# SPECIAL REPORT

AUGUST 2006 NO. 8

### Application for a Limited Alternative Rate Increase in Polk County by **Pinecrest Ranches, Inc.**

DOCKET NO. 060416-WU

On July 19, 2006, the Commission officially accepted the application of Pinecrest Ranches, Inc. (Pinecrest or utility) for a limited alternative rate increase. Pinecrest, a water utility operating in Polk County, provides service to approximately 144 customers.

The utility is requesting a rate increase because the existing rates do not provide sufficient revenues to cover the increasing expenses of operations. Pinecrest's last rate increase was in 2003. The current rate case is being processed under the PSC's "Proposed Agency Action" (PAA) procedure.

As part of the process of evaluating Pinecrest's request, the PSC staff conducts a customer meeting to allow customers the opportunity to provide input into the rate setting process. The purpose of this meeting is to give customers and other interested persons an opportunity to offer comments to the Public Service Commission staff regarding the proposed rate increase, and to ask questions and comment on other issues. Customer comments, both written and oral, will be considered by the Commission staff in reviewing this rate case. Staff members will summarize Pinecrest's proposed filing and answer questions to the extent possible. A representative from the utility has also been invited to respond to questions.

Pursuant to Rule 25-30.457, Florida Administrative Code, a Class C utility may petition the Commission for a rate increase of up to 20 percent of service revenues. An engineering or financial audit of the utility's books and records is not required. The utility will hold any revenue increase granted subject to refund with interest for a period of 15 months. To insure overearnings will not occur due to the implementation of the rate increase, the Commission will conduct an earnings review of the utility's annual report for the year the adjustment in rates was implemented. If overearnings occur, such overearnings, up to the amount

held subject to refund, with interest, will be disposed of for the benefit of the customers.

The utility's revenues for the test period are \$40,194, with adjusted operating expenses of \$49,628, resulting in a net operating loss of \$9,434 for the test period. The test period for setting rates is the historical twelve month period ending December 31, 2005.

PSC staff is scheduled to file a recommendation with the Commission on October 12, 2006. The Commissioners are expected to vote on this matter at the October 24, 2006, Agenda Conference.
