Note:

1. The City of Tallahassee electric system has a total of 231 Solar PV Installations, some Solar PV systems do not have a net metering agreement, therefore only 207 PV systems are reported.
2. The total Customer count listed in this table is 225, the actual Customer count is 207, with some entries listed as 0 for KW capacity (dc) and Gross Power Rating (AC) and N/A in the Interconnect Date. This is due to meter changeout during the year, duplicate customer net metering agreements (customer increased the size of their system), and/or the customer removed the system.

NOTE:

1. The total Customer count listed in this table is 225, the actual Customer count is 207, with some entries listed as 0 for KW capacity (dc) and Gross Power Rating (AC) and N/A in the Interconnect Date. This is due to meter changeout during the year, duplicate customer net metering agreements (customer increased the size of their system), and/or the customer removed the system.

NOTE:

1. The total Customer count listed in this table is 225, the actual Customer count is 207, with some entries listed as 0 for KW capacity (dc) and Gross Power Rating (AC) and N/A in the Interconnect Date. This is due to meter changeout during the year, duplicate customer net metering agreements (customer increased the size of their system), and/or the customer removed the system.
