BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

In re: Petition of FLORIDA CITIES WATER COMPANY, seeking recovery of environmental litigation costs in a Limited Proceeding for its NORTH and SOUTH FT. MYERS DIVISIONS in Lee County and BAREFOOT BAY DIVISION in Brevard County, Florida	Docket No. 971663-WS

NOTICE OF HEARING

NOTICE IS HEREBY GIVEN that the Florida Public Service Commission will hold a hearing regarding the petition of Florida Cities Water Company, (Petitioner) seeking approval of recovery of environmental litigation costs in rates for its North and South Ft. Myers Divisions in Lee County and Barefoot Bay Division in Brevard County, Florida, at the following time and place:

9:30 a.m., Tuesday, August 12, 1998
Florida Public Service Commission
2540 Shumard Oak Boulevard
Room 148, Betty Easley Conference Center
Tallahassee, Florida 32399-0850

Thursday and Friday, August 13 and 14, 1998, have also been reserved for continuation of the hearing. The starting time of the next day's session will be announced at the conclusion of the prior day. The hearing may be adjourned early if all testimony is concluded.

PURPOSE AND PROCEDURE

The purpose of this hearing is to consider the Petition of Florida Cities Water Company for increased water and wastewater rates, and any motions or other matters that may be pending at the time of the hearing. The Commission may rule on any such motions from the bench or may take the matters under advisement.

At hearing, all parties shall be given the opportunity to present testimony and other evidence on the issues identified by the parties in the

prehearing order. All witnesses shall be subject to cross-examination at the conclusion of their testimony.

Any person requiring some accommodation at this hearing, because of a physical impairment should call the Division of Records and Reporting at (850) 413-6770 at least five calendar days prior to the hearing. Any person who is hearing or speech impaired, please contact the Florida Public Service Commission using the Florida Relay Service, which can be reached at 1-800-955-8771 (TDD).

JURISDICTION

The Florida Public Service Commission is vested with jurisdiction over the subject matter by the provisions of Chapter 367, Florida Statutes. This hearing will be governed by said Chapter as well as Chapter 120, Florida Statutes and Chapters 25-9, 25-22 and 25-30, Florida Administrative Code.

APPLICABLE STATUTES AND RULES

Sections 367.081, 367.0816, 367.101, Florida Statutes, and any other relevant sections of Chapter 367, Florida Statutes, are applicable to this proceeding, as well as Chapter 120, Florida Statutes, and Rules 25-9, 25-22 and 25-30, Florida Administrative Code.

NOTICE OF OPPORTUNITY TO CONSENT TO THE EXERCISE OF CIVIL JURISDICTION BY A MAGISTRATE JUDGE AND APPEAL OPTION

In accordance with the provisions of 28 U.S.C. §636(c) and Fed.R.Civ.P. 73, you are hereby notified that the United States magistrate judges of this district court, in addition to their other duties, may, upon the consent of all the parties in a civil case, conduct any or all proceedings in the case, including a jury or non-jury trial, and order the entry of a final judgment.

You should be aware that your decision to consent, or not to consent, to the referral of your case to a United States magistrate judge for disposition is entirely voluntary and should be indicated by counsel endorsing the attached consent form for the plaintiff(s) and defendant(s). If the form is executed by all counsel for the parties, it should be communicated solely to the clerk of the district court. ONLY if all the parties to the case consent to the reference to a magistrate judge will either the judge or magistrate judge to whom the case has been assigned be informed of your decision.

Your opportunity to have your case disposed of by a magistrate judge is subject to the calendar requirements of the court. Accordingly, the district judge to whom your case is assigned must approve the reference of the case to a magistrate judge for disposition.

In accordance with 28 U.S.C. §636(c)(3) and Fed.R.Civ.P. 73(c), an appeal from a judgment entered by a magistrate judge may be taken directly to the United States court of appeals for this judicial circuit in the same manner as an appeal from any other judgment of a district court. Alternatively, upon consent of all parties, an appeal from a judgment entered by a magistrate judge may be taken directly to a district judge in accordance with 28 U.S.C. §636(c)(4) and Fed.R.Civ.P. 73(d). Cases in which an appeal is taken to a district judge may be reviewed by the United States court of appeals for this circuit only by way of petition for leave to appeal.

Copies of the consent form are available from the clerk of the court.

IN THE UNITED STATES DISTRICT COURT
FOR THE MIDDLE DISTRICT OF FLORIDA
FORT MYERS DIVISION

UNITED STATES OF AMERICA, Plaintiff, v. FLORIDA CITIES WATER COMPANY, INC., Defendant.	)	CIVIL ACTION NO. 93-381-CIV-FTM-21

RECEIVED
U.S. MARSHAL
93 OCT -4 PM 1:54
MIDDLE DIST OF FLORIDA
FT MYERS

COMPLAINT

The United States of America, by authority of the Attorney General, acting at the request of the Administrator of the U.S. Environmental Protection Agency ("EPA"), alleges as follows:

NATURE OF ACTION

1. This is a civil action brought pursuant to section 309(b) of the Clean Water Act ("the Act"), 33 U.S.C. § 1319(b), for civil penalties for violations of section 301 of the Act, 33 U.S.C. § 1311, and of the conditions and limitations of a National Pollutant Discharge Elimination System ("NPDES") permit issued by EPA pursuant to section 402 of the Act, 33 U.S.C. § 1342. Notice of the commencement of the action has been provided to the State of Florida.

JURISDICTION AND VENUE

2. This Court has jurisdiction over the subject matter of this action under 28 U.S.C. §§ 1331, 1345, and 1355, and section 309(b) of the Act, 33 U.S.C. § 1319(b).

3. Venue is proper in the Middle District of Florida pursuant to 28 U.S.C. §§ 1391(b) and (c) and 1392, and section 309(b) of the Act, 33 U.S.C. § 1319(b).

THE DEFENDANT

4. The defendant, Florida Cities Water Company, Inc., is a Florida corporation that resides and does business in Florida.

5. The defendant is a "person" within the meaning of section 502(5) of the Act, 33 U.S.C. § 1362(5).

GENERAL ALLEGATIONS

6. At all times relevant herein, the defendant has owned and operated a privately owned wastewater treatment plant known as the Waterway Estates Wastewater Treatment Plant, which is located in North Fort Myers, Lee County, Florida.

7. At all times relevant herein, the defendant has collected wastewater from residential and commercial sources, treated that wastewater at the Waterway Estates Wastewater Treatment Plant, and then has discharged that wastewater either directly or indirectly into the Caloosahatchee River.

8. At all times relevant herein, the defendant has caused the "discharge of pollutants" within the meaning of section 502(12) of the Act, 33 U.S.C. § 1362(12), from the Waterway Estates Wastewater Treatment Plant through a "point source" within the meaning of section 502(14) of the Act, 33 U.S.C. § 1362(14), into the Caloosahatchee River, a "navigable

water" within the meaning of section 502(7) of the Act, 33 U.S.C. § 1362(7).

9. Section 301(a) of the Act, 33 U.S.C. § 1311(a), prohibits the discharge of pollutants by any person except as in compliance with certain sections of the Act.

10. Subject to certain terms and conditions, the defendant was authorized under NPDES Permit Number FL0030325 ("Permit") to discharge pollutants from the Waterway Estates Wastewater Treatment Plant into the Caloosahatchee River during the periods on or about September 24, 1981 to January 8, 1987 and November 1, 1989 to September 30, 1994.

11. During the period on or about January 9, 1987 to October 31, 1989, the defendant was not authorized to discharge pollutants from the Waterway Estates Wastewater Treatment Plant into the Caloosahatchee River.

12. The Permit, as reissued on September 24, 1981, authorized the discharge of pollutants from the Waterway Estates Wastewater Treatment Plant into the Caloosahatchee River only via "outfall 001," which at that time referred to a point in a tributary canal leading to the River.

13. The Permit, as reissued on September 29, 1989, authorizes the discharge of pollutants from the Waterway Estates Wastewater Treatment Plant into the Caloosahatchee River only via "outfall 001," which at that time referred to a point in the Caloosahatchee River itself.

14. The Permit, as reissued on September 29, 1989, imposes a monthly average limitation on the amount of Total Nitrogen in the discharge from the Waterway Estates Wastewater Treatment Plant.

15. The Permit, as reissued on September 29 1989, contains a biomonitoring program under which the wastewater discharge from the Waterway Estates Treatment Plant must not exceed prescribed toxicity parameters.

16. Subsection 309(d) of the Act, 33 U.S.C. § 1319(d), provides, in part, that any person who violates, inter alia, section 301 of the Act, 33 U.S.C. § 1311, including any permit condition or limitation implementing that section, or violates any condition or limitation in a NPDES permit issued under Section 402 of the Act, 33 U.S.C. § 1342, shall be subject to a civil penalty not to exceed $25,000 per day for each such violation.

FIRST CLAIM FOR RELIEF
(Discharging Without a Permit)

17. Paragraphs 1 throughout 16 are realleged and incorporated herein by reference as if fully set forth below.

18. On each day during the period on or about October 1, 1988 to October 31, 1989, the defendant discharged pollutants from the Waterway Estates Wastewater Treatment Plant into the Caloosahatchee River without a NPDES permit.

19. Each day of discharge by the defendant without a NPDES permit constitutes a separate violation of section 301 of the Act, 33 U.S.C. § 1311.

SECOND CLAIM FOR RELIEF
(Discharging at an Unpermitted Location)

20. Paragraphs 1 throughout 16 are realleged and incorporated herein by reference as if fully set forth below.

21. On each day during the period on or about November 1, 1989 to July 14, 1991, the defendant discharged pollutants from the Waterway Estates Treatment Plant into a tributary canal leading to the Caloosahatchee River.

22. The tributary canal was not a permitted discharge location during the period referenced in paragraph 21 herein.

23. Each day of discharge by the defendant at an unpermitted location constitutes a separate violation of a permit condition or limitation implementing section 301 of the Act, 33 U.S.C. § 1311, in a permit issued pursuant to section 402 of the Act, 33 U.S.C. § 1342.

THIRD CLAIM FOR RELIEF
(NPDES Effluent Violations)

24. Paragraphs 1 throughout 16 are realleged and incorporated herein by reference as if fully set forth below.

25. During each month during the period on or about July 1991 to March 1992, the defendant discharged pollutants in excess of the Total Nitrogen limitation in the Permit.

26. On at least three occasions (February 1992, April 1992, and June 1992), the defendant discharged effluent in excess of the toxicity limitation in the Permit.

27. Each day of discharge by the defendant in excess of an effluent limitation in the Permit constitutes a separate

violation of a permit condition or limitation implementing section 301 of the Act, 33 U.S.C. § 1311, in a permit issued pursuant to section 402 of the Act, 33 U.S.C. § 1342.

RELIEF

28. Pursuant to section 309(b) and (d) of the Act, 33 U.S.C. §§ 1319(b) and (d), the defendant is liable for civil penalties up to $25,000 per day for each violation of the Act, including up to $25,000 per day in each month in which a monthly average was violated.

WHEREFORE, Plaintiff, the United States of America, respectfully requests that:

1. The defendant be ordered to pay a civil penalty up to $25,000 per day for each violation of the Act;
2. This Court grant such other relief as it deems just and appropriate.

Respectfully submitted,

Exhibit_____(GSA-3)

IN THE UNITED STATES DISTRICT COURT
FOR THE MIDDLE DISTRICT OF FLORIDA
FORT MYERS DIVISION

UNITED STATES OF AMERICA,

Plaintiff,

v.

FLORIDA CITIES WATER COMPANY

Defendant.

CIVIL ACTION NO.:
93-281-CIV-FM-21

RECEIVED
NOV 29 1993
DGS

ANSWER

Defendant, Florida Cities Water Company, ("FCWC"), through undersigned counsel, files this Answer to Plaintiff's Complaint in the above-captioned action and states:

NATURE OF ACTION

1. This is a civil action brought pursuant to section 309(b) of the Clean Water Act ("the Act"), 33 U.S.C. § 1319(b), for civil penalties for violations of section 301 of the Act, 33 U.S.C. § 1311, and of the conditions and limitations of a National Pollutant Discharge Elimination System ("NPDES") permit issued by EPA pursuant to section 402 of the

Act, 33 U.S.C. § 1342. Notice of the commencement of the action has been provided to the State of Florida.

ANSWER: These allegations are conclusions of law requiring no response. To the extent a response is required, the allegations are denied except to the extent borne out by the authorities referenced, which are the best evidence of their contents. FCWC lacks knowledge or information sufficient to form a belief regarding whether notice of commencement of this action has been given to the State of Florida.

JURISDICTION AND VENUE

2. This Court has jurisdiction over the subject matter of this action under 28 U.S.C. §§ 1331, 1345, and 1355 and section 309(b) of the Act, 33 U.S.C. § 1319(b).

ANSWER: FCWC neither admits nor denies that this Court has subject matter jurisdiction, in that this represents a conclusion of law requiring no response.

3. Venue is proper in the Middle District of Florida pursuant to 28 U.S.C. §§ 1391(b) and (c) and 1392, and section 309(b) of the Act, 33 U.S.C. § 1319(b).

ANSWER: FCWC neither admits nor denies that venue is proper in this district, in that this represents a conclusion of law requiring no response.

THE DEFENDANT

4. The defendant, Florida Cities Water Company, Inc., is a Florida corporation that resides and does business in Florida.

ANSWER: FCWC admits these allegations of the complaint.

5. The defendant is a "person" within the meaning of section 502(5) of the Act, 33 U.S.C. § 1362(5).

ANSWER: This allegation is a conclusion of law requiring no response.

GENERAL ALLEGATIONS

6. At all times relevant herein, the defendant has owned and operated a privately owned wastewater treatment plant known as the

Waterway Estates Wastewater Treatment Plant, which is located in North Fort Myers, Lee County, Florida.

ANSWER: FCWC is without sufficient information and knowledge to form a belief as to the truth of the statement "[a]t all times relevant herein." FCWC admits that it owns and operates a privately owned wastewater treatment plant known as The Waterway Estates Wastewater Treatment Plant, which is located in North Fort Myers, Lee County, Florida.

7. At all times relevant herein, the defendant has collected wastewater from residential and commercial sources, treated that wastewater at the Waterway Estates Wastewater Treatment Plant, and then has discharged that wastewater either directly or indirectly into the Caloosahatchee River.

ANSWER: FCWC is without sufficient information and knowledge to form a belief as to the truth of the statement "[a]t all times relevant herein." FCWC admits that it collects wastewater from residential and commercial sources, treats wastewater at the Waterway Estates Wastewater

Treatment Plant, and discharges treated wastewater into the Caloosahatchee River.

8. At all times relevant herein, the defendant has caused the "discharge of pollutants" within the meaning of section 502(12) of the Act, 33 U.S.C. § 1362(12), from the Waterway Estates Wastewater Treatment Plant through a "point source" within the meaning of section 502(14) of the Act, 33 U.S.C. § 1362(14), into the Caloosahatchee River, a "navigable water" within the meaning of section 502(7) of the Act, 33 U.S.C. § 1362(7).

ANSWER: FCWC is without sufficient information and knowledge to form a belief as to the truth of the statement "[a]t all times relevant herein." The other allegations are conclusions of law requiring no response.

9. Section 301(a) of the Act, 33 U.S.C. § 1311(a) prohibits the discharge of pollutants by any person except as in compliance with certain sections of the Act.

ANSWER: FCWC neither admits nor denies these allegations which are conclusions of law requiring no response.

10. Subject to certain terms and conditions, the defendant was authorized under NPDES Permit Number FL0030325 ("Permit") to discharge pollutants from the Waterway Estates Wastewater Treatment Plant into the Caloosahatchee River during the periods on or about September 24, 1981 to January 8, 1987 and November 1, 1989 to September 30, 1994.

ANSWER: FCWC admits it was issued National Pollutant Discharge Elimination System ("NPDES") Permit No. FL0030325 ("Permit"). The other allegations are conclusions of law requiring no response. To the extent a response is required, the allegations are denied except to the extent borne out by the Permit, which speaks for itself and is the best evidence of its contents.

11. During the period on or about January 9, 1987 to October 31, 1989, the defendant was not authorized to discharge pollutants from the Waterway Estates Wastewater Treatment Plant into the Caloosahatchee River.

ANSWER: These allegations are conclusions of law requiring no response. To the extent a response is required, the allegations are denied.

12. The Permit, as reissued on September 24, 1981, authorized the discharge of pollutants from the Waterway Estates Wastewater Treatment Plant into the Caloosahatchee River only via "outfall 001," which at that time referred to a point in a tributary canal leading to the River.

ANSWER: FCWC admits the Permit was reissued on September 24, 1981. The other allegations are conclusions of law requiring no response. To the extent a response is required, the allegations are denied except to the extent borne out by the Permit, which speaks for itself and is the best evidence of its contents.

13. The Permit, as reissued on September 29, 1989, authorizes the discharge of pollutants from the Waterway Estates Wastewater Treatment Plant into the Caloosahatchee River only via "outfall 001," which at that time referred to a point in the Caloosahatchee River itself.

ANSWER: FCWC admits the Permit on September 29, 1989. The other allegations are conclusions of law requiring no response. To the extent a response is required, the allegations are denied except to the extent borne out by the Permit, which speaks for itself and is the best evidence of its contents.

14. The Permit, as reissued on September 29, 1989, imposes a monthly average limitation on the amount of Total Nitrogen in the discharge from the Waterway Estates Wastewater Treatment Plant.

ANSWER: These allegations are conclusions of law requiring no response. The Permit speaks for itself and is the best evidence of its contents.

15. The Permit, as reissued on September 29, 1989, contains a biomonitoring program under which the wastewater discharge from the Waterway Estates Treatment Plant must not exceed prescribed toxicity parameters.

ANSWER: These allegations are conclusions of law requiring no response. The Permit speaks for itself and is the best evidence of its contents.

16. Subsection 309(d) of the Act, 33 U.S.C. § 1319(d), provides, in part, that any person who violates, inter alia, section 301 of the Act, 33 U.S.C. § 1311, including any Permit condition or limitation implementing that section, or violates any condition or limitation in a NPDES Permit issued under Section 402 of the Act, 33 U.S.C. § 1342, shall be subject to a civil penalty not to exceed $25,000 per day for each such violation.

ANSWER: These allegations are conclusions of law requiring no response.

First Claim for Relief
(Discharging Without a Permit)

17. Paragraphs 1 throughout 16 are realleged and incorporated herein by reference as if fully set forth below.

ANSWER: FCWC hereby incorporates its responses to Paragraphs 1 through 16 of the complaint.

18. On each day during the period on or about October 1, 1988 to October 31, 1989, the defendant discharged pollutants from the

Waterway Estates Wastewater Treatment Plant into the Caloosahatchee River without a NPDES Permit.

ANSWER: FCWC admits it discharged pollutants from the Waterway Estates Wastewater Treatment Plant into the Caloosahatchee River during the period on or about October 1, 1988 to October 31, 1989. The remaining allegations are conclusions of law requiring no response.

19. Each day of discharge by the defendant without a NPDES Permit constitutes a separate violation of section 301 of the Act, 33 U.S.C. § 1311.

ANSWER: These allegations are conclusions of law requiring no response.

Second Claim for Relief
(Discharging at an Unpermitted Location)

20. Paragraphs 1 throughout 16 are realleged and incorporated herein by reference as if fully set forth below.

ANSWER: FCWC hereby incorporates its responses to Paragraphs 1 through 16 of the complaint.

21. On each day during the period on or about November 1, 1989 to July 14, 1991, the defendant discharged pollutants from the Waterway Estates Treatment Plant into a tributary canal leading to the Caloosahatchee River.

ANSWER: FCWC admits that during the period on or about November 1, 1989, to July 14, 1991, it discharged pollutants from the Waterway Estates Treatment Plant into the Caloosahatchee River. Any remaining allegations are denied.

22. The tributary canal was not a permitted discharge location during the period referenced in paragraph 21 herein.

ANSWER: FCWC denies these allegations.

23. Each day of discharge by the defendant at an unpermitted location constitutes a separate violation of a permit condition or limitation implementing section 301 of the Act, 33 U.S.C. § 1311, in a permit issued pursuant to section 402 of the Act, 33 U.S.C. § 1342.

ANSWER: These allegations are conclusions of law requiring no response.

Third Claim for Relief
(NPDES Effluent Violations)

24. Paragraphs 1 throughout 16 are realleged and incorporated herein by reference as if fully set forth below.

ANSWER: FCWC hereby incorporates its responses to paragraphs 1 through 16 of the complaint.

25. During each month during the period on or about July 1991 to March 1992, the defendant discharged pollutants in excess of the Total Nitrogen limitation in the Permit.

ANSWER: FCWC denies that during July, August, and September 1991, pollutant levels in effluent discharged by FCWC were in excess of the applicable Total Nitrogen limitation. The remaining allegations are conclusions of law requiring no response.

26. On at least three occasions (February 1992, April 1992, and June 1992), the defendant discharged effluent in excess of the toxicity limitation in the Permit.

ANSWER: On three occasions (February 1992, April 1992, and June 1992) FCWC reported measurements for toxicity that were in excess of the numerical values specified in the Permit. To the extent any remaining allegations are conclusions of law, no response is required.

27. Each day of discharge by the defendant in excess of an effluent limitation in the Permit constitutes a separate violation of a permit condition or limitation implementing section 301 of the Act, 33 U.S.C. § 1311, in a permit issued pursuant to section 402 of the Act, 33 U.S.C. § 1342.

ANSWER: These allegations are conclusions of law requiring no response.

Relief

28. Pursuant to section 309(b) and (d) of the Act, 33 U.S.C. §§ 1319(b) and (d), the defendant is liable for civil penalties up to

$25,000 per day for each violation of the Act, including up to $25,000 per day in each month in which a monthly average was violated.

ANSWER: These allegations are conclusions of law requiring no response.

AFFIRMATIVE DEFENSES

Pursuant to Fed. R. Civ. P. 12(b), FCWC, having specifically answered each and every allegation, further answers:

First Defense

Plaintiff's Complaint fails to state a claim upon which relief can be granted.

Second Defense

Plaintiff's claims are barred because FCWC's application for renewal of the Permit was improperly denied by EPA in 1986.

Third Defense

Plaintiff's claims are barred because FCWC has paid penalties assessed by the state of Florida under comparable Florida law.

Fourth Defense

Plaintiff's claims are barred by the doctrine of impossibility.

Fifth Defense

Plaintiff's claims are barred by the doctrine of estoppel.

Sixth Defense

Plaintiff's claims are barred by the doctrine of waiver.

Seventh Defense

Plaintiff's claims are barred by the applicable statute of limitations.

Eighth Defense

Plaintiff's claims are barred by laches.

Ninth Defense

State and local governments unnecessarily delayed issuing permits and enacting zoning changes necessary before FCWC could initiate

construction of an advanced water treatment facility or relocate an outfall, thereby precluding FCWC's ability to meet compliance schedules.

Tenth Defense

FCWC has at all times acted in a proper and reasonable manner, exercised due care, acted in good faith to fulfill all requirements of the Federal Clean Water Act, the NPDES Permits, applicable Administrative Orders and applicable state laws.

re: United States v. Forida Cities Water Company
(M.D. Fla.)

Dear Mr. DeHihns:

This will confirm that the U.S. Environmental Protection Agency (EPA) has formally requested that the U.S. Department of Justice file suit against Florida Cities Water Company for violations of the Clean Water Act. I understand that you represent Florida Cities Water Company in this matter.

In several telephone conversations, I have personally provided to you information about the nature of the violations, the statutory penalty for the violations, and EPA's demand for $5,000,000 to settle the action. Based on communications I have had with Assistant Regional Counsel Gwendolyn Eason, I am also satisfied that prior to the case being referred to the Justice Department, EPA provided the Company with extensive information about the nature of EPA's claims, as well as an opportunity to settle them.

Nonetheless, before filing suit, we would like to afford the Company a final opportunity to settle these claims. To this end, we have agreed to allow the Company to meet with EPA and DOJ officials and counsel to discuss this matter. After consulting with you regarding your client's preferred date and venue for this meeting, we have agreed that it will take place on Wednesday, December 16, 1992 at 1:30 p.m., at the Company's offices at 4837 Swift Road, Suite 100, Sarasota, Florida.

We have mutually agreed that an exchange of certain information would be useful prior to the meeting. You are in the process of providing some limited information requested by the United States, and have requested that the United States share with you information regarding its economic benefit calculations.

We understand your letter of December 7, 1992 to represent that information exchanged during our settlement discussions will be inadmissible, unless otherwise discoverable. We agree. I do

want to clarify, however, that while the information we have requested from you would ordinarily be available to us through discovery, it is our position that our economic benefit calculations would be privileged and therefore not available to you through discovery. Therefore, while we are willing to share with you certain of our economic benefit calculations for the purpose of negotiations, we will only do so with the express understanding that you will not assert that we have waived any privilege by providing that information to you.

Please do not hesitate to contact me at any time if I may be of assistance.

Sincerely,

Assistant Attorney General
Environment and Natural Resources
Division

AVATAR UTILITIES INC.

Exhibit_____(GSA-5)

FROM: Gerald S. Allen
TO: Files
DATE: December 22, 1992

SUBJECT: Meeting - USEPA/U.S. Department of Justice
Waterway Estates, WWTP

ENCL:

C: P. Bradtmiller
D. Getman
R. Gordon
E. Jacobson
L. Wilkov

The purpose of this memorandum is to memorialize principal issues discussed during a meeting with USEPA and U.S. Department of Justice officials in the FCWC general office (Sarasota) on December 16. Those attending were as follows:

Robert B. Gordon, AUI
Gerald S. Allen, AUI
Paul Bradtmiller, FCWC
Johnnie M. Overton, FCWC
Julie Karleskint, FCWC
Lee DeHihns, Alston & Bird (FCWC counsel)
Gwen Eason, Assistant Regional Attorney, USEPA
Kenneth Kwan, Enforcement Section, USEPA
Daniel S. Jacobs, Trial Attorney, U.S. Department of Justice

Mr. Jacobs stated that the case, which pertains to alleged violations of the Clean Water Act, was being managed by the U.S. Department of Justice under his supervision. He requested that Ms. Eason and Mr. Kwan explain the violations and basis of proposed penalties.

Ms. Eason stated that the violations were as follows:

(1) Discharge to canal without permit, June 1988/October 1991
(2) Discharge at unpermitted location, November 1, 1989/July 14, 1991
(3) Exceeding TKN limit, July 15, 1991/March 1992
(4) Toxicity violations - three days

Ms. Eason stated that penalties are based on the following factors:

(1) Seriousness of violation
(2) Economic benefit to violator during period of violation
(3) History of violations on the part of the violator
(4) Good faith efforts to comply with regulations and permits
(5) Economic impact of penalties on violator, including violator's ability to pay

She stated that the USEPA uses a model for calculating penalties for purposes of settlement and requested that Mr. Kwan explain how this model was applied to the FCWC case.

First, Mr. Kwan demonstrated the penalty calculations if the statutory limit of $25,000 per day was applied as follows:

Discharge without a permit - 660 days @ $25,000 =	$16,500,000
Discharge at unpermitted location - 614 days @ $25,000 =	15,350,000
Exceeding the TKN limit - 256 days @ $25,000 =	6,400,000
Violating the toxicity standard - 3 days @ $25,000 =	75,000
TOTAL =	$38,325,000

Then, Mr. Kwan showed the calculations pertaining to the settlement model as follows:

(1) Economic benefit -	Treatment plant	$3,089,000*
	Sewer outfall to river	226,018*
	SUB TOTAL	$3,315,018
	Gravity Component (seriousness)	$ 407,000
	Adjustment Factor (35%)**	1,302,706
	TOTAL	$5,024,724

Mr. Bradtmiller provided a brief overview of the history of the discharge in question from 1982 when Lee County rejected the construction of a wastewater treatment plant in North Fort Myers as proposed in the 201 Regional Plan through placement of the upgraded wastewater treatment plant in operation in March 1992. He explained some of the principal difficulties encountered by the company in permitting and constructing the upgraded plant facilities, as well as circumstances clearly beyond the company's control which contributed to delays in completing the project.

Mr. Gordon explained the fact that the company realized no economic benefit from delays in completing the project, illustrating the financial impact of plant investments on FCWC. He compared this illustration with the financial impact on an unregulated business, such a paper mill under similar circumstances. He also provided the attached summary of net operating income for the Waterway Estates wastewater operation, by year, for the years ended December 31, 1987 through November 30, 1992.

*See attached sheet
**Recognizes recalcitrence, ability to pay, litigation risk etc.

A discussion was held regarding the number of wastewater accounts served by the Waterway Estates system (approximately 2,400) and the very modest customer growth rate experienced during the period of the alleged violations. Mr. Jacobs seemed surprised that so few customers were served and that the growth rates were modest.

Mr. Jacobs explained his intent to bring suit in federal court demanding the statutory penalties unless a settlement agreement could be reached immediately. He also explained the legal process if a settlement agreement is reached, which essentially entails filing the suit but simultaneously recording a consent decree outlining the settlement which effectively stays the suit. After considerable discussion, it was agreed that the company would present a settlement offer through Mr. DeHihns on December 23. Mr. Jacobs indicated that the Department of Justice would consider a "good faith offer" only and should the Company not respond in good faith, a suit would be filed immediately.

December 18, 1992

ATTORNEY-CLIENT COMMUNICATION
PRIVILEGED AND CONFIDENTIAL

Mr. Robert B. Gordon
President
Avatar Utilities, Inc.
255 Alhambra Circle
Coral Gables, Florida 33134

Dear Bob:

The purpose of this letter is to outline the settlement issues in the potential case United States v Florida Cities Water Company (FCWC). The case would be filed by the U.S. Department of Justice (DOJ) at the request of the U.S. Environmental Protection Agency (EPA) Regional Office in Atlanta, Georgia, in the U.S. District Court for the Middle District of Florida, for alleged violations of the Clean Water Act, 33 U.S.C. §1251 et seq. by the FCWC Waterway Estates plant in North Fort Myers, Florida. A brief statement of the DOJ position is set forth in the enclosed DOJ December 9, 1992 letter.

Case Description. The essence of the DOJ case against FCWC is that FCWC failed to comply with EPA's December 1986 decision denying FCWC the right to continue discharging wastewater from the Waterway Estates plant into a canal connected to the Caloosahatchee River in a timely fashion and that FCWC's discharge during the following time period violated Clean Water Act requirements. From 1987 to 1990 EPA issued two Administrative Orders with amendments to FCWC setting schedules to design, construct and achieve compliance at an alternative discharge location. When EPA issued NPDES No. FL 0030325 to FCWC on September 29, 1989, FCWC was directed to achieve compliance with the effluent limitations in the 1989 permit. A portion of the case involves alleged violations of that permit. Simply stated, EPA believes taking from January 1987 to March 1992 to achieve operational status is unacceptable.

Alleged Violations and Penalty Calculation. The specific Clean Water Act violations that DOJ and EPA allege were committed by FCWC can be separated into four categories with a total maximum penalty of $38,325,000. This is derived by multiplying each day or occasion of violation in the four above categories by $25,000, which is the Clean Water Act maximum daily penalty allowed. A description of the alleged violations and penalty amounts follows. **1. Discharging without a permit** - 660 days (Jan. 1, 1988 - Oct. 31, 1989). This refers to the period from permit denial in December, 1986 until the 1989 permit became effective on November 1, 1989. For settlement purposes, EPA did not a calculate penalty for calendar year 1987. Penalty-$16,500,000. **2. Discharging at an unpermitted location** - 614 days (Nov. 1, 1989 - July 14, 1991). This refers to the period when FCWC was still discharging to the canal, although the 1989 permit only allowed a discharge into the Caloosahatchee River. This period ended when the outfall pipe was relocated into the River. Penalty- $15,350,000. **3. TKN violations of the 1989 permit** - 256 days (July 15, 1991 - March, 1992).This refers to FCWC's discharge of TKN at levels exceeding the TKN effluent limitation in the 1989 permit into the Caloosahatchee River. These alleged violations ended when compliance with the TKN levels began in April, 1992. Penalty- $6,400,000. **4. Toxicity violations -** 3 occurrences(Feb., April and June, 1992). This refers to three separate occasions when FCWC allegedly violated the toxicity testing requirements of the 1989 permit. The plant has been in compliance with toxicity testing requirements beginning in July, 1992. Penalty-$75,000.

Settlement. For purposes of settlement, the amount requested by EPA and DOJ during the December 16, 1992 meeting, while less than the maximum penalty case, is nevertheless quite substantial at $5,024,074. The same figure referred to in the DOJ December 9, 1992 letter. The settlement demand consists of three categories: **1. Economic benefit** gained by delay in ceasing the discharge to the canal and subsequent violations of the 1989 permit - $3,315,018.00; **2. Gravity.** This refers to a variety of factors, such as significance of violation, health and environmental impact, and number/duration of violations - $407,000.00; and **3. Adjustment factors** such as recalcitrance, ability to pay and litigation risks - $1,302,706.00 (35% x 1+2).

Settlement Offer After a full discussion and analysis of all issues, you, Gerald Allen, Paul Bradtmiller and I agreed that I would contact the DOJ attorney, Daniel S. Jacobs, on December 23, 1992 (as agreed by the parties on December 16, 1992) to offer him a FCWC settlement of $250,000 to resolve all issues raised by the potential court case against FCWC.

The rationale for the offer comes from our joint belief that it is: (1) a good faith offer in the context of the settlement meeting discussions; (2) consistent with a comparable $750,000 settlement that has recently been reached between DOJ and the City of Cape Coral, Florida for their wastewater discharge permit violations into the Caloosahatchee River. There we understand DOJ's maximum Clean Water Act penalty demand was

approximately $137,000,000. When compared to FCWC's approximate penalty amount of $38,000,000, we see that the ratio is 28%. Moreover, Cape Coral's discharge volume into the Caloosahatchee River is approximately 6 MGD compared to FCWC's approximately .8 MGD; (3) without question that FCWC believes it can support the position that it gained no economic benefit during the time periods in question; and (4) necessary for settlement to include some premium for recalcitrance as demanded by EPA and DOJ in the settlement request where they used at 35% multiplier. Simply put , 28% x $750,000 = $206,000 + an unspecified recalcitrance multiplier % for a total of $250,000.

Strength of FCWC Case. EPA and DOJ allege FCWC violated various Administrative Order and permit provisions from approximately January 1, 1987 through June, 1992. It will be difficult to convince a federal judge that in a sixty-six month period no violations occurred. We recognize that our time schedule for various events leading to operation in March, 1992 contains likely unjustified or unsupported delays. The Government's argument that it took more than five years to complete work that normally takes three-four years could be a convincing one. Moreover, our alleged permit violations of TKN and toxicity have been previously reported to EPA, such that penalties for those violations are virtually inescapable. The permit violations alone under categories 3 and 4 above carry a maximum penalty of over $6.4 million. Although we have defenses available with respect to the time periods and certain aspects of the permit violations, we are potentially vulnerable for an extremely high penalty judgment in federal court. In addition, litigation costs in a likely two year long case could reach or exceed $500,000.

Conclusion. In light of all the above information, I recommend that the Executive Committee approve a settlement offer to DOJ of $250,000.

Sincerely,

Lee A. DeHihns, III

Exhibit_____(GSA-7)

IN THE UNITED STATES DISTRICT COURT
FOR THE MIDDLE DISTRICT OF FLORIDA
FORT MYERS DIVISION

UNITED STATES OF AMERICA, Plaintiff, v. AVATAR HOLDINGS, INC., and FLORIDA CITIES WATER COMPANY, INC., Defendants.	)	CIVIL ACTION NO. 93-281-CIV-FTM-21

AMENDED COMPLAINT

The United States of America, by authority of the Attorney General, acting at the request of the Administrator of the U.S. Environmental Protection Agency ("EPA"), alleges as follows:

NATURE OF ACTION

1. This is a civil action brought pursuant to section 309(b) of the Clean Water Act ("the Act"), 33 U.S.C. § 1319(b), for civil penalties for violations of section 301 of the Act, 33 U.S.C. § 1311, and of the conditions and limitations of National Pollutant Discharge Elimination System ("NPDES") permits issued by EPA pursuant to section 402 of the Act, 33 U.S.C. § 1342. Notice of the commencement of the action has been provided to the State of Florida.

JURISDICTION AND VENUE

2. This Court has jurisdiction over the subject matter of this action under 28 U.S.C. §§ 1331, 1345, and 1355, and section 309(b) of the Act, 33 U.S.C. § 1319(b).

3. Venue is proper in the Middle District of Florida pursuant to 28 U.S.C. §§ 1391(b) and (c) and 1392, and section 309(b) of the Act, 33 U.S.C. § 1319(b).

THE DEFENDANTS

4. Defendant Avatar Holdings, Inc. is a Delaware corporation which resides and does business in Florida.

5. Defendant Florida Cities Water Company, Inc., is a subsidiary of Avatar Holdings, Inc., and is a Florida corporation that resides and does business in Florida.

6. As the parent company of Florida Cities Water Company, Inc., Defendant Avatar Holdings, Inc. directly controls the management of Florida Cities Water Company's environmental compliance practices, and is thereby directly responsible for the acts and omissions alleged herein. Thus, each subsequent reference to "Defendants" herein should be read to include Avatar Holdings, Inc., acting through Florida Cities Water Company.

7. Each of the defendants is a "person" within the meaning of section 502(5) of the Act, 33 U.S.C. § 1362(5).

GENERAL ALLEGATIONS

8. At times relevant herein, Defendants have owned and operated privately owned wastewater treatment plants known as the Barefoot Bay Wastewater Treatment Plant, Carrollwood Wastewater Treatment Plant, and Waterway Estates Wastewater Treatment Plant, all located in the State of Florida.

9. At times relevant herein, Defendants have collected wastewater from residential and/or commercial sources,

treated that wastewater at the various wastewater treatment plants listed in the preceding paragraph, and then discharged that wastewater either directly or indirectly into waters of the United States.

10. At times relevant herein, Defendants have caused the "discharge of pollutants" within the meaning of section 502(12) of the Act, 33 U.S.C. § 1362(12), from the treatment plants listed in paragraph 8 above through a "point source" within the meaning of section 502(14) of the Act, 33 U.S.C. § 1362(14), into a "navigable water" within the meaning of section 502(7) of the Act, 33 U.S.C. § 1362(7).

11. Section 301(a) of the Act, 33 U.S.C. § 1311(a), prohibits the discharge of pollutants by any person except as in compliance with certain sections of the Act, including the requirement that a person obtain a National Pollutant Discharge Elimination System (NPDES) permit for discharges to waters of the United States.

12. At times relevant herein Defendants were required by NPDES permits to submit monthly discharge monitoring reports ("DMRs") to EPA containing the results of the required sampling for each month, and reporting the actual number of any permit exceedances. On each report, the Defendants were required to certify, by the signature of a principal executive officer or authorized agent, that the submitted information is true, accurate and complete.

13. Subsection 309(d) of the Act, 33 U.S.C. § 1319(d), provides, in part, that any person who violates, inter alia, section 301 of the Act, 33 U.S.C. § 1311, including any permit condition or limitation implementing that section, violates any condition or limitation in a NPDES permit issued under section 402 of the Act, 33 U.S.C. § 1342, or violates any order issued by EPA under section 309(a) of the Act, 33 U.S.C. § 1319(a), shall be subject to a civil penalty not to exceed $25,000 per day for each such violation.

14. Each occurrence of a (1) discharge without a NPDES permit; (2) violation of an EPA Administrative Order; (3) discharge at an unpermitted location; (4) violation of an effluent limitation or other condition in a NPDES permit constitutes a separate violation of section 301 of the Act, 33 U.S.C. § 1311 punishable in accordance with section 309(d) of the Act, 33 U.S.C. § 1319(d).

FIRST CLAIM FOR RELIEF
(Barefoot Bay)

15. Paragraphs 1 through 14 are realleged and incorporated herein by reference as if fully set forth below.

16. During the period on or about April 1, 1990 to October 31, 1991, Defendants discharged pollutants from the Barefoot Bay Treatment Plant into the Sebastian River, without a NPDES permit.

17. Pursuant to section 309(a) of the Act, 33 U.S.C. § 1319(a), on September 26, 1990, EPA issued an Administrative Order (No. 90-106) to Defendant Florida Cities Water Company,

finding it in violation of the Act for discharging pollutants from its Barefoot Bay plant into waters of the United States, a drainage canal leading to the Sebastian Creek, without a valid NPDES permit and prescribing certain interim effluent limitations and monitoring requirements on pollutants discharged from the Barefoot Bay plant into the waters of the United States.

18. On repeated occasions (during the period in or about November 1990 to June 1991), Defendants violated EPA Administrative Order No. 90-106 by discharging effluent from the Barefoot Bay Treatment Plant which exceeded the Total Suspended Solids daily maximum limitation in that Order.

19. On repeated occasions (during the period in or about 1990-1991), Defendants violated EPA Administrative Order No. 90-106 by discharging effluent from the Barefoot Bay Treatment Plant which exceeded the Fecal Coliform daily maximum limitation in that Order.

20. On at least one occasion (May 1991), Defendants violated EPA Administrative Order No. 90-106 by discharging effluent from the Barefoot Bay Treatment Plant which did not meet the Dissolved Oxygen daily minimum requirement in that Order.

21. On at least one occasion (in or about October 1990), Defendants violated EPA Administrative Order No. 90-106 by discharging effluent from the Barefoot Bay Treatment Plant which exceeded the Biological Oxygen Demand (BOD) daily maximum limitation in that Order.

22. On at least one occasion (in or about October 1990), Defendants violated EPA Administrative Order No. 90-106 by discharging effluent from the Barefoot Bay Treatment Plant which exceeded the Biological Oxygen Demand (BOD) monthly average maximum limitation in that Order.

23. On at least one occasion (in or about November 1990), Defendants violated EPA Administrative Order No. 90-106 by discharging effluent from the Barefoot Bay Treatment Plant which exceeded the pH daily maximum limitation in that Order.

24. Beginning on or about November 1, 1991, Defendants were authorized by NPDES Permit Number FL0042293, subject to certain terms and conditions, to discharge pollutants from the Barefoot Bay Wastewater Treatment Plant into a drainage canal leading to the north prong of Sebastian Creek.

25. In at least seven months (in or about September 1992, October 1992, November 1992, December 1992, January 1993, February 1993, and March 1993), Defendants discharged pollutants from the Barefoot Bay Treatment Plant in excess of the Total Residual Chlorine daily maximum limitation in NPDES Permit Number FL0042293.

26. On at least three occasions (during the periods in or about September-October 1992, May 1993, and February 1994), the effluent from the Barefoot Bay Treatment Plant failed the test for chronic whole effluent toxicity in NPDES Permit Number FL0042293.

27. On a weekly basis during the period in or about November 1991 and continuing through at least June 1993, and on at least two occasions in November 1993, Defendants failed to monitor biological oxygen demand (BOD) at the Barefoot Bay Treatment Plant, as required by NPDES Permit No. FL0042293.

28. On a daily basis during the period on or about November 1, 1991 and continuing through at least June 28, 1993, Defendants failed to test for total residual chlorine (TRC) at the Barefoot Bay Treatment Plant using the method specified by Part I, Section A-2 of NPDES Permit No. FL0042293.

SECOND CLAIM FOR RELIEF
(Carrollwood)

29. Paragraphs 1 through 14 are realleged and incorporated herein by reference as if fully set forth below.

30. During the period in or about August 1990 to June 1991, Defendants discharged pollutants from the Carrollwood Treatment Plant into the Sweetwater Creek, without a NPDES permit.

31. Beginning on or about July 1, 1991, Defendants were authorized by NPDES Permit Number FL0029319, subject to certain terms and conditions, to discharge pollutants from the Carrollwood Wastewater Treatment Plant into the Sweetwater Creek.

32. In at least three months (in or about October, November, December 1991), Defendants discharged pollutants from the Carrollwood Treatment Plant in excess of the Total Suspended Solids monthly average limitation in Permit Number FL0029319.

33. On repeated occasions (in or about October, November, December 1991), Defendants discharged pollutants from the Carrollwood Treatment Plant in excess of the Total Suspended Solids daily maximum limitation in Permit Number FL0029319.

34. In at least five months (during the period in or about July-November 1991), Defendants discharged pollutants from the Carrollwood Treatment Plant in excess of the Total Phosphorus monthly average limitation in Permit Number FL0029319.

35. On repeated occasions (during the period in or about July-November 1991), Defendants discharged pollutants from the Carrollwood Treatment Plant in excess of the Total Phosphorus daily maximum limitation in Permit Number FL0029319.

36. On repeated occasions (during the period in or about July-October 1991), Defendants discharged pollutants from the Carrollwood Treatment Plant in excess of the Fecal Coliform daily maximum limitation in Permit Number FL0029319.

37. In at least four months (during the period in or about July-November 1991), Defendants discharged pollutants from the Carrollwood Treatment Plant in excess of the Total Nitrogen monthly average limitation in Permit Number FL0029319.

38. On repeated occasions (during the period in or about July-November 1991), Defendants discharged pollutants from the Carrollwood Treatment Plant in excess of the Total Nitrogen daily maximum limitation in Permit Number FL0029319.

39. In at least one month (in or about October 1991), Defendants discharged pollutants from the Carrollwood Treatment

Plant in excess of the Carbonaceous Biochemical Oxygen Demand monthly average limitation in Permit Number FL0029319.

40. On at least two occasions (in or about July and October 1991), Defendants discharged pollutants from the Carrollwood Treatment Plant in excess of the Carbonaceous Biochemical Oxygen Demand daily maximum limitation in Permit Number FL0029319.

41. On repeated occasions (during the period in or about July-December 1991), Defendants discharged pollutants from the Carrollwood Treatment Plant in excess of the Total Residual Chlorine daily maximum limitation in Permit Number FL0029319.

THIRD CLAIM FOR RELIEF
(Waterway Estates)

42. Paragraphs 1 through 14 are realleged and incorporated herein by reference as if fully set forth below.

43. During the period on or about October 1, 1988 to October 31, 1989, Defendants discharged pollutants from the Waterway Estates Wastewater Treatment Plant into the Caloosahatchee River without a NPDES permit.

44. Beginning on or about November 1, 1989, Defendants were authorized by NPDES Permit Number FL0030325, subject to certain terms and conditions, to discharge pollutants from the Waterway Estates Wastewater Treatment Plant directly into the Caloosahatchee River via "outfall 001."

45. On each day during the period on or about November 1, 1989 to July 14, 1991, Defendants discharged pollutants from the Waterway Estates Treatment Plant indirectly into the

Caloosahatchee River via a tributary canal which was not a permitted discharge location during the referenced period.

46. In at least nine months (each month during the period in or about July 1991 to March 1992), Defendants discharged pollutants from the Waterway Estates Treatment Plant in excess of the Total Nitrogen concentration limitation in Permit Number FL0030325.

47. In at least nine months (each month during the period in or about July 1991 to March 1992), Defendants discharged pollutants from the Waterway Estates Treatment Plant in excess of the Total Nitrogen loading limitation in Permit Number FL0030325.

48. On at least three occasions (in or about February 1992, April 1992, and June 1992), the effluent from the Waterway Estates Treatment Plant failed the test for chronic whole effluent toxicity in Permit Number FL0030325.

RELIEF

49. Pursuant to section 309(b) and (d) of the Act, 33 U.S.C. §§ 1319(b) and (d), Defendants are liable for civil penalties up to $25,000 per day for each violation of the Act, including up to $25,000 per day for each month in which a monthly average was violated.

WHEREFORE, Plaintiff, the United States of America, respectfully requests that:

1. The Defendants, and each of them, be ordered to pay a civil penalty up to $25,000 per day for each violation of the Act; and

2. This Court grant such other relief as it deems just and appropriate.

Respectfully submitted,

LOIS J. SCHIFFER

IN THE UNITED STATES DISTRICT COURT
FOR THE MIDDLE DISTRICT OF FLORIDA
FORT MYERS DIVISION

UNITED STATES OF AMERICA, Plaintiff, v. AVATAR HOLDINGS, INC., and FLORIDA CITIES WATER COMPANY, INC., Defendants.	CIVIL ACTION NO. 93-281-CIV-FTM-21

AMENDED COMPLAINT

The United States of America, by authority of the Attorney General, acting at the request of the Administrator of the U.S. Environmental Protection Agency ("EPA"), alleges as follows:

NATURE OF ACTION

1. This is a civil action brought pursuant to section 309(b) of the Clean Water Act ("the Act"), 33 U.S.C. § 1319(b), for civil penalties for violations of section 301 of the Act, 33 U.S.C. § 1311, and of the conditions and limitations of National Pollutant Discharge Elimination System ("NPDES") permits issued by EPA pursuant to section 402 of the Act, 33 U.S.C. § 1342. Notice of the commencement of the action has been provided to the State of Florida.

JURISDICTION AND VENUE

2. This Court has jurisdiction over the subject matter of this action under 28 U.S.C. §§ 1331, 1345, and 1355, and section 309(b) of the Act, 33 U.S.C. § 1319(b).

3. Venue is proper in the Middle District of Florida pursuant to 28 U.S.C. §§ 1391(b) and (c) and 1392, and section 309(b) of the Act, 33 U.S.C. § 1319(b).

THE DEFENDANTS

4. Defendant Avatar Holdings, Inc. is a Delaware corporation which resides and does business in Florida.

5. Defendant Florida Cities Water Company, Inc., is a subsidiary of Avatar Holdings, Inc., and is a Florida corporation that resides and does business in Florida.

6. As the parent company of Florida Cities Water Company, Inc., Defendant Avatar Holdings, Inc. directly controls the management of Florida Cities Water Company's environmental compliance practices, and is thereby directly responsible for the acts and omissions alleged herein. Thus, each subsequent reference to "Defendants" herein should be read to include Avatar Holdings, Inc., acting through Florida Cities Water Company.

7. Each of the defendants is a "person" within the meaning of section 502(5) of the Act, 33 U.S.C. § 1362(5).

GENERAL ALLEGATIONS

8. At times relevant herein, Defendants have owned and operated privately owned wastewater treatment plants known as the Barefoot Bay Wastewater Treatment Plant, Carrollwood Wastewater Treatment Plant, and Waterway Estates Wastewater Treatment Plant, all located in the State of Florida.

9. At times relevant herein, Defendants have collected wastewater from residential and/or commercial sources,

treated that wastewater at the various wastewater treatment plants listed in the preceding paragraph, and then discharged that wastewater either directly or indirectly into waters of the United States.

10. At times relevant herein, Defendants have caused the "discharge of pollutants" within the meaning of section 502(12) of the Act, 33 U.S.C. § 1362(12), from the treatment plants listed in paragraph 8 above through a "point source" within the meaning of section 502(14) of the Act, 33 U.S.C. § 1362(14), into a "navigable water" within the meaning of section 502(7) of the Act, 33 U.S.C. § 1362(7).

11. Section 301(a) of the Act, 33 U.S.C. § 1311(a), prohibits the discharge of pollutants by any person except as in compliance with certain sections of the Act, including the requirement that a person obtain a National Pollutant Discharge Elimination System (NPDES) permit for discharges to waters of the United States.

12. At times relevant herein Defendants were required by NPDES permits to submit monthly discharge monitoring reports ("DMRs") to EPA containing the results of the required sampling for each month, and reporting the actual number of any permit exceedances. On each report, the Defendants were required to certify, by the signature of a principal executive officer or authorized agent, that the submitted information is true, accurate and complete.

13. Subsection 309(d) of the Act, 33 U.S.C. § 1319(d), provides, in part, that any person who violates, inter alia, section 301 of the Act, 33 U.S.C. § 1311, including any permit condition or limitation implementing that section, violates any condition or limitation in a NPDES permit issued under section 402 of the Act, 33 U.S.C. § 1342, or violates any order issued by EPA under section 309(a) of the Act, 33 U.S.C. § 1319(a), shall be subject to a civil penalty not to exceed $25,000 per day for each such violation.

14. Each occurrence of a (1) discharge without a NPDES permit; (2) violation of an EPA Administrative Order; (3) discharge at an unpermitted location; (4) violation of an effluent limitation or other condition in a NPDES permit constitutes a separate violation of section 301 of the Act, 33 U.S.C. § 1311 punishable in accordance with section 309(d) of the Act, 33 U.S.C. § 1319(d).

FIRST CLAIM FOR RELIEF
(Barefoot Bay)

15. Paragraphs 1 through 14 are realleged and incorporated herein by reference as if fully set forth below.

16. During the period on or about April 1, 1990 to October 31, 1991, Defendants discharged pollutants from the Barefoot Bay Treatment Plant into the Sebastian River, without a NPDES permit.

17. Pursuant to section 309(a) of the Act, 33 U.S.C. § 1319(a), on September 26, 1990, EPA issued an Administrative Order (No. 90-106) to Defendant Florida Cities Water Company,

finding it in violation of the Act for discharging pollutants from its Barefoot Bay plant into waters of the United States, a drainage canal leading to the Sebastian Creek, without a valid NPDES permit and prescribing certain interim effluent limitations and monitoring requirements on pollutants discharged from the Barefoot Bay plant into the waters of the United States.

18. On repeated occasions (during the period in or about November 1990 to June 1991), Defendants violated EPA Administrative Order No. 90-106 by discharging effluent from the Barefoot Bay Treatment Plant which exceeded the Total Suspended Solids daily maximum limitation in that Order.

19. On repeated occasions (during the period in or about 1990-1991), Defendants violated EPA Administrative Order No. 90-106 by discharging effluent from the Barefoot Bay Treatment Plant which exceeded the Fecal Coliform daily maximum limitation in that Order.

20. On at least one occasion (May 1991), Defendants violated EPA Administrative Order No. 90-106 by discharging effluent from the Barefoot Bay Treatment Plant which did not meet the Dissolved Oxygen daily minimum requirement in that Order.

21. On at least one occasion (in or about October 1990), Defendants violated EPA Administrative Order No. 90-106 by discharging effluent from the Barefoot Bay Treatment Plant which exceeded the Biological Oxygen Demand (BOD) daily maximum limitation in that Order.

22. On at least one occasion (in or about October 1990), Defendants violated EPA Administrative Order No. 90-106 by discharging effluent from the Barefoot Bay Treatment Plant which exceeded the Biological Oxygen Demand (BOD) monthly average maximum limitation in that Order.

23. On at least one occasion (in or about November 1990), Defendants violated EPA Administrative Order No. 90-106 by discharging effluent from the Barefoot Bay Treatment Plant which exceeded the pH daily maximum limitation in that Order.

24. Beginning on or about November 1, 1991, Defendants were authorized by NPDES Permit Number FL0042293, subject to certain terms and conditions, to discharge pollutants from the Barefoot Bay Wastewater Treatment Plant into a drainage canal leading to the north prong of Sebastian Creek.

25. In at least seven months (in or about September 1992, October 1992, November 1992, December 1992, January 1993, February 1993, and March 1993), Defendants discharged pollutants from the Barefoot Bay Treatment Plant in excess of the Total Residual Chlorine daily maximum limitation in NPDES Permit Number FL0042293.

26. On at least three occasions (during the periods in or about September-October 1992, May 1993, and February 1994), the effluent from the Barefoot Bay Treatment Plant failed the test for chronic whole effluent toxicity in NPDES Permit Number FL0042293.

27. On a weekly basis during the period in or about November 1991 and continuing through at least June 1993, and on at least two occasions in November 1993, Defendants failed to monitor biological oxygen demand (BOD) at the Barefoot Bay Treatment Plant, as required by NPDES Permit No. FL0042293.

28. On a daily basis during the period on or about November 1, 1991 and continuing through at least June 28, 1993, Defendants failed to test for total residual chlorine (TRC) at the Barefoot Bay Treatment Plant using the method specified by Part I, Section A-2 of NPDES Permit No. FL0042293.

SECOND CLAIM FOR RELIEF
(Carrollwood)

29. Paragraphs 1 through 14 are realleged and incorporated herein by reference as if fully set forth below.

30. During the period in or about August 1990 to June 1991, Defendants discharged pollutants from the Carrollwood Treatment Plant into the Sweetwater Creek, without a NPDES permit.

31. Beginning on or about July 1, 1991, Defendants were authorized by NPDES Permit Number FL0029319, subject to certain terms and conditions, to discharge pollutants from the Carrollwood Wastewater Treatment Plant into the Sweetwater Creek.

32. In at least three months (in or about October, November, December 1991), Defendants discharged pollutants from the Carrollwood Treatment Plant in excess of the Total Suspended Solids monthly average limitation in Permit Number FL0029319.

33. On repeated occasions (in or about October, November, December 1991), Defendants discharged pollutants from the Carrollwood Treatment Plant in excess of the Total Suspended Solids daily maximum limitation in Permit Number FL0029319.

34. In at least five months (during the period in or about July-November 1991), Defendants discharged pollutants from the Carrollwood Treatment Plant in excess of the Total Phosphorus monthly average limitation in Permit Number FL0029319.

35. On repeated occasions (during the period in or about July-November 1991), Defendants discharged pollutants from the Carrollwood Treatment Plant in excess of the Total Phosphorus daily maximum limitation in Permit Number FL0029319.

36. On repeated occasions (during the period in or about July-October 1991), Defendants discharged pollutants from the Carrollwood Treatment Plant in excess of the Fecal Coliform daily maximum limitation in Permit Number FL0029319.

37. In at least four months (during the period in or about July-November 1991), Defendants discharged pollutants from the Carrollwood Treatment Plant in excess of the Total Nitrogen monthly average limitation in Permit Number FL0029319.

38. On repeated occasions (during the period in or about July-November 1991), Defendants discharged pollutants from the Carrollwood Treatment Plant in excess of the Total Nitrogen daily maximum limitation in Permit Number FL0029319.

39. In at least one month (in or about October 1991), Defendants discharged pollutants from the Carrollwood Treatment

Plant in excess of the Carbonaceous Biochemical Oxygen Demand monthly average limitation in Permit Number FL0029319.

40. On at least two occasions (in or about July and October 1991), Defendants discharged pollutants from the Carrollwood Treatment Plant in excess of the Carbonaceous Biochemical Oxygen Demand daily maximum limitation in Permit Number FL0029319.

41. On repeated occasions (during the period in or about July-December 1991), Defendants discharged pollutants from the Carrollwood Treatment Plant in excess of the Total Residual Chlorine daily maximum limitation in Permit Number FL0029319.

THIRD CLAIM FOR RELIEF
(Waterway Estates)

42. Paragraphs 1 through 14 are realleged and incorporated herein by reference as if fully set forth below.

43. During the period on or about October 1, 1988 to October 31, 1989, Defendants discharged pollutants from the Waterway Estates Wastewater Treatment Plant into the Caloosahatchee River without a NPDES permit.

44. Beginning on or about November 1, 1989, Defendants were authorized by NPDES Permit Number FL0030325, subject to certain terms and conditions, to discharge pollutants from the Waterway Estates Wastewater Treatment Plant directly into the Caloosahatchee River via "outfall 001."

45. On each day during the period on or about November 1, 1989 to July 14, 1991, Defendants discharged pollutants from the Waterway Estates Treatment Plant indirectly into the

Caloosahatchee River via a tributary canal which was not a permitted discharge location during the referenced period.

46. In at least nine months (each month during the period in or about July 1991 to March 1992), Defendants discharged pollutants from the Waterway Estates Treatment Plant in excess of the Total Nitrogen concentration limitation in Permit Number FL0030325.

47. In at least nine months (each month during the period in or about July 1991 to March 1992), Defendants discharged pollutants from the Waterway Estates Treatment Plant in excess of the Total Nitrogen loading limitation in Permit Number FL0030325.

48. On at least three occasions (in or about February 1992, April 1992, and June 1992), the effluent from the Waterway Estates Treatment Plant failed the test for chronic whole effluent toxicity in Permit Number FL0030325.

RELIEF

49. Pursuant to section 309(b) and (d) of the Act, 33 U.S.C. §§ 1319(b) and (d), Defendants are liable for civil penalties up to $25,000 per day for each violation of the Act, including up to $25,000 per day for each month in which a monthly average was violated.

WHEREFORE, Plaintiff, the United States of America, respectfully requests that:

1. The Defendants, and each of them, be ordered to pay a civil penalty up to $25,000 per day for each violation of the Act; and

2. This Court grant such other relief as it deems just and appropriate.

Respectfully submitted,

LOIS J. SCHIFFER
Assistant Attorney General
Environment and Natural Resources Division
U.S. Department of Justice

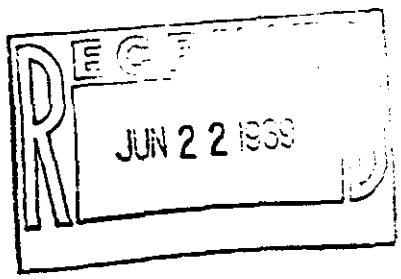
FLORIDA CITIES WATER COMPANY

Exhibit_____(GSA-8)

June 19, 1989

Florida Department of Environmental Regulations
Division of Environmental Programs
Twin Towers Office Building
2600 Blair Stone Road
Tallahassee, FL 32301



Attention: Mr. Bruce DeGrove
Environmental Supervisor

Dear Mr. DeGrove:

Pursuant to the Grizzle-Figg Legislation and the United States Environmental Protection Agency (USEPA) NPDES Permit requirements, Florida Cities Water Company contracted Limno-Tech, Inc. (LTI) to conduct a "Minimal Negative Impact" study of the Carrollwood Wastewater Treatment Plant discharge impact on the Sweetwater Creek quality. LTI conducted field studies to examine impacts of the current discharge of secondary treated wastewater effluent, successfully calibrated a water quality model based on this data and conducted model simulations at low flow/high temperature conditions in the stream to forecast the impacts of an upgraded level of treatment for the Carrollwood facility. LTI's modeling projections indicated Minimal Negative Impacts would occur in Sweetwater Creek assuming Advanced Waste Treatment (AWT) discharge and pollutant decay rates reflective of this level of treatment. In this regard please find enclosed for your review a copy of LTI's report documenting field and modeling activities related to the analysis of minimal negative impacts on Sweetwater Creek.

Based on the LTI report, Florida Cities Water Company respectfully requests the issuance of commitment (Waste Load Allocation) to allow the proposed Carrollwood AWT plant to discharge to Sweetwater Creek. After you have had the opportunity to review LTI's report we would be pleased to meet with you and go over any questions that may be still outstanding. Please contact me if you desire such a meeting.

Thank you in advance for your cooperation.

Very truly yours,

Robert H. French, P.E.
Senior Vice President

RHF/dd

SECTION 1 - BASIC SERVICES OF ENGINEER

1.1. General

1.1.1 ENGINEER shall perform professional services as hereinafter stated which include customary civil, environmental, structural, mechanical and electrical engineering services and customary building and landscape architectural services incidental thereto.

1.1.2. Services rendered by ENGINEER for the Project shall be in accordance with generally accepted professional practices and State-of-the-Art methods for the intended use of the Project, in accordance with the laws of the State of Florida, and applicable governmental regulations.

1.2. Preliminary Design and Report Phase

After written authorization to proceed, the ENGINEER shall:

1.2.1. Meet with the OWNER, and his representatives, to establish the alternative systems to be evaluated and to define OWNER equipment and operating requirements to be considered in establishing facility design criteria.

1.2.2. ENGINEER shall prepare a preliminary design memorandum depicting the design criteria, schematic layouts, sketches and appropriate calculations clearly indicating the ENGINEER's findings, considerations involved and alternative solutions available to OWNER, and setting forth the ENGINEER's recommendations. Moreover, the ENGINEER shall provide a preliminary construction cost estimate, operating cost estimate and schedule for implementation.

1.2.3. Furnish five copies of the Report and present and review it in person with OWNER.

1.3. Final Design Phase

Following written approval of the preliminary design and report by the OWNER, ENGINEER shall:

1.3.1. Based on the information contained in the approved Preliminary Design memorandum, ENGINEER shall prepare Drawings, Technical Specifications and Contract Documents including contract agreement forms, general conditions, supplementary conditions, bid forms, invitations to bid and instructions to bidders, and assist in the preparation of other related documents. Original Drawings shall be drawn on 24-inch x 36-inch mylar sheets.

1.3.2. Drawings, Technical Specifications and Contract Documents shall be submitted to OWNER at 50 percent and 95 percent completion stages for review and written approval. For each review and approval stage, furnish five sets of above documents to OWNER. All review comments of OWNER shall be evaluated and incorporated into the final bidding documents.

1.3.3. Furnish five sets of final bidding documents and present and review them in person with OWNER.

1.3.4. Prepare and submit Design Criteria, Drawings and Contract Documents as required to the U.S. Environmnetal Protection Agency, Southwest Florida Water Management District, Florida Department of Environmental Regulation, and Hillsborough County to support the permit applications as provided for in Exhibit "A" to this Agreement. Assist in obtaining approval of the permit applications.

1.3.5. Prepare an opinion of probable construction cost for the Project and submit to OWNER with final bidding documents.

The opinion of probable construction cost of the entire Project (herein referred to as "Construction Cost") means the total cost of the entire Project to OWNER, but it will not include ENGINEER's compensation and expenses, the cost of land, rights-of-way, or compensation for or damages to properties unless this Agreement so specifies, nor

will it include OWNER's legal, accounting, insurance counseling or auditing services, or interest and financing charges incurred in connection with the Project.

Since ENGINEER has no control over the cost of labor, materials, equipment or services furnished by others, or over the Contractor(s)' methods of determining prices, or over competitive bidding or market conditions, his opinions of probable Project Cost and Construction Cost provided for herein are to be made on the basis of his experience and qualifications and represent his best judgement as an experienced and qualified professional engineer, familiar with the construction industry; but ENGINEER cannot and does not guarantee that proposals, bids or actual Project or Construction Cost will not vary from opinions of probable cost prepared by him.

1.4. Bidding Phase

After written authorization to proceed with the Bidding Phase, ENGINEER shall:

1.4.1. Release Contract Documents for bidding and assist OWNER in obtaining bids for the prime contract for construction, materials, equipment and services.

1.4.2. Consult with and advise OWNER as to the qualifications of contractors submitting bids.

1.4.3. Consult with and advise OWNER as to the acceptability of substitute materials and equipment proposed by Contractor(s) when substitution prior to the award of contracts is allowed by the bidding documents.

1.4.4. Assist OWNER in evaluating bids or proposals and in assembling and awarding contracts.

1.5. Construction Phase

During the Construction Phase ENGINEER shall:

1.5.1. Consult with and advise OWNER and act as his representative as provided in Articles 1 through 17, inclusive, of the N.S.P.E. Standard General Conditions of the Construction Contract No. 1910-8 (1978 edition). The extent and limitations of the duties, responsibilities and authority of ENGINEER as assigned in said Standard General Conditions shall not be modified, except as ENGINEER may otherwise agree in writing. All of OWNER's instructions to Contractor(s) will be issued through ENGINEER who will have authority to act on behalf of OWNER to the extent provided in said Standard General Conditions except as otherwise provided in writing.

1.5.2. Make visits to the site at intervals appropriate to the various stages of construction to observe as an experienced and qualified design professional the progress and quality of the executed work of Contractor(s) and to determine in general if such work is proceeding in accordance with the Contract Documents. ENGINEER shall not be required to make exhaustive or continuous on-site inspections to check the quality of quantity of such work. ENGINEER shall not be responsible for the means, methods, techniques, sequences or procedures of construction selected by Contractor(s) or the safety precautions and programs incident to the work of Contractor(s). ENGINEER's efforts will be directed toward providing a greater degree of confidence for OWNER that the completed work of Contractor(s) will conform to the Contract Documents, but ENGINEER shall not be responsible for the failure of Contractor(s) to perform the work in accordance with the Contract Documents. During such visits and on the basis of on-site observations ENGINEER shall keep OWNER informed of the progress of the work, shall endeavor to guard OWNER against defects and deficiencies in such work and may disapprove or reject work failing to conform to the Contract Documents.

1.5.3. Review and approve (or take other appropriate action in respect of) Shop Drawings (as that term is defined in the aforesaid Standard General Conditions) and samples, the results of tests and inspections and other data which each Contractor is required to submit, but only for conformance with the design concept of the Project and compliance with the information given in the Contract Documents (but such review and approval or other action shall not extend to means, methods, sequences, techniques or procedure of construction or to safety precautions and programs incident thereto); determine the acceptability of substitute materials and equipment proposed

by Contractor(s); and receive and review (for general content as required by the Specifications) maintenance and operating instructions, schedules, guarantees, bonds and certificates of inspection which are to be assembled by Contractor(s) in accordance with the Contract Documents.

1.5.4. Issue all instructions of OWNER to Contractor(s); issue necessary interpretations and clarifications of the Contract Documents and in connection therewith prepare change orders as required; having authority, as OWNER's representative, to require special inspection or testing of the work; act as initial interpreter of the requirements of the Contract Documents and judge of the acceptability of the work thereunder and make decisions on all claims of OWNER and Contractor(s) relating to the acceptability of the work or the interpretation of the requirements of he Contract Documents pertaining to the execution and progress of the work; but ENGINEER shall not be liable for the results of any such interpretations or decisions rendered by him in good faith.

1.5.5. Based on ENGINEER's on-site observations as an experienced and qualified design professional and on review of applications for payment and the accompanying data and schedules, determine the amounts owing to Contractor(s) and recommend in writing payments to Contractor(s) in such amounts; such recommendations of payment will constitute a representation to OWNER, based on such observations and review, that the work has progressed to the point indicated that, to the best of ENGINEER's knowledge, information and belief, the quality of such work is in accordance with the Contract Documents (subject to an evaluation of such work as a functioning Project upon Substantial Completion, to the results of any subsequent tests called for in the Contract Documents, and to any qualifications stated in his recommendation), and that payment of the amount recommended is due Contractor(s); but by recommending any payment ENGINEER will not thereby be deemed to have represented that continuous or exhaustive examinations have been made by ENGINEER to check the quality or quantity of the work or to review the means, methods, sequences, techniques or procedures of construction or safety precautions or programs incident thereto or that ENGINEER has made an examination to ascertain how or for what purposes any Contractor has used the moneys paid on account of the Contract Price, or that title to any of the work, materials or equipment has passed to OWNER free and clear of any

lien, claims, security interests or encumbrances, or that Contractor(s) have completed their work exactly in accordance with the Contract Documents.

1.5.6. Conduct an inspection to determine if the project is substantially complete and a final inspection to determine if the work has been completed in accordance with the Contract Documents and if each Contractor has fulfilled all of his obligations thereunder so the ENGINEER may recommend, in writing, final payment to each Contractor and may give written notice to OWNER and the Contractor(s) that the work is acceptable (subject to any conditions therein expressed), but any such recommendation and notice shall be subject to the limitations expressed in paragraph 1.5.5.

1.5.7. ENGINEER shall not be responsible for the acts or omissions of any Contractor, or subcontractor, or any of the Contractor(s)' or subcontractors' agents or employees or any other persons (except ENGINEER's own employees and agents) at the site or otherwise performing any of the Contractor(s)' work; however, nothing contained in paragraphs 1.5.1. thru 1.5.7. inclusive, shall be construed to release ENGINEER from liability for failure to properly perform duties undertaken by him in the Contract Documents.

1.6. Resident Services During Construction

1.6.1. A Resident Project Representative will be furnished and will act as directed by ENGINEER in order to assist ENGINEER in observing the performance of specific items of work of Contractor(s). Such services will be paid for by OWNER as indicated in Section 5.

1.6.2. The duties and responsiblities and the limitations of the authority of the Resident Project Representative and assistants for the services specified in paragraph 1.6.1. shall be in accordance with No. 1910-1-A National Society of Professional Engineers - Contract Documents (1983 Edition).

1.6.3. Through more extensive on-site observations of work in progress and field checks by the Resident Project Representative and assistants, ENGINEER shall

endeavor to provide further protection for OWNER against defects and deficiencies in the work of Contractor(s); but the furnishing of such resident project representation will not make ENGINEER responsible for construction means, methods, techniques, sequences or procedures or safety precautions or programs or Contractor(s)' failure to perform their work in accordance with the Contract Documents.

1.6.4. If OWNER designates another person to represent OWNER at the Project site who is not ENGINEER's agent or employee, the duties, responsibilities and limitations of authority of such other person and the effect thereof on the duties and responsiblities of ENGINEER under this Agreement will be set forth in an exhibit that is to be identified, attached to and made a part of this Agreement before such services begin.

1.7. Project Documents

1.7.1. Original project documents prepared by ENGINEER under this Agreement are, and shall remain, the property of OWNER, and shall be delivered to OWNER upon final completion or termination of the Project covered by this Agreement. Original project documents shall include, but not be limited to, original mylar drawings; technical specifications and Contract Documents; survey notes; engineering reports; and, design notes.

1.7.2. All documents including Drawings and Specifications prepared by ENGINEER pursuant to this Agreement are instruments of service in respect of the Project. They are not intended or represented to be suitable for reuse by OWNER or others on extensions of the project or any other project. Any reuse without written verification or adaptation by ENGINEER for the specific purpose intended will be at OWNER's sole risk and without liability or legal exposure to ENGINEER; and OWNER shall indemnify and hold harmless ENGINEER for all claims, damages, losses and expenses including attorneys' fees arising out of or resulting therefrom. Any such verification or adaptation will entitle ENGINEER to further compensation at rates to be agreed upon by OWNER and ENGINEER.

1.8. ENGINEER's Project Representative

Designate in writing a person to act as ENGINEER's representative (Project Director, Project Manager, etc.) with respect to the services to be rendered under this Agreement. OWNER shall reserve the right of requesting a change of the Project Representative if the representative is unacceptable to OWNER. Such representative shall have complete authority to transmit and receive information, interpret and define ENGINEER's policies and have overall responsibility for services provided by ENGINEER for the Project.

SECTION 2 - ADDITIONAL SERVICES OF ENGINEER

2.1. General

If authorized in writing by OWNER, ENGINEER shall furnish or obtain from others Additional Services of the following types which are not considered normal or customary Basic Services for the Project. These Additional Services will be paid for by OWNER as indicated in Section 5.

2.1.1. Service resulting from significant changes in extent of the Project or its design including, but not limited to, changes in size, complexity, OWNER's schedule, or character of construction; and revising previously accepted studies, reports, design documents or Contract Documents when such revisions are due to causes beyond ENGINEER's control.

2.1.2. Providing renderings for OWNER's use.

2.1.3. Preparing documents for alternate bids requested by OWNER for Contractor(s)' work which is not executed or documents for out-of-sequence work.

2.1.4. Services resulting from the award of more separate prime contracts for construction, materials, equipment or services for the Project than are originally anticipated, and services resulting from the arranging for performance by persons

other that the principal prime contractors of services for the OWNER and administering OWNER's contracts for such services.

2.1.5. Service in connection with change orders to reflect changes requested by OWNER if the resulting change in compensation for Basic Services is not commensurate with the additional services rendered, services after the award of each contract in evaluating substitutions proposed by Contractor(s), and in making revisions to Drawings and Specifications occasioned thereby, and services resulting from significant delays, changes or price increases occurring as a direct or indirect result of material, equipment or energy shortages.

2.1.6. Services during out-of-town travel required of ENGINEER other than visits to the site as required by Section 1.

2.1.7. Additional or extended services during construction made necessary by (1) work damaged by fire or other cause during construction, (2) a significant amount of defective or neglected work of Contractor(s), (3) prolongation of the contract time of any prime contract by more than sixty days, (4) acceleration of the progress schedule involving services beyond normal working hours, and (5) default by Contractor(s).

2.1.8. Services after completion of the Construction Phase, such as inspections during any guarantee period and reporting observed discrepancies under guarantees called for in any contract for the Project.

2.1.9. Preparing to serve or serving as a consultant or witness for OWNER in any litigation, public hearing or other legal or administrative proceeding involving the Project (except as agreed to under Basic Services).

2.1.10. Additional services in connection with Project, including services normally furnished by OWNER and services not otherwise provided for in this Agreement.

2.2. Resident Services During Construction

2.2.1. If requested by OWNER or recommended by ENGINEER and agreed to in

writing by the OWNER, a Resident Project Representative will be furnished, to supplement the resident services provided under Section I paragraph 1.6, and will act as directed by ENGINEER in order to assist ENGINEER in observing performance of the work or Contractor(s). Such services will be paid for by OWNER as indicated in Section 5.

2.2.2. The duties and responsibilities and the limitations on the authority of the Resident Project Representative and assistants will be set forth in Exhibit B which is attached to and made a part of this Agreement.

2.2.3. Through more extensive on-site observations of the work in progress and field checks of materials and equipment by the Resident Project Representative (if furnished) and assistants, ENGINEER shall endeavor to provide further protection for OWNER against defects and deficiencies in the work of Contractor(s); but the furnishing of such resident Project representation will not make ENGINEER responsible for construction means, methods, techniques, sequences or procedures or for safety precautions or programs, or for Contractor(s)' failure to perform their work in accordance with the Contract Documents.

2.2.4. If OWNER designates another person to represent OWNER at the Project site who is not ENGINEER's agent or employee, the duties, responsibilities and limitations of authority of such other person and the effect thereof on the duties and responsibilities of ENGINEER under this Agreement will be set forth in an exhibit that is to be identified, attached to and made a part of this Agreement before such services begin.

SECTION 3 - RESPONSIBILITY OF OWNER

OWNER shall:

3.1. Provide all criteria and full information as to OWNER's requirements for the Project, including design objectives and constraints, space, capacity and performance requirements, flexibility and expandability; and furnish copies of all design and

construction standards which OWNER will require to be included in the Drawings and Specifications.

3.2. Assist ENGINEER by placing at his disposal all available information pertinent to the Project including previous reports, studies, drawings, specifications, permits, applications and any other data relative to design or construction of the Project. Any previous information transmitted to ENGINEER for his use on this Project shall remain the property of OWNER and shall be returned to OWNER upon final completion or termination of the Project covered by this Agreement for the ENGINEER's services.

3.3. Furnish to ENGINEER, as required for performance of ENGINEER's services (except to the extent provided otherwise in this Agreement under "Section 1 - Services of ENGINEER"), data prepared by or services of others, including without limitation laboratory tests and inspections of equipment; appropriate professional interpretation of the foregoing; environmental assessment and impact statements; property, boundary, easement, right-of-way, topographic and utility surveys; property descriptions; zoning, deed and other land use restriction; and other special data or consultations not covered in this Agreement under Section 1; all of which ENGINEER may rely upon in performing his services.

3.4. Arrange for access to and make all provisions for ENGINEER to enter upon public and private property as required for ENGINEER to perform his services.

3.5. Examine all studies, reports, sketches, drawings, specifications, proposals and other documents presented by ENGINEER, obtain advice of an attorney, insurance counselor and other consultants as OWNER deems appropriate for such examination and render in writing decisions pertaining thereto within a reasonable time so as not to delay the services of ENGINEER.

3.6 Furnish approvals, execute and pay all fees for all necessary applications required for the Project by applicable regulatory agencies and such approvals and consents from others as may be necessary for completion of the Project.

3.7 Provide such accounting, independent cost estimating and insurance counseling services as may be required for the Project, such legal services as OWNER may require or ENGINEER may reasonably request with regard to legal issues pertaining to the Project including any that may be raised by Contractor(s) as long as such legal services are not based upon any negligence of the ENGINEER, such auditing service as OWNER may require to ascertain how or for what purpose any Contractor has used the moneys paid to him under the construction contract, and such inspection services as OWNER may require to ascertain that Contractor(s) are complying with any law, rule or regulation applicable to their performance of the work.

3.8 Designate in writing a person to act as OWNER's representative with respect to the services to be rendered under this Agreement. Such person shall have complete authority to transmit instruction, receive information, interpret and define OWNER's policies and decisions with respect to materials, equipment, elements and systems pertinent to ENGINEER's services.

3.9. Give prompt written notice to ENGINEER whenever OWNER observes or otherwise becomes aware of any development that affects the scope or timing of ENGINEER's services, or any defect in the work of Contractor(s).

3.10. Bear all costs incident to compliance with requirements of this Section 3.

SECTION 4 - PERIOD OF SERVICE

4.1. The provisions of this Section 4 and the various rates of compensation for ENGINEER's services provided for elsewhere in this Agreement have been agreed to in anticipation of the orderly and continuous progress of the Project through completion of the Construction Phase. ENGINEER's obligation to render services hereunder will extend for a period which may reasonably be required for the design, award of contracts and construction of the Project including extra work and required extensions thereto.

4.2. The services called for in the Preliminary Design and Report Phase of the

Project will be completed and the Report submitted within 30 calendar days following written authorization to proceed with that phase of services.

4.3. After acceptance and approval by OWNER of the Preliminary Design and Report Phase documents indicating any specific modifications or changes in the extent of the Project desired by OWNER, and upon written authorization from OWNER, ENGINEER shall proceed with the performance of services called for in the Final Design Phase; and shall deliver final bidding Documents and an opinion of probable Project Costs for all work of Contractor(s) on the Project within 90 calendar days following authorization to proceed with that phase of services.

4.4. ENGINEER's services under the Preliminary Design and Report Phase and the Final Design Phase shall each be considered complete at the earlier of (1) the date when the submissions for that phase have been accepted and approved by OWNER, or (2) thirty days after the date when such submissions are delivered to OWNER for final acceptance, plus such additional time as may be considered reasonable for obtaining approval of governmental authorities having jurisdiction over design criteria applicable to the Project.

4.5. After acceptance by OWNER of the ENGINEER's Drawings, Specifications and other Final Design phase documentation including the opinion of probable Project Cost and upon written authorization to proceed, ENGINEER shall proceed with performance of the services called for in the Bidding Phase. This Phase shall terminate and the services to be rendered thereunder shall be considered complete upon commencement of the Construction Phase.

4.6. The Construction Phase will commence with the execution of the first prime contract to be executed for the work of the Project or any part thereof, and will terminate upon written approval by ENGINEER of final payment on the last prime contract to be completed. It is anticipated that construction phase services will be completed within 520 calendar days after written Notice to Proceed with the preliminary design and report phase of the project.

4.7. If OWNER has requested significant modifications or changes on the extent

of the Project, the time of performance of ENGINEER's services and his various rates of compensation shall be adjusted appropriately.

4.8. If OWNER fails to give prompt written authorization to proceed with any phase of services after completion of the immediately preceding phase, or if the Construction Phase has not commenced within 120 calendar days after completion of the Final Design Phase, ENGINEER may, after giving seven days' written notice to OWNER, suspend services under this Agreement.

4.9. If ENGINEER's services for design or services during construction of the Project are delayed or suspended in whole or in part by OWNER for more than three months for reasons beyond ENGINEER's control, or if ENGINEER for any reason is required to render services more than one year after Substantial Completion, the compensation provided for elsewhere in this Agreement shall be subject to renegotiation.

SECTION 5 - PAYMENTS TO ENGINEER

5.1. Basic and Additional Services

OWNER shall pay ENGINEER for the services of personnel engaged directly on the Project, including, but not limited to, engineers, architects, surveyors, designers, drafters, specification writers, estimators, other technical personnel, stenographers, typists and clerks. Payment shall be based on the actual hours worked by each employee of ENGINEER assigned to the Project and shall be an amount equal to the Direct Labor Cost of the employee times a multiplier factor as provided for in Exhibit "A" to this Agreement. The Direct Labor Cost for each employee engaged directly on the Project shall include salaries and wages (basic and incentive) paid to employees, but does not include indirect payroll related costs or fringe benefits. The multiplier shall include the cost of customary and statutory benefits including, but not limited to: Social Security contributions; unemployment, excise and payroll taxes; worker's compensation; health and retirement benefits; sick leave, vacation, and holiday pay applicable thereto plus overhead expenses and operating margins.

5.2. Reimbursable Expenses

OWNER shall pay ENGINEER the actual costs of all Reimbursable Expenses incurred in connection with all Basic and Additional Services for the Project. Reimbursable Expenses mean the actual expenses incurred directly in connection with the Project for: materials and supplies; transportation and subsistence; toll telephone calls and telegrams; postage; reproduction of reports, drawings and specifications; aerial reconnaissance photographs; construction and other photographs; computer time; word processor time; obtaining bids from Contractor(s); the actual cost of special consultants including soils testing, surveyors, water and wastewater laboratory testing, ecological and environmental scientific consultants; and similar Project-related items in addition to those required under Section 1.

5.3. Total payment to ENGINEER for Basic Services and Reimbursable Expenses (exclusive of applicable state sales tax on professional services) associated with Basic Services for the Project, shall not exceed three hundred sixteen thousand eight hundred and eighty dollars ($316,880.00) without prior written authorization from OWNER.

5.4. OWNER shall pay ENGINEER for Additional Services Rendered under Section 2 in accordance with the provisions of paragraphs 5.1 and 5.2. Each authorization for additional services shall establish a total payment limit which shall not be exceeded without prior written authorization of the OWNER.

5.5. Times of Payments

5.5.1. ENGINEER shall submit monthly statements for Basic and Additional Services rendered and for Reimbursable Expenses incurred. The monthly statements shall be itemized indicating the hours and payroll costs for each discipline contributing to the Project (e.g., Architectural, Civil, Landscape, Structural, Environmental, Mechanical, Electrical, Instrumentation), and the amounts for each type of Reimbursable Expense for the billing cycle. The monthly statements will also indicate the total amounts billed to the date of each billing and amounts paid by OWNER to date of billing. Each monthly statement shall include computer project cost reports or

other records to substantiate actual services rendered and costs incurred for the Project.

5.5.2. OWNER shall make prompt monthly payments in response to ENGINEER's monthly statements. If OWNER fails to make any payment due ENGINEER for services and expenses within sixty days after receipt of ENGINEER's bill thereof, the amounts due ENGINEER shall include a charge at the rate of 1% per month from said sixtieth day, and in addition, ENGINEER may, after giving seven days' written notice to OWNER, suspend service under this Agreement until he has been paid in full all amounts due him for services and expenses.

5.6. All records relating to the work performed and reimbursable expenses incurred, including reports of accounts, shall be maintained by ENGINEER in accord with generally accepted accounting principles and shall be available to OWNER or its authorized representative at all reasonable times during the term of this Contract and for one (1) year after termination.

5.7. OWNER shall have the right to audit ENGINEER's books and inspect all of ENGINEER's records maintained pursuant to this Contract at any reasonable time. This right to audit and inspect shall continue for one (1) year beyond the expiration of this Contract or for one (1) year from the date of final payment, whichever occurs later in time.

SECTION 6 - GENERAL CONSIDERATIONS

6.1. Termination

6.1.1. Anything to the contrary herein notwithstanding, the OWNER in its sole discretion, may terminate this Agreement at any time by giving at least seven (7) days' prior written notice of such termination to the ENGINEER.

6.1.2. The obligation to provide further services under this Agreement may be terminated by ENGINEER upon seven (7) days' written notice in the event of

substantial failure by the OWNER to perform in accordance with the terms hereof through no fault of the ENGINEER.

6.1.3. Upon termination of this Agreement, the ENGINEER shall be entitled to payment for all unpaid services rendered and reimbursable expenses incurred, as mutually agreed to by OWNER and ENGINEER, up to the date of termination.

6.1.4. The ENGINEER, upon termination of the Agreement, shall forthwith peaceably and quietly surrender to the OWNER all project documents and data defined in Paragraphs 1.7.1 and 3.2 of this Agreement.

6.2. Controlling Law

This Agreement shall be governed by the laws of the State of Florida. All rights, remedies and powers granted to OWNER herein shall be cumulative and may be exercised singularly or concurrently.

6.3. Successors and Assigns

6.3.1. OWNER and ENGINEER each binds himself and his partners, successors, executors, administrators, assigns and legal representatives to the other party to this Agreement and to the partners, successors, executors, administrators, assigns and legal representatives of such other party, in respect to all covenants, agreements and obligations of this Agreement.

6.3.2. Neither OWNER nor ENGINEER shall assign, sublet or transfer any rights under or interest in (including, but without limitation, moneys that may become due or moneys that are due) this Agreement without the written consent of the other, except as stated in paragraph 6.3.1. and except to the extent that the effect of this limitation may be restricted by law. Unless specifically stated to the contrary in any written consent to an assignment, no assignment will release or discharge the assignor from any duty or responsibility under this Agreement. Nothing contained in this paragraph shall prevent ENGINEER from employing such independent consultants, associates and

subcontractors as he may deem appropriate to assist him in the performance of services hereunder.

6.3.3. Nothing herein shall be construed to give any rights or benefits hereunder to anyone other than OWNER and ENGINEER.

6.4. Litigation

6.4.1. Should litigation occur between the two parties relating to the provisions of this Agreement, all litigation expenses, collection expenses, witness fees, court costs and attorney's fees incurred by the prevailing party shall be paid by the nonprevailing party to the prevailing party.

6.4.2. In the event any provision of this Agreement shall be held to be invalid or unenforceable, the remaining provisions shall be valid and binding upon the parties of this Agreement.

6.5. Insurance

The ENGINEER, at its own expense, shall maintain insurance during the performance of its services under this Agreement with limits of liability not less than the following:

6.5.1. General Liability Insurance:	Limits
Comprehensive Form	$1,000,000
Premises-Operations	Combining Single Limit
Products/Completed Operations Hazard	
Contractural Insurance	
Broad Form Property Damage	
Independent Contractors	
Personal Injury	$1,000,000 Aggregate

	Limits
Automobile Liability	
Comprehensive Form	$500,000 Bodily Injury
Owned	(Each Person)
Hired	$1,000,000 Bodily Injury
Non-Owned	(Each Accident)
	$100,000 Property Damage
Worker's Compensation	Statutory
Employers' Liability	$100,000

6.5.2. Professional Liability Insurance:

Including errors and omissions	$1,000,000
	($50,000 Deductible)

6.5.3. OWNER shall be named as an additional insured on the General Liability Policy.

6.5.4. Certificates of insurance issued by the insurance carriers for the insurance required under this Agreement shall be delivered to the OWNER within seven (7) days after the date of this Agreement and, thereafter, if policy renewals occur, within thirty days prior to the expiration of the policy. Each certificate and policy shall contain a provision requiring not less than thirty days prior written notice to the OWNER before cancellation, change in perils insured, or reduction of coverage amounts.

6.6. Indemnification

6.6.1. The ENGINEER shall indemnify and hold-harmless the OWNER against all claims, damages, losses and expenses, including, but not limited to, attorney's fees, arising out of or resulting from negligent acts, errors or omissions of the ENGINEER where the claim, damage, loss or expense is attributable to bodily injury, sickness,

disease or death, or injury to or destruction of tangible property, including loss of use resulting therefrom.

6.6.2. There shall be a monetary limitation on the extent of indemnification in this Agreement in an amount of $316,880.00.

6.6.3. Notwithstanding anything to the contrary herein, each party waives all claims for recovery from the other party for any loss or damage to its property caused by fire or other insured casualty. The waiver shall apply only where insurance covering the loss or damage will not be prejudiced by reason of such waiver.

6.7. Consultants and Employees

ENGINEER agrees to bind each Consultant to every term of this Agreement so far as same is applicable to their work. Nothing contained herein, or in any statute or governmental regulation, shall obligate the OWNER to pay or see to the payment of any monies or to pay or assure the withholding of payment of any taxes, or other payroll deductions required by law to be withheld from wages of employees of the ENGINEER or any such party involved in assignment of this Agreement. The ENGINEER shall, at all times enforce strict discipline and good order among its employees and shall not employ on the work any person unfit for or not skilled in the work assigned to him. If any employee or assignee of ENGINEER causes a breach of the peace or disturbance in and around Project, or is otherwise unfit for or unskilled in the work assigned to him, OWNER may require that ENGINEER replace said employee or assignee within twenty-four (24) hours of a written notice from OWNER to ENGINEER. However, the foregoing shall not be construed or interpreted that the OWNER is in any way interfering with the ENGINEER's right to hire and fire his employees, assign duties to them, fix their working hours, wages or terms and conditions of employment, which right shall be absolute.

6.8. Custom and Use

The OWNER shall have the right to enforce all conditions and agreements herein notwithstanding any act of the OWNER in refraining from doing so. The failure

of the OWNER to enforce its rights shall not be construed as creating contrary custom, modifying or waiving conditions and agreements herein.

6.9. Liens and Claims

The ENGINEER shall promptly and properly pay for all labor employed, materials purchased and equipment hired in connection with the work; shall keep the OWNER's property free from any materialmen's or mechanic's liens and claims or notices in respect thereto arising by reason of the ENGINEERS' work by inserting waiver of lien provisions in all subcontracts it enters into in connection with the work.

6.10. Confidential Information

6.10.1. The ENGINEER will not at any time, in any fashion, form, or manner, either directly or indirectly, divulge, disclose, or communicate to any person, firm or corporation, in any manner whatsoever, any information of any kind, nature, or description concerning any matters affecting or relating to the business of OWNER, its manner of operation, or its plans, processes, or other data of any kind, nature, or description without regard to whether any or all of the foregoing matters would be deemed confidential, material or important.

6.10.2. The parties hereby stipulate that, as between them, all matters relating to this Agreement are important, material, and confidential and gravely affect the effective and successful conduct of OWNER's business and its goodwill, and that any breach of the terms of this Paragraph is a material breach of this Agreement.

6.10.3. None of the restrictions stated in this Paragraph shall apply to testimony, records, documents, information or materials which ENGINEER is required to give under any judicial proceeding or pursuant to law; disclosures to and communications with third parties which are necessary for ENGINEER to perform the work required by this Agreement, or disclosures regarding a general description of the work performed by ENGINEER for OWNER pursuant to this Agreement so long as such disclosures are approved in writing by OWNER prior to such disclosures publication in promotional or other materials or by any other means.

6.11. Independent Contractor

The ENGINEER recognizes and agrees that it is an independent contractor with no express or implied authority to act for or to obligate the OWNER, except as expressly provided in this Agreement.

6.12. Employment, Gifts or Other Considerations

Any of ENGINEER's employees shall not accept employment, gifts or other considerations from other companies, vendors or contractors. ENGINEER agrees not to employ any employee of OWNER nor grant any employee compensation, gifts or consideration. Breach of the terms of this provision shall be considered a material breach of the terms of this Agreement.

6.13. Non-Exclusive Agreement

The parties agree that this Agreement is non-exclusive and that the OWNER has the right, at its discretion, and at any time can engage other parties to perform services or work of a similar nature and to make agreements on any terms whatsoever with said other parties to perform said services.

SECTION 7 - EXHIBITS AND EXECUTION

7.1. The following Exhibits are attached and made a part of this Agreement.

7.1.1. Exhibit A "Price Proposal" for the Project consisting of 7 pages.

7.2. This Agreement (consisting of pages 1 to 23, inclusive), together with the Exhibits and Schedules identified above constitute the entire Agreement between OWNER and ENGINEER and supersedes all prior written or oral understandings. This Agreement and said Exhibits and Schedules may only be amended, supplemented, modified or cancelled by a duly executed written instrument.

IN WITNESS WHEREOF, the parties hereto have made and executed this Agreement as of the day and year first above written.

PRICE PROPOSAL

March 16, 1989 DRMP 89-115.MK

Mr. Patrick J. Lehman, P.E.
Vice President, Operations
Florida Cities Water Company
P.O. Box 5846
Sarasota, FL 34277

Subject: Engineering Fee Proposal for the CarrollWood 0.5 MGD AWT Wastewater Treatment Plant

Dear Mr. Lehman:

Thank you for your invitation to our firm for submittal of a technical and price proposal to Florida Cities Water Company for the above referenced project. Dyer, Riddle, Mills & Precourt, Inc. (DRMP) is pleased to submit herewith, our price proposal for the above referenced project.

We believe that we can provide Florida Cities Water Company with a cost effective design for the proposed AWT Plant by incorporating and reusing some of the existing tankage while providing a system that meets the AWT discharge limitations and the Class I reliability requirements. We also will commit to meeting the time schedule as contained in your request for proposals. We have attached hereto a revised Scope of Services which we feel is appropriate following our visit to the plant site and taking into consideration the advanced level of treatment and the Class I reliability requirements. We have also attached hereto, a summary of compensation by project phase along with our work sheets for the final design and construction management services phase for your reference. We have also attached hereto the proposed project schedule which corresponds to the schedule contained in your request for proposals.

DRMP intends to serve Florida Cities Water Company using the multipliers stated below for this project. Our multiplier for design oriented of services is 2.52 times raw labor cost and the multiplier for construction management services is 2.60 times raw labor cost. All other direct costs will be invoiced to Florida Cities Water Company at cost.

We appreciate the opportunity to provide you with a quotation for engineering services for this project and we look forward to serving you in this manner. We would be happy to discuss the scope of services, our ideas for conversion of the plant to AWT

and use of the existing facilities, and the proposed compensation for this project after you have had a chance to review our proposal and/or to answer any questions that you may have. In the meantime if you have any questions or comments regarding the enclosed proposal, please feel free to give me a call.

Very truly yours,

Dyer, Riddle, Mills & Precourt, Inc.

James E. Christopher, P.E.
Project Manager

FLORIDA CITIES WATER COMPA.
CARROLLWOOD AWT PLANT
SCOPE OF SERVICES

A. Facility Requirements

Florida Cities Water Company intends to construct a 0.5 mgd advanced wastewater treatment plant to replace the existing secondary aeration treatment plant. The proposed facility will be designed to produce a final effluent of 5 mg/l BOD_5, 5 mg/l TSS, 3 mg/l Total Nitrogen, and 1 mg/L Total Phosphorus in accordance with the Grizzle-Figg Bill with surface water discharge to Sweetwater Creek.

It is anticipated the proposed AWT Plant will include the following in order to provide Class I reliability:

a) One mechanical bar screen, one manually cleaned bar screen (bypass), one vortex type grit removal system and bypass channel.

b) Flow equalization system using the existing tankage and providing for refurbishment of the aeration system and two new pumps rated at 1-1.5 ADF.

c) Dual oxidation ditches rated at 0.5 ADF each, single Orbal aeration system designed for Class I reliability, or dual train A^2/O process.

d) Two new 35± ft. diameter clarifiers (SOR = 400 gpd/s.f. @ 75% A.D.F. for Class I reliability) with rapid sludge removal system.

e) Return sludge pumping facilities using two horizontal centrifugal non-clog pumps rated at 1.5 A.D.F. each.

f) Waste sludge pumping facilities using two horizontal centrifugal non-clog pumps.

g) Tertiary effluent filters with a minimum of two units each designed for 75% A.D.F. Denitrification type filters to be utilized if required to meet the TN limits, otherwise most cost effective filter type which satisfies Hillsborough County design criteria.

h) New chlorination and dechlorination facilities utilizing 150 lb. cylinders, automatic vacuum switchover, manual or flow proportional control. Chlorination and dechlorination facilities to be housed within proposed operations/laboratory building or fiberglass enclosure. Chlorine contact chamber to include dual channels rated at 0.5 A.D.F. each.

i) Reaeration facilities to raise the DO limit to meet the discharge requirements for the receiving water body.

j) Provision of a final effluent flow meter consisting of a 90° V-notch or Parshall Flume located prior to the outfall with level and flow recorder, totalizer and indicator.

k) Aerobic digestion facilities to comply with 40 CFR 257 with prethickening of waste sludge via drum thickener, DAF, or gravity. Sludge pumping facilities to transfer sludge from the digester to truck loading facilities.

l) Motor control center to be housed in an air conditioned room within the operations/laboratory building. Power distribution system, emergency generator facilities and diesel fuel system with above ground fuel storage tank and containment structure.

m) Pre-engineered metal building to accommodate motor control center, air blowers, generator, ad operations/laboratory facilities. Existing building frame will be reused and refurbished, if feasible, to reduce project costs.

n) Site improvements including stabilized service road improvements, drainage and pond abandonment or refurbishment, as required, and landscaping buffer and irrigation along western property boundary.

o) Refurbishing of all existing structures to be reused in new plant. Demolition of all remaining structures not to be utilized.

B. Scope of Services

Services for the following areas are included in the fee proposal:

a) Preliminary Design Report/DER Construction Permitting
b) Construction Documents
c) Bidding
d) Construction Services
e) Start-up Services
f) Record Drawings
g) Surveys and Geotechnical Testing Services

1. Preliminary Design Report/DER Construction Permitting

Engineer shall prepare a preliminary design report depicting the design criteria, schematic layouts, sketches and appropriate calculations as required in Chapter 17.037 FAC to obtain a DER construction permit. The report shall also provide a preliminary construction cost estimate and schedule for implementation.

2. Construction Documents

Engineer shall prepare construction drawings and specifications for competitive bidding for all improvements recommended by the Engineer and approved by Florida Cities Water Company. Documents shall include drawings and specifications covering

a) Cover sheet, index, key map.

b) Civil drawings for all on and off site staking, grading, drainage, fencing and paving details, and effluent discharge structures.

c) Architectural drawings for all buildings.

d) Structural drawings for all buildings, tanks, foundations and incidental facilities.

e) Mechanical drawings for all HVAC and plumbing facilities.

f) Process and utility drawings for all treatment units, yard piping, pumping facilities, chemical feed systems and related facilities.

g) Electrical and instrumentation drawings for primary power, emergency power, lighting, lightning protection and facility monitoring and control needs. The electrical design should be complete to facilitate the construction and future troubleshooting. The Engineer should include the following in the design:

1) Panel schedule.
2) Motor control center elevations and plans.
3) Power and conduit plans.
4) Power and instrumentation wiring and conduit schedules.
5) Electrical site plan.
6) Single line diagrams.
7) Control schematics.
8) Electrical details.
9) Instrumentation loop sheets.

h) Prepare all contract agreement forms, general conditions, supplementary conditions, bid forms and related documents in accordance with the owners requirements.

i) Submit documentation and related applications for EPA, FDER, SWFWMD, Hillsborough County, and any other state and local agencies for permits related to construction of facilities.

3. Bidding

a) Release construction documents for competitive bidding.

b) Issue addenda and assist Owner in evaluation of bids.

4. Construction Services

Engineering services during construction to generally include the following:

a) Prepare final construction Contracts for execution by the Owner and Contractor.

b) Visits to the site by the Engineer's representative on approximately bi-weekly intervals to observe the general trend and quality of work. (Total construction time estimated as 12 months).

c) Review and approve shop drawings and submittals including equipment operation and maintenance manuals for conformance with the Contract Documents.

d) Issue Owner's instructions to Contractor.

e) Issue interpretations and clarifications to the documents.

f) Review and approve Contractor's pay requests.

g) Conduct substantial completion inspection.

5. Start-up Services

a) Provide the services of process, mechanical, electrical and instrumentation engineers and other personnel as appropriate during the start-up of the plant process and major mechanical equipment (one (1) week period).

b) Provide consultation and monitor operating results for a period of two (2) months after start-up.

6. Record Drawings Services

a) Prepare record drawings showing actual completed configuration of plant and related facilities and turn over original mylar record drawings to Florida Cities Water Company.

7. Surveying and Geotechnical Testing Services

The Engineer shall arrange for and pay for all Surveying and Geotechnical testing Services required for the design of this project. These fees, whether in house or outside services, are included in the fee proposal as a separate line item.

COMPENSATION SUMMARY

Preliminary Design Services	10,000.00
Final Design/Construction Documents	165,000.00
Bidding Services	4,500.00
General Construction Management Services	39,700.00
StartUp Services	7,300.00
Record Drawing Services	7,100.00
Total Basic Engineering Services	**$233,600.00**
Field Services	
Field Surveying	7,000.00
Geotechnical Services	5,000.00
Total Field Services	**$12,000.00**
Sub Total Basic Engineering and Field Services	**$245,600.00**
Resident Inspection Service at $45.00/Hr.	71,280.00
GRAND TOTAL FEE QUOTATION	**$316,880.00**

Exhibit_____(GSA-10)

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
REGION IV

IN THE MATTER OF: FLORIDA CITIES WATER COMPANY CARROLLWOOD SUBDIVISION SARASOTA, FLORIDA NPDES PERMIT NO. FL0029319	)	ORDER NO. 90-100(WRS)

ORDER PURSUANT TO SECTION 309
CLEAN WATER ACT

Pursuant to the authority of Section 309(a) of the Clean Water Act (hereinafter, the Act), 33 U.S.C. Section 1319(a), which has been delegated to me, I hereby make the following Findings of Fact and Violation and Order:

FINDINGS OF FACT

1. Florida Cities Water Company (hereinafter, the Respondent), is a "person" under Section 502(5) of the Act, 33 U.S.C. Section 1362(5).

2. The Respondent owns and operates the Carrollwood Wastewater Treatment Facility (hereinafter, the Facility), which discharges pollutants into Sweetwater Creek, a water of the United States. The Facility is located on Orange Grove Drive in Tampa, Florida.

3. Section 301(a) of the Act (33 U.S.C. Section 1311(a))

prohibits the discharge of pollutants into waters of the United States except as in compliance with a National Pollutant Discharge Elimination System (hereinafter, NPDES) permit issued pursuant to Section 402 of the Act (33 U.S.C. Section 1342).

4. On April 29, 1980, the Respondent submitted an application for renewal of NPDES Permit No. FL0029319. In September 1984 the NPDES Permit Application was denied. An Administrative Order was issued on November 27, 1984, requiring the facility to cease discharge not later than June 1987.

5. The Respondent has submitted to Region IV, Environmental Protection Agency (EPA), Discharge Monitoring Reports (DMRs) which indicate that the Respondent has continued to discharge pollutants into Sweetwater Creek, a water of the United States without a valid NPDES permit issued pursuant to Section 402 of the Act.

6. Inspections conducted in March 1990 and July 1990 by EPA, document the discharge of effluent into Sweetwater Creek from the Respondent's facility.

7. The Respondent submitted an NPDES application for the Facility on July 31, 1990.

VIOLATION

The Respondent has violated Section 301(a) of the Act (33 U.S.C. Section 1311(1)) by discharging pollutants into waters of the United States, without a valid NPDES permit issued pursuant to Section 402 of the Act (33 U.S.C. Section 1342).

ORDER

Based on the foregoing Findings of Fact and Violation and pursuant to the provisions of Section 309(a) of the Act (33 U.S.C. Section 1319 (a)), as amended, it is hereby ordered:

1. That effective immediately, the following monitoring requirements and effluent limitations shall be met until an NPDES permit is issued:

Parameter	Unit	Sample Type	Sample Frequency
$CBOD_5$	mg/l	8 Hr Comp.	Once/2 Weeks
Total Suspended Solids	mg/l	8 Hr Comp.	Once/2 Weeks
Total Phosphorus	mg/l	8 Hr Comp.	Once/2 Weeks
Total Nitrogen	mg/l	8 Hr Comp.	Once/2 Weeks
Ammonia Nitrogen	mg/l	8 Hr Comp.	Once/2 Weeks
Fecal Coliform	#/100 ml	Grab	Daily
Total Chlorine Residual	mg/l	Grab	Daily
Flow	mgd	Flow Meter	Daily

The pH shall not be less than 6.0 standard units nor greater

than 8.5 standard units and shall be monitored weekly by a grab sample.

The Dissolved Oxygen shall not be less than 5.0 mg/l and shall be monitored weekly by a grab sample.

There shall be no discharge of floating solids or visible foam in other than trace amount.

2. That the Respondent shall continue to maintain and operate its facilities as efficiently as possible.

3. That the Respondent shall submit a Monthly Progress Report identifying progress that has been made in the construction of an advanced wastewater treatment facility. Monthly Progress Reports will be submitted simultaneously with the monthly Discharge Monitoring Reports described in Item 4 below.

4. That monitoring results obtained during the month shall be summarized and reported on a Discharge Monitoring Report Form (EPA Form 3320-1), postmarked no later than the 28th day of the month following the end of the previous month (reporting period).

5. Information required to be submitted by this Order shall be sent by registered mail, or its equivalent, to the following

addressees:

Mr. John T. Marlar, Chief
Facilities Performance Branch
Water Management Division
U. S. Environmental Protection Agency
345 Courtland Street, NE
Atlanta, Georgia 30365

Mr. Dale Twachtmann
Secretary
Florida Department of
Environmental Regulation
Twin Towers Office Building
2600 Blair Stone Road
Tallahassee, Florida 32301

Failure to comply with the requirements of this Order shall constitute a violation of this Order and may subject the Respondent to penalties as provided in Section 309 of the Act.

6. This Order does not operate as an NPDES permit and nothing contained herein shall be construed as prohibiting prosecution for the violations cited in this Order, for violations of the Order itself, or for any other violations of the Clean Water Act.

This Order is effective upon receipt.

SEP 2 7 1990
Date

John T Marlar
W. Ray Cunningham, Director
Water Management Division

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
REGION IV

Exhibit_____(GSA-11)

IN THE MATTER OF:	)	Docket No. CWA-IV 90-542
Florida Cities Water Company Carrollwood Subdivision P.O. Box 5846 Sarasota, Florida 34277	)	Proceeding to Assess Class I Administrative Penalty Under Clean Water Act, Section 309(g)

CONSENT AGREEMENT AND ORDER
ASSESSING ADMINISTRATIVE PENALTIES

I. Statutory Authority

The following Findings are made and Consent Agreement issued under the authority vested in the Administrator of the U.S. Environmental Protection Agency ("EPA") by Section 309(g) of the Clean Water Act, ("CWA" or the "Act"), 33 U.S.C. Section 1319(g),. The Administrator has delegated these authorities to the Regional Administrator of EPA Region IV, who has in turn delegated them to the Director of the Water Management Division of EPA Region IV, who hereby issues this Final Order.

II. Findings of Violation

Upon consent of the parties by their attorneys and authorized officials, the Director finds:

1. Florida Cities Water Company, ("Respondent"), a person within the meaning of Section 502(5) of the Act, 33 U.S.C. Section 1362(5), owns or operates the Carrollwood Wastewater Treatment Facility located at 11700 Orange Grove Drive, Tampa, Florida 33618, which is a point source and discharges pollutants to the Sweetwater Creek, a navigable water of the United States, all within the respective definitions established in Section 502 of the Act, 33 U.S.C. Section 1362.

Respondent is therefore subject to the provisions of the Act, 33 U.S.C. Section 1251 et seq.

2. On September 25, 1990, EPA Region IV issued to Respondent and notified the public of an Administrative Complaint, Docket No. CWA-IV 90-542 which included formal findings of violation, notice of a proposed assessment of a civil penalty against Respondent, and notice of Respondent's opportunity to request a hearing on the proposed administrative penalty assessment. EPA Region IV has taken into consideration any public comments timely received.

3. On September 25, 1990, the State of Florida was given an opportunity to consult with EPA regarding the assessment of an administrative penalty against Respondent. EPA Region IV has taken into consideration any comments received from the State.

4. Respondent has violated Section 301(a) of the Act, 33 U.S.C. Section 1311(a), by discharging pollutants into waters of the United States without a valid NPDES permit issued pursuant to Section 402 of the Act, 33 U.S.C. Section 1342, during the period of June 1987 through July 1990.

III. Penalty Order and Consent:

Based on the foregoing stipulations and findings, and having taken into account the nature, circumstances, extent and gravity of the violations, Respondent's prior history of compliance, degree of culpability, economic benefit or savings resulting from the violations, and ability to pay, and under the authority of Section 309(g) of the Act, 33 U.S.C. Section 1319(g), EPA Region IV hereby ORDERS AND RESPONDENT HEREBY CONSENTS, that:

1. The provisions of this Consent Agreement shall be binding upon the Respondent, its officers, directors, agents, servants, authorized representatives, employees, and successors or assigns.

2. Florida Cities Water Company shall pay $15,000 for its past violations of the Clean Water Act cited above, by mailing a money order or certified check payable to "Treasurer, United States of America" by the effective date defined below, to the following address:

Regional Hearing Clerk
U.S. EPA Region IV
P.O. Box 100142
Atlanta, Georgia 30384

Respondent shall send notice of such payment, including a copy of the money order or check, to the Hearing Clerk at the following address:

Regional Hearing Clerk
U.S. EPA Region IV
Department 12
345 Courtland Street, NE
Atlanta, Georgia 30365

IV. General Provisions

1. Issuance of this Order does not constitute a waiver by EPA of its right to enforce the substantive legal requirements underlying this administrative penalty assessment, either administratively or judicially pursuant to Section 309(a),(b), and (c) of the Act, 33 U.S.C. Sections 1319(a),(b), and (c). Nor, pursuant to Section 309(g)(7) of the Act, does issuance or compliance with this Order exempt Respondent from responsibility to comply with all requirements of the Act and of any legal order or permit issued pursuant thereto.

2. Failure by Respondent to pay in full the penalty assessed in Section III, Paragraph 2 shall render the entire proposed penalty of $25,000 due and owing, and it shall be paid immediately in the manner provided in Section III, Paragraph 2 of the Consent Agreement.

Failure by Respondent to pay the penalty set forth in Section III, Paragraph 2 may subject Respondent to a civil action to collect the assessed penalty, plus interest, attorney's fees, costs and an additional quarterly nonpayment penalty equal to 20 percent of the aggregate amount of such penalty pursuant to Section 309(g)(9) of the Act, 33 U.S.C. Section 1319(g)(9). In any such collection action, the validity, amount and appropriateness of the penalty and of the Consent Agreement and Order shall not be subject to review. Interest will accrue on the penalty at the rate established by the Secretary of the Treasury pursuant to 31 U.S.C. Section 3717. A late payment handling charge of twenty ($20.00) dollars will be imposed after thirty (30) days, with an additional charge of ten ($10.00) dollars for each subsequent 30-day period over which an unpaid balance remains. In addition, a six percent (6%) per annum penalty will be applied on any principal amount not paid within ninety (90) days of the effective date of this Order.

3. Respondent knowingly and explicitly waives its rights pursuant to Sections 309(g)(2) and (8) of the Act, 33 U.S.C. Sections 1319(g)(2) and (8) of the Act, to a hearing on this penalty assessment, and to judicial review of this administrative penalty assessment.

V. Effective Date

This Consent Agreement and Order shall become effective thirty (30) days after the date of issuance noted below.

Exhibit_____(GSA-12)

AGREEMENT

This AGREEMENT dated this 5th day of June, 1991, is made and entered into by and between Hillsborough County, a political subdivision of the State of Florida, (hereinafter called "the County") and Florida Cities Water Company (hereinafter called "the Company").

W I T N E S S E T H:

WHEREAS, the County is a political subdivision of the state of Florida, empowered to regulate wastewater franchises within its jurisdiction; and

WHEREAS, the Company owns and operates water and wastewater systems including, but not limited to, a wastewater treatment plant within the franchise territory shown on Exhibit "A", attached hereto and made a part hereof (hereinafter called "the Company's Service Area"), which is within the County's jurisdiction; and

WHEREAS, the Board of County Commissioners of the County establishes the water and wastewater rates and approves the tariffs applicable to the Company's customers located within the Company's Service Area; and

WHEREAS, on February 4, 1991, the Company entered into a Consent Order with the Hillsborough County Environmental Protection Commission and the State of Florida, Department of Environmental Regulation (Complainants), to bring the wastewater discharge from the Company's Wastewater treatment plant into compliance with the surfaces water effluent discharge limitations required by Section 403.086, Florida Statutes (hereinafter called "the Consent Order") which provides for the assessment of penalties at the rate of $500.00 per day for each day said limitations are not met after December 31, 1991; and

WHEREAS, the Company has prepared specifications and contract documents, obtained all applicable permits, and obtained bids for the construction of a new wastewater treatment plant which will comply with said advanced wastewater treatment standards (hereinafter called "Company's Proposed New Treatment Plant"); and

WHEREAS, the Company intends to retire its existing wastewater treatment plant (hereinafter called "the Company's Existing Treatment Plant"), upon the construction of the Company's Proposed New Treatment Plant; and

WHEREAS, it is in the interest of the public health, safety and welfare to ensure continued proper discharge of wastewater from the Company's Service Areas; and

WHEREAS, the objectives of said Consent Order can be achieved by discharging wastewater from the Company's Service Area to the County's wastewater system for treatment and disposal (hereinafter collectively called "treatment"); and

WHEREAS, the County's wastewater treatment facilities have excess capacity adequate to treat and dispose of all wastewater from the Company's Service Area now and in the future; and

WHEREAS, it is feasible to connect the Company's wastewater collection system to the County's wastewater collection system for purposes of transporting wastewater from the Company's Service Area to the County's treatment facilities which would eliminate the requirement for the construction of the Company's Proposed New Treatment Plant; and

WHEREAS, the County may establish different classes of wastewater customers by ordinance; and

WHEREAS, the County would derive benefits through the collection of treatment rates and connection fees by providing wastewater treatment service in the Company's Service Area.

NOW, THEREFORE, in consideration of the mutual covenants and provisions contained herein, the County and Company agree as follows:

1. The Company's wastewater collection system will be connected to the County's wastewater collection system as shown on Exhibit "B", attached hereto and made a part hereof. Each of the parties hereto shall completely construct, at its expense not later than December 31, 1991, the facilities designated and described on said Exhibit "B" (hereinafter collectively called "the New Facilities"). The Company shall construct and be responsible for all facilities required to connect the Company's wastewater collection system to the County's facilities at the point-of-connection designated on Exhibit B. The County shall construct and be responsible for all facilities downstream from the point-of-connection. The route indicated on Exhibit B to reach the point-of-connection is not necessarily the route that each party will utilize to install the facilities described on Exhibit B. The actual physical connection of the Company's wastewater collection system to the County's wastewater forcemain shall be accomplished in accordance with established County policies and procedures. Time is of the essence in the performance construction of the New Facilities inasmuch as failure of either party to complete construction of that portion for which it is responsible hereunder by the aforesaid date may result in the assessment of penalties by the Complainants in the Consent Order against the Company at the rate of $500.00 per day for each day that the New Facilities remain incomplete and unusable thereafter. Therefore, it is agreed that if the County does not completely construct and have available for

service that part of the New Facilities for which it is responsible by December 31, 1991, it shall pay to the Company any and all penalties imposed by said Complainants not to exceed $500.00 per day for each day that the County's part of the New Facilities remain incomplete and unusable thereafter, notwithstanding, said payments shall not apply for any period after December 31, 1991, that the Company's part of the New Facilities remain incomplete. Further, in the event the County shall be delayed or hindered in or prevented from completing the design, permitting, construction or installation of the County's part of the New Facilities by December 31, 1991, by reason or causes beyond the reasonable control of the County such as strikes, lock-outs, casualties, acts of God, failure of electrical power, governmental laws or regulations (except laws and regulations of the County, unless the County is required by state or federal law to have the applicable provision in its laws and ordinances), riots, insurrections, or acts of war, (hereinafter collectively referred to as a "force majeure"), the County shall not be liable or responsible for such delays and the doing and the performing of such act shall be excused for the period of the delay and period of performance of such acts shall be extended for a period equivalent to the period of such delay.

2. For the purpose of this Agreement, the Company will give the County the beneficial use of any plans and specifications available in its possession which pertain to the New Facilities at no cost to the County. The Company makes no representations regarding the accuracy and completeness of said plans and specifications and assumes no liability in connection with their use by the County.

3. Upon completion of the construction of the New Facilities, the County shall commence receipt and treatment of wastewater from the Company's Service Area for the benefit of the Company's customers. The Company shall continue to provide wastewater collection and water services to its customers while under a valid franchise agreement.

4. Following the commencement described in paragraph 3 above and until termination of this Agreement, the Company shall on a monthly basis render a bill to its customers for each connection to the Company's wastewater collection system which itemizes the applicable fees and charges prescribed in paragraphs 4.1, 4.2, and 5 below (hereinafter collectively called the County Charges) as well as all other charges which the Company is entitled to assess. The Company shall implement in accordance with County Ordinance 75-2 as amended (a) the rates on which the aforesaid charges will be based and any changes to such rates as may be adopted by the County and (b) the aforesaid fees.

4.1 Each such billing shall include a wastewater treatment charge whose amount shall be the product of the current wastewater treatment rate applicable to the Company as established from time

to time by the County and the number of gallons of water provided by the Company to the property being served by that wastewater connection. The foregoing computation shall exclude water consumption attributable to a service connection metered solely for purposes of irrigation. The initial wastewater treatment rate applicable to the Company hereunder is four dollars and forty-six cents ($4.46) per 1,000 gallons. Any limitation on the amount of treated wastewater that may be billed to a customer by the Company pursuant to its approved rate structure shall be similarly applied by the Company when computing the aforesaid wastewater treatment charge.

4.2 Unless reduced or sooner rescinded by the county or until paid in full as provided herein, each billing rendered pursuant to paragraph 4 above shall also include a wastewater connection fee of twelve dollars and eleven cents ($12.11) per month including simple interest at the rate of zero percent (0%) per annum for a period of thirty-six (36) months and thereafter a fee of seventeen dollars and nineteen cents ($17.19) per month including simple interest at the rate of seven and nine-tenths percent (7.9%) per annum for a period of one hundred eighty (180) months for each equivalent residential connection (ERC) to the Company's wastewater collection system existing at the time of the aforesaid commencement. An ERC represents the average number of gallons per day (gpd) of wastewater treatment service attributed to a single family detached residence as established from time to time by the County. For the purposes of this Agreement one ERC shall equal 225 gpd. The obligation of each wastewater customer of the Company to pay the aforesaid monthly connection fee and the benefit derived therefrom shall be established by law and shall run with the property served by the respective wastewater connection. Any wastewater customer of the Company which would be exempt from paying capacity fees to the County to obtain wastewater service directly from and as the customer of the County shall be similarly exempt from paying the connection fees prescribed in this paragraph. Any wastewater customer of the Company may pay in advance the total fees required at that time for full and complete ownership of wastewater treatment capacity in the County's system equal to the total ERCs for that customer's wastewater connection. The Company shall accept total payment for each such connection upon request by the customer. The amount due for such payment in full shall be the sum of the outstanding balance of the principal plus any outstanding accrued interest. The interest component of each monthly fee identified in this paragraph shall accrue as of the last day of the billing period for such fee.

5. Subsequent to the execution of this Agreement and as long as it shall remain in effect, the Company shall accept no new connections to its wastewater collection system without verification from the County that each such applicant for service has paid the applicable capacity fees for wastewater treatment to the County pursuant to applicable County ordinances and resolutions and is approved for connection to the Company's system. Each

connection made pursuant to this paragraph shall be billed by the Company in accordance with paragraph 4.1 above.

6. On or before the 20th day of each month following the commencement described in paragraph 3 above, the Company shall furnish the County with a summary of the County Charges which were billed by the Company for each wastewater connection during the preceding month as well as the amounts received during that month by the Company in payment of County Charges previously billed but uncollected by the Company. The summary shall also indicate those accounts which are more than sixty (60) days in arrears on payment. The Company shall remit to the County along with the aforesaid summary all such payments received in that month. The Company's expenses associated with performing the services described in paragraphs 4, 5 and 6 of this Agreement shall be an allowable expense for rate making purposes.

7. The Company shall observe the same diligent policy and procedures in the billing and administration of County Charges as it uses in administering and billing its own accounts.

8. The County shall provide the Company with written notice of any change in the rates or method of collection applicable to County Charges. The Company shall implement each such change with the Company's next complete billing cycle which follows the date of the aforesaid notice.

9. The Company agrees to maintain, operate and expand its wastewater collection system as is necessary to meet its obligations under its franchise agreement with the County and to retain complete responsibility therefor. The Company will endeavor, to the extent of its powers, to prohibit the discharge of substances into its wastewater collection system which are detrimental to the County's operation of its treatment and disposal system. The County shall administer and enforce its pretreatment rules and regulations within the Company's Service Area.

10. The Company shall apply to the County for a limited rate proceeding as provided by ordinance for an adjustment in its rates as a result of the interconnection to be made pursuant to this Agreement. The County agrees that it will allow the Company to recover through its wastewater rates the undepreciated cost of the Company's Existing Treatment Plant, cost of demolition of the abandoned portion of the Existing Treatment Plant, restoration of the treatment plant site and amounts expended in connection with the design, preparation of contract documents, bidding, and permitting of the Company's Proposed New Treatment Plant over a period of 15 years, all at the same rate of return as that applicable to the rate base amounts most recently approved by the County.

11. The Company shall indemnify and hold harmless the County, its agents and employees from and against all liabilities, claims, demands, or actions of law and in equity including court costs and attorney's fees, at all judicial levels, that may hereafter at any time be made or brought by anyone for the purpose of enforcing a claim on account of any injury or damage allegedly caused by the negligence or intentional wrongful act or omission of the Company, its agents or employees in the provision of wastewater collection service to its customers pursuant to this Agreement.

12. The County, to the extent allowed by Section 768.28, Florida Statutes, shall indemnify and hold harmless the Company, its agents and employees from and against all liabilities, claims, demands, or actions of law and in equity including court costs and attorney's fees, at all judicial levels, that may hereafter at any time be made or brought by anyone for the purpose of enforcing a claim on account of any injury or damage allegedly caused by the negligence or intentional wrongful act or omission of the County, its agents or employees in the treatment of wastewater pursuant to this Agreement.

13. Nothing in this Agreement will interfere with, inhibit or delay the Company in discontinuing service to the Company's Customers at any time in order that the Company may enforce its rules and regulations relating to wastewater collection service and the payments therefor. The Company shall interrupt (a) water service to any of its water customers (excluding service metered solely for purposes of irrigation) and (b) wastewater service to any of its wastewater customers which are not also its water customers, for nonpayment of the County Charges assessed pursuant to this Agreement until such time that such accounts have been made current. Each such interruption shall be accomplished in accordance with County Ordinance 75-2 as amended. The Company shall be entitled to collect its customary charge from each such delinquent customer whose service is interrupted pursuant to this paragraph.

14. This Agreement may be terminated only by mutual agreement of the parties.

15. After approval of this Agreement by the respective parties hereto and the execution thereof by their duly qualified and authorized officers, the County shall cause this Agreement to be filed with the Clerk of the Circuit Court of Hillsborough County, Florida for recording in the Public Records of Hillsborough County pertaining to land.

16. The Company shall have the right to assign any and all of its interest in this Agreement to any person, firm, partnership, corporation or other entity pursuant to its franchise agreement. The provisions hereof shall be binding upon and inure to the benefit of the parties hereto and their successors and assigns.

Notice in the manner provided in paragraph 17 below and as required by County Ordinance 75-2 as amended shall be given to the County if such an assignment is made.

17. Any notice required or permitted to be delivered hereunder shall be sent by United States certified mail, return receipt requested, and addressed as follows:

To the Company:

Executive V.P. & Chief Operating Officer
Florida Cities Water Company
P.O. Box 21119
Sarasota, FL 34276-4119

To the County:

Director
Hillsborough County Public Utilities Department
925 E. Twiggs Street
Tampa, Florida 33602

18. This Agreement shall be construed and enforced in accordance with the laws of the State of Florida.

19. The prevailing party in any legal proceeding brought to enforce rights under this Agreement shall be entitled to reimbursement of all reasonable costs and fees, including attorney's fees at all judicial levels.

20. This Agreement shall constitute an amendment of the Company's franchise agreement to the extent that the terms of the franchise agreement are inconsistent with this Agreement. This Agreement shall not become effective until and unless the County adopts ordinances establishing the authority to enter into this Agreement.

21. This Agreement is made under the authority of County ordinances and shall be controlled by the laws of the United States of America and of the State of Florida, and by any applicable ordinances, rules, and regulations of any governmental entities of competent jurisdiction. If any provision of this Agreement is found to be in conflict with any such laws, ordinances, rules or regulations, the conflicting provision of this Agreement shall be construed in such a manner as to eliminate the conflict, giving full controlling effect to the law, ordinance, rule or regulation. However, the parties are relying on the validity of this Agreement and may take action based on such reliance.

22. The foregoing constitutes the entire agreement between the parties with respect to the subject matter contained herein.

There are no other understandings, agreements, or representations expressed or implied, respecting this Agreement and the services provided for herein.

IN WITNESS WHEREOF, the parties hereto have caused this Agreement to be executed by their duly authorized representatives.

NOTICE OF PROPOSED AGENCY ACTION
ORDER IMPUTING CONTRIBUTIONS-IN-AID-OF-CONSTRUCTION
FOR GRANT FROM ST. JOHNS RIVER WATER MANAGEMENT DISTRICT

BY THE COMMISSION:

NOTICE IS HEREBY GIVEN by the Florida Public Service Commission that the action discussed herein, regarding our imputation of contributions-in-aid-of-construction for the St. Johns River Water Management District grant to Florida Cities Water Company, Barefoot Bay Division, is preliminary in nature and will

DOCUMENT NUMBER-DATE
09689 SEP 12 96
FPSC-RECORDS/REPORTING

Exhibit

become final unless a person whose interests are substantially affected files a petition for a formal proceeding, within **fourteen days** of the date of this Order, pursuant to Rule 25-22.029, Florida Administrative Code.

BACKGROUND

Florida Cities Water Company, Barefoot Bay Division, (FCWC or utility) is a Class A utility providing water and wastewater service for a predominately residential area in Barefoot Bay, Florida. The utility's Barefoot Bay division was serving 4,458 water and 4,440 wastewater customers at year end December 31, 1994. For the twelve months ended December 31, 1994, the utility recorded operating revenues of $671,582 for water service and $823,463 for wastewater service. The utility recorded a net operating loss of $73,769 for the water system and a net operating income of $77,577 for the wastewater system. The Barefoot Bay system is in an area that has been designated by the St. Johns River Water Management District (SJRWMD) as a critical water supply use caution area.

On November 6, 1995, the utility filed its application for approval of interim and permanent rate increases pursuant to Sections 367.082 and 367.081, Florida Statutes, respectively. On November 6, 1995, the utility satisfied the minimum filing requirements (MFRs) for a rate increase, and this date was established as the official filing date, pursuant to Section 367.083, Florida Statutes. The utility requested that this case be scheduled for a formal hearing and not processed pursuant to the proposed agency action (PAA) process as provided for in Section 367.081(8), Florida Statutes.

The Prehearing Conference was held on March 18, 1996, in Tallahassee, Florida. At the conference, the Prehearing Officer granted a petition to intervene filed by Clinton Dyer. Additionally, the parties identified forty-three issues to be addressed at the formal hearing. Prehearing Order No. PSC-96-0425-PHO-WS, was issued on March 26, 1996. We held the technical hearing in Barefoot Bay, Florida, on April 1 and 2, 1996. Approximately 30 customers presented testimony regarding the utility's application for a rate increase.

The utility's last rate case for only the Barefoot Bay water system was, in Docket No. 940687-WU, finalized on October 11, 1994, by Order No. PSC-94-1237-FOF-WU. The utility's last rate case for both Barefoot Bay systems, in Docket No. 910976-WS, was finalized on June 24, 1992, by Order No. PSC-92-0563-FOF-WS. The utility has received a price index rate increase every year since 1993.

The utility's application for increased final rates is based on the test year ended June 30, 1996. FCWC requested final revenues of $916,723 for water and $2,110,481 for wastewater based on a projected test year ending June 30, 1996. This represents an increase of $153,136 for water and $1,273,024 for wastewater, or 20.05 percent and 152.01 percent, respectively.

Pursuant to Rule 25-22.056 (3)(a), Florida Administrative Code, each party was required to file a post-hearing statement and to include a summary of each position. Any issue or position not included in the post hearing-statement shall be waived. On May 3, 1996, FCWC and OPC filed post-hearing briefs. Mr. Dyer provided his post-hearing brief to legal staff on June 30, 1996. Mr. Dyer failed to properly file his brief with the Division of Records and Reporting on the date established by the Prehearing Order. Upon staff's discovery of this fact, it provided Mr. Dyer's brief to the Division of Records and Reporting, which provided copies to the parties. The other parties did not move to strike Mr. Dyer's brief, and we considered his brief in making our final decisions in this docket.

On May 29, 1996, FCWC filed a motion and notice, requesting that the Commission accept its notice of the transfer of the property formerly known as H&S Groves to FCWC.

FINDING OF FACT, LAW AND POLICY

Having heard the evidence presented at the hearing in this proceeding and having reviewed the recommendation of the Commission staff, as well as the briefs of the parties, we now enter our findings and conclusions.

OPC'S MOTION TO STRIKE

Subsequent to our final decision in this docket at the June 25, 1996 Agenda Conference, but before the Order in this docket was issued, our staff determined that it had miscalculated the percentage of used and useful for the portion of FCWC's wastewater treatment plant which existed prior to improvements for advanced wastewater treatment (AWT) of effluent. This miscalculation was part of staff's original recommendation on that issue. Staff filed a revised recommendation with the appropriate used and useful calculation, for our consideration at the August 13, 1996 Agenda Conference including revised wastewater rates, which resulted from the corrected used and useful calculation. Our decision on this corrected calculation is reflected in the body of this Order.

On August 6, 1996, FCWC filed a Motion to Correct Errors in Staff Recommendation. The alleged errors pertain to our final decision in this docket, but go beyond the scope of our revised decision.

On August 7, 1996, OPC filed a Motion to Strike FCWC's motion. In it's motion, OPC alleges that Rule 25-22.0021(2), Florida Administrative Code, limits participation at agenda to the Commissioners and staff, when a recommendation is considered in a proceeding where a hearing has been held. OPC further states that FCWC has adequate opportunity to raise its concerns in a motion for reconsideration. On August 9, 1996, FCWC responded to OPC's motion, stating that the alleged errors should be corrected at the same time as the revised determination on used and useful.

Upon consideration, we agree with OPC's argument. We also note that our rules do not contemplate FCWC's motion. Rule 25-22.060(1)(a), Florida Administrative Code, provides that any party adversely affected by an Order of the Commission may file a motion for reconsideration of that order. To the extent that FCWC believes it is adversely affected by this Order, it may file a motion for reconsideration. Therefore, we find it appropriate to grant OPC's Motion to Strike.

FCWC's MOTION TO ACCEPT TRANSFER OF PROPERTY FORMERLY KNOWN AS H&S GROVES

As stated earlier, on May 29, 1996, FCWC filed a motion and notice, requesting that we accept the notice of the transfer of the property formerly known as H&S Groves to FCWC. The closing on the property occurred on May 22, 1996. We do not find that a decision is necessary since the ownership of the property is recognized by its inclusion in rate base, discussed later in this Order.

QUALITY OF SERVICE

In accordance with Rule 25-30.433(1), Florida Administrative Code, our evaluation of the quality of service provided by the utility is derived based upon three components of water and wastewater operations: the overall quality of FCWC's product; the operational conditions of FCWC's plant and facilities and the utility's efforts to address customer satisfaction.

Quality of FCWC's Product and Operational Conditions

Mr. Alvin Castro, P.E., program manager for Domestic Waste and Ms. Debra Laisure, Engineer I in the Field Compliance section of the Potable Water Program, are both employed by the Florida

Department of Environmental Protection (DEP). Witness Castro testified that the facility is currently operating in compliance with requirements of the DEP Second Amended Consent Order (SACO) requiring the upgrade to AWT of the effluent. Witness Laisure testified that the water plant and distribution system are in compliance with provisions of Chapter 62, Florida Administrative Code, and have not been the subject of any DEP enforcement action within the past two years.

Customer Satisfaction

A service hearing was held in the Barefoot Bay service area in Barefoot Bay, Florida, on April 1, 1996. Approximately 300 persons attended. Thirty-two customers testified, primarily about rates and the rate increase requested. Only one customer complained about the quality of the water provided. Mr. Robert Jackson complained about a high level of chlorine and sediment in the water.

Based upon the evidence, we find that the quality of service provided by FCWC to its customers is satisfactory.

RATE BASE

Our calculations of the appropriate rate base amounts for the purpose of this proceeding are depicted on Schedules Nos. 1-A and 1-B for water and wastewater, respectively. Our adjustments are itemized on Schedule No. 1-C. Those adjustments which are self-explanatory or which are essentially mechanical in nature are reflected on those schedules without further discussion in the body of this Order. The major adjustments are discussed below.

Year-End Rate Base

The utility requested approval of a year-end rate base value in order to reflect the full weight of additions to plant-in-service. These test year plant additions are the result of capital costs incurred to upgrade the wastewater treatment plant to advanced treatment standards and disposal of wastewater effluent through reuse, at the direction of DEP. The utility argues that the magnitude of investment in the Barefoot Bay wastewater plant, which serves the public interest, is an extraordinary condition that justifies approval of an end-of-period rate base determination.

Although OPC did not object to the utility's proposed use of a year-end rate base for its wastewater operations, OPC witness Dismukes disagreed that the same treatment should be afforded the

water operations. In her testimony, Ms. Dismukes recommended use of a 13-month average rate base for the utility's water operations. In its brief, OPC argues that we should not approve a year-end rate base for the utility's water operations based on Rule 25-30.433, Florida Administrative Code. This rule directs the applicant in a rate case proceeding to use the 13-month average method to calculate rate base, unless the applicant can demonstrate that this will result in an unreasonable burden. Under cross-examination, Utility witness Coel acknowledged the existence of the rule, and conceded that there would be no unreasonable burden imposed on the utility by using the 13-month average for the water rate base. Further, Mr. Coel admitted that there were no unusual or extenuating circumstances associated with the water plant operations, nor were there any major plant additions during the test year.

Utility witness Coel testified that although he is aware of the 13-month average rule, the utility requested use of a year-end rate base for its water operations in order to be consistent with the wastewater operations. In addition, the utility requested year-end rate base treatment to establish the rate bases on a going-forward basis. It is the utility's position that use of year-end rate base is more appropriate, particularly if a final order is issued at the end of the test year and rates are set at the same time, since the rates and rate bases will be in full synchronization and not mismatched.

The Supreme Court of Florida found that, in the absence of the most extraordinary conditions or circumstances, the Commission should apply average investment during the test year in determining rate base. Further, the court found that an average rate base can produce a distorted picture of future conditions when factors are forcing investment costs upward without a concomitant increment in revenues. Citizens of Florida v. Hawkins, 356 So. 2d 254, 257 (Fla. 1978). None of the parties dispute that extraordinary circumstances exist for the wastewater operations.

We find merit in OPC's argument that absent extraordinary circumstances, an average rate base should be used. However, FCWC filed this rate proceeding for both water and wastewater operations. Although we acknowledge that there were no extenuating circumstances or major water plant additions during the test year, we find that there will be a mismatch in rates and rate bases if we approve year-end treatment for wastewater and a 13-month average for water. Moreover, since the utility uses the same capital structure for this division, use of year-end treatment for wastewater and 13-month average for water will result in a mismatch in the determination of the overall cost of capital. Consequently,

we find that extraordinary circumstances do exist for the Barefoot Bay division, and therefore, we find it appropriate to focus upon the total company.

Although intervenor witness Dyer did not address this issue in his testimony, he does argue in his brief that we should reject accelerating recovery of costs based on the premise that the investment serves the public interest and that the increased investment is not being matched by customer growth. Mr. Dyer further contends that even though the public receives the benefit, the customers of Barefoot Bay have to pay the cost. In spite of Mr. Dyer's trepidation, we are obligated to consider this investment with respect to Section 367.081(2)(a), Florida Statutes, which states:

> The commission shall also consider the investment of the utility in land acquired or facilities constructed or to be constructed in the public interest within a reasonable time in the future, not to exceed, unless extended by the commission, 24 months from the end of the historical test period used to set final rates. (Emphasis added)

Based on the above, we find it appropriate to approve a year-end rate base determination for both water and wastewater. The wastewater plant upgrade to advanced wastewater treatment and public access reuse standards are substantial improvements that serve the public interest for the total division. Substantial completion was scheduled for November of 1995 with the addition to plant-in-service on the utility's books on December 31, 1995, which in-service date satisfies the two-year limitation prescribed by Section 367.081(2)(a), Florida Statutes. In this case, an average rate base determination will distort the revenue requirement picture, since factors which are increasing the investment in operating plant are not matched by a concomitant growth in customers. Further, we find the instant rate case consistent with Citizens v. Hawkins because the utility's circumstances are the result of the utility's endeavoring to cope with extraordinary circumstances due to DEP requirements, which the statute requires us to consider.

Utility Plant-In-Service (UPIS)

Preliminary Survey and Investigation (PS&I) Charges

In the 1996 projected test year, the utility capitalized $5,886,260 into UPIS, to include costs to upgrade the Barefoot Bay

Wastewater Treatment Plant to meet AWT and public access reuse standards. Included in the capitalized amount are PS&I charges totaling $191,880 associated with the deep injection well and $828,042 associated with the Micco Tract sprayfield. The injection well and the Micco Tract were alternatives explored in order to comply with the DEP mandate to eliminate the continuous discharge of treated wastewater from the Barefoot Bay treatment plant to surface water bodies. Due to regulatory requirements and other factors beyond FCWC's control, the process ultimately led to upgrading the wastewater treatment plant to AWT standards and reuse as the only feasible solution under the complex circumstances. As discussed below, we have found that the PS&I costs incurred for the injection well and the Micco Tract were prudent and reasonable. Later in this Order, we address the appropriate ratemaking treatment for the related costs.

Prudence of PS&I Charges

Utility witness Gerald S. Allen testified that the utility signed a consent order with the DEP (then known as the Florida Department of Environmental Regulation) on October 18, 1988, under which FCWC was ordered, among other things, to construct a deep injection well for effluent disposal. Witness Allen further testified that, at that time, deep well injection was highly ranked by the DEP as a method of choice to eliminate surface water discharges of wastewater effluent, and that many deep wells had been constructed, or were under consideration, in Florida. Witness Allen testified that the utility hired engineers to do cost estimates, provide assistance to FCWC during the bidding and permitting process and provide certain services during construction, including shop drawing review. He further testified that concerns regarding the viability of injection wells in the area arose in March, 1989, with a newspaper article in the Florida Today newspaper. That article cited leaks in the injection well in the area owned by the City of Melbourne. The Melbourne well was eventually taken out of service. FCWC was concerned, but under terms of the Consent Order, had little choice but to continue planning for the injection well process. Alternative methods of disposal were investigated simultaneously. These alternatives involved the use of reclaimed water on nearby citrus groves. The utility soon learned that the only way it could utilize reuse water was on land owned, or controlled, by it. Subsequent meetings with DEP concerning the geology of the area and concerns regarding the viability of deep wells for injection of effluent, resulted in a modification of the Consent Order to include FCWC pursuing options to purchase land for use as land application of effluent. On October 9, 1990, SJRWMD issued an order deferring action on permit activity for seven months and directed FCWC:

> to aggressively pursue, through its power of eminent domain, acquisition of portions of the Micco Grove northwest of Micco Rd., in Brevard County.

DEP was unwilling to allow FCWC to withdraw the deep well permit application at that time pending more certain outcome of the land proposal pertaining to the Micco tract. Witness Allen testified that the "principal directive" was for FCWC to effect the ultimate elimination of the surface water discharge of treated effluent.

OPC argues in its brief that FCWC's actions in pursuit of several options for disposal of wastewater were not prudent or reasonable. OPC witness Dismukes testified that the Commission should reduce plant-in-service by $1,730,921 to adjust the cost of upgrading the utility's plant to advanced treatment, because the utility pursued two alternatives to its disposal problem prior to upgrading the plant and purchasing the orange grove. OPC offered no additional support for its position.

As stated earlier, witness Allen testified that the Consent Orders required certain action by the utility and that problems occurred in FCWC's dealings with SJRWMD regarding the viability of the proposed deep injection well. Utility witness Blizzard testified that FCWC was legally required to pursue the deep injection well option as well as the sprayfield option. She also testified that, at times, DEP even required that both alternatives be pursued concurrently. We find that in its attempt to comply with regulations, the utility pursued a legitimate course of action which met with regulatory approval and encouragement. When that course became clouded by problems concerning the viability of the injection well, FCWC was required to seek alternative methods of effluent disposal while being required to stay the course on the original solution. In view of the evidence, we find that FCWC acted prudently, and the actions taken were the only reasonable ones available to it at the time.

Ratemaking Treatment For Costs Related to PS&I Charges

Staff witness Clepper testified that the utility is in non-compliance with the NARUC Uniform System of Accounts (USOA) with respect to Account 183. Account 183 - Preliminary Survey and Investigation Charges, states:

> This account shall be charged with all expenditures for preliminary survey, plans, investigations, etc., made for the purpose of

> determining the feasibility of projects under contemplation. If construction results, this account shall be credited and the appropriate utility plant account charged. If the work is abandoned, the charge shall be to account 426 - Miscellaneous Nonutility Expenses, or to the appropriate operating expense account unless otherwise authorized by the Commission (See account 775 - Miscellaneous Expenses).

Since the PS&I charges relate to uncompleted projects, the staff audit opinion recommended that the costs associated with the injection well and the Micco Tract should be removed from rate base for non-compliance with the USOA.

Subsequently, on cross-examination, Mr. Clepper clarified that the audit opinion recommended that the PS&I charges be excluded from the rate base component as filed in UPIS, although not necessarily excluded from rate base altogether. In addition, Mr. Clepper agreed that he had no basis to dispute that the PS&I charges were all at the requirement of DEP. Furthermore, Mr. Clepper recognized that, as acknowledged in Account 183, this Commission has the authority to divert from the auditor's recommendation and implement some other type of accounting treatment.

Since the PS&I charges related to the injection well and the Micco Tract were incurred for two projects that were never completed, and therefore produced no used and useful assets, OPC witness Dismukes recommended that the associated costs should be removed from the cost of the plant upgrade. Ms. Dismukes asserts that these costs are totally unrelated to the costs incurred to upgrade the plant to AWT standards. She further argued that the utility should have written-off the PS&I costs at the time the projects were abandoned.

In response to Ms. Dismukes' assertion that the PS&I costs are totally unrelated to the AWT upgrade, Utility witness Blizzard testified that some of the information gathered during the permitting for the sprayfield aided in the implementation of the AWT plant, with respect to some similar engineering issues. However, Ms. Blizzard admitted that since she is not an expert in the engineering field, she could not testify to the extent of its usefulness. Similarly, Utility witness Allen testified that FCWC would have been precluded from going forward with each alternative without the study involved in the first alternative. However, on cross-examination, Utility witness Young admitted that from an engineering perspective, a deep injection well is not necessarily

a prerequisite for consideration of a sprayfield. Likewise, a sprayfield application is not a necessary requirement to explore advanced wastewater treatment as an alternative. Nevertheless, Mr. Young maintained the utility's position that each alternative does not stand alone, and that the utility had to follow this route to ultimately implement the AWT upgrade.

In response to Ms. Dismukes' assertion that the PS&I costs should have been written off when the projects were abandoned, FCWC argued that there was only one project, and that "FCWC's set task in this instance was to comply with regulatory mandates to eliminate the continuous discharge of treated wastewater to surface water bodies." Further, Mr. Allen argued that there was never an abandonment of the project. Ms. Blizzard and Utility witness Murphy also argue this point. Mr. Allen testified that FCWC never requested a revocation or withdrawal of the construction permits for the injection well or the Micco Tract sprayfield. As testified to by Staff witness Ferraro, during the process of complying with the DEP mandate, at times the various options were being pursued concurrently with other options. Mr. Allen and Ms. Blizzard testified to this point as well.

In its brief, the utility argued that the PS&I charges associated with the injection well and the sprayfield were a necessary component of the project to eliminate the continuous discharge of treated wastewater to surface water bodies. Consequently, the utility maintained that the PS&I costs should be charged to UPIS and included in rate base, together with the balance of FCWC's expenditures on the project to upgrade the wastewater treatment plant. Mr. Murphy testified that once construction began on the Barefoot Bay AWT plant, it was consistent with Account No. 183 to charge the PS&I costs to the appropriate utility plant account, and amortize the costs over the appropriate depreciable lives. Mr. Murphy stated that it is not unusual for utilities to incur PS&I costs on construction projects, and when construction begins on a project, the normal treatment is to capitalize those costs into UPIS.

The utility interprets Account No. 183 to state that if any construction results, then all costs incurred during the process of investigating different alternatives should be capitalized to the cost of construction, regardless of whether or not those costs directly relate to the ultimate construction project. Although we find that the PS&I costs incurred for the injection well and the Micco Tract were prudent and reasonable, we do not find sufficient evidence presented in the record to verify that the PS&I costs were directly related and useful to the construction of the AWT plant upgrade. In order to determine whether or not the PS&I costs

should be included in UPIS, we must look to NARUC USOA Account No. 101 - Utility Plant-in-Service. Account No. 101 states, "This account shall include the original cost of utility plant, ... owned and used by the utility in its utility operations ..." (Emphasis added.) As Mr. Murphy testified, the utility did not construct a deep injection well at Barefoot Bay. Further, Mr. Murphy and Mr. Allen testified that FCWC does not own the Micco Tract, and likewise, did not construct a sprayfield system on that land. Thus, the related PS&I costs produced no assets which are in use or of benefit to the Barefoot Bay customers. Consequently, we find it appropriate to remove these costs from UPIS.

In its brief, the utility stated that FCWC would not object to an alternative treatment for the PS&I costs, such as deferral and amortization. Mr. Clepper testified that the PS&I charges associated with the injection well and the Micco Tract could be considered as non-recurring expenses. Further, Mr. Clepper agreed that Rule 25-30.433(8), Florida Administrative Code, could apply to the treatment of these PS&I charges. This rule states, "non-recurring expenses shall be amortized over a five-year period unless a shorter or longer period of time can be justified." Upon cross-examination, Mr. Murphy agreed that it would be reasonable to defer and amortize the costs over a 15-year period, as long as FCWC could earn a reasonable return on the expenditures, as if they were included in UPIS. When asked if it would be appropriate to include the unamortized balance in the utility's working capital calculation, Mr. Murphy stated that he had no opinion. However, he did state that the costs should be included in rate base. On the other hand, Ms. Dismukes stated that she was not willing to commit to a 15-year amortization period. On this point, Ms. Dismukes testified that she was having difficulty balancing between the issue of customers being required to pay for costs incurred on projects which never reached fruition, and customers not receiving the benefits of gains associated with the sale of utility property in other ratemaking situations.

To summarize, in determining the appropriate ratemaking treatment, we must first determine whether or not the PS&I charges incurred for the injection well and the Micco Tract were prudent. The only way these charges can be disallowed is if we make a determination that the PS&I charges were imprudently incurred. However, as discussed earlier in this Order, we found that the PS&I charges were in fact prudent and reasonable. At this point, we have the option either to capitalize the costs to UPIS, or defer and amortize the PS&I charges as a deferred debit over a reasonable time period. As discussed earlier, we found it inappropriate to capitalize the PS&I charges as UPIS, because NARUC states that this account should only include assets owned and used by the utility in

utility operations. In this case, the PS&I charges did not result in assets which are used and useful in utility service. Thus, we find that the only remaining option is to record the charges as a deferred debit and amortize it over a reasonable time period.

As stated in Rule 25-30.433(8), Florida Administrative Code, non-recurring expenses are to be amortized over 5 years, unless a shorter or longer period can be justified. We find that a 15-year amortization period would be a reasonable time over which to amortize these costs since it reflects the long-term nature of these costs had they resulted in assets being placed in service. Further, we find it appropriate to include the unamortized balance of the PS&Is in the total utility working capital calculation. This treatment is consistent with the methodology employed by FCWC in its MFRs, which reflects an allocation of all working capital components to each of the utility's divisions.

Accordingly, we find it appropriate to reduce wastewater UPIS by $1,019,922. We have made corresponding adjustments to reduce wastewater accumulated depreciation and depreciation expense by $32,271. Furthermore, we have increased total FCWC working capital by $985,925 to reflect a 13-month average unamortized balance, resulting in an allocated increase of $44,367 and $40,423 to Barefoot Bay water and wastewater, respectively. In addition, we have increased Miscellaneous Expenses - Account No. 775 by $67,995 for wastewater to reflect the amortization of the PS&I charges over a 15-year period.

H&S Property

The H&S property is an old orange grove purchased by FCWC to be used for effluent disposal. OPC witness Dismukes testified that $711,000 associated with the H&S property should be removed from rate base because the utility had not explained if the grove was productive or not. OPC reasons that if the grove produces a crop and a profit, ratepayers should not be required to provide another return on the investment.

Utility witness Bradtmiller testified that the land is an inactive citrus grove and is being purchased as a sprayfield for reclaimed water. He further testified that the orange trees present are in various stages of neglect; the grove has not been harvested for several years. Witness Bradtmiller stated that without this land, FCWC would not be able to comply with the DEP mandate to eliminate continuous discharges to surface waters.

Upon consideration, we find that FCWC presented sufficient evidence to justify the purchase of the H&S property. Therefore, we find it appropriate to include the H&S property in rate base.

Margin Reserve

OPC witness Dismukes testified that the inclusion of a margin reserve to account for future customers above and beyond the future test year level represents investment that will not be useful in serving current customers. Mr. Dyer agreed with witness Dismukes' testimony.

As discussed later in this Order, the record supports that FCWC's facilities, with the exception of the wastewater treatment plant prior to AWT upgrades, are 100 percent used and useful. Additionally, FCWC's service area is almost built out, and customer growth is extremely limited at this time. Based on the foregoing, we do not find it appropriate to grant FCWC a margin reserve.

Used and Useful Adjustments

Water Treatment Plant

Mr. Dyer had no position on this issue at prehearing and offered no testimony regarding the issue at the hearing. He stated in his post hearing brief that the used and useful percent should be 89.16 percent. Because he provided no supportive evidence, we are unable to verify the authenticity of his conclusion or his method of arriving at his position. OPC had no position on this issue.

In its MFRs, the utility reported 994,000 gallons as the maximum high daily flow. FCWC stated this was due to the filling of all storage tanks in a two day period to prepare for a planned service outage. Because this was an anomaly, we used the next highest daily flow in used and useful calculations. According to the MFRs, the next four high daily flows were all in the 680,000 gallon range. We find that this range is representative of actual usage. We calculated the plant to be 100 percent used and useful with the lower gallonage figure. See Attachment A to this Order. We found this plant to be 100 percent used and useful in the past two rate proceedings, by Orders No. PSC-92-0563-FOF-WS, issued June 24, 1992, and PSC-95-0039-FOF-WU, issued January 10, 1995, in Docket Nos. 910976-WS and 940687-WU, respectively. Accordingly, we find that the water treatment plant is 100 percent used and useful.

Wastewater Treatment Plant

The utility states in its brief that following AWT upgrades, the plant capacity will be 0.75 mgd. FCWC witnesses Young and Christopher testified that the maximum capacity would be 0.75 mgd. FCWC witness Young further testified that a capacity of 0.75 mgd is the nearest commonly used capacity that allows the use of standard equipment and meets the wastewater treatment needs of Barefoot Bay. Therefore, the utility argues that the water and wastewater treatment plant should be considered 100 percent used and useful.

However, as Utility witness Young testified, the wastewater treatment plant could be operated at 0.9 mgd, provided that FCWC makes an additional investment of only $25,000 for installation of two equalization pumps and associated pipes and wiring. Therefore, we find that the evidence supports actual wastewater treatment plant capacity of 0.9 mgd.

We do not believe that the existing Barefoot Bay customers should be made responsible for this additional, non-used and useful capacity. We recognize, however, that FCWC was required by DEP to make AWT upgrades to plant at a substantial investment. To that extent, we find that FCWC should not be penalized for this investment by a decrease in the percentage of used and useful for its water and wastewater treatment plant.

Therefore, based on the evidence, we find that the value of wastewater plant-in-service prior to AWT upgrades equals 66 percent used and useful, while the value of wastewater plant-in-service for investment in AWT equals 100 percent used and useful.

Wastewater Collection System

In the last water and wastewater rate case for this utility, we found the wastewater collection system 100 percent used and useful. Nothing has occurred to change this calculation. Therefore, we find that the water distribution system is 100 percent used and useful in this proceeding.

Water Distribution System

In the last water and wastewater rate case for this utility, we found the water distribution system 100 percent used and useful. Nothing has occurred to change this calculation. Therefore, we find that the water distribution system is 100 percent used and useful in this proceeding.

Excessive Unaccounted for Water

The record indicates that this utility has a very small percentage of unaccounted for water, 1.07 percent, which is well under accepted industry standards. The utility's MFRs indicate that total unaccounted for water is 1.941 million gallons (mg) for the year, or 1.07 percent of the total treated water. Therefore, we find no adjustment for excessive unaccounted for water necessary for this utility.

Excessive Inflow and Infiltration (I&I)

Utility witness Young testified that the standard for determining excessive I&I for Barefoot Bay, which is contained in Water Pollution Control Federation Manual of Practice No. 9 (MOP 9), provides for up to 30,000 gallons per day (gpd) per mile for the total length of main sewers, laterals and house connections. OPC witness Dismukes calculated I&I for the peak month to be over 5 million gallons which averages 184,366 gpd.

Using witness Young's standards, our calculations indicate that FCWC's resultant permissible I&I would be over 1.1 mgd. Since the wastewater treatment plant is constructed and permitted at 0.75 mgd, we found this to be an unacceptable level of I&I.

Accepted industry standards permit 80 to 90 percent of the water sold to be returned to the wastewater plant. Our calculations assume 90 percent returned water. Using the utility's flow figures for water and wastewater, I&I standards from MOP 9, and allowing for 90 percent returned water, we found that actual flows to the wastewater plant would total 446,605 gpd. Our calculation of permissible level of I&I totals 130,974 gpd. Actual flows to the wastewater plant were reported to be 697,613 gpd, which exceeds sold water by 251,568 gpd. We then subtracted the calculated permissible level of I&I (130,974) from the extra 251,568 gpd being treated, and the result is 120,568 gpd of excessive I&I. We believe that, since these numbers represent actual flows experienced by the utility, they are more realistic of the true amount of I&I in the system.

We agree with witness Dyer that excess flows cause additional power to be consumed for pumping and additional chemicals to be used for treatment. Accordingly, we have reduced expense accounts Nos. 715 and 718 by $18,380 and $4,751 respectively, to account for excessive I&I.

Plant Capacity

Capacity and Flows for Calculating Wastewater Plant Used and Useful

This issue prompted considerable discussion at the service hearing. OPC witness Dismukes testified that the capacity is 1.26 mgd. In his brief, witness Dyer made several references to differing capacities. Utility witness Christopher, a registered professional engineer, testified that the plant is constructed to a design capacity of 0.75 mgd. He also testified that the plant capacity will be equal to or less than 0.075 mgd based on the average annual flow and the waste concentration associated with this flow. Witness Christopher also testified that effluent requirements set by DEP are normally set on an annual average basis, not a daily or weekly basis.

The DEP operating permit reflects 0.75 mgd or less. The utility may not routinely operate it at flows above that amount according to the DEP permit requirements. Because this plant was designed, constructed and permitted at 0.75 mgd capacity and the utility may not routinely operate it at flows above that amount according to the DEP permit requirements; we find that the average daily flow capacity is 0.75 mgd. Our used and useful percent calculations are shown on Attachment B.

Peak Month Wastewater Capacity

During cross-examination by OPC, witness Christopher agreed that the plant could withstand flows of up to 2.7 mgd for an hour. Witness Christopher also testified that a plant must be designed to allow for peak hour flows even though these excess flows may be sent to a temporary holding pond for later treatment. This is intended to keep the plant from overtopping the units. We find that wastewater treatment plants are designed to withstand far greater temporary flows than they are able to normally treat in a given period. Peak month is not a factor in the ratemaking process. Therefore, we do not find that peak month is an appropriate design parameter for a wastewater plant.

Average Daily Flow Capacity-Wastewater Plant

OPC witness Dismukes presented three alternative plant capacities in her testimony: 1.26 mgd; 0.90 mgd and 0.75 mgd. OPC offered no professional engineering expertise to verify the testimony of witness Dismukes.

As previously stated, Utility witness Christopher, a registered professional engineer, testified that the plant is constructed to a design capacity of 0.75 mgd. He also testified that the plant capacity will be equal to or less than 0.75 mgd based on the average annual flow and the waste concentration associated with this flow.

Witness Christopher testified that, in order to operate the treatment plant at 0.90 mgd, two equalization pumps and associated piping and wiring would need to be installed at a cost of $25,000. Additionally, the plant would then need to be re-permitted by DEP. We find that the average daily flow capacity is 0.75 mgd as constructed by the utility and permitted by DEP.

Contributions-in-Aid-of-Construction (CIAC)

As discussed earlier, we have not authorized a margin reserve in this case. Therefore, no imputation of CIAC for margin reserve is needed. However, as discussed later in this Order, we have imputed $81,258 of CIAC to account for a grant awarded by SJRWMD to FCWC for funding of the utility's transmission facilities.

Working Capital

Because FCWC's Barefoot Bay operating division is a Class A utility system, the utility used the balance sheet approach to calculate working capital, in accordance with Rule 25-30.433, Florida Administrative Code. Consistent with its request for approval of year-end rate base amounts, the utility proposed use of a year-end working capital allowance. The requested provisions are $48,214 (4.5 percent) for the water system and $43,929 (4.1 percent) for the wastewater system. These amounts are allocated portions of a common $1,071,429 company-wide balance, based upon relative provisions for operation and maintenance charges.

We find that the record supports the use of the balance sheet approach to calculate working capital.

OPC witness Dismukes testified that while the utility included other deferred debits in its requested working capital allowance, however, it failed to include cost-free other deferred credits. Ms. Dismukes recommended an adjustment to include other deferred credits in the total utility working capital calculation, in the amount of $522,545. This adjustment results in a reduction of $44,940 allocated to the Barefoot Bay Division.

In response to Ms. Dismukes' inclusion of other deferred credits in the working capital calculation, Utility witness Coel

partially agreed with this adjustment. He testified that the deferred credits related to deferred metered sales and deferred pension cost should have been included in the calculation. Further, he testified that deferred gross receipts tax is directly related to carrying charges on capacity fees. As identified in the MFRs, these carrying charges were removed from the working capital calculation. Likewise, Mr. Coel stated that it is also appropriate to exclude the related gross receipts tax. According to witness Coel, the resulting amount of other deferred credits for the working capital calculation should be $171,174.

The adjustments recommended to working capital by witness Dismukes are based on the 13-month average balances for both water and wastewater. Ms. Dismukes testified that the working capital requirement based on the 13-month average is more representative of the utility's working capital needs, as opposed to the year-end approach. Based on Ms. Dismukes' proposed adjustments, OPC recommends a working capital allowance of negative $18,184 for water and negative $16,568 for wastewater.

Witness Coel testified that since the utility supports year-end rate bases in this proceeding, in order to avoid a mismatch, the utility likewise proposes using a working capital allowance based on the year-end approach. However, after review of Ms. Dismukes' adjustment schedules, Mr. Coel identified an error in the utility's 13-month average balance for intercompany payables, as filed in the MFRs. The average balance of this account was not adjusted for a $2,000,000 intercompany note as it was adjusted for the year-end balance. According to Mr. Coel, the corrected total company working capital allowance for the 13-month average, before any other adjustments, is $1,041,535. This results in an allocation to Barefoot Bay of $46,869 for water and $42,703 for wastewater. We have adjusted the 13-month average working capital to reflect the correct amount for intercompany payables.

While we agree with the utility's position that year-end rate base determinations are appropriate in this proceeding, we find it appropriate to examine the working capital accounts on the basis of average values. The averaging process tends to eliminate ebb and flow conditions, particularly with regard to tax payments, which obligations become due and payable at irregular dates. Likewise, we find the 13-month average balance is more representative of the utility's working capital needs, as opposed to the year-end approach.

In its brief, the utility concedes that the working capital allowance should be adjusted to include other deferred credits associated with deferred metered sales and deferred pension costs.

However, we have not factored other deferred credits associated with deferred gross receipts tax into the working capital calculation. Since the related carrying charges have not been included in working capital, we have excluded the gross receipts tax as well. The Utility witness stated that working capital should be adjusted by $171,174 to include other deferred credits. Based upon our calculation of the working capital allowance on the 13-month average basis, we find that the appropriate amount to include in working capital is $156,951. This results in an allocation of $7,063 and $6,435 to Barefoot Bay water and wastewater, respectively.

Based upon our adjustments, and the inclusion of the unamortized balance of PS&I charges discussed earlier, we find the appropriate working capital allowance is $84,173 for the water operations and $76,691 for the wastewater operations. This represents an increase in working capital of $35,958 and $32,763 for water and wastewater, respectively.

Unfunded Post-Retirement Benefits

In this proceeding, the utility has requested recovery of operating expenses representing post retirement benefits, resulting from the implementation of SFAS 106. SFAS 106 refers to the accounting standard that describes the practice of recognizing post retirement benefits other than pensions (OPEBs).

FCWC does not currently fund its OPEB obligation. According to Rule 25-14.012(3), Florida Administrative Code:

> Each utility's unfunded accumulated post retirement benefit obligation shall be treated as a reduction to rate base in rate proceedings. The amount that reduces rate base is limited to that portion of the liability associated with the cost methodology for post retirement benefits other than pensions.

OPC witness Dismukes testified that since the utility does not currently fund its OPEB liability, it is appropriate to include the unfunded liability account in the rate base determination. Based on the average balance of the unfunded liability from the utility's balance sheet, Ms. Dismukes recommended that rate base be reduced by $67,690 and $61,673 for water and wastewater, respectively.

Under cross-examination, Utility witness Schifano agreed that the unfunded liability associated with the post retirement benefits

should be treated as a reduction to rate base, in accordance with the rule. Mr. Schifano further testified that the appropriate amounts to be used in the rate base determination for this proceeding are $79,560 for water and $72,488 for wastewater. As indicated in the record, these amounts represent the unfunded liability balances as of year-end June 30, 1996, consistent with the utility's requested test year rate base.

We find that all parties are in agreement as to the appropriate rate base treatment for the unfunded liability. Therefore, the only remaining question is what amount should be used to reduce rate base. Although OPC did not provide a basis for using the 13-month average balances, it appears that this adjustment is consistent with its recommended treatment for working capital. Because we have included the unfunded OPEBs as a separate line item in rate base, and not as a component of working capital, we find it appropriate to make the adjustment consistent with our rate base treatment. Therefore, we have reduced rate base by $79,560 for water and $72,488 for wastewater to reflect the year-end balances associated with the unfunded liability.

Test Year Rate Base

The record indicates that FCWC applied for a grant from SJRWMD in the amount of $325,032 in order to fund transmission facilities. Mr. Bradtmiller testified that if funding is granted, the amount granted shall be treated as CIAC, thereby reducing rate base. We believe that the customers should receive the benefit of any funding granted to FCWC and that this benefit should be reflected in the customers' rates for wastewater service. Therefore, we find it appropriate to impute $81,258 CIAC to FCWC's rate base. This amount is equal to 25 percent of the utility's grant request.

We believe that this adjustment will demonstrate to the water management district that the benefits of their funding will go to the customers of the utility receiving the funding, not to the stockholders of the utility. Accordingly, we hope that the water management districts will be encouraged to provide additional funding to investor-owned utilities.

Although the record does not specify an actual award or award calculation to FCWC, we believe that our calculation is reasonable. However, given these unique circumstances, this adjustment is made as a proposed agency action and shall only become final if no timely protest is received from a substantially affected person, in the form of an appropriate petition as set forth in Rule 25-22.029, Florida Administrative Code.

This rule states that for good cause shown, the Commission may provide that the time for requesting a Section 120.57, Florida Statutes, hearing shall be **fourteen days** from issuance of the notice. If not for our adjustment, this Order would become final on its issue date. Therefore, we find it appropriate that substantially affected persons have **fourteen days** from the notice of proposed agency action in which to file a protest.

Additionally, the utility shall be granted 30 days from the date of this Order in which to provide us with the actual grant amount from SJRWMD. In the event that a material difference exists between the actual grant amount and our calculation, staff shall file a recommendation for the appropriate rate adjustment.

Based upon a year-end rate base determination and our adjustments, we find that the appropriate rate base amounts total $1,104,920 for water and $6,081,447 for wastewater.

COST OF CAPITAL

Our calculation of the appropriate cost of capital, including our adjustments, is depicted on Schedule No. 2. Those adjustments which are self-explanatory or which are essentially mechanical in nature are reflected on that schedule without further discussion in the body of this Order. The major adjustments are discussed below.

Equity Infusion

In December of 1995, the utility capitalized $2,000,000 into equity, in order to improve its debt to equity ratio and interest coverage ratio. Utility witness Schifano stated that the utility's debt level has significantly increased due to the magnitude of its construction program over the last two years. In addition, he testified that the utility's equity has also been negatively affected by a non-recurring litigation expense.

Staff witness Clepper testified with respect to Staff's Audit Disclosure No. 2, which identified the details surrounding this equity infusion. The disclosure indicated that a series of transactions led to the reclassification of $2,000,000 from an intercompany payable to additional paid-in capital. The conclusion provided in the disclosure was that the reclassification did not change the availability of the cash to the utility, however, it effectively increased the rate of return from nine percent to 11.88 percent. The resulting effect of this transaction increases the weighted average cost of capital and subsequently the revenue requirement. Under cross-examination, Mr. Clepper admitted that there was no evidence to suggest anything improper about the

transaction. On the other hand, Mr. Clepper further testified that since the cost of equity is higher than the cost of debt, during the weighting process used to calculate the overall cost of capital, the cost rates associated with the particular elements have an impact on the overall cost rate.

OPC witness Dismukes testified that since this equity transaction merely had the effect of increasing the cost rate associated with the $2,000,000, the transaction should be reversed. Further, she stated that not only does the utility not receive a benefit from this transaction, but the ratepayers are also negatively affected. She recommended removing the $2,000,000 from equity and placing it back into debt, thereby decreasing the equity component and the overall cost of capital.

Utility witness Murphy testified that Ms. Dismukes' implications that the equity infusion transaction was improper, are simply unfounded. For the past 30 years, forgiveness of a parent utility payable, which is subsequently converted into equity, has been a standard practice of Consolidated Water Company (CWC). Details of the transaction are as follow:

> In 1994 CWC advanced directly to FCWC $2,000,000 to meet cash flow demands caused by the construction of water and wastewater plants throughout the FCWC service areas. CWC is the parent company of [FCWC Holdings, Inc.] Holdings. In December 1995, FCWC issued $18,000,000 in senior notes. As a part of the proceeds of that issue, FCWC repaid the CWC advance. To improve FCWC's equity position, as discussed above, in December, 1995, Holdings made an equity contribution of $2,000,000. The funds for that investment came through CWC as an equity investment in Holdings by CWC. In summary, there was a pay down of debt and a subsequent equity infusion.

Similar transactions have occurred periodically over the past 20 years, due to significant capital improvements.

Witness Murphy testified that after two years of significant plant additions, as well as substantial legal fees incurred to defend a lawsuit by the Department of Justice, FCWC's equity ratio had declined from 35.5 percent in 1993 to 32 percent in 1995. FCWC's controlling debt agreements require a minimum 30 percent equity ratio, otherwise the utility will not be able to issue additional debt. On cross-examination, Mr. Clepper conceded that

these minimum equity requirements were not brought up as points in the staff audit disclosure. Concerned that its 32 percent equity ratio was too close to the minimum requirement, Mr. Murphy further testified that FCWC's parent utility made a $2,000,000 equity contribution, in the ordinary course of business, to improve FCWC's equity ratio. This equity infusion increased its equity ratio to 34.2 percent, as well as FCWC's total equity to debt ratio to 48 percent, closer to the target rate of 50 percent. Mr. Murphy stated, "In the eyes of the capital markets that FCWC must enter when additional debt is required the higher the equity position the lower the cost of debt. A sound financial position ultimately benefits the customers by providing a lower overall cost of capital."

Upon cross-examination by OPC, witness Murphy was asked to refer to Exhibit 43, which indicated that cash dividends had been paid on preferred stock and common stock each year from 1992 through 1994. Mr. Murphy agreed that paying dividends would have a decreasing effect on the utility's equity ratio, however, he explained that the dividends paid on the preferred stock were not elective, but required by the terms of the stock. In addition, OPC posed a question as to whether the utility also made the election to issue preferred stock, as opposed to some other means to raise capital. Mr. Murphy responded by stating that, at the time of the preferred stock issue, the utility may have been limited in what mechanisms were available to raise capital. However, since the issuance occurred in 1991, prior to his employment at FCWC, Mr. Murphy declined to speculate on the matter.

Mr. Dyer also raised concerns in his testimony regarding FCWC's equity. He asserted that a nine percent preferred stock issue was used to pay off 16.25 percent Series G First Mortgage Bonds. Mr. Murphy contradicted this assertion, testifying that the preferred stock issue was completed on June 20, 1991. Subsequently, $6,000,000 in 7.79 percent Series K First Mortgage Bonds were issued in October, 1992. Finally, $1,635,000 of the proceeds from the Series K Bonds were used to extinguish the remaining 16.25 percent Series G Bonds.

In addition, Mr. Dyer testified that FCWC bought back 2,337 shares of common stock. Mr. Murphy explained that in June 1991, FCWC actually converted 2,337 shares of outstanding common stock into 9,000 shares of nine percent preferred stock, resulting in a lower rate of return, and thus a lower revenue requirement.

In his brief, Mr. Dyer mentioned the testimony of Keith Baldwin, a customer of Barefoot Bay. Mr. Baldwin's concerns were related to the principal and amortization payments on some of

FCWC's debt issues, the lack of sinking fund provisions for Series J and K bonds, and the utility's dividend payout ratio. In response, witness Murphy testified that debt amortization does not have a significant impact upon ratemaking. Further, Mr. Murphy stated that the revenue requirement calculation does not include a component for the amortization or sinking fund requirements of debt.

Although the ultimate effect of the equity infusion resulted in an increase to the overall rate of return, we find the record devoid of any evidence to suggest the transaction was improper. We do find that the record supports the utility's argument that a sound financial position ultimately benefits the customers by providing a lower overall cost of capital. According to the utility's controlling debt agreements, if its equity ratio falls below 30 percent, the utility will be precluded from issuing any additional debt, thereby forcing the utility to raise capital by other means. Accordingly, we find it pertinent for FCWC to be concerned with its equity ratio, as well as its total equity to debt ratio. Therefore, we do not find that an adjustment to the equity component is warranted.

Return on Equity

Based upon the evidence in the record and the components of adjusted capital structure, we find that the equity ratio for FCWC is 30.62 percent. Using the current leverage formula, the appropriate rate of return on equity is 11.88 percent. Therefore, we find that the appropriate range for the return on equity is 10.88 percent to 12.88 percent.

Deferred Income Tax Credits

As shown in the MFRs, the utility's reported cost for deferred investment tax credits (ITCs) is 9.61 percent. However, the utility's calculation includes a component for customer deposits.

Although we removed the customer deposit component from the cost rate for ITCs in FCWC's last rate case, the utility included this component in this proceeding, because there is an associated cost of six percent on customer deposits. Utility witness Coel stated that it is the utility's position that there is no effect on the overall cost of capital and rate of return if the customer deposits are removed from the calculation. However, on cross-examination Mr. Coel agreed that the calculation of the weighted cost of ITCs is a fallout from the ratios and costs of capital

components. Subsequently, the utility acknowledged in its brief that it was inappropriate to include the customer deposit component in the calculation of the cost rate for deferred ITCs.

Similarly, OPC witness Dismukes recommended a revision to the utility's cost of ITCs, consistent with Commission policy. She testified that the customer deposit component should be removed from the calculation, in order to reflect the cost of capital associated with investor supplied funds only. In conjunction with Ms. Dismukes' adjustment to the equity component, OPC argues that 9.57 percent is the appropriate cost of ITCs.

We find that all parties are in agreement that the customer deposit component should be removed from the weighted cost of ITCs. We find that inclusion would be inappropriate since customer deposits should not be considered a source of investor funding for the purpose of this equation. Removal of that element necessitates a corresponding adjustment to the cost of deferred ITCs. Therefore, in accordance with the approved debt and equity components, and corresponding cost rates, we find that the appropriate cost for deferred investment tax credits is 9.65 percent, which reflects the removal of customer deposits.

Overall Cost of Capital

Based upon the approved adjustments discussed earlier, we find that an overall cost of capital of 8.75 percent, with a range of 8.44 percent to 9.05 percent, is appropriate.

NET OPERATING INCOME

Our calculations of net operating income are depicted on Schedules Nos. 3-A and 3-B for water and wastewater, respectively. Our adjustments are itemized on Schedule No. 3-C. Those adjustments which are self-explanatory or which are essentially mechanical in nature are reflected on those schedules without further discussion in the body of this Order. The major adjustments are discussed below.

Test Year Revenues

FCWC has estimated a 10 percent decline in water consumption from the historic test year ending June 30, 1995, to the projected test year ending June 30, 1996, for both its water and wastewater customers. FCWC based this estimate on historical data and its apparent declining trend. OPC witness Dismukes has stated that FCWC has not adequately considered the degree to which rainfall may have affected consumption. She testified that consumption was down

somewhat because of an above average amount of rainfall during the historic test period. Therefore, she stated that the base year used by FCWC to project a further decline in consumption may already be understated due to an above average amount of rainfall.

While it is obvious there has been a substantial decrease in water consumption at the Barefoot Bay Division from January, 1991 through December, 1995, it is not clear as to the decrease in consumption from the historical test year ending June 30, 1995 to the projected test year ending June 30, 1996. The record shows actual water consumption data collected for 9 of the 12 months of the projected test year. Thus, the only missing months of the projected test year are April, May, and June of 1996. For the last three years the average consumption for the months of January, February, and March has been higher on average than the months of April, May, and June. Therefore, based on historical consumption, we find that the consumption for the missing months of April, May, and June is at least the same as the actual average for the months of January, February, and March of 1996. If this trend in consumption continues as it has for the last three years, we find that the projected test year consumption will be within one percent of the historic test year consumption ending June 30, 1995.

We agree with OPC witness Dismukes that there is a minimum amount of water that a customer must use. If historic consumption is projected with future growth, without including the utility's proposed 10 percent reduction, then water usage will be 96 gallons per day per household. This would equate to 48 gallons per day per person assuming a two person household. Obviously, this is very low usage per customer. We find that to further reduce this number without knowing what a customer must consume would be ambiguous. Also, the record indicates there were no price elasticity studies done to determine the effect price may have on consumption.

OPC witness Dismukes states, based on data collected from the Melbourne weather station, that 1994 and 1995 were above the 30 year average in annual precipitation. She also stated that rainfall has some impact on the customer's need to irrigate and that it would tend to reduce their water consumption. We find that rainfall is only one component that can reduce irrigation. There may be more significant components that determine the effects of rainfall on consumption. One component that might reduce the effects on consumption due to rainfall is whether or not the area is in an irrigation area. In other words, customers may not need to irrigate as much due to having smaller than average yards. FCWC witness Coel stated that Barefoot Bay is not in an average or above average irrigation area. Thus, if customers tend not to irrigate as much, rainfall will have a lesser effect on their water

consumption. Other components that may effect consumption more significantly than actual rainfall is the time of day it rains, temperature, and the frequency of the participation. Therefore, we find it difficult to determine the effects of rainfall on consumption by only analyzing rainfall data.

In summary, we find that projected consumption is based on the historic consumption amount of 162,222,000 gallons for water and 144,498,000 gallons for wastewater for the primary reason that the record suggests that projected consumption will be within one percent of historic consumption. These numbers are based on the historic test year ending June 30, 1995, and do not reflect the utility's proposal of a 10 percent reduction in consumption. We find it appropriate to base wastewater usage on the historic test year for the same reasons as water usage since wastewater consumption is derived from water usage.

Imputation of Revenue for Sale of Reuse

OPC's position in its brief is that it is appropriate for us to impute reuse revenue of $30,660 for the sale of effluent on the H&S property. FCWC argues in its brief that it does not think any revenue should be imputed for the sale of effluent. Mr. Dyer argues that revenues should be imputed.

According to OPC's brief, if the utility is able to secure a lease for this property to a third party as it intends, then it would be reasonable to conclude that it would sell effluent to the third party at a rate of 21 cents per 1,000 gallons. The amount of $30,660 is derived from the utility's estimate that the grove will take 146,000,000 gallons of reused water per year. In its brief, the utility argues that although Mr. Bradtmiller agreed in principle that any revenue received from the use of land should offset against the cost of operating the treatment system, based on FCWC's investigations including prospective leases with citrus growers and sod farmers, it is highly unlikely that the land will produce any operating revenues in the foreseeable future. According to Mr. Dyer's brief, potential sales exist, and the customers should not have to finance the utility while the utility waits for new customers. Mr. Dyer states that the Commissioners should provide the utility an incentive to find a market for wastewater.

Ms. Dismukes testified that if the orange grove were spun off to an affiliate of FCWC, then it would be appropriate to charge for the use of the reclaimed water. In his rebuttal testimony, Mr. Bradtmiller, made it clear that Ms. Dismukes' hypothetical sale would not be occurring. According to Mr. Bradtmiller's testimony,

FCWC would not consider selling the land, even to an affiliate because of its critical importance in compliance with the Second Amended Consent Order (SACO).

Ms. Dismukes also testified that the utility has not explained whether the orange grove it purchased is productive. If the orange grove produces a crop, and there is a profit associated with the crop, then ratepayers should not be required to provide another return on the investment. Accordingly, the income derived from the orange grove should be included in utility income, or, the land should be removed from rate base and treated as non-utility. Ms. Dismukes chose to treat the land as non-utility.

Mr. Bradtmiller rebutted this argument, testifying that if any revenue is received from the use of the land, or from the sale of the treated effluent for irrigation, FCWC agrees that this revenue should be offset against the cost of operating the Barefoot Bay wastewater treatment system. Based on FCWC's investigations including prospective leases, however, the utility states that it is highly unlikely that the land will produce any operating revenues in the foreseeable future. If FCWC could lease the land for a use that would complement the spraying operation, then it would seriously consider doing so. FCWC states that at the present time, however, this land will not generate any revenue.

According to Ms. Dismukes, the basis of her recommendation was that the utility sent a letter to the DEP indicating that it was their intent to use the property to irrigate groves, or to use it for other agricultural purposes. Under cross-examination, Mr. Bradtmiller admitted that was the intent at the time, and the utility is continuing to seek agricultural interests. However, until then, the utility plans to use the land for slow rate application.

Mr. Dyer has suggested in his brief that potential sales exist but presented no evidence to support the suggestion. However, Mr. Bradtmiller testified that FCWC does not have, nor does it contemplate, a lease arrangement which would provide for the lessee to pay for the reclaimed water. Therefore, the only firm source of revenue is the contract with the Barefoot Bay Golf Course. Mr. Dyer has also suggested that we should provide the utility an incentive to find a market for wastewater. However, he did not provide any testimony as to how this should be done.

Based on the foregoing, we do not find it appropriate to impute reuse revenue at this time. One of the reasons Ms. Dismukes believes that it is appropriate to impute revenue now is that if the utility were to negotiate a lease six months from now, it would

be unfair to the ratepayers for the utility to be allowed to include the land in rate base and receive some kind of benefit from that land. We find merit in witness Dismukes' argument. Therefore, the utility shall file status reports every six months indicating the progress of any negotiations for leases.

Rental Income

FCWC's witness Schifano testified that rental income received during the test year from a third party for an antenna should not be included "above the line" for ratemaking purposes. Mr. Schifano testified that income should be recorded "below the line" because the land on which the antenna sits is contributed property. Furthermore, he stated that because the land has no effect on rate base and that a prorated part of the property taxes is charged back to the lessee, reducing the below-the-line property tax expense for the land, the rental income should be recorded below the line.

OPC argues in its brief that the land is included in rate base and it is essentially utility property. OPC states that land is not depreciated, therefore it will always remain in rate base. Further, if this land was contributed and the amount was included in CIAC, then it would be amortized over time with the net CIAC balance declining. OPC states, assuming this land was contributed when the utility began operations -- some 30 years ago, it is likely that there is no CIAC offset to the amount of land included in rate base. We find no evidentiary support for OPC's arguments.

Based on the record, we find it appropriate to include this rental income in operating revenues for the Barefoot Bay wastewater division. The antenna is located on the wastewater treatment plant site in Barefoot Bay. FCWC has not demonstrated that the land is not included in rate base. Since land is not depreciated and will always remain in rate base, we find it appropriate that the rental income associated with this antenna benefit the customers. Therefore, we have increased test year wastewater income by $19,900 for rental income associated with the antenna.

Operation and Maintenance (O&M) Expenses

Rate Case Expense

The projected provision for rate case expense per the MFRs was $129,420, yielding an annual expense of $13,428 for water and $18,928 for wastewater. The utility allocated 50 percent of current rate case expense to water and 50 percent to wastewater, with the exception of $22,000 for outside consulting services which is allocated only to wastewater. In his rebuttal testimony,

Utility witness Coel supplied an exhibit displaying current rate case expense, supporting documentation, and a revised estimate to complete the hearing process. The utility's current rate case expense and estimate to complete produced a revised rate case expense of $152,356, which yields an annual expense of $16,303 for water and $21,786 for wastewater. The components of these provisions are as follows:

	MFRs	EXH 45
Mail, Printing, Supplies & Miscellaneous	$3,500	$3,420
FCWC (Rate Dept.)	25,800	18,191
Avatar Utility Services	13,120	18,632
Avatar Utilities	1,000	2,440
Legal	55,000	78,744
Outside Consulting (Wastewater Only)	22,000	21,930
Filing Fee	9,000	9,000
Total	$129,420	$152,356

OPC witness Dismukes has challenged the utility's requested rate case expense. She testified that $24,000 in rate case expense from FCWC should be removed because the utility had not adequately demonstrated that these charges are not already included in its 1995 test year expenses. Since the utility uses in-house staff to prepare the MFRs and testimony, Ms. Dismukes asserted that these costs could be included in the test year operating expenses. If so, Ms. Dismukes testified that ratepayers would then be charged twice for this double counting of expenses.

In addition to the previous adjustment, witness Dismukes also recommended that an additional $52,000 be removed from the requested rate case expenses. Ms. Dismukes testified that this adjustment is to account for the additional expenses incurred for setting this rate proceeding directly for hearing. This adjustment is discussed in greater detail later in this Order.

In response to Ms. Dismukes' adjustment to remove rate case expenses charged from FCWC, Utility witness Coel testified that these expenses specifically relate to FCWC's rate department charges for time spent on the rate case filing and are deferred and charged to deferred rate case expenses. Mr. Coel further stated that there is no double counting of this expense, and that any time spent on work unrelated to the rate case is recorded as labor expense. We find that the evidence supports that these expenses are not being double counted. As such, we find it would be inappropriate to make an adjustment based on this premise.

Additionally, in response to Ms. Dismukes' adjustment to remove from rate case expense those expenses associated with the additional costs related to the rate case hearing procedure, Utility witness Bradtmiller testified that by going directly to hearing, both the customers and FCWC are guaranteed a full and complete hearing before this Commission. In addition, Mr. Bradtmiller stated the principal reason the utility did not elect the PAA process was because the magnitude of its requested revenue increase was so great that FCWC believed the application would go to full hearing regardless of what action we might have proposed. As discussed in further detail later in this Order, we find that no adjustment shall be made based on the utility not opting to file this case as a PAA proceeding.

In its brief, OPC argued that a third adjustment should be made to reduce rate case expenses by $22,000, in order to remove the professional fees estimated for Utility witness Blizzard. In support of its argument, OPC indicates that on cross-examination, Ms. Blizzard was unaware of what her fee was in this case, as well as the amount the utility had estimated in the MFRs. OPC further argues that the utility's support for its rate case expenses contains no billing from Ms. Blizzard, nor any documentation concerning how this estimate was derived. OPC also argued that there is no evidence giving assurance that these legal fees have not been recorded as an operating expense or capitalized to the wastewater treatment plant, and thus already recovered. We find that supporting invoices totalling $12,930 were, in fact, included in the record. Additional costs for completion were estimated at $9,000 for the consulting services of Ms. Blizzard, as well as Utility witness Christopher. This estimate covers the months of March and April, during which rebuttal testimony was filed and the technical hearing occurred.

Based on our review of the supporting documentation, and testimony, we find that the utility's requested rate case expense is prudent and reasonable. Therefore, we find that the appropriate provision for current rate case expense is $152,356, resulting in annual expense of $16,303 and $21,786 for water and wastewater, respectively.

In its MFRs, the utility reported total projected test year expenses of $25,091 and $27,618 as the amortization of rate case expense for water and wastewater, respectively. This consisted of the amortization amounts for current rate case expense, as well as the amortization of two prior rate cases. The rate case expense

approved in Order No. PSC-92-0563-FOF-WS, Docket No. 910976-WS, issued June 24, 1992, was fully amortized by July of 1996. Accordingly, we find it appropriate to remove all unamortized rate case expense associated with this docket from test year O&M expenses for both water and wastewater. The annual rate case expense of $10,251, approved in Order No. PSC-95-0039-FOF-WU, Docket No. 940687-WU, issued January 10, 1995, shall remain in test year water O&M expenses, since the amortization period has not yet ended. As such, we find that the appropriate amount of rate case expense amortization is $26,554 and $21,786 for water and wastewater, respectively. This results in an increase to water expenses of $1,463 and a decrease to wastewater expenses of $5,832.

Effect of PAA Process on Rate Case Expense

In its brief, FCWC lists a number of factors upon which it based its request that this case proceed directly to hearing. Those factors include: the magnitude of the requested rate increase; the complexity of the underlying issues; the level of expected controversy and the unrecoverable revenue losses associated with the potential regulatory lag accompanying any protested PAA order. Based upon these factors, FCWC argues that this case should not have been processed as a PAA.

Both OPC and intervenor Dyer maintain that by processing this case as a PAA, rate case expense would be lower, resulting in lower rates to the customer. In support of its position, OPC argues that if a PAA order had been entered, the customers could have decided to avoid the cost of hearing. As a result of FCWC avoiding the PAA process, OPC states that the customers were deprived of an opportunity to avoid a hearing.

OPC is correct that the customers could have opted to avoid a hearing following a PAA decision. However, we find that FCWC's concerns of a protest were valid, given the level of the requested rate increase of $153,136 for water and $1,273,024 for wastewater, and controversy stemming from customer interest in this matter.

Section 367.081 (8), Florida Statutes, grants a utility the option of requesting a PAA proceeding in a rate case. However, the PAA process is not mandatory. Therefore, given FCWC's concerns, we find that the utility's choice to go directly to hearing was reasonable and thus, we properly scheduled this docket to go directly to hearing.

We find that the real issue is not whether this case should have been processed as a PAA, but, rather, whether the rate case expense is reasonable. Section 367.081(7), Florida Statutes, provides that the Commission shall determine the reasonableness of rate case expenses and disallow all rate case expenses determined to be unreasonable. The statute also provides that no rate case expense determined to be unreasonable shall be paid by a consumer. As stated earlier, we find that FCWC's rate case expense request is reasonable.

Customer Growth and Commission Index

In the MFRs, the utility has requested recovery of projected O&M expenses based on customer growth and the Commission index. The projections for the utility's 1996 expenses include adjustments for customer growth factors of 1.16 percent and 1.07 percent for water and wastewater, respectively, and the 1995 index factor of 1.95 percent.

OPC witness Dismukes testified that it is unrealistic to assume that expenses will automatically increase in the test year equal to the increase in customers and inflation, regardless of the circumstances or the account. Based on a benchmark analysis and her evaluation of the utility's expenses, Ms. Dismukes identified some expense accounts that have actually declined. Based on this analysis, she then recommended to remove the proposed increased expenses where it was not evident that the expense would increase during the test year.

Ms. Dismukes' proposed adjustments to the test year water O&M expenses total $10,551, of which $6,306 are related to the growth and index adjustments. The remainder of this expense adjustment relates to the utility's projected increase in postage costs, and is addressed in detail later. Due to decreases in certain expense accounts from June 30, 1994 to June 30, 1995, Ms. Dismukes removed the utility's proposed adjustments to increase fuel expenses, contract-other, and miscellaneous expenses. Ms. Dismukes also recommended an adjustment to purchased power, which the utility has increased for customer growth. Ms. Dismukes stated that this account is more sensitive to consumption than growth. In conjunction with her recommendation that test year consumption will not increase, Ms. Dismukes stated there would be no increase in purchased power costs. Accordingly, she recommended removal of the proposed increase of $353.

Witness Dismukes also recommended adjustments to wastewater O&M expenses, which result in a total reduction of $7,237, of which $2,992 are related to the index and growth adjustments. As discussed in relation to the water expenses, the remainder of this adjustment relates to increased postage costs discussed later. Ms. Dismukes testified that although they affect different accounts, and the benchmark analysis is based on different test years, the proposed adjustments and the reasons provided are the same as for the water expense adjustments.

In response to Ms. Dismukes' proposed adjustments, Utility witness Coel testified that it is reasonable to utilize some growth and inflation factors and to make other reasonable adjustments, when a projected test year is employed. Mr. Coel stated that FCWC's utilization of the price index factor to account for anticipated inflation in the projected test year is in lieu of filing a price index application following the resolution of this rate proceeding. Further, Mr. Coel maintains that it is more prudent to incorporate this anticipated increase in expenses within this rate proceeding. In response to witness Dismukes' statement regarding her belief that it is unrealistic to assume that expenses will automatically increase, Mr. Coel stated that it is also unrealistic to assume that expenses will remain constant, or decrease.

OPC argues in its brief that if we accepted the utility's projected level of test year expenses, the utility will be placed in a position where increasing expenses are condoned. Moreover, OPC argues that FCWC should aspire to reduce its expense levels. However, FCWC argues that the requested expense adjustments are a reasonable attempt to factor in growth and inflation.

Although we agree that increasing expenses should not be encouraged, given a projected test year, we find it reasonable to assume that there will be some increase in certain expenses. Therefore, we find that the utility acted appropriately in utilizing the growth and index factors in its O&M expense projections. In addition, since Section 367.081(4)(a), Florida Statutes, gives utility companies the authority to file for an index application, we find it would be inappropriate to disallow FCWC's projected expense increases. However, because the utility has included these adjustments in its projected test year, FCWC shall be precluded from filing an index application in 1996. Therefore, we find that an adjustment is not warranted.

Postage Costs

The utility has requested projected expenses related to increased postage costs of $4,245 for both water and wastewater operations. Utility witness Sansbury testified about the implementation of a new type of billing method. The utility believes that the new laser-printed stuffed bill with return envelope enhances customer service by the improved readability of the full-sized bill. Previously, the utility used 5 X 7 inch post cards to bill its customers. Mr. Sansbury testified that these "cards were frequently misplaced by the postal service or mixed with other fourth class mail and accidently discarded." Some benefits of the new type of bill are identified by Mr. Sansbury: (1) the utility can more efficiently provide customers with service information as well as water industry communications, such as conservation and water quality; (2) without the need for separate mailings, the utility can send customers messages regarding changes in rates, service, and similar matters and (3) the enclosed return envelope provides a convenient way for the customers to make their monthly payments.

OPC witness Dismukes testified that the utility did not explain why this new billing method would necessitate an increase in postage and billing charges. Although she recognized that some increased costs would be expected, she stated that some of the benefits identified by witness Sansbury would offset the increase in costs. Ms. Dismukes stated that by eliminating the problems caused by the 5 X 7 inch post cards being misplaced or discarded, this should increase the utility's cash flow and reduce the working capital requirements. Also, Ms. Dismukes asserted that postage costs should be reduced by the fact that the utility will now be able to send messages to the customers without sending separate mailings. OPC argues that the utility's estimate for increased postage costs is overstated, since the proposed cost increase is merely the difference between the cost of sending a post card versus an envelope. Because the utility did not reflect the reduction in costs that Ms. Dismukes testified would result from the benefits identified above, OPC recommended the removal of the utility's increased costs of $4,245 from test year expenses for both water and wastewater.

Utility witness Coel rebutted Ms. Dismukes' testimony stating that the costs associated with the stuffed bill, which include the extra paper cost for the larger bill, an envelope, and a return envelope, are significantly higher than the post card bill. In

addition, since the last rate proceeding, there has been an increase in postage rates. Moreover, the new stuffed bill is mailed at a higher postage rate. Mr. Coel stated that, with pre-postal increase, the stuffed bill results in a $.144 per piece increase over the post card bill.

In response to witness Dismukes' statement that there should be a reduction of cost due to increased cash flow, witness Coel testified that Ms. Dismukes provided no evidence to support her position. Although theoretically there may be some beneficial effect on the utility's cash flow and working capital requirements, we find no evidence to suggest that a cost reduction will actually occur. Therefore, we find that the record does not support an adjustment based on this premise.

Likewise, in response to Ms. Dismukes' testimony that postage costs should decrease due to the elimination of the need to have separate mailings, Mr. Coel stated that there were no separate mailings in the past. Until FCWC changed to the stuffed bill, there were no cost effective means to communicate with its customers. Further, we find that due to the utility's billing cycles, the elimination of the need for separate mailings associated with customer notice requirements may only happen on occasion, thus diluting any benefits received.

Based on the foregoing benefits, we find that the utility acted prudently in changing the method of billing its customers. The utility has provided sufficient evidence to demonstrate that the new stuffed bill will cost more than the 5 X 7 inch post cards previously used. In addition, we note that postage rates have in fact increased since the previous test year. We find that the increase in costs associated with the implementation of the new billing method outweigh any theoretical cost savings which may be derived. Therefore, we do not find that an adjustment to the utility's proposed test year postage expense is warranted.

Affiliated Expenses

OPC witness Dismukes testified that due to the affiliation between FCWC and the companies that contribute expenses to the utility's cost of service, whether direct or indirect, we should closely scrutinize the affiliate allocation methods and techniques. In support of OPC's position, Ms. Dismukes expressed some concerns related to the utility's affiliated charges. Those concerns include lack of support concerning reasonableness and necessity of

affiliated charges; possible duplication of services among affiliates; lack of support for the allocation method regarding the equitable cost distribution among affiliates; allocation method employed by parent under-allocates costs to non-regulated business; appearance of a discrepancy between the allocation method described in the MFRs compared to how the allocations actually occur and lack of supporting documentation verifying allocations of administrative and general and customer expenses from FCWC to its various divisions. With respect to the last point, Ms. Dismukes stated that it was not possible to verify the allocation methodology described, nor to determine if the application was correct, since the supporting documentation was not provided as part of the MFRs. This matter is discussed in greater detail later in this Order.

Based on the foregoing arguments, OPC argues that 10 percent of the utility's administrative and general and customer accounting expense should be disallowed. This results in a decrease in test year expenses of $33,164 and $35,212 for water and wastewater, respectively.

Mr. Dyer testified that FCWC's method of allocation has little reality to the services performed, and that reliability of the allocated costs are further diluted by expenses that are charged directly to FCWC. Mr. Dyer testified that the only solution is to require labor and material costs charged directly to the division in which the costs are incurred. Further, Mr. Dyer argues in his brief that the Commission should review and revise the utility's allocation methods in order for expenses to more closely match the operations at Barefoot Bay.

In support of the reasonableness of the utility's allocations between and among its affiliates, Utility witness Coel presented the FPSC Staff Audit Report regarding FCWC's affiliated transactions. The opinion provided in the audit report described the utility's affiliate transactions as reasonable and appropriately allocated. However, OPC asserts that the audit report did not address most of the concerns raised by Ms. Dismukes. Further, on cross-examination, Staff witness Clepper was unable to verify that the allocated charges from Avatar Holdings, Inc. were devoid of any disallowable expenses, such as lobbying, dues, or donations. Likewise, Mr. Clepper could not verify if any legal expenses were included in the charges from Avatar Holdings, Inc., or the nature of any such charges if included. Similarly, he was

unable to substantiate the method used by the utility's administrative staff to estimate the time spent on the various affiliates of the utility.

As additional support for it's position, FCWC cites in its brief, Order No. PSC-93-1288-FOF-SU, in Docket No. 920808-SU. In that order, we determined that "it is inappropriate to make a reduction when the record does not support an argument that any specific charge is unreasonable. Therefore, we find that no adjustment shall be made to the allocation of transactions with affiliated companies." The utility further argues that the requested divisional allocated expenses, as documented in the MFRs are consistent with FCWC's allocation methodology, as previously accepted by us. In addition, Ms. Dismukes' proposed adjustment to arbitrarily disallow 10 percent of affiliate expenses opposes the Supreme Court's holding in GTE Florida Incorporated v. Deason, 642 So.2d 545 (1994), as follows:

> The mere fact that a utility is doing business with an affiliate does not mean that unfair or excess profits are being generated, without more . . . We believe the standard must be whether the transactions exceed the going market rate or are otherwise inherently unfair. (at 547-548)

Although Ms. Dismukes provided no documentation in support of her proposed disallowance of certain affiliate expenses, we find that it is the burden of the utility to prove that these charges are reasonable and necessary. We find that the documentation supplied by the utility in this case supports that the expenses are being incurred and paid. Additionally, the utility provided a portion of the Staff Audit Report, which states that FCWC's affiliated transactions are reasonable and appropriately allocated. Furthermore, we find that the record does not show that the amount of affiliated charges to this division are excessive. Therefore, we find that FCWC's affiliated transactions are reasonable and warrant no adjustment.

Salary Increases

Test year water and wastewater O&M expenses include annualizing adjustments to reflect a five percent wage increase for 1995. These annualized salary increases became effective January 1, 1995.

Intervenor witness Dyer testified that there is a discrepancy between salaries actually paid to employees and salary increases reflected in the utility's requested revenue requirement. Mr. Dyer cited a portion of the utility's MFRs, which includes a copy of the audit report from Ernst and Young, and the audited financial statements, dated December 31, 1994. Within this audit report, it is indicated that the utility paid salary increases of five percent in 1994 and six percent in 1993 and 1992. Further, Mr. Dyer stated that the MFRs indicate that the utility is annualizing salary increases of five percent for the projected test year June 30, 1996. According to Mr. Dyer, this conflicts with information on salary increases reported in a letter dated February 2, 1996, to Senator Patsy Ann Kurth by Paul H. Bradtmiller, Executive Vice President and Chief Operating Officer of FCWC. Mr. Dyer quoted from Mr. Bradtmiller's letter, that "the average wage increases, including cost of living and merit increases, for the year 1992 to 1996 have been 3.25 percent, 4.5 percent, 4.5 percent, 4.5 percent and 3.5 percent, respectively." The concern that Mr. Dyer expressed is that if we approve FCWC's requested salary increases, but some lesser amount is actually paid to the employees, the customers will be charged for an expense that the utility will never incur.

Regarding Mr. Dyer's testimony on the historical salary increases, Utility witness Mr. Coel stated that the source in the MFRs, referred to by Mr. Dyer, is a footnote to the 1994 financial statements regarding the utility's pension plan. The salary increases reported as five percent in 1994 and six percent in 1993 and 1992, were actuarial assumptions for salary and promotion increases, used to determine the annual pension expense. The percentage increases were used only for the actuarial study, as opposed to being the actual paid salary increases, as Mr. Dyer testified.

Witness Coel testified that a critical part of the Bradtmiller letter omitted from Mr. Dyer's testimony stated, "Any other increases are related to promotion, or in the case of plant operators, to higher grades based upon advancements in operator certifications." Mr. Coel testified that a five percent increase in salaries was determined to be a reasonable estimate for purposes of preparing the MFRs. Further, Mr. Coel stated that since the time of filing, the utility has determined the actual average wage increase for 1996 to be 3.5 percent; however, promotions and advancements are not included in this percentage.

Although not distinctly identified in this issue, Mr. Dyer addressed an additional concern that labor costs for FCWC had risen 70.5 percent, as opposed to an increase of 18.77 percent in the cost of living allowance (COLA) during the same time period. Mr. Dyer stated that since the service area is essentially built-out, it would seem this division's costs should have stabilized. Lastly, Mr. Dyer testified that it is unclear what benefit accrues to the customers of FCWC from the additional layer of staffing caused by the dissolution of Consolidated Water Services, Inc. (CWS). Mr. Dyer argues that the costs associated with these additional employees and officers should be disallowed until the utility can explain and demonstrate what benefits, if any, accrue from this action.

In response, Utility witness Murphy testified that he was unaware of how Mr. Dyer arrived at the 70.5 percent figure. However, Mr. Murphy offered some explanation of the two primary reasons that wastewater labor costs have increased. First, the upgrade of the wastewater plant to AWT standards required two additional employees, included in the MFRs at average annual wages of $25,000 each. Second, within the past two years, two consolidations have occurred at FCWC resulting in the reclassification of labor costs from contract services to salaries. As a result of the consolidation of CWS, labor costs associated with finance, accounting, and rate staff, previously recorded as contractual services other in the last wastewater rate proceeding are now recorded in salaries expense. Additionally, the labor costs associated with some executive and administrative positions of Avatar Utilities, Inc., previously recorded as contractual services management fees, have also been shifted to FCWC salaries.

After reviewing Mr. Dyer's testimony, as well as arguments provided in his brief, it appears that the 70.50 percent increase in labor costs was calculated as the increase from the test year in Docket No. 910976-WS to the test year in the current rate proceeding. It also appears that Mr. Dyer's comparison reflects the combined balances for both water and wastewater for the employee salary accounts, associated payroll accounts, and the contractual services accounts for engineering, accounting, legal, management fees, and other. In his brief, Mr. Dyer uses this percentage as a comparison to the COLA index to demonstrate that labor costs have increased excessively since the last rate proceeding. We find this comparison is inappropriate in that by including all of these accounts and adding together water and wastewater, the percentage calculated is distorted when comparing

to a cost of living index. Additionally, in support of the argument in his brief, Mr. Dyer cited information which was not presented as evidence in the record, and thus we will not rely on it.

Although its position on this issue is that we should not accept the utility's requested salary increase, OPC did not provide any evidence at the hearing, nor address this issue in its brief. Based on the foregoing, we find that FCWC met its burden of proof that a five percent salary increase is reasonable.

Test Year Operating Income

Based on the adjustments discussed herein, we find the appropriate test year operating income before any provision for increased revenues is $26,309 for water and negative $76,808 for wastewater.

REVENUE REQUIREMENT

Based upon our consideration of rate base, cost of capital, operating income and our adjustments discussed herein, we find that the appropriate annual revenue requirements for FCWC are $912,061 and $1,915,176 for water and wastewater, respectively.

Allocation of Wastewater Revenue Requirement

FCWC witness Allen testified that one of the most important fundamentals of rate making is that the costs of providing service are recovered from the cost causer. Recognizing that reuse is a source of water as well as a method of effluent disposal, we believe that this method of allocating the revenues is changing. Accordingly, we must determine whether it is appropriate to allocate any portion of the wastewater revenue requirement to the water customers. FCWC argues that no portion of the wastewater revenue requirement should be allocated to the water customers. OPC did not address this issue. In his brief, Mr. Dyer argues that revenue should be related to true cost, and mixing revenues will dilute the real costs without providing any savings. We will discuss these arguments further, however, we find that, first, a brief discussion regarding Section 367.0817, Florida Statutes, is warranted.

Background

In 1994, the Legislature enacted Section 367.0817, Florida Statutes. This section of Chapter 367 authorizes the Commission to allocate the costs of providing reuse among any combination of the utility's customer base. Specifically, Section 367.0817(3), Florida Statutes, states:

> All prudent costs of a reuse project shall be recovered in rates. The Legislature finds that reuse benefits water, wastewater and reuse customers. The commission shall allow a utility to recover the costs of a reuse project from the utility's water, wastewater, or reuse customers or any combination thereof as deemed appropriate by the commission.

As discussed above, this section authorizes a new method of allocating a utility's revenue requirement among its customers. Although we have addressed this issue in other proceedings, we have never applied this section of the statute.

Determining how much of the wastewater revenue requirement should be allocated to the water customers is difficult given the discretionary nature of Section 367.0817, Florida Statutes. Although the Legislature acknowledges that reuse benefits water, wastewater and reuse customers, there is no guidance in the statute as to how to measure these benefits. In addition, the Legislature does not state when it is appropriate to undertake such an allocation or how much should be allocated. These decisions are left solely to our discretion.

Mr. Dyer testified that keeping the operations separate is vital to identifying the true costs. We agree that the traditional method of allocating a revenue requirement is that the costs of providing service are recovered from the cost causer. However, as stated above, reuse is changing this method of revenue recovery and this has been recognized by the Legislature.

FCWC is strongly opposed to allocating any of the wastewater revenue requirement to the water customers. In its brief, FCWC argues that the proposal outlined by witness Chase should not be adopted in this proceeding, because there has been no demonstration that reuse benefits the water customers of Barefoot Bay. The utility states that revenue should be allocated from the wastewater

customers to the water customers only when reuse provides a specific benefit to the water customers. The utility admits that there may be some theoretical benefit to the water customers as a result of reuse, however, in this case, reuse has been shown as the only feasible and prudent means of disposal of treated wastewater effluent. Therefore, according to the utility, the reclaimed water produced is merely a byproduct of the wastewater treatment process, and any revenue derived from the disposal of this byproduct should accrue to the wastewater customers' benefit.

In its brief, the utility also argues that Section 367.0817, Florida Statutes, does not provide us with unlimited authority to allocate reuse costs among water, wastewater and reuse customers, absent a legitimate showing of a benefit to the affected customer class. We agree that there needs to be a benefit in order for the statute to be implemented. However, the Legislature has stated in Section 367.0817, Florida Statutes, that reuse benefits water customers. The benefits to Barefoot Bay's customers are described below.

Staff witness Chase testified to the implications of allocating a portion of the revenue requirement associated with reuse to the water customers. Since this is a new issue, the method of quantifying the benefits to the water customers is evolving, but it is possible to quantify the benefits. A good starting point in quantifying the benefits is determining whether there are any perceived benefits. If there are, witness Chase testified that one should attempt to quantify these benefits as accurately as possible. For instance, in cases where additional costs are incurred to implement reuse over some other environmentally acceptable means of effluent disposal, the water customers should be responsible for these additional costs. In this case, we have recognized the benefits to the water customers by allocating a portion of the revenue requirement associated with the AWT to the water customers, since there was an environmentally acceptable alternative. We will discuss this methodology later in this Order.

Benefits to Water Customers

Reuse was first implemented at Barefoot Bay in 1989. The current reuse plan consists of three reuse sites: the Barefoot Bay Golf Course; a sprayfield; and the H&S groves. The Barefoot Bay Golf Course will receive treated effluent pursuant to an agreement

dated May 25, 1994. The sprayfield is owned by FCWC. As of the hearing in this docket, closing had not occurred on the purchase of the H&S groves.

The utility's argument against shifting reuse revenue is based on the fact there has not been a demonstration that reuse benefits the water customers at Barefoot Bay. However, even though these benefits might not be observable or measurable, we find there is evidence that they exist. We find there are perceived benefits. First, as testified by Staff witness Chase, reuse provides a greater benefit to water users in areas where water quality of supply concerns have been identified. The Barefoot Bay Division is located in SJRWMD. The entire area of the district has been designated as a water conservation area in order to provide for greater availability of reclaimed water district wide and to conserve available water resources. Accordingly, the water in this area requires careful management.

As stated by Staff witness Burklew, a hydrologist employed by SJRWMD, benefits of reuse inure to the water customers of Barefoot Bay through the conservation and protection of the water resources. Resource conservation and protection are goals of SJRWMD. Reuse at FCWC meets these goals by decreasing local groundwater use, reducing fresh water flows to the Indian River Lagoon and eliminating nitrate and phosphorous loading to the Lagoon. We find that reuse also poses less of a threat to the underground sources than an injection well. In fact, Utility witness Allen testified that a leaking injection well was probably the greatest threat to underground sources of drinking water. Witness Allen acknowledged that reducing the agricultural demand on the aquifer could potentially be a benefit to the water customers, albeit a perceived benefit.

As stated earlier, in 1988, FCWC was required to pursue options which would result in the elimination of discharges to surface water bodies. The only options available were an injection well and reuse. FCWC originally chose the injection well because it was found to be the most economical method of effluent disposal and this was the method decided on in the Consent Order. Public access reuse was eventually chosen as the method of effluent disposal.

In its brief, the utility argues that the record is clear that the injection well was ultimately found not to be a viable option and this is the reason why no revenue should be shifted from the

wastewater customers to the water customers. We agree that there is evidence which shows that the injection well was not environmentally acceptable. Although the DEP approved the permit for the injection well, it expressed concerns regarding injection wells in Brevard County. The SJRWMD opposed injection wells as a method of effluent disposal because of the risks of groundwater pollution and the loss of reusable water. Accordingly, a permit was not approved by SJRWMD. Instead, the decision regarding the permit was deferred so that the utility could pursue the reuse option on the Micco Tract. FCWC's plan was to purchase the Micco Tract for use as a land application site. When the Consent Order was amended, FCWC was directed by DEP to construct and operate a land application effluent disposal site on the Micco Tract. The purchase of the site never occurred, however, because of permit challenges.

We find that disposal of treated effluent on the Micco Tract remained an environmentally acceptable alternative for the purposes of revenue allocation pursuant to Section 367.0817, Florida Statutes. Unlike the injection well alternative, SJRWMD strongly endorsed the sprayfield alternative. The administrative process prevented FCWC from implementing this option. The record is clear that the reason that the Micco Tract option did not come to fruition was because of the permit challenges. Despite these challenges, however, the permit was issued by the DEP and has not yet expired. The record shows that if the appeal of the permits by the Brevard Groves and the H&S groves had not occurred, FCWC would have continued with the acquisition of the Micco Tract. This fact was acknowledged under cross-examination of Ms. Blizzard. The appeals occurred, however, and FCWC began exploring new options for reuse while continuing the appeals process. These investigations and the concerns regarding the length of the appeal process resulted in the SACO.

The SACO was issued after the decision in the appeal. Under the terms of the SACO, FCWC was required to complete elimination of discharge to the canal and to obtain a permit to upgrade the wastewater treatment plan to advanced waste treatment. Although the decision in the appeal granted FCWC the permit to construct an effluent disposal system on the Micco Tract, the utility opted to go forward with the plant upgrades required by the SACO. What prevented FCWC from going forward with the Micco Tract option was that it would not have met the schedule set out by the Amended Consent Order.

Revenue Allocation

We find that there are benefits of reuse to the water customers of Barefoot Bay and these benefits must be recognized in the water rates. Witness Chase testified that the level of the water rates, the magnitude of the wastewater revenue increase, the average usage of the customer and the need to send a stronger price signal to achieve water conservation should be considered when determining whether and how much of the reuse costs to allocate to the customers. We agree. In this case, the wastewater revenue increase is significantly higher than the water increase. Shifting a high percentage of the wastewater revenues to the water customers will have a great impact on the water rates. In addition, the average usage of the customer is 2,909 gallons. Therefore, a conservation signal is not needed in this case.

For these reasons, we find it appropriate to allocate $16,130 of the wastewater revenue requirement to the water customers of Barefoot Bay. Therefore, we find it appropriate to allocate five percent of the difference between the wastewater revenue requirement associated with the AWT and the estimated wastewater revenue requirement associated with the Micco Tract to the water customers. This equates to approximately .8 percent of the wastewater revenue requirement. We believe this is an appropriate amount because as we have noted, usage in this area is not significant and a conservation signal is not needed. To allocate more would result in an unnecessarily high water gallonage rate that would penalize customers already conserving.

We find it appropriate to collect the portion of the revenue requirement allocated to the water customers through the water gallonage charge at a rate of $.10 per 1,000 gallons. For annual reporting purposes, the revenue collected as a result of the shift shall be recorded as a separate line item under Miscellaneous Revenue. This will allow the utility to remove the revenue from water revenue before calculating the achieved rate of return for overearnings purposes. In addition, the utility will have the ability to add the revenue to the wastewater revenue before calculating the achieved rate of return on the wastewater system. This will aid the utility in maintaining a proper balance between plant costs and revenues.

We note that the utility has suggested that an investigation into the appropriate criteria for an allocation be initiated. Although we do not believe that a docket for such an investigation

needs to be established, we do find that an informal investigation as to the method of allocation may be warranted. Until we are able to establish firm criteria, we find that it more appropriate for this issue to be handled on a case by case basis.

RATES AND RATE STRUCTURE

Revenue Allocation Between Base Facility and Gallonage Charges

Under the current rate structure, approximately 56 percent of FCWC's water revenue is collected through the base facility charge while the remaining 44 percent is collected through the gallonage charge. For wastewater, approximately 48 percent is collected from the base facility charge leaving 52 percent to be collected from the gallonage charge. The utility is proposing to collect 64 percent of the water revenue through the base facility charge and 36 percent through the gallonage charge. For wastewater, the utility is requesting to collect 78 percent of the wastewater revenue through the base facility charge and 22 percent through the gallonage charge. FCWC's witness Coel stated that the proposed shift to allocate more expenses to the base facility charge is for revenue stability. OPC's witness Dismukes stated that this shift in revenue, where more of the revenue requirement is collected though the base facility charge, places a greater risk of revenue collection on customers.

We have traditionally allocated fixed costs to the base facility charge and variable costs to the gallonage charge. We find this method most appropriate in determining the proper rate structure. Furthermore, when establishing the rate structure, we must also consider the effects on conservation and the previous allocation from prior rate cases to assure continuity in rates.

In recent years, the effects of conservation have shifted more revenue collection through the gallonage charge to allow the customer a greater incentive for conservation. This type of conservation shift in the revenue allocation allows customers more control over their water and wastewater bill. However, whenever more revenue is collected through the gallonage charge, it creates more uncertainty for the utility in collecting its revenue requirement. In other words, when more revenue is collected through the gallonage charge, everything that affects consumption will also affect the utility's amount of revenue collected. When the shift in revenue allocation goes more towards the base facility charge, which promotes revenue stability for the utility, we become

concerned that it will promote water usage. As discussed earlier, it appears that residents of Barefoot Bay have conserved a great deal over the past years. To jeopardize conservation by this type of allocation would be unfair.

In this case, the utility is proposing to allocate 100 percent of its return on rate base through the base facility charge for both water and wastewater. In theory, this would guarantee the utility a return on its rate base. We find a 50 percent split for the return on rate base between the base facility charge and gallonage charge for both the water and wastewater operations more appropriate. This will allow the utility an opportunity to earn a return on its rate base while offering an incentive to its customers to conserve water.

Based on this adjustment and the effects it could have on conservation, we find it appropriate to allocate 58 percent of the revenue to the base facility charge and 42 percent to the gallonage charge for water. This will essentially maintain the current revenue allocation for water. For wastewater, we find that allocation of 62 percent of the revenue to the base facility charge and 38 percent to the gallonage charge is appropriate.

Reuse Rate

The Barefoot Bay Golf Course is the only source of reuse revenue for Barefoot Bay. The utility believes that the appropriate rate for reuse is $.13/1,000 gallons. OPC believes that the appropriate rate is $.21/1,000 gallons. For the reasons stated below, we find that a rate of $.13/1,000 gallons is appropriate. We have not attempted to calculate a cost of service based rate because it does not appear to be reasonable in this case.

FCWC argues in its brief that the rate should be $.13/1,000 gallons, because the agreement between the golf course and the utility establishes that rate. In addition, the agreement provides a buyout clause. Further, the utility argues that there is little promise in marketing reclaimed water for FCWC. This is because SJRWMD is unwilling to withhold the renewal of groundwater withdrawal permits for agricultural irrigation unless certain conditions are met.

According to OPC's brief, FCWC's reuse feasibility study indicates that a rate of $.13/1,000 gallons was consistent with the

charge of another FCWC system. Since FCWC based the rate to the golf course on the rate charged by other systems, and we recently approved the rate of $.21/1,000 gallons for other systems, OPC argues that it is appropriate to use a higher rate.

There are three elements which we find must be considered in determining the appropriate reuse rate. The first element is that the golf course has the ability to buyout of the contract and, if it should do this, it has other options for securing its source of water.

The second element is whether FCWC could secure another customer should the golf course elect to buy out of the contract. We do not find that FCWC could secure another customer. The golf course and neighboring citrus farmers are the only potential users at present. FCWC attempted to encourage the citrus farmers to use the reclaimed water. However, it was unsuccessful.

The third element is the negotiated contract. Even though the contract clearly states that the rate is subject to the approval of this Commission, it does indicate that the golf course agreed on a rate of $.13/1,000 gallons.

As stated earlier, we find that reuse provides a beneficial source of water. Because the golf course has another source of water for irrigation, setting the rate for reuse higher than what was agreed upon could discourage the sale of reclaimed water to the golf course. Because the golf course is located within a water conservation area, we find that this would be sending an improper signal. Therefore, based on the foregoing, we find that a reuse rate of $.13/1,000 gallons is appropriate.

Rate Summary

The permanent rates requested by the utility are designed to produce annual revenues of $916,723 for the water service and $2,110,481 for the wastewater service. The requested revenues represent an increase of $153,136, or 20.05 percent, for water service and $1,273,024, or 156.21 percent, for wastewater service.

The final rates approved for the utility are designed to produce revenues of $924,076 for the water service, which is an increase of $134,188, or 16.99 percent, and $1,889,047 for the wastewater service, which is an increase of $999,827, or 112.43

percent. These approved rates exclude miscellaneous service revenues and are designed using the base facility charge rate structure.

Consistent with the utility's request, we find that a 20 percent differential between the residential and general service wastewater gallonage charges is appropriate. The purpose of the 20 percent differential is to recognize that approximately 20 percent of the water used by residential customers is used for purposes such as irrigation and is not collected by the wastewater systems.

The utility has also requested to charge $10.00 for a premise visit after business hours. This charge would be levied when a service representative visits a premises for the purpose of discontinuing service after hours for nonpayment of a due and collectible bill and does not discontinue service, because the customer pays the service representative or otherwise makes satisfactory arrangements to pay the bill. Currently, the utility collects $10.00 for a premise visit during business hours but does not have a charge for a premise visit after business hours. We find it appropriate that the utility collect this charge.

A comparison of the utility's original rates, interim rates, requested rates and our final approved rates are set forth on Schedules Nos. 4-A and 4-B for water and wastewater, respectively.

EFFECTIVE DATE

The utility shall file revised tariff sheets and a proposed customer notice to reflect the appropriate rates pursuant to Rule 25-22.0407(10), Florida Administrative Code. The approved rates shall be effective for service rendered on or after the stamped approval date on the tariff sheets pursuant to Rule 25-30.475(1), Florida Administrative Code, provided the customers have received notice. The rates shall not be implemented until proper notice has been received by the customers. The utility shall provide proof of the date notice was given within 10 days after the date of the notice.

STATUTORY FOUR-YEAR RATE REDUCTION

Section 367.0816, Florida Statutes, requires that the rates be reduced immediately following the expiration of the four year period by the amount of rate case expense previously authorized in the rates. The reduction will reflect the removal of revenues

associated with the amortization of rate case expense and the gross-up for regulatory assessment fees which is $17,071 for water and $22,813 for wastewater. The removal of rate case expense will result in the reduction of rates as reflected on Schedules Nos. 5-A and 5-B for water and wastewater, respectively.

The utility shall file revised tariffs no later than one month prior to the actual date of the required rate reduction. The utility also shall file proposed customer notices setting forth the lower rates and reason for the reductions.

If the utility files this reduction in conjunction with a price index or pass-through rate adjustment, separate data shall be filed for the price index and/or pass-through increase or decrease, and for the reduction in the rates due to the removal of amortized rate case expense.

REFUND OF INTERIM REVENUES

By Order No. PSC-96-0119-FOF-WS, issued on January 23, 1996, we suspended the utility's proposed rates and approved interim water and wastewater rates subject to refund, pursuant to Sections 367.082, Florida Statutes. According to Section 367.082, Florida Statutes, any refund should be calculated to reduce the rate of return of the utility during the pendency of the proceeding to the same level within the range of the newly authorized rate of return. Adjustments made in the rate case test period that do not relate to the period interim rates are in effect should be removed. Examples of these adjustments would be an attrition allowance or rate case expense, which are recovered only after final rates are established.

In this proceeding, the test period for establishment of interim rates was the historical twelve months ended June 30, 1995. The approved interim rates did not include any provisions for proforma consideration of increased operating expenses or increased plant. The interim increase was designed to allow recovery of actual interest costs, and the floor of the last authorized range for equity earnings.

To establish the proper refund amount, we have calculated a revised interim revenue requirement utilizing the same data used to establish final rates. Rate case expense was excluded because it was not an actual expense during the interim collection period.

Using the principles discussed above, we have calculated the revenue requirement for the interim collection period to be $896,469 for water and $1,927,962 for wastewater. These revenue levels exceed the interim revenues which were granted in Order No. PSC-96-0119-FOF-WS. Therefore, no refund of interim revenues is required.

REFUND OF WASTEWATER REVENUES

As discussed earlier, subsequent to our final decision in this docket, but before the Order had been issued, our staff submitted a revised recommendation to correct a miscalculation regarding the used and useful percentage of FCWC's wastewater treatment plant prior to AWT. The recommendation included revised wastewater rates resulting from the corrected used and useful calculation. We considered this recommendation at the August 13, 1996 Agenda Conference, and our decision is reflected in the body of this Order.

On August 6, 1996, pursuant to Section 367.081(6), Florida Statutes, the utility implemented, subject to refund, the rates we originally approved prior to the corrected used and useful percentage. The implemented wastewater rates are higher than the wastewater rates approved herein. Therefore, the utility shall refund with interest, calculated pursuant to Rule 25-30.360(4), Florida Administrative Code, the additional wastewater revenues collected from these rates until the approved rates are implemented. FCWC shall make the refund to the customers of record as of the date of this Order, pursuant to Rule 25-30.360(3), Florida Administrative Code. FCWC shall submit the proper refund reports pursuant to Rule 25-30.360(7), Florida Statutes. FCWC shall treat any unclaimed refunds as CIAC pursuant to Rule 25-30.360(8), Florida Statutes. The utility's corporate undertaking shall be released upon staff's verification that the refund has been completed.

The utility shall file revised tariff sheets and a proposed customer notice reflecting the appropriate rates and the reason for the reduction. The approved rates shall be effective for service rendered on or after the stamped approval date on the tariff sheets pursuant to Rule 25-30.475(1), Florida Administrative Code, provided the customers have received notice. The rates may not be implemented until proper notice has been received by the customers. The utility shall provide proof of the date notice was given within 10 days after the date of the notice.

PRIOR STATUTORY FOUR-YEAR RATE REDUCTION

Section 367.0816, Florida Statutes, requires that the rates be reduced immediately following the expiration of the four year period by the amount of rate case expense previously authorized in the rates. The rate reduction required by Order No. PSC-92-0563-FOF-WS was scheduled for July 26, 1996, and would reflect the removal of revenues associated with the amortization of rate case expense and the gross-up for regulatory assessment fees from Docket No. 910976-WS. The total amount of this reduction on an annual basis is $6,618 for both the water and wastewater rates.

FCWC's witness Coel testified that it would be efficient and cost effective and would reduce customer confusion if the scheduled rate reduction could be netted against the pending rate case. This would result in one set of tariff changes, one customer notice and mailing. We find that netting the rate reduction with the pending rate case creates a cost savings. Therefore, the rate reduction required by Order No. PSC-92-0563-FOF-WS, is reflected in the approved rates in this docket.

MINIMUM FILING REQUIREMENTS

FCWC is an affiliate in a group of related companies, some of which charge or allocate costs to the utility for the provision of management and administrative services. FCWC allocates administrative and general expenses and customer billing and customer accounting expenses to each of its operating divisions. Avatar Utility Services, Inc. charges for data processing services directly to the utility. Avatar Utilities, Inc. provides management services to the utility. Avatar Holdings, Inc. charges Avatar Utilities, Inc. for certain management fees, which subsequently get allocated down to the utility.

OPC witness Dismukes testified that FCWC has failed to follow Rule 25-30.436(h), Florida Administrative Code, in that the utility did not provide in the MFRs, workpapers supporting some of its allocations described above. The rule states that the following should be provided as part of a utility's application when it files for a rate increase:

> (h) Any system that has costs allocated or charged to it from a parent, affiliate or related party, in addition to those costs

> reported on Schedule B-12 ... shall file three copies of additional schedules that show the following information:
>
> 1. The total costs being allocated or charged prior to any allocation or charging as well as the name of the entity from which the costs are being allocated or charged and its relationship to the utility.
> 2. For costs allocated or charged to the utility in excess of one percent of test year revenues:
> a. A detailed description and itemization;
> b. the amount of each itemized cost.
> 3. The allocation or direct charging method used and the bases for using that method.
> 4. The workpapers used to develop the allocation method, including but not limited to the numerator and denominator of each allocation factor.
> 5. The workpapers used to develop, where applicable, the basis for the direct charging method.
> 6. An organizational chart of the relationship between the utility and its parent and affiliated companies and the relationship of any related parties.
> 7. A copy of any contracts or agreements between the utility and its parent or affiliated companies for services rendered between or among them.

Ms. Dismukes testified that the utility provided all the required information with respect to Avatar Utilities, Inc., as well as the information required in parts 6 and 7 for all other affiliates. However, Ms. Dismukes testified that the utility did not provide any of the information required in parts 1, 3, 4, or 5, with respect to the costs allocated from Avatar Holdings, Inc. Likewise, the utility did not provide the information required in parts 1, 2, 3, 5, and a portion of part 4, with respect to the allocations from FCWC. Ms. Dismukes also stated that in the MFRs, regarding the allocations from FCWC, the utility stated: "Due to the voluminous number of allocations made, schedules showing the

computation of allocation percentages for all expenses allocated are available for inspection at the utility's office in Sarasota Florida." In its brief, OPC argues that if the information was available for inspection, it could not have been part of the MFRs.

In response to Ms. Dismukes contentions, Utility witness Coel testified as follows:

> Included on page 63 of the MFRs, FCWC provided the basis for its divisional allocations. This schedule has been included in all recent FCWC rate cases and has been subject to review at FCWC's General Office in Sarasota. This allocation method has been accepted by the PSC, since the PSC has not made any adjustments in its recent FCWC rate orders to counter this methodology.

Mr. Coel further testified that the PSC confirmed that the MFRs were complete as filed, as of the filing date, November 6, 1995. On cross-examination by OPC, Mr. Coel maintained that the utility complied with the rule with respect to the utility's allocations.

In its brief, FCWC professed that since the MFRs were filed, OPC made no effort to obtain additional information on this issue. We find that Ms. Dismukes is correct in that the utility did not comply with the rule regarding affiliate allocations. The utility's argument that the MFRs have been compiled similarly in all recent FCWC rate cases does not lend any greater weight to whether the information was complete or not. Regardless of whether OPC requested the information, the burden of proof rests on the utility to demonstrate the reasonableness of its affiliate charges. Since the utility did not request a waiver of the rule, FCWC was obligated to provide the information as part of its rate case application. Strict compliance with the rule requires that the utility actually file the requisite information, as opposed to declaring that it is available at the utility's office for inspection. Therefore, the utility shall be required to comply with the rule in all future rate case proceedings.

COMMISSION DISCRETION IN SETTING HEARING

Rule 25-22.036(9)(a), Florida Administrative Code, states:

> Where an application, petition, or complaint has been filed, and Commission action has not yet been proposed, the Commission may: 1) Deny the petition if it does not adequately state a substantial interest in the Commission determination or if it is untimely. 2) Issue notice of proposed agency action where a rule or statute does not mandate a hearing as a matter of course, and after the time for responsive pleadings has passed; 3) Set the matter for hearing before the Commission, or member thereof, or request that a hearing officer from the Division of Administrative Hearings be assigned to conduct the hearing. The assignment of a matter for hearing shall be pursuant to Rule 25-22.0355. 4) Dispose of the matter as provided in §120.57(2).

Section 367.081(8), Florida Statutes, provides that a utility may specifically request the Commission to process its petition for rate relief using the Commission's PAA procedure.

We find that when read together, the rule and statute provide that the utility may request a PAA proceeding, and, in the absence of such a request, the discretion to opt between the PAA or hearing procedures resides with the Commission. FCWC did not request that this case be processed as a PAA. Therefore, it was within our discretion to opt for either PAA or proceed directly to hearing.

Based on the foregoing, it is

ORDERED by the Florida Public Service Commission that the Office of Public Counsel's Motion to Strike is hereby granted. It is further

ORDERED that Florida Cities Water Company, Barefoot Bay Division's application for increased water and wastewater rates is approved to the extent set forth in the body of this Order. It is further

ORDERED that each of the findings made in the body of this Order is hereby approved in every respect. It is further

ORDERED that all matters contained in the schedules attached hereto are by reference incorporated herein. It is further

ORDERED that Florida Cities Water Company, Barefoot Bay Division, shall be granted thirty days from the date of this Order to file the amount of the grant from the St. Johns River Water Management District. It is further

ORDERED that the rates approved herein shall be effective for service rendered on or after the stamped approval date on the revised tariff sheets, pursuant to Rule 25-30.475, Florida Administrative Code, provided the customers have received notice. It is further

ORDERED that prior to its implementation of the rates approved herein, Florida Cities Water Company, Barefoot Bay Division shall submit and have approved a proposed customer notice to its customers of the increased rates and reasons therefore. The notice will be approved upon staff's verification that it is consistent with our decision herein. It is further

ORDERED that Florida Cities Water Company, Barefoot Bay Division shall provide proof that the customers have received notice within 10 days of the date of notice. It is further

ORDERED that prior to its implementation of the rates approved herein, Florida Cities Water Company, Barefoot Bay Division shall submit and have approved revised tariff pages. The revised tariff pages will be approved upon staff's verification that the pages are consistent with our decision herein and that the proposed customer notice is adequate. It is further

ORDERED that for annual reporting purposes, Florida Cities Water Company, Barefoot Bay Division, shall record the revenue collected as a result of the allocation of reuse revenue to water customer, as a separate line item under Miscellaneous Revenue. It is further

ORDERED that Florida Cities Water Company, Barefoot Bay Division, shall refund with interest, calculated pursuant to Rule 25-30.360(4), Florida Administrative Code, the additional

wastewater revenues collected subject to refund as set forth in the body of this Order. It is further

ORDERED that Florida Cities Water Company, Barefoot Bay Division, shall make the refund to customers of record as of the date of this Order pursuant to Rule 25-30.360(3), Florida Administrative Code. Florida Cities Water Company, Barefoot Bay Division, shall submit the proper refund report reports pursuant to Rule 25-30.360(7), Florida Administrative Code. It is further

ORDERED that Florida Cities Water Company, Barefoot Bay Division, shall treat any unclaimed refunds as contributions-in-aid-of-construction pursuant to Rule 25-30.360(8), Florida Administrative Code. It is further

ORDERED that the rates shall be reduced at the end of the four-year rate case expense amortization period, consistent with our decision herein. Florida Cities Water Company, Barefoot Bay Division shall file revised tariff sheets no later than one month prior to the actual date of the reduction and shall file a customer notice. It is further

ORDERED that Florida Cities Water Company, Barefoot Bay Division, shall comply with the filing requirements of Rule 25-30.436, Florida Administrative Code, in all future rate case proceedings. It is further

ORDERED that the provisions of this Order relating to the imputation of contributions-in-aid-of-construction for the St. Johns River Water Management District grant to Florida Cities Water Company, Barefoot Bay Division, is issued as proposed agency action, shall become final and effective unless an appropriate petition, in the form provided by Rule 25-22.036, Florida Administrative Code, is received by the Director, Division of Records and Reporting, 2540 Shumard Oak Boulevard, Tallahassee, Florida 32399-0850, by the close of business on the date set forth in the "Notice of Further Proceedings or Judicial Review" attached hereto. It is further

ORDERED that this docket shall be closed if no timely protest is received from a substantially affected person, upon staff's verification the Florida Cities Water Company, Barefoot Bay Division has made the required refunds as set forth in this Order

and upon Florida Cities Water Company, Barefoot Bay Division's filing and staff's approval of revised tariff sheets and a customer notice. It is further

ORDERED that Florida Cities Water Company, Barefoot Bay Division's corporate undertaking shall be released upon staff's verification that the refund has been completed.

By ORDER of the Florida Public Service Commission, this 12th day of September, 1996.

BLANCA S. BAYÓ, Director
Division of Records and Reporting

(S E A L)

TV

NOTICE OF FURTHER PROCEEDINGS OR JUDICIAL REVIEW

The Florida Public Service Commission is required by Section 120.59(4), Florida Statutes, to notify parties of any administrative hearing or judicial review of Commission orders that is available under Sections 120.57 or 120.68, Florida Statutes, as well as the procedures and time limits that apply. This notice should not be construed to mean all requests for an administrative hearing or judicial review will be granted or result in the relief sought.

As identified in the body of this Order, our action regarding the imputation of contributions-in-aid-of-construction for the St. Johns River Water Management District Grant to Florida Cities Water Company, Barefoot Bay Division, is preliminary in nature and will not become effective or final, except as provided by Rule 25-22.029, Florida Administrative Code.

Any person whose substantial interests are affected by the action proposed by this order may file a petition for a formal proceeding, as provided by Rule 25-22.029(4), Florida Administrative Code, in the form provided by Rule 25-22.036(7)(a) and (f), Florida Administrative Code. This petition must be received by the Director, Division of Records and Reporting at 101 East Gaines Street, Tallahassee, Florida 32399-0870, by the close of business on September 26,1996 such a petition, this order shall become effective on the date subsequent to the above date as provided by Rule 25-22.029(6), Florida Administrative Code.

Any objection or protest filed in this docket before the issuance date of this order is considered abandoned unless it satisfies the foregoing conditions and is renewed within the specified protest period.

If the relevant portion of this order becomes final and effective on the date described above, any party adversely affected may request judicial review by the Florida Supreme Court in the case of an electric, gas or telephone utility or by the First District Court of Appeal in the case of a water or wastewater utility by filing a notice of appeal with the Director, Division of Records and Reporting and filing a copy of the notice of appeal and the filing fee with the appropriate court. This filing must be completed within thirty (30) days of the effective date of this order, pursuant to Rule 9.110, Florida Rules of Appellate Procedure. The notice of appeal must be in the form specified in Rule 9.900(a), Florida Rules of Appellate Procedure.

Any party adversely affected by the Commission's final action in this matter may request: (1) reconsideration of the decision by filing a motion for reconsideration with the Director, Division of Records and Reporting within fifteen (15) days of the issuance of this order in the form prescribed by Rule 25-22.060, Florida Administrative Code; or (2) judicial review by the Florida Supreme Court in the case of an electric, gas or telephone utility or the First District Court of Appeal in the case of a water or wastewater utility by filing a notice of appeal with the Director, Division of Records and Reporting and filing a copy of the notice of appeal and the filing fee with the appropriate court. This filing must be completed within thirty (30) days after the issuance of this order, pursuant to Rule 9.110, Florida Rules of Appellate Procedure. The notice of appeal must be in the form specified in Rule 9.900(a), Florida Rules of Appellate Procedure.

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

In Re: Application for a rate increase in Brevard County by Florida Cities Water Company (Barefoot Bay Division).	DOCKET NO. 951258-WS ORDER NO. PSC-97-0223-FOF-WS ISSUED: FEBRUARY 25, 1997

The following Commissioners participated in the disposition of this matter:

JULIA L. JOHNSON, Chairman
J. TERRY DEASON
JOE GARCIA

FINAL ORDER DENYING REQUEST FOR ORAL ARGUMENT AND GRANTING IN PART AND DENYING IN PART MOTIONS FOR RECONSIDERATION

BY THE COMMISSION:

BACKGROUND

Florida Cities Water Company, Barefoot Bay Division, (FCWC or utility) is a Class A utility providing water and wastewater service for a predominately residential area in Barefoot Bay, Florida. The utility was serving 4,458 water and 4,440 wastewater customers as of December 31, 1994. For the twelve months ended December 31, 1994, the utility recorded operating revenues of $671,582 for water service and $823,463 for wastewater service. The utility recorded a net operating loss of $73,769 for the water system and a net operating income of $77,577 for the wastewater system. The Barefoot Bay system is in an area that has been designated by the St. Johns River Water Management District (SJRWMD) as a critical water supply use caution area.

On November 6, 1995, the utility filed its application for approval of interim and permanent rate increases pursuant to Sections 367.082 and 367.081, Florida Statutes, respectively. The utility requested that this case be scheduled for a formal hearing and not processed pursuant to the proposed agency action (PAA) process as provided for in Section 367.081(8), Florida Statutes.

We held the technical hearing in Barefoot Bay, Florida, on April 1 and 2, 1996. By Final Order No. PSC-96-1147-FOF-WS, issued September 12, 1996, we approved increased rates for FCWC and issued a Notice of Proposed Agency Action imputing contributions-in-aid-of-construction for a grant from the St. Johns River Water Management District to FCWC.

On September 24, 1996, intervenor Clinton Dyer filed a motion for reconsideration of the final order. On September 27, 1996, the Office of Public Counsel (OPC) filed a motion for reconsideration on behalf of the Citizens of the State of Florida. On October 2, 1996, FCWC filed a Motion to Strike or Alternatively to Require Compliance with Rule Governing Motions for Reconsideration addressing Mr. Dyer's motion for reconsideration. On October 4, 1996, OPC filed a Citizen's Response to Motion to Strike. On October 9, 1996, FCWC timely filed a Response to Citizen's Motion for Reconsideration and Cross-Motion for Reconsideration, along with a request for oral argument on its response and cross-motion. On October 11, 1996, OPC filed a response to FCWC's cross-motion for reconsideration. By Order No. PSC-96-1456-FOF-WS, issued December 2, 1996, we granted FCWC's motion to strike Mr. Dyer's motion for reconsideration, based upon its failure to adhere to the requirements of Rule 25-22.060, Florida Administrative Code.

ORAL ARGUMENT

Rule 25-22.058(1), Florida Administrative Code, permits us to grant oral argument, provided, among other things, that the request states "with particularity why oral argument would aid the Commission in comprehending and evaluating the issues before it." FCWC's request for oral argument makes no such statement. Additionally, FCWC's response and cross-motion for reconsideration contain sufficient argument for us to render a fair and complete evaluation of the merits without oral argument. Therefore, FCWC's request for oral argument on its Response to Citizens' Motion for Reconsideration and Cross-Motion for Reconsideration is hereby denied.

RECONSIDERATION OF RATE BASE

The standard for determining whether reconsideration is appropriate is set forth in Diamond Cab Co. of Miami v. King, 146 So. 2d 889 (Fla. 1962). The purpose of a petition for rehearing is merely to bring to the attention of the trial court or the

administrative agency some point which it overlooked or failed to consider when it rendered its order in the first instance, and it is not intended as a procedure for rearguing the whole case merely because the losing party disagrees with the judgment. Id. at 891. We have applied the foregoing standard in our analysis of the parties' motions for reconsideration.

Margin Reserve

OPC argues that we erred in granting a margin reserve to the utility in calculating its wastewater treatment plant prior to advanced wastewater treatment (AWT) standards. OPC argues that at page 14 of Order No. PSC-96-1147-FOF-WS we state, " . . . , we do not find it appropriate to grant FCWC a margin reserve." However, OPC states that on Attachment B to the order, we included a margin reserve of 18,971 gallons per day (gpd). In its response to OPC, FCWC argues that the language in the text of our order did not accurately memorialize our vote to include a margin reserve. Further, in its Cross-Motion for Reconsideration, FCWC argues that if we denied margin reserve, we overlooked or failed to consider the evidence on the issue.

Staff's original recommendation was to grant 100% used and useful for the wastewater treatment plants. It is not our policy to grant a margin reserve when the plants are considered 100% used and useful. At the Agenda Conference held on June 25, 1996, we expressed concern regarding the hydraulic capacity versus permitted capacity of the plant. Due to that concern, we voted to reduce the used and useful percentage of the investment in the original wastewater treatment facility. This action resulted in the plant being considered less than 100% used and useful. Due to the reduction in the used and useful percentage, and since there is a small growth potential in the utility's certificated area, we included a margin reserve allocation.

As the utility correctly pointed out in its response to the Citizens' Motion for Reconsideration, the subject of margin reserve was never explicitly discussed. Since zero margin reserve was originally recommended, we failed to express the fact that a margin reserve had now been included, since, in the original recommendation, no margin reserve issue was included. The margin reserve calculation was, however, clearly shown on the used and useful calculation form (attachment B, revised), which was distributed to us for consideration at the agenda conference. We

adopted our staff's calculation. Therefore, we hereby clarify that we did grant FCWC a margin reserve.

Contributions In Aid of Construction (CIAC)

By Order No. PSC-96-1147-FOF-WS, we decided there should be no imputation of CIAC. However, we did, in fact, include a margin reserve in our used and useful calculation. Accordingly, we find it appropriate to reconsider our decision on whether CIAC should be imputed on the margin reserve factor.

In the utility's MFRs, CIAC has been imputed through the end of the projected test year, which is related to the customer growth rates used in its projection methodology for the current rate proceeding. FCWC did not impute CIAC associated with its margin reserve calculation. Utility Witness Young testified that the imputation of CIAC effectively undermines the utility's ability to earn a return on the necessary investment in plant required to meet its statutory responsibility of readiness to serve existing and future customers within a reasonable amount of time.

OPC Witness Dismukes testified that in order to achieve a proper matching, if a margin reserve is included in the used and useful calculations, then rate base should be adjusted to impute CIAC in an amount equivalent to the number of equivalent residential connections (ERCs) represented by the margin reserve factor.

While the utility believes that imputing CIAC on the margin reserve undermines the utility's ability to earn a fair return on plant constructed to meet statutory guidelines, the evidence does not support the utility's position that we should not impute CIAC associated with margin reserve. We agree with Ms. Dismukes' testimony that CIAC should be imputed in order to achieve proper matching of the CIAC collections made from those customers who will connect during the margin reserve period. This is consistent with our decisions in Orders Nos. 23660, 25092, and PSC-93-1113-FOF-WS, issued on October 24, 1990, September 23, 1991, and July 30, 1993, respectively. In determining the amount of CIAC to impute, we multiplied the number of ERCs included in the margin reserve by the appropriate service availability charge. The proper charge to use in this docket is the utility's proposed service availability charge of $1,400, since this represents the going forward charge that will be in effect during the margin reserve period.

However, in Orders Nos. PSC-96-1320-FOF-WS and PSC-96-1338-FOF-WS issued on October 30, 1996 and November 7, 1996, respectively, we imputed only 50% of the amount of CIAC attributed to the margin reserve. In these cases, we found that the total amount imputed would not be collected at the beginning of the margin reserve period, rather that it would be averaged over the life of such period. We find this application appropriate in the instant case, as well. However, as stated in the above-mentioned orders, the imputation shall still be limited to the amount of net plant included in the margin reserve.

Based on the foregoing, wastewater CIAC shall be increased by $22,969 to reflect the imputation of CIAC on the margin reserve. Corresponding adjustments shall also be made to increase both wastewater accumulated amortization of CIAC and test year CIAC amortization expense by $903.

Excessive Infiltration and Inflow (I&I)

Amount

At page 16 of Order No. PSC-96-1147-FOF-WS, we state that we used water sold in our calculation of excessive I&I. OPC argues, in its Motion for Reconsideration, that we incorrectly used the water pumped in lieu of water sold in the formula for I&I calculation. In its response to OPC, FCWC argues that unrefuted testimony supported the use of water pumped in calculating excessive I&I. FCWC also argues in its Cross-Motion for Reconsideration, that we incorrectly state in our order that we used water sold. Further, FCWC argues in its Cross-Motion for Reconsideration, that we incorrectly used the average daily flows, in the maximum month in place of the correct average annual daily flows, in the formula for I&I calculation, which resulted in 36.01% excess I&I.

We agree with OPC that we incorrectly used water pumped instead of water sold. We also agree with FCWC that we incorrectly used the maximum month instead of the average annual daily flows. Accordingly, we have recalculated I&I using the total water sold and average annual daily flows in place of the total water pumped and the average daily flows from the maximum month. The corrected I&I figures will result in changes to the wastewater used and useful percentages which are discussed later in this Order. Based on our calculations, I&I totals 148,013 gpd. The acceptable level

of I&I is 130,974 gpd to the plant, which results in excess I&I of 17,039 gpd.

FCWC's Method of Calculation

The utility argues, in its Cross-Motion for Reconsideration, that we should have calculated I&I by comparing the quantity of water pumped to the quantity of water treated. FCWC also argues that we applied the incorrect methodology to the calculation. FCWC basically argues that there is no "excessive" I&I. FCWC is rearguing this issue, which is inappropriate for reconsideration. See Diamond Cab at 891.

FCWC states in its motion that witness Young testified that infiltration is properly calculated on the basis of comparing the quantity of water pumped to the quantity of wastewater treated. This Commission uses one of two sources for returned flows in calculating I&I: historical flows of water sold, if available; or the number of ERCs multiplied by the appropriate industry standard (American Water Works Association) flow level per ERC if no historical flows are available.

The utility would have us accept an I&I flow total, exclusive of the flows from its customers, equal to almost two times the permitted plant flow. The wastewater plant during October, its highest flow month, was treating more than 156% of the total water sold that month. This is indicative of excessive I&I, regardless of the method of calculation. The expense for treatment of excessive flow must be factored into the rates and, ultimately, borne by the ratepayers. None of the cost of treating extra water is placed on the utility. Therefore, a utility can easily determine this to be no problem.

The utility correctly argues that the Water Pollution Control Federal Manual of Practice No. 9 (MOP 9) is an accepted industry reference for the determination of acceptable levels of I&I often used by this Commission. The utility also argues that MOP 9 states that it is common to allow 30,000 to 60,000 gpd per mile for systems below ground water, and that it is unrefuted in the record that the Barefoot Bay collection system is below groundwater. The utility also correctly argues that the Commission applied the average day, maximum month flows instead of the annual average daily flow data, which is discussed earlier in this Order.

With regard to the utility's claim that MOP 9 states that it is common to allow up to 60,000 gpd per mile I&I; MOP 9 states, on page 30 that, "Infiltration rates as high as 60,000 gpd per mile . . . have been recorded for systems below groundwater, ..." However, MOP 9 limits the 30,000 gpd allowance to small to medium sized sewers (24 inches in diameter and smaller). This utility has one length of pipe that is 18 inches in diameter. It is approximately 260 feet long. The remaining lines and diameters of the lines in the system are 12 inches (3/4 mile), 10 inches (1.35 mile), 8 inches (17.2 miles) all vitrified clay, and 8 inches polyvinyl chloride (PVC) (12.63 miles).

The method of calculating I&I propounded by the utility yields outrageously high figures relative to the size of the collection system and normally expected flows. Our acceptance of the utility's proposed I&I allowances would permit up to 1.2 million gallons per day (MGD) of I&I exclusive of the daily flows from the utility's customers, which total more than 450,000 gpd. This adds up to over 1.65 MGD of flows to the plant, which is permitted by the Department of Environmental Protection (DEP) at 0.75 MGD. The plant is hydraulically capable of passing up to 0.9 MGD. Since it is obvious, through analysis, that I&I actually exist, and since the system is rather small, we appropriately utilized a more sensible, logical and accurate approach by using the actual flows reported in FCWC's MFRs. Commonly, vitrified clay pipe (vcp) is known to leak profusely and PVC pipe is known to have little to no leak problem. We utilized MOP 9 and applied the most generous allowances permitted by that standard in calculating an acceptable level of flows from sources other than water customers. The resulting flow is within a more acceptable range of I&I for this system. Based on the foregoing, we do not find it appropriate to reconsider our decision on the method of calculation of I&I.

OPC's Method of Calculation

OPC seeks reconsideration of the Commission's method for calculation of used and useful percent versus I&I in the collection system, by stating that, since the maximum month average daily flow is used for determination of used and useful, the same month's flow should be used for I&I determination in lieu of the average annual daily flow. In its response to OPC, FCWC argues that OPC provides no record support to indicate that we made a mistake by utilizing different flows for our calculations, other than alleging that "consistency" required the use of the maximum month average daily

flow for calculating both used and useful and I&I for the wastewater system. We agree. As such, OPC's reargument is inappropriate for reconsideration.

Further, we disagree with OPC on the merits of its argument. The two calculations are unrelated as are the uses for them. The used and useful calculation must be concerned with the maximum flows the treatment plant may experience in order to allow for that event. I&I has to do with the collection system and the amount of leakage permitted from groundwater into the system. Groundwater levels and peak flows may and do occur at different times of the year.

The two calculations measure different components of plant and the results of the calculations are not related. Therefore, consistent with Commission policy, and since this utility is subject to severe seasonal fluctuations, we calculated the used and useful percent for the treatment plant using maximum month average daily flows and I&I percent using average annual daily flows, which is supported by the record. Therefore, we find it inappropriate to reconsider our decision to use average annual daily flows in the calculation of I&I in the collection system of the Barefoot Bay collection system.

Used and Useful

As discussed earlier in this Order, staff's original recommendation in this docket was to grant 100% used and useful to the wastewater treatment facilities. In considering staff's recommendation at the Agenda Conference held on June 25, 1996, we expressed concern regarding the hydraulic capacity versus permitted capacity of the facilities. Our concern was that the original plant had been permitted by the DEP for a capacity of 0.9 MGD and with the addition of the advanced wastewater treatment facility, which is a duplicate of the original, was being downsized and repermitted with a capacity of only 0.75 MGD. Additionally, it was established in the record that returning the capacity of the plant to the original 0.9 MGD required an investment of $25,000. This, when compared to the plant investment of over $4,000,000, was considered to be an insignificant amount. Due to that concern, and following discussion on the issue, we voted to reduce the used and useful percentage of the investment in the original wastewater treatment facility. Since the additional plant was required by the DEP to meet advanced treatment status, we found it 100% used and useful.

In its Cross-Motion for Reconsideration, the utility correctly argues that there is no record support for such a decision. There were only two capacity figures offered for consideration in this case, one being 0.9MG and a second of 0.75MG. Therefore, we have reconsidered our decision and find it appropriate to treat the wastewater plant as a single unit.

The original wastewater treatment plant was built to a hydraulic capacity of 1 MGD. Due to effluent disposal problems, it was permitted by DEP at 0.9 MGD. In Docket No. 910976-WS, we considered the prudence of constructing one unit to service the entire service area of Barefoot Bay, instead of several smaller units, and granted the utility 100% used and useful status.

By the utility's own action of reducing the capacity of the plant and downsizing the permitted flow level to 0.75 MGD from the original capacity of 0.9 MGD, it has become apparent that the original builders may have been overly optimistic in the original design capacity expectations for the Barefoot Bay system. Utility witness Christopher testified that it has become apparent that the actual flows were less than originally estimated. Due to a relatively small annual ERC growth factor of 0.94% per year, it

appears the original design flows may not be reached in the foreseeable future. Since FCWC has admittedly downsized the design and permitted capacity of an otherwise larger treatment plant, we find it appropriate to consider this in our evaluation of the prudence of the original design capacity. There is precedent for such a decision in previous dockets. We have held that when circumstances change sufficiently between rate cases such that a change in used and useful allotment is appropriate, we are not bound by used and useful decisions made in former dockets. See Orders Nos. PSC-96-1320-FOF-WS and PSC-96-1338-FOF-WS.

Utility witness Christopher testified that the plant could be restored to its 0.9 MGD capacity by installing two pumps and related electrical equipment at a cost of $25,000. He further testified that with flow equalization, which is in place, the plant could be stretched to the 0.9 MGD. This indicates that the plant can actually be operated at 0.9 MGD with no additional investment.

OPC argues that the Commission erred in using the maximum month average daily flow to determine the pre-AWT used and useful percentage, stating that it is inconsistent with Order No. PSC-96-1133-FOF-SU, issued September 10, 1996, in Docket No. 950387-SU. We disagree with OPC; each case stands on its own merit and is based on the evidence in the record.

Since this utility is subject to unusual seasonal flow variations and must be equipped to treat them, we have utilized the maximum month average daily flows in our calculation of the used and useful percentage for the wastewater treatment plant.

Attachment B.1, revised, shows calculations based on the plant having 0.9 MGD capacity. Since the used and useful percentage is less than 100%, this calculation includes a small margin reserve allowance. We have added the additional $25,000 to account #380.1, Treatment and Disposal Equipment, giving the treatment facilities a capacity of 0.9 MGD and rating them at 76.67% used and useful.

Rate Base Summary

Based upon our calculations, we find that the revised wastewater rate base totals $5,638,952. The schedule that depicts the wastewater rate base amount is attached as Schedule No. 1-B, and the adjustments to rate base are attached as Schedule No. 1-C.

REVENUE REQUIREMENT

Based upon our reconsideration of rate base, we find that the appropriate revised wastewater revenue requirement is $1,828,851. The operating income statement, which reflects the revenue requirement calculation, is attached as Schedule No. 3-B and the adjustments are shown on Schedule No. 3-C.

RATES AND RATE STRUCTURE

The final rates approved for the utility are designed to produce revenues of $1,802,722 for the wastewater service, which is an increase of $913,514 or 102.73%. This increase excludes miscellaneous service revenues, reclaimed water revenue and the allocation of wastewater revenue to the water operations. The rates are designed using the base facility charge rate structure.

Consistent with the utility's request, we find that a 20% differential between the residential and general service wastewater gallonage charges is appropriate. The purpose of the 20% differential in the wastewater gallonage charge between general service and residential customers recognizes that approximately 20% of the water used by residential customers is used for purposes such as irrigation and is not collected by the wastewater systems.

The utility shall file revised tariff sheets and a proposed customer notice to reflect the appropriate rates pursuant to Rule 25-22.0407(10), Florida Administrative Code. The approved rates shall be effective for service rendered on or after the stamped approval date on the tariff sheets pursuant to Rule 25-30.475(1), Florida Administrative Code, provided the customers have received notice. The rates shall not be implemented until proper notice has been received by the customers. The utility shall provide proof of the date notice was given within 10 days after the date of the notice.

A comparison of the utility's original rates, interim rates, requested rates, and our approved rates is set forth on Schedule No. 4.

STATUTORY FOUR-YEAR RATE REDUCTION

Section 367.0816, Florida Statutes, requires that the rates be reduced immediately following the expiration of the four year period by the amount of rate case expense previously authorized in the rates. The reduction will reflect the removal of revenues associated with the amortization of rate case expense and the gross-up for regulatory assessment fees which is $22,813 for wastewater. The removal of rate case expense will result in the reduction of rates set forth on Schedule No. 5.

The utility shall file revised tariffs no later than one month prior to the actual date of the required rate reduction. The utility shall also file proposed customer notices setting forth the lower rates and reason for the reductions. If the utility files this reduction in conjunction with a price index or pass-through rate adjustment, separate data shall be filed for the price index and/or pass-through increase or decrease, and for the reduction in the rates due to the removal of amortized rate case expense.

REFUND OF INTERIM WASTEWATER REVENUES

By Order No. PSC-96-0119-FOF-WS, issued on January 23, 1996, the utility's proposed rates were suspended and interim wastewater rates were approved subject to refund, pursuant to Sections 367.082, Florida Statutes. According to Section 367.082, Florida Statutes, any refund shall be calculated to reduce the rate of return of the utility during the pendency of the proceeding to the same level within the range of the newly authorized rate of return. Adjustments made in the rate case test period that do not relate to the period interim rates are in effect should be removed. Examples of these adjustments are an attrition allowance or rate case expense, which are recovered only after final rates are established.

In this proceeding, the test period for establishment of interim rates was the historical twelve months ended June 30, 1995. The approved wastewater interim rates did not include any provisions for proforma consideration of increased operating expenses or increased plant. The interim increase was designed to allow recovery of actual interest costs, and the floor of the last authorized range for equity earnings.

To establish the proper refund amount, we have calculated a revised interim wastewater revenue requirement utilizing the same data used to establish final rates. Rate case expense was excluded because it was not an actual expense during the interim collection period.

Using the principles discussed above, the wastewater revenue requirement for the interim collection period is $1,815,138. This revenue level exceeded the wastewater interim revenues which were granted in Order No. PSC-96-0119-FOF-WS. Therefore, we do not find that a refund of wastewater interim rates is necessary.

REFUND OF WASTEWATER REVENUES

On August 6, 1996, pursuant to Section 367.081(6), Florida Statutes, the utility implemented, subject to refund, the rates that were approved at the June 25, 1996, Agenda Conference. These wastewater rates which were implemented on August 6, 1996, are higher than our approved rates set forth on Schedule 4. Therefore, we find that a refund is appropriate.

The appropriate wastewater refund, with interest, shall be calculated pursuant to Rule 25-30.360, Florida Administrative Code. The refund shall be the difference between the wastewater rates that were implemented on August 6, 1996, and the wastewater rates approved herein. The utility shall submit the proper refund report reports pursuant to Rule 25-30.360(7), Florida Administrative Code. The utility shall treat any unclaimed refunds as CIAC pursuant to Rule 25-30.360(8), Florida Administrative Code. The utility's corporate undertaking shall be released upon staff's verification that the refund has been completed. This docket shall be closed after the proper refund has been made and the revised tariff sheets and customer notice have been filed by the utility and approved by staff.

Based on the foregoing, it is

ORDERED by the Florida Public Service Commission that Florida Cities Water Company, Barefoot Bay Division's request for oral argument is hereby denied. It is further

ORDERED that the Office of Public Counsel's Motion for Reconsideration is hereby granted in part and denied in part, as set forth in the body of this Order. It is further

ORDERED that Florida Cities Water Company, Barefoot Bay Division's Cross-Motion for Reconsideration is hereby granted in part and denied in part, as set forth in the body of this Order. It is further

ORDERED that each of the findings made in the body of this Order is hereby approved in every respect. It is further

ORDERED that all matters contained in the schedules and attachments attached hereto are by reference incorporated herein. It is further

ORDERED that the rates approved herein shall be effective for service rendered on or after the stamped approval date on the revised tariff sheets, pursuant to Rule 25-30.475, Florida Administrative Code, provided the customers have received notice. It is further

ORDERED that prior to its implementation of the rates approved herein, Florida Cities Water Company, Barefoot Bay Division shall submit and have approved a proposed customer notice to its customers of the rates and reasons therefore. The notice will be approved upon staff's verification that it is consistent with our decision herein. It is further

ORDERED that prior to its implementation of the rates approved herein, Florida Cities Water Company, Barefoot Bay Division shall submit and have approved revised tariff pages. The revised tariff pages will be approved upon staff's verification that the pages are consistent with our decision herein and that the proposed customer notice is adequate. It is further

ORDERED that Florida Cities Water Company, Barefoot Bay Division shall provide proof that the customers have received notice within 10 days of the date of notice. It is further

ORDERED that the rates shall be reduced at the end of the four-year rate case expense amortization period, consistent with our decision herein. Florida Cities Water Company, Barefoot Bay Division shall file revised tariff sheets no later than one month prior to the actual date of the reduction and shall file a customer notice. It is further

ORDERED that Florida Cities Water Company, Barefoot Bay Division, shall refund with interest, calculated pursuant to Rule 25-30.360, Florida Administrative Code, the additional wastewater revenues collected subject to refund as set forth in the body of this Order. It is further

ORDERED that Florida Cities Water Company, Barefoot Bay Division, shall make the refund to customers of record as of the date of this Order pursuant to Rule 25-30.360, Florida Administrative Code. Florida Cities Water Company, Barefoot Bay Division, shall submit the proper refund report reports pursuant to Rule 25-30.360(7), Florida Administrative Code. It is further

ORDERED that Florida Cities Water Company, Barefoot Bay Division, shall treat any unclaimed refunds as contributions-in-aid-of-construction pursuant to Rule 25-30.360(8), Florida Administrative Code. It is further

ORDERED that this docket shall be closed upon staff's verification the Florida Cities Water Company, Barefoot Bay Division has made the required refunds as set forth in this Order and upon Florida Cities Water Company, Barefoot Bay Division's filing and staff's approval of revised tariff sheets and a customer notice.

By ORDER of the Florida Public Service Commission, this 25th day of February, 1997.

NOTICE OF JUDICIAL REVIEW

The Florida Public Service Commission is required by Section 120.569(1), Florida Statutes, to notify parties of any administrative hearing or judicial review of Commission orders that is available under Sections 120.57 or 120.68, Florida Statutes, as well as the procedures and time limits that apply. This notice should not be construed to mean all requests for an administrative hearing or judicial review will be granted or result in the relief sought.

Any party adversely affected by the Commission's final action in this matter may request judicial review by the Florida Supreme Court in the case of an electric, gas or telephone utility or the First District Court of Appeal in the case of a water or wastewater utility by filing a notice of appeal with the Director, Division of Records and Reporting, 2540 Shumard Oak Boulevard, Tallahassee, Florida 32399-0850, and filing a copy of the notice of appeal and the filing fee with the appropriate court. This filing must be completed within thirty (30) days after the issuance of this order, pursuant to Rule 9.110, Florida Rules of Appellate Procedure. The notice of appeal must be in the form specified in Rule 9.900(a), Florida Rules of Appellate Procedure.

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

In Re: Application for rate increase in Brevard County by Florida Cities Water Company (Barefoot Bay Division).	DOCKET NO. 951258-WS ORDER NO. PSC-97-0516-FOF-WS ISSUED: May 5, 1997

The following Commissioners participated in the disposition of this matter:

JULIA L. JOHNSON, Chairman
J. TERRY DEASON
JOE GARCIA

ORDER ON RECONSIDERATION

BY THE COMMISSION:

BACKGROUND

Florida Cities Water Company, Barefoot Bay Division, (FCWC or utility) is a Class A utility providing water and wastewater service for a predominately residential area in Barefoot Bay, Florida. The utility's Barefoot Bay division was serving 4,458 water and 4,440 wastewater customers at year end December 31, 1994. For the twelve months ended December 31, 1994, the utility recorded operating revenues of $671,582 for water service and $823,463 for wastewater service. The utility recorded a net operating loss of $73,769 for the water system and a net operating income of $77,577 for the wastewater system. The Barefoot Bay system is in an area that has been designated by the St. Johns River Water Management District as a critical water supply use caution area.

On November 6, 1995, the utility filed its application for approval of interim and permanent rate increases pursuant to Sections 367.082 and 367.081, Florida Statutes, respectively. The utility requested that this case be scheduled for a formal hearing and not processed pursuant to the proposed agency action (PAA) process as provided for in Section 367.081(8), Florida Statutes.

We held the technical hearing in Barefoot Bay, Florida, on April 1 and 2, 1996. By Final Order No. PSC-96-1147-FOF-WS, issued September 12, 1996, we approved increased rates for FCWC and issued a Notice of Proposed Agency Action imputing contributions-in-aid-of-construction for a grant from the St. Johns River Water Management District to FCWC. On September 24, 1996, intervenor Clinton Dyer filed a motion for reconsideration of the final order. On September 27, 1996, the Office of Public Counsel (OPC) filed a motion for reconsideration on behalf of the Citizens of the State of Florida. On October 2, 1996, FCWC filed a Motion to Strike or

DOCUMENT NUMBER-DATE
04428 MAY-5
FPSC-RECORDS/REPORTING

Alternatively to Require Compliance with Rule Governing Motions for Reconsideration addressing Mr. Dyer's motion for reconsideration. On October 4, 1996, OPC filed a Citizen's Response to Motion to Strike. On October 9, 1996, FCWC timely filed a Response to Citizen's Motion for Reconsideration and Cross-Motion for Reconsideration, along with a request for oral argument on its response and cross-motion. On October 11, 1996, OPC filed a response to FCWC's cross-motion for reconsideration.

By Order No. PSC-96-1456-FOF-WS, issued December 2, 1996, we granted FCWC's motion to strike Mr. Dyer's motion for reconsideration, based upon its failure to adhere to the requirements of Rule 25-22.060, Florida Administrative Code. By Order No. PSC-97-0223-FOF-WS, issued on February 25, 1997, we denied FCWC's request for oral argument and granted in part and denied in part the motions for reconsideration filed by OPC and FCWC.

RECONSIDERATION OF UTILITY EXPENSES

By Order No. PSC-97-0223-FOF-WS, we recalculated the excessive inflow and infiltration in the Barefoot Bay collection system, resulting in a reduction to our original finding in Order No. PSC-96-1147-FOF-WS. We recalculated the actual amount of water delivered to the system from all sources, thereby reducing excessive inflow and infiltration from 120,594 gallons per day (gpd) to 17,039 gpd. However, we overlooked the need to recalculate the corresponding reduction in expenses for Account No. 715 (Purchased Power) and Account No. 718 (Chemicals) which would result from the reduction of water treated.

On our own motion, we find it appropriate to reconsider our calculation of Account No. 715 (Purchased Power) and Account No. 718 (Chemicals). Our recalculation results in an increase to FCWC's operating expenses, totaling $19,120.

REVENUE REQUIREMENT

Based upon our reconsideration of FCWC's expenses, we find that the revised wastewater revenue requirement is $1,848,872. The operating income statement, which reflects the revenue requirement calculation, is attached as Schedule No. 3-B and the adjustments are shown on Schedule No. 3-C.

RATES AND RATE STRUCTURE

The final rates approved for the utility are designed to produce revenues of $1,822,743 for its wastewater system. This increase excludes miscellaneous service revenues, reclaimed water

revenue and the allocation of wastewater revenue to the water operations. The rates are designed using the base facility charge rate structure. Consistent with our previous decisions in this docket, we find that a 20% differential between the residential and general service wastewater gallonage charges is appropriate.

The utility shall file revised tariff sheets and a proposed customer notice to reflect the appropriate rates pursuant to Rule 25-22.0407(10), Florida Administrative Code. The approved rates shall be effective for service rendered on or after the stamped approval date on the tariff sheets pursuant to Rule 25-30.475(1), Florida Administrative Code, provided the customers have received notice. The rates shall not be implemented until proper notice has been received by the customers. The utility shall provide proof of the date notice was given within 10 days after the date of the notice.

A comparison of the utility's original rates, interim rates, requested rates, and our approved final rates is set forth on Schedule No. 4.

STATUTORY FOUR-YEAR RATE REDUCTION

Section 367.0816, Florida Statutes, requires that the rates be reduced immediately following the expiration of the four year period by the amount of rate case expense previously authorized in the rates. The reduction will reflect the removal of revenues associated with the amortization of rate case expense and the gross-up for regulatory assessment fees, which is $22,813 for wastewater. The removal of rate case expense will result in the reduction of rates set forth on Schedule No. 5.

The utility shall file revised tariffs no later than one month prior to the actual date of the required rate reduction. The utility shall also file proposed customer notices setting forth the lower rates and reason for the reductions. If the utility files this reduction in conjunction with a price index or pass-through rate adjustment, separate data shall be filed for the price index and/or pass-through increase or decrease, and for the reduction in the rates due to the removal of amortized rate case expense.

REFUND OF INTERIM WASTEWATER REVENUES

By Order No. PSC-96-0119-FOF-WS, issued on January 23, 1996, the utility's proposed rates were suspended and interim wastewater rates were approved subject to refund, pursuant to Section 367.082, Florida Statutes. According to Section 367.082, Florida Statutes, any refund shall be calculated to reduce the rate of return of the utility during the pendency of the proceeding to the same level

within the range of the newly authorized rate of return. Adjustments made in the rate case test period that do not relate to the period interim rates are in effect shall be removed. Examples of these adjustments are an attrition allowance or rate case expense, which are recovered only after final rates are established.

In this proceeding, the test period for establishment of interim rates was the historical twelve months ended June 30, 1995. The approved wastewater interim rates did not include any provisions for proforma consideration of increased operating expenses or increased plant. The interim increase was designed to allow recovery of actual interest costs, and the floor of the last authorized range for equity earnings.

To establish the proper refund amount, we calculated a revised interim wastewater revenue requirement utilizing the same data used to establish final rates. Rate case expense was excluded because it was not an actual expense during the interim collection period.

Using the principles discussed above, the wastewater revenue requirement for the interim collection period is $1,835,159. This revenue level exceeded the wastewater interim revenues which were granted in Order No. PSC-96-0119-FOF-WS. Therefore, we do not find that a refund of wastewater interim rates is necessary.

REFUND OF WASTEWATER REVENUES

On August 6, 1996, pursuant to Section 367.081(6), Florida Statutes, the utility implemented, subject to refund, the rates that were approved at the June 25, 1996, Agenda Conference. By Order No. PSC-97-0223-FOF-WS, issued February 25, 1997, we ordered a refund between the rates implemented on August 6, 1996 and the rates approved therein. However, the utility has not implemented the rates approved by Order No. PSC-97-0223-FOF-WS.

The wastewater rates approved herein and shown on Schedule No. 4 are higher than the rates approved by Order No. PSC-97-0223-FOF-WS. Therefore, a refund of the difference between the wastewater rates that were implemented on August 6, 1996, and the wastewater rates approved herein is required. The appropriate wastewater refund, with interest, shall be calculated pursuant to Rule 25-30.360, Florida Administrative Code. The refund shall be the difference between the wastewater rates that were implemented on August 6, 1996, and the wastewater rates approved herein. The utility shall submit the proper refund reports pursuant to Rule 25-30.360(7), Florida Administrative Code. The utility shall treat any unclaimed refunds as CIAC pursuant to Rule 25-30.360(8), Florida Administrative Code. The utility's corporate undertaking

shall be released upon staff's verification that the refund has been completed. This docket shall be closed administratively after the proper refund has been made and the proper revised tariff sheets and customer notice have been filed by the utility and approved by staff.

Based on the foregoing, it is

ORDERED by the Florida Public Service Commission that, upon reconsideration, Florida Cities Water Company, Barefoot Bay Division's operating expenses shall be recalculated as set forth in the body of this Order. It is further

ORDERED that each of the findings made in the body of this Order is hereby approved in every respect. It is further

ORDERED that all matters contained in the schedules and attachments attached hereto are by reference incorporated herein. It is further

ORDERED that the rates approved herein shall be effective for service rendered on or after the stamped approval date on the revised tariff sheets, pursuant to Rule 25-30.475, Florida Administrative Code, provided the customers have received notice. It is further

ORDERED that prior to its implementation of the rates approved herein, Florida Cities Water Company, Barefoot Bay Division shall submit and have approved a proposed customer notice to its customers of the rates and reasons therefore. The notice will be approved upon staff's verification that it is consistent with our decision herein. It is further

ORDERED that prior to its implementation of the rates approved herein, Florida Cities Water Company, Barefoot Bay Division shall submit and have approved revised tariff pages. The revised tariff pages will be approved upon staff's verification that the pages are consistent with our decision herein and that the proposed customer notice is adequate. It is further

ORDERED that Florida Cities Water Company, Barefoot Bay Division shall provide proof that the customers have received notice within 10 days of the date of notice. It is further

ORDERED that the rates shall be reduced at the end of the four-year rate case expense amortization period, consistent with our decision herein. Florida Cities Water Company, Barefoot Bay Division shall file revised tariff sheets no later than one month

prior to the actual date of the reduction and shall file a customer notice. It is further

ORDERED that Florida Cities Water Company, Barefoot Bay Division, shall refund with interest, calculated pursuant to Rule 25-30.360, Florida Administrative Code, the additional wastewater revenues collected subject to refund as set forth in the body of this Order. It is further

ORDERED that Florida Cities Water Company, Barefoot Bay Division, shall make the refund to customers of record as of the date of this Order pursuant to Rule 25-30.360, Florida Administrative Code. Florida Cities Water Company, Barefoot Bay Division, shall submit the proper refund reports pursuant to Rule 25-30.360(7), Florida Administrative Code. It is further

ORDERED that Florida Cities Water Company, Barefoot Bay Division, shall treat any unclaimed refunds as contributions-in-aid-of-construction pursuant to Rule 25-30.360(8), Florida Administrative Code. It is further

ORDERED that Florida Cities Water Company, Barefoot Bay Division's corporate undertaking shall be released upon staff's verification that the refund has been completed. It is further

ORDERED that this docket shall be closed administratively upon staff's verification that Florida Cities Water Company, Barefoot Bay Division has made the required refunds as set forth in this Order and upon Florida Cities Water Company, Barefoot Bay Division's filing and staff's approval of revised tariff sheets and a customer notice.

By ORDER of the Florida Public Service Commission, this 5th day of May, 1997.

BLANCA S. BAYÓ, Director
Division of Records and Reporting

NOTICE OF JUDICIAL REVIEW

The Florida Public Service Commission is required by Section 120.569(1), Florida Statutes, to notify parties of any administrative hearing or judicial review of Commission orders that is available under Sections 120.57 or 120.68, Florida Statutes, as well as the procedures and time limits that apply. This notice should not be construed to mean all requests for an administrative hearing or judicial review will be granted or result in the relief sought.

Any party adversely affected by the Commission's final action in this matter may request judicial review by the Florida Supreme Court in the case of an electric, gas or telephone utility or the First District Court of Appeal in the case of a water or wastewater utility by filing a notice of appeal with the Director, Division of Records and Reporting, 2540 Shumard Oak Boulevard, Tallahassee, Florida 32399-0850, and filing a copy of the notice of appeal and the filing fee with the appropriate court. This filing must be completed within thirty (30) days after the issuance of this order, pursuant to Rule 9.110, Florida Rules of Appellate Procedure. The notice of appeal must be in the form specified in Rule 9.900(a), Florida Rules of Appellate Procedure.

EXPLANATION	WASTEWATER
(1) UTILITY PLANT IN SERVICE	
a) To remove plant additions associated with PS&Is	$ (690,476)
b) To include additional plant costs	25,000
	$ (665,476)
(2) LAND	
To remove additions to land associated with PS&Is	$ (329,446)
(3) NON-USED & USEFUL	
a) To remove non-used & useful wastewater treatment plant	$ (837,631)
b) To remove accumulated depreciation on non-used and useful plant	60,637
	$ (776,994)
(4) ACCUMULATED DEPRECIATION	
a) To remove depreciation associated with PS&Is	$ 32,271
b) To include depreciation associated with additional plant costs	(1,390)
	$ 30,881
(5) CIAC	
a) To include grant funding from SJRWMD for reclaimed water facilities	$ (81,258)
b) To impute CIAC on the margin reserve	(22,969)
	$ (104,227)
(6) ACCUMULATED AMORTIZATION OF CIAC	
a) To include amortization of grant funding from SJRWMD	$ 3,193
b) To include amortization associated with imputed CIAC	903
	$ 4,096
(7) WORKING CAPITAL	
a) To include PS&Is as Other Deferred Debits in working capital	$ 40,423
b) To include Other Deferred Credits in the working capital allowance	(6,435)
c) To adjust working capital to the 13-month average balance	(1,225)
	$ 32,763
(8) UNFUNDED SFAS 106 OBLIGATION	
To allocate the unfunded liability associated with other postretirement benefits	$ (72,488)

DER CERTIFIED MAIL NO. P-597-167-447

Exhibit_____(GSA-14)

BEFORE THE STATE OF FLORIDA
DEPARTMENT OF ENVIRONMENTAL REGULATION

STATE OF FLORIDA DEPARTMENT OF ENVIRONMENTAL REGULATION Complainant, vs. FLORIDA CITIES WATER COMPANY (formerly, Avatar Utilities, Inc. of Florida - Barefoot Bay Division) Barefoot Bay Mobile Home Park Respondent.	IN THE OFFICE OF THE CENTRAL FLORIDA DISTRICT OGC CASE NO. 87-0153

CONSENT ORDER

This Consent Order is made and entered into between the State of Florida Department of Environmental Regulation ("Department") and Florida Cities Water Company - Barefoot Bay Division (formerly, Avatar Utilities, Inc. of Florida - Barefoot Bay Division) ("Respondent"). The Department finds and Respondent neither admits nor denies the following:

1. The Department is the administrative agency of the State of Florida which has the authority to administer and enforce the provisions of Chapter 403, Florida Statutes, and the rules promulgated thereunder, Florida Administrative Code Chapters 17-4 and 17-6.

2. Florida Cities Water Company is a Florida Corporation and person within the meaning of Section 403.031, Florida Statutes, doing business at 2112 Gulf Gate Drive, Post Office Box 5846, Sarasota, Florida 34277.

3. Respondent is responsible for the development of the Barefoot Bay sewage treatment plant (hereinafter referred to as "facility"). Respondent's facility is located on Micco Road, approximately two miles west of U. S. Highway 1, Micco, Brevard County, Florida. Latitude 27°53'32", Longitude 80°32'00", Section 9, Township 30 South, Range 38 East.

4. The Respondent owns and is responsible for the operation and maintenance of the Barefoot Bay sewage treatment plant which serves the Barefoot Bay Mobile Home Park. The most recent operation permit for this facility (D005-61503) was issued on November 23, 1982, and would have expired August 1, 1987 except for the application for renewal filed prior to that date. The operation permit authorizes the operation of a 0.900 MGD extended aeration STP with chlorinated effluent discharge to groundwater via two (2) percolation/evaporation ponds and with no discharge to surface waters.

5. On November 13, 1985, December 27, 1985, and January 22, 1986, site inspections of Respondent's facility were conducted by representatives of the Department to determine the status of compliance at the facility. On each of these inspections, the total flow from the treatment plant was not being completely contained within the percolation/evaporation ponds. A portion of the effluent was being discharged via the facility's emergency

overflow pipe, thence into an agricultural drainage/irrigation canal which flows into the North Prong of the Sebastian Creek, Class III waters of the State.

6. On January 29, 1986, the Department sent a Warning Notice (OWN-86-005), to the Respondent by certified mail informing Respondent of the Department's belief that Respondent's facility was being operated in violation of its operation permit, Chapter 403, Florida Statutes, and the applicable rules promulgated thereunder. Response was requested within ten (10) days of receipt of the Warning Notice. Respondent's response was received by the Department on February 5, 1986.

7. On January 24, 1986, August 25, 1986, and September 17, 1986, representatives of the Department conducted follow-up inspections to determine the status of compliance at the Respondent's facility. Again, the total flow from the plant was not being completely contained in the percolation/evaporation ponds, but was being discharged through the emergency overflow pipe into the agricultural drainage/irrigation canal adjacent to the Respondent's property.

8. On October 14, 1986, a site inspection of Respondent's facility was conducted by representatives of the Brevard County Office of Natural Resources Management to determine the status of compliance at the facility. Inspection again revealed that the existing percolation/evaporation ponds were not adequately percolating the entirety of the effluent and a portion of the plant's effluent was being discharged through the emergency overflow pipe and into the agricultural drainage/irrigation canal

which flows into the North Prong of Sebastian Creek.

9. A follow-up inspection at the Respondent's sewage treatment facility was conducted by the Department on January 16, 1987. Inspection revealed the Respondent's facility was still discharging effluent to the same agricultural drainage/irrigation canal which flows into the North Prong of Sebastian Creek.

10. Discharge of the treatment plant's effluent to surface waters, without authorization from the Department, constitutes a violation of Section 403.161(1)(b) and Section 403.088, Florida Statutes, and Florida Administrative Code Rule 17-6.180(2)(a).

11. On March 4, 1987, the Department issued a Notice of Violation and Orders for Corrective Action to the Respondent. Therein, the Department ordered the Respondent to complete hydraulic testing, implement effluent monitoring, and submit an engineering report with time schedule for corrective actions.

12. Informal conferences were held between the Department and the Respondent in the Department's District Office in Orlando on March 13 and October 23, 1987, and February 9, 1988, during which, all disputed issues were resolved.

THEREFORE, pursuant to Florida Administrative Code Rule 17-103.110(3), Respondent and the Department mutually agree and it is

ORDERED:

13. For the consideration of all costs and expenses incurred by the department prior to the effective date of this Consent Order, Respondent shall pay the amount of Five Thousand Nine Hundred Eighty Dollars ($5,980.00) in settlement of liabilities

arising from Section 403.161, Florida Statutes. Payment shall be by certified check or money order and is due within thirty (30) days from the effective date of this Consent Order; the instrument shall be made payable to the Department of Environmental Regulation and be sent to the Central Florida District Office, 3319 Maguire Boulevard, Suite 232, Orlando, Florida 32803-3767.

14. Within sixty (60) days of the effective date of this Consent Order, Respondent shall install and/or provide documentation to the Department that a flow meter to measure the quantity of effluent discharging from Respondent's facility to surface waters of the State has been installed, and begin monitoring and submitting to the Department monitoring results for flow (million gallons per day) and the following parameters:

Field pH (standard units)

Field Temperature (°C)

Specific Conductance (μmhos/cm)

Field Dissolved Oxygen (mg/l)

Carbonaceous Biochemical Oxygen Demand - 5 day (CBOD mg/l)

Ammonia - Nitrogen (mg/l NH_3-N)

Total Kjeldahl Nitrogen (mg/l NO_2 + NO_3 - N)

Total Phosphorus (mg/l P)

Monitoring of the listed parameters is to be conducted at the following sample station locations:

a. Facility's point of discharge to surface water

b. 50 yards upstream of facility's discharge

c. 100 yards downstream of facility's discharge

d. Ditch at Micco Road bridge

All required monitoring results are to be submitted monthly to the Department for the duration Respondent's facility discharges to surface waters of the State. All sampling and analyses shall be monthly grab samples from the aforesaid locations and parameters. All analyses shall be conducted in accordance with Florida Administrative Code Chapter 17-19.

15. In the event a deep injection well is not possible due to unfavorable geological conditions at the site, and a Department permit cannot be issued, the Department will then, and only then, consider a surface water discharge permit utilizing the monitoring data collected as a result of paragraph 14, above. Within sixty (60) days of Respondent's receipt of written notice from the Department that a deep injection well is not possible, the Respondent will submit a completed permit application and any additional Department requested data to the Department to modify the existing facility as needed to comply with standards established by the Department for discharge of treated effluent from the facility to Class III surface waters of the State.

16. Within sixty (60) days of the effective date of this Consent Order, Respondent shall submit to the Department an evaluation describing the levels of chemical addition and/or additional treatment needed to achieve reduced levels of Total Phosphorus in the effluent from the facility to at least one (1.0) mg/l phosphorus. The evaluation shall be prepared by a professional engineer, registered in the State of Florida.

The Department shall, as expeditiously as possible, review the Respondent's written evaluation and determine the

required level of Total Phosphorus allowed for discharge to surface waters.

Respondent shall implement chemical treatment at the facility within ninety (90) days of receipt of written notice from the Department that the desired level of Total Phosphorus can be achieved in a cost effective manner.

17. Within one hundred twenty (120) days of the effective date of this Consent Order, Respondent shall submit to the Department an engineering report setting forth a plan for the ultimate elimination of the surface water discharge of effluent from Respondent's facility by the construction and operation of a deep injection well. The engineering report shall include temporary provisions for accommodating the flow from the facility until the deep injection well is in full operation. These temporary provisions shall include: (a) the discharge of effluent by means of sprayfield irrigation on a 40 acre site owned by Respondent; and (b) the temporary surface water discharge of that volume of effluent which cannot otherwise be discharged through the sprayfield and the existing percolation/evaporation ponds.

18. Respondent's report shall contain a specific compliance schedule, incorporating Department guidelines established herein, for: (a) the preparation and submittal of applications to all appropriate regulatory agencies for the construction and operation of the deep injection well; (b) the construction and operation of the deep injection well following receipt of all necessary authorizations from the appropriate regulatory agencies; (c) the preparation and submittal of an application and ground water

monitoring plan to the Department for the construction and operation of the 40 acre site for sprayfield irrigation; (d) the construction and operation of the 40 acre site for sprayfield irrigation following receipt of the appropriate permits and the approval of a ground water monitoring plan; (e) the anticipated volume increases in temporary surface water discharge of effluent resulting from growth at the Barefoot Bay Mobile Home Park; and (f) the cleaning and scraping of the existing percolation/evaporation ponds to improve percolation once the 40 acre sprayfield irrigation site is in operation. The report shall be prepared by a professional engineer, registered in the State of Florida, and shall be sent to the Department's Orlando office, 3319 Maguire Boulevard, Suite 232, Orlando, Florida 32803-3767 with a copy to the Department's Melbourne Branch office, 13 East Melbourne Avenue, Melbourne, Florida 32901.

19. The Department shall expeditiously review the engineering report and provide Respondent with a written response as to its acceptability. Respondent shall not implement the plan proposed in the report until Respondent receives written notification from the Department that the proposed plan has been approved. Such approval by the Department shall not be unreasonably withheld.

20. Within sixty (60) days of the issuance of a construction permit from the Department, Respondent shall initiate on-site preparation of the 40 acre site to receive the discharge of the treated effluent from the facility by means of sprayfield irrigation. Respondent shall complete the preparation of the sprayfield site within one hundred fifty (150) days after the

initiation of said work and begin discharging treated effluent from the facility to the sprayfield.

21. Within thirty (30) days of completion of the 40 acre sprayfield irrigation site, Respondent shall initiate cleaning and scraping the two (2) existing percolation/evaporation ponds, taking one pond from service at a time, to improve percolation. Respondent shall complete the cleaning and scraping of the ponds within one hundred twenty (120) days after the initiation of said work and begin utilizing the two (2) percolation/evaporation ponds in conjunction with the 40 acre sprayfield irrigation site and temporary surface water discharge to dispose of the treated effluent from the facility.

22. In the interim, prior to the completion of the 40 acre sprayfield site and the cleaning and scraping of the existing percolation/evaporation ponds, there shall be no expansions made to the Barefoot Bay subdivision that will cause an increase in surface water discharge in excess of an annual ~~a maximum monthly~~ average of 0.600 million gallons per day (mgd).

23. This Consent Order authorizes the temporary surface water discharge of that portion of treated effluent from Respondent's facility not accommodated by the 40 acre sprayfield site and the cleaned and scraped existing percolation/evaporation ponds. This Consent Order will further authorize the pro-rate increases in surface water discharge not to exceed a maximum annual average of 0.600 mgd based on the following compliance schedule:

1. Respondent submits an application for a construction permit for a Class I injection well. (Release 25%)

2. The Department approves and issues the construction permit and well drilling begins. (Release 25%)

3. Respondent completes well construction and the Department approves injection of treated effluent under the construction permit. (Release 25%)

4. The Department issues an operating permit for the deep injection well. (Release additional capacity up to the design capacity of the well.)

The pro-rated increases apply to the volume of the facility's surface water discharge reduced from an annual average of 0.600 mgd through implementation of the 40 acre sprayfield and the cleaning and scraping of the percolation/evaporation ponds. (For example: If the 40 acre sprayfield and renovated ponds reduces the 0.600 mgd annual average of surface water discharge to 0.500 mgd, then the above pro-rated increases would pertain to the 0.100 mgd difference.)

24. Respondent shall pay a stipulated civil penalty of One Hundred Dollars ($100.00) per day for each failure to comply with the time schedules as required in paragraphs 13, 14, 15, 16, 17, 20, 21 and 31 of this Consent Order. The Department hereby agrees that prior to claiming the aforesaid stipulated amount, the Department shall notify Respondent of any alleged violations of this Consent Order by sending a written notice thereof to Respondent at the address set forth below (or at any other address of which Respondent may hereafter give the Department written notice).

25. If any event occurs which causes delay, or the reasonable

likelihood of delay, in the achievement of the requirements of this Consent Order, Respondent shall have the burden of proving that the delay was, or will be caused by, circumstances beyond the reasonable control of the Respondent, and could not have been, or cannot be, overcome by due diligence. Upon occurrence of the event Respondent shall promptly notify the Department orally and shall, within seven (7) calendar days of oral notification to the Department, notify the Department in writing of the anticipated length and cause of delay, the measures taken or to be taken to prevent or minimize the delay, and the timetable by which Respondent intends to implement these measures. If the parties can agree that the delay, or anticipated delay, has been or will be, caused by circumstances beyond the reasonable control of the Respondent, the time for performance hereunder shall be extended for a period equal to the delay resulting from such circumstances, with no assessment of penalties as outlined in paragraph 24, above, during such extension. Such agreement shall be confirmed by letter from the Department accepting, or if necessary, modifying the extension request. The Respondent shall adopt all reasonable measures necessary to avoid or minimize delay. Failure of the Respondent to comply with the notice requirements of this paragraph shall constitute a waiver of the Respondent's right to request an extension of the requirements of this Consent Order. Increased costs of performance of the terms of this Consent Order, or changed economic circumstances, shall not be considered circumstances beyond the control of the Respondent.

26. With regard to any determination, notice, request or

other action made or taken by the Department pursuant to this Consent Order, Respondent may request an informal conference to resolve a disputed determination. No determination will be final for the purpose of invoking the jurisdiction of Section 120.57, Florida Statutes, until such time as the informal conference has been completed as determined by written notification by the Department or Respondent. If the parties cannot resolve the disputed determination in this matter, Respondent may file a Petition for Formal or Informal Administrative Proceeding (hearing), if Respondent objects to the Department's determination, notice, request or other action, pursuant to Section 120.57, Florida Statutes, and Florida Administrative Code Chapters 17-103 and 28-5. The petition must conform with the requirements of Florida Administrative Code Rule 28-5.201, and must be received by the Department's Office of General Counsel, 2600 Blair Stone Road, Tallahassee, Florida 32301, within 14 days after receipt of notice from the Department of any determination, notice, request or other action Respondent wishes to challenge. Failure to file a Petition within this time period shall constitute a waiver by Respondent of its right to request an administrative proceeding under Section 120.57, Florida Statutes. The Department's determination, notice, request or other action, upon expiration of the 14-day time period, if no Petition is filed, or the Department's Final Order as a result of the filing of a Petition, shall be incorporated by reference into this Consent Order and made a part of it. All other aspects of the Consent Order shall remain in full force and effect at all times.

In the event Respondent seeks an administrative proceeding pursuant to this paragraph, the Department may in lieu of or in addition to holding the administrative hearing file suit to obtain judicial resolution of all the issues unresolved at the time of the request for administrative proceedings. In the event the Department files such suit to obtain judicial resolution of all the issues unresolved at the time of the request for administrative proceedings, Respondent reserves all of its rights and defenses to challenge or respond to such suit as is appropriate.

27. Respondent shall allow authorized representatives of the Department access to the property at reasonable times for purposes of determining compliance with this Order and the rules of the Department.

28. All plans, applications, and information required by this Consent Order unless otherwise noted herein, to be submitted to the Department should be sent to, the Program Administrator, Administration and Technical Services Program , Central District, 3319 Maguire Boulevard, Suite 232, Orlando, Florida 32803-3767.

29. The Department, for an in consideration of the complete and timely performance by Respondent of the obligations agreed to in this Consent Order, hereby waives its right to seek judicial imposition of damages, or civil or criminal penalties for the violations outlined in this Consent Order. Except as provided in paragraph 26, Respondent waives his right to a hearing or judicial review of the terms of this Consent Order.

30. Entry of this Consent Order does not relieve Respondent

of the need to comply with the applicable Federal, State or local laws, regulations or ordinances.

31. Respondent shall publish, at their expense, the following notice in the legal section of a newspaper of general circulation in Brevard County, Florida. The notice shall be published one time only within twenty-one (21) days after execution of the Consent Order by the Department.

State of Florida Department of Environmental Regulation

Notice of Proposed Agency Action

The Department of Environmental Regulation gives notice of agency action of entering into a Consent Order with Florida Cities Water Company - Barefoot Bay Division, pursuant to Rule 17-103.110(3), Florida Administrative Code. The Consent Order addresses the elimination of surface water discharge of effluent from Respondent's wastewater treatment plant facility by construction and operation of a deep injection well and the temporary provisions for accommodating the flow from the facility until the deep injection well is in full operation.

The Consent Order is available for public inspection during normal business hours, 8:00 a.m. to 5:00 p.m., Monday through Friday, except legal holidays, at the Department of Environmental Regulation.

Persons whose substantial interests are affected by the above proposed agency action have a right pursuant to Section 120.57, F.S., to petition for an administrative determination (hearing) on the proposed action. The Petition must conform to the requirements of Chapters 17-103 and 28-5, FAC, and must be filed (received) with the Department's Office of this notice. Failure to file a petition within the 14 days constitutes a waiver of any right such person has to an administrative determination (hearing) pursuant to Section 120.57, F.S.

If a petition is filed, the administrative hearing process is designed to formulate agency action. Accordingly, the Department's final

> action may be different from the proposed agency action. Persons whose substantial interests will be affected by any decision of the Department have the right to intervene in the proceeding. A petition for intervention must be filed pursuant to Model Rule 28-5.207, FAC, at least five days before the final hearing and be filed with the Hearing Officer if one has been assigned at the Division of Administrative Hearings, Department of Administration, 2009 Appalachee Parkway, Tallahassee, Florida 32399-2400. If no Hearing Officer has been assigned, the petition is to be filed with the Department's Office of General Counsel, 2600 Blair Stone Road, Tallahassee, Florida 32399-2400. Failure to petition to intervene within the allowed time frame constitutes a waiver of any right such person has to an administrative determination (hearing) under Section 120.57, F.S.

Respondent shall provide proof of publication to the Department within fourteen (14) days of the notice.

32. The terms and conditions set forth in the Consent Order may be enforced in a court of competent jurisdiction pursuant to Sections 120.68 and 403.121, Florida Statutes. Failure to comply with the terms of this Consent Order shall constitute a violation of Section 403.161(1)(b), Florida Statutes.

33. Respondent is fully aware a violation of the terms of this Consent Order may subject Respondent to judicial imposition of damages, civil penalties of up to $10,000.00 per offense, and criminal penalties.

34. This Consent Order shall take effect upon the date of filing and acknowledgement by the Clerk of the Department and shall constitute final agency action by the Department pursuant to Section 120.69, Florida Statutes and Florida Administrative Code Rule 17-103.110(3).

35. The provisions of this Consent Order shall apply to and be binding upon the parties, their officers, their directors, agents, servants, employees, successors, and assigns and all persons, firms and corporations acting under, through or for them and upon those persons, firms and corporations in active concert or participation with them.

36. In consideration of the terms of this Consent Order, Respondent within 15 days of the effective date of the Consent Order shall voluntarily dismiss its petition for Formal Administrative Proceeding filed in the Division of Administrative Hearings, Case No. 87-4794.

ATTENTION JOHNNIE M OVERTON
SENIOR VICE PRESIDENT

Re: Brevard County - DW
Barefoot Bay Wastewater Treatment Facility
State I.D. No. 3005P03394, NPDES No. FL0042293

Dear Mr. Overton:

On May 1, 1995, the Florida Department of Environmental Protection (Department) was granted authority by the U.S. Environmental Protection Agency (EPA) to administer the National Pollutant Discharge Elimination System (NPDES) permitting program. Effective that date, the Department assumed permitting and enforcement authority for the NPDES permit(s) issued by EPA for point source discharges from your wastewater facility(ies) to waters of the United States. Also on May 1, the new wastewater permitting rule, Chapter 62-620, Florida Administrative Code, (F.A.C.), became effective. The rule applies to all state wastewater permitting and supersedes previous rule provisions.

Pursuant to Rule 62-620.105, (F.A.C.), Florida Administrative Code, the enclosed order transfers administrative authority for your EPA-issued NPDES permit to the Department. The order identifies the Department as the permitting agency, provides the address to which your monitoring reports should be sent, and assigns an expiration date, based on the expiration date of your NPDES permit, to the order. The permittee should affix the referenced individual permit to the enclosed Order. If you recently received an NPDES permit from EPA with an effective date later than May 1, 1995, you should also attach the newly issued permit.

"In accordance with Rule 62-620.105, F.A.C., this order expires on June 30, 1995 (the date of expiration of your NPDES permit). However, because you timely filed an application for renewal of the existing NPDES permit, this order administratively continues your authorization to operate under that permit. On May 17, 1995, the EPA forwarded your federal application to the Department's Central District Office in Orlando. This application will eventually have to be amended to meet the requirements of Rule 62-620. The Department will take into account all of the agreed upon conditions in the second amended consent order you have entered into with the Department when acting upon this application."

Pursuant to Chapter 403.087, Florida Statutes, and Rule 62-4.052, F.A.C., an initial pro-rated regulatory program and surveillance fee is due July 30, 1995, for the facility(ies) referenced above. Each year thereafter, the annual regulatory program and surveillance fee will be due January 15. Enclosed is a work sheet identifying the annual fee(s) applicable to your facility(ies) according to information on file at our office. If you have questions about these fees, please contact this office by June 20, 1995. Invoices for the initial annual fees will be mailed after that date.

Please note that the Department did not request authorization for the federal sewage sludge management program. The EPA will issue sludge only permits for facilities with NPDES permits containing sludge management related permit conditions.

If there are any questions about your monitoring requirements or the annual fees, please contact Al Castro, P.E., of my staff at telephone number (407) 893-3313.

Sincerely,

Vivian F. Garfein

STATE OF FLORIDA
DEPARTMENT OF ENVIRONMENTAL PROTECTION
NOTICE OF AGENCY ACTION

In the Matter of an Order for:

Florida Cities Water Company
4837 Swift Road, Suite 100
Sarasota, FL 34231

WASTEWATER PERMIT
NO. FL0042293

Pursuant to Rule 62-620.105(11), Florida Administrative Code (F.A.C.), this order constitutes the transfer of administrative authority for Wastewater Permit No. FL0042293 to the Florida Department of Environmental Protection (Department). This NPDES permit was previously issued by EPA to Barefoot Bay Wastewater Treatment Facility. The NPDES permit is adopted under the authority of Section 403.0885, Florida Statutes (F.S.). This agency action is limited to identifying the Department as the permitting agency, providing a new address to send monitoring reports, and providing an expiration date.

Except for the sludge related permit conditions, all permit conditions remain in effect and are unchanged. All of the conditions are enforceable by the Department under Chapter 403, F.S., and under the Federal Clean Water Act by the Environmental Protection Agency.

The permittee shall continue all monitoring required by this Order. Required monitoring shall continue to be reported on EPA form 3320-1. EPA form 3320-1 for the months of April, May and June shall be sent to the EPA. Effective with the report for the month of July 1995, the permittee shall submit EPA form 3320-1 to the Department of Environmental Protection, Mail Station 3551, 2600 Blair Stone Road, Tallahassee, Florida 32399-2400. Other than the monitoring reports for April - June, all correspondence and requests regarding this wastewater permit should be directed to this office beginning immediately.

"In accordance with Rule 62-620.105, F.A.C., this order expires on June 30, 1995 (the date of expiration of your NPDES permit). However, because you timely filed an application for renewal of the existing NPDES permit, this order administratively continues your authorization to operate under that permit. On May 17, 1995, the EPA forwarded your federal application to the Department's Central District Office in Orlando. This application will eventually have to be amended to meet the requirements of Rule 62-620. The Department will take into account all of the agreed upon conditions in the second amended consent order you have entered into with the Department when acting upon this application."

A person whose substantial interests are affected by this agency action may petition for an administrative proceeding (hearing) in accordance with Section 120.57, F.S. The petition must contain the information set forth below and must be filed (received) in the Office of General Counsel of the Department at 2600 Blair Stone Road, Tallahassee, Florida 32399-2400, within 14 days of receipt of this permit. Petitioner shall mail a copy of the petition to the permittee at the address indicated above at the time of filing. Failure to file a petition within this time period shall constitute a waiver of any right such person may have to request an administrative determination (hearing) under Section 120.57, F.S. The Petition shall contain the following information:

(a) The name, address, and telephone number of each petitioner, the permittee's name and address, the Department Permit number, and the county in which the project is located;
(b) A statement of how and when each petitioner received notice of the Department's action or proposed action;
(c) A statement of how each petitioner's substantial interests are affected by the Department's action or proposed action;
(d) A statement of the material facts disputed by Petitioner, if any;
(e) A statement of facts which petitioner contends warrant reversal or modification of the Department's action or proposed action;
(f) A statement of which rules or statutes petitioner contends require reversal or modification of the Department's action or proposed action; and
(g) A statement of the relief sought by petitioner, stating precisely the action petitioner wants the Department to take with respect to the Department's action or proposed action.

If a petition is filed, the administrative hearing process is designed to formulate agency action. Accordingly, the Department's final action may be different from the position taken by it in this agency action. Persons whose substantial interests will be affected by any decision of the Department with regard to the agency action have the right to petition to become a party to the proceeding. The petition must conform to the requirements specified above and be filed (received) within 14 days of receipt of this notice in the Office of General Counsel at the above address of the Department. Failure to petition within the allowed time frame constitutes a waiver of any right such person has to request a hearing under Section 120.57, F.S., and to participate as a party to this proceeding. Any subsequent intervention will only be at the approval of the presiding officer upon motion filed pursuant to Rule 28-5.207, F.A.C.

This Order is final and effective on the date filed with the Clerk of the Department unless a petition is filed in accordance with the above paragraphs or unless a request for extension of time in which to file a petition is filed within the time specified for filing a petition and conforms to Rule 62-103.070, F.A.C. Upon timely filing of a petition or a request for an extension of time this agency action transferring administrative authority of the permit will not be effective until further Order of the Department.

When the agency action is final, any party to the Order has the right to seek judicial review of the Order pursuant to Section 120.68, F.S., by the filing of a Notice of Appeal pursuant to Rule 9.110, Florida Rules of Appellate Procedure, with the Clerk of the Department in the Office of General Counsel, 2600 Blair Stone Road, Tallahassee, Florida 32399-2400; and by filing a copy of the Notice of Appeal accompanied by the applicable filing fees with the appropriate District Court of Appeal. The Notice of Appeal must be filed within 30 days from the date of the Final Order is filed with the Clerk of the Department.

Executed in Orlando, Florida.

ANNUAL FEE WORKSHEET
Domestic Wastewater

Facility Name: Barefoot Bay, W.W.T.F.

I.D.#: FL0042293 DEP District: Central

==========

PART I. Regular Surface Water Discharge

Scenario A:

1.	Permitted Capacity of Surface Water Discharge (mgd):	0.534
2.	Permitted Reuse Capacity for which surface water discharge serves as back-up: 0.093 mgd	
3.	70% of Permitted Reuse Capacity from 2.	0.065 mgd
4.	Adjusted Surface Water Discharge Permitted Capacity (Item 1 minus Item 3).	0.469 mgd
5.	Annual Fee for the capacity in item 4.	$3,375.00

Scenario B:

1.	UIC disposal with discharge authorized during Mechanical Integrity Test only, or percolation pond disposal with discharge authorized after specified storm events only, enter $200	$ 0.00

==========

PART II. Pretreatment

	If this facility has an approved pretreatment program enter $500.	$ 0.00

==========

PART III. Stormwater-only Outfalls

	Number of Stormwater-only outfalls regulated in the NPDES permit.	0
	Enter the amount equal to the number of Stormwater-only outfalls times $200.	$ 0.00

==========

PART IV. Total Calculated Fee

	TOTAL ANNUAL FEE (Sum of PART I fee from Scenario A or B, plus Parts II and III.)	$3,375.00

Note: The annual fee will be the lesser of the amount in Part IV or the Statutory Cap of $7,500.

STATE OF FLORIDA
DOMESTIC WASTEWATER FACILITY PERMIT

PERMITTEE:

Florida Cities Water Company
Mr. Michael Acosta, P.E.
Vice-President, Eng. & Operations
4837 Swift Road, Suite 100
Sarasota, FL 34231

PERMIT NUMBER:	FL0042293-01
ISSUANCE DATE:	4/5/97
EXPIRATION DATE:	09-03-2002
FACILITY I.D. NO:	FL0042293 (Minor)
PATS NUMBER:	292948
GMS NUMBER:	3005P03394

FACILITY:

Barefoot Bay Advanced Wastewater Treatment Facility
7773 Dottie Lane
Brevard County
Barefoot Bay, Florida
Latitude: 27° 53' 18" N Longitude: 80° 32' 12" W

This permit is issued under the provisions of Chapter 403, Florida Statutes, and applicable rules of the Florida Administrative Code and constitutes authorization to discharge to waters of the state under the National Pollutant Discharge Elimination System. The above named permittee is hereby authorized to operate the facilities shown on the application and other documents attached hereto or on file with the Department and made a part hereof and specifically described as follows:

TREATMENT FACILITIES:

An existing 0.9 mgd annual average daily flow (aadf), hereby derated to 0.75 mgd aadf permitted capacity Advanced Wastewater Treatment (AWT) facility. Major process components include influent screening, flow equalization, biological nutrient removal (two anoxic/aeration basins), secondary clarification, chemical feed, filtration, chlorination, dechlorination and aerobic stabilization of residuals with:

EFFLUENT DISPOSAL:

Surface Water Discharge: A 0.75 mgd aadf permitted Limited Wet Weather Discharge to a drainage canal leading to the North Prong of Sebastian River (Class III fresh waters) at Discharge Location D001. The wet weather discharge is limited to ninety one (91) days a year. This wet weather discharge is a reduction of the Utility's existing surface water discharge. The point of discharge for D001 is located approximately at latitude 27° 53' 13" N, longitude 80° 32' 48" W.

REUSE:

Land Application: An existing 1.04 mgd aadf reuse capacity slow-rate public access land application system (R001) consisting of a reclaimed water transmission/distribution system for public access irrigation of golf courses, sod farms and citrus groves at/or near the Barefoot Bay Mobile Home Community, with an

anticipated reuse capacity of 1.25 mgd aadf as shown in the attached Reuse Service Area Map. The permitted reuse capacity is limited to 0.75 mgd which is the wastewater treatment permitted capacity. Land application system R001 includes an existing 0.13 mgd aadf permitted capacity 40-acre sprayfield, the 0.124 mgd aadf permitted capacity 50-Acre Barefoot Bay Golf Course and the 0.787 mgd aadf permitted capacity H & S Grove Site, which will be converted to a sod farm, one (1) existing 1.8 mg on-site lined substandard water storage pond and one (1) existing 4.0 mg reclaimed water storage pond. Land application system R001 is located approximately at latitude 27° 52' 48" N, longitude 80° 32' 55" W.

IN ACCORDANCE WITH: The limitations, monitoring requirements and other conditions as set forth in Pages 1 through 24 of this permit including the enclosed Discharge Monitoring Report (DMR). This permit supersedes and replaces Permit No. DC05-241879, the temporary authorization to operate the facility contained in the Second Amended Consent Order OGC File No. 87-0153 and Federal NPDES Permit No. FL 0042293, which are now considered null and void.

I. RECLAIMED WATER AND EFFLUENT LIMITATIONS AND MONITORING REQUIREMENTS

A. Surface Water Discharges

1. During the period beginning on the issuance date and lasting through the expiration date of this permit, the permittee is authorized to discharge effluent from Outfall D001 to a drainage canal leading to the North Prong of Sebastian River. This limited wet weather discharge is authorized only for ninety one days a year. Such discharge shall be limited and monitored by the permittee as specified below:

			Effluent Limitations				Monitoring Requirements			
Parameter	Units	Max/Min	Annual Average	Monthly Average	Weekly Average	Single Sample	Monitoring Frequency	Sample Type	Monitoring Location Site Number	Notes
Flow	mgd	Maximum	0.75	Report	-	-	Continuous	Recording flow meters and totalizers	EFF-1	See Cond.I.A.4.
Carbonaceous Biochemical Oxygen Demand (5 day)	mg/L	Maximum	5.0	6.25	7.5	10.0	Weekly	16-hour flow proportioned composite	EFD-1	
Total Suspended Solids	mg/L	Maximum	5.0	6.25	7.5	10.0	Weekly	16-hour flow proportioned composite	EFD-1	
pH	std. units	Range	-	-	-	6.0 to 8.5	5 Days/Week	Grab	EFD-2	
Fecal Coliform Bacteria	See Permit Condition I.A.5.						Weekly	Grab	EFA-2	
Total Residual Chlorine (For Disinfection)	mg/L	Minimum	-	-	-	1.0	Continuous	Analyzer	EFA-2	See Cond.I.A.3., 6.
Total Residual Chlorine (For Dechlorination)	mg/L	Maximum	-	-	-	0.01	Weekly	Grab	EFD-2	
Nitrogen, Total as N	mg/L as N	Maximum	3.0	3.75	4.5	6.0	Weekly	16-hour flow proportioned composite	EFD-1	
Ammonia, Total as N	mg/L as N	Maximum	-	Report	-	-	Weekly	16-hour flow proportioned composite	EFD-1	
Phosphorous, Total as P	mg/L as P	Maximum	1.0	1.25	1.5	2.0	Weekly	16-hour flow proportioned composite	EFD-1	
Dissolved Oxygen (DO)	mg/L	Minimum	-	-	-	5.0	Weekly	Grab	EFD-2	
Whole Effluent Toxicity	% effluent	Minimum	See Permit Condition I.A.7.				-	Grab	EFD-2	

2. Effluent samples shall be taken at the monitoring site locations listed in Permit Condition I. A. 1. and as described below:

Monitoring Location Site Number	Description of Monitoring Location
EFA-2	Sampling point at the end of chlorine contact chamber.
EFD-1	Automatic sampler at the end of dechlorination chamber.
EFD-2	Sampling point at the end of the dechlorination chamber.
EFF-1	90° v-notch weir and flow recorder downstream of dechlorination chamber.

3. Hourly measurement of total residual chlorine for disinfection during the period of required operator attendance may be substituted for continuous measurement. *[Chapter 62-601, Figure 2, Footnotes 1 and 2, 5-31-93]*

4. Recording flow meters and totalizers shall be utilized to measure flow and calibrated at least annually. *[62-601.200(17) and .500(6), 5-31-93]*

5. The arithmetic mean of the monthly fecal coliform values collected during an annual period shall not exceed 14 per 100 mL of effluent sample. The median value of the fecal coliform values for a minimum number of 10 samples of effluent each collected on a separate day during a period of 30 consecutive days (monthly), shall not exceed 14 per 100 mL of sample. No more than 10 percent of the samples collected (the 90th percentile value) during a period of 30 consecutive days shall exceed 43 fecal coliform values per 100 mL of sample. Any one sample shall not exceed 86 fecal coliform values per 100 mL of sample. Note: To report the 90th percentile value, list the fecal coliform values obtained during the month in ascending order. Report the value of the sample that corresponds to the 90th percentile (multiply the number of samples by 0.9). For example, for 30 samples, report the corresponding fecal coliform number for the 27th value of ascending order. *[62-600.440(6)(c), 6-8-93]*

6. A minimum of 1.0 mg/L total residual chlorine must be maintained for a minimum contact time of 15 minutes based on peak hourly flow. *[62-600.440(5)(b) and (6)(b), 6-8-93]*

7. The permittee shall initiate the series of tests described below beginning with the first discharge event from the date of issuance of this permit to evaluate whole effluent toxicity of the discharge from outfall D001. All test species, procedures and quality assurance criteria used shall be in accordance with Methods for Measuring Acute Toxicity of Effluents to Freshwater and Marine Organisms, EPA/600/4-90/027F, or the most current edition. The control water and dilution water used will be moderately hard water as described in EPA/600/4-90/027F, Table 6, or the most current edition. A standard reference toxicant quality assurance (QA) acute toxicity test shall be conducted concurrently or no greater than 30 days before the date of the "routine" test, with each species used in the toxicity tests. The results of all QA toxicity tests shall be submitted with the discharge monitoring report (DMR). Any deviation of the bioassay procedures outlined herein shall be submitted in writing to the Department for review and approval prior to use.

   i. a. The permittee shall conduct 96-hour acute static renewal, multi-concentration (definitive) toxicity tests using the daphnid, Ceriodaphnia dubia, and the bannerfin shiner, Cyprinella leedsi. All tests will be conducted on single grab samples collected at evenly-spaced (6-hr) intervals not to exceed four (4) grab samples over a 24-hour discharge period. Each sample is to be used in a separate test in order to catch any peaks of toxicity and to account for daily variations in effluent quality.

b. If control mortality exceeds 10% for either species in any test, the test(s) for that species (including the control) shall be repeated. A test will be considered valid only if control mortality does not exceed 10% for either species. If, in any separate grab sample test, 100% mortality occurs prior to the end of the test, and control mortality is less than 10% at that time, that test (including the control) shall be terminated with the conclusion that the sample demonstrates unacceptable acute toxicity.

c. All "routine" tests shall be conducted using a control (0% effluent) and the following test concentrations: 100%, 50%, 25%, 12.5% and 6.25% effluent.

d. Mortalities of greater than 50% in a 100% effluent or a calculated LC50 < 100% effluent in any sample will constitute a violation of these permit conditions, and Rule 62-302.200(1), Rule 62-302.500(1)(d), and Rule 62-4.244(3)(a), F. A. C.

ii. a. The toxicity tests specified above shall be conducted once per discharge, in any twelve month period during which the facility discharges with no greater than one (1) routine test per consecutive twelve month period. Should the facility not discharge in a twelve month period, the permittee must notify the Department in writing that no discharge occurred during that twelve month period.

b. Results from "routine" tests shall include the LC50 values with 95% confidence intervals and be reported according to EPA/600/4-90/027F, Section 12, Report Preparation (or the most current edition), and shall be submitted to:

Florida Department of Environmental Protection
Central District Office
3319 Maguire Boulevard Suite 232
Orlando FL 32802-3767

iii. a. If an acute toxicity violation (mortalities of greater than 50% in a 100% effluent or a calculated LC50 < 100% effluent in any sample) is found in a "routine" test, the permittee shall conduct an additional multi-concentration test on each species indicating an acute toxicity violation. The additional test will include grab samples taken as described in 1.a. and run as separate definitive analyses. Results for each additional test will include the determination of LC50 values with 95% confidence limits. Additionally, a sample of sufficient size for chemistry analyses shall be taken concurrently with each bioassay sample. If the follow-up bioassay indicates the presence of toxicity, the chemistry samples shall be run. If the follow-up samples do not indicate the presence of toxicity, the chemistry samples shall not be run. Chemistry analyses shall include: metals, pesticides, herbicides and unionized ammonia. If the discharge ceases before additional, follow-up test samples can be collected, the follow-up test and companion chemistries shall be collected during the next discharge event(s) until two (2) valid tests are run.

b. Results from additional tests, required due to unacceptable acute toxicity in the "routine" tests, shall be submitted in a report prepared according to EPA/600/4-90/027F, Section 12, or the most current edition and submitted within 45 days of completion of each additional, valid tests. If the additional test(s) demonstrate unacceptable acute toxicity, the permittee will meet with the Department within 30 days of the report following the second follow-up test to identify corrective actions necessary to remedy the observed acute toxicity violations.

8. Dissolved oxygen shall not average less than 5.0 mg/L in a 24-hour period and shall never be less than 4.0 mg/L. *[62-302.530(31)]*

9. The permittee shall report the following information to the Department in the monthly Discharge Monitoring Report (DMR):

   (a) A list of days on which limited wet weather discharge to the surface receiving water body occurred;
   (b) The flow rate of the limited wet weather discharge on the days of discharge;
   (c) The concentrations of the parameters listed in Permit Condition I.A.1. of the effluent being discharged;
   (d) An explanation of any factors contributing to the limited wet weather discharge;
   (e) The cumulative number of days during the calendar year during which the limited wet weather discharge was activated; and
   (f) The month's rainfall and the cumulative rainfall during the calendar year during which the limited wet weather discharge was activated.

   [62-610.860(9), 1-9-96]

B. Reuse and Land Application Systems

1. During the period beginning on the issuance date and lasting through the expiration date of this permit, the permittee is authorized to direct reclaimed water to Reuse System(s) R001. Such reclaimed water shall be limited and monitored by the permittee as specified below:

			Reclaimed Water Limitations				Monitoring Requirements			
Parameter	Units	Max/Min	Annual Average	Monthly Average	Weekly Average	Single Sample	Monitoring Frequency	Sample Type	Monitoring Location Site Number	Notes
Flow	mgd	Maximum	0.75	Report	-	-	Continuous	Recording flow meters and totalizers	EFF-2	See Cond.I.B.3.
Carbonaceous Biochemical Oxygen Demand (5 day)	mg/L	Maximum	20.0	30.0	45.0	60.0	Weekly	16-hour flow proportioned composite	EFA-1	
Total Suspended Solids	mg/L	Maximum	-	-	-	5.0	Daily	Grab	EFB-1	
pH	std. units	Range	-	-	-	6.0 to 8.5	5 Days/Week	Grab	EFA-2	
Fecal Coliform Bacteria	See Permit Condition I.B.4.						Daily	Grab	EFA-2	
Total Residual Chlorine (For Disinfection)	mg/L	Minimum	-	-	-	1.0	Continuous	Analyzer	EFA-2	See Cond.I.B.5.
Turbidity	NTU	Maximum	See Permit Condition I.B.6.				Continuous	Analyzer	EFB-1	

2. Reclaimed water samples shall be taken at the monitoring site locations listed in Permit Condition I. B. 1. and as described below:

Monitoring Location Site Number	Description of Monitoring Location
EFA-1	Automatic sampler at end of the chlorine contact chamber.
EFA-2	Sampling point at the end of the chlorine contact chamber.
EFB-1	Sampling point after filtration and prior to chlorination.
EFF-2	Propeller meter at downstream of the effluent transfer pumps.

3. Recording flow meters and totalizers shall be utilized to measure flow and calibrated at least annually. *[62-601.200(17) and .500(6), 5-31-93]*

4. Over a 30 day period, 75 percent of the fecal coliform values (the 75th percentile value) shall be below the detection limits. Any one sample shall not exceed 25 fecal coliform values per 100 mL of sample. Any one sample shall not exceed 5.0 milligrams per liter of total suspended solids (TSS) at a point before application of the disinfectant. Note: To report the 75th percentile value, list the fecal coliform values obtained during that month in ascending order. Report the value of the sample that corresponds to the 75th percentile (multiply the number of samples by 0.75). For example, for 30 samples, report the corresponding fecal coliform value for the 23rd value of ascending order. *[62-600.440(5)(f), 6-8-93]*

5. The minimum total chlorine residual shall be limited as described in the approved operating protocol, such that the permit limitation for fecal coliform bacteria will be achieved. In no case shall the total chlorine residual be less than 1.0 mg/L. *[62-600.440(5)(b) and (6)(b), 6-8-93]*

6. The maximum turbidity shall be limited as described in the approved operating protocol, such that the permit limitations for total suspended solids and fecal coliforms will be achieved. *[62-610.463, 1-9-96]*

C. Other Limitations and Monitoring and Reporting Requirements

1. During the period beginning on the issuance date and lasting through the expiration date of this permit, the treatment facility shall be limited and monitored by the permittee as specified below:

			Limitations				Monitoring Requirements			
Parameter	Units	Max/Min	Annual Average	Monthly Average	Weekly Average	Single Sample	Monitoring Frequency	Sample Type	Monitoring Location Site Number	Notes
Flow	mgd	Maximum	0.75	Report	-	-	Continuous	Recording flow meters and totalizers	INF-1	See Cond.I.C.3, 4
Carbonaceous Biochemical Oxygen Demand (5 day)	mg/L	Report	-	Report	-	-	Weekly	16-hour flow proportioned composite	INF-2	See Cond.I.C.3
Total Suspended Solids	mg/L	Report	-	Report	-	-	Weekly	16-hour flow proportioned composite	INF-2	See Cond.I.C.3

2. Samples shall be taken at the monitoring site locations listed in Permit Condition I. C. 1 and as described below:

Monitoring Location Site Number	Description of Monitoring Location
INF-1	Parshall flume at headworks.
INF-2	Automatic sampler located prior to the parshall flume.

3. Influent samples shall be collected so that they do not contain digester supernatant or return activated sludge, or any other plant process recycled waters. *[62-601.500(4), 5-31-93]*

4. Recording flow meters and totalizers shall be utilized to measure flow and calibrated at least annually. *[62-601.200(17) and .500(6), 5-31-93]*

5. Parameters which must be monitored as a result of a surface water discharge shall be analyzed using a sufficiently sensitive method in accordance with 40 CFR Part 136. Parameters which must be monitored as a result of a ground water discharge (i.e., underground injection or land application system) shall be analyzed in accordance with Chapter 62-601, F.A.C. *[62-620.610(18), 11-29-94]*

6. The permittee shall provide safe access points for obtaining representative influent, reclaimed water, and effluent samples which are required by this permit. *[62-601.500(5), 5-31-93]*

7. During the period of operation authorized by this permit, the permittee shall complete and submit to the Department on a monthly basis Discharge Monitoring Report(s) (DMR), Form 62-620.910(10), as attached to this permit. The permittee shall make copies of the attached DMR form(s) and shall submit the completed DMR form(s) to the Department by the twenty-eighth (28th) of the month following the month of operation at the address specified below:

   Florida Department of Environmental Protection
   Wastewater Facilities Regulation Section, Mail Station 3551
   Twin Towers Office Building
   2600 Blair Stone Road
   Tallahassee, Florida 32399-2400

   [62-620.610(18), 11-29-94][62-601.300(1),(2), and (3), 5-31-93]

   Note: Enclosed for your use is a complementary computer diskette containing a copy of all DMRs and Ground Water Monitoring Reports (GWMRs) created using Microsoft Word 6. As required above, the permittee must still submit hard copies of these reports in lieu of a loaded diskette.

8. During the period of operation authorized by this permit, reclaimed water or effluent shall be monitored annually for the primary and secondary drinking water standards contained in Chapter 62-550, F.A.C., (except for turbidity, total coliforms, color, and corrosivity). Twenty-four hour composite samples shall be used to analyze reclaimed water or effluent for the primary and secondary drinking water standards. These monitoring results shall be reported to the Department annually on the Reclaimed Water or Effluent Analysis Report, Form 62-601.900(4), or in another format if requested by the permittee and if approved by the Department as being compatible with data entry into the Department's computer system.

During years when a permit is not renewed, a certification stating that no new non-domestic wastewater dischargers have been added to the collection system since the last reclaimed water or effluent analysis was conducted may be submitted in lieu of the report. The annual reclaimed water or effluent analysis report or the certification shall be completed and submitted in a timely manner so as to be received by the Department's Central District Office by January 1 of each year. *[62-601.300(4), 5-31-93][62-601.300(3), 5-31-93]*

9. The permittee shall submit an annual report of reclaimed water utilization using Form 62-610.300(4)(a)2. by January 1 of each year. *[62-610.870(3), 1-9-96]*

10. Unless specified otherwise in this permit, all reports and notifications required by this permit, including 24-hour notifications, shall be submitted to or reported to, as appropriate, the Department's Central District Office at the address specified below:

Florida Department of Environmental Protection
Central District Office
3319 Maguire Boulevard Suite 232
Orlando, Florida 32803-3767

Phone Number - (407) 894-7555
FAX Number - (407) 897-2966 All FAX copies shall be followed by original copies.

II. RESIDUALS MANAGEMENT REQUIREMENTS

1. The method of residuals use or disposal by this facility is land application.

2. Land application of residuals shall be in accordance with the conditions of this permit and the requirements of Chapter 62-640, F.A.C. *[62-640, 3-1-91]*

3. The domestic wastewater residuals for this facility are classified as Class B.

4. The wastewater treatment facility permittee shall be responsible for proper handling, use, and disposal of its residuals and will be held responsible for any disposal violations that occur unless the permittee can demonstrate that it has delivered residuals that meet the chemical criteria and appropriate stabilization requirements of this permit and that the disposer (e.g. hauler, contractor, or disposal/land application site owner) has legally agreed in writing to accept responsibility for proper disposal. *[62-640.300(3), 3-1-91]*

5. The permittee shall sample and analyze the residuals at least once every 3 months. All samples shall be representative and shall be taken after final treatment of the residuals but before use or disposal. Sampling and analysis shall be in accordance with the U.S. Environmental Protection Agency publication - POTW Sludge Sampling and Analysis Guidance Document, 1989. The following parameters shall be sampled and analyzed:

Parameter	Maximum Concentration	Maximum Cumulative Loading
Total Nitrogen	(Report only) % dry weight	Not applicable
Total Phosphorus	(Report only) % dry weight	Not applicable
Total Potassium	(Report only) % dry weight	Not applicable
Cadmium	100 mg/kg dry weight	4.4 pounds /acre *
Copper	3000 mg/kg dry weight	125 pounds/acre
Lead	1500 mg/kg dry weight	500 pounds/acre
Nickel	500 mg/kg dry weight	125 pounds/acre
Zinc	10,000 mg/kg dry weight	250 pounds/acre
pH	(Report only) standard units	Not applicable
Total Solids	(Report only) %	Not applicable

* The annual application rate for cadmium shall not exceed 0.5 pounds/acre/year.

6. Class B residuals shall not be used on unrestricted access areas. *[62-640.600(6)(b), 3-1-91]*

7. Class B residuals application shall be in accordance with the Agricultural Use Plan(s) approved by the Department for this facility. *[62-640.300(1), 3-1-91]*

8. Root crops, and fruits and vegetables which touch the soil and which are to be consumed raw shall not be grown on the application site for 18 months after the last application of Class B residuals. *[62-640.600(6)(c), 3-1-91]*

9. Fruits and vegetables which do not touch the soil and which are to be consumed raw shall not be harvested from the application site for 30 days following the last application of Class B residuals. Orchard tree crops, which do not come in contact with the residuals due to the application method, are exempted. This exemption does not apply to orchard tree crops which have fallen to the ground before harvesting. *[62-640.600(6)(d), 3-1-91]*

10. Pasture vegetation on the application site shall not be cut or used for grazing by livestock for 30 days following the last application of Class B residuals. *[62-640.600(6)(e), 3-1-91*

11. The public shall be restricted from the application area for 12 months after the last application of Class B residuals. *[62-640.600(6)(f), 3-1-91]*

12. The wastewater treatment facility permittee shall apply for a minor permit revision on DEP Form 62-620.910(9) for new, modified, or expanded residuals land application sites. The facilities permit shall be revised to include the new or revised Agricultural Use Plan(s) prior to application of residuals to the new, modified, or expanded sites. Current Agricultural Use Plan(s) identify residuals landspreading on the following sites: *[62-620.330, 11-29-94]*

		Site Location	
Site Name	Application Area (Acres)	City	County
Clay Whaley Ranch	800.0	St. Cloud	Osceola
Fortson Ranch Site #1	175.0	Fellsmere	Brevard
Fortson Ranch Site #2	371.0	Fellsmere	Brevard
Rolling MeadowRanch	270.0	Palm Bay	Brevard
Hayman's 711 Ranch	6,119.0	-	Osceola
Sun City, Inc.	938.0	Fellsmere	Indian River

13. Annual residuals application rates shall not exceed the agronomic rates based on the nitrogen requirements of the site vegetation in accordance with the approved Agricultural Use Plan(s). *[62-640.700(3)(d), 3-1-91]*

14. Residuals shall be applied with techniques and equipment to assure uniform application over the site. *[62-640.700(3)(n), 3-1-91]*

15. The pH of the domestic wastewater residuals soil mixture shall be 6.5 or greater at the time domestic wastewater residuals are applied. At a minimum, testing shall be done annually. *[62-640.700(3)(h), 3-1-91]*

16. The permittee shall maintain records of application areas and application rates on DEP Form 62-640.900(3) and shall have these records available for inspection upon request by the Department or the appropriate Local Environmental Program. These records shall include:

    a. Date of application of the residuals,
    b. Location of the residuals application site,
    c. Amount of residuals applied or delivered,

d. Identification of specific areas of the site where residuals were applied and acreage of that area,
e. Method of incorporation of residuals (if any),
f. Water table level at time of application, and
g. Concentration of nitrogen and heavy metals in the residuals, percent solids, and date of last analysis.

The permittee shall provide: annual updates to the Agricultural Use Plan(s) to reflect any changes in domestic wastewater residuals characteristics or agricultural practices; summaries of the total residuals, nitrogen, and heavy metals applied on an annual basis; and annual summaries of the cumulative metals applied. Updates to the Agricultural Use Plan(s) and annual summaries, including copies of applicable analytical laboratory reports for the wastewater residuals analysis for that period, shall be submitted to the Department's Central District Office by November 15 of each year. *[62-640.700(3)(e) and (p), 3-1-91]*

III. GROUND WATER MONITORING REQUIREMENTS

1. During the period of operation authorized by this permit, the permittee shall sample ground water in accordance with this permit and the approved ground water monitoring plan prepared in accordance with Rule 62-522.600, F.A.C. *[62-522.600, 4/14/94]*

2. The following monitoring wells shall be sampled quarterly for Land Application System R001:

Monitoring Location Site Number	Depth (Feet)	Aquifer Monitored	Well Type	New or Existing
MW-1	24	Surficial	Intermediate	Existing
MW-2	13	Surficial	Compliance	Existing
MW-3	24	Surficial	Background	Existing

[62-522.600, 4-14-94][62-610.463,1-9-96]

3. The following parameters shall be analyzed for each of the monitoring wells identified in the Permit Condition III.1:

Water level(field measurement)
Nitrate (as N)
Total dissolved solids
Fecal Coliform

[62-522.500 (11) (b), 4-1-94] [62-601.300(3), 62-601.700, and Figure 3 of 62-601, 5-31-93]

4. Ground water monitoring parameters shall be analyzed in accordance with Chapter 62-601, F.A.C. *[62-620.610(18), 11-29-94]*

5. Ground water monitoring test results shall be submitted on Part D of Form 62-620.910(10). Results shall be submitted with the DMR for each year during the period of operation allowed by this permit in accordance with Permit Condition I. C.7. *[62-522.600(10) and (11) (b), 4-14-94] [62-601.300(3), 62-601.700, and Figure 3 of 62-601, 5-31-93] [62-620.610(18), 11-29-94]*

6. Ground water monitoring wells shall be purged prior to sampling to obtain representative samples. *[62-601.700(5), 5-31-93]*

7. In accordance with Part D of Form 62-620.910(10), water levels shall be recorded before evacuating wells for sample collection. Elevation references shall include the top of the well casing and land surface at each well site (NGVD allowable) at a precision of plus or minus 0.1 foot. *[62-610.424(3), 4-2-94]*

IV. ADDITIONAL REUSE AND LAND APPLICATION REQUIREMENTS

Part III Public Access System(s)

1. Use of reclaimed water is authorized within the general service area identified in the attached map. The following uses of reclaimed water are authorized within this general service area: Golf Course Irrigation, Edible Crop Irrigation, Agricultural Irrigation (Other than edible crops). *[62-620.630(10)(d), 11-29-94]*

2. This reuse system includes the following major users (i.e., using 0.1 mgd or more of reclaimed water):

User Name	User Type	Anticipated Capacity (MGD)	Acreage
Barefoot Bay Golf Course	Golf Courses	0.12	50.0
Sprayfield	Sod Farms	0.13	40.0
H & S Grove Site	Farms and Other Agricultural Activities	0.79	294.0
Wheeler Farms Grove Site	Farms and Other Agricultural Activities	0.21	77.0
Total		1.25	461

[62-610.800(5), 1-9-96][62-620.630(10)(b), 11-29-94]

3. The permittee shall maintain an inventory of commercial agricultural operations using reclaimed water to irrigate edible crops. An updated inventory shall be submitted to the Central District Office at least 30 days prior to addition of an agricultural operation and with the annual reclaimed water utilization report required by Permit Condition I.D.9. *[62-610.475(5) and 62-610.870(3), 4-2-90]*

4. All ground water quality criteria specified in Chapter 62-520, F.A.C., shall be met at the edge of the zone of discharge. For major users of reclaimed water (i.e., using 0.1 mgd or more), the zone of discharge shall extend horizontally 100 feet from the application site or to the user's property line, whichever is less, and vertically to the base of the surficial aquifer. For other users, the zone of discharge shall extend horizontally to the boundary of the general service area identified in the attached map and vertically to the base of the surficial aquifer. *[62-520.200(23), 4-14-94] [62-522.400 and 62-522.410, 4-14-94]*

5. New major users of reclaimed water (i.e., using 0.1 mgd or more) may be added to the reuse system using the general permit described in Rule 62-610.890, F.A.C., if the requirements in this rule are complied with. Application for use of this general permit shall be made using Form 62-610.300(4)(a)1. *[62-610.890, 4-2-94]*

6. The treatment facilities shall be operated in accordance with the approved operating protocol. Only reclaimed water that meets the criteria established in the approved operating protocol may be released to system storage or to the reuse system. Reclaimed water that fails to meet the criteria in the approved operating protocol shall be directed to the substandard water storage pond. The operating protocol shall be reviewed and updated periodically (at least once each year) to ensure continuous compliance with the minimum treatment and disinfection requirements. Updated operating protocols shall be submitted to the Department's Central District Office for review and approval. *[62-610.320(6) and 62-610.463(2), 1-9-96]*

7. Cross-connections to the potable water system are prohibited. *[62-610.469(7), 1-9-96]*

8. A cross-connection control program shall be implemented and/or remain in effect within the areas where reclaimed water will be provided for use. *[62-610.469(7), 1-9-96]*

9. Maximum obtainable separation of reclaimed water lines and potable water lines shall be provided and the minimum separation distances specified in Rule 62-610.469(7), F.A.C., shall be provided. Reuse facilities shall be color coded or marked. Underground piping which is not manufactured of metal or concrete shall be color coded using Pantone Purple 522C using light stable colorants. Underground metal and concrete pipe shall be color coded or marked using purple as the predominant color. *[62-610.469(7), 1-9-96]*

10. In constructing reclaimed water distribution piping, the permittee shall maintain a 75-foot setback distance from a reclaimed water transmission facility to public water supply wells. No setback distances are required to other potable water supply wells or to any nonpotable water supply wells. *[62-610.471(3), 1-9-96]*

11. A setback distance of 75 feet shall be maintained between the edge of the wetted area and potable water supply wells, unless the utility adopts and enforces an ordinance prohibiting potable water supply wells within the reuse service area. No setback distances are required to any nonpotable water supply well, to any surface water, to any developed areas, or to any private swimming pools, hot tubs, spas, saunas, picnic tables, barbecue pits, or barbecue grills. *[62-610.471(1), (2), (5), and (7), 1-9-96]*

12. Reclaimed water shall not be used to fill swimming pools, hot tubs, or wading pools. *[62-610.469(4), 1-9-96]*

13. Low trajectory nozzles, or other means to minimize aerosol formation shall be used within 100 feet from outdoor public eating, drinking, or bathing facilities. *[62-610.471(6), 1-9-96]*

14. A setback distance of 100 feet shall be maintained from indoor aesthetic features using reclaimed water to adjacent indoor public eating and drinking facilities. *[62-610.471(8), 1-9-96]*

15. The public shall be notified of the use of reclaimed water. This shall be accomplished by posting of advisory signs in areas where reuse is practiced, notes on scorecards, or other methods. *[62-610.468(2), 1-9-96]*

16. Routine aquatic weed control and regular maintenance of storage pond embankments and access areas are required. *[62-610.414 and 62-610.464, 1-9-96]*

17. Overflows from emergency discharge facilities on storage ponds shall be reported as an abnormal event to the Department's Central District Office within 24 hours of an occurrence

as an abnormal event. The provisions of Rule 62-610.880(9), F.A.C., shall be met. *[62-610.800(9), 1-9-96]*

V. OPERATION AND MAINTENANCE REQUIREMENTS

1. During the period of operation authorized by this permit, the wastewater facilities shall be operated under the supervision of a(n) operator(s) certified in accordance with Chapter 61E12-41, F.A.C. In accordance with Chapter 62-699, F.A.C., this facility is a Category I, Class B facility and, at a minimum, operators with appropriate certification must be on the site as follows:

   A Class C or higher operator 8 hours/day for 7 days/week. The lead operator must be a Class B minimum, and must be on duty for eight (8) hours per day for five (5) days per week, provided that a lead/chief operator, or a backup Class B lead operator, is available by phone or pager during weekends and/or holidays, must be capable of immediately responding to any emergency situation that may occur at the plant and the automatic computer controls, monitoring and diversion equipment shall be in operation and fuctional at all times including weekends.

   [62-699, 5-20-94] [62-620.630(3), 11-29-94] [62-699.310, 5-20-92] [62-610.462, 1-9-96]

2. A certified operator shall be on-site and in charge of each required shift and for periods of required staffing time when the lead operator is not on-site. A certified operator shall be on call during periods the plant is unattended. *[62-699.311(10), (5), and (1), 5-20-92]*

3. The application to renew this permit shall include an updated capacity analysis report prepared in accordance with Rule 62-600.405, F.A.C. *[62-600.405(5), 6-8-93]*

4. The application to renew this permit shall include a detailed operation and maintenance performance report prepared in accordance with Rule 62-600.735, F.A.C. *[62-600.735(1), 6-8-93]*

5. The permittee shall maintain the following records and make them available for inspection on the site of the permitted facility:

   a. Records of all compliance monitoring information, including all calibration and maintenance records and all original strip chart recordings for continuous monitoring instrumentation and a copy of the laboratory certification showing the certification number of the laboratory, for at least three years from the date the sample or measurement was taken;

   b. Copies of all reports required by the permit for at least three years from the date the report was prepared;

   c. Records of all data, including reports and documents, used to complete the application for the permit for at least three years from the date the application was filed;

   d. Monitoring information, including a copy of the laboratory certification showing the laboratory certification number, related to the residuals use and disposal activities for the time period set forth in Chapter 62-640, F.A.C., for at least three years from the date of sampling or measurement;

   e. A copy of the current permit;

f. A copy of the current operation and maintenance manual as required by Chapter 62-600, F.A.C.;

g. A copy of the facility record drawings;

h. Copies of the licenses of the current certified operators; and

i. Copies of the logs and schedules showing plant operations and equipment maintenance for three years from the date of the logs or schedules. The logs shall, at a minimum, include identification of the plant; the signature and certification number of the operator(s) and the signature of the person(s) making any entries; date and time in and out; specific operation and maintenance activities; tests performed and samples taken; and major repairs made. The logs shall be maintained on-site in a location accessible to 24-hour inspection, protected from weather damage, and current to the last operation and maintenance performed.

[62-620.350,11-29-94][61E12-41.010(1)(e), 11-02-93]

VI. SCHEDULES

Section VI is not applicable to this facility.

VII. INDUSTRIAL PRETREATMENT PROGRAM REQUIREMENTS

This facility is not required to have a pretreatment program at this time. *[62-625.500, 11-29-94]*

VIII. OTHER SPECIFIC CONDITIONS

1. If the permittee wishes to continue operation of this wastewater facility after the expiration date of this permit, the permittee shall submit an application for renewal, using Department Forms 62-620.910(1) and (2), no later than one-hundred and eighty days (180) prior to the expiration date of this permit. *[62-620.410(5), 11-26-94]*

2. Florida water quality criteria and standards shall not be violated as a result of any discharge or land application of reclaimed water or residuals from this facility. *[62-600.320(9), 11-29-94 and 62-302.510(5), 2-27-95][62-610.850(1)(a) and (2)(a),1-9-96][62-640.700(3)(c), 3-1-91]*

3. In the event that the treatment facilities or equipment no longer function as intended, are no longer safe in terms of public health and safety, or odor, noise, aerosol drift, or lighting adversely affects neighboring developed areas at the levels prohibited by Rule 62-600.400(2)(a), F.A.C., corrective action (which may include additional maintenance or modifications of the permitted facilities) shall be taken by the permittee. Other corrective action may be required to ensure compliance with rules of the Department. *[62-600.410(8), 6-8-93]*

4. The deliberate introduction of stormwater in any amount into collection/transmission systems designed solely for the introduction (and conveyance) of domestic/industrial wastewater; or the deliberate introduction of stormwater into collection/transmission systems designed for the introduction or conveyance of combinations of storm and domestic/industrial wastewater in amounts which may reduce the efficiency of pollutant removal by the treatment plant is prohibited. *[62-604.130(3), 5-31-93]*

5. Collection/transmission system overflows shall be reported to the Department in accordance with Permit Condition IX. 20. *[62-604.550, 5-31-93] [62-620.610(20), 11-29-94]*

6. The operating authority of a collection/transmission system and the permittee of a treatment plant are prohibited from accepting connections of wastewater discharges which have not received necessary pretreatment or which contain materials or pollutants (other than normal domestic wastewater constituents):

   a. Which may cause fire or explosion hazards; or

   b. Which may cause excessive corrosion or other deterioration of wastewater facilities due to chemical action or pH levels; or

   c. Which are solid or viscous and obstruct flow or otherwise interfere with wastewater facility operations or treatment; or

   d. Which result in treatment plant discharges having temperatures above 40°C.

   [62-604.130(4), 5-31-93]

7. The treatment facility, storage ponds, rapid infiltration basins, and/or infiltration trenches shall be enclosed with a fence or otherwise provided with features to discourage the entry of animals and unauthorized persons. *[62-610.464(4), 1-9-96] [and 62-600.410, 6-8-93]*

8. Screenings and grit removed from the wastewater facilities shall be collected in suitable containers and hauled to a Department approved Class I landfill or to a landfill approved by the Department for receipt/disposal of screenings and grit. *[62-7.540, 12-10-85]*

9. The permittee shall provide adequate notice to the Department of the following:

   a. Any new introduction of pollutants into the facility from an industrial discharger which would be subject to Chapter 403, F.S., and the requirements of Chapter 62-620, F.A.C. if it were directly discharging those pollutants; and

   b. Any substantial change in the volume or character of pollutants being introduced into that facility by a source which was identified in the permit application and known to be discharging at the time the permit was issued.

   Adequate notice shall include information on the quality and quantity of effluent introduced into the facility and any anticipated impact of the change on the quantity or quality of effluent or reclaimed water to be discharged from the facility.

   [62-620.625(2), 11-29-94]

IX. GENERAL CONDITIONS

1. The terms, conditions, requirements, limitations and restrictions set forth in this permit are binding and enforceable pursuant to Chapter 403, Florida Statutes. Any permit noncompliance constitutes a violation of Chapter 403, Florida Statutes, and is grounds for enforcement action, permit termination, permit revocation and reissuance, or permit revision. *[62-620.610(1), 11-29-94]*

2. This permit is valid only for the specific processes and operations applied for and indicated in the approved drawings or exhibits. Any unauthorized deviations from the approved

drawings, exhibits, specifications or conditions of this permit constitutes grounds for revocation and enforcement action by the Department. *[62-620.610(2), 11-29-94]*

3. As provided in Subsection 403.087(6), F.S., the issuance of this permit does not convey any vested rights or any exclusive privileges. Neither does it authorize any injury to public or private property or any invasion of personal rights, nor authorize any infringement of federal, state, or local laws or regulations. This permit is not a waiver of or approval of any other Department permit or authorization that may be required for other aspects of the total project which are not addressed in this permit. *[62-620.610(3), 11-29-94]*

4. This permit conveys no title to land or water, does not constitute state recognition or acknowledgment of title, and does not constitute authority for the use of submerged lands unless herein provided and the necessary title or leasehold interests have been obtained from the State. Only the Trustees of the Internal Improvement Trust Fund may express State opinion as to title. *[62-620.610(4), 11-29-94]*

5. This permit does not relieve the permittee from liability and penalties for harm or injury to human health or welfare, animal or plant life, or property caused by the construction or operation of this permitted source; nor does it allow the permittee to cause pollution in contravention of Florida Statutes and Department rules, unless specifically authorized by an order from the Department. The permittee shall take all reasonable steps to minimize or prevent any discharge, reuse of reclaimed water, or residuals use or disposal in violation of this permit which has a reasonable likelihood of adversely affecting human health or the environment. It shall not be a defense for a permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit. *[62-620.610(5), 11-29-94]*

6. If the permittee wishes to continue an activity regulated by this permit after its expiration date, the permittee shall apply for and obtain a new permit. *[62-620.610(6), 11-29-94]*

7. The permittee shall at all times properly operate and maintain the facility and systems of treatment and control, and related appurtenances, that are installed and used by the permittee to achieve compliance with the conditions of this permit. This provision includes the operation of backup or auxiliary facilities or similar systems when necessary to maintain or achieve compliance with the conditions of the permit. *[62-620.610(7), 11-29-94]*

8. This permit may be modified, revoked and reissued, or terminated for cause. The filing of a request by the permittee for a permit revision, revocation and reissuance, or termination, or a notification of planned changes or anticipated noncompliance does not stay any permit condition. *[62-620.610(8), 11-29-94]*

9. The permittee, by accepting this permit, specifically agrees to allow authorized Department personnel, including an authorized representative of the Department and authorized EPA personnel, when applicable, upon presentation of credentials or other documents as may be required by law, and at reasonable times, depending upon the nature of the concern being investigated, to:

   a. Enter upon the permittee's premises where a regulated facility, system, or activity is located or conducted, or where records shall be kept under the conditions of this permit;

   b. Have access to and copy any records that shall be kept under the conditions of this permit;

c. Inspect the facilities, equipment, practices, or operations regulated or required under this permit; and

d. Sample or monitor any substances or parameters at any location necessary to assure compliance with this permit or Department rules.

[62-620.610(9), 11-29-94]

10. In accepting this permit, the permittee understands and agrees that all records, notes, monitoring data, and other information relating to the construction or operation of this permitted source which are submitted to the Department may be used by the Department as evidence in any enforcement case involving the permitted source arising under the Florida Statutes or Department rules, except as such use is proscribed by Section 403.111, Florida Statutes, or Rule 62-620.302, Florida Administrative Code. Such evidence shall only be used to the extent that it is consistent with the Florida Rules of Civil Procedure and applicable evidentiary rules. *[62-620.610(10), 11-29-94]*

11. When requested by the Department, the permittee shall within a reasonable time provide any information required by law which is needed to determine whether there is cause for revising, revoking and reissuing, or terminating this permit, or to determine compliance with the permit. The permittee shall also provide to the Department upon request copies of records required by this permit to be kept. If the permittee becomes aware of relevant facts that were not submitted or were incorrect in the permit application or in any report to the Department, such facts or information shall be promptly submitted or corrections promptly reported to the Department. *[62-620.610(11), 11-29-94]*

12. Unless specifically stated otherwise in Department rules, the permittee, in accepting this permit, agrees to comply with changes in Department rules and Florida Statutes after a reasonable time for compliance; provided, however, the permittee does not waive any other rights granted by Florida Statutes or Department rules. A reasonable time for compliance with a new or amended surface water quality standard, other than those standards addressed in Rule 62-302.500, F.A.C., shall include a reasonable time to obtain or be denied a mixing zone for the new or amended standard. *[62-620.610(12), 11-29-94]*

13. The permittee, in accepting this permit, agrees to pay the applicable regulatory program and surveillance fee in accordance with Rule 62-4.052, F.A.C. *[62-620.610(13), 11-29-94]*

14. This permit is transferable only upon Department approval in accordance with Rule 62-620.340, F.A.C. The permittee shall be liable for any noncompliance of the permitted activity until the transfer is approved by the Department. *[62-620.610(14), 11-29-94]*

15. The permittee shall give the Department written notice at least 60 days before inactivation or abandonment of a wastewater facility and shall specify what steps will be taken to safeguard public health and safety during and following inactivation or abandonment. *[62-620.610(15), 11-29-94]*

16. The permittee shall apply for a revision to the Department permit in accordance with Rules 62-620.300, 62-620.420 or 62-620.450, F.A.C., as applicable, at least 90 days before construction of any planned substantial modifications to the permitted facility is to commence or with Rule 62-620.300 for minor modifications to the permitted facility. A revised permit shall be obtained before construction begins except as provided in Rule 62-620.300, F.A.C. *[62-620.610(16), 11-29-94]*

17. The permittee shall give advance notice to the Department of any planned changes in the permitted facility or activity which may result in noncompliance with permit requirements. The permittee shall be responsible for any and all damages which may result from the changes and may be subject to enforcement action by the Department for penalties or revocation of this permit. The notice shall include the following information:

    a. A description of the anticipated noncompliance;

    b. The period of the anticipated noncompliance, including dates and times; and

    c. Steps being taken to prevent future occurrence of the noncompliance.

    [62-620.610(17), 11-29-94]

18. Sampling and monitoring data shall be collected and analyzed in accordance with Rule 62-4.246, Chapters 62-160 and 62-601, F.A.C., and 40 CFR 136, as appropriate.

    a. Monitoring results shall be reported at the intervals specified elsewhere in this permit and shall be reported on a Discharge Monitoring Report (DMR), DEP Form 62-620.910(10).

    b. If the permittee monitors any contaminant more frequently than required by the permit, using Department approved test procedures, the results of this monitoring shall be included in the calculation and reporting of the data submitted in the DMR.

    c. Calculations for all limitations which require averaging of measurements shall use an arithmetic mean unless otherwise specified in this permit.

    d. Any laboratory test required by this permit for domestic wastewater facilities shall be performed by a laboratory that has been certified by the Department of Health and Rehabilitative Services (DHRS) under Chapter 10D41, F.A.C., to perform the test. On-site tests for dissolved oxygen, pH, and total chlorine residual shall be performed by a laboratory certified to test for those parameters or under the direction of an operator certified under Chapter 61E12-41, F.A.C.

    e. Under Chapter 62-160, F.A.C., sample collection shall be performed by following the protocols outlined in "DER Standard Operating Procedures for Laboratory Operations and Sample Collection Activities" (DER-QA-001/92). Alternatively, sample collection may be performed by an organization who has an approved Comprehensive Quality Assurance Plan (CompQAP) on file with the Department. The CompQAP shall be approved for collection of samples from the required matrices and for the required tests.

    [62-620.610(18), 11-29-94]

19. Reports of compliance or noncompliance with, or any progress reports on, interim and final requirements contained in any compliance schedule detailed elsewhere in this permit shall be submitted no later than 14 days following each schedule date. *[62-620.610(19), 11-29-94]*

20. The permittee shall report to the Department any noncompliance which may endanger health or the environment. Any information shall be provided orally within 24 hours from the time the permittee becomes aware of the circumstances. A written submission shall also be provided within five days of the time the permittee becomes aware of the circumstances. The written submission shall contain: a description of the noncompliance and its cause; the period of noncompliance including exact dates and time, and if the noncompliance has not

been corrected, the anticipated time it is expected to continue; and steps taken or planned to reduce, eliminate, and prevent recurrence of the noncompliance.

a. The following shall be included as information which must be reported within 24 hours under this condition:

1. Any unanticipated bypass which causes any reclaimed water or effluent to exceed any permit limitation or results in an unpermitted discharge,

2. Any upset which causes any reclaimed water or the effluent to exceed any limitation in the permit,

3. Violation of a maximum daily discharge limitation for any of the pollutants specifically listed in the permit for such notice, and

4. Any unauthorized discharge to surface or ground waters.

b. If the oral report has been received within 24 hours, the noncompliance has been corrected, and the noncompliance did not endanger health or the environment, the Department shall waive the written report.

[62-620.610(20), 11-29-94]

21. The permittee shall report all instances of noncompliance not reported under Permit Conditions IX. 18. and 19. of this permit at the time monitoring reports are submitted. This report shall contain the same information required by Permit Condition IX. 20 of this permit. *[62-620.610(21), 11-29-94]*

22. Bypass Provisions.

a. Bypass is prohibited, and the Department may take enforcement action against a permittee for bypass, unless the permittee affirmatively demonstrates that:

1. Bypass was unavoidable to prevent loss of life, personal injury, or severe property damage; and

2. There were no feasible alternatives to the bypass, such as the use of auxiliary treatment facilities, retention of untreated wastes, or maintenance during normal periods of equipment downtime. This condition is not satisfied if adequate back-up equipment should have been installed in the exercise of reasonable engineering judgment to prevent a bypass which occurred during normal periods of equipment downtime or preventive maintenance; and

3. The permittee submitted notices as required under Permit Condition IX. 22. b. of this permit.

b. If the permittee knows in advance of the need for a bypass, it shall submit prior notice to the Department, if possible at least 10 days before the date of the bypass. The permittee shall submit notice of an unanticipated bypass within 24 hours of learning about the bypass as required in Permit Condition IX. 20. of this permit. A notice shall include a description of the bypass and its cause; the period of the bypass, including exact dates and times; if the bypass has not been corrected, the anticipated time it is expected to continue; and the steps taken or planned to reduce, eliminate, and prevent recurrence of the bypass.

c. The Department shall approve an anticipated bypass, after considering its adverse effect, if the permittee demonstrates that it will meet the three conditions listed in Permit Condition IX. 22. a. 1. through 3. of this permit.

d. A permittee may allow any bypass to occur which does not cause reclaimed water or effluent limitations to be exceeded if it is for essential maintenance to assure efficient operation. These bypasses are not subject to the provisions of Permit Condition IX. 22. a. through c. of this permit.

[62-620.610(22), 11-29-94]

23. Upset Provisions

a. A permittee who wishes to establish the affirmative defense of upset shall demonstrate, through properly signed contemporaneous operating logs, or other relevant evidence that:

1. An upset occurred and that the permittee can identify the cause(s) of the upset;

2. The permitted facility was at the time being properly operated;

3. The permittee submitted notice of the upset as required in Permit Condition IX. 20. of this permit; and

4. The permittee complied with any remedial measures required under Permit Condition IX. 5. of this permit.

b. In any enforcement proceeding, the permittee seeking to establish the occurrence of an upset has the burden of proof.

c. Before an enforcement proceeding is instituted, no representation made during the Department review of a claim that noncompliance was caused by an upset is final agency action subject to judicial review.

RE: Barefoot Bay WWTP

Dear Mr. French:

Acknowledgment is made of receipt of your application on March 6, 1990, for a National Pollutant Discharge Elimination System (NPDES) permit.

ur application is considered complete and has been assigned NPDES No. FL0042293, which should be referred to in future correspondence concerning this facility. Issuance of this NPDES permit has been assigned to Bridget Crawford. If you wish to inquire about the issuance schedule or have questions, please call her at (404) 347-3012.

Sincerely yours,

Roosevelt Childress

RE: NPDES Permit Application
Barefoot Bay WWTP

Gentlemen:

Enclosed please find our application Forms 1 and 2E for an NPDES Permit for the above referenced facility. If you have any questions with regard to this application, please don't hesitate to contact me.

Sincerely,

Robert H. French, P.E.
Senior Vice President

FORM 1 GENERAL

U.S. ENVIRONMENTAL PROTECTION AGENCY

GENERAL INFORMATION

Consolidated Permits Program

(Read the "General Instructions" before starting.)

I. EPA I.D. NUMBER

F

CASE ITEMS

I. EPA I.D. NUMBER

III. FACILITY NAME

V. FACILITY MAILING ADDRESS

VI. FACILITY LOCATION

PLEASE PLACE LABEL IN THIS SPACE

GENERAL INSTRUCTIONS

If a preprinted label has been provided, affix it in the designated space. Review the information carefully; if any of it is incorrect, cross through it and enter the correct data in the appropriate fill—in area below. Also, if any of the preprinted data is absent *(the area to the left of the label space lists the information that should appear)*, please provide it in the proper fill—in area(s) below. If the label is complete and correct, you need not complete Items I, III, V, and VI *(except VI-B which must be completed regardless)*. Complete all items if no label has been provided. Refer to the instructions for detailed item descriptions and for the legal authorizations under which this data is collected.

II. POLLUTANT CHARACTERISTICS

INSTRUCTIONS: Complete A through J to determine whether you need to submit any permit application forms to the EPA. If you answer "yes" to any questions, you must submit this form and the supplemental form listed in the parenthesis following the question. Mark "X" in the box in the third column if the supplemental form is attached. If you answer "no" to each question, you need not submit any of these forms. You may answer "no" if your activity is excluded from permit requirements; see Section C of the instructions. See also, Section D of the instructions for definitions of bold—faced terms.

SPECIFIC QUESTIONS	MARK 'X' YES	NO	FORM ATTACHED
A. Is this facility a publicly owned treatment works which results in a discharge to waters of the U.S.? (FORM 2A)		X	
B. Does or will this facility *(either existing or proposed)* include a concentrated animal feeding operation or aquatic animal production facility which results in a discharge to waters of the U.S.? (FORM 2B)		X	
C. Is this a facility which currently results in discharges to waters of the U.S. other than those described in A or B above? (FORM 2C)	X		X
D. Is this a proposed facility *(other than those described in A or B above)* which will result in a discharge to waters of the U.S.? (FORM 2D)		X	
E. Does or will this facility treat, store, or dispose of hazardous wastes? (FORM 3)		X	
F. Do you or will you inject at this facility industrial or municipal effluent below the lowermost stratum containing, within one quarter mile of the well bore, underground sources of drinking water? (FORM 4)		X	
G. Do you or will you inject at this facility any produced water or other fluids which are brought to the surface in connection with conventional oil or natural gas production, inject fluids used for enhanced recovery of oil or natural gas, or inject fluids for storage of liquid hydrocarbons? (FORM 4)		X	
H. Do you or will you inject at this facility fluids for special processes such as mining of sulfur by the Frasch process, solution mining of minerals, in situ combustion of fossil fuel, or recovery of geothermal energy? (FORM 4)		X	
I. Is this facility a proposed stationary source which is one of the 28 industrial categories listed in the instructions and which will potentially emit 100 tons per year of any air pollutant regulated under the Clean Air Act and may affect or be located in an attainment area? (FORM 5)		X	
J. Is this facility a proposed stationary source which is NOT one of the 28 industrial categories listed in the instructions and which will potentially emit 250 tons per year of any air pollutant regulated under the Clean Air Act and may affect or be located in an attainment area? (FORM 5)		X

. MAP

tt n to this application a topographic map of the area extending to at least one mile beyond property bounderies. The map must show e outline of the facility, the location of each of its existing and proposed intake and discharge structures, each of its hazardous waste eatment, storage, or disposal facilities, and each well where it injects fluids underground. Include all springs, rivers and other surface wat bodies in the map area. See instructions for precise requirements.

I. ATURE OF BUSINESS (provide a brief description)

Barefoot Bay WWTP is an activated sludge facility using the extended aeration mode. Effluent from the plant is spray irrigated on private land, discharged to percolation ponds and also discharged by consent order from DER, to a surface water canal. Sludge from the plant is hauled away and land applied in compliance with regulations.

XIII CERTIFICATION (see instructions)

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this application and all attachments and that, based on my inquiry of those persons immediately responsible for obtaining the information contained in the application, I believe that the information is true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.

IV. Effluent Characteristics

A. Existing Sources — Provide measurements for the parameters listed in the left-hand column below, unless waived by the permitting authority (see instructions).

B. New Dischargers — Provide estimates for the parameters listed in the left-hand column below, unless waived by the permitting authority. Instead of the number of measurements taken, provide the source of estimated values (see instructions).

Pollutant or Parameter	(1) Maximum Daily Value (include units)		(2) Average Daily Value (last year) (include units)		(3) Number of Measurements Taken (last year)	(or) (4) Source of Estimate (if new discharger)
	Mass	Concentration	Mass	Concentration		
Biochemical Oxygen Demand (BOD)	28.4 kg	12.0 mg/l	8.0 kg	6.1 mg/l	52	
Total Suspended Solids (TSS)	61.8 kg	26.1 mg/l	12.3 kg	9.3 mg/l	260	
Fecal Coliform (if believed present or if sanitary waste is discharged)		936 #/100 ml		121 #/100 ml	52	
Total Residual Chlorine (if chlorine is used)	7.3 kg	3.1 mg/l	2.9 kg	2.2 mg/l	365	
Oil and Grease		NA		NA		
*Chemical oxygen demand (COD)		NA		NA		
*Total organic carbon (TOC)		NA		NA		
Ammonia (as N)	39.5 kg	16.7 mg/l	4.3 kg	3.3 mg/l	52	
Discharge Flow	Value 625,000 gal		349,000 gal		365	
pH (give range)	Value 7.6		6.7		365	
Temperature (Winter)		°C		19.4 °C	365	
...perature (Summer)		°C		22.8 °C	365	

*If noncontact cooling water is discharged

Except for leaks or spills, will the discharge described in this form be intermittent or seasonal?
If yes, briefly describe the frequency of flow and duration. ☐ Yes ☒ No

C. Treatment System *(Describe briefly any treatment system(s) used or to be used)*

Barefoot Bay WWTP uses activated sludge with extended aeration and chlorination to treat municipal sewage.

D. Other Information *(Optional)*

Use the space below to expand upon any of the above questions or to bring to the attention of the reviewer any other information you feel should be considered in establishing permit limitations. Attach additional sheets, if necessary.

VIII. Certification

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

ORDER PURSUANT TO SECTION 309
CLEAN WATER ACT

Pursuant to the authority of Section 309 of the Clean Water Act (hereinafter, the Act), 33 U.S.C. Section 1319(a), which has been delegated to me, I hereby make the following Findings of Fact and Violation and Order:

FINDINGS OF FACT

1. Florida Cities Water Company (hereinafter, the Respondent) is a corporation and as such is a "person" under Section 502 of the Act, 33 U.S.C. Section 1362.

2. The Respondent owns and operates a wastewater treatment facility located at 500 Egret Circle, Barefoot Bay, Brevard County, Florida which discharges pollutants to a drainage canal leading to Sebastian Creek, a water of the United States.

3. Section 301(a) of the Act, 33 U.S.C. Section 1319(a), prohibits the discharge of pollutants into waters of the United States except as in compliance with a National Pollutant Discharge Elimination System (NPDES) permit issued pursuant to Section 402 of the Act, 33 U.S.C. Section 1342.

4. On September 14, 1989, Florida Department of Environmental Regulation and Environmental Protection Agency (EPA) inspectors witnessed a discharge at the Respondent's location. Respondent had not applied for nor did it possess an NPDES permit at the time of the September, 1989 discharge.

5. On February 28, 1990, the Respondent submitted an NPDES application to EPA for the Barefoot Bay wastewater treatment plant. EPA acknowledged the receipt of the NPDES application as complete on March 23, 1990.

VIOLATION

The Respondent has violated Section 301(a) of the Act, 33 U.S.C. Section 1311(a), by discharging pollutants into waters of the United States without a valid NPDES permit issued pursuant to Section 402 of the Act, 33 U.S.C. Section 1342.

ORDER

Based upon the foregoing Findings of Fact and Violation, and pursuant to the provisions of Section 309(a)(5) of the Act, as amended, 33 U.S.C. Section 1319(a)(5), it is hereby ordered that:

1. The Respondent shall within twenty (20) days of receipt of this Order, identify all surface water discharge points from the Barefoot Bay wastewater treatment facility into waters of the United States including the flow amount, date(s) of discharge, and discharge location.

2. That effective immediately, the following interim effluent limitations and monitoring requirements shall be met until an NPDES permit is issued:

PARAMETER	DISCHARGE LIMITATIONS		MONITORING REQUIREMENTS		
	Monthly Average	Daily Maximum	Measurement Frequency	Sample Type	Sampling Point
Flow, MGD	Report		Daily	Continuous	Effluent
BOD, mg/l	20	30	5/Week	Composite	Effluent
TSS, mg/l	20	30	5/Week	Composite	Effluent
Fecal Coliform MPN/100 ml	200	400	5/Week	Grab	Effluent
Ammonia as N mg/l	Report		5/Week	1/Week	Effluent

The pH shall not be less than 6.0 Standard Units nor greater than 8.5 Standard Units and shall be monitored daily by a grab sample.

The Dissolved Oxygen shall not be less than 5.0 mg/l and shall be monitored daily by a grab sample.

There shall be no discharge of floating solids or visible foam in other than in trace amounts.

3. The monitoring results obtained during the month shall be summarized and reported on a Discharge Monitoring Report Form (EPA Form 3320-1), postmarked no later than the 28th day of the month following the end of the previous month (reporting period).

4. That Respondent shall continue to maintain and operate its facility as efficiently as possible.

5. The Respondent shall within twenty (20) days of receipt of this Order, submit a schematic of the wastewater treatment facility process units as existing, proposed and under construction.

6. The Respondent shall within twenty (20) days of receipt of this Order, submit the annual cost of operations and maintenance (O&M) to operate the Barefoot Bay wastewater treatment facility, the capital cost of the current upgrade or expansion, and the estimated O&M cost of the completed facility.

7. Information required to be submitted by this Order shall be sent by registered mail, or its equivalent, to the following addressees:

Mr. John T. Marlar, Chief
Facilities Performance Branch
Water Management Division
U.S. Environmental Protection Agency
345 Courtland Street, N.E.
Atlanta, Georgia 30365

Mr. Alex Alexander, Deputy Assistant Secretary
Florida Department of Environmental Regulation
3319 Maguire Boulevard
Suite 232
Orlando, Florida 32803

8. Failure to comply with the requirements of this Order shall constitute a violation of this Order and may subject the Respondent to penalties as provided in Section 309 of the Act.

9. This Order does not operate an NPDES permit and nothing contained herein shall be construed as preventing prosecution for

the violations cited in this Order, for violations of the Order itself, or for any other violations of the Act.

Exhibit_____(GSA-20)

PRIVILEGED AND CONFIDENTIAL

From: Gerald S. Allen
To: File
Subject: Barefoot Bay - USEPA Show Cause Hearing
Date: August 14, 1991

Encl:

Ref: (1) Letter - Pfaff (USEPA) to Tompkins, 7/16/91
(2) Letter - Bradtmiller to Pfaff, 8/5/91

CC: K. Blizzard, P. Bradtmiller, D. Getman, R. Gordon, A. A. Reeves

The subject hearing was held in the offices of the USEPA (Region IV) in Atlanta on August 9, 1991. Those attending were as follows:

Roy Herwig, USEPA, Water Enforcement
Tori George, Esq., USEPA - ORC
Ron Phelps, USEPA
Brigette Crawford, USEPA
Kathleen Blizzard, Esq., Hopping, Boyd, Green and Sams
A. A. Reeves, FCWC
Paul Bradtmiller, FCWC
Gerald S. Allen, AUI

R. Herwig opened the meeting by explaining the purpose of the show cause hearing and invited FCWC to provide additional response pertaining to the allegations in the order. P. Bradtmiller pointed out that the date FCWC undertook eminent domain proceedings was September 24, 1990 rather than as stated in reference (2) and that cleaning and scraping of the ponds was completed on February 25, 1990. A. Reeves and G. Allen explained the history of the deep injection well proposal and the reasons the Company chose to pursue land application as an alternative. G. Allen explained the efforts by the Company in seeking users of reclaimed water and the negative responses of the citrus growers in the area. A brief summary of the actions taken to date by the Company to acquire a suitable land application site was presented. K. Blizzard described the FDER and Water Management District permitting processes and explained the impact of the interveners on the FDER permitting process. She also described the hearing proceedings necessary to deal with the allegations of the interveners indicating that the final decision will probably not be forthcoming before late in the first quarter of 1992.

Mr. Herwig seemed to be satisfied that the Company had acted prudently and timely since September, 1989 in its efforts to eliminate the discharge, and noted that it had

eliminated a portion of the discharge through land application of reclaimed water on the 40 ac. tract. He then proceeded to inquire about when the discharge first commenced and the action taken immediately thereafter but prior to September, 1989. He pointed out that the FDER consent order mentioned earlier discharges. He also mentioned that he first became aware of the discharge by accompanying the FDER, at their invitation, on an inspection of the facility in 1989. A. Reeves indicated that the earliest date which discharges occurred was unknown, that the ponds at the site were intended to be "polishing ponds" rather than percolation ponds and that the facility was originally permitted by the Florida HRS. R. Herwig implied that FCWC would not be held responsible for discharges after notifying the FDER of same.

The proposed change to the draft NPDES Permit based on input from the U. S. Fish and Wildlife Service was discussed. R. Herwig acknowledged that it would probably not be possible to comply with the chlorine residual limits within the schedule requested by the Fish and Wildlife Service. P. Bradtmiller pointed out that in fact FCWC would be in noncompliance upon issuance of the permit if these changes were made. A discussion was held regarding the time required to complete installation of dechlorination facilities. FCWC maintained that at least six months would be required under the best timetable assuming expedited permitting by the FDER. Finally it was concluded that the only realistic solution was a compromise regarding the Fish and Wildlife Service request or the issuance of an administrative order concurrent with the NPDES Permit which will allow more time for the installation of dechlorination facilities. A discussion was held regarding the cost of such facilities and the very limited use thereof if the land application project proceeded as anticipated. Mr. Herwig seemed to be sensitive to the expense and very limited time such facilities would be useful. K. Blizzard offered to contact a representative of the Fish and Wildlife Service directly in an effort to achieve a compromise. Not only did Mr. Herwig not object to this proposal but seemed to encourage same.

R. Herwig expressed the opinion that FCWC had been responsive since 1989 in its efforts to eliminate the discharge. He indicted that there were several enforcement action options from which the USEPA could choose, as follows:

(1) No action.
(2) Class I Administrative Action - 0 to $25,000 fine.
(3) Class II Administrative Action - $25,001 to $125,000 fine.
(4) Civil Suit - seeking over $25,000 fine.

He indicated that in no way did this case indicate criminal proceedings as an option and that he was leaning toward Class I Administrative Action. He requested that FCWC provide the following additional information:

(1) Realistic schedules for the installation of dechlorination facilities and elimination of the discharge.

(2) All transactions or communications pertaining to reporting the discharge between FCWC and the FDER prior to September, 1989.

FCWC agreed to furnish this information by August 26, 1991.

R. Herwig indicated that any enforcement action by the USEPA must be finalized not later than September 30, 1991. He requested that FCWC officials be available for a telephone conference call on September 4 to discuss proposed enforcement action. He also requested that if possible, one of the parties representing FCWC have the authority to negotiate regarding the penalty amount, if the USEPA's proposed action includes a penalty.

Re: Barefoot Bay Wastewater Treatment Plant
NPDES Permit Application No. FL0042293

Dear Mr. Herwig:

This letter responds to your request for additional information made at our meeting on August 9, 1991 and supplements our submission of August 5, 1991.

Chronology of FCWC Activities 1969-1989

Pursuant to your request, Florida Cities Water Company (FCWC) ereby provides the following detailed chronology of the nteraction between the Florida Department of Environmental Regulation (FDER) and FCWC regarding the surface water discharge at the Barefoot Bay Wastewater Treatment Plant (WWTP) prior to the EPA's first involvement in September 1989.

This chronology shows that FCWC had obtained necessary permits and constructed the WWTP with an emergency discharge pipe in late 1969/early 1970. Because capacity continued to exceed flow, FCWC did not seek permitting of a discharge in its various FDER operating permits, including the 1982 renewal, which expired in 1987. A surface water discharge was noted by FDER in late 1985. After exploring a variety of solutions, in 1986 FCWC constructed an additional pond system on an adjacent 40-acre tract, which proved technically infeasible after approximately $600,000 had been expended by FCWC in this endeavor. FCWC later expended $100,000 to construct a sprayfield on the 40-acre tract. Following a FDER Notice of Violation on March 3, 1987, FCWC met on a number of occasions with FDER, kept them fully informed, and entered into a Consent Order which provided for deep well injection as the ultimate solution for the discharge. Although deep well injection also later proved impracticable due to Water Management District resistance and technical questions, FCWC expended approximately $166,000 on these efforts. FCWC is pursuing ultimate disposal of the effluent on a 300-acre spray field and has expended $208,000 to date to that end.

The following is a detailed summary of FCWC actions prior to September 1989:

FLORIDA CITIES WATER COMPANY
4837 Swift Road, Suite 100
Sarasota, Florida 34231
P O Box 21119 (34276-1119)

1. On September 24 and 29, 1969, the Florida State Board of Health and the Central and Southern Florida Flood Control District issued their respective approvals of the construction application for the Barefoot Bay WWTP for Gulf American Corporation, the predecessor of Avatar Utilities Inc. of Florida,which is the predecessor of FCWC (Enclosures A and B). These approvals were based on a plan which included holding effluent in golf course irrigation lagoons which ultimately discharged to surface waters. The approved plan also included the existing ponds with the emergency discharge pipe which is the source of the present discharge. Infrastructure was constructed for the golf course disposal system; but due to low levels of effluent during the 1970's and changes in regulations in later years, it was never put into operation.

2. FCWC records indicate that in 1972 and 1975 FDER issued an operating permit and a renewal of that permit for the WTTP as constructed. FCWC has been unable to locate copies of these permits. Because effluent levels were well within existing capacity, the 1978 operating permit (No. D005-8349) was issued for "totally confined effluent disposal" (Enclosure C). However, it should be noted that Condition 6 of the permit indicated that a discharge was authorized. In 1982 effluent levels remained within capacity, and FDER issued operating permit No. D005-61503 for a system with no discharge to surface waters (Enclosure D). The WWTP continued to operate with the emergency discharge pipe in place under the 1982 operating permit, which contained an expiration date of August 1, 1987.

3. During 1984 and 1985, FCWC investigated various solutions for expanding capacity of effluent disposal at the WWTP. During this period FCWC purchased a 40-acre tract, constructed rapid rate infiltration pond test cells and commenced load testing on the site in order to provide rapid rate infiltration pond capacity. On April 19, 1985 FCWC provided FDER with an update on these activities and requested a conditional letter of approval for the 40-acre project. On August 8, 1985, FCWC submitted an application to FDER for permitting of the construction of a test cell at the 40-acre site and on January 14, 1986 FDER issued Construction Permit No. DC05-108926 for the test cell (Enclosure E).

4. In late 1985 site inspections by FDER reflected that the total flow from the WWTP was not being completely contained in the percolation/evaporation ponds and effluent was being discharged via the emergency discharge pipe. A Warning Notice was issued by FDER on January 29, 1986. FCWC responded to the Warning Notice on February 3, 1986, and on March 4, 1986 FDER

application for construction of the deep injection well system on May 9, 1989. The application was being processed in September, 1989 when EPA took cognizance of the surface discharge. As explained in our letter of August 5, 1991, deep well injection was eventually abandoned due to concerns over well failure and the environmentally-preferred option of spray irrigation which FCWC was ordered to investigate by St. Johns River Water Management District. Nonetheless, FCWC had expended approximately $166,000 on engineering and permitting of the deep injection well. In addition, costs associated with the 300-acre sprayfield are estimated to be $5 million; thus, this facility will cost $2 million more to construct than the deep injection well, still estimated at $3 million. FCWC has since expended $108,000 on engineering, permitting and legal costs to date for the sprayfield.

Compliance Schedule for Meeting Chlorine Limitations in NPDES Permit

At our meeting on August 9, 1991, we also discussed the time required to comply with the chlorine limitations requested by the Fish and Wildlife Service in draft NPDES Permit No. FL0042293 dated August 9, 1991. However, since our meeting, FCWC has been able to reach agreement with Roosevelt Childress of EPA Permits Section to revise the monitoring of fecal coliform in the NPDES permit so that FCWC will be able to comply with the requested chlorine limitations when the permit is issued. Therefore, it will not be necessary to seek a compliance schedule for meeting the chlorine limitations in the NPDES permit.

Time Required to Eliminate the Discharge

In addition, you asked that we consider the time required to complete the 300-acre sprayfield and thereby eliminate the discharge permitted in draft NPDES Permit No. FL0042293. FCWC has estimated that the acquisition of the sprayfield site will require 45 days; awarding of the contract for construction, 15 days; construction of the sprayfield, 220 days; for a total of 280 days. However, FCWC will not be able to commence these activities until the pending administrative proceedings regarding the two FDER permits for the sprayfield are concluded. The hearing for FDER Permit No. DC05-194008 has been set for November 12 through 14, 1991. FCWC has requested that the challenge to Permit No. DC05-194894, filed six weeks later, be consolidated with the challenge to Permit DC05-194008 and that the November hearing be extended by one day. The Hearing Officer has not yet ruled on this motion. If the two cases are consolidated, FCWC estimates that a final order can be expected from FDER six months after the hearing. If the cases are not consolidated, several additional months will have to be added to this time estimate. Finally, if the cases are appealed

accepted the FCWC's proposed schedule for completion of capacity load tests to determine the feasibility of use of the 40-acre site. FCWC continued testing of the site.

5. On September 19, 1986, FCWC submitted an application for a construction permit for renovation of the existing percolation ponds and completion of the rapid rate infiltration ponds on the 40-acre site pending additional load testing (Enclosure F). On October 22, 1986 and December 18, 1986 FDER requested further information on the application; FCWC responded to all requests. On January 22, 1987, FDER advised FCWC that sufficient testing had been conducted on the 40-acre site for FDER to conclude that the site was unsatisfactory and that the request to extend Construction Permit No. DC05-108926 for further testing was denied.

6. On March 4, 1987, FDER issued a Notice of Violation concerning the discharge and a meeting was held between FDER and FCWC regarding this notice on March 13, 1987. FDER agreed to continued load-testing to determine the capacity of the proposed pond at the 40-acre site. Other disposal options for ultimate buildout at Barefoot Bay were discussed, including deep well injection, irrigation of existing groves, and permitting of a surface water discharge. FCWC continued load testing and ultimately concluded that proposed ponds on the 40-acre site would not comply with FDER regulations or accommodate ultimate flows of the WWTP. Nonetheless, FCWC had expended approximately $250,000 for engineering, testing and infrastructure to the 40-acre site, as well as $350,000 for purchase of the site. FCWC continued to undertake technical investigation of other disposal options during 1987, including use of the 40-acre tract as a spray field (which was put into operation late in 1989 at a cost of approximately $100,000).

7. Further meetings between FDER and FCWC were held on October 23, 1987 and February 9, 1988 and numerous correspondence was exchanged between the parties during this period regarding the most feasible solution for ultimate elimination of the discharge, including FCWC's submission of an application to FDER for a renewal of the WWTP's operating permit with a surface water discharge on July 30, 1987. On September 29, 1987, FDER issued its Intent to Deny this renewal of the operating permit. Ultimately, a Consent Order was entered into between FDER and FCWC on October 18, 1988. (Provided in Exhibit L to our August 5, 1991 submission). The Order provided for continued surface water discharge until elimination of the discharge by deep well injection. Following completion of engineering, FCWC submitted its

to the Florida District Court of Appeal, we are unable to estimate final resolution.

FDER recently tolled the compliance schedule in the FDER/FCWC Amended Consent Order; but, because of the contingencies involved in the pending administrative proceedings, FDER deferred consideration of a revised compliance schedule until after the permit challenges are resolved (Enclosure G). Thus, because the time estimate is uncertain and could potentially reach several years, FCWC suggests that the date for final elimination of the discharge of June 30, 1995, provided in the draft NPDES Permit, is appropriate.

Conclusion

FCWC believes that this submission responds fully to your request for information about this period, and demonstrates FCWC's continuous contacts with FDER and good faith in making repeated and costly efforts ($1,174,000) to eliminate this discharge in an area of the State of Florida with unfavorable geological conditions.

Please telephone me if you have any questions. FCWC would be happy to provide further information or documentation if needed.

As agreed at the close of our meeting on August 9, 1991, we are planning on a teleconference on September 4, 1991. We suggest 2:00 p.m. on that date.

Sincerely,

Paul H. Bradtmiller
Senior Vice President

RE: Final Issuance of NPDES Permit No. FL0042293
Barefoot Bay WWTP

Dear Mr. Bradtmiller:

Enclosed is the National Pollutant Discharge Elimination System (NPDES) permit for the above-referenced facility. This action constitutes the Environmental Protection Agency's final permit decision in accordance with Title 40, Code of Federal Regulations (C.F.R.) Section 124.15(a). The permit will become effective as specified, provided that no timely request for an evidentiary hearing is received by the Agency.

Any interested person may contest this decision by submitting a timely request for an evidentiary hearing (hearing) pursuant to the procedures at 40 C.F.R. § 124.74. If a request for a hearing is received by the Agency, following review, a determination will be made and the requester advised of the Agency's decision on the request. Until that time, please be advised that any request will render the permit ineffective pursuant to 40 C.F.R. § 124.15(b). For a new source, a new discharger, a recommencing discharger, or a facility for which an untimely permit renewal application was submitted, a hearing request renders the facility without an NPDES permit and the facility may not discharge (unless relief is granted by the Presiding Officer under 40 C.F.R. § 124.60(a)).

If the evidentiary hearing request is granted, in whole or part, to an existing source, the effect of the contested provision(s), and any other conditions not severable from those conditions, will be stayed and not subject to judicial review pending final Agency action. In this case, all provisions of the prior permit, as well as, all uncontested provisions of the reissued permit shall continue fully enforceable and effective pending final Agency action on the permit appeal. See 40 C.F.R. § 124.60.

Printed on Recycled Paper

To request an evidentiary hearing under 40 C.F.R. § 124.74, you must submit an original and two copies of the request to the Regional Hearing Clerk at the letterhead address within thirty (30) days from service of this notice. A copy of the procedures and requirements for evidentiary hearing requests and appeals to the Administrator is enclosed.

For purposes of judicial review under the Clean Water Act, 33 U.S.C. § 1251 et seq., final Agency action on a permit does not occur unless and until a party has exhausted its administrative remedies as required by 40 C.F.R. Part 124.

Further information on procedures pertaining to the filing of an evidentiary hearing request or other legal matters may be obtained by contacting Kevin B. Smith, Assistant Regional Counsel, at (404) 347-3777.

Sincerely yours,

W. Ray Cunningham, Director
Water Management Division

Enclosures (4): Evidentiary Hearing Procedures
Final NPDES Permit

of literature or other material in a foreign language shall be accompanied by copies of the original publication.

(3) Where relevant data or information is contained in a document also containing irrelevant matter, either the irrelevant matter shall be deleted or the relevant portions shall be indicated.

(4) Failure to comply with the requirements of this section or any other requirement in this subpart may result in the noncomplying portions of the submission being excluded from consideration. If the Regional Administrator or the Presiding Officer, on motion by any party or *sua sponte*, determines that a submission fails to meet any requirement of this Subpart, the Regional Administrator or Presiding Officer shall direct the Regional Hearing Clerk to return the submission, together with a reference to the applicable regulations. A party whose materials have been rejected has 14 days to correct the errors and resubmit, unless the Regional Administrator or the Presiding Officer finds good cause to allow a longer time.

(d) The filing of a submission shall not mean or imply that it in fact meets all applicable requirements or that it contains reasonable grounds for the action requested or that the action requested is in accordance with law.

(e) The original of all statements and documents containing factual material, data, or other information shall be signed in ink and shall state the name, address, and the representative capacity of the person making the submission.

§ 124.74 Requests for evidentiary hearing.

(a) Within 30 days following the service of notice of the Regional Administrator's final permit decision under § 124.15, any interested person may submit a request to the Regional Administrator under paragraph (b) of this section for an evidentiary hearing to reconsider or contest that decision. If such a request is submitted by a person other than the permittee, the person shall simultaneously serve a copy of the request on the permittee.

(b)(1) In accordance with § 124.76, such requests shall state each legal or factual question alleged to be at issue, and their relevance to the permit decision, together with a designation of the specific factual areas to be adjudicated and the hearing time estimated to be necessary for adjudication. Information supporting the request or other written documents relied upon to support the request shall be submitted as required by § 124.73 unless they are already part of the administrative record required by § 124.18.

Note: This paragraph allows the submission of requests for evidentiary hearings even though both legal and factual issues may be raised, or only legal issues may be raised. In the latter case, because no factual issues were raised, the Regional Administrator would be required to deny the request. However, on review of the denial the Administrator is authorized by § 124.91(a)(1) to review policy or legal conclusions of the Regional Administrator. EPA is requiring an appeal to the Administrator even of purely legal issues involved in a permit decision to ensure that the Administrator will have an opportunity to review any permit before it will be final and subject to judicial review.

(2) Persons requesting an evidentiary hearing on an NPDES permit under this section may also request an evidentiary hearing on a RCRA or UIC permit. PSD permits may never be made part of an evidentiary hearing under Subpart E. This request is subject to all the requirements of paragraph (b)(1) of this section and in addition will be granted only if:

(i) Processing of the RCRA or UIC permit at issue was consolidated with the processing of the NPDES permit as provided in § 124.4;

(ii) The standards for granting a hearing on the NPDES permit are met;

(iii) The resolution of the NPDES permit issues is likely to make necessary or appropriate modification of the RCRA or UIC permit; and

(iv) If a PSD permit is involved, a permittee who is eligible for an evidentiary hearing under Subpart E on his or her NPDES permit requests that the formal hearing be conducted under the procedures of Subpart F and the Regional Administrator finds that consolidation is unlikly to delay final permit issuance beyond the PSD one-year statutory deadline.

(c) These requests shall also contain:

(1) The name, mailing address, and telephone number of the person making such request;

(2) A clear and concise factual statement of the nature and scope of the interest of the requester;

(3) The names and addresses of all persons whom the requester represents; and

(4) A statement by the requester that, upon motion of any party granted by the Presiding Officer, or upon order of the Presiding Officer *sua sponte* without cost or expense to any other party, the requester shall make available to appear and testify, the following:

(i) The requester;

(ii) All persons represented by the requester; and

(iii) All officers, directors, employees, consultants, and agents of the requester and the persons represented by the requester.

(5) Specific references to the contested permit conditions, as well as suggested revised or alternative permit conditions (including permit denials) which, in the judgment of the requester, would be required to implement the purposes and policies of the CWA.

(6) In the case of challenges to the application of control or treatment technologies identified in the statement of basis or fact sheet, identification of the basis for the objection, and the alternative technologies or combination of technologies which the requester believes are necessary to meet the requirements of the CWA.

(7) Identification of the permit obligations that are contested or are inseverable from contested conditions and should be stayed if the request is granted by reference to the particular contested conditions warranting the stay.

(8) Hearing requests also may ask that a formal hearing be held under the procedures set forth in Subpart F. An applicant may make such a request even if the proceeding does not constitute "initial licensing" as defined in § 124.111.

(d) If the Regional Administrator grants an evidentiary hearing request, in whole or in part, the Regional Administrator shall identify the permit conditions which have been contested by the requester and for which the evidentiary hearing has been granted. Permit conditions which are not contested or for which the Regional Administrator has denied the hearing request shall not be affected by, or considered at, the evidentiary hearing. The Regional Administrator shall specify these conditions in writing in accordance with § 124.60(c).

(e) The Regional Administrator must grant or deny all requests for an evidentiary hearing on a particular permit. All requests that are granted for a particular permit shall be combined in a single evidentiary hearing.

(f) The Regional Administrator (upon notice to all persons who have already submitted hearing requests) may extend the time allowed for submitting hearing requests under this section for good cause.

§ 124.75 Decision on request for a hearing.

(a)(1) Within 30 days following the expiration of the time allowed by § 124.74 for submitting an evidentiary hearing request, the Regional Administrator shall decide the extent to which, if at all, the request shall be granted, provided that the request conforms to the requirements of § 124.74, and sets forth material issues of fact relevant to the issuance of the permit.

(2) When an NPDES permit for which a hearing request has been granted constitutes "initial licensing" under § 124.111, the Regional Administrator may elect to hold a formal hearing under the procedures of Subpart F rather than under the procedures of this subpart even if no person has requested that Subpart F be applied. If the Regional Administrator makes such a decision, he or she shall issue a notice of hearing under § 124.116. All subsequent proceedings shall then be governed by §§ 124.117 through 124.121, except that any reference to a draft permit shall mean the final permit.

(3) Whenever the Regional Administrator grants a request made under § 124.74(c)(8) for a formal hearing under Subpart F on an NPDES permit that does not constitute an initial li-

40 CFR Ch.I (7-1-89 Edition)

Subpart E—Evidentiary Hearings for EPA-Issued NPDES Permits and EPA-Terminated RCRA Permits

§ 124.71 Applicability.

(a) The regulations in this subpart govern all formal hearings conducted by EPA under CWA sections 402 and 405(f), except those conducted under Subpart F. They also govern all evidentiary hearings conducted under RCRA section 3008 in connection with the termination of a RCRA permit. This includes termination of interim status for failure to furnish information needed to make a final decision. A formal hearing is available to challenge any NPDES permit issued under § 124.15 except for a general permit. Persons affected by a general permit may not challenge the conditions of a general permit as of right in further agency proceedings. They may instead either challenge the general permit in court, or apply for an individual NPDES permit under § 122.21 as authorized in § 122.28 and then request a formal hearing on the issuance or denial of an individual permit. (The Regional Administrator also has the discretion to use the procedures of Subpart F for general permits. See § 124.111).

(b) In certain cases, evidentiary hearings under this subpart may also be held on the conditions of UIC permits, or of RCRA permits which are being issued, modified, or revoked and reissued, rather than terminated or suspended. This will occur when the conditions of the UIC or RCRA permit in question are closely linked with the conditions of an NPDES permit as to

which an evidentiary hearing has been granted. See § 124.74(b)(2). Any interested person may challenge the Regional Administrator's initial new source determination by requesting an evidentiary hearing under this part. See § 122.29.

(c) PSD permits may never be subject to an evidentiary hearing under this subpart. Section 124.74(b)(2)(iv) provides only for consolidation of PSD permits with other permits subject to a panel hearing under Subpart F.

[48 FR 14264, Apr. 1, 1983, as amended at 54 FR 18786, May 2, 1989]

§ 124.72 Definitions.

For the purpose of this subpart, the following definitions are applicable:

"Hearing Clerk" means The Hearing Clerk, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC, 20460.

"Judicial Officer" means a permanent or temporary employee of the Agency appointed as a Judicial Officer by the Administrator under these regulations and subject to the following conditions:

(a) A Judicial Officer shall be a licensed attorney. A Judicial Officer shall not be employed in the Office of Enforcement or the Office of Water and Waste Management, and shall not participate in the consideration or decision of any case in which he or she performed investigative or prosecutorial functions, or which is factually related to such a case.

(b) The Administrator may delegate any authority to act in an appeal of a given case under this subpart to a Judicial Officer who, in addition, may perform other duties for EPA, provided that the delegation shall not preclude a Judicial Officer from referring any motion or case to the Administrator when the Judicial Officer decides such action would be appropriate. The Administrator, in deciding a case, may consult with and assign the drafting of preliminary findings of fact and conclusions and/or a preliminary decision to any Judicial Officer.

"Party" means the EPA trial staff under § 124.78 and any person whose request for a hearing under § 124.74 or whose request to be admitted as a party or to intervene under § 124.79 or § 124.117 has been granted.

"Presiding Officer" for the purposes of this subpart means an Administrative Law Judge appointed under 5 U.S.C. 3105 and designated to preside at the hearing. Under Subpart F other persons may also serve as hearing officers. See § 124.119.

"Regional Hearing Clerk" means an employee of the Agency designated by a Regional Administrator to establish a repository for all books, records, documents, and other materials relating to hearings under this subpart.

§ 124.73 Filing and submission of documents.

(a) All submissions authorized or required to be filed with the Agency under this subpart shall be filed with the Regional Hearing Clerk, unless otherwise provided by regulation. Submissions shall be considered filed on the date on which they are mailed or delivered in person to the Regional Hearing Clerk.

(b) All submissions shall be signed by the person making the submission, or by an attorney or other authorized agent or representative.

(c)(1) All data and information referred to or in any way relied upon in any submission shall be included in full and may not be incorporated by reference, unless previously submitted as part of the administrative record in the same proceeding. This requirement does not apply to State or Federal statutes and regulations, judicial decisions published in a national reporter system, officially issued EPA documents of general applicability, and any other generally available reference material which may be incorporated by reference. Any party incorporating materials by reference shall provide copies upon request by the Regional Administrator or the Presiding Officer.

(2) If any part of the material submitted is in a foreign language, it shall be accompanied by an English translation verified under oath to be complete and accurate, together with the name, address, and a brief statement of the qualifications of the person making the translation. Translation...

cense under § 124.111, the Regional Administrator shall issue a notice of hearing under § 124.116 including a statement that the permit will be processed under the procedures of Subpart F unless a written objection is received within 30 days. If no valid objection is received, the application shall be processed in accordance with §§ 124.117 through 124.121, except that any reference to a draft permit shall mean the final permit. If a valid objection is received, this subpart shall be applied instead.

(b) If a request for a hearing is denied in whole or in part, the Regional Administrator shall briefly state the reasons. That denial is subject to review by the Administrator under § 124.91.

§ 124.76 Obligation to submit evidence and raise issues before a final permit is issued.

In any case where the Regional Administrator elected to apply the requirements of § 124.14(a), no evidence shall be submitted by any party to a hearing under this Subpart that was not submitted to the administrative record required by § 124.18 as part of the preparation of and comment on a draft permit, unless good cause is shown for the failure to submit it. No issues shall be raised by any party that were not submitted to the administrative record required by § 124.18 as part of the preparation of and comment on a draft permit unless good cause is shown for the failure to submit them. Good cause includes the case where the party seeking to raise the new issues or introduce new information shows that it could not reasonably have ascertained the issues or made the information available within the time required by § 124.15; or that it could not have reasonably anticipated the relevance or materiality of the information sought to be introduced. Good cause exists for the introduction of data available on operation authorized under § 124.60(a)(2).

[49 FR 38051, Sept. 26, 1984]

§ 124.77 Notice of hearing.

Public notice of the grant of an evidentiary hearing regarding a permit shall be given as provided in § 124.57(b) and by mailing a copy to all persons who commented on the draft permit, testified at the public hearing, or submitted a request for a hearing. Before the issuance of the notice, the Regional Administrator shall designate the Agency trial staff and the members of the decisional body (as defined in § 124.78).

§ 124.78 Ex parte communications.

(a) For purposes of this section, the following definitions shall apply:

(1) "Agency trial staff" means those Agency employees, whether temporary or permanent, who have been designated by the Agency under § 124.77 or § 124.116 as available to investigate, litigate, and present the evidence, arguments, and position of the Agency in the evidentiary hearing or nonadversary panel hearing. Any EPA employee, consultant, or contractor who is called as a witness by EPA trial staff, or who assisted in the formulation of the draft permit which is the subject of the hearing, shall be designated as a member of the Agency trial staff;

(2) "Decisional body" means any Agency employee who is or may reasonably be expected to be involved in the decisional process of the proceeding including the Administrator, Judicial Officer, Presiding Officer, the Regional Administrator (if he or she does not designate himself or herself as a member of the Agency trial staff), and any of their staff participating in the decisional process. In the case of a nonadversary panel hearing, the decisional body shall also include the panel members, whether or not permanently employed by the Agency;

(3) "*Ex parte* communication" means any communication, written or oral, relating to the merits of the proceeding between the decisional body and an interested person outside the Agency or the Agency trial staff which was not originally filed or stated in the administrative record or in the hearing. *Ex parte* communications do not include:

(i) Communications between Agency employees other than between the Agency trial staff and the members of the decisional body;

(ii) Discussions between the decisional body and either:

(A) Interested persons outside the Agency, or

(B) The Agency trial staff, if all parties have received prior written notice of the proposed communications and have been given the opportunity to be present and participate therein.

(4) "Interested person outside the Agency" includes the permit applicant, any person who filed written comments in the proceeding, any person who requested the hearing, any person who requested to participate or intervene in the hearing, any participant in the hearing and any other interested person not employed by the Agency at the time of the communications, and any attorney of record for those persons.

(b)(1) No interested person outside the Agency or member of the Agency trial staff shall make or knowingly cause to be made to any members of the decisional body, an *ex parte* communication on the merits of the proceedings.

(2) No member of the decisional body shall make or knowingly cause to be made to any interested person outside the Agency or member of the Agency trial staff, an *ex parte* communication on the merits of the proceedings.

(3) A member of the decisional body who receives or who makes or who knowingly causes to be made a communication prohibited by this subsection shall file with the Regional Hearing Clerk all written communications or memoranda stating the substance of all oral communications together with all written responses and memoranda stating the substance of all oral responses.

(c) Whenever any member of the decisionmaking body receives an *ex parte* communication knowingly made or knowingly caused to be made by a party or representative of a party in violation of this section, the person presiding at the stage of the hearing then in progress may, to the extent consistent with justice and the policy of the CWA, require the party to show cause why its claim or interest in the proceedings should not be dismissed, denied, disregarded, or otherwise adversely affected on account of such violation.

(d) The prohibitions of this section begin to apply upon issuance of the notice of the grant of a hearing under § 124.77 or § 124.116. This prohibition terminates at the date of final agency action.

[48 FR 14264, Apr. 1, 1983, as amended at 49 FR 38052, Sept. 26, 1984]

§ 124.79 Additional parties and issues.

(a) Any person may submit a request to be admitted as a party within 15 days after the date of mailing, publication, or posting of notice of the grant of an evidentiary hearing, whichever occurs last. The Presiding Officer shall grant requests that meet the requirements of §§ 124.74 and 124.76.

(b) After the expiration of the time prescribed in paragraph (a) of this section any person may file a motion for leave to intervene as a party. This motion must meet the requirements of §§ 124.74 and 124.76 and set forth the grounds for the proposed intervention. No factual or legal issues, besides those raised by timely hearing requests, may be proposed except for good cause. A motion for leave to intervene must also contain a verified statement showing good cause for the failure to file a timely request to be admitted as a party. The Presiding Officer shall grant the motion only upon an express finding on the record that:

(1) Extraordinary circumstances justify granting the motion;

(2) The intervener has consented to be bound by:

(i) Prior written agreements and stipulations by and between the existing parties; and

(ii) All orders previously entered in the proceedings; and

(3) Intervention will not cause undue delay or prejudice the rights of the existing parties.

§ 124.80 Filing and service.

(a) An original and one (1) copy of all written submissions relating to an evidentiary hearing filed after the notice is published shall be filed with the Regional Hearing Clerk.

(b) The party filing any submission shall also serve a copy of each submis-

sion upon the Presiding Officer and each party of record. Service shall be by mail or personal delivery.

(c) Every submission shall be accompanied by an acknowledgment of service by the person served or a certificate of service citing the date, place, time, and manner of service and the names of the persons served.

(d) The Regional Hearing Clerk shall maintain and furnish a list containing the name, service address, and telephone number of all parties and their attorneys or duly authorized representatives to any person upon request.

§ 124.81 Assignment of Administrative Law Judge.

No later than the date of mailing, publication, or posting of the notice of a grant of an evidentiary hearing, whichever occurs last, the Regional Administrator shall refer the proceeding to the Chief Administrative Law Judge who shall assign an Administrative Law Judge to serve as Presiding Officer for the hearing.

§ 124.82 Consolidation and severance.

(a) The Administrator, Regional Administrator, or Presiding Officer has the discretion to consolidate, in whole or in part, two or more proceedings to be held under this subpart, whenever it appears that a joint hearing on any or all of the matters in issue would expedite or simplify consideration of the issues and that no party would be prejudiced thereby. Consolidation shall not affect the right of any party to raise issues that might have been raised had there been no consolidation.

(b) If the Presiding Officer determines consolidation is not conducive to an expeditious, full, and fair hearing, any party or issues may be severed and heard in a separate proceeding.

§ 124.83 Prehearing conferences.

(a) The Presiding Officer, *sua sponte*, or at the request of any party, may direct the parties or their attorneys or duly authorized representatives to appear at a specified time and place for one or more conferences before or during a hearing, or to submit written proposals or correspond for the purpose of considering any of the matters set forth in paragraph (c) of this section.

(b) The Presiding Officer shall allow a reasonable period before the hearing begins for the orderly completion of all prehearing procedures and for the submission and disposition of all prehearing motions. Where the circumstances warrant, the Presiding Officer may call a prehearing conference to inquire into the use of available procedures contemplated by the parties and the time required for their completion, to establish a schedule for their completion, and to set a tentative date for beginning the hearing.

(c) In conferences held, or in suggestions submitted, under paragraph (a) of this section, the following matter may be considered:

(1) Simplification, clarification, amplification, or limitation of the issues.

(2) Admission of facts and of the genuineness of documents, and stipulations of facts.

(3) Objections to the introduction into evidence at the hearing of any written testimony, documents, papers, exhibits, or other submissions proposed by a party, except that the administrative record required by § 124.19 shall be received in evidence subject to the provisions of § 124.85(d)(2). At any time before the end of the hearing any party may make, and the Presiding Officer shall consider and rule upon, motions to strike testimony or other evidence other than the administrative record on the grounds of relevance, competency, or materiality.

(4) Matters subject to official notice may be taken.

(5) Scheduling as many of the following as are deemed necessary and proper by the Presiding Officer:

(i) Submission of narrative statements of position on each factual issue in controversy;

(ii) Submission of written testimony and documentary evidence (e.g., affidavits, data, studies, reports, and any other type of written material) in support of those statements; or

(iii) Requests by any party for the production of additional documentation, data, or other information relevant and material to the facts in issue.

(6) Grouping participants with substantially similar interests to eliminate redundant evidence, motions, and objections.

(7) Such other matters that may expedite the hearing or aid in the disposition of the matter.

(d) At a prehearing conference or at some other reasonable time set by the Presiding Officer, each party shall make available to all other parties the names of the expert and other witnesses it expects to call. At its discretion or at the request of the Presiding Officer, a party may include a brief narrative summary of any witness's anticipated testimony. Copies of any written testimony, documents, papers, exhibits, or materials which a party expects to introduce into evidence, and the administrative record required by § 124.18 shall be marked for identification as ordered by the Presiding Officer. Witnesses, proposed written testimony, and other evidence may be added or amended upon order of the Presiding Officer for good cause shown. Agency employees and consultants shall be made available as witnesses by the Agency to the same extent that production of such witnesses is required of other parties under § 124.74(c)(4). (See also § 124.85(b)(16).)

(e) The Presiding Officer shall prepare a written prehearing order reciting the actions taken at each prehearing conference and setting forth the schedule for the hearing, unless a transcript has been taken and accurately reflects these matters. The order shall include a written statement of the areas of factual agreement and disagreement and of the methods and procedures to be used in developing the evidence and the respective duties of the parties in connection therewith. This order shall control the subsequent course of the hearing unless modified by the Presiding Officer for good cause shown.

§ 124.84 Summary determination.

(a) Any party to an evidentiary hearing may move with or without supporting affidavits and briefs for a summary determination in its favor upon any of the issues being adjudicated on the basis that there is no genuine issue of material fact for determination. This motion shall be filed at least 45 days before the date set for the hearing, except that upon good cause shown the motion may be filed at any time before the close of the hearing.

(b) Any other party may, within 30 days after service of the motion, file and serve a response to it or a counter motion for summary determination. When a motion for summary determination is made and supported, a party opposing the motion may not rest upon mere allegations or denials but must show, by affidavit or by other materials subject to consideration by the Presiding Officer, that there is a genuine issue of material fact for determination at the hearing.

(c) Affidavits shall be made on personal knowledge, shall set forth facts that would be admissible in evidence, and shall show affirmatively that the affiant is competent to testify to the matters stated therein.

(d) The Presiding Officer may set the matter for oral argument and call for the submission of proposed findings, conclusions, briefs, or memoranda of law. The Presiding Officer shall rule on the motion not more than 30 days after the date responses to the motion are filed under paragraph (b) of this section.

(e) If all factual issues are decided by summary determination, no hearing will be held and the Presiding Officer shall prepare an initial decision under § 124.89. If summary determination is denied or if partial summary determination is granted, the Presiding Officer shall issue a memorandum opinion and order, interlocutory in character, and the hearing will proceed on the remaining issues. Appeals from interlocutory rulings are governed by § 124.90.

(f) Should it appear from the affidavits of a party opposing a motion for summary determination that he or she cannot for reasons stated present, by affidavit or otherwise, facts essential to justify his or her opposition, the Presiding Officer may deny the motion or order a continuance to allow additional affidavits or other information to be obtained or may make such other order as is just and proper.

§ 124.86 Hearing procedure.

(a)(1) The permit applicant always bears the burden of persuading the Agency that a permit authorizing pollutants to be discharged should be issued and not denied. This burden does not shift.

NOTE: In many cases the documents contained in the administrative record, in particular the fact sheet or statement of basis and the response to comments, should adequately discharge this burden.

(2) The Agency has the burden of going forward to present an affirmative case in support of any challenged condition of a final permit.

(3) Any hearing participant who, by raising material issues of fact, contends:

(i) That particular conditions or requirements in the permit are improper or invalid, and who desires either:

(A) The inclusion of new or different conditions or requirements; or

(B) The deletion of those conditions or requirements; or

(ii) That the denial or issuance of a permit is otherwise improper or invalid, shall have the burden of going forward to present an affirmative case at the conclusion of the Agency case on the challenged requirement.

(b) The Presiding Officer shall conduct a fair and impartial hearing, take action to avoid unnecessary delay in the disposition of the proceedings, and maintain order. For these purposes, the Presiding Officer may:

(1) Arrange and issue notice of the date, time, and place of hearings and conferences;

(2) Establish the methods and procedures to be used in the development of the evidence;

(3) Prepare, after considering the views of the participants, written statements of areas of factual disagreement among the participants;

(4) Hold conferences to settle, simplify, determine, or strike any of the issues in a hearing, or to consider other matters that may facilitate the expeditious disposition of the hearing;

(5) Administer oaths and affirmations;

(6) Regulate the course of the hearing and govern the conduct of participants;

(7) Examine witnesses;

(8) Identify and refer issues for interlocutory decision under § 124.90;

(9) Rule on, admit, exclude, or limit evidence;

(10) Establish the time for filing motions, testimony, and other written evidence, briefs, findings, and other submissions;

(11) Rule on motions and other procedural matters pending before him, including but not limited to motions for summary determination in accordance with § 124.84;

(12) Order that the hearing be conducted in stages whenever the number of parties is large or the issues are numerous and complex;

(13) Take any action not inconsistent with the provisions of this subpart for the maintenance of order at the hearing and for the expeditious, fair, and impartial conduct of the proceeding;

(14) Provide for the testimony of opposing witnesses to be heard simultaneously or for such witnesses to meet outside the hearing to resolve or isolate issues or conflicts;

(15) Order that trade secrets be treated as confidential business information in accordance with §§ 122.7 (NPDES) and 270.12 (RCRA) and 40 CFR Part 2; and

(16) Allow such cross-examination as may be required for a full and true disclosure of the facts. No cross-examination shall be allowed on questions of policy except to the extent required to disclose the factual basis for permit requirements, or on questions of law, or regarding matters (such as the validity of effluent limitations guidelines) that are not subject to challenge in an evidentiary hearing. No Agency witnesses shall be required to testify or be made available for cross-examination on such matters. In deciding whether or not to allow cross-examination, the Presiding Officer shall consider the likelihood of clarifying or resolving a disputed issue of material fact compared to other available methods. The party seeking cross-examination has the burden of demonstrating that this standard has been met.

(c) All direct and rebuttal evidence at an evidentiary hearing shall be submitted in written form, unless, upon motion and good cause shown, the

Presiding Officer determines that oral presentation of the evidence on any particular fact will materially assist in the efficient identification and clarification of the issues. Written testimony shall be prepared in narrative form.

(d)(1) The Presiding Officer shall admit all relevant, competent, and material evidence, except evidence that is unduly repetitious. Evidence may be received at any hearing even though inadmissible under the rules of evidence applicable to judicial proceedings. The weight to be given evidence shall be determined by its reliability and probative value.

(2) The administrative record required by § 124.18 shall be admitted and received in evidence. Upon motion by any party the Presiding Officer may direct that a witness be provided to sponsor a portion or portions of the administrative record. The Presiding Officer, upon finding that the standards in § 124.85(b)(3) have been met, shall direct the appropriate party to produce the witness for cross-examination. If a sponsoring witness cannot be provided, the Presiding Officer may reduce the weight accorded the appropriate portion of the record.

NOTE: Receiving the administrative record into evidence automatically serves several purposes: (1) It documents the prior course of the proceedings; (2) it provides a record of the views of affected persons for consideration by the agency decisionmaker, and (3) it provides factual material for use by the decisionmaker.

(3) Whenever any evidence or testimony is excluded by the Presiding Officer as inadmissible, all such evidence or testimony existing in written form shall remain a part of the record as an offer of proof. The party seeking the admission of oral testimony may make an offer of proof, by means of a brief statement on the record describing the testimony excluded.

(4) When two or more parties have substantially similar interests and positions, the Presiding Officer may limit the number of attorneys or other party representatives who will be permitted to cross-examine and to make and argue motions and objections on behalf of those parties. Attorneys may, however, engage in cross-examination relevant to matters not adequately covered by previous cross-examination.

(5) Rulings of the Presiding Officer on the admissibility of evidence or testimony, the propriety of cross-examination, and other procedural matters shall appear in the record and shall control further proceedings, unless reversed as a result of an interlocutory appeal taken under § 124.90.

(6) All objections shall be made promptly or be deemed waived. Parties shall be presumed to have taken exception to an adverse ruling. No objection shall be deemed waived by further participation in the hearing.

(e) *Admission of evidence on environmental impacts.* If a hearing is granted under this subpart for a new source subject to NEPA, the Presiding Officer may admit evidence relevant to any environmental impacts of the permitted facility if the evidence would be relevant to the Agency's obligation under § 122.29(c)(3). If the source holds a final EPA-issued RCRA, PSD, or UIC permit, or an ocean dumping permit under the Marine Protection, Research, and Sanctuaries Act (MPRSA), no such evidence shall be admitted nor shall cross-examination be allowed relating to:

(1) Effects on air quality, (2) effects attributable to underground injection or hazardous waste management practices, or (3) effects of ocean dumping subject to the MPRSA, which were considered or could have been considered in the PSD, RCRA, UIC, or MPRSA permit issuance proceedings. However, the presiding officer may admit without cross-examination or any supporting witness relevant portions of the record of PSD, RCRA, UIC, or MPRSA permit issuance proceedings.

[48 FR 14264, Apr. 1, 1983, as amended at 49 FR 38052, Sept. 26, 1984]

§ 124.86 Motions.

(a) Any party may file a motion including a motion to dismiss a particular claim on a contested issue with the Presiding Officer on any matter relating to the proceeding. All motions shall be in writing and served as provided in § 124.80 except those made on

the record during an oral hearing before the Presiding Officer.

(b) Within 10 days after service of any written motion, any part to the proceeding may file a response to the motion. The time for response may be shortened to 3 days or extended for an additional 10 days by the Presiding Officer for good cause shown.

(c) Notwithstanding § 122.4, any party may file with the Presiding Officer a motion seeking to apply to the permit any regulatory or statutory provision issued or made available after the issuance of the permit under § 124.15. The Presiding Officer shall grant any motion to apply a new statutory provision unless he or she finds it contrary to legislative intent. The Presiding Officer may grant a motion to apply a new regulatory requirement when appropriate to carry out the purpose of CWA, and when no party would be unduly prejudiced thereby.

§ 124.87 Record of hearings.

(a) All orders issued by the Presiding Officer, transcripts of oral hearings or arguments, written statements of position, written direct and rebuttal testimony, and any other data, studies, reports, documentation, information and other written material of any kind submitted in the proceeding shall be a part of the hearing record and shall be available to the public except as provided in §§ 122.7 (NPDES) and 270.12 (RCRA), in the Office of the Regional Hearing Clerk, as soon as it is received in that office.

(b) Evidentiary hearings shall be either stenographically reported verbatim or tape recorded, and thereupon transcribed. After the hearing, the reporter shall certify and file with the Regional Hearing Clerk:

(1) The original of the transcript, and

(2) The exhibits received or offered into evidence at the hearing.

(c) The Regional Hearing Clerk shall promptly notify each of the parties of the filing of the certified transcript of proceedings. Any party who desires a copy of the transcript of the hearing may obtain a copy of the hearing transcript from the Regional Hearing Clerk upon payment of costs.

(d) The Presiding Officer shall allow witnesses, parties, and their counsel an opportunity to submit such written proposed corrections of the transcript of any oral testimony taken at the hearing, pointing out errors that may have been made in transcribing the testimony, as are required to make the transcript conform to the testimony. Except in unusual cases, no more than 30 days shall be allowed for submitting such corrections from the day a complete transcript of the hearing becomes available.

§ 124.88 Proposed findings of fact and conclusions; brief.

Within 45 days after the certified transcript is filed, any party may file with the Regional Hearing Clerk proposed findings of fact and conclusions of law and a brief in support thereof. Briefs shall contain appropriate references to the record. A copy of these findings, conclusions, and brief shall be served upon all the other parties and the Presiding Officer. The Presiding Officer, for good cause shown, may extend the time for filing the proposed findings and conclusions and/or the brief. The Presiding Officer may allow reply briefs.

§ 124.89 Decisions.

(a) The Presiding Officer shall review and evaluate the record, including the proposed findings and conclusions, any briefs filed by the parties, and any interlocutory decisions under § 124.90 and shall issue and file his initial decision with the Regional Hearing Clerk. The Regional Hearing Clerk shall immediately serve copies of the initial decision upon all parties (or their counsel of record) and the Administrator.

(b) The initial decision of the Presiding Officer shall automatically become the final decision 30 days after its service unless within that time:

(1) A party files a petition for review by the Administrator pursuant to § 124.91; or

(2) The Administrator *sua sponte* files a notice that he or she will review the decision pursuant to § 124.91.

§ 124.90 Interlocutory appeal.

(a) Except as provided in this section, appeals to the Administrator may be taken only under § 124.91. Appeals from orders or rulings may be taken under this section only if the Presiding Officer, upon motion of a party, certifies those orders or rulings to the Administrator for appeal on the record. Requests to the Presiding Officer for certification must be filed in writing within 10 days of service of notice of the order, ruling, or decision and shall state briefly the grounds relied on.

(b) The Presiding Officer may certify an order or ruling for appeal to the Administrator if:

(1) The order or ruling involves an important question on which there is substantial ground for difference of opinion, and

(2) *Either:* (i) An immediate appeal of the order or ruling will materially advance the ultimate completion of the proceeding; or

(ii) A review after the final order is issued will be inadequate or ineffective.

(c) If the Administrator decides that certification was improperly granted, he or she shall decline to hear the appeal. The Administrator shall accept or decline all interlocutory appeals within 30 days of their submission; if the Administrator takes no action within that time, the appeal shall be automatically dismissed. When the Presiding Officer declines to certify an order or ruling to the Administrator for an interlocutory appeal, it may be reviewed by the Administrator only upon appeal from the initial decision of the Presiding Officer, except when the Administrator determines, upon motion of a party and in exceptional circumstances, that to delay review would not be in the public interest. Such motion shall be made within 5 days after receipt of notification that the Presiding Officer has refused to certify an order or ruling for interlocutory appeal to the Administrator. Ordinarily, the interlocutory appeal will be decided on the basis of the submissions made to the Presiding Officer. The Administrator may, however, allow briefs and oral argument.

(d) In exceptional circumstances, the Presiding Officer may stay the proceeding pending a decision by the Administrator upon an order or ruling certified by the Presiding Officer for an interlocutory appeal, or upon the denial of such certification by the Presiding Officer.

(e) The failure to request an interlocutory appeal shall not prevent taking exception to an order or ruling in an appeal under § 124.91.

§ 124.91 Appeal to the Administrator.

(a)(1) Within 30 days after service of an initial decision, or a denial in whole or in part of a request for an evidentiary hearing, any party or requester, as the case may be, may appeal any matter set forth in the initial decision or denial, or any adverse order or ruling to which the party objected during the hearing, by filing with the Administrator notice of appeal and petition for review. The petition shall include a statement of the supporting reasons and, when appropriate, a showing that the initial decision contains:

(i) A finding of fact or conclusion of law which is clearly erroneous, or

(ii) An exercise of discretion or policy which is important and which the Administrator should review.

(2) Within 15 days after service of a petition for review under paragraph (a)(1) of this section, any other party to the proceeding may file a responsive petition.

(3) Policy decisions made or legal conclusions drawn in the course of denying a request for an evidentiary hearing may be reviewed and changed by the Administrator in an appeal under this section.

(b) Within 30 days of an initial decision or denial or a request for an evidentiary hearing the Administrator may, *sua sponte*, review such decision. Within 7 days after the Administrator has decided under this section to review an initial decision or the denial of a request for an evidentiary hearing, notice of that decision shall be served by mail upon all affected parties and the Regional Administrator.

(c)(1) Within a reasonable time following the filing of the petition for

review, the Administrator shall issue an order either granting or denying the petition for review. When the Administrator grants a petition for review or determines under paragraph (b) of this section to review a decision, the Administrator may notify the parties that only certain issues shall be briefed.

(2) Upon granting a petition for review, the Regional Hearing Clerk shall promptly forward a copy of the record to the Judicial Officer and shall retain a complete duplicate copy of the record in the Regional Office.

(d) Notwithstanding the grant of a petition for review or a determination under paragraph (b) of this section to review a decision, the Administrator may summarily affirm without opinion and initial decision or the denial of a request for an evidentiary hearing.

(e) A petition to the Administrator under paragraph (a) of this section for review of any initial decision or the denial of an evidentiary hearing is, under 5 U.S.C. 704, a prerequisite to the seeking of judicial review of the final decision of the Agency.

(f) If a party timely files a petition for review or if the Administrator *sua sponte* orders review, then, for purposes of judicial review, final Agency action on an issue occurs as follows:

(1) If the Administrator denies review or summarily affirms without opinion as provided in § 124.91(d), then the initial decision or denial becomes the final Agency action and occurs upon the service of notice of the Administrator's action.

(2) If the Administrator issues a decision without remanding the proceeding then the *final permit, redrafted* as required by the Administrator's original decision, shall be reissued and served upon all parties to the appeal.

(3) If the Administrator issues a decision remanding the proceeding, then final Agency action occurs upon completion of the remanded proceeding, including any appeals to the Administrator from the results of the remanded proceeding.

(g) The petitioner may file a brief in support of the petition within 21 days after the Administrator has granted a petition for review. Any other party may file a responsive brief within 21 days of service of the petitioner's brief. The petitioner then may file a reply brief within 14 days of service of the responsive brief. Any person may file an *amicus brief* for the consideration of the Administrator within the same time periods that govern reply briefs. If the Administrator determines, *sua sponte*, to review an initial Regional Administrator's decision or the denial of a request for an evidentiary hearing, the Administrator shall notify the parties of the schedule for filing briefs.

(h) Review by the Administrator of an initial decision or the denial of an evidentiary hearing shall be limited to the issues specified under paragraph (a) of this section, except that after notice to all parties, the Administrator may raise and decide other matters which he or she considers material on the basis of the record.

PERMIT NO. FL0042293
Minor - Non POTW

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
REGION IV

AUTHORIZATION TO DISCHARGE UNDER THE
NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM

In compliance with the provisions of the Clean Water Act, as amended (33 U.S.C. 1251 et seq.; the "Act"),

Barefoot Bay WWTP
c/o Florida Cities Water Company
P.O. Box 21119
Sarasota, Florida 34276-4119

is authorized to discharge from a facility located at

North end of Dottie Lane
Brevard County
Barefoot Bay, FL 32976

to receiving waters named

Drainage canal leading to
north prong of Sebastian Creek

in accordance with effluent limitations, monitoring requirements and other conditions set forth herein. The permit consists of this cover sheet, Part I 5 pages, Part II 16 pages, Part III 1 page, and Part IV 3 pages.

This permit shall become effective on November 1, 1991.

This permit and the authorization to discharge shall expire at midnight, June 30, 1995.

SEP 16 1991
Date Issued

W. Ray Cunningham
W. Ray Cunningham, Director
Water Management Division

PART I

A. EFFLUENT LIMITATIONS AND MONITORING REQUIREMENTS - Final

1. During the period beginning on the effective date and lasting through June 30, 1995, the permittee is authorized to discharge from outfall(s) 001, sanitary wastewater.

Such discharges shall be limited and monitored by the permittee as specified below:

PARAMETERS	DISCHARGE LIMITATIONS			MONITORING REQUIREMENTS		
	Annual Average	Monthly Average	Daily Maximum	Measurement Frequency	Sample Type	Sampling Point •
Flow, MGD	Report	Report	Report	5/Week	Representative	Effluent
BOD - 5 Day, mg/l	20.0	30.0	60.0	1/Week	8-hr. Composite	Effluent
Total Suspended Solids, mg/l	20.0	30.0	60.0	1/Week	8-hr. Composite	Effluent
Fecal Coliform Bacteria, N/100 ml	(See Item 6, page I-3)			1/Month	Grab	Effluent
Total Residual Chlorine, mg/l	(See Part I.A.2. for effluent limit and approved testing procedures. See Part I.B.1 for compliance schedule and compliance dates.)			7/Week	Grab	Effluent
pH shall not be less than 6.0 nor greater than 8.5 standard units.				5/Week	Grab	Effluent
Chronic Whole Effluent Toxicity	(See Item 9, Page I-3)			See Part IV	24-hr. Composite	Effluent

• See Item 7, Page I-3.

PART I (CONTINUATION)
EFFLUENT LIMITATIONS AND MONITORING REQUIREMENTS

2. INTERIM TOTAL RESIDUAL CHLORINE (TRC) LIMIT: The daily maximum concentration of TRC in the final effluent shall not exceed 0.2 mg/l beginning the effective date of this permit through the operational level of the final TRC limit.

FINAL TRC LIMIT: The daily maximum concentration of total residual chlorine (TRC) in the final effluent shall not exceed 0.01 mg/l and shall be achieved no later than three months from the effective date of the permit. This limit is included to prevent toxic effects from chlorine in the receiving waters. This compliance schedule allows the permittee time to apply for a mixing zone for TRC from the Florida Department of Environmental Regulation (FDER), if the permittee determines such to be a benefit. If a mixing zone for TRC is granted by FDER and concurred with by EPA, the permittee may apply for a modification of the above TRC limit from EPA.

Testing for total residual chlorine (TRC) shall be conducted according to either the amperometric titration method, the low-level amperometric titration method (if compliance with a permit limitation of 0.20 mg/l or less is to be demonstrated), or the DPD colorimetric method as specified in Section 4500-Cl D., 4500-Cl E., or 4500-Cl G., respectively, Standard Methods for the Examination of Water and Wastewater, 17th Edition. If chlorine is not detected using one of these methods, the permittee shall report on the discharge monitoring report form, the analytical results for chlorine as being measured at less than the detection level for the test method selected; the test method shall also be reported. The permittee shall then be considered to be in compliance with the above daily maximum effluent limit for TRC.

3. There shall be no discharge of floating solids or visible foam in other than trace amounts.

4. The effluent shall not cause a visible sheen on the receiving water.

5. Any bypass of the treatment facility, which is not included in the effluent monitored above, is to be monitored for flow and all other parameters (except whole effluent toxicity testing). For parameters other than flow, at least one grab sample per day shall be monitored. Daily flow shall be monitored or estimated, as appropriate, to obtain reportable data. All monitoring results shall be reported on a Discharge Monitoring Report (DMR) Form (3320-1).

6. The arithmetic average of the monthly fecal coliform values (calculated as a geometric mean) collected during an annual period shall not exceed 200/100 ml of effluent sample. Any one sample shall not exceed 800 fecal coliform colonies per 100 ml of effluent sample.

7. Samples taken in compliance with the monitoring requirements specified in this permit for all parameters except fecal coliform shall be taken at the nearest accessible point after final treatment but prior to the actual discharge or mixing with the receiving waters. Samples for fecal coliform shall be taken after treatment at the chlorine contact chamber but prior to entering the polishing/percolation ponds.

8. For the parameters, BOD, TSS, and Fecal Coliform, no violations for annual average will be deemed to have occurred until data have been compiled for the first 12 months after the effective date of the permit.

9. The effluent shall not be chronically toxic to, or produce adverse physiological or behavioral responses in, aquatic animals. An effluent no observable effect concentration (NOEC) of less than 100% for any test species will constitute a violation of Florida Administrative Code (FAC) Section 17-302.510(3)(p), May 29, 1990, and the terms of this permit. The testing for this requirement shall conform with Part IV of this permit.

10. If the results for a given sample analysis are such that any parameter (other than fecal coliform) is not detected at or above the minimum level for the test method used, a value of zero will be used for that sample in calculating an arithmetic effluent mean value for the parameter. In the case of fecal coliform, a value of 1.0 shall be used in calculating the geometric mean.

B. SCHEDULE OF COMPLIANCE

1. The permittee shall achieve compliance with the effluent limitations specified for discharges in accordance with the following schedule:

Discharge 001:

Operational level attained. . . Effective Date of Permit

Discharge 001 Cease Discharge Schedule:

First Report of Progress . . .December 31, 1991

Second Report of Progress. . .December 31, 1992

Third Report of Progress . . .December 31, 1993

Fourth Report of Progress. . .December 31, 1994

Cease Discharge. . . . . .June 30, 1995

Total Residual Chlorine Final Limit:

Operational Level Attained. . No later than three months from the effective date of the permit.

2. No later than 14 calendar days following a date identified in the above schedule of compliance, the permittee shall submit either a report of progress or, in the case of specific actions being required by identified dates, a written notice of compliance or noncompliance. In the latter case, the notice shall include the cause of noncompliance, any remedial actions taken, and the probability of meeting the next scheduled requirement.

C. SLUDGE MANAGEMENT PRACTICES

1. The permittee must sample and analyze the sludge and report to EPA the quantitative data for the 125 priority pollutants listed in 40 CFR 122, Appendix D, Tables II and III. Qualitative data for 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) must also be submitted if the permittee knows or has reason to believe that TCDD is or may be present in the sludge.

   a. The permittee must submit the above data within 1 year of the effective date of this permit.

2. The permittee must submit within 30 days of the effective date of this permit the sludge production volume (specify if daily or annual; if actual volume is not known, estimate the quantity of sludge being handled and so indicate) and the sludge disposal practice.

3. The permittee shall provide sludge inventory data to the State and EPA, as part of EPA's inventory updates as requested. The data should include, but not be limited to, sludge quantity and characteristics.

4. Reopener. If an applicable "acceptable management practice" or numerical limitation for pollutants in sewage sludge promulgated under Section 405(d)(2) of the Clean Water Act, as amended by the Water Quality Act of 1987, is more stringent than the sludge pollutant limit or acceptable management practice in this permit, or controls a pollutant not limited in this permit, this permit shall be promptly modified or revoked and reissued to conform to the requirements promulgated under Section 405(d)(2). The permittee shall comply with the limitations by no later than the compliance deadline specified in the applicable regulations as required by Section 405(d)(2)(D) of the Clean Water Act.

5. Notice of change in sludge disposal practice. The permittee shall give prior notice to the Regional Administrator of any change planned in the permittee's sludge disposal practice.

6. Cause for modification. 40 CFR 122.62(a)(1) provides that the following is a cause for modification but not revocation and reissuance of permits except when the permittee requests or agrees. (a) Alterations. There are material and substantial changes or additions to the permitted facility or activity which occurred after permit issuance which justify the application of permit conditions that are different or absent in the existing permit.

7. Upon review of information provided by the permittee as required by the above items, or results from an on-site inspection, the permit shall be subject to modification to incorporate appropriate requirements.

Part II

STANDARD CONDITIONS FOR NPDES PERMITS

SECTION A. GENERAL CONDITIONS

1. Duty to Comply

The permittee must comply with all conditions of this permit. Any permit noncompliance constitutes a violation of the Clean Water Act and is grounds for enforcement action; for permit termination, revocation and reissuance, or modification; or for denial of a permit renewal application.

2. Penalties for Violations of Permit Conditions

Any person who violates a permit condition is subject to a civil penalty not to exceed $25,000 per day for each violation. Any person who negligently violates any permit condition is subject to criminal penalties of $2,500 to $25,000 per day of violation, or imprisonment for not more than 1 year, or both. Any person who knowingly violates permit conditions is subject to criminal penalties of $5,000 to $50,000 per day of violation, or imprisonment for not more than 3 years, or both. Also, any person who violates a permit condition may be assessed an administrative penalty not to exceed $10,000 per violation with the maximum amount not to exceed $125,000. [Ref: 40 CFR 122.41(a)]

3. Duty to Mitigate

The permittee shall take all reasonable steps to minimize or prevent any discharge in violation of this permit which has a reasonable likelihood of adversely affecting human health or the environment.

4. Permit Modification

After notice and opportunity for a hearing, this permit may be modified, terminated, or revoked for cause including, but not limited to, the following:

a. Violation of any terms or conditions of this permit;

b. Obtaining this permit by misrepresentation or failure to disclose fully all relevant facts;

c. A change in any conditions that requires either temporary interruption or elimination of the permitted discharge; or

d. Information newly acquired by the Agency indicating the discharge poses a threat to human health or the environment.

f the permittee believes that any past or planned activity would be cause for modification or revocation and reissuance under 40 CFR 122.62, he permittee must report such information to the Permit Issuing uthority. The submittal of a new application may be required of the permittee. The filing of a request by the permittee for a permit modification, revocation and reissuance, or termination, or a otification of planned changes or anticipated noncompliance, does not tay any permit condition.

. Toxic Pollutants

Notwithstanding Paragraph A-4, above, if a toxic effluent standard or rohibition (including any schedule of compliance specified in such ffluent standard or prohibition) is established under Section 307(a) of the Act for a toxic pollutant which is present in the discharge and such standard or prohibition is more stringent than any limitation of ich pollutant in this permit, this permit shall be modified or revoked nd reissued to conform to the toxic effluent standard or prohibition and the permittee so notified.

. Civil and Criminal Liability

Except as provided in permit conditions on "Bypassing" Section B, graph B-3, and "Upsets" Section b, Paragraph B-4, nothing in this mit shall be construed to relieve the permittee from civil or criminal penalties for noncompliance.

. Oil and Hazardous Substance Liability

Nothing in this permit shall be construed to preclude the institution of any legal action or relieve the permittee from any responsibilities, liabilities, or penalties to which the permittee is or may be subject under Section 311 or the Act.

8. State Laws

Nothing in this permit shall be construed to preclude the institution of any legal action or relieve the permittee from any responsibilities, liabilities, or penalties established pursuant to any applicable State law or regulation under authority preserved by Section 510 of the Act.

9. Property Rights

The issuance of this permit does not convey any property rights of any sort, or any exclusive privileges, nor does it authorize any injury to private property or any invasion of personal rights, nor any infringement of Federal, State, or local laws or regulations.

10. Onshore or Offshore Construction

This permit does not authorize or approve the construction of any onshore or offshore physical structures or facilities or the undertaking of any work in any waters of the United States.

11. Severability

The provisions of this permit are severable, and if any provision of this permit, or the application of any provision of this permit to any circumstance, is held invalid, the application of such provision to other circumstances, and the remainder of this permit, shall not be affected thereby.

12. Duty to Provide Information

The permittee shall furnish to the Permit Issuing Authority, within a reasonable time, any information which the Permit Issuing Authority may request to determine whether cause exists for modifying, revoking and reissuing, or terminating this permit or to determine compliance with this permit. The permittee shall also furnish to the Permit Issuing Authority upon request, copies of records required to be kept by this permit.

SECTION B. OPERATION AND MAINTENANCE OF POLLUTION CONTROLS

1. Proper Operation and Maintenance

The permittee shall at all times properly operate and maintain all facilities and systems of treatment and control (and related appurtenances) which are installed or used by the permittee to achieve compliance with the conditions of this permit. Proper operation and maintenance also includes adequate laboratory controls and appropriate quality assurance procedures. This provision requires the operation of back-up or auxiliary facilities or similar systems which are installed by a permittee only when the operation is necessary to achieve compliance with the conditions of the permit.

2. Need to Halt or Reduce not a Defense

It shall not be a defense for a permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the condition of this permit.

3. Bypass of Treatment Facilities

a. Definitions

(1) "Bypass means the intentional diversion of waste streams from any portion of a treatment facility, which is not a designed or established operating mode for the facility.

(2) "Severe property damage" means substantial physical damage to property, damage to the treatment facilities which causes them to become inoperable, or substantial and permanent loss of natural resources which can reasonably be expected to occur in the absence of a bypass. Severe property damage does not mean economic loss caused by delays in production.

b. Bypass not exceeding limitations.

The permittee may allow any bypass to occur which does not cause effluent limitations to be exceeded, but only if it also is for essential maintenance to assure efficient operation. These bypasses are not subject to the provisions of Paragraphs c. and d. of this section.

. Notice

(1) Anticipated bypass. If the permittee knows in advance of the need for a bypass, it shall submit prior notice, if possible at least ten days before the date of the bypass; including an evaluation of the anticipated quality and effect of the bypass.

(2) Unanticipated bypass. The permittee shall submit notice of an unanticipated bypass as required in Section D, Paragraph D-8 (24-hour notice).

. Prohibition of bypass

(1) Bypass is prohibited and the Permit Issuing Authority may take enforcement action against a permittee for bypass, unless:

(a) Bypass was unavoidable to prevent loss of life, personal injury, or severe property damage;

(b) There were no feasible alternatives to the bypass, such as the use of auxiliary treatment facilities, retention of untreated wastes, or maintenance during normal periods of equipment downtime. This condition is not satisfied if adequate backup equipment should have been installed in the exercise of reasonable engineering judgement to prevent a bypass which occurred during normal periods of equipment downtime or preventive maintenance; and

(c) The permittee submitted notices as required under Paragraph c. of this section.

(2) The permit Issuing Authority may approve an anticipated bypass, after considering its adverse effects, if the Permit Issuing Authority determines that it will meet the three conditions listed above in Paragraph d.(1) of this section.

4. Upsets

"Upset" means an exceptional incident in which there is unintentional and temporary noncompliance with technology based permit effluent limitations because of factors beyond the reasonable control of the permittee. An upset does not include noncompliance to the extent caused by operational error, improperly designed treatment facilities, lack of preventive maintenance, or careless or improper operation. An upset constitutes an affirmative defense to an action brought for non-compliance with such technology based permit limitation if the requirements of 40 CFR 122.41(n)(3) are met.

. Removed Substances

This permit does not authorize discharge of solids, sludge, filter backwash, or other pollutants removed in the course of treatment of control of wastewaters of the United States unless specifically limited in Part 1.

SECTION C. MONITORING AND RECORDS

Representative Sampling

Samples and measurements taken as required herein shall be representative of the volume and nature of the monitored discharge. All samples shall be taken at the monitoring points specified in this permit and, unless otherwise specified, before the effluent joins or is diluted by any other wastestream, body of water, or substance. Monitoring points shall not be changed without notification to and the approval of the Permit Issuing Authority.

. Flow Measurements

Appropriate flow measurements devices and methods consistent with accepted scientific practices shall be selected and used to insure the accuracy and reliability of measurements of the volume of monitored discharges. The devices shall be installed, calibrated and maintained to insure that the accuracy of the measurements are consistent with the accepted capability of that type of device. Devices selected shall be capable of measuring flows with a maximum deviation of less than ±10% from the true discharge rates throughout the range of expected discharge volumes. Once-through condenser cooling water flow which is monitored by pump logs, or pump hour meters as specified in Part I of this permit and based on the manufacture's pump curves shall not be subject to this requirement. Guidance in selection, installation, calibration, and operation of acceptable flow measurement devices can be obtained from the following references:

(1) "A Guide of Methods and Standards for the Measurement of Water Flow", U.S. Department of Commerce, National Bureau of Standards, NBS Special Publication 421, May 1975, 97 pp. (Available from the U.S. Government Printing Office, Washington, D.C. 20402. Order by SD catalog No. C13.10:421.)

(2) "Water Measurement Manual", U.S. Department of Interior, Bureau of Reclamation, Second Edition, Revised Reprint, 1974, 327 pp. (Available from the U.S. Government Printing Office, Washington, D.C. 20402. Order by catalog No. 127.19/2:W29/2, Stock No. S/N 24003-0027.)

(3) "Flow Measurement in Open Channels and Closed Conduits", U.S. Department of Commerce, National Bureau of Standards, NBS Special Publication 484, October 1977, 982 pp. (Available in paper copy or microfiche from National Technical Information Service (NTIS), Springfield, VA 22151. Order by NTIS No. PB-273 535/5ST.)

(4) "NPDES Compliance Flow Measurement Manual", U.S. Environmental Protection Agency, Office of Water Enforcement, Publication MCD-77, September 1981, 135 pp. (Available from the General Service Administration (8BRC), Centralized Mailing Lists Services, Building 41, Denver Federal Center, Denver, CO. 80255.)

3. Monitoring Procedures

Monitoring must be conducted according to test procedures approved under 40 CFR Part 136, unless other test procedures have been specified in this permit.

4. Penalties for Tampering

The Clean Water Act provides that any person who falsifies, tampers with, or knowingly renders inaccurate, any monitoring device or method required to be maintained under this permit shall, upon conviction, be punished by a fine of not more than $10,000 per violation, or imprisonment for not more than 2 years, or both.

5. Retention of Records

The permittee shall retain records of all monitoring information, including all calibration and maintenance records and all original strip chart recordings for continuous monitoring instrumentation, copies of all reports required by this permit, and records of all data used to complete the application for this permit, for a period of at least 3 years from the date of the sample, measurement, report, or application. This period may be extended by the Permit Issuing Authority at any time.

. Record Contents

Records of monitoring information shall include:

a. The date, exact place, and time of sampling or measurements;

b. The individual(s) who performed the sampling of measurements;

c. The date(s) analyses were performed;

d. The individual(s) who performed the analyses;

e. The analytical techniques or methods used; and

f. The results of such analysis.

. Inspection and Entry

The permittee shall allow the permit Issuing Authority, or a authorized representative, upon the presentation of credentials and other documents as may be required by law, to;

a. Enter upon the permittee's premises where a regulated facility or activity is located or conducted, or where records must be kept under the conditions of this permit;

b. Have access to and copy, at reasonable times, any records that must be kept under the conditions of this permit.

c. Inspect at reasonable time any facilities, equipment (including monitoring and control equipment), practices, or operations regulated or required under this permit; and

d. Sample or monitor at reasonable times, for the purposes of assuring permit compliance or as otherwise authorized by the Clean Water Act, any substances or parameters at any location.

SECTION D. REPORTING REQUIREMENTS

1 Change in Discharge

The permittee shall give notice to the Permit Issuing Authority as soon as possible of any planned physical alterations or additions to the permitted Facility. Notice is required only when:

a. The alteration or addition to a permitted facility may meet one of the criteria for determining whether a facility is a new source; or

b. The alteration or addition could significantly change the nature or increase the quantity of pollutants discharged. This notification applies to pollutants which are subject neither to effluent limitations in the permit, nor to notification requirements under Section D, Paragraph D-10(a).

. Anticipated Noncompliance

The permittee shall give advance notice to the Permit Issuing Authority f any planned change in the permitted facility or activity which may esult in noncompliance with permit requirements. Any maintenance or facilities, which might necessitate unavoidable interruption of peration and degradation of effluent quality, shall be scheduled during oncritical water quality periods and carried out in a manner approved by the Permit Issuing Authority.

. Transfer of Ownership or Control

A permit may be automatically transferred to another if:

a. The permittee notifies the Permit Issuing Authority of the proposed transfer at least 30 days in advance of the proposed transfer date;

b. The notice includes a written agreement between the existing and new permittees containing a specific date for transfer of permit responsibility, coverage, and liability between them; and

c. The Permit Issuing Authority does not notify the existing permittee of his or her intent to modify or revoke and reissue the permit. If this notice is not received, the transfer is effective on the date specified in the agreement mentioned in paragraph b.

4. Monitoring Reports

ee Part III of this permit.

5. Additional Monitoring by the Permittee

If the permittee monitors any pollutant more frequently than required by this permit, using test procedures approved under 40 CFR 136 or as pecified in this permit, the results of this monitoring shall be ncluded in the calculation and reporting of the data submitted in the Discharge Monitoring Report (DMR). Such increased frequency shall also e indicated.

6 Averaging of Measurements

culations for limitations which require averaging of measurements shall utilize an arithmetic mean unless otherwise specified by the Permit Issuing Authority in the permit.

7. Compliance Schedules

Reports of compliance or noncompliance with, or any progress reports on, interim and final requirements contained in any compliance schedule of this permit shall be submitted no later than 14 days following each schedule date. Any reports of noncompliance shall include the cause of noncompliance, any remedial actions taken, and the probability of meeting the next scheduled requirement.

. Twenty-Four Hour Reporting

The permittee shall orally report any noncompliance which may endanger health or the environment, within 24 hours from the time the permittee becomes aware of the circumstances. A written submission shall also be provided within 5 days of the time the permittee becomes aware of the circumstances. The written submission shall contain a description of the noncompliance and its cause, the period of noncompliance, including the exact dates and times; and if the noncompliance has not been corrected, the anticipated time it is expected to continue, and steps taken or planned to reduce, eliminate and prevent reoccurrence of the noncompliance. The Permit Issuing Authority may verbally waive the written report, on a case-by-case basis, when the oral report is made.

following violations shall be included in the 24 hour report when they might endanger health or the environment:

a. An unanticipated bypass which exceeds any effluent limitation in the permit.

b. Any upset which exceeds any effluent limitation in the permit.

. Other Noncompliance

The permittee shall report in narrative form, all instances of noncompliance not previously reported under Section D, Paragraphs D-2, -4, D-7, and D-8 at the time monitoring reports are submitted. The reports shall contain the information listed in Paragraph D-8.

). Changes in Discharges of Toxic Substances

The permittee shall notify the Permit Issuing Authority as soon as it knows or has reason to believe:

a. That any activity has occurred or will occur which would result in the discharge, on a routine or frequent basis, of any toxic substance(s) (listed at 40 CFR 122, Appendix D, Table II and III) which is not limited in the permit, if that discharge will exceed the highest of the following "notification levels":

(1) One hundred micrograms per liter (100 ug/l);

(2) Two hundred micrograms per liter (200 ug/l) for acrolein and acrylonitrile; five hundred micrograms per liter (500 ug) for 2,4-dinitrophenol and for 2-methyl-4,6-dinitrophenol; and one milligram per liter (1 mg/l) for antimony; or

(3) Five (5) times the maximum concentration value reported for that pollutant(s) in the application.

b. That any activity has occurred or will occur which would result in any discharge, on a non-routine or infrequent basis, of a toxic pollutant (listed at 40 CFR 122, Appendix D. Table II and III) which is not limited in the permit, if that discharge will exceed the highest of the following "notification levels":

(1) Five hundred Micrograms per liter (500 ug/l);

(2) One milligram per liter (1 mg/l) for antimony; or

(3) Ten (10) times the maximum concentration value reported for that pollutant(s) in the permit application.

11. Duty to Reapply

If the permittee wishes to continue an activity regulated by this permit after the expiration date of this permit, the permittee must apply for and obtain a new permit. The application should be submitted at least 180 days before the expiration date of this permit. The Permit Issuing Authority may grant permission to submit an application less than 180 days in advance but not later than the permit expiration date.

Where EPA is the Permit Issuing Authority, the terms and conditions of this permit are automatically continued in accordance with 40 CFR 122.6, only where the permittee has submitted a timely and complete application for a renewal permit and the Permit Issuing Authority is unable through no fault of the permittee to issue a new permit before expiration date.

12. Signatory Requirements

All applications, reports, or information submitted to the Permit Issuing Authority shall be signed and certified.

a. All permit applications shall be signed as follows:

(1) For a corporation: by a responsible corporate officer. For the purpose of this Section, a responsible corporate officer means: (1) a president, secretary, treasurer, or vice-president of the corporation in charge of a principal business function, or any other person who performs similar policy or decision-making functions for the corporation, or (2) the manager of one or more manufacturing production facilities employing more than 250 persons or having gross annual sales or expenditures exceeding 25 million (in second quarter 1980 dollars), if authority to sign documents has been assigned or delegated to the manager in accordance with corporate procedures.

(2) For a partnership or sole proprietorship: by a general partner or the proprietor, respectively; or

(3) For a municipality, State, Federal, or other public agencies by either a principal executive officer or ranking elected official.

b. All reports required by the permit and other information requested by the Permit Issuing Authority shall be signed by a person described above or by a duly authorized representative only if:

(1) The authorization is made in writing by person described above;

(2) The authorization specifies either an individual or a position having responsibility for the overall operation of the regulated facility or activity, such as the position of plant manager, operator of a well or a well field, superintendent, position of equivalent responsibility, or an individual or position having overall responsibility for environmental matters for the company. (A duly authorized representative may this be either a named individual or any individual occupying a named position.); and

(3) The written authorization is submitted to the Permit Issuing Authority.

c. Certification. Any person signing a document under paragraphs (a) or (b) of this section shall make the following certification:

"I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations."

.3. Availability of Reports

Except for data determined to be confidential under 40 CFR Part 2, all reports prepared in accordance with the terms of this permit shall be available for public inspection at the offices of the Permit Issuing Authority. As required by the Act, permit applications, permits and effluent data shall not be considered confidential.

14. Penalties for Falsification of Reports

Clean Water Act provides that any person who knowingly makes any false material statement, representation, or certification in any record or other document submitted or required to be maintained under this permit, including monitoring reports or reports of compliance or noncompliance, or who knowingly falsifies, tampers with, or renders inaccurate any monitoring device or method required to be maintained under the Clean Water Act, shall, upon conviction, be punished by a fine of not more than $10,000 or by imprisonment for not more than 2 years, or both.

SECTION E. DEFINITIONS

.. Permit Issuing Authority

The Regional Administrator of EPA Region IV or his designee, unless at some time in the future the State receives authority to administer the NPDES program and assumes jurisdiction over the permit; at which time, the Director of the State program receiving the authorization becomes the issuing authority.

2. Act

"Act" means the Clean Water Act (formerly referred to as the Federal Water Pollution Control Act) Public Law 92-500, as amended by Public Laws 95-217, 95-576, 96-483, 97-117, and 100-4, 33 U.S.C. 1251 et seq.

Mass/Day Measurements

a. The "average monthly discharges" is defined and the total mass of all daily discharges sampled and/or measured during a calendar month on which daily discharges are sampled and measured, divided by the number of daily discharges sampled and/or measured during such month. It is therefore, and arithmetic mean found by adding the weights of the pollutant found each day of the month and then dividing this sum by the number of days the tests were reported. The limitation is identified as "Daily Average" or "Monthly Average" in Part I of the permit and the average monthly discharge value is reported in the "Average" column under "Quantity" on the Discharge Monitoring Report (DMR).

b. The "average weekly discharge" is defined as the total mass of all daily discharges sampled and/or measured during the calendar week on which daily discharges are sampled and measured, divided by the number of daily discharges sampled and/or measured during such week. It is, therefore, an arithmetic mean found by adding the weights of pollutants found each day of the week and then dividing this sum by the number of days the tests were reported. This limitation is identified as "Weekly Average" in Part I of the permit. Enter the highest weekly average of sample measurements obtained during the reporting period in the "Maximum" column under "Quantity" on the DMR.

c. The "maximum daily discharge" is the total mass (weight) of a pollutant discharged during a calendar day. If only one sample is taken during any calendar day the weight of pollutant calculated from it is the "maximum daily discharge". This limitation is identified as "Daily Maximum", in Part I of the permit and the highest such value recorded during the reporting period is reported in the "Maximum" column under "Quantity" on the DMR.

d. The "average annual discharge" is a rolling average equal to the arithmetic mean of the mass measured in all discharges sampled and/or measured during consecutive reporting periods which comprise one year. For parameters that are measured at least once per month, the annual average shall be computed at the end of each month and is equal to the arithmetic mean of the monthly average of the month being reported and the monthly average of each of the previous eleven months. This limitation is defined as "Annual Average" in Part I of the permit and the average annual discharge value is reported in the "Average" column under "Quantity" on the DMR.

4. Concentration Measurements

a. The "average monthly concentration", other than for fecal coliform bacteria, is the sum of the concentrations of all daily discharges sampled and/or measured during a calendar month on which daily discharges are sampled and measured, divided by the number of daily discharges sampled and/or measured during such month (arithmetic mean of the daily concentration values). The daily concentration value is equal to the concentration of a composite sample or in the case of grab samples is the arithmetic mean (weighted by flow value) of all the samples collected during that calendar day. This limitation is identified as "Monthly Average" or "Daily Average" under "Other Limits" in Part I of the permit and the average monthly concentration value is reported under the "Average" column under "Quality" of the DMR.

b. The "average weekly concentration", other than for fecal coliform bacteria, is the sum of the concentrations of all daily discharges sampled and/or measured during a calendar week on which daily discharges are sampled and measured divided by the number of daily discharges sampled and/or measured during such week (arithmetic mean of the daily concentration values). The daily concentration value is equal to the concentration of a composite sample or in the case of grab samples is the arithmetic mean (weighted by flow value) of all the samples collected during that calendar day. This limitation is identified as "Weekly Average" under "Other Limits" in Part I of the permit. Enter the highest weekly average of sample measurements obtained during the reporting period in the "Maximum" column under "Quality" on the DMR.

c. The "maximum daily concentration" is the concentration of a pollutant discharged during a calendar day. It is identified as "Daily Maximum" under "Other Units" in Part I of the permit and the highest such value recorded during the reporting period is reported under the "Maximum" column under "Quality" on the DMR.

d. The "average annual concentration", other than fecal coliform bacteria, is the rolling average equal to the arithmetic mean of the effluent or influent samples collected during consecutive reporting periods which comprise one year. For parameters that are measured at least once per month, the annual average shall be computed at the end of each month and is equal to the arithmetic mean of the monthly average of the month being reported and the monthly average of each of the previous eleven months. This limitation is identified as "Annual Average" under "Other Limits" in Part I of the permit and the average annual concentration value is reported under the "Average" column under "Quality" on the DMR.

5. Other Measurements

a. The effluent flow expressed as million gallons per day (MGD) is the 24 hour average flow averaged monthly. It is the arithmetic mean of the total daily flows recorded during the calendar month. Where monitoring requirements for flow are specified in Part I of the permit the flow rate values are reported in the "Average" column under "Quantity" on the DMR.

b. An "instantaneous flow measurement" is a measure of flow taken at the time of sampling, when both the sample and flow will be representative of the total discharge.

c. Where monitoring requirements for pH, dissolved oxygen or fecal coliform bacteria are specified in Part I of the permit, the values are generally reported in the "Quality or Concentration" column on the DMR.

d. The "average annual discharge" for fecal coliform bacteria shall be calculated in the same manner as that for mass limitations (see item II.E.3.d.).

6. Types of Samples

a. Composite Samples: A "composite sample" is a combination of not less than 8 influent or effluent portions, of at least 100 ml, collected over the full time period specified in Part I.A. The composite sample must be flow proportioned by either time interval between each aliquot or by volume as it relates to effluent flow at the time of sampling or total flow since collection of the previous aliquot. Aliquots may be collected manually or automatically.

b. Grab Samples: A "grab sample" is a single influent or effluent portion which is not a composite sample. The sample(s) shall be collected at the period(s) most representative of the total discharge.

7. Calculation of Means

a. Arithmetic Mean: The "arithmetic mean" of any set of values is the summation of the individual values divided by the number of individual values.

b. Geometric Mean: The "geometric mean" of any set of values is the N^{th} root of the product of the individual values where N is equal to the number of individual values. The geometric mean is equivalent to the antilog of the arithmetic mean of the logarithms of the individual values. For purposes of calculating the geometric mean, values of zero (0) shall be considered to be one (1).

c. Weighted by Flow Value: "Weighted by flow value" means the summation of each concentration times its respective flow divided by the summation of the respective flows.

8. Calendar Day

A "calendar day" is defined as the period from midnight of one day until midnight of the next day. However, for purposes of this permit, any consecutive 24-hour period that reasonably represents the calendar day may be used for sampling.

9. Hazardous Substance

A "hazardous substance" means any substance designated under 40 CFR Part 116 pursuant to Section 311 of the Clean Water Act.

10. Toxic Pollutants

A "toxic pollutant" is any pollutant listed as toxic under Section 307(a)(1) of the Clean Water Act.

Part III

ıer Requirements

A. Reporting of Monitoring Results

Monitoring results obtained for each calendar month shall be summarized and reported on a Discharge Monitoring Report Form (DMR) (EPA No. 3320-1). These forms shall be submitted after each calendar quarter and postmarked no later than the 28th day of the month following the completed calendar quarter. (For example, data for January-March shall be submitted by April 28.) Calendar quarters are January-March, April-June, July-September, and October-December. Signed copies of these, and all other reports required by Section D of Part II, Reporting Requirements, shall be submitted to the Permit Issuing Authority at the following address:

Environmental Protection Agency
Region IV
Compliance Section
Facilities Performance Branch
Water Management Division
345 Courtland Street, N.E.
Atlanta, GA 30365

If no discharge occurs during the reporting period, sampling requirements of this permit do not apply. The statement "No scharge" shall be written on the DMR form. If, during the term of .is permit, the facility ceases discharge to surface waters, the Permit Issuing Authority and the State shall be notified immediately upon cessation of discharge. This notification shall be in writing.

B. Reopener Clause

This permit shall be modified, or alternatively, revoked and reissued to comply with any applicable effluent standard or limitation issued or approved under Sections 301(b)(2)(C) and (D), 304(b)(2), 307(a)(2), and 405(d)(2)(D) of the Clean Water Act (the Act), as amended, if the effluent standard, limitation, or sludge disposal requirement so issued or approved:

1. Contains different conditions or is otherwise more stringent than any condition in the permit; or

2. Controls any pollutant or disposal method not addressed in the permit.

The permit as modified or reissued under this paragraph shall also contain any other requirements of the Act then applicable.

CHRONIC FRESHWATER LANGUAGE

PART IV
Whole Effluent Toxicity Testing Program

As required by Part I of this permit, the permittee shall initiate the series of tests described below beginning in November 1991 to evaluate whole effluent toxicity of the discharge from outfall 001. All test species, procedures and quality assurance criteria used shall be in accordance with Short-term Methods for Estimating the Chronic Toxicity of Effluents and Receiving Waters to Freshwater Organisms, EPA/600/4-89/001, or the most current edition(s). The dilution/control water used will be a moderately hard water as described in EPA/600/4-89/001, Section 7 (or the most current edition). A standard reference toxicant quality assurance test shall be conducted concurrently with each species used in the toxicity tests and the results submitted with the discharge monitoring report (DMR). Alternatively, if monthly QA/QC reference toxicant tests are conducted, these results must be submitted with the DMR.

1. a. The permittee shall conduct a daphnid (Ceriodaphnia dubia) Survival and Reproduction Test and a Fathead Minnow (Pimephales promelas) Larval Survival and Growth Test. These tests shall be conducted using a control (0% effluent) and one test concentration consisting of 100% effluent (equivalent to the Receiving Water Concentration (RWC) of the effluent in the receiving water at critical conditions). Unacceptable chronic toxicity will be demonstrated if either test results in a no observable effect concentration (NOEC) less than 100% effluent. All test results shall be statistically analyzed according to Appendix H, EPA/600/4-89/001, or the most current edition.

   b. For each set of tests conducted, a minimum of three different 24-hour composite samples of final effluent shall be collected and used per the sampling schedule of Section 8.1.4.2, EPA/600/4-89/001 (or the most current edition). All test solutions shall be renewed daily. If test results do not meet the acceptability criteria of either Section 12, paragraph 12.10 or Section 10, paragraph 11.11, EPA/600/4-89/001 (or the most current edition), that test shall be repeated. A chronic test will be considered valid only if the acceptability criteria referenced above are met.

   c. If 100% mortality occurs in the RWC test concentration prior to the end of the test and control mortality is acceptable at that time, that test (including the control) shall be terminated with the conclusion that the sample demonstrates unacceptable chronic toxicity.

2. a. The toxicity tests specified above shall be conducted once every two months until 6 valid bimonthly tests have been completed, and once every 6 months thereafter for the duration of the permit, unless notified otherwise by EPA. These tests are referred to as "routine" tests.

b. Results from "routine" tests shall be reported according to EPA/600/4-89/001, Section 9, Report Preparation (or the most current edition), and shall be submitted as an attachment to the DMR. Such results are to be entered on the DMR in the following manner:

If the NOEC of a test species is less than 100% effluent, '<100%' should be entered on the DMR for that species. If the NOEC of a test species is greater than or equal to 100% effluent, '>100%' should be entered.

3. a. If unacceptable chronic toxicity (a NOEC less than 100% effluent in either test) is found in a "routine" test, the permittee shall conduct two additional toxicity tests, on the specie(s) indicating unacceptable toxicity. For each additional test, the sample collection requirements and test acceptability criteria specified in Section 1(b) above, must be met for the test to be considered valid. The first test shall begin within two weeks of the end of the "routine" test and the second test shall be conducted two weeks later. If either or both of these tests are invalid, additional test(s) are to be conducted every two weeks until two valid tests are completed (e.g., if the first test is valid and the second test is not, the permittee shall continue to conduct tests until one more test is valid). The additional tests will be used to determine if the toxicity found in the "routine" test is still present.

For "routine" tests with unacceptable chronic toxicity, the permittee shall conduct additional daphnid (Ceriodaphnia dubia) Survival and Reproduction and/or fathead minnow (Pimephales promelas) Survival and Growth multi-concentration tests, as appropriate. The tests will be conducted on a control, 100% effluent, and the following % effluent concentrations: 0.125 x the RWC, 0.25 x the RWC, 0.5 x the RWC, and 0.75 x the RWC. The sample collection requirements specified in Section 1(b) above shall be met.

b. Results from additional tests, required due to unacceptable chronic toxicity in the "routine" test, shall be submitted in a single report prepared according to EPA/600/4-89/001, and submitted within 45 days of completion of the second additional, valid test.

DISCHARGE MONITORING REPORT
GENERAL INSTRUCTIONS FOR COMPLETION

1. Monitoring Period - Fill in the monitoring period as provided for on the DMR. The monitoring period begins on the first day of the month and ends on the last.

2. Completion of Reported Values - For each parameter limited or monitored, the computed values must be entered.

3. Quantity or Loading (lbs/day or kg/day) - The "average monthly discharge" is the total of the daily loads (in pounds) as derived from each day's calculated measurement divided by the number of days during the month the measurements were made. In completing calculations for these averages, quantities or loadings are to be reported in lbs/day or kg/day using the following equations:

   Quantity (lbs/day) = Flow (MGD) x concentration (mg/l) x 8.34
   Quantity (kg/day) = Flow (MGD) x concentration (mg/l) x 3.79

4. Frequency of Analysis - Enter frequency of analysis which is the actual frequency of sampling and analysis used during the monitoring period; the minimum is as specified in the permit and on the DMR.

   All monitoring frequency requirements of the permit are minimum requirements. The results of any additional monitoring of parameters at the location(s) designated in the permit, using the approved analytical methods, must be included on the DMR. Such increased frequency should also be indicated on the DMR.

5. Sample Type - Enter the sample type as Sample Measurement (actual sample type used during the monitoring period.

6. No. Ex. (Number of Exceptions) - Enter the number of sample measurements as calculated values for the monitoring period that exceed (maximum and/or minimum, 7-day average, etc.) the permit requirements for each parameter. The number should be the total of all exceptions during the reporting period, including quantity and quality limits. If none occurred, then enter "0".

7. If no discharge occurs during the month, a report must still be submitted. Simply enter "No Discharge" across the face of the DMR for that reporting month.

8. When violations of permit conditions are reported, attach a brief explanation describing the cause of the violation and any corrective actions taken. Reference each violation by date.

9. Complete the bottom of the DMR with the name and title of the principal executive officers, the date, and the telephone number, along with the signature of the principal officer or authorized agent. Each sheet must be signed.

10. Mail a copy to the appropriate EPA office and keep one copy on file at the permittee's lab or office.

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

REGION IV

345 COURTLAND STREET, N.E.
ATLANTA, GEORGIA 30365

AMENDMENT TO THE STATEMENT OF BASIS AT THE TIME OF FINAL PERMIT ISSUANCE

DATE: SEP 16 1991

APPLICATION NO: FL0042293

NAME OF APPLICANT: Barefoot Bay WWTP

1. Changes to Permit from Draft Permit to Final Permit Stage:

Page I-1: Reference to the sampling point for each parameter was added.

Page I-2, Item 2: An interim total residual chlorine (TRC) limit of 0.2 mg/l (daily maximum) was added to the permit with a requirement to meet the final TRC limit of 0.01 mg/l no later than three months from the effective date of the permit. These requirements are based on comments from the U.S. Fish and Wildlife Service by letters dated June 7, 1991, and August 8, 1991. Their comments state that in the case of TRC, there should be no significant adverse impacts as long as the effluent is discharged upon a spray field. However, if there should be direct discharges into the drainage canal (as is the case with Barefoot Bay WWTP at this time), severe impacts to the fishery in the canal and Sebastian Creek could result, thus adversely impacting the wood stork which is classified as an endangered species. Therefore, the Fish and Wildlife Service recommends that no direct discharges to the canal be permitted, or that a 0.2 mg/l interim TRC limit be applied to the permit.

Page I-3, Item 7: The final permit requires that sampling for fecal coliform will be taken after treatment at the chlorine contact chamber but prior to entering the polishing/percolation ponds. The draft permit required that sampling for fecal coliform be taken at the nearest accessible point after final treatment but prior to the actual discharge or mixing with the receiving water.

Page I-4: The compliance schedule for Total Residual Chlorine (TRC) was revised to require meeting the final limit of 0.01 mg/l no later than three months from the effective date of the permit.

Printed on Recycled Paper

2. Public Comment:

Comments were received from the U.S. Fish and Wildlife Service (FWS) by letter dated June 7, 1991. An additional letter dated August 8, 1991, was received from the FWS to confirm verbal recommendations concerning final permit issuance. These comments were incorporated into the final NPDES permit. No other comments were received during the public comment period.

3. State Certification:

Certification for final issuance of this permit was requested by the Environmental Protection Agency on May 9, 1991. The Florida Department of Environmental Regulation waived certification per 40 C.F.R. 124.53(c). (Certification was waived by telephone conversation.)

SEP 27 1991
SARASOTA OFFICE

REF: 4WM-FP

SEP 25 1991

Mr. Paul H. Bradtmiller, Senior Vice President
Florida Cities Water Company
4837 Swift Road, Suite 100
Sarasota, Florida 34231

RE: Notice of Proposed Assessment of a Civil Penalty;
Tentative Consent Agreement and Order;
Docket No. CWA-IV 91-538

Dear Mr. Bradtmiller:

Enclosed is a document entitled "Administrative Complaint". We have filed this Complaint against Florida Cities Water Company under the authority of Section 309(g) of the Clean Water Act ("Act"), 33 U.S.C. Section 1319(g). In the Complaint, the U. S. Environmental Protection Agency ("EPA") alleges that Florida Cities Water Company has violated various provisions of the Act, and its implementing regulations. The violations EPA is alleging are specifically set out in Section II of the Complaint.

By law, you have a right to request a Hearing regarding the violations alleged in the Complaint, and the proposed administrative civil penalty. Any request for a Hearing must be in writing and must specify the factual and legal issues which are in dispute and the specific factual and legal grounds for your defense, pursuant to Section 126.104 of the enclosed "Guidance on Class I Clean Water Act Administrative Penalty Procedures". Please pay particular attention to Complaint Section IV entitled "Notice of Opportunity to Request a Hearing". Note that should you fail to request a Hearing within thirty days of your receipt of the Complaint, you will waive your right to such a Hearing and the proposed civil penalty may be assessed against you without further proceedings. You have the right to be represented by an attorney, or to represent yourself at any stage of these proceedings.

It is EPA's policy to encourage all parties against whom it files a complaint to pursue the possibility of settlement, and EPA recognizes that, pursuant to this policy, an informal conference was held between you and EPA regarding the matters set forth in the above referenced Complaint. As a result of this informal settlement conference, a tentative Consent Agreement and Order was negotiated and is enclosed for your convenience. If after review you find this tentative Consent Agreement and Order accurate, please sign and return to Mr. Michael Hom, Water Management Division, at the above address.

Printed on Recycled Paper

Notwithstanding the enclosed tentative Consent Agreement and Order, the law requires EPA to file the above referenced Complaint and provide the public with thirty days in which to comment. Upon expiration of the thirty-day public comment period, EPA must consider any and all public comments received before executing the enclosed Consent Agreement and Order. Assuming the Consent Agreement and Order is signed by both parties, an executed copy will be sent to you. The issuance of this Consent Agreement and Order shall constitute a waiver by you of your right to a hearing on, and to judicial appeal of, the agreed upon civil penalty.

Please note that the informal conference and the enclosed tentative Consent Agreement and Order do not extend the thirty days by which you must request or waive a Hearing on the matters raised in the Complaint; and the two procedures can be pursued simultaneously. If you have any questions regarding these matters, please contact Mr. Hom.

We urge your prompt attention to this matter.

Sincerely yours,

W. Ray Cunningham, Director
Water Management Division

Enclosure

Office of Regional Counsel

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
REGION IV

IN THE MATTER OF:	)	Docket No. CWA-IV 91-538
Florida Cities Water Company 4837 Swift Road, Suite 100 Sarasota, Florida 34231	)	Proceeding to Assess Class I Administrative Penalty Under Clean Water Act, Section 309(g)

ADMINISTRATIVE COMPLAINT

I. Statutory Authority

The following Findings are made, and Notices given under the authority vested in the Administrator of the U. S. Environmental Protection Agency ("EPA") by Section 309(g) of the Clean Water Act ("Act"), 33 U.S.C. Section 1319(g). The Administrator has delegated these authorities to the Regional Administrator of EPA Region IV, who has in turn delegated them to the Director of the Water Management Division of EPA Region IV, who hereby issues this Complaint.

II. Findings of Violation:

1. Florida Cities Water Company, ("Respondent"), a person within the meaning of Section 502(5) of the Act, 33 U.S.C. Section 1362(5), owns or operates a facility located at Barefoot Bay, Brevard County, Florida, which is a point source and discharges pollutants to the drainage canal to Sebastian River, a navigable water of the United States, all within the respective definitions established in Section 502 of the Act, 33 U.S.C. Section 1362. Respondent is therefore subject to the provisions of the Act, 33 U.S.C. Section 1251 et seq.

2. Respondent has violated Section 301(a) of the Act, 33 U.S.C. Section 1311(a), by discharging pollutants into waters of the United States without a valid NPDES permit issued pursuant to Section 402 of the Act (33 U.S.C. 1342), on September 14, 1989 from its

Barefoot Bay WWTP into a drainage canal leading to the Sebastian River.

3. EPA has consulted with the State of Florida regarding this proposed action by mailing a copy of this document to the appropriate State official, and offering an opportunity for the State to consult with EPA on this proposed penalty assessment.

III. Notice of Proposed Order Assessing A Civil Penalty

Based on the foregoing findings of violation, and pursuant to the authority of Section 309(g) of the Act, 33 U.S.C. Section 1319(g), EPA Region IV hereby proposes to issue a Final Order Assessing Administrative Penalties to Florida Cities Water Company, assessing a penalty in the amount of $6,000.00.

The proposed penalty amount was determined by EPA after taking into account the nature, circumstances, extent and gravity of the violation or violations, and Respondent's prior compliance history, degree of culpability for the cited violations, any economic benefit or savings accruing to Respondent by virtue of the violations, and Respondent's ability to pay the proposed penalty, all factors identified at Section 309(g)(3) of the Act, 33 U.S.C. Section 1319(g)(3). EPA may issue the Final Order Assessing Administrative Penalties thirty days after Respondent's receipt of this Notice, unless Respondent, within that time, requests a hearing on this Notice pursuant to the following section.

IV. Notice of Opportunity to Request A Hearing

1. Respondent may, pursuant to Section 309(g) of the Act, 33 U.S.C. Section 1319(g), request within thirty days of receipt of this Notice a hearing on the proposed civil penalty assessment, and at the hearing may contest any material fact contained in the Findings of Violation at Section II above, and the appropriateness of any penalty

amount. The request for a hearing must specify the factual and legal issues which are in dispute and the specific factual and legal grounds for Respondent's defense. Any and all specific allegations not responded to by Respondent shall be deemed admitted. The procedures for the hearing, if one is requested, are set out in "Guidance on Class I Clean Water Act Administrative Penalty Procedures", a copy of which is enclosed.

2. Respondent must send any request for a hearing to:

Regional Hearing Clerk
U. S. EPA Region IV
345 Courtland Street
Atlanta, Georgia 30365

3. Be aware that should you request a hearing on this proposed penalty assessment, members of the public, to whom EPA is obligated to give notice of this proposed action, will have a right under Section 309(g)(4)(B) of the Act, 33 U.S.C. Section 1319(g)(4)(B), to be heard and to present evidence on the appropriateness of the penalty assessment. Should you not request a hearing, EPA will issue a Final Order Assessing Administrative Penalties, and only members of the public who submit timely comment on this proposal will have an additional 30 days to petition EPA to set aside the Final Order Assessing Administrative Penalties and to hold a hearing thereon. EPA will grant the petition and will hold a hearing only if the petitioner's evidence is material and was not considered by EPA in the issuance of the Final Order Assessing Administrative Penalties.

4. Neither assessment nor payment of an administrative civil penalty pursuant to this section of the Act shall affect your continuing obligation to comply with the Clean Water Act and with any separate Compliance Order issued under Section 309(a) of the Act, 33 U.S.C. Section 1319(a), for the violations alleged herein.

IN THE MATTER OF:	)	Docket No. CWA-IV 91-538
	)	
Florida Cities Water Company	)	Proceeding to Assess Class I
4837 Swift Road, Suite 100	)	Administrative Penalty Under
Sarasota, Florida 34231	)	Clean Water Act, Section 309(g)

CONSENT AGREEMENT AND ORDER
ASSESSING ADMINISTRATIVE PENALTIES

I. Statutory Authority

The following Findings are made and Consent Agreement issued under the authority vested in the Administrator of the U.S. Environmental Protection Agency ("EPA") by Section 309(g) of the Clean Water Act ("Act"), 33 U.S.C. Section 1319(g). The Administrator has delegated these authorities to the Regional Administrator of EPA Region IV, who has in turn delegated them to the Director of the Water Management Division of EPA Region IV, who hereby issues this Final Order.

II. Findings of Violation

Upon consent of the parties by their attorneys and authorized officials, the parties stipulate and the Director finds:

1. Florida Cities Water Company, ("Respondent"), a person within the meaning of Section 502(5) of the Act, 33 U.S.C. Section 1362(5), owns or operates a facility located at Barefoot Bay, Brevard County, Florida, which is a point source and discharges pollutants to the drainage canal to Sebastian River, a navigable water of the United States, all within the respective definitions established in Section 502 of the Act, 33 U.S.C. Section 1362. Respondent is therefore subject to the provisions of the Act, 33 U.S.C. Section 1251 et seq.

2. EPA Region IV issued to Respondent and notified the public of an Administrative Complaint, Docket No. CWA-IV 91-538 which included formal findings of violation, notice of a proposed assessment of a civil penalty against Respondent, and notice of Respondent's opportunity to request a hearing on the proposed administrative penalty assessment. EPA Region IV has taken into consideration any public comments timely received.

3. The State of Florida was given an opportunity to consult with EPA regarding the assessment of an administrative penalty against Respondent. EPA Region IV has taken into consideration any comments received from the State.

4. Respondent has violated Section 301(a) of the Act, 33 U.S.C. Section 1311(a), by discharging pollutants into waters of the United States without a valid NPDES permit issued pursuant to Section 402 of the Act (33 U.S.C. 1342), on September 14, 1989 from its Barefoot Bay WWTP into a drainage canal leading to the Sebastian River.

III. Penalty Order and Consent:

Based on the foregoing stipulations and findings, and having taken into account the nature, circumstances, extent and gravity of the violations, Respondent's prior history of compliance, degree of culpability, economic benefit or savings resulting from the violations, and ability to pay, and under the authority of Section 309(g) of the Act, 33 U.S.C. Section 1319(g), EPA Region IV hereby ORDERS AND RESPONDENT HEREBY CONSENTS, that:

1. The provisions of this Consent Agreement shall be binding upon the Respondent, its officers, directors, agents, servants, authorized representatives, employees, and successors or assigns.

2. Florida Cities Water Company shall pay $6,000.00 for its past violations of the Clean Water Act cited above, by mailing a

money order or certified check payable to "Treasurer, United States of America" by the effective date defined below, to the following address:

U.S. EPA Region IV
P.O. Box 100142
Atlanta, Georgia 30384

Respondent shall send notice of such payment, including a copy of the money order or check, to the Hearing Clerk at the following address:

Regional Hearing Clerk
U.S. EPA Region IV
345 Courtland Street, NE
Atlanta, Georgia 30365

IV. General Provisions

1. This Consent Agreement and Order represents full monetary settlement of the proposed administrative penalties sought by EPA for the underlying violations as alleged in the Complaint. However, issuance of this Consent Agreement and Order does not constitute a waiver by EPA of its right to issue an administrative order pursuant to Section 309(a) of the Act, 33 U.S.C. Section 1319(a), to require any remedial actions necessary (other than penalty assessment) to address the cause of the underlying violations. In addition, issuance of this Consent Agreement and Order does not constitute a waiver by EPA of its right to seek injunctive relief pursuant to Section 309(b) of the Act, 33 U.S.C. Section 1319(b), or to seek criminal penalties for the underlying violations pursuant to Section 309(c) of the Act, 33 U.S.C. Section 1319(c). Nor, pursuant to Section 309(g)(7) of the Act, 33 U.S.C. Section 1319(g)(7) of the Act, does issuance or compliance with this Consent Agreement and

Order exempt Respondent from responsibility to comply with all requirements of the Act and of any legal order or permit issued pursuant thereto.

2. Failure by Respondent to pay in full the penalty assessed in Section III, Paragraph 2 shall render the entire proposed penalty of $6,000.00 due and owing, and it shall be paid immediately in the manner provided in Section III, Paragraph 2 of the Consent Agreement.

Failure by Respondent to pay the penalty set forth in Section III, Paragraph 2 may subject Respondent to a civil action to collect the assessed penalty, plus interest, attorney's fees, costs and an additional quarterly nonpayment penalty equal to 20 percent of the aggregate amount of such penalty pursuant to Section 309(g)(9) of the Act, 33 U.S.C. Section 1319(g)(9). In any such collection action, the validity, amount and appropriateness of the penalty and of the Consent Agreement and Order shall not be subject to review. Interest will accrue on the penalty at the rate established by the Secretary of the Treasury pursuant to 31 U.S.C. Section 3717. A late payment handling charge of twenty ($20.00) dollars will be imposed after thirty (30) days, with an additional charge of ten ($10.00) dollars for each subsequent 30-day period over which an unpaid balance remains. In addition, a six percent (6%) per annum penalty will be applied on any principal amount not paid within ninety (90) days of the effective date of this Order.

3. For purposes of federal income taxation, Respondent shall not be entitled to, and agrees not to, claim a deduction for any penalty payment made pursuant to this Consent Agreement and Order.

4. Respondent knowingly and explicitly waives its rights pursuant to Sections 309(g)(2) and (8), 33 U.S.C. Section 1319(g)(2)

and (8), to a hearing on this penalty assessment, and to judicial review of this administrative penalty assessment.

5. Each party to this Consent Agreement shall bear its own attorneys' fees, costs and expenses in this action. Should Respondent subsequently be determined to have violated the terms and conditions of this Consent Agreement, then the United States Environmental Protection Agency reserves its rights to seek payment of all attorneys' fees, costs and expenses it incurs in any actions against Respondent for noncompliance with this Consent Agreement.

V. Effective Date

This Consent Agreement and Order shall become effective thirty (30) days after the date of issuance noted below.

AO 450 (Rev. 5/85) Judgment in a Civil Case ●

Exhibit_____(GSA-24)

United States District Court

MIDDLE DISTRICT OF FLORIDA

UNITED STATES OF AMERICA

V.

AVATAR HOLDINGS, INC., and
FLORIDA CITIES WATER COMPANY

JUDGMENT IN A CIVIL CASE

CASE NUMBER: 93-281-Civ-FTM-21

☐ **Jury Verdict.** This action came before the Court for a trial by jury. The issues have been tried and the jury has rendered its verdict.

☒ **Decision by Court.** This action came ~~to trial or hearing before the Court~~. The issues have been tried or heard and a decision has been rendered.

IT IS ORDERED AND ADJUDGED that judgment is entered in favor of plaintiff United States of America and against defendant Florida Cities Water Company for the violations at the three wastewater treatment plants as follows:

Barefoot Bay	$5,610.00
Carrollwood	$14,675.00
Waterway Estates	$289,425.00
TOTAL	**$309,710.00**

Judgment is entered in favor of defendant Avatar Holdings, Inc. and against plaintiff United States of America on plaintiff's claims against it.

(By) Deputy Clerk

UNITED STATES DISTRICT COURT
MIDDLE DISTRICT OF FLORIDA
FORT MYERS DIVISION

UNITED STATES OF AMERICA

Plaintiff,

V. CASE NO. 93-281-CIV-FTM-21

AVATAR HOLDINGS, INC., and
FLORIDA CITIES WATER COMPANY,

Defendants.
_____/

MEMORANDUM ORDER

This is an action by the United States of America ("Plaintiff") against Florida Cities Water Company ("Florida Cities"), a private utility company, and its parent company, Avatar Holdings, Inc. ("Avatar Holdings"), brought pursuant to the civil penalty provisions of the Clean Water Act (CWA), 33 U.S.C. § 1319 (b). The action was tried to the Court sitting without a jury. Upon due consideration of the testimony and evidence presented herein, the arguments of counsel, and the proposed findings submitted by the parties, the Court issues the following opinion as its findings of fact and conclusions of law in accordance with Rule 52, Federal Rules of Civil Procedure.

PROCEDURAL BACKGROUND

Prior to trial, the Court decided summary judgment motions of all three parties. The Court granted Plaintiff summary judgment on liability against Florida Cities on the Plaintiff's claims for National Pollutant Discharge System (NPDES) permit violations at Barefoot Bay and

O 72A
Rev. 8/82)

Carrollwood and claims for unpermitted discharges, discharges to an unpermitted location and NPDES permit violations at Waterway Estates. The Court granted Florida Cities summary judgment on the allegations in paragraphs 16-23 and 30 of the Second Amended Complaint, which consisted of a claim for discharge from Barefoot Bay without an NPDES permit, claims for violations of Administrative Order (AO) 90-106 for discharging without a permit from Barefoot Bay, and a claim for discharge without an NPDES permit from Carrollwood. The Court also granted Avatar Holdings partial judgment on the pleadings as to all allegations against Avatar Holdings that date back more than five years due to the five year statute of limitations, 28 U.S.C. § 2462. The remaining issues at trial were the amount of civil penalty to be assessed against Florida Cities[1], the liability of Avatar Holdings as Florida Cities' parent company, and the amount of civil penalty to be assessed against Avatar Holdings if it is found to be liable. The parties have filed their proposed findings of fact and conclusions of law and post-trial briefs, and Avatar Holdings has additionally filed a memorandum of law in support of judgment as a matter of law and Plaintiff has filed a memorandum in opposition thereto.

FINDINGS OF FACT — FLORIDA CITIES[2]

Florida Cities is a utility company, which owns and operates the three wastewater treatment plants that are involved in this case: Barefoot Bay, Carrollwood, which is no longer

[1]In accordance with the Pretrial Order (Dkt. 248), the trial of this case proceeded upon the Revised Joint Pretrial Statement (Dkt. 264), and said pretrial statement is controlling. In the pretrial statement, the parties indicated that the only issue to be tried with respect to Florida Cities was the amount of the civil penalty to be assessed. Therefore, the Court will base the amount of penalties on the number of violations determined in the Court's prior Orders in this case.

[2]Additional findings of fact are incorporated into the Court's discussion of the six factors to consider in assessing the amount of the civil penalty, as is required by the Eleventh Circuit in Atlantic States Legal Foundation, Inc. v. Tyson Foods, Inc., 897 F.2d 1128, 1142 (11th Cir. 1990)(stating that in determining the amount of penalty, the district court must indicate the weight it gives to factors in the applicable statute and the factual findings that support its conclusions).

AO 72A
(Rev. 8/82)

in operation, and Waterway Estates. In order for a company to discharge to surface waters of the United States, it must obtain an NPDES permit issued from the Environmental Protection Agency (EPA) or by a state to which the EPA has delegated NPDES permitting authority. Prior to May 1, 1995, Florida was a "non-delegated" state under the CWA such that dischargers in Florida were required to be permitted by both the EPA and the Florida Department of Environmental Protection (FDEP)[3].

I. Barefoot Bay

The Barefoot Bay plant is located in Brevard County, Florida, and it discharges treated effluent into an agricultural drainage canal which leads to the Sebastian River. Barefoot Bay utilizes two percolation ponds. Barefoot Bay provides secondary wastewater treatment to a residential community and is currently undergoing a plant modification to provide advanced wastewater treatment. On November 1, 1991, NPDES permit FL0042293 became effective. The permit required Florida Cities to report to EPA total residual chlorine (TRC) levels, toxicity test results, and biochemical oxygen demand (BOD) levels. The 269 Clean Water Act violations pertaining to Barefoot Bay in this case are the following exceedances of NPDES permit FL0042293: 182 violations of the TRC limitation between September 1992 and March 1993; 3 chronic toxicity test failures in September-October 1992, May 1993, and February 1994; and 79 violations for failure to report BOD on a weekly basis between November 1991 and June 1993 and twice in November 1993.

[3]The Florida Department of Environmental Protection (FDEP) was formerly known as the Florida Department of Environmental Regulation (FDER). Throughout this Memorandum Order, FDEP should be read to mean either FDEP or its predecessor agency, FDER, depending on the relevant time period.

TO 72A
Rev. 8/82)

In September 1992, Barefoot Bay purchased and put into use a new Hach DPD DR-100 chlorine tester, which is an EPA approved method for testing chlorine limits of 0.01 milligrams per liter. However, the EPA guidance materials acknowledge that the DPD DR-100 colorimeter is inaccurate below levels of 0.1 milligrams per liter. Thus, the EPA guidance materials allow dischargers who test for TRC with the DPD DR-100 colorimeter to report measurements below 0.1 milligrams per liter as non-detectable. Between September 1992 and March 1993, Florida Cities reported chlorine residuals at or below 0.1 milligrams per liter. Had Florida Cities reported the chlorine as non-detectable rather than as an actual number, Florida Cities would have been deemed to be in compliance with chlorine limits under the Clean Water Act. In any event, after reporting the chlorine residuals at Barefoot Bay, Florida Cities constructed, permitted and placed into service by March 3, 1993 an amperometric titrator and a sulfur dioxide feed, which eliminates chlorine through the combination of sulfur dioxide with the chlorine residual.

With respect to the chronic toxicity test violations, the testimony presented at trial established that the most common cause of chronic toxicity failures is the presence of ammonia in the effluent. Ammonia is made of nitrogen and hydrogen (NH_3). Although advanced wastewater treatment provides for nutrient removal from effluent, secondary treatment does not provide for removal of nutrients such as nitrogen or phosphorus. Thus, Barefoot Bay, a secondary treatment plant, was not designed to remove the nitrogen which resulted in the chronic toxicity test violations.

With respect to the BOD violations, Florida Cities had been reporting carbonaceous biochemical oxygen demand (CBOD) rather than BOD as required in the permit. The BOD test measures the oxygen demand exerted by treated effluent on the receiving system. In October

O 72A
Rev. 8/82)

1993, Barefoot Bay applied to EPA for a modification of NPDES permit FL0042293 to allow monitoring for CBOD instead of BOD, and EPA granted the modification request with no change in the actual limit. The testimony at trial showed that BOD levels can be extrapolated with a reasonable degree of accuracy from CBOD levels. Thus, even though Barefoot Bay improperly reported CBOD levels, the effluent would have complied with the applicable permit limits.

II. Carrollwood

Until it was closed on January 6, 1992, the Carrollwood plant was located in Hillsborough County, Florida, and provided secondary wastewater treatment to a residential community. Between 1975 and January 1992, Carrollwood discharged secondarily treated effluent into the Sweetwater Creek pursuant to a series of FDEP permits and consent orders. In May 1991, the EPA issued NPDES permit FL0029319, which imposed advanced wastewater treatment standards. The 234 Clean Water Act violations pertaining to Carrollwood in this case are exceedances of the NPDES permit limitations for phosphorus, CBOD, nitrogen, TRC, Total Suspended Solids (TSS), and fecal coliform between July 1991 and January 1992.

In 1979, the FDEP determined that there should be no discharge into Sweetwater Creek, which leads to Tampa Bay, in order to reduce the amount of pollution going to Tampa Bay. In 1984, the EPA denied Florida Cities' NPDES renewal application to discharge into the Sweetwater Creek. In April 1988, FDEP issued Carrollwood an operating permit to the Carrollwood facility requiring Florida Cities to connect to the Hillsborough County system or to construct an advanced wastewater treatment facility by October 1, 1990. In the summer of 1990, Florida Cities applied to the FDEP for another operation permit and the permit application was denied. However, Florida Cities and FDEP entered into a consent order in January 1991

AO 72A
(Rev. 8/82)

reincorporating the effluent limitations of the April 1988 operating permit and extending until April 1992 the construction deadline for interconnection to Hillsborough County or completion of advanced wastewater treatment. The consent order also required Florida Cities to continue to operate the wastewater treatment plant in accordance with the 1988 effluent limitations.

Since late 1990, Carrollwood also operated under EPA AO 90-100, which imposed secondary treatment limits. No violations of secondary treatments were recorded between July 1, 1991 and January 6, 1992, and Florida Cities met the effluent limitations and monitoring requirements of the active administrative orders. In May 1991, the EPA issued the NPDES permit with advanced wastewater treatment limits. The level of treatment required by the NPDES permit reflected increased treatment requirements for phosphorous and nitrogen which were unattainable by the secondary treatment plant.

In 1991, Florida Cities simultaneously pursued two remedial options: connection to the Hillsborough County system and construction of an advanced wastewater treatment. Hillsborough County did not have capacity to accept effluent until the second quarter of 1991. After Hillsborough County agreed to waive a $5.5 million capacity fee, an agreement was signed on June 5, 1991 to interconnect the two facilities by January 1992. Florida Cities then abandoned plans to construct an advanced wastewater facility. Both before and after the agreement with Hillsborough County, Florida Cities requested that the EPA allow secondary interim limits and relief from the advanced wastewater treatment requirements. The EPA never revoked AO 90-100, which authorized secondary treatment, until March 1992, two months after the interconnection with Hillsborough County was completed. In 1991, the EPA assessed a

AO-72A
(R . 8/82)

$15,000 penalty ($13.51/day) under the CWA for discharges without an NPDES permit between June 1987 and July 1990 at Carrollwood.

III. Waterway Estates

The Waterway Estates plant is located in Lee County, Florida. Since April 1992, Waterway Estates has provided advanced wastewater treatment, and prior to that time, it provided secondary wastewater treatment. Waterway Estates has discharged treated effluent into the Caloosahatchee River since July 14, 1991, and prior to July 14, 1991, it discharged treated effluent into a canal which led to the Caloosahatchee River. The Waterway Estates plant exceeded NPDES permit FL0030325, which imposed advanced wastewater treatment standards, for a total of 1038 Clean Water Act violations consisting of: 396 violations for discharge without an NPDES permit between October 1, 1988 and October 31, 1989; 621 violations for discharging into a canal, instead of to the 6-foot contour line of the Caloosahatchee River between November 1, 1989 and July 14, 1991; 18 violations of total nitrogen loading and concentration; and 3 toxicity test violations.

In 1975, Florida Cities received a wasteload allocation and an NPDES permit which authorized Waterway Estates to discharge secondarily treated effluent to a canal leading to the Caloosahatchee River. The EPA renewed the permit in 1981 and 1983, and on May 9, 1986, Florida Cities applied to EPA Region IV for a routine renewal of its NPDES permit. At that time, permit writer Connie Kagey denied the application. Ms. Kagey based her denial on her review of the cover page and page 17 of the January 1981 Caloosahatchee River Wasteload Allocation Documentation, which is a preliminary planning document drafted as guidance by FDEP regional offices making permitting decisions. Based on her review of the planning

D 72A
ev. 8/82)

document, Ms. Kagey determined that Waterway Estates had no wasteload allocation. However, Florida Cities was given opportunities to bring any errors to the EPA's attention at several occasions: after receiving the letter indicating that there would be a public notice period, during the public notice period, and after the issuance of the permit decision when Florida Cities could have requested a hearing under 40 C.F.R. §§ 124.74 or 124.114.

Once the existing NPDES permit expired in 1987, the EPA issued AO 87-085, whereby the EPA authorized Waterway Estates to continue discharging effluent under the terms of the 1981 NPDES permit and directed that the facility cease its discharges by September 30, 1988. Florida Cities then decided to construct an advanced wastewater treatment facility and hired Source, Inc. in early 1988 to design the upgrade. In August 1988, the EPA amended its 1987 administrative order to require Waterway Estates to complete construction and meet final effluent requirements by November 1, 1990. The FDEP also issued a temporary operating permit requiring compliance with effluent limitations by November 1, 1990. The temporary permit allowed secondary discharges to the canal until November 1, 1990, and the EPA did not challenge or comment on the issuance of this permit.

On September 26, 1989, the EPA issued AO 89-109, which contained a construction schedule for the advanced wastewater treatment upgrade, a construction schedule for the relocation of the outfall to the 6-foot contour line of the Caloosahatchee River, and interim secondary treatment effluent limitations from the 1981 NPDES permit until the advanced wastewater treatment construction was completed. Additionally, on September 29, 1989, the EPA issued NPDES permit No. FL0030325, which contained effluent limitations for an advanced wastewater treatment facility. The FDEP also issued a construction permit which

provided an extension of time for the advanced wastewater treatment upgrade and relocation of the outfall to September 1992. Florida Cities requested that the EPA extend AO 89-109 to match the September 1992 construction deadline set by the FDEP, but the EPA did not respond to the request. Florida Cities then completed the advanced wastewater treatment upgrade in April 1992, ahead of the FDEP's schedule, but failed to meet the deadline set in AO 89-109 for October 1, 1991. The outfall to the six-foot contour line of the Caloosahatchee River was operational on July 14, 1991, ahead of the deadlines established in the state construction permit and EPA AO 89-109.

CONCLUSIONS OF LAW — FLORIDA CITIES

The penalty provisions of the Clean Water Act are set forth in 33 U.S.C. § 1319 (d), which provides in pertinent part:

> Any person who violates [specified sections of the Act] shall be subject to a civil penalty not to exceed $25,000 per day for each violation. In determining the amount of a civil penalty the court shall consider the seriousness of the violation or violations, the economic benefit (if any) resulting from the violation, any history of such violations, any good-faith efforts to comply with the applicable requirements, the economic impact of the penalty on the violator, and such other matters as justice may require.

The Clean Water Act was intended "to restore and maintain the chemical, physical, and biological integrity of the Nation's waters." Gwaltney of Smithfield v. Chesapeake Bay Foundation, 484 U.S. 49, 52 (1987)(quoting Section 101(a) of the Act). In Atlantic States Legal Foundation, Inc. v. Tyson Foods, Inc., the Eleventh Circuit stated that in determining penalties under the Clean Water Act, "the point of departure for the district court should be the maximum fines for such violations permitted by the Clean Water Act." 897 F.2d 1128, 1137 (11th Cir. 1990). The Court further stated that if the district court chooses not to impose the maximum

A 72A
(F / 8-82)

fine, "it must reduce the fine in accordance with the factors spelled out in section 1319(d), clearly indicating the weight it gives to each of the factors in the statute and the factual findings that support its conclusions." Id. at 1142. The Court also noted that in Tull v. United States, 481 U.S. 412, 422-425 (1987), "the Supreme Court made clear that economic gain and restoration of the status quo is not the only basis on which penalties should be awarded under the Clean Water Act. In addition, the penalties are designed to punish violators for their non-compliance and to serve the goal of retribution." Id. at 1141.

The statutory maximum for the violations at issue is calculated by multiplying daily violations by $25,000. In order to calculate the statutory maximum for monthly violations, the number of monthly violations is multiplied by the number of days in the month they occurred and that number is multiplied by $25,000. Thus, the Court's computation of the statutory maximum is as follows: $6,600,000 (264 x 25,000) for the Barefoot Bay violations, $14,675,000 (587[4] x 25,000) for the Carrollwood violations, and $32,025,000 (1281[5] x 25,000) for the Waterway Estates violations. The total is $53,300,000. In accordance with Tyson Foods, this statutory maximum is the Court's departure point, and the Court will consider Defendants' arguments to reduce the penalty in accordance with the factors in § 1319 (d). The Plaintiff argues that the penalty should only be reduced to $4,861,500.

---

[4]The Carrollwood violations consist of violations of the following parameters, several of which are monthly violations: (1) Phosphorus from July-November 1991, the equivalent of 153 days of violations; (2) Carbonaceous Biological Oxygen Demand (CBOD) in October 1991, the equivalent of 31 days of violations; (3) Nitrogen in July 1991 and from September-November 1991, the equivalent of 122 days of violations; (4) Total Residual Chlorine, amounting to 184 violations; (5) Total Suspended Solids from October-December 1991, the equivalent of 92 days of violations; and (6) Fecal Coliform, amounting to 5 violations. The sum of these violations is 587.

[5]The Waterway Estates violations consist of the following: 396 days of unpermitted discharges; 621 days of discharges to an unpermitted location; Nitrogen violations between July 1991 - March 1992, the equivalent of 261 separate days of violations; and 3 chronic toxicity test violations. The sum of these violations is 1281.

AO 72A
Rev. 3/82)

Florida Cities maintains that the penalty should be de minimis — no more than $48,000. Florida Cities points out that trial courts have broad discretion when deciding the appropriate civil penalty amount in Clean Water Act enforcement actions, citing Hawaii's Thousand Friends v. City and County of Honolulu, 821 F.Supp. 1368, 1395 (D.Haw. 1993). Florida Cities points out that in Hawaii's Thousand Friends, the court found that mitigation in the amount of 99.71% of the maximum statutory penalty was within its "sound discretion," even though the discharges failed to meet secondary treatment standards, discharges of raw sewage were numerous and unreported, and the court found a lack of good faith efforts to comply with the NPDES permit or avoid other violations. The courts' determination of the penalty under the Clean Water Act has been characterized as "highly discretionary." Tull v. United States, 481 U.S. 412, 413 (1987), Sierra Club v. Cedar Point Oil Co., 73 F.2d 546, 575 (5th Cir. 1996).

Florida Cities asserts that the Court should use its discretion to find that a penalty of up to $1,000 per violation is appropriate for the following violations in which mitigation is less: 18 nitrogen violations and 3 toxicity violations at Waterway Estates and 3 toxicity violations at Barefoot Bay (a total of 24 violations), which amounts to a penalty of $24,000. For the remaining 1512 violations, Florida Cities says that the EPA's own valuation of discharge without a permit violations at Carrollwood is instructive in setting a standard for the remaining violations. In AO 90-100 for Carrollwood, the EPA found that 37 months of discharge without a permit between June 1987 and July 1990 was worth $15,000 or $13.51 per day. Thus, Florida Cities suggests that, for the remaining 1512 violations, the Court should assess a penalty of no more than $20,428 (1512 x 13.51) for all remaining violations.

AO 72A
Rev. 8/82)

I. Seriousness of the Violations

In evaluating the seriousness of the violations at issue in this case, the Court considers the number, duration and degree of the violations as well as the actual or potential harm to human health and environment. United States v. Dean Dairy Products Co., CV-94-0621, p. 16 (M.D. Penn., July 10, 1996), Hawaii's Thousand Friends v. City and County of Honolulu, 821 F.Supp. 1368, 1383 (D. Hawaii 1993). A substantial reduction in the maximum statutory penalty is warranted where the violations caused minimal environmental damage. Id. at 1397. Atlantic States Legal Foundation, Inc. v. Universal Tool & Stamping Co., Inc., 786 F.Supp. 743, 753 (N.D. Ind. 1992). In the instant case, the Court finds that most of the violations of total residual chlorine (TRC), toxicity violations and BOD at Barefoot Bay are not serious. First, although Plaintiff concedes no harm, it asserts that a "particularized showing of harm" is not required and that proof of overall risk of pollutants is sufficient, relying upon Public Interest Research Group of New Jersey, Inc. v. Powell Duffryn Terminal, Inc., 913 F.2d 64, 79 (3rd Cir. 1990), cert. denied, 111 S.Ct. 1018 (1990); Chesapeake Bay Foundation v. Gwaltney of Smithfield, 611 F.Supp. 1542, 1560 (E.D. Va. 1985), aff'd, 791 F.2d 304 (4th Cir. 1986), cert. denied, 479 U.S. 1029 (1987); Dean Dairy, supra at p. 16. Plaintiff's expert Mark Klingenstein, pointed out that a potential risk of harm exists, as the discharge from Barefoot Bay proceeds to the Sebastian River and the Indian River Lagoon, which water bodies have been identified as a habitat for fish, wildlife, and the wood stork, an endangered species. Klingenstein also pointed out that those water bodies have been identified as "threatened water bodies that were being negatively impacted by nutrient load" in the Surface Water Improvement and

72A
(Rev. 8/82)

Management Act. The Court notes, however, that, with respect to all of the violations, Plaintiff has not in any way quantified the risk of environmental harm.

Further, although the number of violations is relatively high (182 TRC, 3 chronic toxicity, 79 BOD) and the duration of the violations is considerable,[6] the degree of the violations lessens the seriousness of the violations. The TRC violations occurred because Florida Cities was unaware that the test method approved by the EPA did not provide precise results and that the levels measured could have been reported as "not detectable," such that Florida Cities would have been deemed to be in compliance with the NPDES permit. Further, the Plaintiff has acknowledged that the BOD violations are not serious, as they occurred simply because Florida Cities mistakenly reported CBOD instead of BOD. Douglas Smith's testimony established that a conversion of the CBOD test results was possible, and that such conversion showed that none of the CBOD data would have been a violation of BOD effluent limitations. With respect to the chronic toxicity test failures, which occur as a result of nitrogen present in the effluent, the Court notes that Barefoot Bay's secondary treatment facility was not designed to remove nitrogen, and the EPA did not include nitrogen limits in the NPDES permit for Barefoot Bay. Thus, there appears to be an inconsistency between allowing nitrogen in the effluent while limiting the consequent toxicity. Upon consideration of the foregoing evidence, the Court finds that the TRC and BOD violations at Barefoot Bay are not serious, and that the toxicity test violations are somewhat serious.

[6]The 182 total residual chlorine violations occurred between September 1992 and March 1993; the 3 chronic toxicity test failures occurred in September-October 1992, May 1993, and February 1994; and the 79 violations for failure to report biochemical oxygen demand occurred on a weekly basis between November 1991 and June 1993, and twice in November 1993.

AO A
Rev 3/82)

Second, the Court finds that the NPDES violations at Carrollwood are not serious. First, the Plaintiff admits that it has no evidence of environmental damage from these violations. Although Klingenstein testified that there is a potential risk of harm to the Sweetwater Creek and Tampa Bay due to the nature of the water bodies, the evidence does not demonstrate a quantifiable risk of environmental harm. Further, Smith testified that the Carrollwood plant was providing better than secondary treatment during the period in question and that the environmental impact of BOD and TSS was very small or essentially not measurable. The Court also notes that it is appropriate for the Court to consider the toxic/conventional pollutant distinction when weighing the seriousness of a violation and for the Court to consider that conventional pollutants such as TSS and BOD are not among the most egregious pollutants. Dean Dairy, supra, p. 17, citing PIRG v. Powell Duffryn Terminals, Inc., 720 F.Supp. 1158. 1161 (D.N.J. 1989). Additionally, although the total number of NPDES violations is high (234), the duration was not extended (between July 1991 and January 1992). The Court also finds that the degree of the violations was not substantial because the EPA kept AO 90-100 in effect, thereby authorizing Carrollwood to discharge secondarily treated effluent into Sweetwater Creek. The violations at Carrollwood are violations of the advanced wastewater treatment standards in the July 1991 NPDES permit, not violations of the secondary standards in AO 90-100. The FDEP also permitted Carrollwood to discharge secondarily treated effluent to Sweetwater Creek, which further demonstrates that the degree of the violations was not substantial.

Third, the Court finds that most of the violations at Waterway Estates are not serious. Plaintiff has conceded that there is no evidence of environmental damage as a result of discharges

AC 2A
Rev. 8/82)

from Waterway Estates. However, Klingenstein testified that to avoid localized impacts of pollutant discharges, the Caloosahatchee River was best protected if such discharges were at the six-foot contour line of the River itself. Klingenstein further testified that the permit violations had the potential to cause environmental harm due to the nature of the water bodies. The Court notes, however, that Plaintiff has not demonstrated a quantifiable risk of environmental harm. Rather, as Klingenstein acknowledged on cross-examination, his opinion that the discharges from Waterway Estates had a negative impact upon the canal and the Caloosahatchee River was based upon two studies consisting of computer models of assumed scenarios. Further, Klingenstein admitted that he had not reviewed in detail the actual data concerning the canal and the Caloosahatchee River but indicated that he believed that certain characteristics indicated by the model were useful. Next, the Court notes that the number of violations at Waterway Estates (1038) is sizable and the duration of the violations is somewhat extended.[7] However, the Court finds that the degree of most of the violations is not substantial. The EPA issued two administrative orders that authorized Florida Cities to continue to discharge secondarily treated effluent from Waterway Estates and to meet the effluent limitations in the 1981 NPDES permit between January 1987 and October 1991. Thus, the secondary discharge from Waterway Estates was continuously authorized at all relevant times by both EPA administrative orders and by FDEP permits and consent orders. Further, the EPA did not require Waterway Estates to reduce the volume of its discharge. Additionally, the discharges to an unpermitted location violations are somewhat mitigated by the fact that the canal was a previously approved discharge location.

[7]The 396 violations for discharge without an NPDES permit occurred between October 1, 1988 and October 31, 1989, and the 621 violations for discharging into a canal, instead of to the 6-foot contour line of the Caloosahatchee River, occurred between November 1, 1989 and July 14, 1991.

AC 72A
R(8/82)

II. Economic Benefit

The Court finds that the consideration of whether Florida Cities enjoyed an economic benefit as a result of the violations does not weigh in favor of mitigation of the penalties. Florida Cities argues that when a capital improvement, such as an upgrade in a wastewater treatment plant, is approved by the Florida Public Service Commission (PSC) as "used and useful," the utility can include the cost of the capital improvement in the rate base and thereby benefit economically, such that Florida Cities can realize an economic benefit only from investing, not from deferring investment. Mr. Keith Cardey testified, based on the assumption that the Florida PSC's rate increase is in effect as soon as the advanced wastewater treatment plants begin service, that Florida Cities did not enjoy an economic benefit as a result of its violations at any of the three facilities at issue in this case.[8] However, as Plaintiff points out, any investment that was subsequently not approved by the PSC could not have been recouped. Further, Florida Cities has not established that the cost of the capital improvement would be immediately approved and included in the rate base. Thus, the Court disagrees with Florida Cities' contention that it can only realize an economic benefit from investing, not deferring investment.

[8]With respect to Barefoot Bay, Cardey testified that if Florida Cities had constructed the advanced wastewater treatment plant and had it in service by April 1, 1990, Florida Cities would have generated $803,000 more than they actually experienced. With respect to Carrollwood, Cardey testified that if Florida Cities had constructed the advanced wastewater treatment plant and had it in service by November 1, 1984, the operation would have generated $1,827,000 more than they actually experienced. With respect to Waterway Estates, Cardey testified that, if Florida Cities had constructed the advanced wastewater treatment plant and had it in service by October 1, 1988, the operation would have generated $1,997,000 more than they actually experienced.

O 72A
Rev (82)

III. History of Violations

The Court has considered the history of violations at the three facilities at issue and finds that this factor supports some mitigation of the penalties. With respect to Barefoot Bay, Florida Cities admits that prior to November 1, 1991, it did not have an NPDES permit to discharge effluent from Barefoot Bay and that it has paid penalties for discharge without a permit. Further, the Court notes that Barefoot Bay exceeded AO 90-106 from September 26, 1990 to October 31, 1991. However, Florida Cities points out that it entered into a Consent Order with the FDEP which permitted discharges until a feasible alternative could be found. Additionally, the Court notes that there is no history of violations for TRC, toxicity, or misreporting of BOD measurements at Barefoot Bay. At Carrollwood, Florida Cities discharged without a permit from November 1, 1984 to June 30, 1991. However, the FDEP issued permits effective June 1980 through May 1985 and April 1988 through October 1990 for Carrollwood. In September 1990, the EPA issued AO 90-100, which provided effluent guidelines and limitations. Further, the Court notes that there is no history of violations of advanced wastewater treatment standards at Carrollwood prior to the issuance of the NPDES permit containing advanced wastewater treatment standards in 1991. At Waterway Estates, the Court again finds no history of violations which support imposition of maximum penalties. Although Waterway Estates discharged without a permit from January 1987, after the EPA's denial of the NPDES permit took effect, until October 1, 1988, Waterway Estates consistently met its secondary wastewater treatment requirements during all relevant periods.

A 72A
(R 8/82)

IV. Good Faith Efforts to Comply with Requirements

The Court has considered Florida Cities' efforts to comply with its various requirements and finds that the efforts to comply in some instances support a small mitigation of the penalties. First, with respect to Barefoot Bay, Plaintiff points out that it is located in a rural area of Brevard County, where there are approximately 3,000 acres of orange groves within 1.5 miles which could have been used to build additional percolation ponds, spray irrigation, or a deep well. Although the evidence at trial shows that these options were considered since the mid-1980s, and that Florida Cities purchased a 40 acre site in December 1985, the alternatives were rejected due to cost and effectiveness concerns. Klingenstein gave his opinion that these alternatives were feasible and would have eliminated the violations at Barefoot Bay. Further, Plaintiff maintains that Florida Cities could have invested earlier in a sulfur dioxide unit and an advanced wastewater treatment plant in order to meet permit limits for toxicity and TRC. The Court agrees that Florida Cities' efforts to comply with the applicable requirements of the Clean Water Act were prolonged, and decisions were made slowly over the course of several years due to much concern regarding the cost of the options, such that Florida Cities did not purchase the 316 acres of the H&S groves for spray irrigation until July 1995. Nevertheless, the Court gives due weight to Florida Cities' efforts in investigating means to comply with the requirements, and the Court notes that some delays were caused by third parties outside of Florida Cities' control, such as delays caused by challengers to the construction permit for a spray field system on a 300-acre spray field site, which led to administrative proceedings and hearings. Further, the Court notes that Florida Cities acted promptly to solve the TRC exceedances and misreporting of CBOD.

.O 72A
Rev 1/82)

With respect to Carrollwood, Plaintiff points out that Florida Cities could have connected with the City of Tampa's plant, which had available capacity, or could have built an advanced wastewater treatment plant after the Grizzle-Figg legislation took effect in 1987, in order to prevent unpermitted discharges in the years 1984 through 1991 and permit violations after July 1991.[9] Rather, Florida Cities waited until the Hillsborough County system had capacity to treat the Carrollwood wastewater in 1992 due to the perceived high costs of connecting to the Tampa wastewater treatment plant, which involved the construction of a force main of between 10,000 and 15,000 feet. The Court agrees that Florida Cities was dilatory in proceeding in its efforts and making its decisions to correct the violations at Carrollwood. However, the Court also gives due weight to Florida Cities' efforts to comply with the requirements of the EPA. Florida Cities complied at all times with the requirements of AO 90-100, which the EPA kept active during the time in which the secondary treatment facility could not meet the NPDES permit's advanced wastewater treatment limits.

With respect to Waterway Estates, Plaintiff points out that Defendants knew or should have known that they needed to consider alternative arrangements for Waterway Estates due to the 1981 study which indicated that the discharge to the canal could not continue. Plaintiff also points out that Florida Cities had interconnection and advanced wastewater treatment upgrade options which would have prevented the violations. From February 1987 through February 1990, North Fort Myers Utilities discussed the possibility of providing wastewater treatment service to Waterway Estates, but Florida Cities rejected this option for reasons of cost and concern that the PSC may not approve such connection. Plaintiff asserts that this option was a

[9]Klingenstein's report also indicates the opinion that spray irrigation, percolation ponds, and deep well injection were other options.

O A
Rev 3/82)

particularly attractive one from an environmental standpoint because the North Fort Myers plant uses deep well injection and spray irrigation to dispose of its treated effluent without any surface water discharge. In 1986 Florida Cities applied for a renewal of its NPDES permit, which was denied in January 1987. In December 1987, having decided to upgrade its plant and move the outfall, Florida Cities applied for a wasteload allocation. In November 1989, Florida Cities' new NPDES permit became effective. Due to contractor disputes and delays, the design and construction process for the upgrade was delayed, and Defendants failed to comply with its NPDES permit until 1992. Additionally, in its efforts to prevent discharges to an unpermitted location, Florida Cities did not begin the construction of the outfall extension until December 1990, and the new outfall was not completed until July 1991. The Court again finds that Florida Cities' efforts and decisions proceeded slowly such that the violations were not eliminated expeditiously. However, the Court gives due weight to the efforts of Florida Cities to construct its advanced wastewater treatment plant within a reasonable time despite the delays caused by third parties. The Court also notes that Florida Cities had explored alternatives to surface water discharge, including public access spray irrigation, restricted access irrigation, percolation ponds, and deep well injection.

V. Economic Impact of the Penalty

The Court finds that Florida Cities does not have the ability to pay the statutory maximum penalty and that the economic impact of the penalty on Florida Cities constitutes a mitigating factor. The Court notes that Eileen Zimmer testified for the Plaintiff that Florida Cities can afford to pay a penalty up to of $7.5 million (if the penalty is paid over the course of five years) without a material adverse affect on the company. Ms. Zimmer indicated that she analyzed

AO 72A
(R . 8/82)

publicly available materials, SEC filings, and financial statements of Florida Cities, and in her report she stated that she considered "the stable nature of the business the company is in, its historical ability to generate income and its dividend payment history." Ms. Zimmer suggested that Florida Cities could borrow the $7.5 million to pay for the penalty; however, she acknowledged that the only source likely for a loan would be Avatar Holdings, who Zimmer conceded lost money in each of the last five years. Further, Zimmer conceded that Florida Cities' liquidity as represented by its current equity to debt ratio and working capital is poor and that long term debt has increased somewhat and remains at moderate levels. At trial, she also stated that short term liabilities increased between 1993 an 1994 by about $4.3 million. Further, the record shows that Florida Cities is obligated to pay Allstate Insurance Company preferred stock redemption obligations every year between 1997 and 2001. Additionally, the Court finds significant the testimony of Charles McNairy[10] that Florida Cities and Avatar Utilities, Inc. have approximately $17 million of planned capital expenditures for enhancements, improvements, and expansions to the existing water treatment plants which will exhaust the available lines of credit. Finally, as a utility being regulated by the PSC, Florida Cities cannot simply raise its rates to cover a penalty, and the payment of the penalty is not tax deductible.

VI. Other Matters as Justice May Require

Florida Cities argues that the Court should consider several facts pertaining to each of the facilities at issue in this case. The Court finds that the facts noted by Florida Cities, such as Barefoot Bay's compliance with the directives and authorizations of the FDEP, Carrollwood's inability to meet the NPDES requirements which were beyond the physical capacity of the plant,

[10]Charles McNairy testified that he is currently the Executive Vice-President, treasurer, and Chief Financial Officer of Avatar Holdings, Inc.

A 72A
(R 8/82)

and Waterway Estates' possession of a wasteload allocation to discharge secondarily treated effluent when Kagey denied the permit renewal based upon her review of a planning document have already been considered by this Court in connection with the above five factors. Florida Cities does raise a new argument, however, that the Plaintiff raised the violations pertaining to Carrollwood for the first time when it amended the Complaint in 1995 and should not be allowed to recover millions of dollars in penalties by including those violations. Nevertheless, the Court finds the above five factors to be determinative of the mitigation of the penalty to be assessed.

VII. Penalties

Having considered the factors discussed above, the Court finds that the statutory maximum should be mitigated as set forth herein. First, the 79 violations of BOD at Barefoot Bay will be penalized in the amount of $10 per day of each violation. The 182 TRC violations will be penalized at $10 per day of each violation. The three (3) chronic toxicity test violations will be penalized in the amount of $1,000 per day of each violation. With respect to the 234 Carrollwood NPDES permit violations, the penalty will be in the amount of $25 per day of each violation. The 18 nitrogen and three (3) chronic toxicity test violations at Waterway Estates will be penalized in the amount of $1,000 per day. The 621 days of discharges to an unpermitted location will be penalized in the amount of $25 per day. Finally, the 396 days of unpermitted discharges from Waterway Estates will be penalized in the amount of $25 per day.

FINDINGS OF FACT — AVATAR HOLDINGS

Avatar Holdings is a diversified company which has more than 60 direct and indirect subsidiaries engaged in a variety of business operations including home construction, vacation ownership, resort operations, retail land sales, property management, commercial and industrial

) 72A
(ev. 8/82)

development, and water and wastewater utilities operations. Avatar Holdings places its principal emphasis on the real estate operations. Avatar Utilities, Inc. ("Avatar Utilities") is a subsidiary of Avatar Holdings and is the parent for all of Avatar Holdings' utility subsidiaries. Until 1993, Avatar Utilities was the parent of numerous utility companies which operated approximately 37 water supply companies and 13 wastewater plants. In late 1993, Avatar Utilities downsized through the sale of 29 plants.

The formal relationship between Avatar Holdings and Florida Cities is as follows: Avatar Holdings is the parent of Avatar Utilities; Avatar Utilities is the parent of Consolidated Water Company; Consolidated Water Company is the parent of Florida Cities Water Company Holdings, Inc.; and Florida Cities Water Company Holdings, Inc. is the parent of Florida Cities. However, the evidence in this case has shown the involvement of employees of only three of these entities: Avatar Holdings, Avatar Utilities, and Florida Cities. Further, the evidence established that Avatar Holdings does not control any of Florida Cities' individual plants on a daily basis. The utilities subsidiaries make decisions concerning plant operation, not Avatar Holdings. When Florida Cities chooses a contractor for a particular project involving a capital expenditure exceeding $75,000, it seeks contract award ("conward") approval form Avatar Holdings. Avatar Holdings has never rejected a conward request from Florida Cities or Avatar Utilities relating to the operation of plant facilities or environmental compliance.

Further, Avatar Holdings officers and directors generally held utility operations review meetings once a year to discuss financial matters, budget performance, and future budget plans. With respect to the three facilities at issue in this case, Avatar Holdings officers and directors discussed and sent memoranda concerning planning matters. As for Barefoot Bay, the Plaintiff

A 72A
(I v. 8/82)

introduced evidence at trial showing that in 1983, "Avatar" management meetings included discussion of land areas needed "for future construction to accommodate the complete build-out of Barefoot Bay." Further, in February 1984, Lawrence Wilkov, former President of Avatar Holdings, wrote a file memorandum which noted the cost to acquire and build ponds, stated that a way should be found to have the utility fund the entire amount, and stated that the situation requires immediate action as increased capacity should be "on line" by November 1984. In June 1984, Peter Sharp, former Chief Executive Officer of Avatar Holdings, wrote to Wilkov, John Sladkus,[11] and Robert Gordon[12] that they "must be sure that the cost of the percolation pond and related construction end up 100% as part of Barefoot Bay's rate base on which rates can be charged to customers from day one." Further, in 1985 Gordon informed Wilkov of cost estimates of percolation ponds for Barefoot Bay and Sharp gave his opinions to Gordon regarding Gordon's efforts in acquiring land for percolation ponds. In 1986, Gordon sent Sladkus status reports on the Barefoot Bay plant. In January 1987, Sladkus informed Sharp and Wilkov by memorandum that the ponds were not functioning and suggested the possibility of spray irrigation. In 1988, Sladkus gave Sharp another report on Barefoot Bay attaching a file memorandum written by Gordon concerning Gordon's meeting with the FDEP, and Sladkus also sent Sharp a memorandum recommending the retention of a particular engineering company. The Plaintiff also points to memoranda between Sladkus, Wilkov, Dennis Getman[13] and Sharp

[11]John Sladkus was Avatar Holdings' Executive Vice President.

[12]Robert Gordon is President of Avatar Utilities.

[13]Dennis Getman is Avatar Holdings' Executive Vice-President, and he is also General Counsel for Avatar Holdings. Avatar Utilities and Florida Cities.

A 72A
(I v. 8/82)

indicating their awareness of or involvement in the deep well project or alternatives to deep well injection, such as spray irrigation, at Barefoot Bay.

With respect to Carrollwood, Sladkus was informed by two memos in December 1988 and by participation in a meeting at Avatar Utilities in January 1989 of the status and schedules pertaining to Carrollwood projects. Further, Sharp was concerned with cost, flow, recovery of costs through the rate base, and construction completion time. However, Paul Bradtmiller, Executive Vice-President of Florida Cites, who was involved in the advanced wastewater treatment construction process and was the principal negotiator on behalf of Florida Cities with respect to connection to Hillsborough County, testified that he never discussed the advanced wastewater treatment process or the negotiations with Hillsborough County with any officials of Avatar Holdings. Further, the testimony of William Shafer, Head of Planning for the Sanitary Sewer Department of the City of Tampa, who was involved in negotiations with Florida Cities regarding possible connection to Tampa in the 1980s, did not show any involvement by Avatar Holdings in the negotiation process.

With respect to Waterway Estates, in January 1987, Sladkus reported to Sharp and Wilkov that the plant either needed to apply for a wasteload allocation and upgrade to advanced wastewater treatment or connect to North Fort Myers Utilities. In June 1987, Gordon forwarded to Sladkus a copy of the EPA's compliance order for Waterway Estates. In August 1987, Gordon forwarded to Sladkus a copy of an engineering report on the feasibility of disposing of the Waterway Estates wastewater, noting that due to the recommended cost of treatment and disposal, additional work would be necessary. In November 1987, Gordon again wrote to Sladkus attaching a memorandum outlining various options regarding upgrading Waterway

A 72A
(I v. 8/82)

Estates. On October 3, 1988, Gordon wrote Sharp and Wilkov a memorandum stating that County Commissioner Bigelow indicated that he wanted the County Commission to get out of the water and wastewater day-to-day operations and felt that could only be accomplished through privatization or establishment of a water/sewer authority which would take over the direction and operation of the utility systems. On October 7, 1988, Sharp wrote to Gordon that Florida Cities' "long term objective should be to own the entire Lee County system--that is, the County's facilities as well as the City's."

Further, Sladkus was informed by two memos in December 1988 and by participation in a meeting at Avatar Utilities in January 1989 of the status and schedules pertaining to Waterway Estates projects. Sladkus also informed Sharp of the budgeted items for Waterway Estates. In October 1989, Sharp wrote Sladkus that "[w]e must have assurance from Bob Gordon that the entire cost of the upgrade and expansion of this plant will be included as used and useful." In July 1991, when it became clear that the Waterway Estates advanced wastewater treatment improvements were behind schedule, Gerald Allen, President of Florida Cities and formerly Vice-President of Avatar Utilities, wrote a memorandum to Sharp with copies to Getman, Gordon, and Wilkov updating them on the status of the project.

However, Allen and Patrick Lehman[14], who were involved in the selection of discharge alternatives at Waterway Estates, stated at trial that it was not Avatar Holdings, but rather Florida Cities and Avatar Utilities, that made the decisions regarding the alternatives. Further, Lehman testified that the alternatives were not discussed with Avatar Holdings. Additionally, in a memorandum to Sladkus on June 5, 1990, Allen requested approval of a conward to upgrade

[14]Patrick Lehman was employed at Florida Cities between June 1984 and April 1989, initially as an Operations Manager and later as Vice-President of Operations.

) 72A
ev. 8/82)

the Waterway Estates facility. When Sladkus responded with a recommendation that the project be rebid because the price appeared high, Allen informed him of the disadvantages of rebidding the project. Sladkus then did not seek to have Florida Cities rebid the contract, and the contract was approved with the original bidder.

In the fall of 1988, Avatar Utilities developed an Environmental Assurance Program. This was not an Avatar Holdings' program. Allen did not make any reports to the full Avatar Holdings Board of Directors regarding audits performed under the Environmental Assurance Program, but did report to the Avatar Holdings Audit Committee. Allen's reports provided the progressive status as to whether a field audit, draft audit, or final audit report had been completed. Allen did not provide the reports of field audits themselves or describe the findings of the field audit reports to the Avatar Holdings Audit Committee. Allen did not describe for the Avatar Holdings Audit Committee the alleged violations at Barefoot Bay, Carrollwood, or Waterway Estates.

CONCLUSIONS OF LAW — AVATAR HOLDINGS

This Court previously determined in its November 22, 1995 Order that, in determining whether Avatar Holdings is liable as a parent corporation under the Clean Water Act, the standard of liability in § 107 of the Comprehensive Environmental Response and Liability Act (CERCLA) does not apply. Under that standard, a parent corporation is liable as an "operator" under CERCLA if it "directly and pervasively controlled" the actions of the subsidiary "to the extent of actually involving itself in the daily operations of the subsidiary." Jacksonville Electric Authority v. Bernuth Corp., 996 F.2d 1107, 1110 (11th Cir. 1993). This Court stated in its Order that, under the Clean Water Act, "the mere fact of being a parent exercising control over

AO 72A
(Rev. 8/82)

a violating subsidiary does not properly subject the parent company to liability." Although the Court indicated that it would consider evidence showing "actual and pervasive control of Florida Cities to the extent of actually being involved in the daily operations of Florida Cities," the various portions of the Court's opinion show that the Court intended the standard for Avatar Holdings' liability as a parent corporation to be based on a stricter standard of "directing or causing" the violations in such a way that it may be considered a "person who violates" under § 309 (d) of the Clean Water Act. To the extent the Court's language in the November 22, 1995 Order broadened this intended standard, the Court recedes from that portion of its November 22, 1995 opinion.

The Court finds that the evidence adduced at trial does not establish that Avatar Holdings directed or caused any of the violations of the Clean Water Act at issue in this case. Thus, the Court finds that Avatar Holdings is not a "person who violates" under section 309 (d) of the Clean Water Act. The evidence as a whole shows that Avatar Holdings' role in the operations of the three Florida Cities' facilities was limited to overall financial review and long term strategic planning, as Avatar Holdings' officers were concerned with large costs and budgetary planning. The fact that Avatar Holdings officials were informed of environmental compliance issues and discussed the costs of large projects that would eventually eliminate violations does not amount to the type of action or direction for which liability arises under the Clean Water Act. Further, the evidence shows that Avatar Holdings did not make the type of operational decisions that amount to directing or causing the violations in this case. Additionally, there is no legal basis under the Clean Water Act for holding Avatar Holdings liable for any failure to

A(72A
(R . 8/82)

act because it was not the entity responsible for decisions regarding operations and environmental compliance.

With respect to Barefoot Bay, the evidence does not establish that Avatar Holdings caused or directed the violations of TRC, toxicity test failures, and failure to monitor BOD. First, there is no evidence that Avatar Holdings' officials were aware of these violations or that they ever discussed these violations. Further, there is no evidence that Avatar Holdings had any involvement in the measurements of these tests or knowledge or control regarding how the measurements of these tests are conducted or how such measurements are reported to the EPA. Although the Plaintiff argues that Avatar Holdings caused the Barefoot Bay violations because of an alleged profit motive in having its indirect subsidiary, Barefoot Bay Development Corporation, develop a mobile home community at Barefoot Bay, the evidence does not establish any link between the development of the mobile home community and the Barefoot Bay NPDES violations. Further, the evidence regarding Avatar Holdings' concern for costs and long-term planning of large projects such as percolation ponds or alternative discharge options does not establish that Avatar Holdings controlled the discharge options at Barefoot Bay such that it could have directed or caused the Barefoot Bay violations.

With respect to Carrollwood, the evidence again does not establish that Avatar Holdings caused or directed the violations of TSS, phosphorus, nitrogen, CBOD, TRC, or fecal coliform. Although the Plaintiff argued that Avatar Holdings caused the violations because it was not willing to connect to Hillsborough County sooner or build an advanced wastewater treatment plant sooner, the evidence does not establish any link between Avatar Holdings' actions and statements and the Carrollwood violations. Rather, the evidence shows that the utilities

) 72A
ev. 8/82)

subsidiaries devised and considered the alternatives and made the decision to proceed with the Hillsborough County connection. Additionally, there is no evidence that Avatar Holdings' officials were aware of the Carrollwood NPDES violations or that they ever discussed these violations. There is also no evidence that Avatar Holdings had any involvement in the measurements of these tests or knowledge or control regarding how the measurements of these tests are conducted or how such measurements are reported to the EPA. Moreover, the evidence regarding Avatar Holdings' concern for costs and long-term planning of large projects does not establish that Avatar Holdings controlled the discharge options at Carrollwood such that it could have directed or caused the Carrollwood violations.

With respect to Waterway Estates, the evidence again does not establish that Avatar Holdings caused or directed the violations of alleged discharges into an unpermitted location during the period of May 5, 1990 through July 14, 1991 or the NPDES permit violations relating to nitrogen levels and toxicity test failures.[15] First, although the Plaintiff argues that Avatar Holdings caused the delays in upgrading Waterway Estates to an advanced wastewater facility, the evidence does not show that Avatar Holdings was involved in the selection of alternatives or the construction of the advanced wastewater treatment plant. Further, the fact that Sharp expressed his opinion that the long term objective should be to own the entire Lee County system does not amount to a strategy on the part of Sharp to do so, and there is no evidence that Avatar Holdings took steps to acquire the entire Lee County system. Moreover, both Allen and Lehman testified at trial that they were unaware of any plan by Avatar Holdings to acquire the Lee

[15]The Court's November 22, 1995 Order barred certain claims against Avatar Holdings based on the statute of limitations, 28 U.S.C. § 2462. Thus, with respect to Waterway Estates, Avatar Holdings is potentially subject to liability only for the violations of discharges to an unpermitted location during the period of May 5, 1990 through July 14, 1991 and the NPDES violations at Waterway Estates.

AO 72A
(Rev. 8/82)

County system. Additionally, the evidence shows that the delays in the construction of the advanced wastewater treatment plant involved difficulties in the permitting process, and the evidence shows that Avatar Holdings was not involved in the permitting process. The evidence does not establish that Avatar Holdings delayed construction; rather, it shows that Avatar Holdings approved a conward to upgrade the Waterway Estates facility without a rebidding for the project. Finally, the evidence regarding Avatar Holdings' concern for costs and knowledge of the alternatives and the status and schedules of the projects does not amount to an exercise of control, decision-making or other activity that caused or directed the violations at Waterway Estates.

CONCLUSION

Upon consideration of the foregoing, it is hereby **ORDERED and ADJUDGED** that:

1. The Clerk is **DIRECTED** to enter judgment in favor of Plaintiff and against Florida Cities. The amount of civil penalties to be assessed against Florida Cities for the violations at the three wastewater treatment plants are as follows:

Barefoot Bay	$ 5,610.00
Carrollwood	$14,675.00
Waterway Estates	$289,425.00
TOTAL	**$309,710.00**

2. The Clerk is **DIRECTED** to enter judgment in favor of Defendant Avatar Holdings and against Plaintiff on Plaintiff's claims against it.

3. Avatar Holding's Rule 52 (c) Motion for Judgment as a Matter of Law is **DENIED as moot.**

P R O C E E D I N G S

THEREUPON:

GERALD S. ALLEN,

having been previously duly sworn, testified as follows:

MS. GERVASI: Before we start, may we agree on the record to the usual stipulations? Is that okay with you?

MR. GATLIN: Which stipulations? The reading?

MS. GERVASI: Well, the ones that we generally put in there are that the deposition was taken pursuant to notice in accordance with the civil procedure rules.

MR. GATLIN: Sure, that's fine.

MS. GERVASI: We are stipulating that the witness is indeed the person he has identified himself as, that objections are reserved except as to the form of the question, and then reading and signing is up to you, whether you want to waive that.

MR. GATLIN: We will put that off until later.

MS. GERVASI: Sure.

DIRECT EXAMINATION

BY MS. GERVASI:

Q. Mr. Allen, could you please state your full name and business address for the record?

A. Gerald S. Allen, President of Florida Cities Water, Suite 300, 4837 Swift Road, Sarasota, Florida.

Q. I will be asking you some questions today on behalf of the Commission staff concerning the suit you filed in docket number 97-1663-WS. Please let me know if anything is unclear. I will try to rephrase the question. And if you need a break any time during the deposition, let us know and we can certainly accommodate that.

Could you tell us what your current responsibilities are as president of Florida Cities Water Company?

A. Well, as president, I'm responsible for virtually everything that happens within the company, for the overall management of the company.

Q. Okay. Concerning the MPDES permit denial for Carrollwood, the 1994 permit denial, is it correct that in September of 1984, the MPDES permit application for the utility's Carrollwood plant was denied?

A. Yes, that is correct.

Q. Why was it denied? Do you know?

A. No waste load allocation to Sweetwater Creek, which was the receiving stream for the treated effluent.

Q. Do you have a copy of that permit denial? If so, could you provide us with a copy of it?

A. Yes. I thought that was --

Q. The 1984 one?

A. Certainly, we can provide a copy.

MS. GERVASI: I want to go ahead and label that as a late-filed deposition Exhibit No. 1.

MR. GATLIN: Copy of permit of Carrollwood denial?

MS. GERVASI: Right. Carrollwood 1984 permit denial.

MR. GATLIN: Are you going to have several of these?

MS. GERVASI: A few.

MR. GATLIN: Okay.

MS. GERVASI: Maybe six or so.

MR. GATLIN: What I would like for you to do, if you would, is give us a list, when you are finished, or tomorrow, sometime.

MS. GERVASI: Sure, be glad to.

MR. GATLIN: To make sure we have taken the correct notes on it.

MS. GERVASI: Be glad to.

BY MS. GERVASI:

Q. Do you know if the EPA issued an administrative order requiring the Carrollwood plant to cease discharge no later than June of 1987? Is that

correct?

A. I'm not certain of the dates. There was an administrative order issued, but I'm not certain of the dates and exactly the content of the order.

Q. Do you have a copy of that administrative order that you could provide to us?

A. My best guess is that we do have a copy.

MS. GERVASI: Let's go ahead, then, please, and label that as Late-filed Exhibit 2, administrative order concerning the Carrollwood plant.

MR. GATLIN: That's EPA order?

MS. GERVASI: Yes. EPA order.

MR. GATLIN: Any other identification?

MS. GERVASI: The date of the order. How about that? November 27th, 1984.

MR. GATLIN: Okay.

BY MS. GERVASI:

Q. Mr. Allen, do you know if the EPA ever issued an order assessing administrative penalties due to non-compliance of that order, of that 1984 order?

A. I know the EPA issued an administrative and consent order assessing penalties. I could refer to my testimony regarding the date.

Q. Okay. Can we get a copy of that order, as

well?

A. Yes.

MS. GERVASI: That would be Late-filed No. 3, administrative consent order assessing penalties for Carrollwood.

BY MS. GERVASI:

Q. What is your understanding of how the MPDES permitting process worked prior to 1995, in terms of who had responsibility, EPA's role versus the DER's role at that time?

A. Well, the EPA had jurisdiction at that time for issuing and administering the MPDES permit program. However, the EPA consulted with the state through the DEP, and DEP was asked to certify any new permit or the renewal of permits. So the DEP had an opportunity to comment on all of its permits. So there was close consultation between the EPA and the DEP.

Q. Is it correct that a utility who discharges pollutants into waters of the United States without an MPDES permit is in violation of the Clean Water Act?

A. I believe that's -- that's probably a legal question, but that is my understanding, that that is correct.

Q. Do you know if the EPA, or either the EPA and DER together, performed an MPDES compliance inspection

in 1985 for compliance of Florida Cities?

A. I don't know.

Q. Do you know who might know here?

A. We could check our files to see if we have a record of such inspection.

MS. GERVASI: Let me label this as Late-filed Exhibit No. 4, if it exists. We'd like a copy of the 1985 MPDES compliance inspection report.

MR. GATLIN: 1985 MPDES compliance report?

MS. GERVASI: Right.

MR. GATLIN: Okay.

BY MS. GERVASI:

Q. Okay. Do you know if the EPA recognized a waste load allocation for Waterway?

A. Yes. The EPA certainly recognized a waste load allocation at one point in time, because they issued MPDES permits.

Q. Did the EPA consider Waterway's discharge to be discharged at the proper location? Do you know?

A. Well, I can say this. There were a number of inspections of the facility by the EPA, and any question regarding the discharge location never came up. Later -- I'm not sure; the EPA claimed this -- but later, the U.S. Department of Justice alleged that it was not the correct location, but to my knowledge no one else

alleged that. The DEP never alleged that it was the wrong location, and I think it came out in the trial that probably the only party alleging that it was the wrong location was the U.S. DOJ.

Q. Do you know how often EPA performs these compliance inspections; you said "frequently"?

A. I'm not sure I said "frequently," but there were a number of inspections performed during that time, but I don't know the specific interval.

Q. Okay. Do you know if any of those inspections were performed from 1981 to 1984?

A. I'm not certain.

MS. GERVASI: Let me go ahead and ask for -- if, again, they exist -- the compliance inspection reports for the years 1981 to 1984, if you have that information, 1981 to '84 compliance inspection reports.

BY MS. GERVASI:

Q. Do you know if the DER issued Waterway a permit in 1981?

MR. GATLIN: Did you want that to be an exhibit?

MS. GERVASI: Yes. Late-filed Exhibit No. 5.

MR. GATLIN: Excuse me.

MS. GERVASI: Sure.

THE WITNESS: I'm not certain of the date. The DER issued operating permits, and I believe that the plant was operating on a permit during that date, but I'm not sure when the permit was issued.

MS. GERVASI: Could you provide us with a copy of that permit? I believe it was issued April 6th of 1981. That's Late-filed 6, the DER Waterway operating permit from 1981, .

BY MS. GERVASI:

Q. You don't know when that permit expired, offhand. Do you?

A. I'm not sure when that permit expired. I do recall one of the permits expired in 1988, but I'm not certain that it would have been the renewal of 1981.

Q. Do you know what the stated waste load allocation was for Waterway, in that permit?

A. No, I do not.

Q. Is it correct that in 1986, the utility's Waterway plant had a valid DER permit to discharge 1.08 million gallons a day of effluent into the Caloosahatchie River via a canal?

A. I believe that is correct. Are you speaking of MPDES permit or an operating permit?

Q. That would be 1986 DER operating permit.

A. I believe that's correct. I believe that's a permit that probably expired in '88.

Q. Okay. Do you know if this is the same type of permit that was issued for the Waterway plant in 1983? There was one permit issued in 1981. We wondered if it was the same type of operating permit that the DER issued for Waterway in 1983.

A. I believe that would be correct, because during that time period, the DEP issued operating permits which included the operation of the plant and included the discharge. And the EPA also issued an MPDES permit, which was applicable to the discharge only.

Q. Did the 1981 MPDES permit for Waterway authorize the utility to discharge 1.08 million gallons a day of effluent into the Caloosahatchie River?

A. I believe that's correct. To be absolutely certain, I need to look at the permit, but I believe that's correct.

Q. Is it correct that the DER issued a certification to the EPA for the 1981 MPDES permit?

A. I'm not certain about that.

Q. Do you have a copy of the 1981 MPDES certification worksheet?

A. I'm not certain.

MS. GERVASI: Let's go ahead and identify that. And if you do have it, if it does exist, I would like to request it as Late-filed Exhibit 7, the 1981 MPDES certification worksheet, please.

Could you provide us a copy of the Waterway MPDES permit that was issued in September of 1981?

THE WITNESS: Assuming we have it, we will certainly provide it.

MS. GERVASI: All right. As Late-filed Exhibit 8, the Waterway MPDES permit, September 1981.

MR. GATLIN: All right.

BY MS. GERVASI:

Q. Is it correct that the EPA denied Waterway's 1986 and MPDES permit renewal based on a no-discharge waste load allocation developed by DER?

A. Well, that was what was indicated on the denial worksheet, yes.

Q. Was the EPA's assertion that a no-discharge waste load allocation developed by DER, was that an issue, or was that addressed in 1981 when the EPA issued Waterway an MPDES permit?

A. I don't know. All I can say is I presume that in 1981, when the permit was renewed, that the EPA believed there was a waste load allocation.

Q. From '81 to '86, did the EPA recommend that the utility relocate Waterways outfall or upgrade Waterway to advanced water treatment standards?

A. I believe that came later in an administrative order that was probably issued in early 1987, but I'm not certain of that. But -- or perhaps even later than that. Because I believe initially, the EPA's position was to eliminate the discharge. I don't believe that an option was offered initially upon the denial of the permit renewal in 1986.

Q. Okay.

A. But later, the EPA did agree to relocating the discharge further out into the river, and upgrading the treatment process to meet advanced wastewater treatment standards. And that was a position that was consistent with the DEP's position.

Q. Okay. Thank you. Given that Waterway had a valid DER permit and that Waterway's MPDES permit issued in 1981 authorized Waterway to discharge 1.08 million gallons a day of effluent into the Caloosahatchie River, why didn't Florida Cities comment or object to the EPA's July 22nd, 1986 tentative denial?

A. Well, I've covered that in my pre-filed testimony, and I can refer to that or just summarize. The regulatory environment during that period was a lot

different than it is today. The Clean Water Act -- or at least the MPDES permitting program, had only been in existence for 15 years, and clearly, the company believed the master, so to speak, -owned permitting issues was the DER.

Q. Even for the MPDES permitting issues?

A. Well, obviously, the DER did not have authority to issue MPDES permits. That had not been delegated to that agency at the time; but the DER had a dual permitting system. They had, in essence, a duplicate permitting system which went even further than the December permits because their permits covered not only the discharge and established the point of discharge, the water quality of the discharge, but it also covered the operation of the plant and many other aspects that the MPDES permits did not cover. So the DER had a more comprehensive permitting system. They had a more aggressive enforcement. They took enforcement action. They were closer to the situation. There was a lot more contact with the DER than the EPA, so it was the company's view that, really, if the DER was satisfied, if the company met their requirements, then the EPA would go along, because the EPA, again, to best of my knowledge, relied heavily on the DER on local issues, as the Clean Water Act was set up to do, is to

give a lot of authority to the states as far as waste load allocations and a lot of other aspects of the Clean Water Act.

But even at that time, the State of Florida ranked very high, I think, nationally, as far as administering water quality programs. They were pretty aggressive and probably were -- if not the leading state -- was close to the leader, as far as environmental issues, in particular as far as the Clean Water Act was concerned.

Q. Do you think it was prudent of Florida Cities' management to not comment or object to the EPA's tentative denial letter in 1986?

A. Based on all the circumstances that existed at that time, I see no reason to fault the company's decisions. And again, primarily the fact that the company felt that if it could comply with the wishes of the DER, then the EPA would not object. Furthermore, the EPA had indicated, I believe, at the time the permit was denied, that there would be an administrative order forthcoming which would allow the company time to deal with the situation, because the DER had really given the company two options. They could either -- when the DER permit expired in '88, the company could either eliminate the discharge to convert to a total re-use

system or wastewater disposal through some other means other than the discharge, or the company could upgrade the plant to meet AWT standards and relocate the outfall.

So those two options were on the plate at the time, and in view of those options, and the fact that the EPA said, well, we're going to issue an administrator order, which will give you time to deal with this situation, I can't fault the company with the decision, because even if the company satisfied EPA but that did not satisfy the DER, the company would still have taken the action that it ultimately took.

Q. Don't you think that the later legal expenses incurred defending yourselves could have been avoided if you had challenged the permit denial up front?

A. No. I don't think anyone could conclude that.

Q. Okay. Now, from our information that we received in response to a staff interrogatory, evidently there was a meeting in July of 1986 with the DER. We're wondering why the company didn't ask DER during that meeting to inform the EPA that EPA's assertion of a no-discharge waste load allocation was inaccurate and that Waterway had a waste load allocation of 1.08 million gallons a day?

A. Well, I don't know specifically. Again, it

goes back to the conclusions drawn earlier, which were if the company could satisfy the requirements of the DER, then the EPA would go along with whatever those requirements were. And I think the company had -- later, that year, the company undertook an engineering report to evaluate options, but I think the company had concluded at that time that it had to meet the DER's wishes to either eliminate the discharge through re-use or some other means, or upgrade the process and relocate the outfall.

Q. Given that Waterway had a valid DER permit and that Waterway's MPDES permit authorized it to discharge 1.08 million gallons a day of effluent, why didn't Florida Water ask for a hearing after receiving the final denial in 1986?

A. I think for the same reasons.

MR. GATLIN: May I suggest that it is Florida Cities Water.

MS. GERVASI: I'm sorry. What was I saying? Florida Water?

MR. GATLIN: Florida Water.

MS. GERVASI: Excuse me. Florida Cities Water.

BY MS. GERVASI:

Q. So again, do you think it was prudent of

Florida Cities Water management to not ask for a hearing after receiving the final denial?

A. Again, based on the regulatory environment that existed at the time, the relationships between the company and the two regulatory agencies involved, I would have seen no real reason to have taken that step.

Q. So Florida Cities basically ignored EPA's tentative and final denial of the permit. Is that right?

A. I don't think you could characterize it as ignoring the denial. Again, the EPA had represented that an administrative order would be forthcoming that would allow the company ample time to deal with the situation, and notwithstanding a challenge, the outcome of which no one could predict, I believe it was the company's position that it still had to meet the requirements of the DER.

Q. Okay. Going through the information that you've provided us, it appears that Florida Cities didn't communicate in writing with the EPA from December of '86 until May of '87, and we're wondering, since you didn't request a hearing to challenge that permit denial, and Waterway was discharging without an MPDES permit effective September of 1986, why the company didn't communicate in writing with EPA during that

period of time?

A. I don't know that the company did not communicate in writing during that period. I don't know the basis of the information that it did not communicate, so I couldn't say that there were not communications. I really couldn't say one way or the other.

Q. Okay. We don't have any information that would indicate that you did. If communications exist during that period, could you provide them to us as Late-filed Exhibit 9?

A. Sure.

MS. GERVASI: Communications between Florida Cities and the EPA from December of '86 to May of '87, please, sir.

THE WITNESS: (Nodding affirmatively.)

BY MS. GERVASI:

Q. Evidently Patrick Lehman submitted a proposed compliance schedule in 1986 to the EPA. Do you remember that?

A. I do recall seeing a compliance schedule. I'm not certain of the date, but that seems to be the appropriate time frame that that schedule was submitted.

Q. When submitting proposed compliance schedules to the regulatory agencies such as the EPA or DER, is it

standard procedure to have the vice president of engineering and/or operations approve such schedules?

A. At that time, I don't know.

Q. Do you know whether Mr. Lehman had the schedule approved by Mr. Tony Reeves before submitting it?

A. I don't know.

Q. Do you know why the utility submitted a proposed compliance schedule which Mr. Lehman described at the trial as being extremely optimistic?

A. I could only -- I really don't know. I could say that it's not unusual, when there's a lot of pressure brought to bear for those who are preparing schedules, to perhaps be a little overall optimistic, and it's difficult to always recognize in a process like this all of the potential obstacles. It's almost impossible to even perceive of all the potential obstacles to getting a project from the very planning stages to completion.

Q. From your response to Interrogatory No. 1, evidently in 1988 the EPA held a show-cause meeting/hearing concerning four of the utility's divisions, including Gulf Gate, South Gate, Carrollwood and Waterway. Are you familiar with that?

A. What was the date?

Q. June 9th of 1988.

MR. GATLIN: That was Interrogatory 1?

MS. GERVASI: It's in Interrogatory No. 1, in the appendix, page 57 of the appendix, and look at the date entry of June 22nd of '88.

MR. GATLIN: What was the page number?

MS. GERVASI: 57.

THE WITNESS: I'm not familiar with the specifics of the meeting. I have read some correspondence, perhaps the letter that's referred to in the interrogatory.

BY MS. GERVASI:

Q. Do you know what EPA's concerns were at that time regarding Waterway?

A. No.

Q. Do you know who would? Anybody here at the utility that would be familiar with that meeting?

A. I didn't attend, and I don't think that -- my guess is that there's no one here with the company now who was with the company at that time who attended the meeting, but that's a guess.

Q. Okay. Do you know whether, at that meeting, the EPA asserted that civil penalties would be forthcoming with respect to Waterway?

A. No.

Q. Do you know whether the meeting was transcribed, whether there were any notes taken of the meeting?

A. No. I think the response to interrogatory refers to a letter.

Q. Is that the letter from the Gatlin Woods law firm summarizing the meeting?

A. Yes, I have seen that letter.

Q. Could we get a copy of that letter? Do you have a copy of that?

A. (Nodding affirmatively.)

MS. GERVASI: We will make that Late-filed Exhibit 10, Gatlin Woods law firm summarizing 1988 show-cause meeting, EPA show-cause meeting.

BY MS. GERVASI:

Q. At what point in time, Mr. Allen, did the EPA become adamant about Florida Cities being liable for a civil penalty?

A. I'm not certain. I'd have to refer to correspondence and other records in the file.

Q. Do you know what precipitated EPA's decision to seek the civil penalty? In other words, what was the straw that broke the camel's back, if there was one?

A. I'm not certain I would characterize it as a straw that broke the camel's back, but my perception is

that the EPA felt compelled to take much stronger action with regard to this facility than in the case of Carrollwood or Barefoot Bay, because of similar action which had been taken with respect to the City of Cape Coral, which is located in the close proximity of this facility.

Q. Okay.

A. But that's a perception. I have no basis of fact, other than that's my belief.

Q. Okay. Now, concerning your testimony, where you discussed what Florida Cities' burden should be of the litigation costs, you apparently developed two different methods for determining Florida Cities' share of the litigation costs. Is that right?

A. Well, in my testimony, I did compare the method that I proposed to another method that might be reasonable.

Q. Okay. The method that you proposed, is that where you took the 309,000 civil penalty and divided it by the DOJ's original 5 million, producing the resulting ratio of 6.19 percent?

A. Yes, that's correct. I believe that's in my pre-filed testimony.

Q. And then you multiplied -- well, let's see what page we are -- towards the end of the testimony, I

believe.

A. It's on page 42 of my testimony.

Q. Okay. Then you multiplied the total litigation costs, the 3-million-8-plus, by this 6.19 percent, to come up with the burden of 286,842 for the company. Correct?

A. That's correct.

Q. Then the other method you used -- you used that one just for comparison purposes. Is that correct?

A. That's right.

Q. By that other method, you took Florida Cities' $500,000 settlement offer and subtracted the 309,000 civil penalty to come up with a burden of 190,290 for the company. Right?

A. Well, I'm reading on page 42 of the testimony, beginning at line six, where I compared this method to another method that would simply take the settlement offer that the company made in January 1993, and then if I added the legal expenses that the company had sustained at that point, it was about $125,000. I didn't mention that in my testimony, but at that point in time, the company had sustained legal expenses, I believe, of about $23,000.

Q. Can you explain how the ratio of the civil penalty to the DOJ's original offer is relevant in

determining what the company's burden of the litigation costs should be?

A. Well, I think that it's a way to establish a relationship between what the company offered to settle for, before it had sustained any significant legal expenses, and the offer that the DOJ had made to settle, taking into account the final outcome of the Court. To me, the three are -- it's a rational relationship case where the company offered to settle before the litigation was brought, for an amount that was greater, by almost $200,000, than what the Court found in judgment after the trial.

Q. How is it -- the residual of the civil penalty from the $500,000 settlement offer -- relevant in determining the company's burden of the litigation costs?

A. Restate the question, please?

Q. Sure. How is the residual of the civil penalty from the $500,000 settlement offer relevant in determining the company's burden of litigation costs?

A. Well, had the company -- had the DOJ accepted the company's offer of $500,000, the company would never have attempted to recover that settlement. So when the Court rendered its judgment, it assessed a penalty of $309,000, which the company never -- has not attempted

to recover, and would not attempt to recover. And so the difference between that judgment and the offer compares very closely to the $236,000 that results from the ratio, the 6.19 percent.

Q. [redacted]

A. [redacted]

Q. Why does Florida Cities believe that its shareholders are responsible for some of the litigation costs?

A. Well, because the Court did assess penalties. Also, the company had made the offer to settle for $500,000, which would have been a burden of the shareholders.

Q. Did you consider the level of legal fees incurred at the time of settlement, to the total amount of legal fees incurred?

A. Legal fees at time of settlement? There never was really a settlement.

Q. The settlement offer.

A. Oh, the settlement offer?

Q. Yes. Excuse me.

A. Incur legal fees at the time of the settlement offer to total legal fees? No. I don't understand the rationale. We didn't, because to me there is no

rationale to support that.

Q. Okay. If the Commission finds that the company's management decision to not respond to or challenge the EPA permit denial -- if the Commission finds that that magnified or increased the company's risk of being in non-compliance with the Clean Water Act, should this be a determinant in assessing the company's shareholders' burden of the litigation costs?

A. I don't know how, because I think that you would have to conclude that a challenge would have been successful. I don't know how you could conclude that, but that would have to be the conclusion.

Q. Are you saying that because of the way the Court came down, because of the court's decision, you are saying that's why the challenge would have been successful?

A. No. I'm saying that to have that to go any place, you would have to conclude that a challenge would have been successful and everything would have gone away.

Q. Okay, I see. Thank you.

If the Commission finds that the company's management decisions since the mid-1980s caused delays in meeting the EPA's requirements of the Clean Water Act, should that be a determinant in assessing what the

shareholders' burden of the litigation costs should be?

A. With respect to all three facilities?

Q. Yes.

A. I don't know. I don't -- again, I don't know how that would have impacted the final outcome.

Q. Okay. What measures did the company take to mitigate or control the amount of legal fees that were incurred?

A. It's covered in my pretrial testimony, and if I could refer you to page 41, starting at actually line one.

Q. Okay.

A. I have nothing to add to that testimony.

Q. Okay. In what way are these litigation costs considered reasonable and prudent in connection with fulfilling the utility's obligations pertaining to the provision of service to its customers?

A. Well, as I've stated, again in the pre-filed testimony, I do not view these expenses as being different from any other expenses that a utility company faces. I think that this case is an example of an overzealous trial attorney with the DOJ.

I think that, had someone with objectively taken a look at the facts early on, I don't think that this litigation would have ever occurred. I think it

would have been settled before the complaint was filed.

So I view that as somewhat like a peril, where the federal government has tremendous power. So I think it's part of doing business. You only have to turn the TV on and watch the news and read the newspaper every day to see examples of this, and utility companies are exposed to those same perils.

Q. Okay. Evidently the utility extensively litigated the DOJ's attempt to contact former employees?

A. That is correct.

Q. Why did the company do that?

A. Because it was illegal for the DOJ to make these kinds of contacts. It was against the law.

MS. GERVASI: Thank you, sir. I have no further questions.

MR. McLEAN: I have a few. Could we break for about five, ten?

(Recessed from 10:50 to 10:55 a.m.)

CROSS EXAMINATION

BY MR. McLEAN:

Q. Mr. Allen, my name is Harold McLean. I represent the citizens of the State of Florida. As you know, I have intervened in the docket. You have tendered a resume next with your testimony, with the pre-filed direct testimony in this case. I am not going

to ask you any specific questions about it. I take it you are going to be tendered as an expert witness?

A. I don't know.

Q. Will you be stating opinion testimony?

A. I can't make that judgment. I'll have to defer to legal counsel regarding that.

Q. Okay. Let's move into the substance of your testimony a bit. Let's go first to page six, line 21.

MR. GATLIN: Page six?

MR. McLEAN: Page six, line 21.

BY MR. McLEAN:

Q. At line 21, you say the original complaint alleged that FCWC discharged pollutants from Waterway into the Caloosahatchie River during the period October 1, 1988, through October 31, 1989, without a national pollution discharge elimination system permit. And then you can see the second allegation there, too -- is that right -- on page seven?

A. Yes.

Q. Did those allegations turn out to be true or false?

A. I would have to refer to the Court's ruling, which I believe is Exhibit 24.

Q. All right. That would be fine. Can you identify the order so I can make sure I am looking at

the same document?

A. That is United States District Court, Middle District of Florida, Case No. 93-281-CIV-FTM-21.

Q. All right, sir.

A. Judgment in civil case.

Q. Down at the bottom where it says date, you have a date stamped left-hand side?

A. It's dated August 20, 1996.

Q. All right, sir. It might help to mention findings of facts on Carrollwood that are on page five, I believe, Mr. Allen, if that would help. At least that's what I have.

A. Right. Waterway Estates is page seven.

Q. All right, sir.

A. I believe that the findings of fact with respect to the discharge starts about the upper third of that page.

Q. Page seven?

A. Page seven.

Q. Yes, sir. It is fair to say, isn't it, that the allegations in that original complaint by the government were sustained by the Court? Isn't it?

A. Well, I'm not sure that all the allegations were sustained pertaining to time period.

Q. Okay.

A. But the findings of fact, that there was a discharge without an MPDES permit between October 1, 1988, and October 31, 1998.

Q. And that was Waterway. Right?

A. That is correct.

Q. Let me ask you generally about the other two.

With respect to Carrollwood, isn't it also fair to say that the allegations of, I believe, the amended complaint, were ultimately found to be true by the Court? And by "allegations," I mean allegations of the specific violations.

A. I don't believe the Court found, in any case, that all of the allegations made were correct.

Q. Maybe it would help if you could tell me in a general sense -- or in specific, if you prefer -- with respect to then Waterway, which I asked you about before, there was an allegation that there was a discharge without the MPDES permit. Correct?

A. Correct.

Q. And that was -- can I characterize it accurately as -- the principal allegation in the original complaint?

A. I don't know that I would characterize it as the principal. Principal in what respect?

Q. Well, there was an allegation that there was

such discharge without a permit over a period of time. Taking that allegation as a whole, isn't that the principal allegation of the initial complaint?

A. I'm not sure in a legal sense. I'm not sure I know how to characterize it.

Q. I'm asking for your characterization, certainly not a legal. I want to have a feeling for the extent of the government's case which they took against you for Waterway Estates. Isn't it true that the Court ultimately sustained those allegations and found those violations to be a fact?

A. No.

Q. Which aspect did they find not to be so?

A. The Court did not find for all of the allegations set forth in the complaint.

Q. Well, with respect to Waterway Estates, which did they find to be not sustained?

A. Well, we'd have to take the complaint and then the Court order and go through one by one, but not all of them were sustained.

Q. But you can't tell me which ones were not? You have to lay them down side by side to make that determination?

A. Without a study, that is correct.

Q. If the Commission had a notion to compare, to

somehow quantify the extent to which the government proved up its allegations as opposed to where the government failed to do so, that's the operation you are engaged in. Is that correct? And you are not prepared to do that. Is that correct?

A. Well, I haven't done that, no, you know, side by side; not that kind of comparison.

Q. But to return to at least one specific, you have admitted personally -- and it is also true that the Court found -- that there was discharge without a permit at the Waterway Estates site. Is that correct?

A. That is correct.

Q. Same is true of Carrollwood?

A. I have to check the findings of the Court in that regard, and Carrollwood, I believe, is on page five. I don't believe the Court sustained a discharge without an MPDES permit in the case of Carrollwood.

Q. But you admitted in that deposition, didn't you, that that in fact did occur?

A. I don't recall. In the deposition in the federal case --

Q. In the federal case, yes, sir.

A. -- probably. I think I pointed out that the company was operating under administrative order during that time.

Q. Yes, sir.

A. But technically it did not have an MPDES, for part of that period of discharge.

Q. That is your present testimony, that it did not during that time, during any time. Is that confusing?

A. Well, not during any time. Maybe I can state it this way. There was a period of time when, in the case of Carrollwood, the MPDES permit had expired and the EPA had issued administrative orders which covered the -- it was not an MPDES permit, but authorized the continuation of the discharge.

Q. Okay. You were deposed by Mr. Jacobs; were you not?

A. That is correct.

Q. I want to read you the question and answer, and tell me if it sounds familiar and if it seems to be your testimony.

"Question: Okay, I'm going to ask you the question again. Could you listen carefully? Did it come to your attention that the Carrollwood Wastewater Treatment Plant was discharging without an MPDES permit?

"Answer: Yes.

"Question: When did that come to your

attention?

"Answer: Probably in '98, but I'm not certain."

Does that sound correct? '98?

A. Yes, sir, that sounds correct.

Q. Okay. We have dealt with Carrollwood and Waterway. Same questions with respect to Barefoot Bay. First of all, let me ask you if it is true in that same deposition that you suggested or answered Mr. Jacobs' question -- well, I will read it to you.

A. I'm confused. I thought we were comparing the allegations in the complaint to the findings of the Court. Now we seem to be going back. Because the Court ruled in summary judgment --

Q. Yes.

A. -- that the allegations that occurred prior to the consent orders, which settled all of the issues related to Carrollwood and Barefoot Bay, were history and were not going to be considered by this Court.

Q. Okay. Let me ask you this. And I appreciate your confusion there. Page two of the Court's order, there's a footnote down there that I have been confused with. Perhaps you can shed some light on it. Do you see footnote number one?

A. Yes.

Q. Now, that footnote indicates to me that there has either been a finding or there has been a stipulation with respect to violations, in this trial, which went to the issue of the violative liability of Avatar, finding more importantly the extent to which penalties would be assessed against Florida Cities' Water. Is that correct?

A. That is correct.

Q. Is it fair to say that this order settles the issue of the penalty to be assessed against Florida Cities' Water and the violative liability of Avatar?

A. That's correct. That is correct, but the same Court, also, previous to the trial, had settled the issue of the violations.

Q. Whether there had been violations?

A. That is correct.

Q. Is it your testimony that that order absolved Florida Cities of some of the violations?

A. It absolved Florida Cities -- the summary judgment orders absolved Florida Cities of a substantial number of the allegations made in the complaint, yes.

Q. Could you suggest a methodology by which one might compare the extent to which they were absolved and the extent to which they were found to be violative?

A. I think a comparison could be made. I have

not made such a comparison. Again, one would have to take the summary judgments, compare them to the allegations, and --

Q. Okay. Let's turn from that subject, then, and go back to the subject I was exploring there. You admitted in deposition -- you said in deposition, pardon me -- that in fact there was discharge at all three of those sites -- is that correct -- discharge without the appropriate permit?

A. I believe that's what I said, yes. Again, in most of those cases, I think -- certainly in the case of Waterway and Carrollwood -- there was always an EPA administrative order covering the discharge; granted, not an MPDES permit.

Q. Sure. But the Court in its orders, as long as we are on the topic, did in fact find -- or assess a penalty, rather -- against Florida Cities Water Company for those discharges -- did they not -- on page 31?

A. I don't believe that's the case with respect to Carrollwood. But --

Q. Refer to page 31 and see what it says.

A. Okay.

Q. Now, there is a fine assessed there against Carrollwood, or a penalty. I don't mean anything by that distinction, but there's $14,000.

A. That is correct.

Q. Now, is it fair to say, then, that this trial really addressed two items -- aside from Avatar -- and I mean Avatar Holdings and their liability, because that was resolved prior to the trial, wasn't it?

A. That was my understanding, yes.

Q. So this trial was really about the severity of the violations and Florida Cities Water Company's ability to pay any penalty. Isn't that pretty much what the trial was about?

A. I am not sure the trial was limited -- I haven't given it enough thought to say the trial was limited to those issues, but certainly those issues were a big part of the trial.

Q. Okay. And Florida Cities was no doubt -- first of all, Avatar was happy they were absolved of any wrongdoing. Right? It is true they were absolved of any wrongdoing?

A. That is correct.

Q. Probably happy about it, too. But going into the trial, you were exposed to considerable liability and emerged with a $309,000 penalty -- is that correct -- and change?

A. Yes.

Q. Now, if I read the Court's order fairly, I

think that was based upon, mostly upon severity of the violations -- which the Court found in most instances to be simply not that severe -- and Florida Cities Water Company's ability to pay. Right?

A. Those were two big issues as far as the trial was concerned, yes. Again, I can't say that those were the only issues, without giving a lot more thought to it and reviewing the trial transcript.

Q. Sure, okay. Going back to your direct testimony, pre-filed direct testimony, page seven, line 18, there is a discussion which you offered the Commission which goes, I think -- the intent of the testimony is to show the Commission the extent to which you were exposed to civil penalties at that point. Is that correct?

A. Certainly one of the purposes, yes.

Q. Sure. And isn't it true -- you say your total civil penalty requested was 32 million. Would it be more accurate to say that the total civil penalty which might have been requested -- aren't those penalty clauses written in, quote, up-to language, close quote?

A. I believe if you will examine the complaint, that's the civil penalty requested. I had the same question, and I read the complaint, and I believe it is characterized in that fashion.

Q. Tab two -- I better see what it says, before I ask you a question about it. Turn to page six of your tab two. I think it is your Exhibit 2 at the back of your -- do you have paragraph 28 on that page?

A. Yes.

Q. I read that says the defendant is liable for civil penalties up to $25,000 a day, including up to $25,000 a day. And finally, in the prayer for relief, it says, the defendant be ordered to pay a civil penalty up to $25,000 a day. Is that correct? Did I read it correctly?

A. That is correct, and it says the plaintiff is requesting that the defendant be ordered to pay a civil penalty up to $25,000, and the way I read it is if someone is ordering me to pay a penalty up to $25,000, I'm going to assume it's $25,000.

Q. Oh, so that is an assumption you make based upon that language. Right?

A. Well, I think the language is pretty clear.

Q. Okay.

A. Obviously, it could be from I guess one dollar to 25, but I think you would be pretty foolish to assume it was the one dollar.

Q. In fact, when this case went to trial, the maximum demand by the government was 5 million -- wasn't

it -- in that neighborhood?

A. I believe it was 53 million.

Q. Okay. Taken by the maximum exposure, 52 million?

A. We are getting into a legal area that is -- as far as what the plaintiff was demanding at trial, that's probably above my expertise.

Q. Okay.

A. But my interpretation, going into trial, is that the plaintiff was demanding, at the onset of the trial, something on the order of 53 million or 58 million, because at that point in time the Court, through summary judgment, had eliminated many of the allegations.

Q. Have you revised the joint pretrial statement that is referred to in that footnote that we read sometime back?

A. No, I have not.

Q. In your testimony to Ms. Gervasi, if I have it correctly, you said that Florida Cities relied somehow on the permitting authority of the DEP, the Florida DER. Did the company at that time believe that that would be adequate and they didn't need to get the MPDES permit? Or did they simply believe that EPA would just follow suit and do what the Florida DER did?

A. Well, I never believed that the company didn't think that it was necessary to have an MPDES permit, but on the other hand, I believe that during that time, during that era, and continuing on to today -- and of course now the EPA has jurisdiction for MPDES permits, so they are responsible for all permits -- but it is my belief after having been involved in permitting issues, been involved with regulatory agencies with respect to the Clean Water Act, that the DER was clearly the agency, the lead agency, although they did not have authority to issue MPDES permits.

Q. Okay. So that theory is advanced -- well, let me ask you. Was that theory that you just described, was that advanced before the federal court at any point in time? Was that part of your company's theory of defense before the federal court?

A. I possibly can't answer that. I don't think it was necessarily, you know, a major thrust of the defense, but there was testimony to that effect during the trial, and there was a DEP witness at trial. But notwithstanding, it was clear that the DEP -- the DER at that time -- was really the master that had the ultimate say as to what you would be required to do.

Q. So that was advanced by your company more or less in mitigation, more or less as kind of a good faith

defense to the government's thrust?

A. I'm not sure what you mean by "advanced." It was covered at trial. I think that it probably was covered in some of the motions that were filed and other documents filed with the court. I couldn't say that it was necessarily the number one defense.

Q. No, I wouldn't suggest that. But the DER witness was your witness. Right?

A. That is correct.

Q. You all put him on. Correct? The simple way to put it is, wasn't that part of your saying to the Court, we behaved in good faith, we did as well as we could?

A. I think that was a part of it.

Q. Was there some part that I'm missing, in that characterization?

A. Well, one of the -- if I remember, one of the purposes for the DEP witness was also to deal with the issue of the discharge to the canal versus the river -- in this situation, the river and the canal are one and the same --

Q. Sure.

A. But that became a big issue with the DOJ. I don't think it was ever a big issue with the EPA. And the DER witness testified that they were one and the

same, that although it had become a policy of the DER, for the sake of uniformity, to help people to extend their discharge pipes out into the river.

Q. Are you finished?

A. Yes.

Q. The notion that the company relied -- to some extent, anyway -- on the DEP's authority, that's included in your testimony in this case; and I am wondering what relevance it has here. Why do you advance that theory in this case? What is it intended to have the Commission do?

A. I don't know that it's intended to have the Commission do anything in particular. It's just part of the story.

Q. Well, what part of the story is it, is what I'm asking?

A. Well, it's a part -- I think it indicates what was driving the company's decisions, you know, to the extent that -- what was driving -- what was the environment that influenced the company's decisions, is a better way to put it.

Q. Is that also true -- look at page 12 of your testimony, on line 15.

You are asked: In your opinion, why did the US DOJ bring suit against the FCWC in this case?

You provide a fairly lengthy answer there.

Why is it relevant in this case? What does it have to do with this case?

A. I think it's relevant in trying to explain why the EPA and the DOJ took on a case that, relative to environmental cases and relative to environmental damage, is not a big case at all. It's sort of a no-case, within that definition. And this followed on the heels of the EPA settling Carrollwood, which was very similar to Waterway Estates. It went on for a long period of time. Had some similarity with Barefoot Bay.

They settled those cases, those combined, for $21,000. And why the EPA and the DOJ wanted to take on a very similar case -- I guess from the standpoint of numbers of violations, technical violations, probably it was less, if you counted up the total number. And I thought it appropriate to gather some insight as to why they took this case, which I've heard some of the regulators characterize as nothing -- some of the people who have been in enforcement their entire careers.

Why did they take this case? And I think I have explained why they took this case.

Q. Which, I gather from your testimony, is not the greatest of motives. It is a lesser motive than some other serious violation, I should think. Here is

what I am confused about.

Let me ask the question this way. Two scenarios, both hypothetical, one in which the EPA moves with good motives, one in which they move with bad motives. Express, if you will, the difference that should make to the Commission, if any.

A. Well, I think that some of the things that were bothersome to me, related to this case, would be bothersome to anyone who looked at it, such as why did they take a case that had no environmental significance whatsoever and refuse settlement on a reasonable basis?

Throughout all of this litigation, the DOJ did everything they could to drive up legal expense -- everything. They would take things back to the Court three and four times, until the Court said, don't bring it back again; we're not going to listen to it again.

Throughout this process, every effort was made to drive up legal expense. Legal expenses were higher than I think anyone anticipated, because of some of those tactics, and I just think it needs some explanation.

Q. But my question is, does it suggest in your mind that the Commission should behave differently, given those two extreme scenarios -- one where they acted badly, one where they acted with the highest

intention? The issue before the Commission is whether the customers pay or whether the stockholders pay. Does either of those two scenarios suggest to you any change in the answer?

A. I think so.

Q. In what respect?

A. Because I think a case like this is no different from any other peril. It is a peril that a utility company or a business faces.

Q. Let me re-ask the question.

A. It is really no different from a natural disaster.

Q. I see. Two scenarios, one in which the EPA acts with high motives, one in which they act with corrupt motives. You incur a great deal of expense as a regulated utility in fighting off the EPA. The question before the Commission will be, do customers pay or do stockholders pay? Is there anything that provides an answer to that question in those two scenarios?

In other words, contrast between the two scenarios. It's getting to be a pretty long question, isn't it? The point is, who cares what the motives of the ERA were. Express to me who pays, if you can, by what the different EPA's motives were.

MR. GATLIN: I don't think Mr. Allen is

suggesting that EPA's motives were corrupt.

MR. McLEAN: Certainly not. That is my hypothetical.

THE WITNESS: I'm not sure that I can answer a hypothetical, as I have stated before. The purpose of attempting -- and certainly I have given a lot of thought to why they brought this case and why it was pursued the way it was pursued, which resulted in tremendous legal expenses. I thought it was worth, in telling this story -- it was worth setting forth my opinion in that regard. Now --

BY MR. McLEAN:

Q. And I appreciate that, and I'm glad you did. But what I'm trying to find -- and I don't think you have answered the question yet, in all due respect -- is what difference that makes in this case. If Florida Cities Water was victimized by an overly zealous EPA, does that suggest the customers should be more likely to have to pay than if they had been less victimized by a well-meaning EPA?

A. I'm not sure I can answer the question. I can only say that I have just never seen a case that had the enormity that this one took on. And you know, I'm not sure that I can set forth to the Commission that, well, you should act in this fashion, in this case, but if

this had been different, then you should act in another fashion -- I'm not sure I can respond to those hypotheticals, because there are so many other factors involved that I think would influence not only the Commission's reaction but others' reaction. I don't think we could list them all.

Q. Is it fair to say the degree to which Florida Cities Water Company was victimized by the federal government is absolutely irrelevant to the question of whether the customers pay or the stockholders pay?

A. I'm not sure I can answer that. I could use the -- you know, I view this case as like any other peril -- not any other, but many other perils.

Q. With respect to -- you refer to some tactics of the EPA. And I think the inference I got was that the tactics were designed to increase legal expense. Do they rise to the level of bad faith, do you think?

A. I wouldn't characterize -- I couldn't characterize it as that. I think it was certainly extremely zealous pursuit of the case, based on my observations, and I can't say that driving the legal expense up was the only motivator. I certainly couldn't say that. But it was my perception that that was one of the motivators for some of the tactics that were used.

Q. Did you recover either cost or fees from the

government?

A. No.

Q. Did you request them?

A. Yes.

Q. Did Avatar request theirs?

A. Well, back up. I learned that the process of recovering legal expenses from the federal government is very, very complex. And I'm not sure I thoroughly understand it today. But the way it was explained to me is there are two -- and maybe more -- scenarios. One is where the government gives you permission to sue them.

There's one set of rules that apply to recovery of legal expenses under those circumstances, and then there's a totally different set of rules that apply whenever the government does not give you permission to sue them. And it was my understanding from our legal counsel that we fell into the second category, where the government would not give us permission to sue them for legal expenses. And based on that advice, or based on that situation, and based on the advice of the counsel, it was concluded that probably the cost would exceed the expenses recovered.

Q. You did in fact -- Florida Cities Water Company did in fact -- seek recovery of both legal fees, attorneys' fees, and costs. Did they not?

A. I believe that's correct. And I believe the Court stated -- begrudgingly, I think, is the word they used, or something like that -- that the Court did not have authority to deal with that issue.

Q. Is that because Florida Cities Water was not a prevailing party and because the government didn't litigate in bad faith?

A. I don't know.

Q. Okay. If the order -- on page 35 of your testimony, line seven, you said that Florida Cities Water Company is satisfied with the outcome of the litigation. Correct?

A. Yes.

Q. Well, does that include -- I believe you said it was true that you sought those costs and fees but did not recover them. Does your satisfaction with the judgments include that aspect as well?

A. Well, obviously, I would have liked for the Court to have found judgment of zero.

Q. Sure.

A. And to allow Florida Cities to recover all of its legal expenses.

Q. Do you see a connection between those two things, by the way, a judgment of zero and a recovery of legal expenses?

A. Again, that's a legal question. I really can't answer it.

Q. Okay. Move to page 37, line 22. Let's see. Where are we here? You are dealing with your perceived consequences of this litigation; possible consequences of this litigation. Is that a fair statement?

MR. GATLIN: Page 37 line 22?

MR. McLEAN: Yes.

BY MR. McLEAN:

Q. Certainly you are dealing with your selection of lawyers.

A. Certainly the company viewed the consequences as potentially being devastating.

Q. Sure. $53 million, if recovered, or if sought against Florida Cities Water, would have been the end of the company, I believe. Is that correct?

A. That's correct.

Q. The future of FCWC was at stake. I would like for you to define that. I'm not sure what you mean. Tell me what -- would the customers have stopped receiving water and sewer service?

A. Had the company been faced with a penalty of this magnitude, obviously it would have ultimately ceased to do business.

Q. Yes.

A. Now, how that would come about, that is a hypothetical. But guessing, there would have been bankruptcy, and what would happen from there, I don't know.

Q. Okay. I want to ask you about that. Do you have any expertise in the area of bankruptcy, liquidation, judgment satisfaction, anything like that?

A. Any expertise?

Q. Yes, sir.

A. I'm familiar. But being an expert? No.

Q. Okay. You are not going to be tendered, so far as you know, as an expert in how bankruptcies go about liquidating things like utilities or anything like that?

A. I hope not.

Q. I notice that if you recover this money from the customers, water customers will pay as well as wastewater customers. Is that correct?

A. That is correct.

Q. In a logical sense, how do you get to the water -- all these violations were associated with wastewater activities. How do you get to the water customers, if you understand my question?

A. Well, I believe, for -- and this covered, I believe, in Mr. Murphy's testimony, this rationale, but

this situation was viewed as a company-wide situation that really potentially would impact all customers uniformly. And that was the rationale for applying it, number one. And number two -- and this is a secondary reason -- it was impossible to somehow go through and allocate these expenses to, you know, Carrollwood Waterway. And I think fundamentally it is very difficult to separate water and wastewater. They're both the same, really, except one is treated to one standard, and the other is treated to another standard.

Q. There are some customers who receive one sort of service without receiving the other?

A. That is correct. And those customers who only receive one service, under our proposal, will be billed half as much of a surcharge as those customers who receive both services. So there's equity from that standpoint.

Q. So the reason that the water customers may be liable for this, according to your testimony and your explanation, is because it's too difficult to allocate.

A. I said that was a secondary. Part of the rationale but not primary.

Q. What is the primary?

A. Primary is, it is an umbrella issue that affects all of the customers of the company, both water

and wastewater.

Q. You say here, consequently, the future of FCWC was at stake. Is that why you say that?

A. That would be part of it, but I wouldn't say that that would be more important than other considerations at all.

Q. Well, can you take me down this road? Y'all were faced with a possibility of a $54 million judgment against FCWC.

A. Well, at one time it was $104 million.

Q. Let's go with 104. If the judge came back and said $104 million, what happens next? There are a number of references in your company's testimony, in yours and other witnesses', which say service would have deteriorated, or something bad would have happened to the customers. Tell me what it is and how it would have occurred, if you can, please.

A. Well, again, I can't say exactly what would have happened, had the government demanded $104 million and we'd said, we don't have $104 million. Obviously, we couldn't pay it. So some action would have been taken, I presume. I don't think the government would have forgiven the debt.

Q. Would the government have shut down the service?

A. I don't know. Mr. Jacobs proposed that at one time.

Q. But you don't know. He wasn't speaking on behalf of the government as creditor, was he?

A. Well, I would hope that government would have better judgment than that.

Q. And if they had better judgment, isn't it true that continuity of service would have been maintained through the whole process?

A. I would have hoped that would have been the case, and I presume that the state would not have permitted that to have occurred. I think during that whole process, probably what would have happened -- again, this is one thing that could have happened -- the company's assets would have been liquidated. The company would have been sold, and -- but I don't know that.

Q. Of course not.

A. And I think that any time there's that kind of turmoil, service always suffers.

Q. Sure.

A. Without exception.

Q. Now, when you say here on page 37, "and consequently the future of FCWC was at stake," I want to know exactly what you mean there. Do you mean that

customers-receiving-service was at risk, or do you mean FCWC as an ongoing economic institution was at stake?

A. I think both of those things.

Q. Both of those are true. Can you quantify? I don't think you can quantify, to any extent -- can you quantify the extent to which customers' service was at risk?

A. I can't quantify it. I can say that in the proceedings that would have followed that kind of situation, where the government demanded $50 million or whatever the case may be and the company could not satisfy that demand, there would have been a period of time -- or there would have had to have been some successor entity to assume ownership and operation assistance. During that interim period, it would be my guess that service would have deteriorated, for a number of reasons. One is there would then probably have been an exodus of employees.

Q. Upon what do you base that? Would the rates have changed?

A. Well, just based on my experience in life, when a company is about to go under, people forget about a long-term career at that company, if they're wise.

Q. With FCWC?

A. Yes.

Q. What if the successor were Florida Water Corporation or any entity like that?

A. Well, I think at any time where there's a situation where the employees see the unknown in the future, instability, they don't know what's going to happen, and if they have an opportunity to place themselves in a more stable employment situation, they'll do it. I don't care whether it's a situation like that or it's a situation where Florida Cities decided to sell their utility to Florida Water Corporation or whomever. That always -- that type of situation -- creates instability in the workforce, without exception.

Q. Was there general knowledge in the company that the government was demanding $104 million from Florida Cities Water Company?

A. No, I don't think there was general knowledge of that, no.

Q. Was there any exit of any employee that was associated with that demand?

A. Never made a study of it, so I don't know.

Q. Have you ever made a study that employees leave a company when it is about to be taken over by some other company or liquidated or something of that nature?

A. Can I provide you statistical studies?

Q. Yes.

A. No. I could probably provide you some experts in that area that could. But I know, from living life, that it does happen.

Q. Do you know whether it is also sometimes very good news to the employees that management is about to change?

A. I imagine there are situations similar to that.

Q. But what we're trying to do here is quantify the extent to which service would have deteriorated as a result of whatever comes after the 54 --

A. And I have stated in my opinion that there would have been -- a situation like that creates uncertainty on the part of the employees. Some employees will leave. Some of the key employees this company has -- at last count, 61 licensed operators that are required by law to be licensed in order to operate our facilities -- it's very critical that we keep those people, that we have stability there.

I think, beyond that, the capital improvements program would have stopped in its tracks.

Q. How do you know that to be the case?

A. I think that's a pretty safe assumption, when

a company -- and I am assuming you go into bankruptcy -- when a company goes into bankruptcy, normally they don't go out and build a lot of things; they don't make investments in plants. Normally, creditors are pounding at the door, and they stop all such investments. They don't even pay their bills, much less do things like expand a plant or do things necessary to assure service to the customers.

Q. Essentially, any entity or known governmental entity which took over these facilities would still have to remain within the good graces of the Public Service Commission, wouldn't it?

A. Any governmental entity?

Q. Any known governmental entity.

A. Oh, yes, I would think so.

Q. Sure. And very frequently, according to a great deal of testimony you folks have presented in rural cases, requires you to build ahead and plan ahead. Doesn't it?

A. Well --

Q. Is there any reason you have to assume that a successor in interest would behave with respect to this utility any differently than you do?

A. I have no reason to believe that that entity would not, but you will not place that entity in that

position overnight. In many cases, these things drag on for years, as we both know, and to believe that in the event that a $100 million demand was placed on Florida Cities and it says we can't pay it, we don't have the money -- to believe that that issue would finally be resolved in a short period of time is foolish.

Q. Oh, sure.

A. I mean it would take years.

Q. But there's nothing in your testimony that suggests to the Commission that if this scenario went down, that someone would send a backhoe out, dig up stuff and haul it off in a truck, is there?

A. No, there is nothing to suggest that.

Q. It is probably true that any creditor, including the government, would be interested in maintaining these facilities as a going concern, in an economic sense. Isn't that true?

A. Well, I can't say that any entity would. I think that certainly the government would be interested. I know the DEP would be very interested.

Q. They're interested?

A. And I believe the Commission would be very interested.

Q. And North Ft. Myers might be interested with respect to your Waterway Estates. Right?

A. And the citizens there, the customers would be interested there, yes.

Q. How about North Ft. Myers Utilities, the utility which is your northwesterly neighbor down in Waterway Estates?

A. I'm not sure they are northwesterly, but --

Q. Wherever they are.

A. Northerly, anyway.

Q. Sure. He testified in a federal lawsuit, didn't he, to that effect, the owner of that utility?

A. Yes.

Q. Have there been stated interests by any governmental entities in the neighborhood of -- well, Carrollwood obviously had a government suitor, didn't they? Or did they?

A. I don't know what you mean. I'm sorry.

Q. I'm sorry. Had any governmental entities expressed interest in acquisition of any of your facilities that are the subject of this case?

A. When?

Q. Any time.

A. Carrollwood, not since I have been with the company. I don't know of anyone that's expressed an interest in acquiring Carrollwood. It depends on what you mean by "interest." If you mean when you have a

rate hearing and someone says -- which invariably they say -- well, we're ready to take over Florida Cities, I don't consider that as responsive to your question as those who are expressing interest.

Q. Sure. I mean a serious interest.

A. A serious interest? I don't hardly know how to characterize "serious." After the rate case in Carrollwood, I have no knowledge of anyone coming to Hillsborough County or the City of Tampa or Florida Water Services Corporation, coming to Florida Cities and saying, hey, we want to buy Carrollwood. I know of no instance.

In the case of Barefoot Bay, following our last rate case, there I had some contacts from the Brevard County city attorney, and they asked the question, was Florida Cities interested in selling the facilities at Barefoot Bay. That went on for two or three months, I would guess, and I haven't heard. That's been -- well, it was right after the rate case. So it was two or three years ago.

As far as Waterway Estates, North Ft. Myers system is concerned, I have no knowledge of anyone expressing interest in acquiring that system.

Q. Okay. There was testimony in that federal case about interconnection with the North Ft. Myers

system. Wasn't there?

A. Yes, as was the case in our -- our rate case there of -- not the last one, but the one before that.

Q. Sure, the one before that. The reason y'all resisted that is because -- well, let's don't get into that. That's something else.

The future of FCWC was at stake. I take it that that statement certainly includes the stockholders' equity interest in the corporation. Didn't it?

A. It meant the company, which would include the shareholders, yes.

Q. Sure. Is it fair to say that you have a personal stake in the survival, the financial survival, of Florida Cities Water Company?

A. As long as I am working here, yes.

Q. Sure. Do you have any reason to believe that you wouldn't be as attractive to a successor operator, if you will -- owner of these facilities -- as you are to the current owners?

A. I can't respond to that, because there are so many variables in who the successor corporation might be or the successor entity.

Q. That is why I was careful to ask. You have no reason to believe that you would not be as attractive to them, do you?

A. To --

Q. To any successor.

A. I think it would have to depend on which successor. If Florida Cities were liquidating bits and pieces, that would be one response. If the successor was an investor-owned utility that acquired all of the assets or all of the stock of Florida Cities, then there would be a different answer.

Q. Let me change the focus considerably, just a couple of questions about Avatar. You were presented -- when this case went to trial, Avatar's liability was still very much at issue. Wasn't it?

A. Yes, because that issue had not totally been resolved in summary judgment. That's correct.

Q. Let me ask you a question which is unabashedly a legal question. Maybe you have the answer. I certainly understand if you don't. Was there a discussion about whether Avatar and Florida Cities Water Company were jointly and severally liable, or was the notion that they could collect from one or the other -- let me strike all that.

Was there any discussion that you understood about whether Avatar and Florida Cities Water Company were jointly and severally liable on any judgment that might --

A. I can't answer that.

Q. Okay. You were Avatar's lead witness -- let me strike that.

You were presented as a direct witness by Avatar on the issue of whether Avatar was liable for any of the discharges and so forth. Were you not?

A. I'm not sure how it was presented. I was asked and answered a lot of questions in that regard.

Q. You were sponsored by Avatar and by Florida Cities Water Company. Right?

A. That's getting into a legal area. I did testify on issues that related to the relationship between Avatar Holdings and Avatar Utilities and Florida Cities Water Company. I was examined by Avatar's attorney, Avatar Holdings' attorney.

Q. And that would be Mr. Hird?

A. Mr. Hird, yes.

Q. Okay.

A. And simultaneously, while sitting on the same stand, I answered questions totally unrelated to that, that related to the other issues.

Q. Sure.

A. So I was examined by both attorneys.

Q. Okay. There is --

A. I'm not trying to evade your question, but I'm

not sure I understand the legal term about sponsoring.

Q. It was perfectly responsive. In fact, you were put on by both Avatar and Florida Cities Water. You were asked direct questions by Mr. Hird -- is that H-u-r-t? -- as Avatar's attorney?

A. Yes. And it's H-i-r-d.

Q. Oh, yeah? Have you read your deposition? Anyway, I'll take your word for it.

Was there any point at which the federal court was apprised that Florida Cities Water Company might pass on either the penalty or the cost incurred in resisting the penalty to the ratepayers?

A. I'm not certain about that. I know there was testimony before the Court regarding rate-making, but really, I'm not certain.

Q. There was in your deposition, however, by Mr. Jacobs, wasn't there?

A. Yes.

Q. And didn't you at that time tell them -- Mr. Jacobs -- that it was highly doubtful that you would include any of the -- let me strike that and start over.

You testified to Mr. Jacobs that the company set aside $2 million up front.

A. Right.

Q. Mr. Jacobs asked you, somewhat inartfully, if

that $2 million was in rate base. And you said no. And then he asked you whether Florida Cities had any plans to include that in the rate base, and you said that was highly doubtful. Is that correct?

A. Well, I said that, and I think if you read further in my deposition, you know, I said I really don't know.

Q. Sure.

A. Because, you know, at that point in time I didn't know what the legal expenses were going to be. I didn't know what the outcome of the trial was going to be. Frankly, I didn't know where this thing was going. It just seems to me that it kept getting bigger by the day. And I think if you will read on, you will see that finally, I said, well, I really don't know, because there were just too many things unknown at that point in time to really make a judgment regarding what the company might do with respect to rates and how the Commission might react to it.

MR. GATLIN: Mr. McLean, it might be a good time if we would break, if it's all right?

MR. McLEAN: Sure.

MR. GATLIN: I kind of thought you might be at a point to take a break.

MR. McLEAN: Sure, you can talk the government

man into taking lunch. It's like giving a doughnut to a cop.

(Lunch recess taken from 12:00 - 1:35 p.m.)

BY MR. McLEAN:

Q. Mr. Allen, continuing on page 35 and in pages thereafter, you list a number of lawyers who were involved in the litigation. And those would include -- should they include the lawyers who were involved in your deposition as well?

A. The lawyers when my deposition was taken?

Q. You sat for two depositions.

A. That's correct.

Q. At the first deposition, they were on your behalf. Mr. Battochi?

A. That's correct.

Q. There was another gentleman representing your interest and also that of Florida Cities Water Company. Is that correct?

A. Yes. The other attorney was representing primarily the interest of Florida Cities Water Company, Mr. Scroggin.

Q. Mr. Scroggin, right. Now, Mr. Battochi was representing you, primarily?

A. He was representing both me and the company. I'm not sure how he characterized his representation in

the deposition. Perhaps we should check that. But he was there primarily because of this Whitesenhoff (phonetic) case that had recently been decided by the Supreme Court.

Q. That is what prompted you to take the Fifth on several occasions in your first deposition?

A. Yes. On my first deposition I exercised my Fifth Amendment rights because of that case.

Q. That was a concern of personal criminal liability?

A. Yes.

Q. Later, you were deposed again, and this time you didn't take the Fifth. You dealt with the substance of the questions.

A. That's correct.

Q. And on that occasion, there was present a lawyer by the name of Mayan Albritton, wasn't there?

A. Yes.

Q. Was he representing you or the interest of Florida Cities Water Company?

A. He was representing me.

Q. He sat with you through the deposition. Is that correct?

A. Yes.

Q. And he also was present, at least, when you

testified at the trial. Is that correct?

A. I believe that's correct. I'm not sure he was there the entire time, but he was there at least part of my testimony.

Q. Yes, on your testimony?

A. I'm not sure he was there for all of my testimony, because my testimony went into two days, and I'm not sure if he was there the morning of the second day or not. He was there the first day.

Q. Okay. And that was, again, because of concern about personal criminal liability?

A. He was representing me personally, and no, I don't think there was necessarily -- I didn't have any real concerns at that point in time, but he was there and felt that he should be there, and he was there.

Q. Did he attend at any time -- strike that.

Let me ask, were you there during the entire trial?

A. I was there with the exception of about a day and a half, if I recall. I missed one entire day of the trial, and I believe I missed a part of another day.

Q. Mr. Albritton is either a partner or associate of Holland & Knight. Is that correct?

A. Yes.

Q. And I take it Mr. Albritton was not there at

any time when you were not testifying. Did I get that right? You sat as a spectator, an interested spectator, at the trial for some time anyway?

A. I was a representative of the company.

Q. You were in front of the bar with the lawyers, then?

A. We.

Q. Was Mr. Albritton there with you when you were not testifying?

A. No. I don't believe he was there any time, you know, when I wasn't to be called as a witness. But keep in mind that, you know, witnesses were scheduled, thinking you'd be on at 2:00 o'clock.

Q. Of course.

A. And it might be 4:00 o'clock. So he may have been there for some period of time when I wasn't physically on the stand.

Q. Now, Mr. Albritton represented neither the interest of Florida Cities Water Company nor Avatar -- is that correct -- Avatar Holdings?

A. That is correct.

Q. Are Mr. Albritton's fees sought to be recovered in this proceeding?

A. No.

Q. They are excluded, are they?

A. They are excluded. There's no billings for Mr. Albritton, or there's not supposed to be, and that's our intent, that we are not attempting to recover any of those fees through this proceeding.

Q. Right. Now, with respect to some testimony you gave Ms. Gervasi on former employees and the government's compelling them to testify, did you incur legal fees in that endeavor?

A. Well, yes. Our -- Mr. Scroggin and Mr. Baise devoted some time to seeking relief through the courts to stop this.

Q. Okay. Were you contractually obliged to provide representation to the former employees?

A. No.

Q. Fees were incurred in their endeavor, no doubt. Is that correct?

A. Well, fees were incurred principally -- and I won't say exclusively, but near exclusively -- by the legal proceedings before the Court --

Q. Okay.

A. -- to get the the DOJ trial attorney to stop violating the law.

Q. Is there any separate accounting? Can the Commission identify in any way the amount of money that was spent for fees relating to the protection, if you

will, of the former employees?

A. I don't know that I would characterize it as protecting the former employees.

Q. Resisting their --

A. We were -- the interest was to keep the trial attorney -- stop him from violating the law. Our attorney said the law is very clear, and the Court agreed with him.

Q. But you wouldn't have defended me from breaking the law if I were up in Tallahassee. What I am trying to get at is --

A. If you were a former employee, we would have gone to court, as we did, to keep the trial counsel from meeting with you without Florida Cities' attorney being present.

Q. Were you contractually obliged to provide any legal representation for former employees?

A. I know of no contractual obligation in that regard, no.

Q. Okay. Shifting the focus, Avatar could have been found, given different behavior, liable in this lawsuit, couldn't they?

A. Gee, I don't know. I guess circumstances -- it's like --

Q. Well, let me ask the question differently. It

was certainly at issue. I think you answered me before that the liability of Avatar was to be decided by this proceeding, by this.

A. That is correct. That is correct.

Q. Now, had Avatar been found liable, do you know of any entity to whom Avatar could have passed along either the penalty or the fees incurred in avoiding the penalty or lessening the penalty? Is there any entity to whom they could have passed that along to?

A. I don't know.

Q. You are reasonably familiar with Avatar, are you not, Avatar Holdings?

A. Yes.

Q. Could have have priced it out the door in any way, had they been found liable?

A. If the question is did they have customers, utility customers, that they could have gotten these expenses into rates, somehow or other, the answer is no.

Q. They are in the development business. Is that correct?

A. That is correct.

Q. Do you think, in an economic sense, they could have passed along either the penalty or the expenses to the purchaser of Holdings?

A. If you stay in business -- whether you are

selling houses, cars, whatever -- if you stay in business, you have to pass all your costs on through your business. If you can't, then you are not going to stay in business.

Q. Certainly. Are prices in that market price determined by what the other guys are charging or what your expenses are?

A. My perception is that that selling real estate is -- I'm not an expert in the area, but it's principally market-driven -- maybe not exclusively, but I think generally that's the case.

Q. This is not a market-driven scenario we are playing in here, or we are doing business in here, is it? The Commission offers the influence of a free marketplace, presumably, doesn't it?

A. Well, it's a monopoly, or at least a form of monopoly, yes.

Q. Yes. Did you participate in any way in the selection of Avatar counsel?

A. No.

Q. You testified on behalf of Avatar -- I asked you this before and I think you agreed with me, that you were presented as a witness in Avatar's direct case to avoid liability. Is that right?

A. I'm not sure that's the legal

characterization, but as I stated before, I was examined by both the Florida Cities' attorney on issues related to the Florida Cities' case, and I was examined by Mr. Hird or his associate on issues pertaining to the relationship between all of the affiliated companies. That would be between Avatar Utilities and Avatar Holdings, the relationship between Avatar Utilities and Florida Cities Water Company, and the relationship -- I think even Consolidated Water Company got involved -- all the relationships between those affiliated companies. And some of that examination related to decisions, you know -- how decisions were made. You have read the transcript, so you know.

Q. Yes, sir.

A. So there was some intermingling, but I was examined by both attorneys from that standpoint. I presume legally I could be characterized as a witness for both parties.

Q. Do you believe that the interest of Florida Cities Water Company and those of Avatar Holdings was identical, or was there the risk that they might be substantially different?

A. Are you asking my opinion as to the relative risk of Florida Cities being fined versus Avatar Holdings being fined?

Q. Yes, yes.

A. Well, it was -- again, a layman's opinion was that the risk to Florida Cities was greater, because the way I understood the law, the kind of relationships that had to exist in order for the parent company to be held liabile, I view those risks as less than the case of Florida Cities.

Q. What was, if any -- was there any difference in their opportunity to pass the costs along to their customers, between Avatar and Florida Cities Water Company?

A. Well, as I stated before, I think, obviously, Avatar Holdings or -- the only subsidiary that Avatar Holdings has that is a monopoly -- I guess is as close as you can get -- is, you know, a couple generations removed, but Poinciana Utilities and Florida Cities Water Company. So in that sense, you know, that was the only situation where there was a monopoly.

So in order for other subsidiaries of Avatar Holdings, whether it be Avatar Properties or whichever subsidiary, the only opportunity for them to recover their cost for anything, any expense they have, is through the pricing of the commodities services that they sell.

Q. On page 40 of your testimony, line 16, you

were talking about the expansion of the government's case, I think, from the original complaint, to the amended complaint, including all FCWC facilities. It would be more accurate to say all wastewater facilities, wouldn't it?

A. That is correct. It relates to wastewater facilities.

Q. Turning to page 46, line one, and you have to look back to page 45 to see what the answer was, there was a conclusion -- let me ask it this way.

At the top of page 46: Had FCWC not acted responsibly in this regard, customer rates would have undoubtedly been higher.

I wonder if you could run through the scenario and tell me how it would be that the rates would have been higher.

A. Well, I think, as I explained in the first part of the response -- going back to page 45 -- in dealing in regulatory issues, we were dealing with the the DEP, the EPA. And even when we're dealing with the Florida Department of Transportation and other -- not necessarily all regulatory agencies, but other governmental agencies -- we are really the only advocate for our customers, for a lot of reasons. Most of those decision-makers in those agencies, at least down at the

level where we deal with them, do not understand rate-making. They do not understand that if Florida Cities or Poinciana Utilities is required to build more facilities or a different type of facility or required to extend an outfall from the edge of the river to the center of the river simply for standardization, they don't understand that this all flows back to the rate-payers.

Now, it would be unfair for me to say that none of them were interested in that. It would be fair for me to say, however, that many of them are not interested in that, because if you bring that issue up during the deliberations on the different alternatives for solving a problem, and you bring up cost, generally the reaction is, well, too bad.

We do argue on behalf of options or alternatives that will have a lesser impact on rate-payers. If we didn't, there's no doubt in my mind, whatsoever, that our rates would be a lot higher. I firmly believe that.

So when we go before many of the regulatory agencies -- the DEP, EPA, which we don't deal much with the EPA at all -- we're the only advocate for our customers. I think that if a utility always did, without question, everything that was demanded or

suggested or requested, our rates would be a lot higher -- presuming that we were allowed to recover those costs, again.

Q. Sure.

A. So Mr. Jacobs suggested -- to give you an example, Mr. Jacobs, who is a trial attorney in this case -- suggested that in order to eliminate this discharge, we could have shut the system down and we could have moved all the customers out of Waterway Estates, all 2600 customers, which represents a population of probably six or seven thousand people. He said that was really simple; just shut it off and move everybody out.

So, you know, I think if Florida Cities, as well as other utilities, you know, don't take issue with some of the demands, our rates would be higher.

Q. Can you tell where Mr. Jacobs said that? Did it occur during the trial?

A. No. It occurred during a meeting, and I think there's a document that quotes that someplace, but he said that in a meeting sometime when I was present. Now, I don't remember specifically which meeting.

Q. But the gist of this testimony is, if you just knock down every time they want you to do something in environmental sales, customers' rates will be higher.

Right?

A. (Nodding affirmatively.)

Q. Is that the tack you took on the challenge to the marginal reserve rule?

A. I don't see any relationship between this issue and the margin reserve. How is that connected?

Q. Well, Florida Water -- what is the name of the trade association?

MR. GATLIN: Florida Waterworks Association.

BY MR. McLEAN:

Q. Florida Waterworks Association. Are you a member of that?

A. I am not. My company is.

Q. Didn't they sponsor some witnesses from these companies that don't know anything about economic regulation and so forth?

A. Sponsor witnesses? I think some of the proceedings, there were representatives of the DEP that spoke there on prudent planning, yes.

Q. And they were sponsored by your trade association. Correct?

A. I wouldn't say "sponsored." I'm not sure I understand what you mean by "sponsored." Sponsoring sounds like, I think, something different from -- the appeared and spoke on issues related to planning, wh

goes back to margin reserve. I mean the two are the same, or partly the same, at least.

Q. Look at page 47, line four. You deal generally with the notion here of the question of whether the Commission historically deems prudent passing on expenses in recovering the rates, and so forth. I want to test your understanding of that a little bit. What has been your experience with the Commission, if any, with their passing along this sort of legal fees, legal expenses?

A. I believe the Commission allowed the recovery in past cases of legal expenses associated with trials similar to this. Not on the same order of magnitude, of course.

Q. What cases similar to this?

A. I would have to defer to Mr. Gatlin. I have seen references to the case. I don't recall.

Q. This is your representation that it's historically been true. Right?

A. Yes, and it has, because I have read the cases that Mr. Gatlin has provided.

Q. How many cases did he provide?

A. I want to say two, but I'm not sure that's correct.

Q. One would be Lehigh, perhaps?

A. I just don't remember. It seems like Florida Water Services may have been one, I guess, which would be Lehigh, yes.

Q. You don't remember how much was at stake?

A. It was small.

Q. But you do remember a different magnitude from this one?

A. Yes.

Q. Do you remember whether the Commission made any inquiry into whether you were winners or losers? And I mean that in the sense of the number of claims versus number of claims on which you prevailed, and also in terms of the size of the fine asked for versus what was actually collected and paid.

A. I don't remember, you know, particular details regarding the deliberations that went into that. I remember reading the excerpt from the order, the rate orders.

Q. I see. But you can't say whether there were two or more than two?

A. I don't believe. But I'm not certain.

Q. The basis for this statement is, then, the two cases that Mr. Gatlin provided you?

A. Yes. Well --

MR. GATLIN: I think he said he thought there

was two, there might have been more, is what he said.

BY MR. McLEAN:

Q. However many, is this statement based on any experience with any cases outside those Mr. Gatlin provided to you, irrespective of how many there might have been?

A. In the State of Florida?

Q. Yes, sir.

A. No, I relied on Mr. Gatlin to render an opinion --

Q. Okay.

A. -- regarding the recovery of these legal expenses being consistent with the law, and consistent with Commission practice, and that's the basis for my statement.

Q. Sure. Now, back when you gave your deposition -- we talked about this briefly earlier, your deposition given November 13, 1995, and I think it was continued to a December date -- during the first day of that deposition, you mentioned that you thought it was highly doubtful -- let me be sure of your statement.

You were asked whether you had plans to include any plans in the rate base, and you said highly doubtful. You went on to explain. One of the things

you said in your explanation was, based on your past experience with the Commission, it would be unlikely to grant you some recovery of that. Is that fair?

A. Well, I rambled on there. I think if you read the last part of that, I think you will see I said I really didn't know. I was just speculating without knowing. Number one, I had not gotten Mr. Gatlin's opinion.

Q. Uh-hmm.

A. I had not consulted with him. And quite frankly, at that point in time, no one would give a lot of thought to recovery. That was in the -- that was about a year before the trial, I believe. It may have been before or after the amended complaint was filed and I don't recollect.

So there were a lot of circumstances that were uncertain, and I believe if you will read at the conclusion of my rambling response, I finally said, well, I really didn't know.

Q. You didn't know when were you were going to ask for it?

A. I didn't know when we were going to ask for it. I really didn't know -- I really had no basis for even responding to the question, quite frankly, because I hadn't really consulted with Mr. Gatlin, and I hadn't

really given it much thought.

Q. You said, just based upon my past experience with the Commission. What I would like to get at a little bit is what experience were you referring to?

A. I think I was referring to -- you know, I have had experience in nine states with regulatory Commissions, and all of them take a little different view of things. And I think that was the basis, you know -- relative to other Commissions.

Q. Okay. Do you see a conceptual difference between the penalty, on the one hand -- for which you do not seek recovery -- and the expenses incurred in fighting, if you will -- I hate to use that word because you are going to take exception to it -- but resisting the thrust of the government with respect to this whole thing? What is the conceptual difference between the penalty, on the one hand, and the expenses incurred in lessening the penalty, on the other?

A. Well, I think there's a significant difference. It's just like if someone filed a claim, whether it be in the form of a civil suit, claiming that we had damaged them or their property somehow. The easy way not to sustain legal expense is to give them whatever they want. But if they're wrong, if you're within your rights, I think you are obligated -- to your

customers, to your shareholders, to everyone else who has an interest -- to defend yourself regarding unreasonable claims -- however, whatever the form they may take.

Q. Why does that obligation run to the customers?

A. I think it is part of doing business. It's like a lot of other things that relate to doing business. I think it would be, number one -- I don't think there would be investor-owned utilities very long if, every time you were presented with a claim, you just paid off. If you didn't hire a lawyer, you didn't take into account what your rights are, you just simply paid off, there wouldn't be any of us around.

So I think that a utility company has a right to defend itself. I think that's a legitimate business expense. I think it's an expense that has to be sustained to stay in business, in particular in the environment we operate in today. We have claims all the time from claimants.

Sometimes we settle -- in particular, small claims -- because it's, you know, it's more reasonable to settle than it is to litigate. It would be more costly to litigate. So I think it's a matter of what your rights are and applying judgment, but certainly, I think it would be ridiculous to imply that simply

because you are a regulated business that you should not defend yourself, and that the expense of defending yourself against unreasonable claims is not a legitimate expense.

Q. Why did you not ask for the penalty? Why did you not ask to recover the penalty from the rate payers?

A. Well, I view the penalty -- and this is merely my view -- as -- and perhaps you could make a case for recovering it as a part of the cost of doing business -- but I think that would be a stretch.

Q. My question is, why did you not ask for it?

A. Because we felt it would be a stretch.

Q. You mentioned briefly -- when I asked about those cases that Mr. Gatlin mentioned to you, you mentioned briefly about your experiences in other states. Did you bring any specific case from those other states to the attention of the Commission in this case?

A. I correct myself, too. I said nine. It's seven.

Q. Okay.

A. I have no particular experience in recovery of legal expenses in a case like this. I do know I have had experience in other states where proven legal expenses are treated like any other expense, no

different than paying for the alum that is used to treat the water. I do not know of a challenge for legal expenses, recovery of legal expenses, in any rate case.

Q. Can you name any case in which they were sought, as they are in this case, adjunct to enforcement action by an agency with enforcement authority? For example, NRC, EPA. Is there any case you might testify about at hearing that is not shown in the case thus far?

A. Well, if you are asking me if I have known of a case of this order of magnitude, no, I have not. If you are asking me if I have known of cases where legal expenses have been recovered as a normal course of business expense because you had a lawyer to help you deal with the regulatory agency, I can say it happens all the time.

Q. Well, I want to know. I want to test that experience that you have, and this is my opportunity to learn about those things. So I'm asking you to tell me about those now with some measure of specificity so I can go read them and see if they say the same thing as you say they say. That is what discovery is for, I think.

So my question is, if you are going to rely on some other cases, would you tell me about those now, with enough specificity so I can go look at them?

A. I have no other cases that I can bring to you that says that Utility A was allowed to recover legal expenses because it got a notice of violation or a threat of violation from a regulatory agency and it took its lawyer up to the office of the regulator and you had a conference regarding this alleged violation and you recovered the legal expenses. To me, those legal expenses are the normal course of doing business.

I can't cite a case where Florida Cities or any company, other than those mentioned by Mr. Gatlin, where that's taken place. I think in all the utilities I have ever worked for, that was a cost of doing business. Just like if somebody files suit against us -- we hired a lawyer recently because a party had filed suit against us. To me, that's the normal course of doing business. The plaintiff was claiming that the company made an adjustment in a bill and that the adjustment was not adequate. And I don't see that -- I can't really see the difference.

Q. Did you win that case?

A. Well, I don't know. I mean it hasn't -- we hope to be able to settle it. We hope that it doesn't have to be litigated.

Q. And you are not suggesting it is anything even similar to this case in terms of materiality?

A. In terms of materiality, no, but in terms of principle, I think there are a lot of similarities.

Q. Sure. And some cases have a nuisance value, don't they, small claims against the company?

A. Absolutely.

Q. Costs you more to defend it?

A. As I mentioned earlier, in many cases of small claims, someone is -- if there is any legitimacy at all to the claim, and they are claiming $750 for some damage -- you don't just issue checks, but if it appears that their claim has legitimacy -- you settle with them, although you may think it is worth $300. But it's not prudent to hire a lawyer and go to court over those kinds of claims.

Q. With respect to the Hillsborough County matter, any particular reason why you decided to seek -- deal with the Commission aspects of this case before you went to Hillsborough County?

A. The only reason is because Hillsborough County has 1400 customers, or something like that, and I don't think it would have made much sense to go to Hillsborough County first.

Q. Do you more or less expect Hillsborough County to follow whatever the Commission does?

A. I don't know what to expect from them. I

can't speculate.

Q. During your testimony, live testimony in the federal case, there is mention by Mr. Baise of Chuck Hill. Do you know what Chuck Hill that is? Is that the one we are all familiar with, from the Public Service Commission?

A. Yes.

Q. What was the subject of his testimony?

A. He didn't testify.

Q. Was he deposed by the other side? Well, pardon me. Let me ask first. By whom was he sponsored, if you will forgive the term?

A. He was asked to testify on behalf of Florida Cities.

Q. Florida Cities?

A. Yes.

Q. But you don't know whether he was deposed by the other side?

A. Gee, I'm not sure. I don't think so, but I'm not sure.

Q. Do you recall what his anticipated topic of discussion was going to be?

A. Well, it was my understanding that he was to explain the rate-making process to the Court because the Department of Justice was viewing Florida Cities in the

same light that it would view a paper company from, you know, the financial benefits of deferring investments. You know, a paper company -- if Florida Cities were a paper company -- paper company owned Waterway Estates, then there would be significant economic benefits of delaying investing $5 million in a new plant facility. And there would be, you know, significant economic gain from doing that. And the Department of Justice would never accept the fact that a regulated utility doesn't -- there is no economic gain from deferring an investment, assuming you have the ability to make the investment. That's where your return comes, is from investments.

So our attorneys felt that if we had someone, you know, from the Commission who could explain that to the Court, that it would be beneficial in dispelling the misconception that the Department of Justice was presenting.

Q. Did the Court agree with you on that theory?

A. No, the Court really didn't totally agree. I believe, if you read the order, that it really didn't agree in that case. Now, Mr. Hill never testified.

Q. No, I understand.

A. I tried to do that myself, and I didn't -- apparently didn't have as compelling a story.

Q. The Court in fact was persuaded that deferring investment could be of economic benefit to the company as well.

A. I'm not sure we should characterize it that way. We could look at the order.

Q. It says what it says.

A. Well, yeah.

Q. So as far as you know, is this the first time that Florida Cities has made a request for legal fees which arise from resisting a regulatory authority?

A. From resisting a regulatory authority?

Q. Yes. I don't want to get caught up too much on the specific words. I could ask it about every regulatory agency there is, if you prefer. But what I'm looking for is, has Florida Cities ever requested fees such as this before?

A. Well, the expenses have been included in test year revenue requirements.

Q. Legal fees?

A. For legal fees, sure.

Q. Let me withdraw the question and ask it differently. Has EPA ever sought to fine Florida Cities Water on any occasion?

A. Yes.

Q. On what occasions have those been?

A. There have been, as I mentioned earlier today, there was a penalty assessment in the case of Carrollwood to settle the issues long before this litigation. Not long before, but a few years before. I believe it was $15,000.

Q. Okay. Did Florida Cities Water incur legal fees in association with that activity?

A. Yes.

Q. Were those recovered?

A. I can't say they were recovered. As far as I know, if they occurred during a test year, they would have been included, yes.

Q. You can't refer to any line item where that was the case?

A. No, I can't.

A. Our accounting people might, but I couldn't.

Q. Who would be the accounting people? Would that be Mr. Murphy?

A. Yes, but I know of no other case where we have asked, you know, on a stand-alone basis, like this case, to recover legal expenses.

Q. With respect to that Carrollwood case you just referred to, I take it that a penalty was assessed, a $15,000 penalty was assessed?

A. This was a negotiated -- there was some

negotiation involved, yes.

Q. A consent decree of sorts?

A. Yes, it was a consent agreement.

Q. Do you know whether Mr. Hill made any -- this case was tried in Tampa. Is that right?

A. Yes.

Q. Did Mr. Hill have to go to the hearing or to the trial itself?

A. Mr. Hill was -- there was some circumstance, I think an illness, and he never appeared.

Q. But he didn't have to come down -- he didn't see any part of the trial, so far as you know?

A. No, not to my knowledge. I never saw him there.

Q. Have you prepared a summary of your testimony as yet?

A. Of this testimony?

Q. Yes, sir.

A. No.

Q. It is customary for witnesses to give a summary of their testimony to the Commission.

A. Well, there is a summary at the beginning of the testimony. It's very brief, but on page three, it really characterizes the purpose of the testimony, at line 11.

Q. Do you plan to offer any summary to the Commission beyond what you have written here?

A. If Mr. Gatlin says I need to prepare one, I will follow his directions.

Q. Will you prepare one in writing?

A. If Mr. Gatlin says I need to prepare one in writing, I will do it.

Q. Will you give one to me, or what do I need to do to get one?

A. Speak to Mr. Gatlin.

MR. McLEAN: I get burned by these summaries sometimes. Thank you; that concludes my questions.

MS. GERVASI: Can we establish on the record a deadline for furnishing the Late-filed exhibits? How does a week from Monday sound, the 18th?

THE WITNESS: I don't think there is anything you have mentioned here that we can tell --

MR. GATLIN: We ought to have it all.

THE WITNESS: I think most of it we will have, because we have been through this a lot of times in the last few years. Sometimes some of it has gotten shuffled, but, Mike, I don't think there is any problem with anything that's been requested, is there?

MR. ACOSTA: No.

THE WITNESS: There is a question on a couple of documents, whether they exist.

MS. GERVASI: So just list it on your response as that. So the 18th would work?

THE WITNESS: I don't think there would be any problems.

MR. GATLIN: If there is any problem, we will let you know.

MS. GERVASI: And Mr. Gatlin, did you want to read and sign or waive that?

MR. GATLIN: We want to read and sign. And I have a question to ask, too.

MS. GERVASI: Okay.

MR. GATLIN: Are you finished?

MS. GERVASI: Go ahead, yes.

CROSS EXAMINATION

BY MR. GATLIN:

Q. Mr. Allen, there were some questions and testimony during the deposition relative to a possible protest to the EPA's intent to deny the permit. Do you recall that?

A. Yes.

Q. What would have changed or have been different, in your opinion, if Florida Cities had indeed filed such a protest?

A. Speculation to some extent on my part, but I believe that there wouldn't have been much difference at all. I don't think there would have been any difference in the outcome, because I believe had the company challenged the denial of the permit, that the EPA would have done basically the same thing they did. I think they would have acquiesced to the DER, which wanted the outfall moved out of the canal into the river and wanted the plant upgraded to meet AWT standards.

I don't believe that -- at least at the first stage of a challenge that would have been at the EPA administrative level -- I don't believe that anything would have changed that would have affected the outcome.

Now, what might have changed is the first administrative order that the EPA issued, which was in early 1987 after the permit was denied in December of '86. That first administrative order really just gave the company one option, and it said cease the discharge. Whereas the DEP offered -- and suggested an option in their recommendation to the EPA -- that either the discharge be terminated, or that the outfall be relocated to the six-foot contour line of the river, and the plant upgraded.

So I think the only change would have been that the administrative order would have laid out both

of those options on the front end. The EPA later issued the second administrative order, which did include upgrading the plant and relocating the outfall, but as far as the overall outcome is concerned, as to when things were completed and when the MPDES permit was issued, I don't think it would have made any difference at all.

Q. Would the facts still have been present -- regardless of whether the protest had been filed or not -- that were the basis for the DOJ's enforcement action?

A. Yes.

MR. GATLIN: That's all.

MS. GERVASI: That concludes this deposition.

(Whereupon, the deposition ended at 2:24 p.m.)

BAISE & MILLER, P.C.
815 Connecticut Avenue, N.W., Suite 620
Washington, D.C. 20006-4004
(202) 331-9100
Fax: (202) 331-9060

Professional Experience:

1995- **Partner, Baise & Miller, P.C.**

1992-1994 **Partner, Jenner & Block - Washington, D.C. Office**

1989-1991 **Corporate Officer and Vice President, External Affairs, Browning-Ferris Industries, Houston, Texas**
One of seven senior Corporate Officers assisting the Chief Executive Officer in running a 26,000-employee, Fortune 200 company engaged in solid and hazardous waste disposal and treatment; responsible for addressing the Corporation's potential criminal liabilities.

1974-1989 **Founder and Partner, Beveridge & Diamond, P.C.**
Founded law firm specializing in environmental matters with William D. Ruckelshaus, former Administrator of the U.S. Environmental Protection Agency; responsible for developing and representing a major share of the firm's industrial, commercial, municipal clients in civil and regulatory counseling and litigation, including municipal port authorities, housing and commercial developers, shipbuilders, and the pulp and paper, pharmaceutical, steel, farm and construction equipment, and chemical industries.

1973-1974 **Acting Deputy Attorney General, United States Department of Justice**
Succeeded William D. Ruckelshaus after his resignation from Richard M. Nixon's Administration in 1973; responsible for budgetary issues, judicial selection process for U.S. federal district and appellate courts, and supervising the Offices of the U.S. Marshals and the Immigration and Naturalization Service.

1973 **Associate Deputy Attorney General, United States Department of Justice**
Worked with Deputy Attorney General William D. Ruckelshaus.

1973 **Executive Assistant to the Acting Director of the Federal Bureau of Investigation**
Worked directly under William D. Ruckelshaus, Acting Director of the Federal Bureau of Investigation.

1972-1973 **Director of the Office of Legislation, U.S. Environmental Protection Agency**
Worked on obtaining passage of the Administration's major legislative initiatives resulting in new laws for regulating water pollution, noise pollution, and pesticides.

1970-1972 **Assistant to the Administrator, U.S. Environmental Protection Agency**
First Chief of Staff to the first EPA Administrator; responsible for helping set up and establish the operations of the Office of the EPA Administrator and the new EPA.

1969-1970 **Trial Attorney and Special Assistant in the Civil Division, United States Department of Justice**
Conducted trials for the U.S. Department of Agriculture, U.S. Army Corps of Engineers, and the Department of Health, Education, and Welfare.

UNITED STATES DISTRICT COURT
MIDDLE DISTRICT OF FLORIDA
FORT MYERS DIVISION

UNITED STATES OF AMERICA
Plaintiff(s)

V.

CASE NO. 93-281-CIV-FTM-21(D)

FLORIDA CITIES WATER COMPANY, INC.

Defendant(s)

STATUS ORDER AND DIRECTING ANSWERS TO STANDARD INTERROGATORIES AND PLAINTIFF TO REPORT

It is the practice and policy of the Court, at an early date after an action is filed, pursuant to Fed.R.Civ.P. 16(b), to establish periods of time to: (1) complete discovery; (2) join other parties and amend pleadings; (3) file motions; and (4) schedule a preliminary and/or final pretrial conference and trial. Accordingly, it is ORDERED that:

1. The plaintiff(s) -- or, in removal cases, the defendant(s) -- shall serve a copy of this Order upon all other parties within seven (7) days from the date of the filing of an appearance by the defendant(s) -- or, in removal cases, within seven (7) days from the filing of the notice of removal -- and shall immediately thereupon file herein a certificate of service that such parties have been served with a copy of this Order.

2. Not later than thirty (30) days from the date of filing of the complaint -- or, in removal cases, not later than thirty (30) days from the filing of the notice of removal -- each plaintiff or his attorney shall fully answer, in writing, the following standard interrogatories[1] -- file the original with the Clerk of the Court and serve a copy of such answers upon the defendant(s) within five (5) days after the defendant's appearance in the case -- or, in removal cases, simultaneous with the filing of the answers:

> Plaintiff's Interrogatory #1: Set forth in one paragraph a brief statement of the nature of the case. The type of statement sought is one which could be used in preliminarily explaining the case to prospective jurors. (NOTE: This statement shall be completed regardless of whether the case is to be ultimately tried to a jury or to the Court.)
>
> Plaintiff's Interrogatory #2: Describe the basis of federal jurisdiction. In addition, describe all laws, acts having the force and effect of law, codes, regulations and legal principles, standards and customs or usages which plaintiff contends are applicable to the instant action.
>
> Plaintiff's Interrogatory #3: State the full name, address and telephone number of all persons or legal entities who have a subrogation interest in the instant action, and state the basis and extent of each subrogation interest.
>
> Plaintiff's Interrogatory #4: Outline in detail the discovery anticipated by the plaintiff(s), including the number and type of depositions anticipated to be taken by the plaintiff.

---

[1] In a removal action, once the plaintiff(s) is/are served with a copy of this Order by defendant(s) pursuant to ¶ 1 hereof, the case reverts to the original format for compliance with this Order -- specifically, original plaintiff(s) shall comply with the timetable set forth in ¶ 2 for the filing of plaintiff's answers to interrogatories and the defendant(s) shall then comply with ¶ 3 for such answers to interrogatories, with the plaintiff(s) filing responses to the joint interrogatories required by ¶ 4.

Plaintiff's Interrogatory #5: Describe the nature of any dispositive motion(s) which the plaintiff anticipates filing.

3. Within thirty (30) days after service of plaintiff(s)'s answers to the above interrogatories, or within thirty (30) days after the defendant's appearance in the case (by filing an answer, motion or otherwise), whichever is later, each defendant or his attorney shall fully answer, in writing, the following standard interrogatories, and shall serve a copy of the answers upon every other party and file the original with the Clerk of the Court.

Defendant's Interrogatory #1: State whether you agree with the plaintiff's statement of the nature of the case as set forth in response to Plaintiff's Interrogatory #1. If not, the defendant shall separately state a brief statement of the nature of the case as required in Plaintiff's Interrogatory #1.

Defendant's Interrogatory #2: State whether defendant is properly identified; if not, give the proper identification and state whether you will accept service of an amended complaint reflecting proper identification.

Defendant's Interrogatory #3: Describe all laws, acts having the force and effect of law, codes, regulations and legal principles, standards and customs or usages which defendant contends are applicable to this action.

Defendant's Interrogatory #4: State, to the best of your knowledge, whether all parties whom you contend should be joined have been joined or, if you contend that some other person or legal entity is, in whole or in part, liable to the plaintiff or defendant in this matter, state their names, addresses and telephone numbers, and describe the basis of their alleged liability.

Defendant's Interrogatory #5: Outline in detail the discovery anticipated by the defendant(s), including the number and type of depositions anticipated to be taken by the defendant(s).

Defendant's Interrogatory #6: Describe the nature of any dispositive motion(s) which the defendant anticipates filing.

4. Within ten (10) days from the filing of defendant(s)'s answers to the above interrogatories, the attorneys for all parties, and any unrepresented party, are directed to confer (plaintiff being responsible for initiating such conference), and plaintiff shall fully answer, in writing, the following joint standard interrogatories, shall serve a copy of the answers upon every other party and file the original with the Clerk of the Court:

Joint Interrogatory #1: Estimate the time required to complete all discovery.

Joint Interrogatory #2: Estimate the time required for trial (including jury selection if trial by jury). Specify whether trial is to be by jury or non-jury.

Joint Interrogatory #3: Have the parties engaged in settlement negotiations? Do the parties intend to engage in further settlement negotiations? What is the probability of settlement?

Joint Interrogatory #4: Possibility of parties consenting to trial presided over by the United States Magistrate Judge pursuant to Rule 6.05, M.D.Fla. Rules. (See attachment). The Magistrate Judge assigned to this case is Honorable George T. Swartz.

Joint Interrogatory #5: Possibility of parties consenting to binding arbitration pursuant to Rules 8.02(a)(3) and 8.05(b), M.D.Fla. Rules.

Joint Interrogatory #6: State whether the parties desire a Rule 16 preliminary pretrial conference. If so, state the reasons why you believe such is necessary or desirable and set forth the specific agenda items you believe should be included. (NOTE: If the Court determines that a preliminary pretrial conference is not necessary, it is the Court's intention to enter a scheduling order which will include, among other things, the scheduling of trial and a final pretrial conference under Fed.R.Civ.P. 16(d). Such scheduling order will be based upon the answers to the above interrogatories. The parties must fully and completely answer all of the above interrogatories, regardless of whether the Court determines to schedule a preliminary pretrial conference.)

5. The parties are directed to comply with the requirements of this Order regardless of whether this case has been, or will be, referred for arbitration and regardless of whether motions are filed and outstanding (e.g., motion to dismiss, etc.).

6. In accordance with Fed.R.Civ.P. 16(f), plaintiff's failure to comply with the requirements of this Order may result in the dismissal of the instant action; defendant's failure to so comply may result in a default judgment for the plaintiff.[3]

DONE AND ORDERED, at Ft. Myers, Florida, this 1st day of October 1993.

RALPH W. NIMMONS, JR.

RALPH W. NIMMONS, JR.
United States District Judge

Copies to: Counsel of record
Pro se party, if applicable
John Gay, Courtroom Deputy Clerk
Judy Wauford, Courtroom Deputy Clerk

[3] This Order affords counsel and the parties the opportunity to furnish to the Court information relevant to the scheduling of an appropriate trial date. However, if the answers to the foregoing interrogatories are not filed in a timely manner, this case may be scheduled for trial as the Court deems appropriate, and a party subsequently moving for relief from the deadlines established by the Court in its Scheduling Order will carry a heavy burden.

UNITED STATES OF AMERICA, Plaintiff, v. FLORIDA CITIES WATER COMPANY, INC., Defendant.	CIVIL ACTION NO. 93-281-CIV-FTM-21

UNITED STATES' ANSWERS TO COURT'S STANDARD INTERROGATORIES

Plaintiff's Interrogatory #1: Set forth in one paragraph a brief statement of the nature of the case. The type of statement sought is one which could be used in preliminarily explaining the case to prospective jurors.

ANSWER:

Florida Cities Water Company, Inc. ("Defendant") owns and operates a privately-owned wastewater treatment plant located in North Fort Myers, Lee County, Florida. The plant collects and treats wastewater from residential and commercial sources and then discharges those wastewaters into the Caloosahatchee River. The wastewater discharges contain pollutants which may not be discharged into the River except in compliance with the limitations and conditions of a National Pollutant Discharge Elimination System (NPDES) permit issued by the Environmental Protection Agency (EPA). Defendant violated the Clean Water Act by: (1) discharging pollutants into the River without a NPDES permit from October 1, 1988 to October 31, 1989; (2) discharging pollutants into a tributary canal, an unpermitted discharge

point, from November 1, 1989 to July 14, 1991; and (3) discharging pollutants in excess of permit limits from July 1991 to June 1992.

Plaintiff's Interrogatory #2. Describe the basis of federal jurisdiction. In addition, describe the laws, acts having the force and effect of law, codes, regulations and legal principles, standards and customs or usages which plaintiff contends are applicable to the instant action.

ANSWER:

This Court has jurisdiction over the subject matter of this action under 28 U.S.C. §§ 1331, 1345, and 1355, and section 309(b) of the Act, 33 U.S.C. § 1319(b). The central law applicable to this action is the Clean Water Act, 33 U.S.C. § 1251 et seq. Of particular significance are the following sections of the Act: 301, 309(b), 309(d), 402, 502(5), 502(7), 502(12), and 502(14); 33 U.S.C. §§ 1311, 1319(b) and (d), 1342, 1362(5), (7), (12), and (14). Also applicable is 40 C.F.R. Part 122.

Plaintiff's Interrogatory #3. State the full name, address and telephone number of all persons or legal entities who have a subrogation interest in the instant action, and state the basis and extent of each subrogation interest.

ANSWER:

None.

Plaintiff's Interrogatory #4. Outline in detail the discovery anticipated by the plaintiff(s), including the number and type of depositions anticipated to be taken by the plaintiff.

ANSWER:

The United States is presently engaged in "informal" discovery with the defendant, and has agreed to endeavor to make available certain documents at the earliest practicable time without the necessity of a formal document request. The United States has also proposed an exchange of "core information." Core information will include disclosure of the names and addresses of people having information that is relevant to the proffered claims and defenses, and the location of documents most relevant to the case.

The United States anticipates that following an initial period of informal discovery, it will commence formal discovery, to include interrogatories, document requests, oral depositions, and admission requests. The number of depositions has yet to be determined, but will likely be a function in part of the nature of the core information disclosed.

Plaintiff's Interrogatory #5. Describe the nature of any dispositive motion(s) which the plaintiff anticipates filing.

ANSWER:

Plaintiff anticipates filing a Motion for Summary Judgment.

Respectfully submitted,

LOIS J. SCHIFFER
Acting Assistant Attorney General
Environment and Natural Resources
Division
U.S. Department of Justice

DEFENDANT FLORIDA CITIES WATER COMPANY'S ANSWERS TO COURT'S STANDARD INTERROGATORIES

Pursuant to the Court's October 1, 1993 Status Order directing answers to standard interrogatories, Defendant Florida Cities Water Company ("FCWC") hereby submits its answers.

Defendant's Interrogatory #1: State whether you agree with the plaintiff's statement of the nature of the case as set forth in response to Plaintiff's Interrogatory #1. If not, the defendant shall separately state a brief statement of the nature of the case as required in Plaintiff's Interrogatory #1.

ANSWER:

FCWC agrees with the United States' ("Plaintiff's") factual statements about the nature of its operations.

FCWC does not agree that it has committed any violations of the Clean Water Act, 33 U.S.C. § 1251 et seq., as alleged by Plaintiff. The crux of this litigation is the U.S. Environmental Protection Agency's improper denial on December 8, 1986 of FCWC's application to renew its NPDES permit. FCWC

believes that this case involves complex legal and factual matters, some arising more than a decade ago, including, but not limited to, Clean Water Act permitting, permitting pursuant to state law, the interplay between Federal and state regulation under the Clean Water Act, and analogous state laws, and the enforcement of such laws. As a result, FCWC intends to defend each of Plaintiffs' allegations vigorously. FCWC intends to rely heavily on discovery to support its defenses in this action.

Defendant's Interrogatory #2: State whether defendant is properly identified; if not, give the proper identification and state whether you will accept service of an amended complaint reflecting proper identification.

ANSWER:

Florida Cities Water Company is incorrectly identified in Plaintiff's complaint as "Florida Cities Water Company, Inc." Defendant waives service of an amended complaint for the purposes of properly identifying FCWC, but would request that all future captions reflect FCWC's correct name.

Defendant's Interrogatory #3: Describe all laws, acts having the force and effect of law, codes, regulations and legal principles, standards and customs or usages which defendant contends are applicable to this action.

ANSWER:

The central law applicable to this action is the Clean Water Act, 33 U.S.C. § 1251 et seq., and the regulations promulgated pursuant thereto, in particular 40 C.F.R. § 122 ff. Also applicable are state water laws and corresponding regulations. With respect to legal principles, standards and customs or usages, FCWC hereby incorporates its answer to the Plaintiff's complaint, which sets forth, inter alia, affirmative defenses to Plaintiff's claim.

Defendant's Interrogatory #4: State, to the best of your knowledge, whether all parties whom you contend should be joined have been joined or, if you contend that some other person or legal entity is, in whole or in part, liable to the plaintiff in this matter, state their names, addresses and telephone numbers, and describe the basis of their alleged liability.

ANSWER:

None.

Defendant's Interrogatory #5: Outline in detail the discovery anticipated by the defendant(s), including the number and type of depositions anticipated to be taken by the defendant(s).

ANSWER:

FCWC anticipates a two-pronged initial phase of discovery, consisting of (1) mutual disclosure of (a) the names and addresses of people having information that is relevant to the proffered claims and defenses, and (b) the location of documents most relevant to the case, and (2) exchange of documents pursuant to document requests. The first prong of this initial phase of discovery has already occurred, and the second prong is underway. Upon completion of this initial phase of discovery, FCWC will be in a position to identify with greater specificity the number and type of depositions it will need to take.

Presently, FCWC anticipates the need to take 15 depositions because of the number of individuals who have been involved in the regulation of and enforcement against the FCWC facility, including personnel at the U.S. Environmental Protection Agency, the Florida Department of Environmental Protection, and local jurisdictions, and former employees of FCWC. In

addition, while neither FCWC nor Plaintiff has identified any experts in this matter, FCWC anticipates the need to depose any experts Plaintiff identifies in the future.

FCWC also anticipates the need to conduct additional written discovery, including interrogatories and requests for admissions.

FCWC's preferences for scheduling of discovery matters were set forth in the Parties' Answers to Court's Joint Standard Interrogatories and Joint Report of Parties' Planning Meeting Pursuant to Fed. R. Civ. P. 26(f).

Defendant's Interrogatory #6: Describe the nature of any dispositive motion(s) which the defendant anticipates filing.

ANSWER:

FCWC anticipates filing a Motion for Summary Judgment with respect to one or more issues raised in Plaintiff's complaint.

FLORIDA CITIES WATER COMPANY, INC., Defendant.	)	

MEMORANDUM IN SUPPORT OF MOTION FOR EXTENSION OF TIME IN WHICH TO FILE MOTION TO STRIKE AFFIRMATIVE DEFENSES

This action was filed on October 1, 1993. With the consent of the United States to an extension of time, the defendant served its Answer to the Complaint on November 22, 1993, asserting some ten affirmative defenses to the instant action. Pursuant to Federal Rules of Civil Procedure 6(a) and (e) and 12(f), any Motion to Strike these affirmative defenses must be filed on or before December 16, 1993, which time has not passed.

The undersigned is lead counsel for the United States in this action. He is also lead counsel for the United States in another matter in the United States District Court for the Southern District of Florida, which matter was set for trial during the trial period beginning December 13, 1993. Final judgment was entered in that matter on December 10, 1993. The undersigned is also on leave on 40% of the business days in January 1994 to teach a course. Due to the aforementioned conflicting obligations, the United States requests an extension of time until February 4, 1994, for the purposes of filing any

Motion to Strike Affirmative Defenses in the above-captioned matter.

UNITED STATES OF AMERICA, Plaintiff, v. FLORIDA CITIES WATER COMPANY, INC., Defendant.	)	CIVIL ACTION NO. 93-281-CIV-FTM-21

MEMORANDUM IN SUPPORT OF UNITED STATES' MOTION TO STRIKE AFFIRMATIVE DEFENSES

I. Introduction and Background

This is a civil action brought pursuant to section 309(b) of the Clean Water Act ("the Act"), 33 U.S.C. § 1319(b), for civil penalties for violations of section 301 of the Act, 33 U.S.C. § 1311, and of the conditions and limitations of a National Pollutant Discharge Elimination System ("NPDES") permit issued by EPA pursuant to section 402 of the Act, 33 U.S.C. § 1342. Suit was filed on October 1, 1993. Florida Cities Water Company, Inc. ("Defendant" or "FCWC") owns and operates the Waterway Estates Wastewater Treatment Plant located in North Fort Myers, Lee County, Florida. The plant collects and treats wastewater from residential and commercial sources and then discharges those wastewaters into the Caloosahatchee River. The wastewater discharges contain pollutants which may not be discharged into the River except in compliance with the limitations and conditions of a National Pollutant Discharge Elimination System (NPDES) permit issued by the U.S. Environmental Protection Agency

(EPA). The United States alleges that defendant violated the Act by: (1) discharging pollutants into the River without a NPDES permit from October 1, 1988 to October 31, 1989; (2) discharging pollutants into a tributary canal, an unpermitted discharge point, from November 1, 1989 to July 14, 1991; and (3) discharging pollutants in excess of permit limits from July 1991 to June 1992.

Defendant filed an Answer on November 22, 1993 in which it asserted ten affirmative defenses.[1] In order to narrow the issues in this litigation and avoid unnecessary expenditures of time and resources, pursuant to Rule 12(f), Fed. R. Civ. P., the United States moves to strike all of these defenses.[2] As demonstrated below, these defenses should be stricken as a matter of law.

---

[1] Defendant has failed to give even the slightest hint of a factual or legal predicate for most of its affirmative defenses. Particularly in view of the case law discussed below, query whether all of the defenses were asserted after reasonable inquiry as to whether they were well grounded in fact and warranted by existing law or a good faith argument for the extension, modification, or reversal of existing law, and not interposed for any improper purpose, such as to harass or to cause unnecessary delay or needless increase in the cost of litigation. See Rule 11, Fed. R. Civ. P. In accordance with Local Rule 3.01(g), the United States requested that the defendant reconsider its affirmative defenses. The defendant has declined to withdraw any of them.

[2] Pursuant to the Court's Order of December 22, 1993, the time for filing the instant motion was extended until February 4, 1994.

II. All of Defendant's Affirmative Defenses Should Be Stricken As a Matter of Law

A. Standard of Review

Under Rule 12(f) of the Federal Rules of Civil Procedure, a court may order stricken from the pleading "any insufficient defense or any redundant, immaterial, impertinent or scandalous matter." "An affirmative defense is not valid if it appears to a certainty that the plaintiff would succeed despite any set of facts which could be proved in support of the defense....What constitutes an insufficient defense depends upon the nature of the claim for relief and the defense in question." EEOC v. First National Bank of Jackson, 614 F.2d 1004, 1008 (5th Cir. 1980) [citations omitted].

The standard applicable to motions to strike affirmative defenses was clearly set out by this court in Anchor Hocking Corp. v. Jacksonville Electric Authority, 419 F. Supp. 992 (M.D. Fla. 1976):

> While the Court has broad discretion in disposing of motions to strike, they are granted only where clearly warranted. The standard that must be met is undisputed: only if a defense is insufficient as a matter of law will it be stricken. A defense is insufficient as a matter of law if, on the face of the pleadings, it is patently frivolous, or if it is clearly invalid as a matter of law; in such cases, the determination should be made, and the defenses stricken, in order to avoid unnecessary time and money in litigating invalid, spurious issues.

Id. at 1000 [citations omitted].[3]

---

[3] But see Royal Palm Savings Ass'n v. Pine Trace Corp., 716 F. Supp. 1416, 1420 (M.D. Fla. 1989) ("An affirmative defense should not be stricken where the defense presents a bona fide question of fact.")

A Rule 12(f) motion to strike defenses is particularly appropriate in this case. Defendant unnecessarily muddles an already potentially complex case by raising frivolous and invalid defenses. Striking these will allow the Court and the parties to "avoid unnecessary time and money in litigating invalid, spurious issues." Id.

B. Defendant's Affirmative Defenses

1. Failure to State a Claim

Defendant asserts in its first affirmative defense that the complaint fails to state a claim upon which relief can be granted. This defense is insufficient as a matter of law.

Rule 8(a) of the Federal Rules of Civil Procedure "merely requires that a complaint contain 'a short and plain statement of the claim showing that the pleader is entitled to relief,...'" Hercules, Inc. v. Pages, 814 F. Supp. 79, 80 (M.D. Fla. 1993). A claim for relief meets this requirement if the claim "give[s] the defendant fair notice of what the plaintiff's claim is and the grounds upon which it rests." Conley v. Gibson, 355 U.S. 41, 47 (1957). Thus, the defense of failure to state a claim cannot succeed "unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief." Id. at 45-46.

In its Complaint, the United States has alleged all the requisite elements for liability under the Act for the violations alleged. The United States has alleged that defendant is a "person" within the meaning of the Act; that it has been

"discharging" "pollutants" into a "navigable water" from a "point source," as those terms are defined in the Act; and that these discharges were in violation of the Act and/or the terms and conditions of defendant's NPDES permit. Thus, the United States clearly has stated a claim under the Act upon which relief can be granted, and defendant's first affirmative defense must be stricken.

2. Denial of Permit in 1986

Defendant asserts in its second affirmative defense that the United States' claims are barred because "FCWC's application for renewal of the Permit was improperly denied by EPA in 1986." Answer at 14.

This affirmative defense would appear to relate to the United States' First Claim for Relief -- discharging without a permit. Presumably, under this affirmative defense, defendant would show that it would have had a valid permit during the period referenced in the First Claim were its application not "improperly denied" in 1986.

Assuming, arguendo, that the application in question had been improperly denied in 1986, however, defendant seeks relief in the wrong court at the wrong time. At the time, under section 509(b)(1) of the Act, 33 U.S.C. § 1369(b)(1) (1986), defendant had ninety (90) days from the date of the EPA Administrator's action to challenge the denial of the permit in the United States

Court of Appeals.[4] Having failed to challenge the denial, defendant is now precluded from doing so by section 509(b)(2) of the Act, 33 U.S.C. § 1369(b)(2).[5] See Middlesex County Sewerage Authority v. National Sea Clammers Association, 453 U.S. 1, 14 (1981) ("Where review could have been obtained under this provision, the action at issue may not be challenged in any subsequent civil or criminal proceeding for enforcement. § 1369(b)(2)."); Champion International v. U.S. Environmental Protection Agency, 850 F.2d 182, 188 (4th Cir. 1988); Connecticut Fund for the Environment v. Job Plating Co., 623 F. Supp. 207,

---

[4] Section 509(b)(1) at the time provided in pertinent part as follows:

> Review of the Administrator's action...in issuing or denying any permit under section 1342 of this title... may be had by any interested person in the Circuit Court of Appeals of the United States for the Federal judicial district in which such person resides or transacts such business is upon application by such person. Any such application shall be made within ninety days from the date of such determination, approval, promulgation, issuance or denial, or after such date only if such application is based solely on grounds which arose after such ninetieth day.

33 U.S.C. § 1369(b)(1) (1986). The present statute allows 120 days for appeal.

[5] Section 509(b)(2) provides as follows:

> Action of the Administrator with respect to which review could have been obtained under paragraph (1) of this subsection shall not be subject to judicial review in any civil or criminal proceeding for enforcement.

33 U.S.C. § 1369(b)(2).

216-17 (D. Conn. 1985); United States v. Velsicol Chemical Corp., 438 F. Supp. 945, 949 (W.D. Tenn. 1976).

Defendant failed to avail itself of the opportunity to seek judicial review of EPA's permit denial. It cannot now be allowed to circumvent the law by challenging the denial in the context of a civil enforcement proceeding, directly contrary to section 509(b)(2) and the case law construing it. Accordingly, defendant's second affirmative defense is clearly invalid as a matter of law and must be stricken.

3. Payment of penalties to the State of Florida

Defendant's third affirmative defense is premised on the notion that it has already paid penalties assessed by the State of Florida "under comparable Florida law." Answer at 14.

While the Answer is silent both as to the legal and factual basis for this defense, the United States assumes that defendant intends it to arise under section 309(g)(6) of the Act, 33 U.S.C. § 1319(g)(6), which provides, inter alia, that violations which have been the subject of a final administrative State order and penalty under comparable State law shall not be the subject of a federal civil judicial penalty action. The United States understands that this defendant has indeed been cited numerous times by state and local officials for state and local environmental violations at its Waterway Estates and other of its Florida plants.[6] The particular violations of federal law

[6] An administrative Consent Order before the Florida Department of Environmental Regulation ("FDER") (now the Florida Department of Environmental Protection ("FDEP")), OGC Case No.

alleged in the United States' Complaint in this action, however, have never been the subject of a state administrative order or penalties. Nor could they have been, since, during the periods of time during which the federal violations are alleged to have occurred (1988-1992) Florida was not even authorized to administer the Clean Water Act.[7] Accordingly, this affirmative defense is frivolous and must be stricken.

4. Impossibility

Defendant's fourth affirmative defense is impossibility. Impossibility, however, simply is not a defense to a Clean Water Act action. In United States v. City of Hoboken, 675 F. Supp. 189 (D.N.J. 1987), the Court held as follows:

> First, I find that impossibility is not, as a matter of law, a valid defense to Clean Water Act liability. As the Natus case[8] points out, impossibility is a defense recognized in the law of contracts, where obligations are grounded on a party's prior expressions of intent to be obligated. The Clean Water Act does not, however, deal in contractual obligations. The Act imposes duties unilaterally, as in the law of torts, and without regard for parties' intention. Specifically, the Act creates a scheme of strict liability for exceeding effluent limitations. Thus, it is simply the case that if a party is a permit holder, the Act makes that party liable whenever the party

---

88-0384, settled the State's allegations regarding a major upset of the facility in 1987 which resulted in a number of state permit violations. A subsequent FDER Consent Order, OGC Case No. 90-1747, settled violations of the earlier Order's requirements relating to the construction and certification, under Florida rules and statutes, of its wastewater treatment plant.

[7] Moreover, at no relevant time and in no relevant way were the Florida laws enforced by the State "comparable" to the federal Clean Water Act.

[8] Natus Corp. v. United States, 178 Ct.Cl. 1, 371 F.2d 450 (1967).

> discharges effluent that violates its permit. Excuses are irrelevant; under the Act the party must either achieve the discharge levels it has been allowed, or pay the consequences of its discharge, or stop discharging.

Id. at 198 [citations omitted]. Accordingly, this affirmative defense is also invalid and must be stricken.

5. Estoppel

Defendant's fifth affirmative defense is estoppel. However, estoppel can neither be applied against the United States when acting in its sovereign capacity, Alacare Home Health Services, Inc. v. Sullivan, 891 F.2d 850, 855 (11th Cir. 1990), nor serve as the "means of successfully avoiding the requirements of legislation enacted for the protection of a public interest." Scott Paper Co. v. Marcalus Manufacturing Co., Inc., 326 U.S. 249, 257 (1945). While, as the Eleventh Circuit recently observed, the Supreme Court has not resolved the issue of whether estoppel may ever be applied against the United States, Ferry v. Hayden, 954 F.2d 658, 661 (11th Cir. 1992), citing Heckler v. Community Health Services of Crawford County, Inc., 467 U.S. 51, 61 (1984), the Supreme Court itself noted in Office of Personnel Management v. Richmond, 496 U.S. 414, 422 (1990), that it has "reversed every finding of estoppel [against the federal government] that we have reviewed." See Ferry v. Hayden, 954 F.2d at 661 n.5.

Moreover, there is Eleventh Circuit law directly on point. In Deltona Corp. v. Alexander, 682 F.2d 888 (11th Cir. 1982), appellant challenged the Army Corp of Engineers' denial of a

permit under the Clean Water Act. The Eleventh Circuit upheld this Court's grant of summary judgment to the United States, relying on earlier binding Fifth Circuit precedents to the effect that estoppel cannot be asserted against the United States in actions arising out of the exercise of its sovereign powers. The Eleventh Circuit held that the act of granting a permit under the Act "is unquestionably an exercise of the government's sovereign power to protect the public interest. In fact, the entire rationale behind the § 404 permit is to insure that the public interest in environmental safety and quality is preserved." Id. at 892. See also United States v. City of Menominee, 727 F. Supp. 1110, 1121 (W.D. Mich. 1989) ("No doubt exists that USEPA exercises sovereign rather than proprietary powers when enforcing the CWA.") Thus, since estoppel is an invalid defense to this action, defendant's fifth affirmative defense must be stricken.

6. Waiver

Defendant's fourth affirmative defense is waiver. Waiver, however, also is not a defense to a Clean Water Act action. In United States v. City of Menominee, 727 F. Supp. 1110 (W.D. Mich. 1989), as here, a Clean Water Act civil enforcement action brought under section 309, 33 U.S.C. § 1319, the court held that "the CWA's enforcement provisions do not mention waiver, 33 U.S.C. § 1319, and this court will not recognize waiver by implication." Id. at 1121. Similarly, in United States v. Amoco Oil Co., 580 F. Supp. 1042 (W.D. Mo. 1984), the court held that in the context of a civil enforcement action brought under

section 309(d), the defense of waiver could not be asserted against the government "since generally speaking public officers have no power or authority to waive the enforcement of the law on behalf of the public." Id. at 1050. Accordingly, this affirmative defense is also invalid and must be stricken.

7. Statute of limitations

Defendant asserts in its seventh affirmative defense that the United States' claims "are barred by the applicable statute of limitations." The Answer is silent as to which statute defendant considers "applicable," and the Clean Water Act does not actually contain a statute of limitations. While the United States is unprepared to concede that **any** statute of limitations necessarily applies in section 309 actions, see SPIRG v. New Jersey Central Power and Lights, Inc., 642 F. Supp. 103, 107-08 (D.N.J. 1986), arguably the applicable statute would be the five-year statute of limitation found in 28 U.S.C. § 2462.[9] Because the United States only seeks penalties for violations for a five-year period preceding the date on which its Complaint was filed, none of its claims could possibly be barred by this statute of

---

[9] 28 U.S.C. § 2462 provides as follows:

> Except as otherwise provided by Act of Congress, an action, suit or proceeding for the enforcement of any civil fine, penalty or forfeiture, pecuniary or otherwise, shall not be entertained unless commenced within five (5) years from the date when the claim first accrued if, within the same period, the offender or the property is found within the United States in order that proper service may be made thereon.

limitations, assuming it were applicable. Hence, defendant's seventh affirmative defense is frivolous and should be stricken.

8. Laches

Defendant's eighth affirmative defense is laches. The United States will show that under prevailing and applicable case law, it is not subject to laches.

The rule that the government is exempt from the consequences of its laches -- nullum tempus occurrit regi[10] -- evolved from English common law[11] and continues to have a solid foundation in this country, this Circuit, and this Court. The Supreme Court has consistently held that laches is no defense to a suit to enforce a public right or protect a public interest. United States v. Summerlin, 310 U.S. 414, 416; United States v. California, 332 U.S. 19, 39-40, (1947); Utah Power and Light Co. v. United States, 243 U.S. 389, 409 (1917). Relying on Supreme Court precedent, the Fifth Circuit Court of Appeals, in reversing the Northern District of Alabama in a "textbook case of laches," held "that defense cannot be asserted against the United States in its sovereign capacity to enforce a public right or to protest

---

[10] "Time does not run against the King."

[11] "The rule that the government is exempt from the consequences of its laches and from the operation of statutes of limitations -- nullum tempus occurrit regi -- had its genesis in English common law notions of prerogative of the Crown. The principle is well established in this country, but based upon the important public policy of preserving public rights and revenues from the negligence of public officers. Guaranty Trust Co. v. United States, 304 U.S. 125, 132-33, 58 S.Ct 785, 82 L.Ed. 1224 (1938)." United States v. Weintraub, 613 F.2d 612, 618 (6th Cir. 1979).

the public interest." United States v. Arrow Transportation Co., 658 F.2d 392, 394 (5th Cir. 1981). And, this Court has held that "the United States is not subject to the defense of laches." United States v. Spurlin, 763 F. Supp. 563, 566 (M.D. Fla. 1990).

Furthermore, in both the Menominee and Amoco cases cited above, the courts expressly rejected laches defenses in Clean Water Act actions to enforce NPDES permits. United States v. City of Menominee, 727 F. Supp. at 1122 (no exceptions to the rule that laches cannot defeat the government); United States v. Amoco Oil Co., 580 F. Supp. at 1050 ("It is clear that the defense of laches does not apply to the United States when it acts in its sovereign capacity, as of course it does here."); Accord, Student Public Interest Research Group v. P.D. Oil & Chemical, 627 F. Supp. 1074, 1085 (D.N.J 1986) ("The law is established that the defense of laches may not be asserted against the government.")

In short, defendant's eighth affirmative defense must be stricken.

9. Delay by third parties

In its ninth affirmative defense, defendant asserts that "State and local governments unnecessarily delayed issuing permits and enacting zoning changes necessary before FCWC could initiate construction of an advanced water treatment facility or relocate an outfall, thereby precluding FCWC's ability to meet compliance schedules." Answer at 15-16.

To the extent that defendant claims that it was somehow precluded from complying, this defense would appear to be a variation of defendant's fourth defense of impossibility, discussed above. To the extent that defendant attributes responsibility for the supposed preclusion to third parties, the defense could also be characterized as a "third party defense."

In any event, the case law is replete with pronouncements to the effect that the Clean Water Act is a strict liability statute. See e.g., Connecticut Fund for Environment, Inc. v. Upjohn Co., 660 F. Supp. 1397, 1409 (D. Conn. 1987); United States v. Town of Lowell, 637 F. Supp. 254, 258 (M.D. Pa. 1986); United States v. Amoco Oil Co., 580 F. Supp. 1042, 1050 (W.D. Mo. 1984); United States v. CF Industries, 542 F. Supp. 952, 955 (D. Minn. 1982); United States v. Bradshaw, 541 F. Supp. 884, 886 (D. Md. 1982). Moreover, "[n]o right exists to pollute our nation's waters" and "[t]he burden in on the polluter to comply with the CWA," not on EPA (or some other party). United States v. City of Menominee, 727 F. Supp. 1110, 1122 (W.D. Mich. 1989). Thus, even assuming some third party actually had caused defendant delay, this defense is simply invalid and must be stricken.[12]

10. Due care and good faith

Defendant submits in its tenth affirmative defense that it

---

[12] As noted above, the instant action is brought under section 309(b) of the Clean Water Act, 33 U.S.C. § 1319(b). That section, unlike section 311, does not provide a third-party defense. Presumably, if Congress had intended to allow a third-party defense under section 309, it would have specifically provided for one as it did in section 311.

"has at all times acted in a proper and reasonable manner, exercised due care, acted in good faith...." Answer at 16. As noted immediately above, however, the Clean Water Act is based on strict liability. Therefore, "a defendant's intention to comply or good faith attempt to do so does not excuse a violation." Connecticut Fund for Environment, Inc. v. Upjohn Co., 660 F. Supp. 1397, 1409 (D. Conn. 1987). Likewise, defendant's "intent and good faith are irrelevant to the issues of statutory violations and the defendant[s] liability." SPIRG v. P.D. Oil & Chemical Storage, 627 F. Supp. 1074, 1090 (D.N.J. 1986). Accordingly, defendant's tenth affirmative defense must also be stricken.[13]

CONCLUSION

Defendant has cavalierly asserted affirmative defenses which, as a matter of law, have no place in a Clean Water Act action. For the reasons set out above, the United States

---

[13] Although irrelevant to the question of liability, and therefore not validly asserted as an affirmative defense, defendant's good faith -- or lack thereof -- can and should be considered by the court, along with other factors, in assessing penalties. 33 U.S.C. § 1319(d). See Atlantic States Legal Foundation v. Tyson Foods, 897 F.2d 1128, 1141 (11th Cir. 1990).

respectfully requests that all of defendant's affirmative defenses be stricken.[14]

Exhibit_____(GHB-11)

IN THE UNITED STATES DISTRICT COURT
FOR THE MIDDLE DISTRICT OF FLORIDA
FORT MYERS DIVISION

RECEIVED
FEB 14 1994
DGS

UNITED STATES OF AMERICA, Plaintiff, v. FLORIDA CITIES WATER COMPANY, INC., Defendant.	CIVIL ACTION NO. 93-281-CIV-FTM-21

UNITED STATES' FIRST REQUEST FOR PRODUCTION OF DOCUMENTS

Plaintiff, the United States of America, pursuant to Rules 26 and 34 of the Federal Rules of Civil Procedure, requests Defendant Florida Cities Water Company to produce and permit the United States to inspect and copy each of the following documents in defendant's possession, custody or control. These documents shall be produced on March 14, 1994, unless such time is modified by order of the Court or by counsel by the United States, at the offices of the U.S. Department of Justice, Environment and Natural Resources Division, 1425 New York Avenue, N.W., Washington, D.C., or at such other location as agreed upon by counsel for the United States.

INSTRUCTIONS

1. Unless otherwise stated, these requests apply to documents written, produced, drafted, or generated on or after October 1, 1988, and ending at the trial of this matter.

2. Unless otherwise specified, these document requests pertain to Florida Cities Water Company, Inc. ("defendant") and

mean the designated entity and its parent companies, departments, divisions, officers, employees, agents, servants, assigns and, unless privileged, its attorneys.

3. For each document produced, indicate on the document or in some other reasonable manner, the numbered request(s) to which it responds.

4. If anything is deleted from a document produced, state:

(a) the reason for the deletion; and

(b) the subject matter of the deletion.

5. This request covers all documents in the possession, control or custody of defendant, its parent companies, officers, employees, agents, servants, consultants, attorneys and assigns.

6. Words used in the plural shall also be taken to mean and include the singular. Words used in the singular shall also be taken to mean and include the plural. "Or" and "and" shall be construed either conjunctively or disjunctively to bring within the scope of these interrogatories any information that might otherwise be construed to be outside their scope. The past tense includes the present tense where the clear meaning is not distorted by change of tense.

7. If any document was, but is no longer, in the defendant's possession, custody or control, state:

(a) the disposition of the document;

(b) the date such disposition was made;

(c) the identity and address of the present custodian of the document or, if it no longer exists, so state;

(d) the person(s) who made the decision to dispose of the document;

(e) the reason(s) for the disposition; and

(f) a description of the document and description of the contents of the document.

8. If any document is withheld under any claim of privilege or exemption furnish a list identifying each document for which the privilege or exemption is claimed, together with the following information:

(a) its title, or if it has no title, its subject matter;

(b) the date of origin;

(c) the author or addressor;

(d) the recipient(s) of all copies;

(f) basis upon which privilege or exemption is claimed; and

(g) name, address and telephone number of the custodian of the document and/or copies thereof.

9. Please produce the complete original exact copy of each document and, unless otherwise stated, each non-identical copy (whether different from the original because of notes made on the copy or otherwise), including drafts, of each writing of every kind and description (together with all worksheets, support documents, and other relevant materials), whether inscribed by hand or mechanical, electronic, microfilm, photographic, or other means (such as by recording, film, tape or other medium) from

which such information may be obtained.

DEFINITIONS

Unless otherwise indicated, the terms used in these Requests shall have the same meaning ascribed to them under the Clean Water Act.

In addition, unless otherwise stated, the following definitions shall apply to these discovery requests:

A. The terms "biological monitoring," "discharge," "discharge of a pollutant," "discharge of pollutants," "effluent limitation," and "pollutant" shall have the meanings ascribed to those terms in Section 502 of the Clean Water Act, 33 U.S.C. § 1362.

B. "Contractor" or "consultant" means any person who acts as agent for, or on behalf of, any other person, whether or not for consideration, and includes subcontractors.

C. The terms "bypass" and "upset" shall have the meaning ascribed to those terms by 40 C.F.R. § 122.41.

D. "Clean Water Act" means the Federal Water Pollution Control Act, as amended by the Water Quality Act of 1987, 33 U.S.C. §§ 1251-1387, including all regulations promulgated thereunder.

E. "Defendant," "Florida Cities Water Company," "FCWC," "you," and "your," unless otherwise indicated, all mean Defendant Florida Cities Water Company, Inc., each merged, consolidated, and acquired predecessor or successor, parent, subsidiary,

division, and affiliate, each past and present officer, director, employee, agent, servant, consultant and representative of each such entity or individual, and each past and present attorney of each such entity or individual.

F. "Document" means any and all material that is written, printed, typed, photographed, recorded (electronically, magnetically, graphically or otherwise) or which is capable of being recorded in any form. It includes, but is not limited to, any logs of materials received, other logs, invoices, purchase orders, receipts, bills of lading, loading tickets, receiving tickets, shipping orders, inventories, letters and other correspondence, offers, contracts, agreements, bids, proposals, applications, licenses, permits, reports to government agencies, other reports, minutes of meetings, sales estimates, sales reports, memoranda, handwritten or other notes, calendar or diary entries, agendas, bulletins, graphs, charts, maps, photographs, drawings, data, price lists, lists of accounts, summaries, telegraphs, teletypes, computer printouts, magnetic tapes, discs, microfilm, and microfiche.

G. "DMR" means Discharge Monitoring Report as defined in 40 C.F.R. § 122.2.

H. "EPA" shall refer to the United States Environmental Protection Agency.

I. The "Facility" shall refer to the Florida Cities Water Company's wastewater treatment plant located at 1667 Inlet Drive, in North Fort Myers, Florida and its related sewerage system.

J. "Inspection" means the physical observation of any tangible matter.

K. "Navigable waters" is defined in Section 502(7) of the Clean Water Act, 33 U.S.C. § 1362(7).

L. "Non-Compliance Report" means any report of non-compliance with any term or condition of your NPDES permit pursuant to the requirements of 40 C.F.R. §§ 122.41(1) and (4)-(7) or of NPDES Permit No. FL0030325.

M. "NPDES" shall refer to the National Pollutant Discharge Elimination System of Section 402 of the Clean Water Act, 33 U.S.C. § 1342.

N. "NPDES Permit" means NPDES Permit No. FL0030325, as amended, extended, renewed, reissued or modified.

O. "NPDES Permit Limit(s)" means any discharge limitation, term or condition contained in NPDES Permit No. FL0030325, as amended, extended, renewed, reissued or modified.

P. "Person" or "persons" means an individual, trust, firm, joint stock company, corporation (including a government corporation), partnership, association, State, municipality, commission, or political subdivision of a State, or any interstate body, together with their predecessors, successors and assigns, their agents servants, consultants, contractors, subcontractors, employees, and representatives, and all agents and representatives thereof.

Q. "Point source" is defined in Section 502(14) of the Clean Water Act, 33 U.S.C. § 1362(14).

R. "Relate(s)" or "relating to" means constituting, defining, containing, embodying, reflecting, identifying, stating, referring to, dealing with or in any way pertaining to.

S. "Refer to" or "refers to" means mentioning, discussing, making reference to or relating to in any way.

T. "State" means the State of Florida including, any department, agency or individual representing the State of Florida, and includes the Florida Department of Environmental Protection ("FDEP") and its predecessor-agency, the Florida Department of Environmental Regulation ("FDER").

REQUESTS

1. All DMRs reporting the discharge of pollutants from the Facility.

2. All Non-Compliance Reports submitted by the defendant to EPA or the State of Florida relating to the discharge of pollutants from the Facility.

3. All permit requests and applications, permit renewal requests and applications, and permit modification requests and applications, including all such documents whether they relate to NPDES or non-NPDES permit requests and applications filed by the defendant with federal, state or local authorities that pertain to the discharge of pollutants from the Facility.

4. All organizational charts showing overall organizational structure of the defendant in detail, to include documents identifying all persons employed by the defendant with

responsibility for, or authority over, the operation, maintenance and/or management of the Facility, including lines of authority and reporting relationships.

5. All maps, charts and diagrams, that identify and/or depict the geographic service area of the Facility.

6. All maps (including USGS maps) that identify or depict the discharge location of the Facility.

7. All financial reports, statements, balance sheets, budgets and audits prepared by or on behalf of the defendant since January 1, 1980, including any breakdowns of financial data for operation of the Facility.

8. All documents relating to contacts, discussions, meetings and correspondence, between the defendant and its contractors (including subcontractors), to the extent that those documents relate to the operation of the Facility, including, but not limited to, such documents relating to the following persons:

(a) Environmental Science and Engineering, Inc. (ESE)

(b) Source, Inc.

(c) Barth Tech

(d) Tetra Technologies, Inc. (Tetra Engineered System)

(e) Stone and Webster

9. All audits, evaluations, advice, Facilities Plans, reports, sampling results, surveys, tests, evaluations, analyses or studies, of any kind, prepared by the defendant or its contractors (including subcontractors), to the extent that those documents relate to the operation of the facility, to include,

but not be limited to, documents prepared by the persons listed in the preceding interrogatory.

10. All documents that relate to consideration by FCWC of the proposed improvements to the Facility as stated in Mr. Robert French's memorandum dated October 27, 1987.

11. All documents including, but not limited to, correspondence, memoranda, reports and studies relating to meetings, discussions, or oral communications regarding the compliance schedule for the Facility as submitted on March 1, 1988 by FCWC to the State of Florida.

12. All documents including, but not limited to, correspondence, memoranda, reports and studies, relating to the contents of the April 24, 1989 letter from A. A. Reeves III to Bruce R. Barrett of EPA.

13. All documents including, but not limited to, all correspondence, memoranda, monthly reports and studies relating to the contents of the May 17, 1990 letter from James A. Elder to John T. Marlar of EPA.

14. All documents including, but not limited to, all correspondence, memoranda, monthly reports and studies relating to the contents of the July 3, 1990, letter from Mr. James A. Elder to Kenneth Kwan of EPA.

15. All documents including, but not limited to, all progress reports, correspondence, memoranda, and studies relating to meetings, discussions or oral or written communications relating to the contents of the May 11, 1987 EPA Administrative

Order issued to FCWC (Docket No. 87-085), and its Amendment on August 31, 1988.

16. All documents including, but not limited to, all monthly progress reports, correspondence, memoranda, monthly reports, and studies, relating to meetings, discussions or oral or written communications regarding the September 26, 1989 EPA Administrative Order issued to FCWC (Docket No. 89-109), and its Amendment on July 24, 1990.

17. All documents relating to any test results, laboratory analyses, flow measurements or concentration analyses of any pollutants discharged from the Facility.

18. All documents which refer or relate to the effects of the discharge of pollutants from the Facility on the water quality of Caloosahatchee River and the tributary canal to which the Facility has discharged.

19. All documents which refer or relate to whether or not discharges from the Facility are and have been in compliance with applicable water pollution control laws, including the applicable NPDES Permit.

20. All designs, including any plans and specifications, and modifications thereof, for the treatment elements and processes at the Facility.

21. All documents that identify, describe or explain the treatment processes and operations at the Facility.

22. All maps, charts, photographs and diagrams depicting any of the treatment elements and processes at the

Facility.

21. All documents, including maps, charts, photographs, and diagrams indicating the sampling location(s) for wastewater discharged from the Facility.

23. All documents relating to process or equipment changes at the Facility which were designed to, or had the effect of, evaluating, preventing, increasing, reducing or otherwise affecting discharges of pollutants from the Facility.

24. All documents relating to all operating, maintenance and inspection procedures at the Facility, and any and all changes in these procedures, which were designed to, or had the effect of, preventing, increasing, reducing, or otherwise affecting discharges of pollutants from the Facility.

25. All documents relating to procedures used or prescribed for use by FCWC to report to the EPA or the State, any water pollution discharges, violations of water pollution laws, regulations, or violations of your NPDES Permit.

26. All documents relating to any and all difficulties or problems FCWC encountered in meeting applicable water pollution control effluent limitations or the NPDES Permit Limits regarding pollutants discharged from the Facility.

27. All documents relating to planning and/or consideration by the defendant of whether or not to install or to defer installation of any water pollution control equipment at the Facility.

28. All documents relating to consideration by the

defendant of whether or not to implement or defer implementation of process changes or facility procedures that would in any way affect water and/or pollutant discharges from the Facility.

29. All documents relating to the advantages, disadvantages or potential implications to the defendant of delaying installation of water pollution equipment at the Facility.

30. All documents relating to the capital, operating or maintenance costs of water pollution control equipment installed, or considered for installation, at the Facility to achieve or contribute to the achievement of applicable water pollution control standards and/or NPDES Permit Limits.

31. All documents including, but not limited to, bid solicitations, bid requests, bids, engineering estimates and other cost documents, contracts or staff memoranda, which relate to any water pollution control equipment installed or considered for installation at the Facility.

32. All documents including, but not limited to, bid requests, bids, estimates and other documents, that relate to costs of operation and maintenance, construction and equipment, of any and all plans, whether implemented or proposed, to either increase the treatment efficiency of the Facility or expand the capacity of the Facility.

33. All documents relating to meetings, discussions or other written or oral communications regarding technology, personnel training, inspection, maintenance or any other means to

eliminate or reduce water pollutant discharges or achieve compliance with water pollution control standards or your NPDES Permit.

34. All documents including training manuals, relating to operation, testing or maintenance procedures with respect to water pollution control equipment at the Facility.

35. All documents relating to complaints received by the defendant from any person regarding the operation of the Facility or the discharge of pollutants from the Facility.

36. All documents including, but not limited to, minutes, notes and memoranda, relating to meetings held by defendant at which the facility's compliance with the Clean Water Act and NPDES Permit Limits was discussed.

37. All documents relating to inquiries made by FCWC into the causes of discharges of pollutants at the Facility which were not authorized under applicable water pollution control laws or the terms and limitations of NPDES Permit limits.

38. All documents that refer or relate to contacts, discussions, meeting, or correspondence of any kind between representatives of EPA, the State and/or any other governmental agency, and FCWC or any person representing or acting on its behalf, which relate in any way to the discharge of pollutants from the Facility.

39. All daily Facility operation and maintenance logs.

40. All records relating to the operation, maintenance and calibration of flow meters at the facility.

41. All documents reviewed by any expert retained by Defendant for the purpose of testifying in this case.

42. All documents relating to Defendant's document retention policies.

43. All treatability studies, wastewater characterization studies, industrial waste surveys, evaluations, tests, reports or other documents prepared by you or any consultant or contractor of FCWC or by any other person, relating to monitoring, sampling or analyses of wastewater discharged from the Facility into navigable waters.

44. All documents Defendant intends to rely upon or introduce into evidence at trial.

45. All documents relating to the discharge of pollutants from the Facility not otherwise subsumed by another request herein.

Volume	Page	Designation	Counter-Attack
1.00	5.00	Julie's name and business address	
1.00	62.00	Julie has been an evnironmental engineer with Avatar Utilities for 3 years; 50-60% of her time was spent auditing environmental compliance at the Avatar facilitites	
1.00	68.00	she has been operations manager since January 1992	
1.00	69.00	she has oversight responsibility for operations and maintenance; part of her job is to ensure regulatory compliance	
1.00	73.00	she goes through the DMRs and makes sure that they are timely; they have a tracking system to review the DMRs and exceedances	
1.00	81.00	FCWC owns and operates six WWTPs in Florida; she lists them as well as provides the location	
1.00	140.00	All the FCWC plants are capable of meeting their current NPDES limits	
2.00	5.00	Mike Acosta is V.P. Engineering and Operations; Acosta reports to Bradtmiller	
2.00	7.00	Gerald is President of FCWC	
2.00	10.00	She is still the Operations manager	
2.00	15.00	Everyone knows about the comment at Tompkins deposition; that comment is not her personal opinion, but she called him an asshole	
2.00	19.00	BB discharge without a permit is true	
2.00	21.00	[This must be a screwed up designation because it is Jacobs stating that he's interested in what Julie might know about mitigating evidence]	

Volume	Page	Designation	Counter-Attack
2.00	23.00	Audit report for BB showed no permit; BB was operating under consent order from Florida	
2.00	33.00	Three plants were operating without permits in 1989	
2.00	54.00	Paragraph 18--there were exceedences Paragraph 19-true Paragraph 20--true Paragraph 21--true	
2.00	65.00	Paragraph 25--true Paragraph 26--true Paragraph 27--true	
2.00	75.00	Paragraph 30--true Paragraph 32--true Paragraph 33--true Paragraph 34--true Paragraph 35--true Paragraph 36--true Paragraph 37--true Paragraph 38--true Paragraph 39--true Paragraph 40--true Paragraph 41--true	
2.00	91.00	Paragraph 43--true	
3.00	14.00	Exhibit C to government's motion for summary judgment is accurrate	
3.00	22.00	Exhibit F to government's motion for summary judgment is accurrate; October '91 should have more exceedences; August '91 should have more exceedences	

Page	Notes	Topic	Volume
9.00	Reviewed Exhibits to DOJ's memorandum in support of its summary judgment motion- ie, the summary of violations.	identification of exhibits	
13.00	Does not agree to penalty days summarized in exhibit C (BB), but will testify as to parameter, monthly averages, daily maximums, reported exceedances, actual exceedances, and agent.		
14.00	DMRs are accurate as to what is summarized as violations of the NPDES permit.	violation summary, BB	
17.00	Violation summary accurate as to all items except penalty days.		
21.00	Carrollwood violation summary is accurate except for exceedances not shown for 10/91, 8/91, 7/91.	violation summary, CW	
23.00	Reported exceedances should be one not zero for: TS 12/91, 11/91; 11/91 TP and TN; 10/91 for TSS, CBOD, TP, TN; 9/91 for TN, TP; 8/91 for TP; 7/91 for TP.		
25.00	Violation summary for WWE does not mirror DMR.	violation summary, WWE	
25.00	Recalls that a toxicity violation was reported by FCWC in error, an error that was caught by EPA, and was rectified in a corrected DMR.		
27.00	Was a toxicity failure in September-October 1991 or November-December 1991, a pass in January-February 1992, then two failures (March-April & May-June).		
28.00	Exceedances were not reported in July through August 1991, because the monthly averages were within the limits of the AO, although above those set in the NPDES permit that became effective in October 1991.		
30.00	BB was granted an extension by state of Florida beyond expiration date (6/30/95) of NPDES permit to continue discharge.	continuing BB discharge	
31.00	Florida has assumed delegation from EPA, and authorized discharge until 1997.		
32.00	BB has had recent toxicity failures, as the AWT construction continues.	recent violations, BB	

Page	Notes	Topic	Volume
32.00	Most recent violation at WWE was June 1992.	recent violations, WWE	
33.00	Does not recall telephone 6/20/91 conversation with Allen regarding BB audit. Algae bypass was built, but never used after NPDES permit was granted "which raised the limits."	BB violations	
38.00	TRC testing spot changed from ponds to plant at FCWC request (because of concern about fecal coliform from animals). There were slight TRC violations thereafter.		
39.00	TRC violations ceased after addition of dechlorinization system, and change in testing system.		
40.00	Continuous nitrification of the plant succeeded in reducing toxicity failures.		
43.00	Concern with failure to meet fecal coliform limits related to poor testing protocols.		
43.00	In August 1991, recommended increased chlorine feed rate to ensure disinfection; does not recall whether reduction was recommended when permit with TRC limits took effect.		
48.00	In December 1992, expected to be able to cease discharge by June 30, 1995.		
49.00	Failure to cease by 6/30/95 was because of 8-9 month period to obtain state permit for AWT construction; CO process included appeal by grove owners near the 300 acre spray site.		
53.00	Use of reclaimed water on Parrish property did not occur because grower did not want to pay for water, a long term contract, or bear any risk that he might have crop marketing problems (related to use of reclaimed water in his groves).		
56.00	Currently, no water is used in any groves because, since the AWT construction is not complete, the effluent does not meet public access reuse standards.		
57.00	Current plans to purchase H & S Groves (300 acres) will provide spray irrigation capacity of 600,000 gallons per day, an amount that will allow BB to cease all but wet weather discharge.		
60.00	In December 1993, expected to begin AWT construction in mid-1994, and complete it with 300 days.		

Page	Notes	Topic	Volume
61.00	Construction begun in early 1995; upon completion by end of 1995 secondary effluent discharge will cease (AWT discharge will continue to the canal, the 40 acre spray site, and the golf course under extended permit).		
69.00	Does not think that negotiations with growers for reuse would have progressed even if reclaimed water had been offered for nothing.		
74.00	Understands that FCWC uses AHI Policies and Procedures Manual.	Connection with Avatar	
78.00	Visited Carrollwood for an audit, a follow up on 12/16/90, and a second follow-up on 12/28/90. Uncertain about purpose of titrator mentioned in report of 12/28 visit.	visits to CW	
79.00	Elder, Bradtmiller, and Reeves were FCWC officials most involved with the CW-Hillsborough connection.	Hillsborough connection	
80.00	Letter to Kwan (exhibit 823) explained reasons for delay during dewatering at WWE.	WWE

Memorandum In Support Of Motion For A Protective Order

Pursuant to Fed. R. Civ. P. 26(c), defendant Florida Cities Water Company ("Florida Cities") seeks a protective order limiting discovery in this case to evidence relating to Clean Water Act compliance by the Waterway Estates Wastewater Treatment Plant located in North Fort Myers, Florida.

I. BACKGROUND

The government filed this action on October 1, 1993. The Complaint alleged that from October 1, 1988 until March 1992, Florida Cities, through operation of the Waterway Estates Wastewater Treatment Plant, violated section 301(a) of the Clean Water Act (CWA), 33 U.S.C. § 1311(a). The Complaint

states three separate claims, all of which allege violations of the CWA only by the Waterway Estates facility, and for specific time periods delineated in the Complaint. Count 1 alleges that, from October 1, 1988 to October 31, 1989, Waterway Estates discharged pollutants into the Caloosahatchee River without a NPDES permit. Count 2 alleges that, from November 1, 1989 to July 14, 1991, Waterway Estates discharged at an unpermitted location. Count 3 alleges that, from July 1991 to March 1992, Waterway Estates discharged effluents in violation of the limitations contained in its NPDES permit. Defendant filed an answer asserting numerous defenses to liability.[1/]

On February 11, 1994, the government served its First Request for Production of Documents pursuant to Fed. R. Civ. P. 34. The request focused solely on documents relating to the operation, management, and ownership of the Waterway Estates facility and its related sewerage system.[2/] In response to plaintiff's document request, the defendant produced for inspection and copying more than 100,000 pages of documents within the time frame set by the court. In connection with this production, defendant expended considerable effort to cull and produce only those documents or portions of documents that relate only

---

1/ The government's Motion to Strike Affirmative Defenses is pending.

2/ There was one exception. The government requested documents pertaining to the financial condition of the defendant and its corporate affiliates. Defendant has objected to this request as overly broad.

to the Waterway Estates facility, in conformance with the scope of the pleadings and the government's document request. The government reviewed some of these documents in Miami on March 14-15 and the balance of the documents in Washington, D.C. during the week of April 4-8, 1994.

Concurrently with its document review in Washington, the government indicated its desire to depose Julie L. Karleskint, the Operation Manager of Florida Cities, on April 20-21. These dates were informally confirmed between counsel, and on April 14 a notice of deposition was served fixing April 20-21 as the dates for the deposition. On April 13, the government for the first time announced its intention to inquire about waste water treatment facilities operated by defendant other than the Waterway Estates plant during its deposition of Ms. Karleskint. Furthermore, the government demanded production of all redacted documents in their entireties -- including documents which related to other Florida Cities facilities -- "no later than Friday, April 15, 1994," two days after the date of the government's new demand. Counsel for the government has indicated orally that he relies on section 309(d) of the Clean Water Act, 33 U.S.C. § 1319(d), to support this request for unredacted documents. Florida Cities has received no formal document request pertaining to facilities other than the Waterway Estates treatment plant.

II. ARGUMENT

This court has substantial discretion to determine the appropriate scope of discovery in light of the issues raised by the case, the legitimate needs of the parties, and other circumstances. See generally Amey, Inc. v. Gulf Abstract & Title, Inc., 758 F.2d 1486, 1505 (11th Cir. 1985), cert. denied, 475 U.S. 1107 (1986). Rule 26(c), in particular, "emphasizes the complete control that the court has over the discovery process." Charles Alan Wright & Arthur R. Miller, Federal Practice and Procedure § 2036, at 267 (1970).

The government's announced intention to depose Ms. Karleskint with respect to waste water treatment plants that are not the subject of the pleadings in this case, and its effort generally to broaden the scope of discovery, is unsupportable and inappropriate, and should be foreclosed. On virtually the eve of deposition, the government has suddenly sprung this request on Florida Cities and demanded immediate compliance. The government's demands go well beyond the scope of the complaint, whose allegations are directed only to the Waterway Estates facility. They are also outside the government's First (and only) Request for Production of Documents, which also involved only the Waterway Estates facility. Counsel for the government has indicated that plaintiff may amend the Complaint to cover other Florida Cities treatment facilities. However, the Complaint has not been amended. If and when the

Complaint is amended, the United States may depose witnesses and request documents consistent with the scope of those pleadings. However, it is improper for the government to use discovery in this case as a fishing expedition to assist it in gaining information for the drafting of an action involving other, yet-unnamed plants.

Furthermore, counsel's reference to § 309(d) of the Clean Water Act is unavailing. Section 309(d) does not set out the parameters of disclosure in this case; indeed, it is not a provision that relates to discovery at all. Hence, it does not support the government's demand for documents.

III. CONCLUSION

For the foregoing reasons, defendant Florida Cities respectfully requests entry of a protective order limiting discovery to evidence relating to Clean Water Act compliance by the Waterway Estates Wastewater Treatment Plant.

ORDER

This Cause is before the Court on the defendant, FLORIDA CITIES WATER COMPANY's Motion for Protective Order. The Court has carefully reviewed the motion and memorandum in support. The defendant is requesting that the deposition of Julie L. Karleskint, Operation Manager of Florida Cities be limited in scope to the Waterway Estates only and that the government's new demand of production of all redacted documents in their entirety which relate to other Florida Cities facilities be denied. The Court finds that scope of the deposition of Ms. Karleskint should not be limited, however, the defendant is permitted to object to any question but shall not instruct the deponent not to answer any questions. Regarding the documents, the defendant does not have to produce all redacted documents in their entirety by April 15, 1994, however the defendant shall produce all redacted documents in their entirety within twenty (20) days from the date of this Order subject to any assertion of confidentiality and privilege.

23

It is hereby ORDERED:

That the Motion for a Protective Order is hereby GRANTED in part and DENIED in part. It is GRANTED to the extent that the defendant does not have to produce all redacted documents in their entirety immediately, but must produce them within twenty days from the date of this Order subject to confidentiality and privilege. This Motion is DENIED as to limiting the scope of Julie L. Karleskint's deposition and in all other respects.

DONE and ORDERED in Chambers, Fort Myers, Florida, this 12th day of April, 1994.

Re: Ex Parte Meetings with Florida Cities' Former Employees and Consultants (U.S. v. Florida Cities Water Company, No. 93-281-CIV-FTM-21D)

Dear Mr. Jacobs:

We have recently learned that the Department of Justice has on several occasions contacted and sought to meet with selected former employees and consultants of Florida Cities regarding the substance of this litigation without notifying opposing counsel. At least one such meeting has already occurred. We believe that such contacts are improper under applicable law, and we request that the Department of Justice immediately cease contacting and setting up meetings with former employees and consultants of Florida Cities regarding this case without first notifying Florida Cities and giving us the opportunity to be present at the meeting.

Exhibit 13

Several of these potential witnesses are former executive-level employees of Florida Cities who were both decision makers and persons privy to attorney-client privileged and other confidential information. Others are former consultants who worked closely with Florida Cities during the time of events at issue in this litigation. We fully expected the Department of Justice to notice the depositions of these and other potential witnesses, and we have already expressed our continuing willingness to cooperate fully with you in scheduling and conducting such depositions. However, we are dismayed by these attempts by the Department of Justice to circumvent this process by contacting these persons and seeking to conduct meetings on the substance of this case without notifying Florida Cities or giving us the opportunity to be present.

More disturbing, we are informed by more than one of these persons that they were made to feel pressured by the Department of Justice to have such meetings and that DOJ urged at least one such person contacted not to allow Florida Cities' counsel to attend a meeting, even though this person requested that we attend. (We understand that this person was told that the Department of Justice would cancel the meeting if Florida Cities' counsel were present.) We believe that it is improper for the Department to attempt to exert pressure on such an individual to meet alone with you under these circumstances.

As I am sure you are aware, the Middle District of Florida has held that, with respect to ex parte contact with former employees of an organization represented by counsel:

> Privileged communications present a distinct problem with respect to contact with former employees, thus ex parte contact should be barred to prevent disclosure of any inadvertent confidential communications.
>
> . . .
>
> [C]ourt authorization or opposing counsel's consent to ex parte contact should be required if the former employee was highly-placed in the company (such as a former officer or director) or if the former employee's actions are precisely those sought to be imputed to the corporation.

Rentclub, Inc. v. Transamerica Rental Finance Corp., 811 F.Supp 651 (M.D.Fla, 1992) at 657-658. In light of this authority and our open willingness to cooperate fully in your deposing these persons or other witnesses, pursuant to our joint agreement on discovery, we request that you notify us before making further contacts or before conducting any further meetings, so that we may be present.

Again, pursuant to our informal agreement that we would give each other notice of intended motions, we intend to file a Motion for a Protective Order regarding these contacts unless we can reach a mutually agreeable resolution before 2:00 pm Eastern Time tomorrow, Wednesday, April 20, 1994. We look forward to your full cooperation in this matter. Please contact me as soon as you receive this letter to communicate your intents.

Yours sincerely,

Don G. Scroggin

Re: United States v. Florida Cities Water
No. 93-281-CIV-FTM-21 (M.D. Fla.)

Dear Mr. Scroggin:

I am in receipt this morning of your fax sent on April 19, 1994 (at 9:13 p.m.). Kindly consider this an initial reply designed not to fully examine the issues you raise, but simply to meet the 2:00 p.m. deadline today you unilaterally saw fit to impose.

First, please be advised that the United States take serious exception both to your representation of certain facts and the state of the law on the issue in question.

Second, please be advised that the conduct of the Department of Justice in this matter has been fully in accord with the Department's guidelines for its attorneys in such matters. See 59 Fed. Reg. 10086 (March 3, 1994).

We do recognize, however, that the Department's guidelines arguably may conflict with the Court's decision in Rentclub v. Tansamerica Rental Finance Corp., 811 F. Supp. 651 (M.D. Fla. 1992). In light of this potential conflict, as you can well imagine, we will need to carefully study the issue you raise. In the meantime, however, in due deference to the Court's decision in Rentclub, and in acquiescence to your request, until further notice, the United States will not contact any former employees of Florida Cities Water Company without first contacting an attorney of record for the Company in this matter. Moreover, if, after further study, we determine that we can no longer honor that commitment, we will give you ample opportunity to bring your motion before making any such contacts.

I trust that this reply will satisfactorily address your concerns at least for the time being, but please do not hesitate

to contact me to discuss this matter at any time.

Sincerely,

Assistant Attorney General
Environment and Natural Resources
Division

UNITED STATES OF AMERICA, Plaintiff, v. FLORIDA CITIES WATER COMPANY, INC., Defendant.	CIVIL ACTION NO. 93-281-CIV-FTM-21

MEMORANDUM IN SUPPORT OF UNITED STATES' MOTION FOR AN ORDER ALLOWING EX-PARTE CONTACTS WITH FORMER EMPLOYEES

INTRODUCTION

This is a civil action brought on behalf of the Administrator of the U.S. Environmental Protection Agency ("EPA") pursuant to section 309(b) of the Clean Water Act ("the Act"), 33 U.S.C. § 1319(b), for civil penalties for violations of section 301 of the Act, 33 U.S.C. § 1311, and of the conditions and limitations of a National Pollutant Discharge Elimination System ("NPDES") permit issued by EPA pursuant to section 402 of the Act, 33 U.S.C. § 1342. Suit was filed on October 1, 1993.

Florida Cities Water Company, Inc. ("Defendant" or "FCWC") owns and operates the Waterway Estates Wastewater Treatment Plant located in North Fort Myers, Lee County, Florida, as well as other wastewater treatment plants in Florida. The Waterway Estates Plant collects and treats wastewater from residential and commercial sources and then discharges those wastewaters into the Caloosahatchee River. The wastewater discharges contain pollutants which may not be discharged into the River except in

compliance with a NPDES permit. The United States alleges that Defendant violated the Act by: (1) discharging pollutants into the River without a NPDES permit from October 1, 1988 to October 31, 1989; (2) discharging pollutants into a tributary canal, an unpermitted discharge point, from November 1, 1989 to July 14, 1991; and (3) discharging pollutants in excess of permit limits from July 1991 to June 1992.

The parties are presently engaging in informal and formal discovery. During the course of discovery, Defendant demanded that the United States not contact and meet with former employees and consultants of the Defendant corporation without first notifying Defendant and giving it the opportunity to be present at the meeting. Because the United States considers Defendant's demand to go well beyond the United States' legal and ethical obligations, it seeks an order from the Court expressly permitting it to have such contact and meetings.[1]

ARGUMENT

The Local Rules of the United States District Court for the Middle District of Florida specify that the professional conduct of all members of the bar of this Court, including those specially admitted, "shall be governed by the Model Rules of Professional Conduct of the American Bar Association as modified and adopted by the Supreme Court of Florida to govern the

[1] In accordance with Local Rule 3.01(g), counsel for the United States has conferred with counsel for Defendant regarding the issue raised herein, but counsel have been unable to agree on the resolution of the issue.

professional behavior of the members of the Florida Bar." Local Rule 2.04(c). The Supreme Court of Florida has adopted the "Rules Regulating the Florida Bar," which includes Chapter 4 entitled "Rules of Professional Conduct." The only rule arguably applicable to the issue sub judice is Rule 4-4.2 of the Florida Rules of Professional Conduct. Modelled largely on Rule 4.2 of the ABA Model Rules of Professional Conduct, Florida Rule 4-4.2 reads in pertinent part as follows:

> In representing a client, a lawyer shall not communicate about the subject of the representation with a party the lawyer knows to be represented by another lawyer in the matter, unless the lawyer has the consent of the other lawyer.[2]

Rule 4-4.2 and its official comment, like American Bar Association Model Rule 4.2 and its official comment, are silent as to whether ex-employees are to be deemed a "party" for the purposes of ex-parte communications. On the basis of an exhaustive analysis of the Florida and ABA rules, prevailing case law, and commentary, the United States respectfully submits that the rule simply is not applicable to ex-employees.

---

[2] The Florida Rules also adopts the following pertinent official Comment to ABA Rule 4.2:

> In the case of an organization, this rule prohibits communications by a lawyer for one party concerning the matter in representation with persons having a managerial responsibility on behalf of the organization and with any other person whose act or mission in connection with that matter may be imputed to the organization for purposes of civil or criminal liability or whose statement may constitute an admission on the part of the organization.

The Board of Governors of the Florida Bar addressed this very issue in Opinion 88-14 (March 7, 1989), reprinted in Professional Ethics of the Florida Bar at 1299 (attached hereto as Exhibit A). Their opinion, in brief, was as follows: "A plaintiff's attorney may communicate with former managers and former employees of a defendant corporation without seeking and obtaining consent of corporation's attorney."[3]

Because Rule 4-4.2 follows ABA Model Rule 4.2 in all pertinent respects, the ABA's own interpretation of its rule is also instructive.[4] Significantly, a 1991 formal ABA opinion expressly held that Rule 4.2 does not apply to former corporate employees, even ones who held high ranking or managerial positions, based on the plain language of the rule and the fact that such an interpretation would inhibit the acquisition of

---

[3] The Board of Governors reasoned as follows:

> The issue is whether Rule 4-4.2, Rules Regulating the Florida Bar, proscribes the plaintiffs' attorneys from contacting former managers and other former employees of the defendant corporation except with the permission of the corporation's attorneys. As regards former managers and other former employees who have not maintained any ties with the corporation -- who are no longer part of the corporate entity -- and who have not sought or consented to be represented in the matter by the corporation's attorneys, the answer must be in the negative.

Id.

[4] "Since question of ethics in federal cases are ultimately questions of federal law, the Court is guided by federal case law, as well as the American Bar Associations comments to its Model Rules of Professional Conduct and the policies underlying the particular ethical rule at issue." Kitchen v. Aristech Chemical, 769 F. Supp. 254, 258 (S.D. Ohio 1991).

information. ABA Standing Committee on Ethics and Professional Responsibility Formal Opinion No. 91-359 (March 22, 1991) reprinted in ABA/BNA Lawyers' Manual on Professional Conduct at 1001:101 (attached hereto as Exhibit B). The opinion states as follows:

> [A] lawyer representing a client in a matter adverse to a corporate party that is represented by another lawyer may, without violating Model Rule 4.2, communicate about the subject of the representation with an unrepresented former employee of the corporate party without the consent of the corporation's lawyer.

Id. at 1001:104. Accord, G. Hazard & W. Hodes, The Law of Lawyering, §4.2:107 (2d ed. 1993 Supp.) ("The no-contact regime...does not address communications with former agents and employees, and technically there should be no bar, since former employees cannot bind the organization, and their statements cannot be introduced as admissions of the organization.") (emphasis original); Susan J. Becker, "Conducting Informal Discovery of a Party's Former Employees: Legal and Ethical Concerns and Constraints," 51 Maryland Law Rev. 239, 286-87 (1992) ("Perhaps the most persuasive reasons for allowing ex parte contact of an opposing party's former employees is that neither Model Rule 4.2 nor its Comment truly applies to the

former employee situation.")[5]

The ABA Formal Opinion has greatly influenced this area of the law. As one court observed, "every decision after the promulgation of the ABA's Formal Opinion in March 1991 has adopted the majority position [that Rule 4.2 does not apply to any former employee]." Valassis v. Samelson, 143 F.R.D. 118, 121 n.2 (E.D. Mich. 1992). See In re Domestic Air Transportation Antitrust Litigation, 141 F.R.D. 556, 561-62 (N.D. Ga. 1992) ("court will not require plaintiffs to notify defendants of their intention to interview former employees, nor will it mandate that plaintiffs allow counsel for defendants to be present during the interview."); Goff v. Wheaton Industries, 145 F.R.D. 351, 354 (D.N.J. 1992) ("neither the goal of the Rule nor its underlying rationale support extending the protections of this ethical rule to include former employees"); DuBois v. Gradco Systems, Inc., 136 F.R.D. 341 (D. Conn. 1991) (no ethical rule bars ex parte communications with former employees of an adversary corporate defendant); Action Air Freight, Inc. v. Pilot Air Freight Corp., 769 F. Supp. 899, 904 (E.D. Pa. 1991) (permitted defense counsel to make ex parte contacts with the former employees currently

---

[5] Professor Becker elaborates as follows:

> A former employee is not a represented party or managerial member of an organization; furthermore, the termination of an individual's employment relationship with a party negates the possibility that the individual's statement could constitute a binding admission.

Id.

working for the plaintiff); Shearson Lehman Bros., Inc. v. Wasatch Bank, 139 F.R.D. 412, 417 (D. Utah 1991) ("In light of recent developments in the law and commentary addressing the issue of the scope of Rule 4.2 [the contention] that former employees are within the scope of the rule is rejected.").[6]

While a small minority of courts have restricted contacts with ex-employees, nearly all such decisions predate the ABA Formal Opinion. See Public Service Electric and Gas Co. v. Associated Electric & Gas Ins. Services, Ltd., 745 F. Supp. 1037, 1042 (D.N.J. 1990); Chancellor v. Boeing, 678 F. Supp. 250 (D. Kan. 1988); Porter v. Arco Metals Co., Div. of Atlantic Richfield Corp., 642 F. Supp. 1116, 1118 (D. Mont. 1986). Indeed, judges of the United States District Court for the District of New Jersey openly criticized their colleague who restricted such contacts. Hanntz v. Shiley, Inc., 766 F. Supp. 258, 270 (D.N.J. 1991) ("The holding in PSE & G ... strikes an unreasonable balance between protecting a relationship that does not exist and unduly restricting the need for litigants to have access to all relevant factual information pertinent to the case."); Goff v. Wheaton Industries, 145 F.R.D. at 355 ("the approach taken in PSE & G is unduly harsh and an unnecessary extension of the Rule.").

The United States recognizes that Judge Kovachevich of this

---

[6] Even before the ABA Formal Opinion, the majority view was that there are no ethical prohibitions to contacting any former employee of a defendant corporation. See Polycast Technology Corp. v. Uniroyal, Inc., 129 F.R.D. 621, 628 (S.D.N.Y. 1990); University Patents, Inc. v. Kligman, 737 F. Supp. 325 (E.D. Pa. 1990).

Court has twice addressed the issue at bar in recent published opinions holding that under certain circumstances ex-employees may not be contacted. That position, however, is not only in the vast minority in terms of the published federal court precedent, but is also inconsistent with the Florida Bar and ABA ethics opinions. Under a unique and extraordinary set of facts, Judge Kovachevich held broadly as follows in Rentclub v. Tansamerica Rental Finance Corp., 811 F. Supp. 651 (M.D. Fla. 1992): "Privileged communications present a distinct problem with respect to contact with former employees, thus ex parte contact should be barred to prevent disclosure of inadvertent confidential communications. The focus in on whether the former employee's statements could be admissions against the corporation or whether their actions could be imputed to the corporation." Id. at 657.[7] Judge Kovachevich subsequently held somewhat more narrowly as follows in Browning v. AT & T Paradyne, 838 F. Supp. 1564 (M.D. Fla. 1993): "In reliance on Rule 4-4.2 and its corresponding comments, this Court has and continues to hold that a 'party' for purposes of this rule includes former managerial employees, if their statements 'could be admissions against the

[7] In Rentclub, the plaintiff actually hired defendant's ex-employee as a "trial consultant." Although no appeal was timely taken of the Rentclub decision, the party whose attorney was disqualified later moved for an amendment of the order to certify questions of law for interlocutory review pursuant to 28 U.S.C. § 1292(b). The Court denied the motion on the basis that the disqualification order was immediately appealable under 28 U.S.C. § 1291 and could not be certified for interlocutory appeal after the time periods for filing notice of appeal and for filing a motion for extension of time have lapsed. 806 F. Supp. 259.

corporation or ... their actions could be imputed to the corporation.'" Id. at 1567. In the first case, Judge Kovachevich granted the moving party's motion to disqualify counsel; in the second case, she denied such a motion.

As noted in Curley v. Cumberland Farms, Inc., 134 F.R.D. 77, 79-80 (D.N.J. 1991), another New Jersey case finding Rule 4.2 inapplicable to former employees, the decision of one judge is not binding upon another judge of the same court in a different law suit. Based on the prevailing law, and with due deference to Judge Kovachevich, the United States respectfully submits that the extension of "party" under Rule 4-4.2 to ex-employees is erroneous. Indeed, the application of the rule to former employees, could have numerous unintended anomalous, impractical, and illogical results. By limiting an important avenue of informal discovery, it would necessarily increase the use of formal discovery, a result clearly antithetical to the Supreme Court's intentions in amending the discovery rules in the Federal Rules of Civil Procedure in December 1993. Moreover, a former employee is potentially a valuable witness for the party adverse to his/her former employer: the former employee may be very knowledgeable of facts relevant to the litigation yet not be as reticent as he might be if still employed. Assuming the adverse party wanted to call a former employee as a witness, it would be precluded from interviewing and preparing the witness for trial. If the former employer's attorney were entitled to be present at meetings between the adverse party and the employee, the adverse

party's attorney work product would necessarily be shared. Indeed, the facts in Browning serve as an example of an absurd -- yet conceivable -- extension of Judge Kovachevitch's interpretation: the moving party moved for the disqualification of plaintiffs' counsel on the grounds that counsel had spoken to their own client, a former employee of the defendant corporation!

Limitations such as might result from as broad an interpretation as Judge Kovachevitch's would be particularly serious insofar as the United States is concerned. In carrying out their law enforcement functions, attorneys for the United States in particular require -- and must have access to -- a variety of informal means of acquiring information. To ensure that they have such access under appropriate, yet controlled circumstances, the U.S. Department of Justice has promulgated extensive guidelines governing its attorneys' communications with represented persons. See 42 Fed. Reg. 10086 et seq. (March 3, 1994). By their own terms, the rules are expressly inapplicable to communications with former employees. Id. at 10101.

The United States acknowledges that Florida Cities has a legitimate ongoing interest in ensuring that information protected by the attorney-client privilege not be jeopardized by virtue of an employee having left the Company. On the other hand, the United States has an equally strong interest in gathering evidence in this matter through all appropriate means, as well as in having ongoing contacts with potential Government witnesses without sharing its work product with the Defendant's

attorneys. The United States fully intends to avoid eliciting attorney-client privileged information from former employees. To the extent that Florida Cities has doubts about the United States' intentions in this regard, it is certainly free to solicit its own interviews of its former employees, before and/or after the United States' contacts with them.

CONCLUSION

Florida Rule 4-4.2 should not and does not preclude the United States from having ex parte contacts with Defendant's former employees. Accordingly, this Court should enter an order expressly allowing such contacts.[8]

OPINION 88-14
(March 7, 1989)

A plaintiff's attorney may communicate with former managers and former employees of a defendant corporation without seeking and obtaining consent of corporation's attorney.

Note: This opinion was approved by the Board of Governors at its March 1989 meeting.

RPC:	4-4.2; ABA Model 4.2
CPR:	DR 7-104(A)(1)
Opinions:	Alaska 88-3, Colorado 69, Illinois 85-12, Los Angeles Co. 369, Maryland 86-13, Massachusetts 82-7, Michigan CI-597, N.Y. City 80-46, N.Y. County 528, Virginia 533, Wisconsin E-82-10
Case:	*Wright v. Group Health Hospital*, 691 P.2d 564 (Wash. 1984)
Statutes:	*F.S.* 90.803(18)(e); Florida Evidence Code
Misc:	Fed.R.Evid. 801(d)(2)(D)

The inquiring attorney's law firm represents the plaintiffs in a civil action against a corporation. The attorneys wish to have ex parte interviews with former employees of the defendant corporation who were employed by the corporation during the period when the actions or decisions on which the suit is based occurred. The former employees may include some who had managerial responsibilities and some whose acts or omissions during their employment might be imputed to the corporation for purposes of civil liability. As is usually the case, the defendant corporation objects to ex parte contacts with its former employees.

The issue is whether Rule 4-4.2, Rules Regulating The Florida Bar, proscribes the plaintiffs' attorneys from contacting former managers and other former employees of the defendant corporation except with the permission of the corporation's attorneys. As regards former managers and other former employees who have not maintained any ties with the corporation—who are no longer part of the corporate entity — and who have not sought or consented to be represented in the matter by the corporation's attorneys, the answer must be in the negative.

Rule 4-4.2 is substantially the same as its predecessors in the Code of Professional Responsibility (DR 7-104(A)(1)) and the earlier Canons of Professional Ethics (Canon 9). (The American Bar Association's "code comparison" for Model Rule 4.2 states that the rule is "substantially identical" to DR 7-104(A)(1).)

The rule forbids a lawyer to communicate about the subject of the representation with a person the lawyer knows to be represented in the matter unless the lawyer obtains the permission of the person's counsel. The comment to the rule

GOVERNMENT EXHIBIT A

states that in the case of organizations (including corporations), the rule prohibits ex parte communications with "persons having a managerial responsibility on behalf of the organization and with any other person whose act or omission in connection with that matter may be imputed to the organization for purposes of civil or criminal liability or whose statement may constitute an admission on the part of the organization." The comment further states that if an agent or employee of the organization is represented by his or her own counsel in the matter, then it is the consent of that lawyer—not the organization's lawyer—that must be obtained.

Nothing in Rule 4-4.2 or the comment states whether the rule applies to communications with former managers and other former employees. To the extent that the comment implies that the rule does apply to these individuals, it is contrary to ethics committees' interpretation of the rule.

Rule 4-4.2 cannot reasonably be construed as requiring a lawyer to obtain permission of a corporate party's attorney in order to communicate with former managers or other former employees of the corporation unless such individuals have in fact consented to or requested representation by the corporation's attorney. A former manager or other employee who has not maintained ties to the corporation (as a litigation consultant, for example) is no longer part of the corporate entity and therefore is not subject to the control or authority of the corporation's attorney. In many cases it may be true that the interests of the former manager or employee are not allied with the interests of the corporation. In such cases the conflict of interests would preclude the corporation's attorney from actually representing the individual and therefore would preclude the corporation's attorney from controlling access to the individual. As the comment indicates with regard to current employees, if a former manager or former employee is represented in the matter by his personal attorney, permission of that attorney must be obtained for ex parte contacts, including contacts by the corporation's attorney.

A former manager or employee is no longer in a position to speak for the corporation. Further, under both the federal and the Florida rules of evidence, statements that might be made by a former manager or other former employee during an ex parte interview would not be admissible against the corporation. Both Rule 801(d)(2)(D), Federal Rules of Evidence, and Section 90.803(18)(c), Florida Evidence Code, provide that a statement by an agent or servant of a party is admissible against the party if it concerns a matter within the scope of the agency or employment and is *made during the existence of the agency or employment relationship.*

This Committee has not previously had occasion to issue an opinion on the question of communicating with former managers and employees but, as indicated above, bar ethics committees in a number of states have done so. The clear consensus is that former managers and other former employees are not within the

scope of the rule against ex parte contacts. Alaska Bar Opinion 88-3 (6/7/88) (Former employees are no longer part of corporate entity and no longer can act or speak on behalf of corporation; opposing lawyer therefore may contact former employees, including former members of corporation's control group who dealt with subject matter of litigation, but may not inquire into privileged communications); Colorado Bar Opinion 69 (Revised) (6/20/87) (Former employee cannot bind corporation as matter of law; lawyer may interview opposing party's former employees with regard to all matters except communications within corporation's attorney-client privilege); Illinois Bar Opinion 85-12 (4/4/86) (Former employees, including those who were part of corporation's control group, may be contacted without permission of corporate counsel; direct communications with former control group employees may elicit information adverse to corporation, but that direct contact no more deprives corporation of benefit of counsel than does direct communication with any potential witness); Los Angeles County, Calif., Bar Opinion 369 (11/23/77) (Although ethical dangers may be posed if rule prohibiting ex parte contacts is not extended to former controlling employees, no authority is found to support such extension); Maryland Bar Opinion 86-13 (8/30/85) (Lawyer may communicate with former employee of adverse corporate party if former employee is not represented by counsel).

Also, Massachusetts Bar Opinion 82-7 (6/23/82) (Lawyer may communicate with former employees of corporate defendant regarding matters within scope of their employment; former employees enjoy no current agency relationship that is being served by corporate counsel's representation); Michigan Bar Opinion CI-597 (12/22/80) (Plaintiff's attorney may communicate with prospective witness, who is former employee of corporate defendant, on subject matter of representation if employee is unrepresented); New York City Bar Opinion 80-46 (Former employees are no longer part of corporate entity and may be contacted ex parte); New York County Bar Opinion 528 (1965) (Although direct communication with any current manager or employee of defendant corporation is improper, restriction does not apply to communications with former employees); Virginia Bar Opinion 533 (12/16/83) (Lawyer may communicate directly with former officers, directors and employees of adversary corporation on subject of pending litigation unless lawyer has reason to know those witnesses are represented by counsel); Wisconsin Bar Opinion E-82-10 (12/82) (Lawyer may contact former employee of opposing party to obtain material information even though former employee was managing agent, if former employee has severed all ties with corporation and therefore is not in position to commit corporation).

See *Wright v. Group Health Hospital*, 691 P.2d 564 (Wash. 1984). In *Wright*, the Washington Supreme Court ruled that because former employees cannot possibly speak for a defendant corporation, the rule against communicating with adverse parties does not apply. The court found no reason to distinguish between former employees who witnessed an event and those whose act or omission caused

the event. The court said the purpose of the communication rule is not to protect a corporate party from revelation of prejudicial facts, but rather to preclude interviewing of employees who have authority to bind the corporation.

As stated above, it is ethically permissible for the inquiring attorney to contact former managers and other former employees of the opposing party without obtaining permission from the corporation's attorney unless those former employees are in fact represented by the corporation's attorney. But as indicated by some of the ethics committees cited above, the attorney should not inquire into matters that are within the corporation's attorney-client privilege (e.g., asking a former manager to relate what he had told the corporation's attorney concerning the subject matter of the representation).

ABA Formal Opinions

The ABA Standing Committee on Ethics and Professional Responsibility issues both formal and informal opinions. Formal opinions are on subjects determined by the committee to be of widespread interest or of unusual importance. They appear her in full text and are copyrighted by the ABA.

Formal Opinion 91-359
March 22, 1991

Contact With Former Employee Of Adverse Corporate Party

The prohibition of Rule 4.2 with respect to contacts by a lawyer with employees of an opposing corporate party does not extend to former employees of that party.

The Committee has been asked for its opinion whether a lawyer representing a client in a matter adverse to a corporate party that is represented by another lawyer may, without the consent of the corporation's lawyer, communicate about the subject of the representation with an unrepresented former employee of the corporate party.

The starting point of our inquiry is Model Rule of Professional Conduct 4.2, which states:

> In representing a client, a lawyer shall not communicate about the subject of the representation with a party the lawyer knows to be represented by another lawyer in the matter, unless the lawyer has the consent of the other lawyer or is authorized by law to do so.

The rule is, for purposes of the issue under discussion, substantially identical to DR 7-104(A)(1), which states as follows:

> (A) During the course of his representation of a client a lawyer shall not:
>
> (1) Communicate or cause another to communicate on the subject of the representation with a party he knows to be represented by a lawyer in that matter unless he has the prior consent of the lawyer representing such other party or is authorized by law to do so.

The comment to Rule 4.2 makes clear that corporate parties are included within the meaning of "party" in that Rule, and is helpful in defining the contours of that rule as it applies to *present* employees of corporate parties:

> [1] This Rule does not prohibit communication with a party, or an employee or agent of a party, concerning matters outside the representation. For example, the existence of a controversy between a government agency and a private party, or between two organizations, does not prohibit a lawyer for either from communicating with non lawyer representatives of the other regarding a separate matter. Also, parties to a matter may communicate directly with each other and a lawyer having independent justification for communicating with the other party is permitted to do so. Communications authorized by law include, for example, the right of a party to a controversy with a government agency to speak with government officials about the matter.
>
> [2] In the case of an organization, this Rule prohibits communications by a lawyer for one party concerning the matter in representation with persons having a managerial responsibility on behalf of the organization, and with any other person whose act or omission in connection with that matter may be imputed to

VERNMENT
EXHIBIT
B

> the organization for purposes of civil or criminal liability or whose statement may constitute an admission on the part of the organization. If an agent or employee of the organization is represented in the matter by his or her own counsel, the consent by that counsel to a communication will be sufficient for the purposes of this Rule. Compare Rule 3.4(f).
>
> [3] This Rule also covers any person, whether or not a party to a formal proceeding, who is represented by counsel concerning the matter in question.

The rationale on which Rule 4.2 was formulated was identified in *Wright v. Group Health Hospital*, 103 Wash.2d 192, 691 P.2d 564, 576 (1984).

> The purposes of the rule against ex parte communications with represented parties are "preserving the proper functioning of the legal system and shielding the adverse party from improper approaches." (Citing ABA Formal Opinion 108 (1934)).

The profession has traditionally considered that the presumptively superior skills of the trained advocate should not be matched against those of one not trained in the law. As discussed at Law. Man. Prof. Conduct 71:302,

> ... The rule against communicating with the opposing party without the consent of that party's lawyer does not admit of any exceptions for communications with "sophisticated" parties. Maru, 10861 (Fla. Bar Op. 76-21 (4/19/77)). See also *Waller v. Kotzen*, 567 F. Supp. 424 (E.D. Pa. 1983) (plaintiff's counsel contacted insurance company directly, after insurer was represented by counsel); *Estate of Vañades v. Sheppard Bus Service*, 469 A.2d 971 (N.J. Super. 1983) (negotiations were conducted with insurance company for defendants).

cf. Meat Price Investigators Assn. v. Iowa Beef Processors, 448 F.Supp. 1, 3 (S.D. Iowa 1977) (while leaving question of culpability of counsel's conduct to disciplinary authorities, court declined to disqualify counsel for interviewing an officer of an opposing party who was a "sophisticated businessman who was openly willing to share his knowledge of the beef industry with attorneys he knew to be plaintiff's counsel.") *See also* Code of Professional Responsibility EC 7-18:

> The legal system in its broadest sense functions best when persons in need of legal advice or assistance are represented by their own counsel. For this reason a lawyer should not communicate on the subject matter of the representation of his client with a person he knows to be represented in the matter by a lawyer, unless pursuant to law or rule of court or unless he has the consent of the lawyer for that person....

The comment to Rule 4.2 limits those *present* corporate employees covered by this rule to:

> persons having a managerial responsibility on behalf of the organization, and ... any other person whose act or omission in connection with that matter may be imputed to the organization for purposes of civil or criminal liability or whose statement may constitute an admission on the part of the organization.

The inquiry as to present employees thus becomes whether the employee (a) has "a managerial responsibility" on behalf of the employer-corporation, or (b) is one whose act or admission in connection with the matter that is the subject of the potential communicating lawyer's representation may be *imputed* to the corporation, or (c) is one whose "statement may constitute an admission" by the corporation.

Whether an employee falls into any of these three categories is inevitably an is-

sue affected by a host of factors, the exploration of none of which need detain us. These include at least the terms of the relevant statutory and common law of the state of the corporation's incorporation; applicable rules of evidence in the relevant jurisdiction; and relevant corporate documents affecting employees' duties and responsibilities.

At least insofar as the test of imputable act or omission is concerned all of these factors, in turn, would have to be applied within the context of "the matter in representation" to determine whether the acts or omissions of the employee can be imputed to the corporation with respect to that particular matter. That requires a determination of the scope of the subject matter of the potentially-communicating lawyer's representation.

The comment—by defining three categories of unrepresented corporate employees with whom communication "concerning the matter in representation" is prohibited absent the consent of the corporation's counsel or authorization of law—clearly implies that communication with all *other* employees on "the matter in representation" is permissible without consent, subject only to such other rules and other law as may be applicable. (*E.g.*, Rule 4.1, requiring truthfulness in statements to others and Rule 4.3, addressing a lawyer's dealings with unrepresented persons.)

Neither the Rule nor its comment purports to deal with *former* employees of a corporate party. Because an organizational party (as contrasted to an individual party) necessarily acts through others, however, the concerns reflected in the Comment to Rule 4.2 may survive the termination of the employment relationship.

(It is appropriate to note here that those addressed by the Comment are not denominated "employees" but "persons." The Rule presumably covers independent contractors whose relationship with the organization may have placed them in the factual position contemplated by the Comment. Because the issue this Opinion addresses deals expressly with former *employees*, we need not explore the ramifications of this expansive terminology.)

While Rule 4.2 does not purport by its terms to apply to former employees, courts confronting the issue have interpreted Rule 4.2 (as illuminated by its comment) and DR 7-1-4(A)(1) (which does not have such a comment or comparable discussion in any Ethical Consideration) in various ways.

Most recently, in an aside in a case dealing with current employees under DR 7-104(A)(1), the New York Court of Appeals noted its agreement with the Appellate Division that the rule applies "only to current employees, not to former employees." *Niesig v. Team I et al*, 76 N.Y.2d 363, 558 N.E.2d 1030 (1990). *See also Wright by Wright v. Group Health Hosp.*, 103 Wash. 2d 192, 691 P.2d 564 (1984) (reasoning that former employees could not possibly speak for or bind the corporation, and therefore interpreting DR 7-104(A)(1) as not applying to them); and *Polycast Technology Corp. v. Uniroyal, Inc.*, 129 F.R.D. 621 (S.D.N.Y. 1990) (holding that DR 7-104 does not bar contacts with former corporate employees, at least in absence of a showing that the employee possessed privileged information).

On the other hand, other courts have held that former employees *are* covered (it is usually phrased that they will be considered "parties" for *ex parte* contact purposes) under certain circumstances. Thus, Rule 4.2 has been held to bar *ex parte* contacts with former employees who, while employed, had "managerial responsibilities concerning the matter in litigation." *Porter v. Arco Metals*, 642 F.Supp. 1116, 1118 (D. Mont. 1988). In *Amarin Plastics v. Maryland Cup Corp.*, 116 F.R.D. 36 (D. Mass. 1987) the Court, while recognizing the possible applicability of Rule 4.2 to former employees, declined to apply it on the facts of that case. It noted, however, the additional

possibility that communications between a former employee and his former corporate employer's counsel may be privileged. *Id.*, at 41. *See also In re Coordinated Pre-Trial Proceedings in Petroleum Products Antitrust Litigation*, 658 F.2d 1355, 1361 n.7 (9th Cir. 1981), *cert. denied*, 455 U.S. 99 (1982) (noting that the rationale of *Upjohn v. United States*, 449 U.S. 383 (1981), with respect to corporate attorney-client privilege applies to former as well as current corporate employees). In *Public Service Electric and Gas Company v. Associated Electric and Gas Ins. Services, Ltd.*, 745 F. Supp. 1037 (D. N.J. 1990) the court interpreted Rule 4.2 to cover all former employees.

Commentators on the subject of *ex parte* contacts with former employees have likewise urged application of the prohibition on contacts to at least some former corporate employees. *See, e.g.*, Stahl, *Ex Parte Interviews with Enterprise Employees: A Post-Upjohn Analysis*, 44 Wash. & Lee L. Rev. 1181 at 1227 (1987), recommending a functional approach deeming

> any present or former employee who is identified with an enterprise, either for purposes of resolving disputed issues or effective representation of the enterprise, to be a party representative for discovery purposes. Any other rule would put enterprises at a distinct and unfair disadvantage and may effectively deny enterprises the full benefit of representation by counsel....

See also Miller and Calfo, *Ex Parte Contact with Employees and Former Employees of a Corporate Adversary: Is It Ethical?*, 42 Bus. Law. 1053 at 1072-73 (1987):

> [C]ourt authorization or opposing counsel's consent to ex parte contact should be required if the former employee was highly-placed in the company (such as a former officer or director) or if the former employee's actions are precisely those sought to be imputed to the corporation.

While the Committee recognizes that persuasive policy arguments can be and have been made for extending the ambit of Model Rule 4.2 to cover some former corporate employers, the fact remains that the text of the Rule does not do so and the comment gives no basis for concluding that such coverage was intended. Especially where, as here, the effect of the Rule is to inhibit the acquisition of information about one's case, the Committee is loath, given the text of Model Rule 4.2 and its Comment, to expand its coverage to former employees by means of liberal interpretation.

Accordingly, it is the opinion of the Committee that a lawyer representing a client in a matter adverse to a corporate party that is represented by another lawyer may, without violating Model Rule 4.2, communicate about the subject of the representation with an unrepresented former employee of the corporate party without the consent of the corporation's lawyer.

With respect to *any* unrepresented former employee, of course, the potentially-communicating adversary attorney must be careful not to seek to induce the former employee to violate the privilege attaching to attorney-client communications to the extent his or her communications as a former employee with his or her former employer's counsel are protected by the privilege (a privilege not belonging to or for the benefit of the former employee, by the former employer). Such an attempt could violate Rule 4.4 (requiring respect for the rights of third persons).

The lawyer should also punctiliously comply with the requirements of Rule 4.3, which addresses a lawyer's dealings with unrepresented persons. That rule, insofar as pertinent here, requires that the lawyer contacting a former employee of an opposing corporate party make clear the nature of the lawyer's role in the matter, giving occasion for the con-

tact, including the identity of the lawyer's client and the fact that the witness's former employer is an adverse party. *See, e.g., Brown v. Peninsula Hospital Centers*, 64 A.D.2d 685, 407 N.Y.S.2d 586 (App. Div. 1978) (attorneys for defendant hospital should have disclosed potential conflict of interest before talking to treating physician and producing him for deposition as hospital's representative); ABA Informal Opinion 908 (1966).

Formal Opinion 91-360
July 11, 1991

Prohibition of Partnerships with Nonlawyers: Extrajurisdictional Effect

A lawyer who is licensed both in a jurisdiction that prohibits partnerships with nonlawyers, as in Model Rule 5.4(b), and in a jurisdiction that permits lawyers to form partnerships with nonlawyers, but who practices only in the latter jurisdiction, should not be subject to the prohibition of the jurisdiction where the lawyer does not practice. On the other hand, if a lawyer licensed in two such jurisdictions is engaged in practice in the jurisdiction that prohibits such partnerships, the lawyer must adhere to the restrictions of that jurisdiction.

The ethical prohibition on a lawyer practicing law in partnership with a nonlawyer that is embodied in Rule 5.4(b) of the ABA Model Rules of Professional Conduct has until very recently been in force in every American jurisdiction.[1] This unanimity, however, was broken at the beginning of 1991 when a different version of Rule 5.4(b), allowing lawyers to practice in partnership with nonlawyers in certain circumstances, came into effect in the District of Columbia.[2] In this Opinion we address the question of what ethical rule should govern when lawyers are partners in a law firm that, as permitted by the D.C. rule, includes nonlawyer partners, but are also members of the bar of another juris-

[1]The ABA's formal prohibitions against lawyer partnerships with non-lawyers date back to 1928, when Canon 33 was added to the Canons of Ethics. Canon 33 provided in pertinent part that "[p]artnerships between lawyers and members of other professions or non-professional persons should not be formed or permitted where any part of the partnership's employment consists of the practice of law." Canon 34 prohibited fee splitting with nonlawyers. Canon 35 warned against lawyers being "controlled or exploited by any lay agency, personal or corporate, which intervenes between client and lawyer."

In 1969, the Model Code of Professional Responsibility replaced the Canons of Ethics. DR 3-103 carried over Canon 33's prohibition against lawyers forming partnerships with nonlawyers but phrased the prohibition in mandatory rather than merely precatory language. DR 3-102 continued Canon 34's prohibition against fee-splitting with nonlawyers, with certain limited exceptions. DR 5-107(C) prohibited lawyers from practicing law with or in the form of a professional corporation if "(1) a non-lawyer owns any interest therein. . . ; (2) a non-lawyer is a corporate director or officer thereof; or (3) a non-lawyer has the right to direct and control the professional judgment of a lawyer."

In 1983, the ABA Model Rules of Professional Conduct supplanted the Model Code. Model Rule 5.4 incorporated traditional restrictions against lawyer and nonlawyer associations. Rule 5.4(b) reproduced verbatim DR 3-103(A)'s prohibition of lawyer partnerships with nonlawyers. The Model Rule as originally proposed by the Commission on Evaluation of Professional Standards (commonly known as the Kutak Commission) included a proposed Rule 5.4 that would have allowed nonlawyer partners in law firms on somewhat broader terms than those contemplated by the District of Columbia version of Rule 5.4(b); but that proposal was rejected by the ABA House of Delegates in 1983. *See The Legislative History of the Model Rules of Professional Conduct. Their Development in the ABA House of Delegates* 160 (ABA Center for Professional Responsibility 1987). Rule 5.4(a) continued the Code's prohibition against fee-splitting with nonlawyers. Rule 5.4(d) is substantially identical to DR 5-107(C).

For a detailed treatment of the history of the ABA restriction on lawyer collaboration with nonlawyers as well as a close consideration of the various arguments for and against such collaborations, *see* Andrews, *Nonlawyers in the Business of Law: Does the One Who Has the Gold Really Make the Rule?*, 40 Hastings L.J. 577 (1989).

MEMORANDUM IN OPPOSITION TO PLAINTIFF'S
MOTION FOR AN ORDER ALLOWING
EX PARTE CONTACTS WITH FORMER EMPLOYEES

Defendant Florida Cities Water Company ("Florida Cities") hereby opposes Plaintiff United States' Motion for an Order Allowing Ex Parte Contacts with Former Employees ("Motion"). For the reasons that follow, unless advance notification has been given to Defendant of any intended contacts with former employees, and unless counsel for Defendant has the opportunity to be present during such contacts, Plaintiff's contacts with former employees should not be allowed. Plaintiff's Motion should therefore be denied.

I. BACKGROUND

In April 1994, counsel for Defendant learned from former Florida Cities employees that, on several occasions beginning about February 1994, counsel for the Plaintiff engaged in ex parte contacts with several former employees of Florida Cities and was in the process of scheduling and attempting to engage in further ex parte contacts with former employees regarding the substance of the instant litigation. Defendant and Defendant's counsel had no notice that the Plaintiff had any intention of making such contacts outside the context of depositions.[1/] Defendant also learned of ex parte contacts made by counsel for the Plaintiff with consultants who where hired by Defendant to work on projects that are at issue in this litigation.

In April of 1994, Defendant learned that at least one ex parte meeting between a Department of Justice attorney and a former Florida Cities' employee had already been held. Specifically, in approximately early March 1994, counsel for the Plaintiff travelled to Australia and met with Robert H. French, former Senior Vice President of Defendant Florida Cities (employed by Defendant from

---

[1/] Counsel for both parties had discussed on several occasions the expectation that former employees, including Mr. Robert French, a former Florida Cities' employee currently residing in Australia, would be voluntarily deposed with the full cooperation of Florida Cities. During these discussions, Department of Justice attorneys failed to disclose to Defendant that contact with Mr. French had already occurred and that a Department of Justice attorney had travelled to Australia to meet with him. If, as the United States now maintains, such contacts were proper and routine, it is puzzling why the United States took steps to conceal these contacts from Florida Cities.

1987 to 1990), at his permanent residence in Wahroonga, N.S.W., Australia. Counsel for Defendant was subsequently informed by Mr. French that the Department of Justice attorney had met with him and had sought information relating directly to the central legal and factual issues in this litigation. Had Defendant Florida Cities known of Plaintiff's intent to meet with Mr. French, Florida Cities would have strenuously objected to the Department of Justice's conducting such a meeting secretly and without notice and would have asked for the opportunity to be present.

Defendant also subsequently learned that counsel for the Plaintiff had scheduled several additional meetings with former Florida Cities' employees to take place late in the week of April 18, 1994. Specifically, Defendant learned that interviews were either scheduled or attempted to be scheduled with (1) Antone A. Reeves, former Executive Vice-President and Chief Operating Officer of Defendant Florida Cities (employed by Defendant from approximately 1968 to 1991); and (2) James Elder, former Manager of Engineering and Construction for Defendant Florida Cities (employed by Defendant from 1989 to 1992). In addition, counsel for Florida Cities learned that the Plaintiff had scheduled an interview with William D. Harrop, President of Source, Inc., who was the Director of Engineering for the design of the waste water treatment facility at issue here, Florida Cities' Waterway Estates.

In an effort to speed up discovery, upon learning of the above contacts, Florida Cities did not oppose Plaintiff counsel's having these meetings, but did

ask the former employees that Florida Cities counsel be allowed to attend any future meetings, which the Department of Justice attorneys had represented as "informal interviews" to the former employees. All the contacted persons readily agreed to invite Florida Cities' counsel to attend any future meetings with the Plaintiff.

Notwithstanding the desire of the contacted former employees that Florida Cities' counsel attend the meetings, Florida Cities' counsel learned that Plaintiff continued to pursue scheduling meetings excluding Florida Cities' counsel, even when at least one such contacted person stated that he felt "pressured" by the "demanding tone" of Plaintiff counsel's repeated requests. See attached Affirmation of James A. Elder.

An example of such "pressure" was the Department of Justice's informing one such person, Mr. James A. Elder, during the course of the meeting requests from the Department of Justice, that the United States had acquired personal information on him that revealed that he had left his former position of employment under "negative circumstances" and that the United States Department of Justice would subpoena him and depose him if he would not agree to meet with Plaintiff's counsel alone. See attached Affirmation of James A. Elder.

Upon learning of these contacts and the refusal of Plaintiff to allow Florida Cities counsel to attend the meetings, Florida Cities immediately requested the Plaintiff in writing to immediately stop scheduling and engaging in

ex parte contacts with former employees of Florida Cities regarding the subject matter of this case without first notifying Defendant and giving Defendant an opportunity to be present at any such meetings. See Defendant's letter of April 19, 1994, at 1, attached hereto as Exhibit A. Counsel for Defendant apprised the Plaintiff that the individuals Plaintiff sought to interview included former executive-level employees of Florida Cities who were both decision makers and persons privy to attorney-client privileged and other confidential information. Id. at 2. Counsel for Defendant advised the Plaintiff that Defendant clearly anticipated that these individuals would be deposed by Plaintiff, and would cooperate fully in the scheduling and conducting of such depositions. Id. at 2-3.

Defendant also apprised the Plaintiff that some of the persons they contacted and sought to interview informed Defendant that "they were made to feel pressured by the Department of Justice to have such meetings and that DOJ urged at least one such person contacted not to allow Florida Cities' counsel to attend a meeting, even though this person requested that [Florida Cities' counsel] attend." Id. at 2. Defendant further alerted counsel for Plaintiff that Florida Cities was informed that one person "was told that the Department of Justice would cancel the meeting if Florida Cities' counsel were present." Id. In light of this pressure being exerted by Plaintiff's counsel upon the former employees to hold the planned meetings promptly, Florida Cities feared that other meetings might occur before it could move this court for a Protective Order prohibiting

such contacts. Consequently, Defendant's counsel requested a prompt reply from the Department of Justice.

Counsel for Plaintiff shortly thereafter agreed to cease contacting former employees of Defendant without first contacting counsel for Florida Cities. See Plaintiff's letter of April 20, 1994, at 1, attached hereto as Exhibit B. Since Defendant's receipt of Plaintiff's April 20, 1994, letter, counsel for the Plaintiff has not contacted counsel for Defendant to advise of any intended contacts with former Florida Cities employees. To the best of Defendant's knowledge, there have been no further contacts between Plaintiff's counsel and former Florida Cities employees since April 20, 1994.

On June 23, 1994, however, Defendant received a letter from Plaintiff indicating that the Plaintiff, upon further consideration, had concluded it would no longer refrain from engaging in ex parte contacts with former Florida Cities employees, and requesting Defendant's agreement to a stipulation

> in which the United States is expressly granted the unencumbered right to unrestricted ex parte contacts with former employees and consultants of Florida Cities, but is prohibited from inquiring into communications between employees and Florida Cities attorneys which took place during the employees' employment with Florida Cities.

Plaintiff's letter of June 23, 1994, at 2, attached hereto as Exhibit C. Counsel for Plaintiff stated that unless Defendant agreed to the stipulation, Plaintiff would move the Court to allow the "unencumbered right to unrestricted ex parte contacts" sought by Plaintiff. Counsel for the Plaintiff agreed to honor its earlier commitment of refraining from contacting former employees without first

contacting an attorney of record for Defendant until Defendant signed the stipulation or the Court ruled on the matter, whichever came first. Defendant refused to sign Plaintiff's proposed stipulation, and on June 23, 1994, Plaintiff served Defendant with a copy of the instant Motion.

Subsequent to the filing of this Motion, Defendant requested Plaintiff's consent to an extension to respond to the Motion. See Defendant's letter of June 29, 1994, at 1, attached hereto as Exhibit D. In its letter responding to Defendant's request, counsel for the Plaintiff made the following additional demands and observations:

> [A]s a matter of equities in trial preparation, we also ask you to voluntarily refrain from contacting former employees of Florida Cities Water Company without first contacting the United States and giving it the opportunity to participate in the contact.
>
> Furthermore, as an illustrative matter, we would point out that under the arguments you have made to us to date on this issue, you should refrain from contacting Julie Karleskint, a current Florida Cities employee who is a former EPA contractor.

Plaintiff's letter of June 30, 1994, at 2, attached hereto as Exhibit E.

Unlike the Plaintiff, Defendant Florida Cities has a vital ongoing interest in protecting Defendant's former employees' knowledge of privileged or confidential information and avoiding its potential release, inadvertent or otherwise, to opposing counsel in litigation after the employees leave Defendant's employ. Indeed, the release of any such privileged or confidential information, whether inadvertent or otherwise, would cause great harm to Defendant's interests, and would prejudice Defendant in this litigation.

II. ARGUMENT

The professional conduct of attorneys in this Court "is governed by the model rules of professional conduct of the American Bar Association as modified and adopted by the Supreme Court of Florida." Browning v. AT&T Paradyne, 838 F.Supp. 1564, 1566 (M.D.Fla. 1993), citing U.S.Dist.Ct., M.D.Fla.Loc.R. 2.04(c). Under Rule 4.2 of the American Bar Association Model Rules of Professional Conduct ("ABA Model Rules" or "Rules"),

> [i]n representing a client, a lawyer shall not communicate about the subject of the representation with a party the lawyer knows to be represented by another lawyer in the matter, unless the lawyer has the consent of the other lawyer or is authorized by law to do so.

The comment to Rule 4.2 explains that

> [i]n the case of an organization, this Rule prohibits communications by a lawyer for one party concerning the matter in representation with persons having a managerial responsibility on behalf of the organization, and with any other person whose act or omission in connection with that matter may be imputed to the organization for purposes of civil or criminal liability or whose statement may constitute an admission on the part of the organization.

In Rentclub, Inc. v. Transamerica Rental Finance Corp., 811 F.Supp. 651, 657 (M.D.Fla. 1992), this Court pointed out that "[i]t has been determined that a former employee may be considered a 'party' for purposes of Model Rule 4.2." Citing Public Service Electric & Gas Co. v. Associated Electric and Gas Insurance Services, Ltd., 745 F.Supp. 1037 (D.N.J. 1990), and Cronin v. Eighth Judicial Circuit, 781 P.2d 1150 (Nev. 1989). In particular, this Court explained

that a former employee is considered a "party" under Rule 4.2 "because of his position and knowledge," id. at 658:

> "[C]ourt authorization or opposing counsel's consent to ex parte contact should be required if the former employee was highly-placed in the company (such as a former officer or director) or if the former employee's actions are precisely those sought to be imputed to the corporation."

Id. at 657-58, quoting Miller and Calfo, Ex Parte Contact with Employees and Former Employees of a Corporate Adversary: Is It Ethical?, 42 Bus.Law. 1053 at 1072-73 (1987). Indeed, as this Court recently held in Browning, supra,

> [i]n reliance on Rule 4-4.2 and its corresponding comments, this Court has and continues to hold that a "party" for purposes of this rule includes former managerial employees, if their statements ". . . could be admissions against the corporation or . . . their actions could be imputed to the corporation."

838 F.Supp. at 1567, quoting Rentclub, 811 F.Supp. at 657. Cf. Manor Care of Dunedin, Inc. v. Keiser, 611 So.2d 1305, 1308 (Fla.Dist.Ct.App. 1992) (denying motion for protective order but citing Rentclub and acknowledging possibility of different outcome had movant sought protective order prohibiting contacts with former employees who "might fall within this privileged 'managerial class' identified by Judge Kovachevich").

In both Rentclub and Browning, this Court distinguished ABA Model Rule 4.2 from its precursor, Disciplinary Rule (DR) 7-104(a)(1), "which was not meant to include former employees under the definition of the corporate 'party'," and the cases applying DR 7-104(a)(1), which "do not involve the situation where . . . a former employee had access to privileged information while

employed." Rentclub, 811 F.Supp. at 657. Consequently, this Court held in Rentclub that

> [p]rivileged communications present a distinct problem with respect to contact with former employees, thus ex parte contact should be barred to prevent disclosure of any inadvertent confidential communications.

Id. This Court further stated that "[t]he interest of the corporation in protecting privileged information acquired by an employee during the course of employment from disclosure to an opponent in litigation remains after the employee leaves the corporation." Id. at 658. This Court also noted that even if a former employee lacked the necessary agency relationship necessary to bind the corporation through an admission made after his employ, "the relation or connection of the employee to the corporation's potential civil liability may be so close as to require, in all fairness, that the adversary's ex parte contacts be prohibited." Id., quoting Sperber v. Mental Health Center, No. 82 C7428 (S.D.N.Y. Nov. 21, 1983); cf. In re: Home Shopping Network, Inc., Securities Litigation, No. 87-248-CIV-T-13A, 1989 WL 201085, at *1 (M.D.Fla. 1989) (pre-Rentclub/Browning decision allowing ex parte contacts with former employees because of no concerns regarding "elicitation of statements binding on the corporate party").

Federal district courts in other jurisdictions considering this question have similarly held that a former employee is to be considered a party for purposes of Rule 4.2, and have held improper ex parte communications with former employees. See, e.g., Public Service Electric & Gas Co., supra, 745 F.Supp. at

1039-43 (holding that Rule 4.2 proscribes any ex parte contact with former employees of an adverse corporation); Sperber v. Mental Health Center, supra, No. 82 C7428 (S.D.N.Y. Nov. 21, 1983) (proscribing ex parte contact with former employees whose acts were the subject of the litigation). This rule is also consistent with general principles underlying the broad judicial concern regarding protection of corporate parties' privileged or confidential information that may be disclosed through their employees, former employees, or agents. Indeed, a recently issued decision by the Eighth Circuit held that communications between an independent consultant retained directly by a party and outside counsel for that party were covered by the attorney-client privilege, since the consultant was "for purposes of the privilege, the functional equivalent of [the party's] employee . . . ." In re: Bieter Company, No. 94-1037, 1994 WL 43562, at *11 (8th Cir. 1994).

In the instant case, the former Florida Cities employees whom Defendant is aware were sought to be interviewed by the Plaintiff are "parties" under Rule 4.2, as defined by this Court in Rentclub and Browning. Messrs. French, Reeves and Elder are all former "managerial employees" who "because of [their] position and knowledge" would reasonably be expected to be privy to attorney-client privileged and other confidential information. The "relation or connection" of Florida Cities' former employees to Florida Cities' potential civil liability is "so close as to require, in all fairness, that the [United States'] ex parte contacts be prohibited." Defendant continues to have "a vital interest in the

employee's knowledge of privileged information and its potential release to opposing counsel after the employee leaves."

Plaintiff urges this Court to reverse the holding of Rentclub, arguing that this Court's decision in Rentclub was "erroneous." Plaintiff's Memorandum in Support of Motion (Pl.'s Mem. Supp.) at 9. Plaintiff asserts that the Rentclub decision leads to "anomalous, impractical, and illogical results." Id. In particular, Plaintiff claims the Rentclub/Browning line of cases "necessarily increase the use of formal discovery," which Plaintiff argues is "a result clearly antithetical to the Supreme Court's intentions in amending the discovery rules . . . in December 1993." Id. Plaintiff concedes that "Florida Cities has a legitimate ongoing interest in ensuring that information protected by the attorney-client privilege not be jeopardized by virtue of an employee having left the company," but asserts that the Government "has an equally strong interest in gathering evidence . . . as well as in having ongoing contacts with potential Government witnesses without sharing its work product with the Defendant's attorneys." Id. at 10-11. Finally, the Government commits itself to "avoid eliciting attorney client privileged information from former employees." Id. at 11.

The 1993 revisions to the discovery rules were intended, inter alia, "to accelerate the exchange of basic information about the case and to eliminate the paper work involved in requesting such information . . . ." Fed. R. Civ. P. 26 advisory committee's notes, 1993 Amendment. They were not intended to

abrogate or diminish the protection afforded attorney-client privileged and other confidential information. Whatever the value of speed and informality in discovery, it is secondary to the strong policy shielding privileged information from disclosure. No matter how efficient Plaintiff's discovery tactics may be, if they result in the disclosure of privileged information, they should not be allowed.

Plaintiff claims that it will "avoid" eliciting attorney-client privileged information. Without seeking to cast into doubt the ethical conduct of the Department of Justice in this case, Defendant has strong reservations about entrusting the protection of its privileged information to the best efforts of counsel for the Plaintiff and the self-censorship of former employees who are unlikely to understand the scope of privilege.

Despite the Government's insistence that it understands Defendant's "legitimate ongoing interest" in protecting privileged information, counsel for the Plaintiff have already demonstrated that they will not act with an overabundance of caution when it comes to "avoid[ing]" the disclosure of such information. In the face of this Court's clearly enunciated law under Rentclub and Browning, counsel for Plaintiff nevertheless determined to engage in ex parte contacts with former Florida Cities employees without first notifying Defendant of its intended course of conduct or seeking permission from the Court to do so. Indeed, not only did counsel for the United States exhibit a lack of concern for protecting Florida Cities' privileged information, it in fact made some former employees

feel "pressured" to meet with Department of Justice lawyers and threatened to call off interviews when advised by the former employees that they wished counsel for Defendant to be present. It is not difficult to understand how an individual might come to feel "pressured" to agree to meet with the Government when, for example, an attorney from the United States Department of Justice appears in Australia to interview that person.

It was precisely these types of concerns that prompted the District of New Jersey to conclude that ex parte contacts with former employees should be prohibited, and that depositions should be used instead.

> It is . . . unworkable to allow ex parte contact on the condition that the investigator or attorney cease questioning if it appears that imputable information is being divulged. Such a procedure . . . threatens to spawn needless litigation concerning breaches of this undefinable restriction. It also places great ethical faith in the ability of the interviewer to cease questioning the moment the very information sought is revealed. Moreover, even if zealously adhered to, such a restriction would merely delay the institution of the deposition process. It is more logical to hold that such individuals are off limits except for formal discovery because they "may" make statements which can be imputed.
>
> . . . .
>
> It is also true that the deposition process is the best method of developing clear factual records and protecting the rights of all parties without unduly favoring or prejudicing either side. It is a far more reliable and ethically sound procedure . . . .

Public Service Electric & Gas Co., 745 F.Supp. at 1042-43.

Plaintiff's demand in its June 30, 1994, letter that Defendant refrain from contacting its own former employees -- as well as its suggestion that Defendant not speak with its current Operations Manager because she once worked as a

contractor for EPA -- best exemplifies its misunderstanding of the rationale underlying Public Service Electric & Gas Co., Rentclub and Browning. The dispute here is not whether any former employee of a party may be contacted ex parte by that party's opponent. Rather, the issue here is whether a party may engage in "unencumbered" and "unrestricted" contacts with an opposing party's former employee who had access to attorney-client privileged and other confidential information, without the opposing party being notified in advance and allowed to be present to protect this information. Such attorney-client privileged and other confidential information remains the property of the former employer even after the employee departs, and defendant has an ongoing interest in the protection of this information from disclosure. See Rentclub, 838 F.Supp. at 658.

In this case, unless Florida Cities is notified in advance of Plaintiff's intended contact and given an opportunity to be present, it is certain that no one at such a meeting will have the same motivation to protect Defendant's privileged and confidential information as would Florida Cities itself. Defendant is in no way suggesting that either the United States or Defendant's former employees would intentionally elicit or release privileged or confidential information; however, without Defendant's counsel present to vigilantly and carefully protect this information, it is quite possible that such privileged information may be inadvertently disclosed. The strong policies underlying the protection of attorney-client privileged and other confidential information, as reaffirmed by

this Court in Rentclub and Browning, together with the unfair prejudice that would result from the release, inadvertent or otherwise, of such information, compel that Plaintiff's Motion be denied.

Finally, it is important to note that a central concern in Rentclub was this Court's admonition that "[w]hile the Code of Professional Conduct does not contain an express provision prohibiting the appearance of impropriety, Florida law clearly retains this provision." Id. at 654. See also, Contant v. Kawasaki Motors Corp., U.S.A., Inc., 826 F.Supp 427, 429 (M.D.Fla. 1993) (quoting Rentclub: "'even an appearance of impropriety may, under the appropriate circumstances, require prompt remedial action from the court . . . .'"). Defendant respectfully submits that Plaintiff's Motion should especially be denied in this instance to avoid any appearance of impropriety on the part of the United States.[2/]

III. CONCLUSION

For all the above-stated reasons, Defendant respectfully requests that this Court deny Plaintiff's Motion and prohibit contact by counsel for the United States with former employees of Florida Cities, unless notification has been

---

[2/] In Rentclub, this Court granted a motion to disqualify counsel in a situation such as the one presented in this motion, stating that "[w]here the question [of disqualification] arises any doubt should be resolved in favor of disqualification." 811 F.Supp. at 654 (emphasis in original). Consequently, the Defendant specifically reserves any rights it may have to move for disqualification of counsel for the United States, should conditions warrant such action.

given to Defendant and counsel for Defendant has the opportunity to be present during such contacts.

IN THE UNITED STATES DISTRICT COURT
FOR THE MIDDLE DISTRICT OF FLORIDA
FORT MYERS DIVISION

UNITED STATES OF AMERICA, Plaintiff, v. FLORIDA CITIES WATER COMPANY, Defendant.	CIVIL ACTION NO.: 93-281-CIV-FTM-21

Affirmation of James A. Elder

1. My name is James A. Elder. My home address is 6625 Mauna Loa Boulevard, Sarasota, FL 34241.

2. I am currently the Administrator at Englewood Water District, P.O. Box 1399, Englewood, FL 34295-1399. I have been employed there since May 26, 1992.

3. I was formerly employed as Manager of Engineering and Construction at Florida Cities Water Company from August 4, 1989 to May 20, 1992.

4. I have personal knowledge of the facts recited in this Affirmation.

5. During the week of April 11, 1994, I was called on the telephone by Ms. Dianne Spellberg, who identified herself as being an attorney with the United States Department of Justice.

6. During the approximate two-week period between this first conversation and the requested meeting of April 21 or 22, 1994, I had three to four conversations with Ms. Spellberg regarding the desire of the United States Department of Justice to meet with me concerning this case.

7. In the first conversation of about April 11, 1994, Ms. Spellberg said that she was calling me regarding the lawsuit filed against Florida Cities Water Company in relation to the Waterway Estates Wastewater Treatment Facility. She explained that the Department of Justice was contacting former employees of Florida Cities Water Company. After a short discussion regarding some of my duties at FCWC and my departure from there, she said she was surprised, since her information was that I had left under "negative circumstances." I did not know to what she might be referring, since I had left my old job at Florida Cities for a higher paying job and since my departure was on good terms with Florida Cities. As far as I am aware, there were no "negative circumstances" associated with my departure from Florida Cities.

8. In this conversation Ms. Spellberg stated that the purpose of her contact was to arrange an informal meeting to discuss the pending lawsuit. She said that she would rather not involve outside attorneys at this stage. She implied, and I understood, in this conversation that the requested meeting would be between just myself and her. She stated that she would be in the area on April 21 and 22, 1994 and would like to meet with me then. I tentatively agreed to meet with her then.

9. After some thought, I called another former employee of FCWC to see if he had also been contacted. When I found out that this other employee had also been contacted and that the meeting with him was to be in the same week as my own meeting, we mutually agreed that in order to save time for both us and Ms. Spellberg, we could meet at the same time. We believed that this would be appropriate, based on Ms. Spellberg's telling us that the meetings were only informal.

10. After speaking with this other former employee, I had another conversation with Ms. Spellberg and informed her of my desire to meet with her together with the other employee. Her response was less than enthusiastic, to say the least. She told me that the Department of Justice preferred to talk to people alone in such informal meetings. I also asked

her if the tentative date of our meeting could be changed, but she replied that she was going to meet with another Department of Justice attorney, who I gathered was her supervisor, on that date and that a change in the meeting did not fit with their schedule. Nevertheless, she said that she would discuss with others my desire to change the date of the meeting. She also told me for the first time that this other attorney would also plan on attending her meeting with me. In this conversation Ms. Spellberg stated that she could take my deposition, but that she would prefer not to get other attorneys involved this early in the suit. I was puzzled at her response, since I could not understand why she would object to others attending what she had told me was only an informal meeting. I was also surprised to learn in this conversation that now the requested meeting would be with two attorneys, not just her alone.

11. During the week of April 18, 1994, I also had conversations with Don G. Scroggin, counsel for Florida Cities Water Company, regarding the Department of Justice's request to meet with me. Mr. Don G. Scroggin, counsel to Florida Cities, asked me if he could sit in on the informal meeting to listen to the Department of Justice attorneys interview. I readily agreed to his attendance.

12. I had a final conversation with Ms. Spellberg during the week of April 18, 1994, regarding the requested meeting. She responded that the Department of Justice wanted to meet with me alone. She also informed me for the first time that now there would be not only herself and her supervisor, but that she was only part of a team of attorneys from the Department of Justice who would be in the area. Ms. Spellberg's tone during this last conversation was very demanding, and she restated the fact that the United States Department of Justice would subpoena me and/or take my deposition if this meeting did not occur.

13. Based on her demanding tone during this conversation and the new information that a team of attorneys from the Department of Justice had now been set up for this work, I concluded that this requested meeting was no longer going to be an informal information-gathering meeting, but something much more involved.

14. During all contacts with Ms. Spellberg, there was a significant amount of pressure to not only meet with her but to do so alone. This pressure had caused me not only to speak with Mr. Scroggin, but to also seek additional advice from an independent counsel.

15. I told Ms. Spellberg in this last conversation that I would not meet with her or others at all without my attorney being present and that if she needed to subpoena me or take my deposition, to do so.

I declare under penalty of perjury that the foregoing is, to the best of my knowledge, true and correct.

Re: Ex Parte Meetings with Florida Cities' Former Employees and Consultants (U.S. v. Florida Cities Water Company, No. 93-281-CIV-FTM-21D)

Dear Mr. Jacobs:

We have recently learned that the Department of Justice has on several occasions contacted and sought to meet with selected former employees and consultants of Florida Cities regarding the substance of this litigation without notifying opposing counsel. At least one such meeting has already occurred. We believe that such contacts are improper under applicable law, and we request that the Department of Justice immediately cease contacting and setting up meetings with former employees and consultants of Florida Cities regarding this case without first notifying Florida Cities and giving us the opportunity to be present at the meeting.

Several of these potential witnesses are former executive-level employees of Florida Cities who were both decision makers and persons privy to attorney-client privileged and other confidential information. Others are former consultants who worked closely with Florida Cities during the time of events at issue in this litigation. We fully expected the Department of Justice to notice the depositions of these and other potential witnesses, and we have already expressed our continuing willingness to cooperate fully with you in scheduling and conducting such depositions. However, we are dismayed by these attempts by the Department of Justice to circumvent this process by contacting these persons and seeking to conduct meetings on the substance of this case without notifying Florida Cities or giving us the opportunity to be present.

More disturbing, we are informed by more than one of these persons that they were made to feel pressured by the Department of Justice to have such meetings and that DOJ urged at least one such person contacted not to allow Florida Cities' counsel to attend a meeting, even though this person requested that we attend. (We understand that this person was told that the Department of Justice would cancel the meeting if Florida Cities' counsel were present.) We believe that it is improper for the Department to attempt to exert pressure on such an individual to meet alone with you under these circumstances.

As I am sure you are aware, the Middle District of Florida has held that, with respect to ex parte contact with former employees of an organization represented by counsel:

> Privileged communications present a distinct problem with respect to contact with former employees, thus ex parte contact should be barred to prevent disclosure of any inadvertent confidential communications.
>
> . . .
>
> [C]ourt authorization or opposing counsel's consent to ex parte contact should be required if the former employee was highly-placed in the company (such as a former officer or director) or if the former employee's actions are precisely those sought to be imputed to the corporation.

Rentclub, Inc. v. Transamerica Rental Finance Corp., 811 F.Supp 651 (M.D.Fla, 1992) at 657-658. In light of this authority and our open willingness to cooperate fully in your deposing these persons or other witnesses, pursuant to our joint agreement on discovery, we request that you notify us before making further contacts or before conducting any further meetings, so that we may be present.

Again, pursuant to our informal agreement that we would give each other notice of intended motions, we intend to file a Motion for a Protective Order regarding these contacts unless we can reach a mutually agreeable resolution before 2:00 pm Eastern Time tomorrow, Wednesday, April 20, 1994. We look forward to your full cooperation in this matter. Please contact me as soon as you receive this letter to communicate your intents.

Yours sincerely,

Don G. Scroggin

Re: United States v. Florida Cities Water
No. 93-281-CIV-FTM-21 (M.D. Fla.)

Dear Mr. Scroggin:

I am in receipt this morning of your fax sent on April 19, 1994 (at 9:13 p.m.). Kindly consider this an initial reply designed not to fully examine the issues you raise, but simply to meet the 2:00 p.m. deadline today you unilaterally saw fit to impose.

First, please be advised that the United States take serious exception both to your representation of certain facts and the state of the law on the issue in question.

Second, please be advised that the conduct of the Department of Justice in this matter has been fully in accord with the Department's guidelines for its attorneys in such matters. See 59 Fed. Reg. 10086 (March 3, 1994).

We do recognize, however, that the Department's guidelines arguably may conflict with the Court's decision in Rentclub v. Tansamerica Rental Finance Corp., 811 F. Supp. 651 (M.D. Fla. 1992). In light of this potential conflict, as you can well imagine, we will need to carefully study the issue you raise. In the meantime, however, in due deference to the Court's decision in Rentclub, and in acquiescence to your request, until further notice, the United States will not contact any former employees of Florida Cities Water Company without first contacting an attorney of record for the Company in this matter. Moreover, if, after further study, we determine that we can no longer honor that commitment, we will give you ample opportunity to bring your motion before making any such contacts.

I trust that this reply will satisfactorily address your concerns at least for the time being, but please do not hesitate

to contact me to discuss this matter at any time.

Sincerely,

Assistant Attorney General
Environment and Natural Resources
Division

Re: United States v. Florida Cities Water
No. 93-281-CIV-FTM-21 (M.D. Fla.)

Dear Mr. Scroggin:

This letter is in further reply to your letter of April 19, 1994 (faxed at 9:13 p.m. on that date) on the subject of the United States' right to have ex parte contacts with Florida Cities' former employees.

No doubt, you will recall that in your letter of April 19, you demanded that the United States "immediately cease contacting and setting up meetings with former employees and consultants of Florida Cities without first notifying Florida Cities and giving us the opportunity to be present at the meeting." Unless that demand was met by 2:00 p.m. the following day, you threatened to move for a protective order. The United States responded by your 2:00 p.m. deadline, tentatively agreeing to acquiesce in your demand, while reserving the right to readdress the issue after further study.

After thorough study, the United States has concluded that under any analysis of the law, your demand was overreaching and should no longer be met. We do, intend, however, to honor our earlier commitment not to contact any former employees of Florida Cities Water Company without first contacting an attorney of record for the Company in this matter, until such time as the parties have come to a mutually satisfactory resolution of the issue, or the court has ruled on it, whichever, comes first.

Our study of the issue has led us to believe that Florida Cities has a legitimate ongoing interest in ensuring that information protected by the attorney-client privilege not be jeopardized by virtue of an employee having left the Company. On

the other hand, we hope you can recognize that the United States has an equally strong interest in gathering evidence in this matter through all appropriate means, as well as in having ongoing contacts with potential Government witnesses without sharing its work product with the Defendant's attorneys.

We believe that a satisfactory resolution of the issue must take account of the interest of both parties. Our earlier tentative resolution only addressed Florida Cities' interests. Accordingly, we propose to enter into a stipulation, to be submitted to the Court for approval, in which the United States is expressly granted the unencumbered right to unrestricted ex parte contacts with former employees and consultants of Florida Cities, but is prohibited from inquiring into communications between employees and Florida Cities attorneys which took place during the employees' employment with Florida Cities. Such a stipulation is attached for your signature.

Two additional points should be made at this point. First and foremost, as I noted in my April 20, 1994 letter initially replying to your's dated April 19, 1994, and wish to reiterate herein, the United States takes serious exception both to your representation of certain facts and the state of the law on the issue in question. We have since had informal full and frank discussions with you on the subject. Second, our position and proposed compromise relies in part on the published legal-ethical analysis espoused by one of the premier authorities on the subject, Professor Geoffrey Hazard of the Yale Law School, who we understand serves on the Board of Florida Cities' parent company. Since your position to date has been so clearly antithetical to prevailing case law as well as Professor Hazard's analysis, we find your earlier demand to be somewhat disingenuous, if not hypocritical.

We do hope that you find the attached stipulation to be satisfactory. In keeping with the precedent that you sent in April, however, if you do not sign and transmit it to us by 5:00 p.m. today, we intend to file an appropriate motion with the Court.

Sincerely,

Assistant Attorney General
Environment and Natural Resources
Division

Re: United States v. Florida Cities Water
No. 93-281-CIV-FTM-21 (M.D. Fla.)

Dear Mr. Scroggin:

This responds to your letter of June 29, 1994, requesting an extension of twenty-one days in which to respond to the United States' Motion for an Order Allowing Ex-Parte Contacts with Former Employees.

We regret that for the following reasons we are unable to concur in such a lengthy extension. First, we find your suggested cause for the extension to be pretextual. Second, we presume that before you sent your letter of April 19, 1994 (faxed at 9:13 p.m. on that date, demanding that the United States "immediately cease contacting and setting up meetings with former employees and consultants of Florida Cities without first notifying Florida Cities and giving us the opportunity to be present at the meeting," and threatening to file a motion unless we acquiesced in your demand by 2:00 p.m. on April 20, 1994), you thoroughly researched the issue in question. Thus, you are hardly addressing the issue anew. Third, and most importantly, as you know, we have agreed to refrain from contacting any former employees of Florida Cities Water Company without first contacting an attorney of record for the Company in this matter, until such time as the parties have come to a mutually satisfactory resolution of the issue, or the court has ruled on it, whichever comes first. That commitment detracts from our trial preparation. Accordingly, we do not wish there to be any undue delay in the adjudication of the issue.

Notwithstanding these concerns, we are prepared to concur in an unconditional ten (10) day extension in the filing of your reply to our motion. You may represent to the court that we have

concurred in such an extension. If you choose to move for a more lengthy extension, kindly attach a copy of this letter to your motion so that the court will be duly and timely apprised of our opposition and can rule without awaiting a formal opposition.

In any event, as a matter of equities in trial preparation, we also ask you to voluntarily refrain from contacting former employees of Florida Cities Water Company without first contacting the United States and giving it the opportunity to participate in the contact.

Furthermore, as an illustrative matter, we would point out that under the arguments you have made to us to date on this issue, you should refrain from contacting Julie Karleskint, a current Florida Cities employee who is a former EPA contractor.

Sincerely,

Assistant Attorney General
Environment and Natural Resources
Division

UNITED STATES OF AMERICA, Plaintiff, v. FLORIDA CITIES WATER COMPANY, INC., Defendant.	CIVIL ACTION NO. 93-281-CIV-FTM-21

MOTION AND MEMORANDUM FOR PERMISSION TO FILE REPLY MEMORANDUM IN SUPPORT OF UNITED STATES' MOTION FOR AN ORDER ALLOWING EX-PARTE CONTACTS WITH FORMER EMPLOYEES

In accordance with Local Rule 3.01(b), the United States moves the Court for permission to file its Reply Memorandum in Support of United States' Motion for an Order Allowing Ex-Parte Contacts with Former Employees.

In its opposition to the United States' Motion, Defendant has introduced a number of factual issues which, while perhaps not material insofar as the legal issue at bar is concerned, warrant a reply, particularly because the United States takes serious exception to Defendant's representation of the salient facts. The United States believes that a reply brief is necessary for the Court to be fully apprised of the salient facts, particularly in the event that it decides not to hold oral argument.

Accordingly, the United States respectfully requests that the Court order that the reply brief be filed. A proposed order

is attached.

FORT MYERS DIVISION

UNITED STATES OF AMERICA, Plaintiff, v. FLORIDA CITIES WATER COMPANY, INC., Defendant.	)	CIVIL ACTION NO. 93-281-CIV-FTM-21

REPLY MEMORANDUM IN SUPPORT OF UNITED STATES' MOTION FOR AN ORDER ALLOWING EX-PARTE CONTACTS WITH FORMER EMPLOYEES

The Defendant has filed a memorandum in opposition to the United States' Motion for an Order Allowing Ex-Parte Contacts with Former Employees. The United States files the instant memorandum for the limited purpose of responding to certain portions of Defendant's brief.[1]

The United States acknowledges that it has had ex parte contacts with Defendant's former employees and a former consultant, and stands by its position in its initial brief that such contacts are both entirely proper as well as entirely necessary to professional and efficient trial preparation.[2] It

[1] As a limited reply, this brief does not address immaterial arguments or statements of facts by Defendant, even when inaccurate or misleading.

[2] Defendant's representation in its brief that there were contacts with more than one consultant is simply incorrect, and its statement that the contacts took place "with consultants who where [sic] hired by Defendant to work on projects that are at issue in this litigation," Defendant's brief at 2, is poorly drafted and/or misleading to the extent that it suggests that the United States contacted consultants hired by Defendant for the purposes of this litigation. William Harrop, the sole consultant

bears noting that not only did Defendant not object to such contacts until April 19, 1994, it actually facilitated the contacts by voluntarily providing to the United States, inter alia, the names and addresses of former employees and consultants having information relevant to the proffered claims and defenses.[3] At no time prior to April 19, 1994, did Defendant either advise the United States that any of these individuals had been privy to attorney-client privileged information, give the slightest hint that it objected to the United States contacting those individuals, or indicate that it wished to be present at any meetings with the individuals.[4] Once the Defendant did object on April 19, 1994, the United States agreed to voluntarily cease such contacts without first notifying Defendant until such

---

contacted to date by the United States, was associated with Defendant long ago, and is not presently a consultant to it. Further, in referring to Harrop as the "Director of Engineering for the design of the waste water treatment facility at issue here," id. at 3, Defendant obscures the fact that Harrop was a consultant, not an actual employee of Defendant. Moreover, both Harrop and one of the former employees, A.A. Reeves, are separately represented by counsel. Under Rule 4-4.2, if the United States wishes to communicate with Harrop or Reeves, it is obliged to obtain the consent of their respective attorneys, not Defendant's attorney.

[3] On February 4, 1994, the parties voluntarily and mutually disclosed "core information" relating to the case, including the "names and address of people having information that is relevant to the proffered claims and defenses." See 56 Fed. Reg. 55195, 55196 (October 25, 1991). The core information provided by Defendant is attached hereto as Exhibit A.

[4] In its February 4, 1994 core information disclosure, Defendant gave no information about the potential witnesses other than their names and addresses. In its April 19, 1994 letter, Defendant vaguely contends that "several of the potential witnesses" allegedly were privy to attorney-client privileged information, but fails to identify such individuals by name.

time as the parties reach an agreement or the Court has had the opportunity to rule on the issue. And, the United States stands by that commitment. The suggestion by Defendant that the United States has been anything less than fully candid in the process is simply disingenuous.

While the prevailing case law and commentary clearly support the United States' position on the issue at bar, it is also clear that reasonable attorneys and judges may differ as to whether Rule 4-4.2 should govern contacts with ex-employees.[5] There can and should be no doubt, however, that the United States takes its ethical obligations very seriously, and has taken pains to ensure that no privileged information was elicited from the ex-employees it contacted. Defendant must be well aware of the United States' efforts in this regard because Defendant has clearly gone to some trouble to ascertain what information Robert French provided to the United States. Its Operations Manager, Julie Karleskint, testified that she spoke to French for approximately one hour, and that at the time he had already spoken to Gerald Allen, (Executive Vice-President of one of Defendant's parent companies), as well as Bob Gordon (President of Defendant company and three of its parent companies). Deposition of Julie

---

[5] See the United States' initial brief. Also, compare Rentclub v. Transamerica Rental Finance Corp., 811 F. Supp. 651 (M.D. Fla. 1992) (ex parte contact with former employees generally prohibited) with In re Home Shopping Network, Inc. Securities Litigation, No. 87-248-CIV-T-13A (M.D. Fla., June 22, 1989) (order issued allowing plaintiffs' counsel to have ex parte contacts with defendant's former employees without its prior approval or notice) (copy attached).

Karleskint, April 21, 1994 at 18.[6] Notwithstanding blatant interruptions bordering on coaching by Defendant's counsel; see e.g., id. at 8, lines 19-11; id. at 19, lines 13-23; Karleskint testified that French indicated that he had been treated fairly by the Government. Id. at 26. Indeed, Karleskint's testimony revealed that French told her that the Government had been "very pleasant," and that he had not been pressured in any way into speaking to the Government. Id. at 26-27. And, French gave no indication of having been asked to divulge attorney-client privileged material. Id. at 27.

Surely, Defendant's extensive debriefing of Mr. French by no fewer than three of its high-level managers served to reassure Defendant that the United States was scrupulous in ensuring that no privileges were violated. Indeed, there is not a shred of evidence to the contrary. And, in the face of Ms. Karleskint's testimony, Defendant's cavalier statements in its brief to the effect that the United States was anything less than scrupulous themselves border on reckless.

The inequities that would prevail were Rule 4-4.2 construed to prohibit the United States from contacting Defendant's former employees and contractors are exemplified well simply by events to date. Having voluntarily refrained from making such contacts since the date of Defendant's objection to them, the United

---

[6] Ironically, if one were to strictly apply Defendant's reading of Rule 4-4.2, Defendant would be precluded from having discussions with Ms. Karleskint, who testified that she was formerly associated with EPA as a contractor. See id. at 49-55. (The original deposition transcript is filed herewith.)

States has been precluded from contacting the witnesses in question to obtain declarations from them. Defendant, on the other hand, has had the opportunity to solicit and file an "Affirmation" from James A. Elder.[7]

In short, Defendant's opposition fails to make out a sufficient legal or factual case to rebut the United States' Motion for an Order Allowing Ex-Parte Contacts with Former Employees. Accordingly, the Motion should be granted.

Respectfully submitted,

LOIS J. SCHIFFER
Acting Assistant Attorney General
Environment and Natural Resources Division

FILED

ORDER

The matter came before the Court on plaintiff's motion for an Order allowing ex parte contacts with defendant's employees, defendant's motion to disqualify counsel, and defendant's motion for a protective order to postpone the depositions of Lawrence Wilkov and James Elder. Upon consideration of the arguments of counsel, and the entire record in this matter, it is hereby ORDERED that:

1. Plaintiff's motion to allow ex parte contacts with defendant's employees is DENIED.

a. Except as set forth in the next two paragraphs, no attorney in the United States Department of Justice shall communicate with any of defendant's present or past employees, unless the communication is at a formal deposition at which the employee or witness will have the right to be represented by counsel.

54

b. If counsel for the plaintiff wishes to communicate other than at a deposition with a potential witness represented by counsel, counsel for the plaintiff shall give counsel for the defendant reasonable advance notice, so that defense counsel can contact counsel for the witness before any communication from plaintiff occurs.

c. If counsel for the plaintiff wishes to communicate other than at a deposition with a potential witness not represented by counsel, counsel for the plaintiff shall give counsel for the defendant reasonable advance notice, so that defense counsel can discuss the matter with the witness before any communication from plaintiff occurs. Thereafter, counsel for the plaintiff shall advise the witness that he or she should retain counsel before any communication occurs, and further advise the witness that he or she may be subject to potential criminal prosecution under the Clean Water Act.

2. Defendant's motion to disqualify plaintiff's current counsel is DENIED.

3. Defendant's motion to continue the depositions of Messrs. Wilkov and Elder is GRANTED; provided however, that those depositions shall take place on or before March 17, 1995. Counsel for those witnesses shall make a filing confirming that the deponents themselves favored a continuance of their depositions for the reasons stated by counsel for defendant. If no such filing is

made, the Court will consider whether to award the plaintiff its costs associated with the continuance of the depositions.

DONE AND ORDERED at Fort Myers, Florida, this 16th day of March, 1995.

GEORGE T. SWARTZ

Deposition Summary
John Marlar (I)
May 5, 1994

Title: Branch Chief, Environmental Compliance Branch

Responsibilities: field investigation and inspection

He discusses the 201 grant program for wastewater treatment facilities; the 303 program; 303 plans; NPDES permitting and how a permit drafter would use the 303 plans to evaluate a permit application. He also discusses how the permit drafters would include a WLA if one was developed in the 303 plan; the contents of an NPDES permit and the Administrative Procedures Act process for issuing NPDES permits.

He was questioned about a 201 grant meeting that was held; the difference between an Advanced Wastewater Treatment facilities and secondary facilities; and a draft permit application which was submitted by FCWC. He discusses the process in the CWA that requires states to develop WLA; the process of developing technical documents with WLAs that are used by the EPA in making regulatory decisions. He answers questions about section 501 of the CWA (allows states to set more stringent standards); what happens when a permit applicant meets the secondary treatment effluent limitations and water quality standards---typically the EPA follows the state's recommendation and issues the permit.

He responded to questions about the 401 certification from Florida and a letter from the state certifying that the FCWC facilities were meeting water quality standards. He stated that under such circumstances the EPA would typically issue the permit.

Page	Notes	Topic	Volume
8.00	Was not involved in enforcement at Waterway Estates.	WWE	2
9.00	Marlar asked his staff to inspect Barefoot Bay at request of Alex Alexander of FDEP/	Barefoot Bay inspection	
10.00	Does not recall who conducted EPA inspection of Barefoot Bay on September 14, 1989. There was no penalty action against the facility.	Barefoot Bay inspection	
11.00	He is knowlgeable regarding penalty actions and 309(a) administrative orders. No enforcement responsibilty over Carrollwood, and no knowledge of Carrollwood generally.	Carrollwood	
16.00	An administrative order does not authorize a discharge, only an NPDES permit does so.	AO	
18.00	Tracking compliance with administrative orders is done by notation to enforcement file by compliance officer. Interim effluent limits found in an AO are normally determined by inspector's "professional judgment."	AO	
19.00	Interim effluent limits should be stringent enough to assure that facility operates at maximum capacity, but not so onerous that limits cannot be achieved. Inspector should rely on effluent data found in monthly operating reports.	development of effluent limits	
20.00	Marlar believes there is no mechanism for appeal of interim limit found in an AO.	development of effluent limits	
21.00	Effluent limits for new NPDES permittee are site specific.	development of effluent limits	
24.00	In Marlar's opinion, right to appeal effluent limit will lie only during NPDES permitting process.	appeal of effluent limits	
27.00	Deference accorded state permits by EPA depends on the type of state permit involved; conditions such as monitoring frequency, which are matters of state regulation, are given greater deference.	deference to state standards	
28.00	State temporary operating permit is similar to EPA-issued AO: it imposes reporting requirements, interim effluent limits, and other conditions upon a discharge that is not in compliance with state law (and not allowed under an operating permit).	deference to state standards	
30.00	Does not know difference (in effect on discharger) between state consent order and temporary operating permit, or whether there is a right of appeal from CO.	deference to state standards	

Page	Notes	Topic	Volume
31.00	EPA will defer to state effluent limits in operating or temporary operating permit where limits are more stringent than EPA's.	deference to state standards	
32.00	Major difference between AO and NPDES process is that latter has a public notice and comment period.	deference to state standards	
33.00	Does not know normal enforcement response to failure to meet AO limits.	EPA enforcement, discretion	
34.00	There are a range of enforcement reponses to failure to meet NPDES limits, from telephone calls to bringing criminal suit. EPA has considerable discretion in responding to AO violations.	EPA enforcement, discretion	
35.00	Factors weighed in AO enforcement are weighed on case-by-case basis: damage to receiving water or good faith by discharger are two examples. Seriousness of violation likewise determined on case-by-case basis.	EPA enforcement, discretion	
41.00	CBOD test is not often appropriate for secondary treatment facility; it may be where plant is oversized, and nitrification is likely. CBOD is an appropriate test for an AWT facility.	EPA enforcement, discretion	
44.00	In establishing enforcement action compliance schedules, EPA will consider discharger's ability to pay for compliance-related capital costs.	EPA enforcement, discretion	
48.00	In general, a historical violation is less serious than a present violation. An AO, as an injunctive remedy, is indicative of a presently occurring violation.	EPA enforcement, discretion	
50.00	Referrals to DOJ for civil enforcement typically arise out of violation of the law, although MArlar believes he has seen referrals for violations of an AO.	EPA enforcement, discretion	
52.00	There is no specific procedure for termination of an AO; generally, a letter is sent notifying discharger of termination of the order.	EPA enforcement, discretion	
53.00	Closure of an AO does not necessarily mean AO has been fully complied with.	EPA enforcement, discretion	
54.00	Delegation agreements outline the specifications of state NPDES permitting and residual state law enforcement authority.	delegation; state enforcement	
55.00	Because Florida did not have delegation authority in 1991, Marlar ignored Florida's enforcement activities (state and federal enforcement programs were independent of each other, and respective enforcement activities were not coordinated).	delegation; state enforcement	

Page	Notes	Topic	Volume
62.00	However, if a state had established a compliance schedule in a CO or temporary operating permit, EPA might defer to the schedule by including it in the federal AO.	delegation; state enforcement	
73.00	Marlar believes that BEN is used to calculate benefit to discharger of foregoing/delaying expenditures needed to comply with Clean Water Act. It is used in civil litigation or penalty calculations in an adminstrative action.	penalty calculations; BEN	
74.00	May be other factors, in addition to economic benefit and deterrent assessments, that EPA considers in seeking a penalty.	penalty calculations	
75.00	Has never heard of "wrongful profits" analysis.	penalties; wrongful profits	
80.00	Does not know if violation of AO and underlying violation of permit count as separate CWA violations.	counting violations	
81.00	Has never heard of situation where EPA sought penalties from parent company of discharger.	imputed liability, parent co.	
84.00	Typically, pattern of corporate misbehavior will trigger an action that includes facilities owned by a single corporation.	corporate misbehavior	
107.00	Permit renewal can be denied for failure to meet any condition of the permit.	Basis for permit denial	
109.00	Fact sheet should include effluent limits both for a proposed permit, and for a proposed permit denial.	Basis for permit denial	
120.00	WWE may have had a wasteload allocation in September 1983, but it is unclear what it was.	Basis for permit denial	
122.00	January 1981 wasteload allocation study was a planning document, not a basis for legal requirements.	Basis for permit denial	
123.00	Kagey apparently relied on 1981 study as a basis for permit denial, as stated in her fact sheet.	Basis for permit denial	
133.00	It is desirable, though not necessary, for wasteload allocations to be approved by EPA before they can be used in permit determinations; technical adequacy of allocations can be addressed during the public review and comment phase of the NPDES permit process.	Basis for permit denial	

Page	Notes	Topic	Volume
137.00	Set of technical information, even if not approved by EPA as a 303(d) wasteload allocation, could be used as the basis for NPDES permit effluent limits.	Basis for permit denial	
142.00	EPA can, under its own CWA authority, develop or adopt its own WLA, and place it in a NPDES permit for public scrutiny.	Basis for permit denial	
150.00	The purpose of State-EPA region IV agreements on the development of WLAs was to "heighten [states'] interest in complying with the law"; but the agreements themselves have "no official status..under the law."	state-EPA WLA agreement	
168.00	Permit was issued and not challenged.	Basis for permit denial	
172.00	Zero wasteload allocation could not have been used as basis for denial, at least as an approved allocation under 303(d), since it was apparently not noticed and approved as required under the CFR.	Basis for permit denial	
178.00	Marlar suggests that he does not agree with Barrett's assessment that Kagey had no basis for denying the permit.	Basis for permit denial	

Deposition Summary
Peter McGarry
May 17, 1994

Title: Chief of Compliance and Enforcement Unit in the Drinking Water Section of EPA's Region IV's Water Management Division.

He stated that he is not responsible for writing NPDES permits but he did review them on occasion; his staff had the authority to make a recommendation that a permit be terminated. He describes the process of applying for an NPDES permit.

He could not recall if facilities other than FCWC had their permit renewal applications denied. He did not participate in meetings concerning the EPA's decision to deny FCWC its permit renewal. He doesn't have the authority to revoke a permit but he could recommend enforcement for a violation of water quality standards. He discusses a meeting that was held to review the compliance status at FCWC facilities. He briefly describes the Administrative penalties procedure.

He does not recall if anyone called Florida to find out if FCWC had a WLA before their permit was denied. He has no recollection of whether FCWC was violating water quality standards; no recollection of any time when effluent limitations and water quality standards were being met but the permit was denied; no recollection of any situation in which a permit was completely taken away.

DEFENDANT'S MOTION TO DISQUALIFY COUNSEL

Pursuant to Rule 7(b) of the Federal Rules of Civil Procedure, and for the reasons set forth in the accompanying memorandum, Florida Cities Water Company, moves for entry of an order disqualifying Plaintiff's counsel in this action. Pursuant to Local Rule 3.01(g) of this Court, counsel for Florida Cities has conferred with counsel for Plaintiff in a good faith effort to resolve the issues raised by this Motion and have been unable to agree on the resolution of the Motion.

Respectfully submitted,

Gary H. Baise

DEFENDANT'S MEMORANDUM IN SUPPORT OF DEFENDANT'S MOTION TO DISQUALIFY COUNSEL

Because of ex parte communications by Plaintiff's counsel with a former managerial employee of Defendant who, according to the law of this Court, is a party in this case, Defendant Florida Cities Water Company ("Florida Cities") seeks to disqualify Plaintiff's counsel in this case.

I. BACKGROUND

The detailed factual background regarding the ex parte contacts made by Plaintiff's counsel is set forth in Defendant's Memorandum in Opposition to Plaintiff's Motion for an Order Allowing ex parte Contacts With Former Employees, which is adopted by reference. However, a concise recital of the undisputed facts that constitute the specific inappropriate contacts follows.

In April, 1994, Defendant's counsel learned that meetings between a Department of Justice attorney and a former Florida Cities' employee had

occurred. Specifically, in mid-February, 1994, counsel for Plaintiff traveled to Australia and conducted two meetings with Robert H. French (formerly Senior Vice President of Florida Cities). Mr. French, as a former key employee and manager, possesses personal knowledge of confidential and attorney-client privileged information relating to matters that are at the heart of this litigation. In addition, his statements might be admissions against the corporation or his actions might be imputed to the corporation. These meetings were conducted over a period of two days -- February 14-15, 1994 -- and lasted a total of approximately four hours. Counsel for Florida Cities was neither notified nor given an opportunity to attend or to object to these ex parte meetings. Mr. French did not have any other counsel present. Florida Cities' counsel was subsequently informed by Mr. French that the Department of Justice attorney had met with him and had sought information relating directly to the central legal and factual issues in this litigation. These factual components of the government's inappropriate behavior are not in dispute. See Affirmations of Robert B. Gordon (attached as Exhibit A) and Gerald S. Allen (attached as Exhibit B) and Transcript of Julie L. Karleskint's Deposition of April 21, 1994 (filed with this Court by Plaintiff). Indeed, Plaintiff's counsel "acknowledges that it has had ex parte contacts with Defendant's former employees . . . and stands by its position in its initial brief that such contacts are both entirely proper as well as entirely necessary to professional and efficient trial preparation." Plaintiff's Reply Memorandum at 1.

II. ARGUMENT

A. Former Managerial Employees May Be Parties with Whom Ex Parte Contacts Are Prohibited

The U.S. District Court for the Middle District of Florida, unlike many other jurisdictions, has a well-established rule that former managerial employees may, under certain circumstances discussed below, be considered parties and that ex parte contacts with such former employees by opposing parties' counsel is prohibited and may be grounds for disqualification.[1/] The facts relevant to this Motion To Disqualify clearly meet this Court's test.

The professional conduct of attorneys in this Court "is governed by the Model Rules of Professional Conduct of the American Bar Association as modified and adopted by the Supreme Court of Florida. U.S. Dist. Ct., M.D. Fla. Loc. R. 2.04(c)." Rentclub, Inc. v. Transamerica Rental Finance Corp., 811 F. Supp. 651 (M.D. Fla. 1992) (hereinafter, "Rentclub"). In Rentclub, this court held that while the Rules of Professional Conduct do

> not contain an express provision prohibiting the appearance of impropriety, Florida law clearly retains this requirement. In State Farm Mutual Auto Co. v. K. A. W. etc., et al, 575 So.2d 630, 633 (Fla. 1991),

---

[1/] Florida Cities recognizes that many other federal jurisdictions do not consider former managerial employees to be parties. However, this Court has twice affirmed, in Rentclub and Browning, supra, that former managerial employees are parties when they clearly possess attorney-client and other privileged information or when they might make statements attributable to the company. See Glenn J. Waldman, "Can We Talk? Communicating with Former Employees of an Adverse Party in Litigation," The Florida Bar Journal (October 1994) at 120.

> the Florida Supreme Court ruled that attorneys must still avoid even the appearance of impropriety. Accordingly, it has been held "even an appearance of impropriety may, under the appropriate circumstances, require prompt remedial action from the Court . . . Consequently, any doubt is to be resolved in favor of disqualification."

Rentclub at 654.

An organizational party under Rule 4-4.2 of the Rules of Professional Conduct includes managerial employees whose acts or omissions may be imputed to the organization or whose statements may constitute an admission on the part of the organization. Accordingly, contact by an opposing counsel with such managerial employees is prohibited. In this Court, an organizational party under Rule 4-4.2 includes former managerial employees, who possesses confidential and attorney-client privileged information and whose statements might be admissions against the corporation or whose actions might be imputed to the corporation. Browning v. AT&T Paradyne, 835 F. Supp. 1564 (M.D. Fla. 1993) (hereinafter "Browning"); Rentclub, supra. The basic issue is whether Robert H. French is a "party." If so, then the ex parte meetings with him by Plaintiff's counsel were clearly inappropriate.

Defendant's counsel was informed in April 1994 that Plaintiff's counsel had travelled to Australia specifically to meet with Mr. French to discuss this case. Plaintiff's counsel's meetings with Mr. French extended over two days on February 14-15, 1994. The meetings lasted a total of approximately four hours. Plaintiff's counsel during these meetings discussed with Mr. French the central

legal and factual issues in this case, including the costs and circumstances for the delay in Florida Cities' extending the outfall and the related upgrade construction at the Waterway Estates facility, and excess profits allegedly realized by Florida Cities as a result of delays in this construction project. See Affirmation of Gerald S. Allen (attached as Exhibit B). Plaintiff's counsel gave Mr. French a copy of the Complaint brought by the government against Florida Cities in this case and discussed with Mr. French the merits of the Complaint.

Florida Cities' legitimate interests lie in protecting the potential disclosure of confidential or privileged information during these ex parte meetings or the making of statements that might be imputed to Florida Cities. This Court held in Rentclub that

> "[p]rivileged communications present a distinct problem with respect to contact with former employees, thus ex parte contact should be barred to prevent disclosure of any inadvertent confidential communications. The focus is on whether the former employee's statements could be admissions against the corporation or whether their actions could be imputed to the corporation.

Rentclub, supra, at 657.

As evidenced by the attached Affirmations of Robert B. Gordon (attached as Exhibit A) and Gerald S. Allen (attached as Exhibit B),[2/] Robert H. French held the position of Senior Vice President of Florida Cities from June 15, 1987

[2/] As the Affirmations explain, Mr. Gordon's supervisory responsibilities over Mr. French preceded those of Mr. Allen. Taken together, these two Affirmations address the entire time period of Mr. French's employment with Florida Cities.

to November 16, 1990. Many of the actions of Florida Cities that are the subject of this lawsuit took place during Mr. French's employment with Florida Cities. These actions include the extension of the outfall and the related upgrade of Florida Cities Waterway Estates Sewage Treatment Facility in Fort Myers, Florida. As affirmed by the attached Affirmations of Robert B. Gordon (Exhibit A) and Gerald S. Allen (Exhibit B), throughout Mr. French's employment by Florida Cities, which include the time periods of interest to this litigation, Mr. French had the following management responsibilities:

a) He had access to confidential and proprietary information of Florida Cities and Avatar.

b) He was privy to intra-office and inter-office communications relating to technical, financial, policy, environmental compliance, regulatory, and legal matters.

c) He participated in intra-office and inter-office meetings relating to such matters.

d) He had direct and personal contact with Florida Cities' and Avatar's counsel -- both inside counsel and outside counsel regarding such matters -- and reviewed transmittals to and from them.

e) He regularly attended management meetings with senior managers of both Florida Cities and Avatar.

f) He was frequently responsible for disseminating confidential business documents and legal documents to the appropriate other managers and executives of Florida Cities and Avatar.

In light of these responsibilities, Mr. French clearly possesses attorney-client and other privileged and confidential information regarding this case, and he is a former managerial employee whose statements could be admissions against Florida Cities and whose actions or omissions could be imputed to Florida Cities. Thus, by the standards established by this Court, Mr. French is a "party" to this litigation. Therefore, the ex parte contacts by Plaintiff's counsel with Mr. French, without notice to Florida Cities or its counsel, are no less egregious than direct ex parte contacts with other parties to this case, such as current managerial employees of Florida Cities. As such, the remedy for these ex parte contacts should be the same as for similar ex parte contacts with other parties.

B. The Appropriate Remedy for Improper Ex Parte Contacts with Former Employees Who are Parties Is, at a Minimum, Disqualification

The law of the Eleventh Circuit is well-established that improper conduct by counsel should result in disqualification, if the proper circumstances, discussed below, are present. Because those circumstances are present here, Eleventh Circuit law mandates disqualification of Plaintiff's counsel. Further, this Court must devise an appropriate procedure whereby all information

obtained -- directly or indirectly -- or otherwise derived from the ex parte contacts should play no role in this case.

The Eleventh Circuit has established a two-prong test for disqualification based on appearance of professional impropriety. This Circuit has held:

> First, although proof of actual wrongdoing is not required, there must exist a reasonable possibility that some specifically identifiable impropriety did in fact occur. Second, the likelihood of public suspicion or obloquy must outweigh the social interests that will be served by the attorney's continued participation in the case. (Emphasis added.)

Norton v. Tallahassee Memorial Hosp., 689 F. 2d 938 (11th Cir. 1982) (hereinafter "Norton"). Under Norton, both prongs of the test must be met.

The appearance of professional impropriety in this case consists of ex parte contacts by Plaintiff's counsel with the former managerial employee Robert H. French under circumstances (in Australia) where there is the reasonable possibility of disclosure of attorney-client or other privileged and confidential matters relating to this lawsuit or where Mr. French's statements might be imputed to Florida Cities.

In examining whether there is "a reasonable possibility that some specifically identifiable impropriety in fact occurred," the operative facts are not in dispute. First, even though Plaintiff's counsel specifically spoke with Defendant's counsel on more than one occasion about arrangements for the government to depose Mr. French, not once did Plaintiff's counsel advise Florida

Cities' counsel that he was going to have, or had already had, ex parte communications with Mr. French. Second, Plaintiff's counsel did in fact travel to Australia to have ex parte meetings with Mr. French concerning the legal and factual issues in this lawsuit. One can reasonably infer from these undisputed facts that Plaintiff's counsel (even if unintentionally) created a situation in which Mr. French may have disclosed confidential matters directly related to the issues in this case. Mr. French clearly was in possession of much confidential and attorney-client privileged information. Because Mr. French is not an attorney and chose not to have counsel present, under the circumstances of these meetings there is more than "a reasonable possibility" that Mr. French could have disclosed such privileged or confidential information, even if he did not intend to do so.

Moreover, the government's assertion that Plaintiff's counsel offered Mr. French the opportunity to have personal counsel present is irrelevant here. Personal counsel would have known nothing about this case or the privileged information to be protected. Such an offer would have no impact on the reasonable possibility of the impropriety, because the offer in no way protected or addressed Florida Cities' interests. Those interests could only be protected by having Florida Cities' counsel present, not Mr. French's personal counsel.

As Rentclub, supra, emphasizes:

> [T]he interest of the corporation in protecting privileged information acquired by an employee during the course of employment from disclosure to

> an opponent in litigation remains after the employee leaves the corporation . . . It has been recognized that a former employee who is a 'party' because of his position and knowledge will remain a party even after he leaves the corporation because that employee has a memory. The corporation continues to have a vital interest in the employee's knowledge of privileged information and its potential release to opposing counsel in litigation after the employee leaves.

Id. at 658.

As to the second prong of the Norton test, it would seem that the likelihood of public suspicion that would result from improper ex parte contacts with a former managerial employee would clearly outweigh whatever social interest, if any, that would be served by allowing Plaintiff's present counsel to continue to participate in the case. This conclusion is more certain where, as here, Plaintiff's counsel is staff counsel for the Department of Justice.

Plaintiff's counsel argues that it "has taken pains to ensure that no privileged information was elicited from the ex-employees it contacted" during these ex parte contacts (Plaintiff's Reply Memorandum at 3) and that its conduct "has been fully in accord with the Department's guidelines for its attorneys in such matters."[3/] Whether or not the government directly sought, by subterfuge

---

[3/] See Letter of April 20, 1994 from Daniel S. Jacobs to Don G. Scroggin at 1 (attached as Exhibit B to "Defendant's Memorandum in Opposition to Plaintiff's Motion for an Order Allowing Ex Parte Contacts with Former Employees." The guidelines referenced in that letter, which have now been published in final form [59 Fed. Reg. 39910 (August 4, 1994)] do not supersede the law of this court. Moreover, the scope of those guidelines, which were not published even in draft form (March 3, 1994) until after the ex parte contacts that are the subject of this Motion, are subject to question. The immediate-past President of the American

(continued...)

or otherwise, to solicit privileged information is irrelevant to protecting the inadvertent or accidental disclosure of such privileged information under these circumstances. Indeed, it is unclear how Plaintiff's counsel could have determined whether the information he gathered from these lengthy ex parte exchanges was privileged. Judge Kovachevich's decision in Rentclub makes clear, as discussed above, that the scope of the Court's prohibition of such ex parte contacts extends beyond the direct solicitation of privileged information. It is precisely because of the "reasonable possibility" of accidental or inadvertent disclosure or the making of statements attributable to Florida Cities under the circumstances of these ex parte meetings that this Court's decision in Rentclub makes both good sense and sound law.

Finally, Plaintiff's counsel emphasizes that during these ex parte meetings Mr. French was "treated fairly by the government," that "the Government had been 'very pleasant,'" and that Mr. French "had not been pressured by the government in any way into speaking to the government." Plaintiff's Reply Memorandum at 4. Whether Plaintiff's counsel was mannerly and polite in conducting these ex parte meetings is beside the point. The very fact of

---

3/ (...continued)
Bar Association has termed the government's self-serving new policy "a disturbing arrogation of power." See "Questioning New DOJ Rule: Direct-contact policy disregards ABA Rule 4.2," American Bar Association Journal (October 1994) at 101.

conducting these ex parte meetings with a party was improper under the law of this Court.

As this Court has recognized, an employer such as Florida Cities does not cease to have a legitimate interest in protecting such disclosure after the managerial employee leaves the company. In this complex case, even an experienced environmental attorney might have difficulty in always discerning a bright line distinguishing matters of fact from matters of law. Moreover, this Court has already been involved in the parties' dispute regarding whether Florida Cities' environmental audits were privileged -- an area commenters consider uncertain and in flux.[4/] In the face of such admitted complexity even to experts, it is unclear what basis Mr. French, a nonlawyer, would have for making the fine legal determinations regarding what information might be privileged or what statements might legally bind Florida Cities.

Indeed, the government acknowledges that its purpose in having these ex parte meetings with Mr. French and in seeking schedule similar ex parte meetings with the other former Florida Cities employees in Florida was because "the former employee may be very knowledgeable of facts relevant to the litigation yet not be as reticent as he might be if still employed." Plaintiff's

---

[4/] The wide divergence of opinion on the confidentiality of environmental audits and the passage of new legislation in numerous states addressing this subject was the subject of a recent public meeting, held by EPA in Washington, DC, to which EPA said the response was "overwhelming." See 59 Fed. Reg. 38455 (July 28, 1994).

Memorandum at 9. In short, the government sought to gain an unfair advantage by deliberately creating a situation in which there was the reasonable possibility of disclosure of attorney-client and other privileged information. It is significant that Florida Cities had already voluntarily agreed and made preliminary arrangements with Plaintiff's counsel for the deposition of any of Florida Cities' former employees, including specifically Mr. French.[5/]

In disclosing the core information to the government, pursuant to the Federal Rules of Civil Procedure, Florida Cities named Mr. French as one of only five current and former key employees having information central to this case.[6/] In light of Florida Cities' subsequent discussions with government's counsel about Florida Cities' willingness to cooperate in voluntarily arranging Mr. French's deposition, it is hard to read any benign purpose into the government's acknowledged actions. In sum, the government knew that Florida Cities would seek to attend any meetings with Mr. French and the few other former key employees who were potential witnesses, and took steps to set up

---

[5/] Plaintiff's counsel and Florida Cities counsel had reached an agreement that the voluntary deposition of Mr. French, tentatively scheduled for August 18-19, 1994 in Australia, would consist of one day for each side to examine Mr. French, as both Florida Cities and the government recognized that Mr. French's living in Australia would probably make him unavailable for trial. The government has now "taken off the calendar" this scheduled deposition without explanation. Florida Cities remains willing to participate in any voluntary deposition of Mr. French.

[6/] See Florida Cities' letter of February 4, 1994, from Gary H. Baise to Daniel S. Jacobs regarding "Disclosure of Core Information," attached as Exhibit A to Plaintiff's Reply Memorandum In Support of Ex Parte Contacts.

undisclosed ex parte meetings during which the reasonable possibility of disclosure of privileged or other confidential information would occur or during which the former employees might, as parties, make statements that could bind Florida Cities. This conclusion remains the same, even if such disclosures or statements were inadvertent or accidental, since the government deliberately created the occasion for such disclosure.

Two types of harm may occur to Florida Cities' interests as a result of these improper ex parte contacts. First, Plaintiff's counsel may have obtained privileged or otherwise confidential information that would not have been disclosed had Florida Cities' counsel been present. Plaintiff's counsel may seek to introduce such tainted evidence at trial. Second, Plaintiff's counsel may have gained information that will lead to the introduction of new witnesses or new evidence that would not otherwise be presented to the Court. Either event would unfairly prejudice Florida Cities' interests. The scope of this harm to Florida Cities' interests has recently been significantly increased, as the Plaintiff has pursued in discovery a several-fold enlargement of this case to cover four other Florida Cities' facilities that are not part of the Complaint.

In addition to the obvious potential prejudice to the interests of Florida Cities resulting from these ex parte meetings, the government's conduct may also compromise the integrity and efficiency of the judicial process now underway before this Court. If the questions of disqualification were to arise later at trial (such as when Plaintiff's counsel might seek to introduce tainted evidence), the

Court would then be faced with the difficult question of how to address the government's impropriety. Disqualification of Plaintiff's counsel at that later time might result in significant delays or the necessity for a new trial. Judicial efficiency and fairness argue for acting on disqualification now, when disqualification of Plaintiff's counsel will cause little or no prejudice to the government or inconvenience to the Court. Disqualification would thus preserve both Florida Cities' legitimate interests and the Court's interest in the integrity and efficiency of the judicial process.

III. CONCLUSION

For all of the above-stated reasons, Defendant submits that the appearance of impropriety and this Circuit's two-prong test for disqualification have been clearly met. Moreover, any doubt is to be resolved in favor of disqualification. State Farm Mutual Auto Co., supra. Accordingly, Defendant respectfully requests that this Court disqualify Plaintiff's counsel. This Court may disqualify the entire Department of Justice or, at a minimum, disqualify Plaintiff's current counsel and develop specific instructions to implement the order of disqualification in order to avoid the passing on of tainted evidence or privileged information to successor counsel. Under the current circumstances, Florida Cities believes that the appropriate remedy is to disqualify plaintiff's current counsel, and Florida Cities requests the opportunity to brief the question of what

specific instructions would most fairly implement the Court's decision to disqualify Plaintiff's counsel.

Respectfully submitted,

Gary H. Baise, Esq. (Trial Counsel)

LAWYER'S NOTES

Page	Line	

THE CLERK: Calling Case Number 93-281-CV-FtM-21, United States of America versus Florida Cities Water Company.

THE COURT: Make your appearances, please, gentlemen.

MR. JACOBS: Good afternoon, Your Honor. Daniel Jacobs, U.S. Department of Justice for the United States. I apologize for being a few minutes late. I flew out of a --

THE COURT: I understand the problem.

MR. JACOBS: -- snowstorm this morning.

MR. BAISE: Gary Baise, firm of Gabeler, Baise and Miller, representing Florida Cities Water Company, Your Honor.

MR. SCROGGIN: Don Scroggin, also Gabeler, Baise and Miller, representing Florida Cities.

MR. HUME: Harold Hume of Henderson, Franklin, also on behalf of Florida Cities.

THE COURT: We're here for various purposes. Number one, which I will address first, is the preliminary pretrial conference. Before everybody starts arguing with everybody, let's see where we can get with that first.

Then there was a motion to allow ex-parte contacts, a motion to disqualify counsel, and a motion

for a protective order from two individuals trying to delay a deposition. We'll address all of those.

First things first, the preliminary pretrial conference. I need to know how long before we can cut off the discovery.

MR. JACOBS: Your Honor, on behalf of the United States we would ask the Court to allow us sixty days in which to amend our complaint, and then we would anticipate being in a position to complete discovery approximately three and a half months thereafter.

Referring the Court respectfully to the parties answers to Court's joint standard interrogatories and joint report of parties, I would respectfully suggest that the Court add on to the proposed dates that the United States suggested in that document an additional five months, as I say, to allow for the amendment of the complaint and an additional three months, or three and a half months thereafter for us to complete discovery.

THE COURT: Eight months you're saying?

MR. JACOBS: I'm saying approximately five and a half months from today, Your Honor.

THE COURT: Okay. I thought you said five and three.

MR. JACOBS: If I did, I misspoke. The five refers to the dates that we initially proposed way back

a year ago when we put the suggested dates together, which preceded our anticipation of amending the complaint.

THE COURT: All right. So five to six months.

MR. JACOBS: Yes, Your Honor.

THE COURT: All right.

MR. JACOBS: If the Court pleases.

MR. BAISE: Your Honor, it's a bit difficult to respond to that amount of time and whether or not it is accurate. The Justice Department informed us back on April 13th, 1994, that it was thinking about amending the complaint. It has not done so. It's engaged in massive discovery since that period of time. Only when we finally see the amended complaint will we have some idea as to how much time it will take us to respond to that particular complaint.

At this point, as you know, we just have a complaint that involves one facility. The Government is looking at four additional facilities at this point. The Government has obtained approximately a half million documents that we have readily provided to them for review, but at this point we have not seen the complaint filed nor do we know what charges they're likely to bring against us. So it's unlikely that we can respond with respect to the exact date and the amount of time

today until we see that complaint.

THE COURT: Well, this is -- as I said this is a preliminary pretrial conference. I'm trying to get a handle on it.

MR. BAISE: Yes, sir.

THE COURT: Is that an accurate statement that you're adding other facilities or what is it that you're amending?

MR. JACOBS: Your Honor, this company operates six permitted facilities in the State of Florida. Five out of six of those are in violation or have been in violation of the Clean Water Act within recent years and we are indeed studying the possibility of amending the complaint to bring enforcement actions with respect to those five or some of those five facilities.

I'm a little bit aggrieved about this April 13th date. I can tell you that on the record the Government has never advised the Defendant that we would be amending the complaint. We might have off the record tried to give them a head's up that we were headed that way. But, Mr. Baise, I'm a little surprised that you're putting that date before the Court at this time. I have no record of having told you that, but I can certainly assure you that if I did it was meant as an informal communication, not on the record.

MR. BAISE: I believe we can back that date up, Your Honor, and we'll take the opportunity to do so.

THE COURT: Before we get any further then this, let me tell you something so you know where I'm coming from. Counsel will not address each other, they will address this Court and that's it. You understand?

MR. JACOBS: Yes, Your Honor.

MR. BAISE: Yes, Your Honor.

THE COURT: Unless I tell you to do otherwise, so we don't have any arguments going on. Only one you're suppose to talk to here is me.

I'm going to give you sixty days to get an amended complaint filed. And if you don't, from there on in it may be very difficult to file an amended complaint.

MR. JACOBS: Thank you, Your Honor. Would I have to seek leave of Court at that time or is the Court granting me leave at this time?

THE COURT: I'm going to grant you leave at this time.

MR. JACOBS: Thank you, Your Honor.

THE COURT: But that's it as far as I'm concerned, I'm not going to drag this on.

MR. JACOBS: Understood, Your Honor.

THE COURT: All right. I'm going to add

another four months to that for cut-off of discovery. So it will be a total of six months. We'll fill in the dates as we go along.

The motion to add parties will be within that sixty days I would assume.

MR. JACOBS: Yes, Your Honor.

THE COURT: Motions for summary judgment to be filed -- should be able to be filed thirty days after discovery. So seven months.

We've already discussed -- are there any other motions outstanding other than --

MR. JACOBS: Other than the ones before the Court today, Your Honor, the United States I believe in February of '94 filed a motion to strike the affirmative defenses that the Defendant presented in its answer.

THE COURT: That's moot at this point if you're going to file an amended complaint, because they're going to file a whole new answer, I would assume.

MR. JACOBS: I agree, Your Honor, or it will be moot shortly.

THE COURT: We'll set a pretrial conference, a final pretrial conference eight months from today. Pretrial statement is to be filed five days before the conference.

I know it's early, but can anybody hazard a guess as to how long the trial will be?

MR. JACOBS: Your Honor, again the parties have stipulated in our answers to the Court's joint interrogatories that the trial would take approximately one week if there were a decision on the Government's motion for summary judgment prior to trial. If both liability and penalties needed to be tried, we thought it would take two weeks.

MR. BAISE: Again, Your Honor, it's very difficult to make any estimate until we see whether or not they're going to bring charges against one facility only or four additional facilities at this point.

THE COURT: I'll just put temporarily down the two weeks and we'll see where we go from there.

MR. BAISE: Okay.

MR. JACOBS: Judge, on the subject - and I hope I'm not jumping ahead - the parties stipulated it would be a nonjury trial.

THE COURT: Okay. Is that correct?

MR. BAISE: Agreed, sir.

THE COURT: All right. I don't know anything else that I want to add on that then at this time.

THE LAW CLERK: Do you want to set the trial date for nine months from now?

THE COURT: I'm going to withhold setting a trial date at this time. I'm not too sure about some of these other dates yet, in trying to set a schedule. I think after the first sixty days go by we'll see what the complaint takes shape.

All right. Defendant's motion for a protective order in regards to Mr. Lawrence Wilkov and James Elder. I'm not sure you have standing to file that motion unless you can tell me that you have represented those two individuals.

MR. HUME: Your Honor, I believe that until just maybe as recently as yesterday Mr. Baise and Mr. Scroggin did in fact represent those individuals. Part of the reason for the motion for protective order is to give those individuals an opportunity to have new counsel. I understand, at least as of yesterday, they have done so.

THE COURT: They have?

MR. HUME: They have. A gentleman by the name of John Campbell with the Holland and Knight firm in Miami.

I believe, Your Honor, I can't cite the rule off the top of my head, but I believe that the rule provides that a party or a person whose deposition is scheduled to be deposed may file for a protective order.

We did it --

THE COURT: If you represented him, yes.

MR. HUME: Well, we did represent him. As of today, I would say we do not. Is that correct, gentlemen?

MR. BAISE: Correct, Your Honor.

MR. JACOBS: If I may, Your Honor, as of yesterday they were -- we were advised at least by Mr. Campbell and his associate that Holland and Knight in Miami represented these individuals, and that conversation took place literally minutes after the Court contacted us to see whether we had any objection to the protective order motion being heard today. And in view of the fact that we did not and understood it would go forward today, we alerted Holland and Knight that the hearing would take place today at three p.m.

MR. HUME: Your Honor, that's consistent with what I -- I think it's consistent with what I just told the Court, that until yesterday we did represent -- I shouldn't say I, I did not, but Mr. Scroggin and Mr. Baise did.

THE COURT: Where is Holland and Knight? I don't think you have any right to argue that motion since you no longer represent those people. And I think their counsel should be here to argue it and they better

be here to have a deposition, and I don't see any reason why they can't be here to have a deposition.

MR. BAISE: Your Honor, may I address the Court with regard to this issue and how this has developed and why this request for protective order was filed? May I proceed?

THE COURT: Yes, you may.

MR. BAISE: Your Honor, the Clean Water Act has criminal provisions, as you are well aware. These provisions have been under construction by the courts around the country for some period of time, particularly the 1987 amendments.

The case that brought this issue to the forefront with respect to the two individuals in question here is a case that was argued before the Ninth Circuit Court of Appeals and decided in August of 1994. Went up to the U.S. Supreme Court and cert. was just denied on this case sometime around January 23rd through the 30th of this year. I first picked up the first notice that the cert. had been denied with respect to this matter from a publication that covers EPA activities and court activities.

This case is a stunner with respect to those of us who practice in the Clean Water Act area. What the dissent points out -- and would Your Honor allow me

to approach the bench and provide -- it would be marked as an exhibit, a copy of this Weitzenhoff case.

MR. JACOBS: Your Honor, while Counsel is approaching the bench, if I may interject with the Court's permission, this is a 1993 case, not a 1994 case. And the amendments that Counsel refers to were indeed passed in 1987. This is not new news.

THE COURT: Okay. Go ahead.

MR. BAISE: I beg the Court's indulgence to correct Counsel. It's dated August 8th, 1994. It was a rehearing on EnBanc. It was denied with the opinion as written. You can turn to Page 1,293. The initial decision was in 1993, but the date as you will see is August 8th, 1994.

The fact is, what the dissent points out, Your Honor, is that the majority criminalizes entirely innocent conduct. In fact, there's some interesting language that I would bring to the Court's attention at the bottom of Page 1,293, left-hand column, bottom paragraph where the Court says, "We have now made felons of a large number of innocent people doing socially valuable work."

In that same paragraph, the last full sentence -- and this is talking about people who run sewage treatment plants, Your Honor. This is about

individuals who know that they are discharging into waters of the United States or waters of the State of Florida or any state in this country. And the Court in it's dissent -- and there are five members of the court here pointing out, and it's describing people who work in sewage treatment plants or those who work around them, "If they know they are discharging into water, have a permit for the discharges, think they are conforming to their permits, but unknowingly violate their permit conditions, into prison they go with the most violent criminals."

The dissent also points out on Page 1,299, that's the last page, Your Honor, about midway down, again left-hand column on page 1,299, it says, "We have now imposed on these vitally important public servants a massive legal risk unjustified by law or precedent, if they unknowingly violate their permit conditions."

Most of us who have practiced in the Clean Water Act area, for my own case about twenty-two years, they've all always felt that to be convicted of a criminal act you had to knowingly know that you had the permit and knowingly violate the conditions in that permit. What this decision does is criminalize perfectly innocent conduct. It criminalizes negligent conduct.

The reason we sought originally to file this protective order with regard to the individuals in this case is that these folks clearly knew that they had plants that discharged water into waters of the United States. So this case -- in fact, there are a number of people that are looking at how to go to Congress to change the outcome of this case, because it criminalizes perfectly innocent conduct.

And as you read this case you will see the dissent saying people who go to work in sewage treatment plants are not paid nearly enough to expose themselves to potential criminal conduct. So once I saw that the Supreme Court had denied certiorari with respect to this case, I looked at it, I contacted the general counsel of Florida Cities, we had a meeting last Thursday to go over this issue.

Last Friday I instructed one of the lawyers representing Florida Cities to contact Mr. Jacobs, to talk to him about postponing these depositions coming up this week. The Weitzenhoff case as far as I know was not discussed with him by that counsel, but he can speak for himself regarding that point. Once Mr. Jacobs indicated he wanted to proceed with these depositions of the two individuals, and that was reported to me roughly five o'clock Friday afternoon, I discussed it again with

my client, we raised it with the individuals in question, and felt at that point in light of the fact that the Supreme Court had denied certiorari with this case, that these individuals should seek their own counsel and proceed as they saw fit in light of this case.

That in general, Your Honor, is the background of why we filed this motion for protective order, did not adhere to this Court's normal rule of bringing or giving ten days notice and then asking for the matter to be brought on for hearing.

MR. HUME: Your Honor, if I may before Mr. Jacobs responds to the substance. On the standing issue, I was looking for the rule and it is 26C, and it says that -- it is with protective orders, it says, upon motion by a party, which Florida Cities is, or by the person from whom discovery is sought, so it's either/or, the Court may then, you know, enter a protective order.

So even though at the time -- or at the time the motion was filed it was filed on behalf of Florida Cities. As it happens, Mr. Baise and Mr. Scroggin also represented these two individuals. But I believe, Your Honor, Rule 26C confers standing upon a party to ask for the protective order and for the reasons that Mr. Baise just stated that was it. The purpose is to try to give

their new counsel the opportunity to get up to speed on this case before his clients are deposed, and that's why the additional thirty days was asked for.

I believe I can accurately represent to the Court that Mr. Campbell spoke yesterday with Mr. Jacobs in an effort to get him to agree to postpone it for some period of time, and Mr. Jacobs indicated that he was not willing to do so, which is why we're here today.

MR. BAISE: And, Your Honor, with respect to this case and with respect to the counsel representing the individuals in question, and obviously I do not -- no longer represent those two, but in light of this case and the reason we're asking for the postponement is that in my judgment these individuals have no choice but to take the Fifth Amendment as a result of this case. That's why we're asking for the delay.

Again I have no idea, nor can I speak for their new counsel, but I do think if you proceed with the depositions it turns out to be at least at this moment a waste of time. So in terms of saving time and effort, and we obviously are concerned about the shortness of time by which we brought this on, but that's the reason I wanted to give you some context into which to fit your thinking with regard to one, this case, why the motion, why the shortness of time, and why the Holland and

Knight lawyer is not here today.

THE COURT: Well, you haven't excused that, you haven't excused Holland and Knight from not being here.

MR. JACOBS: Your Honor, I tend to agree with the Court notwithstanding Counsel's citation to the rule, that the proper parties to bring the motion are not here today. The motion has not been brought by the proper parties, they are not in attendance.

The Defendant itself has no grounds to delay. They agreed to the dates long ago. If there is a party that has grounds to ask for the delay, it is the two witnesses. They did not bring the motion. They are not represented here today. They were advised minutes after I was advised that the Court would hear the motion today, they were advised that the Court would hear the motion today.

To give the Court some further background, the deposition of Mr. Elder was originally noticed for October 6th, 1994. This was not the first time we noticed his deposition. We actually sought to interview Mr. Elder back in April of 1994. We have now been waiting ten months to speak to Mr. Elder. And as I say, the date of February 16th was agreed to by the Defendant, we understand who represented at that time that he made that agreement that he represented -- that

the Defendant, rather, represented both -- or I'm sorry, that counsel for the Defendant represented both Mr. Elder and the Defendant. And the same applies to Mr. Wilcov.

This was not a case of the Government just sending marshals out and suppoenaing these individuals. We agreed with Counsel and then we issued notices and subpoenas. And yesterday we hear for the first time that we ought not to be able to go forward.

As far as the reference to the Weitzenhoff case, Mr. Campbell and I did discuss the Weitzenhoff case. I relied on the 1993 decision, because that's the one that Mr. Campbell brought to my attention.

I would note for the record that there was not a rehearing on EnBanc, that the petition for rehearing on EnBanc was in fact denied. And the dissents that Mr. Baise quotes from are the denial from the rehearing on EnBanc, if I've read this correctly in the last five minutes, the 1994 decision.

In any event, I think the important point to make here is that the Ninth Circuit hasn't legislated criminal activity, Your Honor, Congress legislated criminal activity under the Clean Water Act when it amended it in 1987. The Ninth Circuit -- the Government doesn't think the Ninth Circuit has done anything to

change the law. In fact, the majority of the Ninth Circuit obviously is interpreting the law consistent with the way Congress intended it.

THE COURT: It still could put individuals in the position of having criminal charges brought against them.

MR. JACOBS: Absolutely.

THE COURT: I don't care who did it.

MR. JACOBS: Absolutely. That was done in 1987, Your Honor. So the point I'm --

THE COURT: And these people need protection.

MR. JACOBS: I'm not going -- I'm a civil enforcement attorney.

THE COURT: I understand.

MR. JACOBS: I'm not really all that capable of addressing --

THE COURT: I'm going to grant the motion to the extent that I'm going to require that Counsel show to me that this was not just a delay and that these individuals were in fear of having -- I'm disappointed that their counsel is not here, nor are those individuals if that's what they want to have happen. And I'm going to have to have something from their attorney showing that they are consistent with this and they wanted the delay for the purposes that you

showed -- that you brought up. If they don't, I'm going to require that the Government be paid for making a trip down here for the depositions, and any costs that are attributable. At this time I'll reserve on any of that, but I may award it at a later date.

Yes, sir?

MR. JACOBS: Your Honor, one more point before we move on, if I may. The motion speaks in terms of a delay only. A letter that was faxed to me by Mr. Baise which accompanied the motion threatens that the witnesses won't actually appear. So I wonder - and I'd be happy to supply the Court with a copy of that letter - if I might quote the pertinent part: 'Counsel retained by Mr. Wilcov and Mr. Elder will decide whether their clients will agree to testify in response.'

THE COURT: Well, they will appear. If they want to use the Fifth Amendment, that's up to them, but they will appear. And I will expect that this be done within thirty days from today's date, and if it's not done then I may -- you can file whatever kind of sanctions you wish to ask for.

MR. JACOBS: Thank you, Your Honor.

MR. BAISE: I assure you, Your Honor, they will appear within the thirty days that the question was --

THE COURT: What they testify to is something

else.

MR. BAISE: Absolutely, Your Honor.

MR. HUME: Your Honor, point of clarification, you just made a comment that this is to happen within thirty days. Are you saying the rescheduling of their deposition should occur within thirty days?

THE COURT: Their depositions shall occur within thirty days.

MR. HUME: Okay. Thank you. That's what I thought.

THE COURT: Rescheduling is whenever you wish to do it.

MR. HUME: The taking of the depositions will take place within thirty days from today.

THE COURT: That's correct.

MR. HUME: Thank you, sir.

MR. JACOBS: Your Honor, as you've probably gleened we've had terrible times picking dates. May we have the luxury of picking the dates this time as long as we're going to come back for a second time.

THE COURT: As long as you work with them on any conflicts, but they still have to do it within thirty days.

MR. JACOBS: Yes, Your Honor.

THE COURT: That firm's big enough that they

can find someone to go sit in a deposition, I guarantee you.

Now, there's two motions which I'll hear together, that's the motions for ex-parte contact and disqualification. I don't know who wants to go first. I guess the motion to disqualify should go first.

MR. JACOBS: Chronologically, the motion for permission to conduct the contacts occurred five or six months before the motion to disqualify, with all due respect. And if the Court grants that motion, the Defendant's motion is moot.

THE COURT: Okay. Well, both are -- either way. I think I'd rather have them go forward with the motion to disqualify. Go ahead.

MR. HUME: Thank you, Your Honor.

As the Court I think is already aware from some comments that were made, the United States of America is suing Florida Cities Water Company to attempt to recover very substantial civil penalties for alleged violations of the Clean Water Act.

The Department of Justice is prosecuting the case through Mr. Jacobs primarily, as I understand it, and probably other attorneys within the department are assisting Mr. Jacobs.

THE COURT: It's a civil case so I don't think

they're prosecuting it.

MR. HUME: Well, I didn't mean in the criminal sense, I mean they are handling the case on behalf the Department of Justice.

The Department of Justice has admitted in filings that are before the Court today even that they have had ex-parte contacts with former employees of Florida Cities Water Company.

Affidavits that have been filed by Florida Cities we believe establish that these were high-level managerial employees who had access to privileged and confidential information, whose actions could be imputed to Florida Cities and whose statements could be used as admissions against Florida Cities.

Florida Cities believes, for reasons I'll state very shortly, that those contacts, those ex-parte contacts were improper. We are relying primarily, Your Honor, on the Rentclub case. I would imagine you already have a copy. I gave Miss Heise a copy.

THE COURT: I read it about forty times.

MR. HUME: Okay. In that case then, as the Court is well aware, Judge Kovachevich reasoned that a party includes former employees whose acts or statements could result in vicarious liability to the former employer. Thus, ex-parte contacts should be barred to

prevent disclosure of confidential or privileged information.

She recognized what I think is probably obvious, that the interest of a corporation in protecting such information from being disclosed to an opponent in litigation remains after that employee leaves the corporation, and that such a former employee, who is a party because of his position and knowledge, will remain a party even after he leaves the corporation because that employee has a memory. And the corporation continues to have a vital interest in the employee's knowledge of such information, and its potential release to opposing counsel in litigation after the employee leaves.

The Department of Justice is saying that Rentclub constitutes a -- I forgot the exact wording -- a substantial minority view and it is basically erroneous. I cannot represent to the Court that I have read all of the cases dealing with this subject both pro and con, because there are cases that go both ways. But I believe that in many of the cases at least, that adopt the position that such contact is appropriate, they didn't go into the very detailed discussion and analysis that Judge Kovachevich did in both the Rentclub and the Browning case which came afterwards.

She really tried to carve out a particular niche. She didn't say that all contact with all prior employees is improper. She said only those employees whose actions or statements might be used and serve the basis of the liability for the corporation are protected.

THE COURT: How does one find that out?

MR. HUME: Well, one does it by -- it's a factual question. And we have in this case submitted affidavits to support our position that these employees occupied that position. And in a moment I will go through that list of things that we believe fit the standards or meet the standards that Judge Kovachevich set forth.

THE COURT: The Government's reply implies that they got a list of employees from your company, but with that list there was no advisory notes that would say that these people had such information. Don't you think they should have done that?

MR. HUME: Your Honor, I'm really not knowledgeable about whether they got such a list and maybe if Mr. Baise could respond.

MR. BAISE: Yes, Your Honor, if I could address that. Under the new rules you are to advise the other party as to the persons that you think will be those

that have potential information.

THE COURT: I understand.

MR. BAISE: There's no indication that you have to identify them as high-level employees, low-level employees, mid-level employees, Your Honor.

THE COURT: I understand that, but if you're trying to protect certain people from any ex-parte communication, don't you think that would have been a wise thing to do?

MR. BAISE: Your Honor, we did not think they would fly off to Australia to talk to this fellow without taking the depositions or contacting a number of the other folks. It did strike us as very odd that they flew to Australia to make this ex-parte contact.

THE COURT: Well, if this guy had been a machinist you wouldn't have thought anything about it, right?

MR. BAISE: No. Because the case law, Your Honor, clearly under Judge Kovachevich's opinion talks about managerial employees and certainly implies high-level managerial employees.

THE COURT: With confidential information or with an attorney/client information.

MR. BAISE: That's correct. The machinist would not have that kind of information.

THE COURT: Might have. I mean, he might have been the one who was in charge of doing something that this whole lawsuit was about.

MR. BAISE: The machinist?

THE COURT: Yes. Not in this particular case, but I'm saying in some other case, like one of the auto accident cases that we've had. He could be, that's why I'm saying it seems to me it's incumbent if knowledge of that is known, it's incumbent upon the parties to advise of that knowledge.

MR. BAISE: Certainly the Government has not made any such effort to advise us of the key individual who made decisions. In fact, if anything they've tried to obscure who the parties were with respect to who had the key information, Your Honor.

THE COURT: Go ahead.

MR. HUME: Our position, Judge, on the Rentclub case is that it was a very well-reasoned case, I think it makes sense, the holding. It's, we believe, the law that is established in the Middle District and that it makes good sense and it makes good law.

The Department of Justice makes a point in opposition that the Florida Bar's position, the state bar's position under advisory opinion, Opinion 88-14, which is attached to their memorandum, says that they

have not accepted the interpretation that Judge Kovachevich put on it. I would point out to the Court two things. First of all, that a state court's interpretation is not binding on the federal court; and the Pellicast case which is referred to by Judge Kovachevich in her decision so states. That's at 129 FRD 621, it's a case out of New York.

And also I would point out to the Court that the Manor case, which is a Florida case, Second DCA, it's a 1993 decision, this was a motion for protective order which was denied, but in a footnote, Footnote 6, the Second DCA notes as follows -- well, I won't read the whole thing, but they refer to Judge Kovachevich's decision in Rentclub, and then they go on to say that,

"In moving for protective order, Manor Care did not identify specific former employees who might fall within this privileged 'managerial' class identified by Judge Kovachevich, but rather sought a blanket prescription against contact with any and all former employees.

"Our holding is therefore without prejudice to Manor Care to renew it's objection in the event it can point to individuals who have been the recipients of privileged information."

So in the Manor Care case -- and I don't think

I gave you the cite, it's --

THE COURT: Until they talk to them how do they know if they do or don't?

MR. HUME: How with will the Government know?

THE COURT: Yes.

MR. HUME: One suggestion that comes to mind is, if they know the person and know the position that he occupied in the company it would probably be a pretty good indication. I believe Mr. French, for example, whom they contacted --

THE COURT: Then they're just guessing, right, until they talk to them.

MR. HUME: Perhaps. Perhaps.

THE COURT: After they learn, then they should cease all further discussions maybe.

MR. HUME: Well, yes, it's a fair question, Judge, and I'm not sure I've got a good answer to it frankly. But the problem is if these are individuals who have the type of information that is protected and they shouldn't be contacted, then the harm can be done before they come back and say, oh, I spoke with this guy and I probably should not have done so.

THE COURT: So you're going to extend the rule to the point now that if anybody's in a managerial position they should never be addressed on an

ex-parte -- that's about what you're telling me, because that's the only way you could do it, because you would have to guess because that person was in a position he can't be addressed, you can't even go approach him.

MR. HUME: I guess, Judge, maybe the opposing party, whether it's the Department of Justice in this case or any other opposing party, they kind of run a risk if they make contact and it turns out that they goofed, then they run the risk of being disqualified, as has happened in Rentclub. And that's what we're asking the Court to do here.

THE COURT: Well, in Rentclub we had some other facts involved.

MR. HUME: There were some other factors, but the principle --

THE COURT: Paying a witness, that's what the impropriety was in Rentclub.

MR. HUME: Admittedly that was another factor that was present in Rentclub, but it's our position that the principle that was established in Rentclub is what we are asserting here, that contact with those high-level individuals who have that kind of information is prohibited under the rules of professional responsibility.

THE COURT: All right.

MR. HUME: Anyway, the point I was trying to make on the Manor Care case, Judge, and that cite is 611 So.2d. 1305, is that this is at least an indication from Florida courts that they recognize the correctness of Rentclub, and that if a proper delineation had been made and they left the door open for them to come forward with it, then the court might rule differently. The court might not have denied the motion for protective order.

The Department of Justice also argues that, well, gee, this takes away from us rights of informal discovery. And there's one case again we cited in our information or in our filings, Judge, but it's the Public Service case at 745 F.Supp. 1037, where this same kind of argument was made and the court I think disposed of it better than I could say it, so I'll just read the brief language from it. The court said on Page 1043, Judge, kind of in the middle of the left-hand column: "It is true that today's result will close off certain avenues of informal discovery, and in the process increase the need for depositions.

But the court went on to conclude in the final paragraph at the bottom that -- or even before we get to that, the court said that, "Requiring the depositions to be the way to obtain this information may ultimately

produce less procedural haggling, and thus maybe in the long run more cost efficient.

And finally the Court said, "It is also true that the deposition process is the best method of developing clear factual records and protecting the rights of all parties without unduly favoring or prejudicing either side. It is a far more reliable and ethically sound procedure than the informal methods espoused."

Our filings, Judge, show that the position of the Department of Justice regarding such contact is not just limited to this particular case, it's acquired national attention. I will concede that for the most part the attention is directed toward the Department of Justice's position that they can have this kind of contact even with existing or current employees. But there was one article that actually mentioned this case even though we're talking about a former employee, and if the former employee is considered a party, then the principle is the same anyway.

THE COURT: Or if they have an attorney.

MR. HUME: Pardon me?

THE COURT: Or if they're independently represented.

MR. HUME: I'm not sure I get your point,

Judge.

THE COURT: If they have counsel, then they -- whether they're an employee or not they shouldn't be without having their own counsel there.

MR. HUME: Well, that may be, if they say I have a lawyer and I want my lawyer present, then that contact shouldn't occur. But it's our position that even if they say they have a lawyer and they want their lawyer present, if in this case Florida Cities' attorney can't be present, no one's there to look out for Florida Cities' interests. The former employee's attorney would be looking out for the former employee's interest only. And so we think that Florida Cities or whoever the opposing party is would need to be present in any case.

Let me just go over the list of things that I mentioned about Mr. French. These are set forth in affidavits that are attached to our motion to disqualify. There are two, one of Robert Gordon and one of Gerald Allen. And so you can see how close perhaps Mr. French comes to the individuals who were -- or to the individual who was involved in the Rentclub case.

He had access to confidential and proprietory information of Florida Cities. He was privy to interoffice and intraoffice communications relating to technical financial policy, environmental compliance,

regulatory and legal matters. He participated in intraoffice and interoffice meetings relating to such matters. He had direct and personal contact with Florida Cities' and Avatar's counsel, both inside counsel and outside counsel, regarding such matters, and reviewed transmittals to and from them.

He regularly attended meetings, management meetings with senior managers of both Florida Cities and Avatar, and he was frequently responsible for assimilating confidential business documents and legal documents to the appropriate other managers and executives of Florida Cities and Avatar.

We think that under the standards of Rentclub he qualifies as that type of former employee who is protected, and anything that he might have said would be something that could be used against Florida Cities in this case. The contacts, therefore, we believe were improper. There is clearly an appearance of professional impropriety by virtue of such ex-parte contacts.

And, Judge, I would like to emphasis that we're not contending that the Department of Justice attorneys did anything intentionally wrong. We will acknowledge, let's say, that they did not know of the Rentclub decision and that their contacts were inappropriate.

But nevertheless, we believe that there is at least an appearance of professional impropriety and that if Mr. French was in fact a party by definition under Rentclub, even though he's a former employee, that contact was no less inappropriate than the contact would have been if they'd gone to the existing senior vice president of Florida Cities and had similar discussions with him. In fact, Judge, I think if we were in that context there wouldn't be any question that that's considered inappropriate, you can't do it.

THE COURT: Are you going to tell me that we'd have to disqualify the entire Justice Department from this case?

MR. HUME: No, sir. We're not asking that that be done.

THE COURT: It's their -- it's not just Mr. Jacobs that's made these -- set up these rules or internal rules, it's the Justice Department as I understand it.

MR. HUME: That's correct. He's doing what they said. But my point is, we're not asking that the entire Department of Justice be disqualified from the case, we are asking that Mr. Jacobs and whoever else may have been involved and be privy to these contacts be disqualified and that other attorneys within the

Department of Justice be required to handle the case, pursuant to whatever instructions the Court deems appropriate to prevent any taint, so to speak, spilling over.

THE COURT: How do you know there is any?

MR. HUME: Well, we don't know that there is, but that brings me to my next point, which is part of the two-prong test that must be met in the Eleventh Circuit, that there must be a reasonable possibility that some specifically identifiable impropriety has occurred.

As I indicated, they have admitted that they had the contact. We believe that the contact itself is improper and is an identifiable impropriety because it should not have occurred. That is sufficient in and of itself, but it's also not disputed that the Department of Justice attorney spent four hours over a two-day period speaking with Mr. French about matters pertaining to this lawsuit.

We think that under those circumstances there is at least a reasonable possibility that Mr. French could have disclosed privileged or confidential information. We don't have to prove that it actually happened, only that there's a reasonable possibility that it did.

THE COURT: So they're saying [illegible]

MR. HUME: Well --

THE COURT: He's an officer of the Court just like you are.

MR. HUME: Yes, sir, I understand that. But if -- I suppose if that were the test, and that's all it takes, then there would never be a disqualification.

THE COURT: Well, unless we had other facts.

MR. HUME: Well, perhaps so. We think that the test is probably lenient where it says a reasonable possibility that something happened. And Mr. Jacobs may not even yet be aware that something improper did happen. He may not know that some confidential information was imparted to him, so he may be unaware that something happened, but the information may have been imparted to him nonetheless.

The second prong of the test is the likelihood of public suspicion must outweigh the social interest that will be served by counsel's continued participation. Basically, you know, how's the public going to look on this knowing it's a wrong, the contact was inappropriate. How does that reflect on the legal profession and the legal system versus the social interest of a client being able to chose the attorney of his own choice.

Typically it arises in private situations where an individual's gone out and hired a lawyer and says, I want Joe to represent me, and now somebody's asking the court to take Joe away from him. We don't think that we have that situation here. We think the likelihood of public suspicion for the prohibited conduct would outweigh any social interest. We're not really sure there is one here when we've got the Department of Justice. I don't mean any disrespect to Mr. Jacobs, I'm really seeing him today for the first time. But I think where you have the Department of Justice, the attorneys perhaps are a little more fungible or interchangeable than for a private citizen to go and hire a lawyer of his own choice.

I'm not sure that anyone but the Department of Justice could handle this suit for the United States, but certainly it's less onerous for another lawyer in that department to handle the case than it is for a private individual to have to get somebody else.

As Rentclub and other cases point out, even the appearance of impropriety may require prompt remedial action from the court, and any doubt should be resolved in favor of disqualification. We think that certainly there is a reasonable possibility that something occurred and something improper occurred,

and that there is at least a doubt and that that doubt should be resolved in favor of disqualification.

As I indicated, we're not seeking to disqualify the entire Department of Justice, rather we're only seeking to disqualify Mr. Jacobs and any other attorneys who have had this contact with these former managerial employees.

I think any further comments, Judge, I will wait for rebuttal purposes.

THE COURT: If I give it to you.

MR. HUME: Okay. If you give it to me. Thank you.

MR. JACOBS: May it please the Court. This is a civil environmental enforcement action brought for violations of the Clean Water Act. The Defendant owns and operates the Waterway Estates Waste Water Treatment Plant located in North Fort Myers, Florida, as well as other waste water treatment plants in Florida.

The Waterway Estates Plant discharges into the Caloosahatchee River. The United States alleges in its complaint that the Defendant violated the act by, one, unlawfully discharging pollutants into the river without an EPA permit; two, unlawfully discharging pollutants into a tributary canal instead of the river itself once it obtained an EPA permit; and three, unlawfully

discharging pollutants into the river in excess of the limits specified in the EPA permit.

The issue before the Court today put simply is whether the United States is barred by Rule 4-4.2 of the Florida Rules of Professional Conduct from contacting Defendant's ex-employees without Defendant's permission. Your Honor, by my count there have now been no fewer than nine briefs filed by the parties on this issue, and I do not intend to use the Court's time today to rehash the briefs.

Suffice it to say, however, that as we have said in our briefs, the Government's position is that such contacts are entirely proper under the rules of this Court, the rules of professional conduct adopted by the Supreme Court of Florida, the model rules of professional conduct of the American Bar Association and the regulations of the the U.S. Department of Justice. The Board of Governors of the Florida Bar in a published opinion has stated that such contacts are perfectly appropriate. The ABA Standing Committee on Ethics and Professional Responsibility in a published formal opinion has said that ABA Model Rule 4.2 on which the Florida Rule is modeled, does not apply to ex-employees.

The U.S. Department of Justice in a

promulgated regulation has expressly said that a communication with an ex-employee of an organization is not a communication with the organization. Nearly every federal court considering the issue after the ABA formal opinion in 1991 agrees. The Government recognizes that Judge Kovachevich of this Court has held otherwise in Rentclub and Browning. Notwithstanding those holdings, there is still an ample basis to grant the Government's motion because the facts in Rentclub are readily distinguishable from the instant case.

Judge Kovachevich's decision in Rentclub was based on a unique and extraordinary set of facts. There the plaintiff actually hired the defendant's ex-employee as a trial consultant; money changed hands. Here the Government hasn't hired Defendant's ex-employees, it merely interviewed one of them, ensuring in the process, I should add, that no privileges were violated.

The Government is very concerned, Your Honor, about the practical effects of the application of Rule 4-4.2 to former employees. By limiting an important avenue of informal discovery, it would necessarily increase the use of formal, more costly discovery, a result clearly antithetical to the Supreme Court's intentions in amending the discovery rules in the Federal Rules of Civil Procedure in December 1993,

amendments which postdate both Judge Kovachevich's opinions.

Moreover, ex-employees could well be Government witnesses. Is the Government to be precluded from directly contacting its own witnesses? Is the Government to be required to contact opposing counsel and have opposing counsel present when preparing its own witnesses for trial? We say no, Your Honor. In fact --

THE COURT: Even if they have -- even if they're found to have attorney/client information or -- as set forth in the comment on Rule 4.2, having matters or information which could be imputed to the corporation?

MR. JACOBS: I think that the gloss on the comment -- or the comment or the gloss on the rule says, without looking at it, that current employees might be able to bind the corporation, but not former employees.

THE COURT: Well, if they were -- I would think there would be cases where they could.

MR. JACOBS: I believe that former employees can make statements.

THE COURT: And I think that's what Judge Kovachevich said.

MR. JACOBS: I believe Judge Kovachevich said that. I think the prevailing weight of authority

disagrees. Professor Hazard, who wrote the book on ethics, so to speak --

THE COURT: What if he was one day out of employment, he just happened to retire one day and you talked to him the next. It's how many fairies can dance on the head of a pin.

MR. JACOBS: And if I talked to him the next, as an officer of the court, I would advise him that I was not there to listen and could not entertain hearing attorney/client privilege material.

THE COURT: So then that's an exception from what you just said, right?

MR. JACOBS: I'm sorry, I don't follow the Court.

THE COURT: That would be one exception from what you've said, that no former employees are subject to the rule.

MR. JACOBS: No, Your Honor. No former -- our position is that no former employees are subject to the rule. And the logic is that they cannot make admissions on behalf of the corporation because they do not any longer work for the corporation.

If I were to take -- I have taken mid-level managers' depositions in this case, they are in a position to make admissions for the corporation, the

ex-employees can't. And that's what the commentators say, that's what Professor Hazard says, that's what most of the case law says. That's what --

THE COURT: There's also case law that says something else.

MR. JACOBS: Well, I suggest that before the ABA interpreted its own rule in 1991, there was a splattering of decisions that went both ways. Since the ABA itself, which drafted the model rule and which the Florida rule is modeled, since that time, as far as I know, Judge Kovachevich is the only judge with respect that's gone the other way and we do disagree.

The authorities on ethics, Professor Baker, Professor Hazard -- Professor Hazard incidentally was on the board of directors of the parent corporation of the department until recently when he resigned. Professor Hazard said you can't -- the former employees rather, excuse me, former employees cannot make admissions on behalf of the corporation.

THE COURT: What about ex-parte communications in a situation such as we have here, where people could be testifying against themselves?

MR. JACOBS: They could certainly make admissions against themselves and that's why I'm somewhat sympathetic to the plea of the new lawyers as

of yesterday, that they have some time to work with their new clients. And I was sympathetic to Mr. Campbell when he contacted me yesterday. I'm less sympathetic to the Defendant's Counsel, who have repeatedly claimed, as I'll say later in my address, have repeatedly claimed to represent every single witness, every single ex-employee witness who I've attempted to contact, whether I've contacted them directly or through counsel for the other side as they've requested. I'd get a phone call back saying, oh, we represent them also.

THE COURT: How many individuals have you actually taken ex-parte statements from?

MR. JACOBS: We had one interview and that's the interview of Mr. French.

THE COURT: Mr. French, and where was that?

MR. JACOBS: That was in Australia, and that took place --

THE COURT: Who was there?

MR. JACOBS: I'm sorry?

THE COURT: Who was there?

MR. JACOBS: I was there. That took place the second week of February. We were provided with the list that the Court has already referred to in Defendant's presentation, with the witness list. We did not know

who Mr. French was at the time; this was on February 4th. I already had my ticket for my two-week vacation in Australia, and while I was there I took a day out to speak to Mr. French. And at that time I learned that he was a manager, but we took every step to advise Mr. French at the time that he had the right to counsel, that he had the right to have the counsel for the company present. And we specifically advised him that he should not make reference to any communications that he had with counsel. We took every step to be very careful here, Your Honor.

Counsel was right when he says we didn't know of Rentclub, and Counsel has confided that they didn't know of Rentclub either. I personally practice in roughly fifteen judicial districts, and I do try to keep up with every potentially important decision and I'm embarrassed to say I didn't know about Rentclub when I conducted that interview. But I certainly knew of the issue and the Department's position on the issue, and I went forward as the Department would have me go forward and the Department authorized me to go forward. But we had no indication about Mr. French other than his name and address. And as I said to Mr. Scroggin and Mr. Baise as I gave them a lift back in my car to their office that day on February 4th, well, if there's

somebody in Australia, I think I'll start with him. And I left a week later, and I spoke to Mr. French a few days later.

As I say, Your Honor, the Government is very concerned about the practical effects of the application of Rule 4-4.2 to former employees. By limiting an important avenue of informal discovery, it would necessarily increase the use of formal, more costly discovery.

This very case serves an illustration of why such limitations are ill-advised. On every occasion - and I started to allude to this a moment ago - on every occasion since the Government has voluntarily agreed to contact opposing counsel prior to contacting an ex-employee, opposing counsel has taken the opportunity before allowing the contact to solicit the ex-employee as a client.

Defendant's Counsel actually did represent both the Defendant corporation and an ex-employee at his deposition last month. Until only yesterday Defendant's Counsel also represented two additional ex-employees whose depositions were scheduled for tomorrow and the next day. And, Your Honor, we've been advised that each witness who's separately represented is represented at Defendant's expense, not at their own expense.

Your Honor, I respectfully suggest that what Judge Kovachevich was driving at in Rentclub was fair play. It was simply wrong in that case for one party to pay an ex-employee of the other party. Is it less wrong in this case for a Defendant to provide free legal services to the Government's potential witnesses, and to use every tactic available to prevent the Government from having access to them? Is it less wrong in this case for the Defendant to have hired counsel -- to have hired as counsel a former EPA employee who had ultimate supervisory responsibility for the Agency's enforcement actions against this very Defendant during the time that it was committing the violations in question? Or for that matter, for the Defendant to pay a former employee, a former EPA employee a consulting fee in his testimony as a fact witness, not an expert witness, at a deposition.

Your Honor, the Government doesn't necessarily quarrel with opposing Counsel's aggressive representation of their client. And we agree that reasonable minds may differ as to how Rule 4-4.2 ought to be construed. We do quarrel, however, with the unnecessarily offensive way Defendant has insisted on framing the issue, particularly since the Government itself first brought the matter to the Court's attention

last June, long before Defendant filed its October motion.

We urge the Court to grant the Government's motion and deny the Defendant's so we can proceed with this action without further interference, so that the Defendant can be brought to justice for unlawfully polluting the Caloosahatchee River.

Thank you, Your Honor.

THE COURT: Thank you, Counsel.

MR. HUME: May I have just a few minutes?

THE COURT: About two minutes.

MR. HUME: Thank you, Judge. It won't take but a moment.

Just a few things, Judge. First, he referred again to the opinion of the Florida Bar 88-14. Our response basically is that Judge Kovachevich is not bound by that, and to the extent that her ruling disagrees with that in Rentclub, then she doesn't agree with it. And we submit that that's what should govern in the Middle District of the Federal Court and not the opinion of the Florida Bar.

Again, as I commented before, the one case that I cited talks about how discovery -- or excuse me, formal discovery, deposition is the better way to do this. We would submit the protection of privileged

information should not be sacrificed at the alter cost of discovery.

One thing I would point out, the Court may have already seen it, but the comment to Rule 4-4.2 talks about three categories of people, and it says in the case of an organization, this rule prohibits communications by a lawyer for one party concerning the matter and representation with persons having a managerial responsibility on behalf of the corporation, and with any other person who's act or omission in connection with that matter may be imputed to the organization for purposes of civil or criminal liability, or whose statement may constitute an admission on the part of the organization. That's the language that Judge Kovachevich picked up on in making her ruling, and we think that makes good sense.

Basically the Department of Justice is telling this Court, Your Honor, that the Rentclub case is wrong and he wants you to change it or doesn't want you to follow it. We believe that it's good law and you should follow it. We think the important thing is the appearance of impropriety is present with his contacts. He's admitted he was unaware of Rentclub. Ignorance of the law is certainly no excuse.

THE COURT: Especially for an attorney.

MR. HUME: Pardon me? Especially for a lawyer. I didn't want to say that, Judge, but thank you.

He mentioned the list of witnesses that were provided. The purpose of that list, as I understand it, was to provide the key witnesses who have important information. That should have been some clue to Mr. Jacobs that these were important people who might have privileged information.

I understand that the discussions that were had with Mr. Jacobs about Australia were going there to depose Mr. French, not an authorization or consent to his going down there and contacting him in an ex-parte manner.

I'm further told that these witnesses who later became represented by Mr. Baise and Mr. Scroggin were not solicited; they sought out the representation on their own. And that finally the payment to -- on this point, final point is, the payment to that EPA agent was done at the request of Mr. Jacobs.

We would ask that you deny the Government's motion, grant our motion. If you, however, agree with the Government and disagree with us, we would also then ask that you extend your ruling to provide that those former employees cannot bind Florida Cities, their statements cannot be introduced as admissions of Florida

Cities, and their actions cannot be imputed to Florida Cities. And that's based on the rationale that the Government is asserting in support of its position. And I will give you a few quick references.

THE COURT: Counsel, I'm going to deny both motions. And I don't really think I have to disagree with Judge Kovachevich in any way for doing it.

First of all, to disqualify an attorney, it's a very severe penalty and I would only do so if the actions of counsel were unconscionable, and I don't think we have that in this case. Although we may have had -- and I will go on the record and say I don't agree with the Justice Department's position either. I don't think they have carte blanche authority to go contact every witness in a lawsuit. If they wanted to, they could have investigated this case before they filed the lawsuit and had their investigators talking to these people, whether they wanted to talk to them or not. But they -- it's not as severe as having a Justice attorney call you, and whether they did or not, it comes on pretty strong and it's hard for people to back off of that. But in relationship to -- but I don't believe that that actually took place to that extent in this case, and I don't think Counsel should be disqualified.

However, I am -- for the purpose that was

brought out about the fact that these witnesses may be subject to criminal problems, I'm going to refuse to allow the Justice Department to talk to any of the witnesses in this case, or for that matter any employees in this case without doing so with a full deposition and with their having the right to have their attorney there and present.

MR. HUME: Does that include the right of Florida Cities Counsel to be present? It's a deposition you're talking about, right?

THE COURT: They're going to have to depose them if they're going to do so, but these witnesses are going to have to be -- or former employees or whoever they are, are going to have to have the right to have their attorney with them.

MR. HUME: Certainly.

THE COURT: And if they depose them, I would assume you have the right to be there too.

MR. HUME: Yes, sir. Thank you.

THE COURT: Counsel?

MR. JACOBS: For the sake of clarification, Your Honor, with respect to the ex-employees who have separately retained counsel, with the consent of that counsel may we interview their clients, and with the consent of that counsel may we interview their clients

Outside the presence of the Defendant.)

MR. BAISE: In all due reference, Your Honor, that emasculates your ruling, because what they are seeking here is to sit down with counsel that has absolutely no expertise in the Clean Water Act area and Mr. Jacobs would have superior knowledge with respect, one, to the facts, two, with regard to the law over such individual and his counsel.

MR. HUME: More importantly, Judge --

THE COURT: I'm going to require -- my order's going to be additionally that you're going to have to give notice of such a request so that these counsel can at least discuss that with the other attorney just as you can.

MR. JACOBS: That's fair, Your Honor.

THE COURT: Then after they've talked to an attorney and you've talked to the attorney, and the attorney talk to his client and they still want to talk to you outside of that, I figure they're -- at that point they're going to be adverse to Florida Cities Water Company and would fit in the other case, which I can't remember what it is, but there's another case which was filed where a party became adverse in a discrimination case. So in that case they -- the holding was that since they were adverse, they certainly

couldn't be held as a former employee. I think that's where they would put them.

So what you would have to do in this case is to notify Florida Cities Counsel that you intend to talk to the witness's counsel to see if they would be willing to do that and then give them the opportunity, they can also discuss that with counsel.

MR. HUME: (Nodded head affirmatively.)

MR. JACOBS: And with respect to the ex-employees, Your Honor, who have not advised us that they have separate counsel, how does the Court wish us to proceed?

THE COURT: You will have to advise them that they're going to have to get counsel if they want to talk to you. Unless they, you know -- but then you're still going to have to notify them if you're going to talk to them, so that they can talk to those people too.

Once they have been notified I think that they could be subject to criminal activity, I'm sure that they'll get their own attorney. I don't think we'll have a problem with that, and that would be your obligation too.

MR. JACOBS: To notify the witness --

THE COURT: That's right, because of the Clean Air Act they could be subject to some kind of criminal

prosecution.

MR. JACOBS: Very well. And then if the witness still wants to talk to us with or without counsel --

THE COURT: If he still wants to talk to you after all that, he can talk away.

MR. JACOBS: Without the company's being present.

THE COURT: That's right.

MR. JACOBS: Thank you, Your Honor.

MR. HUME: But he has to notify us of when he's going to meet --

THE COURT: He has to notify you that he's going to talk to him, right.

MR. HUME: Thank you.

MR. JACOBS: But not when and I don't have to invite them, Your Honor, right? I just need to --

THE COURT: You don't have to invite them, you've just got to tell them that you are going to talk to a certain ABC or whoever it is, so that they can also do so.

MR. JACOBS: Yes, Your Honor.

THE COURT: And give them a chance to talk to the witness.

MR. JACOBS: I understand.

MR. HUME: (Nodded head affirmatively.)

THE COURT: I hope you got all that now.

MR. JACOBS: Is the Court going to issue an order or would you like me to prepare one, Your Honor?

THE COURT: If you two sides can get together and prepare such an order, I'd be glad to have you do so.

MR. BAISE: Yes. It would be a joint order, Your Honor.

MR. HUME: We will -- if we can agree on an order, we will do it and submit it. If we can't, we will ask that the Court --

THE COURT: Then my order will be that you will agree on an order.

MR. HUME: Okay, sir. We will agree on an order. Thank you for your time.

THE COURT: All right, gentlemen.

MR. JACOBS: Thank you, Your Honor.

THE COURT: Have a good day.

(Hearing concluded.)

FORT MYERS DIVISION

UNITED STATES OF AMERICA,

Plaintiff,

V.

CASE NO. 93-281-CIV-FTM-21

FLORIDA CITIES WATER COMPANY,

Defendant.

_____/

ORDER

This cause comes before the Court on two objections to the Magistrate Judge's Order (Dkt. 54) entered March 16, 1994: (1) United States' Objections to the Magistrate Judge's Order on the United States' Motion for an Order Allowing Ex-Parte Contacts with Former Employees (Dkt. 58) and the Defendant's response (Dkt. 75) in opposition thereto; and (2) Defendant's Objections to the Magistrate Judge's Order on Defendant's Motion to Disqualify Counsel (Dkt. 66). Pursuant to Rule 72, Federal Rules of Civil Procedure, the Court "shall consider such objections and shall modify or set aside any portion of the magistrate judge's order found to be clearly erroneous or contrary to the law."

I. Motion to Allow Ex-Parte Contacts

After hearing oral argument, the Magistrate Judge issued an order denying the Plaintiff's Motion for an Order Allowing Ex-Parte Contacts with Former Employees. The United States objects solely to paragraph 1 of the Magistrate Judge's Order, which provides:

1. Plaintiff's motion to allow ex parte contacts with defendant's employees is DENIED.

a. Except as set forth in the next two paragraphs, no attorney in the United States Department of Justice shall communicate with any of defendant's present or past employees, unless the communication is at a formal deposition at which the employee or witness will have the right to be represented by counsel.

b. If counsel for the plaintiff wishes to communicate other than at a deposition with a potential witness represented by counsel, counsel for the plaintiff shall give counsel for the defendant reasonable advance notice, so that defense counsel can contact counsel for the witness before any communication from plaintiff occurs.

c. If counsel for plaintiff wishes to communicate other than at a deposition with a potential witness not represented by counsel, counsel for the plaintiff shall give counsel for the defendant reasonable advance notice, so that defense counsel can discuss the matter with the witness before any communication occurs, and further advise the witness that he or she may be subject to potential criminal prosecution under the Clean Water Act.

The Plaintiff argues that under Rule 4-4.2[1], Florida Rules of Professional Conduct, Rule 4.2, ABA Rules of Professional Conduct, prevailing case law, and commentary, there exists no legal barrier to the Plaintiff's ex parte informal interviews with Defendant's ex-employees. The Plaintiff states that neither Florida Rule 4-4.2 nor the ABA Rule addresses the issue whether a former employee is deemed to be represented by the former employer's counsel for purposes of

---

[1]Rule 4-4.2, Florida Rules of Professional Conduct, modelled largely on Rule 4.2, ABA Model Rules of Professional Conduct, provides, in pertinent part, that a lawyer shall not communicate:

> about the subject of the representation with a person the lawyer knows to be represented by another lawyer in the matter, unless the lawyer has the consent of the other lawyer.

The Florida Rules also adopt the following provision from the Official Comment to ABA Rule 4.2:

> In the case of an organization, this rule prohibits communications by a lawyer for one party concerning the matter in representation with persons having a managerial responsibility on behalf of the organization and with any other person whose act or omission in connection with that matter may be imputed to the organization for purposes of civil or criminal liability or whose statement may constitute an admission on the part of the organization.

ex parte communications. The Plaintiff maintains, however, that Opinion 88-14 (March 7, 1989) of the Governors of the Florida Bar, reprinted in Professional Ethics of the Florida Bar at 1299 supports their requested ex parte communications. They quote the Opinion, which states, "A plaintiff's attorney may communicate with former managers and former employees of a defendant corporation without seeking and obtaining consent of corporation's attorney." (Dkt. 58, Exh. A). The Plaintiff also points out that a 1991 formal ABA opinion expressly held that Rule 4.2 does not apply to former corporate employees. ABA Standing Committee on Ethics and Professional Responsibility Formal Opinion No. 91-359 (March 22, 1991) reprinted in ABA/BNA Lawyers' Manual on Professional Conduct at 1001:101 (Dkt. 58, Exh. B).

Additionally, the Plaintiff cites several courts outside the Eleventh Circuit that have held that Rule 4.2 or its equivalent does not apply to former employees. The Plaintiff also attempts to distinguish two cases in which this Court has held that under certain circumstances ex-employees may not be contacted, and asserts that Judge Kovachevich's holdings in those cases are in the distinct minority and inconsistent with the Florida Bar and ABA ethics opinions. See Browning v. AT & T Paradyne, 838 F.Supp. 1564 (M.D. Fla. 1993); Rentchub Inc. v. Transamerica Rental Finance Corp., 811 F.Supp. 651 (M.D. Fla. 1992). Finally, the Plaintiff states that the U.S. Department of Justice promulgated extensive guidelines on August 4, 1994, which provide that "[a] communication with a former employee of an organization that is represented by counsel shall not be considered to be a communication with the organization for purposes of this part." See 59 Fed. Reg. 39910.

In response, the Defendant asserts that the Defendant's former employees with whom Defendant knows the Justice Department attempted to interview ex parte were all "managerial"

employees who were responsible for making, or had knowledge of, several important decisions at issue in this case. The Defendant asserts that it has an ongoing interest in protecting Defendant's former employees' knowledge of privileged or confidential information. Further, the Defendant maintains that the Magistrate Judge's denial of the government's motion to allow ex parte contacts was mandated by this Court's prior decisions in Rentclub and Browning. The Defendant argues that those decisions are correct, particularly here, where the persons sought to be interviewed ex-parte were high ranking personnel with privileged information. Further, the Defendant asserts that the Justice Department's regulations purport to override the states' Codes of Professional Responsibility and have been "universally condemned by all authorities considering them."

Finally, the Defendant argues that the Magistrate Judge's ruling is correct in light of [illegible], 1 F.3d 1523 (9th Cir. 1993), amended and superseded on denial of rehearing en banc, 35 F.3d 1275 (1994), cert. denied, Mariani v. U.S., 115 S.Ct. 939 (1995). The Defendant asserts that in Weitzenhoff, the Ninth Circuit increased the potential liability of all Defendant's current and former managerial employees by its interpretation of 33 U.S.C. § 1319(C)(2)(a). Under § 1319(C)(2)(a), any person who "knowingly violates [various sections of the Act] . . . or any permit condition or limitation . . . [commits a felony]." In Weitzenhoff, the Court construed the term "knowingly" to require that a person know that he was discharging the pollutants in question, not that he knew that his conduct was violating the terms of the Act or a permit. 35 F.3d at 1284. The Defendant asserts that in light of the Supreme Court's denial of certiorari, Defendant's counsel concluded that past and present employees of the Defendant would have to be informed of their Fifth Amendment privileges

against self incrimination before giving deposition testimony. The Defendant further states that various former employees of the Defendant have retained separate counsel to represent them, and that those represented by counsel have invoked the Fifth Amendment when deposed. Additionally, the Defendant notes that the Magistrate Judge's Order directs counsel for the Plaintiff to advise a witness, who is not represented by counsel and with whom the Plaintiff wishes to communicate with other than at a deposition, that he or she may be subject to potential criminal prosecution under the Clean Water Act.

The Court finds that the Order by the Magistrate Judge was not clearly erroneous or contrary to the law. First, this Court has held that a former employee may be considered a "party" for purposes of Model Rule 4.2. Rentclub, 811 F.Supp. at 657. In Rentclub the Court stated:

> Privileged communications present a distinct problem with respect to contact with former employees, thus *ex parte* contact should be barred to prevent disclosure of any inadvertent confidential communications. . . The interest of the corporation in protecting privileged information acquired by an employee during the course of employment from disclosure to an opponent in litigation remains after the employee leaves the corporation.

Id. at 657-58. The Court agrees that the decision in Rentclub is applicable here, where the Defendant has demonstrated an interest in protecting privileged information. Further, the Magistrate Judge's Order does not prohibit the Justice Department's informal interviews with the Defendant's former employees, but rather requires that counsel for the Defendant be notified in advance and be given the opportunity to be present. Finally, in light of the potential criminal liability of the former employees sought to be interviewed, the Magistrate Judge properly ruled that before the Plaintiff's counsel could communicate with a witness not represented by counsel,

the Plaintiff's counsel would have to advise that person of his or her possible prosecution under the Act.

II. Motion to Disqualify Counsel

The Defendant objects to the portion of the Magistrate Judge's Order which states, "Defendant's motion to disqualify plaintiff's current counsel is DENIED." The Defendant states that it primarily seeks to disqualify Plaintiff's counsel based on the impropriety of two ex parte meetings that occurred over a period of two days in Australia with Mr. Robert H. French, the former Senior Vice President of the Defendant. The Defendant asserts that Mr. French had personal knowledge of confidential and attorney-client privileged information, and that his statements might be admissions against the corporation or his actions might be imputed to the corporation. The Defendant further asserts that the conduct of Plaintiff's counsel in the instant case satisfies the Eleventh Circuit two-prong test for disqualification:

> First, although proof of actual wrongdoing is not required, there must exist a reasonable possibility that some specifically identifiable impropriety did in fact occur. Second, the likelihood of public suspicion or obloquy must outweigh the social interests that will be served by the attorney's continued participation in the case.

Norton v. Tallahassee Memorial Hosp., 689 F.2d 938 (11th Cir. 1982).

Even assuming, however, that the Court finds that the Plaintiff's counsel created a reasonable possibility of impropriety, the Court does not find persuasive the Defendant's argument that the second prong, the attorney's continued participation is outweighed by social interests, has been satisfied. Thus, the Court finds that the Magistrate Judge's Order on the Motion to Disqualify was not clearly erroneous or contrary to the law.

Upon consideration of the foregoing, it is hereby **ORDERED and ADJUDGED** that the United States' Objections to the Magistrate Judge's Order on the United States' Motion for an Order Allowing Ex-Parte Contacts with Former Employees (Dkt. 58) and the Defendant's Objections to the Magistrate Judge's Order on Defendant's Motion to Disqualify Counsel (Dkt. 66) are **DENIED**, and the Magistrate Judge's Order is **AFFIRMED** with respect to the subject of said objections.

DONE AND ORDERED, at Tampa, Florida, this 26th day of April, 1995.

RALPH W. NIMMONS, JR.
UNITED STATES DISTRICT JUDGE

DGS

UNITED STATES OF AMERICA,

Plaintiff,

v.

FLORIDA CITIES WATER COMPANY, INC.,

Defendant.

CIVIL ACTION NO.
93-281-CIV-FTM-21

UNITED STATES' SECOND REQUEST FOR PRODUCTION OF DOCUMENTS

Plaintiff, the United States of America, pursuant to Rules 26 and 34 of the Federal Rules of Civil Procedure, requests Defendant Florida Cities Water Company to produce and permit the United States to inspect and copy each of the following documents in defendant's possession, custody or control. These documents shall be produced on July 18, 1994, unless such time is modified by order of the Court or by counsel for the United States, at the offices of the U.S. Department of Justice, Environment and Natural Resources Division, 1425 New York Avenue, N.W., Washington, D.C., or at such other location as agreed upon by counsel for the United States

INSTRUCTIONS

1. Unless otherwise stated, these requests apply to documents written, produced, drafted, or generated on or after October 1, 1988, and ending at the trial of this matter, and excludes documents already produced in response to the United States' First Request for Production of Documents. (Where the

October 1, 1988 date does not apply the words "regardless of date" appear in parenthesis in the individual request.)

2. Unless otherwise specified, these document requests pertain to Florida Cities Water Company, Inc. ("defendant") and mean the designated entity and its parent companies, departments, divisions, officers, employees, agents, servants, assigns and, unless privileged, its attorneys.

3. For each document produced, indicate on the document or in some other reasonable manner, the numbered request(s) to which it responds.

4. This request covers all documents in the possession, control or custody of defendant, its parent companies, officers, employees, agents, servants, consultants, attorneys and assigns.

5. Words used in the plural shall also be taken to mean and include the singular. Words used in the singular shall also be taken to mean and include the plural. "Or" and "and" shall be construed either conjunctively or disjunctively to bring within the scope of these interrogatories any information that might otherwise be construed to be outside their scope. The past tense includes the present tense where the clear meaning is not distorted by change of tense.

6. If any document is withheld under any claim of privilege or exemption, furnish a list identifying each document for which the privilege or exemption is claimed, together with the following information:

(a) its title, or if it has no title, its subject matter;

(b) the date of origin;

(c) the author or addressor;

(d) the recipient(s) of all copies; and

(e) the basis upon which privilege or exemption is claimed.

7. Please produce the complete original exact copy of each document and, unless otherwise stated, each non-identical copy (whether different from the original because of notes made on the copy or otherwise), including drafts, of each writing of every kind and description (together with all worksheets, support documents, and other relevant materials), whether inscribed by hand or mechanical, electronic, microfilm, photographic, or other means (such as by recording, film, tape or other medium) from which such information may be obtained.

DEFINITIONS

Unless otherwise indicated, the terms used in these Requests shall have the same meaning ascribed to them under the Clean Water Act.

In addition, unless otherwise stated, the following definitions shall apply to these discovery requests:

A. "Contractor" or "consultant" means any person who acts as agent for, or on behalf of, any other person, whether or not for consideration, and includes subcontractors.

B. The terms "bypass" and "upset" shall have the meaning

ascribed to those terms by 40 C.F.R. § 122.41.

C. "Clean Water Act" means the Federal Water Pollution Control Act, as amended by the Water Quality Act of 1987, 33 U.S.C. §§ 1251-1387, including all regulations promulgated thereunder.

D. "Defendant," "Florida Cities Water Company," "FCWC," "you," and "your," unless otherwise indicated, all mean Defendant Florida Cities Water Company, Inc., each merged, consolidated, and acquired predecessor or successor, parent, subsidiary, division, and affiliate, each past and present officer, director, employee, agent, servant, consultant and representative of each such entity or individual, and each past and present attorney of each such entity or individual.

E. "Document" means any and all material that is written, printed, typed, photographed, recorded (electronically, magnetically, graphically or otherwise) or which is capable of being recorded in any form. It includes, but is not limited to, any logs of materials received, other logs, invoices, purchase orders, receipts, bills of lading, loading tickets, receiving tickets, shipping orders, inventories, letters and other correspondence, offers, contracts, agreements, bids, proposals, applications, licenses, permits, reports to government agencies, other reports, minutes of meetings, sales estimates, sales reports, memoranda, handwritten or other notes, calendar or diary entries, agendas, bulletins, graphs, charts, maps, photographs, drawings, data, price lists, lists of accounts, summaries,

telegraphs, teletypes, computer printouts, magnetic tapes, discs, microfilm, and microfiche.

F. "DMR" means Discharge Monitoring Report as defined in 40 C.F.R. § 122.2.

G. "EPA" shall refer to the United States Environmental Protection Agency.

H. The "Facilities" shall refer to the following wastewater treatment plants and related sewerage systems, unless a facility is otherwise indicated by name:

Gulf Gate Treatment Plant, Sarasota, Florida
South Gate Treatment Plant, Sarasota, Florida
Barefoot Bay Treatment Plant, Barefoot Bay, Florida
Carrollwood Treatment Plant, Tampa, Florida

I. "Inspection" means the physical observation of any tangible matter.

J. "Navigable waters" is defined in Section 502(7) of the Clean Water Act, 33 U.S.C. § 1362(7).

K. "Non-Compliance Report" means any report of non-compliance [pursuant to the requirements of 40 C.F.R. §§ 122.41(1) and (4)-(7)] with any term or condition of a NPDES permit issued for the discharge of pollutants from one of the Facilities.

L. "NPDES" shall refer to the National Pollutant Discharge Elimination System of Section 402 of the Clean Water Act, 33 U.S.C. § 1342.

M. "NPDES Permit" in relation to the Gulf Gate Treatment Plant means NPDES Permit No. FL0032816; in relation to South Gate Treatment Plant means NPDES Permit No. FL 0032808; in relation to

Barefoot Bay Treatment Plant means FL0042293; and in relation to Carrollwood Treatment Plant means FL0029319; all as amended, extended, renewed, reissued or modified.

N. "NPDES Permit Limit(s)" means any discharge limitation, term or condition contained in the permits listed in the preceding paragraph, as amended, extended, renewed, reissued or modified.

O. "Person" or "persons" means an individual, trust, firm, joint stock company, corporation (including a government corporation), partnership, association, State, municipality, commission, or political subdivision of a State, or any interstate body, together with their predecessors, successors and assigns, their agents servants, consultants, contractors, subcontractors, employees, and representatives, and all agents and representatives thereof.

P. "Point source" is defined in Section 502(14) of the Clean Water Act, 33 U.S.C. § 1362(14).

Q. "Relate(s)" or "relating to" means constituting, defining, containing, embodying, reflecting, identifying, stating, referring to, dealing with or in any way pertaining to.

R. "Refer to" or "refers to" means mentioning, discussing, making reference to or relating to in any way.

S. "State" means the State of Florida including, any department, agency or individual representing the State of Florida, and includes the Florida Department of Environmental Protection ("FDEP") and its predecessor-agency, the Florida

Department of Environmental Regulation ("FDER").

REQUESTS

1. All environmental audits of any FCWC wastewater treatment plant (regardless of date).

2. All complaint logs relating to any of the Facilities.

3. All documents relating to spills, overflows, leaks, bypasses, excessive discharges, and unpermitted discharges at/from any of the Facilities.

4. All DMRs reporting the discharge of pollutants from the Facilities.

5. All Non-Compliance Reports submitted by the defendant to EPA or the State of Florida relating to the discharge of pollutants from the Facilities.

6. All permit requests and applications, permit renewal requests and applications, and permit modification requests and applications, including all such documents whether they relate to NPDES or non-NPDES permit requests and applications filed by the defendant with federal, state or local authorities that pertain to the discharge of pollutants from the Facilities.

7. All organizational charts showing overall organizational structure of the defendant in detail, to include documents identifying all persons employed by the defendant with responsibility for, or authority over, the operation, maintenance and/or management of the Facilities, including lines of authority

and reporting relationships.

8. All maps, charts and diagrams, that identify and/or depict the geographic service area of the Facilities.

9. All maps (including USGS maps) that identify or depict the discharge location of the Facilities.

10. All documents relating to contacts, discussions, meetings and correspondence, between the defendant and its contractors (including subcontractors), to the extent that those documents relate to the operation of the Facilities.

11. All audits, evaluations, advice, Facilities Plans, reports, sampling results, surveys, tests, evaluations, analyses or studies, of any kind, prepared by the defendant or its contractors (including subcontractors), to the extent that those documents relate to the operation of the Facilities.

12. All documents including, but not limited to, all progress reports, correspondence, memoranda, and studies relating to meetings, discussions or oral or written communications relating to any and all EPA Administrative Orders issued to FCWC.

13. All documents relating to any test results, laboratory analyses, flow measurements or concentration analyses of any pollutants discharged from the Facilities.

14. All documents which refer or relate to the effects of the discharge of pollutants from the Facilities on the receiving waters.

15. All documents which refer or relate to whether or not discharges from the Facilities are and have been in

compliance with applicable water pollution control laws, including the applicable NPDES Permit.

16. All designs, including any plans and specifications, and modifications thereof, for the treatment elements and processes at the Facilities.

17. All documents that identify, describe or explain the treatment processes and operations at the Facilities.

18. All maps, charts, photographs and diagrams depicting any of the treatment elements and processes at the Facilities.

21. All documents, including maps, charts, photographs, and diagrams indicating the sampling location(s) for wastewater discharged from the Facilities.

19. All documents relating to process or equipment changes at the Facility which were designed to, or had the effect of, evaluating, preventing, increasing, reducing or otherwise affecting discharges of pollutants from the Facilities.

20. All documents relating to all operating, maintenance and inspection procedures at the Facilities, and any and all changes in these procedures, which were designed to, or had the effect of, preventing, increasing, reducing, or otherwise affecting discharges of pollutants from the Facilities.

21. All documents relating to procedures used or prescribed for use by FCWC to report to the EPA or the State, any water pollution discharges, violations of water pollution laws, regulations, or violations of your NPDES Permits.

22. All documents relating to any and all difficulties or problems FCWC encountered in meeting applicable water pollution control effluent limitations or the NPDES Permit Limits regarding pollutants discharged from the Facilities.

23. All documents relating to planning and/or consideration by FCWC of whether or not to install or to defer installation of any water pollution control equipment at the Facilities.

24. All documents relating to consideration by the defendant of whether or not to implement or defer implementation of process changes or facility procedures that would in any way affect water and/or pollutant discharges from the Facilities.

25. All documents relating to the advantages, disadvantages or potential implications to the defendant of delaying installation of water pollution equipment at the Facilities.

26. All documents relating to the capital, operating or maintenance costs of water pollution control equipment installed, or considered for installation, at the Facilities to achieve or contribute to the achievement of applicable water pollution control standards and/or NPDES Permit Limits.

27. All documents including, but not limited to, bid solicitations, bid requests, bids, engineering estimates and other cost documents, contracts or staff memoranda, which relate to any water pollution control equipment installed or considered for installation at the Facilities.

28. All documents including, but not limited to, bid requests, bids, estimates and other documents, that relate to costs of operation and maintenance, construction and equipment, of any and all plans, whether implemented or proposed, to either increase the treatment efficiency of the Facility or expand the capacity of the Facilities.

29. All documents relating to meetings, discussions or other written or oral communications regarding technology, personnel training, inspection, maintenance or any other means to eliminate or reduce water pollutant discharges or achieve compliance with water pollution control standards or your NPDES Permits.

30. All documents including training manuals, relating to operation, testing or maintenance procedures with respect to water pollution control equipment at the Facilities.

31. All documents relating to complaints received by the defendant from any person regarding the operation of the Facility or the discharge of pollutants from the Facilities.

32. All documents including, but not limited to, minutes, notes and memoranda, relating to meetings held by defendant at which any of the Facilities' compliance with the Clean Water Act and NPDES Permit Limits was discussed.

33. All documents relating to inquiries made by FCWC into the causes of discharges of pollutants at the Facilities which were not authorized under applicable water pollution control laws or the terms and limitations of NPDES Permit limits.

34. All documents that refer or relate to contacts, discussions, meeting, or correspondence of any kind between representatives of EPA, the State and/or any other governmental agency, and FCWC or any person representing or acting on its behalf, which relate in any way to the discharge of pollutants from the Facilities.

35. All daily operation and maintenance logs for the Facilities.

36. All records relating to the operation, maintenance and calibration of flow meters at the Facilities.

37. All treatability studies, wastewater characterization studies, industrial waste surveys, evaluations, tests, reports or other documents prepared by you or any consultant or contractor of FCWC or by any other person, relating to monitoring, sampling or analyses of wastewater discharged from the Facilities into navigable waters.

38. All documents relating to toxicity testing and nitrification procedures at the Facilities.

39. All documents relating to actual toxicity testing and nitrification at the Facilities.

40. All operational reports (internal and external) relating to the Facilities and Waterway Estates.

41. All permit applications and design documents relating to the original construction of the Waterway Estates Treatment Plant (regardless of date), including, but not limited to, such documents relating to the discharge location.

42. All documents relating to the acquisition of the Waterway Estates Treatment Plant.

43. All documents relating to permits of any nature obtained for plant upgrades at any FCWC wastewater treatment plant (regardless of date).

44. All applications relating to the discharge of pollutants at the Waterway Estates Treatment Plant (regardless of date).

45. All copies of the document entitled "CALOOSAHATCHEE RIVER: Wasteload Allocation Documentation: Lee County" (FDER Water Quality Technical Series Volume 2 Number 52). (regardless of date).

46. All documents relating to the development of wasteload allocations for the Caloosahatchee River and the unnamed canal to which the Waterway Estates Treatment Plant has discharged (regardless of date).

47. All documents relating to field data collection and modelling of the Caloosahatchee River and the unnamed canal to which the Waterway Estates Treatment Plant has discharged (regardless of date).

48. All project files (both levels) relating to the Waterway Estates upgrade/expansion (regardless of date).

49. All documents relating to all communications with Jack Schenkman (regardless of date).

50. All copies of all feasibility studies relating to the Waterway Estates upgrade/expansion (regardless of date).

51. All documents relating to all alternatives (including, but not limited to, "tie-in" to other facilities) to discharging wastewater from the Waterway Estates Treatment Plant into the Caloosahatchee River (regardless of date).

52. All documents relating to all authorizations to proceed relating to the Waterway Estates upgrade/expansion (regardless of date).

53. All documents relating to the Lee County 201 Facilities Plan.

54. All documents relating to FCWC policies and procedures for spending authorizations/approvals.

55. Bob Gordon's desk calendars (appointment books).

56. All management contracts (i.e., contracts for services such as environmental consulting, safety, etc.) between FCWC and any Avatar Utilities, Inc. or affiliate.

57. The 1994 monthly operating statements for FCWC.

58. The 1993 audited financial statements for Avatar Utilities, Inc. and subsidiaries, FCWC, Consolidated Water Company and subsidiaries.

59. Any and all 1995 FCWC budgets.

60. All documents reviewed by any expert retained by Defendant for the purpose of testifying in this case.

61. All documents Defendant intends to rely upon or introduce into evidence at trial.

62. All documents relating to the discharge of pollutants from the Facilities not otherwise subsumed by another request herein.

Respectfully submitted,

Question	Expected Answer/Notes	Page/Line	
Ms. Kagey, you wrote the intent to deny the Waterway Estates NPDES permit renewal application in July 1986, is that correct?	Yes	49/12-50/11	Denial
You also wrote the fact sheet that accompanies the notice of intent to deny the Waterway Estates NPDES permit renewal application, is that correct?	Yes		
Ms. Kagey, you have been with EPA since January 1980, correct?	Yes	16/17	Employ
Ms. Kagey, you have been an environmental engineer since January 1980, is that correct?	Yes.	17/16-22	Employ
Ms. Kagey, you have been writing NPDES permits for EPA Region IV since 1981, is that correct?	Yes.	19/13-22	Employ
Ms. Kagey, there are only three methods for writing NPDES permits is that correct?	Yes.	32/11-20	Permit
Ms. Kagey, one of the three methods for writing permits is effluent limitation guidelines, is that correct?	Yes.	31/6-10	Permit
Ms. Kagey, the second method for developing effluent limitations is water quality considerations, is that correct?	Yes	31/6-10	Permit
Ms. Kagey the third method for developing effluent limitations is through the permit writer's "best professional judgment", is that correct?	Yes	31/6-10	Permit
Ms. Kagey, you have never written a NPDES permit based on best professional judgment is that correct?	That is correct	36/19-20	Permit
Ms. Kagey, the fact that you have never written a permit based on best professional judgment means that the 1986 Waterway Estates denial was based upon either effluent limitation guidelines or water quality standards, is that correct?			Denial
Ms. Kagey, effluent limitation guidelines are codified in the Code of Federal Regulations, is that correct?			
Ms. Kagey, there are effluent limitation guidelines listed in the Code of Federal Regulations for sewage treatment works, is that correct?	Yes	40/13-16	Denial
Ms. Kagey, you do not use BPJ when an effluent limitation guideline has been promulgated for an industry, such as sewage treatment works, is that correct?	She should say "Yes": the permit writers guide says that you only use BPJ when no industry standards have been promulgated.		
Ms. Kagey water quality considerations are communicated to EPA in the form of wasteload allocations, is that correct?			
To use your testimony, you said that "Wasteload allocations are developed by states for a specific river or facility giving specific limits for allowable discharge." is that correct?	Yes	41/23-42/2	WLA
Ms. Kagey, as a general proposition, states develop wasteload allocations to protect the receiving water from high amounts of pollution, is that correct?	Yes	42/3-5	WLA
Ms. Kagey, you would not rely upon a draft WLA is that correct?	Yes	42/17-20	WLA

Question	Expected Answer/Notes	Page/Line	
The reason you would not rely on a draft WLA is that the final WLA might change from the draft, is that correct?	Yes	42/21-23	WLA
Ms. Kagey, do you know anything about how EPA approves WLAs?	No	41/17-20	WLA
Ms. Kagey, you do not know why a particular WLA might be submitted to EPA do you?	No--she knows that WLAs are submitted but does not know the purpose behind them.	43/10-14	WLA
Ms. Kagey, EPA denied the WWE application for a renewal permit based on your recommendation, is that correct?	yes	52/24-53/2	WLA
Ms. Kagey, your recommendation is detailed in the fact sheet attached to the notice of denial of the WWE renewal application, is that correct?	Yes	50/12-19	Denial
Your recommendation to deny was based upon a document entitled Caloosahatchee River Wasteload Allocation Documentation, Volume 2, Number 52, dated January 1981, is that correct?	Yes	52/8-23	Denial
Ms. Kagey you received the 1981 WLA directly from the state of Florida in June of 1986, is that correct	Yes	53/3-9	Denial
Ms. Kagey, you did not draft or read any memoranda regarding this particular WLA did you?	no	53/10-12	Denial
Ms. Kagey, renewal application denials are very rare in your experience, correct?	Yes	58/11-13	Denial
In fact, the 1986 WWE denial is the only renewal application denial that you recall, correct?	Yes	58/20-22	Denial
Ms. Kagey, you do not know why the 1981 document specified no discharge WLA for WWE, correct?	Yes	59/11-20	
Ms. Kagey, you assumed the WLA was approved by EPA?	Yes	67/18-20	Denial
Ms. Kagey, you do not know for a fact whether the 1981 WLA was approved by EPA?	Correct	67/15-17	Denial
Ms. Kagey, you did not check to verify that the 1981 wasteload allocation had been approved by EPA, correct?	Correct.	74/12-15	WLA
In fact, Ms. Kagey, you cannot state whether the State of Florida meant the figures in the 1981 document to be required limitations, correct?	Correct.	81/18-82/1	WLA
Ms. Kagey, when you reviewed the 1981 document, you only reviewed pages 1 and 17, correct? You did not review any other pages, correct?	Correct.	83/17-24; 88/19-89/8	WLA
After January 1981, you are not aware whether Florida Cities requested a wasteload allocation from FDER for discharge to the canal leading to the Caloosahatchee, correct?	Correct.	110/1-7	WLA
Ms. Kagey, if WWE had a wasteloal allocation, you would have given those limits in a permit to discharge, correct?	Correct.	111/18-112/4	WLA
Ms. Kagey, you testified that "as a permit writer I would use the most recent information that I had," correct?	Yes.	117/22-118/4	WLA
Ms. Kagey, permit writers are instructed to obtain the current FDEP operating permit from a NPDES applicant, correct?	Yes.	134/13-135/3	Permit

Question	Expected Answer/Notes	Page/Line	
Ms. Kagey, you usually draft permits in accordance with FDER operating permits, correct?	Yes.	135/9-17	Permit
Ms. Kagey, Florida Cities included in its application to EPA a copy of the current Florida operating permit, correct?	Correct.	147/2-6	Permit
Ms. Kagey, as of 1986 the current FDER permit permitted discharges to the canal leading to the Caloosahatchee River, correct?	Correct	141/21-144/1	Permit
Ms. Kagey, the current Florida operating permit was written in 1983, correct?	Correct, Correct.		Permit
Isn't the 1983 FDER operating permit permitting discharges to the canal leading to the Caloosahatchee River written more than two years after the 1981 document?			
Ms. Kagey, it is apparent that FDEP did not interpret the 1981 document to mean that WWE cease discharge to the canal leading to the Caloosahatchee, correct?	Correct.		Permit
Ms. Kagey, you based your denial on the supposed 1981 wasteload allocation, not on the FDER operating permit, because the WLA was more stringent than the permit, correct?	Correct.	145/24-146/17	Denial
Ms. Kagey, in reaching your decision to deny the 1986 WWE NPDES renewal application, you knew that WWE had a valid state operating permit until 1988, correct.	Correct.	147/7-11	Denial
Ms. Kagey, you cannot interpret whether the 1981 document is a state requirement or a state recommendation, correct?	Correct.	148/22-149/3	
Ms. Kagey, the wasteload allocations unit interprets submissions from the state to determine in order to approve the wasteload allocation, correct?	Correct.		
Ms. Kagey, in performing your duties in 1986, you had a mental checklist of items, although there was no written checklist, correct?	Correct.	153/12-23	Permit
When you were deposed, you included state permits on your "mental checklist", correct?	Correct.	154/9-14	Permit
Ms. Kagey, you have seen 40 cfr 122.64, correct?	Correct.	154/21-155/3;168/9-1	Permit

Bruce Barrett
Deposition Digest
October 25, 1994

Mr. Barrett described his education and professional background. He was the Director of the Water Management Division in EPA Region IV. He discussed the three methods by which effluent limitations are developed, as well as the way TMDLs (Total Daily Maximum Loads) are developed. However, he was not familiar with the state wasteload allocation processes. He was generally knowledgeable about the purpose of wasteload allocations and the circumstances in which a wasteload allocation might be developed. He responded to questions concerning the relationship between wasteload allocations and effluent limitations and when the "best professional judgment" standard would be used.

He was asked whether or not it was common for the EPA to deny permit renewals and answered that it was not. He further explained that EPA generally defers to state decisions regarding wasteload allocations and permitting. He was also questioned about the Waterway facility and the wasteload allocation for the facility. Mr. Barrett discussed, in general terms, the permit approval process and stated that he was unaware of any other instance in which EPA denied a permit renewal (other than Waterway). He also briefly discussed the four reasons for EPA to terminate or deny a permit renewal request as listed in the Code of Federal Regulations.

FORT MYERS DIVISION

UNITED STATES OF AMERICA, Plaintiff, v. FLORIDA CITIES WATER COMPANY and AVATAR HOLDINGS INC., Defendants.	)	CIVIL ACTION NO.: 93-281-CIV-FTM-21

DEFENDANT FLORIDA CITIES WATER COMPANY'S MOTION FOR PARTIAL SUMMARY JUDGMENT AND REQUEST FOR ORAL ARGUMENT

Defendant Florida Cities Water Company ("Florida Cities") hereby moves, pursuant to Fed. R. Civ. P. 56, before this Court for an order granting summary judgment on its behalf as to the allegations contained paragraphs 16, 17, 18, 19, 20, 21, 22, 23, 28, 30, and 45 of Plaintiff's Second Amended Complaint. No genuine issues of material fact exist as to these allegations and therefore, Florida Cities is entitled to summary judgment as a matter of law. The grounds for this motion are set forth in the accompanying memorandum. Defendant contends that genuine issues of material fact exist regarding all remaining allegations of Plaintiff's Second Amended Complaint and these issues should be reserved for a full trial on

UNITED STATES OF AMERICA, Plaintiff, v. FLORIDA CITIES WATER COMPANY and AVATAR HOLDINGS INC., Defendants.	)	CIVIL ACTION NO.: 93-281-CIV-FTM-21

Florida Cities Water Company's Memorandum in Support of Its Motion for Partial Summary Judgment and in Response To Plaintiff's Motion for Partial Summary Judgment

Plaintiff has brought these actions alleging Clean Water Act ("CWA") violations at three small wastewater treatment facilities owned and operated by Florida Cities Water Company ("Florida Cities"): Barefoot Bay, Carrollwood, and Waterway Estates.[1] Although these facilities had state authorizations to discharge treated effluent at all times relevant to these causes of action, this case addresses certain alleged violations of the federal Clean Water Act, none of which involved any evidence of environmental harm. This Memorandum is filed in support of Florida Cities' Cross-Motion for Partial Summary Judgment. It is also filed in response to Plaintiff's Motion for Partial

[1] Plaintiff commenced this action on October 1, 1993, alleging violations of the Clean Water Act at Florida Cities' Waterway Estates sewage treatment facility. On March 30, 1995 Plaintiff added two additional Florida Cities's sewage treatment facilities, Barefoot Bay and Carrollwood. However, the issues were not fully joined as to these facilities until the Court's June 22, 1995 Order.

Summary Judgment, which is premature because it was filed before Florida Cities filed its Answer to the Second Amended Complaint, before Plaintiff produced any documents relating to Barefoot Bay and Carrollwood, and before Plaintiff designated and produced its key Rule 30(b)(6) witness for Waterway Estates and any of its Rule 30(b)(6) witnesses for Barefoot Bay and Carrollwood. Further, Plaintiff's summary judgment motion is premature because Plaintiff is unable to state the number of alleged violations with which Florida Cities is being charged. It is fundamental that Florida Cities has a right to know the charges it faces before it can respond meaningfully or present a defense.

The facts revealed during discovery regarding Barefoot Bay and Carrollwood demonstrate that Plaintiff has failed to review key documents in its own files or talk to its own employees with knowledge of the facts at issue. These documents and key employees' testimony demonstrate that Plaintiff failed to conduct a competent preliminary review and factual inquiry before filing this action. As specified in Florida Cities' Motion for Summary Judgment, the facts established through discovery demonstrate that no genuine issue of material fact exists as to a select number of these alleged violations, for which the Court should find no liability: discharge without a permit at the Barefoot Bay and Carrollwood wastewater treatment facilities (barred by 33 U.S.C. § 1319(g) (CWA § 309(g)), violations of the Administrative Order at Barefoot Bay, and permit violations at Barefoot Bay, Carrollwood, and Waterway Estates. In spite of the Environmental Protection Agency's ("EPA") admission that it has no evidence that Florida Cities' alleged actions caused any environmental harm and heedless of the facts contained in its own files and the testimony of its own witnesses,

Plaintiff continues to pursue multi-million dollar penalties in this action. Accordingly, Florida Cities is entitled to judgment as a matter of law as to these causes of action. Florida Cities' discovery has also established that the remaining claims present genuine issues of material fact which should be resolved at a trial on the merits of these issues.

I. STATEMENT OF THE FACTS

Florida Cities, a Florida corporation, owns and operates both drinking water treatment and wastewater treatment facilities serving communities in central and south Florida.[2] Florida Cities is regulated by local, state, and federal environmental authorities. At all times relevant to these actions, Barefoot Bay, Carrollwood, and Waterway Estates had state authorizations to discharge treated effluent and substantially met all applicable water quality standards and effluent limitations. All of the rates which Florida Cities charges its customers are regulated by the Florida Public Service Commission, except for the service areas located in Sarasota and Hillsborough Counties, in which the respective county commissions regulate rates.

II. LEGAL ANALYSIS

A. Standard for Summary Judgment

Summary judgment is appropriate only when no genuine issue of material fact exists and the moving party is entitled to judgment as a matter of law. Fed. R. Civ. P. 56(c). "As to materiality, the substantive law will identify which facts are material. Only disputes over facts that might affect the outcome of the suit under the governing

---

[2] A more complete statement of the facts regarding each facility is presented in the discussions of the specific facilities, *infra* part III.

law will properly preclude the entry of summary judgment." Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248 (1986). The moving party bears the burden of establishing the absence of dispute over material facts. Reynolds v. Bridgestone/Firestone, Inc., 989 F.2d 465, 469 (11th Cir. 1993). The Court must view the evidence presented in the light most favorable to the non-moving party. Clark v. Coats & Clark, Inc., 929 F.2d 604, 606 (11th Cir. 1991). Reasonable doubts about material facts are to be resolved in favor of the party opposing the motion for summary judgment. Reynolds, 989 F.2d at 469. If the moving party fails to meet its burden of establishing no genuine issue of material fact, its summary judgment motion will be denied. United States v. Four Parcels of Real Property, 941 F.2d 1428, 1437 (11th Cir. 1991).

Plaintiff is seeking summary judgment on "all violations alleged in its Revised Amended Complaint."[3] However, Plaintiff's Second Amended Complaint fails to state a specific number of CWA violations. Plaintiff's key witness, EPA environmental engineer Kenneth Kwan, calculated the number of alleged violations at issue in this case.[4] In its Answers to Defendant's First Interrogatories, served on April 28, 1995,[5]

---

[3] Pl.'s Mot. for Summ. J. at 4.

[4] Mr. Kwan has verified Plaintiff's Answers to Defendant's Interrogatories, has filed a "Declaration" in support of Plaintiff's Motion for Summary Judgment, has been listed as a person having knowledge of the facts surrounding this lawsuit, and has testified as one of Plaintiff's Rule 30(b)(6) witnesses. However, Mr. Kwan admits that he has no personal knowledge of the facts surrounding the CWA 309(g) settlements for Barefoot Bay and Carrollwood and made no effort to educate himself prior to attempting to calculate the number of violations at issue. See discussions of Barefoot Bay's and Carrollwood's alleged unpermitted discharges, infra.

[5] See Exhibit 1 (attached).

Plaintiff states that there are a total of 4,173 violations at issue. Subsequently, Plaintiff submitted Mr. Kwan's Declaration, dated June 15, 1995, in support of its Motion for Summary Judgment. In contrast to the Answers to Defendant's First Interrogatories, the Kwan Declaration and the attached tables reference, without any explanation for the discrepancy, 2,991 violations.[6] At his August 29-30, 1995 deposition (taken five months after the filing of the Second Amended Complaint and almost three months after the filing of Plaintiff's Motion for Summary Judgment), Mr. Kwan testified that Plaintiff is "still fine tuning the number."[7] Mr. Kwan further testified on August 29, 1995 that the final number of violations would not be known for "another month."[8]

In his testimony, Mr. Kwan stated:

> Q (By Mr. Scroggin) Are those recalculations still underway or have they finally reached a steady state constant value for each of the vio-- for each of the three facilities?
> Mr. Quinn: Objection.
> A We are still fine tuning the number.
> Q (By Mr. Scroggin) Do you have any estimate of when you think you'll know how many violations there were at these three facilities?
> Mr. Quinn: Objection.
> A I don't know; another month. We are still adding the numbers up.[9]

---

[6] On its own, this unexplained change would reduce the maximum penalty Plaintiff calculates for alleged violations from $104,325,000 to $74,775,000. Compare the tables found in Defendant's Ex. 1 (drafted by Mr. Kwan) with Plaintiff's Ex. C, F, and I (also drafted by Mr. Kwan and attached to his Declaration).

[7] Kwan Dep. at 151 l. 20; See Exhibit 2. See also Exhibit 45 (Condensed version of Kwan Video Deposition, with videotape excerpts marked) and Exhibit 46 (Videotape of Excerpts of Kwan Deposition).

[8] Kwan Dep. at 151 l. 25. See Exhibit 2 (attached). See also Exhibit 45 (Condensed version of Kwan Video Deposition, with videotape excerpts marked) and Exhibit 46 (Videotape of Excerpts of Kwan Deposition).

[9] Id. at l. 15-152 l. 1. See Exhibit 2 (attached). See also Exhibit 45 (Condensed (continued...)

Given the still-evolving status of Plaintiff's calculations of the violations that are the subject of Plaintiff's motion, Florida Cities contends that Plaintiff's Motion for Summary Judgment is premature.

B. The Clean Water Act

The federal Clean Water Act prohibits discharge of pollutants to waters of the United States unless authorized by a federal NPDES permit. 33 U.S.C. §§ 1311(a), 1342. In states such as Florida, where EPA issues and enforces the NPDES program, each permit requires state certification that the permit will fully satisfy state water quality standards (which EPA independently approves). NPDES permits usually contain, among other requirements, limitations on the discharge of specific pollutants. For a full discussion of the permitting and enforcement structure, see generally, U.S. v. CPS Chem. Co., 779 F. Supp. 437 (E.D. Ark. 1991).

III. CLAIMS AT ISSUE

A. Barefoot Bay

1. Alleged Unpermitted Discharges

Plaintiff alleges that Florida Cities discharged pollutants without a federal NPDES permit from April 1, 1990 until November 1, 1991 at its Barefoot Bay facility, located in Brevard County. This allegation has been made even though the discharge of treated effluent from the Barefoot Bay facility was authorized by the state and was already treated to a level that would remove more pollutants than would be required by the

---

[9](...continued)
version of Kwan Video Deposition, with videotape excerpts marked) and Exhibit 46 (Videotape of Excerpts of Kwan Deposition).

federal NPDES permit that was finally issued.[10] Florida Cities acknowledges that it did discharge without a federal NPDES permit into the Sebastian Creek during this period. However, this matter was settled by the Consent Agreement and Order Assessing Administrative Penalties No. CWA-IV 91-538 ("Consent Agreement") -- a conclusion supported by EPA's own administrative enforcement files and witnesses. The CWA specifically precludes EPA from seeking judicial or other enforcement of violations that have already been settled in EPA administrative enforcement proceedings that include payment of an administrative penalty. Under the CWA:

> Action taken by the Administrator or the Secretary, as the case may be, under this subsection shall not affect or limit the Administrator's or Secretary's authority to enforce any provision of this chapter; except that any violations-
>
> . . .
>
> > iii) for which the Administrator, the Secretary, or the State has issued a final order not subject to further judicial review and the violator has paid a penalty assessed under this subsection, or such comparable State law, as the case may be,
>
> shall not be the subject of a civil penalty action under subsection (d) of this section or section 1321(b) of this title or section 1365 of this title.

33 U.S.C. § 1319(g)(6) (CWA § 309(g)(6)). Because EPA's administrative record, as well as the testimony of EPA and Florida Cities' witnesses, demonstrate that the issue of discharge without a permit was for the entire period at issue, no genuine issue of material fact exists, and Florida Cities is entitled to summary judgment as a matter of law on Paragraph 16 of the Second Amended Complaint.

---

[10] See Pl.'s 30(b)(6) Dep. [Herwig] at 106 l. 17 - 109 l. 24 (hereafter "Herwig"). See Exhibit 3 (attached). The Barefoot Bay's level of treatment was superior to the standards of secondary treatment that were imposed in the final NPDES permit.

On September 14, 1989, EPA enforcement officer Roy Herwig visited Barefoot Bay and discovered that, although authorized to discharge into the Sebastian Creek by the Florida Department of Environmental Protection ("FDEP"), the facility did not have an NPDES permit.[11] On September 20, 1990, EPA issued an Administrative Order ("AO 90-106"), drafted by Mr. Herwig, that authorized discharge from the Barefoot Bay facility and established interim effluent limits for that discharge until a federal NPDES permit could be issued. On July 12, 1991, EPA initiated an enforcement action to address the years of discharge without a federal NPDES permit by this facility by issuing a Notice of Show Cause for discharge without an NPDES permit for "the period from September 14, 1989 until the present."[12] The Show Cause meeting was held on August 9, 1991.[13] Following this Show Cause meeting, Mr. Herwig drafted the EPA's Administrative Complaint and the Consent Agreement with the accompanying "Notes on the Proposed Penalty Assessment" ("Notes").[14]

---

[11] Inspection Report of September 14, 1989 by Roy Herwig. See Exhibit 4 (attached).

[12] The administrative record in this case for Barefoot Bay consists of (1) AO 90-106 (attached as Exhibit 5), (2) Notice of Show Cause (attached as Exhibit 6), (3) Notes on the Proposed Penalty Assessment (attached as Exhibit 7), (4) Administrative Complaint (attached as Exhibit 8), and (5) Consent Agreement and Order Assessing Administrative Penalties (attached as Exhibit 9).

[13] Herwig at 159 l. 2-18 (attached as Exhibit 10).

[14] Id. at 155 l. 10 (attached as Exhibit 11).
See Ex. 7. The Notes are prepared by the enforcement officer and are routed along with the Complaint for approval from the chain of command at EPA. The Notes then become part of the administrative record. EPA, Enforcement Management System (attached as Exhibit 12), Region IV 456 (1990) (hereafter "EMS"). The Notes provide the underlying justification of an enforcement officer's decision to penalize a company. In practice, the Notes are the only document that provides detailed analysis of EPA's penalty considerations. The Notes are prepared in every administrative penalty action.

These Notes outlined the nature of Florida Cities' alleged violations at Barefoot Bay, reviewed the statutory mitigation factors contained in CWA § 309(g)(3), and proposed a $6,000 penalty to settle the alleged violations of discharge without an NPDES permit. EPA issued an Administrative Complaint on September 25, 1991 and entered into the final Consent Agreement on November 6, 1991. The NPDES permit for Barefoot Bay became effective on November 1, 1991, one week prior to these negotiations.[15]

A thorough review of the complete administrative record establishes that both parties intended to settle all violations for discharge without an NPDES permit at Barefoot Bay, and that the Consent Agreement with its attached Notes did in fact settle all such matters, even though the Consent Agreement specifically references only the day of EPA's inspection, September 14, 1989. Plaintiff's Rule 30(b)(6) witness, Roy Herwig, testified that he was the author of the Notes, which are routinely prepared by the responsible EPA enforcement officer to explain the basis for EPA's proposed penalty amount.[16] Mr. Herwig was also the lead negotiator for EPA during the settlement negotiations, including the Show Cause hearing.[17] He testified that the Notes were reviewed by an EPA staff counsel;[18] that the purpose of the Notes, which

---

[15] Florida Cities had originally applied for a permit on February 28, 1990 (fully 19 months earlier). When asked, EPA cannot explain why the Agency took 19 months to issue this permit, nor can EPA explain why or how the Agency lost the permit application after acknowledging in writing its receipt and completeness. EPA's losing the permit application required Florida Cities to start the entire permitting process over again on June 6, 1990, by submitting still another application.

[16] See Herwig Dep. at 156 ll. 16-18 (attached as Exhibit 13).

[17] Id. at 159 ll. 11-14 (attached as Exhibit 10).

[18] Id. at ll. 19-25 (attached as Exhibit 10).

physically accompany the proposed Consent Agreement when the senior EPA official signs the proposed Consent Agreement, "is to memorialize what information we can for the public, related to how we disposed of a certain case so that six years later somebody will say why did you do this"[19]; and that all the statements in the Notes were correct.[20] In the Notes EPA carefully reviewed Florida Cities' actions in light of the statutory mitigation factors under CWA § 309(g)(3)[21] and found:

> Respondent operated a mobile home community known as Barefoot Bay which discharged treated wastewater to a drainage canal leading to the north prong of the Sebastian Creek, a water of the United States, without the benefit of a valid NPDES permit for the discharge during the period from 1985 to present.
>
> In September 1991, an NPDES permit was issued to Respondent. The effluent limitations contained in the permit are limitations that the facility would have been able to meet since 1985. Thus, the environmental harm was not any greater than if Respondent had had an NPDES permit.[22]

Through the use of its economic benefit computer model ("BEN"), EPA measured the benefit gained by Florida Cities from its failure to obtain an NPDES permit. The BEN model determined that Florida Cities' total economic gain from noncompliance

---

[19] Id. at 155 ll. 11-20 (attached as Exhibit 11).

[20] Id. at 156 l. 19-157 l. 2 (attached as Exhibit 13).

[21] Mitigation factors which the CWA requires EPA to consider in determining the amount of any administrative penalties are: (1) the nature, circumstances, extent and gravity of the violation, or violations, and with respect to the violator, (2) ability to pay, (3) any prior history of such violations, (4) the degree of culpability, (5) economic benefit or savings (if any) resulting from the violation, and (6) such other matters as justice may require. 33 U.S.C. § 1319(g)(3); CWA § 309(g)(3).

[22] Notes at 2.

during the period September 14, 1989 to September 11, 1991 was $73.00.[23] Under the category titled "Other matters that justice may require," EPA noted:

> The enforcement team considered the fact that Respondent has been working closely with the Florida Department of Environmental Regulation since 1985 to develop a solution to the problem. Since being contacted by EPA, Respondent has been very cooperative. Consideration was given to calculating liability on a daily basis beginning with the initial overflow in 1985. However, since the respondent had been working with DER and since the effluent being discharged would have met the limitations contained in the permit now being issued by EPA, it is believed that the true violation was limited to that of not applying for an NPDES permit.[24]

The Notes' "Summary" states "that the assessed penalty of $6,000 represents a fair and equitable application of the factors identified in CWA § 309(g)(3) of the Act in this case."[25] Mr. Herwig testified that he believed that some monetary fine was appropriate because "[Florida Cities] had been in noncompliance with the Clean Water Act since 1985 in that [it] did not have a permit" for discharges from the Barefoot Bay facility.[26] Read in its entirety, the administrative record shows that EPA considered all the days of discharge without an NPDES permit commencing in 1985 and ending on November 1, 1991.[27] Even after considering all these years of discharge without an

---

[23] Id.; Herwig at 151 l. 9-152 l. 2 (attached as Exhibit 14).

[25] Id.

[26] Herwig at 148 l. 25-149 l. 1 (attached as Exhibit 15).

[27] Michael Hom, Mr. Herwig's supervisor in 1991, stated that it is EPA's general policy to settle all violations of which EPA is aware at the settlement of administrative enforcement actions. See Dep. of Michael Hom at 46 ll. 16-19 (attached as Exhibit 16). Not only did EPA have concrete evidence of discharges on virtually all days between September 14, 1989 and November 6, 1991 (the date of the settlement), but the Agency also had the DMRs for AO 90-106, which disclosed exceedances of the AO's interim effluent limitations.

NPDES permit at Barefoot Bay, the Notes explain that EPA "believe[d] that the assessed penalty amount of $6,000.00 represent[ed] a fair and equitable application of the factors identified in § 309(g)(3) of the Act, to this case."[28]

Plaintiff argues that because the Consent Agreement is analogous to a contract, this Court may not look beyond the four corners of the document, no matter what the two parties intended or understood they were settling and no matter what explanatory documents accompanied the Consent Agreement when it was signed.[29] This argument, however, ignores the language of the Consent Agreement itself and the requirements of EPA's Enforcement Management System ("EMS").[30] The introductory paragraph to Section III of the Consent Agreement states that EPA has

---

[28] Notes at 3.

[29] Plaintiff argues that this matter has been addressed in the Court's Order denying Florida Cities' Motion for Partial Summary Judgment on the Waterway Estates facility. Plaintiff is in error. This issue was not addressed in Florida Cities' motion or in the Court's Order of June 21, 1991. Plaintiff raised this "contract defense" in its response to Florida Cities' Motion to Strike Paragraphs 15 through 39 of Plaintiff's Amended Complaint. In a companion order to the above referenced order of June 21, 1991, the Court denied Florida Cities' Motion to Strike. However, the Court's ruling was in the context of a Rule 12(f) motion on the sufficiency of the pleading. At that time, Florida Cities had not yet answered these allegations, EPA had not produced the administrative records for Barefoot Bay and Carrollwood, and no EPA witnesses relevant to these facilities had been deposed. Although EPA's current practice is to attach a copy of the entire administrative record with the Consent Agreement and Order Assessing Administrative Penalties, Florida Cities had no knowledge of the Notes On Proposed Penalty Assessment until EPA produced these documents in July, 1995, after the Court's order denying Florida Cities' Motion to Strike. Summary judgment is appropriate only after Defendant has had an opportunity to conduct discovery into important factual matters. Plaintiff's contention that it is entitled to summary judgment in the context of a Motion to Strike is therefore without merit.

[30] The EMS is an internal manual published by EPA. It provides guidelines to use in administering a proper penalty for a particular violation or set of violations. 50 Fed. Reg. 34648 (1985).

"taken into account" the factors enumerated in CWA § 309(g)(3). The only analysis of these factors in the administrative record is in the Notes, which demonstrate that the EPA's intention was to settle all outstanding violations for discharge without a federal NPDES permit. Mr. Herwig testified that although he referenced the September 14, 1989 date because that was the only date on which he personally witnessed a discharge at Barefoot Bay,[31] he believed, and EPA fully understood, that the facility was discharging on a daily or near-daily basis.[32] At the end of the negotiations, Mr. Herwig believed that the issue of discharge without an NPDES permit was fully resolved and "none of this would be revisited."[33] Mr. Herwig's understanding is bolstered by the affidavit of Kathleen L. Blizzard, counsel for Florida Cities at the Show Cause meeting. Ms. Blizzard states that at the end of the Show Cause meeting it was her understanding that all of the "discharge without a permit" violations were resolved and that this was EPA's understanding as well.[34] These facts suggest the clear inference that neither Mr. Kwan nor any member of the litigation team ever discussed with Mr. Herwig the facts of the Barefoot Bay settlement. In light of the complete administrative record, any other reading of the documents is unreasonable.

---

[31] Herwig at 152 l. 3-153 l. 3 (attached as Exhibit 14).

[32] Id. at 54 ll. 7-11 (attached as Exhibit 17).

[33] Id. at 90 ll. 13-14 (attached as Exhibit 18).

[34] Kathleen Blizzard, counsel for Florida Cities at the Barefoot Bay settlement, states in her Declaration that "it was my understanding that by execution of the Consent Agreement and Order Assessing Administrative Penalties . . . and payment of the agreed $6,000 penalty, EPA intended to resolve the matter of enforcement by EPA for the discharge until an NPDES permit could be issued." See Declaration of Kathleen Blizzard of September 8, 1995 (attached as Exhibit 19).

From a practical perspective, Plaintiff's "one-day" theory would result in the expenditure over several months of hundreds of man-hours and thousands of dollars by both EPA and Florida Cities to resolve only one day, out of several hundreds of days of discharge without an NPDES permit. According to Plaintiff's argument, once the single day's discharge without a permit on September 14, 1989 was resolved, EPA might have initiated the whole administrative enforcement process again and again for each sequential day of discharge, even though the parties were fully aware of all the days of discharge at issue. Because the time period between the drafting of the Administrative Complaint and the actual signing of the Consent Agreement for the first day consumed more than one month, Plaintiff's theory would require EPA to spend a minimum of several years to resolve all of the days of discharge without an NPDES permit, by which time the statute of limitations (5 years) would have expired.

Plaintiff's characterization of the facts and the administrative process is both impractical and unrealistic. Significantly, none of the EPA officials deposed can remember, despite their many years of experience with such matters, a single instance in which EPA has ever engaged in such a sequential resolution of daily violations known to all parties participating in the settlement. To the contrary, the administrative record for Barefoot Bay shows that both parties were fully aware of and considered all of the hundreds of days of violation in settling on the $6000 penalty. Read together, the administrative record, Mr. Herwig's testimony, and Ms. Blizzard's affidavit show that all of these violations were fully settled.

The principal support for Plaintiff's case is provided by the analysis, calculations, and testimony of Mr. Kwan. However, Mr. Kwan admits that he has no personal

knowledge of the settlements of "discharge without a permit" violations at Barefoot Bay.[35] Mr. Kwan was not the responsible enforcement officer at the time of the settlement.[36] The "discharge without a permit" violations were negotiated and settled between Florida Cities and Mr. Herwig's EPA team on November 6, 1991. However, Mr. Kwan has not inquired into Mr. Herwig's intent.[37] Although he has no personal knowledge of the events at issue, Mr. Kwan summarily rejected EPA's official determination in the Notes for the Barefoot Bay settlement and failed to consult with any member of EPA's negotiating team.

Mr. Kwan's surprising failure to verify his reinterpretations of the official EPA settlement documents constitutes a glaring lack of due diligence and borders on recklessness. When asked at his deposition why he failed to make any efforts to reconcile EPA's official determinations with his own personal interpretation of the facts surrounding the Barefoot Bay negotiations, Mr. Kwan testified:

> Q (By Mr. Scroggin) Did it occur to you to have a conversation with Mr. Herwig regarding his opinion since he was the enforcement officer that drafted this document and negotiated the settlement for EPA?
> Mr. Quinn: Objection.
> A Mr. Herwig is not on the litigation team.[38]

[35] Pl.'s 30(b)(6) Dep. [Kwan Vol. I] at 37 ll. 15-18 (hereafter "30(b)(6) Kwan") (attached as Exhibit 20).

[36] Roy Herwig had enforcement oversight of Barefoot Bay from late 1989 to early 1992. See Herwig at 14 l. 22 (attached as Exhibit 21); Deposition of Ken Kwan at 242, ll. 12-13 (attached as Exhibit 22). See generally Kwan Dep. at 374 ll. 20-25; see also Id. at 375 (attached as Exhibit 23).

[37] Kwan Dep. at 242 ll. 5-13 (attached as Exhibit 22), 259 l. 11 - 260 l. 21 (attached as Exhibit 24).

[38] Kwan Dep. at 262 ll. 4-9; see generally Kwan Dep. at 254-259, 263-267, 281- (continued...)

It is fundamental that Plaintiff base its allegations on known facts, not unsupported conjecture by Mr. Kwan four years after events in which he played no part. Mr. Herwig, not Mr. Kwan, is the enforcement officer for Barefoot Bay with knowledge of the violations and the settlement. Mr. Kwan's own testimony demonstrated that he is not qualified to determine whether the "discharge without a permit" violations had been settled, because he was not present at the settlement negotiations and he has made no inquiries of the persons who were present. Mr. Kwan's conclusions directly contradict findings in EPA's own administrative record and are not supported by the administrative record or any objective source.[39]

Plaintiff has failed to present credible evidence to refute EPA's own administrative record. Accordingly, pursuant to CWA § 309(g)(6), no genuine issue of material fact exists as to the allegations contained in Paragraph 16 of Plaintiff's Second Amended Complaint, and Florida Cities is entitled to judgment as a matter of law as to the 579 violations for discharge without a federal NPDES permit at Barefoot Bay.

2. Alleged Violations of Barefoot Bay's AO 90-106

Plaintiff has erroneously based this action for violations of a CWA § 309(a) order on the Administrator's authority in CWA § 309(b).[40] Significantly, neither CWA § 309(b) nor any other CWA section authorizes either administrative or judicial

[39] See Kwan Dep. at 95 l. 10, 97 ll. 4-9, 99 l. 10, 103-107, 235-245, 250-251 (all attached as Exhibit 26).

[40] Second Amended Complaint ¶ 1.

enforcement of violations of § 309(a) AOs. In spite of this lack of statutory authority, this complaint includes numerous allegations of violations of Barefoot Bay's AO 90-106. Plaintiff's novel theory alleging liability for the AO violations would result in the double counting of violations at this facility.[41]

In general, an NPDES permit acts as a "shield" to protect a discharger from liability as long as the discharges conform to the requirements and limitations contained in the permit. 33 U.S.C. § 1342(k).[42] The Eleventh Circuit has confirmed that individually enforceable effluent limitations may be imposed on a discharger only through the NPDES permitting process:

> As to effluent limitations, EPA can only authorize discharge to [surface waters], and could only impose an effluent limitation on a discharger, through the NPDES permitting process.

City of Sarasota v. EPA, 813 F.2d 1106, 1109 (11th Cir. 1987).[43] In Paragraphs 18-23 of the Second Amended Complaint, the United States has alleged effluent limitation violations, not of Barefoot Bay's NPDES permit, but of Barefoot Bay's administrative order.

---

[41] These violations are the same alleged violations for discharge without a permit discussed immediately above.

[42] See also Atlantic States Legal Foundation, Inc. v. Eastman Kodak Co., 1993 U.S. App. LEXIS 35911, 24 Envtl. L. Rep. 20122 (2d Cir. 1993).

[43] EPA must subject a draft NPDES permit to rigorous public and internal review before issuing a final permit. See 40 C.F.R. 122.1(e), 124.1 et seq. As part of this process, the permittee and members of the public have the opportunity to comment on the draft permit and any proposed effluent limitations it contains. Opportunity for notice and comment protects the rights of every interested party. The statute provides an opportunity for a party to appeal an effluent limitation contained in a permit. See 33 U.S.C. § 1369(b); CWA § 509(b).

As a complement to the NPDES system, administrative orders ("AOs") are "enforcement tools"[44] used to bring a discharger back into compliance with the CWA. An AO is a like a "sword." See United States v. Metropolitan Dist. Comm'n., 23 Env't Rep Cas. (BNA) 1350, 16 Envtl. L. Rep. 20621 (D. Mass. 1985). Therefore, before EPA issues an AO, EPA must determine that the discharger has violated the CWA. The purpose of an AO is always to address underlying violations of the CWA. Indeed, all that EPA may refer to DOJ for enforcement is the underlying violation of the CWA itself. The underlying violation falls within this Court's subject matter jurisdiction; violation of an AO falls outside this Court's subject matter jurisdiction.

Plaintiff relies on CWA § 309(b) as authority for EPA's referring AO violations to DOJ for judicial enforcement. However, there is no such authority under CWA § 309(b) for EPA to refer AO violations to DOJ for enforcement. Section 309(b) specifically limits the kinds of violations that EPA can refer to DOJ, as follows:

> The Administrator is authorized to commence a civil action for appropriate relief, including a permanent or temporary injunction for any violation for which he is authorized to issue a compliance order under subsection (a) of this section. Any action under this subsection may be brought in the district court of the United States for the district in which the defendant is located or resides or is doing business, and such court shall have jurisdiction to restrain such violation and to require compliance.

33 U.S.C. § 1319(b) (emphasis added). Thus, the subject matter jurisdiction of this Court is limited to considering allegations of CWA violations that are capable of being the underlying basis of an AO. If a permit violation or other CWA violation were the subject of a § 309(a) order, that violation would fall within the subject matter jurisdiction of this Court. But since a violation of a 309(a) order itself cannot be the

---

[44] 30(b)(6) Kwan Dep. Vol. III at 49 ll. 3-4 (attached as Exhibit 27).

underlying basis for another 309(a) order,[45] this Court does not have subject matter jurisdiction over such a violation, and the cause of action would be dismissed. In this case, Plaintiff has alleged in Paragraphs 18-23 violations of a § 309(a) order at Barefoot Bay. These allegations are outside the subject matter jurisdiction of this Court and should be dismissed.

CWA § 309(a)(3) provides the types of violations proper for an AO for a non-delegated state.[46] For a CWA § 309(a) administrative order to be issued, and for a case to be the subject matter of a civil referral under CWA § 309(b), a discharger must have violated section "1311, 1312, 1316, 1317, 1318, 1328, or 1345 . . . or is in violation of any permit condition or limitation implementing any of such sections in a permit under section 1342." 33 U.S.C. § 1319(a)(3) (referring to CWA sections). As the subsection goes on to state, the Administrator may issue an AO requiring such facility to comply, or she may bring a civil action. But the Administrator may not bring a civil action for a violation of a § 309(a) order.[47]

---

[45] See 33 U.S.C. § 1319(a); CWA §309(a).

[46] Prior to May 1, 1995, Florida was a "non-delegated state," meaning that Florida did not have NPDES permitting authority. However, Florida did have its own permitting and enforcement program, and Florida Cities was required to comply with the state, as well as federal, requirements.

[47] An AO cannot substitute for a permit or as a modification of a permit. Rather, CWA § 309(a) authorizes EPA to "specify a time for compliance," but does not allow EPA to incorporate into an AO interim effluent limitations that are independently enforceable. Thus, Plaintiff's reliance in the Second Amended Complaint on CWA § 309(a) for such enforcement authority for violations of interim effluent limits is misplaced. A CWA § 309(a) order is issued unilaterally by EPA without public notice and comment. Deposition of Michael Hom, EPA Enforcement Supervisor, at 55 l. 17 - 56 l. 2 (attached as Exhibit 29). This distinction between interim effluent limits in an AO and the effluent limits in an NPDES permit is reflected (continued...)

This reading of the statute is reflected in EPA's own internal guidelines. The EMS states:

> The Clean Water Act does not authorize the issuance of an AO for a violation of a previously issued AO nor may an administrative penalty order be issued for violation of an administrative order. Any successive AO issued must be based upon the underlying violations of the Act contained in the previous AO . . . .

EMS at 62 n.5.[48] Thus, a violation of a previous AO is not a ground for issuing another AO, nor is a violation of a previous AO a ground for civil referral.

Plaintiff's attempt to impose multiple daily liability (for discharge without a permit and for violations of effluent limits in an AO), instead of a single violation for each day's discharge without a permit, is not authorized by law. Therefore, this Court lacks subject matter jurisdiction over Paragraphs 18, 19, 20, 21, 22, and 23, and Defendant is entitled to summary judgment as a matter of law.

3. Alleged Violations of Barefoot Bay's NPDES Permit No. FL0042293

a. Test Method for Total Residual Chlorine

Plaintiff alleges that on a daily basis between November 1, 1991 and June 28, 1993 the Barefoot Bay facility used a test method for total residual chlorine ("TRC") not specified in NPDES permit FL0042293. However, both the plain language of the

---

[47](...continued)
by EPA's separation of enforcement activities from permit writing; permit writers, who develop effluent limitations for NPDES permits, must do so pursuant to rigorous procedures established by formal EPA regulations. 40 C.F.R. § 124.1 - 124.21.

[48] (Attached as Exhibit 25). Note 5 arises from the Enforcement Response Guide contained within the EMS. The Enforcement Response Guide provides proper responses for particular types of violations. The text of Note 5, which occurs on page 62, is referenced on page 56 under the heading for "Administrative Order Interim Limits." AO Interim Limits are the types of violations being asserted against the Barefoot Bay plant.

permit and the testimony of EPA's own Rule 30(b)(6) witness demonstrate that Florida Cities used one of the two methods allowed in its permit. Indeed, three EPA officials conducted a Performance Audit Inspection of Barefoot Bay on June 10, 1993 and noted in their report that the test method being used by the facility (DPD colorimetric) was approved by EPA's regulations.[49]

Although the permit language lists three test methods for TRC, the first two methods are subparts of the same alternative. The language at issue in Part I of Barefoot Bay's permit, entitled "Effluent Limitations and Monitoring Requirements," states:

> Testing for total residual chlorine (TRC) shall be conducted according to either the amperometric titration method, the low-level amperometric titration method (if compliance with a permit limitation of 0.20 mg/l or less is to be demonstrated), or the DPD colorimetric method as specified in Section 4500-Cl D., 4500-Cl E., or 4500-Cl G., respectively. Standard Methods for the Examination of Water and Wastewater, 17th Edition.[50]

NPDES Permit No. FL0042293. EPA's own 30(b)(6) designated witness for enforcement at Barefoot Bay (Mr. Herwig) acknowledged that the language of this permit provision was "hard to read."[51] While the language may be confusing, the grammatical structure ("either" . . . "or") makes clear that the choice is between two test methods, one of which has two subparts. During the time period in question, Florida Cities used the DPD colorimetric method to test for TRC and reported its test results to EPA on its DMRs. During this period EPA inspected Barefoot Bay and

---

[49] See Letter of July 18, 1993 from Antonio Quinones (EPA) to Florida Cities, attaching Performance Audit Inspection. Specifically, see pages L-2, L-3, and L-4 of the inspection report (all attached as Exhibit 30).

[50] See Plaintiff's Memorandum for Partial Summary Judgment, Exhibit B.

[51] Herwig at 119 l. 21; Id. at 122 ll. 2-6 (all attached as Exhibit 31).

noted no problems with Florida Cities' use of the DPD colorimetric method.[52] Accordingly, no genuine issue of material fact exists as to the allegations contained in Paragraph 28 of Plaintiff's Second Amended Complaint, and Florida Cities is entitled to judgment as a matter of law as to Paragraph 28 of the Second Amended Complaint.

b. Other Claims at Barefoot Bay

Florida Cities acknowledges that the DMRs filed with EPA reported some exceedances (values higher than the permit's effluent limitations) during the relevant time period for TRC, toxicity, and Biochemical Oxygen Demand ("BOD"). However, Florida Cities is unable to determine what appropriate legal defenses and mitigating circumstances are applicable until the government can determine the number of violations being alleged (which Mr. Kwan estimated would take "another month").[53] Accordingly, summary judgment is premature until Plaintiff can state with particularity the charges against Florida Cities. Moreover, at trial Florida Cities will present evidence of mitigating circumstances that should significantly reduce, or eliminate altogether, any applicable penalties.

B. Carrollwood

1. Alleged Unpermitted Discharges

Plaintiff alleges that the Carrollwood facility discharged effluent without a federal NPDES permit from August 1990 to June 1991. Florida Cities acknowledges that while it did discharge effluent into Sweetwater Creek between August 1990 and June

---

[52] See Note 49 and accompanying text.

[53] See Note 9 and accompanying text.

1991, it settled with EPA for these discharges in a Consent Agreement, dated April 19, 1991. Therefore, just as with Barefoot Bay, no genuine issue of material fact exists, and Florida Cities is entitled to judgment as a matter of law.

EPA issued Carrollwood's initial NPDES permit on August 15, 1975. In April of 1980 Florida Cities filed a timely application to renew its Carrollwood permit. Four years later EPA denied the renewal application, based on Florida's designation of Sweetwater Creek as a "no discharge area," which would have precluded Florida from providing to EPA the state certification required for EPA to renew Carrollwood's NPDES permit.[54] In November 1984, EPA issued AO 85-044, ordering Carrollwood to cease discharge into Sweetwater Creek by June 1987. EPA's Notes on the Carrollwood Consent Agreement state that "DER [now FDEP] issued Respondent Temporary Operating Permits (TOPs) throughout this time period allowing discharges into Sweetwater Creek, thereby not enforcing their [sic] own 'no discharge' rule."[55]

During the late 1970s and the 1980s, Florida Cities had been negotiating with Hillsborough County ("County") to connect Carrollwood to the Hillsborough facility. In June 1979 the County notified Florida Cities that connection to the facility would not be available until June 1983. This date was subsequently extended by the County to the spring of 1988 and then extended again to 1990. Hillsborough's 1990 offer at that

---

[54] EPA's Carrollwood Notes (attached as Exhibit 32) explain that the sole basis for EPA's failure to renew the NPDES permit was Florida's designation of the receiving waters of Sweetwater Creek as a "no discharge area." Such designation precluded Florida from providing the state certification necessary for EPA to renew Carrollwood's NPDES permit. The Notes make no mention of any other basis for EPA's failure to renew the permit.

[55] Carrollwood Notes at 1 (attached as Exhibit 32).

time included a capacity fee of over $5.5 million, which could have quadrupled the rates charged to customers.[56]

In 1987 the Florida legislature passed the Grizzle-Figg Act[57] which allowed discharge into Sweetwater Creek within certain limitations. In November 1989 Florida Cities applied to FDEP for a permit to construct an upgrade to Advanced Wastewater Treatment ("AWT")[58] at Carrollwood, which FDEP issued in July 1990. Following receipt of the FDEP construction permit -- a clear indication that Florida would no longer withhold the required state certification for an NPDES permit -- Florida Cities applied for an NPDES permit on July 31, 1990. EPA issued an Administrative Complaint to Florida Cities for CWA violations on September 25, 1990; two days later, it issued AO 90-100, which temporarily authorized discharge into Sweetwater Creek until an NPDES permit was issued. EPA issued NPDES permit No. FL0029319 for an AWT facility on April 19, 1991, effective July 1, 1991. During this period Florida Cities and Hillsborough County continued to negotiate, and they finally concluded a connection agreement on June 5, 1991. Throughout this time period, EPA

---

[56] In an attempt to find alternative methods of disposal of the effluent during this same period, Florida Cities investigated and sought permits for deep well injection, attempted to purchase surrounding citrus groves on which to spray effluent, negotiated with grove owners to receive effluent, and negotiated with area golf courses to supply effluent for irrigation. None of these options proved to be economically viable given the rate base constraints placed on Florida Cites by the Florida Public Service Commission ("PSC"). Throughout all relevant periods of time, Florida Cities continued to submit DMRs to both EPA and FDEP.

[57] Fla. Stat. ch. 403.086 (1987).

[58] AWT requires a level of treatment more stringent than the "secondary treatment" than is required of all wastewater treatment facilities discharging into Waters of the U.S. See 40 C.F.R. § 122.44.

personnel were kept fully apprised of these negotiations and were immediately informed when the connection agreement was reached. On January 6, 1992, Carrollwood connected with Hillsborough's facility, thereby ceasing any discharge into Sweetwater Creek. On March 6, 1992, EPA "inactivated" AO 90-100, informing Florida Cities that it was in compliance with the AO's terms.[59]

As with the Barefoot Bay proceedings, the Carrollwood administrative record consists of the Notice of Show Cause, Notes, Administrative Complaint, and Consent Agreement.[60] The Consent Agreement settled any unpermitted discharge claims at Carrollwood pursuant to CWA § 309(g)(3). In section III, the Consent Agreement states that EPA has considered the CWA § 309(g)(6) factors. The only examination of these factors in the administrative record is found in the Notes:

> The economic benefit realized by Respondent was computed by using the "BEN" model of calculating the economic benefit of noncompliance. The values entered into the BEN model are based upon the delayed capital savings which Respondent realized as a result of not submitting an NPDES permit application. The period of noncompliance used in the model was calculated from the first day of noncompliance, June 1987, up to the point of expected issuance of an NPDES permit, February 1991.[61] Using the BEN model, the estimated benefit of delayed compliance totals $ 203.00.

---

[59] Letter of March 3, 1992 from EPA to Florida Cities (attached as Exhibit 38).

[60] The administrative record in this case for Carrollwood consists of (1) AO 85-044 (attached as Exhibit 33) and AO 90-100 (attached as Exhibit 34), (2) Notice of Show Cause (attached as exhibit 35), (3) Notes on the Proposed Penalty Assessment (attached as Exhibit 32), (4) Administrative Complaint (attached as Exhibit 36), and 5) Consent Agreement and Order Assessing Administrative Penalties (attached as Exhibit 37).

[61] In fact, EPA did not issue the Carrollwood NPDES permit until May 28, 1991, with an effective date of July 1, 1991.

Notes 2 ¶ 4. In Paragraph 6 of the Notes, EPA stated that a penalty reduction was justified because Florida had modified state law to allow for discharge of AWT effluent into Sweetwater Creek. The plain language of the Notes establishes that the penalties were calculated for the entire period of discharge without a permit until the date of issuance of the permit (then estimated to be February 1991).[62]

Plaintiff contends that the Consent Agreement should be read in isolation and that it addresses only the period from June 1987 through July 1990. As noted above, this analysis is unrealistic and impractical. The parties entered into the Consent Agreement in April 1991, leaving an eight-month gap in EPA's enforcement. Joseph W. Landers, Jr., Florida Cities' counsel in the Carrollwood negotiations, has testified by affidavit that at the end of the Carrollwood negotiations, he understood that the parties intended to resolve fully the issue of discharge without a permit.[63] Thomas Plouff, one of EPA's principal negotiators of the Carrollwood settlement, testified that when the Consent Agreement was signed, the fact that there was a period of time in which Florida Cities would be discharging without a permit did not warrant an increase in the penalty assessed because "[t]he case was settled, long since settled."[64] Mr. Plouff chose the date ending liability for discharge without an NPDES permit from

---

[62] Both the Carrollwood Notes (attached as Exhibit 32) and the draft NPDES permit (attached as Exhibit 39) estimate the effective date of the final NPDES permit as February 1991. In fact, comments received on the draft permit delayed EPA's process, so that the permit became effective July 1, 1991.

[63] Declaration of Joseph W. Landers, Jr. (attached as Exhibit 40).

[64] Deposition of Thomas Plouff at 120 ll. 5-6 (attached as Exhibit 41).

Carrollwood as July 1990, because that was the date on which Florida Cities had applied for the permit.[65]

As with the Barefoot Bay allegations, Mr. Kwan again failed to check with EPA's Enforcement Officer who negotiated the Carrollwood settlement, Mr. Thomas Plouff,[66] with Florida Cities or to undertake any due diligence to verify his reinterpretation of the documents in this closed file for a facility that had ceased to discharge.[67] The entire administrative record demonstrates that the CWA § 309(g)(6) penalty paid by Florida Cities applied to the entire period of discharge without a permit. Therefore, no genuine issue of material fact exists, and Florida Cities is entitled to judgment as a matter of law as to Paragraph 30 of Plaintiff's Complaint.

2. Alleged Violations of Carrollwood's NPDES Permit No. FL0029319

EPA was fully aware when it issued NPDES Permit No. FL0029319, which required AWT at the Carrollwood facility, that Carrollwood was incapable of meeting these stringent AWT standards without constructing new treatment facilities. Mr. Kwan testified that, based on his eighteen years experience in such matters at EPA, such construction would routinely take one to four years. Further, when it issued the permit, EPA was also fully apprised that Florida Cities was near completion of the years-long negotiations with Hillsborough County to connect the discharge and

---

[65] Id. at 119 ll. 18-21 (attached as Exhibit 41).

[66] Mr. Plouff conducted a site inspection and negotiated the Carrollwood settlement for the discharge without a permit violations. See Deposition of Thomas Plouff at 57-59 (attached as Exhibit 42).

[67] Carrollwood connected with Hillsborough County on January 6, 1992 and the facility was subsequently physically dismantled and removed from the site.

eliminate any need for an NPDES permit. Indeed, once EPA issued the permit in April 1991, thus assuring that Florida Cities had an alternative to connecting to the Hillsborough facility, the County promptly dropped its demand for a $5.5 million capacity fee and concluded a connection agreement with Florida Cities on June 5, 1991. While these facts support mitigation of any penalties for violations of the AWT provisions of the permit (which EPA never sought to enforce until Plaintiff's litigation team recommended that Mr. Kwan resurrect this case and refer it to DOJ for enforcement),[68] Florida Cities acknowledges that some exceedances of the unachievable AWT standards did occur.

Florida Cities further acknowledges that the DMRs filed with EPA reported exceedances during the relevant time period because the plant, as EPA knew, was incapable of meeting stringent AWT standards. However, as with Barefoot Bay, EPA's Mr. Kwan is still "adding the numbers up"[69] regarding the number of alleged violations. Consequently, Florida Cities is unable to determine what appropriate legal defenses and mitigating circumstances are applicable until the government can decide the number of violations being alleged. Accordingly, summary judgment is premature until Plaintiff can state with particularity the charges against Florida Cities. Moreover,

---

[68] Q (By Mr. Scroggin) And the decision, Mr. Kwan, was the decision to make a referral of the Carrollwood case to the Department of Justice based on your recommendation?
A It is based on the recommendation of the litigation team.
Kwan Dep. at 372 (attached as Exhibit 23).

[69] Kwan Dep. at 152 (attached as Exhibit 2). See discussion in text, supra, at Note 9.

at trial Florida Cities will present evidence of mitigating circumstances that should significantly reduce, or eliminate altogether, any applicable penalties.

C. Waterway Estates

1. Alleged Unpermitted Discharges

Florida Cities has acknowledged that, although fully permitted by FDEP, it discharged secondarily treated effluent from its Waterway Estates sewage treatment facility into the Caloosahatchee River without a federal NPDES permit during the relevant time period. The Court is already aware that EPA erroneously rejected Florida Cities' 1986 application to renew the Waterway Estates' NPDES permit, thus creating by its own wrongful act the very absence of a federal permit that is now the subject of this case. Ultimately, EPA corrected its own error and issued a new permit for the Waterway Estates facility. The government should not be permitted to profit by obtaining penalties from Florida Cities for its own mistake.

2. Alleged Discharges to an Unpermitted Location

Plaintiff alleges that by discharging effluent from Waterway Estates into a tributary canal of the Caloosahatchee River, Florida Cities violated NPDES Permit No. FL0030325. However, the facts developed through discovery (including Plaintiff's own testimony and the testimony of the FDEP official responsible for this facility) and the relevant federal regulations establish that the plant's outfall was within the permitted area of discharge. Therefore, no genuine issue of material fact exists, and Florida Cities is entitled to a judgment in its favor as to the allegations of discharge to an unpermitted location.

NPDES Permit No. FL0030325, effective November 1, 1989, states that Waterway Estates is authorized to discharge into "receiving waters named Caloosahatchee River." Plaintiff's Complaint alleges that because the outfall of the plant discharged into the tributary canal between November 1, 1989 and July 14, 1991, Florida Cities violated the terms of its permit. Plaintiff bases this allegation on Mr. Kwan's Declaration, which alleges that NPDES permit No. FL0030325 authorizes discharge "to a point at the six (6) foot contour line in the Caloosahatchee River." Kwan Decl. ¶ 21. In Plaintiff's Answers to Defendant's First Interrogatories, which were verified by Mr. Kwan, Plaintiff claims that the permit "specified that they were to discharge the effluent from the Waterway Estates Treatment plant directly to six-foot [sic] contour line of the Caloosahatchee River, during the period alleged . . . ."[70] However, when Mr. Kwan was asked at the United States' 30(b)(6) deposition to identify where NPDES permit No. FL0030325 specifies that discharge must be directly to the six-foot contour line, he was unable to do so. In fact, there is no reference in NPDES permit No. FL0030325 specifying discharge to the six-foot contour line. The only reference to a discharge point found in the permit names the receiving waters simply as the "Caloosahatchee River."

Between November 1, 1989, and July 14, 1991, Florida Cities discharged effluent into a canal adjacent to the Caloosahatchee River. Dr. Abdul B. Ahmadi, Water Facilities Administrator of the FDEP, has testified by affidavit that "FDEP was aware of the physical location of the discharge point from the Waterway Estates facility into a tidally influenced canal to the Caloosahatchee River. This canal was considered part of

[70] Pl.'s Resp. to Def.'s First Interrogs. ¶ 45. See Ex. 1.

the Caloosahatchee River."[71] Plaintiff has presented no evidence to the contrary. Accordingly, Florida Cities was discharging in accordance with the plain meaning of the permit's language and is entitled to summary judgment as a matter of law.[72]

3. Alleged Violations of Waterway Estates' NPDES Permit No. FL0030325

Florida Cities acknowledges that the DMRs filed with EPA reported some exceedances for nitrogen (concentration and loading) and toxicity tests, during the relevant time period. However, as with Barefoot Bay and Carrollwood, the government still has not yet specifically identified the number of alleged violations. It is fundamental that Florida Cities has the right to know the charges it faces before it can respond meaningfully or present a defense. Accordingly, summary judgment is premature until Plaintiff can state with particularity the charges against Florida Cities. Moreover, at trial Florida Cities will present evidence of mitigating circumstances that should significantly reduce, or eliminate altogether, any applicable penalties.

---

[71] Ahmadi Aff. ¶ 11 (emphasis added) (attached as Exhibit 43).

[72] EPA's own regulations state that the discharge point in the canal is within the scope of the permit. EPA's own regulations state that the application form shall provide:

> (1) Outfall location. The latitude and longitude to the nearest 15 seconds [1500 feet] and the name of the receiving water.

40 CFR § 122.21(g). The canal is within 15 seconds of the location of the current, permitted Waterway Estates outfall.

IV. THE FIFTH AMENDMENT AND NEGATIVE INFERENCES

Plaintiff contends that "a number of key witnesses in this case have refused to testify on Fifth Amendment grounds,"[73] and implies that its prosecution of this case has somehow been thwarted because these witnesses have exercised their constitutional rights. Plaintiff argues that this Court should draw inferences from these witnesses's invocation of the Fifth Amendment that all of the violations at issue occurred as alleged in the Plaintiff's Complaint.[74]

Plaintiff's argument ignores several significant facts. First, Plaintiff has engaged in thorough and wide-ranging discovery against all three Florida Cities facilities for fifteen months before any witness invoked the Fifth Amendment. Second, Florida Cities has produced over 500,000 pages of documents, covering all three facilities. Additionally, Plaintiff has deposed seven Florida Cities officials, who testified fully under oath, for a total of eight days of testimony. These witnesses are:

- Julie Karleskint, Operations Manager, Florida Cities Water Company;
- Larry L. Good, Regional Manager for Sarasota Division and North Division, Florida Cities Water Company;

---

[73] Pl.'s Mot. for Summ. J. at 14.

[74] The Supreme Court has held that "the Fifth Amendment does not forbid adverse inferences against parties to civil actions when they refuse to testify in response to probative evidence offered against them: the Amendment 'does not preclude the inference where the privilege is claimed by a party to a civil cause.' 8 J. Wigmore, Evidence 439 (McNaughton rev. 1961)." Baxter v. Palmigiano, 425 U.S. 308, 318 (1976). Furthermore, "the inference is not required: it may be drawn, but it does not necessarily need to be drawn." Daniels v. Pipefitters' Association Local Union No. 597, 983 F.2d 800, 802 (7th Cir. 1993) (emphasis in original). In addition, no inference drawn through the invocation of the Fifth Amendment can form the sole basis of a judgment against a witness; it is a fact to be considered along with other facts. Director of the Office of Thrift Supervision v. Lopez, 960 F.2d 958, 965 (11th Cir. 1992); Koester v. American Republic Investments, 11 F.3d 818, 824 (8th Cir. 1993).

- William Sansbury, Division Manager, Barefoot Bay Division, Florida Cities Water Company;
- Glen Siler, Wastewater Operator, Barefoot Bay Plant, Florida Cities Water Company;
- Johnnie Overton, Senior Vice President, Florida Cities Water Company, 1992-94 (currently Executive Vice President and Chief Operating Officer, Avatar Utility Services, Inc.);
- Paul Bradtmiller, Executive Vice President and Chief Operating Officer, Florida Cities Water Company; and
- Jack Tompkins, former Operations Manager, Florida Cities Water Company.

Since the Supreme Court denied certiorari in United States v. Weitzenhoff, 35 F.3d 1275 (9th Cir. 1994), cert. denied, 115 S.Ct. 939 (1995),[75] Plaintiff has also deposed Leon Levy, Avatar Holdings Inc.'s Chairman of the Board of Directors and Edwin Jacobson, Chief Executive Officer of Avatar Holdings Inc. Both witnesses have testified fully in response to Plaintiff's questions. In addition, Plaintiff has conducted a series of site inspections at all three facilities, including two inspections of Waterway Estates. The document discovery, depositions, and inspections have provided Plaintiff a full and fair opportunity to discover all facts relevant to this suit.[76] Additionally, all evidence, including all inferences, must be viewed in the light most favorable to the

---

[75] The Ninth's Circuit's holding in Weitzenhoff dramatically changed the well-established legal standard of criminal liability for "knowing" violations of the CWA. Under Weitzenhoff, any violation of the CWA, regardless of the mitigating circumstances, can give rise to criminal felony liability. This result applies to anyone knowingly causing a discharge that results in any violation, even if that person believed in good faith that the facility was in compliance with the CWA.

[76] Florida Cities has repeatedly informed Plaintiff that the witnesses who have exercised their Fifth Amendment rights would testify in exchange for immunity from individual criminal prosecution under the CWA. Florida Cities has formally requested such immunity, but to date, Plaintiff has not responded to Florida Cities' request. The Department of Justice, unlike a private plaintiff, is uniquely empowered to grant this immunity and obtain both deposition and trial testimony from all of these witnesses. See letters exchanged between Don G. Scroggin and Daniel S. Jacobs (attached as Exhibit 44).

party opposing summary judgment, Florida Cities. In light of Plaintiff's sweeping and exhaustive discovery, this Court should decline to draw any adverse inferences and should instead rule on the actual facts of this case.

V. CONCLUSION

Based on the foregoing, Defendant Florida Cities should prevail on its Motion for Summary Judgment on: Paragraph 16 (Barefoot Bay discharge without a valid NPDES permit); Paragraphs 17, 18, 19, 20, 21, 22, 23 (Barefoot Bay effluent limitation violations of Administrative Order 90-106); Paragraph 28 (Barefoot Bay alleged violations for using the improper test method for total residual chlorine); Paragraph 30 (Carrollwood discharge without a valid NPDES permit); Paragraph 45 (Waterway Estates discharge at the wrong location) of the Second Amended Complaint. Plaintiff's Motion for Partial Summary Judgment should be denied.

Respectfully submitted,

Deposition Summary
Johnnie Overton
November 17, 1994

Title: June 1992 - June 1994 - Senior VP for FCWC; June 1994 - Avatar Utilities Services, Inc. Executive Vice President (reports to Gerald Allen).

As Senior VP he was responsible for the overall operation of 6 facilities; he was responsible for environmental compliance. He was questioned about his knowledge of environmental science and stated that he had taken no classes in the subject---only seminars in connection with his job. He was questioned on his involvement with NPDES permits; he had done some renewal applications.

He answers questions about exceedances at the facilities; meetings with Paul Bradtmiller about various environmental matters; visits to the wastewater treatment facilities.

He discusses the Barefoot Bay facility at length: the perc. ponds, sprayfield and the overflows into the canal; the plan to upgrade the facility; various alternatives that were explored in order to stop discharging into the river (and the cost scenarios associated with each).

Page	Designation	Counter Attack
14.00	DGS might have conflict of interest by representing Tompkins personally	
36.00	Began work for FCWC in August 1989	
40.00	ended work for FCWC in September 1991	
41.00	was hired as construction manager; moved to operations manager	
42.00	he reported to French then to Bradtmiller	
43.00	*had oversight of day to day operations*	
44.00	responsibilities included permitting; permit reviewing and applications for permits and DMRs	
53.00	Tompkins visited WWE; WWE discharges to a canal	
55.00	AO 89-109; her circulated the AO to French and Wittenmyer	
64.00	Tompkins recalls Harrop and conflict with Harrop; FDER requested more information and Source needed $ in order to respond; tried to work out an agreement with Source in July 1989; needed DER permit so construction could go forward; fee dispute; DER issued a comment letter on 6/16/89 that needed to be responded to; November 1989 the DER application was still incomplete; Tompkins met with Ahmadi; FDER frowned on surface water discharges; Ahmadi called to talk about anti-degradation	
84.00	Tompkins says the discharge was at unpermitted location	[Tompkins is only responding to what the permit says; he is not factoring in the AO and what it says]
89.00	10 month fee dispute holds things up at WWE	

Page	Designation	Counter Attack
94.00	FCWC retained a different engineer in May 1990 because of dissatisfactio with Source	
96.00	another engineering firm takes over construction; not necessarily delays involved with the construction; Tompkins does not know the length of delay attributable to the dispute with Source; [Jacobs wants Tompkins to say that dispute with Source led to Total Nitrogen violations because construction was not complete]	
105.00	No permit to discharge to the canal	
116.00	Tompkins told FCWC and Avatar of WWE deadlines; Elder, Reeves, Allen, Getman	
119.00	Tompkins had several dealings with Allen, Getman and Avatar	
120.00	Tompkins concerned for need to speed up compliance	
122.00	No reponse from Getman but Getman did write memo asking Tompkins to document all issues related to WWE project for possibility of future litigation	
132.00	McGarry wrote notice of violation; EPA's dissatisfaction because compliance date is behind schedule; Temporary facilities could have been used	
134.00	that FCWC was working to meet all schedules related to WWE is an exaggeration	
135.00	Bradt was supervisor and was kept apprised of the situation; Tompkins was trying to speed things up in April 1991	
139.00	memo to Bradtmiller for a sulfunator; trying to get facility into compliance ASAP; proposing temporary measures to improve effluent quality; if recommended measures are approved by FDER that would reduce construction time; Reeves did not allow letter to FDER to be sent requesting temporary measures	
144.00	Bradtmiller is providing resistance to WWE measures; Tompkins recommendation would reduce time for compliance	

Page	Designation	Counter Attack
146.00	Tompkins efforts were meeting resistance; Bradtmiller didn't follow his recommendations	
149.00	Memo to Bradt recommending denitrification filter before 10/1/91; would improve effluent quality; Bradt was concerned with expenses; justifiable cost; Bradtmiller never waived his concerns with the expenses	
153.00	Bradtmiller sent letter to Kwan in August 1991; delays were partially within the company's control	
155.00	no permit at BB when Tompkins started	
158.00	serious matter not to have a permit at BB	
174.00	Bradt, Reeves, and Allen knew BB was without a permit	
176.00	Tompkins tried to remedy permit situation at BB; FCWC knew of discharge without a permit; Memo cc:'d to Gordon, Sladkus, Reeves, Wilkov, Getman	
182.00	Allen was lead person for company in terms of eliminating the discharge	
199.00	problems meeting state consent order for BB; Avatar Properties was pursuing the 300 acre purchase	
201.00	wastewater flow rates are accurrate	
207.00	plenty of orange groves available near BB to accept effluent	
208.00	plenty of land was available for purchase near BB to pursue spray field	
210.00	had contacts with Crawford and Kwan; found them reasonable to deal with	
219.00	Allen, Reeves, French, Lander, Getman are copied on mem re: Carrollwood problems and lack of permit	

Page	Designation	Counter Attack
222.00	EPA, DER, County had problems with Carrollwood

Re: United States v. Florida Cities Water
No. 93-281-CIV-FTM-21 (M.D. Fla.)

Dear Mr. Baise:

Reference is made to my letters of April 20, 1994 and June 23, 1994 regarding the United States' interviews of former Florida Cities Water Company employees.

Pursuant to the representations made in the referenced correspondence, I am writing to advise you that effective seven days from the date of this letter, the United States will no longer voluntarily refrain from conducting interviews of former employees of Florida Cities Water Company and its parent companies who have advised us that they have separately retained counsel to represent them in the above-captioned matter, and have consented to being interviewed outside the presence of counsel for Florida Cities. Any such interviews will be conducted without further notice to Florida Cities and its parent companies.

Sincerely,

Assistant Attorney General
Environment and Natural Resources
Division

Exhibit_____(GHB-35)

IN THE UNITED STATES DISTRICT COURT
FOR THE MIDDLE DISTRICT OF FLORIDA
FORT MYERS DIVISION

UNITED STATES OF AMERICA, Plaintiff, v. FLORIDA CITIES WATER COMPANY, INC., Defendant.	CIVIL ACTION NO. 93-281-CIV-FTM-21

UNITED STATES' REPLY TO DEFENDANT'S EMERGENCY MOTION FOR A TEMPORARY PROTECTIVE ORDER AND DEFENDANT'S REQUEST FOR ORAL ARGUMENT IN CONNECTION WITH DEFENDANT'S MOTION TO DISQUALIFY COUNSEL

On January 27, 1995, Defendant filed a request for oral argument on its Motion to Disqualify Counsel (filed on October 25, 1994), and a memorandum in support thereof. On February 6, 1995, Defendant filed an Emergency Motion for a Temporary Protective Order, and a memorandum in support thereof. The United States opposes both Defendant's Request for Oral Argument and Defendant's Emergency Motion for a Temporary Protective Order.

Defendant's Request for Oral Argument should be denied as untimely.[1] Both the United States' Motion for an Order Allowing Ex-Parte Contacts with Former Employees (filed on June 24, 1994), which, if granted, renders moot Defendant's Motion to Disqualify Counsel, and Defendant's Motion to Disqualify Counsel, have been

[1] By filing its request for oral argument on January 27, 1995, Defendant violated Local Rule 3.01(d), which requires that a request for oral argument be filed concurrently with the motion to which it relates and estimate the time required for argument.

fully briefed, and can be decided without oral argument.[2] Nonetheless, if the Court deems oral argument to be helpful to its consideration of the issue at bar, the United States will be pleased to participate in oral argument on the pending motions.

The parties' earlier briefs focused largely on the Rules of Professional Conduct adopted by the Supreme Court of Florida, the Model Rules of Professional Conduct of the American Bar Association, and relevant case law. Defendant, in its Memorandum in Support of its Request for Oral Argument, now attempts to redirect the Court's attention to the Department of Justice's new regulations governing contacts with represented persons.[3] While the United States' conduct in this case is authorized by and consistent with these regulations, it is also entirely consistent with the rules of professional conduct otherwise applicable in the State of Florida. As applied to the facts of this case, there is simply no conflict between the Department's regulations and Florida's Rules of Professional Conduct.

---

[2] Indeed, considering Defendant has now submitted no fewer than five briefs on the issue at bar, Defendant has had a sufficient opportunity to be heard.

[3] As noted in its Memorandum in support of United States' Motion for an Order Allowing Ex-Parte Contacts with Former Employees, the Department of Justice regulations governing its attorneys' communications with represented persons were promulgated as a final rule on August 4, 1994, see 59 Fed. Reg. 39910, after twice being published as proposed rules long before the ex parte contacts at issue here, see 57 Fed. Reg. 54734 (November 20, 1992) and 58 Fed. Reg. 39976 (July 26, 1993), and at all times relevant here have expressly excluded former employees from their purview. Defendant has had every opportunity to discuss these regulations in earlier submissions to the Court.

Defendant's "Emergency Motion" should be denied because it is moot, because Defendant falls far short of meeting its burden of showing good cause for the extraordinary relief it seeks, and because there is no sufficient legal basis to preclude interviews of former employees separately represented by counsel. As stated in the United States' Notice to Court Regarding Scheduling of Interview with Former Employee (filed February 2, 1995), the United States wished to proceed with the interview in question, scheduled for February 15, 1995, as soon as possible.[4] In deference to the Court, however the United States offered to postpone the interview, pending the Court's ruling on the pending motions, if the Court indicated that a postponement was advisable. On February 4, 1995, with notice to counsel for defendant, the attorney for the witness whose interview was to take place cancelled the interview after being contacted by Defendant's attorney. See Exhibit A.[5] Thus, no interviews of ex-employees are presently scheduled, and the United States will again notify Defendant and the Court before any such interviews are conducted. Accordingly, Defendant's Motion is moot.

Defendant's Emergency Motion should also be denied because Defendant has patently failed to show good cause for a protective

---

[4] The interview was scheduled in conjunction with depositions on February 16 and 17, 1995.

[5] Defendant is careless with the truth when it suggests that the United States misled the witness' attorney by not advising him of the pending motions. To the contrary, when scheduling the interview, the United States made full disclosure of the pending motions. See Exhibit B.

order. The only so-called irreparable injury Defendant alleges might take place if the United States were to proceed with interviews of ex-employees separately represented by counsel is that the United States (1) "may obtain privileged or otherwise confidential information that would not have been disclosed had Florida Cities' counsel been present," and "may seek to introduce such tainted evidence at trial," and (2) "may gain information that will lead to the introduction of new witnesses or new evidence that would not otherwise be presented to the Court." Defendant's brief at 7-8. As to the first point, there is no reason to believe such a disclosure would occur, since the United States has no intention of eliciting, soliciting, or receiving from any witness it interviews privileged information. If an accidental disclosure were to take place, the parties, with the Court's assistance, if necessary, could fashion an appropriate remedy. As to the second point, witness interviews are indeed intended to lead to discoverable evidence and are a legitimate and important tool in discovery and trial preparation. Thus, there clearly is no realistic likelihood of any untoward injury to Defendant, let alone irreparable injury, and no good cause for an emergency protective order.

Finally, Defendant's Emergency Motion should be denied because the interview of a represented person in the presence of his own counsel but outside the presence of Defendant's counsel in entirely consistent both with Rule 4-4.2 of the Florida Rules of Professional Conduct, as well as with U.S. Department of

Justice regulations governing communications with represented persons. See 59 Fed. Reg. 39910 (August 4, 1994).

In short, Defendant should stop crying wolf and stop impugning the integrity of the United States and its counsel. Defendant's Request for Oral Argument and Emergency Motion should be denied. The United States should be allowed to go forward with its case without further obstruction or delay.

Respectfully submitted,

LOIS J. SCHIFFER

Re: United States of America v. Florida Cities Water Company

Dear Mr. Jacobs:

On January 26, 1995, we spoke concerning producing Mr. A.A. Reeves, a former employee of Florida Cities Water Company, and Jack Schenkman, primary stockholder in North Fort Myers Utilities, Inc. for informal interviews on Wednesday, February 15th in Fort Myers, Florida.

I have now been contacted by Attorney Don G. Scroggin, who has advised that Mr. Reeves may be held to be a "party" to the litigation because of recent court rulings in the Middle District of Florida.

Additionally, Mr. Scroggin provided to me, via fax, a copy of the "Defendant's Memorandum in Support of Defendant's Motion to Disqualify Counsel", dated October 24, 1994, and a copy of the "United States' Notice to the Court Regarding Scheduling of Interview with Former Employee", which is undated. The last paragraph in the United States Notice states:

> United States wishes to proceed with the interview, presently scheduled for February 15, 1995, as soon as possible. In deference to the Court, however, the United States will postpone the interview, pending the Court's ruling on the Motions reference above, if the Court indicates that a postponement is advisable.

GOVERNMENT EXHIBIT A

Personally, I have no philosophical problem with producing Mr. Reeves for an informal interview. However, as I have now been apprised of, but have not read, a judicial determination that Mr. Reeves may be a party, and out of abundance of caution and our view of our ethical obligations in this regard, we must conclude that it is not appropriate to produce Mr. Reeves for an informal interview, without providing an opportunity for counsel to Florida Cities to also attend.

Because he can in no way be defined as a "party", we will produce Mr. Schenkman on the 15th as discussed. I cannot imagine your needing much time with Mr. Schenkman. Therefore, I would like to suggest a late morning meeting on the 15th at your downtown Fort Myers' offices. Please call me to confirm that arrangement.

As regards Mr. Reeves, I will make arrangements with you and Mr. Scroggin for a mutually convenient time and place for an informal interview. If you would prefer to proceed to deposition, please advise so that we may similarly come to agreement as to a mutually convenient time and place.

Should you have any questions or comments concerning the above, please do not hesitate to contact me.

Sincerely,

ROSE, SUNDSTROM & BENTLEY

Post Office Box 7611
Washington, D.C. 20044

Dear Mr. Jacobs:

This letter is to summarize our telephone conference of January 25, 1995 regarding the federal government's legal action against Florida Cities Water Company. In that telephone conference you had asked that we produce our clients, Jack Schenkman and Tony Reeves, for an informal interview. At that time you advised me that Florida Cities Water Company had filed a motion with the federal court prohibiting the federal government from interviewing any former employees of Florida Cities Water Company, of which Mr. Reeves is one, without counsel for Florida Cities Water Company being present.

It is further my understanding that the federal government filed pleadings in opposition to that motion and that it is presently pending before the Federal District Court. You further advised me that in absence of a court ruling to the contrary you believed that there was no prohibition against interviewing former employees, particularly where the former employee had separate counsel from that of Florida Cities Water Company. We further discussed a scheduling of those interviews.

Very truly yours,

MARTIN S. FRIEDMAN

erty value. *See Eide*, 908 F.2d at 720–22 (describing this as a due process takings claim). Second, the plaintiff can allege that the regulation is arbitrary, irrational, and not substantially related to a legitimate governmental purpose. *See id.* (describing this as an arbitrary and capricious due process claim); *see also Del Monte Dunes v. City of Monterey*, 920 F.2d 1496, 1508 (9th Cir.1990) (city council actions that are not for valid regulatory reasons are a violation of the developers' substantive due process rights).

[7] Because the district court dismissed the Partnership's complaint without reaching the merits of these issues, we reverse and remand the Partnership's as applied claims.[15] Furthermore, from our review of the record, the County has forced the Partnership to bear a burden that should fairly have been allocated throughout the entire watershed area. "A strong public desire to improve the public condition will not warrant achieving the desire by a shorter cut than the constitutional way of paying for the change." *Dolan v. City of Tigard*, — U.S. ——, ——, 114 S.Ct. 2309, 2322, 129 L.Ed.2d 304 (1994) (quotation omitted). We believe that the Partnership is entitled to recoup the portion of its expenditures in excess of its pro rata share and remand to the district court to determine the details and amounts.

B. The Facial Claim

[8, 9] The Partnership alleges that the Criteria, on their face, violate the equal protection clause. The Partnership claims that the enactment of the Criteria creates a financial obligation for the first developer in a watershed area to construct a drainage system for the whole area. In order to state a facial challenge to a statute or regulation, the plaintiff must assert that "*any* application of the regulation is unconstitutional." *Eide*, 908 F.2d at 724 n. 14. We agree with the district court that the Partnership has not demonstrated a facial challenge to the Criteria. Therefore, the district court's dismissal of the Partnership's facial challenge is affirmed.

[15] Although neither party discussed the application of Mo. Const. art. 1, § 26 to this case, we also remand this as applied issue to the district court.

III. CONCLUSION

For the foregoing reasons, we reverse the district court's judgment and remand this case for further proceedings consistent with this opinion.

UNITED STATES of America, Plaintiff–Appellee,

v.

Michael H. WEITZENHOFF; Thomas W. Mariani, Defendants–Appellants.

Nos. 92–10105, 92–10108.

United States Court of Appeals, Ninth Circuit.

Argued and Submitted Jan. 11, 1993.

Decided Aug. 3, 1993.

As Amended on Denial of Rehearing and Rehearing En Banc Aug. 8, 1994.

Managers of sewage treatment plant that operated under Environmental Protection Agency (EPA) permit were convicted for felony violations of Clean Water Act (CWA) by permitting discharge of waste activated sludge (WAS) directly into ocean without treatment after jury trial in the United States District Court for the District of Hawaii, David Alan Ezra, J. Defendants appealed. The Court of Appeals, 1 F.3d 1523, affirmed. Following denial of motion for rehearing en banc, the Court of Appeals, Fletcher, Circuit Judge, issued amended opinion, holding that: (1) authorizing illegal discharges established required intent; (2) delegating interpretation of permit to jury was harmless error; (3) permit was not unconstitutionally vague; (4) entrapment by estoppel defense did not apply; (5) emphasizing health risks of discharges was not prose-

cutorial misconduct; and (6) one defendant's perjury justified obstruction of justice enhancement.

Affirmed.

1. **Health and Environment** ⇐25.7(24)

Provision of Clean Water Act making it a felony offense to "knowingly" violate any permit condition did not require that polluter be cognizant of requirements of even existence of permit, but only that polluter knowingly engaged in conduct that resulted in permit violation. Federal Water Pollution Control Act Amendments of 1972, §§ 301(a), 309(c)(2, 4), as amended, 33 U.S.C.A. §§ 1311(a), 1319(c)(2, 4).

See publication Words and Phrases for other judicial constructions and definitions.

2. **Health and Environment** ⇐25.7(24)

Criminal provisions of Clean Water Act are designed to protect public at large from potentially dire consequences of water pollution and, as such, fall within category of "public welfare legislation." Federal Water Pollution Control Act Amendments of 1972, §§ 301(a), 309(c)(2, 4), as amended, 33 U.S.C.A. §§ 1311(a), 1319(c)(2, 4).

3. **Criminal Law** ⇐769, 790

Permitting witnesses familiar with waste water management field to testify about various technical terms in and obligations imposed by permit issued under Clean Water Act, and then instructing jury to construe permit based on plain meaning of language in permit and testimony of expert and other witnesses rather than resolving conflicts in testimony in its jury charge amounted to impermissible delegation of district judge's duty; in effect, witness instructed jury on law rather than judge. Federal Water Pollution Control Act Amendments of 1972, §§ 301(a), 309(c)(2, 4), as amended, 33 U.S.C.A. §§ 1311(a), 1319(c)(2, 4).

4. **Criminal Law** ⇐469.2, 1153(1)

Admission of expert testimony is within discretion of trial court and reversible only for abuse of discretion or manifest error. Fed.Rules Evid.Rules 702, 704, 28 U.S.C.A.

5. **Criminal Law** ⇐469.1

Expert testimony is properly admissible when it serves to assist trier of fact to understand evidence or determine fact in issue. Fed.Rules Evid.Rules 702, 704, 28 U.S.C.A.

6. **Criminal Law** ⇐1137(3)

Defendants charged with criminal violations of Clean Water Act (CWA) did not invite error by court in permitting experts to instruct jury on contested issue of law and as to meaning of various technical terms and obligations imposed by CWA permit rather than resolving conflicting testimony in jury charge by insisting that court not define any of permit's terms for jury in its charge, but merely to instruct jury to follow plain meaning of language in permit, where defendants had initially objected to admission of any expert testimony concerning permit terms and, after court ruled such testimony admissible, presented their own expert testimony to counter that of government witnesses. Fed.Rules Evid.Rules 702, 704, 28 U.S.C.A.; Federal Water Pollution Control Act Amendments of 1972, §§ 301(a), 309(c)(2, 4), as amended, 33 U.S.C.A. §§ 1311(a), 1319(c)(2, 4).

7. **Criminal Law** ⇐1172.1(2)

Trial court's error in admitting expert testimony on contested issues of law as to interpretations of technical terms and obligations imposed by permit issued under Clean Water Act in lieu of instructing jury was harmless where, under proper interpretation of permit, discharges admitted to by defendants necessarily violated permit and appellate court was able to accomplish task of permit interpretation without turning to experts. Federal Water Pollution Control Act Amendments of 1972, §§ 301(a), 309(c)(2, 4), as amended, 33 U.S.C.A. §§ 1311(a), 1319(c)(2, 4).

8. **Criminal Law** ⇐1134(3)

Since construction of Clean Water Act permit is matter of law, Court of Appeals is in position to interpret permit provisions at issue. Federal Water Pollution Control Act Amendments of 1972, § 101 et seq., as amended, 33 U.S.C.A. § 1251 et seq.

9. **Health and Environment** ⇐25.7(6.1)

Excess waste activated sludge (WAS that was separated out from plant's treatment process to be stored and eventually disposed of clearly fell with Clean (CWA) permit's definition of "rer stance," and, as such, could n charged into ocean unless discha tuted permissible bypass of treat tem. Federal Water Pollution C Amendments of 1972, §§ 301 309(c)(2, 4), as amended, 33 §§ 1311(a), 1319, 1319(c)(2, 4).

10. **Health and Environment** ⇐ 4h Even assuming that direct dumping of waste activated sludge (not violate treatment facility's effl dards, discharges were not "permi passes" of treatment system auth Clean Water Act (CWA) because c were not for "essential maintenanc sure efficient operation. 12. **Administrative Law and Pr** ⇐413

Health and Environment ⇐25. Environmental Protection A (EPA) interpretation of its regulation iting bypass of treatment system where necessary for essential mainten entitled to considerable weight.

13. **Health and Environment** ⇐25.7 National Pollution Discharge E tion System (NPDES) permit was not stitutionally vague so as to preclude c conviction of managers of sewage tre plant under Clean Water Act (CW violating permit in absence of requir that defendants knew they were vi law, where defendants were knowled in waste water field and could be expec

disposed of clearly fell with Clean Water Act (CWA) permit's definition of "removed substance," and, as such, could not be discharged into ocean unless discharge constituted permissible bypass of treatment system. Federal Water Pollution Control Act Amendments of 1972, §§ 301(a), 309, 309(c)(2, 4), as amended, 33 U.S.C.A. §§ 1311(a), 1319, 1319(c)(2, 4).

10. **Health and Environment** ⇐25.7(16)

Even assuming that direct oceanic dumping of waste activated sludge (WAS) did not violate treatment facility's effluent standards, discharges were not "permissible bypasses" of treatment system authorized by Clean Water Act (CWA) because discharges were not for "essential maintenance" to assure efficient operation. Federal Water Pollution Control Act Amendments of 1972, §§ 301(a), 309, 309(c)(2, 4), as amended, 33 U.S.C.A. §§ 1311(a), 1319, 1319(c)(2, 4).

See publication Words and Phrases for other judicial constructions and definitions.

11. **Health and Environment** ⇐25.7(16)

"Essential maintenance," within meaning of regulation establishing guideline prohibiting bypass of treatment system except where necessary for essential maintenance, means unavoidable measures to insure continuing operation of treatment plant equipment. Federal Water Pollution Control Act Amendments of 1972, §§ 301(a), 309, 309(c)(2, 4), as amended, 33 U.S.C.A. §§ 1311(a), 1319, 1319(c)(2, 4).

12. **Administrative Law and Procedure** ⇐413

Health and Environment ⇐25.15(6.1)

Environmental Protection Agency's (EPA) interpretation of its regulation prohibiting bypass of treatment system except where necessary for essential maintenance is entitled to considerable weight.

13. **Health and Environment** ⇐25.7(24)

National Pollution Discharge Elimination System (NPDES) permit was not unconstitutionally vague so as to preclude criminal conviction of managers of sewage treatment plant under Clean Water Act (CWA) for violating permit in absence of requirement that defendants knew they were violating law, where defendants were knowledgeable in waste water field and could be expected to have understood what permit meant, and particularly, that it did not give them license to dump thousands of gallons of partially treated sewage into ocean on regular basis, and that defendants had adequate notice of illegality of their dumping considering pains taken to conceal activities. U.S.C.A. Const. Amends. 5, 14; 18 U.S.C.A. §§ 2, 371; Federal Water Pollution Control Act Amendments of 1972, §§ 301(a), 309, 309(c)(2, 4), as amended, 33 U.S.C.A. §§ 1311(a), 1319, 1319(c)(2, 4).

14. **Criminal Law** ⇐1139

Whether National Pollution Discharge Elimination System (NPDES) permit was unconstitutionally vague was question of law which Court of Appeals reviewed de novo. U.S.C.A. Const.Amends. 5, 14.

15. **Criminal Law** ⇐13.1(1)

In evaluating question of vagueness of statute, Court of Appeals ordinarily looks to common understanding of terms of statute; however, if statutory prohibition involves conduct of select group of persons having specialized knowledge, and challenged phraseology is indigenous to idiom of that class, standard is lowered and court may uphold statute which uses words or phrases having technical or other special meaning well enough to enable those within its reach to correctly apply them. U.S.C.A. Const. Amends. 5, 14.

16. **Health and Environment** ⇐41

Exclusion of Federal Register excerpt describing regulation proposed in 1984 by Environmental Protection Agency (EPA) but never adopted, which would have permitted bypass of effluent from wastewater treatment facility by where resultant effluent is in compliance with permit limitations, in trial in criminal charges under Clean Water Act for violating National Pollution Discharge Elimination System (NPDES) permit was not an abuse of discretion, notwithstanding fact that jury was impermissibly assigned task of interpreting permit; although explanation of proposed regulation might properly have been considered or disregarded by court in ruling on legal issues in case, it was not relevant to jury's determination of facts. 18 U.S.C.A. §§ 2, 317; Federal Water Pollution

Control Act Amendments of 1972, §§ 301(a), 309(c)(2, 4), as amended, 33 U.S.C.A. §§ 1311(a), 1319(c)(2, 4).

17. Criminal Law ⇐37(6.1)

Defendants charged with criminal violations of Clean Water Act due to violations of discharge permit by dumping waste activated sludge (WAS) in ocean were not entitled to instruction on elements of "entrapment by estoppel" defense, despite defendant's claim that regulatory authorities previously permitted them to haul excess WAS to waste treatment facility where it only underwent primary treatment process before being discharged into ocean; fact that it was lawful to discharge WAS at one facility without secondary treatment had no bearing on discharge limitations at another plant which operated under its own permit and defendants failed to seek advice from appropriate authorities as to how properly to dispose of excess WAS. Federal Water Pollution Control Act Amendments of 1972, §§ 301(a), 309(c)(2, 4), as amended, 33 U.S.C.A. §§ 1311(a), 1319(c)(2, 4).

18. Criminal Law ⇐37(2.1)

"Entrapment by estoppel" applies when authorized government official tells defendant that certain conduct is legal and defendant believes official.

19. Criminal Law ⇐37(2.1)

To invoke "entrapment by estoppel" defense, defendant must show that he relied on official statement and that his reliance was reasonable in that person sincerely desirous of obeying law would have accepted information as true and would not have been put on notice to make further inquiries.

20. Criminal Law ⇐1036.1(3.1), 1037.1(2)

Although challenged testimony regarding potential health effects of waste activated sludge discharges in prosecutor's remarks as to public health hazard engendered by defendants' activities of dumping untreated waste activated sludge (WAS) directly into ocean in violation of permit were of questionable relevance and indeed conveyed repugnant images, they could not have materially affected verdict or rendered trial on charges of criminal violations of Clean Water Act unfair, where substantial amount of testimony regarding health risks associated with WAS came in without objection prior to testimony defendants claimed was prejudicial and, as for most exceptionable testimony, court sustained defendants' objections and issued prompt curative instructions. Federal Water Pollution Control Act Amendments of 1972, §§ 301(a), 309(c)(2, 4), as amended, 33 U.S.C.A. §§ 1311(a), 1319(c)(2, 4).

21. Criminal Law ⇐1171.1(1)

Reversal is justified only if alleged misconduct of prosecutor materially effects verdict or deprives defendant of fair trial. U.S.C.A. Const.Amend. 6.

22. Criminal Law ⇐730(1)

Depending upon circumstances, prompt and effective admonishment of counsel or curative instruction from trial court may effectively neutralize damage from prosecutorial misconduct.

23. Criminal Law ⇐706(3), 723(2)

Prosecutor's few additional questions touching upon health issue with regard to defendants' discharge of waste activated sludge (WAS) directly into ocean without treatment and comments in prosecutor's summation could not be considered misconduct, where both defendants attempted to portray their discharging of WAS into ocean as responsible tactic to forestall environmental disaster, thus putting safety of public at issue, and one defendant testified that in ordering discharges, public health was first and foremost in his mind.

24. Criminal Law ⇐1253

Two-point upward adjustment of defendant's base offense level for criminal violation of Clean Water Act based on obstruction of justice based on trial court's finding that defendant perjured himself was not clearly erroneous, where defendant's testimony that he believed his activities were within scope of permit were not illegal was belied by efforts to conceal activities. U.S.S.G. § 3C1.1, 18 U.S.C.A.App.

25. Criminal Law ⇐986.2(6)

ORDER AMENDING OPINION AND DENYING PETITION FOR REHEARING AND REHEARING EN BANC

Aug. 8, 1994.

The opinion filed at 1 F.3d 1523 is amended as follows:

At 1 F.3d 1530, bottom of the first column, delete:

But see United States v. Speach, 968 F.2d 795 (9th Cir.1992) (distinguishing *Hoflin* and holding that different subsection of RCRA uses word "knowingly" in different manner so as to require showing that transporter of hazardous wastes knew that receiving facility lacked storage permit).

Add footnote "5" following "violating law)." in the line prior to the deleted text:

5 Weitzenhoff argues that this case is controlled by *United States v. Speach*, 968 F.2d 795, 796–97 (9th Cir.1992), in which we held that 42 U.S.C. § 6928(d)(1), which imposes criminal liability on parties who "knowingly transport[ ] ... hazardous waste ... to a facility which does not have a permit," requires that the transporter know that he acted in violation of the statute. This argument is unavailing because *Speach* recognizes the general rule that public welfare offenses are not to be construed to require proof that the defendant knew he was violating the law in the absence of clear evidence of contrary congressional intent and finds only a narrow exception to this general rule. In *Speach*, we relied on the fact that the defendant was not the permittee but simply the individual who transported waste to the permittee, and, as contrasted to the permittee was not "the person in the best position to know the facility's permit status." *Id.* at 797. Although we considered it unreasonable to put the defendant at risk for failing to ascertain the permit status of the receiving facility, we recognized that such a risk is not unreasonable when the permittee is also the defendant. *Id.* In this case, as the permittees, appellants are clearly in the best position to know their own permit status, and are among those persons upon whom the *Speach* court would impose liability.

Replace the deleted language of text with:

Other courts have also followed *International Minerals* by similarly construing the knowledge requirement in statutes that regulate deleterious devices or obnoxious waste materials. *E.g., United States v. Laughlin*, 10 F.3d 961, 965–66 (2d Cir. 1993) (§ 6928(d)(2)(A) of RCRA), *cert. denied*, — U.S. —, 114 S.Ct. 1649, 128 L.Ed.2d 368 (1994); *United States v. Buckley*, 934 F.2d 84, 88 (6th Cir.1991) (pre–1990 version of § 7413(c)(1)(C) of the Clean Air Act); *United States v. Dee*, 912 F.2d 741, 745 (4th Cir.1990), *cert. denied*, 499 U.S. 919, 111 S.Ct. 1307, 113 L.Ed.2d 242 (1991) (§ 6928(d)(2)(A) of RCRA); *United States v. Corbin Farm Serv.*, 444 F.Supp. 510, 519–20 (E.D.Cal.), *aff'd*, 578 F.2d 259 (9th Cir.1978) (Federal Insecticide, Fungicide and Rodenticide Act).[6]

6 Like the court in *International Minerals*, we construe the language in § 1319(c)(2)(A) prohibiting knowing violation of "any permit condition" as a "shorthand designation for specific acts" that violate the CWA. *See International Minerals*, 402 U.S. at 567, 91 S.Ct. at 1703. In both § 1319(c)(2)(A) and the statute in question in *International Minerals*, the penalty provisions were drafted in a general fashion to encompass a wide variety of possible violations of the Acts and the word "knowingly" is used to reflect a re-

* Honorable Marilyn L. Huff, United States District Judge for the Southern District of California, sitting by designation.

quirement that the government prove general intent in order to establish a violation. *See also Buckley*, 934 F.2d at 88 ("knowingly ... violates section 7411(e) ..."); *Sherbondy*, 865 F.2d at 1002 ("knowingly violates subsection ... (g) ... of section 922"); *Corbin Farm Serv.*, 444 F.Supp. at 518 ("knowingly violates any provision of this subchapter").

At 1 F.3d 1530, second column, immediately following first paragraph, insert:

Subsequent to the filing of the original opinion in this case, the Supreme Court decided two cases which Weitzenhoff contends call our analysis into question. *See Ratzlaf v. United States*, — U.S. —, 114 S.Ct. 655, 126 L.Ed.2d 615 (1994); *Staples v. United States*, — U.S. —, 114 S.Ct. 1793, 128 L.Ed.2d 608 (1994). We disagree.

The statute in *Ratzlaf* does not deal with a public welfare offense, but rather with violations of the banking statutes. The Court construed the term "willfully" in the anti-structuring provisions of the Bank Secrecy Act to require both that the defendant knew he was structuring transactions to avoid reporting requirements and that he knew his acts were unlawful. The Court recognized that the money structuring provisions are not directed at conduct which a reasonable person necessarily should know is subject to strict public regulation and that the structuring offense applied to all persons with more than $10,000, many of whom could be engaged in structuring for innocent reasons. *Ratzlaf*, — U.S. at ——, 114 S.Ct. at 660–62. In contrast, parties such as Weitzenhoff are closely regulated and are discharging waste materials that affect public health. The *International Minerals* rationale requires that we impute to these parties knowledge of their operating permit. This was recognized by the Court in *Staples*.

The specific holding in *Staples* was that the government is required to prove that a defendant charged with possession of a machine gun knew that the weapon he possessed had the characteristics that brought it within the statutory definition of a machinegun. But the Court took pains to contrast the gun laws to other regulatory regimes, specifically those regulations that govern the handling of "obnoxious waste materials." *See Staples*, — U.S. at ——, 114 S.Ct. at 1798. It noted that the mere innocent ownership of guns is not a public welfare offense. *Id.* at ——, 114 S.Ct. at 1804. The Court focussed on the long tradition of widespread gun ownership in this country and, recognizing that approximately 50% of American homes contain a firearm, *id.* at ——, 114 S.Ct. at 1801, acknowledged that mere ownership of a gun is not sufficient to place people on notice that the act of owning an unregistered firearm is not innocent under the law.

Staples thus explicitly contrasted the mere possession of guns to public welfare offenses, which include statutes that regulate " 'dangerous or deleterious devices or products or obnoxious waste materials.' " *id.* at ——, 114 S.Ct. at 1800, and confirmed the continued vitality of statutes covering public welfare offenses, which "regulate potentially harmful or injurious items" and place a defendant on notice that he is dealing with a device or a substance "that places him in 'responsible relation to a public danger.' " *Id.* "[I]n such cases Congress intended to place the burden on the defendant to ascertain at his peril whether [his conduct] comes within the inhibition of the statute." *Id.* at ——, 114 S.Ct. at 1798 (citations and internal quotations omitted).

Unlike "[g]uns [which] in general are not 'deleterious devices or products or obnoxious waste materials,' *International Minerals, supra* [402 U.S.], at 565 [91 S.Ct. at 1702], that put their owners on notice that they stand 'in responsible relation to a public danger[,]' *Dotterweich*, 320 U.S. at 281 [64 S.Ct. at 136]," *Staples*, — U.S. at ——, 114 S.Ct. at 1800, the dumping of sewage and other pollutants into our nation's waters is precisely the type of activity that puts the discharger on notice that his acts may pose a public danger. Like other public welfare offenses that regulate the discharge of pollutants into the air, the disposal of hazardous wastes, the undocumented shipping of acids, and the use of pesticides on our food, the improper and excessive discharge of sewage causes chol-

era, hepatitis, and other seriou

OPINION

FLETCHER, Circuit Judge:

Michael H. Weitzenhoff and Thoma
Mariani, who managed the East Hon

era, hepatitis, and other serious illnesses, and can have serious repercussions for public health and welfare.[7]

7 In *Staples*, the Court also noted that the penalty attached to a violation of a criminal statute in the past has been a relevant factor in determining whether the statute defines a public welfare offense. The Court recognized that public welfare offenses originally involved statutes that provided only light penalties such as fines or short jail sentences, *see* —— U.S. at ——, 114 S.Ct. at 1802, but that modern statutes now punish public welfare offenses with much more significant terms of imprisonment. *E.g., International Minerals*, 402 U.S. 558, 91 S.Ct. 1697 (ten years imprisonment if death or bodily injury results from violation); *United States v. Freed*, 401 U.S. 601, 609–10, 91 S.Ct. 1112, 1118–19, 28 L.Ed.2d 356 (1971) (five years imprisonment for possession of unregistered grenade); *Hoflin*, 880 F.2d 1033 (two years imprisonment for certain violations of RCRA). While the *Staples* opinion expresses concern with this evolution of enhanced punishments for public welfare offenses, it refrains from holding that public welfare offenses may not be punished as felonies. *Staples*, —— U.S. at ——, 114 S.Ct. at 1804 (stating that the early cases suggest that public welfare offenses might not extend to felonies, but noting that "[w]e need not adopt such a definitive rule of construction to decide this case").

Except for the above amendments, the petition for rehearing is denied and the petition for rehearing en banc is rejected.

The petition for rehearing en banc was circulated to the full court. An active judge of this court requested a vote as to whether the case should be reheard en banc. Less than the required majority of the non-recused active judges voted to take the case en banc.

No further petitions for rehearing or rehearing en banc will be entertained. The mandate shall issue forthwith.

OPINION

FLETCHER, Circuit Judge:

Michael H. Weitzenhoff and Thomas W. Mariani, who managed the East Honolulu Community Services Sewage Treatment Plant, appeal their convictions for violations of the Clean Water Act ("CWA"), 33 U.S.C. §§ 1251 et seq., contending that 1) the district court misconstrued the word "knowingly" under section 1319(c)(2) of the CWA; 2) the court improperly permitted witnesses to testify as to the meaning of the terms and provisions of the permit issued to the East Honolulu plant; 3) the court erred in concluding that the permit was not unconstitutionally vague; 4) evidence they sought to introduce concerning a regulation proposed by the EPA was improperly excluded; 5) the court erred in refusing their proposed instruction on entrapment by estoppel; and 6) the court should have granted a mistrial due to prosecutorial misconduct. In addition, Mariani contends that his sentence was improperly adjusted upward for obstruction of justice based on his testimony at trial.

We affirm the convictions and sentence.

FACTS AND PROCEDURAL HISTORY

In 1988 and 1989 Weitzenhoff was the manager and Mariani the assistant manager of the East Honolulu Community Services Sewage Treatment Plant ("the plant"), located not far from Sandy Beach, a popular swimming and surfing beach on Oahu. The plant is designed to treat some 4 million gallons of residential wastewater each day by removing the solids and other harmful pollutants from the sewage so that the resulting effluent can be safely discharged into the ocean. The plant operates under a permit issued pursuant to the National Pollution Discharge Elimination System ("NPDES"), which established the limits on the Total Suspended Solids ("TSS") and Biochemical Oxygen Demand ("BOD")—indicators of the solid and organic matter, respectively, in the effluent discharged at Sandy Beach. During the period in question, the permit limited the discharge of both the TSS and BOD to an average of 976 pounds per day over a 30–day period. It also imposed monitoring and sampling requirements on the plant's management.

The sewage treatment process that was overseen by Weitzenhoff and Mariani began

with the removal of large inorganic items such as rags and coffee grounds from the incoming wastewater as it flowed through metal screens and a grit chamber at the head of the plant. The wastewater then entered large tanks known as primary clarifiers, where a portion of the organic solids settled to the bottom of the tanks. The solid material which settled in the primary clarifiers, known as primary sludge, was pumped to separate tanks, known as anaerobic digesters, to be further processed. Those solids that did not settle continued on to aeration basins, which contained microorganisms to feed on and remove the solids and other organic pollutants in the waste stream.

From the aeration basins the mixture flowed into final clarifiers, where the microorganisms settled out, producing a mixture that sank to the bottom of the clarifiers called activated sludge. The clarified stream then passed through a chlorine contact chamber, where the plant's sampling apparatus was, and emptied into the plant's outfall, a long underground pipe which discharged the plant's effluent into the ocean through diffusers 1,100 to 1,400 feet from shore (the "Sandy Beach outfall").

Meanwhile, the activated sludge that had settled in the final clarifiers was pumped from the bottom of the clarifiers. A certain portion was returned to the aeration basins, while the remainder, known as waste activated sludge ("WAS"), was pumped to WAS holding tanks. From the holding tanks, the WAS could either be returned to other phases of the treatment process or hauled away to a different sewage treatment facility.

From March 1987 through March 1988, the excess WAS generated by the plant was hauled away to another treatment plant, the Sand Island Facility. In March 1988, certain improvements were made to the East Honolulu plant and the hauling was discontinued. Within a few weeks, however, the plant began experiencing a buildup of excess WAS. Rather than have the excess WAS hauled away as before, however, Weitzenhoff and Mariani instructed two employees at the plant to dispose of it on a regular basis by pumping it from the storage tanks directly into the outfall, that is, directly into the ocean. The WAS thereby bypassed the plant's effluent sampler so that the samples taken and reported to Hawaii's Department of Health ("DOH") and the EPA did not reflect its discharge.

The evidence produced by the government at trial showed that WAS was discharged directly into the ocean from the plant on about 40 separate occasions from April 1988 to June 1989, resulting in some 436,000 pounds of pollutant solids being discharged into the ocean, and that the discharges violated the plant's 30–day average effluent limit under the permit for most of the months during which they occurred. Most of the WAS discharges occurred during the night, and none was reported to the DOH or EPA. DOH inspectors contacted the plant on several occasions in 1988 in response to complaints by lifeguards at Sandy Beach that sewage was being emitted from the outfall, but Weitzenhoff and Mariani repeatedly denied that there was any problem at the plant. In one letter responding to a DOH inquiry in October 1988, Mariani stated that "the debris that was reported could not have been from the East Honolulu Wastewater Treatment facility, as our records of effluent quality up to this time will substantiate." (U.S. Excerpts of Record ("U.S.E.R.") at 37.) One of the plant employees who participated in the dumping operation testified that Weitzenhoff instructed him not to say anything about the discharges, because if they all stuck together and did not reveal anything, "they [couldn't] do anything to us." (2 R.T. at 66–67.)

Following an FBI investigation, Weitzenhoff and Mariani were charged in a thirty-one-count indictment with conspiracy and substantive violations of the Clean Water Act ("CWA"), 33 U.S.C. §§ 1251 *et seq.* At trial, Weitzenhoff and Mariani admitted having authorized the discharges, but claimed that their actions were justified under their interpretation of the NPDES permit. The jury found them guilty of six of the thirty-one counts.[1]

Weitzenhoff was sentenced to twenty-one months and Mariani thirty-three months im-

1. Weitzenhoff and Mariani were found guilty of count 1, conspiracy to discharge the WAS in violation of the NPDES permit and the Clean Water Act, a violation of 18 U.S.C. § 371; count 9, knowingly discharging WAS in violation of the

prisonment. Each filed a time appeal.

DISCUSSION

A. Intent Requirement

[1] Section 1311(a) of the CW the discharge of pollutants int waters without an NPDES p U.S.C. § 1311(a). Section 1319(c it a felony offense to "knowingl section 1311, 1312, 1316, 13 1321(b)(3), 1328, or 1345 . . ., or a condition or limitation implementi such sections in a permit issued tion 1342."

Prior to trial, the district court "knowingly" in section 1319(c)(2) as only that Weitzenhoff and Mari aware that they were discharging tants in question, not that they k were violating the terms of the s permit. According to appellants, th court erred in its interpretation of t and in instructing the jury that "the ment is not required to prove that th dant knew that his act or omissio unlawful," (14 R.T. at 117),[2] as we rejecting their proposed instruction t the defense that they mistakenly their conduct was authorized by the Apparently, no court of appeals has c ed the issue raised by appellants.

We review a question of statuto struction de novo. *United States v.*

permit between March and October 1988 lation of 33 U.S.C. §§ 1311(a) and 1319(c)(18 U.S.C. § 2; count 10, knowingly ren inaccurate the plant's monitoring method charging WAS beyond the plant's effluen pler during a period in 1988, a violation U.S.C. § 1319(c)(4) and 18 U.S.C. § 2; co knowingly making false representatio monthly discharge monitoring reports file government regulators by failing to repor discharges of WAS, a violation of 33 § 1319(c)(4) and 18 U.S.C. § 2; count 30, ingly discharging WAS in violation of the between January and July 1989, a violation U.S.C. §§ 1311(a) and 1319(c)(2) and 18 § 2; and count 31, knowingly rendering in rate the plant's monitoring method by disc ing WAS beyond the plant's effluent san during a period in 1989, a violation of 33 U § 1319(c)(4) and 18 U.S.C. § 2.

On appeal, most of appellants' energies directed against the section 1319(c)(2) violat

prisonment. Each filed a timely notice of appeal.

DISCUSSION

A. Intent Requirement

[1] Section 1311(a) of the CWA prohibits the discharge of pollutants into navigable waters without an NPDES permit. 33 U.S.C. § 1311(a). Section 1319(c)(2) makes it a felony offense to "knowingly violate[ ] section 1311, 1312, 1316, 1317, 1318, 1321(b)(3), 1328, or 1345 . . ., or any permit condition or limitation implementing any of such sections in a permit issued under section 1342."

Prior to trial, the district court construed "knowingly" in section 1319(c)(2) as requiring only that Weitzenhoff and Mariani were aware that they were discharging the pollutants in question, not that they knew they were violating the terms of the statute or permit. According to appellants, the district court erred in its interpretation of the CWA and in instructing the jury that "the government is not required to prove that the defendant knew that his act or omissions were unlawful," (14 R.T. at 117),[2] as well as in rejecting their proposed instruction based on a defense that they mistakenly believed their conduct was authorized by the permit.[3] Apparently, no court of appeals has confronted the issue raised by appellants.

We review a question of statutory construction de novo. *United States v. Richi-*

son, 901 F.2d 778, 780 (9th Cir.1990). "In construing statutes in a case of first impression, we first look to the language of the controlling statutes, and second to legislative history." *Central Mont. Elec. Power Coop., Inc. v. Administrator of Bonneville Power Admin.*, 840 F.2d 1472, 1477 (9th Cir.1988). Whether a jury instruction misstates elements of a statutory crime is also a question of law reviewed de novo. *United States v. Johnson*, 956 F.2d 197, 199 (9th Cir.1992). If the district court was correct in its interpretation of the statute, then it did not err in giving the instruction it did or refusing to submit appellants' mistake of law defense to the jury.

As with certain other criminal statutes that employ the term "knowingly," it is not apparent from the face of the statute whether "knowingly" means a knowing violation of the law or simply knowing conduct that is violative of the law. We turn, then, to the legislative history of the provision at issue to ascertain what Congress intended.

In 1987, Congress substantially amended the CWA, elevating the penalties for violations of the Act. *See* H.R.Conf.Rep. No. 1004, 99th Cong., 2d Sess. 138 (1986). Increased penalties were considered necessary to deter would-be polluters. S.Rep. No. 50, 99th Cong., 1st Sess. 29 (1985). With the 1987 amendments, Congress substituted "knowingly" for the earlier intent requirement of "willfully" that appeared in the predecessor to section 1319(c)(2).[4] The Senate

mit between March and October 1988, a violation of 33 U.S.C. §§ 1311(a) and 1319(c)(2) and U.S.C. § 2; count 10, knowingly rendering curate the plant's monitoring method by discging WAS beyond the plant's effluent samduring a period in 1988, a violation of 33 § 1319(c)(4) and 18 U.S.C. § 2; count 22, ingly making false representations in ly discharge monitoring reports filed with ument regulators by failing to report their rges of WAS, a violation of 33 U.S.C. (c)(4) and 18 U.S.C. § 2; count 30, knowischarging WAS in violation of the permit n January and July 1989, a violation of 33 §§ 1311(a) and 1319(c)(2) and 18 U.S.C. d count 31, knowingly rendering inaccuplant's monitoring method by dischargAS beyond the plant's effluent sampler period in 1989, a violation of 33 U.S.C. (4) and 18 U.S.C. § 2.

peal, most of appellants' energies are against the section 1319(c)(2) violations, which are premised on the language of the NPDES permit. Section 1319(c)(4) criminalizes the making of false statements in any document or rendering inaccurate of any monitoring device or method required to be maintained under the CWA.

2. Appellants do not challenge the court's giving of the same instruction with respect to the section 1319(c)(4) reporting and monitoring violations charged in the indictment.

3. This defense is mistakenly labeled "mistake of fact" in Weitzenhoff's brief on appeal.

4. At least two courts held that specific intent was not required for conviction under the earlier version of section 1319, which imposed penalties for "willful or negligent" violations of the CWA without distinction. The current statute imposes harsher penalties for knowing violations than for negligent ones. *United States v. Baytank (Houston), Inc.*, 934 F.2d 599, 618–19 & n. 32 (5th

report accompanying the legislation explains that the changes in the penalty provisions were to ensure that "[c]riminal liability shall ... attach to any person who is not in compliance with all applicable Federal, State and local requirements and permits *and causes* a POTW [publicly owned treatment works] to violate any effluent limitation or condition in any permit issued to the treatment works." *Id.* (emphasis added). Similarly, the report accompanying the House version of the bill, which contained parallel provisions for enhancement of penalties, states that the proposed amendments were to "provide penalties for dischargers or individuals who knowingly or negligently violate *or cause the violation of* certain of the Act's requirements." H.R.Rep. No. 189, 99th Cong., 1st Sess. 29–30 (1985) (emphasis added). Because they speak in terms of "causing" a violation, the congressional explanations of the new penalty provisions strongly suggest that criminal sanctions are to be imposed on an individual who knowingly engages in conduct that results in a permit violation, regardless of whether the polluter is cognizant of the requirements or even the existence of the permit.

Our conclusion that "knowingly" does not refer to the legal violation is fortified by decisions interpreting analogous public welfare statutes. The leading case in this area is *United States v. International Minerals & Chem. Corp.*, 402 U.S. 558, 91 S.Ct. 1697, 29 L.Ed.2d 178 (1971). In *International Minerals*, the Supreme Court construed a statute which made it a crime to "knowingly violate[ ] any ... regulation" promulgated by the ICC pursuant to 18 U.S.C. § 834(a), a provision authorizing the agency to formulate regulations for the safe transport of corrosive liquids. *Id.* at 559, 91 S.Ct. at 1699. The Court held that the term "knowingly" referred to the acts made criminal rather than a violation of the regulation, and that "regulation" was a shorthand designation for the specific acts or omissions contemplated by the act. *Id.* at 560–62, 91 S.Ct. at 1699–1700. "[W]here ... dangerous or deleterious devices or products or obnoxious waste materials are involved, the probability of regulation is so great that anyone who is aware that he is in possession of them or dealing with them must be presumed to be aware of the regulation." *Id.* at 565, 91 S.Ct. at 1701–02.

This court followed *International Minerals* in *United States v. Hoflin*, 880 F.2d 1033 (9th Cir.1989), *cert. denied*, 493 U.S. 1083, 110 S.Ct. 1143, 107 L.Ed.2d 1047 (1990), when it held that knowledge of the absence of a permit is not an element of the offense defined by 42 U.S.C. § 6928(d)(2)(A), part of the Resource Conservation and Recovery Act ("RCRA"). *Id.* at 1039. "There can be little question that RCRA's purposes, like those of the Food and Drug Act, '... touch phases of the lives and health of people which, in the circumstances of modern industrialism, are largely beyond self-protection.'" *Id.* at 1038 (quoting *United States v. Dotterweich*, 320 U.S. 277, 280, 64 S.Ct. 134, 136, 88 L.Ed. 48 (1943) (construing Food, Drug and Cosmetic Act)); *see also United States v. Sherbondy*, 865 F.2d 996, 1001–03 (9th Cir.1988) (use of word "knowingly" in 18 U.S.C. §§ 922(g) & 924(A)(1)(B), part of Firearms Owners' Protection Act, does not require proof that defendant knew he was violating law).[5] Other courts have also followed *International Min-*

Cir.1991); *United States v. Frezzo Bros., Inc.*, 546 F.Supp. 713, 720–21 (E.D.Pa.1982), *aff'd*, 703 F.2d 62 (3d Cir.), *cert. denied*, 464 U.S. 829, 104 S.Ct. 106, 78 L.Ed.2d 109 (1983).

5. Weitzenhoff argues that this case is controlled by *United States v. Speach*, 968 F.2d 795, 796–97 (9th Cir.1992), in which we held that 42 U.S.C. § 6928(d)(1), which imposes criminal liability on parties who "knowingly transport[ ] ... hazardous waste ... to a facility which does not have a permit," requires that the transporter know that he acted in violation of the statute. This argument is unavailing because *Speach* recognizes the general rule that public welfare offenses are not to be construed to require proof that the defendant knew he was violating the law in the absence of clear evidence of contrary congressional intent and finds only a narrow exception to this general rule. In *Speach*, we relied on the fact that the defendant was not the permittee but simply the individual who transported waste to the permittee, and, as contrasted to the permittee was not "the person in the best position to know the facility's permit status." *Id.* at 797. Although we considered it unreasonable to put the defendant at risk for failing to ascertain the permit status of the receiving facility, we recognized that such a risk is not unreasonable when the permittee is also the defendant. *Id.* In this case as the permittees, appellants are clearly in the best position to know their own permit status and are among those persons upon whom the *Speach* court would impose liability.

erals by similarly construing the knov requirement in statutes that regulate rious devices or obnoxious waste mat *E.g., United States v. Laughlin*, 10 F.3 965–66 (2d Cir.1993) (§ 6928(d)(2)(RCRA), *cert. denied*, — U.S. —, 114 1649, 128 L.Ed.2d 368 (1994); *United* g *Buckley*, 934 F.2d 84, 88 (6th Cir (pre–1990 version of § 7413(c)(1)(C) Clean Air Act); *United States v. Dee* F.2d 741, 745 (4th Cir.1990), *cert. denie* U.S. 919, 111 S.Ct. 1307, 113 L.Ed.2 (1991) (§ 6928(d)(2)(A) of RCRA); *U States v. Corbin Farm Serv.*, 444 F. 510, 519–20 (E.D.Cal.), *aff'd*, 578 F.2 (9th Cir.1978) (Federal Insecticide, Fung and Rodenticide Act).[6]

s Appellants seek to rely on the Sup Court's decision in *Liparota v. United St* 471 U.S. 419, 105 S.Ct. 2084, 85 L.Ed.2 (1985), to support their alternative readi the intent requirement. *Liparota* conce 7 U.S.C. § 2024(b)(1), which provides anyone who "knowingly uses, transfers, quires, alters, or possesses [food stamp] pons or authorization cards in any ma not authorized by [the statute] or reg tions" is subject to a fine or imprisonm *Id.* at 420, 105 S.Ct. at 2085. The Co noting that the conduct at issue did not stitute a public welfare offense, distinguis the *International Minerals* line of cases held that the government must prove defendant knew that his acquisition or p session of food stamps was in a man unauthorized by statute or regulations. at 432–33, 105 S.Ct. at 2092.

Subsequent to the filing of the origi opinion in this case, the Supreme Court d cided two cases which Weitzenhoff conten call our analysis into question. *See Ratz United States*, — U.S. —, 114 S.C 655, 126 L.Ed.2d 615 (1994); *Staples v. Un ed States*, — U.S. —, 114 S.Ct. 1793, 1 L.Ed.2d 608 (1994). We disagree.

6. Like the court in *International Minerals*, construe the language in § 1319(c)(2)(A) prohi ting knowing violation of "any permit conc tion" as a "shorthand designation for specif acts" that violate the CWA. *See Internation Minerals*, 402 U.S. at 567, 91 S.Ct. at 1703. both § 1319(c)(2)(A) and the statute in questio in *International Minerals*, the penalty provision were drafted in a general fashion to encompass wide variety of possible violations of the Acts an

als by similarly construing the knowledge requirement in statutes that regulate deleterious devices or obnoxious waste materials. *E.g., United States v. Laughlin*, 10 F.3d 961, 965–66 (2d Cir.1993) (§ 6928(d)(2)(A) of RCRA), *cert. denied*, — U.S. —, 114 S.Ct. 1649, 128 L.Ed.2d 368 (1994); *United States v. Buckley*, 934 F.2d 84, 88 (6th Cir.1991) (pre–1990 version of § 7413(c)(1)(C) of the Clean Air Act); *United States v. Dee*, 912 F.2d 741, 745 (4th Cir.1990), *cert. denied*, 499 U.S. 919, 111 S.Ct. 1307, 113 L.Ed.2d 242 (1991) (§ 6928(d)(2)(A) of RCRA); *United States v. Corbin Farm Serv.*, 444 F.Supp. 510, 519–20 (E.D.Cal.), *aff'd*, 578 F.2d 259 (9th Cir.1978) (Federal Insecticide, Fungicide and Rodenticide Act).[6]

Appellants seek to rely on the Supreme Court's decision in *Liparota v. United States*, 471 U.S. 419, 105 S.Ct. 2084, 85 L.Ed.2d 434 (1985), to support their alternative reading of the intent requirement. *Liparota* concerned 7 U.S.C. § 2024(b)(1), which provides that one who "knowingly uses, transfers, acquires, alters, or possesses [food stamp] coupons or authorization cards in any manner not authorized by [the statute] or regulations" is subject to a fine or imprisonment. 471 U.S. at 420, 105 S.Ct. at 2085. The Court, finding that the conduct at issue did not constitute a public welfare offense, distinguished *International Minerals* line of cases and held that the government must prove the defendant knew that his acquisition or possession of food stamps was in a manner unauthorized by statute or regulations. *Id.* at 432–33, 105 S.Ct. at 2092.

Subsequent to the filing of the original opinion in this case, the Supreme Court decided two cases which Weitzenhoff contends call our analysis into question. *See Ratzlaf v. United States*, — U.S. —, 114 S.Ct. 655, 126 L.Ed.2d 615 (1994); *Staples v. United States*, — U.S. —, 114 S.Ct. 1793, 128 L.Ed.2d 608 (1994). We disagree.

The statute in *Ratzlaf* does not deal with a public welfare offense, but rather with violations of the banking statutes. The Court construed the term "willfully" in the anti-structuring provisions of the Bank Secrecy Act to require both that the defendant knew he was structuring transactions to avoid reporting requirements and that he knew his acts were unlawful. The Court recognized that the money structuring provisions are not directed at conduct which a reasonable person necessarily should know is subject to strict public regulation and that the structuring offense applied to all persons with more than $10,000, many of whom could be engaged in structuring for innocent reasons. *Ratzlaf*, — U.S. at ——, 114 S.Ct. at 660–62. In contrast, parties such as Weitzenhoff are closely regulated and are discharging waste materials that affect public health. The *International Minerals* rationale requires that we impute to these parties knowledge of their operating permit. This was recognized by the Court in *Staples*.

The specific holding in *Staples* was that the government is required to prove that a defendant charged with possession of a machine gun knew that the weapon he possessed had the characteristics that brought it within the statutory definition of a machine-gun. But the Court took pains to contrast the gun laws to other regulatory regimes, specifically those regulations that govern the handling of "obnoxious waste materials." *See Staples*, — U.S. at —, 114 S.Ct. at 1798. It noted that the mere innocent ownership of guns is not a public welfare offense. *Id.* at —, 114 S.Ct. at 1804. The Court focussed on the long tradition of widespread gun ownership in this country and, recognizing that approximately 50% of American homes contain a firearm, *id.* at —, 114 S.Ct. at 1801, acknowledged that mere ownership of a gun is not sufficient to place

[6] the court in *International Minerals*, we ue the language in § 1319(c)(2)(A) prohibnowing violation of "any permit condias a "shorthand designation for specific that violate the CWA. *See International ls*, 402 U.S. at 567, 91 S.Ct. at 1703. In 1319(c)(2)(A) and the statute in question *national Minerals*, the penalty provisions rafted in a general fashion to encompass a riety of possible violations of the Acts and the word "knowingly" is used to reflect a requirement that the government prove general intent in order to establish a violation. *See also Buckley*, 934 F.2d at 88 ("knowingly ... violates section 7411(e) ..."); *Sherbondy*, 865 F.2d at 1002 ("knowingly violates subsection ... (g) ... of section 922"); *Corbin Farm Serv.*, 444 F.Supp. at 518 ("knowingly violates any provision of this subchapter").

people on notice that the act of owning an unregistered firearm is not innocent under the law.

Staples thus explicitly contrasted the mere possession of guns to public welfare offenses, which include statutes that regulate " 'dangerous or deleterious devices or products or obnoxious waste materials,' " *id.* at ——, 114 S.Ct. at 1800, and confirmed the continued vitality of statutes covering public welfare offenses, which "regulate potentially harmful or injurious items" and place a defendant on notice that he is dealing with a device or a substance "that places him in 'responsible relation to a public danger.' " *Id.* "[I]n such cases Congress intended to place the burden on the defendant to ascertain at his peril whether [his conduct] comes within the inhibition of the statute." *Id.* at ——, 114 S.Ct. at 1798 (citations and internal quotations omitted).

Unlike "[g]uns [which] in general are not 'deleterious devices or products or obnoxious waste materials,' *International Minerals, supra* [402 U.S.], at 565 [91 S.Ct. at 1702], that put their owners on notice that they stand 'in responsible relation to a public danger[,]' *Dotterweich*, 320 U.S. at 281 64 S.Ct. at 136]," *Staples*, — U.S. at ——, 114 S.Ct. at 1800, the dumping of sewage and other pollutants into our nation's waters is precisely the type of activity that puts the discharger on notice that his acts may pose a public danger. Like other public welfare offenses that regulate the discharge of pollutants into the air, the disposal of hazardous wastes, the undocumented shipping of acids, and the use of pesticides on our food, the improper and excessive discharge of sewage causes cholera, hepatitis, and other serious illnesses, and can have serious repercussions for public health and welfare.[7]

[2] The criminal provisions of the CWA are clearly designed to protect the public at large from the potentially dire consequences of water pollution, *see* S.Rep. No. 99–50, 99th Cong., 1st Sess. 29 (1985), and as such fall within the category of public welfare legislation. *International Minerals* rather than *Liparota* controls the case at hand. The government did not need to prove that Weitzenhoff and Mariani knew that their acts violated the permit or the CWA.

B. Expert Testimony

[3] The essence of Weitzenhoff and Mariani's defense was that their clandestine dumping of thousands of gallons of toxic sludge into the ocean at Sandy Beach was an effort to restore the plant's biological balance so as to avoid a complete plant shutdown and avert environmental disaster. They claim that the discharges of WAS were fully consistent with the NPDES permit. The central issue at trial, therefore, was the meaning of the permit.

In addition to establishing TSS and BOD limits for the effluent discharged at Sandy Beach and imposing monitoring requirements, the permit issued to the East Honolulu plant provided that substances removed from the wastewater could only be disposed of "in a manner such as to prevent any pollutant from such materials from entering navigable water." (Mariani Excerpts of Record ("M.E.R.") at 68) (NPDES permit). "Removed substances," according to the permit, include "[s]olids, sludges, filter backwash, or other pollutants removed in the course of treatment or control of wastewaters." (*Id.*)

The permit also regulates "bypass," defined as "the intentional diversion of waste

7. In *Staples*, the Court also noted that the penalty attached to a violation of a criminal statute in the past has been a relevant factor in determining whether the statute defines a public welfare offense. The Court recognized that public welfare offenses originally involved statutes that provided only light penalties such as fines or short jail sentences, *see* — U.S. at ——, 114 S.Ct. at 1802, but that modern statutes now punish public welfare offenses with much more significant terms of imprisonment. *E.g., International Minerals*, 402 U.S. 558, 91 S.Ct. 1697 (ten years imprisonment if death or bodily injury results from violation); *United States v. Freed*, 401 U.S. 601, 609–10, 91 S.Ct. 1112, 1118–1119, 28 L.Ed.2d 356 (1971) (five years imprisonment for possession of unregistered grenade); *Hoflin*, 880 F.2d 1033 (two years imprisonment for certain violations of RCRA). While the *Staples* opinion expresses concern with this evolution of enhanced punishments for public welfare offenses, it refrains from holding that public welfare offenses may not be punished as felonies. *Staples*, — U.S. at ——, 114 S.Ct. at 1804 (stating that the early cases suggest that public welfare offenses might not extend to felonies, but noting that "[w]e need not adopt such a definitive rule of construction to decide this case").

streams from any portion of facility." (*Id.* at 66.) Under bypass is generally prohibited "prevent loss of life, personal i were property damage" and in th feasible alternatives. (*Id.*) The vides, however, that where it w effluent limitations to be exce permittee may allow any bypass only if it ... is for essential ma assure efficient operation." (*Id.*

Weitzenhoff and Mariani ass discharges were permissible byp claim that WAS is not a "re stance," that the discharges th were for the purpose of "essen nance," and that, because they a considered "bypasses," the disch not required to be reflected in the reports submitted to government

The trial judge—concerned tha construe the permit, "we [would case.... [w]e would just have a h (4 R.T. at 168)—treated the inter the permit as a question for the sistent with this approach, the co ted witnesses familiar with the management field to testify about technical terms within and oblig posed by the permit. Since both sented witnesses on these issues, t tions of the permit were, as might ed, contradictory. For example, o ment witness testified that a di WAS from a WAS holding tank to would constitute the disposal of a substance in violation of the permit was contradicted by a defense wit testified that WAS was not a "rem stance" and therefore did not come prohibition. While the same go witness defined "essential mainter pertaining only to the maintenan plant's "physical facilities," the de pert stated that the term could maintenance of the plant's biologica as well as its physical facilities. did not resolve these conflicts in charge but instead instructed the tha

We note that the defense contribut error by insisting that the court not def the permit's terms for the jury in its c merely instruct the jury to "follow meaning of the language" in the

streams from any portion of a treatment facility." (*Id.* at 66.) Under the permit, bypass is generally prohibited, except to "prevent loss of life, personal injury, or severe property damage" and in the absence of feasible alternatives. (*Id.*) The permit provides, however, that where it will not cause effluent limitations to be exceeded, "[t]he permittee may allow any bypass to occur, but only if it ... is for essential maintenance to assure efficient operation." (*Id.*)

Weitzenhoff and Mariani assert that the discharges were permissible bypasses. They claim that WAS is not a "removed substance," that the discharges they oversaw were for the purpose of "essential maintenance," and that, because they are properly considered "bypasses," the discharges were not required to be reflected in the monitoring reports submitted to government authorities.

The trial judge—concerned that were he to construe the permit, "we [wouldn't] have a case.... [w]e would just have a bench trial," (4 R.T. at 168)—treated the interpretation of the permit as a question for the jury. Consistent with this approach, the court permitted witnesses familiar with the wastewater management field to testify about the various technical terms within and obligations imposed by the permit. Since both sides presented witnesses on these issues, the explications of the permit were, as might be expected, contradictory. For example, one government witness testified that a discharge of WAS from a WAS holding tank to an outfall would constitute the disposal of a removed substance in violation of the permit. But he was contradicted by a defense witness who testified that WAS was not a "removed substance" and therefore did not come under the prohibition. While the same government witness defined "essential maintenance" as pertaining only to the maintenance of the plant's "physical facilities," the defense expert stated that the term could apply to maintenance of the plant's biological process as well as its physical facilities. The court did not resolve these conflicts in its jury charge but instead instructed the jury to "construe" the permit based on "the plain meaning of the language therein" and the testimony of the expert and other witnesses. (14 R.T. at 122.)

Weitzenhoff and Mariani argue that the testimony defining key terms of the permit and explaining its prohibitions amounted to an impermissible delegation of the district judge's duties because, in effect, it was witnesses who instructed the jury on the law rather than the judge. We agree with appellants in this assessment.

[4, 5] The admission of expert testimony is within the discretion of the trial court and reversible only for abuse of discretion or manifest error. *United States v. Arvin*, 900 F.2d 1385, 1388–89 (9th Cir.1990), *cert. denied*, 498 U.S. 1024, 111 S.Ct. 672, 112 L.Ed.2d 664 (1991). Expert testimony is properly admissible when it serves to assist the trier of fact to understand the evidence or determine a fact in issue. *United States v. Brodie*, 858 F.2d 492, 496 (9th Cir.1988). It is well settled, however, that the judge instructs the jury in the law. *Id.* "Resolving doubtful questions of law is the distinct and exclusive province of the trial judge." *Id.* at 497.

[6] Here the district court did not decide the issues of law raised by the parties. Instead of applying the court's interpretation of the law to the facts, then, the jurors applied their own rendition(s) of the law, presumably derived to some degree from the conflicting expert testimony, to the facts. Although the testimony of the witnesses regarding technical terms in the permit might have been permissible had the judge proceeded properly to instruct the jury, *see* Fed.R.Evid. 702 (expert testimony admissible if it will assist the trier of fact), 704 (opinion on ultimate issue to be decided by factfinder not necessarily objectionable), in this case it compounded the error of consigning the interpretation of the law to the jury. The court's admission of expert testimony on contested issues of law in lieu of instructing the jury was manifestly erroneous.[8]

8. We note that the defense contributed to this error by insisting that the court not define any of the permit's terms for the jury in its charge, but merely instruct the jury to "follow the *plain meaning* of the language" in the permit. (U.S.E.R. at 74.) The defendants, however, had initially objected to the admission of any expert testimony concerning permit terms. After the court ruled such testimony admissible, defendants presented their own expert testimony to

[7, 8] Nonetheless, we hold that the error was harmless because, under a proper interpretation of the permit, the discharges admitted to by Weitzenhoff and Mariani necessarily violated the permit.[9] Since construction of the permit is a matter of law, we are in a position to interpret the permit provisions at issue. *Hemlani v. Guerrero*, 902 F.2d 1412, 1415 (9th Cir.1990) ("The interpretation of this statute is purely a question of law, the issue has been fully briefed, and we are in as good a position as the [district] court to decide if the statute means what it says."). We note that in deciding what the provisions mean, we need not choose between the conflicting expert opinions; the critical terms are either defined in the permit itself or their meaning is apparent from EPA's commentary on its permitting guidelines. As we are able to accomplish the task of permit interpretation without turning to the experts, we are not hampered by questions of witness credibility, which of course could not be resolved by us on appeal. *United States v. Gordon*, 844 F.2d 1397, 1405 (9th Cir.1988) ("Questions of credibility are for the jury to decide and are generally immune from appellate review.")

[9] We begin by observing that, notwithstanding the "expert" testimony to the contrary, the excess WAS that was separated out from the plant's treatment process to be stored and eventually disposed of clearly falls within the permit's definition of a "removed substance" because it was a "sludge[ ] ... removed in the course of treatment or control of wastewaters." (M.E.R. at 68.) As such, it could not be discharged into the ocean unless the discharge constituted a permissible bypass of the treatment system.

[10, 11] Even assuming that the oceanic dumping of WAS at Sandy Beach did not violate the East Honolulu facility's effluent standards,[10] a doubtful proposition, we hold that the discharges were not permissible bypasses because they were not for "essential maintenance to assure efficient operation." (*Id.* at 66.) An NPDES permit must conform to EPA regulations. *See* 40 C.F.R. § 122.1 *et seq.* (permitting requirements). In establishing the guideline prohibiting bypass except where necessary for essential maintenance, 40 C.F.R. § 122.41(m), the EPA explained that "[g]enerally, maintenance is that which is necessary to maintain the performance, removal efficiency and effluent quality of the *pollution control equipment*. However, for the purposes of this section, it is necessary to distinguish between maintenance that is 'essential' and that which is routine." 49 Fed.Reg. 38,037 (1984) (emphasis added). The discussion in the Federal Register focuses on necessary repairs and upkeep of plant equipment and emphasizes that if it is feasible to perform the maintenance "with no loss in treatment plant performance," the maintenance is not considered "essential" for the purposes of the bypass exception. *Id.* There is no indication that the EPA considered anything other than unavoidable measures to ensure the continuing operation of plant equipment to be "essential maintenance."

[12] The EPA's interpretation of its bypass regulation is entitled to considerable weight. *Force v. Director, Office of Workers' Compensation Programs*, 938 F.2d 981, 983 (9th Cir.1991); *Natural Resources Defense Council, Inc. v. U.S. Environmental Protection Agency*, 822 F.2d 104, 122 (D.C.Cir.1987) (upholding bypass provision). We therefore reject appellants' interpretation of the bypass exception as authorizing their wholesale dumping of WAS into the ocean and circumvention of the plant's monitoring apparatus. The discharges they directed were not for the purpose of maintaining plant equipment. Nor were they essential, for the record establishes that a ready alternative existed.

counter that of the government witnesses. Under these circumstances, we decline to hold that appellants invited the error.

9. The government presented evidence and arguments indicating that the permit was violated in more than one way. There was no special verdict in the case, however, and consequently, there is no means for us to ascertain which theory or theories the jury adopted. Even though the government presented compelling evidence that the discharges caused the plant's effluent limitations to be exceeded, we assume for the purposes of this analysis that the jury rejected this evidence, as it was entitled to, and rely only on appellants' admissions to support our conclusion that the permit was violated.

10. *See supra* note 6.

Weitzenhoff and Mariani could have excess WAS hauled away.

Finally, we note that appellants' construe the permit as allowing charges turns the entire statute on its head. In keeping with the CWA, the EPA's bypass rule was to ensure "that the applicable technology, implemented for the purpose achieving pollution reduction ... the 'best technology,' be ... signed." *Natural Resources Council*, 822 F.2d at 124. To endorse interpretation would be to grant ... ers' carte blanche to pollute ... slightest managerial inconvenience itself. We are certain that ... Congress intended.

C. Vagueness

[13] Weitzenhoff and Mariani ... that, especially in the absence ... ment that they knew they were ... law, the NPDES permit is unconstitutionally vague. 'eitzenhoff and Mariani could have had the ress WAS hauled away.

Finally, we note that appellants' attempt to construe the permit as allowing these discharges turns the entire statutory scheme on its head. In keeping with the goal of the CWA, the EPA's bypass rule was devised to ensure "that the applicable treatment technology, implemented for the purpose of achieving pollution reduction equivalent to the 'best technology,' be operated as designed." *Natural Resources Defense Coun-*, 822 F.2d at 124. To endorse appellants' terpretation would be to grant permit holders carte blanche to pollute whenever the ightest managerial inconvenience presented self. We are certain that this is not what ongress intended.

Vagueness

[13] Weitzenhoff and Mariani contend at, especially in the absence of a requirent that they knew they were violating the , the NPDES permit is unconstitutionally ue. They assert that key provisions of permit, in particular those that were ated at trial, have no established mean- . The district court declined to rule on ndants' vagueness claim at a pretrial g but denied a motion for acquittal d on the ambiguity of the permit after close of the government's case.

[14, 15] Whether the permit was unconitionally vague is a question of law which review de novo. *United States v. Chris-*, 700 F.2d 1253, 1258 (9th Cir.), *cert.* ed, 461 U.S. 960, 103 S.Ct. 2436, 77 2d 1321 (1983). "A defendant is ed to have fair notice of an offense if a nable person of ordinary intelligence understand that his or her conduct is bited by the law in question." *United v. Fitzgerald*, 882 F.2d 397, 398 (9th 89). In evaluating a question of vague- we ordinarily look to the common unnding of the terms of a statute. *Id.* ver, if the statutory prohibition "inconduct of a select group of persons specialized knowledge, and the chal- phraseology is indigenous to the idiom class, the standard is lowered and a may uphold a statute which 'uses words ases having a technical or other special g, well enough known to enable those within its reach to correctly apply them.'" *Precious Metals Assocs., Inc. v. Commodity Futures Trading Commission*, 620 F.2d 900, 907 (1st Cir.1980) (quoting *Connally v. General Constr. Co.*, 269 U.S. 385, 391, 46 S.Ct. 126, 127, 70 L.Ed. 322 (1926)).

Pursuant to the preceding analysis of the permit's terms, which, as we have demonstrated, have meaning in the context of the EPA regulatory scheme, we have no trouble in upholding the permit against appellants' vagueness challenge. Weitzenhoff and Mariani were knowledgeable in the wastewater field and can be expected to have understood what the permit meant. In particular, they should have known that it did not give them license to dump thousands of gallons of partially treated sewage into the ocean on a regular basis.

We are further persuaded that appellants had adequate notice of the illegality of their dumping by the considerable pains they took to conceal their activities. The discharges were effected mainly at night; plant personnel were not to discuss them; and Weitzenhoff and Mariani consistently repeatedly denied the illicit operation when questioned by health authorities. These are not the ways of conscientious managers seeking to safeguard the environment.

Although we affirm the convictions on the basis of Weitzenhoff and Mariani's factual admissions and our interpretation of the permit rather than attempting to divine the facts upon which the jury based its verdict, we nonetheless address the additional concerns raised by appellants relating to the presentation of the case to the jury. We do this because had the court erroneously deprived the jury of an opportunity to acquit or wrongly refused to grant a mistrial, we might not be in a position to affirm. That is, had the jury acquitted or a mistrial been declared, there would be no convictions to uphold.

D. Exclusion of Evide

[16] At trial, defenc duce an excerpt from describing a regulatio the EPA but never ad 49 Federal Register

lation would have permitted bypass of effluent from a wastewater treatment facility

> where the resultant effluent is in compliance with permit limitations. The proposal would allow any bypass which does not cause a violation of permit limitations or other permit conditions. However, to ensure that permit limitations are, in fact, not exceeded during the bypass, the proposed amendment would require permittees to monitor all affected discharge points at the time of any bypass.

(Weitzenhoff Excerpts of Record at 74.) Weitzenhoff and Mariani claim this should have been admitted as evidence because, combined with the fact that it was never adopted, it suggests that the EPA did not require them to monitor the discharges they characterize as bypasses. The district court held the excerpt inadmissible since the regulation was never adopted, the language cited by the defense was of dubious significance, and such "evidence" would confuse the jury.

We review the exclusion of the evidence for abuse of discretion. *United States v. Kessi*, 868 F.2d 1097, 1107 (9th Cir.1989); *United States v. Soulard*, 730 F.2d 1292, 1296 (9th Cir.1984). Although the explanation of the proposed regulation might properly have been considered (or disregarded) by the court in ruling on the legal issues in the case, it was not relevant to the jury's determination of the facts. Thus, notwithstanding the fact that the jury was impermissibly assigned the task of interpreting the permit, the district court did not abuse its discretion in excluding the Federal Register excerpt from the jury's consideration.

E. Entrapment by Estoppel Defense

[17] The district court ruled after the close of evidence that it would not give Weitzenhoff and Mariani's proposed jury instruction on the elements of an entrapment by estoppel defense because the defense was not warranted by the law or the facts of the case. Appellants claim the court's refusal to give the instruction warrants reversal.

"A defendant is entitled to an instruction covering a theory of defense if it has a basis in law and there is some foundation for it in the evidence." *United States v. Ibarra-Alcarez*, 830 F.2d 968, 973 (9th Cir.1987). A trial court's determination that the evidence was insufficient to justify the giving of an instruction on a theory of defense is a question of law which we review de novo. *Id.*

[18, 19] Entrapment by estoppel applies when an authorized government official tells the defendant that certain conduct is legal and the defendant believes the official. *United States v. Brebner*, 951 F.2d 1017, 1024 (9th Cir.1991). To invoke the entrapment by estoppel defense, the defendant must show that he relied on the official's statement and that his reliance was reasonable in that a person sincerely desirous of obeying the law would have accepted the information as true and would not have been put on notice to make further inquiries. *United States v. Lansing*, 424 F.2d 225, 227 (9th Cir.1970).

Weitzenhoff and Mariani contend that the jury should have been permitted to consider whether they were entrapped by the government, for two reasons: because they were entitled to rely upon the "plain language" of the permit as a "comprehensive official statement of the law"—at the same time, of course, claiming that they abided by the permit; and because of the fact that regulatory authorities had previously permitted them to haul excess WAS to the Sand Island waste treatment facility where it only underwent a primary treatment process before being discharged into the ocean. According to Weitzenhoff and Mariani, the authorization to haul the WAS to the another facility that lacked a secondary treatment process somehow implies that it was acceptable to discharge the WAS from the East Honolulu plant without additional treatment.

The first of appellants' theories is flawed because it merely begs the critical inquiry in this case, that is, the correct interpretation of the permit. It would have been entirely superfluous to have the jury decide whether appellants properly relied on the permit since no one disputes that they were bound by it.

The second asserted rationale is a tortured one that does not make out a claim of entrapment by estoppel. Even if disposing of the WAS by hauling it to the Sand Island facility could somehow plausibly be equated with dumping it into the Sandy Beach outfall

than the one at Sandy Beach, which

appellants do not point to a statement on the part of a government official upon which they relied in reaching this conclusion. Moreover, the fact that it was lawful to discharge WAS at Sand Island without secondary treatment has no bearing on the discharge limitations at the East Honolulu plant, which operated under its own permit.[11] If Weitzenhoff and Mariani had had a genuine desire to obey the law, they would have sought advice from the appropriate authorities as to how properly to dispose of the excess WAS.

F. Prosecutorial Misconduct

[20–22] Weitzenhoff and Mariani object to what they characterize as the prosecutor's deliberate attempts to elicit irrelevant and inflammatory testimony regarding the potential health effects of the WAS discharges despite the trial court's ruling limiting such testimony. "A claim of prosecutorial misconduct must be viewed in the entire context of the trial." *United States v. Christophe*, 833 F.2d 1296, 1300 (9th Cir.1987). Reversal is justified only if the alleged misconduct materially affected the verdict or deprived the defendant of a fair trial. *Id.* at 1301; *see also United States v. Simtob*, 901 F.2d 799, 806 (9th Cir.1990) ("[P]rosecutorial misconduct invites reversal if it appears more probable than not that the alleged misconduct affected the jury's verdict."). Depending upon the circumstances, a prompt and effective admonishment of counsel or curative instruction from the trial judge may effectively "neutralize the damage." *Simtob*, 901 F.2d at 806.

During the first part of the trial, the government introduced evidence about the health concerns associated with sewage through three witnesses who testified about the waste treatment process and its goal of ridding wastewater of disease-causing microorganisms to the extent possible. One of these witnesses, Ken Greenberg, noted that the discharge from a treatment facility could have adverse effects on the receiving waters and harm swimmers. Defendants failed to object to any of this testimony.

Later on in the trial, however, when the government asked a question of another witness concerning the length of the outfall at Sandy Beach, defendants objected on relevance grounds. The government argued that the testimony was relevant to show defendants' motive in concealing their activities. The court, while expressing initial concern about the lack of relevance and prejudicial effects of injecting "gruesome" testimony about "viruses floating in the water," ruled that testimony regarding the potential health risks of discharging WAS into the water could come in, so long as the prosecutor stayed away from detailed accounts of "viruses and AIDS and all other kinds of stuff." (8 R.T. at 36.)

Edmund Pestana, a lifeguard at Sandy Beach, subsequently testified for the government about the plumes of brown water he had observed coming out of the outfall. The prosecutor asked whether Pestana was aware of people getting sick at the beach, to which the lifeguard answered "yes." The court sustained defendants' objection and instructed the jury to disregard the response. Later, Pestana was asked what he noticed during an incident in which he had windsurfed through discolored water. Pestana stated that he knew he was going through sewage water: "It smelled of it, and it looked of it, and it's nothing less than what your imagination can conjure up. I was scared to fall off my board and into it and get my face wet or anything like that in my mouth or my ears or my nose." (8 R.T. at 126.) The judge ordered the quoted testimony stricken and instructed the jury to disregard it.

At the conclusion of Pestana's testimony, defendants moved for a mistrial, alleging that the prosecutor had deliberately violated the court's ruling regarding the limitations on such testimony. The court denied the motion, noting its curative instructions and the fact that it was common knowledge that WAS, if ingested, would pose a health risk.

Appellants also point to the prosecutor's cross-examination of their wastewater expert regarding the length of the Sandy Beach versus the Sand Island outfall. In the course of this exchange, the court sustained the

11. The government points out that the outfall for the Sand Island facility is many times longer than the one at Sandy Beach, which accounts for the stricter waste handling requirements imposed on the East Honolulu plant.

defendants' objections to two questions regarding whether there were many swimmers near these outfalls.

Finally, in his closing argument, the prosecutor drew attention to the public health hazard engendered by defendants' activities, stating that Weitzenhoff and Mariani "placed at risk the hundreds of people, surfers, body boarders, swimmers, divers, fishermen, people who use Sandy Beach every day." (14 R.T. at 9–10.) The court did not respond to these remarks as defendants did not object to them.

Although the challenged testimony and prosecutorial remarks were of questionable relevance and indeed conveyed repugnant images, considered in the context of the entire proceeding, we do not believe they could have materially affected the verdict or rendered the trial unfair. A substantial amount of testimony regarding the health risks associated with WAS—indeed, the most specific references to viruses, bacteria, and so forth—came in without objection prior to the testimony appellants claim was so prejudicial. As for the most exceptionable testimony, that of the lifeguard, the court sustained objections and issued prompt curative instructions.

[23] Most significant to our analysis, though, is that throughout the trial, Weitzenhoff and Mariani attempted to portray their discharging of WAS into the ocean as a responsible tactic to forestall environmental disaster, thus putting the safety of the public at issue. Both defendants made this point in their opening statements. Later on, Mariani testified that in ordering the discharges, the public health was "first and foremost" in his mind. (11 R.T. at 23, 25.) Against this backdrop, the prosecutor's few additional questions touching upon the health issue and the comments in his summation cannot be considered misconduct.

G. Upward Adjustment of Mariani's Sentence

[24] Mariani contends that the court's two-point upward adjustment of his offense level pursuant to U.S.S.G. § 3C1.1 for obstruction of justice based on the court's finding that he perjured himself was not warranted by his conduct at trial and represents an unconstitutional interference with his right to testify.[12] We review the court's interpretation of the sentencing guidelines de novo, and the factual findings underlying the upward adjustment for clear error. *United States v. McAninch*, 994 F.2d 1380, 1383 (9th Cir.1993).

In sentencing Mariani, the court expressly adopted the determination of the presentence report that Mariani had lied in his testimony at trial. The presentence report notes, with support in the record, that Mariani perjured himself on several occasions when he stated that he believed that the discharges of WAS did not violate the permit. The record shows, for example, that at trial, Mariani consciously underrepresented the size of a WAS holding tank, thus underrepresenting the potential size and impact of the discharges from it. His testimony that he believed that his activities were within the scope of the permit is belied by his efforts to conceal them. The district court's findings in support of the upward adjustment were not clearly erroneous.

[25] Mariani's constitutional challenge to the obstruction of justice enhancement is unavailing. The Supreme Court recently rejected the contention, as had this court, that a sentencing increase based on false testimony unconstitutionally burdens a defendant's right to testify. *United States v. Dunnigan*, — U.S. —, —, 113 S.Ct. 1111, 1117, 122 L.Ed.2d 445 (1993); *see also United States v. Torres–Rodriguez*, 930 F.2d 1375, 1389–90 (9th Cir.1991); *United States v. Barbosa*, 906 F.2d 1366, 1369–40 (9th Cir.), *cert. denied*, 498 U.S. 961, 111 S.Ct. 394, 112 L.Ed.2d 403 (1990). "[A] defendant's right to testify does not include a right to commit perjury." *Dunnigan*, — U.S. at —, 113 S.Ct. at 1117. Mariani's sentence was justly enhanced.

We **AFFIRM** both the convictions and Mariani's sentence.

12. Weitzenhoff elected not to testify at trial.

DISSENTING OPINION FROM ORDER REJECTING SUGGESTION FOR REHEARING EN BANC

Aug. 8, 1994

KLEINFELD, Circuit Judge, with whom Circuit Judges REINHARDT, KOZINSKI, TROTT, and T.G. NELSON join, dissenting from the order rejecting the suggestion for rehearing en banc.

I respectfully dissent from our decision to reject the suggestion for rehearing en banc.

Most of us vote against most such petitions and suggestions even when we think the panel decision is mistaken. We do so because federal courts of appeals decide cases in three judge panels. En banc review is extraordinary, and is generally reserved for conflicting precedent within the circuit which makes application of the law by district courts unduly difficult, and egregious errors in important cases. In my view, this is a case of exceptional importance, for two reasons. First, it impairs a fundamental purpose of criminal justice, sorting out the innocent from the guilty before imposing punishment. Second, it does so in the context of the Clean Water Act. This statute has tremendous sweep. Most statutes permit anything except what is prohibited, but this one prohibits all regulated conduct involving waters and wetlands except what is permitted. 33 U.S.C. § 1311(a); *United States v. Riverside Bayview Homes, Inc.*, 474 U.S. 121, 106 S.Ct. 455, 88 L.Ed.2d 419 (1985). Much more ordinary, innocent, productive activity is regulated by this law than people not versed in environmental law might imagine.

The harm our mistaken decision may do is not necessarily limited to Clean Water Act cases. Dilution of the traditional requirement of a criminal state of mind, and application of the criminal law to innocent conduct, reduces the moral authority of our system of criminal law. If we use prison to achieve social goals regardless of the moral innocence of those we incarcerate, then imprisonment loses its moral opprobrium and our criminal law becomes morally arbitrary.

We have now made felons of a large number of innocent people doing socially valuable work. They are innocent, because the one thing which makes their conduct felonious is something they do not know. It is we, and not Congress, who have made them felons. The statute, read in an ordinary way, does not. If we are fortunate, sewer plant workers around the circuit will continue to perform their vitally important work despite our decision. If they knew they risk three years in prison, some might decide that their pay, though sufficient inducement for processing the public's wastes, is not enough to risk prison for doing their jobs. We have decided that they should go to prison if, unbeknownst to them, their plant discharges exceed permit limits. Likewise for power plant operators who discharge warm water into rivers near their plants, and for all sorts of other dischargers in public and private life. If they know they are discharging into water, have a permit for the discharges, think they are conforming to their permits, but unknowingly violate their permit conditions, into prison they go with the violent criminals.

The statute does not say that. The statute at issue makes it a felony, subject to three years of imprisonment, to "knowingly violate[ ] ... any permit condition or limitation." 33 U.S.C. § 1319(c)(2)(A).[1] Here is the statutory scheme, with the portion applied in *Weitzenhoff* in boldface:

"Any person who ...

"negligently violates [various sections of the Clean Water Act] ... or any permit condition or limitation ... [commits a misdemeanor]. 33 U.S.C. § 1319(c)(1)(A);

"negligently introduces into a sewer system or a publicly owned treatment works any pollutant or hazardous substance which such person knew or reasonably should have known could cause personal injury or property damage or ... which causes such treatment works to violate any effluent limitation or condition in any permit ... [commits a misdemeanor]. 33 U.S.C. § 1319(c)(1)(B);

"knowingly violates [various sections of the Clean Water Act] ... or any permit condition or limitation ... [commits a felony]. 33 U.S.C. § 1319(c)(2)(A);

[1] 1987 amendment raised the crime from a misdemeanor to a felony, and changed the intent requirement from "willfully" to "knowir Pub.L. No. 100-4, § 312, 101 Stat. 42 (1

"knowingly introduces into a sewer system or into a publicly owned treatment works any pollutant or hazardous substance which such person knew or reasonably should have known could cause personal injury or property damage or ... which causes such treatment works to violate any effluent limitation or condition in a permit ... [commits a felony]. 33 U.S.C. § 1319(c)(2)(B);

"knowingly violates [various sections of the Clean Water Act] ... or any permit condition or limitation ... and who knows at that time that he thereby places another person in imminent danger of death or serious bodily injury ... [commits a felony punishable by up to 15 years imprisonment]. 33 U.S.C. § 1319(c)(3)(A).

In this case, the defendants, sewage plant operators, had a permit to discharge sewage into the ocean, but exceeded the permit limitations. The legal issue for the panel was what knowledge would turn innocently or negligently violating a permit into "knowingly" violating a permit. Were the plant operators felons if they knew they were discharging sewage, but did not know that they were violating their permit? Or did they also have to know they were violating their permit? Ordinary English grammar, common sense, and precedent, all compel the latter construction.

As the panel opinion states the facts, these two defendants were literally "midnight dumpers." They managed a sewer plant and told their employees to dump 436,000 pounds of sewage into the ocean, mostly at night, fouling a nearby beach. Their conduct, as set out in the panel opinion, suggests that they must have known they were violating their National Pollution Discharge Elimination System (NPDES) permit. *United States v. Weitzenhoff*, 1 F.3d 1523, 1527–28 (9th Cir. 1993). But we cannot decide the case on that basis, because the jury did not. The court instructed the jury that the government did not have to prove the defendants knew their conduct was unlawful, and refused to instruct the jury that a mistaken belief that the discharge was authorized by the permit would be a defense. Because of the way the jury was instructed, its verdict is consistent with the proposition that the defendants honestly and reasonably believed that their NPDES permit authorized the discharges.

This proposition could be true. NPDES permits are often difficult to understand and obey. The EPA had licensed the defendants' plant to discharge 976 pounds of waste per day, or about 409,920 pounds over the fourteen months covered by the indictment, into the ocean. The wrongful conduct was not discharging waste into the ocean. That was socially desirable conduct by which the defendants protected the people of their city from sewage-borne disease and earned their pay. The wrongful conduct was violating the NPDES permit by discharging 26,000 more pounds of waste than the permit authorized during the fourteen months. Whether these defendants were innocent or not, in the sense of knowing that they were exceeding their permit limitation, the panel's holding will make innocence irrelevant in other permit violation cases where the defendants had no idea that they were exceeding permit limits. The only thing they have to know to be guilty is that they were dumping sewage into the ocean, yet that was a lawful activity expressly authorized by their federal permit.

The statute says "knowingly violate[s] any permit condition or limitation." "Knowingly" is an adverb. It modifies the verb "violates." The object of the verb is "any permit condition or limitation." The word "knowingly" is placed before "violates" to "explain its meaning in the case at hand more clearly." 1 George O. Curme, A Grammar of the English Language 72 (1935). Congress has distinguished those who knowingly violate permit conditions, and are thereby felons, from those who unknowingly violate permit conditions, so are not. The panel reads the statute as though it says "knowingly discharges pollutants." It does not. If we read the statute on the assumption that Congress used the English language in an ordinary way, the state of mind required is knowledge that one is violating a permit condition.

This approach has the virtue of attributing common sense and a rational purpose to Congress. *Cf. Longview Fibre Co. v. Rasmussen*, 980 F.2d 1307, 1311 (9th Cir.1992); *United States v. Martinez-Cano*, 6 F.3d

1400, 1405 (9th Cir.1993) (dissent). It is one thing to defy a permit limitation, but quite another to violate it without realizing that one is violating it. Congress promulgated a parallel statute making it a misdemeanor "negligently" to violate a permit condition or limitation. 33 U.S.C. § 1319(c)(1)(A). If negligent violation is a misdemeanor, why would Congress want to make it a felony to violate the permit without negligence and without even knowing that the discharge exceeded the permit limit? That does not make any sense. It would deter people from working in sewer plants, instead of deterring people from violating permits. All dischargers acting lawfully pursuant to a permit know that they are discharging pollutants. The presence or absence of that knowledge, which is the only mental element determining guilt under the panel's decision, has no bearing on any conduct Congress could have meant to turn into a felony. The only knowledge which could have mattered to Congress, the only knowledge which distinguishes good conduct from bad, is knowledge that the discharge violates the permit. That is what the statute says, "knowingly violates," not "knowingly discharges." There is no sensible reason to doubt that Congress meant what it said and said what it meant.

The panel reaches its surprising result in surprising ways. First, it says that the statute is ambiguous. "As with certain other criminal statutes that employ the term 'knowingly,' it is not apparent from the face of the statute whether 'knowingly' means a knowing violation of the law or simply knowing conduct that is violative of the law." *Weitzenhoff*, 1 F.3d at 1529. As explained above, a grammatical and sensible reading of the statute leaves no room for ambiguity. But for the sake of discussion, suppose that the statute is ambiguous, as the panel says. Then the rule of lenity requires that the construction allowing the defendant more liberty rather than less be applied by the court. *Ratzlaf v. United States*, — U.S. —, —, 114 S.Ct. 655, 662–63, 126 L.Ed.2d 615 (1994); *Hughey v. United States*, 495 U.S. 411, 422, 110 S.Ct. 1979, 1986, 109 L.Ed.2d 408 (1990). "[L]enity applies 'demand resolution of ambiguities in criminal statutes in favor of the defendant.' *Ratzlaf*, — U.S. at —, 114 S.Ct. at 663. The reason is the need for "fair warning." *Id.* (quoting *McBoyle v. United States*, 283 U.S. 25, 27, 51 S.Ct. 340, 341, 75 L.Ed. 816 (1931) (Holmes, J.)).

Instead of applying the rule of lenity, as it was required to do, the panel, after identifying the ambiguity, said "[w]e turn, then, to the legislative history of the provision at issue to ascertain what Congress intended." That is not an appropriate way to resolve an ambiguity in a criminal law. "Because construction of a criminal statute must be guided by the need for fair warning, it is rare that legislative history or statutory policies will support a construction of a statute broader than that clearly warranted by the text." *Crandon v. United States*, 494 U.S. 152, 160, 110 S.Ct. 997, 1002–03, 108 L.Ed.2d 132 (1990). We cannot fairly put sewer plant workers in peril of prison if they do not read House and Senate committee reports.

Even if the use of legislative history were proper here, it would not support the panel's construction. The legislative history furnished a column of quotations and references in the opinion, but no genuine support for the panel's analysis. The opinion relies on two quotations. The first says that criminal liability is to be imposed on any person who "*causes* a POTW [publicly owned treatment works] to violate any effluent limitation or condition in any permit." *Weitzenhoff*, 1 F.3d at 1529 (quoting S.Rep. No. 50, 99th Cong., 1st Sess. 29 (1985)) (emphasis in *Weitzenhoff*). That sounds as though it supports the panel's construction, but no doubt the panel overlooked the context of these words. If one looks up the quotation, one discovers that the Senate report was referring here to another provision, 33 U.S.C. § 1319(c)(2)(B), not to the provision at issue. The other provision has entirely different language, "knowingly introduces ... any pollutant ... which causes such treatment works to violate any effluent limitation or condition in a permit," as opposed to "knowingly violates ... any permit condition or limitation."

The second quotation, from a House report, says that the "knowingly violates" and "negligently violates" crimes are intended to penalize those who "knowingly or negligently violate or cause the violation" of certain laws.

H.R.Rep. No. 189, 99th Cong., 1st Sess. 29–30 (1985). This quotation does not help to answer the question before the panel. The opinion applies subtle grammatical analysis to the phrase in the House committee report, "or cause the violation," to draw an inference that knowing conduct which unknowingly violates a permit was meant to be turned into a felony. Careful grammatical analysis might better be applied to the law which Congress passed and the President signed. Even if inference from unexpressed intent in a committee report from one house were an appropriate means of turning innocent conduct into a felony, the inference from these words is too weak to carry the argument.

The panel's entire excursion into legislative history was fruitless and mistaken. The Supreme Court recently said in *Ratzlaf v. United States*, — U.S. —, 114 S.Ct. 655, 126 L.Ed.2d 615 (1994), "we do not resort to legislative history to cloud a statutory text that is clear. Moreover, were we to find § 5322(a)'s 'willfulness' requirement ambiguous as applied to [structuring], we would resolve any doubt in favor of the defendant." *Id.* at ——–—, 114 S.Ct. at 662–63 (footnote omitted). Analogously, the legislative history cannot properly be used to cloud the legislative restriction of felonies to those permit violations in which the person has "knowingly violate[d]." Even if the statute were ambiguous, the rule of lenity would compel resolution of the ambiguity in favor of the defendant.

The panel then tries to bolster its construction by categorizing the offense as a "public welfare offense," as though that justified more aggressive criminalization without a plain statutory command. This category is a modernized version of "malum prohibitum." Traditionally the criminal law distinguishes between malum in se, conduct wrong upon principles of natural moral law, and malum prohibitum, conduct not inherently immoral but wrong[illegible]e prohibited by law. [illegible]ry 1112 (4th ed. 1951). [illegible]odern terms, any nor[illegible]der, rape and robbery [illegible]ould be wrong even in [illegible]ign and no law. Dis[illegible]tants than one's per[illegible] because the law says [illegible]nodern term "public welfare offense" for the traditional one, malum prohibitum, allows for confusion by rhetorical suggestion. The new term suggests that other offenses might merely be private in their impact, and therefore less serious. The older set of terms made it clear that murder was more vile than violating a federal regulation. The category of malum prohibitum, or public welfare offenses, makes the rule of lenity especially important, most particularly for felonies, because persons of good conscience may not recognize the wrongfulness of the conduct when they engage in it.

Staples v. United States, — U.S. —, 114 S.Ct. 1793, 128 L.Ed.2d 608 (1994), reminds us that "offenses that require no *mens rea* generally are disfavored." *Id.* at —, 114 S.Ct. at 1797. *Mens rea* may be dispensed with in public welfare offenses, but the penalty is a "significant consideration in determining whether the statute should be construed as dispensing with *mens rea*." *Id.* at —, 114 S.Ct. at 1802.

The potentially harsh penalty attached to violation of § 5861(d)—up to 10 years' imprisonment—confirms our reading of the Act. Historically, the penalty imposed under a statute has been a significant consideration in determining whether the statute should be construed as dispensing with *mens rea*. Certainly, the cases that first defined the concept of the public welfare offense almost uniformly involved statutes that provided for only light penalties such as fines or short jail sentences, not imprisonment in the state penitentiary.

As commentators have pointed out, the small penalties attached to such offenses logically complemented the absence of a *mens rea* requirement: in a system that generally requires a "vicious will" to establish a crime, imposing severe punishments for offenses that require no *mens rea* would seem incongruous. Indeed some courts justified the absence of *mens rea* in part on the basis that the offenses did not bear the same punishments as "infamous crimes," and questioned whether imprisonment was compatible with the reduced culpability required for such regulatory offenses.

Id. at ——-——, 114 S.Ct. at 1802–03 (footnote and citations omitted). If Congress makes a crime a felony, the felony categorization alone is a "factor tending to suggest that Congress did not intend to eliminate a *mens rea* requirement. In such a case, the usual presumption that a defendant must know the facts that make his conduct illegal should apply." *Id.* at ——, 114 S.Ct. at 1804. In the case at bar, "the facts that make his conduct illegal" are the permit violations, not the discharges of pollutants. Discharge of pollutants was licensed by the federal government in the NPDES permit. Under *Staples*, it would be presumed, even if the law did not plainly say so, that the defendant would have to know that he was violating the permit in order to be guilty of the felony.

Precedent cuts strongly against the panel's decision. Two Supreme Court decisions came down this term which should have caused us to rehear the case.

Ratzlaf v. United States, — U.S. ——, 114 S.Ct. 655, 126 L.Ed.2d 615 (1994), reversing a decision of ours, holds that to commit the crime of "willfully violating" the law against structuring cash transactions to evade currency transaction reporting requirements, the defendant has to know that his conduct is unlawful. It is not enough that he is engaging in the cash transactions with a purpose of evading currency transaction reporting requirements. *Id.* at ——, 114 S.Ct. at 657. Ignorance of the law generally is no excuse, but "Congress may decree otherwise." *Id.* at ——, 114 S.Ct. at 663. The Court was concerned that a narrower reading of the mental element of the crime would criminalize conduct committed without the criminal motive with which Congress was concerned. *Id.* at ——, 114 S.Ct. at 661.

At issue in *Staples v. United States*, — U.S. ——, 114 S.Ct. 1793, 128 L.Ed.2d 608 (1994), was a statute which made it a felony to possess an unregistered "firearm." The statute defined "firearm" to include a fully automatic gun, which would fire more than one bullet on a single pull of the trigger, but not a semiautomatic. The defendant possessed a fully automatic gun, but testified that he did not know it would fire more than one bullet with a single trigger pull. The trial judge had instructed the jury that his ignorance did not matter, so long as the government proved he possessed "a dangerous device of a type as would alert one to the likelihood of regulation." The Supreme Court again rejected dilution of the mental element of the crime. The Court explained that unlike the hand grenades in *United States v. Freed*, 401 U.S. 601, 91 S.Ct. 1112, 28 L.Ed.2d 356 (1971), semiautomatics are innocently possessed by many people. Nor was knowledge that guns are regulated enough to require the owner to ascertain compliance with the regulations at his peril. That might do for a misdemeanor, but the felony status of the offense suggested a more plainly criminal mental state. Nor would the dangerousness of guns suffice to weaken the mens rea requirement:

> If we were to accept as a general rule the Government's suggestion that dangerous and regulated items place their owners under an obligation to inquire at their peril into compliance with regulations, we would undoubtedly reach some untoward results. Automobiles, for example, might also be termed "dangerous" devices and are highly regulated at both the state and federal levels. Congress might see fit to criminalize the violation of certain regulations concerning automobiles, and thus might make it a crime to operate a vehicle without a properly functioning emission control system. But we probably would hesitate to conclude on the basis of silence that Congress intended a prison term to apply to a car owner whose vehicle's emissions levels, wholly unbeknownst to him, began to exceed legal limits between regular inspection dates.

Staples, — U.S. at ——-——, 114 S.Ct. at 1801–02.

Nor does our own precedent support the panel's result. Our case most closely in point goes the other way. It is a crime to "knowingly transport[ ] or cause[ ] to be transported any hazardous waste identified or listed under this subchapter to a facility which does not have a permit." 42 U.S.C. § 6928(d)(1). Must the government prove that the defendant knew the facility did not have a permit, or can a person be convicted if he knows he is transporting, even if he honestly and rea-

sonably believes that the facility does have a permit? We held in *United States v. Speach*, 968 F.2d 795 (9th Cir.1992), that the government must prove that the transporter knew the facility did not have a permit. "Removing the knowledge requirement would criminalize innocent conduct...." *Id.* at 796.

The panel's suggested distinctions of *Speach* do not justify the difference in result. In *Speach*, we construed an ambiguous statute to require more rather than less knowledge of what made the conduct wrong, because diluting the knowledge requirement could ensnare the innocent. Likewise here. If a sewage worker pulls the switch to discharge sludge into the sea, because that is his job and the plant has a federal permit to discharge sludge into the sea, the panel opinion makes him guilty of a felony, if unbeknownst to him the particular discharge will violate the permit limits. *Speach* says that a narrow construction of the knowledge requirement in that case would "criminalize innocent conduct." 968 F.2d at 796. The statute could be read literally either way, so *Speach* read it, consistently with the rule of lenity, in the way which required that the defendant know of the absence of a permit, not just that he or she was transporting a hazardous waste. The same reasoning applies in *Weitzenhoff*, if the statute is ambiguous at all.

The panel cites *United States v. International Minerals & Chem. Corp.*, 402 U.S. 558, 91 S.Ct. 1697, 29 L.Ed.2d 178 (1971), and *United States v. Hoflin*, 880 F.2d 1033 (9th Cir.1989), in support of its reading. *International Minerals* was a pre-*Ratzlaf* misdemeanor case. Because of the syntactically similar statute at issue in that case, it is the strongest authority for the panel's decision and raises the most serious question for my own analysis. It held that a shipper of sulfuric acid could be convicted of violating a statute applying to those who "knowingly violate[ ]" regulations governing shipments of corrosive liquids, regardless of whether he had knowledge of the regulations. *International Minerals* expressly limits its holding to "dangerous or deleterious devices or products or obnoxious waste materials." 402 U.S. at 565, 91 S.Ct. at 1702. The Court distinguished materials not obviously subject to regulation:

> Pencils, dental floss, paper clips may also be regulated. But they may be the type of products which might raise substantial due process questions if Congress did not require ... "*mens rea*" as to each ingredient of the offense. But where, as here ..., dangerous or deleterious devices or products or obnoxious waste materials are involved, the probability of regulation is so great that anyone who is aware that he is in possession of them or dealing with them must be presumed to be aware of the regulation.

Id. at 564–65, 91 S.Ct. at 1701–02. *International Minerals* would have much persuasive force for *Weitzenhoff*, because of the grammatical similarity of the statute, if (1) the Clean Water Act limited pollutants to "dangerous or deleterious devices or products or obnoxious waste materials;" (2) the crime was only a misdemeanor; and (3) *Staples* had not come down this term. But all three of these conditions are contrary to fact. The pollutants to which the Clean Water Act felony statute applies include many in the "pencils, dental floss, paper clips" category. Hot water, rock, and sand are classified as "pollutants" by the Clean Water Act. *See* 33 U.S.C. § 1362(6). Discharging silt from a stream back into the same stream may amount to discharge of a pollutant. For that matter, so may skipping a stone into a lake. So may a cafeteria worker's pouring hot, stale coffee down the drain. Making these acts a misdemeanor is one thing, but a felony is quite another, as *Staples* teaches.

> In *Hoflin*, the statute made it a crime to: (2) knowingly ... dispose[ ] of any hazardous waste....
>
> (A) without having obtained a permit ... or
>
> (B) in knowing violation of [a permit condition].

We held that the "stark contrast" between the presence of "knowing" in subsection (B) and its absence in subsection (A) implied that knowledge of the absence of a permit was not an element of the subsection (A) crime. It was apparent from the nonparallel syntax of the statute that the word "knowing" in the introductory line modified only "disposes," not "without having obtained a permit." The

We undermine the foundation of cr[im]inal when we so vitiate the requiremen[t]

statute in *Hoflin* is not like the one before us. The panel unfortunately did not make the careful analysis of the syntax of the statute in our case that was made in *Hoflin*.

The panel, finally, asserts that as a matter of policy, the Clean Water Act crimes "are clearly designed to protect the public at large from the dire consequences of water pollution." That is true, but the panel does not explain how the public is to be protected by making felons of sewer workers who unknowingly violate their plants' permits. Provision for sanitary sewage disposal is among the most ancient laws of civilization. Deuteronomy 23:12–13. Sewage workers perform essential work of great social value. Probably nothing has prevented more infant mortality, or freed more people from cholera, hepatitis, typhoid fever, and other disease, than the development in the last two centuries of municipal sewer systems. *See* W.H. Corfield, The Treatment and Utilisation of Sewage 17–27 (1871). Sewage utility workers perform their difficult work in malodorous and dangerous environments. We have now imposed on these vitally important public servants a massive legal risk, unjustified by law or precedent, if they unknowingly violate their permit conditions.

Nor is the risk of prison limited to sewage plant workers. It applies to anyone who discharges pollutants pursuant to a permit, and unknowingly violates the permit. The panel suggests that criminalizing this innocent conduct will protect the public from water pollution. It is at least as likely that the increased criminal risk will raise the cost and reduce the availability of such lawful and essential public services as sewage disposal. We should not deprive individuals of justice, whether the judicial action would serve some desirable policy or not. It is by no means certain that the panel's construction will advance the underlying policy it attributes to Congress. We should apply the words Congress and the President promulgated as law, leaving the difficult policy choices to them.

We undermine the foundation of criminal law when we so vitiate the requirement of a criminal state of knowledge and intention as to make felons of the morally innocent.

> The contention that an injury can amount to a crime only when inflicted by intention is no provincial or transient notion. It is as universal and persistent in mature systems of law as belief in freedom of the human will and a consequent ability and duty of the normal individual to choose between good and evil. A relation between some mental element and punishment for a harmful act is almost as instinctive as the child's familiar exculpatory "But I didn't mean to".... Unqualified acceptance of this doctrine by English common law in the Eighteenth Century was indicated by Blackstone's sweeping statement that to constitute any crime there must first be a "vicious will."

Morissette v. United States, 342 U.S. 246, 250–51, 72 S.Ct. 240, 243–44, 96 L.Ed. 288 (1952) (footnote omitted). As Justice Jackson explained, "Consequences of a general abolition of intent as an ingredient of serious crimes have aroused the concern of responsible and disinterested students of penology. Of course, they would not justify judicial disregard of a clear command to that effect from Congress, but they do admonish us to caution in assuming that Congress, without clear expression, intends in any instance to do so." *Id.* at 254 n. 14, 72 S.Ct. at 246 n. 14.

Congress made it a serious felony "knowingly" to violate permit limitations on discharge of pollutants. The harsh penalty for this serious crime must be reserved for those who know they are, in fact, violating permit limitations.

IN THE UNITED STATES DISTRICT COURT
FOR THE MIDDLE DISTRICT OF FLORIDA
FORT MYERS DIVISION

UNITED STATES OF AMERICA, Plaintiff, v. FLORIDA CITIES WATER COMPANY, INC., Defendant.	)	CIVIL ACTION NO. 93-281-CIV-FTM-21

UNITED STATES' FIRST SET OF INTERROGATORIES TO DEFENDANT FLORIDA CITIES WATER CO.

Pursuant to Rules 26 and 33 of the Federal Rules of Civil Procedure, Plaintiff, the United States of America, serves upon Defendant Florida Cities Water Company the following interrogatories to be answered by Defendant separately and fully in writing and under oath, and served upon the undersigned attorney within 30 days.

INSTRUCTIONS AND DEFINITIONS

A. Unless otherwise specified, these interrogatories pertain to Florida Cities Water Company, Inc. ("Defendant") and and its parent companies, and the directors, departments, divisions, officers, employees, agents, servants, assigns and, unless privileged, the attorneys of Defendant and its parent companies.

B. These interrogatories are continuing in nature and require you to provide supplemental answers promptly in the event that you or your attorney obtain information that alters or augments the answers now given.

C. Where an individual interrogatory calls for an answer that involves more than one piece of information, each part of the answer is to be set out clearly so that it is understandable.

D. Words used in the plural shall also be taken to mean and include the singular. Words used in the singular shall also be taken to mean and include the plural. "Or" and "and" shall be construed either conjunctively or disjunctively to bring within the scope of these interrogatories any information that might otherwise be construed to be outside their scope. The past tense includes the present tense where the clear meaning is not distorted by change of tense.

E. "EPA" means the United States Environmental Protection Agency, and its agents and employees.

F. "Person" includes any natural person, firm, corporation, partnership, joint venture, association, proprietorship, company, government agency, group, or other entity or organization.

G. "Document" means any and all material that is written, printed, typed, photographed, recorded (electronically, magnetically, graphically or otherwise) or which is capable of being recorded in any form. It includes, but is not limited to, any logs of materials received, other logs, invoices, purchase orders, receipts, bills of lading, loading tickets, receiving tickets, shipping orders, inventories, letters and other correspondence, offers, contracts, agreements, bids, proposals, applications, licenses, permits, reports to government agencies, other reports, minutes of meetings, sales estimates, sales

reports, memoranda, handwritten or other notes, calendar or diary entries, agendas, bulletins, graphs, charts, map, photographs, drawings, data, price lists, list of accounts, summaries, telexes, telegrams, teletypes, computer printouts, magnetic tapes, discs, microfilm, and microfiche.

H. "Relate(s)" or "relating to" means constituting, defining, containing, embodying, reflecting, identifying, stating, referring to, dealing with, or in any way pertaining to.

I. "Identify", "identification" and "identifying" mean and include, with respect to a natural person the following:

(1) full name;

(2) home address and telephone number;

(3) present employer, business address and telephone number; and

(4) present occupation, job title and responsibilities.

J. All terms not expressly defined above are used herein as used in common English and/or as used within the meaning of the Clean Water Act, 33 U.S.C. §§ 1251 to 1387.

INTERROGATORIES

1. For each interrogatory in this and subsequent sets, identify fully (see instructions) all persons who have assisted in any way in answering the interrogatory, except for those persons providing clerical and secretarial assistance.

2. For each Request for Production of Documents served upon you by the United States in this action, state each employee, officer, and director of Florida Cities Water Company (and its parent companies) from whose files documents responsive to the request were produced.

3. For each allegation in the United States' Complaint in this action denied by Defendant, summarize in full the facts supporting Defendant's denial. (If the answers to these interrogatories are served subsequent to the filing of an Amended Complaint, this interrogatory shall apply to the Amended Complaint and not to the Complaint.)

4. Identify fully (see instructions) all directors, officers, and employees of Defendant from January 1, 1980 to the present. For each such person, state the term of their employment and, if no longer employed, the reason for the termination of their employment; the total compensation received from Defendant on an annual basis for each calendar year 1980 to the present; and specify in what respect, if any, each such person's responsibilities relate(d) to the operation of Defendant's wastewater treatment facilities and Defendant's

compliance with environmental laws and regulations.

5. Identify each wastewater treatment plant owned and/or operated by Defendant during the period 1980 through the trial of this action. For each such plant, state (1) the years in which the plant discharged effluent into waters of the United States; (2) during what years Defendant held an EPA National Pollutant Discharge Elimination System (NPDES) permit to discharge effluent from the plant into waters of the United States; and (3) which persons identified in response to interrogatory no. 3 were aware of any unpermitted discharges and on or about what date they became so aware.

6. For the period 1988 to the trial of this matter, list, by date and type, each violation of any federal, state, or local environmental law or regulation, including all violations of any permit, at any facility owned and/or operated by Florida Cities Water Company. If you deem the use of the word "violation" to constitute a legal conclusion, list, by date and type, any instance of non-compliance with any federal, state, or local environmental law or regulation, including all instances of non-compliance with any permit, and any exceedance of a permit limitation or condition, at any facility owned and/or operated by Florida Cities Water Company.

7. For each violation (or instance of non-compliance, etc.) listed in response to interrogatory no. 5 above, state (1) the nature of the violation; (2) the reason for the violation; (3) any and all measures taken to prevent the violation; and (4)

which persons identified in response to interrogatory no. 3 were aware of the violations and on or about what date they became so aware.

8. Identify fully (see instructions) all persons whom you intend to call as factual witnesses at any hearing, trial, or other proceeding in this case, state the subject matter on which each witness is expected to testify, and summarize the facts to which each witness is expected to testify.

9. Identify fully (see instructions) all expert witnesses you intend to call at trial in this case; the subject matter on which, and the substance of the facts and opinions to which, the expert is expected to testify; and provide a summary of the grounds for each opinion.

10. State whether you intend to attempt to recover through your rates the costs associated with this action, including the costs of civil penalties and legal expenses incurred.

IN THE UNITED STATES DISTRICT COURT
FOR THE MIDDLE DISTRICT OF FLORIDA
FORT MYERS DIVISION

UNITED STATES OF AMERICA,	)	
	)	
Plaintiff,	)	
	)	
v.	)	CIVIL ACTION NO.:
	)	93-281-CIV-FM-21
FLORIDA CITIES WATER COMPANY,	)	
	)	
Defendant.	)	
	)	

Defendant's Second Request for Production of Documents to Plaintiff United States of America

Defendant Florida Cities Water Company ("FCWC"), pursuant to Rules 26 and 34 of the Federal Rules of Civil Procedure ("FRCP"), hereby requests that Plaintiff United States of America ("United States") produce and make available for inspection and copying, at a mutually agreeable location, the documents identified in this Request for Production of Documents ("Request for Production") that are within Plaintiff's possession, custody, or control, within thirty (30) days of the date of service of this Request for Production. Such production of documents shall be in accordance with the FRCP and the following instructions and definitions.

Definitions

1. "Plaintiff" or "United States" means all agencies of the United States, including the United States Department of Justice, the United States Attorneys' Offices, and the national headquarters, regional offices, field offices, laboratories, or other facilities of the United States Environmental Protection Agency ("EPA"), and any other agent, representative, or person acting on behalf of the United States.

2. "Defendant" or "FCWC" means the Florida Cities Water Company, including its officers, employees, agents, and any others acting on its behalf.

3. "Person," unless otherwise specified, means any present or past individual or natural person, firm, partnership, association, corporation, municipal corporation, proprietorship, governmental body or political subdivision thereof, government agency or commission, or any other organization or entity.

4. "Government" or "governmental" means relating to any federal, state, local, municipal, county, city, or other similar entity or organization.

5. "Document" is used in the broadest sense and includes, but is not limited to, the original and all non-identical copies of the following items, whether

in draft or final form, and whether printed, recorded, reproduced by hand, or maintained in any computer database or machine-readable form: memoranda, letters, reports, evaluations, correspondence, summaries and/or reports of inspections, communications, intra-office memoranda and/or communications, inter-office communications, agreements, contracts, invoices, checks, journals, records, ledgers, diaries, logs, summaries and/or records of telephone or personal conversations or interviews, telegrams, summaries, notebooks, handwritten, typewritten or otherwise maintained or recorded notes, periodicals, pamphlets, brochures, circulars, computer or business machine print-outs, accountants' work papers, other working papers, accountants' statements and writings, marginal or other notation, minutes or records of meetings, reports and/or summaries of negotiations, printers' galleys, books, papers, speeches, public relations issues, advertising, press releases, material filed with government agencies, office manuals, appraisals or evaluations, employee manuals or office rules and regulations, opinions or reports of experts or consultants, any other written matter, tape recordings or other sound or visual reproduction materials, photographs, drawings, computer data bases, or any tangible or physical objects however produced or reproduced upon

which words or other information are affixed or recorded or from which by appropriate transcription written matter or a tangible thing may be produced.

6. "Relate," "relating to," "refer to," "with respect to," or "refers to" means in whole or in part, directly or indirectly, mentioning, discussing, reflecting, containing, embodying, stating, dealing with, analyzing, constituting, defining, concerning, identifying, or in any way pertaining or relevant to.

7. "State" means the State of Florida, including all its departments, agencies, agents, officials, or any other representative acting in its behalf.

9 "NPDES permits" means any National Pollutant Discharge Elimination System permits issued by EPA to FCWC, including, but not limited to, permits that are or were temporary, renewed, continuing, permanent, or in any way modified.

Instructions

1. Plaintiff is requested to respond to this Request for Production within thirty (30) days by producing and making available for inspection and copying each of the documents identified in this Request for Production that are within Plaintiff's possession, custody, or control.

2. In particular, Plaintiff must produce and make available for inspection and copying all non-identical, responsive documents that are within the possession, custody or control of (1) EPA's main offices or Headquarters in Washington, D.C., and (2) EPA Region IV offices. If Plaintiff is aware of additional, non-identical, responsive documents in other Regions or other EPA offices, such documents should also be produced.

3. Documents shall be produced in the order in which they are currently maintained, and in the form in which they are maintained in the files (i.e., stapled, clipped, or otherwise fastened together). File folders in which the documents are contained shall be considered as part of each document contained therein.

4. For each document produced, indicate on the document or in some other reasonable manner, the numbered request(s) to which it responds.

5. In your response, specify for each request the location, volume, file title(s), and custodian(s) of the requested documents.

6. This Request for Production of Documents is continuing, and Plaintiff shall supplement or amend its initial responses in accordance with Rule 26(e) of the Federal Rules of Civil Procedure, or if Plaintiff obtains further or

different information, and as otherwise becomes necessary during the course of this litigation.

7. If any document was, but is no longer in your possession, custody or control, state:

(a) the disposition of the document;

(b) the date such disposition was made;

© the identity and address of the present custodian of the document or, if the document and/or the custodian no longer exists, so state;

(d) the person(s) who made the decision to dispose of the document;

(e) the reason(s) for the disposition; and

(f) a description of the document and a description of the contents of the document.

8. If any document is withheld under any claim of privilege, furnish a list identifying each document for which the privilege is claimed, together with the following information:

a. the title of the document, or if it has no title, the subject of the document;

b. the type of document;

c. the date of the document;

d. the name and job title of each author or addresser;

e. the name and job title of each addressee;

f. the name and job title of all recipients of copies;

g. the privilege asserted and basis upon which the privilege is claimed; and

h. name, address and telephone number of the custodian of the document and/or copies thereof.

9. If anything is deleted from a document produced in response to these requests, state:

a. the reason for the deletion; and

b. the subject matter of the deleted material.

10. Plaintiff is to retain in its possession, custody and control, and to refrain from destroying, any document requested herein that is in the possession, custody or control of Plaintiff as of the date of service of these requests.

11. Words used in the plural shall also be taken to mean and include the singular. Words used in the singular shall also be taken to mean and include the plural. Any references to gender shall also be taken to mean and include the opposite gender, so as to include, rather than exclude, documents.

12. "And" and "or" shall be construed conjunctively or disjunctively, as necessary, to make the request inclusive rather than exclusive.

13. Unless otherwise stated, these requests apply to the period beginning on January 1, 1980 and ending at the conclusion of trial of this matter.

Documents Requested

31. All documents currently in existence called for by Defendant's First Request for Production of Documents (paragraphs 1 to 30), which plaintiff has not previously produced.

32. All documents reflecting the facts and circumstances relating to the referral of this matter to the Department of Justice for litigation, including the persons responsible for that referral, the reasons for it, and a comparison between this case and other Clean Water Act cases which EPA considered for referral between January 1, 1984 and December 31, 1988.

33. All documents reflecting the criteria and procedures used by EPA Region IV for referral of matters to the Department of Justice for litigation.

34. Documents reflecting the general procedures, practices, and internal agency guidance of EPA in reviewing and approving lists of water quality-limited stream segments under the Clean Water Act during the years 1980-1990.

35. Documents reflecting all denials by EPA Region IV of NPDES permit renewal applications from 1980-present.

36. All documents reflecting EPA's knowledge and efforts to coordinate state, county and local permitting requirements as they relate to the

upgrade to AWT and extension of the outfall pursuant to EPA's Administrative Orders of May 11, 1987 and September 26, 1989.

37. All documents reflecting the facts and circumstances surrounding other EPA Region IV NPDES initial and renewal permit application denials from 1980 to the present, and the results of any litigation (criminal or civil) arising from said NPDES permit application denials.

38. All documents reflecting any evidence known to EPA of actual environmental harm caused by Defendant's discharges including, but not limited to, the amount of pollutant, the toxicity of pollutant, and the environmental sensitivity of the area.

39. All documents reflecting the risk of harm inherent in the violations alleged in the complaint at the time they were committed.

40. Documents reflecting: a) the criteria for inclusion on EPA Region IV's Significant Non-compliance List for Clean Water Act violations, b) the identity of all companies included on said list from 1980 to present, and c) the types and results of enforcement actions, both administrative and judicial, taken between 1980 and the present against the identified companies.

41. All documents referred to in your responses to any of defendant's interrogatories, or relied upon by plaintiff in the preparation of those responses.

March 22, 1995.

Exhibit_____(GHB-40)

IN THE UNITED STATES DISTRICT COURT
FOR THE MIDDLE DISTRICT OF FLORIDA
FORT MYERS DIVISION

UNITED STATES OF AMERICA, Plaintiff, v. FLORIDA CITIES WATER COMPANY, Defendant.	)	CIVIL ACTION NO.: 93-281-CIV-FTM-21

Defendant's Notice of Intention To Oppose Constructive Motion by United States for Leave To File Amended Complaint

Defendant Florida Cities Water Company ("Florida Cities") hereby gives notice that it intends to oppose the United States' constructive motion for leave to file an Amended Complaint.

Although the United States served an Amended Complaint upon Florida Cities by facsimile on March 30, 1995, it served no motion for leave to file the Amended Complaint. F.R.Civ.P. 15(a) provides that, in the circumstances obtaining here, the United States may amend its complaint "only by leave of court . . . ." This Court's February 27, 1995 Order provides, consistent with F.R.Civ.P. 15(a), that "[motions to add parties or amend pleadings must be filed by April 15, 1995." (¶ 5, Order Limiting Time For Completion Of Discovery And Scheduling Of Final Pretrial Conference And Trial, filed Feb. 27, 1995) (emphasis supplied).

The Court gave oral leave to amend at the February 15, 1995 hearing before Magistrate Judge Swartz. However, the only Order entered by the Court addressing potential amendments to the complaint is the Court's February 27, 1995 Order, which specifically requires the United States to move for the court's leave to amend the complaint. Since that February 27, 1995 Order is the only Order from the court on this matter, it appears controlling in this situation. Thus, the Court has

given the United States until April 15, 1995 to move the Court to amend the complaint; it has not given the United States a license to file whatever amended complaint it wished without leave of Court to do so

On March 30, 1995, the United States served upon Florida Cities a "Motion for Leave To Add a New Party Defendant." That Motion was limited to adding a new party, not adding new allegations against Florida Cities. Rather than delay these proceedings to allow time for the government to correct its filing to amend the complaint to comply with the Court's Order, Florida Cities will treat the government's Motion To Add a New Party as also a motion for leave to amend the complaint. Defendant Florida Cities will be filing an opposition to the United States' constructive motion for leave to amend within the time allowed by the local and federal rules.

Exhibit_____(GHB-41)

UNITED STATES DISTRICT COURT
MIDDLE DISTRICT OF FLORIDA
FORT MYERS DIVISION

United States of America,

Plaintiff,

v.

Florida Cities Water Company,

Defendant.

Case No. 93-281-CIV-FTM-21D

DEFENDANT'S MEMORANDUM IN PARTIAL OPPOSITION TO PLAINTIFF'S MOTION FOR LEAVE TO AMEND COMPLAINT

This memorandum by Defendant Florida Cities Water Company ("Florida Cities"), is in opposition to portions of Plaintiff's Motion for Leave to Amend Complaint, and is submitted pursuant to this Court's Order, dated April 10, 1995.

SUMMARY OF ARGUMENT

In its proposed Amended Complaint ("Amended Complaint"), the Plaintiff seeks a second bite of an apple it has already eaten. The Clean Water Act makes clear that EPA may not seek civil judicial penalties for violations already settled by an EPA administrative order assessing penalties. Florida Cities has already agreed to administrative orders assessing penalties for alleged violations, including discharges without a federal permit, at both its Barefoot Bay and Carrollwood facilities. The Amended Complaint makes claims for relief for those same violations, already settled by

these parties. As the Clean Water Act expressly prohibits EPA from seeking civil penalties for violations for which an administrative order has already been issued and a penalty paid, it would be futile for EPA to amend the complaint to seek these prohibited penalties.. When it is futile to allege newly-asserted claims, a trial court should deny leave to amend a complaint.

PROCEDURAL AND FACTUAL BACKGROUND

1. Introduction. This is an action by the United States under the Clean Water Act, 33 U.S.C. §§ 1251-1387 (the "Act"). Under 33 U.S.C. § 1319(d), Plaintiff seeks to recover up to $25,000.00 for each day Florida Cities allegedly violated any provision of the Act, or any order or permit issued pursuant to the Act. Florida Cities has operated, among others, the Waterway Estates Wastewater Treatment Plant ("Waterway Estates"), the Barefoot Bay Wastewater Treatment Plant ("Barefoot Bay") until January 5, 1992, and the Carrollwood Wastewater Treatment Plant ("Carrollwood"). Plaintiff's original complaint alleged violations of the Act only at Waterway Estates. The Amended Complaint alleges for the first time similar violations of the Act at Barefoot Bay and Carrollwood consisting essentially of two categories of violations: discharging without a federal permit and a collection of intermittent exceedances of the permit. This memorandum addresses only the first category of violations, for discharge without an NPDES permit.

Paragraph 16 of the Amended Complaint alleges that from about April 1, 1990 to October 31, 1991, Florida Cities discharged pollutants from Barefoot Bay without an

NPDES permit[1]. Paragraph 30 alleges that from about August 1990 to June 1991, Florida Cities discharged pollutants from Carrollwood without an NPDES permit. Florida Cities opposes granting the Plaintiff leave to amend the complaint by adding paragraphs 16 and 30.[2] Florida Cities does not oppose granting Plaintiff leave to add the other paragraphs of the Amended Complaint, except that Florida Cities supports the opposition of Avatar Holdings Inc. to Plaintiff's motion for leave to add it as a party.

The Clean Water Act requires that a discharger of effluent into waters of the United States obtain authorization to discharge in the form of a permit, pursuant to the National Pollutant Discharge Elimination System (an "NPDES permit"). The Act also authorizes EPA to delegate responsibility for issuing these NPDES permits to those states with an approved permitting program. This system of delegation eliminates the need for a facility to have both federal and state authorizations to discharge. As Florida has not yet been granted authority to issue NPDES permits (anticipated shortly), facilities in Florida with discharges to surface waters must still obtain both state authorization and a federal NPDES permit to discharge.

The discharges at issue in this case are alleged to have occurred without a federal NPDES permit, perhaps giving the incorrect impression that these discharges were unregulated by any environmental regulatory agency. At all relevant times, however,

---

[1] National Pollutant Discharge Elimination System ("NPDES") permits are issued by the United States Environmental Protection Agency ("EPA"), pursuant to 33 U.S.C. § 1342.

[2] The other claims concerning Barefoot Bay and Carrollwood are minor allegations of discharges in excess of administrative order or permit limits.

Florida Cities had authorizations from the state of Florida to discharge effluent, as necessary, from these facilities to surface waters. Further, both these facilities were in substantial compliance with these state authorizations, which imposed extensive monitoring requirements, effluent limitations, and monthly reporting of these data to the state. EPA must have been aware of these state authorizations, which would have been considered as part of EPA's process for evaluating applications for a federal NPDES permit.

2. Barefoot Bay. On September 26, 1990, the EPA issued an Administrative Order concerning Barefoot Bay. Ex. 1. That Order noted that Florida Cities was violating the Act by discharging from Barefoot Bay without a valid NPDES permit and directed that Florida Cities comply with specific effluent limitations and monitoring requirements until the NPDES permit for which it had applied was issued. Ex. 1 at 2-3.

On July 12, 1991, the EPA issued to Florida Cities a Notice to Show Cause, which alleged violations of the Act and sought penalties. Ex. 2. EPA specifically described those violations as follows:

> "[T]he Company discharged from the Barefoot Bay Wastewater Treatment Plant to the waters of the United States during the period from September to [sic] 1989 to present without a valid NPDES permit."

Ex. 2, at 1.

Florida Cities and EPA thereafter met and negotiated a settlement of these alleged violations. On September 25, 1991, EPA issued an Administrative Complaint proposing to assess an administrative penalty against Florida Cities for one violation at

Barefoot Bay, i.e., discharging without an NPDES permit on September 14, 1989.[3] Florida Cities received an NPDES permit for Barefoot Bay, effective November 1, 1991. NPDES Permit No. FL0042293. On November 6, 1991, EPA issued a Consent Agreement and Order Assessing Administrative Penalties. Ex. 3. That Consent Order referred to the same allegation cited in the Administrative Complaint, and required Florida Cities to pay $6,000.00 for that violation. Ex. 3 at 2. As indicated by an internal Florida Cities document, the November 1991 Consent Agreement was understood as resolving all allegations of discharges without an NPDES permit at Barefoot Bay, as referred to by the Notice of Show Cause. Ex. 4.

The Consent Order required Florida Cities to send EPA a certified check, payable to "Treasurer, United States of America", no later than December 6, 1991. Ex. 3, at 2-3, 5. This check was timely sent to EPA, which cashed it. Ex. 5. In September 1992, EPA sent Florida Cities a letter confirming that the September 26, 1990 Order, which required compliance with effluent limitations and monitoring reports, "has been complied with and placed in an inactive status." Ex. 6.

3. Carrollwood. In November 1984, EPA issued an order requiring Carrollwood to cease discharging by June 1987. For some time after June 1987, Carrollwood allegedly discharged without an NPDES permit. On July 31, 1990, Florida Cities submitted an application for an NPDES permit for Carrollwood.

---

[3] State and federal officials conducted an inspection of the Barefoot Bay facility on that date.

On September 25, 1990, EPA issued an Administrative Complaint to Florida Cities for Carrollwood. Ex. 7. The Complaint alleged that Carrollwood had been discharging without an NPDES permit since June 1987, a period of more than three years, and proposed an administrative penalty of $25,000.00. Ex. 7, at 1-2. On September 27, 1990, EPA issued an Administrative Order that alleged that Florida Cities had been discharging at Carrollwood without a valid NPDES permit, and required Florida Cities to comply with specific monitoring requirements and effluent limitations until the NPDES permit was issued. Ex. 8, at 3-4.

Florida Cities and EPA thereafter negotiated the penalty amount to be assessed. On April 19, 1991, EPA issued a Consent Agreement and Order Assessing Administrative Penalties for Carrollwood. The Consent Agreement noted the filing of the Administrative Complaint, alleged that Florida Cities violated the Act by discharging without a permit from June 1987 through July 1990, the date Florida Cities applied for an NPDES permit, and provided that Florida Cities would pay a penalty of $15,000.00, rather than the $25,000.00 originally proposed by the EPA. Ex. 9, at 2-3. Just as at Barefoot Bay, as part of the conclusion of these negotiations, EPA issued an NPDES discharge permit for Carrollwood, effective July 1, 1991.

The Consent Agreement required Florida Cities to send EPA a money order or certified check for $15,000, payable to "Treasurer, United States of America," no later than May 19, 1991. Ex. 9, at 3, 5. This check was timely sent to EPA, which cashed it. Ex. 10. In March 1992, EPA sent Florida Cities a letter confirming that the September 27, 1990 order, which required monitoring reports and compliance with effluent limitations, "has been complied with and placed in an inactive status." Ex. 11.

4. Prior Proceedings. Plaintiff instituted this action in October 1993. The complaint addressed alleged violations of the Act only at Florida Cities' Waterway Estates facility. The primary claim was that Waterway Estates discharged without an NPDES permit from October 1, 1988 to October 1, 1989. Prior to October 1988, EPA had denied Florida Cities' application to renew its federal permit.

In October 1994, Florida Cities deposed the EPA official ultimately responsible for denying the permit renewal application for Waterway Estates. He admitted there was no legal basis for the denial of that application.[4] This meant that, although EPA was seeking civil penalties of up to $25,000.00 per day for each day Waterway Estates allegedly discharged without an NPDES permit, EPA's mistake was the sole reason the permit renewal application was denied. Denials of permit renewals are themselves extremely unusual; EPA has denied no more than a handful over the last twenty years.

The government now seeks leave to file its proposed Amended Complaint adding allegations against Barefoot Bay and Carrollwood. This Court has imposed a discovery cutoff of July 15, 1995, and set this case for trial during the trial term commencing October 2, 1995.

---

[4] Bruce Barrett, the former Director of the Water Management Division in EPA Region IV, testified: "I don't see the basis for the federal action denying the permit based on the correspondence [demonstrating Waterway Estates had a wasteload allocation, which entitled it to a permit]." Barrett Dep., October 25, 1994, at 60; see id. at 54-60; Ex. 12.

ARGUMENT

I. PLAINTIFF SHOULD BE DENIED LEAVE TO AMEND THE COMPLAINT TO SEEK PENALTIES FOR DISCHARGES WITHOUT AN NPDES PERMIT AT BAREFOOT BAY AND CARROLLWOOD.

A. Legal Standard for Amendment. Plaintiff may amend its Complaint only by leave of court. Fed. R. Civ. P. 15(a). Leave will be freely granted under Rule 15(a), unless there is a substantial reason to deny leave to amend. Motorcity of Jacksonville, Ltd. v. Southeast Bank, N.A., 39 F.3d 292, 297 (11th Cir. 1994); Shipner v. Eastern Air Lines, Inc., 868 F.2d 401, 407 (11th Cir. 1989). The futility of a proposed amended complaint is a sufficient reason to deny a motion to amend. Motorcity, 39 F.3d at 297 (citing Foman v. Davis, 371 U.S. 178, 182 (1962)); Moore v. Baker, 989 F.2d 1129, 1131 (11th Cir. 1993); Mahon v. City of Largo, 829 F.Supp. 377, 385 (M.D. Fla. 1993). It is proper for the trial judge to consider the futility of an amended complaint on a motion to amend. To delay until there is a later motion to dismiss or for summary judgment would be a wasteful formality. See Moore, 989 F.2d at 1131 (quoting Middle Atl. Util. Co. v. S.M.W. Dev. Corp., 392 F.2d 380, 385 (2d Cir. 1968)) (statute of limitations barred the newly-asserted claim). As we now explain, the government cannot seek additional penalties in this case for discharges without an NPDES permit at Barefoot Bay and Carrollwood because it settled those claims years ago.

B. Barefoot Bay. The Clean Water Act expressly forbids EPA from seeking to collect, in court, penalties for violations for which EPA has already collected an administrative penalty. In relevant part, Section 309 of the Clean Water Act provides that:

"any violation — . . .

> *for which the Administrator* . . . has issued a final order not subject to further judicial review and the violator has paid a penalty assessed under this subsection . . . ,

shall not be the subject of a civil penalty action under subsection (d) of this section . . . ."

33 U.S.C. § 1319(g)(6)(A).

EPA issued a Consent Order for Barefoot Bay covering discharges without a permit; that order is not subject to further judicial review; Florida Cities paid an administrative penalty assessed under § 1319; and this action seeks civil penalties under § 1319(d). Ex. 3; Amended Complaint, Paragraph 49. As a matter of law, the government is therefore barred from seeking penalties in this case for discharges from Barefoot Bay without an NPDES permit.

The government may argue that the Barefoot Bay Consent Order settled only a claim that Defendant discharged on one day, September 14, 1989, for which it paid a $6,000.00 penalty. There is no merit to such an argument. While Florida Cities paid a penalty for only one day's discharge, the settlement covered all claims for discharges without a permit before and after that date. The Notice of Show Cause alleged discharges without an NPDES permit from September 1989 forward. Ex. 2, at 1. Florida Cities and EPA agreed to settle the allegation of discharges from Barefoot Bay without an NPDES permit, as reflected in the Administrative Complaint and Consent Order. EPA was aware throughout this period of the alleged discharges from Barefoot

Bay, and of Barefoot Bay's permit status.[5] The Administrative Complaint and Consent Order refer only to one date, September 14, 1989,[6] not because it was the only alleged violation, but because that was the penalty agreed upon by Florida Cities and EPA. The November 6, 1991 Consent Order settled all penalty claims for discharging without an NPDES permit for the entire period from September 1989 through November 6, 1991, and Plaintiff cannot now reopen that settlement. Indeed, it would be ludicrous for the government to now suggest that the parties settled penalties for discharges without an NPDES permit for only one day of this period and intended to leave EPA free to later seek penalties for every other day.

3. Carrollwood. EPA long ago settled all claims for discharging without an NPDES permit at Carrollwood, and Florida Cities paid the penalty agreed upon. Plaintiff should therefore be barred from attempting to reopen that settlement by seeking to recover more penalties through the Amended Complaint.

EPA may take the position that the Carrollwood settlement covered only the period from June 1987 through July 1990, and not the period from August 1990 to June 1991. See Amended Complaint, Paragraph 30. That position is unsound. It is true that the April 1991 Consent Order alleged violations of the Act only from June 1987 through

---

[5] See Disclosure Monitoring Reports submitted to EPA for Barefoot Bay. Notice of Show Cause, Ex. 2.

[6] EPA may have selected this date because state and federal inspectors visited Barefoot Bay on that date, when they apparently personally observed a discharge from Barefoot Bay.

July 1990, because during negotiations EPA determined that penalties were not warranted for the period after July 31, 1990, the date on which Carrollwood applied for an NPDES permit.

The Administrative Complaint issued on September 25, 1990 sought $25,000.00 in penalties for discharges without a permit from June 1987 through September 1990, two months beyond July 31, 1990. Ex. 7, at 1-2. The parties thereafter negotiated the amount and scope of the penalties. Throughout the period of the settlement discussions, Carrollwood continued to submit reports to the EPA indicating discharges, and EPA was fully apprised of Carrollwood's permit status. In fact, at the time of the Consent Order, EPA was in the final stages of reviewing the NPDES permit application, which it granted in May 1991. Florida Cities and EPA's ultimate agreement, reflected in the April 19, 1991 Consent Order was that Florida Cities would not be charged with any violations after July 1990, and that the total penalty would be reduced from $25,000.00 to $15,000.00 for all violations involving discharges without a permit at Carrollwood, not just those occurring before August 1990.

EPA agreed to a settlement under which discharges without a permit at Carrollwood from June 1987 through July 1990 resulted in penalties of about $13.00 per day. Obviously, Florida Cities' conduct after July 31, 1990 -- when it had applied for a permit, was submitting discharge reports, and complying with effluent limitations -- was far more acceptable to the EPA than its discharges before that date. After the parties negotiated a settlement and executed a consent agreement, EPA closed out the matter with its March 3, 1992 compliance letter. EPA's March 3, 1992 letter confirmed that the Carrollwood administrative order requiring monitoring and compliance with effluent

limitations "has been complied with and placed in an inactive status." Ex. 11.

After the compliance letter was sent, any attempts by EPA to try to recover additional administrative penalties for discharges between July 31, 1990 and July 1, 1991, when the NPDES permit became effective, would have reflected bad faith. There is even less basis to allow the EPA now to reopen the settlement agreement to seek penalties in Court of up to $25,000.00 per day for this same time period.

* * * * *

EPA's original case against Florida Cities (involving the Waterway Estates facility) suffered a potentially lethal blow when it was discovered that EPA had wrongly refused to grant the permit renewal for Waterway Estates -- a renewal that EPA was legally obligated to grant. This lack of a federal permit was the basis of the original complaint. Instead of accepting the consequences of this significant discovery by dropping the complaint, the Department of Justice has, rather, sought to salvage the case by engaging in open-ended and massive discovery in a transparent attempt to prop up its failed case by seeking to find <u>any</u> technical violation, no matter how trivial, at any of the several other facilities owned and operated by Florida Cities. This unwarranted ploy and abuse of power appears to be an effort to punish Florida Cities for not settling the case on terms acceptable to the Department of Justice. As Florida Cities remains convinced that both the original and amended complaints are unwarranted and represent an abuse of government power, it has so far refused to settle and has borne the costly consequences of opposing the government's unjustified vendetta.

CONCLUSION

Plaintiff should be denied leave to include paragraphs 16 and 30 in its proposed Amended Complaint.

FILED

94 APR 26 AM 11:44

UNITED STATES DISTRICT COURT
MIDDLE DISTRICT OF FLORIDA
FORT MYERS DIVISION

MIDDLE DISTRICT COURT
MIDDLE DISTRICT OF FLORIDA
TAMPA, FLORIDA

UNITED STATES OF AMERICA,

Plaintiff,

V. CASE NO. 93-281-CIV-FTM-21

FLORIDA CITIES WATER COMPANY,

Defendant.

_____/

ORDER

This cause comes before the Court on two objections to the Magistrate Judge's Order (Dkt. 54) entered March 16, 1994: (1) United States' Objections to the Magistrate Judge's Order on the United States' Motion for an Order Allowing Ex-Parte Contacts with Former Employees (Dkt. 58) and the Defendant's response (Dkt. 75) in opposition thereto; and (2) Defendant's Objections to the Magistrate Judge's Order on Defendant's Motion to Disqualify Counsel (Dkt. 66). Pursuant to Rule 72, Federal Rules of Civil Procedure, the Court "shall consider such objections and shall modify or set aside any portion of the magistrate judge's order found to be clearly erroneous or contrary to the law."

I. Motion to Allow Ex-Parte Contacts

After hearing oral argument, the Magistrate Judge issued an order denying the Plaintiff's Motion for an Order Allowing Ex-Parte Contacts with Former Employees. The United States objects solely to paragraph 1 of the Magistrate Judge's Order, which provides:

1. Plaintiff's motion to allow ex parte contacts with defendant's employees is DENIED.

a. Except as set forth in the next two paragraphs, no attorney in the United States Department of Justice shall communicate with any of defendant's present or past employees, unless the communication is at a formal deposition at which the employee or witness will have the right to be represented by counsel.

b. If counsel for the plaintiff wishes to communicate other than at a deposition with a potential witness represented by counsel, counsel for the plaintiff shall give counsel for the defendant reasonable advance notice, so that defense counsel can contact counsel for the witness before any communication from plaintiff occurs.

c. If counsel for plaintiff wishes to communicate other than at a deposition with a potential witness not represented by counsel, counsel for the plaintiff shall give counsel for the defendant reasonable advance notice, so that defense counsel can discuss the matter with the witness before any communication occurs, and further advise the witness that he or she may be subject to potential criminal prosecution under the Clean Water Act.

The Plaintiff argues that under Rule 4-4.2[1], Florida Rules of Professional Conduct, Rule 4.2, ABA Rules of Professional Conduct, prevailing case law, and commentary, there exists no legal barrier to the Plaintiff's ex parte informal interviews with Defendant's ex-employees. The Plaintiff states that neither Florida Rule 4-4.2 nor the ABA Rule addresses the issue whether a former employee is deemed to be represented by the former employer's counsel for purposes of

---

[1]Rule 4-4.2, Florida Rules of Professional Conduct, modelled largely on Rule 4.2, ABA Model Rules of Professional Conduct, provides, in pertinent part, that a lawyer shall not communicate:

> about the subject of the representation with a person the lawyer knows to be represented by another lawyer in the matter, unless the lawyer has the consent of the other lawyer.

The Florida Rules also adopt the following provision from the Official Comment to ABA Rule 4.2:

> In the case of an organization, this rule prohibits communications by a lawyer for one party concerning the matter in representation with persons having a managerial responsibility on behalf of the organization and with any other person whose act or omission in connection with that matter may be imputed to the organization for purposes of civil or criminal liability or whose statement may constitute an admission on the part of the organization.

ex parte communications. The Plaintiff maintains, however, that Opinion 88-14 (March 7, 1989) of the Governors of the Florida Bar, reprinted in Professional Ethics of the Florida Bar at 1299 supports their requested ex parte communications. They quote the Opinion, which states, "A plaintiff's attorney may communicate with former managers and former employees of a defendant corporation without seeking and obtaining consent of corporation's attorney." (Dkt. 58, Exh. A). The Plaintiff also points out that a 1991 formal ABA opinion expressly held that Rule 4.2 does not apply to former corporate employees. ABA Standing Committee on Ethics and Professional Responsibility Formal Opinion No. 91-359 (March 22, 1991) reprinted in ABA/BNA Lawyers' Manual on Professional Conduct at 1001:101 (Dkt. 58, Exh. B).

Additionally, the Plaintiff cites several courts outside the Eleventh Circuit that have held that Rule 4.2 or its equivalent does not apply to former employees. The Plaintiff also attempts to distinguish two cases in which this Court has held that under certain circumstances ex-employees may not be contacted, and asserts that Judge Kovachevich's holdings in those cases are in the distinct minority and inconsistent with the Florida Bar and ABA ethics opinions. See Browning v. AT & T Paradyne, 838 F.Supp. 1564 (M.D. Fla. 1993); Rentchub Inc. v. Transamerica Rental Finance Corp., 811 F.Supp. 651 (M.D. Fla. 1992). Finally, the Plaintiff states that the U.S. Department of Justice promulgated extensive guidelines on August 4, 1994, which provide that "[a] communication with a former employee of an organization that is represented by counsel shall not be considered to be a communication with the organization for purposes of this part." See 59 Fed. Reg. 39910.

In response, the Defendant asserts that the Defendant's former employees with whom Defendant knows the Justice Department attempted to interview ex parte were all "managerial"

employees who were responsible for making, or had knowledge of, several important decisions at issue in this case. The Defendant asserts that it has an ongoing interest in protecting Defendant's former employees' knowledge of privileged or confidential information. Further, the Defendant maintains that the Magistrate Judge's denial of the government's motion to allow ex parte contacts was mandated by this Court's prior decisions in Rentclub and Browning. The Defendant argues that those decisions are correct, particularly here, where the persons sought to be interviewed ex-parte were high ranking personnel with privileged information. Further, the Defendant asserts that the Justice Department's regulations purport to override the states' Codes of Professional Responsibility and have been "universally condemned by all authorities considering them."

Finally, the Defendant argues that the Magistrate Judge's ruling is correct in light of [illegible] Weitzenhoff, 1 F.3d 1523 (9th Cir. 1993), amended and superseded on denial of rehearing en banc, 35 F.3d 1275 (1994), cert. denied, Mariani v. U.S., 115 S.Ct. 939 (1995). The Defendant asserts that in Weitzenhoff, the Ninth Circuit increased the potential liability of all Defendant's current and former managerial employees by its interpretation of 33 U.S.C. § 1319(C)(2)(a). Under § 1319(C)(2)(a), any person who "knowingly violates [various sections of the Act] . . . or any permit condition or limitation . . . [commits a felony]." In Weitzenhoff, the Court construed the term "knowingly" to require that a person know that he was discharging the pollutants in question, not that he knew that his conduct was violating the terms of the Act or a permit. 35 F.3d at 1284. The Defendant asserts that in light of the Supreme Court's denial of certiorari, Defendant's counsel concluded that past and present employees of the Defendant would have to be informed of their Fifth Amendment privileges

against self incrimination before giving deposition testimony. The Defendant further states that various former employees of the Defendant have retained separate counsel to represent them, and that those represented by counsel have invoked the Fifth Amendment when deposed. Additionally, the Defendant notes that the Magistrate Judge's Order directs counsel for the Plaintiff to advise a witness, who is not represented by counsel and with whom the Plaintiff wishes to communicate with other than at a deposition, that he or she may be subject to potential criminal prosecution under the Clean Water Act.

The Court finds that the Order by the Magistrate Judge was not clearly erroneous or contrary to the law. First, this Court has held that a former employee may be considered a "party" for purposes of Model Rule 4.2. Rentclub, 811 F.Supp. at 657. In Rentclub the Court stated:

> Privileged communications present a distinct problem with respect to contact with former employees, thus *ex parte* contact should be barred to prevent disclosure of any inadvertent confidential communications. . . The interest of the corporation in protecting privileged information acquired by an employee during the course of employment from disclosure to an opponent in litigation remains after the employee leaves the corporation.

Id. at 657-58. The Court agrees that the decision in Rentclub is applicable here, where the Defendant has demonstrated an interest in protecting privileged information. Further, the Magistrate Judge's Order does not prohibit the Justice Department's informal interviews with the Defendant's former employees, but rather requires that counsel for the Defendant be notified in advance and be given the opportunity to be present. Finally, in light of the potential criminal liability of the former employees sought to be interviewed, the Magistrate Judge properly ruled that before the Plaintiff's counsel could communicate with a witness not represented by counsel,

the Plaintiff's counsel would have to advise that person of his or her possible prosecution under the Act.

II. Motion to Disqualify Counsel

The Defendant objects to the portion of the Magistrate Judge's Order which states, "Defendant's motion to disqualify plaintiff's current counsel is DENIED." The Defendant states that it primarily seeks to disqualify Plaintiff's counsel based on the impropriety of two ex parte meetings that occurred over a period of two days in Australia with Mr. Robert H. French, the former Senior Vice President of the Defendant. The Defendant asserts that Mr. French had personal knowledge of confidential and attorney-client privileged information, and that his statements might be admissions against the corporation or his actions might be imputed to the corporation. The Defendant further asserts that the conduct of Plaintiff's counsel in the instant case satisfies the Eleventh Circuit two-prong test for disqualification:

> First, although proof of actual wrongdoing is not required, there must exist a reasonable possibility that some specifically identifiable impropriety did in fact occur. Second, the likelihood of public suspicion or obloquy must outweigh the social interests that will be served by the attorney's continued participation in the case.

Norton v. Tallahassee Memorial Hosp., 689 F.2d 938 (11th Cir. 1982).

Even assuming, however, that the Court finds that the Plaintiff's counsel created a reasonable possibility of impropriety, the Court does not find persuasive the Defendant's argument that the second prong, the attorney's continued participation is outweighed by social interests, has been satisfied. Thus, the Court finds that the Magistrate Judge's Order on the Motion to Disqualify was not clearly erroneous or contrary to the law.

Upon consideration of the foregoing, it is hereby **ORDERED and ADJUDGED** that the United States' Objections to the Magistrate Judge's Order on the United States' Motion for an Order Allowing Ex-Parte Contacts with Former Employees (Dkt. 58) and the Defendant's Objections to the Magistrate Judge's Order on Defendant's Motion to Disqualify Counsel (Dkt. 66) are **DENIED**, and the Magistrate Judge's Order is **AFFIRMED** with respect to the subject of said objections.

DONE AND ORDERED, at Tampa, Florida, this 26th day of April, 1995.

RALPH W. NIMMONS, JR.
UNITED STATES DISTRICT JUDGE

Copies to: Counsel of record

Exhibit_____(GHB-43)

IN THE UNITED STATES DISTRICT COURT
FOR THE MIDDLE DISTRICT OF FLORIDA
FORT MYERS DIVISION

UNITED STATES OF AMERICA, Plaintiff, v. AVATAR HOLDINGS, INC., and FLORIDA CITIES WATER COMPANY, INC., Defendants.	CIVIL ACTION NO. 93-281-CIV-FTM-21

REVISED AMENDED COMPLAINT

The United States of America, by authority of the Attorney General, acting at the request of the Administrator of the U.S. Environmental Protection Agency ("EPA"), alleges as follows:

NATURE OF ACTION

1. This is a civil action brought pursuant to section 309(b) of the Clean Water Act ("the Act"), 33 U.S.C. § 1319(b), for civil penalties for violations of section 301 of the Act, 33 U.S.C. § 1311, and of the conditions and limitations of National Pollutant Discharge Elimination System ("NPDES") permits issued by EPA pursuant to section 402 of the Act, 33 U.S.C. § 1342. Notice of the commencement of the action has been provided to the State of Florida.

JURISDICTION AND VENUE

2. This Court has jurisdiction over the subject matter of this action under 28 U.S.C. §§ 1331, 1345, and 1355, and section 309(b) of the Act, 33 U.S.C. § 1319(b).

3. Venue is proper in the Middle District of Florida pursuant to 28 U.S.C. §§ 1391(b) and (c) and 1392, and section 309(b) of the Act, 33 U.S.C. § 1319(b).

THE DEFENDANTS

4. Defendant Avatar Holdings, Inc. is a Delaware corporation which resides and does business in Florida.

5. Defendant Florida Cities Water Company, Inc., is a subsidiary of Avatar Holdings, Inc., and is a Florida corporation that resides and does business in Florida.

6. As the parent company of Florida Cities Water Company, Inc., Defendant Avatar Holdings, Inc. directly controls the management of Florida Cities Water Company's environmental compliance practices, and is thereby directly responsible for the acts and [illegible] thus, each subsequent reference to "Defendants" herein should be read to include Avatar Holdings, Inc., acting through Florida Cities Water Company.

7. Each of the defendants is a "person" within the meaning of section 502(5) of the Act, 33 U.S.C. § 1362(5).

GENERAL ALLEGATIONS

8. At times relevant herein, Defendants have owned and operated privately owned wastewater treatment plants known as the Barefoot Bay Wastewater Treatment Plant, Carrollwood Wastewater Treatment Plant, and Waterway Estates Wastewater Treatment Plant, all located in the State of Florida.

9. At times relevant herein, Defendants have collected wastewater from residential and/or commercial sources,

treated that wastewater at the various wastewater treatment plants listed in the preceding paragraph, and then discharged that wastewater either directly or indirectly into waters of the United States.

10. At times relevant herein, Defendants have caused the "discharge of pollutants" within the meaning of section 502(12) of the Act, 33 U.S.C. § 1362(12), from the treatment plants listed in paragraph 8 above through a "point source" within the meaning of section 502(14) of the Act, 33 U.S.C. § 1362(14), into a "navigable water" within the meaning of section 502(7) of the Act, 33 U.S.C. § 1362(7).

11. Section 301(a) of the Act, 33 U.S.C. § 1311(a), prohibits the discharge of pollutants by any person except as in compliance with certain sections of the Act, including the requirement that a person obtain a National Pollutant Discharge Elimination System (NPDES) permit for discharges to waters of the United States.

12. At times relevant herein Defendants were required by NPDES permits to submit monthly discharge monitoring reports ("DMRs") to EPA containing the results of the required sampling for each month, and reporting the actual number of any permit exceedances. On each report, the Defendants were required to certify, by the signature of a principal executive officer or authorized agent, that the submitted information is true, accurate and complete.

13. Subsection 309(d) of the Act, 33 U.S.C. § 1319(d), provides, in part, that any person who violates, inter alia, section 301 of the Act, 33 U.S.C. § 1311, including any permit condition or limitation implementing that section, violates any condition or limitation in a NPDES permit issued under section 402 of the Act, 33 U.S.C. § 1342, or violates any order issued by EPA under section 309(a) of the Act, 33 U.S.C. § 1319(a), shall be subject to a civil penalty not to exceed $25,000 per day for each such violation.

14. Each occurrence of a (1) discharge without a NPDES permit; (2) violation of an EPA Administrative Order; (3) discharge at an unpermitted location; (4) violation of an effluent limitation or other condition in a NPDES permit constitutes a separate violation of section 301 [illegible] U.S.C. § 1311 punishable in accordance with section 309(d) of the Act, 33 U.S.C. § 1319(d).

FIRST CLAIM FOR RELIEF
(Barefoot Bay)

15. Paragraphs 1 through 14 are realleged and incorporated herein by reference as if fully set forth below.

16. Pursuant to section 309(a) of the Act, 33 U.S.C. § 1319(a), on September 26, 1990, EPA issued an Administrative Order (No. 90-106) to Defendant Florida Cities Water Company, finding it in violation of the Act for discharging pollutants from its Barefoot Bay plant into waters of the United States, a drainage canal leading to the Sebastian Creek, without a valid NPDES permit and prescribing certain interim effluent limitations

and monitoring requirements on pollutants discharged from the Barefoot Bay plant into the waters of the United States.

17. On repeated occasions (during the period in or about November 1990 to June 1991), Defendants violated EPA Administrative Order No. 90-106 by discharging effluent from the Barefoot Bay Treatment Plant which exceeded the Total Suspended Solids daily maximum limitation in that Order.

18. On repeated occasions (during the period in or about 1990-1991), Defendants violated EPA Administrative Order No. 90-106 by discharging effluent from the Barefoot Bay Treatment Plant which exceeded the Fecal Coliform daily maximum limitation in that Order.

19. On at least one occasion (May 1991), Defendants violated EPA Administrative Order No. 90-106 by discharging effluent from the Barefoot Bay Treatment Plant which did not meet the Dissolved Oxygen daily minimum requirement in that Order.

20. On at least one occasion (in or about October 1990), Defendants violated EPA Administrative Order No. 90-106 by discharging effluent from the Barefoot Bay Treatment Plant which exceeded the Biological Oxygen Demand (BOD) daily maximum limitation in that Order.

21. On at least one occasion (in or about October 1990), Defendants violated EPA Administrative Order No. 90-106 by discharging effluent from the Barefoot Bay Treatment Plant which exceeded the Biological Oxygen Demand (BOD) monthly average maximum limitation in that Order.

22. On at least one occasion (in or about November 1990), Defendants violated EPA Administrative Order No. 90-106 by discharging effluent from the Barefoot Bay Treatment Plant which exceeded the pH daily maximum limitation in that Order.

23. Beginning on or about November 1, 1991, Defendants were authorized by NPDES Permit Number FL0042293, subject to certain terms and conditions, to discharge pollutants from the Barefoot Bay Wastewater Treatment Plant into a drainage canal leading to the north prong of Sebastian Creek.

24. In at least seven months (in or about September 1992, October 1992, November 1992, December 1992, January 1993, February 1993, and March 1993), Defendants discharged pollutants from the Barefoot Bay Treatment Plant in excess of the Total Residual Chlorine daily maximum limitation [illegible] FL0042293.

25. On at least three occasions (during the periods in or about September-October 1992, May 1993, and February 1994), the effluent from the Barefoot Bay Treatment Plant failed the test for chronic whole effluent toxicity in NPDES Permit Number FL0042293.

26. On a weekly basis during the period in or about November 1991 and continuing through at least June 1993, and on at least two occasions in November 1993, Defendants failed to monitor biological oxygen demand (BOD) at the Barefoot Bay Treatment Plant, as required by NPDES Permit No. FL0042293.

27. On a daily basis during the period on or about February 1, 1992 and continuing through at least June 28, 1993, Defendants failed to test for total residual chlorine (TRC) at the Barefoot Bay Treatment Plant using the method specified by Part I, Section A-2 of NPDES Permit No. FL0042293.

SECOND CLAIM FOR RELIEF
(Carrollwood)

28. Paragraphs 1 through 14 are realleged and incorporated herein by reference as if fully set forth below.

29. Beginning on or about July 1, 1991, Defendants were authorized by NPDES Permit Number FL0029319, subject to certain terms and conditions, to discharge pollutants from the Carrollwood Wastewater Treatment Plant into the Sweetwater Creek.

30. In at least three months (in or about October, November, December 1991), Defendants discharged pollutants from the Carrollwood Treatment Plant in excess of the Total Suspended Solids monthly average limitation in Permit Number FL0029319.

31. On repeated occasions (in or about October, November, December 1991), Defendants discharged pollutants from the Carrollwood Treatment Plant in excess of the Total Suspended Solids daily maximum limitation in Permit Number FL0029319.

32. In at least five months (during the period in or about July-November 1991), Defendants discharged pollutants from the Carrollwood Treatment Plant in excess of the Total Phosphorus monthly average limitation in Permit Number FL0029319.

33. On repeated occasions (during the period in or about July-November 1991), Defendants discharged pollutants from

the Carrollwood Treatment Plant in excess of the Total Phosphorus daily maximum limitation in Permit Number FL0029319.

34. On repeated occasions (during the period in or about July-October 1991), Defendants discharged pollutants from the Carrollwood Treatment Plant in excess of the Fecal Coliform daily maximum limitation in Permit Number FL0029319.

35. In at least four months (during the period in or about July-November 1991), Defendants discharged pollutants from the Carrollwood Treatment Plant in excess of the Total Nitrogen monthly average limitation in Permit Number FL0029319.

36. On repeated occasions (during the period in or about July-November 1991), Defendants discharged pollutants from the Carrollwood Treatment Plant in excess of the Total Nitrogen daily maximum limitation in Permit Number FL0029319.

37. In at least one month (in or about October 1991), Defendants discharged pollutants from the Carrollwood Treatment Plant in excess of the Carbonaceous Biochemical Oxygen Demand monthly average limitation in Permit Number FL0029319.

38. On at least two occasions (in or about July and October 1991), Defendants discharged pollutants from the Carrollwood Treatment Plant in excess of the Carbonaceous Biochemical Oxygen Demand daily maximum limitation in Permit Number FL0029319.

39. On repeated occasions (during the period in or about July-December 1991), Defendants discharged pollutants from

the Carrollwood Treatment Plant in excess of the Total Residual Chlorine daily maximum limitation in Permit Number FL0029319.

THIRD CLAIM FOR RELIEF
(Waterway Estates)

40. Paragraphs 1 through 14 are realleged and incorporated herein by reference as if fully set forth below.

41. During the period on or about October 1, 1988 to October 31, 1989, Defendants discharged pollutants from the Waterway Estates Wastewater Treatment Plant into the Caloosahatchee River without a NPDES permit.

42. Beginning on or about November 1, 1989, Defendants were authorized by NPDES Permit Number FL0030325, subject to certain terms and conditions, to discharge pollutants from the Waterway Estates Wastewater Treatment Plant directly into the Caloosahatchee River via "Outfall 001."

43. On each day during the period on or about November 1, 1989 to July 14, 1991, Defendants discharged pollutants from the Waterway Estates Treatment Plant indirectly into the Caloosahatchee River via a tributary canal which was not a permitted discharge location during the referenced period.

44. In at least nine months (each month during the period in or about July 1991 to March 1992), Defendants discharged pollutants from the Waterway Estates Treatment Plant in excess of the Total Nitrogen concentration limitation in Permit Number FL0030325.

45. In at least nine months (each month during the period in or about July 1991 to March 1992), Defendants

discharged pollutants from the Waterway Estates Treatment Plant in excess of the Total Nitrogen loading limitation in Permit Number FL0030325.

46. On at least three occasions (in or about February 1992, April 1992, and June 1992), the effluent from the Waterway Estates Treatment Plant failed the test for chronic whole effluent toxicity in Permit Number FL0030325.

RELIEF

47. Pursuant to section 309(b) and (d) of the Act, 33 U.S.C. §§ 1319(b) and (d), Defendants are liable for civil penalties up to $25,000 per day for each violation of the Act, including up to $25,000 per day for each month in which a monthly average was violated.

WHEREFORE, Plaintiff, the United States of America, respectfully requests that:

1. The Defendants, and each of them, be ordered to pay a civil penalty up to $25,000 per day for each violation of the Act; and

2. This Court grant such other relief as it deems just and appropriate.

MEMORANDUM IN SUPPORT OF DEFENDANT FLORIDA CITIES WATER COMPANY'S MOTION TO STRIKE

("Florida Cities") motion to strike the First and Second Claims for Relief in their entirety, paragraphs 15 through 39 of the Revised Amended Complaint. This Court has already ruled that Plaintiff may not amend its complaint to include claims concerning Barefoot Bay and Carrollwood. As noted by this Court, raising these claims less than three months before the close of discovery is untimely and would clearly prejudice Florida Cities.

FACTUAL BACKGROUND

On October 1, 1993, plaintiff filed its original complaint, alleging violations of the Clean Water Act by Florida Cities at one facility, its Waterway Estates wastewater treatment

plant ("Waterway Estates"). On February 27, 1995, this Court issued an order requiring that all discovery be completed by July 15, 1995, and set a trial date of October 2, 1995. This Court indicated that discovery may be extended beyond July 15, 1995 under limited circumstances, but only so long as there was no delay of the trial date.

On or about March 30, 1995, plaintiff submitted an Amended Complaint. This Amended Complaint added numerous claims concerning two new facilities, the Barefoot Bay wastewater treatment plant and the Carrollwood wastewater treatment plant, and sought to add a party, Avatar Holdings Inc. ("Avatar Holdings"). On April 14, 1995, Florida Cities filed its partial opposition to plaintiff's motion for leave to amend its complaint. On that same date, Avatar Holdings filed its opposition to plaintiff's motion to add it as a party, citing the untimely nature of the amended complaint and the prejudice to it of having to join the litigation shortly before the close of discovery.

On April 26, 1995, this Court issued its order directing plaintiff to file a revision of [illegible] amended complaint by ordering that "paragraphs 16 and 30 of the proposed Amended Complaint and any allegations relating to paragraphs 16 and 30 that are not relevant to the remaining claims shall not be permitted." Order of April 26, 1995 ("Order") at 5. Paragraph 16 of the proposed amended complaint and the related allegations referred to Barefoot Bay. Paragraph 30 of the proposed amended complaint and the related allegations referred to Carrollwood.

On or about May 4, 1995, plaintiff filed its Revised Amended Complaint. The First Claim for Relief, paragraphs 15 through 27, contains allegations concerning Barefoot Bay.

The Second Claim for Relief, paragraphs 28 through 39, contains allegations concerning Carrollwood.

ARGUMENT

Under Rule 12(f) of the Federal Rules of Civil Procedure, this Court may "order stricken from any pleading any . . . immaterial, impertinent, or scandalous matter." A motion to strike will be granted where the allegations have no possible relation to the controversy and may cause prejudice to one of the parties. Cherry v. Crow, 845 F.Supp. 1520 (M.D.Fla. 1994)

1. This Court determined that claims concerning Barefoot Bay and Carrollwood will not be permitted.

In its April 26, 1995 Order, this Court ruled that claims regarding Barefoot Bay and Carrollwood would not be permitted in the revised amended complaint. The revised amended

this Court's Order.

As the Court stated, "it is evident that even if the Plaintiff had viable claims against Barefoot Bay and Carrollwood, it should have been aware of those claims at the time of the filing of the original Complaint. Raising such claims three months before the expiration of discovery is clearly prejudicial to the Defendant." Order at 4. This statement summarized the conclusions of the Court concerning the effect of the proposed amendment on Florida Cities. The Court went on to analyze whether Avatar Holdings should be added as a party.

The Court concluded that Avatar Holdings would not be prejudiced by being added as

a party just three months before the close of discovery because "the Court will not permit portions of the amended complaint that allege claims against Barefoot Bay and Carrollwood." Order at 5. That is, the case would remain limited to its original scope, Waterway Estates. With this narrow focus to the case, the Court ruled that Avatar Holdings would not be prejudiced by "an enlargement of claims." Id.

Both Florida Cities and Avatar Holdings would have been prejudiced by a late addition of claims concerning other facilities so soon before the close of discovery. Recognizing that inequitable result, the Court determined that the claims concerning Barefoot Bay and Carrollwood would not be permitted, thus permitting Avatar Holdings to be added as a party without prejudice.

2. The new allegations have no relation to the original controversy and expansion of the litigation at this time would prejudice Florida Cities.

The original complaint included claims concerning the Waterway Estates facility only. [illegible] allegations. The revised amended complaint filed by plaintiff would greatly expand the scope of this case less than three months before the close of discovery and less than five months before trial. The claims on Barefoot Bay and Carrollwood are unrelated to the claims in the original complaint on Waterway Estates. All of the facts and most of the legal issues are different. Accordingly, Florida Cities would be prejudiced by expansion of the litigation at this time to include the claims concerning Barefoot Bay and Carrollwood.

CONCLUSION

For the reasons stated above, the First and Second Claims for Relief in the Revised Amended Complaint should be stricken.

IN THE UNITED STATES DISTRICT COURT
FOR THE MIDDLE DISTRICT OF FLORIDA
FORT MYERS DIVISION

UNITED STATES OF AMERICA, Plaintiff, v. AVATAR HOLDINGS, INC., and FLORIDA CITIES WATER COMPANY, INC., Defendants.	)	CIVIL ACTION NO. 93-281-CIV-FTM-21

UNITED STATES' MEMORANDUM IN SUPPORT OF ITS MOTION FOR RECONSIDERATION OF COURT'S ORDER ON AMENDMENT OF COMPLAINT

INTRODUCTION

The Court entered an Order on April 26, 1995 permitting the [illegible] to add Avatar Holdings, Inc. as a party, but disallowing the United States' claims for unpermitted discharges at Defendants' Barefoot Bay and Carrollwood plants. The United States respectfully requests the Court to reconsider that portion of the Order disallowing these significant claims.

BACKGROUND

This is a civil action brought on behalf of the Administrator of the U.S. Environmental Protection Agency ("EPA") pursuant to section 309(b) of the Clean Water Act ("the Act"), 33 U.S.C. § 1319(b), for civil penalties for violations of section 301 of the Act, 33 U.S.C. § 1311, and of the conditions and limitations of National Pollutant Discharge Elimination System

("NPDES") permits issued by EPA pursuant to section 402 of the Act, 33 U.S.C. § 1342. The Complaint was filed on October 1, 1993, a proposed Amended Complaint was filed on March 31, 1995, and a Revised Amended Complaint was filed in accordance with the Court's Order of April 26, 1995 on May 5, 1995. Discovery closes on July 15, 1995. Trial has been set for the trial term commencing October 2, 1995.

Defendant Florida Cities Water Company ("Florida Cities") is currently the NPDES permit holder for six wastewater treatment plants in operation in Florida, some of which have been the subject of federal, state, and/or local enforcement actions for violations of applicable environmental laws and regulations. Defendant Avatar Holdings, Inc. is Florida Cities' parent company. Defendants collect and treat wastewater from their customers and then discharge those wastewaters into the waters of the United States. The wastewater discharges contain pollutants which may not be discharged into waters of the United States except in compliance with an NPDES permit.

The original Complaint alleged violations at one of Defendants' plants, the Waterway Estates plant in North Ft. Myers. At a Preliminary Pretrial Conference held before Magistrate Judge Swartz on February 15, 1995, the United States requested and received leave to amend its Complaint within sixty days to add claims at additional facilities. Defendant Florida Cities did not object. Transcript at 6. The Court then proceeded to set discovery and other deadlines.

The United States filed its proposed Amended Complaint on March 31, 1995, well before the April 15, 1995 deadline set by the Court. Because the Amended Complaint added both additional claims and a new party, Avatar Holdings, the United States also filed a Motion to Add Party, which the Court subsequently construed as a Motion to amend the complaint as well as to add a party and to which the Court ordered an expedited response. Order, April 10, 1995. Defendant Florida Cities subsequently filed a response captioned "Defendant's Memorandum in Partial Opposition to Plaintiff's Motion for Leave to Amend Complaint" in which it argued that paragraphs 16 and 30 of the Amended Complaint should be barred on grounds of futility.

On April 26, 1995 the Court ruled that the United States could amend its Complaint to add claims relating to violations at two additional facilities, Barefoot Bay and Carrollwood, and to add Avatar Holdings, Inc. as a party, but prohibited the United States from asserting claims for unpermitted discharges at the two additional facilities. The Court's ruling is based primarily on its finding that the addition of the unpermitted discharge claims would be futile and, secondarily, on its view that the filing of the unpermitted discharge claims was untimely and would be prejudicial to Florida Cities.

Because the United States was earlier barred by Local Rule 3.01(b) from briefing the futility issue, the United States urges the Court to give it de novo review in the context of the instant

motion.[1] The United States contends that such a review will demonstrate that the claims are not futile and that the United States should therefore be allowed to include them in its Amended Complaint. The United States also contends that Defendants will not be unduly prejudiced by inclusion of the two additional unpermitted discharge claims and that leave to amend should therefore not be denied on timeliness grounds.

ARGUMENT

I. The Consent Orders

Paragraphs 16 and 30 of the proposed Amended Complaint, which are at issue here, read in their entireties as follows:

> 16. During the period on or about April 1, 1990 to October 31, 1991, Defendants discharged pollutants from the Barefoot Bay Treatment Plant into the Sebastian River, without a NPDES permit.
>
> 30. During the period in or about August 1990 to June 1991, Defendants discharged pollutants from the Carrollwood Treatment Plant into the Sweetwater Creek, without a NDPES permit.

While not denying that it in fact had discharged without a permit in violation of the Clean Water Act, Florida Cities argued that it would be futile to permit these claims to stand because they had already been settled in EPA administrative orders. Florida Cities is wrong. As is clear from the terms of the administrative orders, the violations that were resolved administratively are separate and distinct from those alleged in paragraphs 16 and 30 of the Amended Complaint. Accordingly, the

---

[1] Local Rule 3.01(b) precludes the filing of a reply brief unless requested by the Court. Because the issue of futility was first raised in Florida Cities' opposition to the United States' Motion to Add Party, the United States was never afforded the opportunity to brief that issue.

United States is not barred from asserting these claims at this time.

This dispute is governed by the provisions of Section 309(g)(6)(A)(iii), 33 U.S.C § 1319(g)(6)(A)(iii), which provides in pertinent part as follows:

> **any violation** ... for which the Administrator...has issued a final order not subject to further judicial review and the violator has paid a penalty assessed under this subsection...shall not be the subject of a civil penalty action under subsection (d) of this section....

This provision is straightforward. Violations that are expressly resolved in a final administrative order, and for which the violator has paid a penalty, may not be the subject of a subsequent judicial proceeding for civil penalties pursuant to Section 309(d). Section 309(g)(6)(A)(iii) is limited in scope, however. The statute refers to specific **violations** that have been resolved by the payment of a penalty, not to generalized conduct. This distinction is important because, as the Act makes clear, each day that illegal conduct continues constitutes a separate day of violation, and may be penalized separately. 33 U.S.C. §1319(d). See Atlantic States Legal Foundation, Inc. v. Tyson Foods, Inc., 897 F.2d 1128, 1137-38 (11th Cir. 1990).

When examined closely, it is clear that the administrative orders and Florida Cities' payments under those orders, resolved only a limited number of past violations, i.e., those that were specifically referenced in the orders, and no others. Paragraphs 16 and 30 of the proposed Amended Complaint allege only violations that occurred after the administrative orders became

final. For this reason, Section 309(g)(6)(A)(iii) does not bar the United States from bringing these claims now. Each of the administrative orders will be discussed in turn.

The order relating to Barefoot Bay is styled "Consent Agreement and Order Assessing Administrative Penalties" and is dated November 6, 1991. Exhibit A. The three paragraphs critical to the instant motion, paragraphs II.4, III.2, and IV.1, read as follows:

> Respondent **has violated** Section 301(a) of the Act, 33 U.S.C. Section 1311(a), by discharging pollutants into waters of the United States without a valid NPDES permit issued pursuant to Section 402 of the Act (33 U.S.C. 1342), **on September 14, 1989** from its Barefoot Bay WWTP into a drainage canal leading to the Sebastian River.
>
> . . . .
>
> Florida Cities Water Company **shall** pay $5,000 for its past violations . . . cited above. . . .
>
> This Consent Agreement and Order represents **full monetary settlement** of the proposed administrative penalties sought by EPA **for the underlying violations as alleged in the Complaint.**

[Emphasis added.]

In its brief on the subject, Florida Cities overlooks the critical language of the second paragraph, which makes absolutely clear that the Administrative Order only resolved the violation on September 14, 1989. This conclusion is further buttressed by the provisions of the third paragraph which makes it clear that the only violations being resolved were those alleged in the Administrative Complaint. As Florida Cities concedes, the only violation alleged in the Administrative Complaint, exhibit B, was

the illegal discharge occurring on September 14, 1989. There is no ambiguity here. When the relevant portions of the Administrative Order and Administrative Complaint are read together, the conclusion becomes inescapable: as a matter of law, the only violation Florida Cities resolved in the Administrative Order was the unpermitted discharge on September 14, 1989.

The order relating to Carrollwood is styled "Consent Agreement and Order Assessing Administrative Penalties" and is dated April 19, 1991. Exhibit C. The two paragraphs critical to the instant motion, paragraphs II.4 and III.1 read as follows:

> Respondent has violated Section 301(a) of the Act, 33 U.S.C. Section 1311(a), by discharging pollutants into waters of the United States without a valid NPDES permit issued pursuant to Section 402 of the Act, 33 U.S.C. Section 1342, during the period of June 1987 through July 1990.
>
> . . . .
>
> Florida Cities Water Company shall pay $15,000 for its past violations . . . cited above. . . .

[Emphasis added.]

Again, Florida Cities ignores the second paragraph of the Order, which makes clear that the only violations being settled were the unpermitted violations during the period June 1987 through July 1990. When the two paragraphs quoted above are read together, as a matter of law, there simply can be no other conclusion. Moreover, it is significant that the Carrollwood consent order, unlike the Barefoot Bay consent order, does not contain language to the effect that the order settles the violations alleged in the complaint. The Administrative

Complaint for Carrollwood, exhibit D, is dated September 25, 1990 and alleges that Florida Cities had been discharging without a permit "since June 1987." By not referring in the consent order to the allegation in the complaint, and by referring instead in to a finite period of time, the parties clearly signified their intention to limit the settlement to the time period specifically referenced in the consent order.

The Court's Order cites to language contained in section III in the Administrative Orders as support for the notion that EPA intended to resolve all violations at Barefoot Bay and Carrollwood. This reliance is misplaced. The language cited by the Court comes from Section 309(g)(3) of the Act, 33 U.S.C. § 1319(g)(3), and merely describes the factors that EPA or the Court should consider in determining an appropriate penalty amount to resolve a specific set of violations. It does not describe the violations being resolved in a particular action.

Florida Cities argues that the consent orders settled all unpermitted discharge violations at Barefoot Bay and Carrollwood, past and future, whether specifically referenced or not in the consent orders. This argument is nonsensical. Essentially, Florida Cities argues that, in exchange for its payment of $6,000 at Barefoot Bay and $15,000 at Carrollwood, it was absolved for all time from being subjected to additional penalties no matter how long it continued to discharge without a permit and no matter what the environmental consequences of its discharges were.

Moreover, Florida Cities' argument flies in the face of

applicable law. It is axiomatic that "since consent decrees and orders have many of the attributes of ordinary contracts, they should be construed basically as contracts...." United States v. ITT Continental Baking Co., 420 U.S. 223, 236 (1975). Under contract law, the terms of an unambiguous contract are exclusively contained within the four corners of the document itself, and "the instrument must be construed as it is written." Id. at 236. Each of the two administrative orders is unambiguous and therefore must be construed as it was written. Clearly, as written, each order settled only the violation(s) explicitly referenced therein.

Florida Cities, which now holds six NPDES permits for its separate facilities, is a sophisticated corporate player, represented by experienced counsel, heavily involved in activities that are pervasively regulated by both [illegible] and USEPA. The record demonstrates that high-level officers of Florida Cities and Avatar Holdings, including counsel, were involved in the negotiations with EPA that led to issuance of the orders in question. In light of these facts, it is simply disingenuous for the company to claim that it understood the terms and provisions of the consent orders to be anything other than what were clearly stated in the orders themselves.[2]

---

[2] An October 4, 1991, memorandum from Avatar's Vice President and General Counsel indicates that he personally reviewed the Barefoot Bay order. Exhibit E. It is also quite apparent from this memorandum that counsel thought Florida Cities had negotiated a favorable settlement, and wanted to close the deal quickly. Of particular note are counsel's observations that he "was very pleasantly surprised with the format and especially the minimal

Florida Cities attempts to bootstrap its argument by relying on a number of largely irrelevant exhibits, which serve only to obfuscate, not crystallize, the issue at bar. As discussed above, Section 309(g)(6)(A)(iii) bars subsequent claims for civil penalties only for those violations that were resolved in final administrative orders. For this reason, Florida Cities' reliance on the administrative compliance orders (exhibits 1 and 8 to Florida Cities' brief) is misplaced. These orders do not penalize Florida Cities for the unpermitted discharges at Barefoot Bay and Carrollwood, but impose requirements to ensure that EPA could assess the nature of the unpermitted discharges at those facilities. Because they did not impose a penalty, these orders have no relevance under section 309(g)(6)(A)(iii).

For the same reason, EPA's Show Cause Notice relating to Barefoot Bay (exhibit 2 to Florida Cities' brief) is irrelevant. While the Notice refers to ongoing unpermitted discharges, the reason for its issuance was to command Florida Cities to appear at EPA's offices "to show cause why this agency should not refer the matter to the U.S. Attorney for initiation of civil or criminal proceedings **or institute administrative proceedings to assess penalties.** [Emphasis added]. Thus, by its terms the Notice did not assess penalties, but rather informed Florida Cities that EPA might do so in a separate proceeding. EPA, in

---

penalty of $6,000 [the maximum possible penalty for the one-day violation was $25,000]" and his belief that "it is in the best interest of Florida Cities Water Company to conclude this matter as quickly and quietly as possible."

fact did commence a separate proceeding for the violations at Barefoot Bay. But the only illegal discharge resolved by that separate proceeding was that occurring on September 14, 1989. While Florida Cities could have sought to settle all potential claims (and pay the higher penalty which would have resulted), it did not. Indeed, as noted above, Florida Cities' counsel delighted in the low one-day penalty and sought to conclude the matter "quickly and quietly." See Exhibit E.

The "internal Florida Cities document" which Florida Cities asserts "was understood as resolving all allegations of discharges without an NDPES permit at Barefoot Bay" (exhibit 4 to Florida Cities' brief) does nothing of the sort. This document, like EPA's letter of September 14, 1992 (exhibit 6 to Florida Cities' brief), merely says that EPA had deactivated the Barefoot Bay compliance order.[3] Even assuming arguendo that this "internal document" does manifest the understanding suggested by Florida Cities, a document generated by one party one and one-half years after the ratification of a contract cannot alter or amend that party's obligations which have been described

---

[3] This exhibit is not probative of anything. There is no indication who authored the document or whether that person had any personal knowledge of the prior administrative proceedings. There is also no indication of the purpose for which this document was generated or any discussion of the issue at bar. Moreover, the document was generated on May 10, 1993, one and one-half years after the issuance of the administrative penalty order. At best, this document is a post hoc interpretation of a contractual agreement that is entitled to no weight whatsoever.

In fact, at the time that it was deactivated, the compliance order had been superseded by the permit that EPA had issued for the facility.

unambiguously in that contract.

The remainder of Florida Cities' exhibits are similarly unhelpful to the discussion. EPA's letter of March 3, 1992 (exhibit 11 to Florida Cities' brief) deactivates the Carrollwood compliance order.[4] Because the order did not impose penalties, it falls outside the ambit of Section 309(g)(6)(A)(iii) and is therefore irrelevant. The cancelled checks (exhibits 5 and 10 to Florida Cities' brief) add nothing because the issue is not whether the penalties due under the administrative orders were actually paid, but what violations the penalties covered.

In short, Florida Cities' arguments are nothing more than an ill-founded attempt to avoid liability for years of continuing illegal discharges. The administrative orders are clear on their fact and demonstrate that Florida Cities only settled -- and should have known that it was only settling -- the violations specifically referenced in the consent orders. To conclude otherwise would be contrary to law, and would have the effect of rewarding Florida Cities' unlawful conduct and neutralizing EPA's enforcement efforts against this and other polluters.

II. Significance of the Unpermitted Discharges at Barefoot Bay and Carrollwood

The United States respectfully offers the Court some

---

[4] As the March 3, 1992 letter states on its face, the compliance order responds to -- and was deactivated as a result of -- Florida Cities' letter of February 10, 1992 advising EPA that it had ceased discharging from its Carrollwood plant, not because, as Florida Cities intimates in its brief, see p. 11, Florida Cities had eleven months earlier settled its liability for some three years of discharge.

background into why the claims for discharging without a permit are critical to the United States' action and why they are brought at this time. Operating a plant without a permit challenges the very integrity of the Clean Water Act and the National Pollutant Discharge Elimination System. The central prohibition of the Act declares that "the discharge of any pollutant by any person shall be unlawful," except as specified by the Act. 33 U.S.C. § 1311(a). This prohibition represents a significant change from prior federal water pollution law. The Senate Report on the 1972 amendments to the Act describes the change in both emphasis and method:

> This section [§ 301, now 33 U.S.C. § 1311] clearly establishes that the discharge of pollutants is unlawful. Unlike its predecessor program which permitted the discharge of certain amounts of pollutants under the conditions described above, this legislation would clearly establish that no one has the right to pollute -- that pollution continues because of technological limits, not because of any inherent right to use the nation's waterways for the purpose of disposing of wastes. ... The Committee believes it is important to clarify this point: **no one has the right to pollute.**

Legislative History at 1460-61 (emphasis added). See also, United States v. City of Menominee and Menominee Paper Co., 727 F. Supp. at 1122 ("No right exists to pollute our nation's waters.").

To reduce and eventually eliminate the discharge of pollutants to the nation's waters, the Act established a regulatory system to control those discharges. The Act provided that EPA would promulgate federal effluent limitations reflecting the degree of effluent control achievable by polluters using

various levels of pollution control technology. See Section 301, 33 U.S.C. § 1311; S. Rep. No. 414, 92d Cong., 1st. Sess. 42 (1971). See also E.I. Du Pont de Nemours & Co. v. Train, 430 U.S. 112, 126-29 (1977); EPA v. National Crushed Stone Ass'n, 449 U.S. 64, 69-71 (1980). Regulation of wastewater treatment plants is primarily effected through the issuance of NPDES permits under section 402 of the Act, 33 U.S.C. § 1342. The permits authorize the direct discharge of pollutants into the nation's waters, under narrowly prescribed terms and conditions. See, EPA v. California ex rel. State Water Resources Control Board, 426 U.S. 200 (1976); Natural Resources Defense Council, Inc. v. Costle, 568 F.2d 1369, 1374-77 (D.C. Cir. 1977). Each permit contains specific limitations on the amount of certain pollutants a given discharger is allowed to discharge into a specified body of water. NPDES permits also contain self-monitoring, testing, and reporting requirements which are central to the integrity of the NPDES Program. Although state and local regulators may also require certain permits for the operation of a wastewater treatment plant, any discharge of pollutants into the waters of the United States in the State of Florida must be permitted by EPA.

Florida Cities operated the Barefoot Bay Wastewater Treatment plant unlawfully for close to a decade before it even applied for an NPDES permit. Operating without a permit, it discharged pollutants into the Sebastian River on a daily basis. Simultaneously, Avatar Holdings continued to expand its Barefoot

Bay development beyond its sewage capabilities, exacerbating the situation.[5]

According to Florida Cities' own Division Manager, Larry Good, as of 1983, there were roughly 2,000 units in the development, resulting in a flow of approximately 200,000 gallons of wastewater per day. While the wastewater treatment plant had the capacity to treat one-million gallons of effluent per day, more than enough to accommodate the wastewater flow, inadequate provision had been made for the discharge of the treated effluent. The plant discharged into two percolation ponds, which together had only a 50,000-100,000 gallon/day disposal capacity. As a result, the percolation ponds overflowed on a daily basis into a drainage canal leading to the Sebastian River, and then to the Indian River, both of which are navigable waters. (The

gallons of treated effluent per day in 1983 to 300,000 per day in later years.) Notwithstanding the daily overflows to the canal, Florida Cities continued to operate the Barefoot Bay wastewater treatment plant without an NPDES permit. Moreover, Avatar Holdings continued to develop Barefoot Bay: some 300 units were added each year from 1984-89, some 200 units from 1989-90, and

---

[5] The Sebastian River discharges directly into the Indian River, not far from the Barefoot Bay plant. Deposition of William Sansbury at 45, and Exhibit F. The Indian River is an important Florida waterway to which the State has given special protection in the Indian River Lagoon System Act, ch. 90-262 (1990), which requires that all existing sewage treatment facilities discharging into the Indian River Lagoon System must be eliminated before July 1, 1995.

some 100 units in 1991. These new units were connected to the existing treatment facility which led to steadily increasing volumes of wastewater being discharged without a permit to the Sebastian River. See Deposition of Larry Good at 183-89. Florida Cities finally applied to EPA for an NPDES permit in March 1990, and one was granted in November 1991.

Unlike at Barefoot Bay, Florida Cities had an NDPES permit for Carrollwood at one point in time. The permit, valid from 1975-80 authorized Florida Cities to discharge from the Carrollwood facility into Sweetwater Creek, which flows into Tampa Bay. On September 21, 1979, as the permit expiration date approached, the Florida Department of Environmental Regulation ("FDER")[6] determined that the Carrollwood plant should no longer be allowed to discharge into Sweetwater Creek because of a "zero wasteload allocation" for the creek, and, on October 5, 1979, FDER notified Florida Cities of that determination. Exhibit G. In 1984, EPA denied Florida Cities' permit renewal application on the basis of the zero wasteload allocation, exhibit H, and Florida Cities failed to challenge that denial. 33 U.S.C. § 1369(b)(2).[7] Notwithstanding the absence of such a permit,

---

[6] FDER has since been renamed the Florida Department of Environmental Protection ("FDEP").

[7] The denial notice itself notified Florida Cities of its right to an evidentiary hearing on the permit. Florida Cities failed to avail itself of that opportunity, and is now prohibited by law from challenging the permit denial by section 509(b)(2) of the Clean Water Act, which provides as follows:

> Action of the Administrator with respect to which review could have been obtained under paragraph (1)

however, Florida Cities continued to discharge on a daily basis to the Sweetwater Creek for an additional seven years. Not until May 1991 did EPA, based on promises by Florida Cities to construct a highly advanced treatment system so that the discharge to the Sweetwater Creek would not be harmful, issue another permit, which was effective July 1, 1991. Not until January 1992, however, did Florida Cities actually cease its illegal discharges by hooking up to the Hillsborough County regional treatment system.

III. Timeliness of Amendment

In striking paragraphs 16 and 30 of the proposed Amended Complaint, the Court also indicated that the amendment was untimely and that it would result in prejudice to Florida Cities. The United States respectfully submits that, while these claims might have been brought as part of the initial complaint, filing them now will not prejudice Florida Cities. Thus, under the principles set forth by the Supreme Court in Foman v. Davis, 371 U.S. 178 (1962), the amendment should be allowed.

When the United States commenced this action by bringing suit only for the violations at the Waterway Estates facility, it was aware that Florida Cities had discharged without permits at Barefoot Bay and Carrollwod. However, it was not aware at that time -- and only learned during discovery in this action -- of

---

> of this subsection shall not be subject to judicial review in any civil or criminal proceeding for enforcement.

33 U.S.C. § 1369(b)(2).

the extent and nature of Florida Cities' operations, and particularly Avatar's role in developing Barefoot Bay in the face of continuing Clean Water Act violations. This fact pattern, summarized above, especially the evidence that the percolation ponds at Barefoot Bay were so inadequate, leading to daily violations dating back to the early 1980s, only became apparent during the course of the depositions of Florida Cities' managers in October and November 1994.

Moreover, the Defendants will not be prejudiced if the unpermitted discharge claims are included in the Amended Complaint. Florida Cities has been on notice from the very start of this litigation that its other plants were under examination. Indeed, on April 18, 1994, Florida Cities filed a Motion for Protective Order in which it sought to prevent the United States from taking discovery relating to violations at plants other than Waterway Estates. The Court, in an order issued on the same day, denied the Motion and allowed discovery into violations at the other facilities.

Additionally, at the preliminary pretrial conference in February 1995, the United States made known its intention to add additional facilities to the complaint, and obtained permission from the Magistrate Judge to do so. The proposed Amended Complaint was filed promptly in March 1995. A full six months remained between the date on which the proposed Amended Complaint was filed and the date of the trial term. Three-and-one-half months remained for completion of discovery. To date, there have

been no extensions of either date. Based on these facts, there can be no argument that any delay by the United States in formally filing the Amended Complaint resulted in undue prejudice to Florida Cities.[8] This case is readily distinguishable from Nolin v. Douglas County, 903 F.2d 1546 (11th Cir. 1990) where "both the parties and the court were fully prepared for trial and the addition of a new claim would have re-opened the pretrial process and delayed the trial." 903 F.2d at 1551.

Moreover, once this Court concludes, as we believe it must, that the proposed amendments dealing with unpermitted discharges are not futile, there is a compelling practical reason to resolve all of the claims alleged in a single proceeding. This Court has already allowed the United States to add claims against Florida Cities for violations of permit conditions at the Carrollwood and Barefoot Bay plants. As a matter of efficiency and judicial economy, it is far preferable to include all claims and all parties in the context of the instant civil action, than to separately litigate the Barefoot Bay and Carrollwood unpermitted discharge claims in a new civil action. Any perceived prejudice is readily cured by an extension in the discovery and/or trial dates, which have thus far not been requested by either

---

[8] Nor can Avatar Holdings claim prejudice, inasmuch as it has just been named as a defendant. Moreover, from the pleadings it has filed, it appears that Avatar Holdings has retained some of the same counsel who are representing Florida Cities. Thus, there will be no need for additional time for counsel to educate himself about the facts of the case.

defendant, and which the United States would not oppose.

CONCLUSION

The United States' claims for the unpermitted discharges at Barefoot Bay and Carrollwood are important to its case and are neither futile or untimely. Moreover, it would be simply be inefficient for all concerned for those claims to be brought and tried in a separate action. They are very much related to -- and should be part of -- the instant action. Accordingly, the United States respectfully requests that it be permitted to file its proposed Amended Complaint, nunc pro tunc, as of March 31, 1995.[9]

IV. General Provisions

1. This Consent Agreement and Order represents full monetary settlement of the proposed administrative penalties sought by EPA for the underlying violations as alleged in the Complaint. However, issuance of this Consent Agreement and Order does not constitute a waiver by EPA of its right to issue an administrative order pursuant to Section 309(a) of the Act, 33 U.S.C. Section 1319(a), to require any remedial actions necessary (other than penalty assessment) to address the cause of the underlying violations. In addition, issuance of this Consent Agreement and Order does not constitute a waiver by EPA of its right to seek injunctive relief pursuant to Section 309(b) of the Act, 33 U.S.C. Section 1319(b), or to seek criminal penalties for the underlying violations pursuant to Section 309(c) of the Act, 33 U.S.C. Section 1319(c). Nor, pursuant to Section 309(g)(7) of the Act, 33 U.S.C. Section 1319(g)(7) of the Act, does issuance or compliance with this Consent Agreement and

Order exempt Respondent from responsibility to comply with all requirements of the Act and of any legal order or permit issued pursuant thereto.

2. Failure by Respondent to pay in full the penalty assessed Section III, Paragraph 2 shall render the entire proposed penalty o $6,000.00 due and owing, and it shall be paid immediately in the manner provided in Section III, Paragraph 2 of the Consent Agreemen

Failure by Respondent to pay the penalty set forth in Section III, Paragraph 2 may subject Respondent to a civil action tc collect the assessed penalty, plus interest, attorney's fees, costs and an additional quarterly nonpayment penalty equal to 20 percent c the aggregate amount of such penalty pursuant to Section 309(g)(9) c the Act, 33 U.S.C. Section 1319(g)(9). In any such collection action, the validity, amount and appropriateness of the penalty and of the Consent Agreement and Order shall not be subject to review. Interest will accrue on the penalty at the rate established by the Secretary of the Treasury pursuant to 31 U.S.C. Section 3717. A late payment handling charge of twenty ($20.00) dollars will be imposed after thirty (30) days, with an additional charge of ten ($10.00) dollars for each subsequent 30-day period over which an unpaid balance remains. In addition, a six percent (6%) per annum penalty will be applied on any principal amount not paid within ninety (90) days of the effective date of this Order.

3. For purposes of federal income taxation, Respondent shall not be entitled to, and agrees not to, claim a deduction for any penalty payment made pursuant to this Consent Agreement and Order.

4. Respondent knowingly and explicitly waives its rights pursuant to Sections 309(g)(2) and (8), 33 U.S.C. Section 1319(g)(2)

and (8), to a hearing on this penalty assessment, and to judicial review of this administrative penalty assessment.

5. Each party to this Consent Agreement shall bear its own attorneys' fees, costs and expenses in this action. Should Respondent subsequently be determined to have violated the terms and conditions of this Consent Agreement, then the United States Environmental Protection Agency reserves its rights to seek payment of all attorneys' fees, costs and expenses it incurs in any actions against Respondent for noncompliance with this Consent Agreement.

V. Effective Date

This Consent Agreement and Order shall become effective thirty (30) days after the date of issuance noted below.

IN THE MATTER OF:	)	Docket No. CWA-IV 91-538
Florida Cities Water Company 4837 Swift Road, Suite 100 Sarasota, Florida 34231	)	Proceeding to Assess Class I Administrative Penalty Under Clean Water Act, Section 309(

ADMINISTRATIVE COMPLAINT

I. Statutory Authority

The following Findings are made, and Notices given under the authority vested in the Administrator of the U. S. Environmental Protection Agency ("EPA") by Section 309(g) of the Clean Water Act ("Act"), 33 U.S.C. Section 1319(g). The Administrator has delegated these authorities to the Regional Administrator of EPA Region IV, who has in turn delegated them to the Director of the Water Management Division of EPA Region IV, who hereby issues this Complaint.

II. Findings of Violation:

1. Florida Cities Water Company, ("Respondent"), a person within the meaning of Section 502(5) of the Act, 33 U.S.C. Section 1362(5), owns or operates a facility located at Barefoot Bay, Brevard County, Florida, which is a point source and discharges pollutants to the drainage canal to Sebastian River, a navigable water of the United States, all within the respective definitions established in Section 502 of the Act, 33 U.S.C. Section 1362. Respondent is therefore subject to the provisions of the Act, 33 U.S.C. Section 1251 et seq.

2. Respondent has violated Section 301(a) of the Act, 33 U.S.C. Section 1311(a), by discharging pollutants into waters of the United States without a valid NPDES permit issued pursuant to Section 402 of the Act (33 U.S.C. 1342), on September 14, 1989 from its

Barefoot Bay WWTP into a drainage canal leading to the Sebastian River.

3. EPA has consulted with the State of Florida regarding thi proposed action by mailing a copy of this document to the appropria State official, and offering an opportunity for the State to consul with EPA on this proposed penalty assessment.

III. Notice of Proposed Order Assessing A Civil Penalty

Based on the foregoing findings of violation, and pursuant to the authority of Section 309(g) of the Act, 33 U.S.C. Section 1319(g), EPA Region IV hereby proposes to issue a Final Order Assessing Administrative Penalties to Florida Cities Water Company, assessing a penalty in the amount of $6,000.00.

The proposed penalty amount was determined by EPA after taking into account the nature, circumstances, extent and gravity of the violation or violations, and Respondent's prior compliance history, degree of culpability for the cited violations, any economic benefit or savings accruing to Respondent by virtue of the violations, and Respondent's ability to pay the proposed penalty, all factors identified at Section 309(g)(3) of the Act, 33 U.S.C. Section 1319(g)(3). EPA may issue the Final Order Assessing Administrative Penalties thirty days after Respondent's receipt of this Notice, unless Respondent, within that time, requests a hearing on this Notice pursuant to the following section.

IV. Notice of Opportunity to Request A Hearing

1. Respondent may, pursuant to Section 309(g) of the Act, 33 U.S.C. Section 1319(g), request within thirty days of receipt of this Notice a hearing on the proposed civil penalty assessment, and at the hearing may contest any material fact contained in the Findings of Violation at Section II above, and the appropriateness of any penalty

amount. The request for a hearing must specify the factual and le issues which are in dispute and the specific factual and legal grounds for Respondent's defense. Any and all specific allegation not responded to by Respondent shall be deemed admitted. The procedures for the hearing, if one is requested, are set out in "Guidance on Class I Clean Water Act Administrative Penalty Procedures", a copy of which is enclosed.

2. Respondent must send any request for a hearing to:

Regional Hearing Clerk
U. S. EPA Region IV
345 Courtland Street
Atlanta, Georgia 30365

3. Be aware that should you request a hearing on this propose penalty assessment, members of the public, to whom EPA is obligatec to give notice of this proposed action, will have a right under Section 309(g)(4)(B) of the Act, 33 U.S.C. Section 1319(g)(4)(B), t be heard and to present evidence on the appropriateness of the penalty assessment. Should you not request a hearing, EPA will iss a Final Order Assessing Administrative Penalties, and only members the public who submit timely comment on this proposal will have an additional 30 days to petition EPA to set aside the Final Order Assessing Administrative Penalties and to hold a hearing thereon. EPA will grant the petition and will hold a hearing only if the petitioner's evidence is material and was not considered by EPA in the issuance of the Final Order Assessing Administrative Penalties.

4. Neither assessment nor payment of an administrative civil penalty pursuant to this section of the Act shall affect your continuing obligation to comply with the Clean Water Act and with any separate Compliance Order issued under Section 309(a) of the Ac 33 U.S.C. Section 1319(a), for the violations alleged herein.

IN THE MATTER OF:	)	Docket No. CWA-IV 90-542
Florida Cities Water Company Carrollwood Subdivision P.O. Box 5846 Sarasota, Florida 34277	)	Proceeding to Assess Class I Administrative Penalty Under Clean Water Act, Section 309(

CONSENT AGREEMENT AND ORDER
ASSESSING ADMINISTRATIVE PENALTIES

I. Statutory Authority

The following Findings are made and Consent Agreement issued unde the authority vested in the Administrator of the U.S. Environmenta Protection Agency ("EPA") by Section 309(g) of the Clean Water Act ("CWA" or the "Act"), 33 U.S.C. Section 1319(g),. The Administrato has delegated these authorities to the Regional Administrator of EP Region IV, who has in turn delegated them to the Director of the Wate Management Division of EPA Region IV, who hereby issues this Fina Order.

II. Findings of Violation

Upon consent of the parties by their attorneys and authorize officials, the Director finds:

1. Florida Cities Water Company, ("Respondent"), a person withi the meaning of Section 502(5) of the Act, 33 U.S.C. Section 1362(5) owns or operates the Carrollwood Wastewater Treatment Facility locate at 11700 Orange Grove Drive, Tampa, Florida 33618, which is a point source and discharges pollutants to the Sweetwater Creek, a navigable water of the United States, all within the respective definitions established in Section 502 of the Act, 33 U.S.C. Section 1362.

GOVERNMENT EXHIBIT C

Respondent is therefore subject to the provisions of the Act, 33 U.S.C. Section 1251 et seq.

2. On September 25, 1990, EPA Region IV issued to Respondent a notified the public of an Administrative Complaint, Docket No. CWA-90-542 which included formal findings of violation, notice of proposed assessment of a civil penalty against Respondent, and noti of Respondent's opportunity to request a hearing on the propos administrative penalty assessment. EPA Region IV has taken in consideration any public comments timely received.

3. On September 25, 1990, the State of Florida was given a opportunity to consult with EPA regarding the assessment of a administrative penalty against Respondent. EPA Region IV has take into consideration any comments received from the State.

4. Respondent has violated Section 301(a) of the Act, 33 U.S.C Section 1311(a), by discharging pollutants into waters of the Unite States without a valid NPDES permit issued pursuant to Section 402 o the Act, 33 U.S.C. Section 1342, during the period of June 1987 throug July 1990.

III. Penalty Order and Consent:

Based on the foregoing stipulations and findings, and having taken into account the nature, circumstances, extent and gravity of the violations, Respondent's prior history of compliance, degree of culpability, economic benefit or savings resulting from the violations, and ability to pay, and under the authority of Section 309(g) of the Act, 33 U.S.C. Section 1319(g), EPA Region IV hereby ORDERS AND RESPONDENT HEREBY CONSENTS, that:

1. The provisions of this Consent Agreement shall be binding upon the Respondent, its officers, directors, agents, servants, authorized representatives, employees, and successors or assigns.

2. Florida Cities Water Company shall pay $15,000 for its p violations of the Clean Water Act cited above, by mailing a money or or certified check payable to "Treasurer, United States of America" the effective date defined below, to the following address:

Regional Hearing Clerk
U.S. EPA Region IV
P.O. Box 100142
Atlanta, Georgia 30384

Respondent shall send notice of such payment, including a copy the money order or check, to the Hearing Clerk at the follow address:

Regional Hearing Clerk
U.S. EPA Region IV
Department 12
345 Courtland Street, NE
Atlanta, Georgia 30365

IV. General Provisions

1. Issuance of this Order does not constitute a waiver by EPA o its right to enforce the substantive legal requirements underlying thi administrative penalty assessment, either administratively o judicially pursuant to Section 309(a),(b), and (c) of the Act, 3 U.S.C. Sections 1319(a),(b), and (c). Nor, pursuant to Sectio 309(g)(7) of the Act, does issuance or compliance with this Orde exempt Respondent from responsibility to comply with all requirements of the Act and of any legal order or permit issued pursuant thereto.

2. Failure by Respondent to pay in full the penalty assessed in Section III, Paragraph 2 shall render the entire proposed penalty of $25,000 due and owing, and it shall be paid immediately in the manner provided in Section III, Paragraph 2 of the Consent Agreement.

Failure by Respondent to pay the penalty set forth in Sect: III, Paragraph 2 may subject Respondent to a civil action to colle the assessed penalty, plus interest, attorney's fees, costs and additional quarterly nonpayment penalty equal to 20 percent of t aggregate amount of such penalty pursuant to Section 309(g)(9) of t Act, 33 U.S.C. Section 1319(g)(9). In any such collection action, t validity, amount and appropriateness of the penalty and of the Conse: Agreement and Order shall not be subject to review. Interest wil accrue on the penalty at the rate established by the Secretary of th Treasury pursuant to 31 U.S.C. Section 3717. A late payment handlin charge of twenty ($20.00) dollars will be imposed after thirty (30 days, with an additional charge of ten ($10.00) dollars for eac subsequent 30-day period over which an unpaid balance remains. I addition, a six percent (6%) per annum penalty will be applied on an principal amount not paid within ninety (90) days of the effective dat of this Order.

3. Respondent knowingly and explicitly waives its rights pursuant to Sections 309(g)(2) and (8) of the Act, 33 U.S.C. Sections 1319(g)(2) and (8) of the Act, to a hearing on this penalty assessment, and to judicial review of this administrative penalty assessment.

greement and Order shall become effective thirty

IN THE MATTER OF:	Docket No. CWA-IV 90-542
Florida Cities Water Company P.O. Box 5846 Sarasota, Florida 34277	Proceeding to Assess Class I Administrative Penalty Under Clean Water Act, Section 309(

ADMINISTRATIVE COMPLAINT

I. Statutory Authority

The following Findings are made, and Notices given under the authority vested in the Administrator of the U. S. Environmental Protection Agency (EPA) by Section 309(g) of the Clean Water Act, 33 U.S.C. Section 1319(g), (CWA or the Act). The Administrator has delegated these authorities to the Regional Administrator of EPA Region IV, who has in turn delegated them to the Director of the Water Management Division of EPA Region IV, who hereby issues this Complaint.

II. Findings of Violation:

1. Florida Cities Water Company, (Respondent), a person within the meaning of Section 502(5) of the Act, 33 U.S.C. Section 1362(5), owns or operates the Carrollwood Wastewater Treatment Facility located on Orange Grove Drive in Tampa, Florida, which is a point source and discharges pollutants to the Sweetwater Creek, a water of the United States, all within the respective definitions established in Section 502 of the Act, 33 U.S.C. Section 1362. Respondent is therefore subject to the provisions of the Act, 33 U.S.C. Section 1251 et seq.

2. Respondent has violated Section 301(a) of the Act, 33 U.S.C. Section 1311(a), by discharging pollutants into Sweetwater

[illegible] of the United States without a valid NPDES permit
ant to Section 402 of the Act, 33 U.S.C. 1342, since June

has consulted with the State of Florida regarding this
on by, at least, mailing a copy of this document to the
tate official, and offering an opportunity for the State
th EPA on this proposed penalty assessment.

of Proposed Order Assessing A Civil Penalty

n the foregoing findings of violation, and pursuant to
of Section 309(g) of the Act, 33 U.S.C. Section
Region IV hereby proposes to issue a Final Order
inistrative Penalties to Florida Cities Water Company,
nalty in the amount of $25,000.
osed penalty amount was determined by EPA after taking
nature, circumstances, extent and gravity of the
violations, and Respondent's prior compliance history,
ability for the cited violations, any economic benefit
ruing to Respondent by virtue of the violations, and
bility to pay the proposed penalty, all factors
Section 309(g)(3) of the Act, 33 U.S.C. Section
PA may issue the Final Order Assessing Administrative
ty days after Respondent's receipt of this Notice,
ent, within that time, requests a hearing on this
t to the following section.

Opportunity to Request A Hearing

dent may, pursuant to Section 309(g) of the Act, 33
9(g), request within thirty days of receipt of this
g on the proposed civil penalty assessment, and at the
test any material fact contained in the Findings of

violation at Section II above, and the appropriateness of any penalty amount. The request for a hearing must specific factual and legal issues which are in dispute and the specific factual and legal grounds for Respondent's defense. Any and all specific allegations not responded to by Respondent shall be deemed admitted. The procedures for the hearing, if one is requested, are set out in "Guidance on Class I Clean Water Act Administrative Penalty Procedures", a copy of which is attached.

2. Respondent must send any request for a hearing to:

Regional Hearing Clerk
U. S. EPA Region IV
345 Courtland Street
Atlanta, Georgia 30365

3. Be aware that should you request a hearing on this proposed penalty assessment, members of the public, to whom EPA is obligated to give notice of this proposed action, will have a right under Section 309(g)(4)(B) of the Act, 33 U.S.C. Section 1319(g)(4)(B), to be heard and to present evidence on the appropriateness of the penalty assessment. Should you not request a hearing, EPA will issue a Final Order Assessing Administrative Penalties, and only members of the public who submit timely comment on this proposal will have an additional 30 days to petition EPA to set aside the Final Order Assessing Administrative Penalties and to hold a hearing thereon. EPA will grant the petition and will hold a hearing only if the petitioner's evidence is material and was not considered by EPA in the issuance of the Final Order Assessing Administrative Penalties.

4. Neither assessment nor payment of an administrative civil penalty pursuant to this section of the Act shall affect your continuing obligation to comply with the Clean Water Act and with a separate Compliance Order issued under Section 309(a) of the Act, 3 U.S.C. Section 1319(a), for the violations alleged herein.

ATTORNEY WORK PRODUCT

Please be advised that I have reviewed the "Administrative Complaint" and "Consent Agreement and Order Assessing Administrative Penalties" drafts forwarded to Florida Cities Water Company by EPA in conjunction with the inquiry into the possible pollutant discharges from the Barefoot Bay Wastewater Treatment Facilities. To say the least, I was very pleasantly surprised with the format and especially the minimal penalty of $6,000. Obviously, if I had my druthers, I would change the Consent Agreement so that the "Findings" were determined by the Directors with Florida Cities Water Company not admitting or stipulating to anything. However, under the prevailing circumstances, I believe it is in the best interest of Florida Cities Water Company to conclude this matter as quickly and quietly as possible.

It is very obvious to me that EPA took into full consideration the nature, circumstances, compliance history, etc. of Florida Cities Water Company and that the meetings with the EPA by the staff were extremely beneficial. Everyone associated with these meetings from the standpoint of Florida Cities Water Company is to be congratulated, in my opinion, for doing an excellent job.

If anyone receiving this memorandum has any questions thereon, I would request they contact me immediately. Otherwise, let's get this matter completed and behind us.

THIS IS A LEGAL OPINION MEMORANDUM WHICH IS LEGAL/ CONFIDENTIAL AND OF AN ATTORNEY WORK PRODUCT WHICH IS PROTECTED BY THE ATTORNEY/CLIENT PRIVILEGE. THE FURTHER DISSEMINATION OR REPRODUCTION OF THIS MEMORANDUM IS STRICTLY PROHIBITED WITHOUT THE WRITTEN PERMISSION OF THE ISSUER.

RE: NPDES Permit Application
NPDES No. FL0029319

Dear Mr. Reeves:

You are hereby notified of denial of the National Pollutant Discharge Elimination System (NPDES) permit application for the above referenced facility. This action constitutes a final permit decision under Title 40, Code of Federal Regulations, Section 124.15 (April 1, 1983).

This action will become effective thirty days from receipt of this letter, provided that no request for an evidentiary or panel hearing is granted by the Agency. If you wish to request an evidentiary hearing or a panel hearing, you must submit such request (an original and two copies) to the Regional Hearing Clerk within thirty (30) days from the receipt of this letter. The request will be timely if mailed by certified mail within a thirty (30) day time period. For the request to be valid, it must conform to the requirements of 40 CFR 124.74. A summary of these requirements is enclosed.

Since this facility is presently discharging pollutants to waters of the United States, EPA also intends to issue an Administrative Order after the permit denial effective date. The Administrative Order will contain a schedule for this facility to cease discharge, and specify interim discharge limits. You will be contacted under separate cover regarding the details of the Administrative Order.

Information on procedures and legal matters pertaining to an evidentiary or panel hearing request may be obtained by contacting Mr. Andrew Robert Greene, Attorney, Office of Regional Counsel at (404) 881-3506.

Sincerely yours,

Paul J. Traina, Director
Water Management Division

	)	
Defendants.	)	

DEFENDANT FLORIDA CITIES WATER COMPANY'S
ANSWER TO REVISED AMENDED COMPLAINT

Defendant, Florida Cities Water Company ("FCWC"), through undersigned counsel, files its Answer to the Revised Amended Complaint in the above-captioned action. Florida Cities would note that it has moved to strike paragraphs 15 through 39 of the Revised Amended Complaint in their entirety and reserves all rights to make arguments related to that motion. Defendant states:

NATURE OF ACTION

1. This is a civil action brought pursuant to section 309(b) of the Clean Water Act ("the Act"), 33 U.S.C. § 1319(b), for civil penalties for violations of

section 301 of the Act, 33 U.S.C. § 1311, and of the conditions and limitations of a National Pollutant Discharge Elimination System ("NPDES") permit issued by EPA pursuant to section 402 of the Act, 33 U.S.C. § 1342. Notice of the commencement of the action has been provided to the State of Florida.

ANSWER: These allegations are conclusions of law requiring no response. To the extent a response is required, the allegations are denied except to the extent borne out by the authorities referenced, which are the best evidence of their contents. FCWC lacks knowledge or information sufficient to form a belief regarding whether notice of commencement of this action has been given to the State of Florida.

JURISDICTION AND VENUE

2. This Court has jurisdiction over the subject matter of this action under 28 U.S.C. §§ 1331, 1345, and 1355 and section 309(b) of the Act, 33 U.S.C. § 1319(b).

ANSWER: FCWC neither admits nor denies that this Court has subject matter jurisdiction, in that this represents a conclusion of law requiring no response.

3. Venue is proper in the Middle District of Florida pursuant to 28 U.S.C. §§ 1391(b) and (c) and 1392, and section 309(b) of the Act, 33 U.S.C. § 1319(b).

ANSWER: FCWC does not dispute venue in this district.

THE DEFENDANT

4. Defendant Avatar Holdings Inc. is a Delaware corporation which resides and does business in Florida.

ANSWER: FCWC cannot answer for Avatar Holdings Inc. To the extent that a response is required, the allegation is denied.

5. Defendant, Florida Cities Water Company, Inc., is a subsidiary of Avatar Holdings Inc., and is a Florida corporation that resides and does business in

ANSWER: FCWC denies that it is a direct subsidiary of Avatar Holdings Inc. FCWC admits that it is a corporation that resides and does business in Florida.

6. As the parent company of Florida Cities Water Company, Inc., Defendant Avatar Holdings Inc. directly controls the management of Florida Cities Water Company's environmental compliance practices, and is thereby directly responsible for the acts and omissions alleged herein. Thus, each subsequent

reference to "Defendants" herein should be read to include Avatar Holdings Inc., acting through Florida Cities Water Company.

ANSWER: The first sentence is denied. The second sentence does not require an answer.

7. Each of the defendants is a "person" within the meaning of section 502(5) of the Act, 33 U.S.C. § 1362(5).

ANSWER: This allegation is a conclusion of law requiring no response.

GENERAL ALLEGATIONS

8. At times relevant herein, Defendants have owned and operated privately owned wastewater treatment plants known as the Barefoot Bay Wastewater Treatment Plant, Carrollwood Wastewater Treatment Plant, and Waterway Estates Wastewater Treatment Plant, all located in the State of Florida.

ANSWER: FCWC does not know the meaning of the statement "[a]t times relevant herein." FCWC admits that it owns and operates privately owned wastewater treatment plants known as Barefoot Bay Wastewater Treatment Plant, Carrollwood Wastewater Treatment Plant, and Waterway Estates Wastewater Treatment Plant, all located in the State of Florida.

9. At times relevant herein, Defendants have collected wastewater from residential and/or commercial sources, treated that wastewater at the various

wastewater treatment plants listed in the preceding paragraph, and then discharged that wastewater either directly or indirectly into the waters of the United States.

ANSWER: FCWC does not know the meaning of the statement "[a]t times relevant herein." FCWC admits that it collected wastewater from residential and commercial sources, treated wastewater at the various wastewater treatment plants, and then at various times discharged treated wastewater into waters of the United States.

10. At times relevant herein, Defendants have caused the "discharge of pollutants" within the meaning of section 502(12) of the Act, 33 U.S.C. § 1362(12), from the treatment plants listed in paragraph 8 above through a "point source" within the meaning of section 502(14) of the Act, 33 U.S.C. § 1362(14), into "navigable waters" within the meaning of section 502(7) of the Act, 33 U.S.C. § 1362(7).

ANSWER: FCWC does not know the meaning of the statement "[a]t times relevant herein." FCWC admits that it has caused the discharge of treated effluent through point sources at various times. The other allegations are conclusions of law requiring no response.

11. Section 301(a) of the Act, 33 U.S.C. § 1311(a) prohibits the discharge of pollutants by any person except as in compliance with certain sections of the Act, including the requirement that a person obtain a National Pollutant

Discharge Elimination System (NPDES) permit for discharges to waters of the United States.

ANSWER: FCWC neither admits nor denies these allegations which are conclusions of law requiring no response.

12. At times relevant herein Defendants were required by NPDES permits to submit monthly discharge monitoring reports ("DMRs") to EPA containing the results of the required sampling for each month, and reporting the actual number of any permit exceedences. On each report, the Defendants were required to certify, by the signature of a principal executive officer or authorized agent, that the submitted information is true, accurate and complete.

ANSWER: The allegations are denied except to the extent borne out by the permits, which speak for themselves and are the best evidence of their contents.

13. Subsection 309(d) of the Act, 33 U.S.C. § 1319(d), provides, in part, that any person who violates, inter alia, section 301 of the Act, 33 U.S.C. § 1311, including any permit condition or limitation implementing that section, violates any condition or limitation in a NPDES permit issued under Section 402 of the Act, 33 U.S.C. § 1342, or violates any order issued by EPA under section 309(a) of the Act, 33 U.S.C. § 1319(a), shall be subject to a civil penalty not to exceed $25,000 per day for each such violation.

ANSWER: These allegations are conclusions of law requiring no response.

14. Each occurrence of a (1) discharge without a NPDES permit; (2) violation of an EPA Administrative Order; (3) discharge at an unpermitted location; (4) violation of an effluent limitation or other condition in a NPDES permit constitutes a separate violation of section 301 of the Act, 33 U.S.C. § 1311 punishable in accordance with section 309(d) of the Act, 33 U.S.C. § 1319(d).

ANSWER: These allegations are conclusions of law requiring no response.

First Claim for Relief
(Barefoot Bay)

15. Paragraphs 1 through 14 are realleged and incorporated herein by reference as if fully set forth below.

ANSWER: FCWC hereby incorporates its responses to Paragraphs 1 through 14 of the Amended Complaint.

16. Pursuant to section 309(a) of the Act, 33 U.S.C. § 1319(a), on September 26, 1990, EPA issued an Administrative Order (No. 90-106) to Defendant Florida Cities Water Company, finding it in violation of the Act for discharging pollutants from its Barefoot Bay plant into waters of the United States, a drainage canal leading to the Sebastian Creek, without a valid NPDES permit and prescribing certain interim effluent limitations and monitoring requirements on

pollutants discharged from the Barefoot Bay plant into the waters of the United States.

ANSWER: The allegations are denied except to the extent borne out by the Administrative Order No. 90-106, which speaks for itself and is the best evidence of its contents.

17. On repeated occasions (during the period in or about November 1990 to June 1991), Defendants violated EPA Administrative Order No. 90-106 by discharging effluent from the Barefoot Bay Treatment Plant which exceeded the Total Suspended Solids daily maximum limitation in that Order.

ANSWER: FCWC denies this allegation except to admit that it reported some exceedences of the total suspended solids daily maximum limitations to EPA Region IV. However, all liability arising therefrom is denied.

18. On repeated occasions (during the period in or about 1990-1991), Defendants violated EPA Administrative Order No. 90-106 by discharging effluent from the Barefoot Bay Treatment Plant which exceeded the Fecal Coliform daily maximum limitation in that Order.

ANSWER: FCWC denies this allegation except to admit that it reported some exceedences of the fecal coliform daily maximum limitations to EPA Region IV. However, all liability arising therefrom is denied.

19. On at least one occasion (May 1991), Defendants violated EPA Administrative Order No. 90-106 by discharging effluent from the Barefoot Bay Treatment Plant which did not meet the Dissolved Oxygen daily minimum requirement in that Order.

ANSWER: FCWC denies this allegation except to admit that it reported an exceedence of the dissolved oxygen daily minimum limitation to EPA Region IV. However, all liability arising therefrom is denied.

20. On at least one occasion (in or about October 1990), Defendants violated EPA Administrative Order No. 90-106 by discharging effluent from the Barefoot Bay Treatment Plant which exceeded the Biological Oxygen Demand (BOD) daily maximum limitation in that Order.

ANSWER: FCWC denies this allegation except to admit that on one occasion it reported an exceedence of the biochemical oxygen demand daily limitation to EPA Region IV. However, all liability arising therefrom is denied.

21. On at least one occasion (in or about October 1990), Defendants violated EPA Administrative Order No. 90-106 by discharging effluent from the Barefoot Bay Treatment Plant which exceeded the Biological Oxygen Demand (BOD) monthly average maximum limitation in that Order.

ANSWER: FCWC denies this allegation except to admit that on one occasion it reported an exceedence of the biochemical oxygen demand monthly limitation to EPA Region IV. However, all liability arising therefrom is denied.

22. On at least one occasion (in or about November 1990), Defendants violated EPA Administrative Order No. 90-106 by discharging effluent from the Barefoot Bay Treatment Plant which exceeded the pH daily maximum limitation in that Order.

ANSWER: FCWC denies this allegation except to admit that on one occasion it reported an exceedence of the pH daily maximum limitation to EPA Region IV. However, all liability arising therefrom is denied.

23. Beginning on or about November 1, 1991, Defendants were authorized by NPDES Permit Number FL0042293, subject to certain terms and conditions, to discharge pollutants from the Barefoot Bay Wastewater Treatment Plant into a drainage canal leading to the north prong of Sebastian Creek.

ANSWER: FCWC admits it was issued National Pollutant Discharge Elimination System ("NPDES") Permit No. FL0042293 ("Permit"), which speaks for itself.

24. In at least seven months (in or about September 1992, October 1992, November 1992, December 1992, January 1993, February 1993, and March 1993),

Defendants discharged pollutants from the Barefoot Bay Treatment Plant in excess of the Total Residual Chlorine daily maximum limitation in NPDES Permit Number FL0042293.

ANSWER: FCWC denies this allegation except to admit it reported exceedences for total residual chlorine daily maximum limitations to EPA Region IV for each month specified. However, FCWC denies all liability arising therefrom.

25. On at least three occasions (during the periods in or about September-October 1992, May 1993, and February 1994), the effluent from the Barefoot Bay Treatment Plant failed the test for chronic whole effluent toxicity in NPDES Permit Number FL0042293.

ANSWER: FCWC denies this allegation except to admit it reported exceedences for the tests for chronic whole effluent toxicity for these three occasions. However, FCWC denies any liability arising therefrom.

26. On a weekly basis during the period in or about November 1991 and continuing through at least June 1993, and on at least two occasions in November 1993, Defendants failed to monitor biological oxygen demand (BOD) at the Barefoot Bay Treatment Plant, as required by NPDES Permit No. FL0042293.

ANSWER: FCWC denies this allegation.

27. On a daily basis during the period on or about February 1, 1992, and continuing through at least June 28, 1993, Defendants failed to test for total residual chlorine (TRC) at the Barefoot Bay Treatment Plant using the method specified by Part I, Section A-2 of NPDES Permit No. FL0042293.

ANSWER: FCWC admits these allegations with respect to the Barefoot Bay Treatment facility, however, FCWC denies all liability arising therefrom.

Second Claim for Relief
(Carrollwood)

28. Paragraphs 1 through 14 are realleged and incorporated herein by reference as if fully set forth below.

ANSWER: FCWC hereby incorporates its responses to Paragraphs 1 through 14 of the Amended Complaint.

29. Beginning on or about July 1, 1991, Defendants were authorized by NPDES Permit Number FL0029319, subject to certain terms and conditions, to discharge pollutants from the Carrollwood Wastewater Treatment Plant into the Sweetwater Creek.

ANSWER: FCWC admits it was issued National Pollutant Discharge Elimination System ("NPDES") Permit No. FL0029319 ("Permit"). The permit speaks for itself.

30. In at least three months (in or about October, November, December 1991), Defendants discharged pollutants from the Carrollwood Treatment Plant in excess of the Total Suspended Solids monthly average limitation in Permit Number FL0029319.

ANSWER: FCWC admits it reported some exceedences for the total suspended solids monthly average limitation for these three months. However, FCWC denies all liability arising therefrom.

31. On repeated occasions (in or about October, November, December 1991), Defendants discharged pollutants from the Carrollwood Treatment Plant in excess of the Total Suspended Solids daily maximum limitation in Permit Number FL0029319.

ANSWER: FCWC admits it reported some exceedences of the total suspended solids daily maximum limitation to EPA Region IV for these three months. However, FCWC denies all liability arising therefrom.

32. In at least five months (during the period in or about July-November 1991), Defendants discharged pollutants from the Carrollwood Treatment Plant in excess of the Total Phosphorous monthly average limitation in Permit Number FL0029319.

ANSWER: FCWC admitted it reported some exceedences of the total phosphorous monthly average limitation to EPA Region IV. However, FCWC denies all liability arising therefrom.

33. On repeated occasions (during the period in or about July-November 1991), Defendants discharged pollutants from the Carrollwood Treatment Plant in excess of the Total Phosphorous daily maximum limitation in Permit Number FL0029319.

ANSWER: FCWC admits that it reported some exceedences of the total phosphorous daily maximum limitation to EPA Region IV for these months. However, FCWC denies all liability arising therefrom.

34. On repeated occasions (during the period in or about July-October 1991), Defendants discharged pollutants from the Carrollwood Treatment Plant in excess of the Fecal Coliform daily maximum limitation in Permit Number FL0029319.

ANSWER: FCWC admits that it reported exceedences of the fecal coliform daily maximum limitation to EPA Region IV for some of these months. However, FCWC denies all liability arising therefrom.

35. In at least four months (during the period in or about July-November 1991), Defendants discharged pollutants from the Carrollwood Treatment Plant in

excess of the Total Nitrogen monthly average limitation in Permit Number FL0029319.

ANSWER: FCWC admits that it reported exceedences of the total nitrogen monthly average limitation for some of these months. However, FCWC denies all liability arising therefrom.

36. On repeated occasions (during the period in or about July-November 1991), Defendants discharged pollutants from the Carrollwood Treatment Plant in excess of the Total Nitrogen daily maximum limitation in Permit Number FL0029319.

ANSWER: FCWC admits that it reported exceedences of the total nitrogen daily maximum limitation to EPA Region IV for some of these months. However, FCWC denies all liability arising therefrom.

37. In at least one month (in or about October 1991), Defendants discharged pollutants from the Carrollwood Treatment Plant in excess of the Carbonaceous Biochemical Oxygen Demand monthly average limitation in Permit Number FL0029319.

ANSWER: FCWC admits it reported an exceedence of the carbonaceous biochemical oxygen demand monthly average limitation to EPA Region IV for one month. However, FCWC denies all liability arising therefrom.

38. On at least two occasions (in or about July and October 1991), Defendants discharged pollutants from the Carrollwood Treatment Plant in excess of the Carbonaceous Biochemical Oxygen Demand daily maximum limitation in Permit Number FL0029319.

ANSWER: FCWC admits it reported an exceedence of the carbonaceous oxygen demand daily maximum limitation to EPA Region IV for these two occasions. However, FCWC denies all liability arising therefrom.

39. On repeated occasions (during the period in or about July- December 1991), Defendants discharged pollutants from the Carrollwood Treatment Plant in excess of the Total Residual Chlorine daily maximum limitation in Permit Number FL0029319.

ANSWER: FCWC admits it reported some exceedences of the total residual chlorine daily maximum limitation to EPA Region IV during this period. However, FCWC denies all liability arising therefrom.

Third Claim for Relief
(Waterway Estates)

40. Paragraphs 1 through 14 are realleged and incorporated herein by reference as if fully set forth below.

ANSWER: FCWC hereby incorporates its responses to Paragraphs 1 through 14 of the Amended Complaint.

41. During the period on or about October 1, 1988 to October 31, 1989, Defendants discharged pollutants from the Waterway Estates Wastewater Treatment Plant into the Caloosahatchee River without a NPDES Permit.

ANSWER: FCWC admits it discharged treated effluent from the Waterway Estates Wastewater Treatment Plant into the Caloosahatchee River during the period on or about October 1, 1988 to October 31, 1989. The remaining allegations are conclusions of law requiring no response.

42. Beginning on or about November 1, 1989, Defendants were authorized by NPDES Permit Number FL0030325, subject to certain terms and conditions, to discharge pollutants from the Waterway Estates Wastewater Treatment Plant directly into the Caloosahatchee River via "outfall 001."

ANSWER: FCWC admits it was issued National Pollutant Discharge Elimination System ("NPDES") Permit No. FL0030325 ("Permit"). The other allegations are conclusions of law requiring no response. To the extent a response is required, the allegations are denied except to the extent borne out by the Permit, which speaks for itself and is the best evidence of its contents.

43. On each day during the period on or about November 1, 1989 to July 14, 1991, Defendants discharged pollutants from the Waterway Estates Treatment

Plant indirectly into the Caloosahatchee River via a tributary canal which was not a permitted discharge location during the referenced period.

ANSWER: FCWC admits that during the period on or about November 1, 1989, to July 14, 1991, it discharged pollutants from the Waterway Estates Treatment Plant into the Caloosahatchee River. Any remaining allegations are denied.

44. In at least nine months (each month during the period in or about July 1991 to March 1992), Defendants discharged pollutants from the Waterway Estates Treatment Plant in excess of the Total Nitrogen concentration limitation in Permit Number FL0030325.

ANSWER: FCWC admits that it reported some exceedences of the total nitrogen concentration limitation to EPA Region IV. FCWC denies that during July, August, and September 1991, pollutant levels in effluent discharged by FCWC were in excess of the applicable Total Nitrogen concentration limitation.

45. In at least nine months (each month during the period in or about July 1991 to March 1992), Defendants discharged pollutants from the Waterway Estates Treatment Plant in excess of the Total Nitrogen loading limitation in Permit Number FL0030325.

ANSWER: FCWC admits that it reported some exceedences of the total nitrogen loading limitation to EPA Region IV. FCWC denies that during July, August, and September 1991, pollutant levels in effluent discharged by FCWC were in excess of the applicable total nitrogen loading limitation.

46. On at least three occasions (in or about February 1992, April 1992, and June 1992), the effluent from the Waterway Estates Treatment Plant failed the test for chronic whole effluent toxicity in Permit Number FL0030325.

ANSWER: On three occasions (February 1992, April 1992, and June 1992) FCWC reported measurements for toxicity that were in excess of the numerical values specified in the permit. To the extent any remaining allegations are conclusions of law, no response is required.

Relief

47. Pursuant to section 309(b) and (d) of the Act, 33 U.S.C. §§ 1319(b) and (d), Defendants are liable for civil penalties up to $25,000 per day for each violation of the Act, including up to $25,000 per day in each month in which a monthly average was violated.

ANSWER: FCWC denies that it is liable for any civil penalties. All other allegations are conclusions of law requiring no response.

AFFIRMATIVE DEFENSES

Pursuant to Fed. R. Civ. P. 12(b), FCWC, having specifically answered each and every allegation, further defends:

First Defense

Plaintiff's Complaint fails to state a claim upon which relief can be granted.

Second Defense

Plaintiff's claims are barred because FCWC has paid administrative penalties assessed by EPA for certain violations alleged herein. See 33 U.S.C. § 1319.

Third Defense

Plaintiff's claims are barred because they were the subject of earlier settlement agreements with EPA for certain violations alleged herein.

Fourth Defense

Plaintiff's claims are barred because FCWC's application for renewal of the NPDES Permit Number FL0030325 was illegally, wrongfully, or improperly denied by EPA in 1986.

Fifth Defense

Plaintiff's claims are barred because FCWC has paid penalties assessed by the state of Florida under comparable Florida law. See 33 U.S.C. § 1319.

Sixth Defense

Plaintiff's claims are barred by the doctrines of res judicata and collateral estoppel.

Seventh Defense

Plaintiff's claims are barred by the doctrine of impossibility.

Eighth Defense

Plaintiff's claims are barred by the doctrine of estoppel.

Ninth Defense

State and local governments delayed issuing permits, enacting zoning changes, signing agreements, or granting other approvals necessary for FCWC to meet compliance schedules.

Tenth Defense

In some instances, the complaint improperly seeks duplicative penalties for the same violation.

Eleventh Defense

The Plaintiff violated the Defendants' due process rights under the Fifth Amendment.

Exhibit_____(GHB-47)

IN THE UNITED STATES DISTRICT COURT
FOR THE MIDDLE DISTRICT OF FLORIDA
FORT MYERS DIVISION

UNITED STATES OF AMERICA, Plaintiff, v. AVATAR HOLDINGS, INC., and FLORIDA CITIES WATER COMPANY, INC., Defendants.	)	CIVIL ACTION NO. 93-281-CIV-FTM-21

UNITED STATES' OPPOSITION TO DEFENDANT FLORIDA CITIES WATER COMPANY'S MOTION TO STRIKE

Defendant Florida Cities has moved to strike in their entireties the First and Second Claims for Relief in the United States' Revised Amended Complaint. The motion is spurious and should be denied.

The original Complaint filed in this action alleged violations at one of Defendants' plants, the Waterway Estates plant in North Ft. Myers. On March 31, 1995, the United States filed a proposed Amended Complaint which included a variety of claims against Defendants for violations at two additional plants, the Barefoot Bay plant in Brevard County, and the Carrollwood plant in Tampa. Defendant Florida Cities in its "Partial Opposition to Plaintiff's Motion for Leave to Amend its Complaint," urged the Court to deny the United States leave to amend its Complaint to allege unpermitted discharge violations at the Barefoot Bay and Carrollwood plants (paragraphs 16 and 30 of the proposed Amended Complaint) on grounds of futility, but

otherwise did not oppose the filing of Amended Complaint.[1] Defendant now belatedly seeks to preclude the United States from asserting all claims for violations at the two additional facilities.

In its April 26, 1995 Order, the Court sustained Florida Cities' opposition to the Barefoot Bay and Carrollwood unpermitted discharge claims, but otherwise permitted the filing of the Amended Complaint.[2] The operative language of the Court's order reads as follows:

> ...[I]t is hereby ORDERED and ADJUDGED that the United States' Motion for Leave to Add Party (Dkt. 56) is GRANTED with the limitation that paragraphs 16 and 30 of the proposed Amended Complaint and any allegations relating to paragraphs 16 and 30 that are not relevant to the remaining claims shall not be permitted.

Order, April 26, 1995 at 6.

The remaining claims are set forth in paragraphs 17-28, and 31-49. All of the allegations included in the Revised Amended Complaint relate to the remaining claims. Thus, the United States has complied fully with the letter and spirit of the Court's Order.

Florida Cities, on the other hand, has taken splices of the Order out of context, and read them in an imaginative fashion,

---

[1] In its Order of April 26, 1995, the Court noted "[t]he Defendant's opposition to the motion to amend, however, addresses only the first category of violations, for discharge without a NPDES permit." Order, April 26, 1995 at 3.

[2] On May 15, 1995, the United States filed a motion asking the Court to reconsider this Order.

thereby blatantly misconstruing the Court's Order. In so doing, Florida Cities now seeks to revisit its limited opposition to the proposed Amended Complaint by urging the Court to strike all of the claims relating to Barefoot Bay and Carrollwood. Florida Cities claims that such a result is mandated by the Court's April 26, 1995 Order.

It is abundantly clear from both the focus and text of the Order addressing revision of the proposed Amended Complaint, however, that the Court intended for the United States to withdraw only the Barefoot Bay and Carrollwood unpermitted discharge claims, not all of the claims relating to those two facilities. The Court's analysis, like Florida Cities' initial opposition to amendment of the Complaint, was limited to the unpermitted discharge claims. The operative language of the Order must be read in this context.

As the United States notes in its Memorandum in Support of its Motion for Reconsideration, Florida Cities' argument on futility in its initial opposition to the amendment of the complaint was simply wrong as a matter of law. Not content in having prevailed thus far in that effort to obfuscate, Florida Cities has launched yet another such attempt designed to shield itself from liability for polluting Florida's waters.

The Court should rebuff this latest attempt by denying the Motion to Strike.

Respectfully submitted,

LOIS J. SCHIFFER

Exhibit_____(GHB-48)

MAR 1 1995

IN THE UNITED STATES DISTRICT COURT
FOR THE MIDDLE DISTRICT OF FLORIDA
FORT MYERS DIVISION

UNITED STATES OF AMERICA, Plaintiff, v. FLORIDA CITIES WATER COMPANY, INC., Defendant.	)	CIVIL ACTION NO. 93-281-CIV-FTM-21

UNITED STATES' THIRD REQUEST FOR PRODUCTION OF DOCUMENTS

Plaintiff, the United States of America, pursuant to Rules 26 and 34 of the Federal Rules of Civil Procedure, requests Defendant Florida Cities Water Company to produce and permit the United States to inspect and copy each of the following documents in defendant's possession, custody or control. These documents shall be produced on April 17, 1995 unless such time is modified by order of the Court or by counsel for the United States, at the offices of the U.S. Department of Justice, Environment and Natural Resources Division, 1425 New York Avenue, N.W., Washington, D.C., or at such other location as agreed upon by counsel for the United States

INSTRUCTIONS

1. Unless otherwise indicated, these requests apply to all documents written, produced, drafted, or generated on or after October 1, 1988, and ending at the trial of this matter, but **exclude** documents already produced in response to the United States' First and Second Requests for Production of Documents.

2. For each document produced, indicate on the document or in some other reasonable manner, the numbered request(s) to which it responds.

3. This request covers all documents in the possession, control or custody of defendant, its parent companies, sister companies, departments, divisions, directors, officers, employees, agents, servants, consultants, attorneys and assigns.

4. Words used in the plural shall also be taken to mean and include the singular. Words used in the singular shall also be taken to mean and include the plural. "Or" and "and" shall be construed either conjunctively or disjunctively to bring within the scope of these interrogatories any information that might otherwise be construed to be outside their scope. The past tense includes the present tense where the clear meaning is not distorted by change of tense.

5. If any document is withheld under any claim of privilege or exemption, furnish a list identifying each document for which the privilege or exemption is claimed, together with the following information:

(a) its title, or if it has no title, its subject matter;

(b) the date of origin;

(c) the author or addressor;

(d) the recipient(s) of all copies; and

(e) the basis upon which privilege or exemption is claimed.

6. Please produce the complete original exact copy of each document and, unless otherwise stated, each non-identical copy (whether different from the original because of notes made on the copy or otherwise), including drafts, of each writing of every kind and description (together with all worksheets, support documents, and other relevant materials), whether inscribed by hand or mechanical, electronic, microfilm, photographic, or other means (such as by recording, film, tape or other medium) from which such information may be obtained.

DEFINITIONS

Unless otherwise indicated, the terms used in these Requests shall have the same meaning ascribed to them under the Clean Water Act.

In addition, unless otherwise stated, the following definitions shall apply to these discovery requests:

A. "Clean Water Act" means the Federal Water Pollution Control Act, as amended by the Water Quality Act of 1987, 33 U.S.C. §§ 1251-1387, including all regulations promulgated thereunder.

B. "Document" means any and all material that is written, printed, typed, photographed, recorded (electronically, magnetically, graphically or otherwise) or which is capable of being recorded in any form. It includes, but is not limited to, any logs of materials received, other logs, invoices, purchase orders, receipts, bills of lading, loading tickets, receiving tickets, shipping orders, inventories, letters and other

correspondence, offers, contracts, agreements, bids, proposals, applications, licenses, permits, reports to government agencies, other reports, minutes of meetings, sales estimates, sales reports, memoranda, handwritten or other notes, calendar or diary entries, agendas, bulletins, graphs, charts, maps, photographs, drawings, data, price lists, lists of accounts, summaries, telegraphs, teletypes, computer printouts, magnetic tapes, discs, microfilm, and microfiche.

C. "Relate(s)" or "relating to" means constituting, defining, containing, embodying, reflecting, identifying, stating, referring to, dealing with or in any way pertaining to.

REQUESTS

1. All documents requested in the United States' First and Second Requests for Production of Documents, including, but not limited to, in particular, all such documents from the files of Robert Gordon, Dennis Getman, Leon Levy, Edwin Jacobson, and Lawrence Wilkov, and all such responsive documents generated since those requests were propounded.

2. All minutes of the Board of Directors meetings of Avatar Holdings, Inc. (regardless of date).

3. All minutes of the Board of Directors meetings of the Barefoot Bay Development Corporation (regardless of date).

4. All copies of "Pipeline."

5. All FCWC monthly operating statements (regardless of date).

6. All financial reports, income statements, balance

sheets, cash flow statements, budgets and audits relating to the Barefoot Bay Development Corporation, or any predecessor corporation or corporate entity (dating back to the date that Avatar acquired GAC).

7. All documents relating to the development and financing of Barefoot Bay, including copies of all loan and/or working capital agreements (dating back to the date that Avatar acquired GAC).

8. All documents reflecting the lots developed, marketed, and/or sold at Barefoot Bay and the prices of those lots (dating back to the date that Avatar acquired GAC).

9. All documents relating to all intercompany transfers of funds relating to the development and operation of Barefoot Bay (dating back to the date that Avatar acquired GAC).

10. All documents reviewed by any expert retained by Defendant for the purpose of testifying in this case.

11. All documents Defendant intends to rely upon or introduce into evidence at trial.

Respectfully submitted,

LOIS J. SCHIFFER
Assistant Attorney General
Environment and Natural Resources
Division
U.S. Department of Justice

MEMORANDUM IN SUPPORT OF DEFENDANT'S MOTION FOR PARTIAL SUMMARY JUDGMENT

This memorandum is in support of Defendant Florida Cities Water Company's ("FCWC's"), motion for partial summary judgment. In 1986, the U.S. Environmental Protection Agency ("EPA") exceeded its specific regulatory authority by purporting to deny FCWC's application to renew its National Pollutant Discharge Elimination System ("NPDES") permit. As EPA had no legal basis to deny the permit, according to the Agency's own regulations, this action was void *ab initio*. EPA thus cannot now assert that FCWC violated the Clean Water Act ("CWA") by discharging without that permit.

As set forth below, this private utility has been bedeviled by bureaucratic carelessness and indifference, and a stubborn unwillingness by the government to admit error. For more than twenty years, the treated effluent discharged from FCWC's

Waterway Estates sewage treatment plant ("Waterway Estates") has met substantially all applicable state and federal effluent guidelines and water quality standards. EPA's claim concerning FCWC's permit is not about environmental harm, but rather asserts only a technical violation of EPA's permitting regulations. Yet, instead of acknowledging that it lacked the requisite grounds for denying FCWC's permit, a fact we believe established beyond reasonable dispute, EPA is now compounding the error by seeking civil penalties from FCWC for allegedly discharging without a permit -- the consequence of EPA's own error.

FACTUAL BACKGROUND

1. Permit History. Waterway Estates has served the people of Lee County, Florida for twenty years, providing wastewater treatment to several thousand residents since the mid-1970s. Throughout that time, the State of Florida has authorized FCWC to discharge the treated water from the facility.[1]

FCWC first received an operating permit for the Waterway Estates treatment plant on October 26, 1971, although apparently operations did not begin immediately.[2] The original design capacity for Waterway Estates was 0.33 million gallons per day

---

[1] In most states, the federal and state discharge permits are the same, as the state has been delegated authority by EPA to administer the federal program. Due to a long-standing dispute between EPA and the State of Florida, not relevant here, in Florida the state and federal governments both issue permits. The state permit imposes extensive monitoring requirements, effluent limitations, and monthly reporting requirements. The State of Florida and EPA are currently negotiating delegation of the federal program, and the program may be administered by Florida shortly.

[2] Permit No. DT-36-732, effective October 26, 1971 until April 26, 1972. Ex. 1.

("mgd"). In 1975, with the growth of population in south Florida, Waterway Estates received permission to expand its facility from 0.33 mgd to 1.08 mgd. Waterway Estates continued to receive operating permits from the State of Florida, authorizing discharges from the facility.[3]

Over most of the last twenty years FCWC, without dispute, has maintained an NPDES discharge permit for Waterway Estates.[4] Throughout this period, Waterway Estates faithfully met the strict discharge limits imposed by its state and federal permits. For example, a federal inspection in 1985 indicated that the Waterway Estates facility was in compliance, with only four minor exceptions.[5] Even EPA alleges only technical violations of permit terms in 1991 and 1992, which posed no risk to human health. To improve Waterway Estates' ability to treat wastewater, FCWC upgraded the facility to an advanced wastewater treatment plant from 1987 to 1991, at a cost of more than $4 million.

2. Purported Permit Denial. On December 8, 1986, EPA purported to deny

---

[3] Permit No. DO-36-732, effective July 14, 1972 until July 14, 1977; Permit No. DO36-2543, effective February 10, 1977 until February 10, 1981; Permit No. DO36-7407, effective April 1, 1981 until July 1, 1983; Permit No. DO36-72569, effective August 2, 1983 until August 2, 1988; Permit No. DT-36-152486; effective September 23, 1988 until November 1, 1990; Permit No. DT-36-188171, effective January 22, 1991 until June 9, 1993; Permit No. DO36-228850, effective August 25, 1993 until August 25, 1998. See Ex. 2.

[4] NPDES Permit No. FL003025, effective August 15, 1975 until August 15, 1980; NPDES Permit No. FL0030325, effective September 24, 1981 until September 24, 1986; NPDES Permit No. FL0030325, effective November 1, 1989 until September 30, 1994. See Ex. 3.

[5] The flow meter was not adequately calibrated, samples were not refrigerated, the time of sample collection and analysis was not recorded, and quality control could be improved by use of spiked samples. Letter dated May 28, 1985, from Priscilla Oliver, Compliance Section, EPA Region IV to Anthony Reeves, Vice President, FCWC. Ex. 4.

Waterway Estates' application for an NPDES permit renewal.[6] This action, taken without authority, is at issue in this litigation. The denial by EPA was based solely on a statement extracted out of context from a 1981 Florida planning document ("the DeGrove analysis"), which was mistakenly interpreted by EPA to mean that Waterway Estates had a zero waste load allocation[7] -- also called "no discharge."[8]

This conclusion was wrong in at least three respects: (1) EPA carelessly took an isolated statement in the DeGrove analysis out of context, for Waterway Estates had a waste load allocation in 1981; (2) the statement EPA relied on in the DeGrove analysis was based on an earlier, outdated assumption that Waterway Estates would eventually tie in to another facility; and (3) EPA knew as a fact in 1986 that Waterway Estates then had a wasteload allocation. In other words, the decision by EPA on Waterway Estates' permit had no basis at the time, and has no basis now.

Lest there be any doubt, let us review this matter in more detail. EPA's decision to deny Waterway Estates' permit was based solely on the understanding that Florida had determined that Waterway Estates could not discharge to the Caloosahatchee River. This was not true. In 1981, in a planning document that never became a state

---

[6] Letter dated December 8, 1986, from Bruce R. Barrett, Director, Water Management Division, EPA Region IV to A.A. Reeves, III, Vice President and General Manager, FCWC. Ex. 5.

[7] A waste load allocation is defined as that portion of a receiving water's loading capacity allocated to one of its existing or future dischargers. Loading capacity is the amount of pollution that a water can receive and still maintain water quality standards. 40 C.F.R. §§ 130.2(f), 130.2(h) (1993).

[8] Fact Sheet dated June 30, 1986, EPA Region IV at 2, Ex. 6; Deposition of Connie A. Kagey ("Kagey Deposition") at 56, Ex. 7; Bruce D. DeGrove, Caloosahatchee River Wasteload Allocation Documentation Lee County, January 1981 ("DeGrove") at 17, Ex. 8.

requirement, Florida considered how much each of several dischargers could discharge to the river. For several of its scenarios, Florida hypothetically assumed no discharges from Waterway Estates. As the 1981 DeGrove analysis explained, "[t]he Waterway Estates Treatment Plant was eliminated from further modeling due to the assumed tie-in to the Cape Coral facility and the assumed impracticality of upgrading to AWT and relocating the outfall for such a small flow."[9]

That is, based on purely hypothetical assumption that the Waterway Estates facility would hook up to another facility, the study included discharges from Waterway Estates under the listing of discharges from that regional facility instead of listing them separately. As this hook up never occurred, and within a year or two it was clear that it would not occur, Waterway Estates retained its wasteload allocation.[10]

Five years later, a staff-level EPA official came across a few pages of this unofficial planning document, misinterpreted its status and significance, took an isolated statement out of context, and concluded, wrongly, that Waterway Estates had no discharge allocation and thus could not be permitted to discharge to the Caloosahatchee River. This is crucial because, as set forth below, EPA has by regulation only four grounds on which it can deny a permit renewal. Three of them are not relevant here; the fourth, under which EPA purported to act, was the mistaken belief that the State of Florida had required the "elimination of any discharge or sludge use or disposal practice

---

[9] DeGrove at 12. Ex. 8.

[10] DeGrove at 1, 3, Ex. 8; Permit No. DO36-72569, effective August 2, 1983. In 1981, Florida permitted Waterway Estates to discharge. Permit No. DO-36-732; Permit DO36-7407. See Ex. 2.

controlled by the permit."[11]

The EPA permit writer testified under oath that she did not even have, much less read, the entire DeGrove analysis, but only the cover sheet and one page describing the hypothetical situation.[12] This misreading of a single page was the sole basis for EPA's decision to deny Waterway Estates an NPDES permit.

Yet, in 1986 EPA was officially aware that Waterway Estates continued to have a wasteload allocation for discharge to the Caloosahatchee River.[13] The fact is beyond dispute because in May 1986 the Florida Department of Environmental Regulation informed EPA, while EPA was considering Waterway Estates' permit application, that Waterway Estates had a wasteload allocation of 1.08 mgd.[14] This letter went from Florida to EPA Region IV -- to the same agency, the same Regional office, the same building, and into the very same water management office where the EPA permit writer was reviewing the permit renewal application.

This was not some bureaucratic oversight on a routine matter. Denials of permit renewals are extremely rare. Surprising as it may seem, in almost a quarter century,

---

[11] See 40 C.F.R. § 122.64(a)(4) (1993).

[12] Kagey Deposition at 87. Ex. 7.

[13] Waterway Estates had a wasteload allocation in 1975, in 1981, in 1983, and most importantly, had a wasteload allocation in 1986 when EPA denied its permit. Lower Florida River Basin Water Quality Management Plan. Florida Department of Environmental Regulation, December 1975, at III-232, III-241, Ex. 9; DeGrove at 1, 3, Ex. 8; Memorandum dated February 23, 1983, from Ron Blackburn to Phil Edwards, Wasteload Allocations for the Caloosahatchee River; Richardson Letter at 1, Ex. 10.

[14] Letter dated May 7, 1986 from D.G. Richardson, Florida Department of Environmental Regulation to Marshall Hyatt, EPA Region IV ("Richardson Letter"). Ex. 11.

EPA has denied a permit renewal in only a handful of cases throughout the nation. Never has the agency, to our knowledge, denied a permit renewal of a facility that was in substantial compliance with all environmental standards and where none of the four regulatory criteria for terminating a permit were triggered. For such a virtually unprecedented action, one would expect careful checking and rechecking, but no such obvious measures were taken. No supervision was undertaken by higher-level EPA officials to ensure that a grievous mistake by a careless staff-level official was prevented.

In hindsight, even the former EPA official that denied Waterway Estates' permit renewal has acknowledged that there was no legal basis for the permit denial. Bruce Barrett, the former director of the Water Management Division in EPA Region IV testified, "I don't see the basis for the federal action denying the permit based on the correspondence [demonstrating that Waterway Estates had a wasteload allocation]."[15]

Unfortunately, EPA has indicated an appalling lack of concern for whether or not EPA had a basis for its decision to deny Waterway Estates' permit. The former branch chief for NPDES permits and enforcement at EPA Region IV has testified that EPA can put anything in a permit, no matter how arbitrary or factually insupportable, and so long as it is not challenged, bring an enforcement action against a permit holder.[16] To EPA, whether its original decision had any factual, environmental, or legal basis at all is apparently beside the point. On the contrary, it is the main point. The irony of this case is that the government seeks to impose massive penalties against Florida Cities for EPA's own blunder.

---

[15] Barrett Deposition at 60; see Barrett Deposition at 54-60, Ex. 12.

[16] Deposition of John T. Marlar at 75-84. Ex. 13.

ARGUMENT

A party seeking summary judgment must demonstrate that there is no genuine issue of material fact. See Fed. R. Civ. P. 56(c); Celotex Corp. v. Catrett, 477 U.S. 317, 322-323 (1986); Cover v. Wal-Mart Stores, Inc., 812 F.Supp. 1215, 1216 (M.D.Fla. 1993).

1. EPA violated its own regulations in denying Florida Cities' permit renewal.

The fact is undisputed that EPA violated its own regulations in denying FCWC's application for permit renewal. The sole basis for EPA's denial of the permit was the erroneous notion that Waterway Estates had a wasteload allocation of "no discharge."[17] It bears repeating -- during the time that EPA was reviewing Waterway Estates' permit application, Florida sent EPA an official written confirmation that, at that very moment, Waterway Estates had a wasteload allocation for discharge to the Caloosahatchee River.[18] EPA instead relied on a sentence from an outdated 1981 planning document, taken out of context and never true even in 1981, that Waterway Estates had a "no

---

[17] Fact Sheet at 2, Ex. 6; Kagey Deposition at 56, Ex. 7.

[18] EPA cannot quibble that this information went to Marshall Hyatt, a Region IV, Water Management Division employee, while Connie Kagey, another Region IV, Water Management Division employee, reviewed Waterway Estates' permit application. As EPA is fond of pointing out to companies, even in criminal cases knowledge of employees and agents of an entity is attributable to that entity. Steere Tank Lines, Inc. v. U.S., 330 F.2d 719, 722 (5th Cir. 1963) (knowledge of employees attributable to corporation and their acts may amount to willfulness by corporation). "[A] corporation cannot plead innocence by asserting that the information obtained by several employees was not acquired by any one individual who then would have comprehended its full import. Rather the corporation is considered to have acquired the collective knowledge of its employees and is held responsible for their failure to act accordingly." U.S. v. Bank of New England, N.A., 821 F.2d 844, 856 (1st Cir.), cert. denied, 484 U.S. 943 (1987) (quoting U.S. v. T.I.M.E. - D.C., Inc., 381 F.Supp. 730, 738 (W.D. Va. 1974)).

discharge" wasteload allocation.

EPA's regulations establish only four legal grounds for denying a permit renewal.[19] None of these four grounds was satisfied here. The one under which EPA purported to act was: "A change in any condition that requires either a temporary or permanent reduction or elimination of any discharge or sludge use or disposal practice controlled by the permit (for example, plant closure or termination of discharge by connection to a POTW)." 40 C.F.R. § 122.64(a)(4).

2. EPA must follow its own regulations. There was never a change that required a reduction or elimination of discharge. EPA officials have freely admitted as much. Without this condition, or one of the other three set forth in the regulations, the agency had no authority to deny a permit. It is axiomatic that an Agency must follow its own regulations. U.S. v. Nixon, 418 U.S. 683, 695-696 (1974); U.S. ex rel. Accardi v. Shaughnessy, 347 U.S. 260, 265-267 (1954); Finkelstein v. U.S., 29 Fed.Cl. 611, 616 (1993). As noted in a recent contract case, "[t]he government has the power to act only

---

[19] Termination of Permits

(a) The following are causes for terminating a permit during its term, or for denying a permit renewal application:

(1) Noncompliance by the permittee with any condition of the permit;

(2) The permittee's failure in the application or during the permit issuance process to disclose fully all relevant facts, or the permittee's misrepresentation of any relevant facts at any time;

(3) A determination that the permitted activity endangers human health or the environment and can only be regulated to acceptable levels by permit modification or termination; or

(4) A change in any condition that requires either a temporary or permanent reduction or elimination of any discharge or sludge use or disposal practice controlled by the permit (for example, plant closure or termination of discharge by connection to a POTW).

(b) The Director shall follow the applicable procedures in part 124 or State procedures in terminating any NPDES permit under this section. 40 C.F.R. § 122.64 (1993).

through its agents whose authority and manner of exercise thereof is rigidly prescribed and limited by statute, regulation, and judicial and administrative determinations. Failure to follow the applicable rules *negates* the agent's authority to enter into a contract binding on the government. To permit otherwise would be to nullify those very statutes, regulations, and determinations -- a result clearly contrary to the public interest."[20] "When an administrative agency promulgates rules to govern its proceedings, these rules must be scrupulously observed . . . If an agency in its proceedings violates its rules and prejudice results, any action taken as a result of the proceedings cannot stand." Pacific Molasses Company v. F.T.C., 356 F.2d 386, 389-390 (5th Cir. 1966) (citations omitted). Where, as here, EPA acted contrary to its specific regulations, and where its actions were unauthorized, beyond the powers that EPA had itself specified, its action was null and void.

3. The concept of void *ab initio* is well-established. The concept of an action as void *ab initio* is well-established throughout the law.[21]

In bankruptcy law, for example, the concept of a void judgment has long been recognized. See, e.g., Briley v. Hidalgo, 981 F.2d 246 (5th Cir. 1993) (default judgment void as covered by prior discharge in bankruptcy). Moreover, violations of the automatic stay provision applicable in bankruptcy actions are void. As stated in this Circuit,

---

[20] U.S. v. Amdahl Corp., 786 F.2d 387, 392 (Fed.Cir. 1986) (quoting Brous, Termination for Convenience: A Remedy for the Erroneous Award., 5 Pub.Cont.L.J. 221, 222-223 (1972)) (footnotes omitted, emphasis supplied).

[21] "Void" is defined as having no legal force or binding effect. Black's Law Dictionary 1411 (5th ed. 1979).

"[a]ctions taken in violation of the automatic stay are void and without effect." Borg-Warner Acceptance Corp. v. Hall, 685 F.2d 1306, 1308 (11th Cir. 1982) (citing Kalb v. Feuerstein, 308 U.S. 433 (1940)), (other citations omitted).

In property law, an option violating the rule against perpetuities is void *ab initio*. Certified Corp. v. GTE Products Corp., 467 N.E.2d 1336 (Mass. 1984). A conveyance of homestead real estate contrary to Florida law is a nullity and the attempt is void. Gotshall v. Taylor, 196 So. 2d 479 (Fl. Ct. App. 1967).

Bigamous or incestuous marriages are void *ab initio*. See, e.g., Va. Code Ann. Sections 20-38.1(a)(1), 20-43, 20-45.1 (bigamous) (Supp. 1990); Va. Code Ann. Sections 20-38.1(2), (3), 20-45.1 (incestuous) (Supp. 1990). A void marriage is invalid from its inception, and the parties may simply separate without benefit of a court order of divorce or annulment. Darling v. Darling, 335 N.E.2d 708, 710-711 (Ohio Ct. App. 1975).

Without a prior use in commerce, a trademark application is void *ab initio*. Avakoff v. Southern Pacific Co., 765 F.2d 1097 (Fed.Cir. 1985).

In corporate law, an *ultra vires* contract, that is, one not within the powers conferred on the corporation, is wholly void and of no legal effect. Jacksonville &c. Railway v. Hooper, 160 U.S. 514, 524-525 (1896); Thomas v. Railroad Co., 101 U.S. 71, 83 (1879).

The concept of void *ab initio* is also widely accepted in international law. As one U.S. government attorney recently observed, under the Vienna Convention on the Law of Treaties, a treaty procured by the threat or use of force is void *ab initio*. Steven R.

Ratner, The Cambodia Settlement Agreements, 87 Am. J. Int'l. L. 1, 34 (1993). Even a treaty freely entered into by states, but contradicting fundamental norms, is void *ab initio.* R. A. Mullerson, Agora: New Thinking by Soviet Scholars, 83 Am. J. Int'l. L. 494, 507 (1989); Thomas M. Franck, Legitimacy in the International System, 82 Am. J. Int'l. L. 705, 757 (1988).

In landlord-tenant law, housing code violations making premises uninhabitable at the time of a lease render that lease void *ab initio.* Brown v. Southall Realty Company, 237 A.2d 834, 837 (D.C. App. 1968).

Under Indian law, a conveyance of aboriginal lands without the sovereign's consent is void *ab initio.* County of Oneida v. Oneida Indian Nation, 470 U.S. 226, 245 (1985).

An action beyond an agency's authority is void *ab initio.* See Chrysler v. Brown, 441 U.S. 281, 313 (1979) (regulation promulgated without proper notice and comment is void *ab initio*); Cabazon Band of Mission Indians v. City of Indio, 694 F.2d 634, 637 (9th Cir. 1982) (an act in violation of a statutory mandate is void *ab initio*); Alabama Rural Fire Ins. Co. v. U.S., 572 F.2d 727, 733 (Ct.Cl. 1978) (noncompliance with statute or regulation made contract award a nullity); U.S. v. Goodner Bros. Aircraft, Inc., 966 F.2d 380, 385 (8th Cir. 1992), cert. denied, 113 S. Ct. 967 (1993) (criminal conviction overturned when underlying regulations were vacated).

Finally, it has been regarded as fundamental, since the beginnings of the Republic, that an act violative of the Constitution is void. Marbury v. Madison, 5 U.S. 137, 176-180 (1803). An unconstitutional law is void *ab initio.* As the Supreme Court observed:

"An unconstitutional act is not a law; it confers no rights; it imposes no duties; it affords no protection; it creates no office; it is, in legal contemplation, as inoperative as though it had never been passed." Norton v. Shelby County, 118 U.S. 425, 442 (1886); see also Chicago, Ind. & L. Ry. Co. v. Hackett, 228 U.S. 559, 566 (1913). As recently reaffirmed in a criminal case, an unconstitutional statute is to be considered no statute at all. Hiett v. U.S., 415 F.2d 664, 666 (5th Cir. 1969), cert. denied, 397 U.S. 936 (1970).

Since EPA acted without authority in denying Florida Cities' permit renewal without satisfying the requirements of its own specific regulation, EPA cannot now maintain an action for discharging without a permit. That decision must be treated as void *ab initio*.

4. A void act may be challenged at any time. A void act is subject to collateral attack at any time. In 1795, the Oneida Indian Nation agreed to convey virtually all of its remaining land to New York State for annual cash payments. In 1970, almost two centuries later, descendants of those Indians brought suit alleging that the original conveyance was void, as violative of the Trade and Intercourse Act of 1793. The Supreme Court ruled that the Oneidas had a cause of action for violation of their possessory rights, notwithstanding the passage of 175 years. Oneida, 470 U.S. at 230.

Similarly, a void judgment may be attacked at any time. Fed. R. Civ. P. 60(b)(4). As one commentator observed, "there is no time limit on an attack on a judgment as void . . . A void judgment cannot acquire validity because of laches on the part of the judgment debtor." Charles A. Wright & Arthur R. Miller, Federal Practice and Procedure: Civil Section 2862 (1973).

It is well-recognized that if an action is void *ab initio*, parties need not take action within any prescribed statutory time to establish invalidity. In 1970, the City of Indio, California annexed lands including a portion of the Cabazon Indian Reservation, without federal consent. The city claimed that the running of the statue of limitations "cured" its failure to comply with the annexation statute. The Court held that as the attempted annexation was void *ab initio*, the Cabazon Indians were not required to take action within the limitations period. Cabazon, 694 F. 2d at 638.

5. EPA's reckless disregard of the facts makes its action void *ab initio*, and subject to challenge at any time. In everyday life, we realize that a void marriage cannot be made legally valid simply by asking whether "anyone knows of any reason why this couple should not be joined in holy matrimony, speak now or forever hold your peace." If the bridegroom is already married, for example, the second, bigamous marriage does not become valid because someone did not immediately protest.

Consequently, if an agency takes an unconstitutional action, or if an agency arrogates to itself powers it does not legally possess, its *ultra vires* actions are null and void, whether or not someone protests, and whether or not the protest is deemed timely. Thus, for example, if EPA required as a condition of a water permit that a newspaper must clear its editorials with the agency; or if through an airline company's water discharge permit EPA attempted to dictate routes and fares; or if the agency mistakenly acted pursuant to provisions of law that actually did not exist, these actions would not become unassailably lawful simply because no interested party sounds a timely warning. Instead, they would be void *ab initio*, as being beyond the powers of the agency. To find

otherwise would allow agencies to expand their authority infinitely, without benefit of legislation or regulations.

Similarly, where an agency knowingly disregards crucial facts and instead assumes facts that it knows are wrong, and where it thereafter acts with reckless disregard as to whether the facts are right or wrong, or even relevant, it cannot pretend that it has acted pursuant to its regulations. This is not a question of whether the agency's decision was arguably correct or incorrect; it is a remarkable situation in which the agency was first negligently, then recklessly, indifferent to satisfying the legal criteria under which it was supposed to operate. This did not rise above even the minimum threshold of the agency's regulatory obligations, and thus it must be estopped from claiming it acted pursuant to them.

The government's action is especially offensive when one recalls the relief it seeks in this case. It does not seek the ending of some polluting practice, nor the cleanup of past contamination. As a practical matter, the significance of purportedly having discharged without an NPDES permit is minimal, as FCWC had a Florida permit, was in substantial compliance with federal and state discharge limits, and most importantly had no reasonable alternative to continued discharge. An immediate shutdown of the Waterway Estates facility would have been worse environmentally than continued discharge, as it would have left raw sewage untreated. FCWC subsequently applied for, and received, a federal NPDES permit. In fact, this case is not about the environment at all. It is about a blatant attempt by the government to impose massive financial penalties on a company for EPA's own mistake.

When EPA wrongly denied FCWC's permit in December 1986, FCWC did not seek judicial review of that decision. The Clean Water Act allows judicial review in a United States Court of Appeals within 120 days (then 90 days) of action denying a permit. 33 U.S.C. § 1369(b)(1) (1994). That section further provides that actions with respect to which review could have been obtained "shall not be subject to judicial review in any civil . . . enforcement proceeding." 33 U.S.C. § 1369(b)(2) (1994). These provisions should not bar FCWC from raising defects in EPA's action in this case. Where, as here, EPA acted in violation of its own regulations and without authority, EPA's action was void *ab initio*. As the permit denial was void *ab initio*, FCWC's then existing permit must be deemed to have continued in effect.[22] EPA therefore cannot claim that FCWC discharged without a permit. In addition, when the decision upon which EPA bases a civil penalty action is void *ab initio*, that decision should be subject to judicial review under § 1369(b)(2) in the civil penalty action. This is especially so where, as here, EPA is suing not to obtain injunctive relief or otherwise correct continuing violations of the Clean Water Act, but instead to collect penalties. EPA simply should not be allowed to recover penalties for conduct which was lawful, and would have remained so except for a lawless EPA decision.

If EPA's action was void, under the law the then-existing permit continues and the permittee was entitled to discharge pursuant to the prior permit. EPA therefore has no basis for its claim that Waterway Estates was discharging without a permit.

---

[22] See 5 U.S.C. § 558(c) (1994); 40 C.F.R. § 122.6 (1993).

CONCLUSION

For the reasons stated above, Defendant's motion for partial summary judgment should be granted.

Respectfully submitted,

Exhibit_____(GHB-50)

IN THE UNITED STATES DISTRICT COURT
FOR THE MIDDLE DISTRICT OF FLORIDA
FORT MYERS DIVISION

UNITED STATES OF AMERICA, Plaintiff, v. AVATAR HOLDINGS, INC., and FLORIDA CITIES WATER COMPANY, INC., Defendants.	CIVIL ACTION NO. 93-281-CIV-FTM-21

UNITED STATES' OPPOSITION TO DEFENDANT FLORIDA CITIES WATER COMPANY'S MOTION FOR PARTIAL SUMMARY JUDGMENT

Defendant Florida Cities Water Company has moved for partial summary judgment on the United States' allegation that Defendants discharged pollutants from their Waterway Estates Wastewater Treatment Plant into the Caloosahatchee River without an NPDES permit (Revised Amended Complaint, ¶ 41). For the reasons set forth below, as a matter of law, the motion must be denied.

Florida Cities was authorized by an NPDES permit valid from September 24, 1981 to September 24, 1986 to discharge effluent from its Waterway Estates plant to a tributary canal leading to the Caloosahatchee River. Declaration of Kenneth Kwan. On July 28, 1986, EPA notified the company that it had tentatively decided to deny its application for renewal of the permit. Deposition of Connie A. Kagey, October 24, 1994 at 49 and exhibit 32 thereto. On December 8, 1986, EPA issued its final denial,

which took effect on January 9, 1987.[1] Id. at 55, and exhibit 33 thereto. The basis of both the tentative and final denial was that in a January 1981 report, the Florida Department of Environmental Regulation (FDER) had developed a "no discharge" allocation for the Waterway Estates plant. Id. at 52-57 and exhibits 32-33.

Defendant Florida Cities does not deny that it continued to discharge from the Waterway Estates plant into the Caloosahatchee River even after it lost its permit. Answer ¶41.[2] Rather, Defendant maintains that it would have had a permit during that period of time were it not for EPA error, to wit, the denial of Defendant's permit renewal application. Defendant reasons that EPA's action in denying Defendant a permit is "void ab initio" because Defendant was entitled to such a permit, and, by extension of its argument, that EPA cannot now claim that Defendant violated the act by discharging without the permit.

Defendant's argument is not simply novel, it is directly contrary to an express provision of the Clean Water Act. When it passed the 1972 amendments to the Clean Water Act which included

---

[1] Pursuant to 40 C.F.R. § 122.6, having made a timely renewal application, the company was entitled to continue to discharge under the existing permit, even though it had expired, until the effective date of the denial.

[2] The company's discharges were unpermitted from January 9, 1987, the effective date of the permit denial, until November 1, 1989, the effective date of a new NPDES permit authorizing it to discharge directly into the Caloosahatchee River. Because the initial Complaint was filed in this matter on October 1, 1993, the statute of limitations arguably bar claims before October 1, 1988. Hence, paragraph 41 pleads violations occurring on and after that date.

the NPDES permitting program, Congress made very clear that a challenge to a permit denial **must** be timely made to the appropriate U.S. Court of Appeals, and **may not** be in the context of an enforcement action. Defendant exhausted neither its administrative nor judicial remedies to challenge the permit denial it now so vigorously contests. Instead, Defendant essentially asks that the Court rewrite the law and confer on this court jurisdiction which Congress has chosen not to confer.

The only **material** fact relevant to Defendant's summary judgment motion is whether Defendant had a NPDES permit to discharge pollutants from its Waterway Estates Wastewater Treatment plant into the Calooshatchee River during the period October 1, 1988 to October 31, 1989.[3] It did not. Declaration of Kenneth Kwan. The only **material** law relevant to this issue is section 509(b) of the Clean Water Act, which, at the time, provided in pertinent part as follows:

> (1) Review of the Administrator's action ... in issuing or denying any permit under section 1342 of this title [National Pollutant Discharge Elimination System], may be had by any interested person in the Circuit Court of Appeals of the United States for the Federal judicial district in which such person resides or transacts such business upon application by such person.
>
> . . . .
>
> (2) Action of the Administrator with respect to which review could have been obtained under paragraph (1) of this subsection shall not be subject to judicial review in any civil or criminal proceeding for enforcement.

---

[3] Defendant's motion does not include a statement of material facts, but rather only its version of unsubstantiated and immaterial facts.

33 U.S.C. § 1369(b) (1986).[4]

Every federal court in the nation which has construed this statute has held that it means what it says: EPA's actions (including permit denials) under section 509(a) are reviewable only within the time provided in the Court of Appeals and cannot be challenged in a District Court enforcement proceeding. In fact, the Supreme Court, in summarizing the enforcement provisions of the 1972 amendments to the Clean Water Act held as follows:

> [U]nder § 509(b), 33 U.S.C. § 1369(b), "any interested person" may seek judicial review in the United States courts of appeals of various particular actions by the Administrator, including establishment of effluent standards and issuance of permits for discharge of pollutants. Where review could have been obtained under this provision, the action at issue may not be challenged in any subsequent civil or criminal proceeding for enforcement. § 1369(b)(2).

Middlesex Count Sewerage Authority v. National Sea Clammers Association, 453 U.S. 1, 14 (1981). See also, Crown Simpson Pulp Co. v. Costle, 445 U.S. 193 (1980) (EPA veto of state-proposed NPDES permit is equivalent of permit denial reviewable by Court of Appeals). Judge (now Justice) Ginsburg, writing in 1982 for the D.C. Court of Appeals, summarized section 509(b) as follows:

> Section 509(b)(1) contains a ninety-day "statute of limitations" for challenging any action of the Administrator that falls within its terms.

---

[4] In 1986, an interested party had ninety (90) days in which to seek review of a permit denial in the Court of Appeals. This subsection was amended in 1987 to allow an interested party 120 (120) days. See United States v. CPS Chemical Company, Inc., 779 F. Supp. 437, 441 (E.D. Ark. 1991). Because no application for review was ever filed, the amendment is academic to the issue at bar.

> Complementing this provision, section 509(b)(2), 33 U.S.C. § 1369(b)(2) (1976), provides that "[a]ction of the Administrator with respect to which review could have been obtained under [section 509(b)(1)] shall not be subject to judicial review in any civil and criminal proceeding for enforcement." Under these two provisions, **one who wishes to challenge an action of the Administrator must**, if the action is held to be within the categories of section 509(b)(1), **do so within ninety days or lose forever the right to do so, even though that action might eventually result in the imposition of severe civil or criminal penalties.**

Natural Resources Defense Council v. Environmental Protection Agency, 673 F.2d 400, 406 (D.C. Cir. 1982) (emphasis added).

All other courts considering section 509(b) have reached the same conclusion. See Public Interest Research Group of New Jersey, 913 F.2d 64, 78 (3rd Cir. 1990) ("[S]ection 509(b)(2) of the Act clearly states that EPA action in issuing a permit 'shall not be subject to judicial review in any civil or criminal proceeding for enforcement'"); Texas Municipal Power Agency v. Administrator, 836 F.2d 1482 (5th Cir. 1988) (referring to section 509(b) as jurisdictional in nature and a "now or never" rule); Champion International v. U.S. Environmental Protection Agency, 850 F.2d 182, 188 (4th Cir. 1988); Natural Resources Defense Council, Inc. v. Outboard Marine Corp., 702 F. Supp. 690, 693 (N.D. Ill. 1988) (characterizing section 509(b) as "exhaustion-of-remedies provisions" in context of permit denial); Connecticut Fund for the Environment v. Job Plating Co., 623 F. Supp. 207, 216-17 (D. Conn. 1985); United States v. Velsicol Chemical Corp., 438 F. Supp. 945, 949 (W.D. Tenn. 1976).

Assuming, arguendo, that the application in question had been improperly denied in 1986, defendant seeks relief in the

wrong court at the wrong time. At the time, under section 509(b)(1) of the Act, 33 U.S.C. § 1369(b)(1) (1986), defendant had ninety (90) days from the date of the EPA Administrator's action to challenge the denial of the permit in the United States Court of Appeals. Having failed to challenge the denial, defendant is now precluded from doing in this Court by section 509(b)(2) of the Act, 33 U.S.C. § 1369(b)(2).

In sum, nearly nine years ago, Defendant failed to avail itself of the opportunity to seek judicial review of EPA's permit denial. It cannot now be allowed to circumvent the law by challenging the denial in the context of a civil enforcement proceeding, directly contrary to section 509(b)(2) and the case law construing it.

DECLARATION OF KENNETH KWAN

I, Kenneth Kwan, declare as follows:

1. I am an Environmental Engineer employed by the U.S. Environmental Protection Agency, Region IV, Atlanta, Georgia.

2. In that capacity, I am the enforcement officer assigned to the above-captioned action and am familiar with the EPA National Pollutant Discharge Elimination System (NPDES) permits issued to Florida Cities Water Company.

3. From September 24, 1981 to January 8, 1987, Florida Cities Water Company was authorized by NPDES Permit No. FL0030325 to discharge effluent from the Waterway Estates plant into a tributary canal leading to the Caloosahatchee River.

4. From November 1, 1989 to the present, Florida Cities Water Company was authorized by NPDES Permit No. FL0030325 to discharge effluent from the Waterway Estates plant to a point at the six (6) foot contour line in the Caloosahatchee River.

5. During the period January 9, 1987 to October 31, 1989, Florida Cities Water Company did not have an NPDES permit to

discharge effluent from the Waterway Estates plant either directly or indirectly into the Caloosahatchee River.

I declare under penalty of perjury that the foregoing is true and correct.

Executed this 6 day of June, 1995 in Atlanta, Georgia.

ORDER

This cause comes before the Court on Defendant Florida Cities' Motion for Partial Summary Judgment (Dkt. 79, refiled at Dkt. 98) and the United States' response (Dkt. 118) in opposition thereto.

BACKGROUND

Florida Cities first received an operating permit for Waterway Estates treatment plant on October 26, 1971. During most of the time prior to the period in dispute, Florida Cities maintained a National Pollutant Discharge Elimination System ("NPDES") discharge permit for Waterway Estates. On July 28, 1986, however, the Environmental Protection Agency ("EPA") notified Florida Cities that it had tentatively decided to deny Florida Cities' application for a renewal permit. On December 8, 1986, the EPA issued its final denial, which took effect on January 9, 1987. The basis for both the tentative and final denial was that in a January 1981 report, the Florida Department of Environmental Regulation had developed a "no discharge" allocation for the Waterway Estates plant.

AO 72A
(Rev. 8/82)

127

SUMMARY JUDGMENT STANDARD

The Court will enter summary judgment only if the evidence shows "that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law." Fed. R. Civ. P. 56(c). On the issue of materiality, "the substantive law will identify which facts are material." Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248 (1986). Material facts are those over which disputes "might affect the outcome of the suit under the governing law." Id. at 248.

The movant bears the burden of establishing the absence of dispute over material facts. Reynolds v. Bridgestone/Firestone, Inc., 989 F.2d 465, 469 (11th Cir. 1993). Where, as here, the party opposing the summary judgment motion has the burden of proof at trial, the moving party must either point out to the Court specific portions of the record which show that the nonmoving party cannot prevail at trial, or introduce affirmative evidence negating the opposing party's case. United States v. Four Parcels of Real Property, 941 F.2d 1428, 1438 (11th Cir. 1991). In determining whether the party seeking summary judgment has met its initial burden, the Court must view the evidence and factual inferences therefrom in the light most favorable to the opposing party. Clark v. Coats & Clark, Inc., 929 F.2d 604, 606 (11th Cir. 1991). Any reasonable doubts about the facts are to be resolved in favor of the party opposing the motion for summary judgment. Reynolds, 989 F.2d at 469. If the moving party does not meet its burden, the motion for summary judgment will be denied. Four Parcels of Real Property, 941 F.2d at 1437. Where the moving party meets its initial burden, the burden shifts "to the non-moving party to demonstrate that there is indeed a material issue of fact that precludes summary judgment." Clark, 929 F.2d at 608.

AO 72A
(Rev. 8/82)

DISCUSSION

Florida Cities argues that the EPA violated its own regulations in denying its renewal permit and that the EPA's denial of the permit is "void ab initio." Florida Cities thus argues that the EPA cannot now assert that Florida Cities violated the Clean Water Act by discharging without that permit. Florida Cities first points out that during the time the EPA was reviewing Waterway Estates' permit application, the state of Florida sent the EPA an official written confirmation that, at that time, Waterway Estates had a wasteload allocation for discharge to the Caloosahatchee River. Florida Cities asserts that the EPA wrongfully relied on a sentence from an outdated 1981 planning document, taken out of context and not true in 1981, that Waterway Estates had a "no discharge" wasteload allocation. Further, Florida Cities asserts that the EPA has admitted that there was never a change that required a reduction or elimination of discharge. Thus, Florida Cities maintains that where, as here, the EPA acted contrary to its specific regulations, and where its actions were unauthorized, its action was null and void.

Finally, Florida Cities argues that a void act may be challenged at any time. Florida Cities cites as an example the case of the Oneida Indian Nation, which in 1795 agreed to convey virtually all of its remaining land to New York State for annual cash payments. In 1970, descendants of the Oneida Indians brought suit alleging that the original conveyance was void, as violative of the Trade and Intercourse Act of 1793. County of Oneida v. Oneida Indian Nation, 470 U.S. 226 (1985). The Supreme Court held that the Oneida Indians had a cause of action for violation of their possessory rights, even though the events occurred 175 years earlier. Id. at 230. Florida Cities thus asserts that despite the provisions of the Clean Water Act (discussed in greater depth below), which allowed Florida Cities to seek judicial review of the

AO 72A
(Rev. 8/82)

EPA's denial of the permit within 90 days of the action denying the permit, Florida Cites should not be barred from raising defects in the EPA's action.

In response, the United States argues that Florida Cities' argument is directly contrary to an express provision of the Clean Water Act. The United States submits that the only material fact relevant to Defendant's summary judgment motion is whether Florida Cities had a NPDES permit to discharge pollutants from Waterway Estates into the Caloosahatchee River during the period of October 1, 1988 to October 31, 1989.[1] The United States notes that Florida Cities did not have a NPDES permit during said period. Further, the United States states that the only material law relevant to this issue is Section 509(b) of the Clean Water Act, which at the relevant time, provided in pertinent part:

> (1) Review of the Administrator's action . . . in issuing or denying any permit under section 1342 of this title [National Pollutant Discharge Elimination System], may be had by any interested person in the Circuit Court of Appeals of the United States for the Federal judicial district in which such person resides or transacts such business upon application by such person. . .
>
> (2) Action of the Administrator with respect to which review could have been obtained under paragraph (1) of this subsection shall not be subject to judicial review in any civil or criminal proceeding for enforcement.

33 U.S.C. § 1369(b) (1986). Thus, the United States maintains that Florida Cities seeks relief in the wrong court at the wrong time. It maintains that having failed to challenge the denial within ninety (90) days of the EPA's denial of the permit in accordance with 33 U.S.C. § 1369 (b)(1) (1986), Florida Cities is now precluded from making such a challenge.

---

[1]The United States indicates that Florida Cities' discharges at Waterway Estates were unpermitted from January 9, 1987, the effective date of the permit denial, until November 1, 1989, the effective date of a new NPDES permit authorizing it to discharge directly into the Caloosahatchee River. Further, the United States indicates that because the initial Complaint in this action was filed on October 1, 1993, the statute of limitations arguably bars claims before October 1, 1988. Thus, the United States notes, paragraph 41 of the Amended Complaint (Dkt. 82) pleads violations occurring on and after that date.

AO 72A
(Rev. 8/82)

The Court finds that Florida Cities' argument that the United States should be barred from asserting violations at Waterway Estates due to its own conduct in wrongfully denying the permit request is without merit. As the Supreme Court has held with respect to the enforcement provision of the Clean Water Act:

> [U]nder § 509 (b), 33 U.S.C. § 1369 (b), "any interested person" may seek judicial review in the United States courts of appeals of various particular actions by the Administrator, including establishment of effluent standard and issuance of permits for discharge of pollutants. Where review could have been obtained under this provision, the action at issue may not be challenged in any subsequent civil or criminal proceeding for enforcement. § 1369 (b)(2).

Middlesex County Sewerage Auth. v. National Sea Clammers Ass'n, 453 U.S. 1. 13-14 (1981). Further, Judge, now Justice, Ginsburg, writing in 1982 for the D.C. Court of Appeals, summarized section 509 (b) as follows:

> Section 509(b)(1) contains a ninety-day "statute of limitations" for challenging any action of the Administrator that falls within its terms. Complementing this provision, section 509(b)(2), 33 U.S.C. § 1369(b)(2) (1976), provides that "[a]ction of the Administrator with respect to which review could have been obtained under [section 509(b)(1)] shall not be subject to judicial review in any civil and criminal proceeding for enforcement." Under these two provisions, **one who wishes to challenge an action of the Administrator must, if the action** is held to be within the categories of section 509(b)(1), **do so within ninety days or lose forever the right to do so, even though that action might eventually result in the imposition of severe civil or criminal penalties.**

Natural Resources Defense Council, Inc. v. Environmental Protection Agency, 673 F.2d 400, 406 (D.C. Cir. 1982)(emphasis added). In consideration of the above authorities and the clear language of 33 U.S.C. § 1369 (b) (1986), which provides that Florida Cities had ninety (90) days from the date of the EPA's denial of the permit to seek judicial review, the Court finds that Florida Cities is now precluded from challenging the EPA's denial in the context of a civil enforcement proceeding.

AO 72A
(Rev. 8/82)

Upon consideration of the foregoing, it is hereby **ORDERED and ADJUDGED** that Defendant Florida Cities' Motion for Partial Summary Judgment (Dkts. 79 & 98) is **DENIED.**

DONE AND ORDERED, at Tampa, Florida, this 27 day of June, 1995.

FORT MYERS DIVISION

UNITED STATES OF AMERICA, Plaintiff, v. AVATAR HOLDINGS, INC., and FLORIDA CITIES WATER COMPANY, INC., Defendants.	CIVIL ACTION NO. 93-281-CIV-FTM-21

UNITED STATES' MEMORANDUM IN SUPPORT OF ITS MOTION FOR PARTIAL SUMMARY JUDGMENT

I. INTRODUCTION

This is a civil action brought on behalf of the Administrator of the U.S. Environmental Protection Agency ("EPA") pursuant to section 309(b) of the Clean Water Act ("the Act"), 33 U.S.C. § 1319(b), for civil penalties for violations of section 301 of the Act, 33 U.S.C. § 1311, and of the conditions and limitations of National Pollutant Discharge Elimination System ("NPDES") permits issued by EPA pursuant to section 402 of the Act, 33 U.S.C. § 1342. The Complaint was filed on October 1, 1993, a proposed Amended Complaint was filed on March 31, 1995, and a Revised Amended Complaint was filed on May 5, 1995. Discovery closes on July 15, 1995. Trial has been set for the trial term commencing October 2, 1995.

Defendant Florida Cities Water Company ("Florida Cities") is currently the NPDES permit holder for a total of six wastewater treatment plants in operation in Florida. Three of its plants, one of which is no longer in operation, are the subject of this

law suit. Defendant Avatar Holdings, Inc. is Florida Cities' parent company. Defendants collect and treat wastewater from their customers and discharge the treated wastewater ("effluent") on a daily basis into the waters of the United States. The wastewater discharges contain pollutants which may not be discharged into waters of the United States unless authorized by, and under the terms and conditions of, an NPDES permit.

The initial Complaint alleged violations at one of Defendants' plants, the Waterway Estates plant. The Revised Amended Complaint added claims relating to violations at two additional facilities, Barefoot Bay and Carrollwood, and added Avatar Holdings, Inc. as a defendant. The violations alleged in the proposed Amended Complaint against defendants include the following: (1) discharging without an NPDES permit (Waterway Estates); (2) violation of an EPA Administrative Order (Barefoot Bay); (3) discharging at an unpermitted location (Waterway Estates); (4) exceeding NPDES effluent limitations (all three facilities); (5) failure to monitor specified effluent parameters as required by an NPDES permit (Barefoot Bay); and (6) failure of toxicity tests required by an NPDES permit (Barefoot Bay and Waterway Estates).[1] The United States has brought the instant

[1] The Revised Amended Complaint brings identical claims as the proposed Amended Complaint, except that the latter also included unpermitted discharge claims at the Barefoot Bay and Carrollwood plants. As of this date, the Court has not permitted the United States to bring these claims, see, Order, April 26, 1995, and the United States has moved for reconsideration. The United States has included discussions of the unpermitted discharges at the Barefoot Bay and Carrollwood plants in this

(continued...)

action to redress those violations through the imposition of a substantial civil penalty, and, in the process, to deter both this polluter and others in the State of Florida and elsewhere, from such major violations of the nation's environmental laws.

The Barefoot Bay plant treats wastewater from an upscale mobile home development in Brevard County and discharges its effluent into a drainage canal which leads into the Sebastian Creek and Indian River. Barefoot Bay itself is operated by Avatar Holdings through another of its subsidiaries, Barefoot Bay Development Corporation. The Carrollwood plant treated wastewater from the Carrollwood area of Tampa, discharging effluent into the Sweetwater Creek, which leads to Tampa Bay, until 1992. Since then, Florida Cities has pumped the sewage from its Carrollwood customers to a Hillsborough County treatment facility. The Waterway Estates plant treats wastewater from an area bearing that name in North Fort Myers. Until 1991, its effluent was discharged into a tributary canal leading to the Caloosahatchee River; since 1991, the effluent has been discharged directly into the river itself.

Extensive discovery has taken place over the course of the pendency of this action, as a result of which there remains no genuine issue of material fact for trial as to any of the

---

[1](...continued)
brief because the facts relevant to those claims overlap with the facts relevant to the remaining claims. Also, should the Court grant the United States' Motion for Reconsideration, then summary judgment on the Barefoot Bay and Carrollwood unpermitted discharge claims also would be appropriate.

violations alleged in the United States' three claims for relief. The United States therefore moves for summary judgment on liability as to all violations alleged in its Revised Amended Complaint. In addition, if the Court grants the United States' Motion for Reconsideration of its claims against Defendants for discharging without a permit at the Carrollwood and Barefoot Bay plants, the United States respectfully requests that this motion be treated as a motion for summary judgment on those claims as well.

II. STATUTORY BACKGROUND

A. Overview

The Clean Water Act prohibits the introduction of pollutants into the waters of the United States, except under an NPDES permit. Thus, the requirement that a permit be obtained is a central underpinning of the Act, designed to protect our nation's waters. The permitting process is EPA's means of controlling whether a given water body can sustain pollutant discharges, and, if so (and a permit is issued), EPA's means of controlling the location and content of those discharges.[2] The permit sets out specific terms and conditions governing a permittee's discharge, including parameters which govern the nature of the discharge and various monitoring and reporting requirements to ensure that

---

[2] In determining whether to issue a permit, EPA may rely on a state's "wasteload allocation," that is, its determination of whether a given water body can sustain a pollutant discharge, and, if so, at what locations. The location of the discharge point is very important because the capacity of a given water body to sustain pollutant discharges without damage can vary greatly depending on the precise point of discharge.

permit conditions are met. Violations of the Act and of a permit issued under the Act subject a polluter to a civil penalty not to exceed $25,000 per day for each violation.

B. The Clean Water Act

Prior to 1972, federal involvement in water pollution control focused on assisting states in developing water quality standards for interstate waters within their boundaries. These state water quality standards were set according to a particular water body's intended uses, taking into account the water's ability to assimilate the pollution. In 1972, Congress concluded that water quality standards alone were not adequate to restore and maintain the integrity of the nation's waters, and enacted the Federal Water Pollution Control Act Amendments of 1972, also commonly known as the Clean Water Act, Pub. L. No. 92-500, 86 Stat. 816, 33 U.S.C. § 1251 et seq. See S. Rep. No. 414, 92d Cong., 1st Sess. 8 (1971), reprinted in A Legislative History of the Water Pollution Control Act Amendments of 1972 ("Legislative History") at 1426 (1973). See also EPA v. California ex rel. State Water Resources Control Board, 426 U.S. 200, 202-206 (1976). The Act was intended "to restore and maintain the chemical, physical, and biological integrity of the Nation's waters." Gwaltney of Smithfield v. Chesapeake Bay Foundation, 484 U.S. 49, 52 (1987) (quoting Section 101(a) of the Act).

The Act prohibits "the discharge of any pollutant by any person," except as specified by the Act. 33 U.S.C. § 1311(a). This prohibition represents a significant change from prior

federal water pollution law. The Senate Report describes the change in both emphasis and method:

> This section [§ 301, now 33 U.S.C. § 1311] clearly establishes that the discharge of pollutants is unlawful. Unlike its predecessor program which permitted the discharge of certain amounts of pollutants under the conditions described above, this legislation would clearly establish that no one has the right to pollute -- that pollution continues because of technological limits, not because of any inherent right to use the nation's waterways for the purpose of disposing of wastes. ... The Committee believes it is important to clarify this point: no one has the right to pollute.

Legislative History at 1460-61. See also, United States v. City of Menominee and Menominee Paper Co., 727 F. Supp. 1110, 1122 (W.D. Mich. 1989) ("No right exists to pollute our nation's waters.").

C. Permits and Enforcement

Regulation of dischargers such as defendants is primarily effected through the issuance of NPDES permits under section 402 of the Act, 33 U.S.C. § 1342. The permits authorize the direct discharge of pollutants into the nation's waters, under narrowly prescribed terms and conditions. See EPA v. California ex rel. State Water Resources Control Board, 426 U.S. 200 (1976); Natural Resources Defense Council, Inc. v. Costle, 568 F.2d 1369, 1374-77 (D.C. Cir. 1977). Each permit contains specific limitations on the amount of certain pollutants a given discharger is allowed to discharge into a specified body of water. NPDES permits also contain self-monitoring, testing, and reporting requirements which are central to the integrity of the NPDES Program. See 33 U.S.C. § 1318.

The permitting process is designed to ensure the participation and rights of the applicant, the state, and the public. To that end, before taking final action on an application, EPA prepares a draft of the permit conditions or denial, 40 C.F.R. § 124.6; seeks state certification of the permit, 40 C.F.R. § 124.53; and submits the draft permit for public notice and comment, 40 C.F.R. § 124.10. During the public comment period, any interested party may submit written comments on the draft permit (or denial) and may request a public hearing. 40 C.F.R. § 124.11. Any person, including an applicant, who wishes to contest a draft permit (or denial) is obliged to raise such issues during the public comment period. 40 C.F.R. § 124.13. After consideration of any comments by the applicant, the state, and the public, EPA then takes final action on the application. 40 C.F.R. § 124.15. Following EPA's final action, any interested party may request an evidentiary hearing. 40 C.F.R. § 124.74. Any party which considers itself aggrieved by EPA's final action, including an applicant, may then challenge it in the U.S. Court of Appeals. 33 U.S.C. § 1369(b)(1). An aggrieved party that fails to make a timely appeal waives its right to later challenge EPA's decision. 33 U.S.C. § 1369(b)(2).

EPA has delegated the authority to issue NPDES permits to state authorities in many states, see 33 U.S.C. § 1342(b), including, as of May 1, 1995, the State of Florida. Prior to May 1, 1995, however, Florida was not such a "delegated state," and, consequently, any discharge of pollutants into the waters of the

United States in the State of Florida required an NPDES permit. Thus, only the United States can bring suit to redress the violations alleged in the instant case, although State and local agencies had independent regulatory authority to impose and enforce other requirements for the operation of wastewater treatment plants within their jurisdictions.[3]

IV. STANDARD OF REVIEW

A. Summary Judgment Standard

Under Rule 56(c) of the Federal Rules of Civil Procedure, summary judgment is to be granted to the moving party if the evidence of record shows "that there is no genuine issue as to any material fact and the moving party is entitled to a judgment as a matter of law." Rule 56(c), Fed. R. Civ. P. The standard which has emerged from a trilogy of Supreme Court decisions construing Rule 56 can be stated as follows: while the moving party bears the initial burden of identifying evidence which demonstrates the absence of a genuine issue of material fact, once that burden has been met, the nonmoving party must set forth "specific facts showing that there is a genuine issue for trial," Rule 56(e), Fed. R. Civ. P., or the factual record will be taken as presented by the moving party and judgment will be entered as

---

[3] Not only are dischargers subject to federal, state, and local laws and regulations and enforcement actions, they are subject to both federal and state enforcement action even when a state issues the NPDES permit (i.e., in a delegated state). See 33 U.S.C. § 1342(b) and (i). This important federal enforcement role has been expressly recognized by the Supreme Court. See Gwaltney of Smithfield v. Chesapeake Bay Foundation, 484 U.S. 49, 52-53 (1987).

matter of law. See Anderson v. Liberty Lobby, Inc., 477 U.S. 242 (1986); Celotex Corp. v. Catrett, 477 U.S. 317 (1986); Matsushita Electric Industrial Co. v. Zenith Radio Corp., 475 U.S. 574 (1986). See also, United States v. Fleet Factors Corp., 901 F.2d 1550, 1553 (11th Cir. 1990), cert. denied, 498 U.S. 1046 (1991); Florida Power & Light Co. v. Allis Chalmers Corp., 893 F.2d 1313, 1318 (11th Cir. 1990). "By its very terms, this standard provides that the mere existence of some alleged factual dispute between the parties will not defeat an otherwise properly supported motion for summary judgment; the requirement is that there be no genuine issue of material fact." Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 247-48 (1986) (emphasis original).

In order to meet its burden, the non-movant must show more than a mere scintilla of evidence to present a genuine issue of fact. Anderson v. Liberty Lobby, Inc., 477 U.S. 242 (1986). If the non-moving party's "evidence is merely colorable, or is not significantly probative, summary judgment may be granted." Id. at 249-250; See also, Celotex Corp. v. Catrett, 477 U.S. 317 (1986). Or, as the Eleventh Circuit has put it, "[o]nce a moving party has sufficiently supported its motion for summary judgment, the non-moving party must come forward with significant, probative evidence demonstrating the existence of a triable issue of fact." Chanel v. Italian Activewear of Florida, Inc., 931 F.2d 1472, 1477 (11th Cir. 1991).

Courts have routinely granted summary judgment as a means of resolving liability issues in Clean Water Act cases. See, e.g.,

County of Honolulu, 821 F.Supp. 1368, 1392 (D. Hawaii, 1993). And, as the court noted in United States v. CPS Chemical Co., Inc., 779 F. Supp. 437, 442 (E.D.Ark. 1991), "the legislative history of the Act reveals that Congress intended to keep enforcement actions simple and speedy."

C. Estoppel is Not a Defense

Florida Cities may not defend Clean Water Act claims by contending that the United States is somehow estopped by its own actions. Estoppel can neither be applied against the United States when acting in its sovereign capacity, Alacare Home Health Services, Inc. v. Sullivan, 891 F.2d 850, 855 (11th Cir. 1990), nor serve as the "means of successfully avoiding the requirements of legislation enacted for the protection of a public interest." Scott Paper Co. v. Marcalus Manufacturing Co., Inc., 326 U.S. 249, 257 (1945). While, as the Eleventh Circuit recently observed, the Supreme Court has not resolved the issue of whether estoppel may ever be applied against the United States, Ferry v. Hayden, 954 F.2d 658, 661 (11th Cir. 1992), citing Heckler v. Community Health Services of Crawford County, Inc., 467 U.S. 51, 61 (1984), the Supreme Court itself noted in Office of Personnel Management v. Richmond, 496 U.S. 414, 422 (1990), that it has "reversed every finding of estoppel [against the federal government] that we have reviewed." See Ferry v. Hayden, 954 F.2d at 661 n.5. See also Deltona Corp. v. Alexander, 682 F.2d 888 (11th Cir. 1982) (Court upheld Army Corp of Engineers' denial of a permit under the Clean Water Act relying on earlier binding

Fifth Circuit precedents to the effect that estoppel cannot be asserted against the United States in actions arising out of the exercise of its sovereign powers).

D. Discharge Monitoring Reports are Conclusive Evidence of Noncompliance

Discharge Monitoring Reports (DMRs) constitute conclusive evidence of Clean Water Act violations. The requirement that these reports be submitted to EPA is an important self-reporting mechanism of the Clean Water Act designed to ensure that EPA has accurate information to monitor each discharger's compliance with its permit: "Compliance monitoring and enforcement by the EPA are based primarily on the self-monitoring requirements in permits and the information in the DMRs permittees are required to submit." United States v. CPS Chemical Co., Inc., 779 F.Supp. 437, 442 (E.D. Ark. 1991).

The DMRs are sworn to by a permittee's authorized agent and include results of tests measuring the pollutants discharged from its plant.[5] For enforcement purposes, the reports constitute

---

[5] The certification block on the DMRs reads as follows:

> I certify under penalty of law that I have personally examined and am familiar with the information submitted herein; and based on my inquiry of those individuals immediately responsible for obtaining the information, I believe the submitted information is true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment. See 18 U.S.C. § 1001 and 33 U.S.C. § 1319. (Penalties under these statutes may include fines up to $10,000 and or maximum imprisonment of between 6 months and 5 years.)

[Parenthetical in original]

admissions, which may be used to conclusively establish a defendant's liability for summary judgment purposes. Atlantic States Legal Foundation v. Tyson Foods, 897 F.2d 1128, 1135 (11th Cir. 1990); Sierra Club v. Simkins Industries, Inc., 847 F.2d 1109, 1115 (4th Cir. 1988), cert. denied 491 U.S. 904 (1989); United States v. Aluminum Company of America, 824 F.Supp. 640, 648 (E.D. Texas 1993); Arkansas Wildlife Federation v. Bekaert Corporation, 791 F.Supp. 769 (W.D. Ark. 1992); Sierra Club v. Union Oil Co. of California, 716 F.Supp. 429, 434 (N.D. Calf. 1988); Student Public Interest Research Group of New Jersey, Inc. v. P.D. Oil & Chemical Storage, Inc., 627 F. Supp. 1074, 1090 (D.N.J. 1986).

Similarly, defendants cannot attempt to impeach the data they reported in their own DMRs. See Sierra Club v. Union Oil Company of California, 813 F.2d 1480, 1492 (9th Cir. 1987), vacated on other grounds, 485 U.S. 931 (1988), judgment reinstated, 853 F.2d 667 (9th Cir. 1988); U.S. V. Aluminum Co. of America, 824 F.Supp. 640, 648 (E.D. Texas 1993); McClellan Ecological Seepage Situation v. Weinberger, 707 F.Supp. 1182, 1203 (E.D. Cal. 1988). Indeed, "a court cannot accept a defense based simply on error or sloppiness in laboratory practices for the Act relies on accurate monitoring by dischargers and they will be held accountable for the data they collect and report." Natural Resources Defense Council, Inc. v. Outboard Marine Corp., 692 F.Supp. 801, 819 (N.D. Illinois, E.D. 1988) [citations omitted].

E. Adverse Inference from Assertion of Fifth Amendment

A number of key witnesses in this case have refused to testify on Fifth Amendment grounds. Every past and present officer and employee of both Defendants who has been deposed from March 1995 to date has refused to answer any questions whatsoever, other than to testify to his name and address.[6] These witnesses include high-ranking past and present managers and officers of both defendants, individuals who possess a wealth of knowledge regarding the claims brought by the United States. As discussed in section IV.C of this brief, they authored a number of the important documents and are key decision-makers on environmental matters that are the subject of this action. The clear implication is that these witnesses would have provided additional evidence to support the United States' allegations had they not taken the Fifth Amendment. The inference that may be drawn from these individuals' assertion of the Fifth Amendment is that the violations were committed as alleged, and that Avatar Holdings pervasively controlled Florida Cities' environmental practices. The Court can and should draw that adverse inference from their failure to testify. See Baxter v. Palmigiano, 425 U.S. 308, 318 (1976); Director of the Office of Thrift Supervision v. Lopez, 960 F.2d 958, 965 (11th Cir. 1992); United States v. A Single Family Residence, 803 F.2d 625, 629 n.4 (11th

[6] See Deposition of James Elder, March 6, 1995; Lawrence Wilkov, March 7, 1995; Gerald S. Allen, March 27, 1995; Antone A. Reeves, March 28, 1995; Dennis Getman, May 1, 1995; Robert Gordon, May 1, 1995.

Cir. 1986); Shell Oil Company v. Altina Associates, Inc., 866 F. Supp. 536, 540 (M.D. Fla. 1994).

V. ARGUMENT

The United States is Entitled to Summary Judgment on Liability on all its Claims for Relief

Based on the pleadings, depositions, answers to interrogatories, and admissions on file at this time, there is no genuine issue of material fact as to any of the United States' claims for relief. Indeed, because the law and facts in this case are straightforward, it is very suitable for disposition by summary judgment.

There are in essence three types of violations: (1) operating without a permit; (2) discharging at an unpermitted location; and (3) violating the terms of a permit or administrative order. With respect to the first, it is beyond dispute that Defendants did not possess the required NPDES permits during the periods in question, yet they operated all three plants anyway. With respect to the second, there is no question that Defendants discharged from its Waterway Estates plant to a canal during a time when they were supposed to discharge to the Caloosahatchee River itself. With respect to the third, Defendants violated effluent limitations in NPDES permits at all three plants, effluent limitations in a Barefoot Bay administrative order, and monitoring requirements in the Barefoot Bay permit.

All of the United States' allegations are premised on Defendants' own DMRS, admissions, or testimony. The various

violations of the Act, the administrative order, and the permits are discussed next, as are Florida Cities' asserted defenses to them.[7]

A. The Elements of Liability

In an action under section 309 of the Act, 33 U.S.C. § 1319, to establish a violation of section 301, 33 U.S.C. § 1311, the United States need only show that (1) a person (2) discharged a pollutant into navigable waters (3) from a point source, and that (4) the person had no permit for the discharge or, as applicable, that the discharge violated the terms of the applicable NPDES permit or administrative order. See United States v. Velsicol Chemical Corp., 438 F. Supp. 945, 948 (W.D. Tenn. 1976); Michigan v. City of Allen Park, 501 F. Supp. 1007, 1014 (E.D. Mich. 1980), aff'd, 667 F.2d 1028 (6th Cir. 1981), cert. denied, 456 U.S. 927 (1982).

Florida Cities has admitted the first three elements with respect to each of the United States' claims. As to the first element, Florida Cities admits that it owned and operated the three plants in question at all times relevant to each respective

---

[7] The United States notes that its Motion to Strike Affirmative Defenses is pending and incorporates it and its accompanying memorandum herein by reference pursuant to rule 10(c), Fed. R. Civ. P. In the instant brief, the United States discusses those affirmative defenses for which Defendants have alleged supporting facts in a reponse to an interrogatory requiring them to do so. See Defendant Florida Cities Water Company's Answers to Plaintiff's Second Set of Interrogatories [hereinafter "FCWC Second Set of Interrogatory Answers"], no. 2 (filed herewith).

claim for relief in the United States' Revised Amended Complaint. Defendant Florida Cities Water Company's Answers to Plaintiff's First Request for Admissions [hereinafter "FCWC Admission"] Admission No. 3 (filed herewith). As to the second element, Florida Cities admits that it is a "person" within the meaning of section 502(5) of the Act, 33 U.S.C. § 1362(5), which specifically defines the term "person" to include a corporation. FCWC Admission No. 5. As to the third element, Florida Cities admits that it caused the discharge of pollutants through a point source into a navigable water within the meaning of the Act at all relevant times with respect to each of its three facilities. FCWC Admission No. 7. The fourth element, discharge without a permit or in violation of a permit or administrative order will be discussed below in the context of the individual claims.

B. The Violations

1. Barefoot Bay

a) Unpermitted Discharges

Paragraph 16 of the Amended Complaint alleges that Defendants discharged pollutants without an NPDES permit from the Barefoot Bay Plant into the Sebastian River during the period on or about April 1, 1990 to October 31, 1991.

Florida Cities did not have an NPDES permit to discharge effluent from the Barefoot Bay Wastewater Treatment Plant into the Sebastian River prior to November 1, 1991. Declaration of Kenneth Kwan ¶ 7; FCWC Admission No. 10. Despite the absence of a permit, Florida Cities first began to discharge from the plant

into a drainage canal leading to the Sebastian Creek sometime prior to 1983. FCWC Second Set of Interrogatory Answers No. 5. The canal and creek lead to the Sebastian River. Deposition of William Sansbury at 45, and Exhibit 76.[8] Therefore, Florida Cities has discharged into the Sebastian River without an NPDES permit. Because these unpermitted discharges occurred daily during the period April 1, 1990 to October 31, 1991, see Deposition of Larry Good at 189-90, they account for 579 violations.

Florida Cities has argued that it cannot be held liable for the unpermitted discharge violations at Barefoot Bay because EPA has already penalized the company for them in an administrative penalty order. As set forth in detail, however, in the United States' Memorandum in Support of its Motion for Reconsideration of Court's Order on Amendment of Complaint, that administrative order only covered discharges on September 14, 1989.[9] The discharges now alleged all occurred after that date and were not covered by the administrative order.

b) Violations of EPA Administrative Order 90-106

On September 26, 1990, EPA issued an administrative order requiring Florida Cities to meet prescribed interim effluent

---

[8] Numerical exhibits refer to the United States' deposition exhibits, which have been numbered consecutively 1-779 and have been filed with the deposition transcripts. Alphabetic exhibits refer to exhibits being filed herewith in three separate volumes, one for each of the three facilities.

[9] That brief is incorporated by reference herein pursuant to rule 10(c), Fed. R. Civ. P.

limitations while its permit application was pending. Declaration of Kenneth Kwan ¶ 8. Exhibit 206. FCWC Admission No. 12.[10] From September 26, 1990 until the November 1, 1991 effective date of Florida Cities' NPDES permit (which by definition superseded the administrative order), the company regularly exceeded the administrative order's effluent limits. According to Florida Cities' own DMRs, summarized in Exhibit C, there were twenty-nine violations of the Administrative Order, as alleged in paragraphs 17-22 of the Revised Amended Complaint. Declaration of Kenneth Kwan ¶ 9.[11]

Florida Cities alludes vaguely to a "mix-up" in the limits imposed by the administrative order, see FCWC Second Set of Interrogatory Answers No. 1, and to Barefoot Bay's unique construction, FCWC Admission No. 13. The limits in the administrative order, however, essentially mirror the limits later imposed in the permit and Florida Cities never challenged the permit limits. Moreover, there is absolutely no evidence in

---

[10] It should be noted that by its own terms the administrative order did not constitute an NPDES permit and did not authorize any discharge; it merely assumed a discharge and, by setting requirements, gave EPA the opportunity to monitor the discharge until a permit was issued. Like other administrative compliance orders EPA issued to Florida Cities, see Exhibit 56, this order contained express language to the effect that it did "not operate [as] an NPDES permit and nothing contained herein shall be construed as preventing prosecution for the violations cited in this Order, for violations of the Order itself, or for any other violations of the Act." Exhibit 206.

[11] The DMRs, which have been summarized for the Court's convenience in exhibits C, F, and I, and attached hereto collectively as Exhibits D, G and J, form the basis of the allegations contained in paragraphs 17-22, 24-25, 30-39, and 44-46 of the United States Revised Amended Complaint.

the record that Florida Cities objected to the limits set out in the order. The Court should conclude from the total absence of objections that Florida Cities recognized that the limits were reasonable.

c) NPDES Permit Violations

1) TRC and Toxicity

NPDES Permit No. FL0042293, applicable to the Barefoot Bay plant, became effective on November 1, 1991. Exhibit B; FCWC Admission No. 14. Since the effective date, Florida Cities has repeatedly violated its conditions and limitations.

According to Florida Cities' own DMRs, there were a total of 182 separate exceedances of the Total Residual Chlorine (TRC) limitation, and three separate toxicity test failures, as alleged in paragraphs 24 and 25 respectively of the Revised Amended Complaint. Declaration of Kenneth Kwan ¶ 11 and Exhibit C.

Florida Cities' convoluted defense to the TRC violations suggests that the company used an imprecise method to test TRC, and that its own reports of exceedances therefore cannot be used to prove up the violations. See FCWC Admission No. 15. This defense must fail because Defendants are estopped from challenging the data they submitted on their DMRS. See section III.C above.[12]

---

[12] Past and present Florida Cities agents who signed the DMRs have challenged neither their authenticity nor accuracy. See Deposition of Paul Bradtmiller II:109; Deposition of Johnnie Overton I:42, II:5, and Deposition of Jack Tompkins at 160.

Florida Cities attributes its toxicity test failures to the inadequacy of its plant's design, suggesting that the permit limits were written for a more advanced plant, the improvements for which are now under construction, see FCWC Admission No. 16, and obliquely implies that it would have met its permit limits were it not for delays caused by regulatory agencies in issuing permits it needed to make necessary improvements to its plant. FCWC Second Set of Interrogatory Answers No. 2, sixth paragraph. Section 509(b) of the Clean Water Act, 33 U.S.C. § 1369(b), however, clearly prohibits Florida Cities from challenging the permit limits in the context of an enforcement action. That section provides in pertinent part that any final Agency action relating to an NPDES permit must be challenged within a specified period of time in the U.S. Court of Appeals. Defendant failed to avail itself of the opportunity to seek judicial review of the permit limits, and cannot be allowed to circumvent the law by challenging the denial in the context of a civil enforcement proceeding.[13] Moreover, the question of fault is not an appropriate inquiry at this stage of the proceedings in view of the Clean Water Act's strict liability scheme, see section III.B above, but rather should be addressed in the penalty phase of the case when the court considers the factors set out in section 309(d) of the Clean Water Act, 33 U.S.C. § 1319(d). See Atlantic

[13] Section 509(b) was discussed extensively in the United States' Opposition to Defendant Florida Cities Water Company's Motion for Partial Summary Judgment to which the Court is respectfully referred, and which is incorporated herein by reference pursuant to rule 10(c), Fed. R. Civ. P.

States Legal Foundation v. Tyson Foods, 897 F.2d 1128, 1140-42 (11th Cir. 1990).

2) Monitoring Violations

BOD

From November 1991 through June 1993 (and twice in November 1993), Florida Cities also failed to monitor biological oxygen demand (BOD) as required by its permit. The Barefoot Bay plant manager has admitted that Florida Cities was reporting to EPA values for carbonaceous biological oxygen demand (CBOD) instead of BOD during the time alleged. Deposition of William Sansbury pp. 207, 209-10; exhibits 114, 116, 117. Based on his testimony, there were 79 such violations.[14]

Florida Cities admits that what it reported as BOD was really CDOB, but blames the mistake on its contract laboratory. See FCWC Admission No. 17. Again, such an excuse, even if truthful, is simply not a defense to liability under the Clean Water Act's strict liability scheme. It was Florida Cities' responsibility to ensure that the proper data was reported to EPA. If it failed to monitor the actions of its laboratory then it must bear the consequences. It has no one to blame but itself.

TRC

The Barefoot Bay permit also requires daily monitoring of total residual chlorine (TRC) using a method specified in the

[14] The applicable permit requires BOD sampling on a weekly basis. Exhibit 139. There were a total of 79 weeks during the period alleged in the Revised Amended Complaint.

permit itself. From February 1992 through June 1993, Florida Cities failed to use the correct method.

The text of Part I.2 of the permit provides in pertinent part that "[t]esting for total residual chlorine (TRC) shall be conducted according to ... the low-level amperometric titration method (if compliance with a permit limitation of 0.20 mg/l or less is to be demonstrated)...." Exhibit 139. Because at all times since the permit became effective the TRC limit was 0.20 mg/l or less, see id. Part I.2 (first two paragraphs), there was only the one approved method, the low-level titration method. Declaration of Kenneth Kwan ¶ 13. According to one of Florida Cities' plant operators, prior to June 28, 1993, however, Florida Cities used the DR-100 method. See Deposition of Glen Siler at 99, exhibit 133. As a result of the use of this unapproved method, there were 514 days of violations.[15]

Florida Cities has twice admitted the TRC allegations, see Defendant's Answer to Amended Complaint ¶ 28 and Defendant Florida Cities Water Company's Answer to Revised Amended Complaint ¶27, but now denies them. Defendant Florida Cities Water Company's Amended Answer to Revised Amended Complaint ¶ 27.[16] Florida Cities now argues that it used one of three EPA-

---

[15] There were 514 days during the period alleged in paragraph 27 of the Revised Amended Complaint.

[16] Florida Cities recently filed a motion for leave to amend its answer to deny this allegation. Because the United States believes that the merits of the defense are best adjudicated in the context of the instant motion, it did not oppose the filing of the amended answer, although it believes Florida Cities had no basis on which to change its answer.

approved methods. See FCWC Admission No. 18. This argument ignores the unambiguous permit requirement that only one method (low-level amperometric titration) be used for TRC limits of .020 mg/l or less.

There were a total of 579 unpermitted discharges, 778 permit violations, and 29 administrative order violations, for a grand total of 1,386 violations at Barefoot Bay. Declaration of Ken Kwan ¶ 14.

2. Carrollwood

a) Unpermitted Discharges

It is uncontested that during the period November 1, 1984 to June 30, 1991, Florida Cites did not have an NPDES permit to discharge from the Carrollwood Plant into the Sweetwater Creek. FCWC Admission No. 23. Likewise, it is uncontested that notwithstanding the absence of the permit, Florida Cities continued to discharge on a daily basis during those seven years. FCWC Admission No. 24. The daily discharges during the period alleged in paragraph 30 of the Amended Complaint (August 1990 to June 1991) account for 234 violations. Declaration of Kenneth Kwan ¶ 17.

Florida Cities offers no defense to this unpermitted discharge claim other than to assert that it has already paid an administrative penalty for the unpermitted discharges in question. It has not. The administrative order in question only covered unpermitted discharges during the period June 1987

through July 1990.[17] The proposed Amended Complaint pleads unpermitted discharge violations beginning in August 1990.

b) NPDES Permit Violations

In May 1991, EPA issued Florida Cities NPDES permit no. FL0029319, which was effective from July 1, 1991 until deactivated. Exhibit E; Declaration of Kenneth Kwan ¶ 16. Admission No. 25. For the six months following the date the permit took effect, Florida Cities violated nearly every one of its effluent parameters. Based on Florida Cities' own DMRs, summarized in Exhibit F, there were a total of 234 separate violations of the Phosphorus, CBOD, Nitrogen, Chlorine, and Fecal Coliform limits, as alleged in paragraphs 30-39 of the Revised Amended Complaint. Declaration of Kenneth Kwan ¶ 17.

Florida Cities now suggests that the Carrollwood permit limits were "inappropriate" because they "were for an advanced wastewater treatment facility." FCWC Admission No. 25. As discussed above, and in the United States' Opposition to Defendant Florida Cities Water Company's Motion for Partial Summary Judgment, however, Florida Cities may not now challenge the permit limits, having failed to exercise that right at the

---

[17] As is the case with the Barefoot Bay unpermitted discharges, Florida Cities has argued that it cannot be held liable for the unpermitted discharge violations at Carrollwood because EPA has already penalized the company for them in an administrative order. As set forth in detail, however, in the United States' Memorandum in Support of its Motion for Reconsideration of Court's Order on Amendment of Complaint, none of the discharges now alleged were covered by the administrative order.

appropriate time and in the appropriate forum. Moreover, as the United States will discuss at length in the penalty phase of the case, Florida Cities' failure to timely upgrade its plant to an advanced wastewater treatment facility was its own making.

3. Waterway Estates

a) Unpermitted Discharges

Paragraph 41 of the Revised Amended Complaint alleges that Defendants discharged without an NPDES permit from the Waterway Estates Plant during the period October 1, 1988 to October 31, 1989.

Florida Cities was authorized by an NPDES permit valid from September 24, 1981 to January 8, 1987 to discharge effluent from its Waterway Estates plant to a tributary canal leading to the Caloosahatchee River. Declaration of Kenneth Kwan ¶ 19. On July 28, 1986, EPA notified the company that it had tentatively decided to deny its application for renewal of the permit. Deposition of Connie A. Kagey, October 24, 1994 at 49; Exhibit 32. On December 8, 1986, EPA issued its final denial, which took effect on January 9, 1987, thirty days after receipt by the company.[18] Id. at 55; Exhibit 33; FCWC Admission No. 28. The basis of both the tentative and final denial was that in a January 1981 report, the Florida Department of Environmental Regulation (FDER) had developed a "no discharge" allocation for

[18] Pursuant to 40 C.F.R. § 122.6, having made a timely renewal application, the company was entitled to continue to discharge under the existing permit, even though it had expired, until the effective date of the denial.

the Waterway Estates plant based on its discharge location at the time (the canal). Id. at 52-57; Exhibits 32-33. It is uncontested that Florida Cities did not challenge the permit denial. FCWC Admission No. 29.

Florida Cities admits that it continued to discharge from the Waterway Estates plant from January 9, 1987 (the effective date of the permit denial) until October 31, 1989. FCWC Admission No. 31. These daily unpermitted discharges account for 396 violations.[19] Declaration of Kenneth Kwan. ¶ 20.

Florida Cities now contends that EPA wrongly denied the permit and, as a result, that its earlier permit continued in force. As set forth in detail the United States' Opposition to Defendant Florida Cities Water Company's Motion for Partial Summary Judgment, however, this argument fails as a matter of law because Florida Cities failed to challenge the permit denial at the time in the U.S. Court of Appeals as required by section 509(b) of the Clean Water Act, 33 U.S.C. § 1369, and cannot now attempt to evade liability in this enforcement action.

b) Discharges to an Unpermitted Location

On November 1, 1989, EPA issued NPDES permit No. FL0030325, which Florida Cities admits was applicable to Waterway Estates. FCWC Admission No. 32. The permit required Florida Cities to discharge directly to the Caloosahatchee River itself rather than

---

[19] Because the initial Complaint was filed in this matter on October 1, 1993, the statute of limitations arguably bar claims before October 1, 1988. Hence, paragraph 41 of the Revised Amended Complaint pleads violations occurring on and after that date.

to the canal. Exhibit 153. Declaration of Kenneth Kwan at 21. FCWC Admission No. 33. Notwithstanding the new location, Defendants continued to discharge to the tributary canal during the period alleged in paragraph 43 of the Revised Amended Complaint, with knowledge that it was an unpermitted location. Deposition of Jack Tompkins at 84. Again, each day of discharge to an unpermitted location is a separate violation. Accordingly, there were 617 such violations. Declaration of Kenneth Kwan ¶ 24.

c) NPDES Permit Violations

Florida Cities periodically violated the effluent parameters in the new Waterway Estates permit. Based on Florida Cities' own DMRs, summarized in Exhibit I, there were a total of twenty-one separate violations of the Total Nitrogen limitations (concentration and loading), as well as three toxicity test failures, as alleged in paragraphs 44-46 of the Revised Amended Complaint. Declaration of Kenneth Kwan ¶ 22; Exhibit I.

Florida Cities argues that it should not be held to the permit limits because delays in upgrading its plant resulted in its not beginning advanced wastewater treatment until April 3, 1992. See FCWC Admission Nos. 35-37. This argument, which is not a defense to liability under the strict liability scheme of the Clean Water Act, will be rebutted at the penalty stage of this litigation. Nor can Florida Cities escape liability by claiming that EPA allowed it additional time in which to complete construction. The purpose of EPA's administrative orders setting

new deadlines for construction represented efforts to speed up construction which was behind schedule, not forgive the delays. By their own terms, the administrative orders were not permits and did not vary the terms of the permit itself. Moreover, the administrative orders made clear that EPA was reserving the right to take enforcement action, and there is no evidence in the record to suggest that EPA intended otherwise.[20]

---

[20] The administrative order issued on September 26, 1989 provides in pertinent part as follows:

> 2. This should in no way be considered a permit to discharge, however, if the Respondent does discharge to waters of the United States in violation of the Act, the Respondent's discharge of treated wastewater shall at least comply with the effluent limitations, monitoring schedule and other requirements contained in its previous permit.
>
> . . . .
>
> 7. Nothing contained in this Order shall be construed to prevent further enforcement of the violations stated herein, nor shall it preclude the use of Administrative Penalties or civil litigation based on violations of the Clean Water Act.

Exhibit 304.

When this administrative order was amended on July 24, 1990, the amendment stressed even further that the order was not a permit and that the Agency retained its right to take enforcement action:

> This Amendment is issued to enforce existing requirements under your NPDES permit and therefore, does not replace, modify or eliminate any NPDES requirement. Notwithstanding the issuance of this Section 309(A) Order, EPA retains the right to bring further enforcement action under Section 309(d) or 309(g) of the Act, for their violations cited in this Order and for any other violation of your NPDES permit and the Act. Violations of the Act including requirements contained in and [sic] NPDES permit or a

(continued...)

Florida Cities also alludes to a consent agreement it negotiated with the State of Florida which penalized it for "certain violations" at Waterway Estates, and asserts that the United States can not seek penalties for those same violations. See FCWC Second Set of Interrogatory Answers No. 2, third paragraph. While Florida Cities is silent both as to the legal and factual basis for this defense, the United States assumes that defendant intends it to arise under section 309(g)(6) of the Act, 33 U.S.C. § 1319(g)(6), which provides, inter alia, that violations which have been the subject of a final administrative State order and penalty under comparable State law shall not be the subject of a federal civil judicial penalty action.

The United States understands that Florida Cities has indeed been cited by state officials for state violations at its Waterway Estates plant. The particular violations of federal law alleged by the United States in this action, however, have never been the subject of a state administrative order or penalties. An administrative Consent Order before the Florida Department of Environmental Regulation ("FDER") (now the Florida Department of Environmental Protection ("FDEP")), OGC Case No. 88-0384, settled the State's allegations regarding a major upset at Waterway Estates in 1987 which resulted in a number of state permit

---

[20](...continued)
Section 309(a) Order, remain subject to a civil penalty up to $25,000 per day for each violation pursuant to Section 309(d) of the Act.

Exhibit 320 [emphasis in original].

violations. That agreement, signed by Florida Cities on July 15, 1988, resolved 1987 violations of Florida Administrative Code Rules 17-600.750(1), 17-7.040, 17-600.740(a)(b)(1.d and 17-601.500(1). The federal violations alleged by the United States in this case all occurred after 1987. A subsequent FDER Consent Order, OGC Case No. 90-1747, signed by Florida Cities on November 25, 1990, resolved Florida Cities' liability for violating a Florida statute by failing to comply with the previous consent agreement's requirement that it complete construction and obtain certification of plant upgrades by November 1, 1990. The United States does not seek to penalize Defendants for that violation but rather for discrete NPDES permit violations.

In sum, the United States' claims are distinctly different from the state violations covered by the state orders, each of which contained language expressly stating that it "does not relieve Respondent of the need to comply with all applicable federal, state or local laws, regulations or ordinances." By no stretch of the imagination could the consent agreements have covered the violations at issue in the instant case, the United States' is not barred by those agreements from bringing the claims in this suit.

C. Liability of Avatar Holdings

Standard of Liability of a Parent Company

Avatar Holdings should be held liable for the violations of the Act alleged in this action because, as Florida Cities' parent

company, Avatar directly and pervasively controlled Florida cities' environmental practices.

There is sound authority in this jurisdiction for finding a parent company directly liable under federal environmental protection statutes for the acts of its subsidiary. Under Jacksonville Electric Authority v. Eppinger and Russell Company, 996 F.2d 1107 (11th Cir. 1993), a parent may be held liable as an operator of its subsidiary's business under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA or "Superfund"). In Jacksonville Electric, the Eleventh Circuit adopted the test for parent company liability formulated by Judge Moore in his district court decision, Jacksonville Electric Authority v. Eppinger and Russell Company, 776 F. Supp. 1542 (M.D. Fla. 1991). Judge Moore held that a parent company is liable when it "exercises actual and pervasive control of the subsidiary to the extent of actually involving itself in the daily operations of the subsidiary. Actual involvement in decisions regarding the disposal of hazardous substances is a sufficient, but not a necessary condition to the imposition of operator liability." 776 F. Supp. at 1547-48.

Courts in other jurisdictions have also held that a parent company may be liable under CERCLA. See Lansford-Coaldale Water Authority v. Tonolli Corp., 4 F.3d 1209, 1221, 1222 & n.13 (3d Cir. 1993); United States v. Kayser-Roth Corp., 910 F.2d 24, 26-27 (1st Cir. 1990), cert. denied, 498 U.S. 1084 (1991); United States v. Amtreco, Inc., 809 F. Supp. 959, 966 (M.D. Ga. 1992);

New York v. Shore Realty Corp., 759 F.2d 1032, 1052-53 (2d Cir. 1985); United States v. Nicolet, Inc., 712 F. Supp. 1193 (E.D. Pa. 1989); United States v. Mottolo, 695 F.Supp. 615, 624-25 (D.N.H. 1988); Idaho v. Bunker Hill Co., 635 F.Supp. 665, 672 (D. Idaho 1986). And, courts in other jurisdictions also have embraced direct liability theories in order to find individual corporate officers liable in cases arising under other environmental protection statutes. See United States v. Pollution Abatement Services of Oswego, Inc., 763 F.2d 133 (2d Cir. 1985)(Rivers and Harbors Act); United States v. Production Plated Plastics, 742 F. Supp. 956 (W.D. Mich. 1990) (Resource Conservation and Recovery Act (RCRA)); Vermont v. Staco, Inc., 684 F.Supp. 822, 830-32 (D.Vt. 1988) (CERCLA and RCRA); United States v. Tzavah Urban Renewal Corp., 696 F. Supp. 1013 (D.N.J. 1988) (Clean Air Act).

Judge Moore's analysis was based on United States v. Fleet Factors Corp., 901 F.2d 1550 (11th Cir. 1990), cert. denied, 498 U.S. 1046 (1991); Riverside Mkt. Dev. Corp. v. International Bldg. Products, Inc., 931 F.2d 327, 330 (5th Cir. 1991), cert. denied, 502 U.S. 1004 (1991), and United States v. Kayser-Roth Corp., 910 F.2d 24, 26-27 (1st Cir. 1990), cert. denied, 498 U.S. 1084 (1991). In Fleet, the Eleventh Circuit held a secured creditor liable for Superfund cleanup costs, notwithstanding an express exemption in CERCLA for secured creditors, see 42 U.S.C. § 9601(20)(A), reasoning that their "awareness that they are potentially liable under CERCLA will encourage them to monitor

the hazardous waste treatment systems and policies of their debtors and insist upon compliance with acceptable treatment standards as a prerequisite to continued and future financial support." United States v. Fleet Factors Corp., 901 F.2d at 1558.

Both the Eleventh Circuit in Fleet, and Judge Moore in Jacksonville Electric, found Kayser-Roth to be instructive. In Kayser-Roth, finding the parent directly liable, the court considered the following factors as indicia of the parent's "total control" control over the subsidiary:

> 1) its total monetary control including collection of accounts payable; 2) its restriction on Stamina Mills' financial budget; 3) its directive that subsidiary-governmental contact, including environmental matters, be funneled directly through Kayser-Roth; 4) its requirement that Stamina Mills' leasing, buying or selling of real estate first be approved by Kayser-Roth; 5) its policy that Kayser-Roth approve any capital transfer or expenditures greater than $5,000; and finally, its placement of Kayser-Roth personnel in almost all Stamina Mills' director and officer positions, as a means of totally ensuring that Kayser-roth corporate policy was exactly implemented and precisely carried out.

910 F.2d at 27.

The holdings in Jacksonville Electric, Fleet, and Kayser-Roth (as well as the holdings in the individual direct liability cases referenced above which were brought under other environmental protection statutes), should apply equally to a Clean Water Act enforcement action. Both CERCLA and the Clean Water Act are environmental protection statutes. Indeed, CERCLA itself was modelled in part on the Clean Water Act. See, e.g., United States v. Carr, 880 F.2d 1550, 1553 (2d Cir. 1989);

Conservation Law Foundation of New England v. Browner, 840 F. Supp. 171, 174 (D. Mass. 1993); Lincoln Properties, Ltd. v. Higgins 823 F. Supp. 1528, 1540-41 (E.D. Cal. 1992). The underlying question of liability in Jacksonville Electric and Kayser-Roth turned on whether the parent companies were "operators" within the meaning of CERCLA. As the court in Kayser-Roth noted, the definition of operator relies in large part on the definition of "person," which "[t]he statute defines ... extremely broadly and certain includes a parent corporation." United States v. Kayser-Roth, 910 F.2d at 26 and n.5. Similarly, section 309(d) of the Clean Water Act, 33 U.S.C. § 1319(d), provides that **"any person"** who violates specified provisions of the Act or an administrative order issued under the Act is liable for civil penalties [emphasis added]. Like CERCLA, "person" is defined extremely broadly under the Clean Water Act, and includes a corporation.[21] Finally, the Eleventh Circuit in Fleet makes it clear that it intends those with the authority to prevent pollution to take responsibility for doing so.

Facts Supporting Avatar's Liability

The United States submits that based on the facts developed in discovery, Avatar Holdings must be held directly liable under the Jacksonville Electric test for the violations alleged in this case. The deposition testimony and exhibits demonstrate that

---

[21] "Person" is defined as "an individual, corporation, partnership, association, State, municipality, commission, or political subdivision of a State, or any interstate body." 33 U.S.C. § 1362(5). Avatar Holdings admits that it is a corporation. Answer of Avatar Holdings, Inc. ¶4.

Avatar Holdings exercised pervasive control of the environmental practices of Florida Cities. Under the case law in this Circuit and District, these facts demonstrate that Avatar is liable for the violations.

Avatar Holdings, whose offices are in Coral Gables, Florida, is a publicly-traded company, whose primary business activities include retail land sales, land development and utility service.[22] Florida Cities, whose offices are in Sarasota, is a subsidiary of Avatar Holdings. FCWC Admission No. 1.

Florida Cities asserts that Avatar Holdings owns it through a paper chain of other companies. Id. The distinction is unimportant, however, because, as will be demonstrated herein, Avatar Holdings, in fact, directly controls Florida Cities and, particularly, its environmental practices.[23]

While the other companies may at least nominally have officers, they all function simply as one company. Even Florida Cities tends to refer to all of the Avatar entities simply as "Avatar." In interrogatory answers, Florida Cities listed Avatar personnel without distinguishing between the nominally distinct entities. FCWC First Set of Interrogatory Answers no. 4. Florida Cities managers also tend simply to refer to the Avatar

---

[22] This information is based on Securities and Exchange Commission public filings of which this Court may take judicial notice pursuant to Fed. R. Evid. 201(c).

[23] It is unclear whether any of them presently operates or even has any employees. Avatar Utilities, Inc. has undergone "downsizing" from a staff of roughly six employees located at Avatar Holdings' offices in Coral Gables. Deposition of Bradtmiller II:16-18.

entities uniformly as "Avatar." See, e.g., Bradtmiller II:42-43, 59-61, Overton II:125-131. In fact, the Florida Cities' Executive Vice-President commented that Florida Cities employees are Avatar employees. Bradtmiller II:27. And, as the exhibits cited below will make abundantly clear, inter-office memoranda, even between officers of the allegedly distinct companies make no mention of title of corporate affiliation.

Avatar exercises not simply the type of routine oversight that one might expect that a parent would exercise over a subsidiary. Rather, the chain of command, as well as certain logistical details, confirms that the Avatar management is simply an extension of the Florida Cities management. Indeed, a memorandum written by the Avatar Utilities president suggests that Florida Cities is ultimately managed not by its own officers or even Avatar Holdings officers, but by Avatar Holdings Board members, who are referred to as "Senior Management in New York." Exhibit 653.[24]

Avatar employees serve on the Florida Cities Board. See "Defendant Florida Cities Water Company, Inc.'s Answers to the United States' First Set of Interrogatories," [hereinafter "FCWC First Set of Interrogatory Answers"] No. 4 (filed herewith). The

[24] The United States' attempts to obtain discovery directly from the "Senior Management in New York" have so far been strongly rebuffed. Defendants have refused to search and produce documents from the Board members' files, and have refused to produce copies of the minutes of Avatar Holdings' Board of Directors meetings. See United States' Motion to Compel Discovery, filed May 22, 1995. The deposition of the Avatar Chairman of the Board, Leon Levy, who resides in New York, was noticed for June 19, 1995, but he failed to appear.

Florida Cities executive vice-president, Paul Bradtmiller, reports not to the Florida Cities president, but directly to Gerald Allen, the executive vice-president of Avatar Utilities, whose office is upstairs from his in Sarasota. Deposition of Paul Bradtmiller I: 61-63.[25] Conversely, the president of Florida Cities, Robert Gordon, who also serves as the Avatar Utilities president, is located in the Avatar suite in Coral Gables, Florida, not in the Florida Cities office in Sarasota. Deposition of Robert Gordon at 4.[26]

Avatar in particular pervasively controls Florida Cities' environmental practices. Bradtmiller, the Florida Cities Executive Vice-President, speaks daily to Allen, the Avatar Utilities Executive Vice-President, Deposition of Paul Bradtmiller II:12-13, who is involved whenever there is a question of environmental compliance, id. II:71-72. A memorandum drafted by Allen instructs Bradtmiller to transmit to him "all notices of violations, consent orders, administrative orders, notices of civil actions, warning letters from regulatory agencies, and other similar documents. . .immediately upon receipt." Bradtmiller II:61-62, exhibit 227. The present

---

[25] Although Bradtmiller identifies Allen as executive vice-president of Avatar Utilities, Deposition of Paul Bradtmiller I:61, he has also been addressed as being affiliated with Avatar Holdings, see Exhibit 593.

[26] Gordon has testified in a rate-making proceeding that he is also the president of FCWC Holdings, Consolidated Water, and Avatar Utilities. Exhibit 764. As far as we know, there are no other Florida Cities employees or officers in Coral Gables, and Gordon appears to occupy his office there as an Avatar officer.

Florida Cities operations manager also testified that she reports directly to Allen, Gordon, and the Avatar Holdings Executive Vice President/General Counsel on matters relating to environmental compliance. Deposition of Julie Karleskint at 78-80.

Florida Cities relies on Avatar's "Environmental Assurance Plan" because it has no such plan of its own, Deposition of Paul Bradtmiller I:109-11, and Florida Cities has relied on Avatar to conduct environmental audits. Such audits were conducted by an Avatar employee resident in Florida Cities' Sarasota office from January 1989 through January 1992, see Deposition of Julie Karleskint at 55, 62-67, three critical years in Florida Cities' history in terms of the violations alleged by the United States. As of November 1994, Florida Cities still did not have its own environmental auditor, but claimed that it was planning to hire one. Bradtmiller II. at 75-76. That person's audits will go directly to Dennis Getman, the Avatar Holdings Executive Vice-President/General Counsel. Id.

Avatar officers and directors are not simply consulted and privy to decisions of any significance, they actually make and approve such decisions. During the time periods relevant to this action, expenditures of more than $10,000 at any Florida Cities facility had to be approved by Avatar Holdings officers. These spending authorizations, which Avatar calls "conwards," have separate signature lines within a distinct block for the signature of the Avatar Holdings president and C.E.O. See, e.g., Exhibits 490-538. See also Deposition of Johnnie Overton,

II:150-51. Since, judging from the conwards themselves, Florida Cities relied heavily on contractors and consultants for whom authorizations were required to address its environmental issues (i.e., study discharge alternatives and design and build plant improvements), the ultimate decisions to hire those individuals were made by Avatar Holdings.

A wealth of documentation reveals that Allen, together with Gordon, as the top two Avatar Utilities officers, report on Florida Cities' environmental matters directly to Dennis Getman, an Avatar Holdings officer. Indeed, it is readily apparent from Avatar correspondence, memoranda, and other documents referenced herein that these three individuals were key decision-makers in matters relating directly to the violations alleged by the United States. It is also readily apparent from the documentation that each of these three individuals also reported directly to the Avatar Holdings president and Board members on environmental matters relating directly to the allegations in this law suit.

1. Barefoot Bay

The unpermitted discharges from the Barefoot Bay plant alleged by the United States were directly caused by Avatar Holdings' continued development of Barefoot Bay well beyond its sewage capabilities. The effluent from the plant was discharged into percolation ponds of limited capacity, which, in the early 1980s, began overflowing into a canal leading to the Sebastian River. These overflows, however, did not stop Avatar from continuing to market its lots.

According to the sworn testimony of Florida Cities' own Division Manager, Larry Good, in 1983, when Barefoot Bay came under his supervision, the ponds were already overflowing into the canal. Deposition of Larry Good at 175. At that time, there were roughly 2,000 units in the development, resulting in a flow of approximately 200,000 gallons of wastewater per day. Id. at 181-82. The two percolation ponds, into which the plant discharged, however, together had only a 50,000 gallon/day disposal capacity. Id.. As a result, in 1983 approximately 100,000-150,000 gallons of effluent overflowed from the percolation ponds on a daily basis into the drainage canal. Id. In 1984, the overflow into the canal reached approximately 200,000 gallons per day. Id. at 180.

As early as 1984, it is apparent that Gordon (the Avatar Utilities president) was well aware that the Barefoot Bay percolation ponds were overflowing into the canal, and, in turn, notified Avatar Holdings Board members of the problem and his intended solution. His June 22, 1984 memorandum on the subject of "Effluent Disposal - Barefoot Bay," was directed to the John Sladkus, an Avatar Holdings Executive Vice President at the time, and copied to Peter Sharp, a member of the executive committee of the Avatar Holdings Board of Directors at the time, Deposition of Paul Bradtmiller II:93-95, whom Bradtmiller describes as the boss

of Larry Wilkov, the Avatar Holdings president, id.[27] The memorandum reads in pertinent part as follows:

> As you know the percolation ponds at the Barefoot Bay Wastewater Treatment Plant are not operating properly, and as a consequence, the effluent is leaching into an adjacent canal which periodically has inundated an area of an orange grove which allegedly damaged some trees.

Exhibit 474.

The memorandum goes on to discuss various potential land disposal solutions, including building additional percolation ponds, spray irrigation, and deep-well injection.[28] A year later, with the ponds still overflowing into the canal, Avatar Holdings officers and Board members signed a conward to authorize the design of additional percolation ponds and plant improvements. Exhibit 749.[29]

---

[27] Both Sladkus and Sharp are believed to have been part of the "Senior Management in New York" (Sharp died in 1992). While Sladkus has been identified by Florida Cities as an "Avatar employee who served as a Director or Officer of FCWC," with a New York address, see FCWC First Set of Interrogatory Answers, no. 4., Sladkus is further identified in public SEC filings as Avatar Holdings' Executive Vice President.

[28] Testimony on this memorandum (its attachment has never been produced) has been limited by virtue of the fact that its author (Gordon) and two of its recipients (Wilkov and Reeves) have plead the Fifth Amendment, and one of its recipients is dead (Sharp). When the forty acres were eventually acquired, they were used for spray irrigation, not construction of additional basins, Deposition of Paul Bradtmiller II:85, which only partly reduced the overflow from the percolation ponds, Deposition of Larry Good at 216-219.

[29] Avatar had the opportunity to buy more land which ostensibly could have provided additional and immediate land disposal options for the Barefoot Bay effluent: a memorandum dated June 13, 1985 and written on Avatar letterhead to Wilkov advised him of an offer to sell approximately 200 acres adjacent to Barefoot Bay. Exhibit 475. The same memorandum also refers to an "approximate 270 acre Hearndon property." Id.

In the meantime, notwithstanding the daily overflows to the canal, Florida Cities continued to operate the Barefoot Bay wastewater treatment plant without an NPDES permit and Avatar Holdings continued to develop Barefoot Bay. Some 300 units were added each year from 1984-89, some 200 units from 1989-90, and some 100 units in 1991. Deposition of Larry Good at 183-88. These new units were connected to the existing treatment facility even though Avatar must have been aware that they would result in increasing volumes of wastewater being discharged without a permit to the Sebastian River, and even after EPA had issued its administrative order in September 1990 finding that Florida Cities was in violation of the Clean Water Act by discharging without an NPDES permit. Exhibit 206.[30]

Various projects conducted during relevant years which related to studying alternative discharge options at Barefoot Bay were handled directly by Allen (the Avatar Utilities Executive Vice-President) with the participation of Gordon (the Avatar Utilities President) and Getman (the Avatar Holdings Executive Vice-President/General Counsel). Getman personally handled projects which involved the purchase of land. Both, in turn, were closely supervised by Avatar Holdings Board members, including, at times, its Chairman of the Board, Leon Levy.

---

[30] By 1987, the overflow to the canal had reached approximately 300,000 gallons per day. Id. at 185-86. It remained at that level during 1988, id., decreased to 200,000-250,000 gallons per day in 1989 (as a result of the addition of a spray irrigation field), Deposition of Larry Good at 187-88, reached 300,000 gallons per day again in 1990, id., and peaked at approximately 330,000 gallons per day in 1991, id. at 189-90.

In April 1989, Gordon forwarded to Sladkus (an Avatar Executive Vice-President) an engineering report on deep well injection at Barefoot Bay. Exhibit 758. Gordon recommends that "we arrange a meeting to review the entire injection well controversy with CH2M Hill so that everyone has first hand information relative to the Barefoot Bay project's success." Id. In June 1989, Allen travelled to New York to brief Avatar Board members on the various alternatives. Exhibit 541. Unidentified handwritten notes of the meeting appear to read "Continue to pursue deep well simultaneously with permit to irrigate." Exhibit 704.

In July 1989, even while the Barefoot Bay plant was discharging without a permit, a memorandum written by Sladkus to Wilkov reveals that Avatar Holdings had plans to acquire and develop an additional tract of land, known as the Hearndon Property, and was debating whether to use the Barefoot Bay plant to treat effluent from the new development. Exhibit 476.

In August 1989, Gordon wrote a memorandum to Sharp and Wilkov about the possibility of using neighboring orange groves on which to dispose of the Barefoot Bay effluent. Exhibit 477.[31] The recipients of that memorandum included Levy and Sladkus. Id. By September 1989, it was evident that the deep well injection project had not been a success, and Gordon sent Sladkus a copy of

[31] Even details such as flow data from the Barefoot Bay treatment plant were later provided directly to Sharp. Exhibit 717.

a submittal to FDER proposing spray irrigation. Exhibit 759. In November 1989, a report entitled "Wastewater Disposal Alternatives to Deep Well Injection, Barefoot Bay" was transmitted directly from Allen to Board members including Levy. Exhibit 706.

Although there are many more examples which serve to illustrate why Florida Cities Water Company is merely Avatar Holdings' alter ego, perhaps the best example is Avatar's ill-fated attempt in 1990 to acquire orange groves known as the Micco Groves adjacent to the Barefoot Bay plant to be used for disposal of the Barefoot Bay effluent. In February 1990, Getman contacted Sun Bank regarding an outstanding Avatar offer to purchase the groves, which the bank held in trust. Exhibit 707. Using Avatar Holdings letterhead, he signed as Executive Vice President - General Counsel of Avatar Properties, Inc. Id. Using the same letterhead and title, he increases Avatar's offer on May 10, 1990, copying the Avatar Holdings president, among others. Exhibit 708. On June 14, 1990, a Getman memorandum to file reflects that there is competition for the orange groves. Exhibit 709. That memorandum is also copied to the Avatar president, among others, id., and then forwarded by Gordon on June 15, 1990 to Sladkus, among others, Exhibit 710. Sladkus responded personally on June 18, 1990, injuring about the possibility of obtaining the property through condemnation proceedings. Exhibit 711. On June 18, Getman writes another memorandum saying that he has set up a meeting on the subject for

June 22, 1990, noting in a "P.S." that "Mr. Sladkus would like to join this discussion by telephone conference." Exhibit 712. On June 19, Gordon writes directly to Sladkus saying that "condemnation of the Micco Grove property would be extremely difficult because (a) the property is not unique (other property would be available for a price) and (b) there are alternatives to spray irrigation." Exhibit 713. Sharp then gets involved, again urging eminent domain. Exhibit 760.

On July 25, 1990, Getman, writing on Avatar Holdings letterhead, signing as "Executive Vice President" of Avatar Properties increases his offer again. Exhibit 714.[32] On August 24, 1990, Getman ups his offer yet again. Exhibit 716. He again uses Avatar Holdings letterhead, but this time, he makes the offer on behalf of Florida Cities Water Company, signing as its "General Counsel." Id.

A March 31, 1991 memo from Gordon to Getman, Sharp, and Wilkov, among others, shows that Avatar did eventually begin condemnation proceedings, notwithstanding Gordon's evaluation that they would be inappropriate, and thereafter did reach a tentative agreement reached for purchase of the property, subject. Exhibit 233. Ultimately, however, the property was never acquired. Deposition of Paul Bradtmiller II:97.

---

[32] The same day, Getman writes a letter about wastewater treatment to a state environmental regulator, again using Avatar Holdings letterhead, but this time signing on behalf of Barefoot Bay Development Corporation as its Executive Vice President - General Counsel. Exhibit 715.

The Micco Grove illustration is useful from a number of perspectives. First, it highlights Avatar's pervasive involvement in the management of Florida Cities Water Company and the Barefoot Bay treatment plant. Second, it demonstrates Avatar's intimate knowledge of the unpermitted discharges. Third, it reveals the commonality of interest of the various Avatar entities.[33] Fourth, it indicates high-level Avatar Holdings involvement at the time of the unpermitted discharges alleged in the instant action.

The conclusion is inevitable that Avatar, a sophisticated development company, continued to expand the Barefoot Bay development with knowledge that it would thereby increase the magnitude of the unpermitted discharge violations. Avatar made that business decision both as the developer of Barefoot Bay and as the parent company of Florida Cities, choosing not to defer developing until it was able to comply with the law and ignoring the consequences to the environment.

2. Carrollwood

Avatar officials were also well aware that Florida Cities was operating its Carrollwood plant without a permit. As far back of August 6, 1984, Robert Gordon (the Avatar Utilities President) sent a memorandum to Sladkus (an Avatar Holdings

---

[33] Getman's role is apparently multi-faceted. According to the testimony of a Florida Cities vice-president, Getman is corporate counsel for Avatar Holdings, Avatar Properties, and Avatar Utilities, Deposition of Johnnie Overton II:126. As Getman himself put it in a memorandum, at times he wore both his "developer" hat and the "utility" hat, purporting to represent both sides to an agreement. Id. at II:133 and Exhibit 188.

Executive Vice President), with a copy to Wilkov (the Avatar Holdings President), which reads in pertinent part as follows:

> Attached is a letter from the EPA denying our application for an extension of our Temporary Operating Permit for the Carrollwood Wastewater Treatment Plant located in Hillsborough County. The plant discharges its effluent into Sweetwater Creek. In October 1979 the Company was advised that it would have to stop discharging into the creek and would have to find another method of effluent disposal. At that time, the Company looked into spray irrigation on golf courses, building percolation ponds and other possible methods of disposal, all of which were rejected for one reason or another.
>
> . . . .
>
> We intend to write to the EPA and inform them of our negotiations with the County and attempt to have them reconsider their position. If they refuse, I believe our only alternative is to fight their mandate through the courts.

Exhibit 489.

Gordon's resolution that they would fight the matter in the courts perhaps accounts in part for why there is so little documentation of efforts to cease the discharge: Avatar simply decided not to make any serious efforts to comply. And, a 1986 memorandum from Gordon to Getman makes it clear that Avatar decided to stall and continue its unpermitted discharge until Hillsborough County would accept the Carrollwood sewage:

> Enclosed is a proposed consent order to be entered into by FCWC with the DER to allow FCWC's Hillsborough WWTP to continue to discharge treated effluent into Sweetwater Creek. FCWC has been ordered by the DER to discontinue discharging its treated effluent to Sweetwater Creek. The solution to the problem is for the Company to connect to Hillsborough County's regional plant. The problem has been Hillsborough Countys [sic] inability to provide adequate capacity for our plant at this time.

> **The consent order will buy us time,** I do not see any resolve of the problem short of connecting to the Hillsborough plant. **I doubt that we will be connected by August 1988, expiration of consent order.**

Exhibit 726 [emphasis added].

Getman not only endorsed the stall, but also suggested that Gordon negotiate language that would enable Florida Cities to stall even longer with impunity. He wrote back as follows:

> You're probably 100% correct, in that a proposed Consent Order would only buy us further time.
>
> . . . .
>
> 2. I would be greatly surprised if the DER agreed without a fight to Paragraph #5 which states FCWC's only alternative. I believe that this language must be somewhere in the Consent Order as it is important for future leverage when, and if, FCWC is unable to comply with the cease and desist date of August 31, 1988.
>
> 3. Is there any chance that the aforesaid cease and desist date could be extended?

Exhibit 727.

Eventually, Avatar did begin to study the alternatives. In 1986, Wilkov approved an expenditure for an engineering study of the design of a pumping station and force main (pipe) to transfer the Carrollwood wastewater to the Hillsborough County facility. Exhibit 652.[34] Avatar apparently debated whether to tie in to another treatment plant or improve its own. In 1989, a conward was actually signed, Exhibit 567, authorizing the advanced wastewater treatment plant, which prompted an exchange of memoranda between Gordon and Sharp. Exhibit 762. As noted in

---

[34] Sharp's name also appears on the conward.

section "F" above, however, the AWT plant was never built,[35] and not until 1992 did Florida Cities cease discharging by connecting of the Carrollwood sewage to the Hillsborough County system.

3. Waterway Estates

Avatar officials at the highest levels were also aware of the violations at Waterway Estates and made critical decisions relating to compliance.

On June 30, 1986, some six months before EPA actually denied Florida Cities' permit renewal at Waterway Estates, it sent a letter to Florida Cities advising it of the impending denial. Exhibit 665. On August 14, 1986, Gordon forwarded that letter to Avatar officials, including Sladkus, Getman, and Wilkov, with a brief explanation: "The EPA wants the Company to either discontinue discharging effluent to a canal which ultimately goes to the Caloosahatchee River or improve the treatment to AWT and seek a wasteload allocation to the Caloosahatchee." Exhibit 732. Gordon's letter is enlightening in two important respects: first, Avatar Holdings knew of the impending permit denial; and second, Avatar Holdings knew that any future permitted discharge would have to go not to the canal but to the river itself.

In June 1987, Gordon forwarded to Sladkus a copy of EPA's compliance order. Exhibit 733.[36] On August 31, 1987, Gordon forwarded to Sladkus a copy of an engineering report on the

---

[35] Because the AWT plant was never built, the permit violations at Carrollwood were inevitable.

[36] In January 1987, the permit denial had taken effect, and Waterway Estates simply continued discharging without a permit.

feasibility of disposing of wastewater at the Waterway Estates plant. Exhibit 765. Cost remains the primary issue. Gordon wrote, "[a]s you can imagine from the recommended cost of treatment and disposal, additional work [on the options] will have to be done." On November 19, 1987, apparently after additional work was done, Gordon again writes to Sladkus attaching an options memorandum. Exhibit 766. It is clear from the evidence that Defendants were evaluating whether to expend a large sum of money to upgrade the Waterway Estates plant or to contract with another private wastewater treatment company, North Fort Myers Utilities (NFMU) to treat its waste. Ultimately, Defendants made a business decision to forego connecting to NFMU (which used land disposal methods of disposing of its effluent). That decision is memorialized as follows in a later letter from Gordon to the Avatar Chairman of the Board, Leon Levy:

> Prior to deciding to upgrade our existing plant, we contacted NFMU to determine whether or not we could enter into an agreement whereby NFMU would treat waste from the Waterways Estates area. NFMU was agreeable to this arrangement, however, they insisted upon a connection fee plus gross-up for the equivalent units connecting to the system. The tax gross-up impact made the connection uneconomic as compared to upgrading our existing plant. Florida Cities also tried to lease a part of their plant and also inquired about purchasing an interest in their plant. Being unable to reach an agreement that made economic sense, the gross-up was the killer, Florida Cities turned its attention to upgrading its existing wastewater treatment facility.

Exhibit 772.

In order to comply with the new Waterway Estates permit, issued on September 29, 1989 and effective on November 1, 1989, Exhibit H, Florida Cities needed to upgrade the plant and move

its discharge. At the same time, they were considering expanding the plant. But, high level Avatar officials were concerned by the construction costs that were to be incurred in effecting the changes. Sharp writes Sladkus on October 2, 1989 that he is "very worried" about the content of a September 18 memo by Allen detailing the costs of the Waterway Estates upgrade and expansion. Exhibit 575. By cover memo dated June 5, 1990, Allen sends Sladkus conward number 940 requesting approval for the Waterway Estates improvements. Exhibit 576. On June 11, 1990, Sladkus rejects the conward. Exhibit 770. In short, in the absence of testimony from these individuals, these documents suggest that delays in the upgrade and expansion necessary for compliance are directly attributable to expenditures directly and pervasively controlled by Avatar officials. Avatar knew in August 1986 that it needed to move the outfall from the canal to the River, but it did not do so until July 1991. See discussion in section IV.B.3 above.

High-level Avatar officials were kept apprised every step of the way. When, in July 1991, it became clear that the Waterway Estates improvements were again behind the schedule (making the NPDES permit violations inevitable), Allen wrote a memorandum directly to Sharp, with copies to Getman, Gordon, and Wilkov. Exhibit 582. In September 1992, Allen alerted Gordon to the toxicity violations at Waterway Estates. Exhibit 591.

Avatar Holdings was not only directly involved in decision-making resulting in the violations, but also in strategy relating

to EPA's enforcement actions as a result of the violations. Dennis Getman, the Avatar Holdings Executive Vice-President/General Counsel personally planned the strategy for negotiating a penalty for the Waterway Estates violations in a May 18, 1992 memorandum to Gerald Allen:

> At this point in time, I believe that the position of FCWC to the USEPA should be "firm" in nature without being too aggressive. Of course, that is not to say that we may not want to get aggressive at a later stage as sometimes you can cut a better deal with the attorneys at the Justice Department than you can with the "bunny hugger" environmentalist attorneys at the USEPA.

Exhibit 273.

The facts summarized above clearly establish that Avatar Holdings exhibits actual and pervasive control over Florida Cities' environmental practices. These facts readily meet both the Jacksonville Electric test. Avatar was not only the real decision-maker on environmental matters relating directly to the allegations in the complaint, but also the real party in interest. It was Avatar Holdings that stood to gain financially -- and did gain -- by the development of Barefoot Bay. It was Avatar Holdings that ultimately stood to gain financially by the operation of Florida Cities' wastewater treatment plants. And, it should be Avatar Holdings, as well as Florida Cities, which should be penalized as a result of the violations which have been committed.

V. CONCLUSION

No genuine issue of material fact remains as to the Defendants' liability for any of the United States' claims for

relief.[37] Accordingly, summary judgment on liability should be entered in its favor pursuant to Rule 56, Fed. R. Civ. P. Trial should be limited to a determination of the appropriate penalty each defendant should pay for the violations.

Respectfully submitted,

LOIS J. SCHIFFER

Exhibit_____(GHB-53)

IN THE UNITED STATES DISTRICT COURT
FOR THE MIDDLE DISTRICT OF FLORIDA
FORT MYERS DIVISION

UNITED STATES OF AMERICA, Plaintiff, v. AVATAR HOLDINGS, INC., and FLORIDA CITIES WATER COMPANY, INC., Defendants.	CIVIL ACTION NO. 93-281-CIV-FTM-21

UNITED STATES' SECOND SET OF INTERROGATORIES TO DEFENDANT FLORIDA CITIES WATER COMPANY, INC.

Pursuant to Rules 26 and 33 of the Federal Rules of Civil Procedure, Plaintiff, the United States of America, serves upon Defendant Florida Cities Water Company the following interrogatories to be answered by Defendant separately and fully in writing and under oath, and served upon the undersigned attorney within 30 days.

INSTRUCTIONS AND DEFINITIONS

A. Unless otherwise specified, these interrogatories pertain to Florida Cities Water Company, Inc. ("Defendant") and its parent companies, and the directors, departments, divisions, officers, employees, agents, servants, assigns and, unless privileged, the attorneys of Defendant and its parent companies.

B. These interrogatories are continuing in nature and require you to provide supplemental answers promptly in the event that you or your attorney obtain information that alters or augments the answers now given.

C. Where an individual interrogatory calls for an answer that involves more than one piece of information, each part of the answer is to be set out clearly so that it is understandable.

D. Words used in the plural shall also be taken to mean and include the singular. Words used in the singular shall also be taken to mean and include the plural. "Or" and "and" shall be construed either conjunctively or disjunctively to bring within the scope of these interrogatories any information that might otherwise be construed to be outside their scope. The past tense includes the present tense where the clear meaning is not distorted by change of tense.

E. "EPA" means the United States Environmental Protection Agency, and its agents and employees.

F. "Person" includes any natural person, firm, corporation, partnership, joint venture, association, proprietorship, company, government agency, group, or other entity or organization.

G. "Relate(s)" or "relating to" means constituting, defining, containing, embodying, reflecting, identifying, stating, referring to, dealing with, or in any way pertaining to.

H. "Identify", "identification" and "identifying" mean and include, with respect to a natural person, the following:

(1) full name;

(2) home address and telephone number;

(3) present employer, business address and telephone number; and

(4) present occupation, job title and responsibilities.

I. All terms not expressly defined above are used herein as used in common English and/or as used within the meaning of the Clean Water Act, 33 U.S.C. §§ 1251 to 1387.

INTERROGATORIES

1. For each allegation in the United States' Revised Amended Complaint in this action denied by Defendant, summarize in full the facts supporting Defendant's denial, and identify each person of whom you are aware with knowledge of the facts either supporting or refuting Defendant's denial.

2. For each affirmative defense asserted by Florida Cities Water Company, Inc. in its Answer to the United States' Revised Amended Complaint in this action, summarize in full the facts supporting the affirmative defense and identify each person of whom you are aware with knowledge of the facts either supporting or refuting the affirmative defense.

3. For each violation alleged in the United States' Revised Amended Complaint in this action, and without regard to whether or not you believe that Florida Cities Water Company, Inc. is liable for such violation, state:

a. the number of days of each type of violation;

b. the seriousness of the violation;

c. the economic benefit to Florida Cities Water Company, Inc. (if any) resulting from the violation;

d. whether Florida Cities Water Company, Inc. has a history of such violations;

e. all good-faith efforts Florida Cities Water Company, Inc. has made to comply with the applicable requirements of the Clean Water Act;

f. the economic impact on Florida Cities Water Company, Inc. of any civil penalty which may be assessed for the alleged violations;

g. such other matters as you contend the court should consider in assessing a civil penalty against Florida Cities Water Company, Inc; and

h. the identity of each person of whom you are aware with knowledge of facts either supporting or refuting your contentions with respect to a-g above.

4. If your response to any Request for Admission served herewith is anything other than an unqualified admission, summarize in full the facts supporting your contention that the matter is not true as stated, and identify each person of whom you are aware with knowledge of the facts either supporting or refuting your contention.

5. On what date did Florida Cities Water Company, Inc. first begin to discharge effluent from the Barefoot Bay Wastewater Treatment Plant into a drainage canal leading to the Sebastian Creek?

6. Identify fully (see instructions) all persons of whom you are aware with knowledge of the facts alleged in the United States' Revised Amended Complaint, and summarize in full the facts of which each witness is aware.

7. Identify fully (see instructions) all persons whom you intend to call as factual witnesses at any hearing, trial, or other proceeding in this case; state the subject matter on which each witness is expected to testify; state whether each witness has provided statements under oath in any matter; and summarize the facts to which each witness is expected to testify.

8. Identify fully (see instructions) all expert witnesses you intend to call at trial in this case; the subject matter on which, and the substance of the facts and opinions to which, the expert is expected to testify; and provide a summary of the grounds for each opinion.

IN THE UNITED STATES DISTRICT COURT
FOR THE MIDDLE DISTRICT OF FLORIDA
FORT MYERS DIVISION

UNITED STATES OF AMERICA, Plaintiff, v. AVATAR HOLDINGS, INC., and FLORIDA CITIES WATER COMPANY, INC., Defendants.	)	CIVIL ACTION NO. 93-281-CIV-FTM-21

UNITED STATES' FIRST REQUESTS FOR ADMISSION TO DEFENDANT FLORIDA CITIES WATER COMPANY, INC.

Pursuant to Rules 36 and 37(c)(2) of the Federal Rules of Civil Procedure, Defendant Florida Cities Water Company, Inc., is requested to admit the truth of the matters set forth below.

DEFINITIONS

A. "Defendant" shall mean Florida Cities Water Company, [illegible] its parent companies, and the directors, [illegible] divisions, officers, employees, agents, servants, assigns and, unless privileged, the attorneys of Defendant and its parent companies.

B. "EPA" shall mean the United States Environmental Protection Agency.

C. Words used in the plural shall also be taken to mean and include the singular. Words used in the singular shall also be taken to mean and include the plural. "Or" and "and" shall be construed either conjunctively or disjunctively to bring within the scope of these interrogatories any information that might otherwise be construed to be outside their scope. The past tense

includes the present tense where the clear meaning is not distorted by change of tense.

D. All terms not expressly defined herein are used within the meaning of common English and/or the Clean Water Act, 33 U.S.C. §§ 1251 to 1387.

REQUESTS FOR ADMISSIONS

1. Florida Cities Water Company, Inc., is a subsidiary of Avatar Holdings, Inc.

2. Avatar Holdings, Inc. controls the management of Florida Cities Water Company Inc.'s environmental compliance practices.

3. (a) At all times alleged in the First Claim for Relief in the United States' Revised Amended Complaint, Florida Cities Water Company, Inc. owned and operated the Barefoot Bay Wastewater Treatment Plant, located in Barefoot Bay (Brevard County), Florida;

(b) At all times alleged in the Second Claim for Relief in the United States' Revised Amended Complaint, Florida Cities Water Company, Inc. owned and operated the Carrollwood Wastewater Treatment Plant, located in Tampa (Hillsborough County), Florida;

(c) At all times alleged in the Third Claim for Relief in the United States' Revised Amended Complaint, Florida Cities Water Company, Inc. owned and operated the Waterway Estates Wastewater Treatment Plant, located in North Fort Myers (Lee County), Florida.

4. (a) At all times alleged in the First Claim for Relief in the United States' Revised Amended Complaint, Florida Cities Water Company, Inc. collected wastewater from residential and/or commercial sources and treated it at the Barefoot Bay, Wastewater Treatment Plant, located in Barefoot Bay (Brevard County), Florida;

(b) At all times alleged in the Second Claim for Relief in the United States' Revised Amended Complaint, Florida Cities Water Company, Inc. collected wastewater from residential and/or commercial sources and treated it at the Carrollwood Wastewater Treatment Plant, located in Tampa (Hillsborough County), Florida;

(c) At all times alleged in the Third Claim for Relief in the United States' Revised Amended Complaint, Florida Cities Water Company, Inc. collected wastewater from residential and/or commercial sources and treated it at the Waterway Estates Wastewater Treatment Plant, located in North Fort Myers (Lee County), Florida.

5. Florida Cities Water Company, Inc., is a "person" within the meaning of section 502(5) of the Clean Water Act, 33 U.S.C. § 1362(5).

6. (a) At all times alleged in the First Claim for Relief in the United States' Revised Amended Complaint, the treated effluent discharged from the Barefoot Bay Wastewater Treatment Plant contained "pollutants" within the meaning of section 502(6) of the Clean Water Act, 33 U.S.C. § 1362(6).

(b) At all times alleged in the Second Claim for Relief in the United States' Revised Amended Complaint, the treated effluent discharged from the Carrollwood Wastewater Treatment Plant contained "pollutants" within the meaning of section 502(6) of the Clean Water Act, 33 U.S.C. § 1362(6).

(c) At all times alleged in the Third Claim for Relief in the United States' Revised Amended Complaint, the treated effluent discharged from the Waterway Estates Wastewater Treatment Plant contained "pollutants" within the meaning of section 502(6) of the Clean Water Act, 33 U.S.C. § 1362(6).

7. (a) At all times alleged in the First Claim for Relief in the United States' Revised Amended Complaint, Florida Cities Water Company, Inc. caused the "discharge of pollutants" within the meaning of section 502(12) of the Clean Water Act, 33 U.S.C. § 1362(12), from the Barefoot Bay Wastewater Treatment Plant through a "point source" within the meaning of section 502(14) of the Clean Water Act, 33 U.S.C. § 1362(12), into a "navigable water" within the meaning of section 502(7) of the Clean Water Act, 33 U.S.C. § 1362(7).

(b) At all times alleged in the Second Claim for Relief in the United States' Revised Amended Complaint, Florida Cities Water Company, Inc. caused the "discharge of pollutants" within the meaning of section 502(12) of the Clean Water Act, 33 U.S.C. § 1362(12), from the Carrollwood Wastewater Treatment Plant through a "point source" within the meaning of section 502(14) of the Clean Water Act, 33 U.S.C. § 1362(12), into a

"navigable water" within the meaning of section 502(7) of the Clean Water Act, 33 U.S.C. § 1362(7).

(c) At all times alleged in the Third Claim for Relief in the United States' Revised Amended Complaint, Florida Cities Water Company, Inc. caused the "discharge of pollutants" within the meaning of section 502(12) of the Clean Water Act, 33 U.S.C. § 1362(12), from the Waterway Estates Wastewater Treatment Plant through a "point source" within the meaning of section 502(14) of the Clean Water Act, 33 U.S.C. § 1362(12), into a "navigable water" within the meaning of section 502(7) of the Clean Water Act, 33 U.S.C. § 1362(7).

8. Under the Clean Water Act, the violation of a weekly average limitation in an NPDES permit subjects the violator to a maximum penalty for that violation equivalent to seven (7) days of violation.

9. Under the Clean Water Act, the violation of a monthly average limitation in an NPDES permit subjects the violator to a maximum penalty for that violation equivalent to the penalty for a violation on every day in that month.

10. At no time prior to November 1, 1991, did Florida Cities Water Company, Inc. have an NPDES permit to discharge effluent from the Barefoot Bay Wastewater Treatment Plant into the Sebastian River.

11. For approximately a decade prior to October 31, 1991, Florida Cities Water Company, Inc. discharged pollutants from the

Barefoot Bay Wastewater Treatment Plant into the Sebastian River (via a drainage canal) on a daily basis without an NPDES permit.

12. On September 26, 1990, EPA issued Administrative Order No. 90-106 to Florida Cities Water Company, Inc. finding it in violation of the Clean Water Act for discharging pollutants from its Barefoot Bay Wastewater Treatment Plant into waters of the United States, a drainage canal leading to the Sebastian Creek, without a valid NPDES permit, and prescribing interim effluent limitations and monitoring requirements.

13. On the number of separate occasions indicated in parentheses in each subparagraph below, Florida Cities Water Company, Inc. discharged effluent from the Barefoot Bay Wastewater Treatment Plant which exceeded a limitation (or failed to meet a requirement) contained in EPA Administrative Order No. 90-106, as specified below:

(a) Total Suspended Solids daily maximum limitation (22);

(b) Fecal Coliform daily maximum limitation (3);

(c) Dissolved Oxygen (DO) daily minimum requirement (1);

(d) Biological Oxygen Demand (BOD) daily maximum limitation (1);

(e) Biological Oxygen Demand (BOD) monthly average maximum limitation (1);

(f) pH daily maximum limitation (1).

14. On and after November 1, 1991, NPDES Permit No. FL0042293 was the applicable NPDES permit relating to the Barefoot Bay Wastewater Treatment Plant.

15. In at least seven (7) months (in or about September 1992, October 1992, November 1992, December 1992, January 1993, February 1993, and March 1993) Florida Cities Water Company, Inc. discharged pollutants from the Barefoot Bay Wastewater Treatment Plant in excess of the Total Residual Chlorine daily maximum limitation in NPDES Permit No. FL0042293.

16. On three (3) occasions (during the periods in or about September-October 1992, May 1993, and February 1994), the effluent from the Barefoot Bay Wastewater Treatment Plant failed the test for chronic whole effluent toxicity in NPDES Permit No. FL0042293.

17. On a weekly basis during the period on or about November 1991 and continuing through June 1993, and on two occasions in November 1993, Florida Cities Water Company, Inc. failed to monitor biological oxygen demand (BOD) at the Barefoot Bay Wastewater Treatment Plant as required by NPDES Permit No. FL0042293.

18. On a daily basis during the period on or about November 1, 1991 and continuing through at least June 28, 1993 (i.e., on at least 514 days), Florida Cities Water Company, Inc. failed to test for total residual chlorine (TRC) at the Barefoot Bay Wastewater Treatment Plant using the method specified by Part I, Section A-2 of NPDES Permit No. FL0042293.

19. There are the equivalent of 1,416 days of violations at the Barefoot Bay Wastewater Treatment Plant.

20. On September 21, 1979, Florida Cities Water Company was notified by the Florida Department of Environmental Regulation that it had determined that the Carrollwood plant should no longer be allowed to discharge into Sweetwater Creek because of a "zero wasteload allocation" for the creek.

21. On October 1, 1984, Florida Cities Water Company, Inc. received notification from EPA of the denial of the NPDES permit renewal application for the Carrollwood Wastewater Treatment Plant.

22. Florida Cities Water Company, Inc. did not challenge the denial of the NPDES permit renewal application for the Carrollwood Wastewater Treatment Plant by submitting a timely request for hearing to the Regional Administrator pursuant to either 40 C.F.R. § 124.74 or 40 C.F.R. § 124.114.

23. During the period November 1, 1984 to June 30, 1991, Florida Cities Water Company, Inc. did not have an NPDES permit to discharge from the Carrollwood Wastewater Treatment Plant into the Sweetwater Creek.

24. During the period November 1, 1984 to June 30, 1991, Florida Cities Water Company, Inc. discharged pollutants from the Carrollwood Wastewater Treatment Plant into the Sweetwater Creek on a daily basis without an NPDES permit.

25. From July 1, 1991 until deactivated, NPDES Permit No. FL0029319 was the applicable NPDES permit relating to the Carrollwood Wastewater Treatment Plant.

26. On the number of separate occasions indicated in parentheses in each subparagraph below, Florida Cities Water Company, Inc. discharged effluent from the Carrollwood Wastewater Treatment Plant which exceeded a limitation (or failed to meet a requirement) contained in NPDES Permit No. FL0029319, as specified below:

(a) Total Suspended Solids monthly average limitation (3);

(b) Total Suspended Solids daily maximum limitation (3);

(c) Total Phosphorus monthly average limitation (5);

(d) Total Phosphorus daily maximum limitation (5);

(e) Fecal Coliform daily maximum limitation (5);

(f) Total Nitrogen monthly average limitation (5);

(g) Total Nitrogen daily maximum limitation (6);

(h) Carbonaceous Biochemical Oxygen Demand monthly average limitation (1);

(i) Carbonaceous Biochemical Oxygen Demand daily maximum limitation (3); and

(j) Total Residual Chlorine daily maximum limitation (184).

27. There are the equivalent of 1,044 days of violation at Carrollwood Wastewater Treatment Plant.

28. On December 10, 1986, Florida Cities Water Company, Inc. received notification from EPA of the denial of the NPDES permit renewal application for the Waterway Estates Wastewater Treatment Plant.

29. Florida Cities Water Company, Inc. did not challenge the denial of the NPDES permit renewal application for the Waterway Estates Wastewater Treatment Plant by submitting a timely request for hearing to the Regional Administrator pursuant to either 40 C.F.R. § 124.74 or 40 C.F.R. § 124.114.

30. During the period January 9, 1987 to October 31, 1989, Florida Cities Water Company, Inc. did not have an NPDES permit to discharge from the Waterway Estates Wastewater Treatment Plant into the Caloosahatchee River.

31. From January 9, 1987 to October 31, 1989, Florida Cities Water Company, Inc. discharged pollutants from the Waterway Estates plant (via a tributary canal) into the Caloosahatchee River without an NPDES Permit.

32. On and after November 1, 1989, NPDES Permit No. FL0030325 was the applicable NPDES permit relating to the Waterway Estates plant.

33. Beginning on November 1, 1989, NPDES Permit No. FL0030325 authorized the discharge of pollutants from the Waterway Estates plant through "outfall 001" which refers to a point at the six (6) foot contour line in the Caloosahatchee River.

34. On each day during the period on or about November 1, 1989 to July 14, 1991, Defendants discharged pollutants from the Waterway Estates Treatment Plant indirectly into the Caloosahatchee River via a tributary canal which was not a permitted discharge location during the referenced period.

35. In at least nine months (each month during the period in or about July 1991 to March 1992), Defendants discharged pollutants from the Waterway Estates Treatment Plant in excess of the Total Nitrogen concentration limitation in Permit Number FL0030325.

36. In at least nine months (each month during the period in or about July 1991 to March 1992), Defendants discharged pollutants from the Waterway Estates Treatment Plant in excess of the Total Nitrogen loading limitation in Permit Number FL0030325.

37. On at least three occasions (in or about February 1992, April 1992, and June 1992), the effluent from the Waterway Estates Treatment Plant failed the test for chronic whole effluent toxicity in Permit Number FL0030325.

38. There are the equivalent of 1,713 days of violation at the Waterway Estates Wastewater Treatment Plant.

39. The Summary of NPDES Permit and Administrative Order Effluent Violations, Barefoot Bay, attached hereto as Government Exhibit A, accurately summarizes, inter alia, NPDES permit and Administrative Order exceedances at the Barefoot Bay Wastewater Treatment Plant, and accurately reflects information in Discharge Monitoring Reports submitted by Florida Cities Water Company, Inc. to EPA.

40. The Summary of NPDES Permit and Administrative Order Effluent Violations, Carrollwood, attached hereto as Government Exhibit B, accurately summarizes, inter alia, NPDES permit exceedances at the Carrollwood Wastewater Treatment Plant, and accurately reflects information in Discharge Monitoring Reports submitted by Florida Cities Water Company, Inc. to EPA.

41. The Summary of NPDES Permit and Administrative Order Effluent Violations, Waterway Estates, attached hereto as Government Exhibit C, accurately summarizes, inter alia, NPDES permit exceedances at the Waterway Estates Wastewater Treatment Plant, and accurately reflects information in Discharge Monitoring Reports submitted by Florida Cities Water Company, Inc. to EPA.

MEMORANDUM

TO: Gary Baise and Don Scroggin

FROM: Liz Poliner

DATE: May 10, 1995

RE: Florida Cities: Invoking the 5th Amendment in a Civil Suit

Because of the possibility that under Weitzenhoff Florida Cities' employees could become subject to criminal liability, you have asked me to research the standard for establishing the Fifth Amendment privilege against self-incrimination in Florida Cities' current civil law suit. You would also like to know how to properly establish the privilege and what inferences can be drawn from invoking it. Finally, you would like to know if invocation of the privilege is any different for current employees than for former employees.

In addition to this memorandum, which provides the most recent case law on this subject and is tailored to Eleventh Circuit decisions as much as possible, I am attaching two law review articles that offer good practical advice regarding invocation of the self-incrimination privilege in civil suits.

Standard for Establishing the Privilege Against Self-Incrimination

The Fifth Amendment privilege against self-incrimination can be asserted "in any proceeding, civil or criminal, administrative

or judicial, investigatory or adjudicatory; and it protects against any disclosures that the witness reasonably believes could be used in a criminal prosecution or could lead to other evidence that might be so used." Kastigar v. U.S., 406 U.S. 441, 444 (1972). See also U.S. v. Argomaniz, 925 F.2d 1349, 1353 (11th Cir. 1991) (citing Kastigar).

As this rule implies, the appropriateness of raising the privilege in the civil context hinges on the nexus between the information to be disclosed and the possibility of its use in a criminal prosecution against the person being asked to disclose it. In fleshing out this nexus, the Eleventh Circuit has stated that "the central standard [for invoking the self-incrimination privilege] . . . [is] whether the claimant is confronted by substantial and 'real', and not merely trifling or imaginary, hazards of incrimination." U.S. v. Argomaniz, 925 F.2d at 1353 (quoting Marchetti v. U.S., 390 U.S. 39, 53 (1968)). The court has further stated that "the privilege applies in 'instances where the witness has reasonable cause to apprehend danger' of criminal liability." Argomaniz, 925 F.2d at 1353 (quoting Hoffman v. U.S., 341 U.S. 479, 486 (1951)).

In Argomaniz, the court held that a taxpayer could have a legitimate fear of possible tax-related prosecution, and therefore could invoke the privilege, even though the invocation occurred during the IRS's investigation in a civil proceeding. Id. at 1354 ("production of [the requested tax returns] would establish two of the essential elements of the crime [of failing

to file returns] . . . Under these circumstances, this civil tax investigation has become an inquiry with dominant criminal overtones . . . [such that Argomaniz was] entitled to raise his fifth amendment objections"). Applying the standard articulated in Argomaniz to the present situation, it would appear likely, given Weitzenhoff, that the Florida court would find the appropriate nexus between disclosure and potential criminal liability.

The standard for invoking the self-incrimination privilege--establishing a nexus between disclosure and potential criminal implication--would not vary for a current employee or a past employee except to the degree that the work status affects the individual's exposure to criminal liability. That is to say, the privilege is personal, rather than corporate. See e.g., U.S. v. Dean, 989 F.2d 1205, 1207 (D.C. Cir. 1993) ("the fifth amendment privilege is a purely personal one that protects only the natural individual from compulsory incrimination").

With regard to Florida Cities, for example, if a past employee could no longer be exposed to criminal liability under the Clean Water Act, that person would be unlikely to meet the standard for invoking the privilege. However, that does not appear to be the case. Neither the Clean Water Act Section 1362(5), defining "person," nor Section 1319(C)(2)(a), defining a "knowing violation," distinguishes between past and current employees. Under Weitzenhoff, therefore, it appears that any employee could be subject to criminal liability for a knowing

violation in the event that the person knowingly engaged in action that led to a permit violation.

Properly Establishing the Privilege

As Kastigar implies, the privilege against self-incrimination is available during all phases of pretrial discovery. 406 U.S. 441 at 444. See also North River Insurance Company, Inc. v. Stefanou, 831 F.2d 484, 486 (4th Cir. 1987), cert. denied, 486 U.S. 1007 (1988) ("The [fifth amendment] privilege applies not only at trial but also at the pleading stage").

The privilege must be affirmatively invoked. See U.S. v. White, 846 F.2d 678, 690 (11th Cir.), cert. denied, 488 U.S. 984 (1988) ("the settled principle . . . requires a witness to assert his Fifth Amendment rights"). See also Davis v. Fendler, 650 F.2d 1154, 1160 (9th Cir. 1981) ("Clearly, the Fifth Amendment is not a self-executing mechanism. It can be affirmatively waived or lost by not asserting it in a timely fashion" (citing Maness v. Meyers, 419 U.S. 449, 466 (1975)).

No special combination of words are required to invoke the privilege. Quinn v. U.S., 349 U.S. 155, 162 (1955). Still, it is necessary to communicate with clarity that the privilege is indeed being invoked. See Davis, 650 F.2d at 1160 ("[an invocation of the privilege] should be plain enough and specific enough so that the court can understand in what way the [questions] are alleged to be objectionable").

Generally, a witness must personally invoke the privilege, i.e., he cannot rely on his counsel to invoke it for him, but exceptions have been made where good reason exists as to why a privilege was not personally invoked. See e.g., Bigby v. U.S. I.N.S., 21 F.3rd 1059, 1061 (11th Cir. 1994) (holding that a non-English speaking alien could rely on counsel to invoke the Fifth Amendment privilege in a deportation action), and Florida v. Southland Corporation, 684 F. Supp. 292, 294 (S.D. Fla. 1988) (holding that absent compelling circumstances, a witness must personally invoke the privilege against self-incrimination).

Courts generally agree that a blanket refusal to answer questions does not effectively raise the privilege; rather, it must be raised with reference to particular questions and requests for information. Argomaniz, 925 F.2d at 1355; U.S. v. Stoecklin, 848 F. Supp. 1521, 1527 (M.D. Fla. 1994) ("respondent must . . . assert the Fifth Amendment to each question and document to which he believes it applies; he may not assert a blanket privilege"). The rationale for this rule lies in the fact that if the invocation is challenged, a court would be required to decide on its propriety, and a blanket refusal forces a court to speculate as to which questions would tend to incriminate. Anglada v. Sraque, 822 F.2d 1035, 1037 (11th Cir. 1987).

In Argomaniz, the Eleventh Circuit ruled that the following set of circumstances did not constitute a blanket refusal to answer questions. At a civil investigatory hearing, a tax-payer

answered non-incriminating questions and refused to answer questions that would incriminate by citing his privilege against self-incrimination. When the IRS officer realized that the tax-payer would raise the privilege in response to each of her document requests and to each of her questions concerning the tax-payer's tax liability for the years in question, the IRS officer terminated the interview. The court held that this behavior did not constitute a blanket invocation of the privilege, but, rather, that it was proper use of the privilege. The court found that the tax-payer responded to each question raised, and, following the IRS officer's termination of the interview, "could not respond to questions he was not asked." Argomaniz, 925 F.2d at 1356.

With regard to the present situation, a review of several recent depositions (James Elder and Gerald Allen) reveal that when the privilege has been invoked it has been in response to individual questions rather than in a blanket manner. Like Argomaniz, Florida Cities' depositions have been cut short by the government's attorney upon his realizing the privilege will be invoked routinely. This should not pose a problem for Florida Cities. Its main concern is to ensure that deponents discriminate carefully between incriminating and non-incriminating questions, answers those questions that can be answered, and raise the Fifth each time an incriminating question is asked.

Possible Adverse Inferences

It is permissible, though not required, that in a civil suit an adverse inference be drawn against those who invoke the self-incrimination privilege. As the Supreme Court has ruled: "the Fifth Amendment does not forbid adverse inferences against parties to civil actions when they refuse to testify in response to probative evidence offered against them: the Amendment does not preclude the inference where the privilege is claimed by a party to a civil cause." Baxter v. Palmigiano, 425 U.S. 308, 318 (1976). See also Daniels v. Pipefitters' Assoc. Local Union No. 597, 983 F.2d 800, 802 (7th Cir. 1993) (citing Baxter for the proposition that adverse inferences against a witness invoking the Fifth Amendment are permissive but not required).

As to how to consider an adverse inference, Baxter has made clear that the invocation of the privilege be given "no more evidentiary value than [is] warranted by the surrounding facts of [a] case." Baxter, 425 U.S. at 318. In other words, a given silence becomes a fact to be considered, along with other facts of a case. The silence cannot become a sole basis for a judgment against the invoker.

Courts have followed Baxter closely. See e.g., Koester v. American Republic Investments, 11 F.3d 818, 824 (8th Cir. 1993) ("Although an adverse inference may be drawn against a party who invokes the Fifth Amendment privilege and refuses to testify in a civil proceeding, that silence alone is insufficient to support an adverse decision . . . The government may not punish assertion

of the constitutional privilege against self-incrimination"); U.S. v. One Parcel of Property, 897 F.2d 97, 103 (2nd Cir. 1990) ("an adverse inference is permitted against the invoker of the privilege where his silence 'was only one of a number of factors to be considered by the finder of fact'"); First Interregional Equity Corp. v. Haughton, 1993 U.S. Dist. LEXIS 12813 at *7 (S.D.N.Y. Sept. 14, 1993) ("There is no doubt that the privilege against compelled self-incrimination may be invoked in a pretrial proceeding such as a deposition . . . It is equally clear, however, that a refusal to answer questions upon assertion of the privilege is relevant evidence from which the trier of fact in a civil action may draw whatever inference is reasonable in the circumstances . . . Permitting an adverse inference to be drawn against a party who invokes the Fifth Amendment privilege during discovery prevents use of the privilege as a weapon in civil litigation").

With regard to the present case, current and former employees who invoke the Fifth Amendment during depositions and other stages of the trial can reasonably expect that the invocation becomes a fact, along with others, that the court considers when determining Florida Cities' civil liability. A question to consider, therefore, is whether the silence can prove or help prove any adverse facts in the civil case.

Generally, "a party's failure to produce evidence which, if favorable, would naturally have been produced, is open to the inference that the facts were unfavorable to his cause." 8

Wigmore on Evidence, Section 2273 (1961). Most obviously, silence raises the adverse inference that a party believed that his response to a particular question might incriminate him. See Robert Heidt, The Conjurer's Circle--The Fifth Amendment Privilege in Civil Cases, 91 Yale L. J. 1062, 1117 (attached). That fact, in turn, might create an inference about the subject matter of the question and in this way help prove an adverse fact. However, in the present case, the court would have to bear in mind that the privilege has been invoked specifically in reference to the extraordinarily broad extension of potential criminal liability implied by Weitzenhoff. That fact could very well mitigate the seriousness of any adverse inference in our case.

Though determining exactly how the government might use silence as adverse evidence involves speculation, it is necessary to consider the possibility that the invocation could be used as a party statement. (This possibility is fleshed out in the Heidt article at 1116-1122.) In this regard we should consider the degree to which a silence, adversely inferring potential incrimination or unfavorable facts, contradicts any prior statements, and how this could harm our case.

With regard to a corporate employee, Heidt recommends that plaintiffs' attorneys consider arguing that any adverse inference be a party statement of the corporate employer:

> An invoking by an employee during a deposition should be treated as a vicarious statement of the defendant corporate employer if the invoker was still working for the defendant corporation at the time of the invoking

> and if the question that triggered the invoking related to the employee's work.

Id. at 1119. With regard to former employees, Heidt's analysis changes slightly.

> That the invoker is no longer the defendant's employee at the time of his invoking need not necessarily bar admitting the invoking as a vicarious admission. The fact of present employment serves primarily to reduce the chance that the employee will falsely claim to have engaged in criminal conduct for which the defendant employer is liable. Any factors suggesting that a former employee retains some loyalty to his former employer--such as the fact that the employer is paying for his attorney--would serve the same purpose.

Id. at 1119-1120, n. 214.

Applying this analysis to the present case, it would appear possible that any negative implication of the invocation by both current and past employees be viewed as vicarious statements of Florida Cities proper. To the degree such statements contradict prior statements, or suggest proof of facts harmful to Florida Cities, the risk of invoking the privilege would have to be balanced against the risk of self-incrimination.

Summary of Facts to Consider

Michael E. Wolfson, in his article Civil Discovery and the Privilege Against Self-Incrimination, 15 Pacific L. J. 785, 796 (1984) (attached), has proposed the following outline of factors to consider regarding invocation of the self-incrimination privilege in civil discovery.

> a. Is the discovery that is being sought relevant to the subject matter of the action?

b. Assuming the allegations contained in the complaint and subsequent pleading are true, do they constitute in whole or in part the basis for a possible criminal prosecution? Has the statute of limitations run on the potential criminal charges?

c. What "juristic consequences" [adverse inferences] may be imposed by the court if the party asserts the privilege as to the discovery requested.

d. When must the party either answer or object to the requested discovery based upon the applicable procedural rule?

e. What information being sought by the opposing party clearly falls within the scope of the privilege?

f. What type of particularized showing can be made so that the validity of the privilege is clear to the court, yet the information sought to be protected remains undisclosed?

MEMORANDUM

TO: Florida Cities Legal Team

FROM: Liz Poliner

DATE: June 28, 1995

RE: Inferences from 5th Amendment Privilege--Follow-up

This memorandum is a follow-up to the May 10, 1995 memorandum, "Invoking the 5th Amendment in a Civil Suit." Specifically, it addresses the government's claim, on page 14 of its Motion for Partial Summary Judgment, that "the inference that may be drawn from these individuals' [i.e., Florida Cities' employees] assertions of the Fifth Amendment is that the violations were committed as alleged."

The cases that the government cites to support this claim state the general rule that in a civil proceeding an adverse inference may be made against a witness or party who invokes the 5th Amendment privilege against self-incrimination. See e.g., Baxter v. Palmigiano, 425 U.S. 308, 318 (1976). Though the adverse inference is permissible, Baxter makes clear that ~~its~~ the evidentiary value of the inference is limited to whatever "is warranted by the surrounding facts of a case." Id. The silence cannot be the sole basis for an adverse decision, but it can become a fact to be considered, along with other facts, when liability is being determined.

The government's claim that the proper inference to make is that "the violations occurred as alleged" appears to be directly

opposed to this rule. At best, a given silence is but one fact, albeit an adverse one, that can be used as evidence against Florida Cities. Moreover, a given silence speaks only to the particular question asked. See U.S. v. Argomaniz, 925 F.2d 1349, 1355 (11th Cir. 1991) (holding that the fifth amendment privilege can be invoked only in response to particular questions and requests for information). Unless the government asked each deponent "Did the violations occur as alleged?" the government cannot infer that a given silence ~~infers~~ this broad--this convenient--a ~~conclusion~~.

Most obviously, what the silence infers is that the questions could be incriminating, or could lead to incriminating evidence, under the broad sweep of Weitzenhoff. Under Weitzenhoff, a person who knowingly engages in conduct that results in a CWA permit violation, regardless of the person's knowledge of the violation or even of the permit, could lead to criminal liability. Perhaps this holding is the basis for the government's conclusion that the permissible inference in ~~the present~~ case is that the alleged violations ~~did~~ occur ~~is that a minimum condition under~~ Weitzenhoff is that there were ~~in fact violations~~. In other words, there would be nothing ~~to worry~~ about ~~under~~ Weitzenhoff without actual permit violations. [does this contradict what I've just said???]

RE: FCWC: Comparability of Florida Enforcement Provisions

You have asked me to research whether Florida's environmental enforcement laws for water are comparable to the enforcement provisions of the federal Clean Water Act (CWA). Under CWA Section 309(g)(6)(A)(iii), EPA cannot pursue a civil penalty action in court when "the State has issued a final order not subject to further judicial review and the violator has paid a penalty assessed under this subsection, or such comparable state law."

To the degree that Florida Cities can argue that Florida state law is comparable to the federal law, it can subsequently argue that under CWA Section 309(g)(6)(A)(iii) its July 15, 1988 Consent Order with the Florida Department of Environmental Protection (DEP)--which by its own terms waived further judicial and administrative review, and under which Florida Cities was assessed and paid[1] a $20,180.00 penalty for violations at the Waterways Estates site--precludes EPA from pursuing additional civil penalties for the same violations.

Florida's Enforcement Provisions

Under Florida law it is a violation to (among other things)

[1] To the best of my knowledge, Florida Cities paid this fine.

cause pollution, fail to obtain a permit, or violate a permit. Fla. Stat. Section 403.161(1). These violations, in turn, are subject to civil judicial penalties of up to $10,000 per offense and criminal penalties of up to $50,000 per offense. Fla. Stat. Sections 403.161(2) and (3); 403.141(1). Each day of an offense counts as a separate violation. Fla. Stat. 403.141(1). In assessing this penalty a court may receive evidence of mitigation. Id.

Florida's DEP can bring different kinds of enforcement actions against a person who violates Section 403.161(1). Under Fla. Stat. Section 403.121, which sets forth enforcement procedures, the DEP can seek civil judicial penalties of not more than $10,000 per day per offense. Fla. Stat. Section 403.121(1)(b). In the alternative, DEP can bring an administrative enforcement action. Fla. Stat. Section 403.121(2). DEP also has the authority to seek injunctive relief and cumulative remedies. Fla. Stat. Section 403.131.

In an administrative action DEP is authorized to order that a violator pay a "specified sum as damages to the state," although the provision does not state a specific amount to be assessed, nor does it refer to "administrative penalties" per se. Fla. Stat. Section 403.121(2)(a). Before any amount of damages is assessed, DEP must provide written notice to the alleged violator, who has twenty days to request a hearing. Fla. Stat. 403.121(2)(c).

In discussing DEP's enforcement procedures with Jerry

Phillips, DEP General Counsel, I was told that under the powers granted in this provision and others DEP often enters into consent decrees with parties. Typically DEP will begin an enforcement action by issuing a warning letter. If compliance is not achieved, it will then attempt to negotiate a consent decree whereby remedial action is specified and a penalty assessed. If compliance is still not achieved, or if a consent decree is violated, DEP then resorts to judicial enforcement.

In addition to judicial and administrative remedies, DEP can also assess a "noncompliance fee" against domestic wastewater treatment facilities for the failure to comply with a permit condition that requires the submittal of monthly operating reports or the reporting of characteristics of the waste stream. Fla. Stat. Section 403.121(3). In assessing this fee, which cannot exceed $250.00 per reported violation or a total of $1,000.00 for all reported violations in a given month, DEP must consider the following factors: the type of violation, the degree of noncompliance, the potential for harm, the good faith of the owner/operator, the efforts to comply, the lack of willfulness or negligence, the economic benefits associated with the failure to comply, the history of violations, and the ability to pay. Id. Noncompliance fees require written notice to the alleged violator and the right to request a hearing. Id.

A party adversely affected by a final agency action may seek judicial review of the action. Fla. Stat. Section 120.68. An administrative consent order is a final agency order. Fla.

Admin. Code Rule 62-103.110.

Florida's public participation provisions include a citizen suit provision, Fla. Stat. Section 120.69, and liberal intervention of citizens in environmental enforcement actions. Fla. Civ. Pro. Rule 1.230 (allowing intervention in any pending litigation by "anyone claiming an interest"), Fla. Stat. 403.412(5) (allowing a Florida citizen to have standing to intervene in environmental actions), and Fla. Stat 120.57 (setting forth procedures for administrative hearings).

Attachment A consists of these various Florida laws. Attachment B is a description of Florida's enforcement provisions regarding water actions. This description was part of Florida's "Program Submission for Authorization to Administer the NPDES Program." As this description indicates, these provisions meet the federal requirements for implementation of the NPDES program. The description further indicates that to get the authorization to administer the NPDES program, Florida did not change its already existing enforcement provisions. I have spoken to a number of officials at EPA Region 4 and the Florida DEP who have confirmed this. Specifically, Kevin Smith, OGC EPA Region 4, explained to me that even though the Florida regulations have not codified CWA Section 309's statutory penalty provisions for administrative penalties, this gap between state and federal law was not substantial enough to hold back the state delegation. However, as discussed below, the state delegation is not the same thing as saying that Florida's laws are "comparable" as that term

is used in CWA Section 309(g)(6).

Legal Standard for Determining Comparability

1. Looking to Scheme As a Whole

To determine whether state law is "comparable" within the meaning of CWA Section 309(g), courts compare CWA Section 309(g)'s administrative enforcement procedures with state water pollution enforcement provisions. See e.g., Orange Environment, Inc. v. County of Orange, 860 F. Supp. 1003, 1014 (S.D. N.Y. 1994)(comparing Section 309(g) with "New York's Water Pollution Control law, Article 17 of the E.C.L. and the penalty provision contained at Title 19 of Article 71").[2]

In general, the factors that courts look at when determining comparability include the state's enforcement goals, the state's ability to assess penalties, the opportunity for citizen participation in enforcement actions, and an alleged violator's right to a hearing and judicial review. See generally, Arkansas Wildlife Federation v. ICI Americas, Inc., 29 F.3d 376, 381 (8th Cir. 1994). On occasion a court can get more particular in its scrutiny such as in Citizens for a Better Environment-Ca. v. Union Oil Co., 861 F. Supp. 889, 908 (N.D. Cal. 1994), where, in addition to the above-mentioned factors, the court examined the state's penalty collection authority and collection procedures.

When determining whether state law is comparable to CWA

---

[2] The word "comparable" appears in both CWA Sections 309(g)(6)(A)(ii) and (iii). Though many of the cases discussed below analyze the term as used in section (A)(ii), the same analysis applies to section (A)(iii). Natural Resources Defense Council v. Vygon, 803 F. Supp. 97, 102 (N.D. Oh. 1992).

Section 309(g), courts generally do not require a comparison between any one specific state enforcement provision and CWA Section 309(g). Instead, state enforcement schemes as a whole are compared. See, e.g., Arkansas Wildlife, 29 F.3d at 381; North & South Rivers Watershed Assoc. v. Town of Scituate, 949 F.2d 552, 556 (1st Cir. 1991). But see Citizens for a Better Environment-Ca. v. Union Oil Co., 861 F. Supp. at 889 (requiring comparison of CWA Section 309 with "the specific state enforcement provision actually used" in the enforcement proceeding at issue).

Within these statutory schemes, more often than not courts do not require that state provisions duplicate the federal law such that the two are identical. They need only be "sufficiently similar." See, e.g., Arkansas Wildlife, 29 F.3d at 381; Sierra Club v. Colorado Refining Co., 838 F. Supp. 1428, 1435 (D. Co. 1993). The case that established this principle, North and South Rivers Watershed Assoc., Inc. v. Town of Scituate, 949 F.2d at 556, held that even though Massachusetts law did not duplicate CWA Section 309(g), it is "enough that the Massachusetts statutory scheme, under which the State is diligently proceeding, contains penalty assessment provisions comparable to the Federal Act, that the state is authorized to assess those penalties, and that the overall scheme of the two acts is aimed at correcting the same violations, thereby achieving the same goals."

Not all courts follow Scituate's "sufficiently similar" test. Some have required a closer identity between state and

federal schemes. See Citizens for a Better Environment, 861 F. Supp. at 908 (requiring a state law provision that is virtually identical to CWA Section 309(g)).

Florida has not yet litigated the issue of comparability under CWA Section 309. However, applying this case law to the present situation, it would be at least possible, and perhaps more likely than not, that a Florida court would adopt the majority rule such that even though no one Florida provision mirrors CWA Section 309(g), the statutory scheme as a whole could be looked at to make the comparability determination, and the standard for review would be the "sufficiently similar" test.

The following sections will look at the two weak links in Florida Cities' comparability argument: public participation and administrative penalty assessments.

2. Public Participation

Comparability of state and federal public participation provisions is one of the elements of comparability that has been litigated more than others. This is because many states, like Florida, do not require that prior to the initiation of a penalty action the public receive notice and opportunity to comment as CWA Section 309(g)(4) mandates.[3]

Several jurisdictions have ruled that a state's failure to have the exact notice and comment provisions of CWA Section

[3] CWA Section 309(g)(4)(A) states: "Before issuing an order assessing a civil penalty under this subsection the Administrator or Secretary, as the case may be, shall provide public notice of and reasonable opportunity to comment on the proposed issuance of such order.

309(g)(4) does not defeat a finding of comparability, so long as the state grants citizens a meaningful opportunity to participate in the decision-making process of a penalty enforcement action.

For example, in Arkansas Wildlife, 29 F.3d at 381, the court ruled that comparability between state and federal enforcement provisions existed even though the state provisions at issue provided only an ex post facto citizen's right to intervene in an enforcement action, with no public notice or comment at any time. Similarly, in Saboe v. Oregon, 819 F. Supp. 914, 918 (D. Or. 1993), the court ruled that despite Oregon's lack of mandatory public notice and participation rights, Oregon's procedures adequately protect the substantive public interest of citizens in enforcement actions and are thus comparable to the CWA. See also, Scituate, 949 F.2d at 556, n.7, (holding that Massachusetts state law is comparable to CWA Section 309(g) despite its lack of mandatory public notice and comment where the state's administrative orders are public documents, where individuals have a right to intervene in enforcement actions, and where interested parties can request a public hearing); Sierra Club v. Colorado Refining Co., 838 F. Supp. at 1435 (holding that "although the Colorado regulatory scheme does not mandate prior public notice of enforcement proceedings, overall, the scheme adequately protects the public interest"); and Connecticut Coastal Fisherman's Assoc. v. Remington Arms Co. Inc., 777 F. Supp. 173, 182-83 (D. Conn. 1991) (holding that where Connecticut law did not require mandatory public notice and comment, an

element of Connecticut's comparability with CWA Section 309 involves its liberal intervention in enforcement proceedings).

Were the Florida court to follow this line of analysis, in all probability Florida's public participation requirements would not defeat a finding of comparability. That is to say, like the jurisdictions above, Florida law does not mandate public notice and comment prior to the initiation of an enforcement action. Yet it does provide for public intervention in such actions, a level of participation that other courts have found to be meaningful enough to meet the comparability standard.[4]

However, Florida Cities cannot be certain of winning this argument. The Florida court could follow a divergent line of cases whereby under a more strict interpretation of comparability Florida's failure to require public notice and comment could be fatal. See Public Interest Research Group of N.J., Inc. v. New Jersey Expressway Authority, 822 F. Supp. 174, 184 (D.N.J. 1992) (holding that state law enforcement procedures that did not require public notice and comment were not comparable to federal procedures); Natural Resources Defense Council, Inc. v. Vygen, 803 F. Supp. 97, 101 (N.D. Oh. 1992) (holding that because Ohio law failed to provide mandatory public notice and comment, administrative orders issued under state law were not issued under law comparable to CWA Section 309(g)): Atlantic States

---

[4] The July 15, 1988 Consent Order includes the following public participation provision: "Persons not subject to this Consent Order have a right, pursuant to Section 120.57, F.S., to petition for an administrative determination (hearing) on it." (Paragraph 16).

Legal Foundation, Inc. v. Universal Tool & Stamping Co. Inc., 735 F. Supp. 1404, 1416 (N.D. Ind. 1990) (Indiana law held not comparable to CWA Section 309(g) in part because of a lack of mandatory public notice and comment period).

3. Administrative Penalty Assessments and Penalty Assessment Factors

In addition to Florida's lack of public notice and comment procedures, the other, more serious, weakness in its comparability argument lies in the fact that Florida law does not provide for the assessment of administrative penalties. Similarly, except with regard to waste water treatment "non compliance fees" Florida law does not provide for administrative penalty assessment factors such as those in CWA Section 309(g)(3).[5]

Under a strict interpretation of the term "comparable," a court could find that without the authority to assess administrative penalties in the amounts specified in CWA Section 309(g), and without the aid of the assessment factors specified in the federal statute, a state law is not comparable. For example, in Atlantic States Legal Foundation, 735 F. Supp. at 1416, the court found that Indiana law was not comparable to CWA Section 309(g) because, in addition to a lack of notice and

[5] CWA Section 309(g)(3) requires that "[i]n determining the amount of any penalty assessed under this subsection the Administrator . . . shall take into account the nature, circumstances, extent and gravity of the violation, or violations, and with respect to the violator, ability to pay, any prior history of such violations, the degree of culpability, economic benefit or savings (if any) resulting from the violation, and such other matters as justice may require."

comment, the state law did not contain a provision that specified penalty assessment factors. See also Citizens for a Better Environment, 861 F. Supp. at 908 (holding that where California law does not authorize the imposition of civil penalties it is not comparable to the CWA Section 309(g)).

Fortunately, not all courts have been this strict. For example, in Orange Environment, Inc. v. County of Orange, 860 F. Supp. 1003, 1015 (S.D.N.Y. 1994), the court rejected the argument that because New York's civil penalty provision did not provide for administrative penalties, but instead provided for civil judicial penalties, it was not comparable. The court stated that even though New York's civil penalties are technically recoverable in a judicial action, penalties could nevertheless be assessed in the first instance by the state environmental agency. Under this scheme, the state law was held to be "essentially similar" to the federal law such that the CWA 309(g)(6) bar was applicable. Id.

Applying this analysis, Florida Cities could argue that under Florida law civil judicial penalties are authorized in amounts comparable to the maximum amounts recoverable under CWA Section 309(g). Though technically the statute authorizes $10,000 maximum daily civil judicial penalties, the combination of this authority with DEP's authority to assess penalties in the context of consent decrees, renders the statute, for all practical purposes, "essentially similar" to the federal scheme. Moreover, Citizens for a Better Environment could be

distinguished on the ground that in that case the California court found no authorization for civil penalties at all, whereby in our case there is authority to assess penalties, though this authority differs technically from the federal scheme.

Florida Cities could bolster this argument by pointing out the overall tendency for courts to apply a more practical, less technical, approach to the comparability test. For example, the Scituate decision established the principle that in determining comparability for purposes of CWA Section 309(g), a state need not actually have assessed penalties against an alleged violator; it is enough that the state could assess penalties under a scheme comparable to the CWA. In Scituate, because the state scheme "closely paralleled" the federal scheme, i.e., the Massachusetts DEP could assess civil penalties of up to $25,000 per day per violation, the court held that the law was comparable even though the state had declined to actually assess any penalty at all. Id. at 556. Florida Cities might argue that if comparability can be found in instances where no penalty has been assessed, then surely it can be found in instances where a penalty was indeed assessed, though under provisions that do not mirror CWA Section 309(g) word for word.

Florida's absence of penalty assessment factors is another weakness in the comparability argument. However, the statute does provide for hearing evidence on the mitigation of any assessed penalties, and, like the argument above, Florida Cities could maintain that this provision works to produce the same

result as the federal scheme. Moreover, I have been told that whenever the DEP assesses penalties in the context of a consent decree, it does so pursuant to a "penalty matrix," an internal procedure the DEP has adopted and prepares for each case. Jerry Phillips, DEP General Counsel, is sending me a sample matrix.[6] Again, the argument that comes to mind is that Florida law is in fact comparable when the whole statutory scheme is considered and when the sufficiently similar standard is applied. There is case law to support this position. Specifically, in Sierra Club v. Colorado Refining Co., 838 F. Supp. at 1436, the court held that even though Colorado's laws do not describe any factors to be considered in assessing penalties, it was enough that the state had adopted informal guidelines that required consideration of factors "closely similar" to those of the CWA such that the two schemes were deemed comparable.

In general, applying this case law to the present situation, Florida's lack of an administrative penalty assessment provision, and lack of a provision specifying penalty assessment factors, would likely be an obstacle, though not necessarily a fatal one, in making a claim for comparability. In support of its claim for comparability, Florida Cities could argue that only when a highly technical comparability test is applied to its penalty assessment scheme, does it fall short. For all practical purposes, the civil penalty assessment provisions that Florida operates under

---

[6] I've asked Lance if we have a matrix for this consent decree but he doesn't know. Obviously, we should look into this further.

works in a way substantially similar to the federal scheme. Moreover, under the specific consent decree in question a penalty was assessed according to a penalty matrix whereby a number of factors went into the determination of the penalty.

4. NPDES Delegation

The fact that recently Florida was able to receive authority to administer its NPDES permit program could bolster this practical (versus technical) view. As Florida's "Program Submission for Authorization to Administer the NPDES Program," at C-14, states: "State law provides authority to . . . apply civil and criminal penalties and fines comparable to the maximum amounts recoverable under section 309 of the CWA or which represent an actual and substantial deterrent to the actions for which they are assessed or levied. Each day of continuing violation is a separate offense for which civil and criminal penalties and fines may be assessed." Florida Cities could argue that by virtue of EPA's granting Florida the authority to operate the NPDES program, EPA implicitly assessed Florida law to be "comparable" to the federal law.

Be aware, however, that delegation does not necessarily imply comparability as that term is used in CWA Section 309(g). For example, in Universal Tool, 735 F.Supp. at 1416, the court determined that Indiana law was not comparable for purposes of invoking the CWA Section 309(g) bar. Yet Indiana was delegated authority to administer its own NPDES permit program in 1975. Similarly, in Citizens for a Better Environment the court held

that California law was not comparable to CWA Section 309(g). Yet California received its delegation in 1973. Massachusetts has yet to receive EPA authorization to administer its own NPDES permit program, yet in Scituate the court found that its state laws were comparable. As these decisions indicate, the actual relationship between delegation and "comparability" under CWA Section 309(g) is not a close one.

Summary

Overall, it would appear that the best strategy that Florida Cities can take in arguing that Florida law is comparable to CWA Section 309(g) would be to emphasize that when the Florida statutory scheme as a whole is compared, the two schemes are essentially similar. Specifically, like the federal scheme, the state law grants DEP the authority to assess civil penalties, criminal penalties, and issue injunctions. When assessing a civil penalty, the DEP must consider evidence of mitigation and apply a "penalty matrix," and it must never assess penalties without first providing notice to an alleged violator and a right to request a hearing. These enforcement actions are subject to public intervention and are further subject to judicial review.

Of course, the weak links in the argument are still there, and, unfortunately, we cannot be sure how comparable a Florida judge will view the federal and state schemes.

ATTACHMENT A

...nce to litigation and disputes involving the mat... which the association could bring a class ...under this rule. Nothing herein limits any ...tory or common-law right of any individual homeowner or class of homeowners to bring any action ...may otherwise be available. An action under ...rule shall not be subject to the requirements of ...1.220.

...effective Sept. 22, 1988 (541 So.2d 1121, 1123–4). ...ended July 16, 1992, effective Jan. 1, 1993 (604 So.2d ...).

RULE 1.230 INTERVENTIONS

Anyone claiming an interest in pending litigation may at any time be permitted to assert a right by intervention, but the intervention shall be in subordination to, and in recognition of, the propriety of the main proceeding, unless otherwise ordered by the court in its discretion.

Amended July 16, 1992, effective Jan. 1, 1993 (604 So.2d 1110).

RULE 1.240 INTERPLEADER

Persons having claims against the plaintiff may be joined as defendants and required to interplead when their claims are such that the plaintiff is or may be exposed to double or multiple liability. It is not ground for objection to the joinder that the claim of the several claimants or the titles on which their claims depend do not have a common origin or are not identical but are adverse to and independent of one another, or that the plaintiff avers that the plaintiff is not liable in whole or in part to any or all of the claimants. A defendant exposed to similar liability may obtain such interpleader by way of crossclaim or counterclaim. The provisions of this rule supplement and do not in any way limit the joinder of parties otherwise permitted.

Amended July 16, 1992, effective Jan. 1, 1993 (604 So.2d 1110).

RULE 1.250 MISJOINDER AND NONJOINDER OF PARTIES

(a) **Misjoinder.** Misjoinder of parties is not a ground for dismissal of an action. Any claim against a party may be severed and proceeded with separately.

(b) **Dropping Parties.** Parties may be dropped by an adverse party in the manner provided for voluntary dismissal in rule 1.420(a)(1) subject to the exception stated in that rule. If notice of lis pendens has been filed in the action against a party so dropped, the notice of dismissal shall be recorded and cancels the notice of lis pendens without the necessity of a court order. Parties may be dropped by order of court on its own initiative or the motion of any party at any stage of the action on such terms as are just.

(c) **Adding Parties.** Parties may be added once as a matter of course within the same time that pleadings can be so amended under rule 1.190(a). If amendment by leave of court or stipulation of the parties is permitted, parties may be added in the ... pleading without further order of court. Parti... be added by order of court on its own initiative motion of any party at any stage of the action ... such terms as are just.

Amended June 19, 1968, effective Oct. 1, 1968 (211 ... 206); July 26, 1972, effective Jan. 1, 1973 (265 So.... July 16, 1992, effective Jan. 1, 1993 (604 So.2d 1110).

Committee Notes

1972 Amendment. Subdivision (c) is amended to p... the addition of parties when the pleadings are amend... stipulation. This conforms the subdivision to all o... permissive types of amendment under rule 1.190(a). I... an inadvertent omission by the committee when the rule in its present form was adopted in 1968 as can be seen by reference to the 1968 committee note.

RULE 1.260 SURVIVOR; SUBSTITUTION OF PARTIES

(a) **Death.**

(1) If a party dies and the claim is not thereby extinguished, the court may order substitution of the proper parties. The motion for substitution may be made by any party or by the successors or representatives of the deceased party and, together with the notice of hearing, shall be served on all parties as provided in rule 1.080 and upon persons not parties in the manner provided for the service of a summons. Unless the motion for substitution is made within 90 days after the death is suggested upon the record by service of a statement of the fact of the death in the manner provided for the service of the motion, the action shall be dismissed as to the deceased party.

(2) In the event of the death of one or more of the plaintiffs or of one or more of the defendants in an action in which the right sought to be enforced survives only to the surviving plaintiffs or only against the surviving defendants, the action shall not abate. The death shall be suggested upon the record and the action shall proceed in favor of or against the surviving parties.

(b) **Incompetency.** If a party becomes incompetent, the court, upon motion served as provided in subdivision (a) of this rule, may allow the action to be continued by or against that person's representative.

(c) **Transfer of Interest.** In case of any transfer of interest, the action may be continued by or against the original party, unless the court upon motion directs the person to whom the interest is transferred to be substituted in the action or joined with the original party. Service of the motion shall be made as provided in subdivision (a) of this rule.

=1> LEXSEE 1995 Fl. ALS 147 -- See section 1420.

0.57 Decisions which affect substantial interests.

The provisions of this section apply in all proceedings in which the ibstantial interests of a party are determined by an agency, unless such roceedings are exempt pursuant to subsection (5). Unless waived by all parties ibsection (1) applies whenever the proceeding involves a disputed issue of aterial fact. Unless otherwise agreed, subsection (2) applies in all other ases.

(1) FORMAL PROCEEDINGS.--

(a) A hearing officer assigned by the division shall conduct all hearings nder this subsection, except for:

1. Hearings before agency heads or a member thereof except the secretary o: ie Department of Business and Professional Regulation for matters relating to e regulation of professions, as defined in chapter 455, or a board or member a board within the Department of Business and Professional Regulation for atters relating to the regulation of professions, as defined in chapter 455;

2. Hearings before the Unemployment Appeals Commission in unemployment ompensation appeals, unemployment compensation appeals referees, and special leputies pursuant to s. 443.141;

3. Hearings regarding drivers' licensing pursuant to chapter 322;

4. Hearings conducted within the Department of Health and Rehabilitative ervices in the execution of those social and economic programs administered by he former Division of Family Services of said department prior to the eorganization effected by chapter 75-48, Laws of Florida;

5. Hearings in which the division is a party, in which case an attorney ssigned by the Administration Commission shall be the hearing officer;

6. Hearings which involve student disciplinary suspensions or expulsions nd which are conducted by educational units;

7. Hearings of the Public Employees Relations Commission in which a determination is made of the appropriateness of the bargaining unit, as provide in s. 447.307;

8. Hearings held by the Department of Agriculture and Consumer Services rsuant to chapter 601; and

9. Hearings held by the Division of Florida Highway Patrol of the Department of Highway Safety and Motor Vehicles to deny, suspend, or remove a wrecker operator from participating in the wrecker rotation system established s. 321.051. Such hearings shall be held by a hearing officer appointed by t director of the Division of Florida Highway Patrol.

(b) In any case to which this subsection is applicable, the following procedures apply:

1. A request for a hearing shall be granted or denied within 15 days of receipt.

2. All parties shall be afforded an opportunity for a hearing after reasonable notice of not less than 14 days; however, the 14-day notice requirement may be waived with the consent of all parties. In a preliminary hearing for the revocation of parole, no less than 7 days' notice shall be given. In a hearing involving a student disciplinary suspension or expulsion conducted by an educational unit, the 14-day notice requirement may be waived the agency head or the hearing officer without the consent of the parties. The notice shall include:

a. A statement of the time, place, and nature of the hearing.

b. A statement of the legal authority and jurisdiction under which the hearing is to be held.

c. A reference to the particular sections of the statutes and rules involved.

d. Except for any hearing before an unemployment compensation appeals referee, a short and plain statement of the matters asserted by the agency and by all parties of record at the time notice is given. If the agency or any par is unable to state the matters in sufficient detail at the time initial notice is given, the notice may be limited to a statement of the issues involved, and thereafter, upon timely written application, a more definite and detailed statement shall be furnished not less than 3 days prior to the date set for th hearing.

3. Except for any proceeding conducted as prescribed in s. 120.54(4) or s 120.56, a petition or request for a hearing under this section shall be filed with the agency. If the agency elects to request a hearing officer from the division, it shall so notify the division within 15 days of receipt of the petition or request. When the Florida Land and Water Adjudicatory Commission receives a notice of appeal pursuant to s. 380.07, the commission shall notify the division within 60 days of receipt of the notice of appeal if the commissi elects to request the assignment of a hearing officer. On the request of any agency, the division shall assign a hearing officer with due regard to the expertise required for the particular matter. The referring agency shall take further action with respect to the formal proceeding, except as a party litigant, as long as the division has jurisdiction over the formal proceeding. Any party may request the disqualification of the hearing officer by filing an affidavit with the division prior to the taking of evidence at a hearing, stating the grounds with particularity.

4. All parties shall have an opportunity to respond, to present evidence nd argument on all issues involved, to conduct cross-examination and submit ebuttal evidence, to submit proposed findings of facts and orders, to file ceptions to any order or hearing officer's recommended order, and to be represented by counsel. When appropriate, the general public may be given an opportunity to present oral or written communications. If the agency proposes consider such material, then all parties shall be given an opportunity to cross-examine or challenge or rebut it.

5. All pleadings, motions, or other papers filed in the proceeding must b signed by a party, the party's attorney, or the party's qualified representative. The signature of a party, a party's attorney, or a party's qualified representative constitutes a certificate that he has read the pleading, motion, or other paper and that, to the best of his knowledge, information, and belief formed after reasonable inquiry, it is not interposed for any improper purposes, such as to harass or to cause unnecessary delay or for frivolous purpose or needless increase in the cost of litigation. If a pleading, motion, or other paper is signed in violation of these requirements the hearing officer, upon motion or his own initiative, shall impose upon the person who signed it, a represented party, or both, an appropriate sanction, which may include an order to pay the other party or parties the amount of reasonable expenses incurred because of the filing of the pleading, motion, or other paper, including a reasonable attorney's fee.

6. The record in a case governed by this subsection shall consist only o

a. All notices, pleadings, motions, and intermediate rulings;

b. Evidence received or considered;

c. A statement of matters officially recognized;

d. Questions and proffers of proof and objections and rulings thereon;

e. Proposed findings and exceptions;

f. Any decision, opinion, proposed or recommended order, or report by th officer presiding at the hearing;

g. All staff memoranda or data submitted to the hearing officer during t hearing or prior to its disposition, after notice of the submission to all parties, except communications by advisory staff as permitted under s. 120.66(1), if such communications are public records;

h. All matters placed on the record after an ex parte communication pursuant to s. 120.66(2); and

i. The official transcript.

7. The agency shall accurately and completely preserve all testimony in proceeding, and, on the request of any party, it shall make a full or partial transcript available at no more than actual cost. In any proceeding before a hearing officer initiated by a consumptive use permit applicant pursuant to subparagraph 14., the applicant shall bear the cost of accurately and complet preserving all testimony and providing full or partial transcripts to the

water management district. At the request of any other party, full or partial transcripts shall be provided at no more than cost.

8. Findings of fact shall be based exclusively on the evidence of record and on matters officially recognized.

9. Except as provided in subparagraph 13., the hearing officer shall complete and submit to the agency and all parties a recommended order consisting of his findings of fact, conclusions of law, interpretation of administrative rules, and recommended penalty, if applicable, and any other information required by law or agency rule to be contained in the final order. The agency shall allow each party at least 10 days in which to submit written exceptions the recommended order.

10. The agency may adopt the recommended order as the final order of the agency. The agency in its final order may reject or modify the conclusions of law and interpretation of administrative rules in the recommended order. The agency may not reject or modify the findings of fact, including findings of fa that form the basis for an agency statement, unless the agency first determine from a review of the complete record, and states with particularity in the order, that the findings of fact were not based upon competent substantial evidence or that the proceedings on which the findings were based did not comp with essential requirements of law. The agency may accept the recommended penalty in a recommended order, but may not reduce or increase it without a review of the complete record and without stating with particularity its reasc therefor in the order, by citing to the record in justifying the action. When there is an appeal, the court in its discretion may award reasonable attorney' fees and costs to the prevailing party if the court finds that the appeal was ivolous, meritless, or an abuse of the appellate process or that the agency action which precipitated the appeal was a gross abuse of the agency's discretion.

11. If the hearing officer assigned to a hearing becomes unavailable, the division shall assign another hearing officer who shall use any existing recor and receive any additional evidence or argument, if any, which the new hearing officer finds necessary.

12. A hearing officer who is a member of an agency head may participate i the formulation of the final order of the agency, provided he has completed al his duties as hearing officer.

13. In any application for a license or merger pursuant to title XXXVIII which is referred by the agency to the division for hearing pursuant to this section, the hearing officer shall complete and submit to the agency and to al parties a written report consisting of findings of fact and rulings on evidentiary matters. The agency shall allow each party at least 10 days in whi to submit written exceptions to the report.

14. In any application for a consumptive use permit pursuant to part II c chapter 373, the water management district on its own motion may, or, at the request of the applicant for the permit, shall, refer the matter to the divisi for the appointment of a hearing officer to conduct a hearing under this section.

15. Each agency statement defined as a rule under s. 120.52 and not adop by the rulemaking procedure provided by s. 120.54 which is relied upon by an ·ency to determine the substantial interests of a party shall be subject to .vo review by a hearing officer. A statement shall not enlarge, modify, or contravene the specific provision of law implemented or otherwise exceed delegated legislative authority. The statement applied as a result of a proceeding pursuant to this subsection shall be demonstrated to be within the scope of delegated legislative authority. Recommended and final orders pursua to this subsection shall provide an explanation of the statement that include the evidentiary basis which supports the statement applied and a general discussion of the justification for the statement applied.

(2) INFORMAL PROCEEDINGS.--In any case to which subsection (1) does not apply:

(a) The agency shall, in accordance with its rules of procedure:

1. Give reasonable notice to affected persons or parties of the action c the agency, whether proposed or already taken, or of its decision to refuse action, together with a summary of the factual, legal, and policy grounds therefor.

2. Give affected persons or parties or their counsel an opportunity, at convenient time and place, to present to the agency or hearing officer writte or oral evidence in opposition to the action of the agency or of its refusal act, or a written statement challenging the grounds upon which the agency has chosen to justify its action or inaction.

3. If the objections of the persons or parties are overruled, provide a written explanation within 7 days.

(b) The record shall only consist of:

1. The notice and summary of grounds;

2. Evidence received or considered;

3. All written statements submitted by persons and parties;

4. Any decision overruling objections;

5. All matters placed on the record after an ex parte communication pursuant to s. 120.66(2); and

6. The official transcript.

(3) Unless precluded by law, informal disposition may be made of any proceeding by stipulation, agreed settlement, or consent order.

(4) This section does not apply to agency investigations preliminary to agency action.

(5) This section does not apply to any proceeding in which the substant: .nterests of a student are determined by the State University System. The Bo: of Regents shall establish a committee, at least half of whom shall be

appointed by the Council of Student Body Presidents, which shall establish by January 1, 1985, rules and guidelines ensuring fairness and due process in judicial proceedings involving students in the State University System. This section shall not become effective until January 1, 1985.

(6) In cases where a conceptual review permit has been issued by a water management district, petitions challenging the issuance of a construction or operating permit implementing the conceptual review permit, upon a motion of a party, shall be subject to expedited review. Within 15 days of filing a motion for expedited review by the district or the applicant, the hearing officer shall, by order, establish a schedule for the proceedings, including discovery, which provides for a final hearing within 60 days of the issuance of the order. Proposed recommended orders must be submitted to the hearing officer, if at all, within 10 days of the filing of the hearing transcript. Recommended orders shall be submitted to the district within 30 days of the last day for the filing of the proposed recommended order. The district shall issue its final order within 45 days of the receipt of the recommended order. If the district grants the construction or operating permit, the permittee may proceed unless judicial review of final agency action is sought pursuant to s. 120.68 and a stay is applied for and issued.

FLORIDA STATUTES 1994

*** THIS DOCUMENT IS CURRENT THROUGH THE 1994 REGULAR LEGISLATIVE SESSION ***

TITLE X PUBLIC OFFICERS, EMPLOYEES, AND RECORDS
CHAPTER 120 ADMINISTRATIVE PROCEDURE ACT

Fla. Stat. @ 120.68 (1994)

120.68 Judicial review.

(1) A party who is adversely affected by final agency action is entitled judicial review. For purposes of this section, a district school board whose decision is reviewed under the provisions of s. 231.36 and whose final action modified by a superior administrative decision shall be a party entitled to judicial review of the final action. A preliminary, procedural, or intermediat agency action or ruling, including any order of a hearing officer, is immediately reviewable if review of the final agency decision would not provid an adequate remedy.

(2) Except in matters for which judicial review by the Supreme Court is provided by law, all proceedings for review shall be instituted by filing a petition in the district court of appeal in the appellate district where the agency maintains its headquarters or where a party resides. If the appeal is o an order rendered in a proceeding initiated under s. 120.54(4) or under s. 120.56, the agency whose rule is being challenged shall transmit a copy of the notice of appeal to the committee. Review proceedings shall be conducted in accordance with the Florida Rules of Appellate Procedure.

(3)(a) The filing of the petition does not itself stay enforcement of the agency decision, but if the agency decision has the effect of suspending or revoking a license, supersedeas shall be granted as a matter of right upon suc conditions as are reasonable, unless the court, upon petition of the agency, determines that a supersedeas would constitute a probable danger to the health safety, or welfare of the state. The agency may also grant a stay upon appropriate terms, but, whether or not the action has the effect of suspending or revoking a license, a petition to the agency for a stay is not a prerequisi to a petition to the court for supersedeas. In any event, the order shall specify the conditions, if any, upon which the stay or supersedeas is granted.

(b) The filing of a petition appealing an order issued by a hearing offic under s. 120.535, whether filed by the agency or any other party, does not sta enforcement of the hearing officer's order, unless the court, upon petition of the agency or other party, determines that a stay is necessary to avoid a probable danger to the public health, safety, or welfare. A stay order shall specify the conditions, if any, upon which the stay is granted.

(4) Judicial review of any agency action shall be confined to the record transmitted and any additions made thereto in accordance with subsection (6).

(5) The record for judicial review shall consist of the following:

(a) The agency's written document expressing the order, the statement of easons therefor, if issued, and the record under s. 120.57, if review of roceedings under that section is sought.

(b) The agency's written document expressing the action, the statement of reasons therefor, if issued, and the materials considered by the agency under s. 120.54, if review is sought of proceedings under that section.

(c) The agency's written document expressing the action, and other written documents identified by the agency as having been considered by it before its action and used as a basis for its action, if review is sought of proceedings under s. 120.56 or s. 120.565 or if there has been no proceeding under s. 120.5 or s. 120.57.

(6) When there has been no hearing prior to agency action and the reviewing court finds that the validity of the action depends upon disputed facts, the court shall order the agency to conduct a prompt, factfinding proceeding under this act after having a reasonable opportunity to reconsider its determination on the record of the proceedings.

(7) The reviewing court shall deal separately with disputed issues of agency procedure, interpretations of law, determinations of fact, or policy within the agency's exercise of delegated discretion.

(8) The court shall remand the case for further agency action if it finds that either the fairness of the proceedings or the correctness of the action may have been impaired by a material error in procedure or a failure to follow prescribed procedure. Failure of any agency to comply with s. 120.53 shall be presumed to be a material error in procedure.

(9) If the court finds that the agency has erroneously interpreted a provision of law and that a correct interpretation compels a particular action, it shall:

(a) Set aside or modify the agency action, or

(b) Remand the case to the agency for further action under a correct interpretation of the provision of law.

(10) If the agency's action depends on any fact found by the agency in a proceeding meeting the requirements of s. 120.57, the court shall not substitute its judgment for that of the agency as to the weight of the evidence on any disputed finding of fact. The court shall, however, set aside agency action or remand the case to the agency if it finds that the agency's action depends on any finding of fact that is not supported by competent substantial evidence in the record.

(11) If the agency's action depends on facts determined pursuant to subsection (6), the court shall set aside, modify, or order agency action if the facts compel a particular action as a matter of law, or it may remand the case to the agency for further examination and action within the agency's responsibility.

(12) The court shall remand the case to the agency if it finds the agency's exercise of discretion to be:

(a) Outside the range of discretion delegated to the agency by law;

(b) Inconsistent with an agency rule;

(c) Inconsistent with an officially stated agency policy or a prior agency practice, if deviation therefrom is not explained by the agency; or

(d) Otherwise in violation of a constitutional or statutory provision;

but the court shall not substitute its judgment for that of the agency on an issue of discretion.

(13)(a) The decision of the reviewing court may be mandatory, prohibitory or declaratory in form; and it shall provide whatever relief is appropriate irrespective of the original form of the petition. The court may:

1. Order agency action required by law, order agency exercise of discretion when required by law, set aside agency action, remand the case for further agency proceedings, or decide the rights, privileges, obligations, requirements or procedures at issue between the parties; and

2. Order such ancillary relief as the court finds necessary to redress the effects of official action wrongfully taken or withheld.

(b) If the court sets aside agency action or remands the case to the agency for further proceedings, it may make such interlocutory order as the court finds necessary to preserve the interests of any party and the public pending further proceedings or agency action.

(14) Unless the court finds a ground for setting aside, modifying, remanding, or ordering agency action or ancillary relief under a specified provision of this section, it shall affirm the agency's action.

(15) No petition challenging an agency rule as an invalid exercise of delegated legislative authority shall be instituted pursuant to this section, except to review an order entered pursuant to a proceeding under s. 120.54(4) s. 120.56, unless the sole issue presented by the petition is the constitutionality of a rule and there are no disputed issues of fact.

HISTORY: s. 1, ch. 74-310; s. 13, ch. 76-131; s. 38, ch. 77-104; s. 1, ch. 77-174; s. 11, ch. 78-425; s. 4, ch. 84-173; s. 7, ch. 87-385; s. 36, ch. 90-302; s. 6, ch. 91-30; s. 1, ch. 91-191; s. 10, ch. 92-166.

<=1> LEXSEE 1995 Fl. ALS 147 -- See section 766.

120.69 Enforcement of agency action.

(1) Except as otherwise provided by statute:

(a) Any agency may seek enforcement of an action by filing a petition for enforcement, as provided in this section, in the circuit court where the subject matter of the enforcement is located.

(b) A petition for enforcement of any agency action may be filed by any substantially interested person who is a resident of the state. However, no such action may be commenced:

1. Prior to 60 days after the petitioner has given notice of the violation of the agency action to the head of the agency concerned, the Attorney General and any alleged violator of the agency action.

2. If an agency has filed, and is diligently prosecuting, a petition for enforcement.

(c) A petition for enforcement filed by a nongovernmental person shall be in the name of the State of Florida on the relation of the petitioner, and the doctrines of res judicata and collateral estoppel shall apply.

(d) In an action brought under paragraph (b), the agency whose action is sought to be enforced, if not a party, may intervene as a matter of right.

(2) A petition for enforcement may request declaratory relief; temporary or permanent equitable relief; any fine, forfeiture, penalty, or other remedy provided by statute; any combination of the foregoing; or, in the absence of any other specific statutory authority, a fine not to exceed $ 1,000.

(3) After the court has rendered judgment on a petition for enforcement, no other petition shall be filed or adjudicated against the same agency action, on the basis of the same transaction or occurrence, unless expressly authorized on remand. The doctrines of res judicata and collateral estoppel shall apply, and the court shall make such orders as are necessary to avoid multiplicity of actions.

(4) In all enforcement proceedings:

(a) If enforcement depends on any facts other than those appearing in the record, the court may ascertain such facts under procedures set forth in s. 120.68(6).

(b) If one or more petitions for enforcement and a petition for review involving the same agency action are pending at the same time, the court onsidering the review petition may order all such actions transferred to and onsolidated in one court. Each party shall be under an affirmative duty to otify the court when it becomes aware of multiple proceedings.

(c) Should any party willfully fail to comply with an order of the court, the court shall punish him in accordance with the law applicable to contempt committed by a person in the trial of any other action.

(5) In any enforcement proceeding the respondent may assert as a defense the invalidity of any relevant statute, the inapplicability of the administrative determination to respondent, compliance by the respondent, the inappropriateness of the remedy sought by the agency, or any combination of th foregoing. In addition, if the petition for enforcement is filed during the ti within which the respondent could petition for judicial review of the agency action, the respondent may assert the invalidity of the agency action.

(6) Notwithstanding any other provision of this section, upon receipt of evidence that an alleged violation of an agency's action presents an imminent and substantial threat to the public health, safety, or welfare, the agency ma bring suit for immediate temporary relief in an appropriate circuit court, and the granting of such temporary relief shall not have res judicata or collatera estoppel effect as to further relief sought under a petition for enforcement relating to the same violation.

(7) In any final order on a petition for enforcement the court may award the prevailing party all or part of the costs of litigation and reasonable ttorney's fees and expert witness fees, whenever the court determines that su. n award is appropriate.

HISTORY: s. 1, ch. 74-310.

judicial or administrative proceedings when ordered to be produced by appropriate subpoena or by order of the court or a hearing officer. No such subpoena or order of the court or hearing officer shall abridge or alter the rights or remedies of persons affected in the protection of trade secrets or secret processes, in the manner provided by law, and such persons affected may take any and all steps available by law to protect such trade secrets or processes.

(3) Information submitted by or required of permit applicants or permittees pursuant to § 403.0885 is not subject to the provisions of this section but is subject to the provisions of 40 C.F.R. § 122.7.

NOTES OF DECISIONS

Construction and application

Statute provides exception to state policy that all public records are open to inspection by public at large and it prohibits DER from releasing for public inspection records containing secret processes and trade secrets; however, court rejected appellant's contention that statute provides absolute immunity from discovery of confidential information where party in a formal administrative proceeding can demonstrate necessity for disclosure. Eastern Cement v. Dept. of Environ. Reg., App., (1st) 512 So. 2d 264 (1987).

In general

Any information obtained by the Florida air pollution control commission or the state board of health (from any source whatsoever) which directly related to air pollution might be used as the commission or board might deem proper in controlling or preventing air pollution in accordance with the provisions of this chapter. Op. Atty. Gen., 060-136, Aug. 12, 1960.

Records of results of sampling and analysis of vegetation, air, etc., in the files of the Florida air pollution control commission for the state board of health insofar as they related directly to air pollution, constituted public records and would be open to the public, and such public records might be used in private suits against a company. Id.

The state board of health and the Florida air pollution control commission are bound to hold confidential the information concerning secret processes, methods of manufacture, and production figures, and any other data filed with either of them from which such information may be deduced. Any information, the confidential nature of which is questionable, should be released or made public only in compliance with a writ of mandamus or other process issued by a court of competent jurisdiction. Id.

403.121 Enforcement; procedure; remedies

The department shall have the following judicial and administrative remedies available to it for violations of this chapter, as specified in § 403.161(1).

(1) Judicial remedies:

(a) The department may institute a civil action in a court of competent jurisdiction to establish liability and to recover damages for any injury to the air, waters, or property, including animal, plant, and aquatic life, of the state caused by any violation.

(b) The department may institute a civil action in a court of competent jurisdiction to impose and to recover a civil penalty for each violation in an amount of not more than $10,000 per offense. However, the court may receive evidence in mitigation. Each day during any portion of which such violation occurs constitutes a separate offense.

(c) It shall not be a defense to, or ground for dismissal of, these judicial remedies for damages and civil penalties that the department has failed to exhaust its administrative remedies, has failed to serve a notice of violation, or has failed to hold an administrative hearing prior to the institution of a civil action.

(2) Administrative remedies:

(a) The department may institute an administrative proceeding to establish liability and to recover damages for any injury to the air, waters, or property, including animal,

plant, or aquatic life, of the state caused by any violation. The department may order that the violator pay a specified sum as damages to the state. Judgment for the amount of damages determined by the department may be entered in any court having jurisdiction thereof and may be enforced as any other judgment.

(b) If the department has reason to believe a violation has occurred, it may institute an administrative proceeding to order the prevention, abatement, or control of the conditions creating the violation or other appropriate corrective action.

(c) An administrative proceeding shall be instituted by the department's serving of a written notice of violation upon the alleged violator by certified mail. The notice shall specify the provision of the law, rule, regulation, permit, certification, or order of the department alleged to be violated and the facts alleged to constitute a violation thereof. An order for corrective action may be included with the notice. However, no order shall become effective until after service and an administrative hearing, if requested within 20 days after service. Failure to request an administrative hearing within this time period shall constitute a waiver thereof.

(d) Nothing herein shall be construed as preventing any other legal or administrative action in accordance with law.

(3)(a) In addition to any judicial or administrative remedy authorized by this part, the department may assess a noncompliance fee for failure of any owner or operator of a domestic wastewater treatment facility to comply with a permit condition that requires the submittal of monthly operating reports or the reporting of the characteristics of the waste stream or the effects of the facility on surface or ground water. For the first and second violations of the reporting requirements, the fee shall not be assessed until the department has given the owner or operator at least 30 days to comply with the reporting requirement. The time shall not begin until the department has given the owner or operator written notice of the facts alleged to constitute the reporting violation, the specific provision of law, rule, or order alleged to have been violated by the owner or operator, the corrective action needed to bring the facility into compliance, and the potential penalties that may be imposed as a result of the owner's or operator's failure to comply with the notice. For subsequent violations, the department does not have to provide 30 days' written notice of the violations prior to assessing a noncompliance fee, except as follows:

1. If any additional reporting violations occur prior to the expiration of either of the 30-day notices issued by the department, the department must provide the owner or operator with 30 days' written notice to correct these violations as well.

2. Upon the renewal of the permit, the department shall reinstate the 30-day notice requirements provided in this subsection prior to assessing a noncompliance fee during the new permit period.

(b) At the time of assessment of a noncompliance fee, the department shall give the owner or operator written notice setting forth the amount assessed, the specific provision of law, rule, or order alleged to be violated, the facts alleged to constitute the violation, the corrective action needed to bring the party into compliance, and the rights available under chapter 120 to challenge the assessment. The assessment shall be final and effective unless an administrative proceeding is requested within 20 days after receipt of the written notice, and shall be enforceable pursuant to § 120.69. Once the assessment has become final and effective, the department may refuse to issue, modify, transfer, or renew a permit to the facility until the fee has been paid.

(c) Before assessing a noncompliance fee, the department shall adopt rules to implement the provisions of this subsection. The rules shall establish specific procedures and assessment amounts for noncompliance fees authorized by paragraph (a). Noncompliance fees shall be set on a sliding scale based upon the type of violation, the degree of noncompliance, and the potential for harm. Such rules shall also authorize the

application of adjustment factors subsequent to the initial assessment to increase or decrease the total amount assessed, such as the good faith efforts or the lack of good faith efforts of the owner or operator to comply with the reporting requirement, the lack of or degree of willfulness or negligence on the part of the owner or operator, the economic benefits associated with the owner's or operator's failure to comply, the owner's or operator's previous history of reporting violations, and the owner's or operator's ability to pay the noncompliance fee. No noncompliance fee shall exceed $250, and total noncompliance fees assessed shall not exceed $1,000 per assessment for all reporting violations attributable to a specific facility during any one month. No noncompliance fee may be assessed unless the department has, within 90 days of the reporting violation, provided the owner or operator written notice of the violation.

(d) The department's assessment of a noncompliance fee shall be in lieu of any civil action which may be instituted by the department in a court of competent jurisdiction to impose and recover civil penalties for any violation that resulted in the fee assessment, unless the department initiates a civil action for nonpayment of a fee properly assessed pursuant to this subsection.

(e) Fees collected pursuant to this subsection shall be deposited in the Pollution Recovery Fund. The department may use a portion of the fund to contract for services to help in the collection of the fees assessed pursuant to this subsection.

NOTES OF DECISIONS

Construction and application

Court found no authority for department's ostensible contention that warning served on appellant was some type of free-form pleading which had no impact upon its substantial interests; notice which was served generally tracked language of § 403.121(c), specifying statute and regulation alleged to have been violated and facts alleged to constitute violation; additionally, by entering into consent orders with 2 of 3 persons served with "warning," department must have considered that substantial interests were affected by such service. Philbro Resources Corp. v. State, Department of Environmental Regulation, App., (1st) 579 So. 2d 118 (1991).

Inconsistencies of §§ 403.171, 403.121(3), and 403.804(1) can be reconciled by construing them to provide for judicial review of final agency action after review of action by Commission. Peterson v. State of Florida Department of Environmental Regulation, App., (1st) 350 So. 2d 544 (1977).

In general

Appellant was made party to administrative proceeding by both statute and rule when NOV was served on it; having achieved status as party pursuant to § 403.121(2)(c) and Rule 17-103.110(1)(b), it was therefore immaterial whether its own interests were determined in proceeding, so long as interests of specific party or parties were there determined. Philbro Resources Corp. v. State, Department of Environmental Regulation, App., (1st) 579 So. 2d 118 (1991).

When legislature amended Ch. 403 in 1972, it eliminated right of defendant to require judicial determination for liability and damages; this amendment restricts right previously held and is substantive, not procedural and, under circumstances of case, Supreme Court declined to give retrospective effect to 1972 amendments. State, Department of Pollution Control v. International Paper Company, 329 So. 2d 5 (1976).

It is apparent that legislature intended that no fine, forfeiture or penalty should be exacted against any citizen for violation of any provision of act, or for damages flowing from any act of pollution, unless and until

such person was granted either an administrative or judicial hearing to determine nature and extent of damage or penalty to be exacted, and that civil liability was limited to $5,000 for each offense. Gardinier, Inc. v. Florida Department of Pollution Control, App., 300 So. 2d 75 (1974).

Before penalties contained in § 403.161, the Air and Water Pollution Control Act, can be imposed and alleged violator is entitled to notice and hearing before Commission as provided in § 403.121; once due process safeguards are met and Commission has determined that one or more violations have occurred, it is then free to initiate complaint seeking judicial imposition of penalties. State, Air & Water Pollution Control Com'n v. St. Regis Paper Co., 257 So. 2d 253 (1971).

In light of apparent legislative intent that all moneys recovered for violations of Part I of Ch. 403 be used to restore polluted areas, all such moneys should be placed in Pollution Recovery Fund established by § 403.165 without regard to statutory procedure (administrative or judicial) employed to obtain recovery. Op. Atty. Gen., 076-169, Aug., 1976.

Public prosecutors are authorized to prosecute violations of § 403.161(3) in proper courts, but there does not exist either authority to seek criminal relief before Board of Department of Pollution Control or authority for public prosecutor to institute action for civil penalties pursuant to § 403.121(1)(b). Op. Atty. Gen., 072-239, August 2, 1972.

Injunctions

Trial court abused its discretion in denying motion for temporary injunction; DER established that samples taken from treatment plants revealed violations of effluent standards; that plant was being operated without necessary permit from DER; that irreparable harm would flow from continued effluent violations at plants; that it lacked adequate remedy at law; that it had clear legal right to relief requested; and that injunction was in public interest. State, Dept. of Environmental Reg. v. Kaszyk, App., (3rd) 590 So. 2d 1010 (1991).

Nature of liability

Provisions of Ch. 403, regarding determination of liability and imposition and enforcement of fines and penalties are penal in nature, and must be strictly construed in favor of those sought to be regulated or penalized. Gardinier, Inc. v. Florida Department of Pollution Control, App., 300 So. 2d 75 (1974).

Notice

Under Air and Water Pollution Control Act, requirement that Commission give notice of violation is condition precedent to any institution of proceeding by Commission in court of competent jurisdiction seeking civil or criminal penalties where continuing violation is charged predicated upon usual and normal daily operation of alleged violator's business. St. Regis Paper Co. v. State By and Through Florida Air and Water Pollution Control Commission, App., 237 So. 2d 797 (1970).

403.131 Injunctive relief, cumulative remedies

(1) The department may institute a civil action in a court of competent jurisdiction to seek injunctive relief to enforce compliance with this chapter or any rule, regulation, permit certification, or order; to enjoin any violation specified in § 403.161(1); and to seek injunctive relief to prevent irreparable injury to the air, waters, and property, including animal, plant, and aquatic life, of the state and to protect human health, safety, and welfare caused or threatened by any violation.

(2) All the judicial and administrative remedies in this section and § 403.121 are independent and cumulative except that the judicial and administrative remedies to recover damages are alternative and mutually exclusive.

Derivation

Laws 1972, c. 72-286, § 2; Laws 1970, c. 70-439, § 1; Laws 1970, c. 70-139, § 1; Laws 1969, c. 69-106, §§ 26, 35; Laws 1967, c. 67-436, § 14.

Library References

Injunction, Key No. 136(1); C. J. S. Injunctions § 17 et seq.

403.141 Civil liability; joint and several liability

(1) Whoever commits a violation specified in § 403.161(1) is liable to the state for any damage caused to the air, waters, or property, including animal, plant, or aquatic life, of the state and for reasonable costs and expenses of the state in tracing the source of the discharge, in controlling and abating the source and the pollutants, and in restoring the air, waters, and property, including animal, plant, and aquatic life, of the state to their former condition, and furthermore is subject to the judicial imposition of a civil penalty for each offense in an amount of not more than $10,000 per offense. However, the court may receive evidence in mitigation. Each day during any portion of which such violation occurs constitutes a separate offense. Nothing herein shall give the department the right to bring an action on behalf of any private person.

(2) Whenever two or more persons pollute the air or waters of the state in violation of this chapter or any rule, regulation, or order of the department so that the damage is indivisible, each violator shall be jointly and severally liable for such damage and for the reasonable cost and expenses of the state incurred in tracing the source of discharge, in controlling and abating the source and the pollutants, and in restoring the air, waters, and property, including the animal, plant, and aquatic life of the state, to their former condition. However, if said damage is divisible and may be attributed to a particular violator or violators, each violator is liable only for that damage attributable to his violation.

(3) In assessing damages for fish killed, the value of the fish is to be determined in accordance with a table of values for individual categories of fish which shall be promulgated by the department. At the time the table is adopted, the department shall utilize tables of values established by the Department of Natural Resources and the Game and Fresh Water Fish Commission. The total number of fish killed may be estimated by standard practices used in estimating fish population.

(4) The damage provisions of this section shall not apply to damage resulting from the application of federally approved or state-approved chemicals to the waters in the state for the control of insects, aquatic weeds, or algae, provided the application of such chemicals is done in accordance with a program approved pursuant to § 403.088(1) and provided said application is not done negligently.

NOTES OF DECISIONS

Construction and application

State attorney has no standing to independently initiate § 403.141(1) civil action for damages and penalties against an alleged violator of Ch. 403, and state attorney has no standing under § 120.69(1)(a) to file petition for enforcement of rules and regulations promulgated by DER in relation to Ch. 403. State, State Attorney for Twelfth Judicial Circuit v. General Development Corp., App., (2nd) 448 So. 2d 1074 (1984).

In general

When legislature amended Ch. 403 in 1972, it eliminated right of defendant to require judicial determination for liability and damages; this amendment restricts right previously held and is substantive, not procedural and, under circumstances of case, Supreme Court declined to give retrospective effect to 1972

amendments. State. De

amendments. State, Department of Pollution Control v. International Paper Company, 329 So. 2d 5 (1976).

It is apparent that legislature intended that no fine, forfeiture or penalty should be exacted against any citizen for violation of any provision of act, or for damages flowing from any act of pollution, unless and until such person was granted either an administrative or judicial hearing to determine nature and extent of damage of penalty to be exacted, and that civil liability was limited to $5,000 for each offense. Gardinier, Inc. v. Florida Department of Pollution Control, App., 300 So. 2d 75 (1974).

Department of Pollution Control, under statute, may bring civil action for damages against one who unlawfully discharges contaminants into air or water of state without prior administrative hearing. State v. Saint Regis Paper Co., App., 275 So. 2d 21 (1973).

Nature of liability

Provisions of Ch. 403, regarding determination of liability and imposition and enforcement of fines and penalties are penal in nature, and must be strictly construed in favor of those sought to be regulated or penalized. Gardinier, Inc. v. Florida Department of Pollution Control, App., 300 So. 2d 75 (1974).

Stipulations

Court did not find Stipulation ambiguous; it did not provide that if force majeure is declared by the court, Boiler 4 could be operated after Jan. 1, 1976, without liability if it were not in compliance with regulations; stipulation merely provided for reduced penalty for appellant if force majeure occurred; were it not for Stipulation, appellant could not have operated without suffering full penalty for noncompliance under § 403.141. St. Joe Paper Company v. State of Florida Department of Environmental Regulation, App., (1st) 371 So. 2d 178 (1979).

Validity

Fish table values as authorized by statute are proper and relevant to question of damages; they are admissible and may be introduced as evidence and rebutted like any other evidence. State, Department of Pollution Control v. International Paper Company, 329 So. 2d 5 (1976).

403.151 Compliance with rules or orders of department

All rules or orders of the department which require action to comply with standards adopted by it, or orders to comply with any provisions of this act, may specify a reasonable time for such compliance.

Derivation

Laws 1969, c. 69-106, §§ 26, 35; Laws 1967, c. 67-436, § 16.

403.161 Prohibitions, violation, penalty, intent

(1) It shall be a violation of this chapter, and it shall be prohibited for any person:

(a) To cause pollution, except as otherwise provided in this chapter, so as to harm or injure human health or welfare, animal, plant, or aquatic life or property.

(b) To fail to obtain any permit required by this chapter or by rule or regulation, or to violate or fail to comply with any rule, regulation, order, permit, or certification adopted or issued by the department pursuant to its lawful authority.

(c) To knowingly make any false statement, representation, or certification in any application, record, report, plan, or other document filed or required to be maintained under this chapter, or to falsify, tamper with, or knowingly render inaccurate any monitoring device or method required to be maintained under this chapter or by any permit, rule, regulation, or order issued under this chapter.

(d) For any person who owns or operates a facility to fail to report to the representative of the department, as established by department rule, within one working day of discovery of a release of hazardous substances from the facility if the owner or operator is required to report the release to the United States Environmental Protection

Agency in accordance with 42 U. S.C. § 9603.

(2) Whoever commits a violation specified in subsection (1) is liable to the state for any damage caused and for civil penalties as provided in § 403.141.

(3) Any person who willfully commits a violation specified in paragraph (1)(a) is guilty of a felony of the third degree punishable as provided in §§ 775.082(3)(d) and 775.083(1)(g) by a fine of not more than $50,000 or by imprisonment for 5 years, or by both, for each offense. Each day during any portion of which such violation occurs constitutes a separate offense.

(4) Any person who commits a violation specified in paragraph (1)(a) due to reckless indifference or gross careless disregard is guilty of a misdemeanor of the second degree, punishable as provided in §§ 775.082(4)(b) and 775.083(1)(g) by a fine of not more than $5,000 or by 60 days in jail, or by both, for each offense.

(5) Any person who willfully commits a violation specified in paragraph (1)(b) or paragraph (1)(c) is guilty of a misdemeanor of the first degree punishable as provided in §§ 775.082(4)(a) and 775.083(1)(g) by a fine of not more than $10,000 or by 6 months in jail, or by both for each offense.

(6) It is the legislative intent that the civil penalties and criminal fines imposed by the court be of such amount as to ensure immediate and continued compliance with this section.

NOTES OF DECISIONS

Confidential information

The state board of health and the Florida air pollution control commission were bound to hold confidential the information concerning secret processes, methods of manufacture, and production figures, and any other data filed with either of them from which such information might be deduced. Any information, the confidential nature of which was questionable, should be released or made public only in compliance with a writ of mandamus or other process issued by a court of competent jurisdiction. Op. Atty. Gen., 060-136, Aug. 12, 1960.

Hearings

All hearings conducted pursuant to former provisions of this chapter (the Florida air pollution control law) should be open to the public except when information, including testimony and records, as to secret processes or methods of manufacture or production is being offered or discussed, at such periods during a hearing the public should be excluded and that part of the transcript classified as confidential. Op. Atty. Gen., 060-136, Aug. 12, 1960.

In general

Where appellants, city and Department of Environmental Regulation sought review of order granting summary final judgment in favor of appellee in connection with their complaints for civil penalties claimed for improper asbestos removal, in violation of Environmental Protection Board Rule 2.209 and Florida Administrative Code Rule 17-2.670, where trial court entered summary final judgment based on finding that rules irreconcilably conflict with § 455.302 which court interpreted as absolutely prohibiting unlicensed persons such as appellee from exercising control over asbestos abatement operation, court found no such conflict and reversed and remanded for further proceedings. State, Dept. of Environmental Regulation v. SCM Glidco Organics Corporation, App., (1st) 606 So. 2d 722 (1992).

On appeal of order of Department of Environmental Regulation which finds failure to adequately treat stormwater runoff, in violation of Florida Administrative Code Rule 17-25 and § 403.161(1)(b), and orders corrective action, department had proceeded administratively against party, individually and personally,
