Subject: Please stop subsidizing solar at the expense of Floridians
Date: Tuesday, June 23, 2015 5:29:52 PM

The solar industry must stand on their own two feet, allowing them to become more cost competitive and affordable. In the meantime seniors and vulnerable families shouldn't have to subsidize developing programs.

Please be advised that I do not support any policies that will drive up the costs of every Florida household and business. These include any policies that will create subsidies and mandates for high cost rooftop solar systems.

William M. Richardson Sr.
