RECEIVED - COMMISSION CLERK

Dear Ms. Cole:

Enclosed are an original and twenty-five copies of a revised page 18 of Gulf's recently filed 2011 Ten Year Site Plan (TYSP) pursuant to Rule No. 25-22.071. The revisions are in the introductory paragraph in Chapter II, Section VI, entitled "Conservation Programs". This paragraph addresses the version of Gulf's DSM Plan which was incorporated in the TYSP. No tables or numbers require revisions, just the language included here. Also attached for your convenience, is a redline strikethrough version of revised page 18.

Sincerely,

Terry A. Davis

V. DATA SOURCES

Gulf utilized historical customer, energy and revenue data by rate and class, and historical hourly load data coupled with weather information from The National Oceanic and Atmospheric Administration (NOAA) to support the energy and demand models. Individual customer historical data was utilized in developing projections for Gulf's largest industrial customers.

Gulf's models also utilized economic projections provided by Moody's Analytics, formerly known as Moody's Economy.com, a renowned economic services provider. Moody's relies on the Bureau of Labor Statistics for data on employment, unemployment rate and labor force. Moody's obtains Personal Income data from the Bureau of Economic Analyses. Moody's obtains Population, Households and Housing Permit information from the U.S. Census Bureau.

VI. CONSERVATION PROGRAMS

Gulf's forecast of energy sales and peak demand reflect the continued impacts of energy efficiency and conservation activities, including the impacts of programs proposed by Gulf in its DSM plan, as filed on March 30, 2010 and revised on June 14, 2010 in Docket No. 100154-EG. Gulf's conservation programs were designed to meet the goals established by the Commission in Order No. PSC-09-0855-FOF-EG in December of 2009. Following is a brief description of Gulf's programs and tables indicating the historical and projected conservation impacts of Gulf's ongoing conservation efforts.
