Dear FPSC;

As a year round resident of Florida, ' the Sunshine State' , I look forward to our state being one of the leaders in solar energy use.

I reccommend the FPSC have a dedicated staff looking at what other states and countries are already doing to implement and promote solar energy use; this staff could stay abreast of the latest news on evolving solar technologies too.

I look forward to hearing the policies and programs the FPSC proposes to accelerate solar energy use in our great state.

Sincerely,

Charles Diehl
