FLORIDA PUBLIC SERVICE COMMISSION

In the Matter of	**DOCKET NO. 950495-WS**
Application for a rate increase and increase in service availability charges by SOUTHERN STATES UTILITIES, INC. for Orange-Osceola Utilities, Inc. in Osceola County, and in Bradford, Brevard, Charlotte, Citrus, Clay, Collier, Duval, Hernando, Highlands, Hillsborough, Lake, Lee, Marion, Martin, Nassau, Orange, Osceola, Pasco, Polk, Putnam, Seminole, St. Johns, St. Lucie, Volusia and Washington Counties.	

PROCEEDINGS: **SANFORD SERVICE HEARING**

BEFORE: CHAIRMAN SUSAN F. CLARK
COMMISSIONER J. TERRY DEASON
COMMISSIONER JULIA L. JOHNSON
COMMISSIONER DIANE K. KIESLING
COMMISSIONER JOE GARCIA

DATE: **Tuesday, January 30, 1996**

TIME: Commenced at 10:00 a.m.
Concluded at 12:50 p.m.

PLACE: Sanford Civic Center
401 E. Seminole Boulevard
Sanford, Florida

REPORTED BY: JOY KELLY, CSR, RPR

P R O C E E D I N G S

(Hearing convened at 10:00 a.m.)

CHAIRMAN CLARK: Ladies and gentlemen we're ready to call the hearing to order.

Ms. O'Sullivan, will you please read the notice.

MS. O'SULLIVAN: Pursuant to notice this time and place has been set for a customer service hearing in Docket No. 950495-WS, application for a rate increase and increase in service availability charges by Southern States Utilities, Incorporated.

CHAIRMAN CLARK: We'll take appearances. Starting with you, Mr. Shreve.

MR. SHREVE: Jack Shreve and Charlie Beck, Office of the Public Counsel, representing the Citizens of the State of Florida and specifically in this case the customers of Southern States Utilities in opposition to any rate increase.

MR. FEIL: Matthew Feil, 1000 Color Place, Apopka, Florida, on behalf of Southern States Utilities, Inc.

MS. O'SULLIVAN: Maggi O'Sullivan on behalf of the Commission Staff.

CHAIRMAN CLARK: Good morning. My name is Susan Clark. I'm the Chairman of the Public Service

Commission. With me today is Commissioner Deason, who is on my right. Next to him is Commissioner Diane Kiesling, and on my left is Commissioner Julia Johnson.

The purpose of this hearing today is to hear from you, the ratepayers of Southern States Utilities. We're interested in hearing about the quality of service you receive for this Company and your comments on the requested rate increase.

To give you a little background, this case began with Southern States filing a petition asking for a rate increase. Along with that petition they filed numerous documents in support of their need for a rate increase. They filed accounting data, financial data, engineering data and rate data to demonstrate, according to their thinking, the need for the rate increase.

A rate case takes approximately eight months to process. During that eight months we hold numerous customer hearings. This is one of those customer hearings. Then beginning on April 29th in Tallahassee we will have what is called a technical hearing. That is scheduled to last about two weeks. During that time we take testimony from experts, both from the Utility and from intervenors regarding their request

for a rate increase.

As I said, this began when Southern States filed their application for an increase in water and wastewater rates. They have requested a two-tier uniform water rate along with a uniform wastewater rate. They have requested a final rate increase of up to 45.9% for water, and 30.21% for wastewater. They have also requested an interim rate increase. On January 4th we voted to give them a partial interim rate increase. That increase is subject to refund after we go through this whole process and hear from them regarding their justification for the rate increase.

As I indicated, we do have intervenors in this case. Mr. Shreve is one of those intervenors. We also have a Mr. Mike Twomey who is not here today who has intervened on behalf of several homeowners associations.

As part of these service hearings we have allowed opening statements. We allow them to take five minutes to explain -- for the Utility to explain their need for the rate increase, and for Mr. Shreve to present his views about the rate increase.

After that, I will swear in everyone who has signed up to testify. We'll do it all together. Then

Mr. Shreve will call your name as you have signed in. The first people to sign in will be called first. If you do not wish to testify, but you wish to make comments regarding this case, on the back of the sheet that was handed out to you is a place to make your comments and you could mail it into the Public Service Commission.

In addition, we have numerous Staff people here today who can assist you. If you would rather ask them questions not in a public forum, they are here to help you and let me introduce them to you.

There's Marshall Willis right here on the end. He's our bureau chief of our Economic Regulation Bureau in our Division of Water and Wastewater. Next is Ms. Maggi O'Sullivan, who is one of our attorneys working on this case. Next to her is Mr. Troy Rendell. He's a rate supervisor, and next to him is Mr. Stan Rieger who is an engineer in our Water and Wastewater Division. I should also point out in the back are Ms. Sandy Simmons who is with our clerk's office and Ms. Margaret Ring who is with our Consumer Information Division. Also our court reporter today is Joy Kelly. The Staff is here to help you. Please feel free to ask them any questions you may have about this case or about the Commission.

At this time I would like to give the Company and Mr. Shreve an opportunity to give five-minute presentations.

MR. FEIL: Thank you, Commissioner. My name is Matthew Feil. I'm here on behalf of Southern States Utilities, Inc.

Southern States filed this rate case now under consideration because it is not able to earn a reasonable profit from the rates in effect prior to this case being filed. Since SSU's last consolidated rate case, SSU invested and will invest additional $100 million in utility plant. Since SSU's last consolidated rate case was based on 1991 information, none of those additional investments, roughly $20 million a year, were considered in the last case.

SSU submitted information in this case showing that in 1994 SSU earned less than 3% of a return on its investment. Because of the plant additions I just mentioned, that return will diminish in 1995 and 1996 and SSU will lose money. Despite those poor returns, however, SSU has continued to invest additional funds in plant investment, primarily because SSU is required to do so by the Department of Environmental Protection, EPA, Water Management District and other governmental agencies, rules,

regulations, permits and orders.

With increased investment caused by increased regulation and service requirement comes the need for revenue adjustments. Electric utilities experienced higher investment requirements and higher revenue needs in the early 1980s such that it was not unusual for an electric bill to be in the neighborhood of $100 a month. Water and wastewater utilities have been facing similar pressures since the mid-1980s when the Clean Water Act was passed. SSU's expert witnesses in this case will testify as to the necessity and the prudence of the investments I've mentioned.

What I've just been discussing is one of the two big issues in this case which is the total revenue issue. The second major issue in this proceeding is rate structure. The revenue issue concerns the total amount of money which will be recovered through rates. The rate structure issue concerns which customer groups will be paying which portion of the total. SSU has requested a uniform rate at the conclusion of this case. Basically uniform rate reflects the pooling of all revenue requirements for all of SSU service areas throughout the state, such that most of the customers will pay the same rate regardless of where they are

located.

A possible alternative to the uniform rate is what is called a stand-alone rate where revenue requirements are calculated for individual localities served and rates may vary widely from service area to service area. How these different rate structures affect you can best be illustrated with the interim rates which the Commission recently authorized SSU to collect and which you should be seeing in your next bills.

Interim rates are rates which the law allows the Utility to collect during the pendency of a rate case. As Commissioner Clark said, they are subject to refund and the total interim revenue dollars are calculated in accordance with a statutory formula set by the legislature. The interim rates approved in this case follow the version of the stand-alone rate structure. As a result of this rate structure, many of you in this room, in Orange, Seminole and Volusia Brevard Counties will pay interim rates higher taken the uniform rates requested at the conclusion of this case.

This is so despite the interim rates being based on 1994 information and the final uniform rates being based on 1996 information reflecting additional

utility investment.

For example, if you live in Chuluota in Seminole County, the water and sewer bill SSU has asked that you pay at the conclusion of this case under uniform rates will be some $26 a month lower than the interim rates now coming into effect. This is so because of the rate structure that the Commission used in interim rates.

Even though some of you would be paying higher rates under the uniform rates than under some other rate structure, SSU still favors the uniform rate structure. This is because you all receive the same utility service from the same utility company, regardless of where you're located, and because uniform rates serve as insurance against future rate spikes resulting from high investment in a individual locality in the future. Thank you for your attention.

CHAIRMAN CLARK: Mr. Shreve.

MR. SHREVE: Thank you, Commissioner.

Well, do all of you understand now why Southern States needs this massive rate increase? It should have made it perfectly clear. The one thing Southern States really never talks about is amount of money that they want from you, their customers, the citizens of the state of Florida. And that's what

we're trying to get everbybody to talk about. When he talks about their 3% in 1994, now they left out -- in the last rate case the Public Service Commission would not consider a $6 million profit that they made on the St. Augustine Shores sale. They wouldn't consider the $9 million less that Southern States paid in the Deltona purchase and many of you are from Deltona. They paid $9 million less than they are receiving a return on. The same situation happened in Lehigh Acres when they bought that. So the calculations that they're making and what they say they're earning is on a phantom amount. It's not on what they really had invested. We'd all like to know what they're really making on the money they really have invested in this state. The $100 million he's talking about, one, goes through 1996 with their projections. And to sit here and say that they're required to make that $100 million by environmental protection is really misleading. If you go through and look at their investments, a very, very large part of it was made to serve future growth and nothing more, and you, the present customers, should not be having to pay for that.

I'll be brief because we want to hear from you, but I want to give you a couple of examples of

what Southern States wants. Now, he talked about the uniform rates and stand-alone rates. Some people would benefit by uniform and some people would be benefited by stand-alone, and everyone has their own interest and that's understandable. But to come in here and say that the Public Service Commission gave them more in most instances than they requested for the interim is really not true and that's what has been said at almost every hearing. They made a request on uniform but they came in with what would justify a higher -- tried to justify a higher rate.

I'll just pick out some examples. One that I think is really bad. I know there's some people here from Chuluota.

Southern States, if they had their way, would take Chuluota's bill for water from 11.39 to 45.62 for 6,000 gallons. They would take their sewer from 33.12 before the 1992 case to $271 for 6,000 gallons. That's a total 6,000-gallon bill of $316 a month. Rates are supposed to be fair, just and reasonable. No one can ever convince me that that rate is fair, just and reasonable. And regardless of the rate structure, Southern States should not get that kind of money from any of our customers, whether it's one individual group or whether they can get it

from the entire group. And the first thing the Public Service Commission needs to do is go back and review each and every system and see just how much Southern States really is entitled to get out of those.

In the revenue department which is what they really want, before the 1992 case, the Deltona sewer revenue was $828,000. They have asked coming out of this case for $3.584,000. For the a small system -- all right, that's a large system, a small system, Jungle Den. Before the 1992 case Jungle Den produced $15,659, Southern States now wants to take out of the pot, $100,266. That's atrocious. It makes absolutely no sense, and it cannot be justified. And if anything, I think our case is going to show when we put it on that they not only don't deserve any rate increase but the Public Service Commission should take a good close look and probably give them a rate decrease. Thank you very much. (Applause)

CHAIRMAN CLARK: Thank you, Mr. Shreve. At this time I'm almost ready to swear you in. I want to tell you two things. If you have already presented testimony at one of these customer hearings, that is still part of this record and that testimony will be available to us to rely on in making our decision, so you do not need to testify again today. The other

thing is I usually don't limit the time people can speak, but remember your friends and neighbors are here and they have something to say so please don't take a long time. Be courteous to the other people who are here to participate in this case, and provide testimony to us.

With that, I would like everybody who signed up to testify to please stand and raise your right-hand side.

(Witnesses collectively sworn.)

CHAIRMAN CLARK: You may be seated.

Mr. Shreve, would you go ahead and call your first witness.

MR. SHREVE: Wayne Gardner.

CHAIRMAN CLARK: Can I ask you to give us your name again, spell your last name and indicate the system from which you receive service.

- - - - -

WAYNE GARDNER

was called as a witness on behalf of the Citizens of the State of Florida and, having been duly sworn, testified as follows:

WITNESS GARDNER: Madam Chairman, I'm Wayne Gardner. I'm the Vice-mayor and Commissioner of the city of Deltona. I live at 548 McNeal Drive in

Deltona.

First off I'd like to thank the Commission for being here and hearing what we have to say. We appreciate your time. I know a lot of you came from a large distance.

Deltona is a community that, as you know, has a lot of changes going on there. We've gone from a community in the 1970s being predominantly retirement with an average age of about 60 to 65 to a community now in the 1990s with an average age of less than 35, believe it or not. Huge growth. Unbelievable amount of changes. But one thing we do know about the change is it's inevitable and sometimes rate increases are inevitable. But I'm going to support our counsel, Mr. Shreve, and say that I do not feel that a rate increase on the water side is needed at this time as it relates to the 19,192 customers in Deltona that have water only.

The rate increase that they have asked for in the water some people have said is small. I don't really agree with that. But the rate increase that I've seen them ask for in wastewater is just unbelievable and, quite frankly, I feel it's going to be unbearable for the residents of Deltona. About 95% of those that this will affect are the 4,719 customers

that live in the areas of Deltona that we call the first, second and third areas. These are the areas that were originally developed by the Mackle Brothers when the community was originally built. Predominantly this is made up of retired persons, people that retired 15, 20, even 25 years ago. They retired on incomes that were adequate at that time. But when they retired they did not envision having water and sewer bills of $75, $90, even $100 a month. That's how much their house payments were when they bought and moved there. I would ask that you show as much restraint as possible as you review those rate increases.

I have had some people that have come to me and given an explanation of what they feel are some of the reasons for such a large rate increase. Of course, we've heard SSU today speak about they need the additional revenues, they need the additional profits.

If you look in the newspaper, even as late as today, in the stock section, parent company, Minnesota Power, dividend $2.04 on a stock that's worth $28. That's a tremendous dividend. To put it in perspective, Disney, a stock that's worth $60 paid a dividend of 44 cents on $2.62 worth of earnings. I

think we need to look at what the dividend structure is of the parent organization, what the profit structure is of the whole organization.

We'd ask that you investigate that and again show as much restraint as possible.

In closing, I don't envy the position that you're in. Sometimes some of the most difficult things to do is to determine increases in costs and like that. I have been in the position that you're in and it is a tough position. We hope that you'll show as much restraint as possible. Please realize that the people that you're going to affect, especially on the sewer in Deltona, are the retirees and people that have been retired for the longest. Again, we thank you for your time of being here.

CHAIRMAN CLARK: Thank you, Mr. Gardner. If you would just hold on a minute.

Mr. Shreve or Mr. Feil, do you have any questions?

MR. SHREVE: No questions. Thank you very much. (Applause)

WITNESS GARDNER: Thank you, Mr. Shreve.

- - - - -

MR. SHREVE: Valerie Grueninger.

VALERIE GRUENINGER

was called as a witness on behalf of the Citizens of the State of Florida and, having been duly sworn, testified as follows:

WITNESS GRUENINGER: My name is Valerie Grueninger. I live at --

CHAIRMAN CLARK: I'm sorry, you're last name.

WITNESS GRUENINGER: Grueninger, G-R-U-E-N-I-N-G-E-R.

CHAIRMAN CLARK: Go ahead.

WITNESS GRUENINGER: I live at 1124 Fountainhead in Deltona, and I'm just going to reemphasize the same things that have already been said but point out just a few other things. Most people get less than a 2% increase in their annual wages. I don't see how any company can justify almost a 50% increase across the board on these utilities. And again, to emphasize, most people or many people are on fixed incomes throughout Florida, not just in Volusia County and there's no way they can afford this.

Another point, the water meters are not checked regularly. I have never seen anyone check my water meter. I purposely left my water meter in the

condition that it's in for over a year. There's a layer of dirt, very thick, over the meter itself. When you pick up the metal cover and you look underneath, there's a layer of dirt that has not been disturbed for over a year. This goes to two houses. My parents who live in another part of Deltona have never seen someone check the water meter. My neighbors haven't seen anyone check the water meter. I'm not saying it's not done somewhere, but I've not seen this happen.

And another point I wanted to make, a lot of people aren't aware that the interim rates -- I know it's been explained but those interim rates make the increase look like our bills are going down. And there's a lot of people out there that are going to interrupt it that way who aren't at these hearings and just read the bills and get some basic information. I know that a lot of information has been printed in the paper, but I don't think enough people are aware of this game that's going on. You increase the rate, you give a posed amount that is outrageous and then you bring it down a couple of dollars and everyone thinks, "Oh, okay, this is fine." I just speak for a lot of my neighbors and a lot of other people, that there's no way that this can be justified. I just wanted to

emphasize that. Thank you.

CHAIRMAN CLARK: Thank you.

MR. SHREVE: Thank you. (Applause)

You mentioned an almost 50% increase. This is an overall basis and Southern States has put out information a lot of times, so it's not easy to tell. But in the water rates, the rate increase that they're asking for is 77%; for the sewer it's 34%. Now that's different for different systems, but overall that's the additional amount of money they want. Thank you. (Applause)

- - - - -

MR. SHREVE: Mr. George Wells.

GEORGE W. WELLS

was called as a witness on behalf of the Citizens of the State of Florida and, having been duly sworn, testified as follows:

WITNESS WELLS: Madam Commissioner, my name is George Wells, and I'm President of the Sugarmill Homeowners Association in New Smyrna Beach.

I wish to address the two issues today. We have the request for more income from Southern States Utilities, and we also have the big issue of how these rates will be collected.

I'd first like to speak to the uniform rate

system, and representing the thousand residents and 600 homes in Sugarmill we respectfully request that the Public Service Commission grant any rate increase on a uniform rate basis rather than a stand-alone. Almost all utilities in the United States operate with an uniform rate structure. This is also true, really, to a large degree in the way our taxes are spent for highways, hospitals, prisons and park services and many other things. In fact, the health insurance system was built on an uniform rate system just for equity.

I'm so much shocked when I just read this morning in the blue pamphlet, quickly scanning, what some areas will have to pay under a stand-alone rate versus the uniform rate. You know, if increases are necessary then we accept them and we'll be willing to pay when justified. But it seems to me that we really ought to spread this kind of a rate across the entire community of the state of Florida. It may cost us -- we will spend more money, but I'll feel better knowing that my increase may only be 20 or 30%, or, hopefully, not even that large but some poor folks sitting somewhere are going to pay a drastic 100 to 200%. I look at some of those numbers there, and they're rather severe. So we would strongly support that you

continue or grant increases on a uniform rate basis only.

Also, increasing environmental requirements and the projected future water shortages will mean more cost in the future, and this is a broad problem and these are best handled by a uniform rate structure. Also, I think SSU or the Public Service Commission needs to tell the public or give the reason why the first appeals court ruled for stand-alone rates rather than uniform rates in that court case back last fall. We don't know why they made that ruling for stand-alone versus the uniform rates. This is a rather drastic change. The impact on us looks like a -- averages $49 a month up to $70 a month. For other areas it's going to be much more severe. So we request that you stay with uniform rates.

On the request for more income for the Utility, we had researched their filings and we support the comments that this ought to be looked at carefully. They report a need for a 10.56% increase in wages in 1996. This is somewhat beyond the pale in terms of what industry is really doing or what the market would now bear. Also, since 1991 the Utility has had a 68% increase in operating expenses, so we're not sure that they are making the full-blown effort to

control costs as they should.

And finally, what seemed to us a little ludicrous and the people that researched this for our association, there's a request for a $209,000 reporting system for shareholder reporting of SSU to its parent corporation, Minnesota Power & Light. It seems to be something that the folks in Florida should not have to pay for.

And in conclusion, we seriously question the cause of the rate increase, and even more importantly, we hope the Commission will stay with the uniform rate system rather than stand-alone. Thank you.

CHAIRMAN CLARK: Thank you, Mr. Wells. Let me see if there are any questions.

MR. SHREVE: No. Thank you very much.

CHAIRMAN CLARK: Questions. Thank you very much. (Applause)

- - - - -

MR. SHREVE: Burt Tischer.

BURT TISCHER

was called as a witness on behalf of the Citizens of the State of Florida and, having been duly sworn, testified as follows:

WITNESS TISCHER: Good morning. T-I-S-C-H-E-R. I have talked to the Public Service Commission when they met at the county building down on the other end of town.

My sentiments are very much the same. However, in our situation -- we're in the Druid Hills plant -- since I testified before, I was told that our water standards would improve. My main objection at that time was that drinking water was almost prohibitive for several reasons. Chemical and content of foreign matter in the water.

Now, I was told that this condition was going to improve and at that time I thought well, the justification for an increase may come. Here we are today -- and I can't say that my water standards have improved. What they did is installed an old tank, tremendous old tank, and out of that tank it had an aerator on the top of it. Well, there's no one in our area that's seen that aerator working for more than a year; maybe even two years.

Now, if they're justifying an increase, we

haven't seen the justification through service. In other words, I still wouldn't be getting the sediments.

They frequently flush the lines, which is supposed to take care of that but what usually happens, as a result of the flushing, then, if you've had your water on while they're in that process you've got that whole system of content in your system. And what I would like for the Public Service Commission to do is to get probably more involved with the individual plants that Southern States Utilities has, because on our particular circumstance, we have no wastewater treatment. We don't want to be lumped in and have our rates probably affected with people who are on those systems and are going to receive some benefits at some time. It looks to me like they are trying to get the money up front for these investments for which most of us who are in business have to take the long-range approach by making the investment and then hoping that we can put it together and make a profit in the next year's life of that particular machine or people or whatever our investment is into.

I only want the Public Service Commission to look at these things in a very serious manner to make sure, even if there was a rate increase given, what is

the result in the follow-up? Did they live up to their agreement? I'm not sure that this has ever been accomplished and, of course, I realize our utility situation changed ownership. So Southern States, I know they've made changes but I'm not sure that they justify the rate increases that they're asking for and I only want fair treatment. Thank you.

CHAIRMAN CLARK: Thank you, Tischer.

MR. SHREVE: Mr. Tischer.

WITNESS TISCHER: I have a sample. In other words, I don't think anyone here would like to get up in the morning and brush their teeth and find out that they've got something else out of the system. I'd leave this sample with the Commission.

CHAIRMAN CLARK: We'll take it. Thank you. And Mr. Shreve would like to ask you a question.

MR. SHREVE: Mr. Tischer, did you realize there are approximately 150 different systems in this rate case?

WITNESS TISCHER: Yes, sir, I think I did and that's one of the reasons why I didn't want to be lumped in with a brand-new facility somewhere that maybe these people are totally satisfied and think it's worth it. I don't in my mind.

MR. SHREVE: Yes, sir. And I think the

point that you made about checking each and every individual system, and seeing what, in fact, has been done and not, just what's claimed to be done or told is going to be done is very important.

Before this type of case where we had 150 systems in -- for instance, we represented Deltona individually against the Deltona utility before they were purchased by Southern States. You're able to go in and look at a system much closer, at the entire situation. And I think your point is very well taken and it's very important that the claims made by the Company for each and every system are checked out thoroughly, and I'm afraid it's not going to be done because of the number of systems that are in this case, sir. Thank you very much.

WITNESS TISCHER: Thank you. (Applause)

CHAIRMAN CLARK: Thank you, Mr. Tischer.

- - - - -

MR. SHREVE: Myron Lewenthal.

MYRON LEWENTHAL

was called as a witness on behalf of the Citizens of the State of Florida and, having been duly sworn, testified as follows:

WITNESS LEWENTHAL: Myron Lewenthal, L-E-W-E-N-T-H-A-L. I live down the street from Mr. Tischer. Before I go talking --

COMMISSIONER KIESLING: You have to talk only into the microphone.

WITNESS LEWENTHAL: That's a sample of the water.

I'm a little confused why if it's such a rotten business Southern States Utilities is gobbling up all of these plants and it's going to cost them money?

This woman that told about the meters with the sand on top brought back memories. I went out many times and there -- I had received bills but there was no way anybody could have read the bills through the meters through the sand.

The other thing is the used tanks up front, God knows what they got them down for as assets, but they were used in the area aerator that they built on top of the tank, like Mr. Tischer said, hasn't been working for at least a year that we know. Every time

I go by I look. The water is so horrible that most people buy bottled water. That's an added expense. My machine is hooked up, the ice-making machine. I've got a very expensive filter on, but still to put those ice cubes in a drink, I'm afraid wouldn't be the most palatable thing. That's another problem. Then as far as figures go Mr. Shreve was very good and we all know people can make figures dance. I'm going to tell a quick story about figures.

There was a motel and this young fellow was in charge of running it. Three men came to the motel and they said, "How much is it going to cost us?" He said, "$10 a room." So he collected $30. His boss came in the next day and said, "How much did you charge those three men?" He said, "$30." He said, "You know, I have a special on, three for 25. Give the $5 back to them." The young fellow was a little confused, "How am I going to give $5 back to three guys?" He knocks on the first door and he says, "Your room as only $9, here is a dollar back." Second, third, same thing. Somebody hearing this story -- and then he puts $2 in his pocket out of the five -- hearing the story says, three times nine is 27 plus the $2 he put in his pocket is 29, what happened to the other dollar? Same thing with your figures, they

can be made to anything you want.

Any questions, Mr. Shreve?

MR. SHREVE: No questions. Thank you very much.

WITNESS LEWENTHAL: All right, sir.

CHAIRMAN CLARK: Thank you, Mr. Lewenthal.

- - - - -

MR. SHREVE: Mr. Ralph Bailey.

RALPH BAILEY

was called as a witness on behalf of the Citizens of the State of Florida and, having been duly sworn, testified as follows:

WITNESS BAILEY: Good morning, ladies and gentlemen. Thank you for the opportunity of speaking to you again. My name is Ralph Bailey. I live at Sugarmill Estates in New Smyrna, now a resident, formerly president, of the home owners association, and I have testified in past cases.

This court decision regarding uniform water rates is really disturbing considering the Commission's charged to ensure just and reasonable costs to all residents. Despite 25 years of conservation, the water cost for the Volusia County community of Sugarmill were among the highest in the state on the stand-alone basis. Most residents have

installed conservation fixtures and irrigation wells to minimize water cost. Resulting in consumption rates in the lowest 20% of the SSU systems. Despite this, our bills were still in the 70 to $100 per month range. It is really infuriating to have SSU continually recommend conservation to us when they are assured a guaranteed rate of return regardless of our consumption. Our conservation efforts have only resulted in higher rates to ensure SSU's rate of return.

It's interesting to note that the community responsible for the return to stand-alone rates consumes five times as much water as our community. I'm very familiar with that community. I've spent a lot of time over there.

Their water rates are so low the conservation efforts are apparently meaningless and unheeded and, believe me, that's true.

Another bothersome point to our community and SSU's plant, another development outside of our community is scheduled to be serviced by the same SSU plant. Will our residents be liable for any increased cost for this expansion? We'd like to have an answer to that. I wonder since we're here not only as an -- I don't really view this as an adversarial group here

because I think we're all fighting a common enemy and that's the people who took the uniform rate to court, and were able to convince the Court to change that. But I wonder what is the proper forum for a class action suit by other SSU customers versus that current court ruling? I would believe that most of the customers would be pleased to participate in such a suit.

Water in Florida is a priceless natural treasure to be used wisely by everyone, and as a necessity of life, must be priced appropriately for everyone. Thank you very much.

CHAIRMAN CLARK: Thank you, Mr. Bailey.

MR. SHREVE: Mr. Bailey, I have a question.

(Applause)

Mr. Bailey, since I represent all of the customers, I, of course, have 50% on one side and 50% on the other. But I have filed a motion with the Public Service Commission to have appointment of counsel for the individual groups so that your specific interest would be represented by an attorney, because I think what you're bringing out here is that different groups have different interests and they should be represented. For instance, Southern States has been ordered to make a refund of $8 million under

the case and the PSC has done that, to make a refund of $8 million to the people that were on the other side of the uniform rate issue, and, of course, Southern States doesn't want to pay it. But they have taken the position that if they pay it they want to get it from you, the customers that were on the other side, and this is a reason I've made the motion. We're going to try and see if we can't get specific counsel that would be able to represent customers rather than worrying about what position Southern States is in, the other customers or the other Public Service Commission.

WITNESS BAILEY: Jack, please let us know how we can participate in that. If it's a matter of attorney, I think there's a lot of people in this room would be very interested in participating in that program.

MR. SHREVE: I'd like to work with you on that, because I think it shows that while you may be aligned with Southern States and the Public Service Commission at one time all of a sudden that can change if they try to take the $8 million back from you. Thank you very much.

WITNESS BAILEY: Thank you. (Applause)

- - - - -

MR. SHREVE: Mr. Hank Wenz.

HANK WENZ

was called as a witness on behalf of the Citizens of the State of Florida and, having been duly sworn, testified as follows:

WITNESS WENZ: Good morning, and I appreciate this opportunity to appear before the Commission. My name is Hank Wenz, W-E-N-Z. I live at 658 Whitemarsh Avenue in Deltona.

I guess sometime in last June or July you had a meeting at the County Council Chambers concerning the upcoming rate increases. And during that meeting I addressed two concerns of mine and that was the upcoming hearing concerning the state unified rate structure, stand-alone versus unified costs. And at that time I had no way of knowing, I guess, no other customer had any way of knowing whether there was any disparity in the different service area costs. But in spite of that ignorance on my part, I felt that the stand-alone cost system should be used instead of the unified cost because it was a justifiable method of charging people.

Near the end of the session, I learned that if this did occur, if we had a stand-alone cost system, that by chance I would benefit; my rates would

decrease. But I didn't come there for that, I didn't come here today just by chance that now I do know that my costs would decrease. But I think it's an ethical approach that we have to address.

The one thing I asked last time I didn't get an answer to and I requested that the Commission or someone serving the Commission send to me and every other customer through a mailout was what causes the difference in the service areas? Is it land costs? Is it labor costs? That was one request I asked. So we could understand why there was a difference in costs. I did not receive that information. So I wonder if someone here could briefly tell me what is causing the differences in the costs?

CHAIRMAN CLARK: Mr. Wenz, we can have Marshall Willis or Troy Rendell tell you that. There are numerous things that affect the cost of a utility.

WITNESS WENZ: I'm a building contractor and I know all about cost of development, et cetera, and I could basically tell you the heavy-weight cost items that cause one building in Miami to be built at Volusia County, and don't need but a minute to do what. That's what I was asking for.

CHAIRMAN CLARK: What I can tell you is that it depends on what was charged to begin with to hook

up. That has an impact on what the cost of service, the impact fee in effect. Another thing is what --

WITNESS BAILEY: Did you say the impact fee?

CHAIRMAN CLARK: What is called an impact fee. Let me correct myself, the service availability charge. When you build a house, what does the Utility charge for you to hook up to their system? It depends on what relationship that bears to the total cost of plant to serve those customers. Another thing is what kind of treatment has to be given to the water or wastewater? That varies. Some plants are reverse osmosis plants and they are more expensive.

What kind of water that you have to treat and the degree to which you have to treat it. Also, the number of customers on your system has an affect on the cost, because the more people you can spread it across the less it is on an individual basis. Taxes vary, too. Utilities are subject to local taxation as and those taxes vary. The land to locate the plant in various --

WITNESS BAILEY: The cost of the land to put the facility on.

CHAIRMAN CLARK: Right. That's sort of in a nutshell what it is.

WITNESS BAILEY: Well, anyway, whatever

these are in succinct manner. If this kind of information could be -- you know, I want to back off a little bit. The information that I'm going to request and what I did request last time, I finally went to the office in Deltona and they said, "Sure, we have the information." I said, "Where would that be," expecting to look at one or two sheets of paper which was all that was necessary, and I brought a third of what there was available to look at. You can look through that and get your answer. And that's an insult. That's an insult.

CHAIRMAN CLARK: Mr. Wenz, I can tell you that we have a number of Staff people looking at that and looking at each piece of information.

WITNESS BAILEY: Okay. I just want to show you, as customer, what I experienced. No one should have to read through this stuff here to get the simple answer to a fundamental question, I hope that gets resolved. I hope that when I leave here in the mail next time, not me, but every customer gets fundamental information that makes sense. Okay. I don't want to belabor this because there are a lot of people waiting, and I want to cover some other areas. But I hope I made my point on that, because this is my second time here, coming for the same reason I came

the last time, frankly.

Okay. Now, I guess I get disturbed because I know we basically innately look out for our own self-interest; that's human nature. But somewhere along the way we have to be more responsible than that. I hear people from different areas. Two gentlemen spoke and they were for the unified costs. Now I'd be willing to bet you that that's because if you go to a stand-alone their rate increase increases.

Now, should I come up here and promote a stand-alone because mine decreases? I don't think that's the reason why we should be up here, and that was not my reason the last time. In fact, I didn't know what the difference would be; now I do know, and I'll tell you by chance mine would become lower. But that's not why I'm up today, and I don't think anyone else should be up here for that reason.

I think we have a responsibility, each community has a responsibility to pay for the problems or for the needs they either cause or need. They made a decision to live there or move there or to develop there. No one else did, and they have to foot the bill to live there. Why would New Smyrna have to pay for the problems Deltona causes or vice versa. I think that ought to be a fundamental policy that any

utility company or anybody paying a fee ought to address and probably adopt.

Now, if someone else including the Commission can come up with a more ethical policy, I would like to see that; I would like to consider that. I'm not against something new, but I wouldn't want to continue under the old system for the reasons given. And the reasons given basically in the literature I got in the mail -- by the way, I see that the Utility -- I guess Southern States Utilities had a hearing, let's see, concerning the statewide rate structures on January 18th at the Holiday Inn Convention Center. I got this two days after the event. I'd like to have this on record, because I sure would have been there and I just wonder how many other people got it after the fact. That's another point I'd like to see addressed on that.

There cannot be any legitimate reason for having these notices coming out late. They know well in advance when these things are going to happen. And so I would hope that this gets corrected and never happens again. Now I'll get back to the two points I want to get into here.

Who creates -- last time I mentioned that my rates were increased and a substantial portion of

them, in fact, most was because of a fiscal item called marginal reserves. And now I learn what it is; that it pays for costs imposed on existing communities for future development. What I would like to know is, have an answer to is who created this revenue source, and under what authority? This scheme of things, this entity called a marginal reserve, who had the authority to or who gave it to them, because I have a suggestion on that.

CHAIRMAN CLARK: Okay. Mr. Wenz, that is a policy with respect to the rate setting that we have implemented. And let me tell you what it is. When we set rates, we use the test year, and we look at all of their expenses and their operations in a given test year to determine their rates. But we know things change over time, and we --

WITNESS BAILEY: "We," the Commission?

CHAIRMAN CLARK: The Commission.

WITNESS BAILEY: Okay. I didn't know whether it was the Company -- The Utility Company or the Commission.

CHAIRMAN CLARK: We're not the Utility company.

WITNESS BAILEY: I know, you're the ones who created this entity.

CHAIRMAN CLARK: Yes. We have a concept called a margin of reserve and what we say is we know that when these rates are in effect we expect more people to come on line. And what we're trying to do is match their need for plant and operations with the customers of the Utility that will be there when the rates are there. And that's why we indicate that there may be more plant that should be considered used and useful because at the time the rates are in effect there will be customers there.

Marshall, have I explained that concept right?

MR. SHREVE: Commissioner, I feel compelled to make a couple of comments.

CHAIRMAN CLARK: Yes. That is an issue that Mr. Shreve continues to be concerned with and maybe you should hear from him with respect to his viewpoint.

MR. SHREVE: For 10 or 12 years the Public Service Commission and the Public Service Commission Staff and the companies are the ones that all like margin of reserve. As Commissioner Clark said, they go through and determine all of the expenses, all of the rate base, the used and useful percentage and establish that. Then they say -- and this has changed

over the years. For a while it was a year and a half. Southern States is trying to stretch it way on out, so that an additional percentage based on the growth is added to what has already been established that is a fair rate or a fair -- fair for the present customers to support. Then they add in that additional amount of margin reserve to support customers who are going to be coming on in the future, which are going to be paying the same higher rate that the present customers. It is totally illogical. If it were left out of there everything would work out even. But all they do is give the Southern States Utilities and other companies an additional amount of revenue that they pocket to support additional customers coming on in the future which will also be paying higher rates because of the margin reserve.

WITNESS BAILEY: Thank you. Now, this is really interesting. I have a proposal I would like to make to you verbally, I'm not going to do it in writing. And that is that I think we should dichotomize the costs that all three of us were talking about. One is that whatever additions or improvements are needed in existing structures to accommodate the existing community is justifiably -- is a justifiable cause under margin reserve. I don't

think anyone could say that's not right. That's a fair cost. But I think we have to dichotomize between either replacing -- basically what we're doing is improving or replacing a facility for the existing community. But when you're talking about, and that's this other area or this other fiscal item, future growth, if that growth didn't happen we wouldn't need that other increase. And since whoever decides to move in or whoever decides to develop did it on his own, he didn't ask me and he sure didn't share the profit with me, then he should pay for that thing they call the impact. Because he actually impacted the facility. If he didn't develop, man, we didn't need another dollar. We didn't need a square feet of sewer capacity. We were doing just fine. And so I think that this should be formally addressed, and I'm making a formal request.

And not only that, I'm asking that this idea, this concept be presented in a mailout to the customers explaining just the way I did, the two units, fiscal units. And I think they will all understand it and promote that thing, and you won't have any problem in getting support in doing this. Will the developers like that? No. There will be less profit, obviously. But they are the ones who

wanted to be the developer. They could have been shoemakers or bakers or anything else, but they wanted to be developers. If you're going to be a developer, then you have a social responsibility of your own.

So I'm hoping that you will do -- that you will initiate a formal request.

Now, I'm going to go to a third area. Can the Commission make an impact fee? No. I said this last time and I had asked that this be published -- that's another thing and another laugh, I asked it be published, so the community at large, whoever is affected, does understand the concept, that's either the county council or city council that enact an impact fee. And so that's what I'm hoping, is that you will make a formal request to the legal representatives of each service area, that they enact a just impact fee to compensate for the impact caused by future development and let the public know that you did that.

It's amazing, I went up here last time and I learned that 40% of the rate increase that I had to pay was for new homes for their sewer. Before then I thought it was for gray water dispersal, really the real environmental use, and I was happy to pay this. You see, again, I don't want to have to pay it but I

knew I have a social responsibility. I told you that last time, also, that I was not happy to pay it but I was willing to pay it, is what I really should say because I have a social responsibility. And to my dismay, this gentlemen here informed me of this marginal revenue that -- you folks didn't or none of these folks did. And everyone here had a responsibility of informing me in a succinct manner of doing that and it really bothers me that this doesn't happen. I'm asking again that that be done.

And then also, you know, stand-alone I'm asking for a printout on one sheet of the 150-some-odd service areas, if you'll put by each service area what their unit cost is so I get an idea of what the cost differences are. Maybe in a succinct manner you can explain why there are cost differences? This is 1, or 2 or 3 pages. It is not this. This is deliberate, because they know no one will read it, if they could read it, most folks can't read it. This is not informing the public. Thank you.

CHAIRMAN CLARK: Thank you, Mr. Wenz.

MR. SHREVE: Thank you, Mr. Wenz.

(Applause)

- - - - -

MR. SHREVE: Mr. Bruce.

E. P. BRUCE

was called as a witness on behalf of the Citizens of the State of Florida and, having been duly sworn, testified as follows:

WITNESS BRUCE: My name is E. P. Bruce, B-R-U-C-E. I live at 6365 Lake Charm Circle, Ovieda. I am the President of Village Home Properties. We are currently a developer/builder, and I guess it's very appropriate I speak now because I just heard urgent comments about impact fees.

But we have a 37-lot subdivision in the Chuluota area of this county. We are served for sewer and water by Southern States Utilities. I'm here primarily to encourage the Commission to reject any notion of switching to a stand-alone fee or rate structure, that the uniform structure is certainly the standard throughout the whole United States for utilities. And any change -- there are a lot of reasons not to make any switch to a stand-alone type service and I won't go into all of that. But I wasn't going to say anything about impact fees or anything along that line, but -- and I'm not here to try to gain any sympathy for developers, because I know that's useless, but I would like to point out and I'm sure the Commission is aware of it, and I would like

to be sure that when the technical hearings take place in Tallahassee that consideration is given to what type of contribution that it has made in most systems, I guess all systems, but I know specifically in the Chuluota system we do pay impact fees down there in order to gain a connection.

In our 37 lots we have installed an infrastructure for sewer and water of approximately $40,000 expense and on top of that, which we have deeded over to Southern States Utilities at no change, of course. And on top of that for each connection that we will make to that system we will pay impact -- it will impact us or the future home buyer in excess of $6,000 per connection for sewer and water. Of that 27.50, I believe, is currently the capacity charge just to reserve capacity and then there's a pretty high impact fee charged for our share of plant improvements, charges, maintenance, whatever. But I just didn't want to let it pass that the current customers are paying for new connections. The more connections you have, the greater the number of people you have to spread the costs of operating that plant. If you only had two homes and a complete system, the cost would be very expensive, but if you have 1,000 connections that reduces the cost for everyone. But I

also am sure you're going to hear plenty of people speaking against the current increase and as someone whose business relies upon the sales of homes, I can certainly understand that any horrendous increase which we're talking about here is going to make it very difficult for me to sell a house to someone and convince them, "Hey, this sewer charge or this water rate, that's not too bad, when compared to other utilities around or compared to especially to what a uniform rate versus stand-alone rate, it's reasonable." And I just ask you to take some of these things into consideration, and I thank you for your time.

CHAIRMAN CLARK: Thank you, Mr. Bruce.

MR. SHREVE: Just a minute, sir. Sir, you mentioned the margin reserve and not hurting developers. When the margin reserve is given to customers, or not given to customers, I don't think that really impacts the developer. Now, if it raises the rates it certainly is going to hurt the developer in that area. If CIAC or some other mechanism were collected, it would come off the rate base and keep rates down. But the way the Commission has set up the margin reserve it increases rates without having an effect on the rate base, and I do not think it really

helps the developer one way or the other on that, so I think your point is well-taken as far as the developer putting in the infrastructure and actually delivering it to Southern States at no cost, but the margin reserve really hurts everybody and does not help the developer.

WITNESS BRUCE: That's correct. And also in addition to my desire to sell homes in that area, we're not selling lots we're selling homes, a large increase -- and I'll go back to that stand-alone rate, it would be such a financial hardship on the existing customers not to mention any future customers, they just wouldn't even consider the area. But you may force some existing residents to, "We can't pay these rates. We're going to have to move. We're going to have to dig us a little hole in the backyard and start using that as opposed to -- we just flat cannot pay that kind of money for wastewater." And, you know, if you try to sell your home because you can't afford to live there any more, who is going to buy it if they're facing a $250 a month sewer rate? There's just no way that a stand-alone rate can work for the citizens of this community or this state. Thank you.

MR. SHREVE: I have one other question. Without regard to the uniform rates or stand-alone, do

you feel that Chuluota's rates for 6,000 gallons water and sewer should have gone from roughly $42 or $43 total prior to the 1992 case to $316 after the '95 case, and is it justifiable for Southern States to raise that -- raise the rates that much and walk away with that kind of money?

WITNESS BRUCE: Well, it's certainly excessive. And I cannot not speak about the quality of service down there because I'm not a user per se of -- I don't get the water or use the sewer. We just build the homes. But I'm sure someone that is a customer of that system will mention that it's only been within the last six months that all of a sudden you start seeing a lot of Southern States activity down there for improvements in the resleeving of sewer lines, new water lines going in, a new fire hydrant here, it's you know, kind of suspicious. You see this activity now, where was it a year ago? And I understand they've made improvements to the plant and some of it mandated by governmental bodies, but still you know it does look a little suspicious.

CHAIRMAN CLARK: Thank you, Mr. Bruce.

MR. SHREVE: Thank you, sir.

- - - - -

MR. SHREVE: Mr. George Mycock.

GEORGE S. MYCOCK, JR.

was called as a witness on behalf of the Citizens of the State of Florida and, having been duly sworn, testified as follows:

WITNESS MYCOCK: Madam Chairman, members of the Commission, Staff, ladies and gentlemen, I, too, am pleased to have the opportunity afforded to come and speak to you today regarding my concerns.

I'm one of the senior citizens that Commissioner Gardner spoke of that lives in Deltona. First of all, my name is spelled M-Y-C-O-C-K. My concern is the increase that we're going to have. Talking with somebody at SSU, it was a lady that I talked to, they're going to increase the cost of my meter from $12.83 a month to $15.94 a month, and they're going to decrease the cost of my water on gallonage to -- instead of .001230 cents per gallon, they're going to decrease that to .00109. And what that amounts to, my monthly meter bill will be $15.94, which is an increase from 12.83, and my water bill will drop down from $2.89 to $2.56. I have my last two water bills here. The month of January I used 2,900 gallons. The month of December I used 2,350. I hear these 6, 7 and 8,000 figures. I don't use that kind of water.

But the point I'm getting to is I believe that they're going at this just backwards. A quote from one of the letters that I got from SSU. It says, "Southern States continues to support the uniform rate structure as the fairest and most equitable way to pay for the protection of Florida's aquifers."

Now, we've heard from time to time that we must preserve the water in our aquifers. We're getting shorter and shorter and shorter. And what they're doing here, they're decreasing the price of the water and increasing the price of the meter. I happened to have a one-inch meter. The reason I have a one-inch meter and only use that small volume of water is because I'm retired as a fireman for 40 years, and I understand hydraulics and whatnot. And I put this one-inch meter in the event that my home catches on fire I'll have a chance to get on it before help arrives and I wish to continue to keep that meter.

And while I'm on that subject, I have with me a sample of the pipe that brings the water to my meter. I have one-inch meter and I have a pipe that has a seven-eighths diameter, it's for your examination. I even brought a ruler so you can measure it if you so desire. This is a standard pipe

that they use. I've been down in the holes myself and seen what the workers are installing and they use this same pipe, whether they're putting in a three-quarter-inch meter for a one-inch meter. It's seven-eighths diameter.

Another point I'm getting to is this: Just about everybody that you can come in contact with uses the products manufactured by General Motors, Ford, Chrysler, Du Pont Company, General Electric or whatever. They don't ask you to help pay for their plant when they build it. You pay for that in the price of the product that you buy from them.

This is exactly the opposite of what Southern States is trying to do. They're going to increase the price that we pay for our meter and decrease the price of the water. They want us to pay for their plant, and by decreasing the price of the water this is going to increase the usage. Everybody that I've talked to say, "Well, heck, the meter price is fixed, so we're going to use more water." And what they're doing with this, their scheme is twofold: They're going to cause an increase of use in the water and those folks that are using their sewage, they're going to have a tremendous increase because they give them a couple of mills off on a gallon of water, but

they certainly increase it on the usage of water that has to go into the sewer system.

There's one other thing that I want to bring to your attention. As far as the folks at SSU, they are always very, very courteous and whatnot. But I had -- I have a problem here that has not been resolved.

My water pressure at times exceeds 110 pounds. The reason is I'm between a pump where there's a well and a storage tank. And during the night when they're replenishing the water in that storage tank they have to have an increase in pressure in order to equal or surpass the residual pressure that's in the storage tank which is down Sagamore. And the well that I'm in between is at the corner or right near the corner of Courtland Boulevard and Fort Smith Boulevard. They came up on two different occasions and put a graph on my service and the graph went up to 100 pounds. And in both cases the needle on the graph went completely off the graph and couldn't get back on again. And I would say that there was probably a difference of 15 or 20 pounds margin after the 100 pounds pressure where it went off the graph, so my pressure exceeded 110, 115 pounds and this happens during the night.

We have had two occasions of flooding in the home. One occasion we came home, after being away, and we had about four inches of water in the house because the hose that services our washer machine burst because of the high pressure, and it just ran unchecked until we came back. When we opened the door we had a water fall.

The other occasion was I have a small filter under the kitchen sink with a charcoal filter in it to try to take away some of the smell out of the water, and the cylinder on that filter burst around 11:15 one night just as we were getting ready to go to bed. By the time I was able to get out and shut the pressure off, why we had another flood to clean up but it wasn't as bad as the first one.

So they recommended to me that we put a pressure regulator on the system. And they offered to do it and I said, "No, I'll do it myself," because I felt if they put a pressure regulator on there that I'd have another $5 or $6 a month that I'd have to pay, so I didn't care for that.

But the problem with the pressure regulator is this: As soon as you turn on the faucet you get a burst and then it slows it up. You shut the faucet off and the water will seep by the pressure regulator

and it will reach its own pressure on both sides of the pressure regulator. As soon as you turn on the faucet, shoom, but then it slows right down; the pressure regulator takes over, and this is what happens.

I submit to you that in the 14 years that I've lived in Deltona I've paid over $2,000 for that one-inch meter, and now they want me to pay still more. and I say to you, ladies and gentlemen, that this is totally unfair as far as the homeowner is concerned, and I thank you very much.

CHAIRMAN CLARK: Thank you, Mr. Mycock.

COMMISSIONER GARCIA: Could you tell me if you -- when that happened, the bursting of your pipes, those two incidents?

WITNESS MYCOCK: What's that again?

COMMISSIONER GARCIA: The bursting of your pipes, those two incidents, how long agog was that?

CHAIRMAN CLARK: He wants to know how long ago did you have your hose on the washing machine break. What year was that? Was that recently or a long time ago?

WITNESS MYCOCK: That was three, four years ago.

CHAIRMAN CLARK: Three or four. And what

about the water filter under your sink, when did that happen?

WITNESS MYCOCK: Now, Doug Lovell, who I dealt with, he's aware of this situation. Doug has been very pleasant and tried to help us out. But there's nothing they can do until they put in a direct main that goes from that pump to the storage tank on Sagamore.

CHAIRMAN CLARK: When did this occur, the last one under your sink? Was that also three years ago?

WITNESS MYCOCK: It was two, three years ago.

CHAIRMAN CLARK: Okay.

WITNESS MYCOCK: And here just recently I had another one of those filters burst. I've got one outside of the house and one under the kitchen sink and I had another one of those burst.

COMMISSIONER GARCIA: How long ago was that?

WITNESS MYCOCK: This was about six or eight months ago.

COMMISSIONER GARCIA: Can I ask you favor, could you get with one of our engineers to see if there's something that the Company could do to help you out, because there's not your fault and you

shouldn't have to be paying for the damages that the company is causing because of other facilities that they have to take care of. So if you could see one of our engineers to see if we can help you out with that problem.

WITNESS MYCOCK: Be glad to.

COMMISSIONER GARCIA: Thank you.

WITNESS MYCOCK: Thank you.

- - - - -

MR. BECK: Franklin Welch.

FRANKLIN WELCH

was called as a witness on behalf of the Citizens of the State of Florida and, having been duly sworn, testified as follows:

WITNESS WELCH: My name is Franklin Welch, W-E-L-C-H. I am representing the people at 1850 East Cooper Drive in Deltona. I live there.

My experience with the rate increase began with a meter problem that I had for the period of 8-95 to 9-95 when the residents at 1850 East Cooper were billed for 59,000 gallons of water in one month. I thought there had been a mistake, so I requested assistance from SSU and was -- well, before I say anything else I'd like to thank the SSU employees that helped me with all my questions, but I was operating

under a misconception. I thought that our meter was our check and balance on how much water we were using. I thought that was our control device. The way that this customer was treated, the way I was handled, broke my trust with SSU. I do not feel that the answers that I received were forthcoming. I don't feel I was handled in any shape or form as a customer should be when a private corporate entity is providing a service.

The people are doing their job. It's just a very large corporation. I have no individual problem, it's just that we get lost in the cracks. What it boils down to is if the water goes through the meter I pay for it. Now, what it also boils to is if sediment goes through the meter and destroys my brand-new dishwasher, I pay for that, too. There's very little recourse for me to find out why things happened or when it happened unless I will expend my time and energy to dig it out of the library, out of the fire department records. So my question was: How can a customer be treated this way? And this prompted my new interest. Which uncovered how large this corporate entity that we're faced with is. My first question was how do I define a public utility? So I went to an encyclopedia, being novice at this. And if

you'll allow me, I'll read from the Encyclopedia American. "When a given producer has achieved such complete control over supply and where the demand for the service has become so urgent and general as to make it a common necessity, it is assumed that the economic power of such a provider must be curbed by governmental action, so that he will deal reasonably with those who are dependent on him for supply. This status of being required to deal reasonably has been called the public utility status and industries so classified have been called public utilities."

The reason that I was operating under a misconception is this is not a public utility. This is a private organization that is operating for profit and I realize that I'm not very well represented.

So while I was requesting the water contaminant analysis report from my local office in Deltona I just happened to come up on the rate increase folders, boxes of folders all over the office that I did not really know existed, because I wasn't there about a rate increase; I just wanted to find out why my mother was having to pay a year's worth of water in one month.

And realizing that a lot of people will come up here and complain and argue that this isn't right

or that isn't right, I'd like to read from that testimony if I might. This is from the testimony by Forest L. Ludsen. I have the book and page numbers so you can reference it, I believe. It's Docket No. 905495-WS, Application for General Rate Increase, Volume 1, Books 1 through 12 of 22. I'm In Book 4 under the testimony of Ludsen. On Page 7, Line 12, answering the question, "Does Southern States believe that a uniform rate structure within service classification would provide benefits to the Company and it's customers," Mr. Ludsen replies, "New laws, regulation standards or adverse events could result in the doubling or tripling of an individual facility's rates on a pseudo stand-alone basis. Uniform rates would make it highly unlikely that such rate shock would ever occur. In short, uniform rates are an effective insurance policy against rate shock."

That puzzled me so I continued to read while I sat in the office waiting for the representatives there to give me my water contaminant analysis which I understood I could request at any time.

On Page 21, starting on Line 2, going back to answer the question -- I've lost it. "Is SSU proposing any other innovations in the proceeding to the way rates previously have been set for SSU?" And

his answer on Line 2, Page 21 is, "Yes. As doctor John Whitcomb confirms in his testimony, SSU faces an inordinate level of financial and business risk as compared to water utilities operating in other parts of the country due to circumstances beyond SSU's control, such as weather."

I was confused. I don't understand. Such as weather? This is sworn testimony, this is what is affecting the rate increase now. I'm way past my meter problem.

"We have reacted to these adverse circumstances" -- on Line 11 of Page 21 -- "by proposing a revenue adjustment mechanism which we have referred to as a weather normalization clause, or in short W-N-C, for the Commissions consideration in this proceeding." I had never heard of a weather normalization clause. I was more confused.

I continued. "There are ten steps in computing the monthly WNC adjustment," from Line 6 on Page 21, and it goes through a very complicated set of calculations to come up with -- the analysis of the mechanism to spread back WNC revenue adjustments over two months, six months or a 12-month period. Once again, we have a choice. It isn't whether we're going to have a rate increase; it's what kind of a rate

increase we're going to pay. And it isn't on how much it's going to be, it's how much it's spread over a period of time.

Now, if we go back to my meter being my only check and balance, if we continue in this line, I will have no, I idea how much I'm going to spend for water. I will have no idea how to control my water usage. I'll be in the dark. And that was my original intention was to find out why I used 59,000 gallons at a period of time when I don't think I was at home.

COMMISSIONER GARCIA: Excuse me, you said you used 59,000 gallons?

WITNESS WELCH: That's what the meter read, yes.

COMMISSIONER GARCIA: During a month that you weren't home?

WITNESS WELCH: The problem was that the meter that was removed and then replaced was never -- there was no final reading. I wasn't home, so they couldn't notify me in person. I was told that there was a letter sent to me saying that the meter had been replaced. I didn't realize that the meter had been replaced until two months later when I received a bill for $78. Then I went down and looked at the meter and I could not get any answer to what the final meter

reading was on the meter that was removed. We performed field tests on the meter that was in the ground. We performed a bench test at SSU's expense on the meter in the ground, which caused me to replace the meter again. Now I have a meter in the ground that has not been field tested; it has not been bench tested and I still don't have a final reading on the original meter because it's disappeared. This is what prompted my investigation.

COMMISSIONER GARCIA: When was this?

WITNESS WELCH: The period was 8-95 to 9-95. And I have the billing, I believe was in November, but I'd be happy to share that. I have the bills with me if you'd like to see later.

This brings me down to Page 27, Line 18. "Excessive consumption by consumers acting in this fashion provide a double benefit to customers who are using less water by reducing the unit price they are paying for the decreased volume of water they are using." I'm sorry, I'm just out here trying to make a living and I've always paid the water bill on time, but I'm not clear on this. I need guidance. I need an explanation. This doesn't do it for me. This is sitting in a SSU office, waiting for the public to trip over it like I did. Sworn testimony. But who

knows it? Who knows how this is going to work? I'm not fearful for the elderly people who are on a fixed income. I'm fearful for everyone, because if we can run this through in the state of Florida and have no one see it, then we're just operating in the dark. That's not desirable in my opinion.

So now by new concern is water quality. The reporting that I have found between SSU, the Department of Environmental Protection, Environmental Protection Agency and the EPA is very confusing at least, realizing that I'm doing this in my spare time. I have to ask the question: Why doesn't the format for one entity match the format for the other? Why is dioxin put in an entirely different category when we go from any other agent to another. I'm no longer interested in how much the water costs. Now I'm interested in the water that is drinkable, and I can't get the information that's supposedly been accumulated for me to peruse at my -- it should be at my beck and call, anytime I want to I can go get a water analysis from my local company. But I defy anyone to tell me what well it comes from. I defy anybody at this point, you know without sounding brash, to explain to me how this testing is done.

I haven't been able to find an answer and I

have been asking very quietly and calmly.

So based on the way I was initially treated, I must ask now why we are being given a choice about how much the increase should be? Why should we have any increase, when the water is introducing sand into my hot water heater, or scale off the water main interior surface? I haven't had it analyzed yet. Or why should we have an increase when the customer service is not up to what I would expect? And why are we still under water restrictions? If the St. Johns Water Authority is determining how much and when we can water or wash our car, and we can receive a citation if we're seen doing it, when we're paying for the water that's coming out of the ground fed to us by a corporate entity that can't tell me what my last meter reading was.

Why are we still not clear on who SSU is accountable to? These are just my questions. I don't have answers. I don't know if I have enough time to figure it all out. But I am concerned.

So in light of my experience I am seriously in the dark as to why they -- being SSU -- should be guaranteed a profit on their investment. It's not that I desire them not to make a profit. I just want or would appreciate an answer to that. It dope sound

logical to me. And that's all I really have to say.

CHAIRMAN CLARK: Mr. Welch, you've indicated you have a problem with your meter and you want some answers to questions. Let me ask you to get with Stan Rieger, our engineer, and I, too, would be interested in why you didn't get a meter reading from that meter when it was changed out. And I would also like the Company to provide that information. Thank you, Mr. Welch.

WITNESS WELCH: Thank you. (Applause)

MR. SHREVE: Mr. Welch, you did a nice job of reviewing everything. Did you gather from your reading there that the one thing that is consistent is that regardless of how high the rates go, Southern States still wants that amount of money, that there can be no unreasonable rate or any individual system as far as they're concerned?

WITNESS WELCH: Could you state that again?

MR. SHREVE: All right. Southern States is saying how much money they're entitled to from each individual system. Then they get over to the uniform versus stand-alone rates. But as far as Southern States is concerned, $316.73 for 6,000 gallons for Chuluota is not an unreasonable rate. To me -- did you read or gather from yours that they're asking for

this revenue across the board and there would be no rate really that would be unreasonable?

WITNESS WELCH: I really am not qualified to answer that, but I do know that if I have a kitchen remodeled and it takes me four and a half months to get a contractor to respond, and I'm not using water and I'm eating out, if I don't use the appropriate amount of water per month, I feel like it's possible for a company to come in and say, "Well, something must be wrong here. We're going to bill you regardless of how much water you use. Because remember, if it goes through the meter, you pay for it."

MR. SHREVE: Yes, sir. Thank you very much.

CHAIRMAN CLARK: Mr. Welch, I've been asked to point out two things to you. That testimony you read from is what we call prefiled testimony, and Mr. Ludsen will take the stand in April and he will be subject to cross examination by the intervenors and by our Staff and we will explore those issues as part of that hearing. I would also point out we don't guarantee a rate of return to any company. We provide the opportunity to earn that fair rate of return provided they operate efficiently.

WITNESS WELCH: Okay. Well, that's an

assumption, and I'm hear to voice an opinion about the assumption, I suppose.

CHAIRMAN CLARK: Okay. Thank you.

WITNESS WELCH: Thank you. (Applause)

MR. SHREVE: Thank you, sir.

- - - - -

MR. SHREVE: Representative Ball.

RANDY BALL

was called as a witness on behalf of the Citizens of the State of Florida and, having been duly sworn, testified as follows:

REPRESENTATIVE BALL: Randy Ball, B-A-L-L, and I'm a state representative for north Brevard County, and the citizens of the great town of Nims brings you greetings.

After all I've heard today I'm not sure I'm really need. There's two issues that you're addressing today. One is the rate hike and the other is the question of uniform versus stand-alone and I only want to address the second one. When I first heard about it -- it's been suggested here today that if you're for the uniform perhaps it's only because of the financial burden that you'll bear otherwise. And truly in my district that would be the case. We've got two little subdivisions, Kingswood and Oakwood,

and they would bear a little bit of a financial burden if we went to it. But I know in my own heart, I've supported the principle of a uniform rate in the past. And just one analogy that I wanted to give is I have a Border collie, and when I go to the veterinarian I know in the course of her life. All we've done the routine exams and we've done the pills and we've done the immunizations. And I know that I pay a little bit more than I need to do, but I know that I'm paying for the poor fellow's Border collie who gets run over by a sheep and has to have surgery. I'm subsidizing that surgery. And though my dog has never had to have anything like that, I have never had a problem with paying a little bit extra so that the other guy can have his rate a little lower.

So I think I'm very forthright when I support this principal. And really I don't have a whole lot of other things to tell you. I believe it's a good principal, and I think you see the analogy. And there's capital improvements that come expected and unexpected and by having a uniform rate it helps everybody and I think the best way to assure a uniform and uniformly fair and affordable price and cost. So I just ask that you'll consider that and unless you have any question of me I'm finished.

COMMISSIONER GARCIA: Representative, you said Kingswood wood and what was the other?

REPRESENTATIVE BALL: Oakwood.

COMMISSIONER GARCIA: Oakwood.

REPRESENTATIVE BALL: Kingswood and Oakwood.

COMMISSIONER GARCIA: Thank you. Appreciate that.

MR. SHREVE: Thank you, sir.

CHAIRMAN CLARK: Thank you, Representative Ball.

- - - - -

MR. SHREVE: Representative Marvin Couch.

MARVIN COUCH

was called as a witness on behalf of the Citizens of the State of Florida and, having been duly sworn, testified as follows:

REPRESENTATIVE COUCH: Good morning. I represent District 33, which the communities that are served with SSU is Daetwyler Shores, Chuluota and Deltona.

I also serve on the Utilities and Telecommunications Subcomittee in the House, so I understand the volatility of this issue that you're dealing with. I hear both sides of it. But, you know, we're talking about uniform rates, and I'm not

going to discuss this in detail, but the way I feel about uniform rates personally is that when we look at all utilities we basically use the uniform rates to get the prices down. And what we have to prove, I guess, if we're going to do uniform rates with water and wastewater is to prove that it's functionally related, all the communities are functionally related.

Now, when you look at the price increases that we're getting because of water and wastewater because of environmental impacts and environmental regulations, I think that in itself proves that it is all functionally related because it's protecting the environment and that's why the costs are going up. So, personally, I strongly believe in the uniform rates. It's something we use in telecommunications, electric, and it's something I think we should use in water and wastewater.

But as far as the rate increase, I personally believe that the rate increase is premature, especially when the 1993 rate structure is still pending. And when you look at the rate increase that is supposed to be fair, just and reasonable and then you look at Chuluota which is part of my area and look at the increase of $271 a month, which that is more sometimes than the mortgage, I don't think that's

fair, just and reasonable. So I think that -- and since I serve on the utilities subcommittee, I know there are going to be some members that are going, statutorily, to try to say that the state is going to be on stand-alone rates. That's a battle we're going to have in the House. But with all of the uncertainty we're having here right now, I think if we do a rate increase at this time I think it would be inappropriate, and I think we ought to wait and see how the 1993 rate structure case comes out before we do a rate increase. I think that would be the fair and equitable way to do things. Thank you.

CHAIRMAN CLARK: Thank you, Representative Couch.

MR. SHREVE: Thank you very much.

MR. SHREVE: Senator Ostaikiewicz.

- - - - -

JOHN OSTAIKIEWICZ

was called as a witness on behalf of the Citizens of the State of Florida and, having been duly sworn, testified as follows:

SENATOR OSTAIKIEWICZ: Thank you. I don't have a lot to say except this: You know I have constituents in Chuluota and a lot of places that are served by this Utility. And they're facing increases

that they cannot afford. Now, I'm not talking about, you know, that they don't like it or perhaps it's a little inconvenient. I'm talking about rates that my constituents just plain cannot afford.

I do not think it is reasonable that a utility can raise the rates this high this fast. And I have to tell you is that -- and I know that you have a tough job to do and you're hearing from both sides, but what I would encourage you to do is look at this in the most favorable light to the people that are receiving the water and receiving the services. Do not look at things in the most favorable light to the Company.

I would encourage you to look at productivity of the Company, look at how much money they're spending on public relations, executive perks. In other words, if they're entitled to a rate of return that should be predicated on an efficiently run operation. I'm not saying it's not efficient, but what I'm saying is that you should make every effort to make sure that you are looking after the people who have to pay these rates.

Secondly, as I would say, is that we need uniform rates. You know, you cannot charge somebody as much as a mortgage for water and sewage. They

can't afford it. And, you know, one of the basic covenants of government is to be reasonable and to be fair, and these rate increases are not reasonable and they are not fair. And I just want to stand here publicly and tell everybody that if there's something we can do in the legislature to fight this, we certainly will because we want to stand up for the people who put us in office. And with that I thank you.

CHAIRMAN CLARK: Thank you, Senator.

(Applause)

MR. SHREVE: Thank you, Senator.

- - - - -

CHAIRMAN CLARK: Let me ask you a question, how many more people do we have?

MR. SHREVE: Seven.

CHAIRMAN CLARK: Mr. Shreve, let's take a ten-minute break and give our court reporter a break, and then we'll continue on and finish the seven people we have rather than taking a lunch break. Thank you. We'll come back in ten minutes.

(Brief recess.)

- - - - -

CHAIRMAN CLARK: Ladies and gentlemen, we're ready to start back up.

Before we call the next witness, I would like to indicate that I'd like to have the Company look into Mr. Mycock's statement that he is paying for an one-inch meter and has only a seven-eighths inch line. Would you please let us know the status of that? We're concerned as to whether he should, in fact, be paying for a three-quarters rates on his meter and if he should receive a refund. And if you'd make sure you get that information to the Commission, specifically to Stan Rieger, I'd appreciate it.

MR. FEIL: Yes, ma'am.

CHAIRMAN CLARK: Mr. Beck, would you call the next witness?

MR. BECK: Yes. Commissioner Pat Warren.

- - - - -

PAT WARREN

was called as a witness on behalf of the Citizens of the State of Florida and, having been duly sworn, testified as follows:

COMMISSIONER WARREN: Good afternoon. I have been where you sit, and I welcome you. I know this is a difficult task for you, but I'm going to try to appeal to you and also give you some facts to measure by. I have a lot of citizens that live in Chuluota and then across west I-4 as a County

Commissioner that I'm accountable for, so when you look at my face I want you to see hundreds of citizens who could not be here today.

COMMISSIONER KIESLING: I'm sorry, Commissioner, I didn't get your name.

COMMISSIONER WARREN: Pat Warren, Seminole. County Commissioner.

Those hundreds of faces, some of them are working today, some are them are at home disabled and some of them are seniors who didn't have transportation here. I need you to understand, as I do, every decision I make, you're affecting the lives of people.

I am a very pro-business Commissioner. I believe in a good honest profit for companies and for businesses, so I'm not saying people should not have a profit. I'm saying that profit should be reasonable. if it's not government operations, it has a right to some profit. I think that we're bordering on extremely very damaging maximum profits on the back of maximum stress to citizens and I speak to that.

I think the formula of stand-alone versus uniformity is one that I can't touch as a Commissioner because I have citizens on both sides. Uniformity is generally generically a system that I believe in. I

pay school taxes. My children are not in school, so I understand uniformity. I think that the stand-alone is a fright tactic, and I don't like that formula. But I've got citizens that will benefit and/or be lost on either side.

My thrust today is to tell you that reasonable profit is what you ought to be measuring. And in order to measure that, I want to present to you that Seminole County has a water and sewer business. County government and all governments are supposed to be bureaucratic and much more costly than private. I will present to you that we just had what we considered to be a very difficult move to raise taxes, utility taxes, 9% in Seminole County. Meaning to the average household $3.50. That's a lot different than the $271 to my citizen out in Chuluota, many of whom cannot be here and absolutely cannot afford it. So there's something wrong with the formula. And the flaw that I see is in the formula and the outreach for maximum profits.

I do want to -- I will say that the SSU proposal -- let me compare for you just a moment. The water and sewer for Southern States as it stands now to be on the average of 6,000 gallons using their figures is $66.54. Seminole County, under the very

same computations, and our profit lies in our citizens' services, is $37.19. So somewhere in here, ladies and gentlemen, I would submit to you that there's a room for them to have a profit but not the maximum profit that's being spoken to today.

COMMISSIONER GARCIA: Commissioner, if I could ask you question --

COMMISSIONER WARREN: Sure.

COMMISSIONER GARCIA: If you don't know the answer, that's fine. Does the city at all subsidize its water facility?

COMMISSIONER WARREN: I'm sorry.

COMMISSIONER GARCIA: Does the city at all subsidize its utility system?

COMMISSIONER WARREN: No, sir. It's an enterprise fund. It stands alone. It supports itself.

COMMISSIONER GARCIA: Does it generate any revenue.

COMMISSIONER WARREN: And I might tell you that our bond rating is an AAA. So we do it. We do it well. It's enterprises. It is self-sustaining, self-sufficient, the salaries of the employee who deal with that are included in this $37.19 to the average homeowner, water and sewer.

COMMISSIONER GARCIA: Thank you, Commissioner.

COMMISSIONER WARREN: And I'm very proud of the AAA bond rating which makes it that much more cost effective.

I mean if they were selling gidets and widgets and they could make a maximum profit of this sort, fine; I have a choice to buy that. Citizens don't have a choice on water and sewer. That's a mandated thing. God gave us the water and man is supposed to handle it responsibly, and I think in the handling of that responsibly, maximum profit is not in the computation, in my opinion.

I believe that -- I've spoken to the raise that we have increased. I wanted to mention that to you. I would suggest to you as you approach this decision I wanted to compare county government cost to private cost and have you think on that. And as you make this decision, please walk in the moccasins, as I do with every decision I make, especially on taxes. Because the ones that you hurt the most are the ones who can afford it the least. And they're often not even in the audience with all of these folks that are here. Remember and multiply these faces hundreds of times because it could be your mother, it could be

your aunt, it could be your single parent daughter that has a problem that these kinds of rate increases price you out of any quality of life at all. And I would appeal to you to consider that in your decision. Thank you.

CHAIRMAN CLARK: Thank you, Commissioner.

MR. SHREVE: Commissioner, thank you for your testimony, and I'd like to ask you the figures that you gave comparing Seminole County's rates and Southern States, were those the requested rates that were furnished by them that you have? The $66?

COMMISSIONER WARREN: That is the proposed rate -- that increase?

UNIDENTIFIED SPEAKER: They're the numerals in the last --

COMMISSIONER WARREN: They're strictly based on the last column proposed for a 6,000 usage which, you understand, is a very low usage.

MR. SHREVE: Yes. I'd like to furnish to you the rates that they -- the money they would like to pull out of the system, not represented just by the uniform rates, because regardless of whether you have uniform rates or stand-alone, as you said, there are people on each side. Southern States has an amount of money they want to take out of the system, and I'd

like to furnish that to you and I think it compares, is shows that your system in the city is much, much more favorable rates even than those comparisons.

COMMISSIONER WARREN: Actually, this is the county and, as you know, it would be much more difficult to deliver water and sewer countywide because the rural areas and the outreach is greater.

MR. SHREVE: Right. I didn't know if you had been furnished these figures. Before the 1992 case, Southern States Utilities' revenues out of Seminole County were approximately $594,000. But the increase that they have asked for coming out of this rate case, what they have asked for is $1,363,000 out of Seminole County. Now, that's all of your customers, that's what they want regardless of who pays for it. For sewer, the revenues coming into Southern States prior to the '92 case was $194,000, $554. They want to go to $658,000 from your constituents. Thank you very much.

COMMISSIONER WARREN: I would like to say to that, I appreciate the large numbers. It's more dramatic and it certainly makes the point.

I live on the local front with citizens and I live at their door front and at their household, and when I measure, I try to measure the personal impact

to a citizen and that's what I'm coming to. I have known, for instance, in Chuluota -- let me just diverse a moment -- there is a sewer plan out there that was in gross need of repair when I was first elected Commissioner seven years ago. I worked with Southern States, and would certainly thank Mr. Sweat for working closely with me eventually to come to a corrective problem area and to provide better quality of service out there. So I do thank Southern States for that. They work well. And, of course, in government we have to get the money, the taxes before we do the job. They've done the job and now want the money. And to Mr. Sweat and all of my acquaintances at Southern States, I've got to say you're asking for too much, absolutely too much. So please consider that.

COMMISSIONER GARCIA: Commissioner, is the county in a growth mode in terms of providing water right now?

COMMISSIONER WARREN: We are in a growth mode. We have, I believe, 2.5% that is locked into these figures of the 9% increase that we just made. But if our growth goes bigger than that, it will mitigate or drop down the percentage needed, so the citizens will benefit if we grow more.

COMMISSIONER GARCIA: If I can ask you, do you have an impact fee for new development on water?

COMMISSIONER WARREN: Sure. I believe the last time I remember was 1500.

UNIDENTIFIED SPEAKER: Water is 995.50 unincorporated.

COMMISSIONER GARCIA: Commissioner, if you repeat what he just said into the make so we can put it into the record.

COMMISSIONER WARREN: Okay. Water is $950 for impact fee connection. This is Bill Briggs. I apologize, but he can give you some facts.

COMMISSIONER GARCIA: Speak into the mike.

WITNESS BRIGGS: Our water is $990.50. It's predicated on the usage of the 350 gallons a day. Our Wastewater is $2,100, and that's based on usage of 300 gallons a day.

COMMISSIONER GARCIA: And that's for all new development?

COMMISSIONER WARREN: Connection fees. Or if a person is on a well and wants to connect, they have to take that. Any new connection.

CHAIRMAN CLARK: Commissioner Warren, we -- What I would like to do -- I presume you were not sworn in. Let me swear him in, so if we have need to

rely on those facts and figures.

COMMISSIONER WARREN: Swear us both because at that time I was going to try to be quiet and I just couldn't.

CHAIRMAN CLARK: You were here when I sworn people in, were you not?

COMMISSIONER WARREN: I was, but I did not stand.

CHAIRMAN CLARK: All right.

(Witnesses collectively sworn.)

CHAIRMAN CLARK: And the testimony you have previously given has been the truth.

COMMISSIONER WARREN: Yes.

- - - - -

BOB BRIGGS

was called as a witness on behalf of the Citizens of the State of Florida and, having been duly sworn, testified as follows:

CHAIRMAN CLARK: Now, if you would let your staff person state his name for us.

BOB BRIGGS: My name is Bob Briggs.

CHAIRMAN CLARK: Spell your last name.

WITNESS BRIGGS: B-R-I-G-G-S.

COMMISSIONER GARCIA: Mr. Briggs, since we have you here, maybe I can ask you a few quick

questions. The Commissioner stated you're in a growth mode. What do you think overall your system -- what's the growth more or less in terms of percentage on a yearly basis?

WITNESS BRIGGS: Last year water grew at about 3.25%, wastewater was around 2.5. This year, fiscal year '96, we're in a growth mode forecast at a lineal rate of about 2.5% for water, sewer will be somewhere around 2.

COMMISSIONER GARCIA: Okay. And are you reaching out -- have the county purchased any of the local systems that were there from developers before, or is it a wholly-owned and wholly-operated, wholly-created system from the county.

WITNESS BRIGGS: No, the county utility began with an acquisition in 1967 --

COMMISSIONER GARCIA: Could you speak right into the mike because I can't hear you.

BOB BRIGGS: The county began an acquisition in 1967 of the Utility, approximately. The last utility that we acquired was Lake Monroe Utilities and that was about 1989 or '90, and that's the last time.

COMMISSIONER GARCIA: Was it Lake Monroe Utilities you called it?

WITNESS BRIGGS: That's correct.

COMMISSIONER GARCIA: Commissioner, if we were to ask you -- I guess we could do it through your office, but if our Staff was to ask you for certain information on how the county has done certain things, would you be willing to give us those records and let us look at them so we could use them as a comparative format to what Southern States is doing?

COMMISSIONER WARREN: Our books and staff are open to any request that you have to reach a better conclusion.

COMMISSIONER GARCIA: What's the name of that utility, last purchased, 1990, Lake what?

WITNESS BRIGGS: Lake Monroe Utilities.

COMMISSIONER GARCIA: Lake Monroe.

BOB BRIGGS: That's correct.

COMMISSIONER WARREN: I might comment that we have been offered several other utility systems and because of their enormous presumption that they were more valuable than they were we declined that. I believe that we have probably proved today that government in some things do some things better than private business. No reflection on our esteemed gentlemen from SSU. But I just think that collectively on service like water and sewer where it's vital; it's not a choice, I think we have to be

extremely careful with our citizens.

COMMISSIONER GARCIA: Commissioner, you just stated that there had been certain opportunities to buy other systems, but when you looked at them the prices were too high. Would that include, and if you don't know that's fine, too, would that include any of the systems that Southern States Utilities ended up purchasing.

COMMISSIONER WARREN: No, we have not approached Southern States nor have they us.

COMMISSIONER GARCIA: No, no, but did the county find itself purchasing or in the same --

COMMISSIONER WARREN: Competitive with SSU?

COMMISSIONER GARCIA: Yes.

COMMISSIONER WARREN: No.

COMMISSIONER GARCIA: No.

COMMISSIONER WARREN: No, a city purchased one system up in southern Seminole County, and we were offered one, the Sanlando utility, which is a private owned utility, and the price was a little too steep for us. We would have had to have raised the rates uniformly across the county, and we did not feel that would be quite the thing to do.

So I commend SSU for their operations. I just question that edge of margin that is high profit.

Thank you.

CHAIRMAN CLARK: Thank you, Commissioner Warren.

MR. SHREVE: Thank you, Commissioner.

- - - - -

MR. SHREVE: Mr. Gene Carr.

GENE CARR

was called as a witness on behalf of the Citizens of the State of Florida and, having been duly sworn, testified as follows:

WITNESS CARR: Madam Chairman, Commissioners, I appreciate the opportunity to be here before you and give some additional testimony. My name is Gene Carr, and I live in the Apple Valley Subdivision and that is also my water service.

I don't have a whole lot to add to my testimony that I gave before, so I won't take too much time.

But I wanted to come before you today and give a few more points.

On January 19th Southern States Utilities had a meeting at the Holiday Inn in Winter Park and they asked Southern States customers to come in because they wanted to talk to us. It was an information meeting about the uniform rates versus the

stand-alone rates and so forth. But during that meeting the person giving the presentation made the statement that Southern States Utilities will get their money and the only thing to be decided was who was going to pay it. And that indicated to me that they felt as though they had already cut some kind of a deal, and I thought that was a little bit presumptuous on their part to make that kind of a statement. They also mentioned that they expect to make 12% return on their investment, which is a little bit high. I don't believe anybody in this room can turn 10%, let alone 12. I know I can't.

And what is a fair -- a fair rate of return is something I don't know. But the Utility seems to have little incentive to really economize on their operation.

Years ago our bills used to come out and they were on a simple little card. The cost of producing that was minimum. But it gave us only the information we needed. The water we used and the rates and the amount we are to pay. Now they have got laser printers and all kinds of fancy invoice statements. I don't require that. I don't think anybody in this room requires such fancy presentations of a bill they are supposed to pay, but yet the

equipment that they have purchased to do this is part of the pass-through that we have to pay for in their equipment needs. And I think economizing on things like that and all of their office procedures throughout the field and throughout all of their operations should be looked at very, very carefully to determine what is reasonable. And if they want to give us laser-printed bills and buy the equipment then part of it should be on them.

COMMISSIONER GARCIA: Mr. Carr, if I could ask you a few quick questions. How many people attended that meeting?

WITNESS CARR: I would say there was about six or eight customers and there were about six people from Southern States attended, also.

COMMISSIONER GARCIA: And the whole thrust of the meeting was pushing the concept of uniform rates?

WITNESS CARR: Yes. Yes, they were in favor of uniform rates. I'm on the fence here about uniform rates.

COMMISSIONER GARCIA: If I could ask you, at that meeting -- you always have a lot of questions for us at the Commission and you are always attending these hearings which I congratulate you for. When you

asked questions of Southern States Utilities at that meeting, were they forthcoming with the information and did they provide all of the answers that you wanted there?

WITNESS CARR: Basically, I would say yes. I would say yes, basically. Most of it -- I mean, I felt it was, of course, propaganda on their part. They are trying to sell uniform rates. They are trying to tell rate increases. They're trying to tell us how much they spent. The millions of dollars they put into equipment and so forth which, you know, is in all of their literature.

But I would urge the Commission that if uniform rates are the coming thing, that there should be some ability for the people of Florida to justify and to check the accountability of each and every one of these 152 plus systems as to what has actually been spent in that system. We have no idea of what has been spent in any of these systems. That they are asking for these rates. They say they've spent this money, but we have no idea of where all of this money is going. I think there ought to be some ability to check the accuracy -- I don't know whether special Commission would have to be set up for that, but somebody ought to check rather than just take a

blank --

CHAIRMAN CLARK: Mr. Carr, that's what this rate case is about. We will be checking whether or not they've made the investment, whether it was prudent to make that investment. Mr. Shreve will be looking at it. We do an audit of the company. We send our auditors and engineers out there to look at the books and records. They look at the plant and they verify that it was, in fact, made, and they also look at whether it was prudent to do it the way they did it. If it's not prudent the way they did it, it's not allowed. So we do look at that.

WITNESS CARR: That's great. That's commendable. I would hope that there could be some check and balances as to the truth of the --

COMMISSIONER GARCIA: And even though the Company may have given you the impression that this is a "done deal," this is a long way --

WITNESS CARR: Well, I didn't mean to give that impression.

COMMISSIONER GARCIA: No, no, I understand. I'm just -- because you made a statement, I didn't want to let it hang there. Clearly, there is not a done deal. This has a lot of -- we're just at the beginning of this process.

WITNESS CARR: Well, I was hoping that was the case. Believe me.

MR. SHREVE: Commissioner, and Mr. Carr is right, I agree with you and appreciate your pointing that out. So I guess we can assume, in spite of what Southern States says, that all of us that are interested in not allowing the rate increase can still participate in there. But it seems they are telling the customers that it's all over and unless you have an interest in the uniform rates, stand-alone, not to get involved. And I appreciate Mr. Carr's -- and I understand that from the Commission standpoint it is not a done deal. And I don't appreciate at all Southern States intimating that they already know what they're going to get.

WITNESS CARR: Well, I knew that was the case, but I thought it was a little bit out of the ordinary for them to get up in a public meeting and make this statement. I mean, it shocked me, you know. And it gave everybody there in the room the idea that something had already been cut. Now I know the workings of the Commission better than to know that something like that has happened, and I don't mean to suggest that I was suggesting that.

The question of adjustable rates due to

weather was brought up and that came up in the last public hearing, as well, as to a way that Southern States wanted to have a adjustable rate due to weather that during dry years when nobody used any water the rates would go up and in wet years, when there was a lot of war -- when there was a lot of water and nobody used it, like we've had in the last two years, that rates would then go up because the Utility would not sell as much water. And in dry years we would use a lot of water and the rates supposedly would go down.

I don't know how that's going to be administered. I don't know how anybody could administer that in a fair and just way. So the flexible rate idea is not going to fly in my book. And I don't think the Commission should consider a flexible, adjustable rate of that nature due to a condition that we have no earthly power over. And it seems that every time -- every time the customers are asked to conserve water in every way they can, the state asks us to conserve as much water because the aquifer is a very gentle item, and we all must be appreciate that it's not a finite -- or it is a finite quantity of water down there. And every time they ask us to conserve water, and we comply with their wishes and do everything we can, our water rates go up

because the water companies sell water.

This is something that has to be addressed. And that's about all I have that I wanted to talk about today.

CHAIRMAN CLARK: Thank you.

WITNESS CARR: I appreciate coming before you and hearing all of these people. The citizens of Florida really appreciate meetings like this.

COMMISSIONER GARCIA: Mr. Carr, thank you, thank you for coming. I know you never miss one of these. We're very appreciative of that. I'm sure Mr. Shreve is also very appreciative of your participation.

WITNESS CARR: Okay. That you very much, sir.

MR. SHREVE: Thanks, Mr. Carr.

- - - - -

MR. SHREVE: Mr. Harold Martin.

HAROLD MARTIN

was called as a witness on behalf of the Citizens of the State of Florida and, having been duly sworn, testified as follows:

WITNESS MARTIN: Good morning -- afternoon, I guess. My name is Harold Martin, M-A-R-T-I-N. I live at 571 Fifth Street Chuluota, Florida. I'm very

appreciative of our representatives showing up here today and speaking and they pretty well said everything I would like to say, so I don't want to bother you with all of that. I did get my water bill this morning, and according to the rate prior to January 23rd, we used 2,740 gallons last month and my total water and sewage bill was 31.54. No, basing my usage at 3,000 gallons for next month, or the rest of this month and next month, my water bill would go to a total of $63.50 for one month. And according to the best of my ability to figure this out. My water increase would go 125%; and the wastewater bill would be a 92% increase.

And as they stated before, they're asking for a 10-point-something, that I understand. That's what was on the paper, that they are wanting a 10.4 profit. I understand someone else said it's 12-something.

MR. SHREVE: They want a return on their investment, like interest or the return, 12.25. The figure they put out of 10% is an average of interest and that.

WITNESS MARTIN: Anyway, we've had all kinds of construction going on out there at the present time, new water system. They're putting in new water

lines, putting the meter out in front of the houses in place of back in the alley. I wonder if all of this is considered as being in there, or are we going to be asked to pay for that next year as another increase for what they are doing today.

COMMISSIONER GARCIA: I'm sorry. What did you say, they are putting in stuff in your backyard, you say?

WITNESS MARTIN: Well, all of the construction they are doing right now.

COMMISSIONER GARCIA: In your neighborhood.

WITNESS MARTIN: In my neighborhood.

COMMISSIONER GARCIA: How much has it grown in the last year? Ballpark, we're not going to hold you to this. Has your neighborhood doubled, had it gone up a third?

WITNESS MARTIN: Very little. There's been little growth individually. In fact, Mr. Bruce was here, he's talking about building the 37 to 39 homes. That would be right across the street from me. I happen to live on a dead-end street and for one whole block there is no other houses, but he will build on the other side. So he'll have nine houses on the other side of the street in that city block.

As far as driving up and down the streets

where there is sewage, we have nothing but sinkholes over the years where there have been sewer leaks. Last year they went in and they lined the sewer to stop up the leaks. We still have the sinkholes in the road.

COMMISSIONER GARCIA: This is SSU?

WITNESS MARTIN: Right.

COMMISSIONER GARCIA: Okay. Let me just ask you, there were leaks in their mains and that was creating sinkholes and SSU last year went in and --

WITNESS MARTIN: Right. Water and sand was leaking into the sewer, and it has been doing that for years. I've lived there 30 years and they've always leaked.

COMMISSIONER GARCIA: Right. And so they went in and fixed all the leaks so you don't have anymore sinkholes?

WITNESS MARTIN: They finally went in and patched that after all these years that they could have done it, they nerve did. That's about all I have to say. Thank you.

CHAIRMAN CLARK: Thank you, Mr. Martin.

MR. SHREVE: Mr. Martin.

WITNESS MARTIN: Yes.

MR. SHREVE: In Chuluota I notice the

customer growth from the rate case in 1992 until 1995 is, I believe, four customers; from about 132 to 136. They want revenue to go from $40,000 for that community to them to $350,000. Is there anything in your community that would justify that type of a revenue increase for Southern States, from $40,000 to $350,000?

WITNESS MARTIN: Not that I can see.

MR. SHREVE: Thank you, sir.

WITNESS MARTIN: Thank you.

- - - - -

MR. SHREVE: Ileen Mulvihill.

ILEEN MULVIHILL

was called as a witness on behalf of the Citizens of the State of Florida and, having been duly sworn, testified as follows:

WITNESS MULVIHILL: Good afternoon. I've never done this before, so forgive me if I appear to be a little on the nervous side. My last name is spelled M-U-L-V-I-H-I-L-L, and I reside at 701 Nardello Drive in Deltona Florida.

COMMISSIONER GARCIA: Could you state your name again because Mr. Shreve always gets the pronunciation wrong.

WITNESS MULVIHILL: Ileen Mulvihill.

MR. SHREVE: I was exactly right, wasn't I.

WITNESS MULVIHILL: I'm speaking on behalf of my husband and myself. We have been long-term residents of Deltona from the beginning of the '80s, renting first on Wellington Drive while our house was being built. We live in what would be called the first area of Deltona.

We both, as I said, for my husband and myself are totally against any rate increase. I've never come and spoken nor have come to any meetings before. My husband did want to have me express that he is very grieved and disappointed over the meetings being during working hours of the average working class individual and not in the evening to cover Deltona area people. It's always in the daytime when we look at the list of the meeting times. He would have liked to have attended himself. Ever since we have resided in Deltona in the early '80s, my concern or our concern has been over the quality of the water of Deltona. From the time that it was Deltona Utilities to the time that SSU took over, the quality has not changed one bit. I was diagnosed in 1989 with chronic viral hepatitis and prior to that for numerous years I had gotten very, very sick. I don't want to offend anybody but with pretty much ongoing diarrhea.

And I went myself through a process of elimination of foods, chemicals and I would go organic, and I would stop drinking the water and it would go away. And I would begin drinking the water again, and the condition would return. But when the diagnosis of chronic viral hepatitis came, my gastroenterologist told me that I needed to drink a lot of water, which I do anywhere. I drink anywhere from 12 to 15 glassed, eight-ounce glasses daily as just my normal. And as the hepatitis increased and I ended up going on chemotherapy, I was getting increasing sickness again from the water and I switched to bottled water. My gastroenterologist asked me to bring in sample of the water and he looked at it. After unscrewing the top of it and took one smell and said don't ever drink that water from where you live. And I do drink bottled water right now. But just the smell of turning it on, whether it be for washing dishes, or even for the washing machine, or even bathing, I start getting nauseous from the smell of it, and this is a tremendous concern.

COMMISSIONER GARCIA: Ma'am, may I ask you, is the smell, is it the sulfur content the smell or is it the chlorine that they're putting in? What smell is it?

WITNESS MULVIHILL: As far as I'm concerned it's both the chlorine and the sulfur smell.

COMMISSIONER GARCIA: Are you having a lot of variation in that? I mean, some days there is too much chlorine and some --

WITNESS MULVIHILL: It's always a very, very high smell of chlorine, extremely high smell. And many times I have to wear a face mask when I use the water quite a bit of doing -- whether it be dishes or washing laundry. I have attempted to drink the water again on numerous occasions by just letting it aerate, which some people have mentioned, and it still does no good because I still continue to get sick.

COMMISSIONER GARCIA: Let me ask you, in that area there has been a lot of growth in Deltona in the last few years. Has there been a lot of growth in the last two years in your system? In other words, a lot of people moving in and a lot of new --

WITNESS MULVIHILL: In our particular corner -- we're a corner lot, there has, yes, since we moved into our house, there has been a house next door built and two houses across the street that were built. And that's really about it, as far as immediately right around our house. Up the street a bit, yes, there have been other houses built, but as far as the

quality of the water, and my so-called medical condition and concern, there has not been a change at all from the takeover by SSU where I still can't -- the small has not changed, the quality, the clarity of it.

And the other area of concern that we are against any increase in rates is because of what I have and my husband has observed on Whitewood. On Whitewood almost in the intersection of Wellington, because I use that route quite often, there was a water manhole that was dug up maybe two and a half weeks ago. This has been dug up, we seem to recall, maybe twice before in the past year to two years. And maybe about two to two and a half weeks ago it was dug up again.

And I drove by early in the morning when it was in the process of being dug up and there had to be six to seven workers from SSU around this site. And two of them were working and the rest of them were standing like this, or with their hands in their pockets, just talking with one another and just walking back and forth and not being concerned or participating in what was going on as far as digging it up.

To this day, as of last night -- I didn't go

by this morning -- that was patched up, it looks like, with a barricade. It is right smack in the middle of the road, not off to the side, and the barricade is over the water hole -- cover, whatever it may be, with just one barricade. Very easy for a car to plow into at night let alone even during the day with the amount of elderly that live in the area, because there were times when I almost ran into it. I am a very cautious driver and have an excellent driving record. That is a concern.

And my husband and I have observed this elsewhere in Deltona with employees. Numerous employees on one job and more than half of them are just standing around with their hands in their pockets or their arms folded across their chest. But the quality is the biggest concern and having the medical condition, you know, being such. And we're considering selling our house and trying to move out, but it appears that SSU is everywhere that we need to go, because my husband working for Sprint Telephone in Orange City. So no matter what we're going to have to continue to reside somewhere in the area and still be under SSU. So emphatically we're opposed to any rate increase, no matter what.

CHAIRMAN CLARK: Thank you.

COMMISSIONER GARCIA: Ma'am, I just want to let you know -- I mean, I understand that your being here is more than sufficient, but if your husband does want to speak we're going to be at Mount Dora this night.

WITNESS MULVIHILL: It's too far from Deltona for somebody who doesn't know what time they usually get off work, sometime 7:00, 730.

COMMISSIONER GARCIA: I just wanted to let you know. Thank you.

MR. SHREVE: Thank you. (Applause)

- - - - -

MR. SHREVE: Mr. Mayo.

RAYMOND G. MAYO

was called as a witness on behalf of the Citizens of the State of Florida and, having been duly sworn, testified as follows:

WITNESS MAYO: Yes. Good afternoon. My name is Raymond Mayo, M-A-Y-O. I live at 470 Glen Haven Drive, Deltona. And you'll have to excuse me also for being a little nervous here, and I thank you for the opportunity to come before you.

I think it all comes down to choices. SSU has made several bad choices, I feel. They're purchasing ill-maintained dilapidating systems,

they're dumping thousands and millions of our dollars into rehab'ing these systems and trying to make something usable of them.

The question about quality, another gentlemen spoke about the well that's near the corner of Fort Smith and Courtland. I live within 1,000 feet of that well. I don't know what the engineering aspects of that well are, but it's my understanding that there are three chlorine cylinders hooked to that well. When that well comes on, it's automatically injected with chlorine and that there is no ground storage or aeration time at all.

The taste at my house, it's sometimes a extreme chlorine taste. And being in the business myself -- I am a lab technician and a licensed water and wastewater operator -- I can't point my finger on the taste, but it's something like a plastic, chlorine, kerosene.

Again it all comes down to choices. I don't have any choice. If I chose to live in Deltona, I'm stuck with Southern States Utility for water. I can't drill a well. Public Service Commission is here for me to try to fight for me, and I would like to see that they not only not get a rate increase but have their service checked out thoroughly.

COMMISSIONER GARCIA: Could you speak to one of our engineers before you leave about your water problem.

WITNESS MAYO: Okay.

CHAIRMAN CLARK: Thank you, Mr. Mayo.

MR. SHREVE: Thank you, sir.

- - - - -

MR. SHREVE: Mr. Schrimscher

FERREL SCHRIMSCHER

was called as a witness on behalf of the Citizens of the State of Florida and, having been duly sworn, testified as follows:

WITNESS SCHRIMSCHER: Good afternoon, Commissioners, staff, representatives and ladies and gentlemen. I think that just about all that I wanted to say has been said.

CHAIRMAN CLARK: Will you give us your name again and spell your last name?

WITNESS SCHRIMSCHER: I'm sorry. My name is Ferrel Schrimscher.

CHAIRMAN CLARK: Spell that, would you?

WITNESS SCHRIMSCHER: F-E-R-R-E-L, first name and the last name is S-C-H-R-I-M-S-C-H-E-R.

CHAIRMAN CLARK: And the system you get service from?

WITNESS SCHRIMSCHER: Ma'am?

CHAIRMAN CLARK: The system you get service from.

WITNESS SCHRIMSCHER: We get it from SSU in Deltona.

CHAIRMAN CLARK: Okay. Thank you.

WITNESS SCHRIMSCHER: Okay. I'm just about

one of the pioneers of Deltona, I think many before me when Deltona was developed. We came shortly after that.

We bought land there in 1968 and we built there in 1970 down in the first area. One of the ladies that just spoke in the area there, Wellington and, I think, Deltona Boulevard, we're right in that vicinity there. And when we came here to Deltona I worked with the power company, Florida Power and Light in Miami and transferred here in that same year, even though we were visiting up here.

Deltona Utilities was the utility company and we never had a great amount of problems, even though there were little ones that had to be worked out, such as the staining in the water and a little bit of smell. And, of course, they had their rate increases, but they weren't humongous as to be what they are now being asked by SSU. And looking at the paper I notice that, of course, they want an 87% increase. This to me seems to be unjust and unfair. Especially to many of the elderly people that are in Deltona. I know in our own church, the First Baptist Church of Deltona, we have approximately 50 to 60 widows, and I teach a Bible class and I have about half of these in my Bible class. And they tell me

that they have -- and I know for a fact because I have been to their homes, they have a very difficult time on Social Security. Their range might be $500 to $600 a month and they have a tough time even putting food on the table. It's very hard for them. And things like this come along and I think there's been a rate increase by SSU in 1992 and 1993. And I think they bought the company out, Deltona Utilities, someplace in the '80s. And since that time it's been very hard for them with all of these increases.

I've talked to some of them, they said, "Well, they can't water their yard hardly because the increase of the impact of the sewage cost in proportion to the water that they use." So it's been very difficult. And with -- if this new rate increase is approved by the Commission and goes into effect, some of these dear widows won't even be able to hardly drink the water or flush the toilet, and then it would still cost them $27.50 a month, because looking at what was in the paper, their base sewage charge would jump from 12.67 to 21.25. That's a good increase. And the water charge would be from 5.13 to 6.38. So even if they didn't drink water or flush their toilet, they would still pay $27.50 a month. I think in many places in other utilities around our country doesn't

have a rate like this that's so hard on especially elderly people.

It's a hardship. And then we could get into the water quality. I know myself with my wife's condition we have to use bottled water plus a water softner to be able to tolerate the water that is in Deltona, and we only use it for bathing, dishes and etcetera like that. But with this terrific increase they are asking -- they say, "Well, $116 million to expand and pay for what we want to do for you." Well, I'd like to question that a little bit. They say they want 10% profit return on their money when evidently with these rates and everything it could be well in the range of anywhere from 12 to 15%. You know, working with the power company for 46 years, when we had to have expansion we didn't place all of that cost directly upon the consumer. It came through such things as stocks and bonds to raise the money in a drive to be able to expand and not be such a hardship on the consumers. And I would like to appeal to the Commission to evaluate this very closely in analyzing these humongous rates that are being asked by SSU. It's a great hardship on the people. True, perhaps I can afford it and it doesn't effect me as much, but there's many elderly people, many elderly whether

there's a husband or wife or whether it's a widow or widower in a home, that has a tremendous impact upon them and their livelihood. Thank you.

CHAIRMAN CLARK: Thank you, Mr. Schrimscher.

MR. SHREVE: Thank you, sir. (Applause)

- - - - -

MR. SHREVE: Mr. Quentin Morris.

QUENTIN MORRIS

was called as a witness on behalf of the Citizens of the State of Florida and, having been duly sworn, testified as follows:

WITNESS MORRIS: My name is Quentin Morris, M-O-R-R-I-S. I'm a snowbird from West Virginia down here and we bought a house at 1705 Providence Boulevard almost two years ago. And I've had a whole lot of trouble with SSU ever since I have been down here.

Just for the record, back in Charleston, West Virginia, where we have a home back there, we have a water company called the West Virginia American Water Company and they're a pretty big operation because they are in Kentucky and also in Ohio. But back there when I got ready to come down here I had them come and shut the water off, and they said -- I asked them about whether there would be a bill every

month. They said, "No, if we shut it off there won't be no bill every month, no bill until you come back and we turn it on." So I called SSU here and they said "Well, you've got to pay $17.80 whether you use a drop or not," and that's what I did. They charged me $17.80 a month all last year while we was up in West Virginia not using one drop of water. I didn't think it was fair, and I told them I didn't think it was fair. So really I don't think that SSU needs to get a rate increase of 87% in order to get a 10% profit return. That's all I have to say.

CHAIRMAN CLARK: Mr. Morris, what system do you get service from?

WITNESS MORRIS: Pardon?

CHAIRMAN CLARK: What system do you get service from? Is it Deltona?

WITNESS MORRIS: Deltona, yeah.

CHAIRMAN CLARK: Thank you.

MR. SHREVE: Thank you, Mr. Morris.

(Applause)

- - - - -

MR. SHREVE: That's all the signatures we have.

CHAIRMAN CLARK: Thank you. That's all we have for people who have signed up to speak. Is there

anyone else here who wishes to speak on this rate increase?

COMMISSIONER GARCIA: Can I just say, Madam Chairman, before you close up, if you have any problems with your service, you notice on this blue sheet there's a 1-800 number. Some of you complained that you weren't getting quick enough response or we've heard from other places, please call us. The Company should be responding to you, but if you have a problem there's a 1-800 there. It's open Monday through Friday, please give us a call. The company -- and file a complaint with us and the Company has to rectify if there's a problem.

CHAIRMAN CLARK: I want to thank you all for coming out and participating in this hearing, and at this point we'll adjourn the service hearing. Thank you very much.

MR. FEIL: Madam Chairman, if I may. One last remaining thing, the proof of publication.

CHAIRMAN CLARK: Thank you, Mr. Feil. What is the exhibit? We have to identify as an exhibit the proof of publication and the affidavit of sending notice, and what is that number?

MR. FEIL: I believe the exhibit number is 42.

CHAIRMAN CLARK: It will be marked as Exhibit 42.

MR. FEIL: Thank you.

CHAIRMAN CLARK: Thank you.

(Exhibit No. 42 marked for identification.)

(Thereupon, the hearing concluded at 12:50 p.m.)

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION
NOTICE OF SERVICE HEARING
DOCKET NO. 950495-WS

Docket No. 950495-WS – Application by Southern States Utilities, Inc. for rate increase and increase in service availability charges for Orange-Osceola Utilities, Inc. in Osceola County, and in Bradford, Brevard, Charlotte, Citrus, Clay, Collier, Duval, Highlands, Lake, Lee, Marion, Nassau, Orange, Osceola, Pasco, Putnam, Seminole, St. Johns, St. Lucie, Volusia and Washington Counties.

Notice is hereby given that the Florida Public Service Commission will conduct a service hearing to discuss the above application for a water and wastewater rate increase and changes to service availability charges. The service hearing for the utility's customers in Brevard, Orange, Seminole and Volusia County(ies) will be held at the following time and place:

January 30, 1996
10:00 a.m.
Sanford Civic Center
401 E. Seminole Blvd.
Sanford, FL 32771

3627/1901

All persons who wish to testify are urged to be present at the beginning of the service hearing as the hearing may be adjourned early if no customers are present. Any persons requiring some accommodation at this hearing because of a physical impairment should call the Division of Records and Reporting at (904) 413-6770 at least five calendar days prior to the hearing. If you are hearing or speech impaired, please contact the Florida Relay Service by using the following numbers: 1-800-955-8770 (VOICE) OR 1-800-955-8771 (TDD).

PURPOSE

The purpose of the service hearing is to allow customers and any substantially affected person an opportunity to present comments and information to the Commission about the utility's quality of service, the proposed rate increase, or other matters related to the rate case or the utility. The utility is requesting that customers served water under conventional treatment methods be classified as a separate and distinct service classification from customers receiving water service from reverse osmosis facilities. Under the utility's proposal, the base facility and gallonage charges assessed to customers will be uniform within each service classification. All wastewater customers are included in one service classification and would be charged the same base facility and gallonage charges. The utility's application indicates that the utility has or will have placed nearly $100 million of additional water and wastewater plant into service since 1992 and through the period ending December 31, 1996. The application also indicates that the majority of these plant additions were required by environmental laws, rules or regulations. The utility's requested service availability charges include charges for meter installation, main extension, service installation, plant capacity, and allowance for funds prudently invested (AFPI). These charges will only be assessed to new customers who connect after Commission approval of the charges. Existing customers will not be assessed service availability charges. Plant capacity and main extension charges for water treatment are classified by conventional and reverse osmosis treatment methods. The utility proposes plant capacity and main extension charges which are uniform within each water service classification. The utility proposes only one service classification for wastewater service, and the plant capacity and main extension charges proposed for wastewater are uniform.

Central Florida YMCAs spent more than $1 million serving some 60,000 poor kids at its 16 centers, said Jerry Herman, vice president of the five-county Y association.

The money comes from membership fees. DeLancett said the downtown center, with its 3,500-member base, contributed about 30 percent of the $1.1 million raised by the 16 Y centers.

The Downtown Y also raised $100,000 last year to defray costs for 5,600 poor kids using its center, said Herman.

And it was the downtown center's membership base that prompted SunTrust bank to approve the center's $1.5 million renovation loan, using the property as collateral, said finance director Lynda Dennis.

Unlike most nonprofit organizations, the Y gets few subsidies. It depends almost entirely on fees, not government or private funding, to operate.

More than 80 percent of the Central Florida YMCA's $10.6 million budget in 1994 came from program fees and membership dues. Heart of Florida United Way money totaled just 4 percent.

Increasing new memberships, obviously, is the key to a fiscally fit Y operation. And the downtown center isn't shy about tooting its own horn.

Its current campaign is utilizing billboards and direct-mail appeals to entice new members. The goal: 600 new members this month and 1,000 by year's end, Dennis said.

"The best way to help the disadvantaged is to have the funds to do it," said DeLancett. "The best way to do that is to build membership and the best way to do *that* is to build a new Y program."

STATE OF FLORIDA)
COUNTY OF ORANGE)
_____)

AFFIDAVIT

STEVEN M. GALLIS, having been duly sworn, states as follows:

1. I am Supervisor of Administrative Services in the Office Services Department of Southern States Utilities, Inc. ("SSU"), whose central office is located in Apopka, Florida.

2. As part of my duties, I am responsible for administering mailings to SSU customers, such as notices required by Florida Public Service Commission Rules and Orders.

3. In my presence and under my supervision, SSU personnel mailed to the customers in Seminole, Orange, Volusia and Brevard Counties a copy of the document identified as "Notice To Customers Of Service Hearing Letter" attached hereto and marked "Exhibit A."

4. The names and addresses of the aforesaid customers were obtained by SSU from SSU's Information Services Customer Address Files. A copy of the list of SSU customer names and addresses used to print the mailing labels for customers in the aforesaid county is attached hereto and marked "Exhibit B." "Exhibit C" attached hereto, is the presorting report printed from SSU's Information Services Customer Address Files to prepare the mailing.

5. On January 2 and January 3, 1996, my staff and I machine postmarked the labeled envelopes containing copies of Exhibit A and hand delivered the envelopes to a representative of the United States Postal Service for delivery.

6. Attached hereto and marked "Exhibit D" is a copy of the relevant page of SSU's Office Services' Postage meter logbook. The logbook is used to record mailings from SSU's Office Services Department. Exhibit D contains information pertinent to the aforementioned mailing, to wit: on January 2, 1996, SSU mailed 7,342 total batch items, which included mail fitting the description of "Sanford Meeting - Seminole County, Volusia (Enterprise) Brevard, Orange (Except University Shores)," and on January 3, 1996, SSU mailed 30,086 total batch items, which included mail fitting the description of "Sanford Meeting - University Shores (Orange Co.), Deltona Lakes (Volusia Co.)." I personally made these entries into the logbook, and the recordations therein coincide with my personal observations

7. The total batch count on the logbook included 31,596 pieces of mail as listed in Exhibit C mailed to those persons listed in Exhibit B. If applicable, any logbook totals which are

less than Exhibit B & C totals reflect automation malfunctions in copying and sorting. In such cases, envelopes were reprocessed by hand and metered separately for mailing the same day.

Steven M. Gallis

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION
DOCKET NO. 950495-WS
NOTICE TO CUSTOMERS OF SERVICE HEARING

Docket No. 950495-WS -- Application by Southern States Utilities, Inc. for rate increase and increase in service availability charges for Orange-Osceola Utilities, Inc. in Osceola County, and in Bradford, Brevard, Charlotte, Citrus, Clay, Collier, Duval, Highlands, Lake, Lee, Marion, Martin, Nassau, Orange, Osceola, Pasco, Putnam, Seminole, St. Johns, St. Lucie, Volusia and Washington Counties.

DATED: January 2, 1996

Notice is hereby given that the Florida Public Service Commission will conduct service hearings to discuss the above application for a water and wastewater rate increase and changes to service availability charges. The service hearing for customers in Brevard, Orange, Seminole and Volusia County(ies) will be held at the following time and place:

January 30, 1996
10:00 a.m.
Sanford Civic Center
401 E. Seminole Blvd.
Sanford, FL 32771

All persons who wish to testify are urged to be present at the beginning of the service hearing as the hearing may be adjourned early if no customers are present. Any person requiring some accommodation at this hearing because of a physical impairment should call the Division of Records and Reporting at (904) 413-6770 at least five calendar days prior the hearing. If you are hearing or speech impaired, please contact the Florida Relay Service by using the following numbers: 1-800-955-8770 (VOICE) OR 1-800-955-8771 (TDD).

PURPOSE

The purpose of the service hearing is to allow customers and any substantially affected person an opportunity to present comments and information to the Commission about the utility's quality of service, the proposed rate increase, or other matters related to the rate case or the utility. The utility is requesting that customers served water under conventional treatment methods be classified as a separate and distinct service classification from customers receiving water service from reverse osmosis facilities. Under the utility's proposal, the base facility and gallonage charges assessed to customers will be uniform within each service classification. All wastewater customers are included in one service classification and would be charged the same base facility and gallonage charges. The utility's application indicates that the utility has or will have placed nearly $100 million of additional water and wastewater plant into service since 1992 and through the period ending December 31, 1996. The application also indicates that the majority of these plant additions were required by environmental laws, rules or regulations. The utility's requested service availability charges include charges for meter installation, main extension, service installation, plant capacity, and allowance for funds prudently invested (AFPI). These charges will only be assessed to new customers who connect after Commission approval of the charges. Existing customers will not be assessed service availability charges. Plant capacity and main extension charges for water treatment are classified by conventional and reverse osmosis treatment methods. The utility proposes plant capacity and main extension charges which are uniform within each water service classification. The utility proposes only one service classification for wastewater service, and the plant capacity and main extension charges proposed for wastewater are uniform.
