Dear Northeast District ERP Compliance Department

Please see the attached Construction Commencement Notification and proposed schedule of construction as required by Specific Condition #8 of permit 12-0378587-001-EI issued to Gulf Power Company. As shown on the project schedule, mobilization and site preparation of staging areas 3, 4, 5, and 8 is anticipated as early as September 8th. Preparation of the staging areas is necessary in order to receive poles, wires and associated equipment prior to constructing the permitted transmission line.

Gulf Power Company welcomes a meeting with the assigned compliance reviewer at the Department's earliest convenience to discuss the project schedule and permit Special Conditions. I will be the lead for permit and construction compliance so feel free to contact me with any questions or concerns.

Brian Yates
