**Subject:** Subsidized Solar Energy Companies in Florida  
**Date:** Tuesday, June 23, 2015 4:40:52 PM

---

Florida is a state comprised of many different families however the majority of families here are seniors and the disabled. We do not want our tax dollars subsidizing solar energy companies in Florida while our monthly electric bills are in the hundreds. The majority of people here are on fixed incomes and our tax dollars shouldn't go to help companies startups. These companies should be able to start up on their own and make this industry competitive enough on their own merits.
