

Florida Public Service Commission **SPECIAL REPORT**

SEPTEMBER 2003 NO. 12

Application for a Staff-Assisted Rate Case in Pasco County by

Floralino Properties, Inc.

On March 13, 2003, Floralino Properties, Inc. (Floralino or utility) filed an application for a staff-assisted rate case with the Florida Public Service Commission (PSC). Floralino, a water utility operating in Pasco County, provides service to approximately 701 residential customers and 7 general service customers located within the Colonial Manor, Colonial Manor Annex, and Eastwood Acres subdivisions. The utility's service area is located along the east side of US Highway 19 South (approximately 2.9 miles south of Main Street), in New Port Richey.

The current rate case is being processed under the PSC's "Proposed Agency Action" (PAA) procedure. Under the PAA process, the case will not be set for a formal hearing unless a timely protest to the Commission's proposed agency action is filed.

As part of the discovery process, the Commission staff conducts a customer meeting to allow customers the opportunity to provide input into the rate setting process. Customer comments are an integral part of the process and will assist the Commission in reaching its decision.

The utility's records have been audited by PSC staff for compliance with Commission rules and orders. In addition, a PSC staff engineer has conducted a field investigation of the utility's plant and service area. A preliminary review of Floralino's operation expenses, maps, company files, and rate application was also performed to obtain information about the physical plant operating costs and components for rate setting. Staff's preliminary findings are contained in a preliminary staff report dated July 28, 2003.

According to PSC staff's preliminary analysis, average residential consumption is 4,500 gallons per month. At present, the average monthly bill is \$15.27 for residential customers (the existing rates times average consumption). The average monthly bill at staff's preliminary proposed rates is \$18.23. (Note: Although the utility is currently billing bi-monthly, the test

year rates in the staff report have been converted to monthly rates for comparison purposes.)

Information obtained at the customer meeting will be updated to form staff's recommendation to the Commission. PSC staff is scheduled to file its recommendation on October 9, 2003. The Commissioners are expected to vote on this matter at the October 21, 2003, Agenda Conference.

What Is a Staff-Assisted Rate Case?

Many of the water and wastewater utilities located throughout the state are very small and do not have employees with the financial and engineering expertise to develop the minimum filing requirements required for a rate case. Because of their size, it is also not economically feasible for them to hire outside engineers, accountants and attorneys to compile the necessary information without great expense, which may be passed on to customers.

For this reason, the PSC developed a "staff-assisted" rate case program in which small utilities with annual water or wastewater revenues under \$150,000, can request that the PSC staff develop the information for the rate cases. The primary purpose of this type of program is to avoid passing on to the customer, through higher rates, substantial costs of having outside consultants develop rate case data. In a staff-assisted rate case, the PSC staff audits the utility's books and carefully reviews expenditures and operations. PSC engineers and accountants make on-site investigations of the company's operations and service. The PSC staff then prepares an accounting report. After considering the testimony of customers from a customer meeting, a recommendation on rates is prepared and scheduled for a regular Commission Agenda Conference.
