RE: Rule 25-6.065 FAC

Mr. Futrell and Ms. Marr:

The City of Blountstown currently does not have any net metered customers. We are working with Florida Municipal Electric Association to develop a net metering policy and standardized interconnection agreement for small customer-owned renewable generation. Currently, the City of Blountstown is looking for a new City Manager and I am filling the position on an interim basis. I am sure that once the City has hired a permanent replacement this will be a priority for them.

Please contact me if you have any questions.

Sincerely,

Traci S. Hall  
Interim City Manager/Finance Director
