**MEMORANDUM**

DATE: December 20, 1991

TO: Ray Lee

SUBJECT: CPRS DATA REQUEST

Attached is the report containing the CPRS data you requested. If you have any questions, please call Human Resources on 404-529-0553.

Place a check by each employee name that needs a departmental service record produced. I will return to work on January 2nd and will call you then.

Nancy

C74 000136

LIST CUST SVC DRESSER'S-SERVICE REP'S & MANAGEMENT-EMPLOYEES IN FLORIDA

**MANAGEMENT JOB EVALUATION - FORM 11-C**
**COMPOSITE JOB DESCRIPTION**

COMPANY: SBT DEPT: Network PDN: CE764

TITLE: Asst. Manager TITLE CODE: 0334 H REVIEW: 1988

PAY GRADE: 3 FLSA: A ISSUE DATE: 04-88 REVIEW DATE: 04-91

BRIEF DESCRIPTION: Load balance manager in the CSCC

PARAMETERS: Taskworker - 0 Subordinates.

INCUMBENT'S SIGNATURE Howard T. Adams Jr. APPROVAL (SUPERVISOR'S SIGNATURE) [signature]

DATE: 7/21/88 DATE: 7/27/88

SUMMARY OF JOB RESPONSIBILITIES (BRIEF)

Responsible for ensuring daily successful completion of the district's total installation and maintenance load. Monitors force-to-load balancing and makes adjustments in force assignments as necessary to ensure that a balance between available forces and workload is achieved. Performs analysis on dispatch weights and adjusts the job selection criteria as required to increase or decrease the importance of factors like commitment, travel, priority, etc. Oversees and monitors technician progress on job assignments. Coordinates with field supervisors on technicians' overruns. Oversees and monitors work functions associated with cable failures. Serves as point of contact for predictor administration. Also serves as point of contact for problems involving dispatching, for example, no jobs available, dispatching on future work, questions about job selection, etc. Handles all expedites on appointments for today--service orders and troubles. Additionally, has ultimate responsibility for accurately forecasting on a short term basis future work volume and controlling appointment offering for both installation and maintenance.

Outline of Job Responsibilities (Detail)

60% A. Performs job duties required to effect good force to load balancing thus ensuring completion of the total maintenance and installation load. Following is a

Composite Review Status (CRST)
Request Out-of-Service List (ROSL)

1. Monitors force to load balancing for station and cable activity throughout the day to effect completion of today's load with good service and cost levels.
2. Responsible for movement of field forces to meet load requirements. This will include adjustments in Assigned Group Turf and/or with Supervisor Unit (SU) transaction.
3. Monitors technicians' progress on job tasks and communicates overruns to outside field supervisor.
4. Evaluates overtime requirements to meet customer demands for service.
5. Coordinates customer notification on potential missed appointments (service orders and troubles). Also coordinates proper updating of mechanized system--CORDNET/LMOS.
6. Reviews and evaluates all pending trouble reports for early identification of potential cable failures.
7. Oversees the building of all cable failures.
8. Ensures that all cable failures are dispatched in a timely manner.
9. Monitors progress of all cable failures and ensures that proper testing is done prior to closeout.
10. Serves as point of interface for predictor center in the referral of potential cable failures detected by predictor.
11. Assumes responsibilities of predictor center during out of hours and weekends.
12. Serves as point of contact for other departments for special handling, escalations and/or expedites on service orders/troubles in the load or being requested to be added to the load for today.
13. Point of contact for inside and outside forces for

problems involving dispatching, for example, no job available, receiving future work, etc.

20% B. Appointment Control.

1. Monitors incoming future demand workload for maintenance and installation. This will be achieved by utilizing the following reports:
   Repair Force Administration (RFA)
   IMC/OSS Administrative Report - Load Balance Summary
2. Analyze and evaluate force availability to ensure that adequate field forces are available to meet customers demands for service.
3. Adjust appointment offering in LMOS/MMA for the maintenance load based on force availability.
4. Coordinates adjustment of installation offered appointments via DOE Due Date Screen as required based on load and force availability.

20% C. Oversees and maintains proper priority of dispatching.

1. Review and analyze Dispatch Point Values (DPVAL) to ensure that the Assigned Dispatch Weights (ADW) are performing as expected to allow for job selection based on the District's priority.
2. Revise dispatch priorities as required to ensure that all work items requiring a field visit are dispatched in a timely manner to comply with customers request for service.

Understands and implements the Company's Affirmative Action Program and Policies to a degree and manner in keeping with individual job objectives.

ADDITIONAL DUTIES NOT LISTED ABOVE (DELETIONS WHERE APPROPRIATE)

| COMMITMENTS | FIRST QUARTER | SECOND QUARTER | THIRD QUARTER | FOURTH QUARTER |
|---|---|---|---|---|
| | | | | |

Note: As defined in Paragraphs 1.15, 1.17-Teamwork, and 2.05, some consideration should be given to the extent to which job responsibilities not specifically covered by commitments were fulfilled. The way a subordinate accomplishes his/her commitments should also be reflected in the assignment of the Performance Rating.

These commitments have been agreed upon by the supervisor and subordinate.

| Commitments | First Quarter | Second Quarter | Third Quarter | Fourth Quarter |
|---|---|---|---|---|
| **EEO/AA** | | | | |
| Support BellSouth's commitment to Equal Employment Opportunity (EEO) by: | | | | |
| - Understanding the Corporate EEO and Affirmative Action policies, programs and procedures | OBJECTIVE MET | OBJECTIVE MET | OBJECTIVE MET | OBJECTIVE MET |
| - Helping ensure that the work environment is free of harassment or unlawful discrimination | OBJECTIVE MET | OBJECTIVE MET | OBJECTIVE MET | OBJECTIVE MET |
| - Considering qualified females and minorities for management vacancies, particularly when a departmental imbalance exists. | N/A | N/A | N/A | N/A |
| - Making all non-management employees aware of opportunities for self-development, career enhancement, and future growth in a non-discriminatory manner. | OBJECTIVE MET | OBJECTIVE MET | OBJECTIVE MET | OBJECTIVE MET |
| **Employee Development** | | | | |
| Encourage and support career developmental programs for self and (where applicable) subordinates to include activities aimed at achieving business goals through individual growth. | | | | |
| - Self | ATTENDANCE IN THE "CAN DO" PROGRAM | Self: Developed RFA Form to utilize in managing commitments. | Self: Implementation of RFA. Supported less commitment misses & 90-minute callback to supply to move prod. | Self: Two week relief & observation of outside repair group in Dunnellon, for developmental knowledge of area. |
| - Subordinate | N/A | Subordinate: N/A | craft. Subordinates N/A | |

Note: As defined in Paragraphs 1.024 Significant, 2.022 and 2.023, some consideration should be given to the extent to which job responsibilities not specifically covered by commitments were fulfilled. The way a subordinate accomplishes his/her commitments should also be reflected in the assignment of the Performance Rating.

These commitments have been agreed upon by the supervisor and subordinate.

## Management Performance Rating

| Name | Title | Pay Grade |
|---|---|---|
| Adams, Jr., Howard T. | Assistant Manager-CSCC | 3 |
| **Department** | **Location** | |
| Network | 903 W. University Avenue, Gainesville, FL | |
| **Review Period:** From 01/01/88 To 12/31/88 | | |

**Performance Rating:**

- [X] Major Contribution (MC)
- [ ] Contribution (C)
- [ ] Unsatisfactory Contribution (UC)
- [ ] Not Rated (NR)

**Supervisor's Comments:**

Howard is a highly motivated and dedicated individual. He was instrumental in the smooth consolidation of the Brooksville Turf into the Gainesville CSCC. Without his help the transition would have been a nightmare.

Year In Which Current Potential Rating Was Assigned 1983

Year In Which Current Promotability Rating Was Assigned 1983

REVERSE (11-85)
Page 6 of 6

Note: As defined in Paragraphs 1.024-Significant, 2.022 and 2.023, some consideration should be given to the extent to which jobs responsibilities not specifically covered by commitments were fulfilled. The way a subordinate accomplishes his/her commitments should also be reflected in the assignment of the Performance Rating.

The supervisor and subordinate have reviewed the BellSouth Corporate Strategies and, where appropriate, the above commitments support these strategies. These commitments have been agreed upon by the supervisor and subordinate.

# Management Potential Summary

Private

| Name | Title | Pay Grade |
|---|---|---|
| H. T. Adams | Assistant Manager | 3 |

Period Covered: From: 01-01-83 To: 12-31-83 Rating Scale: 1-Low/5-High

**Dimension** **Ratings**

**1. Oral Communication: Ability to present ideas and information concisely and effectively in an oral presentation to a group.**

Summary Comments: Mr. Adams is often called on to give talks to the craft, and to give presentations to the outside First Level Managers. I have personally observed several of these events and find Mr. Adams to do a good job. He is well prepared, and gives an interesting talk. Mr. Adams maintains eye contact, and leaves the group with a good understanding of the subject matter. — 3

**2. Written Communication: Ability to express ideas and information concisely and effectively in writing.**

Summary Comments: Mr. Adams is the analyst foreman and constantly performs written forms. He also is called on to write letters for his supervisor. These letters are well written, concise, and adequately convey the message. Mr. Adams has a good grasp of the English language and punctuates well. — 3

**3. Flexibility: Ability to change or vary one's approach or strategy for the purpose of accomplishing a task.**

Summary Comments: Day to day activities in the MC environment call for great flexibility. I have never asked Howard to make a change or adjust a policy that he has not shown a willingness to be flexible. I feel that flexibility is one of the most important dimensions and this is Howards strong suit. — 4

**4. Performance Stability: Ability to maintain a consistent level of performance under conditions of stress uncertainty or lack of structure.**

Summary Comments: It is very common when working in the MC to work under a degree of stress. This comes from constant pressure to maintain indice levels constantly working toward a cutoff time, etc. Mr. Adams exhibits no reduced level of performance during situations of this nature. An example would be when Howard was assigned the job of United Wau worker after the original worker became ill. Even faced with diminished time frames he conducted a successful campaign and the Palm Springs District was 100 percent contributors. — 3

## Management Potential Summary

Ratin

5. Decision Making: Ability to make timely and effective decisions on the basis of available information.

Summary Comments: *As the analyst foreman Howard often makes decisions. In most cases Howard's decisions are well thought out and correct. Of more importance Howard shows no reluctance to make a decision when necessary.* — 3

6. Leadership: Ability to influence others to perform a task effectively.

Summary Comments: *I have been in meetings with all of the Maintenance Center foremen and have observed Mr. Adams assume the leadership. When we meet to discuss the Master Schedule and the allocation of personnel to each discipline, Howard is instrumental in leading the group to an equitable conclusion.* — 3

7. Organizing And Planning: Ability to schedule resources and personnel and to develop systematic and effective means for accomplishing a task.

Summary Comments: *The analyst foreman handles all of the Treat Reports, the filing, the analyzing of reports etc. The Palm Springs MC has one of the best organized analizer organizations I have seen. When I ask Howard for a piece of information it is usually at his fingertips.* — 3

8. Inner Work Standards: Extent to which an individual demonstrates a desire to perform at or near the limits of capability most of the time, even when a lesser effort would be acceptable.

Summary Comments: *Often I am required to be out of the MC and when I return I find that Mr. Adams has continued to perform his work and his responsibilities are complete.* — 3

MCCM/SCREEN PROCEDURES
FOR
GAINESVILLE MC

1. QR 12A PROCEDURES (222)

WITH THE IMPLEMENTATION OF GENERIC 4 SOFTWARE, THE HANDLING OF POSSIBLE PSC MISSED APPOINTMENT PROCEDURES HAVE CHANGED. THIS SOFTWARE WILL ELIMINATE THE GUESS WORK AND EXPENSIVE RESEARCH TIME SPENT BY THE CLOSING MAINTENANCE ADMINISTRATOR.

THE FOLLOWING PROCEDURES SHOULD BE IMPLEMENTED AS SOON AS POSSIBLE IN ALL MC'S WITH MECHANIZED SCREENING.

A. REQUEST A JEOPARDY REPORT WITH A MCM COMMAND APPROXIMATELY 15-30 MINUTES BEFORE EACH HOUR AND POPULATE THE "COMBY" (COMMITMENT BY) WITH THE CURRENT DATE AND THE NEXT FULL HOUR. EXAMPLE, REPORT REQ ON 7-1-88 AT 2:30 PM. THE COMMITMENT BY TIME SHOULD BE 7-1-88 0300P.

```
RJR MCM UNIT 121000--CS COMBY 7-1-88  0300P  PRTR X121 REQ BY 000
             123000--

ROPT 8 STAT SCRX10 TSTX20 DSPX50 CLRX95 CLOX125 MSGX0 MCMX0 SABX50

----COMM EXPIRED JEOPARDY 00                          7-1-88 0245P

                                                  REPORTED      COMMITTED
ITN       TELEPHONE  CS  SR  SD  RTE     STAT  DATE  TIME    DATE  TIME
0434830   XXX-XXXX   BUS 0   22  000300  POO   7-1   1000A   7-1   0300P

0434832   XXX-XXXX   BUS 0   22  000128  DPO   7-1   1044A   7-1   0300P

TOTAL 2
```

THIS WILL LIST ALL TELEPHONE NUMBERS THAT WILL BE MISSED APPOINTMENTS AT A FUTURE TIME AND APPOINTMENTS THAT HAVE ALREADY BEEN MISSED.

THE STAT SECTION HAD DELIBERATELY BEEN LEFT BLANK TO INCORPORATE ALL IST CODES. THIS WILL BE IMPORTANT WHEN FIVE NEW IST CODES ARE ADDED TO THE SYSTEM.

B. A DECISION TO START NOTIFYING CUSTOMERS OF POSSIBLE MISSES SHOULD BE MADE DEPENDING ON SEVERAL FACTORS SUCH AS, NUMBER OF POTENTIAL MISSES, TIME LEFT BEFORE COMMITMENT, ETC.

CONTINUED
C7 8000001

C. AFTER THE DECISION HAS BEEN MADE TO START CALLING CUSTOMERS, MANUALLY REQUEST THOSE PARTICULAR TTN'S WHICH QUALIFY FOR THE 222 ENTRY ON THE MSCR MASK. THIS WILL DISPLAY ANY NEEDED INFORMATION SUCH AS NAME, SPECIFIC INSTRUCTION, CAN BE REACHED NUMBER, ETC. ALSO MAKE SURE THAT THE TROUBLE IS STILL PENDING DISPATCH.

D. AFTER THE CUSTOMER HAS BEEN CONTACTED, OR THE ATTEMPT WAS MADE, AN ADDITIONAL LINE OF STATUS MUST BE IMPUT. THE WP (WORK PERFORMED) SHOULD BE "0" THE 1ST SHOULD REMAIN THE SAME AND THE RTE SHOULD BE CHANGED TO 302. THE ROUTE CODE IS BEING CHANGED TO INDICATE ON FUTURE JEOPARDIES THAT THIS CUSTOMER HAS BEEN CONTACTED.

THE NEXT ENTRY WILL BE THE TIME. WE ARE SUGGESTING THAT YOU BACK THE TIME UP ONE MINUTE. THIS WILL MAKE SURE THAT SOMEONE HAS NOT JUST DISPATCHED THE REPORT WHILE YOU WERE HANDLING IT.

THE 222 ENTRY MUST BE PLACED IN THE FL3 FIELD. THE LAST ENTRY WILL BE THE NARRATIVE. IT IS VERY IMPORTANT TO BRING FORWARD ANY NECESSARY NARRATIVE THAT SHOULD BE SAVED. EXAMPLE: R GRD/222 MS. JONES 7-1 255 P 000.

AFTER THIS PROCEDURE HAS BEEN COMPLETED, THE 222 WILL NOT BE DISPLAYED ON ANY JEOPARDY OR DISP MASK BUT WILL BE DOWN LOADED TO THE PROPER LMOS FIELD.

ONCE THE TROUBLE IS RECOMMITTED WITH THE CUSTOMER, A SUBSEQUENT CATEGORY "CD" SHOULD BE ENTERED INTO THE SYSTEM UPDATING MAPPER. A COMMITMENT CHANGE MAY BE REQUIRED IF THE CUSTOMER REQUESTS A SPECIAL TIME OR DATE APPPOINTMENT. WHEN THIS OCCURS, THE MC PERSONNEL SHOULD MAKE A SUBSEQUENT REPORT WITH A "CD" CATEGORY. USING THE A (AFTER) AND B (BEFORE) TIME FIELDS WILL HELP ENSURE THE TROUBLE WILL BE RELEASED AT THE PROPER TIME TO REDUCE THE CHANCE OF EARLY DISPATCH AND SUBSEQUENT NO ACCESS.

2. MA STATUSING OFF LOAD
   ALL MA'S, ONCE THEY HAVE UTILIZED THE MSCR MASK TO PERFORM A FUNCTION (SCREEN, PAC, SUB, ETC.), WILL BE SHOWN AUTOMATICALLY AS LOGGED ON. THE MA MUST LOG OFF FOR THE FOLLOWING REASONS:

   A. BREAKS
   B. LUNCH
   C. ANY SPECIAL ASSIGNMENT OVER 15 MINUTES
   D. END OF WORK DAY

CONTINUED

C7 8000003

IN ORDER FOR AN MA TO BE CAPABLE OF SIGNING OFF, THE MSCR MASK MUST HAVE A TROUBLE DISPLAYED ON IT. THIS IS THE ONLY TIME THE RETURN FIELD IS DISPLAYED. IF AN MA IS ATTEMPTING TO SIGN-OFF AND HE/SHE DOES NOT HAVE A TROUBLE ON THE MSCR MASK, IT IS RECOMMENDED THAT A TROUBLE STATUSED PENDING DISPATCH POO IN THE SELECT STATUS FIELD. OFF IS THEN PLACED IN THE RETURN FIELD CAUSING THE TROUBLE TO BE PLACED BACK IN THE DISPATCH POOL AND THE MA BEING SHOWN OFF.

3. MA USE OF DESK

REPORTS ARE PLACED ON DESK (DSK) BY PLACING "DSK" IN THE RETURN FIELD OF THE MSCR MASK. THE FOLLOWING GUIDELINES ARE ESTABLISHED GOVERNING DESK:

A. ANY TROUBLE PLACED ON DESK PRIOR TO 1200PM SHOULD BE REMOVED PRIOR TO 1200PM.

B. ANY TROUBLE PLACED ON DESK PRIOR TO 500PM SHOULD BE REMOVED PRIOR TO 500PM.

C. ANY TROUBLES SHOULD BE REMOVED FROM DESK A MINIMUM OF 2 HOURS PRIOR TO THE COMMITMENT.

D. A SUPERVISOR SHOULD BE NOTIFIED IF ANY OF THE ABOVE GUIDE LINES CANNOT BE FOLLOWED.

4. SERVICE ORDER PROCESSING

DURING SCHOOL RUSH

A. CRSAB GENERATED: TROUBLES RECEIVED FROM THE CRSAB WILL FIRST BE CHECKED ON DLR TO SEE IF S.O. DOWN LOADED AND IF NOT THEN ROUTED TO THE "SO POOL" VIA THE SERV ORD HANDLING FIELD OR BY STATUSING A D-111-100 BY THE SCREENER SHOULD A SERVICE ORDER RELATED TROUBLE APPEAR ON THEIR SCREEN. THE MA RESPONSIBLE FOR THE "SO" FILE WILL THEN SCREEN THESE TROUBLES VIA THE MSCR MASK PLACING S.O. IN THE SELECT STATUS FIELD PERFORMING THE RTE TRANSACTION PLACING IT PROPERLY IN THE DISPATCH POOL.

NORMAL CONDITIONS

B. WILL BE HANDLED AS USUAL BY THE MA'S SCREENING

C. MC GENERATED - S ROUTE: ONCE IT HAS BEEN IDENTIFIED AN "S" ROUTED SERVICE ORDER REQUIRES A DISPATCH, THIS INFORMATION WILL BE GIVEN TO THE ICC PERSON RESPONSIBLE FOR INPUTTING THE TROUBLE INTO LMOS VIA ITE CHANGING "S" ROUTE TO "R" ROUTE.

ONCE THESE STEPS HAVE BEEN PERFORMED, THE TROUBLE WILL AUTOMATICALLY DROP INTO THE POOL FOR DISPATCH.

5. FUTURE DATE REQUESTED

TROUBLES RECOGNIZED AS FUTURE DATES REQUESTED BY THE CRSAB WILL BE AUTOMATICALLY STATUSED AS "PDO" (0630) BY AUTOMATED SCREENER. ONCE THE TROUBLE IS STATUSED AS "PDO" : A DETERMINATION MUST BE MADE TO WAIT UNTIL THE COMMITMENT DATE OR DISPATCH EARLY.

A. WAIT UNTIL COMMITMENT DATE: TROUBLE WILL BE STATUSED AS "NAO" (1-103-399) PLACING THE PROPER NARRATIVE.

B. DISPATCH EARLY: IF THE DETERMINATION IS MADE THAT THE TROUBLE MAY NOT REQUIRE ACCESS AND AN EARLY DISPATCH MAY CORRECT THE PROBLEM, IT SHOULD BE STATUSED AS "PDO" (1-032 300). IF, UPON DISPATCH, THE PROBLEM IS NOT CORRECTED DUE TO ACCESS BEING NEEDED, THE TROUBLE WILL BE STATUSED AS "NAO" (0-103-399) PLACING THE PROPER NARRATIVE.

PRIOR TO ROUTING FOR THE NEXT DAY, THE RMAR JEOPARDY WILL BE REQUESTED AND THOSE TROUBLES STATUSED "NAO" AND COMMITTED FOR THE NEXT DAY WILL BE STATUSED "PDO" (0-032-300) ENSURING THE NARRATIVE SHOWN IS ALSO PLACED.

6. PAC FILE

THE PAC FILE WILL BE MONITORED BY A DESIGNATED MA. ONCE A TROUBLE IS PLACED IN THE PAC FILE, THIS MA WILL BE RESPONSIBLE FOR THEIR MONITORING. TROUBLES WHOSE COMMITMENT IS ABOUT TO BE MISSED WILL BE HANDLED APPROPRIATELY. THIS WILL BE ACCOMPLISED UTILIZING THE "RCMD" COMMAND AND THE "OMO" OPTION.

CONTINUED

C? 8000004

7. CENTRAL OFFICE REFERRALS

A. UPON RECEIPT OF THE TROUBLE: ONCE IT IS DETERMINED A TROUBLE IS TO BE DISPATCHED DIRECTLY TO THE C.O., A SAB TRANSACTION WILL BE MADE:

EXAMPLE: (450)
TTN:XXXXXXX UNIT#31100000
NARRATIVE: APPLICABLE NARRATIVE TO CORRECT CENTER SSC

(457)
TTN:XXXXXXX UNIT#31200000
NARRATIVE: APPLICABLE NARRATIVE TO CORRECT CENTER SSC

B. ISOLATED TO C.O. BY OUTSIDE TECHNICIAN:

SHOULD A TROUBLE BE DISPATCHED OUT TO A TECHNICIAN AND ISOLATED TO THE C.O. HE/SHE WILL CONVEY THIS INFORMATION TO AN MA. THROUGH THE "CAT" BY STATUSING THE TROUBLE AS PDI WHICH WILL APPEAR ON MA'S SCREEN TO OPI AND SAB.

ALL TROUBLES FOUND AS OPEN IN THE C.O. WILL BE STATUSED 1-031-459 THEN 3-061-459 WITH A NARRATIVE OF "OPEN IN REF'D TO FRAME ATTENDANTS NAME". A CALL TO THE FRAME WILL BE MADE BY THE MA TO RELAY INFORMATION ON CUSTOMER TROUBLE REPORT.

8. SPECIAL CIRCUITS

TROUBLES RECEIVED ON SPECIAL CIRCUITS WILL BE AUTOMATICALLY DRIVEN TO A STATUS CODE OF PDT (010) VIA THE CLASS OF SERVICE (CSX) RULES. SHOULD ANY TROUBLES BE RECEIVED AND NOT HANDLED AS MENTIONED ABOVE AND RECOGNIZED BY THE SCREENERS, THEY SHOULD BE STATUSED AS PDT (0-010-100).

THOSE MA'S RESPONSIBLE FOR SCREENING "SPECIALS" WILL ACCESS THIS POOL VIA THE MSCR PLACING "CIR" IN THE SELECT STATUS FIELD. THIS WILL DISPLAY ALL TROUBLES STATUSED AS PFT (010).

9. C.O. FAILURES

WITH THE IMPLEMENTATION, THE HANDLING FIELD OF "OEF" ALL TROUBLES IDENTIFIED BY THE CRSAB WILL BE AUTOMATICALLY STATUSED AS "OEF" (025) THIS STATUS WILL NORMALLY BE MONITORED BY THE MA'S RESPONSIBLE FOR THE PAC FILE. SHOULD AN OFFICE FAILURE OCCUR, AN MA WILL BE DESIGNATED TO MONITOR THE OEF JEOPARDY.

CONTINUED

10. CABLE LOCATES

CABLE LOCATES ARE STATUSED AUTOMATICALLY AS "BKO" (104) VIA THE REGULAR RULES. SHOULD ANY APPEAR FOR SCREENING, THE NA SHOULD STATUS THE LOCATE AS "BKO" AND RBOR A COPY TO THE PRINTER UTILIZED BY THE NA RESPONSIBLE FOR LOCATES. THE NSCR MASK SHOULD BE UTILIZED FOR DISPATCHING AND CLOSING OUT THE LOCATE.

11. SUBSEQUENTS

SUBSEQUENT REPORTS WILL BE REVIEWED VIA THE NSCR MASK, PLACING "SUB" IN THE SELECT STATUS FIELD. THIS WILL BE ACCOMPLISHED BY DESIGNATED NA RESPONSIBLE FOR MONITORING THE "SUB" FILE. SUBSEQUENTS SHOULD BE HANDLED AS FOLLOWS:

A. NO ACTION NEEDED: IF NO ACTION IS DEEMED NECESSARY, A "NXT" IS PLACED IN THE RETURN FIELD, WHICH WILL CAUSE THE SUBSEQUENT TO BE TRASHED.

B. ACTION REQUIRED: IF ACTION IS REQUIRED (I.E. NAS-ACCESS RECEIVED) THE REPORT SHOULD BE STATUSED TO THE PROPER STATUS CODE (032).

12. INTERNAL LOAD CONTROL

SOME NA'S WILL BE ASSIGNED SPECIALIZED JOBS (I.E., LOCATES, THROWS, ETC.) AND SOME NA'S WILL BE PRIMARY SCREENERS. THE REMAINDER OF THE NA'S WILL BE FLEXIBLE BETWEEN SCREENERS AND DISPATCHERS.

MEMORANDUM

TO: RALPH MILLS
SHIRLEY PERRING
CHRIS PHILLIPS

FROM: CHERIE CALVERT

RE: USE OF 430 CAUSE CODE

ATTACHED IS A PRINT OUT OF YOUR ORGANIZATION'S USE OF CODE 430 FOR THE PERIOD OF OCTOBER 10th THROUGH OCTOBER 17th.

AS DISCUSSED, THIS CODE WAS TO BE USED ONLY WHEN APPLICABLE DURING THE EXCESSIVE RAINY PERIOD WE EXPERIENCED AND SHOULD HAVE BEEN MONITORED CLOSELY, TO AVOID ABUSE AND IMPROPER CODING.

WE HAVE VERIFIED THAT THE PSC RULE FOR OOS OVER 24 HOURS (BASE) WILL INCLUDE ANY TROUBLES THAT WERE CLEARED WITHIN THE OBJECTIVE, DESPITE THE USE OF THE CODE. HOWEVER, IF THE INTERVAL IS MISSED AND THE CODE IS APPLICABLE, THE MISS WILL BE EXCLUDED FROM THE RULE AND FROM THE BASE. I HOPE THIS CLEARS UP ANY MISUNDERSTANDING ON THE AFFECTS THE USE OF THIS CODE HAS ON OUR RESULTS.

THE REPORT REFLECTS ONLY THOSE REPORTS TAKEN THROUGH OCTOBER 17th, AS WE SHOULD HAVE HAD LITTLE NEED TO USE THIS CODE BEYOND THIS DATE.

IF YOU HAVE ANY QUESTIONS, PLEASE DO NOT HESITATE TO CONTACT ME.

THANKS,

Cherie

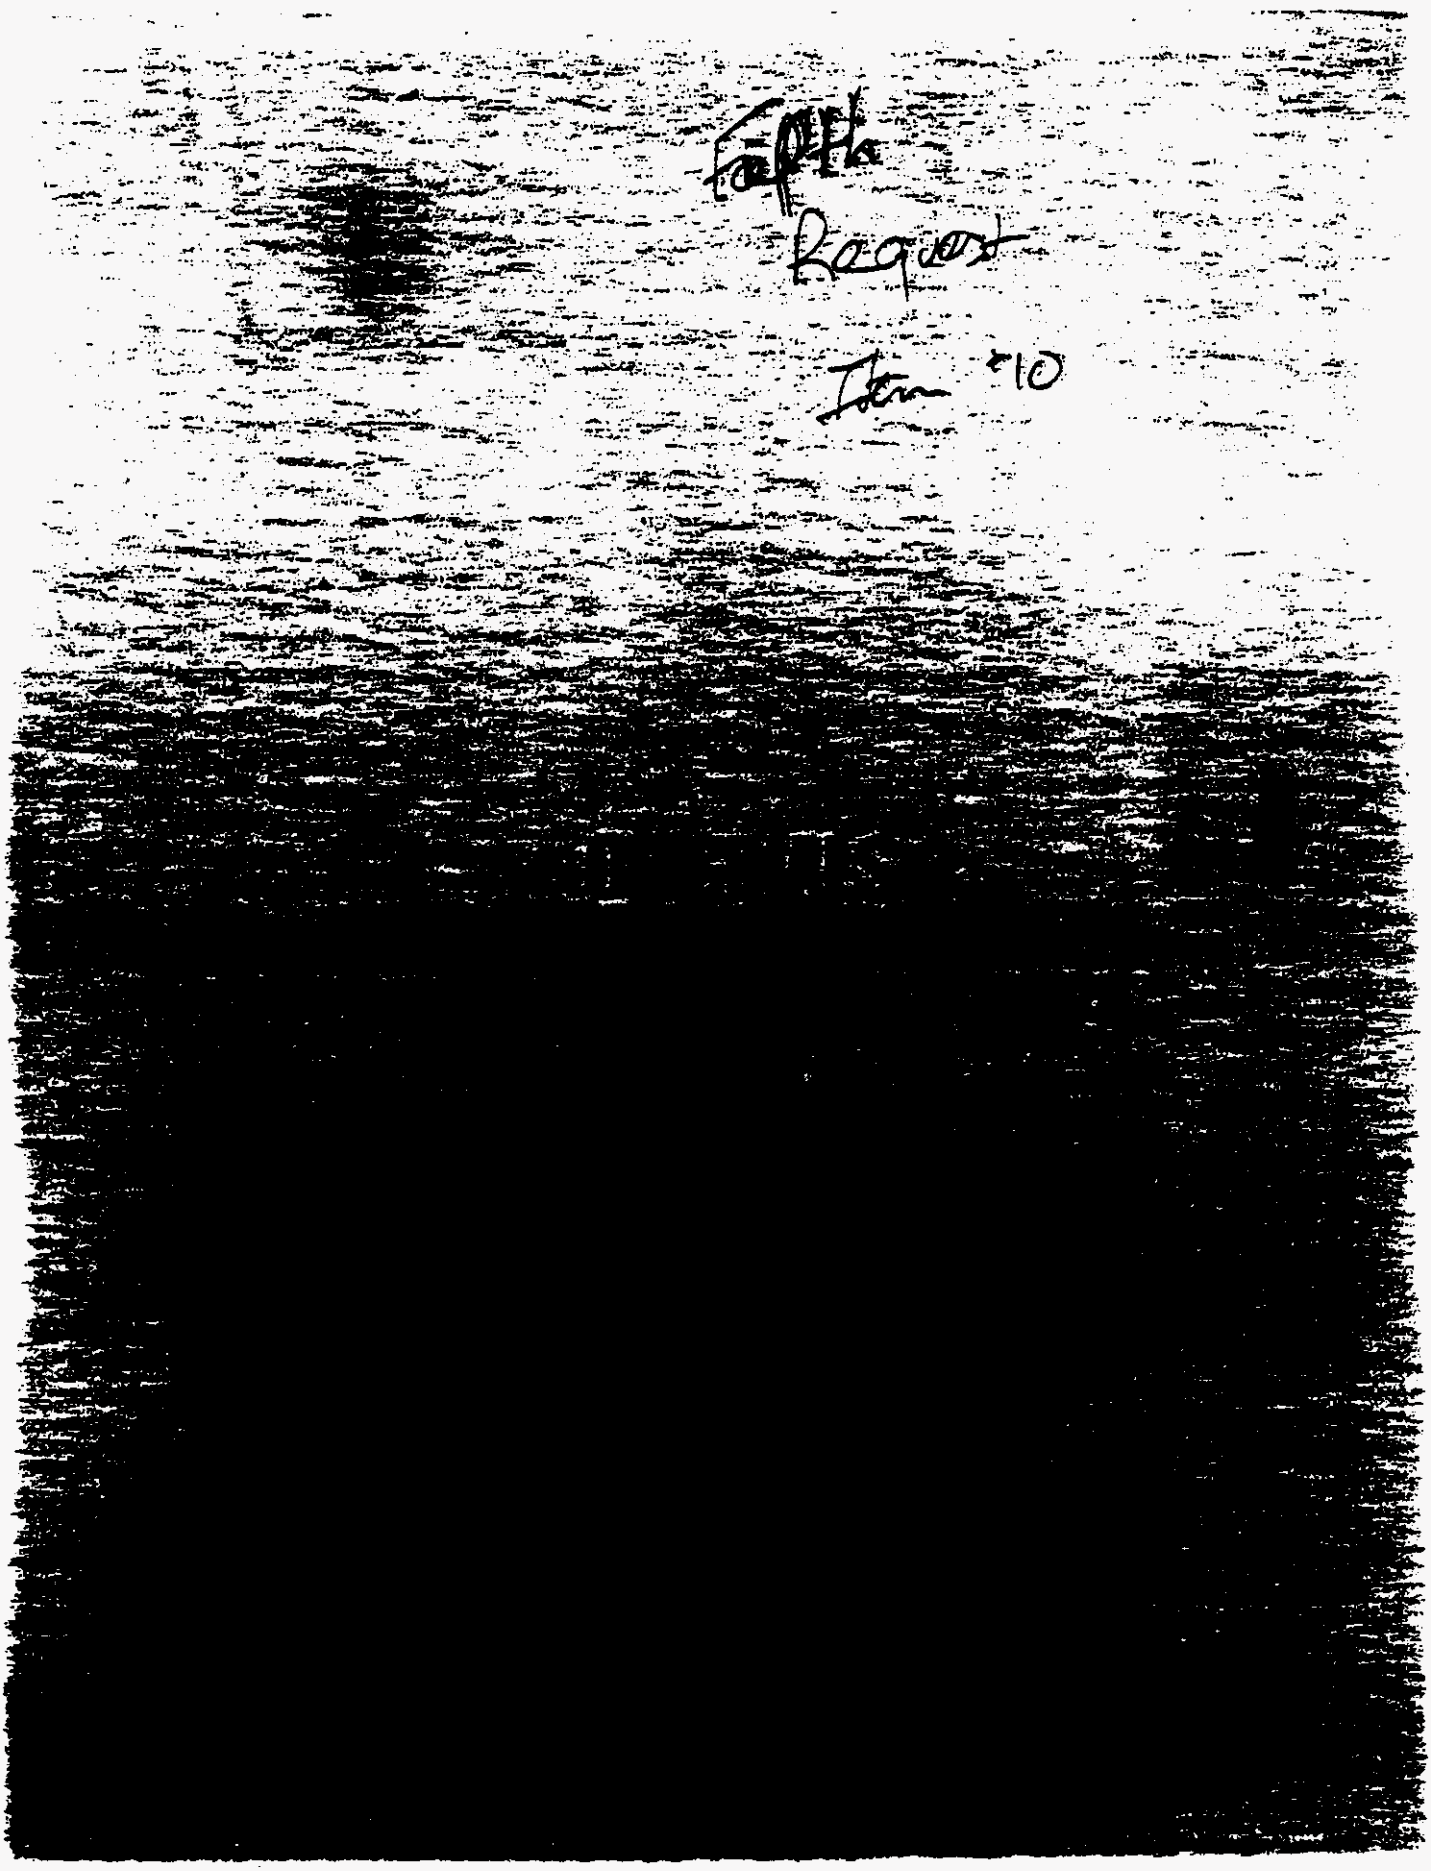
Re: Southern Bell/Request for Production of Documents dated October 30, 1991 (Third Response)

Dear Mr. Hoag:

Southern Bell responds to the Request for Production of Documents dated October 30, 1991 ("Fifth Request for Production") as follows:



Item 1. Documents relating to the ability and/or inability of the company to comply with PSC Rule 25-4.70 and/or PSC Rule 25-4.770 since the inception of each respective rule are being produced herewith. Be advised that investigation continues to determine whether there are additional responsive documents. (Bates Nos. C7 1000000 - C7 1005284).

Item 10. Documents regarding the development and/or implementation of Bell System Practice 660-169-012SV dated December, 1987, referred to in a memorandum dated February 1, 1988, from Operations Manager T.C. Taylor are being produced herewith.

Sincerely,

George T. Yoss

Re: Out of Service Classification of Customer Reports

This is to advise that the Staff has been successful in getting BellSouth to change the practice relative to Out of Service classification. The attached new practice 660-169-012SV dated December, 1987 Paragraph 3.06 advised:

> "The point of determination of Out-of-Service may be one of two ways. Auto Screen rules will be built to automatically score predicated on an obvious Type code in conjunction with an MLT test Verification code that reasonable assures an Out-of-Service condition. Troubles that do not fall within these guidelines will be tested/analyzed by Maintenance Center personnel, who will determine if Out of Service should be statused."

As you are aware currently Service Technicians are required to populate either Service Affecting or Out of Service scripts in the Computer Access System. BellSouth has been contacted and is in the process of deleting this requirement and thus a Field Technician will no longer be able to make this determination. The test, either through Auto Screen or Mechanized Screen, utilized by a Maintenance Administrator will be the only mode of determining an Out of Service condition.

Needless to say, the accuracy and correct classification is paramount. In those instances where MLT fails to test a circuit and subsequent efforts by the Maintenance Administrator in contacting the customer are unsuccessful and the reported condition indicates an Out of Service these reports must be classified and appropriately appointed as Out of Service.

It is felt that this rule change is consistent with Public Service Commission requirements and will more accurately measure the Company's performance in this area.

Should you have any questions regarding this matter, please call me at (904) 350-3586.

C7 10-000000

A change of appointment time for Company reasons to a time later than originally given the customer shall be considered a Missed Appointment. If a technician arrives at a premises to clear a trouble in time to meet the promised appointment and the only reason the trouble cannot be cleared is the inability to obtain access, then, providing a No Access Notification Card is left, a Missed Appointment should not be scored. A notation of No Access along with the date and time of the No Access and the Intermediate Status code of NAS (070) – No Access Subscriber should be entered on the Enter Status (EST) mask for verification purposes.

NOTE: An Intermediate Status of NAS (070) entered prior to the appointment time will prevent the scoring of a Missed Appointment. However, an Intermediate Status of NAO (103) – No Access Other entered prior to the appointment time will not prevent the scoring of a Missed Appointment.

3.02 "I" Report (Report Following Service Order Activity): MTAS will identify a customer trouble report as an "I" report when there has been service order activity (excluding "Record (R)" orders) on the line within 30 days. It will not identify a customer trouble report as an "I" report if a previous customer trouble report has been received on this line since the service order activity.

3.03 "R" Report (Repeated Report): MTAS will identify a customer trouble report as an "R" report when there has been a customer trouble report on the same line (telephone number) within a 30 day period of the received date of a previous report on the same line. If the report is initially scored as an "I" report or the previous report was closed to disposition code 12XX or 13XX, it will not be scored as an "R" report.

3.04 For the official E-2700, MTAS will score Repeated Report results for all classes of service.

3.05 Dispatched: MTAS will identify a dispatched out customer trouble report when the number 4 is entered in the Work Performed (WP) field of the Enter Status (EST) mask. Only one dispatched out will be scored for E-2700 purposes, regardless of the number of times the number 4 is entered in the Work Performed field. In cases where more than one outside technician is assigned to clear trouble resulting from a common cause, only one dispatch is scored. For example:

(a) Regardless of the number of trouble reports generated from one case of cable trouble, one WP Code 4 should be entered in the EST mask of the first report.

* 3.06 "OOS" Out of Service: An Out of Service will automatically be scored when the number 1 or 2 is entered in the Work Performed (WP) field of the Enter Status (EST) mask, and the number 1 is the first numeral entered in the Results (RSLT) Field. Also, a report is scored as an Out of Service when the Out of Service (OOS) field in the EST transaction is populated with a "Y".

A trouble should be entered as an Out of Service status when it is determined that any of the following conditions exist:

(a) The test results indicate an Out of Service condition.

(b) The customer has lost the ability to either originate or receive calls from a premises or location such as a residence, place of business, or office location. The existence of either condition constitutes an Out of Service.

(c) Blockage of the coin entrance, or any other condition associated with the coin deposit mechanism, preventing calls from being made.

(d) Inability to return coins.

C7 10-000001

The point of determination of Out-of-Service may be one of two ways. Auto Screen rules will be built to automatically score predicated on an obvious Type code in conjunction with an MLT test Verification code that reasonably assures an Out-of-Service condition. Troubles that do not fall within these guidelines will be tested/analyzed by Maintenance Center personnel, who will determine if Out of Service should be assigned.

3.07 At the time a report is determined to represent an Out of Service condition and processed according to paragraph 3.06, that report is officially scored as an Out of Service report. There is the capability in LMOS to re-enter these reports to a Non-Out of Service condition for purposes of administration; however, the report is still passed to MTAS as OOS. If the report is initially entered as status with a service affecting test result code and subsequently re-entered with an Out of Service status, the report is scored by MTAS as OOS.

3.08 Carried Over: MTAS identifies all customer trouble reports as Carried Over when the customer trouble report is not cleared by 12 midnight of the same day it is received, except when Intermediate Status (IST) code 106 (Carried Over No) is present. The IST 106 should only be used for reports on which the customer requests a future dated appointment.

3.09 No Access: MTAS identifies a customer trouble report as No Access when the Intermediate Status (IST) code 070 (No Access Subscriber) is entered in the IST field of the Enter Status (EST) mask. This IST code should only be used whenever a dispatch is made and the employee is unable to repair the trouble condition due to the inability to obtain access.

NOTE: MTAS WILL NOT identify a customer trouble report as No Access when the Intermediate Status (IST) code 103 (No Access Other) is entered.

The capability of stopping and starting the LMOS/MTAS duration clock with the WP code of 8 and 9 and the IST code 121 and 122 does not change the procedures associated with a No Access. For example, the 070 IST code should only be used in conjunction with stopping and starting the clock if a dispatch is made. Also, stopping and restarting the LMOS/MTAS duration clock has no effect on the scoring of Missed Appointments. It only allows you to exclude the duration time interval between WP 8 and WP 9 from the total duration time and any other affected durations. (Note: Stopping and starting the LMOS/MTAS duration clock is applicable in South Central Bell and not applicable in Southen Bell.)

There are only two conditions under which the clock should be stopped. They are:

Circuit No Access: This occurs where further testing or sectionalization would render the circuit inoperative and the subscriber denies or is unavailable to grant such access until a later time. This includes those instances when the customer submits a future dated appointment request.

In cases where the trouble is cleared but the subscriber is unavailable to accept the service, standard status entries for cleared-customer not advised (CNA) will apply.

Station/Protector/NI No Access: This occurs when tests and trouble isolation indicate that no further trouble clearance can be performed without access to the station, protector, Network Interface or without the dispatch of an employee of the subscriber (e.g., burglar alarm, microwave tower, radio transmitter, etc.) and that access or dispatch is denied by the subscriber or access is denied by the end user.

Under no circumstances should the clock be stopped for company reasons. In addition, each Work Performed Code entry made to stop and start the clock must be accompanied by appropriate Intermediate Status Code and a narrative entry giving the reason.

3.10 This practice has so far discussed all Customer Service Quality Indicators except three. The three remaining indicators are a combination of more than one item. They are:

(1) OOS - Carried Over - Less Than 24 Hours: These are customer trouble reports identified as:

(a) Out of Service

(b) Carried Over

(c) Received to cleared time is less than or equal to 24 hours

(2) OOS - Carried Over - Greater Than 24 Hours: These are customer trouble reports identified as:

(a) Out of Service

(b) Carried Over

(c) Received to cleared time is greater than 24 hours

(3) OOS - Carried Over - Greater Than 48 Hours: These are customer trouble reports identified as:

(a) Out of Service

(b) Carried Over

(c) Received to cleared time is greater than 48 hours

3.11 Subsequent Report: A Subsequent Report is a customer contact relating to a previously reported trouble which occurs prior to the time the initial or first customer trouble report has been cleared. Although these reports are not counted for measurement purposes, MTAS recognizes particular LMOS subsequents as original reports and consequently are scored as an original report. For example, an Employee-Originated (EO) report is generated in LMOS and prior to clearing the trouble a customer contacts the Centralized Repair Service Attendant Bureau (CRSAB) and reports a trouble condition. The CRSAB would initiate a Customer Subsequent Report and it would be scored by MTAS as an original report as opposed to a subsequent report.

Mr. G.W. Fortner
Assistant Vice-President
Network Operations

Dear Sir:

The attached correspondence addresses some of the problems we have encountered with Out-of-Service statusing. We have addressed the criteria for determining Out-of-Service as it exists in the current pratice and have offered what we feel would be a solution by modifying the pratice.

Should you have any questions, or require further information, please contact us.

Yours truly,

T.C. Taylor

C7 10-000004

Southern Bell

November 16, 1987

Mr. D. King
Assistant Vice-President
Network Operations and Systems

Dear Sir:

Recently there has been much concern regarding the accuracy of statusing customer trouble reports Out-of-Service. Since the implementation of the Computer Access System, we have experienced an increase in our out-of-service statusing. Additionally, there has been an even greater increase in the number of troubles out-of-service carried over 24 hours. The flow thru system will place more emphasis on an Out-of-Service trouble as opposed to a Service Affecting trouble. Needless to say, the sooner a trouble is scored Out-of-Service the better chance it has to become a priority in Mapper.

The current practice (660-169-012SV) we are operating within states the following guidelines for Out-of-Service statusing:

The point of determination of Out-of-Service may be when the report is tested, or in the close-out procedure itself depending upon the situation.

We have been experiencing many errors and misunderstanding by the Outside Technicians scoring Out-of-Service in the CAT environment when they are closing out troubles. We would like to recommend the following changes be made to the practice:

The point of determination of Out-of-Service may be one of two ways. Auto Screen rules will be built to automatically score predicated on an obvious Type code in conjunction with an MLT test ver code that reasonably assures an Out-of-Service condition. Troubles that do not fall within these guidelines will be tested/analyzed by a Maintenance Administrator who will determine if Out-of-Service should be statused.

Considering the CRSAB offers Service Affecting or Out-of-Service commitments upfront, it seems only logical that we should attempt to also status upfront whenever possible. This would help to ensure the proper priority be placed on each trouble quickly and that priority would agree with the appointment given the customer.

Should you have any questions, or require further information, please contact us.

Yours truly,

G. W. Fortner
Assistant Vice President
Network Operations
