COMPANY PROFILE

Provide a brief narrative company profile which covers the following areas:

- A. Brief company history.
- B. Public services rendered.
- C. Major goals and objectives.
- D. Major operating divisions and functions.
- E. Current and projected growth patterns.
- F. Major transactions having a material effect on operations.

A. Commercial Utilities was organized on April 1, 1974 and received Public Service Commission Certificate 164-S on June 4, 1975. Prior to the existence of Commercial Utilities and PCS certification, water and wastewater treatment was available to land tenants of Grace & Company, Inc. from existing company owned water and wastewater treatment plants. Our utility growth has been determined by normal growth and by a moratorium placed by the City of Jacksonville, FL on the construction of new wastewater treatment facilities. On January 18, 1991, Commercial Utilities began purchasing water from the City of Jacksonville, FL but continued to distribute the water through existing lines. On August 8, 1992 all of the wastewater collecting lines were connected to the Atlee Street wastewater pump station belonging to the City of Jacksonville, FL; however responsibility of the lines and collection of wastewater remains with Commercial Utilities. By order No. PSC-97-94-FOF-WU, the commission acknowledged the exempt status of the water division and cancelled Certificate No. 219-W on January 27, 1997.

B. Wastewater

C. To provide quality wastewater service to the customers within our service area.

D. Commercial Utilities has two persons on premises to take care of line breaks, replacing of valves, etc. Major work is contracted out. Billing and contract functions are performed by two persons.

E. Currently our growth is somewhat static; however, future growth has been permitted. The City of Jacksonville has recently extended their lines into property that we were led to believe was our certified territory.

F. Commercial Utilities proposes to reroute some collection lines to accommodate some land use changes.

CALCULATION OF THE WATER SYSTEM EQUIVALENT RESIDENTIAL CONNECTIONS

Provide a calculation used to determine the value of one water equivalent residential connection (ERC).

Use one of the following methods:

- (a) If actual flow data are available from the preceding 12 months, divide the total annual single family residence (SFR) gallons sold by the average number of single family residence customers for the same period and divide the result by 365 days.
- (b) If no historical flow data are available, use:
 $ERC = (\text{Total SFR gallons sold (Omit 000)} / 365 \text{ days} / 350 \text{ gallons per day})$

ERC Calculation:

CALCULATION OF THE WASTEWATER SYSTEM EQUIVALENT RESIDENTIAL CONNECTIONS

Provide a calculation used to determine the value of one wastewater equivalent residential connection (ERC).

Use one of the following methods:

(a) If actual flow data are available from the preceding 12 months, divide the total annual single family residence (SFR) gallons sold by the average number of single family residence customers for the same period and divide the result by 365 days.

(b) If no historical flow data are available, use:

$$ERC = (\text{Total SFR gallons treated (Omit 000)} / 365 \text{ days} / 280 \text{ gallons per day})$$

For wastewater only utilities:

Subtract all general use and other non residential customer gallons from the total gallons treated.

Divide the remainder (SFR customers) by 365 days to reveal single family residence customer gallons per day.

NOTE: Total gallons treated includes both treated and purchased treatment.
