Re: Petition for Arbitration between BellSouth and Supra

Dear Ms. Bayó:

Enclosed is an original and 15 copies of the Petition of BellSouth Telecommunications, Inc. for Section 252(b) Arbitration, which we ask that you file in the captioned matter.

A copy of this letter is enclosed. Please mark it to indicate that the original was filed and return the copy to me. Copies have been served to the parties shown on the attached Certificate of Service.

Sincerely,

J. Phillip Carver (AW)

In re:	)	Docket No. 001305-TP
	)	
Petition for Arbitration of the Interconnection Agreement Between BellSouth Telecommunications, Inc. and Supra Telecommunications and Information Systems, Inc., Pursuant to Section 252(b) of the Telecommunications Act of 1996.	)	
	)	Filed: September 1, 2000

PETITION OF BELLSOUTH TELECOMMUNICATIONS, INC. FOR SECTION 252(b) ARBITRATION

Pursuant to Section 252(b) of the Telecommunications Act of 1996 ("1996 Act"), BellSouth Telecommunications, Inc., ("BellSouth") files this Petition for Arbitration seeking resolution of certain issues arising between Supra Telecommunications and Information Systems, Inc. ("Supra") and BellSouth in the negotiation of an Interconnection Agreement. BellSouth states as follows:

I. STATEMENT OF FACTS

1. BellSouth is a corporation organized and existing under the laws of the State of Georgia, maintaining its principal place of business at 675 West Peachtree Street, N.E., Atlanta, Fulton County, Georgia. BellSouth is an incumbent local exchange carrier ("ILEC") as defined by 47 U.S.C. § 251(h).

2. Supra is a corporation organized and existing under the laws of the State of Florida, maintaining its principal place of business in Miami, Florida. Upon BellSouth's best knowledge and belief, Supra is certified by the Florida Public Service Commission ("Commission") to provide Alternative Local Exchange Carrier ("ALEC") services.

DOCUMENT NUMBER-DATE
10918 SEP-1 8
FPSC-RECORDS/REPORTING
00003

3. Pursuant to the 1996 Act, BellSouth is required to provide (through negotiation or otherwise) interconnection for the equipment and facilities of a requesting telecommunications carrier with its network. *See* 47 U.S.C. § 251(c)(2). The terms of interconnection must comply with the provisions of Section 251(b) of the 1996 Act. BellSouth, as an ILEC, is also required to provide interconnection in compliance with the provisions of Section 251(c) of the 1996 Act.

4. Under the provisions of Section 252(d), BellSouth must provide interconnection and network elements at rates that are cost based and non-discriminatory. The rates BellSouth charges may include a reasonable profit.

5. On or about October 5, 1999, Supra adopted a pre-existing Interconnection Agreement between BellSouth and AT&T (the BellSouth/Supra Interconnection Agreement), which this Commission subsequently approved. The Agreement expired on June 9, 2000. The parties have agreed to continue to operate pursuant to its terms until such time as a new Interconnection Agreement is approved. The new Interconnection Agreement will be retroactive to June 9, 2000.

6. In anticipation of the expiration of the Agreement and pursuant to the terms of the BellSouth/Supra Interconnection Agreement, BellSouth provided to Supra by letter dated March 29, 2000, a request for negotiation of a new Interconnection Agreement. Attached to this request was a copy of the proposed BellSouth agreement from which the parties would commence negotiations. Accordingly, the negotiations were deemed to have commenced on March 29, 2000.

7. Pursuant to its obligations under Section 251(c)(1) of the 1996 Act, BellSouth has attempted to negotiate the terms and conditions of a new Interconnection Agreement with Supra.

000004

Supra and BellSouth, however, have been unable to resolve through negotiations all of the issues arising between them pertinent to the re-negotiation of their Interconnection Agreement.

II. JURISDICTION OF THE COMMISSION

8. Pursuant to Section 252(b)(1) of the 1996 Act, which allows either party to the negotiation to request arbitration, this Commission is empowered to arbitrate any and all unresolved issues regarding Supra's interconnection with BellSouth's network. BellSouth's Petition is filed with the Commission between the 135th and 160th day from the date that negotiations were deemed to have commenced.

9. The Federal Communications Commission ("FCC") established the appropriate standard for arbitration under Sections 251 and 252 of the 1996 Act in its First Report and Order, Implementation of the Local Competition provisions of the Telecommunications Act of 1996, CC Docket No.: 96-98. Pursuant to the FCC's First Report and Order, this Commission must do the following in an arbitration:

a. ensure resolution and conditions satisfying Section 251, including regulations promulgated by the FCC; and

b. establish rates for interconnection services or network elements according to Section 252(d).

III. ARBITRATION ISSUES AND POSITIONS OF THE PARTIES

10. Pursuant to Section 252(b)(2) of the 1996 Act, the unresolved issues between Supra and BellSouth, which BellSouth believes have been properly raised by the parties, are set forth below. Attached to this petition as Exhibit 1 is BellSouth's proposed Interconnection

Agreement with Supra. Immediately preceding the Statement of each issue is a citation to the portion of the proposed Agreement that the issue addresses.[1]

Issue 1: (General Terms and Conditions ("GTC") § 16). Should the Parties be required to submit disputes under this Agreement to an Alternative Dispute Resolution Process (Commercial Arbitration)?

BELLSOUTH: No. BellSouth believes the Florida Public Service Commission, having knowledge of the issues and obligations of the parties under applicable law, is in the best position to resolve contract disputes. ADR is strictly voluntary, and parties cannot be forced to participate in commercial arbitration without their consent.

SUPRA: Supra believes BellSouth should be required to submit to Alternative Dispute Resolution.

Issue 2: (GTC § 18.4). What is the scope of the ability to use the other party's Confidential Information that is obtained pursuant to this Interconnection Agreement?

BELLSOUTH: Confidential Information provided under this Agreement should be utilized only in connection with this Agreement. To the extent the same or similar Confidential Information is to be exchanged under a separate agreement, that separate agreement will control.

SUPRA: To the best of BellSouth's understanding, Supra wants to retain Confidential Information provided by BellSouth under this Interconnection Agreement for use in connection with other agreements between the Parties.

Issue 3: (GTC § 21.1). What is the appropriate amount of general liability insurance coverage for the Parties to maintain under their Interconnection Agreement?

BELLSOUTH: $10,000,000 is an appropriate level of coverage given the value of BellSouth's and other ALECs' network equipment and facilities, both inside and outside the central offices. In the event that any error on the part of an ALEC or BellSouth damages equipment or other property of other

[1] In some cases in which an issue has been raised by Supra, the issue is not reflected in the proposed Agreement because Supra has not proposed any contract language to BellSouth.

carriers, the loss could be substantial. Other ALECs have agreed to this level of coverage.

SUPRA: $10,000,000 is too much coverage to expect ALECs to carry.

Issue 4: (GTC 24, § 15.1). Should this Interconnection Agreement be filed with the Florida Public Service Commission for approval prior to the ALEC's receiving ALEC certification from the Florida Public Service Commission?

BELLSOUTH: No. The Florida Public Service Commission has agreed with BellSouth that "BellSouth's caution in deciding to hold filings for non-certificated entities until they obtain certification is appropriate." (Letter dated April 25, 2000, from Walter O'Haeseleer, Director, Division of Telecommunications, to Nancy Sims of BellSouth) Language requiring certification prior to filing of the Agreement is appropriate given that any ALEC, whether or not certified, may adopt this Agreement.

SUPRA: Supra does not want to be required to be certificated as an ALEC for the Interconnection Agreement to be enforceable except to the extent Supra seeks to provide services for payment. BellSouth is unsure why Supra holds this position as Supra is a certified ALEC in Florida.

Issue 5: (Attachment 1, § 3.15). Should BellSouth be required to provide to Supra a download of all BellSouth's Customer Service Records ("CSRs")?

BELLSOUTH: No. BellSouth provides access to CSR information via its electronic interfaces, provided that the ALEC has submitted a blanket letter of authorization stating that it will view only those CSRs for which the customer has consented to allow the ALEC access. Providing Supra with a download of all CSRs, without authorization from each and every customer, would constitute a violation of Section 222 of the Act.

SUPRA: Yes. Supra believes that such a download is not a violation of the Customer Proprietary Network Information requirements of the Act, and claims that a download of all CSRs is necessary to allow Supra to place orders in a timely manner.

000007

Issue 6: (Att. 1, § 3.15). Should BellSouth be required to provide to Supra a download of BellSouth's Regional Street Address Guide ("RSAG") Database?

BELLSOUTH: No. BellSouth provides access to RSAG data via its electronic interfaces. Hundreds of ALECs successfully utilize BellSouth's existing process to access RSAG. Thus, BellSouth is meeting its obligations under the Act. Notwithstanding the foregoing, BellSouth is willing to negotiate a license agreement outside of this Interconnection Agreement containing rates, terms and conditions for such a download.

SUPRA: Yes. Supra believes a download of RSAG is necessary to allow Supra to populate its orders in a timely manner.

Issue 7: (Att. 1, § 3.21 & Att. 5, § 2.5). Should Supra be required to pay the end user line charge associated with implementation of local number portability as authorized by the Federal Communications Commission.

BELLSOUTH: Yes. This charge is necessary where BellSouth provides switching (as an unbundled network element, in the UNE platform combination or in connection with resold service) to recover the costs of implementing local number portability. Recovery of such charges is expressly permitted under 47 C.F.R. § 52.33.

SUPRA: No. Supra disagrees that the Federal Communications Commission has authorized any such charges for recovery of costs for local number portability implementation.

Issue 8: (Att. 1, § 3.25). Should Supra, as a reseller of BellSouth's services, be required to pay to BellSouth, pursuant to 47 C.F.R. § 51.617, end user common line charges identical to those BellSouth assesses its retail end users?

BELLSOUTH: Yes. 47 C.R.F. § 51.617(a) clearly states that ILECs shall assess the end user common line charge upon resellers.

SUPRA: No. Supra does not believe the end user common line charge should be assessed against resellers.

Issue 9: (Att. 1, § 2.1). What should be the definition of "ALEC"?

BELLSOUTH: Consistent with § 364.02, Florida Statutes, "ALEC" should be defined as a telephone company certified by the Public Service Commission to provide local exchange services in the state of Florida after July 1, 1995.

SUPRA: Supra does not want the definition of "ALEC" to include Commission certification. Supra wants to be able to operate under the Interconnection Agreement without certification.

Issue 10: Should the rate for a loop be reduced when the loop utilizes Digitally Added Main Line (DAML) equipment?

BELLSOUTH: No. BellSouth utilizes DAML equipment on a very limited basis to expand a single loop to derive two digital channels, each of which may be used to provide voice grade service. BellSouth's deployment of DAML is limited to those situations where loop facilities are not currently available for the second voice grade loop. It is a temporary solution for provision of service pending installation of facilities. The use of DAML equipment is a means to meet in a timely manner a request for service. It is not a more economic means of meeting demand on a broad basis than using individual loop pairs. For example, for loops served via Digital Loop Carrier (DLC) equipment, DAML equipment must be placed both at the DLC Remote Terminal and the customer's premises. Further, from the DLC Remote Terminal to the BellSouth central office, two channels at DS-0 (one for each of the loops derived via DAML equipment) must still be provisioned. Supra believes that loops utilizing DAML equipment should be offered at a lower cost than other loops. However, costs for unbundled loops have been calculated in compliance with Federal Communications Commission rules on a forward-looking basis without regard to the manner in which the customer is served (e.g., copper or digital loop carrier).

SUPRA: Supra believes that if a single loop is modified through DAML equipment to serve two customer locations, and Supra only serves one of those locations, Supra should only pay a portion of the loop cost.

Issue 11: Should the Interconnection Agreement state that the parties may withhold payment of undisputed charges to the extent that these charges are equal to or less than disputed charges?

BELLSOUTH: No. The Interconnection Agreement contains in Attachment 6 provisions to handle billing disputes between the parties. Allowing one party to withhold payment of appropriately billed charges when other charges, whether appropriately or inappropriately billed, are in dispute, would allow parties to "game" the billing system to avoid paying bills.

SUPRA: Yes. Supra believes that it is appropriate for the Interconnection Agreement allow this withholding of payments.

Issue 12: Should BellSouth be required to provide transport to Supra across LATA boundaries?

BELLSOUTH: No. BellSouth is prohibited by law from providing services across LATA boundaries. In addition, BellSouth's obligations under Section 251 and 252 of the Act relate to local interconnection and provision of services to allow ALECs to compete in the local exchange market. Supra's request is clearly beyond the scope of the Act.

SUPRA: Yes. BellSouth's restrictions against providing services across LATA boundaries should not prevent Supra from providing such services utilizing BellSouth's facilities.

Issue 13: (Att. 3, § 5.3.1.1). What should be the appropriate definition of "local traffic" for purposes of the parties' reciprocal compensation obligations under Section 251(b)(5) of the 1996 Act?

BELLSOUTH: "Local traffic" should be defined to apply only to traffic that originates and terminates within a local area. The definition should expressly exclude traffic to Internet Service Providers, which is interstate traffic.

SUPRA: The definition of "local traffic" should include interstate traffic, including calls to Internet Service Providers.

000010

Issue 14: Should BellSouth pay reciprocal compensation to Supra where Supra is utilizing BellSouth's unbundled switching for the termination of local traffic to Supra's end users?

BELLSOUTH: No. The purpose of reciprocal compensation is to recover the costs incurred by the terminating carrier for utilizing its network. Since BellSouth does not charge Supra the end office switching rates when a BellSouth customer places a local call to a Supra customer, and Supra does not have its own network, Supra incurs no cost in terminating the call. Thus, reciprocal compensation is not appropriate.

SUPRA: Yes. Reciprocal Compensation should be paid to Supra regardless of whether it incurs any costs in terminating Local Traffic.

Issue 15: (Att. 9). What Performance Measurements should be included in Attachment 9 of the Interconnection Agreement?

BELLSOUTH: The Service Performance Measurements and Enforcement Mechanisms proposed by BellSouth should be adopted. BellSouth has provided extensive service quality measurements pursuant to which Supra can confirm parity between BellSouth and other ALECs. BellSouth's proposal includes voluntary enforcement mechanisms, which would become effective after BellSouth receives 271 authority.

SUPRA: Supra has not provided a proposal for performance measurements. However, Supra has stated that it wants specific intervals for certain services rather than intervals at parity. Supra has not identified the desired intervals and the services to which such intervals should apply.

11. Although, as set forth above, BellSouth initiated negotiations on March 29, 2000, Supra did not respond to BellSouth's requests to negotiate for an extended period of time. When the parties did meet, the short time frame remaining before the deadline for filing this Petition was such that the parties' meetings were limited. Further, in these meetings, Supra committed to

provide both a list of issues and its proposed contractual language. As of this date, Supra has not provided this information. Thus, BellSouth's ability to frame the totality of the pertinent issues is limited. Nevertheless, BellSouth has attempted herein to raise the issues to the best of its understanding.

WHEREFORE, BellSouth respectfully requests that the Commission arbitrate the issues set forth in this Petition and enter an Order directing that BellSouth's position on each of the issues raised herein be incorporated into the Interconnection Agreement between Supra and BellSouth.

Respectfully submitted this 1st day of September, 2000.

AGREEMENT

PREFACE

This Agreement, which shall become effective as of the _____ day of _____, _____, is entered into by and between Supra Telecommunications and Information Systems, Inc., ("Supra Telecom") a Florida corporation, having an office at 2620 S.W. 27th Avenue, Miami, Florida 33133, its successors and assigns and BellSouth Telecommunications, Inc. ("BellSouth"), a Georgia corporation, having an office at 675 West Peachtree Street, Atlanta, Georgia 30375, its successors and assigns.

RECITALS

WHEREAS, The Telecommunications Act of 1996 (the "Act") was signed into law on February 8, 1996; and

WHEREAS, the Act places certain duties and obligations upon, and grants certain rights to Telecommunications Carriers; and

WHEREAS, BellSouth is an Incumbent Local Exchange Carrier; and

WHEREAS, Supra Telecom is a Telecommunications Carrier and has requested that BellSouth negotiate an Agreement pursuant to the Act,

NOW, THEREFORE, in consideration of the promises and the mutual covenants of this Agreement, Supra Telecom and BellSouth hereby agree as follows:

DEFINITIONS and ACRONYMS

For purposes of this Agreement, certain terms have been defined in the body of the Agreement to encompass meanings that may differ from, or be in addition to, the normal connotation of the defined word. Unless the context clearly indicates otherwise, any term defined or used in the singular shall include the plural. The words "shall" and "will" are used interchangeably throughout this Agreement and the use of either connotes a mandatory requirement. The use of one or the other shall not mean a different degree of right or obligation for either Party. A defined word intended to convey its special meaning is capitalized when used. Other terms that are capitalized, and not defined in this Agreement, shall have the meaning in the Act. For convenience of reference, Attachment 11 provides a list of acronyms used throughout this Agreement.

000016

GENERAL TERMS AND CONDITIONS

1. **Provision of Local Service and Unbundled Network Elements**

1.1 This Agreement sets forth the terms, conditions and prices under which BellSouth agrees to provide: (a) telecommunications services that BellSouth currently provides, or may offer hereafter for resale; (b) interconnection of BellSouth's network to Supra Telecom's network including but not limited to reciprocal compensation, if applicable; (c) certain unbundled Network Elements ("Network Elements") and certain combinations of such unbundled Network Elements ("Combinations"); (d) access to poles, rights of way and conduits; and (e) collocation (resale, interconnection, Network Elements and Combinations, access to rights of way, poles and conduits, and collocation shall collectively be referred to as "Services and Elements"). BellSouth may fulfill the requirements imposed upon it by this Agreement by itself or, in the case of directory listings for white pages may cause BellSouth Advertising and Publishing Company ("BAPCO") to take such actions to fulfill BellSouth's responsibilities. This Agreement includes Attachments 1 – 14 and all accompanying Appendices and Exhibits. Unless otherwise provided in this Agreement, BellSouth will perform all of its obligations hereunder throughout its entire service area.

1.2 Subject to the requirements of this Agreement, Supra Telecom may, at any time add, relocate or modify any Services and Elements purchased hereunder. Requests for additions or other changes shall be handled pursuant to the process provided in Attachment 10. Terminations of any Services or Elements shall be handled pursuant to Section 3 of the General Terms and Conditions of this Agreement.

1.3 BellSouth shall not discontinue Services and Elements provided hereunder without the prior written consent of Supra Telecom. Such consent shall not be unreasonably withheld; provided, however, BellSouth may discontinue any telecommunications service available for resale as long as BellSouth provides Supra Telecom prior written notice of intent to discontinue any such service. BellSouth further agrees to make any such service available to Supra Telecom for resale to Supra Telecom's end users who are subscribers of such services from Supra Telecom until the date BellSouth discontinues any such service for BellSouth's customers. BellSouth also agrees to adopt a reasonable, nondiscriminatory transition schedule for BellSouth or Supra Telecom end users who may be purchasing any such service.

000017

1.4 This Agreement may be amended from time to time as mutually agreed in writing between the Parties. The Parties agree that neither Party will take any action to proceed, nor shall either have any obligation to proceed on a requested change unless and until a modification to this Agreement is signed by authorized representatives of each Party.

2. **Term of Agreement**

2.1 When executed by authorized representatives of BellSouth and Supra Telecom, this Agreement shall become effective as of the Effective Date stated above, and shall expire three (3) years from the Effective Date unless terminated in accordance with the provisions of Section 3.2 of the General Terms and Conditions.

2.2 The Parties agree that by no later than one hundred and eighty (180) days prior to the expiration of this Agreement, the Parties agree to commence negotiations for a subsequent agreement ("Subsequent Agreement") with regard to the terms, conditions and obligations contained in this Agreement.

2.3 If, between one hundred and thirty-five (135) days and one hundred sixty (160) days (pursuant to 47 USC 252 of the Act) of commencing the negotiation referred to in Section 2.2, above, the Parties are unable to satisfactorily negotiate the Subsequent Agreement, either Party may petition the Commission to establish appropriate terms and conditions for those unresolved issues pursuant to 47 U.S.C. 252. If the Commission fails to issue an order setting new terms and conditions prior to the expiration of this Agreement, the terms of this agreement shall continue in effect, on a month-to-month basis, at the same terms, conditions and prices as those in effect at the end of the then-current term, until resolved by the Commission. Upon a final decision by the Commission as to the terms of the Subsequent Agreement, the Parties shall execute a Subsequent Agreement in accordance with the Commission's order, notwithstanding any appeals rights of either Party, and the Parties shall abide by such order and the Subsequent Agreement pending any appeal thereof.

2.4 The Parties must have commenced good faith negotiations within the time period set forth in Sections 2.2 and 2.3 of the Terms and Conditions of this Agreement in order for the Agreement to continue on a month-to-month basis. If such good faith negotiations have not commenced, unless the Parties agree otherwise, the Parties agree to submit the issue of having this Agreement continued on a month-to-month basis to the appropriate Commission. If such a request is made

000018

to the Commission, this Agreement will remain in effect on a month-to-month basis until the Commission has ruled.

3. **Termination of Agreement; Transitional Support**

3.1 Supra Telecom may terminate any Services and Elements provided under this Agreement upon thirty (30) days written notice to BellSouth unless a different notice period or different conditions are specified for termination of such Services and Elements in this Agreement or pursuant to any applicable tariff, in which event such specific period or conditions shall apply, provided such period or condition is reasonable, nondiscriminatory and narrowly tailored. Where there is no such different notice period or different condition specified, Supra Telecom's liability shall be limited to payment of the amounts due for any terminated Services and Elements provided up to and including the date of termination. Notwithstanding the foregoing, the provisions of Section 10, infra, shall still apply. Upon termination, BellSouth agrees to cooperate in an orderly and efficient transition to Supra Telecom or another vendor such that the level and quality of the Services and Elements is not degraded and to exercise its best efforts to effect an orderly and efficient transition. Supra Telecom agrees that it may not terminate the entire Agreement pursuant to this section.

3.2 If a Party is in breach of a material term or condition of this Agreement ("Defaulting Party"), the other Party shall provide written notice of such breach to the Defaulting Party. The Defaulting Party shall have ten (10) business days from receipt of notice to cure the breach. If the breach is not cured, the Parties shall follow the dispute resolution procedure set forth in Section 16 of the General Terms and Conditions of this Agreement

4. **Good Faith Performance**

4.1 In the performance of their obligations under this Agreement, the Parties shall act in good faith and consistently with the intent of the Act. Where notice, approval or similar action by a Party is permitted or required by any provision of this Agreement, (including, without limitation, the obligation of the Parties to further negotiate the resolution of new or open issues under this Agreement) such action shall not be unreasonably delayed, withheld or conditioned.

5. **Option to Obtain Services and Elements and Combinations Under Other Agreements**

5.1 BellSouth shall make available and Supra Telecom may elect to adopt pursuant to 47 U.S.C. § 252 and the FCC rules and regulations

regarding such availability any interconnection, service, or network element provided under an agreement approved pursuant to 47 U.S.C. § 252. The adopted interconnection, service, or network element shall apply to the same states as such other agreement and for the identical term of such other agreement. Supra Telecom may exercise this option by delivering written notice to BellSouth, which may include a proposed amendment to this Agreement to incorporate the prices, terms and conditions, in whole or in part found in the other agreement. The Parties shall amend this Agreement pursuant to this Section within thirty (30) days after the date of such request; provided, however that in the event of a dispute between the Parties regarding the requested adoption, the Parties shall follow the Dispute Resolution Process set forth in this Agreement and the terms of such amendment as ultimately determined through such Dispute Resolution Process shall be deemed effective thirty (30) days following the date of such request.

5.2 Any dispute between the Parties concerning any election or exercise of an option by Supra Telecom under this Section 5 shall be resolved pursuant to the dispute resolution procedure set forth in Section 16 of the General Terms and Conditions of this Agreement.

6. **Responsibility of Each Party**

6.1 Each Party is an independent contractor, and has and hereby retains the right to exercise full control of and supervision over its own performance of its obligations under this Agreement and retains full control over the employment, direction, compensation and discharge of all employees assisting in the performance of such obligations. Each Party will be solely responsible for all matters relating to payment of such employees, including compliance with social security taxes, withholding taxes and all other regulations governing such matters. Each Party will be solely responsible for proper handling, storage, transport and disposal at its own expense of all (i) substances or materials that it or its contractors or agents bring to, create or assume control over at Work Locations or, (ii) Waste resulting therefrom or otherwise generated in connection with its or its contractors' or agents' activities at the Work Locations. Subject to the limitations on liability and except as otherwise provided in this Agreement, each Party shall be responsible for (i) its own acts and performance of all obligations imposed by Applicable Law in connection with its activities, legal status and property, real or personal and, (ii) the acts of its own affiliates, employees, agents and contractors during the performance of that Party's obligations hereunder.

7. **Governmental Compliance**

7.1 Supra Telecom and BellSouth each shall comply at its own expense with all Applicable Law that relates to (i) its obligations under or activities in connection with this Agreement or (ii) its activities undertaken at, in connection with or relating to Work Locations. Supra Telecom and BellSouth each agree to indemnify, defend (at the other Party's request) and save harmless the other, each of its officers, directors and employees from and against any losses, damages, claims, demands, suits, liabilities, fines, penalties and expenses (including reasonable attorneys' fees) that arise out of or result from (i) its failure or the failure of its contractors or agents to so comply or (ii) any activity, duty or status of it or its contractors or agents that triggers any legal obligation to investigate or remediate environmental contamination. BellSouth, at its own expense, will be solely responsible for obtaining from governmental authorities, building owners, other carriers, and any other persons or entities, all rights and privileges (including, but not limited to, space and power), which are necessary for BellSouth to provide the Services and Elements pursuant to this Agreement. Supra Telecom, at its own expense, will be solely responsible for obtaining from governmental authorities, building owners, other carriers, and any other persons or entities, all rights and privileges which are Supra Telecom's obligation as a provider of telecommunications services to its end users pursuant to this Agreement.

8. **Responsibility For Environmental Contamination**

8.1 Supra Telecom shall in no event be liable to BellSouth for any costs whatsoever resulting from the presence or Release of any Environmental Hazard or Hazardous Materials that Supra Telecom did not introduce to the affected Work Location so long as Supra Telecom's actions do not cause or substantially contribute to the release of any Environmental Hazard or Hazardous Materials. BellSouth shall indemnify, defend (at Supra Telecom's request) and hold harmless Supra Telecom, each of its officers, directors and employees from and against any losses, damages, claims, demands, suits, liabilities, fines, penalties and expenses (including reasonable attorneys' fees) that arise out of or result from (i) any Environmental Hazard or Hazardous Materials that BellSouth, its contractors or agents introduce to the Work Locations or (ii) the presence or Release of any Environmental Hazard or Hazardous Materials for which BellSouth is responsible under Applicable Law, to the extent the release of any Environmental Hazard or Hazardous Materials is not caused or substantially contributed to by Supra Telecom's actions.

8.2 BellSouth shall in no event be liable to Supra Telecom for any costs whatsoever resulting from the presence or Release of any Environmental Hazard or Hazardous Materials that BellSouth did not introduce to the affected Work Location, so long as BellSouth's actions do not cause or substantially contribute to the release of any Environmental Hazards or Hazardous Materials. Supra Telecom shall indemnify, defend (at BellSouth's request) and hold harmless BellSouth, each of its officers, directors and employees from and against any losses, damages, claims, demands, suits, liabilities, fines, penalties and expenses (including reasonable attorneys' fees) that arise out of or result from (i) any Environmental Hazard or Hazardous Materials that Supra Telecom, its contractors or agents introduce to the Work Locations or (ii) the presence or Release of any Environmental Hazard or Hazardous Materials for which Supra Telecom is responsible under Applicable Law, to the extent the release of any Environmental Hazard or Hazardous Materials is not caused or substantially contributed to by BellSouth's actions.

8.3 For purposes of this Section 8, the following terms shall have the following meaning:

8.3.1 Environmental Hazard" means (1) a release, discharge, leak, spill or disposal (collectively referred to hereafter as "release") of HAZARDOUS MATERIALS has occurred on premises or property that is related to the performance of this Agreement and that such affected material or media is demonstrated through applicable or appropriate testing method to require remediation or removal as determined by all laws, ordinances, statutes, codes, rules, regulations, orders and decrees of the United States, the state, county, city or any other political subdivision in which the release has occurred, and any other political subdivision, agency or instrumentality exercising jurisdiction over the release, including any applicable federal and state case law and common law interpreting any of the foregoing; or (2) any event involving, or exposure to, HAZARDOUS MATERIALS which poses risks to human health, safety or the environment (including, without limitation, indoor or outdoor environment(s) and is regulated under any applicable laws or regulations as described in (1);

8.3.2 "Hazardous Materials" means any hazardous or toxic substance, material or waste listed in the United States Department of Transportation HAZARDOUS MATERIALS Table at 49 CFR 172.101; any hazardous substance listed by the Environmental Protection Agency ("EPA") under the Comprehensive Environmental, Response, Compensation, and Liability Act ("CERCLA"), 42 U.S.C. §§ 9601, et seq., as amended, and found at 40 CFR Part 302; any hazardous

waste listed under the Resource Conservation and Recovery Act ("RCRA"), 42 U.S.C. §§ 6901, et seq., as amended, and found at 40 CFR Part 261; any toxic substance regulated by the Toxic Substances Control Act, 15 U.S.C. §§ 2601, et seq., as amended; any insecticide, fungicide, or rodenticide regulated by the Federal Insecticide, Fungicide, and Rodenticide Act, 7 U.S.C. §§ 136, et seq.; and the following specified substances or materials, that may or may not be regulated by the above: (1) asbestos or asbestos-containing materials; (2) petroleum or petroleum-based or derived products or by-products; (3) polychlorinated biphenyls ("PCBs"); and (4) radon.

8.3.3 "Release" means any release, spill, emission, leaking, pumping, injection, deposit, disposal, discharge, dispersal, leaching, or migration, including without limitation, the movement of Environmental Hazards through or in the air, soil, surface water or groundwater, or any action or omission that causes Environmental Hazards to spread or become more toxic or more expensive to investigate or remediate.

8.3.4 "Waste" means all hazardous and non-hazardous substances and materials which are intended to be discarded, scrapped, or recycled, associated with activities Supra Telecom or BellSouth or their respective contractors or agents perform at Work Locations. It shall be presumed that all substances or materials associated with such activities, that are not in use or incorporated into structures (including without limitation damaged components or tools, leftovers, containers, garbage, scrap, residues or byproducts), except for substances and materials that Supra Telecom, BellSouth or their respective contractors or agents intend to use in their original form in connection with similar activities, are Waste. "Waste" shall not include substances, materials or components incorporated into structures (such as cable routes) even after such components or structure are no longer in current use.

9. **Regulatory Matters**

9.1 BellSouth shall be responsible for obtaining and keeping in effect all Federal Communications Commission, State Commissions, franchise authority and other regulatory approvals that may be required in connection with the performance of its obligations under this Agreement. Supra Telecom shall be responsible for obtaining and keeping in effect all Federal Communications Commission, State Commission, franchise authority and other regulatory approvals that may be required in connection with its offering of services to Supra Telecom end users contemplated by this Agreement. Supra Telecom shall reasonably cooperate with BellSouth in obtaining and maintaining any required approvals for which BellSouth is responsible, and

BellSouth shall reasonably cooperate with Supra Telecom in obtaining and maintaining any required approvals for which Supra Telecom is responsible.

9.2 In the event that BellSouth is required by any governmental authority to file a tariff or make another similar filing ("Filing") in order to implement this Agreement, BellSouth shall (i) consult with Supra Telecom reasonably in advance of such Filing about the form and substance of such Filing, (ii) provide to Supra Telecom its proposed tariff and obtain Supra Telecom's agreement on the form and substance of such Filing, and (iii) take all steps reasonably necessary to ensure that such Filing imposes obligations upon BellSouth that are no less favorable than those provided in this Agreement and preserves for Supra Telecom the full benefit of the rights otherwise provided in this Agreement. In no event shall BellSouth file any tariff to implement this Agreement that purports to govern Services and Elements that is inconsistent with the rates and other terms and conditions set forth in this Agreement unless such rate or other terms and conditions are more favorable than those set forth in this Agreement.

9.3 In the event that any final legislative, regulatory, judicial or other legal action materially affects any material terms of this Agreement, or the ability of Supra Telecom or BellSouth to perform any material terms of this Agreement, Supra Telecom or BellSouth may, on ninety (90) days' written notice (delivered not later than ninety (90) days following the date on which such action has become legally binding and has otherwise become final without regard to, the Parties rights to appeal) require that such terms be renegotiated, and the Parties shall renegotiate in good faith such mutually acceptable new terms as may be required. In the event that such new terms are not renegotiated within ninety (90) days after such notice, the dispute shall follow the dispute resolution procedures set forth in Section 16 of the General Terms and Conditions of this Agreement. To the extent such order involves new or modified rates, the amendment implementing such order shall be deemed effective as to such rates in accordance with the Commission ruling, or in the absence of an ordered effective date, as of the effective date of the order.

10. Liability and Indemnity

10.1 Liabilities of BellSouth - Unless expressly stated otherwise in this Agreement, the financial liability of BellSouth to Supra Telecom during any Contract Year resulting from any and all causes of action arising under this Agreement, other than those arising from BellSouth's gross negligence or willful misconduct, shall not exceed the amount due and

000024

owing by Supra Telecom to BellSouth during the Contract Year in which such cause arises or accrues.

10.2 Liabilities of Supra Telecom - Unless expressly stated otherwise in this Agreement, the financial liability of Supra Telecom to BellSouth during any Contract Year resulting from any and all causes of action arising under this Agreement, other than those arising from BellSouth's gross negligence or willful misconduct, shall not exceed the amount due and owing by Supra Telecom to BellSouth during the Contract Year in which such cause arises or accrues.

10.3 Each party shall, to the greatest extent permitted by Applicable Law, include in its local switched service tariff (if it files one in a particular State) or in any State where it does not file a local service tariff, in an appropriate contract with its end users that relates to the Services and Elements provided under this Agreement, a limitation of liability (i) that covers the other Party to the same extent the first Party covers itself with respect to liability to end users and (ii) that limits the amount of damages a customer may recover to the amount charged the applicable customer for the service that gave rise to such loss.

10.4 No Consequential Damages - NEITHER SUPRA TELECOM NOR BELLSOUTH SHALL BE LIABLE TO THE OTHER PARTY FOR ANY INDIRECT, INCIDENTAL, CONSEQUENTIAL, RELIANCE, OR SPECIAL DAMAGES SUFFERED BY SUCH OTHER PARTY (INCLUDING WITHOUT LIMITATION DAMAGES FOR HARM TO BUSINESS, LOST REVENUES, LOST SAVINGS, OR LOST PROFITS SUFFERED BY SUCH OTHER PARTIES), REGARDLESS OF THE FORM OF ACTION, WHETHER IN CONTRACT, WARRANTY, STRICT LIABILITY, OR TORT, INCLUDING WITHOUT LIMITATION NEGLIGENCE OF ANY KIND WHETHER ACTIVE OR PASSIVE, AND REGARDLESS OF WHETHER THE PARTIES KNEW OF THE POSSIBILITY THAT SUCH DAMAGES COULD RESULT. EACH PARTY HEREBY RELEASES THE OTHER PARTY AND SUCH OTHER PARTY'S SUBSIDIARIES AND AFFILIATES, AND THEIR RESPECTIVE OFFICERS, DIRECTORS, EMPLOYEES AND AGENTS FROM ANY SUCH CLAIM ARISING ANY TIME DURING WHICH THE PARTIES ARE OPERATING UNDER THIS AGREEMENT. NOTHING CONTAINED IN THIS SECTION 10 SHALL LIMIT BELLSOUTH'S OR SUPRA TELECOM'S LIABILITY TO THE OTHER FOR (i) WILLFUL OR INTENTIONAL MISCONDUCT (INCLUDING GROSS NEGLIGENCE); (ii) BODILY INJURY, DEATH OR DAMAGE TO TANGIBLE REAL OR TANGIBLE PERSONAL PROPERTY PROXIMATELY CAUSED BY BELLSOUTH'S OR SUPRA TELECOM'S NEGLIGENT ACT OR OMISSION OR THAT OF THEIR RESPECTIVE AGENTS, SUBCONTRACTORS OR

EMPLOYEES, NOR SHALL ANYTHING CONTAINED IN THIS SECTION 10 LIMIT THE PARTIES' INDEMNIFICATION OBLIGATIONS AS SPECIFIED HEREIN.

10.5 Obligation to Indemnify – Except as provided in Section 11 (Intellectual Property Rights and Indemnification), each Party shall, and hereby agrees to, defend at the other's request, indemnify and hold harmless the other Party and each of its officers, directors, employees and agents (each, an "Indemnitee") against and in respect of any loss, debt, liability, damage, obligation, claim, demand, judgment or settlement of any nature or kind, known or unknown, liquidated or unliquidated, including without limitation all reasonable costs and expenses incurred (legal, accounting or otherwise) (collectively, "Damages") arising out of, resulting from or based upon any pending or threatened claim, action, proceeding or suit by any third Party (a "Claim") (i) alleging any breach of any representation, warranty or covenant made by such indemnifying Party (the "Indemnifying Party") in this Agreement, or (ii) based upon injuries or damage to any person or property or the environment arising out of or in connection with this Agreement that are the result of the Indemnifying Party's actions, breach of Applicable Law, or status of its employees, agents and subcontractors.

10.6 Obligation to Defend; Notice; Cooperation - Whenever a Claim shall arise for indemnification under this Section 10, the relevant Indemnitee, as appropriate, shall promptly notify the Indemnifying Party and request the Indemnifying Party to defend the same. Failure to so notify the Indemnifying Party shall not relieve the Indemnifying Party of any liability that the Indemnifying Party might have, except to the extent that such failure prejudices the Indemnifying Party's ability to defend such Claim. The Indemnifying Party shall have the right to defend against such liability or assertion in which event the Indemnifying Party shall give written notice to the Indemnitee of acceptance of the defense of such Claim and the identity of counsel selected by the Indemnifying Party. Except as set forth below, such notice to the relevant Indemnitee shall give the Indemnifying Party full authority to defend, adjust, compromise or settle such Claim with respect to which such notice shall have been given, except to the extent that any compromise or settlement shall prejudice the Intellectual Property Rights of the relevant Indemnitees. The Indemnifying Party shall consult with the relevant Indemnitee prior to any compromise or settlement that would affect the Intellectual Property Rights or other rights of any Indemnitee, and the relevant Indemnitee shall have the right to refuse such compromise or settlement and, at the refusing Party's or refusing Parties' cost, to take

000026

over such defense, provided that in such event the Indemnifying Party shall not be responsible for, nor shall it be obligated to indemnify the relevant Indemnitee against, any cost or liability in excess of such refused compromise or settlement. With respect to any defense accepted by the Indemnifying Party, the relevant Indemnitee shall be entitled to participate with the Indemnifying Party in such defense if the Claim requests equitable relief or other relief that could affect the rights of the Indemnitee and also shall be entitled to employ separate counsel for such defense at such Indemnitee's expense. In the event the Indemnifying Party does not accept the defense of any indemnified Claim as provided above, the relevant Indemnitee shall have the right to employ counsel for such defense at the expense of the Indemnifying Party. Each Party agrees to cooperate and to cause its employees and agents to cooperate with the other Party in the defense of any such Claim and the relevant records of each Party shall be available to the other Party with respect to any such defense.

11. **Intellectual Property Rights and Indemnification**

11.1 Use of Mark. Both Parties are strictly prohibited from any use, including but not limited to in sales and in marketing or advertising of telecommunications services, of any name, trade name, service mark or trademark (collectively, the "Marks") of the other Party. Notwithstanding the foregoing, the Party receiving a service under this Agreement may, as necessary and as the case may be, make oral and factual references to the trade name "BellSouth" or "Supra" in response to a direct individual inquiry from a particular customer or potential customer regarding the source of the underlying service or the identity of a service technician. In addition, either Party may reference the trade name "BellSouth" or "Supra" in comparative advertising so long as the reference is truthful and factual, does not infringe any intellectual property rights of the other Party and otherwise complies with all applicable laws. Further, Supra Telecom's advertising shall not reference BellSouth or BellSouth's network as the source of service provided by Supra Telecom. Marks of each Party shall include those Marks owned directly by either Party or those Marks which either Party has obtained a legal license to use.

11.2 Ownership of Intellectual Property. Any intellectual property which originates from or is developed by a Party shall remain in the exclusive ownership of that Party. Except for limited licenses, to the extent necessary for the Parties to use any facilities or equipment (including software) or to receive any services solely as provided under this Agreement, or as required by applicable law, no patent, copyright,

trademark, trade name or other proprietary right is licensed, granted or otherwise transferred by this Agreement.

11.3 BellSouth and Supra Telecom (if and to the extent BellSouth uses Supra Telecom facilities or equipment, including software) warrants that each other may use any facilities or equipment, including software, provided hereunder that contains intellectual property owned or controlled by third parties without being subject to any claims of infringement by such third parties. Each Party further warrants that it will not enter into any licensing agreements with respect to any facilities or equipment, including software, that contain provisions that would disqualify the other Party from using or interconnecting with such facilities or equipment, including software, pursuant to the terms of this Agreement. Each Party further warrants that it has not and will not intentionally modify any existing license agreements for any network facilities or equipment, including software, in whole or in part for the purpose of disqualifying the other Party from using or interconnecting with such facilities or equipment, including software, pursuant to the terms of this Agreement. To the extent that providers of facilities or equipment, including software, in either Party's network provide indemnities covering intellectual property liabilities and those indemnities allow a flow-through of protection to third parties, the indemnified party shall flow those indemnity protections through to the other Party. Finally each Party shall indemnify the other pursuant to the terms of this Agreement, with respect to the other Party's use of intellectual property associated with any new network facilities or equipment, including software, acquisitions.

11.4 BellSouth Indemnification. BellSouth will defend Supra Telecom against claims of infringement arising solely from the use by Supra Telecom of Services and Elements and will indemnify Supra Telecom for any damages awarded based solely on such claims in accordance with this Section 11.

11.4.1 For purposes of Section 11.4 of this Agreement, BellSouth's obligation to indemnify Supra Telecom shall include the obligation to indemnify and hold Supra Telecom harmless from and against any loss, cost, expense or liability arising out of a claim that Supra Telecom's use, pursuant to the terms of this Agreement, of BellSouth's facilities, equipment or software infringes the intellectual property rights of a third party. Should any such facilities, equipment or software, or any portion thereof, provided by BellSouth hereunder become, or, in BellSouth's reasonable opinion, be likely to become the subject of a claim of infringement, or should BellSouth's use thereof be finally enjoined, then BellSouth shall, at its expense, after consultation with

Supra Telecom, (i) procure for Supra Telecom the right to continue using such facilities, equipment or software or portion thereof; or (ii) replace or modify such facilities, equipment or software or portion thereof to make it non-infringing, provided, however, that such replacement or modification shall be functionally equivalent to the facilities, equipment or software or portion thereof that is replaced or modified.

11.5 Supra Telecom Indemnification. Supra Telecom (if and only to the extent Supra Telecom provides BellSouth access to its facilities and equipment, including software) will defend BellSouth against claims of infringement arising solely from the use by BellSouth of Supra Telecom facilities or equipment, including software, and to the extent BellSouth uses Supra Telecom facilities or equipment, including software, and will indemnify BellSouth for any damages awarded based solely on such claims in accordance with this Section 11.

11.5.1 For purposes of Section 11.5 of this Agreement, Supra Telecom's obligation to indemnify BellSouth shall include the obligation to indemnify and hold BellSouth harmless from and against any loss, cost, expense or liability arising out of a claim that BellSouth's use, pursuant to the terms of this Agreement, of Supra Telecom facilities or equipment, including software, infringes the intellectual property rights of a third party. Should any such facilities or equipment, including software, or any portion thereof, provided by Supra Telecom hereunder become, or, in Supra Telecom's reasonable opinion, be likely to become the subject of a claim of infringement, or should Supra Telecom's use thereof be finally enjoined, then Supra Telecom shall, at its expense, after consultation with BellSouth, (i) procure for BellSouth the right to continue using such facilities, equipment or software or portion thereof; or (ii) replace or modify such facilities, equipment or software or portion thereof to make it non-infringing, provided, however, that such replacement or modification shall be functionally equivalent to the facilities, equipment or software or portion thereof that is replaced or modified.

11.6 In the event that the provisions of Section 11.4.1 or Section 11.5.1 of this Agreement are unreasonable for the indemnifying party to perform, then the indemnified party shall have the right, in its sole discretion, to waive its indemnification rights under either Section 11.4 or Section 11.5 of this Agreement or to terminate the portion of the Agreement, upon thirty (30) days written notice, solely with respect to the facilities or equipment, including software, provided through the use of the infringing facilities or equipment, including software.

11.7 The Party providing access to its facilities or equipment, including software, will inform the other Party of any pending or threatened intellectual property claims of which it is aware and will provide to the other Party periodic and timely updates of such notification, as appropriate, so that the other Party receives maximum notice of any intellectual property risks that it may want to address.

11.8 In no event shall either Party be responsible for obtaining any license or right to use agreement associated with any facilities or equipment, including software, by either Party.

11.9 Exception to Obligations. Both Parties' obligations under this Section shall not apply to the extent the infringement is caused by: (i) modification of the facilities or equipment (including software) by the indemnitee; (ii) use by the indemnitee of the facilities or equipment (including software) in combination with equipment or facilities (including software) not provided or authorized by the indemnitor provided the facilities or equipment (including software) would not be infringing if used alone; (iii) conformance to specifications of the indemnitee which would necessarily result in infringement; or (iv) continued use by the indemnitee of the affected facilities or equipment (including software) after being placed on notice to discontinue use as set forth herein.

11.10 Exclusive Remedy. The foregoing shall constitute the sole and exclusive remedies and obligations with respect to a third party claim of intellectual property infringement arising out of the conduct of business under this Agreement.

12. **Audits and Inspections**

12.1 For carrier billing purposes, the Parties have agreed pursuant to Section 12 of Attachment 6, to create a process for pre-bill certification. Until such time as that process is in place, the audit process provided in this Section 12 shall apply.

12.1.1 Subject to BellSouth's reasonable security requirements and except as may be otherwise specifically provided in this Agreement, Supra Telecom may audit BellSouth's books, records and other documents once in each Contract Year for the purpose of evaluating the accuracy of BellSouth's billing and invoicing. Supra Telecom may request to review any documents or records legitimately related to its billing regardless of whether or not Supra Telecom may have received such documentation or records previously. Supra Telecom may employ other persons or firms for this purpose. Such audit shall take place at

a time and place agreed on by the Parties no later than thirty (30) days after notice thereof to BellSouth.

12.1.2 BellSouth shall promptly correct any billing error that is revealed in an audit, including making refund of any overpayment by Supra Telecom in the form of a credit on the invoice for the first full billing cycle after the Parties have agreed upon the accuracy of the audit results. Any Disputes concerning audit results shall be resolved pursuant to the dispute resolution procedures described in Section 16 of the General Terms and Conditions of this Agreement.

12.1.3 BellSouth shall cooperate fully in any such audit, providing reasonable access to any and all appropriate BellSouth employees and books, records and other documents reasonably necessary to assess the accuracy of BellSouth's bills.

12.1.4 Supra Telecom may audit BellSouth's books, records and documents more than once during any Contract Year if the previous audit found previously uncorrected net variances or errors in invoices in BellSouth's favor with an aggregate value of at least two percent (2%) of the amounts payable by Supra Telecom for Services and Elements or Combinations provided during the period covered by the audit.

12.1.5 Audits shall be at Supra Telecom's expense, subject to reimbursement by BellSouth in the event that an audit finds an adjustment in the charges or in any invoice paid or payable by Supra Telecom hereunder by an amount that is, on an annualized basis, greater than two percent (2%) of the aggregate charges for the Services and Elements during the period covered by the audit.

12.1.6 Upon (i) the discovery by BellSouth of overcharges not previously reimbursed to Supra Telecom or (ii) the resolution of disputed audits, BellSouth shall promptly reimburse Supra Telecom the amount of any overpayment times the highest interest rate (in decimal value) which may be levied by law for commercial transactions, compounded daily for the number of days from the date of overpayment to and including the date that payment is actually made. In no event, however, shall interest be assessed on any previously assessed or accrued late payment charges.

12.2 Subject to reasonable security requirements, either Party may audit the books, records and other documents of the other for the purpose of evaluating usage pertaining to transport and termination of local traffic. Where such usage data is being transmitted through CABS, the audit shall be conducted in accordance with CABS or other applicable requirements approved by the appropriate State

Commission. If data is not being transferred via CABS, either Party may request an audit for such purpose once each Contract Year. Either Party may employ other persons or firms for this purpose. Any such audit shall take place no later than thirty (30) days after notice thereof to the other Party.

12.2.1 Either Party shall promptly correct any reported usage error that is revealed in an audit, including making payment of any underpayment after the Parties have agreed upon the accuracy of the audit results. Any Disputes concerning audit results shall be resolved pursuant to the dispute resolution procedures described in Section 16 of the General Terms and Conditions of this Agreement.

12.2.2 The Parties shall cooperate fully in any such audit, providing reasonable access to any and all appropriate employees and books, records and other documents reasonably necessary to assess the usage pertaining to transport and terminating of local traffic.

13. Performance Measurement

Performance Measurements, Enforcement Measurements and any applicable enforcement mechanisms shall be as set forth in Attachment 9, incorporated herein by this reference.

13.1 BellSouth shall provide telecommunications services pursuant to Attachment 1 to Supra Telecom for resale that are equal in quality, subject to the same conditions, and provided within the same provisioning time intervals that BellSouth provides these services to others, including end users.

13.2 BellSouth shall provide, for the facilities and equipment of Supra Telecom, interconnection with BellSouth's network that is at a level of quality that is equal to that which BellSouth provides itself, a subsidiary, an affiliate, or any other third party.

13.3 To the extent technically feasible, the quality of a Network Element, as well as the quality of the access to such Network Element, provided to Supra Telecom by BellSouth shall be at least equal in quality to that which BellSouth provides to itself.

14. Force Majeure

14.1 Neither Party shall be liable for any delay or failure in performance of any part of this Agreement caused by a Force Majeure condition, including acts of the United States of America or any state, territory or political subdivision thereof, acts of God or a public enemy, fires,

floods, disputes, freight embargoes, strikes, labor disputes, earthquakes, volcanic actions, wars, civil disturbances, or other causes beyond the reasonable control of the Party claiming excusable delay or other failure to perform. Force Majeure shall not include acts of any Governmental Authority relating to environmental, health or safety conditions at Work Locations or any other noncompliance with applicable laws, rules and regulations by either Party. If any Force Majeure condition occurs, the Party whose performance fails or is delayed because of such Force Majeure condition shall give prompt notice to the other Party, and upon cessation of such Force Majeure condition, shall give like notice and commence performance hereunder as promptly as reasonably practicable.

14.2 Notwithstanding Section 14.1 of this Agreement, no delay or other failure to perform shall be excused pursuant to this Section 14 by the acts or omission of a Party's subcontractors, material persons, suppliers or other third persons providing products or services to such Party unless: (i) there is a Force Majeure condition that affects the performance of said subcontractors, material persons, suppliers or other third persons, (ii) such acts or omissions do not relate to environmental, health or safety conditions at Work Locations and, (iii) unless such delay or failure and the consequences thereof are beyond the control and without the fault or negligence of the Party claiming excusable delay or other failure to perform. Notwithstanding the foregoing, this Section 14 shall not excuse failure or delays where either Party is required to implement Disaster Recovery plans to avoid such failures and delays in performance.

15. Certain Federal, State and Local Taxes

15.1 Definition. For purposes of this Section 15, the terms "taxes" and "fees" shall include but not be limited to federal, state or local sales, use, excise, gross receipts or other taxes or tax-like fees of whatever nature and however designated (including tariff surcharges and any fees, charges or other payments, contractual or otherwise, for the use of public streets or rights of way, whether designated as franchise fees or otherwise) imposed on, or sought to be imposed, either of the Parties and measured by the charges or payments, for the services furnished hereunder, excluding any taxes levied on income.

15.2 Taxes And Fees Imposed Directly On Either Seller Or Purchaser

15.2.1 Taxes and fees imposed on the providing Party, which are neither permitted nor required to be passed on by the providing Party to its Customer, shall be borne and paid by the providing Party.

15.2.2 Taxes and fees imposed on the purchasing Party, which are not required to be collected and/or remitted by the providing Party, shall be borne and paid by the purchasing Party.

15.3 Taxes And Fees Imposed On Purchaser But Collected And Remitted By Seller

15.3.1 Taxes and fees imposed on the purchasing Party shall be borne by the purchasing Party, even if the obligation to collect and/or remit such taxes or fees is placed on the providing Party.

15.3.2 To the extent permitted by Applicable Law, any such taxes and/or fees shall be shown as separate items on applicable billing documents between the Parties. Notwithstanding the foregoing, the purchasing Party shall remain liable, to the extent permitted by Applicable law, for any such taxes and fees regardless of whether they are actually billed by the providing Party at the time that the respective service is billed.

15.3.3 If the purchasing Party determines that in its opinion any such taxes or fees are not lawfully due, the providing Party shall not bill such taxes or fees to the purchasing Party if the purchasing Party provides written certification, reasonably satisfactory to the providing Party, stating that it is exempt or otherwise not subject to the tax or fee, setting forth the basis therefor, and satisfying any other requirements under Applicable Law. If any authority seeks to collect any such tax or fee that the purchasing Party has determined and certified not to be lawfully due, or any such tax or fee that was not billed by the providing Party, the purchasing Party may contest the same in good faith, at its own expense. In the event that such contest must be pursued in the name of the providing Party, the providing Party shall permit the purchasing Party to pursue and control the contest in the name of providing Party and providing Party shall have the opportunity to participate fully in the preparation of such contest. In any such contest, the purchasing Party shall promptly furnish the providing Party with copies of all filings in any proceeding, protest, or legal challenge, all rulings issued in connection therewith, and all correspondence between the purchasing Party and the taxing authority.

15.3.4 In the event that all or any portion of an amount sought to be collected must be paid in order to contest the imposition of any such tax or fee, or to avoid the existence of a lien on the assets of the providing Party during the pendency or such contest, the purchasing Party shall be responsible for such payment and shall be entitled to the benefit of any refund or recovery.

15.3.5 If it is ultimately determined that any additional amount of such a tax or fee is due to the imposing authority, the purchasing Party shall pay such additional amount, including any interest and penalties thereon.

15.3.6 Notwithstanding any provision to the contrary, the purchasing Party shall protect, indemnify and hold harmless (and defend at the purchasing Party's expense) the providing Party from and against any such tax or fee, interest or penalties thereof, or other charges or payable expenses (including reasonable attorney fees) with respect thereto, which are reasonably and necessarily incurred by the providing Party in connection with any claim for or contest of any such tax or fee.

15.3.7 Each Party shall notify the other Party in writing of any assessment, proposed assessment or other claim for any additional amount of such a tax or fee by a taxing authority; such notice to be provided, if possible, at least ten (10) days prior to the date by which a response, protest or other appeal must be filed, but in no event later than thirty (30) days after receipt of such assessment, proposed assessment or claim.

15.4 Taxes And Fees Imposed On Seller But Passed On To Purchaser

15.4.1 Taxes and fees imposed on the providing Party, which are permitted or required to be passed on by the providing Party to its Customer, shall be borne by the purchasing Party.

15.4.2 To the extent permitted by Applicable Law, any such taxes and/or fees shall be shown as separate items on applicable billing documents between the Parties. Notwithstanding the foregoing, to the extent permitted by Section 15 with respect to the billing of services provided hereunder, the purchasing Party shall remain liable for any such taxes and fees regardless of whether they are actually billed by the providing Party at the time that the respective service is billed.

15.4.3 If the purchasing Party disagrees with the providing Party's determination as to the application or basis for any such tax or fee, the Parties shall consult with respect to the imposition and billing of such tax or fee and with respect to whether to contest the imposition of such tax or fee. Notwithstanding the foregoing, the providing Party shall retain responsibility for determining whether and to what extent any such taxes or fees are applicable. The providing Party shall further retain responsibility for determining whether and how to contest the imposition of such taxes or fees, provided, however, the Parties agree to consult in good faith as to such contest and that any such contest undertaken at the request of the purchasing Party shall be at the

purchasing Party's expense. In the event that such contest must be pursued in the name of the providing Party, providing Party shall permit purchasing Party to pursue the contest in the name of the providing Party and the providing Party shall have the opportunity to participate fully in the preparation of such contest.

15.4.4 If, after consultation in accordance with the preceding Section 15.4.3, the purchasing Party does not agree with the providing Party's final determination as to the application or basis of a particular tax or fee, and if the providing Party, after receipt of a written request by the purchasing Party to contest the imposition of such tax or fee with the imposing authority, fails or refuses to pursue such contest or to allow such contest by the purchasing Party, the purchasing Party may utilize the dispute resolution process outlined in Section 16 of the General Terms and Conditions of this Agreement. Utilization of the dispute resolution process shall not relieve the purchasing party from liability for any tax or fee billed by the providing Party pursuant to this subsection during the pendency of such dispute resolution proceeding. In the event that the purchasing Party prevails in such dispute resolution proceeding, it shall be entitled to a refund in accordance with the final decision therein. Notwithstanding the foregoing, if at any time prior to a final decision in such dispute resolution proceeding the providing Party initiates a contest with the imposing authority with respect to any of the issues involved in such dispute resolution proceeding, the dispute resolution proceeding shall be dismissed as to such common issues and the final decision rendered in the contest with the imposing authority shall control as to such issues.

15.4.5 In the event that all or any portion of an amount sought to be collected must be paid in order to contest the imposition of any such tax or fee with the imposing authority, or to avoid the existence of a lien on the assets of the providing Party during the pendency of such contest, the purchasing Party shall be responsible for such payment and shall be entitled to the benefit of any refund or recovery

15.4.6 If it is ultimately determined that any additional amount of such a tax or fee is due to the imposing authority, the purchasing Party shall pay such additional amount, including any interest and penalties thereon.

15.4.7 Notwithstanding any provision to the contrary, the purchasing Party shall protect, indemnify and hold harmless (and defend at the purchasing Party's expense) the providing Party from and against any such tax or fee, interest or penalties thereon, or other reasonable charges or payable expenses (including reasonable attorney fees) with respect thereto, which are incurred by the providing Party in

connection with any claim for or contest of any such tax or fee which purchasing party elects to contest or which purchasing party provides written authorization for the providing party to undertake on behalf of the purchasing party.

15.4.8 Each Party shall notify the other Party in writing of any assessment, proposed assessment or other claim for any additional amount of such a tax or fee by a taxing authority, such notice to be provided, if possible, at least ten (10) days prior to the date by which a response, protest or other appeal must be filed, but in no event later than thirty (30) days after receipt of such assessment, proposed assessment or claim.

15.5 Mutual Cooperation

15.5.1 In any contest of a tax or fee by one Party, the other Party shall cooperate fully by providing records, testimony and such additional information or assistance as may reasonably be necessary to pursue the contest. Further, the other Party shall be reimbursed for any reasonable and necessary out-of-pocket copying and travel expenses incurred in assisting in such contest. Each Party agrees to indemnify and hold harmless the other Party from and against any losses, damages, claims, demands, suits, liabilities, and expenses, including reasonable attorney's fees, that arise out of its failure to perform its obligations under this section.

16. Dispute Resolution Process

Except as otherwise stated in this Agreement, the Parties agree that if any dispute arises as to the interpretation of any provision of this Agreement or as to the proper implementation of this Agreement, either Party may petition the Commission for a resolution of the dispute. However, each Party reserves any rights it may have to seek judicial review of any ruling made by the Commission concerning this Agreement.

17. Notices

17.1 Any notices or other communications required or permitted to be given or delivered under this Agreement shall be in hard-copy writing (unless otherwise specifically provided herein) and shall be sufficiently given if delivered personally or delivered by prepaid overnight express service to the following (unless otherwise specifically required by this Agreement to be delivered to another representative or point of contact):

If to Supra Telecom:

Olukayode Ramos
Supra Telecom
2620 SW 27th Avenue
Miami, FL 33133

If to BellSouth:

CLEC Account Team
9th Floor
600 North 19th Street
Birmingham, AL 35203
Assistant Vice President
Supra Telecom Account Team

General Attorney-Commercial Unit
BellSouth
Legal Department
675 W. Peachtree St., Suite 4300
Atlanta, GA 30375

17.2 Either Party may unilaterally change its designated representative and/or address for the receipt of notices by giving seven (7) days prior written notice to the other Party in compliance with this Section. Any notice or other communication shall be deemed given when received.

18.Confidentiality and Proprietary Information

18.1 For the purposes of this Agreement, "Confidential Information" means confidential or proprietary technical or business Information given by one Party (the "Discloser") to the other Party (the "Recipient") and identified by the Discloser as Confidential Information in accordance with this Section. All information which is to be treated as Confidential Information under this Agreement shall:

18.1.1 if in written, graphic, electromagnetic, or other tangible form, be marked as "Confidential Information"; and

18.1.2 if oral, (i) be identified by the Discloser at the time of disclosure to be "Confidential Information", and (ii) be set forth in a written summary which identifies the information as "Confidential Information" and which is delivered by the Discloser to the Recipient within ten (10) days after the oral disclosure.

18.1.3 Each Party shall have the right to correct an inadvertent failure to identify information as Confidential Information by giving written notification within thirty (30) days after the information is disclosed.

The Recipient shall, from that time forward, treat such information as Confidential Information.

18.2 In addition to any requirements imposed by 47 U.S.C. § 222, for a period of five (5) years from the receipt of Confidential Information from the Discloser, except as otherwise specified in this Agreement, the Recipient agrees (a) to use it only for the purpose of performing under this Agreement, (b) to hold it in confidence and disclose it to no one other than its employees having a need to know for the purpose of performing under this Agreement, and (c) to safeguard it from unauthorized use or disclosure with at least the same degree of care with which the Recipient safeguards its own Confidential Information. If the Recipient wishes to disclose the Discloser's Confidential Information to a third Party agent or consultant, the agent or consultant must have executed a written agreement of non-disclosure and non-use comparable in scope to the terms of this Section.

18.3 The Recipient may make copies of Confidential Information only as reasonably necessary to perform its obligations under this Agreement. All such copies shall bear the same copyright and proprietary rights notices as are contained on the original.

18.4 The Recipient agrees to return all Confidential Information in tangible form received from the Discloser, including any copies made by the Recipient, within thirty (30) days after a written request is delivered to the Recipient, or to destroy all such Confidential Information, except for Confidential Information that the Recipient reasonably requires to perform its obligations under this Agreement or any other agreement between the Parties. If either Party loses or makes an unauthorized disclosure of the other Party's Confidential Information, it shall notify such other Party immediately and use reasonable efforts to retrieve the lost or wrongfully disclosed information.

18.5 The Recipient shall have no obligation to safeguard Confidential Information: (a) which was in the possession of the Recipient free of restriction prior to its receipt from the Discloser; (b) after it becomes publicly known or available through no breach of this Agreement by the Recipient; (c) after it is rightfully acquired by the Recipient free of restrictions on its disclosure; or (d) after it is independently developed by personnel of the Recipient to whom the Discloser's Confidential Information had not been previously disclosed. In addition, either Party shall have the right to disclose Confidential Information to any mediator, arbitrator, state or federal regulatory body, the Department of Justice or any court in the conduct of any mediation, arbitration or approval of this Agreement or in any proceedings concerning the

provision of interLATA services by BellSouth that are or may be required by the Act. Additionally, the Recipient may disclose Confidential Information if so required by law, a court, or governmental agency, so long as the Discloser has been notified of the requirement promptly after the Recipient becomes aware of the requirement. In all cases, the Recipient must undertake all lawful measures to avoid disclosing such information until Discloser has had reasonable time to seek and comply with a protective order that covers the Confidential Information to be disclosed.

18.6 Each Party's obligations to safeguard Confidential Information disclosed prior to expiration or termination of this Agreement shall survive such expiration or termination.

18.7 Except as otherwise expressly provided elsewhere in this Agreement, no license is hereby granted under any patent, trademark, or copyright, nor is any such license implied, solely by virtue of the disclosure of any Confidential Information.

18.8 Each Party agrees that the Discloser would be irreparably injured by a breach of this Agreement by the Recipient or its representatives and that the Discloser shall be entitled to seek equitable relief, including *injunctive relief and specific performance, in the event of any breach* of the provisions of this Agreement. Such remedies shall not be deemed to be the exclusive remedies for a breach of this Agreement, but shall be in addition to all other remedies available at law or in equity.

19. Branding

19.1 Supra Telecom shall provide the exclusive interface to Supra Telecom end users, except as Supra Telecom shall otherwise specify. In those instances where Supra Telecom requires BellSouth personnel or systems to interface with Supra Telecom end users, such personnel shall identify themselves as representing Supra Telecom, and shall not identify themselves as representing BellSouth. Except for material provided by Supra Telecom, all forms, business cards or other business materials furnished by BellSouth to Supra Telecom end users shall be subject to Supra Telecom's prior review and approval. In no event shall BellSouth, acting on behalf of Supra Telecom pursuant to this Agreement, provide information to Supra Telecom local service Customers about BellSouth products or services. BellSouth agrees to provide in sufficient time for Supra Telecom to review and provide comments, the methods and procedures, training and approaches, to be used by BellSouth to assure that BellSouth meets Supra Telecom's branding requirement. For installation and

repair services, Supra Telecom agrees to provide BellSouth with branded material at no charge for use by BellSouth ("Leave Behind Material"). Supra Telecom will reimburse BellSouth for the reasonable and demonstrable costs BellSouth would otherwise incur as a result of the use of the generic leave behind material. BellSouth will notify Supra Telecom of material supply exhaust in sufficient time that material will always be available. BellSouth will not be liable for any error, mistake or omission, other than intentional acts or omissions or gross negligence, resulting from the requirements to distribute Supra Telecom's Leave Behind Material.

20. Directory Listings Requirements

20.1 BellSouth shall make available to Supra Telecom, for Supra Telecom subscribers, non discriminatory access to its telephone number and address directory listings ("Directory Listings"), under the following terms and conditions. In no event shall Supra Telecom subscribers receive Directory Listings that are at less favorable rates, terms or conditions than the rates, terms or conditions that BellSouth provides its subscribers.

20.1.1 BellSouth has delegated certain authority to its affiliate, BellSouth Advertising & Publishing Corporation ("BAPCO"), and has required BAPCO to carry out certain BellSouth obligations imposed by the Act regarding the publication of directories. BellSouth shall maintain the Directory Listings database, which includes Supra Telecom's end users' directory listing information, used by BAPCO in publishing such directories.

20.1.1.1 White Pages Basic Directory Listings. BellSouth shall publish in all BellSouth's white pages Directories at no charge to Supra Telecom or any Supra Telecom Customer one white pages basic Directory Listing for each Supra Telecom Customer for all of such Customer's phone numbers located in the geographic region covered by any white pages Directory. Notwithstanding the foregoing, BellSouth shall not publish any white pages basic Directory Listing for any Supra Telecom Customer whose Directory Listing has been identified as non-published. Supra Telecom will be required to provide to BellSouth the names, addresses and telephone numbers of all Supra Telecom end users that wish to be omitted from directories.

20.1.1.2 Enhanced White Pages Listings. Where BellSouth offers to publish, at no charge, in its white pages directory Enhanced White Pages Listings to its retail customers, BellSouth shall publish such listings, at no charge and under the same terms and conditions, for Supra Telecom

for its end users. Where BellSouth charges its retail customers for Enhanced White Pages Listings, BellSouth shall publish such listings under the same terms and conditions to Supra Telecom for its Customers at the applicable wholesale discount set forth in Attachment 1.

20.1.1.3 Yellow Pages Basic Directory Listings. Where BellSouth offers to publish in its Yellow Pages Directory free Yellow Pages listings to its retail end users, BellSouth shall publish such listings, at no charge and under the same terms and conditions to Supra Telecom for its end users. Where BellSouth charges business customers for Yellow Pages basic Directory Listings, BellSouth shall provide one Yellow Pages basic Directory Listing for each Supra Telecom end user, who subscribes to business services, at BellSouth tariffed rates at the applicable wholesale discount set forth in Attachment 1. BellSouth shall not provide "lead" information on Supra Telecom end users to its Yellow Pages directory publishing Affiliate without written permission from Supra Telecom.

20.1.2 Treatment of Directory Listings. BellSouth shall treat all Directory Listings with the same level of confidentiality that BellSouth accords its own directory listing information, and BellSouth shall limit access to Supra Telecom's end user proprietary confidential directory information to those BellSouth employees who are involved in the preparation of listings. Directory Listings of Supra Telecom Customers shall be alphabetically commingled with the Directory Listings of all other telecommunications carriers, including BellSouth. All Directory Listings published by BellSouth will be as accurate and complete as BellSouth's own listings or those of its Affiliates.

20.1.3 Reserved Rights. Supra Telecom reserves the right to withhold Directory Listing information from BellSouth if BellSouth charges Supra Telecom a rate for inclusion of Supra Telecom's unlisted numbers in the BellSouth directory databases exceeding the BellSouth retail tariffed charge for unlisted numbers.

20.2 Directory Listings Database

20.2.1 Maintenance. BellSouth shall maintain a Directory Listings database that shall include the directory listings of BellSouth, Supra Telecom and any other carrier for whom BellSouth has agreed to publish Directory Listings. Supra Telecom and BellSouth shall cooperate to ensure that Directory Listing information relating to Supra Telecom end user is delivered to BellSouth and reflected in such database in a timely and accurate manner (and in no event in a manner that is less

000042

timely or accurate than the manner in which BellSouth's Directory Listings database is updated for information relating to BellSouth's end user). Data should be generated from the local service order process and other data feeds for facility-based carriers and should be subject to the same rigorous edits that are applied to BellSouth local service orders; provided, however that such edits shall not affect the provisioning of the services ordered. BellSouth shall use all commercially reasonable efforts to maintain the Directory Listings database in good order. BellSouth shall advise Supra Telecom as soon as possible, but in no event fewer than six (6) months in advance, of any changes in the maintenance of the Directory Listings database or any mechanisms or interfaces, whether industry standard or not, pursuant to which BellSouth will provide Directory Listings to Supra Telecom.

20.2.2 Third Party Access to Directory Listings Database. Supra Telecom authorizes BellSouth to provide Directory Listings of Supra Telecom end user to third parties on terms and conditions that comport with the Communications Act and the relevant FCC rules and orders and on the same terms and conditions applicable to the release of Directory Listings of BellSouth end users to third parties. This data shall not be used for any other purpose than publishing a directory.

20.2.3 Co-operation. Supra Telecom and BellSouth agree to co-operate in good faith to resolve any issue regarding a Directory Listing raised by an Supra Telecom end user (e.g., publication of a nonpublished Directory Listing, etc.) Upon request by either party, Supra Telecom and BellSouth will in good faith mutually develop a process for escalating and resolving such issues.

21. Insurance Requirements

21.1 At all times during the term of this Agreement, each Party shall maintain, at its own expense, (i) all insurance required by applicable Law including insurance and approved self insurance for statutory workers compensation coverage and (ii) commercial general liability coverage in the amount of not less than ten million dollars ($10,000,000) or a combination of commercial general liability and excess/umbrella coverage totaling ten million dollars ($10,000,000). Upon request from the other Party, each Party shall furnish the other Party with certificates of insurance which evidence the minimum levels of insurance set forth herein. Each Party may satisfy all or part of the coverage specified herein through self insurance. Each Party shall give the other Party at least thirty (30) days advance written notice of any cancellation or non-renewal of insurance required by this Section.

22. Costs

22.1 Except as otherwise specifically stated in this Agreement, or any FCC or Commission order or rules, each Party shall be responsible for its costs and expenses in complying with its obligations under this Agreement.

23. Disaster Recovery

23.1 The Parties will comply with the Disaster Recovery Plan set forth in Attachment 13 of this Agreement.

24. Miscellaneous

24.1 Delegation or Assignment

24.1.1 BellSouth may not assign any of its rights or delegate any of its obligations under this Agreement without the prior written consent of Supra Telecom which will not be unreasonably withheld. Notwithstanding the foregoing, BellSouth may assign its rights and benefits and delegate its duties and obligations under this Agreement without the consent of Supra Telecom to a 100 percent owned Affiliate company of BellSouth if such Affiliate provides wireline communications, provided that the performance of any such assignee is guaranteed by the assignor. Any prohibited assignment or delegations shall be null and void. In the event any affiliate of Supra Telecom desires to enter into an Interconnection Agreement with BellSouth, such affiliate may negotiate a separate agreement with BellSouth or adopt any filed and approved Interconnection Agreement pursuant to Section 252(i) of the Act.

24.2 **Subcontracting**

24.2.1 If any Party's obligation under this Agreement is performed by a subcontractor or Affiliate, the Party subcontracting the obligation nevertheless shall remain fully responsible for the performance of this Agreement in accordance with its terms, and shall be solely responsible for payments due its subcontractors or Affiliate. In entering into any contract, subcontract or other agreement for the performance of any obligation under this Agreement, the Party shall not enter into any agreement that it would not enter into if the supplier was performing services directly for said Party. Neither Party will allow its subcontractors to place liens against the property of the other Party or any end user's property. If such a lien is filed by a subcontractor, the Party engaging such subcontractor shall arrange to have such lien removed within ten (10) days.

24.3 **Nonexclusive Remedies**

24.3.1 Except as otherwise expressly provided in this Agreement, each of the remedies provided under this Agreement is cumulative and is in addition to any remedies that may be available at law or in equity.

24.4 **No Third-Party Beneficiaries**

24.4.1 Except as may be specifically set forth in this Agreement, this Agreement does not provide and shall not be construed to provide third Parties with any remedy, claim, liability, reimbursement, cause of action, or other privilege.

24.5 **Referenced Documents**

24.5.1 Whenever any provision of this Agreement refers to a technical reference, technical publication, Supra Telecom Practice, BellSouth Practice, any publication of telecommunications industry administrative or technical standards, or any other document specifically incorporated into this Agreement, it will be deemed to be a reference to the most recent version or edition (including any amendments, supplements, addenda, or successors) of such document that is in effect, and will include the most recent version or edition (including any amendments, supplements, addenda, or successors) of each document incorporated by reference in such a technical reference, technical publication, Supra Telecom Practice, BellSouth Practice, or publication of industry standards (unless Supra Telecom elects otherwise). Should there be an inconsistency between or among publications or standards, the Parties shall mutually agree upon which requirement shall apply. If the Parties cannot reach agreement, the matter shall be handled pursuant to Section 16 of the General Terms and Conditions of this Agreement. With respect to any guides, references or practices developed by either Party, in the event of a conflict between this Agreement and such guides, references or practices, this Agreement controls.

24.6 **Applicable Law**

24.6.1 To the extent any provisions of this Agreement are subject to the jurisdiction of the FCC, applicable federal rules and regulations shall govern those provisions. To the extent any provisions of this Agreement are subject to the jurisdiction of the state Commission, applicable Commission rules and regulations shall govern those provisions. All other provisions of this Agreement, including general contract provisions, shall be governed by the laws of the State of Georgia.

24.7 **Amendments or Waivers**

24.7.1 Except as otherwise provided in this Agreement, no amendment or waiver of any provision of this Agreement, and no consent to any default under this Agreement, shall be effective unless the same is in writing and signed by an officer of the Party against whom such amendment, waiver or consent is claimed. In addition, no course of dealing or failure of a Party strictly to enforce any term, right or condition of this Agreement shall be construed as a waiver of such term, right or condition. By entering into this Agreement, neither Party waives any rights granted to them pursuant to the Act.

24.8 **Severability**

24.8.1 If any term, condition or provision of this Agreement is held to be invalid or unenforceable for any reason, such invalidity or unenforceability shall not invalidate the entire Agreement, unless such construction would be unreasonable. The Agreement shall be construed as if it did not contain the invalid or unenforceable provision or provisions, and the rights and obligations of each Party shall be construed and enforced accordingly; provided, however, that in the event such invalid or unenforceable provision or provisions are essential elements of this Agreement and substantially impair the rights or obligations of either Party, the Parties shall promptly negotiate a replacement provision or provisions.

24.9 **Entire Agreement**

24.9.1 This Agreement, which shall include the Attachments, Appendices and other documents referenced herein, constitutes the entire Agreement between the Parties concerning the subject matter hereof and supersedes any prior agreements, representations, statements, negotiations, understandings, proposals or undertakings, oral or written, with respect to the subject matter expressly set forth herein.

24.10 **Survival of Obligations**

24.10.1 Any liabilities or obligations of a Party for acts or omissions prior to the cancellation or termination of this Agreement, any obligation of a Party under the provisions regarding indemnification, Confidential Information, limitations on liability, and any other provisions of this Agreement which, by their terms, are contemplated to survive (or to be performed after) termination of this Agreement, shall survive cancellation or termination thereof.

24.11 **Executed in Counterparts**

24.11.1 This Agreement may be executed in any number of counterparts, each of which shall be deemed an original, but such counterparts shall together constitute one and the same instrument.

24.12 **Headings of No Force or Effect**

24.12.1 The headings of Articles and Sections of this Agreement are for convenience of reference only, and shall in no way define, modify or restrict the meaning or interpretation of the terms or provisions of this Agreement.

24.13 Notice of Network Changes

24.13.1 BellSouth shall comply with the requirements of 47 C.F.R. § 51.325, et seq., regarding notice to Supra Telecom of any network change that will affect Supra Telecom's performance or ability to provide service or that will affect BellSouth's interoperability with Supra Telecom. This section shall be construed in accordance with the obligations contained within 47 C.F.R. § 51.325, et seq.

24.14 Court Ordered Requests for Call Detail Records and Other Subscriber Information

24.14.1 To the extent technically feasible, BellSouth maintains call detail records for Supra Telecom end users for limited time periods and can respond to subpoenas and court ordered requests for this information. BellSouth shall maintain such information for Supra Telecom end users for the same length of time it maintains such information for its own end users.

24.14.2 Supra Telecom agrees that BellSouth will respond to subpoenas and court ordered requests delivered directly to BellSouth for the purpose of providing call detail records when the targeted telephone numbers belong to Supra Telecom end users. Billing for such requests will be generated by BellSouth and directed to the law enforcement agency initiating the request.

24.14.3 Where BellSouth is providing to Supra Telecom telecommunications services for resale or providing to Supra Telecom the local switching function, then Supra Telecom agrees that in those cases where Supra Telecom receives subpoenas or court ordered requests regarding targeted telephone numbers belonging to Supra Telecom end users, if Supra Telecom does not have the requested information, Supra Telecom will advise the law enforcement agency initiating the request to redirect the subpoena or court ordered request to BellSouth. Where the request has been forwarded to BellSouth, billing for call detail

information will be generated by BellSouth and directed to the law enforcement agency initiating the request.

24.14.4 In all other instances, Supra Telecom will provide Supra Telecom end user and/or other customer information that is available to Supra Telecom in response to subpoenas and court orders for their own end user records. When BellSouth receives subpoenas or court ordered requests regarding targeted telephone numbers belonging to Supra Telecom end users, BellSouth will advise the law enforcement agency initiating the request to redirect the subpoena or court ordered request to Supra Telecom.

24.15 **Filing of Agreement**

24.15.1 Upon execution of this Agreement, it shall be filed with the appropriate state regulatory agency pursuant to the requirements of Section 252 of the Act, and the Parties shall share equally any filing fees therefor. If the regulatory agency imposes any filing or public interest notice fees regarding the filing or approval of the Agreement, Supra Telecom shall be responsible for publishing the required notice and the publication and/or notice costs shall be borne by Supra Telecom. Notwithstanding the foregoing, this Agreement shall not be submitted for approval by the appropriate state regulatory agency unless and until such time as Supra Telecom is duly certified as a local exchange carrier in such state.

24.16 Other Proceedings

24.16.1 Upon written request by Supra Telecom, BellSouth agrees to negotiate rates, (if appropriate), terms and conditions to incorporate into this Agreement any obligation or commitment regarding interconnection, resale or access to Network Elements made by BellSouth to any state or federal regulatory authority or the U.S. Department of Justice ("Governmental Body") in connection with any merger or regulatory proceeding regarding BellSouth's obligations under the Act, including 47 U.S.C.§ 271 thereunder. Any amendment shall incorporate only those terms, obligations and commitments made to the Governmental Body, and any anicillary or related terms which do not negate or impair the terms of the obligation or commitment to the Governmental Body. If the Parties cannot reach an agreement regarding the rates, terms and conditions, either Party may, within sixty (60) days after receipt of the request from Supra Telecom, petition the state regulatory commission for resolution of the issue(s). The language to be negotiated and incorporated within this Agreement will be effective consistent with the effective date of the commitment or obligation

000048

made by BellSouth to the Governmental Body or as the Parties may otherwise mutually agree. Supra Telecom's rights pursuant to this Section 4.2 shall be cumulative with, and not in lieu of or in limitation of, any other rights provided to Supra Telecom under this Agreement.

25. **Reservation of Rights**

25.1 Execution of the Interconnection Agreement by either Party does not confirm or infer that the executing Party agrees with any decision(s) issued pursuant to the Telecommunications Act of 1996 and the consequences of those decisions on specific language in this Agreement. Neither Party waives its rights to appeal or otherwise challenge any such decision(s) and each Party reserves all of its rights to pursue any and all legal and/or equitable remedies, including appeals of any such decision(s). If such appeals or challenges result in changes in the decision(s), the Parties agree that appropriate modifications to this Agreement will be made promptly to make its terms consistent with those changed decision(s).

IN WITNESS WHEREOF, the Parties have executed this Agreement through their authorized representatives.

RESALE

1 Discount Rates

1.1 The discount applied to Supra Telecom's purchase of BellSouth Telecommunications services for purposes of resale shall be as set forth in Exhibit A, attached hereto and incorporated herein by this reference. The discount shall be applied to the retail rate for the telecommunications service purchased by Supra Telecom. Such discount shall reflect the costs attributable to any marketing, billing, collection and other costs avoided by BellSouth as specified in the Act, by the FCC and the appropriate state public service commission.

2 Definition of Terms

2.1 ALTERNATE LOCAL EXCHANGE COMPANY ("ALEC") means a telephone company certificated by the public service commission to provide local exchange service.

2.2 CUSTOMER OF RECORD means the entity responsible for placing application for service; requesting additions, rearrangements, maintenance or discontinuance of service; and payment in full of charges incurred.

2.3 DEPOSIT means assurance provided by a Customer of Record in the form of cash, surety bond or bank letter of credit to be held by BellSouth.

2.4 END USER means the ultimate user of the telecommunications services.

2.5 NEW SERVICES means functions, features or capabilities that are not currently offered by BellSouth. This includes packaging of existing services or combining a new function, feature or capability with an existing service.

2.6 RESALE means an activity wherein a ALEC, such as Supra Telecom, subscribes to the telecommunications services of BellSouth and then offers those telecommunications services to the public.

2.7 SPECIAL ASSEMBLY means an offering of special equipment and arrangements mutually agreed upon by the Parties and not otherwise provided for in the General Subscribers Services Tariff. Such

arrangements may be furnished if they are in accord with authorized service offerings, and used in connection with and not detrimental to any of the services furnished by BellSouth. A Special Assembly may be provided when the nature and magnitude of the provision is sufficient to impose the need for specific customer pricing.

3 **General Provisions**

3.1 At the request of Supra Telecom and pursuant to the requirements of the Act, Supra Telecom may resell the telecommunications services of BellSouth that BellSouth provides at retail to subscribers who are not telecommunications carriers, subject to the terms and conditions specifically set forth herein. Notwithstanding the foregoing, the exclusions and limitations on services available for resale will be as set forth in Exhibit B, attached hereto and incorporated herein by this reference. Supra Telecom may purchase resale services from BellSouth for its own use in operating its business. The resale discount will apply to those services under the following conditions:

3.1.1 Supra Telecom must resell services to other end users;

3.1.2 Supra Telecom must order services through resale interfaces, i. e., the Local Carrier Service Center ("LCSC") and/or appropriate Resale Account Teams pursuant to Attachment 7 of this Agreement, incorporated herein by this reference; and

3.1.3 Supra Telecom cannot be a ALEC for the single purpose of selling to itself.

3.2 The provision of services by BellSouth to Supra Telecom does not constitute a joint undertaking for the furnishing of any service.

3.3 Supra Telecom will be the Customer of Record for all telecommunications services purchased from BellSouth for the purpose of resale. Except as specified herein, BellSouth will take orders from, bill and expect payment from Supra Telecom for said services.

3.4 Supra Telecom will be BellSouth's single point of contact for all services purchased pursuant to this Attachment 1. BellSouth shall have no contact with the end user except to the extent provided for herein.

3.5 BellSouth will continue to bill the end user for any services that the end user specifies it wishes to receive directly from BellSouth. Subject to Section 222 of the Act, BellSouth will continue to directly market its own telecommunications products and services and in doing so may establish independent relationships with end users of Supra Telecom. BellSouth will not delay conversion of end users to Supra Telecom as a result of the end users subscription to services not available for resale, provided that Supra Telecom complies with appropriate ordering processes as set forth in the appropriate BellSouth ordering guides.

3.6 Neither Party shall interfere with the right of any person or entity to obtain service directly from the other Party.

3.7 Current telephone numbers may normally be retained by end user. However, telephone numbers are the property of BellSouth and are assigned to the service furnished. Supra Telecom has no property right to the telephone number or any other call number designation associated with services furnished by BellSouth, and no right to the continuance of service through any particular central office. BellSouth reserves the right to change such numbers, or the central office designation associated with such numbers, or both, solely in accordance with BellSouth's practices and procedures and on a non-discriminatory basis.

3.8 For the purpose of the resale of BellSouth's telecommunications services by Supra Telecom, BellSouth will provide Supra Telecom with an on line access to telephone numbers pursuant to Attachment 5, Sections 1.2 and 1.3, incorporated herein by this reference.

3.9 Service is furnished subject to the condition that it will not be used for any unlawful purpose.

3.10 BellSouth accepts no responsibility to any person for any unlawful act committed by Supra Telecom or its end users as part of providing service to Supra Telecom for purposes of resale or otherwise.3.11 The characteristics and methods of operation of any circuits, facilities or equipment provided by any person or entity other than BellSouth shall not:

3.11.1 Interfere with or impair service over any facilities of BellSouth, its affiliates, or its connecting and concurring carriers involved in its service; or

3.11.2 Impair the privacy of any communications.

3.12 If Supra Telecom utilizes a BellSouth resold telecommunications service in a manner other than which the service was originally intended as described in BellSouth's retail tariffs, Supra Telecom has the responsibility to notify BellSouth. BellSouth will only provision and maintain said service consistent with the terms and conditions of the tariff describing said service.

3.13 Facilities and/or equipment utilized by BellSouth to provide service to Supra Telecom remain the property of BellSouth.

3.14 White page directory listings will be provided in accordance with Section 20 of the General Terms and Conditions of this Agreement, incorporated herein by this reference.

3.15 BellSouth provides electronic access to customer record information pursuant to Section 2 of Attachment 6, incorporated herein by this reference. Customer record information includes customer specific information in the Customer Record Information System ("CRIS") and the Regional Street Address Guide ("RSAG"). Supra Telecom agrees not to view, copy, or otherwise obtain access to the customer record information of any end user without that end user's permission, and further agrees that Supra Telecom will obtain access to customer record information only in strict compliance with all applicable state and federal laws, rules and regulations.

3.16 Charges for the electronic interfaces developed and implemented to access Operational Support Systems functions ("OSS") for accessing customer record information and placing local service requests for resale shall be as set forth in Exhibit A, attached hereto and incorporated herein by this reference. No manual OSS charges shall apply to local service requests submitted when BellSouth's existing electronic interfaces utilized by Supra Telecom are unavailable for reasons other than scheduled maintenance, provided the downtime does not occur outside the scheduled maintenance window; or other reasonable scheduled activities for which reasonable advance

notification is provided by BellSouth, and provided the activities do not occur outside the scheduled window.

3.17 Where available to BellSouth's end users, BellSouth shall provide the following telecommunications services at a discount to allow for voice mail services:

- Message Waiting Indicator ("MWI") stutter dialtone and message waiting light feature capabilities
- Call Forward on Busy/Don't Answer ("CF-B/DA")
- Call Forward on Busy ("CF/B")
- Call Forward Don't Answer ("CF/DA")

3.18 Further, BellSouth messaging services set forth in BellSouth's Messaging Service Information Package, available on BellSouth's website, shall be made available for resale without the wholesale discount.

3.19 BellSouth's Inside Wire Maintenance Service Plans may be made available for resale at rates, terms and conditions as set forth by BellSouth and without the wholesale discount.

3.20 If Supra Telecom requests a Special Assembly, Supra Telecom agrees to pay the costs incurred by BellSouth for providing the requested Special Assembly. The costs will be provided to Supra Telecom prior to providing the service. Such costs could include both recurring and non-recurring charges and shall exclude any costs attributable to any marketing, billing, collection or other costs that will be avoided by BellSouth in providing the service to Supra Telecom.

3.21 Pursuant to 47 CFR Section 51.617 recovery of charges associated with Implementing Number Portability shall be as set forth in Section 2.5 of Attachment 5, incorporated herein by this reference.

3.22 BellSouth agrees to notify Supra Telecom electronically of any changes in the terms and conditions under which it offers telecommunications services to end users who are non-telecommunications carriers, including, but not limited to, the introduction or discontinuance of any features, functions, services or

promotions, at least forty-five (45) days prior to the effective date of any such change, whichever is earlier. Supra Telecom recognizes that certain revisions may occur between the time BellSouth notifies Supra Telecom of a change pursuant to this Section and BellSouth's tariff filing of such change. BellSouth shall notify Supra Telecom of such revisions consistent with BellSouth's internal notification process but Supra Telecom accepts the consequences of such mid-stream changes as an uncertainty of doing business and, therefore, will not hold BellSouth responsible for any resulting inconvenience or cost incurred by Supra Telecom unless caused by the intentional misconduct of BellSouth for the purposes of this Section. The notification given pursuant to this Section will not be used by either Party to market its offering of such changed services externally in advance of BellSouth's filing of any such changes. Any change requiring modifications to BellSouth's electronic interface will be as set forth in Section 1.5 of Attachment 7, incorporated herein by this reference. The notification given pursuant to this Section will not be used by either Party to market its offering of such changed services externally in advance of BellSouth's filing of any such changes.

3.23 BellSouth shall provide 911/E911 for Supra Telecom end users in the same manner that it is provided to BellSouth end users. BellSouth shall provide and validate Supra Telecom end users information to the PSAP. BellSouth shall use its service order process to update and maintain, on the same schedule that it uses for its end users, the Supra Telecom end users service information in the ALI/DMS data base (Automatic Location Identification/Database Management System) used to support 911/E911 services.

3.24 BellSouth and Supra Telecom shall provide local and toll dialing parity to each other with no unreasonable dialing delays. Dialing parity shall be provided for all originating telecommunications services that require dialing to route a call. BellSouth and Supra Telecom shall permit similarly situated telephone exchange service end users to dial the same number of digits to make a local telephone call notwithstanding the identity of the end user's or the called party's telecommunications service provider.

3.25 Pursuant to 47 CFR Section 51.617, BellSouth will bill Supra Telecom end user common line charges identical to the end user common line charges BellSouth bills its end users.

3.26 In general, BellSouth will not become involved in disputes between Supra Telecom and Supra Telecom's end users over resold services. If a dispute does arise that cannot be settled without the involvement of BellSouth, Supra Telecom shall contact the designated service center for resolution. BellSouth will make every effort to assist in the resolution of the dispute and will work with Supra Telecom to resolve the matter in as timely a manner as possible. Supra Telecom may be required to submit documentation to substantiate the claim.

4 **BellSouth's Provision of Services to Supra Telecom**

4.1 Supra Telecom agrees that its resale of BellSouth services shall be as follows:

4.1.1 No terms and conditions, including use and user restrictions, shall be applicable to the resale of BellSouth's telecommunications services except for a restriction on the resale of cross-class selling and reasonable, nondiscriminatory and narrowly tailored terms, conditions and limitations in the underlying BellSouth tariffs.

4.1.2 Hotel and Hospital PBX services are the only telecommunications services available for resale to Hotel/Motel and Hospital customers, respectively. Similarly, Access Line Service for Customer Provided Coin Telephones is the only local service available for resale to Independent Payphone Provider ("IPP") customers. Shared Tenant Service customers can only be sold those local exchange access services available in BellSouth's A23 Shared Tenant Service Tariff in the states of Florida, Georgia, North Carolina and South Carolina, and in A27 in the states of Alabama, Kentucky, Louisiana, Mississippi and Tennessee.

4.1.3 BellSouth reserves the right to periodically audit services purchased by Supra Telecom to establish compliance with the terms and conditions set forth above. Such audit shall not occur more than once in a calendar year. Supra Telecom shall make any and all records and data available to BellSouth or BellSouth's auditors on a reasonable basis. BellSouth shall bear the cost of said audit.

4.1.4 Resold services are subject to the same terms and conditions as are specified for such services when furnished to an individual end user of BellSouth in the appropriate section of BellSouth's tariffs. Specific tariff

features (e.g., a usage allowance per month) shall not be aggregated across multiple resold services unless specifically provided for in BellSouth's retail tariffs.

4.1.5 Telephone numbers transmitted via any resold service feature are intended solely for the use of the end user of the feature.

4.1.6 BellSouth will provide Supra Telecom with at least the capability to provide a Supra Telecom end user the same experience as BellSouth provides its own end users with respect to all resold services. The capability provided to Supra Telecom by BellSouth shall be in accordance with standards or other measurements that are at least equal to the level that BellSouth provides or is required to provide by law or its own internal procedures, whichever is the higher standard.

4.2 **CLASS and Custom Features Requirements**

4.2.1 Supra Telecom may purchase the entire set of CLASS and custom features and functions, or a subset of any one or any combination of such features, on an end user-specific basis, without restriction on the minimum or maximum number of lines and features that may be purchased for any one level of service to the extent such restrictions do not apply to BellSouth's retail end users.

4.3 **Voluntary Federal Customer Financial Assistance Programs**

4.3.1 Local telecommunications services provided to low-income subscribers, pursuant to requirements established by the appropriate state regulatory body, include programs such as Voluntary Federal Customer Financial Assistance Program and Link-Up America ("Voluntary Federal Customer Financial Assistance Programs"). When a BellSouth end user eligible for the Voluntary Federal Customer Financial Assistance Program, or other similar state programs, chooses to obtain local service from Supra Telecom, BellSouth shall forward available information regarding such end user's eligibility to participate in such programs to Supra Telecom, in electronic format in accordance with procedures to be mutually established by the Parties and applicable state and federal law.

4.4 **Hospitality Service**

4.4.1 BellSouth shall provide all blocking, screening, and all other applicable functions available for hospitality lines.

4.5 **Blocking Service**

4.5.1 BellSouth shall provide call blocking of 700, 900, and 976 services individually or in any combination upon request, including bill to third party and collect calls from Supra Telecom on a line, trunk, or individual service basis at parity with what BellSouth provides its end users.

4.6 **Routing to Directory Assistance, Operator and Repair Services**

4.6.1 BellSouth shall make available to Supra Telecom the ability to route calls utilizing the customized or compatible signaling protocol:

4.6.1.1 Local Directory Assistance calls (411, (NPA) 555-1212) dialed by Supra Telecom end users directly to the Supra Telecom directory assistance services platform;

4.6.1.2 Local operator services calls (0+, 0-) dialed by Supra Telecom end users directly to the Supra Telecom local operator services platform. Such traffic shall be routed over trunk groups between BellSouth end offices and the Supra Telecom local operator services platform, using standard operator services dialing protocols of 0+ or 0-; and

4.6.1.3 Repair calls (e.g., 611) dialed by Supra Telecom end users directly to the Supra Telecom repair center.

4.6.2 All routing shall permit Supra Telecom end users to dial the same telephone numbers for Supra Telecom directory assistance, local operator service and repair that similarly situated BellSouth end users dial for reaching equivalent BellSouth services.

4.6.2.1 BellSouth branding is the default service level.

4.6.2.2 Unbranding, custom branding, and self branding require Supra Telecom to order customized routing for each originating BellSouth end office identified by Supra Telecom. Rates for customized routing are set forth in Exhibit C of this Attachment, incorporated herein by this reference.

4.6.2.3 Customer branding and self branding require Supra Telecom to order dedicated trunking from each BellSouth end office identified by Supra Telecom, to either the BellSouth Traffic Operator Position System ("TOPS") or Supra Telecom operator service provider. Rates for trunks are set forth in applicable BellSouth tariffs, or Exhibit A of Attachment 2, incorporated herein by this reference.

4.6.2.4 Unbranding – Unbranded directory assistance and/or operator call processing calls ride common trunk groups provisioned by BellSouth from those end offices identified by Supra Telecom to the BellSouth TOPS. These calls are routed to "no announcement."

4.7 **Busy Line Verification and Emergency Line Interrupt**

4.7.1 Where BellSouth does not route operator services traffic to Supra Telecom's platform, BellSouth shall perform BLV/ELI for Supra Telecom on resold BellSouth lines. Where BellSouth routes operator services traffic to Supra Telecom's platform, BellSouth shall provide BLV/ELI services when requested by Supra Telecom operators.

4.8 **Directory Assistance and Operator Services**

4.8.1 Where BellSouth provides directory assistance service on behalf of Supra Telecom, it shall be at the same level of directory assistance service available to BellSouth end users. If requested by Supra Telecom, BellSouth will provide Supra Telecom directory assistance service under the Supra Telecom brand. Where not technically feasible, such calls will be unbranded.

4.8.2 Where BellSouth provides operator services on behalf of Supra Telecom, it shall be at the same level of service available to BellSouth end users. BellSouth will provide service in accordance with all applicable state requirements for operator services.

4.8.3 Upon request, BellSouth agrees to provide Supra Telecom operator services branded as an Supra Telecom call. Where not technically feasible, such calls will be unbranded.

4.8.4 Additionally, BellSouth warrants that such service will provide the following minimum capabilities to Supra Telecom end users:

4.8.4.1 Instant credit on calls, as provided to BellSouth end users; and

4.8.4.2 Routing of calls to Supra Telecom when requested via existing Operator Transfer Service ("OTS").

5 **Maintenance of Services**

5.1 Supra Telecom and BellSouth will adopt and adhere to the standards contained in the applicable CLEC Work Center Operational Understanding set forth on BellSouth's web site regarding maintenance and installation of service.

5.2 Services resold pursuant to this Attachment 1 shall be maintained by BellSouth.

5.3 Supra Telecom or its end users may not rearrange, move, disconnect, remove or attempt to repair any facilities owned by BellSouth, other than by connection or disconnection to any interface means used, except with the written consent of BellSouth.

5.4 BellSouth will bill Supra Telecom for handling troubles that are found not to be in BellSouth's network pursuant to its standard time and material charges. The standard time and material charges will be no more than what BellSouth charges to its retail end users for the same services.

5.5 BellSouth reserves the right to contact Supra Telecom's end users on Supra Telecom's behalf, if deemed necessary, for maintenance purposes.

5.6 BellSouth shall ensure that all BellSouth representatives who receive inquiries regarding Supra Telecom services when providing services on behalf of Supra Telecom: (i) refer such inquiries to Supra Telecom at a telephone number provided by Supra Telecom; (ii) provide Supra Telecom supplied telephone numbers to callers who inquire about Supra Telecom services or products; (iii) do not in any way disparage or discriminate against Supra Telecom, or its products or services; and (iv) do not provide information about BellSouth products or services.

6 **Annoyance Calls**

6.1 BellSouth will continue to process calls made to the annoyance call center and will advise Supra Telecom when it is determined that annoyance calls are originated from one of its end user's locations. BellSouth shall be indemnified, defended and held harmless by Supra Telecom and/or the end user against any claim, loss or damage arising from providing this information to Supra Telecom. It is the responsibility of Supra Telecom to take the corrective action necessary with its end users who make annoying calls. Failure to do so will result in BellSouth's disconnecting the end user's service pursuant to Attachment 6 of this Agreement, incorporated herein by this reference.

7 Line Information Database ("LIDB")

7.1 The Parties' agreement relating to LIDB storage is included in Exhibit A to Attachment 6 of this Agreement, incorporated herein by this reference.

8 RAO Hosting

8.1 The Parties' agreement relating to RAO Hosting is included in Exhibit B to Attachment 6 of this Agreement, incorporated herein by this reference.

9 Optional Daily Usage File ("ODUF")

9.1 The Parties' agreement relating to ODUF is included in Exhibit C to Attachment 6 of this Agreement, incorporated herein by this reference.

10 Enhanced Optional Daily Usage File ("EODUF")

10.1 The Parties' agreement relating to EODUF is included in Exhibit D of Attachment 6 of this Agreement, incorporated herein by this reference.

APPLICABLE DISCOUNTS

The telecommunications services available for purchase by Supra Telecom for the purposes of resale to Supra Telecom end users shall be available at the following discount off of the retail rate. If Supra Telecom cancels an order for telecommunications services for the purposes of resale, any costs incurred by BellSouth in conjunction with the provisioning of that order will be recovered in accordance with the applicable sections of the General Subscriber Services Tariff and the Private Line Service Tariff.

	DISCOUNT*		
STATE	**RESIDENCE**	**BUSINESS**	**CSAs*** **
ALABAMA	16.3%	16.3%	
FLORIDA	21.83%	16.81%	
GEORGIA	20.3%	17.3%	
KENTUCKY	16.79%	15.54%	
LOUISIANA	20.72%	20.72%	9.05%
MISSISSIPPI	15.75%	15.75%	
NORTH CAROLINA	21.5%	17.6%	
SOUTH CAROLINA	14.8%	14.8%	8.98%
TENNESSEE**	16%	16%	

* When Supra Telecom provides Resale service in a cross boundary area (areas that are part of the local serving area of another state's exchange) the rates, regulations and discounts for the tariffing state will apply. Billing will be from the serving state.

** In Tennessee, if Supra Telecom provides its own operator services and directory services, the discount shall be 21.56%. Supra Telecom must provide written notification to BellSouth within 30 days prior to providing its own operator services and directory services to qualify for the higher discount rate of 21.56%.

*** Unless noted in this column, the discount for Business will be the applicable discount rate for CSAs.

RATES FOR INTERFACE TO OPERATIONAL
SUPPORT SYSTEMS

BellSouth has developed and made available the following mechanized systems by which Supra Telecom may submit LSRs electronically.

LENS	Local Exchange Navigation System
EDI	Electronic Data Interface
EDI-PC	Electronic Data Interface – Personal Computer
TAG	Telecommunications Access Gateway

LSRs submitted by means of one of these interactive interfaces will incur an electronic interface ordering charge as specified in the Table below. Such charges will not be refunded if the order is canceled. An individual LSR will be identified for billing purposes by its Purchase Order Number ("PON"). LSRs submitted by means other than one of these interactive interfaces (mail, fax, courier, etc.) will incur a manual order charge as specified in the table below:

INTERFACE RATES	Electronic Per LSR received from Supra Telecom by one of the interactive electronic interfaces	Manual Per LSR received from Supra Telecom by means other than one of the interactive electronic interfaces
Electronic Interface LSR Charge	$3.50per LSR	$19.99per LSR
USOC	SOMEC	SOMAN

Note: In addition to the electronic interface charges, applicable discounted service order and related discounted charges apply per the tariff.

DENIAL/RESTORAL ELECTRONIC INTERFACE CHARGE

In the event Supra Telecom provides a list of customers to be denied and restored, rather than an LSR, each location on the list will require a separate PON and therefore will be billed as one LSR per location.

Note: Supplements or clarifications to a previously billed LSR will not incur another electronic interface charge.

Applicable Notes:

1 **Grandfathered services** can be resold only to existing subscribers of the grandfathered service.

2 (Georgia) CSAs are available for resale at the same terms and conditions offered to BellSouth's customers.

3 Where available for resale, **promotions** will be made available only to customers who would have qualified for the promotion had it been provided by BellSouth directly.

4 **Lifeline/Link Up** services may be offered only to those subscribers who meet the criteria that BellSouth currently applies to subscribers of these services. In Kentucky, Supra Telecom is responsible for funding its own Lifeline and Link Up benefit. In Tennessee, Supra Telecom

shall purchase BellSouth's Message Rate Service at the stated tariff rate, less the wholesale discount. Supra Telecom must further discount the wholesale Message Rate Service to Lifeline customers with a discount which is no less than the minimum discount that BellSouth now provides. Supra Telecom is responsible for recovering the Subscriber Line Charge from the National Exchange Carriers Association interstate toll settlement pool just as BellSouth does today. The maximum rate that Supra Telecom may charge for Lifeline Service shall be capped at the flat retail rate offered by BellSouth.

5 AdWatch^{SM} Service is tariffed as BellSouth® AIN Virtual Number Call Detail Service.

6 In Tennessee, long-term **promotions** (offered for more than ninety (90) days) may be obtained at one of the following rates:

(a) the stated tariff rate, less the wholesale discount;

(b) the promotional rate (the promotional rate offered by BellSouth will not be discounted further by the wholesale discount rate)

NETWORK ELEMENTS AND COMBINATIONS

1. Introduction

This Attachment sets forth the Network Elements and Combinations that BellSouth agrees to offer to Supra Telecom in accordance with its obligations under Section 251(c)(3) of the Act. The specific terms and conditions that apply to the Network Elements and Combinations are described below in this Attachment 2. The prices for the Network Elements and Combinations are set forth in Exhibit A of this Attachment 2.

1.1 BellSouth agrees to provide to Supra Telecom access to and Supra Telecom agrees to utilize Network Elements and Combinations in accordance with effective rules and regulations of the FCC or Commission. The Parties further agree that should such rules and regulations become vacated or stayed, that the Parties shall conform this Attachment 2 accordingly.

2. Network Elements and Combinations

2.1 Network Element is defined to mean a facility or equipment used in the provision of a telecommunications service. Such term may include, but is not limited to, features, functions, and capabilities that are provided by means of such facility or equipment, including but not limited to, subscriber numbers, databases, signaling systems, and information sufficient for billing and collection or used in the transmission, routing, or other provision of a telecommunications service. BellSouth offers access to the following Network Elements: local loops; network interface devices; subloops; switching capabilities; interoffice transmission facilities; operations support systems functions; signaling networks; access to call-related databases; and service management systems, as set forth in this Attachment 2. BellSouth shall offer operator services and directory assistance pursuant to the rates, terms and conditions contained within this Attachment.

2.2 BellSouth shall provide to Supra Telecom for the provision of a telecommunications service, non-discriminatory access to Network Elements at any technically feasible point on terms and conditions that are just, reasonable, and non-discriminatory in accordance with the terms and conditions of the Agreement.

2.3 BellSouth will permit Supra Telecom to interconnect Supra Telecom's facilities or facilities provided to Supra Telecom by an ILEC or by third parties with each of BellSouth's Network Elements at any point

designated by Supra Telecom that is technically feasible. Any request by Supra Telecom to interconnect at a point not previously established (i) in accordance with the terms of the Agreement or (ii) under any arrangement BellSouth may have with another telecommunications carrier, shall be subject to the process set forth in Section 14 of the General Terms and Conditions of this Agreement, incorporated herein by this reference.

2.4 BellSouth will provide Network Elements and Combinations to Supra Telecom via a standard interface that allows the Network Elements and Combinations to operate within the appropriate technical specification unless another technically feasible interface is agreed to by the Parties. Supra Telecom , at its option, may designate other interfaces using the process set forth in Section 14 of the General Terms and Conditions of this Agreement, incorporated herein by this reference.

2.5 Supra Telecom may use one or more Network Elements and Combinations to provide to itself, its affiliates and to Supra Telecom end users any feature, function, capability or service option that such Network Elements and Combinations are technically capable of providing or any feature, function, capability or service option that is described in the Telcordia and other industry standard technical references.

2.6 In addition to Combinations furnished by BellSouth to Supra Telecom hereunder, BellSouth shall permit Supra Telecom to combine any Network Element or Network Elements provided by BellSouth with another Network Element, other Network Elements or Access Services obtained from BellSouth or with compatible network components provided by Supra Telecom or provided by third parties to Supra Telecom to provide telecommunications services to Supra Telecom , its affiliates and to Supra Telecom end users.

2.7 Except upon request by Supra Telecom , BellSouth shall not separate requested Network Elements that BellSouth currently combines.

2.7.1 For the purposes of this Agreement, Network Elements shall be deemed to be currently combined in BellSouth's network when such elements are in fact combined by BellSouth to provide service to a particular end user at a particular location. BellSouth will make available new, not Currently Combined EELs, combinations of Loops and transport Network Elements, in density zone 1 of the Miami, Orlando, and Ft. Lauderdale, FL; Charlotte and Greensboro, NC; New Orleans, LA; and Nashville, TN, MSAs at the rates set forth in Exhibit A, attached hereto and incorporated herein by this reference.

2.8 For each Network Element, BellSouth shall provide a demarcation point (e.g., an interconnection point at a digital signal cross connect or light guide cross connect panel or a main distribution frame) and, if necessary, access to such demarcation point, which Supra Telecom agrees is suitable. However, where BellSouth provides Combinations to Supra Telecom , BellSouth may provide the existing interconnections and no demarcation point shall exist between the combined Network Elements.

2.9 The nonrecurring rates set forth in Exhibit A of this Attachment 2 are for Currently Combined Network Elements.

2.10 Attachment 2 of this Agreement describes the Network Elements that Supra Telecom and BellSouth have identified as of the Effective Date of this Agreement and are not exclusive. Either Party may identify additional or revised Network Elements as necessary to improve services to end users, to improve network or service efficiencies or to accommodate changing technologies, or end user demand. Upon BellSouth's offering of a new or revised Network Element, BellSouth shall notify Supra Telecom of the existence of and the technical characteristics of the new or revised Network Element. Upon Supra Telecom 's identification of a new or revised Network Element, it shall make a request pursuant to Attachment 10 of this Agreement, incorporated herein by this reference.

2.11 Special Access Service Conversions

2.11.1 Supra Telecom may not convert special access services to Currently Combined Network Elements of loop and transport Network Elements, whether or not Supra Telecom self-provides its entrance facilities (or obtains entrance facilities from a third party), unless Supra Telecom uses Currently Combined Network Elements to provide a significant amount of local exchange service, in addition to exchange access service, to a particular customer. To the extent Supra Telecom converts its special access services to Currently Combined Network Elements of loop and transport Network Elements at the rates set forth in Exhibit B of this Attachment 2, incorporated herein by this reference, Supra Telecom hereby certifies that it is providing a significant amount of local exchange service over said Currently Combined Network Elements. Further, Loop/Transport Combinations must be connected to Supra Telecom 's switch and must be used in the provision of circuit switched telephone exchange service. BellSouth may at its sole

discretion audit Supra Telecom records in order to verify the type of traffic being transmitted over combinations of loop and transport Network Elements. If, based on its audits, BellSouth concludes that Supra Telecom is not providing a significant amount of local exchange traffic over the combinations of loop and transport Network Elements, BellSouth may file a complaint with the appropriate Commission, pursuant to the dispute resolution process as set forth in the Interconnection Agreement. In the event that BellSouth prevails, BellSouth may convert such combinations of loop and transport Network Elements to special access services and may seek appropriate retroactive reimbursement from Supra Telecom .

2.11.2 EEL combinations for DS1 level and above will be available only when Supra Telecom provides and handles at least one third of the end user's local traffic over the facility provided. In addition, on the DS1 loop portion of the combination, at least fifty (50) percent of the activated channels must have at least five (5) percent local voice traffic individually and, for the entire DS1 facility, at least ten (10) percent of the traffic must be local voice traffic.

2.11.3 When combinations of loop and transport network elements include multiplexing, each of the individual DS1 circuits must meet the above criteria.

2.12 Standards for Network Elements

2.12.1 BellSouth shall comply with the requirements set forth in the technical references, as well as any performance or other requirements identified in this Agreement, to the extent that they are consistent with the greater of BellSouth's actual performance or applicable industry standards.

2.12.2 If one or more of the requirements set forth in this Agreement are in conflict, the parties shall mutually agree on which requirement shall apply. If the parties cannot reach agreement, the dispute resolution process set forth in Section 16 of the General Terms and Conditions of this Agreement, incorporated herein by this reference, shall apply.

2.12.3 The quality of the Network Elements as well as the quality of the access to said Network Elements that BellSouth provides to Supra Telecom shall be, to the extent technically feasible, at least equal to that which BellSouth provides to itself. Detailed performance

3.3.2 In so far as it is technically feasible, BellSouth shall test and report trouble for all the features, functions and capabilities of conditioned lines, and may not restrict testing to voice-transmission only.

3.4 As a chargeable option on all loops except unbundled copper loop ("UCL"), BellSouth will offer Order Coordination Time Specific ("OC-TS"). This will allow Supra Telecom the ability to specify the time that the coordinated conversion takes place. The OC-TS charge for orders due on the same day at the same location will be applied on a per appropriate local service request basis.

3.5 BellSouth will offer unbundled voice-grade loops ("UVL") Service Level Two ("SL2").

3.5.1 SL2 loops shall have test points, will be designed with a design layout record ("DLR") provided to Supra Telecom , and will be provided with order coordination ("OC"). The OC feature will allow Supra Telecom to coordinate the installation of the loop with the disconnect of an existing end user's service and/or number portability service. In these cases, BellSouth will perform the order conversion with standard order coordination at its discretion during normal work hours.

3.5.2 Supra Telecom will be responsible for isolating troubles on SL2 loops. Once Supra Telecom has isolated a trouble to the BellSouth provided loop, Supra Telecom will issue a trouble report to BellSouth on the loop. BellSouth will take the actions necessary to repair the loop if trouble actually exists. BellSouth will repair these loops in the same time frames that BellSouth repairs similarly situated loops to its end users.

3.5.3 If Supra Telecom reports a trouble on SL2 loops and no trouble actually exists, BellSouth will charge Supra Telecom for any dispatching and testing (outside the central office) required by BellSouth in order to confirm the loop's working status.

3.6 BellSouth will also offer unbundled digital loops ("UDL"). They will be designed, will be provisioned with test points (where appropriate), and will come standard with Order Coordination and a DLR.

3.6.1 Supra Telecom will be responsible for isolating troubles on UDL. Once Supra Telecom has isolated a trouble to the BellSouth provided loop, Supra Telecom will issue a trouble report to BellSouth on the loop. BellSouth will take the actions necessary to repair the loop if a trouble actually exists. BellSouth will repair these loops in the same time frames that BellSouth repairs similarly situated loops to its end users.

3.6.2 If Supra Telecom reports a trouble on a UDL and no trouble actually exists, BellSouth will charge Supra Telecom for any dispatching and testing (outside the central office) required by BellSouth in order to confirm the loop's working status.

3.7 In addition to the UVLs and UDLs, BellSouth shall make available an UCL. The UCL will be a copper twisted pair loop that is unencumbered by any intervening equipment (e.g., filters, load coils, range extenders, digital loop carrier, or repeaters). The UCL will be offered in two versions - short and long. A short UCL (18 kft or less) will be provisioned according to Resistance Design parameters. The long UCL (beyond 18kft) will be used when Supra Telecom wants to condition copper loops longer than 18kft by removing load coils and other intervening equipment. BST will only ensure electrical continuity and balance relative to tip and ring on UCLs.

3.7.1 The UCL will be a designed circuit, with or without conditioning, provisioned with a test point and come standard with a DLR. OC will be offered as a chargeable option on all UCL loops. OC-TS will not be offered on UCLs.

3.7.2 The UCL is a dry copper loop and is not intended to support any particular telecommunications service. Supra Telecom may use the UCL loop for a variety of services, including xDSL (e.g., ADSL and HDSL) services, by attaching appropriate terminal equipment of Supra Telecom 's choosing. Supra Telecom will determine the type of service that will be provided over the loop.

3.7.3 Because the UCL shall be an unbundled loop offering that is separate and distinct from BellSouth's ADSL and HDSL capable loop offerings, Supra Telecom agrees that BellSouth's UCL loop will not be held to the service level and performance expectations that will apply to its ADSL and HDSL unbundled loop offerings. BellSouth shall only be obligated to maintain copper continuity and provide balance relative to tip and ring on UCL.

3.7.4 The UCL shall be provided to Supra Telecom in accordance withBellSouth's Technical Reference 73600.

3.8 Provisioning and Coordinated Cutovers

3.8.1 The following coordination procedures shall apply when BellSouth retail service is being converted to service to be provided by Supra Telecom utilizing a SL2 local loop provided by BellSouth to Supra Telecom ; a SL2 local loop provided by BellSouth to Supra Telecom with interim or local number portability; stand alone interim number

portability ordered by Supra Telecom ; and any other Service or Element that requires project coordination as set forth in this Agreement or in the BellSouth local number portability guidelines.

3.8.2 Supra Telecom shall order Services and Elements as set forth in this Attachment 2 and BellSouth shall provide a Firm Order Confirmation within the interval set forth in this Agreement. When Supra Telecom desires to dictate a specific time for the coordinated cutover of a local loop ordered, Supra Telecom shall do so by requesting on the Local Service Request, Order Coordination – Time Specific and paying the appropriate rate set forth in Exhibit A, incorporated herein by this reference.

3.8.3 Any coordinated conversion and associated translations requirements shall be performed so as to limit end user service outage. In all other instances of coordination the procedures set forth in this section shall apply.

3.8.4 For the purposes of coordinated cutovers, BellSouth shall contact Supra Telecom 24 to 48 hours prior to the conversion due date. At this contact the Parties shall agree upon a conversion time. Supra Telecom and BellSouth shall use best efforts to ensure that the actual conversion activity will occur within 30 minutes of the previously agreed upon conversion time.

3.8.5 BellSouth will perform the appropriate preservice testing to determine whether Supra Telecom dial tone is being delivered to the appropriate connecting point, which may be, if appropriate, a cross connect or tie cable between BellSouth's main distribution frame and Supra Telecom 's collocation space. The timing of the preservice testing is dependent upon the actual interval of the Service or Element being provided by BellSouth to Supra Telecom , but in any event, will be completed within 24 hours of the agreed upon conversion time. Where a field visit is required to provision the local loop, BellSouth will test the local loop to the Network Interface Device. Supra Telecom may request that BellSouth perform testing to the Network Interface Device when a field visit is not required for provisioning the local loop, however, Supra Telecom shall be billed for such testing at the time and materials rate set forth in BellSouth's General Subscriber Services Tariff.

3.8.6 If, at the conclusion of the preservice testing, BellSouth cannot verify that Supra Telecom dial tone is being delivered to the appropriate connecting point, it will contact Supra Telecom and work cooperatively to determine and alleviate the cause of the failure.

3.8.7 BellSouth will advise Supra Telecom at completion of the conversion or turn up of new services, in order for Supra Telecom to accept or reject the services being provisioned.

3.8.8 Any billing credits, waivers of service charges or billing of charges for failure to perform a coordinated cutover pursuant to the procedures set forth in this section shall be as set forth in Attachment 6, incorporated herein by this reference.

3.9 Technical Requirements

BellSouth shall offer Loops capable of providing the following:

3.9.1.1 2-wire analog voice grade Loop provides an effective 2-wire channel with 2-wire interfaces at each end that is suitable for the transport of analog voice grade (nominal 300 to 3300 Hz) signals and using either Loop-start or ground start signaling;

3.9.1.2 4-wire analog voice grade Loop provides an effective 4-wire channel with 4-wire interfaces at each end that is suitable for the transport of analog voice grade (nominal 300 to 3300 Hz) signals. The service will operate with one of the following signaling types that may be specified when the service is ordered: Loop-start, ground-start, Loop-reverse-battery, duplex;

3.9.1.3 2-wire ISDN digital grade Loop provides a channel with 2-wire interfaces at each end that is suitable for the transport of 144 kbps digital services using the ISDN 2B1Q line code;

3.9.1.4 Supra Telecom will be responsible for providing BellSouth with a Service Profile Identifier ("SPID") associated with a particular ISDN-cable loop and end user. With the SPID, BellSouth will be able to adequately test the circuit and ensure that it properly supports ISDN service;

3.9.1.5 ADSL-capable Loop – an ADSL-capable Loop is a basic Loop (2 or 4-wire) without any intervening equipment and is capable of permitting the transmission of communications both within the voice band and in frequency ranges above the voice band. An ADSL-capable Loop provided by BellSouth is designed to RRD guidelines and is expected to support ADSL service;

3.9.1.6 HDSL-capable Loop – an HDSL-capable Loop is a basic Loop (2 or 4-wire) without any intervening equipment and is capable of permitting the transmission of communications both within the voice band and in frequency ranges above the voice band. An HDLS-capable Loop

provided by BellSouth is designed to CSA guidelines and is expected to support HDSL service;

3.9.1.7 4-wire DS-1 Loop provides a channel with 4-wire interfaces at each end. Each 4-wire channel may be equipped with DS-1 Loop repeaters suitable for the transport of 1.544 mbps digital signals simultaneously in both directions using PCM line code ; and

3.9.1.8 UCL is a dry copper Loop, not intended to support any particular telecommunications service. UCL Loops are offered pursuant to Section 3.7 of this Attachment 2. The UCL is available with a no signaling option.

3.9.2 The following provisions shall apply until the Parties negotiate a line sharing arrangement pursuant to the effective rules and regulations of the FCC. At such time, the Parties will amend these provisions to reflect their agreement.

3.9.2.1 In cases in which Supra Telecom has requested that BellSouth remove equipment from the BellSouth loop, BellSouth will no longer be expected to maintain and repair the loop to the standards specified for that loop type in the TR73600 and other standards referenced in this Agreement. BellSouth will only support that these loops provide electrical continuity and balance relative to tip-and-ring.

3.9.2.2 Supra Telecom , in performance of its obligations pursuant to the preceding Section, shall maintain records that will reflect that pursuant to Supra Telecom 's request BellSouth has removed certain equipment from BellSouth provided loops and as such the loop may not perform within the technical specifications associated with that loop type. Supra Telecom will not report to BellSouth troubles on said loops where the loops are not performing within the technical specifications of that loop type.

3.9.2.3 In addition, Supra Telecom recognizes there may be instances where a loop modified in this manner may be subjected to normal network configuration changes that may cause the circuit characteristics to be changed and may create an outage of the service that Supra Telecom has placed on the loop. If this occurs, BellSouth will work cooperatively with Supra Telecom to restore the circuit to its previous modified status as quickly as possible. Supra Telecom will pay the Time and Materials costs associated with BellSouth's work efforts needed to bring the loop back to its previous modified status.

3.10 Integrated Digital Loop Carriers

3.10.1 If Supra Telecom requests one or more loops served by an Integrated Digital Loop Carrier system ("IDLC"), BellSouth shall unbundle the IDLC-delivered loop, as soon as practicable, using one of the following alternative arrangements: (1) utilize existing Next Generation Digital Loop Carrier ("NGDLC") facilities; (2) utilize existing Universal Digital Loop Carrier ("UDLC"); (3) utilize existing cooper facilities that serve the distribution area or allocate new copper feeder pairs to the distribution area if spare capacity is available in the feeder route or carrier serving area; (4) utilize spare capacity of existing Integrated Network Access system or other existing IDLC that is terminated on a digital cross-connect system; (5) utilize side-door/hairpin capability of switch peripheral if the serving IDLC is terminated on a peripheral with those capabilities, or if spare capacity is available on a switch peripheral; (6) activate new IDLC or NGDLC capacity to the distribution area; or (7) convert some existing IDLC capacity to UDL. These alternative arrangements will be used where available to permit Supra Telecom to order a Loop and to provide Supra Telecom with the capability to serve end users at the same level BellSouth provides its retail customers, to the extent technically feasible.

4. Network Interface Device ("NID")

4.1 Definition. The NID is defined as any means of interconnection of end user customer premises wiring to BellSouth's distribution plant, such as a cross-connect device used for that purpose. The NID is a single-line termination device or that portion of a multiple-line termination device required to terminate a single line or circuit at the end user's premises. The NID features two independent chambers or divisions that separate the service provider's network from the on-premises wiring. Each chamber or division contains the appropriate connection points or posts to which the service provider, and the end user each make their connections. The NID provides a protective ground connection and is capable of terminating cables such as twisted pair cable.

4.2 BellSouth shall permit Supra Telecom to connect Supra Telecom 's loop facilities to on-premises wiring through BellSouth's NID or at any other technically feasible point.

4.3 **Access to Network Interface Device**

4.3.1 Due to the wide variety of NIDs utilized by BellSouth (based on subscriber size and environmental considerations), Supra Telecom may access the subscriber's inside wire by any of the following means:

4.3.1.1 BellSouth shall allow Supra Telecom to connect its loops directly to BellSouth's multi-line residential NID enclosures that have additional space and are not used by BellSouth or any other telecommunications carriers to provide service to the premise.

4.3.1.2 Where an adequate length of on-premises wiring is present and environmental conditions permit, either Party may remove the on-premises wiring from the other Party's NID and connect that wire to that Party's own NID; orEnter the subscriber access chamber or "side" of "dual chamber" NID enclosures for the purpose of extending a connecterized or spliced jumper wire from the on-premises wiring through a suitable "punch-out" hole of such NID enclosures; or

4.3.1.3 Request BellSouth to make other rearrangements to the on-premises wiring terminations or terminal enclosure on a time and materials cost basis to be charged to the requesting Party (i.e., Supra Telecom , its agent, the building owner or the subscriber). Such charges will be billed to the requesting Party.

4.3.2 In no case shall either Party remove or disconnect the other Party's loop facilities from either Party's NIDs, enclosures, or protectors except where the Commission has authorized such removal or disconnection. Where the Commission has authorized such action, the Party removing or disconnecting the other Party's loop shall do so after providing notice to the other Party. Further, it shall be the responsibility of the Party disconnecting or removing the loop to properly ground the loop; to maintain the NID and to assume full liability for its actions and any adverse consequences that may occur as a result of the loop being disconnected and removed or as a result of assuming maintenance responsibilities for the NID.

4.3.3 In no case shall either Party remove or disconnect ground wires from the other Party's NID, enclosures, or protectors.

4.3.4 In no case shall either Party remove or disconnect NID modules, protectors, or terminals from the other Party's NID enclosures.

4.3.5 Due to the wide variety of NID enclosures and outside plant environments BellSouth will work with Supra Telecom to develop specific procedures to establish the most effective means of implementing this section.

4.3.6 Technical Requirements

The NID shall provide an accessible point of interconnection for the on-premise wiring, for BellSouth's facilities, for the Subloop Distribution

and/or cross connect to Supra Telecom 's NID, and shall maintain a connection to ground.

4.3.6.1 The NID shall be capable of transferring electrical analog or digital signals between the on-premise wiring and the Subloop Distribution and/or cross connect to Supra Telecom 's NID, consistent with the NID's function at the Effective Date of this Agreement.

4.3.6.2 Where a BellSouth NID exists, it is provided in its "as is" condition. Supra Telecom may request BellSouth do additional work to the NID at the time and materials charges set forth in the appropriate BellSouth Tariff.

4.3.6.3 When Supra Telecom deploys its own local loops with respect to multiple-line termination devices, Supra Telecom shall specify the quantity of NID connections it requires within such device.

5. Subloops

5.1 Definitions

5.1.1 Subloop. The subloop network element is defined as any portion of the loop that is technically feasible to access at terminals in BellSouth's outside plant, including inside wire. An accessible terminal is any point on the loop where technicians can access the wire or fiber within the cable without removing a splice case to reach the wire or fiber within. Such points may include, but are not limited to, the pole or pedestal, the network interface device, ("NID") the minimum point of entry, ("MPOE") the single point of interconnection, the main distribution frame, the remote terminal, and the feeder/distribution interface ("FDI").

5.1.2 Inside Wire. Inside wire is defined as all loop plant owned by BellSouth on end user customer premises as far as the point of demarcation as defined in 47 C.F.R § 68.3, including the loop plant near the end user customer premises. Supra Telecom may access the inside wire subloop at any technically feasible point including, but not limited to, the NID, the MPOE, the single point of interconnection, the pedestal, or the pole.

5.1.3 Subloop elements include, but are not limited to, the following: Distribution, including inside wire; Concentration Multiplexing Functionality; and Feeder.

5.2 **Subloop Distribution**

5.2.1 Definition

5.2.1.1 Subloop Distribution is that portion of the loop between an accessible terminal on the end user side of an FDI, and the end user's point of demarcation. An accessible terminal is a point on the loop where the sub-loop can be accessed without removing a splice case. Subloop Distribution can be accessed at any technically feasible point, including but not limited to, a pole or pedestal, a Network Interface Device ("NID"), a minimum point of entry ("MPOE"), or single point of interconnection ("SPOI") on a multi-unit premises which is constructed by BellSouth pursuant to Section 5.2.3 below. Subloop Distribution will be provisioned as 2-wire or 4-wire circuits up to and including the end user's demarcation point.

5.2.1.2 Subloop Distribution will be copper twisted pair.

5.2.1.3 If Supra Telecom requests a copper twisted distribution pair and it is not available, Supra Telecom may use the Special Construction process to determine the cost of providing the copper facilities.

5.2.2 Requirements for Subloop Distribution

5.2.2.1 Subloop distribution shall be capable of carrying all signaling messages or tones that are technically feasible for media copper facilities.

5.2.2.2 BellSouth will provision, test, and maintain subloop distribution as set forth in Attachment 7 of this Agreement, incorporated herein by this reference

5.2.2.3 BellSouth shall offer Subloop Distribution in accordance with this Section 5.2.

5.2.2.4 Upon request, BellSouth shall provide line conditioning for Subloop Distribution pursuant to Section 3.3 of this Attachment 2 and at the rates set forth in Exhibit A of this Attachment 2, all incorporated herein by this reference.

5.2.3 Single Unit & Multiunit Installation

5.2.3.1 In the case of BellSouth facilities serving a single unit installation (e.g., a single residence or single business location), Subloop Distribution consists of copper facilities providing connectivity between the end user's point of demarcation, including the point of demarcation, and the end user side of the FDI and can be accessed at any technically feasible point in between.

5.2.3.2 In the case of BellSouth facilities serving multiple unit installations, e.g., apartments, condominiums, office buildings and office complexes, access to Sub-Loop Distribution shall be provided to Supra Telecom either by Unbundled Sub-Loop Distribution ("USL-D"), Unbundled Sub-Loop Intra-building Network Cable ("USL-INC") or Unbundled Network Terminating Wire ("UNTW") as requested by Supra Telecom , at the appropriate rate set forth in Exhibit A to this Attachment.

5.2.4 Unbundled Sub-loop – Distribution ("USL-D"). USL-D is the Subloop element which includes the facility from a cross-connect device in the field (i.e., terminal block or cross connect panel) on the end user side of a Feeder Distribution Interface ("FDI"), or any other interconnection point in between these points, to the end user's point of demarcation.

5.2.4.1 Where Supra Telecom has requested access to the USL-D, BellSouth will determine if is technically feasible to place the required facilities. If existing capacity is sufficient to meet Supra Telecom 's request, BellSouth will perform the set-up work to connect Supra Telecom 's cable pairs within the cross-connect device. Supra Telecom will then deliver its feeder facility cable to the BellSouth cross-connect device in the field. Supra Telecom 's cable will be connected, by a BellSouth technician, to a cross-connect panel within BellSouth's cross-connect device.

5.2.4.2 Once the set-up work has been completed, Supra Telecom may order the USL-D pairs by submitting a Local Service Request ("LSR") form to the Local Carrier Service Center ("LCSC"). A BellSouth technician will then connect the ordered USL-D pairs to Supra Telecom 's cable pairs within the BellSouth cross-connect device.

5.2.4.3 If existing capacity is not sufficient to accommodate Supra Telecom 's request for USL-D, and work must be done to modify existing BellSouth facilities or add new facilities, Supra Telecom may use BellSouth's Special Construction ("SC") process to determine additional costs required to provision the USL-D. Supra Telecom will then have the option of paying the SC charges to modify the BellSouth facilities.

5.2.5 Unbundled Sub-Loop-Intrabuilding Network Cable ("USL-INC") (a.k.a. riser cable). USL-INC is the distribution facility inside a building or between buildings on the same premises (continuous property not separated by a public street or road) and is on BellSouth's side of the demarcation point. INCs are used to distribute network access facilities to equipment rooms (wiring closet), cross-connection or other distribution point on which connection is made with customer premises wiring. Sub-Loop-INC will include the facility from the cross-connect

device in the building equipment room up to and including the point of demarcation.

5.2.5.1 Where Supra Telecom has requested access to the USL-INC, BellSouth will determine if is technically feasible to place the required facilities. If existing capacity and space is sufficient to meet Supra Telecom 's request, BellSouth will perform the set-up work. BellSouth will provide and install a cross-connect panel for the purpose of providing Supra Telecom access to the USL-INC pairs. The cross-connect panel will be accessible by multiple carriers as space permits. BellSouth will place cross-connect blocks in 25 pair increments for Supra Telecom 's use on this cross-connect panel. Supra Telecom will be responsible for connecting its facilities to the 25 pair cross-connect block(s).

5.2.5.2 Once the set-up work has been completed, Supra Telecom may order USL-INC pairs by submitting a Local Service Request ("LSR") form to the Local Carrier Service Center ("LCSC"). A BellSouth technician will then connect the requested USL-INC pairs on the cross-connect block and Supra Telecom will have access to the requested USL-INC pairs to connect to its facilities.

5.2.6 Unbundled Network Terminating Wire ("UNTW"). UNTW is twisted-pair copper wire that extends from the BellSouth Garden Terminal or Wiring Closet at the point of termination of BellSouth's loop distribution facilities to the end-user's point of demarcation. UNTW is the final portion of the loop owned by BellSouth.

5.2.7 Requirements

5.2.7.1 On a multi-unit premises where BellSouth owns the network terminating wire, and by request of Supra Telecom , BellSouth will construct an Access Terminal at each Garden Terminal or in a Wiring Closet location that is suitable for use by multiple carriers. In a Multi-Dwelling Unit ("MDU"), UNTW pairs at each Access Terminal location will be connected to the Access Terminals. Supra Telecom will be required to deliver and connect its central office facilities to this Access Terminal. Supra Telecom is responsible for obtaining the property owner's permission for BellSouth to install the Access Terminals. Supra Telecom may access any available pair on an Access Terminal unless BellSouth is using the pair to concurrently provide service. Prior to connecting Supra Telecom service on a pair previously used by BellSouth, Supra Telecom is responsible for ensuring the end-user is no longer using BellSouth service before it accesses the UNTW pairs.

5.2.7.2 In new construction, where possible, both Parties may at their option and with the property owner's agreement install their own NTW. In existing construction, BellSouth shall not be required to install new or additional NTW if NTW is not available to provision the services of Supra Telecom .

5.2.7.3 BellSouth will only provide access to UNTW where BellSouth provides the wiring all the way to the end-user's premises.

5.2.7.4 The non-recurring and recurring charges for accessing the UNTW pairs set forth in Exhibit A to this Attachment shall apply at the time Supra Telecom activates the pairs. Once Supra Telecom has accessed a UNTW pair to serve its end user, Supra Telecom shall submit a Local Service Request ("LSR") form to BellSouth to report activation of that UNTW pair. Supra Telecom may submit a single LSR to report multiple pairs on the same Access Terminal.

5.2.7.5 Supra Telecom will be responsible for isolating and reporting UNTW repair problems to the UNE Center. Supra Telecom must tag the UNTW pair that requires repair for BellSouth. If BellSouth dispatches a technician on a reported trouble call and no UNTW trouble is found, BellSouth will charge Supra Telecom for time spent on the dispatch and for time spent testing UNTW.

5.2.7.6 If Supra Telecom or a third party service provider has not activated at least one UNTW pair on an Access Terminal installed pursuant to Supra Telecom 's request within six months of installation of the Access Terminal, BellSouth may bill Supra Telecom a non-recurring charge equal to the actual cost of provisioning the Access Terminal.

5.2.7.7 If BellSouth determines that Supra Telecom is accessing UNTW pairs without reporting such access to BellSouth, BellSouth may take the following action:

5.2.7.8 If Supra Telecom has issued a LSR to disconnect an end-user from BellSouth in order to use a UNTW pair, Supra Telecom will be billed for the usage of the pair back to the disconnect order date.

5.2.7.9 If Supra Telecom activated a UNTW pair on which BellSouth was not previously providing service, Supra Telecom will be billed for the use of that pair back to the date the end-user began receiving service using that pair. Upon request from BellSouth, Supra Telecom will provide copies of its billing records to substantiate such date. If Supra Telecom fails to provide such records, then BellSouth will bill back to Supra Telecom for the UNTW pairs, to the date of the Access Terminal installation.

5.2.8 Single Point of Interconnection

5.2.8.1 If a single point of interconnection ("SPOI") is not available and upon Request from Supra Telecom , BellSouth will install a SPOI at a multi-unit premises if it is technically feasible and where space allows. The SPOI should be suitable for use by multiple carriers. Supra Telecom , as the requesting party, must obtain the property owner's permission for BellSouth to install additional facilities on Supra Telecom 's behalf.

5.2.8.2 This obligation is in addition to BellSouth's obligation to provide nondiscriminatory access to sub-loops at any technically feasible point.

5.2.9 Rates for installing a SPOI will be determined on an individual case basis.

5.3 Subloop Concentration Multiplexing Functionality

5.3.1 Where facilities permit, BellSouth will provide to Supra Telecom the ability to concentrate its subloops onto multiple DS1s back to the BellSouth central office.

5.3.2 Definition

5.3.2.1 The Subloop Concentration Multiplexing Functionality: (1) aggregates lower bit rate or bandwidth signals to higher bit rate or bandwidth signals (multiplexing); (2) disaggregates higher bit rate or bandwidth signals to lower bit rate or bandwidth signals (demultiplexing); (3) aggregates a specified number of signals or channels to fewer channels (concentrating); (4) performs signal conversion, including encoding of signals (e.g., analog to digital and digital to analog signal conversion); and (5) where available, performs electrical to optical (E/O) conversion.

5.3.2.2 The Subloop Concentration Multiplexing Functionality may be provided through a Digital Loop Carrier ("DLC") system, multiplexer or other equipment at which traffic is encoded and decoded, multiplexed and demultiplexed, or concentrated.

5.3.3 Technical Requirements

The Subloop Concentration Multiplexing Functionality, if deployed, is used to concentrate and or multiplex the Supra Telecom distribution media to the BellSouth feeder media. BellSouth's feeder media can be copper, coaxial (if deployed) or fiber. To the extent unbundling involves "concentration," BellSouth and Supra Telecom will work cooperatively to establish concentration ratios for the specific

application within the technical limits that may exist with deployed equipment and facilities. If concentration ratios are established which result in reengineering of the facilities, special construction charges will apply.

5.3.3.1 When BellSouth provides a Subloop Concentration Multiplexing Functionality or Loop repeaters, BellSouth shall provide power for subloop equipment through a non-interruptible source with battery backup unless otherwise mutually agreed upon by the Parties.

5.3.3.2 The Subloop Concentration Multiplexing Functionality shall be provided to Supra Telecom in accordance with applicable industry standard technical references.

5.3.3.3 The Subloop Concentration Multiplexing Functionality shall continuously monitor protected circuit packs and redundant common equipment in the same manner which BellSouth provides such functionality to itself.

5.3.3.4 The redundant common equipment shall also automatically switch to a protection circuit pack on detection of a failure or degradation of normal operation where technically feasible.

5.3.3.5 The Subloop Concentration Multiplexing Functionality shall be capable of performing its functions on the signals needed to provide telecommunications services capable of being transmitted through said Subloop Concentration Multiplexing Functionality.

5.3.3.6 BellSouth shall provide power for the Subloop Concentration Multiplexing Functionality, through a non-interruptible source if the function is performed in a central office, or from a commercial AC power source with battery backup if the equipment is located outside a central office, where BellSouth provides such functionality to itself.

5.3.3.7 With the Effective Date of this Agreement, Subloop Concentration Multiplexing Functionality, using the Lucent Series 5 equipment, will be offered in two different systems. System A will allow up to 96 of Supra Telecom 's subloops to be concentrated onto multiple DS1s. System B will allow an additional 96 of Supra Telecom's subloops to be concentrated onto multiple DS1s. One System A may be supplemented with one System B and they both must be physically located in a single Series 5 dual channel bank. A minimum of two DS1s is required for each system (i.e., System A requires two DS1s and System B would require an additional two DS1s or four in total). The DS1 level facility that connects the RT site with the BSWC is known as a feeder interface. Except where the Subloop Concentration

Multiplexing Functionality is currently combined with other Network Elements. All DS1 Feeder Interfaces will terminate to Supra Telecom 's Collocation Space within the BSWC that serves the RT where Supra Telecom 's subloops are connected. Subloop Concentration Multiplexing Functionality service is offered with or without concentration and with or without a protection DS1. If BellSouth deploys a different technology for Subloop Concentration Multiplexing Functionality in its network, the Parties will negotiate rates, terms and conditions for Supra Telecom 's access to such Subloop Concentration Multiplexing Functionality.

5.3.3.8 If technically feasible, BellSouth shall provide Supra Telecom access to the Subloop Concentration Multiplexing Functionality in response to a specific Supra Telecom request. Otherwise, Supra Telecom would be required to place a cross-box, remote terminal, or other similar device and deliver a cable to the BellSouth remote terminal. This cable would be connected, by a BellSouth technician, to a cross-connect panel within the BellSouth RT/cross-box and would allow Supra Telecom 's subloops to then be placed on the Subloop Concentration Multiplexing Functionality.

5.3.3.9 The Subloop Concentration Multiplexing Functionality shall be provided to Supra Telecom in accordance with applicable industry standard technical references.

5.3.3.10 BellSouth shall provide Supra Telecom real time performance and alarm data that may affect Supra Telecom 's traffic, if and when technically feasible and to partition such data for Supra Telecom where feasible.

5.3.3.11 At Supra Telecom 's option BellSouth shall provide Supra Telecom with real time ability to initiate non service-affecting tests on the underlying device that provides Subloop Concentration Multiplexing Functionality.

5.4 Subloop Feeder

5.4.1 Definition

5.4.1.1 The Subloop Feeder is the Network Element that provides connectivity between (1) a FDI associated with Subloop Distribution and a termination point appropriate for the media in a central office, or (2) a Subloop Concentration Multiplexing Functionality provided in a remote terminal and a termination point appropriate for the media in a central office. If technically feasible, BellSouth shall provide Supra Telecom physical access to the FDI, and the right to connect the Subloop

Feeder to the FDI in response to a specific Supra Telecom request. Otherwise, BellSouth shall provide the necessary cabling between BellSouth's equipment (i.e., FDI) and Supra Telecom 's equipment.

5.4.1.2 The physical medium of the Subloop Feeder may be copper twisted pair, coaxial (if deployed), or single or multi-mode fiber. In certain cases, BellSouth must provide a copper twisted pair loop even in instances where the medium of the Subloop Feeder for services that BellSouth offers is other than a copper facility, and in such cases, the special construction process will be used to determine the cost of placing new copper facilities.

5.4.2 Requirements for Subloop Feeder

5.4.2.1 The Subloop Feeder shall be capable of transmitting analog voice frequency, basic rate ISDN, digital data, or analog radio frequency signals, where available in BellSouth's network.

5.4.2.2 BellSouth shall provide appropriate power for all active elements in the Subloop Feeder. BellSouth will provide appropriate power from a central office source, or from a commercial AC source with rectifiers for AC to DC conversion and 8-hour battery back-up when the equipment is located in an outside plant RT, where BellSouth provides such functionality to itself.

5.4.3 Additional Requirements for Special Copper Subloop Feeder Medium

5.4.3.1 In addition to requirements set forth in Section 5.4.2 above, and where available in the BellSouth network, Supra Telecom may require BellSouth to provide copper twisted pair Subloop Feeder which are unfettered by any intervening equipment (e.g. filters, load coils, and range extenders), so that Supra Telecom can use these Subloop Feeders for a variety of services by attaching appropriate terminal equipment at the ends.

5.4.4 Additional Technical Requirements for DS1 Conditioned Subloop Feeder

5.4.4.1 In addition to the requirements set forth in this Section and where available in the BellSouth network, Supra Telecom may designate that the Subloop Feeder be conditioned to transport a DS1 signal. The requirements for such transport are defined in the applicable industry standard technical references.

5.4.5 Additional Technical Requirements for Optical Subloop Feeder

5.4.5.1 Where available in BellSouth's network Supra Telecom may designate that Subloop Feeder will transport DS3 and OCn (where n is defined in the industry standard technical reference.). The requirements for such transport are defined in the applicable industry standard technical references.

5.4.6 Interface Requirements

5.4.6.1 If Supra Telecom desires access to unbundled Subloop Feeder in a BellSouth Central Offices, the Subloop Feeder point of termination ("POT") will be as follows:

5.4.6.1.1 Copper twisted pairs shall terminate on the MDF;

5.4.6.1.2 DS1 Subloop Feeder shall terminate on a DSX1, DCS1/0 or DCS3/1; and

5.4.6.1.3 Fiber Optic cable shall terminate on a LGX.

6. **Switching Capabilities**

6.1 BellSouth shall provide non-discriminatory access to local circuit switching capability, and local tandem switching capability, on an unbundled basis, except as set forth below in Section 6.3 of this Attachment 2, to Supra Telecom for the provision of a telecommunications service. BellSouth shall provide non-discriminatory access to packet switching capability on an unbundled basis to Supra Telecom for the provision of a telecommunications service only in the limited circumstance described in Section 6.6.9 of this Attachment 2.

6.2 Except as otherwise provided for herein, BellSouth shall not impose any restrictions on Supra Telecom regarding the use of Switching Capabilities purchased from BellSouth provided such use does not result in demonstrable harm to either the BellSouth network or personnel or the use of BellSouth's network by BellSouth or any other telecommunications carrier.

6.3 Local Circuit Switching Capability, including Tandem Switching Capability.

6.3.1 Definition

6.3.1.1 Local Circuit Switching capability is defined as: (A) line-side facilities, which, include but are not limited to, the connection between a loop termination at a main distribution frame and a switch line card; (B) trunk-side facilities, which include, but are not limited to, the connection

between trunk termination at a trunk-side cross-connect panel and a switch trunk card; (C) All features, functions, and capabilities of the switch, which include, but are not limited to: (1) the basic switching function of connecting lines to lines, line to trunks, trunks to lines, and trunks to trunks, as well as the same basic capabilities made available to BellSouth's end users, such as a telephone number, white page listings, and dial tone; and (2) all other features that the switch is capable of providing, including but not limited to, customer calling, custom local area signaling service features, and Centrex, as well as any technically feasible customized routing functions provided by the switch; and (D) switching provided by remote switching module functionality is included in Switching Capability. The switching capabilities used will be based on the line side features they support.

6.3.1.2 Notwithstanding BellSouth's general duty to unbundle local circuit switching, BellSouth shall not be required to unbundle local circuit switching for Supra Telecom when Supra Telecom serves end users with four (4) or more voice-grade (DS-0) equivalents or lines in locations served by BellSouth's local circuit switches, which are in the following MSAs: Atlanta, GA; Miami, FL; Orlando, FL; Ft. Lauderdale, FL; Charlotte-Gastonia-Rock Hill, NC; Greensboro/Winston-Salem/High Point, NC; Nashville, TN; and New Orleans, LA, and BellSouth has provided non-discriminatory cost based access to the Enhanced Extended Link ("EEL") throughout Density Zone 1 as determined by NECA Tariff No. 4 as in effect on January 1, 1999.

6.3.1.3 When BellSouth provides the local circuit switching, BellSouth will provide to Supra Telecom , upon request, customized routing (selective routing) of calls: (i) to a requested directory assistance services platform; (ii) to a requested operator services platform; (iii) for Supra Telecom 's PIC'ed toll traffic in a two (2) PIC environment to an alternative OS/DA platform designated by Supra Telecom or (iv) to a repair center. Supra Telecom end users may use the same dialing arrangements as BellSouth end users. BellSouth shall allow Supra Telecom to commingle local and toll OS and/or DA traffic on existing OS and/or FGD trunks. Customized routing will include but not be limited to the customized routing of inter-switch traffic on a wire center basis to a port other than the standard routing used by BellSouth.

6.4 AIN Customized (Selective) Carrier Routing

6.4.1 BellSouth will provide AIN customized carrier routing at the request of Supra Telecom . AIN customized carrier routing will provide Supra Telecom with the capability of routing operator calls, 0+ and 0- and 0+ NPA (LNPA) 555-1212 directory assistance, 1+411 directory assistance and 611 repair center calls, to pre-selected destinations.

6.4.2 Supra Telecom shall order AIN customized carrier routing through its Account Team. AIN customized carrier routing must first be established regionally and then on a per central office, per state basis.

6.4.3 AIN customized carrier routing is not available in DMS 10 switches.

6.4.4 Where AIN customized carrier routing is utilized by Supra Telecom , the routing of Supra Telecom 's end user calls shall be pursuant to information provided by Supra Telecom and stored in BellSouth's AIN customized carrier routing service control point database. AIN customized carrier routing shall utilize a set of line class codes ("LCCs") unique to a basic class of service assigned on an "as needed" basis. The same LCCs will be assigned in each central office where AIN customized carrier routing is established.

6.4.5 Upon ordering of AIN customized carrier routing regional service, Supra Telecom shall remit to BellSouth the regional service order non-recurring charges set forth in Exhibit A of this Attachment, incorporated herein by this reference. There shall be a non-recurring end office establishment charge per office due at the addition of each central office where AIN customized carrier routing will be utilized. Said non-recurring charge shall be as set forth in Exhibit A of this Attachment, incorporated herein by this reference. For each Supra Telecom end user activated, there shall be a non-recurring end user establishment charge as set forth in Exhibit A of this Attachment, payable to BellSouth pursuant to the terms of this Section 6.4, incorporated herein by this reference. Supra Telecom shall pay the AIN customized carrier routing per query charge set forth in Exhibit A of this Attachment, incorporated herein by this reference.

6.4.6 The regional service order non-recurring charge will be non-refundable and will be paid with 1/2 coming up-front with the submission of all fully completed required forms, including: Regional Customized Carrier Routing Order Request-Form A, Central Office AIN Customized Carrier Routing Order Request-Form B, AIN_SCR Central Office Identification Form-Form C, AIN_SCR Routing Options Selection Form-Form D, and Routing Combinations Table-Form E. BellSouth has thirty (30) days to respond to the client's fully completed firm order as a regional service order. With the delivery of this firm order response to Supra Telecom , BellSouth considers that the delivery schedule of this service commences. The remaining 1/2 of the regional service order payment must be paid when at least 90% of the central offices listed on the original order have been turned up for the service.

6.4.7 The non-recurring end office establishment charge will be billed to Supra Telecom following BellSouth's normal monthly billing cycle for this type of order.

6.4.8 End user establishment orders will not be turned-up until the second payment is received for the regional service order. The non-recurring end user establishment charges will be billed to Supra Telecom following BellSouth's normal monthly billing cycle for this type of order.

6.4.9 Additionally, the AIN customized carrier routing per query charge will be billed to Supra Telecom following the normal billing cycle for per query charges.

6.4.10 All other network components needed, for example, unbundled switching and unbundled local transport, etc., will be billed accordingly per contracted rates.

6.5 Technical Requirements

6.5.1 Local Switching shall be at least equal to the requirements for Local Switching set forth in the applicable industry standard technical references.

6.5.2 BellSouth's local switch shall maintain translations necessary to direct AIN queries for selected lines and dialing sequences to the Supra Telecom Signaling System 7 ("SS7") network.

6.5.3 BellSouth's local switch shall accept mutually agreeable AIN responses from the Supra Telecom Service Control Point ("SCP") via SS7 network interconnection then continue call handling according to instructions contained in the response.

6.5.4 BellSouth shall provide unbranded recorded announcements and call progress tones to alert callers of call progress and disposition.

6.5.5 BellSouth shall activate service for an Supra Telecom end user or network interconnection on any of the local circuit switching interfaces. This includes provisioning changes to change an end user from BellSouth's services to Supra Telecom 's services without loss of switch feature functionality as defined in this Agreement.

6.5.6 BellSouth shall perform routine testing (e.g., Mechanized Loop Tests ("MLT") and test calls such as 105, 107 and 108 type calls) and fault isolation on a mutually agreed upon schedule.

6.5.7 BellSouth shall repair and restore any equipment or any other maintainable component that may adversely impact local circuit switching.

6.5.8 BellSouth shall control congestion points such as those caused by radio station call-ins, and network routing abnormalities. All traffic shall be restricted in a non-discriminatory manner.

6.5.9 BellSouth shall perform manual call trace and permit end user originated call trace.

6.5.10 For local switching used as 911 Tandems, BellSouth shall allow interconnection from Supra Telecom local switching elements and BellSouth shall route the calls to the appropriate Public Safety Access Point ("PSAP").

6.5.11 Special Services provided by BellSouth will include the following:

6.5.11.1 Essential service lines;

6.5.11.2 Telephone Service Prioritization;

6.5.11.3 Related services for handicapped;

6.5.11.4 Soft dial tone where required by law; and

6.5.11.5 Any other service required by law.

6.5.12 BellSouth shall provide Switching Service Point ("SSP") capabilities and signaling software to interconnect the signaling links destined to the Signaling Transfer Point Switch ("STPS"). These capabilities shall adhere to the technical specifications set forth in the applicable industry standard technical references.

6.5.13 BellSouth shall provide interfaces to adjuncts in accordance with the technical specifications set forth in the applicable industry standard technical references. These adjuncts can include, but are not limited to, the Service Circuit Node and Automatic Call Distributors.

6.5.14 BellSouth shall provide performance data regarding an end user line, traffic characteristics or other measurable elements to Supra Telecom , upon a reasonable request from Supra Telecom. Supra Telecom will pay BellSouth for all costs incurred to provide such performance data through the process set forth in Supra Telecom Section 13 of the General Terms and Conditions of this Agreement, incorporated herein by this reference.

6.5.15 BellSouth shall offer to Supra Telecom all AIN triggers which are supported by BellSouth for offering AIN-based services in accordance with the technical specifications set forth in the applicable industry standard technical references. Triggers that are currently available include:

6.5.15.1 Off-Hook Immediate,

6.5.15.2 Off-Hook Delay,

6.5.15.3 Termination Attempt,

6.5.15.4 3/6/10 Public Office Dialing Plan,

6.5.15.5 Feature Code Dialing,

6.5.15.6 Customer Dialing Plan.

6.5.16 When additional triggers are supported by BellSouth, BellSouth will make these triggers available to Supra Telecom :

6.5.16.1 Private EAMF Trunk,

6.5.16.2 Shared Interoffice Trunk (EAMF, SS7),

6.5.16.3 N11,

6.5.16.4 Automatic Route Selection.

6.5.17 If an Supra Telecom end user subscribes to Supra Telecom provided voice mail and messaging services, BellSouth shall redirect incoming calls to the Supra Telecom system based upon presubscribed service arrangements (e.g., busy, don't answer, number of rings) through dedicated trunks provided by Supra Telecom . In addition, BellSouth shall provide a Standard Message Desk Interface-Enhanced ("SMDI-E") interface to the Supra Telecom system. BellSouth shall support the Inter-switch Voice Messaging Service ("IVMS") capability.

Tandem Switching

6.5.18 Definition

6.5.18.1 The Tandem Switching Capability is defined as:

6.5.18.1.1 Trunk-connect facilities, which include, but are not limited to, the connection between trunk termination at a cross connect panel and switch trunk card;

6.5.18.1.2 The basic switch trunk function of connecting trunks to trunks; and

6.5.18.1.3 The functions that are centralized in tandem switches (as distinguished from separate end office switches), including but not limited, to call recording, the routing of calls to operator services, and signaling conversion features.

6.5.18.2 BellSouth shall perform routine testing and fault isolation on the underlying switch that is providing Tandem Switching and all its interconnections. When requested by Supra Telecom , the results and reports of the testing shall be made immediately available to Supra Telecom .

6.5.18.3 BellSouth shall maintain Supra Telecom 's trunks and interconnections associated with Tandem Switching at least at parity to its own trunks and interconnections.

6.5.18.4 BellSouth shall control congestion points and network abnormalities. Congestion control provided or imposed on Supra Telecom traffic shall be at parity with controls being provided or imposed on BellSouth traffic (e.g., BellSouth shall not block Supra Telecom traffic and leave its traffic unaffected or less affected).

6.5.18.5 Tandem Switching shall process originating toll-free traffic received from an Supra Telecom local switch.

6.5.18.6 In support of AIN triggers and features, Tandem Switching shall provide SSP capabilities when these capabilities are not available from the Local Switching Network Element, to the extent such Tandem Switch has such capability.

6.5.18.7 The Local Switching and Tandem Switching functions may be combined in an office. If this is done, both Local Switching and Tandem switching shall provide all of the functionality required of each of those Network Elements in this Agreement.

6.6 **Interface Requirements**

6.6.1 Tandem Switching shall provide interconnection to the E911 PSAP where the underlying Tandem is acting as the E911 Tandem.

6.6.2 Tandem Switching shall interconnect, with direct trunks, to all carriers with which BellSouth interconnects.

6.6.3 BellSouth shall provide all signaling necessary to provide Tandem Switching with no loss of feature functionality.

6.6.4 Tandem Switching shall interconnect with Supra Telecom 's switch, using two-way trunks, for traffic that is transiting via BellSouth network to interLATA or intraLATA carriers. At Supra Telecom 's request, Tandem Switching shall record and keep records of traffic for billing.

6.7 Packet Switching

6.7.1 Definition

6.7.1.1 Packet Switching Capability. The packet switching capability Network Element is defined as the basic packet switching function of routing or forwarding packets, frames, cells or other data units based on address or other routing information contained in the packets, frames, cells or other data units, and the functions that are performed by Digital Subscriber Line Access Multiplexer, including but not limited to:

6.7.2 The ability to terminate copper customer loops (which includes both a low band voice channel and a high-band data channel, or solely a data channel);

6.7.3 The ability to forward the voice channels, if present, to a circuit switch or multiple circuit switches;

6.7.4 The ability to extract data units from the data channels on the loops, and

6.7.5 The ability to combine data units from multiple loops onto one or more trunks connecting to a packet switch or packet switches.

6.7.6 BellSouth shall be required to provide nondiscriminatory access to unbundled packet switching capability only where each of the following conditions are satisfied:

6.7.6.1 BellSouth has deployed digital loop carrier systems, including but not limited to, integrated digital loop carrier or universal digital loop carrier systems; or has deployed any other system in which fiber optic facilities replace copper facilities in the distribution section (e.g., end office to remote terminal, pedestal or environmentally controlled vault);

6.7.6.2 There are no spare copper loops capable of supporting the xDSL services Supra Telecom seeks to offer;

6.7.6.3 BellSouth has not permitted Supra Telecom to deploy a Digital Subscriber Line Access Multiplexer at the remote terminal, pedestal or environmentally controlled vault or other interconnection point, nor has the Supra Telecom obtained a virtual collocation arrangement at these

subloop interconnection points as defined by 47 C.F.R. § 51.319(b); and

6.7.6.4 BellSouth has deployed packet switching capability for its own use.

6.7.7 If there is a dispute as to whether BellSouth must provide Packet Switching, such dispute will be resolved according to the dispute resolution process set forth in Section 16 of the General Terms and Conditions of this Agreement, incorporated herein by this reference.

7. Operator Service and Directory Assistance Service

7.1

BellSouth shall provide operator services and directory assistance on an unbundled basis at the rates set forth in Exhibit A only where BellSouth does not offer to Supra Telecom customized (selective) routing or compatible signalling protocol. In cases where Supra Telecom requests operator services and directory assistance and BellSouth offers customized (selective) routing, BellSouth and Supra Telecom will negotiate the rates, terms and conditions of said operator services and directory assistance services.

7.2 Operator Systems

7.2.1 Definition

7.2.1.1 Operator Systems is the Network Element that provides operator and automated call handling and billing, special services, end user telephone listings and optional call completion services. The Operator Systems, Network Element provides two types of functions: Operator Service functions and Directory Assistance Service functions, each of which are described in detail below.

7.2.2 Operator Service

7.2.2.1 Definition

7.2.2.1.1 Operator Service provides: (1) operator handling for call completion (for example, collect, third number billing, and manual credit card calls), (2) operator or automated assistance for billing after the end user has dialed the called number (for example, credit card calls); and (3) special services including but not limited to Busy Line Verification

and Emergency Line Interrupt ("ELI"), Emergency Agency Call, Operator-assisted Directory Assistance, and Rate Quotes.

7.2.2.2 Requirements

7.2.2.2.1 When Supra Telecom requests BellSouth to provide Operator Services, the following requirements apply:

7.2.2.2.1.1 BellSouth shall complete 0+ and 0- dialed local calls.

7.2.2.2.1.2 BellSouth shall complete 0+ intraLATA toll calls.

7.2.2.2.1.3 BellSouth shall process calls that are billed to Supra Telecom end user's calling card that can be validated by BellSouth.

7.2.2.2.1.4 BellSouth shall complete person-to-person calls.

7.2.2.2.1.5 BellSouth shall complete collect calls.

7.2.2.2.1.6 BellSouth shall provide the capability for callers to bill to a third party and complete such calls.

7.2.2.2.1.7 BellSouth shall complete station-to-station calls.

7.2.2.2.1.8 BellSouth shall process emergency calls.

7.2.2.2.1.9 BellSouth shall process Busy Line Verify and Emergency Line Interrupt requests.

7.2.2.2.1.10 BellSouth shall process emergency call trace, as they do for their End users prior to the Effective Date. Call must originate from a 911 provider.

7.2.2.2.1.11 BellSouth shall process operator-assisted directory assistance calls.

7.2.2.2.1.12 BellSouth shall adhere to equal access requirements, providing Supra Telecom local end users the same IXC access as provided to BellSouth end users.

7.2.2.2.1.13 BellSouth shall exercise at least the same level of fraud control in providing Operator Service to Supra Telecom that BellSouth provides for its own operator service.

7.2.2.2.1.14 BellSouth shall perform Billed Number Screening when handling Collect, Person-to-Person, and Billed-to-Third-Party calls.

7.2.2.2.1.15 BellSouth shall direct customer account and other similar inquiries to the customer service center designated by Supra Telecom .

7.2.2.2.1.16 BellSouth shall provide a feed of customer call records in "EMI" format to Supra Telecom in accordance with CLEC ODUF standards specified in Attachment 6 of this Agreement, incorporated herein by this reference.

7.2.2.3 Interface Requirements

7.2.2.3.1 With respect to Operator Services for calls that originate on local switching capability provided by or on behalf of Supra Telecom , the interface requirements shall conform to the then current established system interface specifications for the platform used to provide Operator Service and the interface shall conform to industry standards.

7.2.3 **Directory Assistance Service**

7.2.3.1 **Definition**

7.2.3.1.1 Directory Assistance Service provides local end user telephone number listings with the option to complete the call at the callers direction separate and distinct from local switching.

7.2.3.2 Requirements

7.2.3.2.1 Directory Assistance Service shall provide up to two listing requests per call. If available and if requested by Supra Telecom 's end user, BellSouth shall provide caller-optional directory assistance call completion service at rates contained in this Attachment to one of the provided listings, equal to that which BellSouth provides its end users. If not available, Supra Telecom may request such requirement pursuant to the Bona Fide Supra Telecom Request/New Business Process as set forth in General Terms and Conditions.

7.2.3.3 Directory Assistance Service Updates

7.2.3.3.1 BellSouth shall update end user listings changes daily. These changes include:

7.2.3.3.1.1 New end user connections: BellSouth will provide service to Supra Telecom that is equal to the service it provides to itself and its end users;

7.2.3.3.1.2 End user disconnections: BellSouth will provide service to Supra Telecom that is equal to the service it provides to itself and its end users; and

7.2.3.3.1.3 End user address changes: BellSouth will provide service to Supra Telecom that is equal to the service it provides to itself and its end users.

7.2.3.3.2 These updates shall also be provided for non-listed and non-published numbers for use in emergencies.

7.2.4 Branding for Operator Call Processing and Directory Assistance

7.2.4.1 The BellSouth Operator Systems Branding Feature provides a definable announcement to Supra Telecom end users using Directory Assistance ("DA")/Operator Call Processing ("OCP") prior to placing them in queue or connecting them to an available operator or automated operator system. This feature allows Supra Telecom to have its calls custom branded with Supra Telecom 's name on whose behalf BellSouth is providing Directory Assistance and/or Operator Call Processing. Rates for Custom Branding, Operator Call Process and Directory Assistance are set forth in this Attachment.

7.2.4.2 BellSouth offers four service levels of branding to Supra Telecom when ordering Directory Assistance and/or Operator Call Processing.

7.2.4.2.1 Service Level 1 - BellSouth Branding

7.2.4.2.2 Service Level 2 - Unbranded

7.2.4.2.3 Service Level 3 - Custom Branding

7.2.4.2.4 Service Level 4 - Self Branding (applicable only to Supra Telecom for Resale or use with an Unbundled Port when routing to an operator service provider other than BellSouth).

7.2.5 For Resellers and Use with an Unbundled Port

7.2.5.1 BellSouth Branding is the Default Service Level.

7.2.5.2 Unbranding, Custom Branding, and Self Branding require Supra Telecom to order selective routing for each originating BellSouth end office identified by Supra Telecom . Rates for Selective Routing are set forth in this Attachment.

7.2.5.3 Customer Branding and Self Branding require Supra Telecom to order dedicated trunking from each BellSouth end office identified by Supra

Telecom , to either the BellSouth Traffic Operator Position System ("TOPS") or Supra Telecom Operator Service Provider. Rates for trunks are set forth in applicable BellSouth tariffs.

7.2.5.4 Unbranding - Unbranded Directory Assistance and/or Operator Call Processing calls ride common trunk groups provisioned by BellSouth from those end offices identified by Supra Telecom to the BellSouth TOPS. These calls are routed to "No Announcement."

7.2.6 For Facilities Based Carriers

7.2.6.1 All Service Levels require Supra Telecom to order dedicated trunking from their end office(s) point of interface to the BellSouth TOPS Switches. Rates for trunks are set forth in applicable BellSouth tariffs.

7.2.6.2 Customized Branding includes charges for the recording of the branding announcement and the loading of the audio units in each TOPS Switch, IVS and NAV equipment for which Supra Telecom requires service.

7.2.7 Directory Assistance customized branding uses:

7.2.7.1 the recording of the name;

7.2.7.2 the front-end loading of the Digital Recorded Announcement Machine ("DRAM") in each TOPS switch.

7.2.8 Operator Call Processing customized branding uses:

7.2.8.1 the recording of the name;

7.2.8.2 the front-end loading of the DRAM in the TOPS Switch;

7.2.8.3 the back-end loading in the audio units in the Automated Alternate Billing System ("AABS") in the Interactive Voice Subsystem ("IVS");

7.2.8.4 the 0- automation loading for the audio units in the Enhanced Billing and Access Service ("EBAS") in the Network Applications Vehicle ("NAV").

7.2.9 BellSouth will provide to Supra Telecom purchasing local BellSouth switching and reselling BellSouth local exchange service, selective routing of calls to a requested directory assistance services platform or operator services platform. Supra Telecom end users may use the same dialing arrangements as BellSouth end users, but obtain a Supra Telecom branded service.

8. Interoffice Transmission Facilities

8.1 BellSouth shall:

8.1.1 Provide Supra Telecom , upon request, exclusive use of interoffice transmission facilities dedicated to a particular end user or carrier, or use the features, functions, and capabilities of interoffice transmission facilities shared by more than one customer or carrier;

8.1.2 Provide all technically feasible transmission facilities, features, functions, and capabilities that Supra Telecom , upon request, could use to provide telecommunications services; and

8.1.3 Permit, to the extent technically feasible, Supra Telecom , upon request, to connect such interoffice facilities to equipment designated by Supra Telecom , including but not limited to, Supra Telecom 's collocated facilities.

8.2 Shared Transport

8.2.1 Definition

8.2.1.1 Shared Transport is defined as transmission facilities shared by more than one telecommunications carrier, including BellSouth, between end office switches, between end office switches and tandem switches, and between tandem switches in BellSouth's network.

8.2.2 Technical Requirements

8.2.2.1 Shared Transport provided on DS1 or VT1.5 circuits, shall, at a minimum, meet the performance, availability, jitter, and delay requirements specified for central office to central office connections in accordance with the applicable industry standard technical references.

8.2.2.2 Shared Transport provided on DS3 circuits, STS-1 circuits, and higher transmission bit rate circuits shall, at a minimum, meet the performance, availability, jitter, and delay requirements specified for central office to central office connections in accordance with the applicable industry standard technical references.

8.2.2.3 BellSouth shall be responsible for the engineering, provisioning, and maintenance of the underlying equipment and facilities that are used to provide Shared Transport.

8.2.2.4 At a minimum, Shared Transport shall meet all of the requirements set forth in the applicable industry standard technical references.

8.3 **Dedicated Transport**

8.3.1 Definition

8.3.1.1 Dedicated transport is defined as BellSouth transmission facilities, including all technically feasible capacity-related services including, but not limited to, DS1, DS3 and OCn levels, dedicated to a particular customer or carrier, that provide telecommunications between wire centers owned by BellSouth or requesting telecommunications carriers, or between switches owned by BellSouth or requesting telecommunications carriers.

8.3.1.2 BellSouth will, to the extent technically feasible, permit Supra Telecom to obtain the functionality provided by BellSouth's digital cross-connect systems in the same manner that BellSouth provides such functionality to interexchange carriers.

8.3.1.3 **Local Channel**

8.3.1.3.1 The Local Channel is the dedicated transmission path between Supra Telecom 's point of presence and the BSWC.

8.3.1.3.2 Local Channels may be used for either switched or non-switched traffic. Rates for Local Channels are contained in Exhibit A of this Attachment 2.

8.3.1.4 Technical Requirements.

8.3.1.4.1 This Section sets forth technical requirements for all Dedicated Transport.

8.3.1.4.2 When BellSouth provides Dedicated Transport as a circuit or a system, the entire designated transmission circuit or system (e.g., DS1, DS3, STS-1) shall be dedicated to Supra Telecom designated traffic.

8.3.1.4.3 BellSouth shall offer Dedicated Transport in all documented bandwidth interfaces used within BellSouth's network, including, but not limited to, DS1 and DS3 and OCn

8.3.1.4.4 For DS1 or VT1.5 circuits, Dedicated Transport shall, at a minimum, meet the performance, availability, jitter, and delay requirements specified for end user interface to central office connections in the technical reference set forth in the applicable industry standard technical reference.

8.3.1.4.5 For DS3 circuits, STS-1 circuits, and higher rate circuits, Dedicated Transport shall, at a minimum, meet the performance, availability, jitter,

and delay requirements specified for end user interface to central office connections in the technical reference set forth in the applicable industry standard technical reference.

8.3.1.4.6 When requested by Supra Telecom , Dedicated Transport shall provide physical diversity. Physical diversity means that two circuits are provisioned in such a way that no single failure of facilities or equipment will cause a failure on both circuits.

8.3.1.4.7 When physical diversity is requested by Supra Telecom , BellSouth shall provide the maximum feasible physical separation between intra-office and inter-office transmission paths (unless otherwise agreed by Supra Telecom). BellSouth shall take appropriate steps to assure physical diversity continues to be provided for the duration of the period that Supra Telecom employs or until such time that Supra Telecom notifies BellSouth that physical diversity is no longer required.

8.3.1.4.8 Upon Supra Telecom 's request, BellSouth shall provide nondiscriminatory performance monitoring and Supra Telecom alarming.

8.3.1.4.9 BellSouth shall offer the following interface transmission rates for Dedicated Transport:

8.3.1.4.9.1 When Dedicated Transport is provided as a system, BellSouth shall design the system according to BellSouth's network infrastructure to allow for the termination points specified by Supra Telecom .

8.3.1.4.10 At a minimum, Dedicated Transport shall meet each of the requirements set forth in the applicable industry standard technical references

8.4 DARK FIBER

8.4.1 Definition

8.4.1.1 Dark Fiber is optical transmission facilities without attached multiplexing, aggregation or other electronics that connects two points within BellSouth's network. Dark Fiber also includes strands of optical fiber existing in aerial or underground cable which may have lightwave repeater (regenerator or optical amplifier) equipment interspliced to it at appropriate distances, but which has no line terminating elements terminated to such strands to operationalize its transmission capabilities.

8.4.2 Requirements

8.4.2.1 BellSouth shall make available Dark Fiber where it exists in BellSouth's network and where, as a result of future building or deployment, it becomes available. If BellSouth has plans to use the fiber within a two-year planning period, there is no requirement to provide said fiber to Supra Telecom .

8.4.2.2 If the requested dark fiber has any lightwave repeater equipment interspliced to it, BellSouth will remove such equipment at Supra Telecom 's request subject to time and materials charges.

8.4.2.3 Supra Telecom may test the quality of the Dark Fiber to confirm its usability and performance specifications.

8.4.2.4 BellSouth shall use its best efforts to provide to Supra Telecom information regarding the location, availability and performance of Dark Fiber within ten (10) business days for a records based answer and twenty (20) business days for a field based answer, after receiving a request from Supra Telecom ("Request"). Within such time period, BellSouth shall send written confirmation of availability of the Dark Fiber ("Confirmation"). From the time of the Request to forty-five (45) days after Confirmation, BellSouth shall hold such requested Dark Fiber for Supra Telecom 's use and may not allow any other party to use such media, including BellSouth.

8.4.2.5 BellSouth shall use its best efforts to make Dark Fiber available to Supra Telecom within thirty (30) business days after it receives written confirmation from Supra Telecom that the Dark Fiber previously deemed available by BellSouth is wanted for use by Supra Telecom . This includes identification of appropriate connection points (e.g., Light Guide Interconnection ("LGX") or splice points) to enable Supra Telecom to connect or splice Supra Telecom provided transmission media (e.g., optical fiber) or equipment to the Dark Fiber.

8.4.2.6 Dark fiber shall meet the manufacturers' design specifications.

8.4.2.7 Supra Telecom may splice and test Dark Fiber obtained from BellSouth using Supra Telecom or Supra Telecom designated personnel. BellSouth shall provide appropriate interfaces to allow splicing and testing of Dark Fiber. BellSouth shall provide an excess cable length of 25 feet minimum (for fiber in underground conduit) to allow the uncoiled fiber to reach from the manhole to a splicing van.

9. Signaling Networks and Call-Related Databases

9.1 BellSouth shall provide Supra Telecom access to signaling networks, call-related databases, and service management systems on an unbundled basis for the provision of a telecommunications service.

9.2 Signaling Networks

9.2.1 Signaling networks include, but are not limited to, signaling links and signaling transfer points. When Supra Telecom purchases unbundled switching capability from BellSouth, BellSouth shall provide access to its signaling network from that switch in the same manner in which it obtains access itself. BellSouth shall provide Supra Telecom with its own switching facilities access to BellSouth's signaling network for each of the Supra Telecom switches. This connection shall be made in the same manner as BellSouth connects one of its own switches to a signaling transfer point.

9.2.2 Signaling Link Transport is a set of two or four dedicated 56 Kbps. transmission paths between Supra Telecom -designated Signaling Points of Interconnection ("SPOI") and BellSouth Point of Interconnection that provides appropriate physical diversity.

9.2.3 The network termination point where this interconnection takes place is called the STP port termination.

9.2.4 Technical Requirements

9.2.4.1 Signaling Link Transport shall consist of full duplex mode 56 kbps transmission paths.

9.2.4.2 Of the various options available, Signaling Link Transport shall perform in the following two ways:

9.2.4.2.1 As an "A-link" which is a connection between a switch or SCP and a home Signaling Transfer Point Switch ("STPS") pair and consists of two links; and

9.2.4.2.2 As a "D/B-link" which is a connection between two STPS pairs in different company networks (e.g., between two STPS pairs for two Competitive Local Exchange Carriers ("CLECs")) and consists of four links.

9.2.4.3 A signaling link layer shall satisfy a performance objective such that:

9.2.4.3.1 There shall be no more than two minutes down time per year for an A-link layer; and

9.2.4.3.2 There shall be negligible (less than 2 seconds) down time per year for a B-link layer.

9.2.4.4 A signaling link layer shall satisfy interoffice and intraoffice diversity of facilities and equipment, such that:

9.2.4.4.1 No single failure of facilities or equipment causes the failure of both links in an A-link layer (i.e., the links should be provided on a minimum of two separate physical paths end-to-end); and

9.2.4.4.2 No two concurrent failures of facilities or equipment shall cause the failure of all four links in a D/B-link layer (i.e., the links should be provided on a minimum of three separate physical paths end-to-end).

9.2.4.5 The Signaling Point of Interconnection (SPOI) for each link shall be located at a cross-connect element, such as a DSX-1, in the central office where BellSouth STPS is located. There shall be a DS1 or higher rate transport interface at each of the SPOIs. Each signaling link shall appear as a DS0 channel within the DS1 or higher rate interface. BellSouth shall offer higher rate DS1 signaling for interconnecting Supra Telecom local switching systems or STPSs with BellSouth STPSs as soon as these become approved ANSI standards and available capabilities of BellSouth STPSs. BellSouth and Supra Telecom will work jointly to establish mutually acceptable SPOIs.

9.2.5 **Signaling Transfer Points**

9.2.5.1 Definition

9.2.5.1.1 Signaling Transfer Points is a signaling network function that includes all of the capabilities provided by the STPSs and their associated signaling links which enable the exchange of SS7 messages among and between switching elements, database elements and STPS.

9.2.5.2 Technical Requirements

9.2.5.2.1 STPs shall provide access to Network Elements connected to BellSouth SS7 network. These include:

9.2.5.2.1.1 BellSouth Service Control Points/DataBases and

9.2.5.2.1.2 Third-party-provided STPSs.

9.2.5.2.2 The connectivity provided by STPs shall fully support the functions of all Network Elements and Supra Telecom or other third-party switching systems and STPs connected to BellSouth's SS7 network. This explicitly includes the use of BellSouth's SS7 network to convey

messages which neither originate nor terminate at a signaling end point directly connected to BellSouth's SS7 network (i.e., transient messages). When BellSouth SS7 network is used to convey transient messages, there shall be no alteration of the Integrated Services Digital Network User Part ("ISDNUP") or Transaction Capabilities Application Part ("TCAP") user data that constitutes the content of the message.

9.2.5.2.3 If a BellSouth tandem switch routes calling traffic, based on dialed or translated digits, on SS7 trunks between an Supra Telecom local switch and third party local switch, BellSouth SS7 network shall convey the TCAP messages that are necessary to provide Call Management features (Automatic Callback, Automatic Recall, and Screening List Editing) between the Supra Telecom local STPSs and the STPSs that provide connectivity with the third party local switch, even if the third party local switch is not directly connected to BellSouth STPSs.

9.2.5.2.4 STPs shall provide all functions of the MTP as defined in the applicable industry standard technical references.

9.2.5.2.5 STPs shall provide on a non-discriminatory basis all functions of the Operations, Maintenance and Administration Part ("OMAP") commonly provided by STPSs. All OMAP functions will be on a "where available" basis and can include:

9.2.5.2.5.1 MTP Routing Verification Test ("MRVT") and

9.2.5.2.5.2 SCCP Routing Verification Test ("SRVT").

9.2.5.2.6 In cases where the destination signaling point is a BellSouth local or tandem switching system or database, or is an Supra Telecom or third party local or tandem switching system directly connected to the BellSouth SS7 network, STPs shall perform MRVT and SRVT to the destination signaling point. In all other cases, STPs shall perform MRVT and SRVT to a gateway pair of STPSs in an SS7 network connected with the BellSouth SS7 network. This requirement shall be superseded by the specifications for Internetwork MRVT and SRVT if and when these become approved ANSI standards and available capabilities of BellSouth STPSs, and if mutually agreed upon by Supra Telecom and BellSouth.

9.2.5.2.7 BellSouth STPs shall route mutually agreeable AIN responses from the Supra Telecom SCP via SS7 network interconnect to the local switch designated in the Signaling Connection Control Part ("SCCP") called party address.

9.2.5.2.8 STPs shall be equal to or better than the technical specifications set forth in the applicable industry standard technical references.

Message Screening

9.2.5.2.9 BellSouth shall set message screening parameters so as to accept messages from Supra Telecom local or tandem switching systems destined to any signaling point in the BellSouth SS7 network or any network interconnected to the BellSouth SS7 network with which the Supra Telecom switching system has a legitimate signaling relationship.

9.2.5.2.10 BellSouth shall set message screening parameters so as to accept messages destined to/from an Supra Telecom local or tandem switching system or to/from an Supra Telecom Service Control Point from any signaling point or network interconnected to the BellSouth SS7 network with which the Supra Telecom switching system has a legitimate signaling relationship.

9.3 SS7 Advanced Intelligent Network ("AIN") Access

9.3.1 SS7 AIN Access shall provide the Supra Telecom SCP access to BellSouth local switch via interconnection of BellSouth SS7 and Supra Telecom SS7 Networks. BellSouth shall offer SS7 access through its STPs. If BellSouth requires a mediation device on any part of its network, BellSouth must route its calls in the same manner. The interconnection arrangement shall result in the BellSouth local switch recognizing the Supra Telecom SCP as at least at parity with BellSouth's SCP's in terms of interfaces, performance and capabilities.

9.3.2 SS7 AIN Access is the provisioning of AIN triggers in a BellSouth local switch and interconnection of the BellSouth SS7 network with the Supra Telecom SS7 network to exchange TCAP queries and responses with an Supra Telecom SCP.

9.4 Call-Related DataBases

9.4.1 Definition

9.4.1.1 Call-related databases are defined as databases, other than operations support systems, that are used in signaling networks for billing and collection, or the transmission, routing, or other provision of a telecommunications service. For purposes of switch query and database response through a signaling network, BellSouth shall provide access to its call-related databases, including but not limited to, the Calling Name Database, 911 Database, E911 Database, Line

Information Database, Toll Free Calling Database, Advanced Intelligent Network Databases, and downstream number portability databases by means of physical access at the signaling transfer point linked to the unbundled databases. BellSouth shall not be required to unbundle the services created in the AIN platform and architecture that qualify for proprietary treatment. BellSouth shall allow Supra Telecom when Supra Telecom has purchased BellSouth's local switching capability to use BellSouth's service control point element in the same manner, and via the same signaling links, as BellSouth itself. BellSouth shall allow Supra Telecom when it has deployed its own switch, and has linked that switch to BellSouth's signaling system, to gain access to BellSouth's service control point in a manner that allows Supra Telecom to provide any call-related database-supported services to customers served by Supra Telecom 's switch. BellSouth shall provide Supra Telecom , upon request, with access to call-related databases in a manner that complies with section 222 of the Act.

9.4.2 A Service Control Point ("SCP") is a specific type of Database functionality deployed in a Signaling System 7 ("SS7") network that executes service application logic in response to SS7 queries sent to it by a switching system also connected to the SS7 network.

9.4.3 Technical Requirements

9.4.3.1 Requirements for call-related databases within this section address storage of information, access to information (e.g., signaling protocols, response times), and administration of information (e.g., provisioning, administration, and maintenance). All call-related databases shall be provided in accordance with the following requirements:

9.4.3.1.1 BellSouth shall provide physical access to SCPs through the SS7 network and protocols, as specified in this Attachment 2, with TCAP as the application layer protocol.

9.4.3.1.2 BellSouth shall provide physical interconnection to databases via industry standard interfaces and protocols.

9.4.3.2 The reliability of interconnection options shall be consistent with requirements for diversity and survivability.

9.4.4 **Database Availability**

9.4.4.1 Call-related databases shall have a maximum unscheduled unavailability of 30 minutes per year. Unavailability due to software and hardware upgrades shall be scheduled during minimal usage periods and only be undertaken upon proper notification to providers

which might be impacted. Any downtime associated with the provision of call-related databases will impact all service providers, including BellSouth, equally.

9.4.4.2 Any Supra Telecom order for data to be added, modified or deleted from the databases shall be consistent with the ordering and provisioning requirements of this Agreement.

9.4.4.3 BellSouth shall make available call-related database functionality and complete database transactions (e.g., add, modify or delete) for Supra Telecom customer records stored in BellSouth's databases on a basis that is equivalent to that which it provides to itself or third-party requesting telecommunications carriers.

9.4.5 **Line Information Database ("LIDB")**

9.4.5.1 Supra Telecom acknowledges that BellSouth will store in its LIDB only records relating to service in the BellSouth region.

9.4.5.2 Definition.

9.4.5.2.1 The LIDB is a transaction-oriented database accessible through Common Channel Signaling ("CCS") networks. It contains records associated with customer Line Numbers and Special Billing Numbers relating to service in the BellSouth region.

9.4.5.3 The LIDB Storage Agreement, which contains the terms and conditions for Supra Telecom 's access to LIDB, is attached as Exhibit A to Attachment 6, incorporated herein by this reference.

9.4.6 **Toll Free Number Database**

9.4.6.1 The Toll Free Number Database is a SCP that provides functionality necessary for toll free (e.g., 800 and 888) number services by providing routing information and additional so-called vertical features during call set-up in response to queries from SSPs. BellSouth shall provide the Toll Free Number Database in accordance with the following:

9.4.6.1.1 BellSouth shall make BellSouth Toll Free Number Database available for Supra Telecom to query with a toll-free number and originating information.

9.4.6.1.2 The Toll Free Number Database shall return carrier identification and, where applicable, the queried toll free number, translated numbers and instructions as it would in response to a query from a BellSouth switch.

9.4.6.2 Interface Requirements

9.4.6.2.1 The signaling interface between the Supra Telecom or other local switch and the Toll-Free Number database shall use the TCAP protocol and in the signaling network interface as specified in the applicable industry standard technical references.

9.4.7 **Automatic Location Identification/Data Management System ("ALI/DMS")**

9.4.7.1 The ALI/DMS Database contains end user information (including name, address, telephone information, and sometimes special information from the local service provider or customer) used to determine to which PSAP to route the call. The ALI/DMS database is used to provide more routing flexibility for E911 calls than 911. BellSouth shall provide the Emergency Services Database in accordance with the following:

9.4.7.2 Technical Requirements

9.4.7.2.1 BellSouth shall Supra Telecom provide an electronic interface to the ALI/DMS database, through which Supra Telecom or its agent may provide a daily update of Supra Telecom Customer Information. BellSouth shall provide Supra Telecom with record input format, consistent with the requirements imposed on BellSouth by the Supra Telecom governmental body administering 911 services. BellSouth shall provide error reports from the ALI/DMS data base to Supra Telecom as soon as possible, but in any event, within 24 hours after Supra Telecom or its agents enters information into the ALI/DMS data base. The error reports may be provided electronically if Supra Telecom purchases the capability. If an electronic interface is not available as an offering or because of a system outage for Supra Telecom or its agents to provide daily updates to the ALI/DMS database or for BellSouth to provide error reports from the ALI/DMS database, BellSouth shall establish a process or procedure to receive, send and process within one business day Supra Telecom Customer Information. The error files will contain the Supra Telecom reference date and file number of the original record sent.

9.4.7.2.2 The ALI/DMS database shall contain the following end user information:

9.4.7.2.2.1 Name;

9.4.7.2.2.2 Address;

9.4.7.2.2.3 Telephone number; and

9.4.7.2.2.4 Other information as appropriate (e.g., whether an end user is blind or deaf or has another disability).

9.4.7.2.3 When the BellSouth is responsible for administering the ALI/DMS database in its entirety, ported number NXXs entries for the ported numbers should be maintained unless Supra Telecom requests otherwise and shall be updated if Supra Telecom requests, provided Supra Telecom supplies BellSouth with the updates.

9.4.7.2.4 When Remote Call Forwarding ("RCF") is used to provide number portability to the local end user and a remark or other appropriate field information is available in the database, the shadow or "forwarded-to" number and an indication that the number is ported shall be added to the end user record.

9.4.7.2.5 If BellSouth is responsible for configuring PSAP features (for cases when the PSAP or BellSouth supports an ISDN interface) it shall ensure that CLASS Automatic Recall (Call Return) is not used to call back to the ported number. Although BellSouth currently does not have ISDN interface, BellSouth agrees to comply with this requirement once ISDN interfaces are in place.

9.4.7.2.6 At either Party's option, however not to exceed annually unless otherwise agreed to by the Parties, the databases of both Parties shall be compared for accuracy and uniformity. If any discrepancies are found as a result of the comparison, the Parties shall work cooperatively to correct the discrepancies within a reasonable time. The cost of the implementation of the request made other than annually shall be borne by the Party making the request.

9.4.7.3 Interface Requirements

The interface between the E911 Switch or Tandem and the ALI/DMS database for Supra Telecom customers shall meet industry standards.

9.4.8 **Directory Assistance Database Service ("DADS")**

9.4.8.1 Directory Assistance ("DA") database contains all customer data in the database used by BellSouth to provide its own DA service and where BellSouth is authorized to include the customer data of a telecommunications carrier in the database available to Supra Telecom . BellSouth shall provide access to the DA database in one of two manners.

9.4.8.2 BellSouth shall make its Directory Assistance Database Service ("DADS") available solely for the expressed purpose of providing Directory Assistance type services to Supra Telecom end users. Directory Assistance type service is defined as a service that allows Supra Telecom end users to obtain the name, telephone numbers and addresses of other subscribers of telecommunications services. Supra Telecom agrees that Directory Assistance Database Service ("DADS") will not be used for any purpose which violates federal or state laws, statutes, regulatory orders or tariffs. Except for the permitted use, Supra Telecom shall not disclose DADS and shall provide due care in providing for the security and confidentiality of DADS. Further, Supra Telecom authorizes the inclusion of Supra Telecom 's Directory Assistance listings in the BellSouth Directory Assistance products.

9.4.8.3 BellSouth shall provide Supra Telecom initially with a base file of subscriber listings which reflect all listing change activity occurring since Supra Telecom 's most recent update via magnetic tape, and subsequently using electronic connectivity such as Network Data Mover to be developed mutually by Supra Telecom and BellSouth. Supra Telecom agrees to assume the costs associated with CONNECT: Direct™ connectivity, which will vary depending upon volume and mileage.

9.4.8.4 BellSouth will require approximately one month after receiving an order to prepare the base file. BellSouth will provide daily updates to Supra Telecom which will reflect listing change activity occurring since Supra Telecom 's most recent update. BellSouth shall provide updates to Supra Telecom on a business, residence, or combined business and residence basis. Supra Telecom agrees that the updates shall be used solely to keep the information current. Delivery of daily updates will commence the day after Supra Telecom receives the base file.

9.4.8.5 BellSouth is authorized to include Supra Telecom Directory Assistance listing information in its Directory Assistance Database Service. Any other use by BellSouth of Supra Telecom Directory Assistance listing information is not authorized and with the exception of a request for DADS, BellSouth shall refer any request for such information to Supra Telecom .

9.4.8.6 BellSouth shall provide to Supra Telecom , upon request, via DADs, the names and addresses for BellSouth.

9.4.8.7 Supra Telecom and other telecommunication carriers' subscribers that have unlisted and non-published directory listings. The date files shall contain a special indicator showing that the subscribers account is

indicator showing that the subscribers' account is either unlisted or unpublished.

9.4.8.8 Rates for DADS are as set forth in Exhibit A of this Attachment 2.

9.4.8.9 Direct Access to Directory Assistance Service ("DADAS") will provide Supra Telecom 's directory assistance operators with the ability to search all available BellSouth subscriber listings using the Directory Assistance search format. Subscription to DADAS will allow Supra Telecom to utilize its own switch, operator workstations and optional audio subsystems.

9.4.8.10 BellSouth will provide DADAS from its DA location. Supra Telecom will access the DADAS system via BellSouth provided point of availability. Supra Telecom has the responsibility of providing the physical links required to connect to the point of availability. These facilities may be purchased from BellSouth as rates and charges billed separately from the charges associated with this offering.

9.4.8.11 A specified interface to each Supra Telecom subsystem will be provided by BellSouth. Interconnection between Supra Telecom 's system and a specified BellSouth location will be pursuant to the use of Supra Telecom -owned or Supra Telecom -leased facilities and shall be appropriate sized based upon the volume of queries being generated by Supra Telecom .

9.4.8.12 The specifications for the three interfaces necessary for interconnection are available in the following documents:

9.4.8.12.1 DADAS to Subscriber Operator Position System – Northern Telecom Document CSI-2300-07; Universal Gateway/Position Message Interface Format Specification;

9.4.8.12.2 DADAS to Subscriber Switch – Northern Telecom Document Q210-1 Version A107; NTDMS/CCIDAS System Application Protocol; and Supra Telecom Document 250-900-535 Operator Services Position System Listing Service and Application Call Processing Data Link Interface Specification;

9.4.8.12.3 DADAS to Audio Subsystem (Optional) – Directory One Call Control to Audio Response Unit system interface specifications are available through Northern Telecom as a licensed access protocol – Northern Telecom Document 355-004424 and Gateway/Interactive Voice subsystem Protocol Specification.

9.4.8.12.4 Rates for DADAS are as set forth in Exhibit A of this Attachment 2.

9.4.9 **Calling Name Delivery Database Service**

9.4.9.1 Calling Name Delivery Database Service ("CNAM") provides Supra Telecom the ability to associate a name with the calling party number, allowing the end user subscriber (to which a call is being terminated) to view the calling party's name before the call is answered. This service also provides Supra Telecom the opportunity to load and store its subscriber name in the BellSouth CNAM SCPs.

9.4.9.2 The CNAM Database Service Agreement is included as Exhibit F to this Attachment 2 and incorporated herein by this reference.

10. Service Management System

10.1 Definition

10.1.1 A Service Management System is defined as a computer database or system not part of the public switched network that, among other things: (1) interconnects to the service control point and sends to that service control point the information and call processing instructions needed for a network switch to process and complete a telephone call; and (2) provides telecommunications carriers with the capability of entering and storing data regarding the processing and completing of a telephone call. BellSouth shall provide Supra Telecom , upon request, with access to a Service Management System in a manner that complies with Section 222 of the Act.

10.2 BellSouth shall provide Supra Telecom with the information necessary to enter correctly, or format for entry, the information relevant for input into BellSouth's service management system.

10.3 BellSouth shall provide Supra Telecom the same access to design, create, test, and deploy Advanced Intelligent Network-based services at the service management system, through a service creation environment, that BellSouth provides itself.

10.4 BellSouth shall provide access to any and all BellSouth non-proprietary service applications resident in BellSouth's SCP. Such access may be from Supra Telecom 's switch or BellSouth's unbundled Local Switching element.

10.5 Service Management Systems provide operational interfaces to allow for provisioning, administration and maintenance of subscriber data and service application data stored in SCPs.

10.6 BellSouth's Service Creation Environment ("SCE") and Service Management System ("SMS") Advanced Intelligent Network ("AIN") Access shall provide Supra Telecom the capability that will allow Supra Telecom to create service applications in a BellSouth Service Creation Environment and deploy those applications in a BellSouth SMS to a BellSouth SCP. Supra Telecom 's service applications interact with AIN triggers provisioned on a BellSouth SSP. BellSouth shall provide Supra Telecom access to the BellSouth Service Creation Environment in a manner equal to what BellSouth provides itself or requesting telecommunications carriers.

10.7 BellSouth's SCE/SMS AIN Access shall provide access to SCE hardware, software, testing and technical support (e.g., help desk, system administrator) resources available to Supra Telecom . Scheduling procedures shall provide Supra Telecom equivalent priority to these resources.

10.8 BellSouth SCP shall partition and protect Supra Telecom service logic and data from unauthorized access, execution or other types of compromise.

10.9 When Supra Telecom selects SCE/SMS AIN Access, BellSouth shall provide training, documentation, and technical support to enable Supra Telecom to use BellSouth's SCE/SMS AIN Access to create and administer applications. Training, documentation, and technical support will address use of SCE and SMS access and administrative functions, but will not include support for the creation of a specific service application.

10.10 When Supra Telecom selects SCE/SMS AIN Access, BellSouth shall provide for a secure, controlled access environment in association with its internal use of AIN components.

10.11 When Supra Telecom selects SCE/SMS AINSupra Telecom Access for providing services on Supra Telecom 's network, BellSouth and Supra Telecom will work cooperatively to resolve technical and provisioning issues.

11. Trunk Interface Requirements

11.1 If a municipality has converted to E911 service, Supra Telecom will forward 911 calls to the appropriate E911 primary tandem, along with ANI, based upon the current E911 end office to tandem homing arrangement as provided by BellSouth. If the primary tandem trunks are not available, Supra Telecom will alternatively route the call to a

designated 7-digit local number residing in the appropriate PSAP. This call will be transported over BellSouth's interoffice network and will not carry the ANI of the calling party, which is in parity with BellSouth's handling of 911 calls from its customers.

11.2 911/E911 Trunks

11.2.1 **Local Switch and Access Tandem Trunks**

11.2.1.1 BellSouth shall provide trunks groups provisioned exclusively to carry intraLATA traffic, as designated by Supra Telecom .

11.2.1.2 BellSouth shall provide trunk groups provisioned exclusively to carry interLATA traffic, as designated by Supra Telecom .

11.2.1.3 BellSouth shall provide SS7 trunks which provide SS7 interconnection. At Supra Telecom 's request, MF trunks may be substituted for SS7 trunks where applicable.

11.2.1.4 BellSouth shall simultaneous route calls based on dialed digits (in accordance with the standard GR-317-CORE), and Carrier Identification Code (in accordance with the standard GR-394-CORE) over a single SS7 trunk group.

11.3 911 and E911

11.3.1 If Supra Telecom orders Services and Elements, then Supra Telecom is also responsible for providing E911 to its end users. BellSouth agrees to offer access to the 911/E911 network pursuant to the following terms and conditions set forth in this Attachment.

11.3.2 Definition

11.3.2.1 The 911 and E911 are requirements that provide a caller access to the applicable emergency service bureau by dialing a 3-digit universal telephone number (911). 911 Arrangements are arrangements for routing 911 calls from Supra Telecom end users to the appropriate PSAP, passing certain end user information for display at the PSAP answering station based on the class of 911 service (911 or E911) deployed in the area. BellSouth shall provide 911 Arrangements to Supra Telecom in accordance with the provisions below in areas where Supra Telecom is authorized to provide local exchange service and BellSouth is the 911 service provider. The provisions in this Section apply only to 911 Arrangements. The 911 functionality for Local Services Resale shall be governed by provisions in Attachment 1 of this Agreement incorporated herein by reference. In providing 911

Arrangements to Supra Telecom , BellSouth shall comply with all laws, rules and regulations concerning emergency services. The 911 and E911 functions provided to Supra Telecom shall be at least equal in quality and functionality with the support and services that the BellSouth provides to its own retailend users.

11.3.3 Requirements

11.3.3.1 911 Service Provisioning. For 911 service, BellSouth will provide to Supra Telecom a list consisting of each municipality that subscribes to 911 service. The list will also provide, if known, the E911 conversion date for each municipality and, for network routing purposes, a ten-digit directory number representing the appropriate emergency answering position for each municipality subscribing to 911. Supra Telecom will be required to arrange to accept 911 calls from its end users in municipalities that subscribe to 911 service and translate the 911 call to the appropriate 10-digit directory number as stated on the list provided by BellSouth. Supra Telecom will be required to route that call to BellSouth at the appropriate to install dedicated facilities from its serving wire center to the appropriate BellSouth tandem or end office. When a municipality converts to E911 service, Supra Telecom will be required to discontinue the 911 procedures and being using E911 procedures.

11.3.3.2 E911 Service Provisioning. For E911 service, Supra Telecom will be required to install a minimum of two dedicated trunks originating from the Supra Telecom serving wire center and terminating to the appropriate E911 tandem. The dedicated trunks shall be, at a minimum, DS-0 level trunks configured either as a 2-wire analog interface or as part of a digital (1.544 Mb/s) interface. Either configuration shall use CAMA-type signaling with multifrequency ("MF") pulsing that will deliver automatic number identification ("ANI") with the voice portion of the call. If the user interface is digital, MF pulses, as well as other AC signals, shall be encoded per the u-255 Law convention. Supra Telecom will be required to provide BellSouth daily updates to the E911 database. Supra Telecom will be required to forward 911 calls to the appropriate E911 tandem, along with ANI, based upon the current E911 end office to tandem homing arrangement as provided by BellSouth. If the E911 tandem trunks are not available, Supra Telecom will be required to route the call to a designated 10-digit local number residing in the appropriate PSAP. This call will be transported over BellSouth's interoffice network and will not carry the ANI of the calling party. Supra Telecom shall be responsible for providing BellSouth with complete and accurate data for submission to the 911/E911 database for the purpose of providing 911/E911 to its end users.

11.3.4 Technical Requirements

11.3.4.1 At Supra Telecom 's request, BellSouth and Supra Telecom shall establish dedicated trunk groups to route E911 calls placed by Supra Telecom end users to the appropriate BellSouth 911 tandem or selective router. Trunks shall be established as CAMA MF trunks until SS7 connectivity is available. Thereafter, trunks shall be established with SS7 signaling.

11.3.4.2 BellSouth shall provision 911 trunks within 30 calendar days of receipt of Supra Telecom 's order, or such shorter time as may be established by law, rule, regulation or Commission or F.C.C. order. Alternatively, at its option, Supra Telecom may provide the trunks. Regardless of which party provides the trunks, prior to placing a trunk in service BellSouth and Supra Telecom shall cooperate in testing to assure proper functioning of the E911 system for calls delivered over the trunk.

11.3.4.3 BellSouth shall assure sufficient capacity at the 911 tandem or selective router to meet Supra Telecom 's requests for interconnection within 30 calendar days after receipt of the request. There shall be no limit on the number of trunks used by Supra Telecom to connect to the 911 tandem or selective router. Interconnection to the 911 tandem shall be established to provide path and route diversity.

11.3.4.4 BellSouth shall provide the following information to Supra Telecom , and shall promptly notify Supra Telecom of any changes:

11.3.4.4.1 BellSouth processes and requirements for ordering trunks for 911 trunks and interconnection to the 911 tandem or selective router.

11.3.4.4.2 Trunk group specifications.

11.3.4.4.3 E911 tandem CLLI codes, circuit IDs, point codes, LEC order number, and IS code and address.

11.3.4.4.4 Description of BellSouth's diversity for facility routing.

11.3.4.4.5 Maintenance procedures for 911 trunk groups, including, but not limited to, contact names and numbers, escalation lists, and the hours that maintenance is available.

11.3.5 E911 Call Routing and Provision Customer Information to PSAP

11.3.5.1 BellSouth shall route E911 calls delivered by Supra Telecom to BellSouth's 911 tandems or selective routers to PSAPs in the same manner that BellSouth routes E911 calls from its own retail customers.

BellSouth shall provide and validate Supra Telecom customer information from the ALI/ANI database in the same manner BellSouth provides and validates information for its own retail customers.

11.3.5.2 BellSouth shall automatically update the ALI/DMS databases with respect to NPA split conversions.

11.3.6 Master Street Address Guide ("MSAG")

11.3.6.1 BellSouth shall provide Supra Telecom access to the MSAG at least equal in quality and functionality with the access BellSouth provides to itself. BellSouth shall provide Supra Telecom with a complete copy of the MSAG via CD Rom which is usable with personal computers, free of charge, once each year. Quarterly updates for each state are available for an additional charge. BellSouth shall cooperate with Supra Telecom to ensure the accuracy of information about Supra Telecom Customers in the MSAG and shall assist in resolving any errors. If BellSouth discovers an error in the MSAG, BellSouth shall notify PSAPs and Supra Telecom of any errors in the MSAG concerning Supra Telecom Customers.

11.3.7 Other

11.3.7.1 BellSouth shall provide Supra Telecom with 10-digit emergency telephone numbers for operator handling of emergency calls, at least equal in quality and functionality with the provisions of such information to itself.

11.3.8 Technical References

11.3.8.1 BellSouth shall provide 911 Arrangements to Supra Telecom based upon modified NENA 2 Recommendations.

11.3.9 Rates. Charges for 911/E911 service are borne by the municipality purchasing the service. BellSouth will impose no charge on Supra Telecom beyond applicable charges for BellSouth trunking arrangements.

11.3.10 The 911 and E911 functions provided to Supra Telecom shall be at least at parity with the support and services that BellSouth provides to its end users for such similar functionality.

11.3.11 Detailed Practices and Procedures. The detailed practices and procedures contained in the E911 Local Exchange Carrier Guide For Facility-Based Providers as amended from time to time during the term of this Agreement will determine the appropriate practices and

procedures for BellSouth and Supra Telecom to follow in providing 911/E911 services.

DESCRIPTION			USOC	FL
NOTES:				
	1	In states where a specific NRC for customer transfer, feature additions and changes is not stated, the applicable NRC from the appropriate tariff applies.		
	2	Effective May 1, 2000 statewide rates will be replaced by Deaveraged Loop Rates by Zone where available. Until approximately December 31, 2000 or until such time that BellSouth billing systems have been developed to handle the new zone rate structure, BellSouth will bill at the Zone 1 Deaveraged Loop rate level only. After December 31, 2000 or such time that the billing systems have been developed to handle the new zone rate structure, BellSouth will begin billing pursuant to CLEC-1's interconnection agreement.		
	3	All rates are interim and subject to true-up.

End Office Interoffice Trunk Port—Shared, per mou	N/A	NA
Tandem Switching (Port Usage) (Local or Access Tandem)		
Tandem Switching Function per mou	N/A	$0.00029
Tandem Interoffice Trunk Port - Shared per mou		NA
NOTES:		
1 Port rate includes all available features.		
2 Transmission/usage charges associated with POTS circuit switched usage will also apply to circuit switched voice and/or circuit switched data transmission by B-Channels associated with 2-wire ISDN ports.		
3 Access to B Channel or D Channel Packet capabilities will be avail- able only through BFR/New Business Request Process. Rates for the packet capabilities will be determined via the Bona Fide Request/New Business Request Process.		
4 This rate element is for those states which have a specific rate for User Profile per B Channel.		
5 This rate element is for use in those states with a different rate for additional minutes of use.

NRC - Incremental Manual Service Order Disconnect	TBD	$20.00
NOTES:		
1 In the absence of ordered rates by a State Commission, the rates for Currently Combined combinations of loop and port network elements will be the sum of the stand alone recurring rates of the UNEs which make up the combinations.		
2 For Georgia, on an interim basis, for those currently combined port/loop combinations defined by the Georgia Public Service Commission as not currently combined, the non-recurring and recurring rates for such UNE combinations shall be the sum of the stand		
3 Where BellSouth is not required to provide combinations of loop/port network elements, the rates for the 2-wire voice grade loop with 2-wire line port combination will be as follows: the recurring charges will be the sum of the stand-alone UNE loop rates		
4 Usage and Common Transport rates associated with the stand-alone UNE port elements will apply to all combinations of loop/port network elements.		
5 The Extended Area Calling Plans set forth in the stand-alone UNE Port rates section will apply to combinations of the loop/port network elements.		
6 Effective May 1, 2000 statewide rates will be replaced by Deaveraged Loop Rates by Zone where available. Until approximately December 31, 2000 or until such time that BellSouth billing systems have been developed to handle the new zone rate structure, BellSouth will bill at the Zone 1 Deaveraged Loop rate level only. After December 31, 2000 or such time that the billing systems have been developed to handle the new zone rate structure, BellSouth will begin billing pursuant to CLEC-1's interconnection agreement.

	Notes:		
1	Effective May 1, 2000 statewide rates will be replaced by Deaveraged Loop Rates by Zone where available. Until approximately December 31, 2000 or until such time that BellSouth billing systems have been developed to handle the new zone rate structure, BellSouth will bill at the Zone 1 Deaveraged Loop rate level only. After December 31, 2000 or such time that the billing systems have been developed to handle the new zone rate structure, BellSouth will begin billing pursuant to CLEC-1's interconnection agreement. The status of the rates shown by state is as follows:

If no rate is identified in the contract, the rate for the specific service or function will be as set forth in applicable BellSouth tariff or as negotiated by the parties upon request by either party.		
1 BellSouth and CLEC shall negotiate rates for this offering. If agreement is not reached within sixty (60) days of the Effective Date, either party may petition the Florida PSC to settle the disputed charge or charges. (FL)		

BELLSOUTH/SUPRA TELECOM RATES

AND OTHER SERVICES

DESCRIPTION				USOC	FL
		2	This rate element is for those states w/o separate rates for 800 calls with 800 No. Delivery vs. POTS No. Delivery and calls with Optional Complex Features vs. w/o Optional Complex Features.		
		3	This charge is only applicable where signaling usage measurement or billing capability does not exist.		
		4	Prices for AIN to be determined upon development of mediation device. (TN)		
		5	Price for Line Class Codes for Selective Routing shall be determined by the TRA. (TN)		

standards and measurements for Network Elements are set forth in Attachment 9 of this Agreement, incorporated herein by this reference.

2.12.4 Except as otherwise specified by law, BellSouth shall not impose any limitations, restrictions or requirements on requests for or use of Network Elements or Combinations that would impair the ability of Supra Telecom to offer a telecommunications service in the manner Supra Telecom intends, provided such use does not impede or impair the use of BellSouth's network by BellSouth or any other telecommunications carrier utilizing said network.

3. Local Loops

3.1 Definition

3.1.1 The local loop network element ("Loop(s)") is defined as a transmission facility between a distribution frame (or its equivalent) in BellSouth's central office and the loop Demarcation Point at an end user's premises, including inside wire owned by BellSouth. The local loop network element includes all features, functions, and capabilities of such transmission facilities, including dark fiber and attached electronics (except those used for the provision of advanced services, such as Digital Subscriber Line Access Multiplexers) and line conditioning.

3.2 The provisioning of service to Supra Telecom will require cross-office cabling and cross-connections within the central office to connect the loop to a local switch or to other transmission equipment in Collocation Space. These cross-connects are not considered part of the loop. The purchase of such cross-connects shall be pursuant to Attachment 4, incorporated herein by this reference.

3.3 Line Conditioning. The rates for line conditioning shall be as set forth in Exhibit A of this Attachment 2 incorporated herein by this reference. BellSouth shall condition lines required to be unbundled wherever Supra Telecom requests, whether or not BellSouth offers advanced services to the end user on that loop.

3.3.1 Line conditioning is defined as the removal from the loop of any devices that may diminish the capability of the loop to deliver high-speed switched wireline telecommunications capability, including xDSL service. Such devices include, but are not limited to, bridge taps, low pass filters, and range extenders.

End Office Interoffice Trunk Port—Shared, per mou	N/A	NA
Tandem Switching (Port Usage) (Local or Access Tandem)		
Tandem Switching Function per mou	N/A	$0.00029
Tandem Interoffice Trunk Port - Shared per mou		NA
NOTES:		
1 Port rate includes all available features.		
2 Transmission/usage charges associated with POTS circuit switched usage will also apply to circuit switched voice and/or circuit switched data transmission by B-Channels associated with 2-wire ISDN ports.		
3 Access to B Channel or D Channel Packet capabilities will be avail- able only through BFR/New Business Request Process. Rates for the packet capabilities will be determined via the Bona Fide Request/New Business Request Process.		
4 This rate element is for those states which have a specific rate for User Profile per B Channel.		
5 This rate element is for use in those states with a different rate for additional minutes of use.

NRC - Incremental Manual Service Order Disconnect	TBD	$20.00
NOTES:		
1 In the absence of ordered rates by a State Commission, the rates for Currently Combined combinations of loop and port network elements will be the sum of the stand alone recurring rates of the UNEs which make up the combinations.		
2 For Georgia, on an interim basis, for those currently combined port/loop combinations defined by the Georgia Public Service Commission as not currently combined, the non-recurring and recurring rates for such UNE combinations shall be the sum of the stand		
3 Where BellSouth is not required to provide combinations of loop/port network elements, the rates for the 2-wire voice grade loop with 2-wire line port combination will be as follows: the recurring charges will be the sum of the stand-alone UNE loop rates		
4 Usage and Common Transport rates associated with the stand-alone UNE port elements will apply to all combinations of loop/port network elements.		
5 The Extended Area Calling Plans set forth in the stand-alone UNE Port rates section will apply to combinations of the loop/port network elements.		
6 Effective May 1, 2000 statewide rates will be replaced by Deaveraged Loop Rates by Zone where available. Until approximately December 31, 2000 or until such time that BellSouth billing systems have been developed to handle the new zone rate structure, BellSouth will bill at the Zone 1 Deaveraged Loop rate level only. After December 31, 2000 or such time that the billing systems have been developed to handle the new zone rate structure, BellSouth will begin billing pursuant to CLEC-1's interconnection agreement.

Notes:		
1 Effective May 1, 2000 statewide rates will be replaced by Deaveraged Loop Rates by Zone where available. Until approximately December 31, 2000 or until such time that BellSouth billing systems have been developed to handle the new zone rate structure, BellSouth will bill at the Zone 1 Deaveraged Loop rate level only. After December 31, 2000 or such time that the billing systems have been developed to handle the new zone rate structure, BellSouth will begin billing pursuant to CLEC-1's interconnection agreement. The status of the rates shown by state is as follows:

EXHIBIT A

EXHIBIT B

EXHIBIT C

EXHIBIT D

EXHIBIT E

LOCAL INTERCONNECTION

1. NETWORK INTERCONNECTION

1.1 The Parties shall provide interconnection with each other's network for the transmission and routing of telephone exchange service (local) and exchange access (intraLATA toll and switched access).

1.1.1 BellSouth shall provide interconnection with BellSouth's network at any technically feasible point within BellSouth's network.

1.1.2 Supra Telecom shall provide interconnection to BellSouth at any mutually agreed upon point.

1.2 Supra Telecom must establish, at a minimum, a single Point of Presence, Point of Interface, and Point of Interconnection with BellSouth within the LATA for the delivery of Supra Telecom's originated local, intraLATA toll terminated to BellSouth and transit traffic terminated to other than BellSouth. If Supra Telecom chooses to interconnect at a single Point of Interconnection within a LATA, the interconnection must be at a BellSouth access or local tandem. Furthermore, Supra Telecom must establish Points of Interconnection at all BellSouth access and local tandems where Supra Telecom NXXs are "homed." A "Homing" arrangement is defined by a "Final" Trunk Group between the BellSouth access or local tandem and Supra Telecom End Office switch. A "Final" Trunk Group is the last choice telecommunications path between the access or local tandem and End Office switch. It is Supra Telecom's responsibility to enter its own NPA/NXX access and/or local tandem "homing" arrangements into the national Local Exchange Routing Guide ("LERG"). In order for Supra Telecom to home its NPA/NXX(s) on a BellSouth access or local tandem, Supra Telecom's NPA/NXX(s) must be assigned to an exchange rate center area served by that BellSouth access or local tandem and as specified by BellSouth.

1.3 A Point of Presence is the physical location (a structure where the environmental, power, air conditioning, etc. specifications for a Party's terminating equipment can be met) at which a Party establishes itself for obtaining access to the other Party's network. The Point of Presence is the physical location within which the Point(s) of Interface occur.

1.4 A Point of Interface is the physical telecommunications interface between BellSouth and Supra Telecom's interconnection facilities. It establishes the technical interface and point of operational responsibility. The primary purpose of the Point of Interface is to serve as the terminus for each Party's interconnection facilities. The Point of Interface has the following main characteristics:

1.4.1 It is a cross-connect point to allow connection, disconnection, transfer or restoration of service.

1.4.2 It is a point where BellSouth and Supra Telecom can verify and maintain specific performance objectives.

1.4.3 It is specified according to the interface offered in this Agreement

1.4.4 The Parties provide their own equipment to interface with the circuits on the customer premises.

1.5 The **Point of Interconnection** is the point at which the originating Party delivers its originated traffic to the terminating Party's first point of switching on the terminating Party's common (shared) network for call transport and termination. Points of Interconnection are available at either access tandems, local tandems, End Offices, or any other technically feasible point, as described in this Agreement. Supra Telecom's requested Point of Interconnection will also be used for the receipt and delivery of transit traffic at BellSouth access and local tandems. Points of Interconnection established at the BellSouth local tandem apply only to Supra Telecom-originated local and local originating and terminating transit traffic.

1.6 The Parties will work cooperatively to establish the most efficient trunking network in accordance with the provisions set forth in this Attachment 3 and accepted industry practices.

1.7 Each party will be responsible for engineering its network (i.e., the underlying facilities on which trunks are provisioned) on its side of the Point of Interface. Supra Telecom, at its option, shall establish Points of Presence and Points of Interface for the delivery of its originated local and intraLATA toll traffic to BellSouth. The Point of Interface may not necessarily be established at the Point of Interconnection.

1.8 BellSouth shall designate the Points of Presence and Points of Interface for the delivery of its originated local and intraLATA toll traffic to Supra Telecom for call transport and termination by Supra Telecom.

1.9 For the purposes of this Attachment 3, Local Channel is defined as a switch transport facility between a Party's Point of Presence and its designated serving wire center.

1.10 For the purposes of this Attachment 3, Serving Wire Center is defined as the wire center owned by one Party from which the other Party would normally obtain dial tone for its Point of Presence.

1.11 For the purposes of this Attachment 3, Dedicated Transport is defined as a switch transport facility between a Party's designated serving wire center and the first point of switching on the other Party's common (shared) network.

2. METHODS OF INTERCONNECTION

2.1 The Parties shall interconnect their networks utilizing one of the following methods in accordance with the provisions set forth in this Attachment 3.

2.2 Interconnection by one Party at the premises of the other Party.

2.2.1 BellSouth shall provide collocation to Supra Telecom pursuant to the terms set forth in Attachment 4 of this Agreement, incorporated herein by this reference. Supra Telecom may, at its option, purchase such collocation at the rates, terms, and conditions set forth in Attachment 4 of this Agreement, incorporated herein by this reference.

2.3 Leased Facilities – where the Party requesting interconnection utilizes the facilities offered by the other Party. Such leased facilities shall be provided at the rates, terms, and conditions set forth in this Attachment 3. At Supra Telecom's request, it may lease separate facilities for the sole purpose of delivering undipped 8YY traffic from Supra Telecom's end users to BellSouth's Switching Services Port ("SSP") for dipping into BellSouth's toll free database.

2.4 Third Party Facilities – where the Party requesting interconnection utilizes the facilities provided by a source other than the Parties to this Agreement. The Party utilizing this option shall comply with industry standards to maintain network integrity and will be solely responsible for any charges or fees assessed by the third party for use of its facilities.

2.5 Commercial Intra-building Interconnection – where both Parties have constructed broadband facilities into a commercial building (i.e., a building that is not a telephone central office) and agree to establish a Point of Interface at such location utilizing intra-building cable.

2.6 "Fiber Meet" is an interconnection arrangement whereby the Parties physically interconnect their networks via an optical fiber interface (as opposed to an electrical interface), at which one Party's facilities, provisioning, and maintenance responsibility begins and the other Party's responsibility ends (i.e., Point of Interface). A Fiber Meet shall be an arrangement as set forth in Section 2.9 of this Attachment 3.

2.7 Any other method determined to be technically feasible and requested by Supra Telecom shall be done pursuant to the process defined in Attachment 10 of this Agreement, incorporated herein by this reference.

2.8 Local Tandem Interconnection. This interconnection arrangement allows Supra Telecom to establish a Point of Interconnection at BellSouth local tandems for: (1) the delivery of Supra Telecom-originated local traffic transported and terminated by BellSouth to BellSouth end offices within the local calling area as defined in BellSouth's General Subscriber Services Tariff, Section A3 served by those BellSouth local tandems; and (2) for local transit traffic transported by BellSouth for third party network providers who have also established Points of Interconnection at those BellSouth local tandems.

2.8.1 When a specified local calling area is served by more than one BellSouth local tandem, Supra Telecom must designate a "home" local tandem for each of its assigned NPA/NXXs and establish trunk connections to such local tandems. Additionally, Supra Telecom may choose to establish a Point of Interconnection at the BellSouth local tandems where it has no codes homing but is not required to do so. Supra Telecom may deliver local traffic to a "home" BellSouth local tandem that is destined for other BellSouth or third party network provider end offices subtending other BellSouth local tandems in the same local calling area where Supra Telecom does not choose to establish a Point of Interconnection. It is Supra Telecom's responsibility to enter its own NPA/NXX local tandem homing arrangements into the LERG either directly or via a vendor in order for other third party network providers to determine appropriate traffic routing to Supra Telecom's codes. Likewise, Supra Telecom shall obtain its routing information from the LERG.

2.8.2 Not withstanding establishing Points of Interconnection to BellSouth's local tandems, Supra Telecom must also establish Points of Interconnection to BellSouth access tandems within the LATA on which Supra Telecom has NPA/NXX's homed for the delivery of Interexchange Carrier Switched Access ("SWA") and toll traffic, and traffic to Type 2A CMRS connections located at the access tandems.

BellSouth cannot switch SWA traffic through more than one BellSouth access tandem. SWA, Type 2A CMRS or toll traffic routed to the local tandem in error will not be backhauled to the BellSouth access tandem for completion. (Type 2A CMRS interconnection is defined in BellSouth's General Subscriber Services Tariff, Section A35.)

2.8.3 Bell South's provisioning of local tandem interconnection assumes that Supra Telecom has the necessary local interconnection arrangement with the other third party network providers subtending those local tandems as required by the Act.

2.9 Fiber Meet

2.9.1 If Supra Telecom elects to establish a Point of Interconnection with BellSouth pursuant to a Fiber Meet, Supra Telecom and BellSouth shall jointly engineer and operate a Synchronous Optical Network ("SONET") transmission system by which they shall interconnect their transmission and routing of local traffic via a Local Channel facility at either the DS0, DS1, or DS3 level and shall be ordered via an Access Services Request ("ASR") in the initial phase of this offering. The Parties shall work jointly to determine the specific transmission system. The parties will work cooperatively to establish joint access to transmission overhead signals and commands for such facilities and software. However, Supra Telecom's SONET transmission must be compatible with BellSouth's equipment in the serving wire center. The Parties will work cooperatively in the selection of compatible transmission equipment and software. Fiber Meet will be used for the provision of two-way trunking unless otherwise agreed to by the Parties.

2.9.2 BellSouth shall, wholly at its own expense, procure, install and maintain the agreed upon SONET equipment in the BellSouth Serving Wire Center ("BSWC").

2.9.3 Supra Telecom shall, wholly at its own expense, procure, install and maintain the agreed upon SONET equipment in the Supra Telecom Serving Wire Center ("ASWC").

2.9.4 The parties shall mutually agree upon a Point of Interface outside of the BSWC as a Fiber Meet point and shall make all necessary preparations to receive and to allow and enable delivery of fiber optic facilities into the Point of Interface with sufficient spare length to reach the Point of Interface. A Common Language Location Identification ("CLLI") code will be established for each Point of Interface. The code established must be a building type code. All orders shall originate

from the Point of Interface (i.e., Point of Interface to Supra Telecom, Point of Interface to BellSouth).

2.9.5 The Parties shall deliver and maintain their own strands wholly at their own expense. Upon verbal request by either Party, the other Party shall allow access to the Fiber Meet entry point for maintenance purposes as promptly as possible.

2.9.6 The Parties shall jointly coordinate and undertake maintenance of the SONET transmission system. Each Party shall be responsible for maintaining the components of their own SONET transmission system.

2.9.7 Each Party will be responsible for (i) providing its own transport facilities to the Fiber Meet, and (ii) the cost to build-out its facilities to such Fiber Meet.

2.9.8 Neither Party shall charge the other for its portion of the Fiber Meet facility between the ASWC and the BSWC used exclusively for the other Party's local traffic (i.e., the Local Channel). The Parties do not intend to utilize this arrangement for transit traffic.

3. INTERCONNECTION TRUNKING AND ROUTING

3.1 The Parties will convert all existing interconnection arrangements and trunks to the interconnection arrangements described in this Attachment in accordance with the following:

3.2 Within 45 days of the Effective Date, the Parties will mutually develop an operations plan based on sound engineering and operations principles, which will specify the guidelines to convert from the existing interconnection arrangements to the interconnection arrangements described in this Attachment 3. Such guidelines will conform to standard industry practices adopted by and contained in documents published by Industry Forums, including but not limited to, the Alliance for Telecommunications Industry Solutions ("ATIS") and the Ordering and Billing Forum ("OBF").

3.3 Each Party shall bear its own costs to convert from the existing interconnection arrangements to the interconnection arrangements described in this Attachment.

3.4 Unless otherwise mutually agreed, the Parties will complete the conversion within one [1] year of the Effective Date of the Agreement.

3.5 If, following one [1] year after the Effective Date of the Agreement, there exists any interconnection trunks which have not been converted

to the interconnection arrangements described in this Attachment 3, then either Party may invoke the dispute resolution proceeding, pursuant to Section 16 of the General Terms and Conditions of this Agreement, incorporated herein by this reference.

3.6 The Parties will use the following interconnection standards:

3.6.1 The Parties agree to establish Binary 8 Zero Sum Extended Superframe line protocol, where technically feasible.

3.6.2 In those cases where either Party's equipment will not support 64K Clear Channel Capability ("CCC"), the Parties agree to establish AMI line coding. Any AMI line coding will be Superframe formatted. DS3 facilities will be provisioned with C-bit parity.

3.6.3 Where additional equipment is required, such equipment shall be obtained, engineered, and installed to support 64K CCC trunks.

3.6.4 All interconnection facilities between the Parties will be sized according to mutual forecasts developed per the requirements of Section 4.14 of this Attachment 3 and sound engineering practices.

3.6.5 Interconnection will be provided utilizing either a DS1 or DS3 interface or, with the mutual agreement of the Parties, another technically feasible interface (e.g., STS-1).

3.6.6 BellSouth and Supra Telecom shall establish interconnecting trunk groups and trunking configurations between networks including the establishment of one-way or two-way trunks in accordance with Exhibits B - E of this Attachment 3, attached hereto and incorporated herein by this reference.

3.6.7 All terms and conditions, as well as charges, both non-recurring and recurring, associated with interconnecting trunk groups between BellSouth and Supra Telecom not addressed in Exhibit A shall be as set forth in the appropriate Party's Commission approved and effective intrastate or interstate tariff for switched access services. For two-way trunking that carries the Parties' local and intraLATA toll traffic, excluding transit traffic, the Parties shall be compensated for the nonrecurring and recurring charges for trunks and DS1 facilities at 50% of the applicable contractual or tariff rates for the services provided by each Party. Supra Telecom shall be responsible for ordering and paying for any two-way trunks carrying transit traffic.

3.7 All originating toll free service calls for which the end office Party performs the SSP function, if delivered to the tandem Party, shall be

delivered by the end office Party using GR-394 CORE format for IXC bound calls, or using GR-317-CORE format for LEC bound calls.

3.8 The Parties shall deliver over any trunk groups groomed for a specific access tandem only traffic destined for those publicly-dialable NPA NXX codes served by: (1) end offices that directly subtend the access tandem; and (2) those providers (including, but not limited to CMRS providers, other independent LECs, and CLECs) that directly connect to the access tandem.

3.9 For BellSouth end offices that do not normally subtend tandem for which calls are routed to that end office on an alternate routing basis, BellSouth will provide Supra Telecom its alternative routing (scheme) arrangements. Where BellSouth utilizes alternative arrangements, it shall deliver any traffic through that alternative routing.

3.10 The Parties shall deliver over any trunk groups groomed for a specific end office only traffic destined for those publicly-dialable NPA NXX codes served by that end office, unless otherwise agreed to by the Parties.

3.11 The source for the routing information for all traffic shall be the LERG, unless otherwise agreed to between the Parties.

3.12 Where either Party delivers over the local traffic trunk groups miscellaneous calls (e.g., time, weather, 976) destined for the other Party, it shall deliver such traffic in accordance with the serving arrangements defined in the LERG.

3.13 The Parties will cooperate to establish separate, choke trunk groups for the completion of calls to customers such as radio contest lines. Notwithstanding the foregoing, the Parties agree that where the Parties' switch has the capability to perform call gapping and other protective network traffic management controls, separate trunk groups shall not be required to carry such traffic.

3.14 N11 code traffic shall be routed between the Parties' networks pursuant to accepted industry practice (e.g., over local traffic trunks or over separate trunk groups).

3.15 Each Party shall establish procedures whereby its operator bureau will coordinate with the operator bureau of the other Party in order to provide Busy Line Verification/Busy Line Verification Interrupt ("BLV/BLVI") services on calls between their respective line side end users for numbers that are not ported.

3.16 A blocking standard of one-half of one percent (.005) shall be maintained during the average busy hour for final trunk groups carrying jointly provided exchange access traffic between an end office and an access tandem. All other final trunk groups are to be engineered with a blocking standard of one percent (.01). High usage trunk groups shall be sized to an economic CCS parameter mutually agreed to by both Parties.

3.16.1.1 Pursuant to Attachment 9, incorporated herein by this reference, BellSouth shall report to Supra Telecom information regarding blocking of interconnection traffic.

3.17 The Parties agree to jointly manage the capacity of interconnection trunk groups to encourage the economic deployment of increasingly robust and diverse interconnection between their networks.

4. NETWORK DESIGN AND MANAGEMENT FOR INTERCONNECTION

4.1 Network Management and Changes. Both Parties will work cooperatively with each other to install and maintain the most effective and reliable interconnected telecommunications networks, including but not limited to, the exchange of toll-free maintenance contact numbers and escalation procedures. Both Parties agree to provide public notice of changes in the information necessary for the transmission and routing of services using its local exchange facilities or networks, as well as of any other changes that would affect the interoperability of those facilities and networks.

4.2 Interconnection Technical Standards. The interconnection of all networks will be based upon accepted industry/national guidelines for transmission standards and traffic blocking criteria. Interconnecting facilities shall conform, at a minimum, to the technical specifications set forth in the applicable industry standard technical references. Signal transfer point, Signaling System 7 ("SS7") connectivity is required at each interconnection point. BellSouth will provide out-of-band signaling using Common Channel Signaling Access Capability where technically and economically feasible, in accordance with the technical specifications set forth in the applicable industry standard technical references. Facilities of each Party shall provide the necessary on-hook, off-hook answer and disconnect supervision and shall hand off calling number ID (Calling Party Number) when technically feasible.

4.3 Quality of Interconnection. The local interconnection for the transmission and routing of telephone exchange service and exchange

access that each Party provides to each other will be at least equal in quality to what it provides to itself and any subsidiary or affiliate, where technically feasible, or to any other Party to which each Party provides local interconnection.

4.4 Common Channel Signaling. Both Parties will provide LEC-to-LEC Common Channel Signaling ("CCS") to each other, where available, in conjunction with all traffic in order to enable full interoperability of CLASS features and functions except for call return. All CCS signaling parameters will be provided, including automatic number identification ("ANI"), originating line information ("OLI") calling company category, charge number, etc. All privacy indicators will be honored, and each Party will cooperate with each other on the exchange of Transactional Capabilities Application Part ("TCAP") messages to facilitate full interoperability of CCS-based features between the respective networks. The Parties will provide all line information signaling parameters including, but not limited to, Calling Party Number, Charge Number (if it is different from calling party number), and originating line information ("OLI"). For terminating FGD, either Party will pass any CPN it receives from other carriers. All privacy indicators will be honored. Where available, network signaling information such as Transit Network Selection ("TNS") parameter (SS7 environment) will be provided by the end office Party wherever such information is needed for call routing or billing. Where TNS information has not been provided by the end office Party, the tandem Party will route originating exchange access traffic to the IXC using available translations. The Parties will follow all industry Ordering and Billing Forum ("OBF") adopted guidelines pertaining to TNS codes.

4.4.1 BellSouth's Common Channel Signaling Access Service ("CCSAS") allows interconnected carriers to exchange signaling information over a communications path that is separate from the message path.

4.4.2 The transport portion of CCSAS, commonly referred to as a signaling link, is provided via dedicated 56 kbps out of band signaling connections between the Supra Telecom signaling point of interconnection and BellSouth's signaling point of interconnection ("SPOI").

4.4.3 The network termination point where this interconnection takes place is called the Signaling Transfer Point ("STP") port termination.

4.4.4 Charges for signaling links and the STP port termination can be found in Attachment 2 of this Agreement, incorporated herein by this reference.

4.4.5 Each CCSAS signaling connection provides for two-way digital transmission at speeds in multiples of 56 kbps. The connection to BellSouth's STP pair can be made from either Supra Telecom's signaling point ("SP"), which requires a minimum of two links, or from Supra Telecom's STP pair, which requires a minimum of four links.

4.5 SS7 Interconnection will take place at STP locations that are mutually agreed to by the Parties.

4.6 Where CCS is not available, in-band multi-frequency signaling will be provided. In such an arrangement, each Party will outpulse the full ten-digit telephone number of the called party to the other Party with appropriate call set-up and Automatic Number Identification ("ANI") where available, at parity.

4.7 The Parties will provide CCS to one another, where and as available, in conjunction with access to call related databases and Service Control Points ("SCP"), including toll free databases, Line Information Database ("LIDB"), Calling Name ("CNAM"), and any other necessary databases.

4.8 When the Parties establish new links , each Party shall provide its own STP port termination(s) and charge the other Party for the signaling links as follows

4.8.1 Where the SPOI for the signaling link is at a Fiber Meet, there shall be no compensation between the Parties for the signaling link facilities used.

4.8.2 Where the SPOI for the signaling link facilities is located at the BellSouth Serving Wire Center where the signaling link facilities terminates and Supra Telecom has furnished the interconnection facility, BellSouth will pay a monthly charge equal to one half of the Supra Telecom-provided facility charge according to BellSouth's unbundled rate element for the facility used. Rates for said interconnection facilities shall be as set forth in Attachment 2 of this Agreement, incorporated herein by this reference.

4.8.3 Where the SPOI for the signaling link facilities is located at the Supra Telecom Serving Wire Center facility where the signaling link facilities terminate and BellSouth has furnished the interconnection facility, Supra Telecom will pay a monthly charge equal to one half of the BellSouth-provided facility charge according to BellSouth's unbundled rate element for the facility used. Rates for said interconnection facilities shall be as set forth in Attachment 2 of this Agreement, incorporated herein by this reference.

4.8.4 Each party is responsible for all facility maintenance and provisioning on its side of the SPOI.

4.9 Implementation of new interconnection arrangements (as opposed to augmentation of existing arrangements), including testing of SS7 interconnection, shall be pursuant to the technical specifications set forth in the applicable industry standard technical references. Each Party will be expected to provide sufficient cooperative testing resources to ensure proper provisioning, including the ability to confirm that Supra Telecom LERG-assigned NPA NXX codes have been opened, translated and routed accurately in all appropriate BellSouth switches. A mutually agreed test calling plan shall be conducted to ensure successful completion of originating and terminating calls.

4.10 Message Screening

4.10.1 BellSouth shall set message screening parameters so as to accept messages from Supra Telecom local or tandem switching systems destined to any signaling point in the BellSouth SS7 network or any network interconnected to the BellSouth SS7 network with which the Supra Telecom switching system has a legitimate signaling relationship.

4.10.2 BellSouth shall set message screening parameters so as to accept messages destined to/from an Supra Telecom local or tandem switching system or to/from an Supra Telecom Service Control Point ("SCP") from any signaling point or network interconnected to the BellSouth SS7 network with which the Supra Telecom switching system has a legitimate signaling relationship.

4.11 STP Requirements

4.11.1 BellSouth shall provide message transfer part and Signaling Connection Control Point ("SCCP") protocol interfaces in accordance with the technical specifications set forth in the applicable industry standard technical references.

4.12 SS7 Network Interconnection

4.12.1 SS7 Network Interconnection is the interconnection of Supra Telecom STPs and Supra Telecom local or tandem switching systems with the BellSouth STPs. This interconnection provides connectivity that enables the exchange of SS7 messages among BellSouth switching systems and databases, Supra Telecom local or tandem switching systems and other third-party switching systems directly connected to the BellSouth SS7 network.

4.12.2 SS7 Network Interconnection shall provide connectivity to all components of the BellSouth SS7 network. These include:

4.12.2.1 BellSouth local or tandem switching systems;

4.12.2.2 BellSouth databases; and

4.12.2.3 Other third-party local or tandem switching systems.

4.12.3 The connectivity provided by SS7 Network Interconnection shall fully support the functions of BellSouth switching systems and databases and Supra Telecom or other third-party switching systems with [note could be A or D/B link] direct access to the BellSouth SS7 network.

4.12.4 SS7 Network Interconnection shall provide transport for certain types of TCAP messages. If traffic is routed based on dialed or translated digits between an Supra Telecom local switching system and a BellSouth or other third-party local switching system, either directly or via a BellSouth tandem switching system, then it is a requirement that the BellSouth SS7 network convey via SS7 Network Interconnection the TCAP messages that are necessary to provide Call Management services (Automatic Callback, Automatic Recall, and Screening List Editing) between the Supra Telecom local STPs and the BellSouth or other third-party local switch.

4.12.5 When the capability to route messages based on Intermediate Signaling Network Identifier ("ISNI") is generally available on BellSouth STPs, the BellSouth SS7 Network shall also convey TCAP messages using SS7 Network Interconnection in similar circumstances where the BellSouth switch routes traffic based on a Carrier Identification Code ("CIC").

4.12.6 BellSouth shall offer the following SS7 Network Interconnection options to connect Supra Telecom or Supra Telecom-designated local or tandem switching systems or STPs to the BellSouth SS7 network:

4.12.6.1 A-link interface from Supra Telecom local or tandem switching systems; and

4.12.6.2 D/B-link interface from Supra Telecom STPs.

4.12.7 Each interface shall be provided by one or more sets (layers) of signaling links, as follows:

4.12.7.1 An A-link layer shall consist of two links.

4.12.7.2 A D/B-link layer shall consist of four links.

4.12.8 The Parties agree to implement intraoffice diversity for the signaling links so that no single failure of intraoffice facilities or equipment shall cause the failure of any two links in a layer connecting to a BellSouth STP.

4.13 Trunk Forecasting and Servicing Requirements.

4.12.1 The Parties shall exchange technical descriptions and forecasts of their interconnection and traffic requirements in sufficient detail necessary to establish the interconnections required to assure traffic completion to and from all customers in their respective designated service areas. In order for BellSouth to provide as accurate reciprocal trunking forecasts as possible to Supra Telecom, Supra Telecom must timely inform BellSouth of any known or anticipated events that may affect BellSouth reciprocal trunking requirements. If Supra Telecom refuses to provide such information, BellSouth shall provide reciprocal trunking forecasts based only on existing trunk group growth and BellSouth's annual estimated percentage of BellSouth subscriber line growth.

4.13.1 Both Parties shall meet every six months or at otherwise mutually agreeable intervals for the purpose of exchanging non-binding forecast of its traffic and volume requirements for the interconnection and network elements provided under this Agreement, in the form and in such detail as agreed by the Parties. The Parties agree that each forecast provided under this section shall be deemed "Confidential Information" as set forth in Section 18 of the General Terms and Conditions of this Agreement, incorporated herein by this reference.

4.13.2 The trunk forecast should include trunk requirements for all of the interconnecting trunk groups for the current year plus the next two future years. The forecast meeting between the two companies may be a face-to-face meeting, video conference or audio conference. It may be held regionally or geographically. Ideally, these forecast

meetings should be held at least semi-annually, or more often if the forecast is no longer usable. Updates to a forecast or portions thereof should be made whenever the Party providing the forecast deems that the latest trunk requirements exceed the original quantities by 48 trunks or 10%, whichever is greater. Either Party should notify the other Party if they have measurements indicating that a trunk group is exceeding its designed call carrying capacity and is impacting other trunk groups in the network. Also, either Party should notify the other Party if they know of situations in which the traffic load is expected to increase significantly and thus affect the interconnecting trunk requirements as well as the trunk requirements within the other Party's network. The Parties agree that the forecast information provided under this section shall be deemed "Confidential Information" as set forth in Section 18 of the General Terms and Conditions of this Agreement, incorporated herein by this reference. Each Party shall provide a specified point of contact for planning, forecasting and trunk servicing purposes.

4.13.3 For a non-binding trunk forecast, agreement between the two Parties on the trunk quantities and the timeframe of those trunks does not imply any liability for failure to perform if the trunks are not available for use at the required time.

4.13.4 Signaling Call Information. BellSouth and Supra Telecom will send and receive 10 digits for local traffic. Additionally, BellSouth and Supra Telecom will exchange the proper call information, i.e., originated call company number and destination call company number, CIC, and OZZ, including all proper translations for routing between networks and any information necessary for billing.

4.13.5 Both Parties will manage the capacity of their interconnection trunk groups. BellSouth will issue an ASR to Supra Telecom to order changes BellSouth desires to the BellSouth interconnection trunk groups based on BellSouth's capacity assessment. Supra Telecom will issue an ASR to BellSouthBellSouth to order changes Supra Telecom desires to the Supra Telecom interconnection trunk groups based on Supra Telecom's capacity assessment.

4.13.5.1 Either Party may issue a Trunk Group Service Request ("TGSR") to the other Party to order changes it desires to the interconnection trunk groups based on its capacity assessment. The Party receiving the TGSR will, within ten (10) business days, respond with an ASR or an explanation of why it believes an ASR is inappropriate.

4.13.5.2 The Party submitting an ASR will provide complete and accurate tie down inventory assignments in typical industry bay, panel and jack format, or in such other format as the Parties agree, on each order by use of a Design Layout Record. Additional tie down information, such as span information, may be required when applicable.

4.13.5.3 The Parties will prepare ASRs pursuant to the industry standard guidelines of the OBF.

4.13.5.4 The Party provisioning the ASR will assign to the requesting Party a location code expressed in CLLI code format that will appear in the Access Customer Terminal Location Field of the ASR.

4.13.6 The standard interval used for the provisioning of additions to local interconnection trunk groups shall be no greater than ten (10) business days, for orders of fewer than ninety-six (96) DS-0 trunks. Other orders shall be determined on an individual case basis. Where feasible, either Party will expedite installation, upon the other Party's request.

4.13.7 Major projects shall be limited to those projects that require the coordination and execution of multiple orders or related activities between and among BellSouth and Supra Telecom work groups specifically relating to: (i) the initial establishment of local interconnection trunk groups; (ii) extending service into a new area; (iii) NXX code moves; (iv) facility grooming; or (v) network rearrangements. If orders that are component pieces of a major project are submitted after project implementation has been jointly planned and coordinated, they shall be submitted with a major project reference. Several orders submitted at one time may not be classified as a major project without the consent of the submitting Party. Each Party will identify a single point of contact that will be responsible for overall coordination and management of a major project through an agreed completion point.

4.13.8 As provided herein, Supra Telecom and BellSouth agree to exchange escalation lists which reflect contact personnel including vice president level officers. These lists shall include name, department, title, phone number, and fax number for each person. Supra Telecom and BellSouth agree to exchange an up-to-date list promptly following changes in personnel or information.

4.14 Interference or Impairment

4.14.1 Upon receipt of notification of blocking of traffic originated within the other Party's network, the Parties shall work cooperatively to

determine and begin work to implement reasonable corrective measures in a manner consistent with industry practices.

4.15 Local Dialing Parity

4.15.1 BellSouth and Supra Telecom shall provide local and toll dialing parity to each other with no unreasonable dialing delays. Dialing parity shall be provided for all originating telecommunications services that require dialing to route a call. BellSouth and Supra Telecom shall permit similarly situated telephone exchange service end users to dial the same number of digits to make a local telephone call notwithstanding the identity of the end user's or the called party's telecommunications service provider.

5. NETWORK MAINTENANCE

5.1 Outage Repair Standard

5.1.1 In the event of an outage or trouble in any arrangement, facility, or service being provided by BellSouth hereunder, BellSouth will follow procedures for isolating and clearing the outage or trouble that are no less favorable than those that apply to comparable arrangements, facilities, or services being provided by BellSouth to itself, Affiliate or any other carrier whose network is connected to that of BellSouth.

5.2 BellSouth shall provide Supra Telecom at least sixty (60) days' advance notice of any scheduled maintenance activity which may impact Supra Telecom's end users. Scheduled maintenance shall include, without limitation, such activities as, switch software retrofits, power tests, major equipment replacements and cable rolls. Plans for scheduled maintenance shall include, at a minimum, the following information: location and type of facilities, specific work to be performed, date and time work is scheduled to commence, work schedule to be followed, date and time work is scheduled to be completed, estimated number of work-hours for completion.

5.3 Interconnection Compensation

5.3.1 Compensation for Local Traffic

5.3.1.1 Local Traffic means any telephone call that originates and terminates in the same LATA and is billed by the originating Party as a local call when the originating Party has its own switch. Therefore, when an Supra Telecom end user originates traffic and Supra Telecom sends it to BellSouth for termination, Supra Telecom will determine whether the traffic is local or intraLATA toll. When a BellSouth end user originates

traffic and BellSouth sends it to Supra Telecom for termination, BellSouth will determine whether the traffic is local or intraLATA toll. Each Party will provide the other with information that will allow it to distinguish local from intraLATA toll traffic. At a minimum, each Party shall utilize NXX's in such a way that the other Party shall be able to distinguish local from intraLATA toll traffic.

As clarification of this definition and for reciprocal compensation, Local Traffic does not include traffic that originates from or is directed to or through an enhanced service provider or information service provider.

As further clarification, Local Traffic does not include traffic that consists of minutes of use from any end user customer that relies upon a call placed by that end user customer or on the end user customer's behalf to establish or maintain a network connection, if: (a) minutes of use to be billed are primarily associated with traffic of a type not routinely and ordinarily recognized by a reasonable person to constitute traffic as a result of a telephone call (i.e., voice or data traffic); (b) the end user customer does not control the destination of the call; and (c) the minutes of use do not serve a legitimate purpose that is unrelated to the receipt of reciprocal compensation or any other benefit that may be derived solely from establishing or maintaining the network connection.

5.3.1.2 The Parties shall provide for the mutual and reciprocal recovery of the costs for the network facilities utilized in transporting and terminating local traffic on each other's network. The Parties agree that charges for transport and termination of calls on their respective networks are as set forth in Exhibit A to this Attachment.

5.3.1.3 For the purposes of this Attachment 3, Common (Shared) Transport is defined as the transport of one Party's traffic by the other Party over the other Party's common (shared) facilities between the other Party's tandem switch and end office switch and/or between the other Party's tandem switches.

5.3.1.4 For the purposes of this Attachment 3, Tandem Switching is defined as the function that establishes a communications path between two switching offices through a third switching office (the Tandem switch).

5.3.1.5 For the purposes of this Attachment 3, End Office Switching is defined as the function that establishes a communications path between the trunk side and line side of the End Office switch.

5.3.1.6 If Supra Telecom utilizes a switch outside the LATA and BellSouth chooses to purchase dedicated or common (shared) transport from

Supra Telecom for transport and termination of BellSouth originated traffic, BellSouth will pay Supra Telecom no more than the airline miles between the V & H coordinates of the Point of Interface within the LATA where Supra Telecom receives the BellSouth-originated traffic and the V & H coordinates of the BellSouth Exchange Rate Center Area that the Supra Telecom terminating NPA/NXX is associated in the same LATA. For these situations, BellSouth will compensate Supra Telecom at either dedicated or common (shared) transport rates specified in Exhibit A and based upon the network facilities provided by Supra Telecom as defined in this Attachment 3.

5.3.1.7 Neither Party shall represent access services traffic (e.g., Internet Protocol Telephony, FGA, FGB, etc.) as Local Traffic for purposes of payment of reciprocal compensation. "Internet Protocol Telephony" is defined as real-time voice conversations over the Internet by converting voices into data which is compressed and split into packets, which are sent over the Internet like any other packets and reassembled as audio output at the receiving end.

5.3.2 Unidentifiable traffic. Supra Telecom shall utilize its NPA/NXXs in such a way and will provide the necessary information so that BellSouth shall be able to distinguish local from intraLATA toll traffic for BellSouth originated traffic. Supra Telecom end users assigned NPA/NXX line numbers shall be physically located in the BellSouth rate center with which the NPA/NXX has been associated. Whenever BellSouth delivers traffic to Supra Telecom for termination on the Supra Telecom's network, if BellSouth cannot determine, because of the manner in which Supra Telecom has utilized its NXX codes whether the traffic is local or toll, BellSouth will charge the applicable rates for originating intrastate network access service as reflected in BellSouth's Intrastate Access Services Tariff. BellSouth will make appropriate billing adjustments if Supra Telecom can provide sufficient information for BellSouth to determine whether said traffic is local or toll.

5.3.3 Percent Local Use. Each Party will report to the other a Percentage Local Usage ("PLU"). The application of the PLU will determine the amount of local minutes to be billed to the other Party. For purposes of developing the PLU, each Party shall consider every local call and every long distance call, excluding intermediary traffic. By the first of January, April, July and October of each year, BellSouth and Supra Telecom shall provide a positive report updating the PLU. Detailed requirements associated with PLU reporting shall be as set forth in BellSouth's Standard Percent Local Use Reporting Platform for Interconnection Purchasers, as it is amended from time to time during

this Agreement. Notwithstanding the foregoing, where the terminating company has message recording technology that identifies the traffic terminated, such information, in lieu of the PLU factor, shall at the company's option be utilized to determine the appropriate reciprocal compensation to be paid.

5.3.3.1 Notwithstanding the reporting interval set forth in Section 5.3.3, BellSouth will accept and implement a monthly PLU, for a period of twelve (12) months, whenever Supra Telecom gains an end user whose calling pattern and traffic would likely have an impact on the PLU reported by Supra Telecom or whenever Supra Telecom opens a new calling area or begins marketing local services in a new area. After reporting the PLU monthly for a twelve (12) month period, the PLU reporting will revert to quarterly. Unless the monthly reporting demonstrates that the PLU has stabilized, then the reporting party will continue to report a monthly PLU for an additional six (6) month period or until the Parties agree that the PLU has stabilized, whichever occurs first. In all other instances, the PLU reporting shall be quarterly.

5.3.4 Percentage Interstate Usage. For combined interstate and intrastate Supra Telecom traffic terminated by BellSouth over the same facilities, Supra Telecom will be required to provide a projected Percentage Interstate Usage ("PIU") to BellSouth. All jurisdictional report requirements, rules and regulations for Interexchange Carriers specified in BellSouth's Intrastate Access Services Tariff will apply to Supra Telecom. After interstate and intrastate traffic percentages have been determined by use of PIU procedures, the PLU factor will be used for application and billing of local interconnection. Notwithstanding the foregoing, where the terminating company has message recording technology that identifies the traffic terminated, such information, in lieu of the PLU factor, shall at the company's option be utilized to determine the appropriate reciprocal compensation to be paid.

5.3.5 Audits. On thirty (30) days' written notice, each Party must provide the other the ability and opportunity to conduct an annual audit of the traffic reported. BellSouth and Supra Telecom shall retain records of call detail for a minimum of nine months from which a PLU and/or PIU can be ascertained. The audit shall be accomplished during normal business hours at an office designated by the Party being audited. Audit requests shall not be submitted more frequently than one (1) time per calendar year. Audits shall be performed by a mutually acceptable independent auditor paid for by the Party requesting the audit. The PLU and/or PIU shall be adjusted based upon the audit results and shall apply to the usage for the quarter the audit was

completed, to the usage for the quarter prior to the completion of the audit, and to the usage for the two quarters following the completion of the audit. If, as a result of an audit, either Party is found to have overstated the PLU and/or PIU by twenty percentage points (20%) or more, that Party shall reimburse the auditing Party for the cost of the audit.

5.4 Compensation for IntraLATA Toll Traffic

5.4.1 IntraLATA Toll Traffic. IntraLATA Toll Traffic is defined as any telephone call that originates and terminates in the same LATA and is billed by the originating Party as a toll call.

5.4.2 Compensation for IntraLATA Toll Traffic. For terminating its IntraLATA Toll Traffic on the other Party's network, the originating Party will pay the terminating Party's intrastate or interstate terminating switched access tariff rates as set forth in the effective intrastate or interstate access services tariff, whichever is appropriate. The appropriate charges will be determined by the routing of the call. If BellSouth or Supra Telecom is the other Party's end user's presubscribed interexchange carrier or if an end user uses BellSouth or Supra Telecom as an interexchange carrier on a 101XXXX basis, BellSouth or Supra Telecom will charge the other Party the appropriate tariff charges for originating switched access services.

5.4.3 Compensation for 800 Traffic. Each Party shall compensate the other pursuant to the appropriate switched access charges, including the database query charge as set forth in the each Party's intrastate or interstate switched access tariffs.

5.4.4 Records for 8YY Billing. Each Party will provide to the other the appropriate records necessary for billing intraLATA 8YY customers. Records required for billing end users purchasing 8YY Services shall be provided pursuant to Attachment 6 of this Agreement, incorporated herein by this reference.

5.4.5 Transit Traffic Service. BellSouth shall provide tandem switching and transport services for Supra Telecom's transit traffic. Transit traffic is traffic originating on Supra Telecom's network that is switched and/or transported by BellSouth and delivered to a third party's network, or traffic originating on a third Party's network that is switched and/or transported by BellSouth and delivered to Supra Telecom's network . Rates for local transit traffic shall be the applicable call transport and termination charges as set forth in Exhibit A to this Attachment. Rates for intraLATA toll and Switched Access transit traffic shall be the applicable call transport and termination charges as set forth in

BellSouth Interstate or Intrastate Switched Access tariffs. Switched Access transit traffic presumes that Supra Telecom's end office is subtending the BellSouth Access Tandem for switched access traffic to and from Supra Telecom's end users utilizing BellSouth facilities, either by direct trunks with the IXC, or via the BellSouth Access Tandem. Billing associated with all transit traffic shall be pursuant to MECAB procedures. Wireless Type 1 traffic shall not be treated as transit traffic from a routing or billing perspective. Wireless Type 2A traffic shall not be treated as transit traffic from a routing or billing perspective until BellSouth and the Wireless carrier have the capability to properly meet-point-bill in accordance with Multiple Exchange Carrier Access Billing ("MECAB") guidelines.

6. **OSS Rates** – To the extend Supra Telecom orders a Service and Element for the purpose of interconnection, the OSS Rates set forth in Attachment 2 of this Agreement, incorporated herein by this reference, shall apply.

BELLSOUTH/SUPRA TELECOM RATES
LOCAL INTERCONNECTION

DESCRIPTION	USOC	FL
Rates For CLEC-1 Remote Access Concentrator (RAS) Interconnection		
Port Termination charges apply in all cases		
Per DS1 Port Termination:		
Monthly Recurring Per DS1:	TBD	$151.62
Non-recurring per DS1:		
Non-recurring initial DS1	TBD	$45.91
Non-recurring per additional DS1	TBD	$44.18
NRC - Incremental Charge - Manual Service Order - 1st	TBD	NA
NRC - Incremental Charge - Manual Service Order - Add'l	TBD	NA
Per DS3 Port Termination:		
Total Monthly Recurring per DS3:	TBD	$4,755.41
Total Non-recurring per DS3:		
Non-recurring initial DS3	TBD	$772.93
Non-recurring per additional DS3	TBD	$435.92
NRC - Incremental Charge - Manual Service Order - 1st	TBD	NA
NRC - Incremental Charge - Manual Service Order - Add'l	TBD	NA
See Channelization rates in this Exhibit.		
Switching and Transport:		
In addition to Port Termination charges, these charges apply to BellSouth calls originating from BellSouth rate centers that are "intraLATA toll" to the rate center where CLEC-1's RAS is located.		
Interoffice Transport - Dedicated Per DS1		
Per Mile per month	TBD	$0.60130
Facility Termination per Month	TBD	$99.79
Non-recurring initial DS1	TBD	$45.91
Non-recurring per additional DS1	TBD	$44.18
NRC - Incremental Charge - Manual Service Order - 1st	TBD	NA
NRC - Incremental Charge - Manual Service Order - Add'l	TBD	NA
Interoffice Transport - Dedicated Per DS3		
Per Mile per month	TBD	$10.22
Facility Termination per Month	TBD	$984.55
Non-recurring initial DS3	TBD	$772.93
Non-recurring per additional DS3	TBD	$435.92
NRC - Incremental Charge - Manual Service Order - 1st	TBD	NA
NRC - Incremental Charge - Manual Service Order - Add'l	TBD	NA
Common Transport:		
Per Mile per MOU	TBD	$0.0000120
Facility Termination - Per MOU	TBD	$0.0005000
Tandem Switching:		
Per MOU	TBD	$0.0002900
Shared trunk port per port per MOU (EO side)	TBD	$0.0003986

BELLSOUTH/SUPRA TELECOM RATES
LOCAL INTERCONNECTION

DESCRIPTION	USOC	FL
Total:	TBD	$0.0006886
NOTES:		
If no rate is identified in the contract, the rate for the specific service or function will be as set forth in applicable BellSouth tariff or as negotiated by the parties upon request by either party.

COLLOCATION

1. SCOPE OF ATTACHMENT

1.1 Scope of Attachment. BellSouth shall offer to Supra Telecom collocation on rates, terms and conditions that are just, reasonable, nondiscriminatory and consistent with the rules and regulations of the FCC. If BellSouth provides any collocation to its own customers, to a BellSouth affiliate or to any other entity, BellSouth will provide the same collocation to Supra Telecom at rates, terms and conditions no less favorable to Supra Telecom than those provided by BellSouth to itself or to any other party. The rates, terms, and conditions contained within this Attachment shall only apply when Supra Telecom is occupying the collocation space as a sole occupant or as a Host, as defined below, pursuant to Section 3 of this Attachment 4.

1.2 Right to occupy. Subject to Section 4 of this Attachment 4, BellSouth hereby grants to Supra Telecom a right to occupy that certain area designated by BellSouth within a BellSouth Premises, of a size which is specified by Supra Telecom and agreed to by BellSouth (hereinafter "Collocation Space"). "Premises" refers to BellSouth's central offices and serving wire centers, as well as all buildings or similar structures owned or leased by BellSouth that house its network facilities, and all structures that house BellSouth's facilities on public rights-of-way, including but not limited to vaults containing loop concentrators or similar structures. To the extent this Agreement does not include all the necessary rates, terms and conditions for BellSouth Premises other than BellSouth central offices, the Parties will negotiate said rates, terms and conditions at the request for collocation at other than a central office. Notwithstanding the foregoing, BellSouth shall consider in its designation for cageless collocation any unused space within the BellSouth Premises. The size specified by Supra Telecom may contemplate a request for space sufficient to accommodate Supra Telecom's growth within a two year period unless otherwise agreed to by the Parties.

1.2.1 Space Reclamation. In the event of space exhaust within a Premise, BellSouth may provide notice, which must be in writing, to Supra Telecom requesting that Supra Telecom release non-utilized Collocation Space to BellSouth to be allocated to other physical collocation applicants when 100% of the space in Supra Telecom's collocation arrangement is not being utilized by the end of the second year from the date Supra Telecom accepted the Collocation Space.

Supra Telecom, within twenty (20) days of receipt of a written notification from BellSouth, shall either: (i) return the non-utilized Collocation Space to BellSouth, in which case Supra Telecom shall be relieved of all obligation for charges for that portion of the Collocation Space so released; (ii) provide BellSouth evidence that equipment is on order which will be installed in the non-utilized Collocation Space; or (iii) enter into a sharing relationship with another telecommunications carrier who will utilize the non-utilized Collocation Space.

1.3 Use of Space. Supra Telecom shall use the Collocation Space for the purposes of installing, provisioning, maintaining and operating Supra Telecom's equipment (to include testing and monitoring equipment) used or useful primarily to gain access to Network Elements and Combinations and secondarily to interconnect with BellSouth services and facilities, for the provision of telecommunications services. Pursuant to Section 5 of this Attachment 4, Supra Telecom may at its option, place Supra Telecom-owned or Supra Telecom-leased entrance facilities to the Collocation Space. In addition to, and not in lieu of, interconnection to BellSouth services and facilities, Supra Telecom may connect to other interconnectors within the designated BellSouth Premises (including to its other virtual or physical collocated arrangements) through co-carrier cross connect facilities designated by Supra Telecom pursuant to Section 5.6 of this Attachment 4. The Collocation Space may be used for no other purposes except as specifically described herein or authorized in writing by BellSouth.

1.4 BellSouth will offer virtual or adjacent, where technically feasible, collocation of the equipment where BellSouth is prepared to demonstrate that physical collocation is not practical for technical reasons or because of space limitations as provided in § 251(c)(6) of the Act and FCC orders.

1.5 Rates and charges. Supra Telecom agrees to pay the rates and charges identified at Exhibit A attached hereto.

2. SPACE NOTIFICATION

2.1 Availability of Space. Upon submission of an application pursuant to Section 6 of this Attachment 4, BellSouth will permit Supra Telecom to physically collocate, pursuant to the terms of this Attachment, at any BellSouth Premises, unless BellSouth has determined that there is no space available due to space limitations or no space available due to

technical infeasibility. BellSouth will respond to an application within ten (10) business days as to whether space is available or not available within a BellSouth Premises. If BellSouth responds that requested space is not available within the requested BellSouth Premises, BellSouth will inform Supra Telecom of the amount of space that is available. If no space is available, BellSouth will inform Supra Telecom that virtual or adjacent collocation is an option at the requested Premises.

2.2 Reporting. Upon request from Supra Telecom, BellSouth will provide a written report specifying the amount of collocation space available at the Premises requested, the number of collocators present at the Premises, any modifications in the use of the space since the last report or the Premises requested and the measures BellSouth is taking to make additional space available for collocation arrangements.

2.2.1 The request from Supra Telecom must be written and must include the Premises and Common Language Location Identification ("CLLI") code of the Premises where applicable. Such information regarding Premises and CLLI code is located in the National Exchange Carriers Association ("NECA") Tariff FCC No. 4.

2.2.2 BellSouth will respond to a request for a particular Premises within ten (10) business days of receipt of such request. BellSouth will respond in ten (10) business days to a request for up to and including five (5) Premises within the same state. The response time for a request of more than five (5) Premises shall be negotiated between the Parties. If BellSouth cannot meet the ten (10) business day response time, BellSouth shall notify Supra Telecom and inform Supra Telecom of the time frame under which it can respond.

2.3 Denial of Application. After notifying Supra Telecom that BellSouth has no available space in the requested Premises ("Denial of Application"), BellSouth will allow Supra Telecom, upon request, to tour the entire Premises within ten (10) business days of such Denial of Application. In order to schedule said tour within ten (10) business days, the request for a tour of the central office must be received by BellSouth within five (5) business days of the Denial of Application. Notwithstanding the foregoing, the Parties may agree to conduct the tour outside of the 10-day period.

2.4 Filing of Petition for Waiver. Upon Denial of Application BellSouth will timely file a petition with the Commission pursuant to 47 U.S.C.

§ 251(c)(6) and the appropriate state and federal rules and regulations.

2.5 Waiting List. On a first come first served basis, BellSouth will maintain a waiting list of requesting carriers who have either received a Denial of Application or, where it is publicly known that the Premises is out of space, have submitted a letter of intent to collocate. BellSouth will notify the telecommunications carriers on the waiting list when space becomes available according to how much space becomes available and the position of the telecommunications carrier on said waiting list. Upon request BellSouth will advise Supra Telecom as to its position on the list.

2.6 Public Notification. BellSouth will maintain on its Interconnection Services website a notification document that will indicate all Premises that are without available space. BellSouth shall update such document within ten (10) business days of the Denial of Application date. BellSouth will also post a document on its Interconnection Services website that contains a general notice where space has become available in a central office previously on the space exhaust list. BellSouth shall allocate said available space pursuant to the waiting list referenced in Section 2.5 of this Attachment 4.

3. COLLOCATION OPTIONS

3.1 Cageless. Except where local building code does not allow cageless collocation, BellSouth shall allow Supra Telecom to collocate Supra Telecom's equipment and facilities without requiring the construction of a cage or similar structure to enclose said equipment and without requiring the creation of a separate entrance to the Collocation Space. BellSouth shall allow Supra Telecom to have direct access to its equipment and facilities but may require Supra Telecom to use a central entrance to the BellSouth Premises. BellSouth shall make cageless collocation available in single bay increments pursuant to Section 7.5 of this Attachment 4. BellSouth shall assign cageless Collocation Space in conventional equipment rack lineups where feasible. For equipment requiring special technical considerations, Supra Telecom must provide the equipment layout, including spatial dimensions for such equipment pursuant to Section 5.1.1 of this Attachment 4 and shall be responsible for constructing all special technical requirements associated with such equipment pursuant to Section 6.5 of this Attachment 4.

3.1.1 Shared Cageless Collocation. Supra Telecom may allow other telecommunications carriers to share Supra Telecom's cageless collocation arrangements pursuant to the terms and conditions of Section 3.1.1 and Section 3.3 of this Attachment. Notwithstanding the forgoing, sharing of cageless space within the cageless arrangement shall not be authorized (1) where local building codes do not allow shared cageless collocation; or (2) where the BellSouth Premises is located within a leased space and BellSouth is prohibited by that lease from offering shared cageless collocation or (3) where the only remaining space of Supra Telecom's cageless collocation arrangement requires Supra Telecom's equipment to be commingled with BellSouth equipment. For purposes of this section, commingled means that the location of the Supra Telecom cageless arrangement in the BellSouth equipment lineup is such that BellSouth is not able to enclose BellSouth's equipment. Supra Telecom shall coordinate with its Guest, as defined below, and BellSouth to limit the number of parties working within the shared cageless collocation arrangement at the same time. BellSouth agrees to waive this provision in the event a specific project requires the presence of multiple parties all at the same time.

3.2 Cages and Adjacent Arrangement Enclosures. At Supra Telecom's option and upon request, BellSouth shall construct cages in compliance with Supra Telecom's collocation request. At Supra Telecom's request, BellSouth shall permit Supra Telecom to subcontract the construction of physical collocation arrangements with BellSouth Certified Vendors, provided however, that BellSouth shall not unreasonably withhold approval of contractors.

3.2.1 When Supra Telecom subcontracts the construction, Supra Telecom must arrange with a BellSouth Certified Vendor to construct a collocation arrangement enclosure in accordance with BellSouth's guidelines and specifications and at Supra Telecom's expense. BellSouth will provide guidelines and specifications upon request. Where local building codes require enclosure specifications more stringent than BellSouth's standard enclosure specification, Supra Telecom and Supra Telecom's BellSouth Certified Vendor must comply with local building code requirements. Supra Telecom's BellSouth Certified Vendor shall be responsible for filing and receiving any and all necessary permits and/or licenses for such construction. BellSouth shall cooperate with Supra Telecom and provide, at Supra Telecom's expense, the documentation, including architectural drawings, necessary for Supra Telecom to obtain the zoning, permits and/or other licenses. BellSouth shall pass on to Supra Telecom the

costs of providing the documentation. The Certified Vendor shall bill Supra Telecom directly for all work performed for Supra Telecom pursuant to this Attachment and BellSouth shall have no liability for nor responsibility to pay such charges invoiced by the Certified Vendor.

3.2.2 BellSouth has the right to inspect the enclosure after construction to make sure it is designed and constructed according to BellSouth's specifications and to require Supra Telecom to remove or correct at Supra Telecom's cost any structure that does not meet these standards.

3.2.3 Supra Telecom must provide the local BellSouth building contact with two Access Keys used to enter the locked enclosure. Access Keys provided to BellSouth shall not be duplicated under any circumstances. Except in case of emergency, BellSouth will not access Supra Telecom's locked enclosure prior to notifying Supra Telecom. BellSouth shall notify Supra Telecom in writing immediately in the case of lost or stolen Access Keys. BellSouth will reimburse Supra Telecom the reasonable costs to replace each Access Key lost or stolen. Should it become necessary for Supra Telecom to re-key locked enclosures as a result of a lost Access Key(s) or for failure to return an Access Key(s), BellSouth shall pay for all reasonable costs associated with the re-keying. Supra Telecom shall have the right, at its expense, to have locks changed where deemed necessary for the protection and security of its locked enclosures, provided that Supra Telecom shall immediately provide BellSouth with such new keys.

3.3 Shared Caged Collocation. Supra Telecom may allow other telecommunications carriers to share Supra Telecom's caged collocation arrangement pursuant to terms and conditions agreed to by Supra Telecom ("Host") and other telecommunications carriers ("Guests") and pursuant to this section with the following exceptions: (1) where local building code does not allow Shared Caged Collocation and (2) where the BellSouth Premises is located within a leased space and BellSouth is prohibited by said lease from offering such an option. The terms and conditions of the agreement between the Host and its Guests shall be written and Supra Telecom shall provide written notice to BellSouth that it has entered into a shared arrangement prior to submitting an application for said Guest. Further, said agreement shall incorporate by reference the rates, terms, and conditions of this Attachment 4.

3.3.1 Supra Telecom shall be the sole interface and responsible party to BellSouth for the purpose of submitting applications for initial and

additional equipment placements of Guest; for assessment of rates and charges contained within this Attachment; and for the purposes of ensuring that the safety and security requirements of this Attachment are fully complied with by the Guest, its employees and agents. In the event the Host and Guest jointly submit an initial Application, only one Application Fee will be assessed. A separate initial Guest Application shall require the assessment of a Subsequent Application Fee, as set forth in Exhibit A, if this Application is not the initial Application made for the arrangement. Notwithstanding the foregoing, Guest may arrange directly with BellSouth for the provision of the interconnecting facilities between BellSouth and Guest and for the provisions of the services and access to Network Elements.

3.3.2 Supra Telecom shall indemnify and hold harmless BellSouth from any and all claims, actions, causes of action, of whatever kind or nature arising out of the presence of Supra Telecom's Guests in the Collocation Space.

3.4 Adjacent Collocation. BellSouth will make available, where space is legitimately exhausted in a particular BellSouth Premises, collocation in adjacent controlled environmental vaults or similar structures to the extent technically feasible. BellSouth will permit Supra Telecom to construct or otherwise procure such an adjacent structure, subject only to reasonable safety and maintenance requirements. BellSouth will provide power and physical collocation services and facilities, subject to the same nondiscrimination requirements as applicable to any other physical collocation arrangement. BellSouth will permit Supra Telecom to place its own equipment, including, but not limited to, copper cables, coaxial cables, fiber cables, and telecommunications equipment, in adjacent facilities constructed by either BellSouth or by Supra Telecom itself. The Adjacent Arrangement shall be constructed or procured by Supra Telecom and in conformance with BellSouth's reasonable safety and maintenance requirements. BellSouth will provide specifications upon request. Further, Supra Telecom shall construct, procure, maintain and operate said Adjacent Arrangement(s) pursuant to all of the terms and conditions set forth in this Attachment. Rates shall be as set forth in Exhibit A.

3.4.1 Should Supra Telecom elect such option, Supra Telecom must arrange with a BellSouth Certified Vendor to construct an Adjacent Arrangement structure. Where local building codes require enclosure specifications more stringent than BellSouth's standard specification, Supra Telecom and Supra Telecom's contractor must comply with local building code requirements. Supra Telecom's contractor shall be responsible for filing and receiving any and all necessary zoning,

permits and/or licenses for such construction. BellSouth shall cooperate with Supra Telecom and provide, at Supra Telecom's expense, the documentation necessary for Supra Telecom to obtain the zoning, permits and/or other licenses. BellSouth shall pass on to Supra Telecom the costs of providing the documentation. Supra Telecom's BellSouth Certified Vendor shall bill Supra Telecom directly for all work performed for Supra Telecom pursuant to this Attachment and BellSouth shall have no liability for nor responsibility to pay such charges invoiced by the Certified Vendor.

3.4.2 BellSouth may inspect the Adjacent Arrangement(s) following construction and prior to the Commencement Date, as defined in Section 4.1 of this Attachment 4, to ensure the design and construction comply with BellSouth's specifications. BellSouth may require Supra Telecom, at Supra Telecom's sole cost, to correct any deviations from BellSouth's specifications found during such inspection(s), up to and including removal of the Adjacent Arrangement, within five (5) business days of BellSouth's inspection, unless the Parties mutually agree to an alternative time frame.

3.4.3 Supra Telecom shall provide a concrete pad, the structure housing the arrangement, HVAC, lighting, and all facilities that connect the structure (i.e. racking and conduit) to the BellSouth point of interconnection. At Supra Telecom's option, BellSouth shall provide an AC power source and access to physical collocation services and facilities subject to the same nondiscriminatory requirements as applicable to any other physical collocation arrangement.

3.4.4 Where Supra Telecom has elected to construct the adjacent enclosure itself, BellSouth shall deliver to Supra Telecom the requested ground space thirty (30) days after BellSouth receives Supra Telecom's Bona Fide Firm Order.

3.4.5 BellSouth shall allow other telecommunications carriers to share Supra Telecom's Adjacent Arrangements pursuant to the terms and conditions set forth in Section 3.3 above.

4. OCCUPANCY

4.1 Commencement Date. The "Commencement Date" shall be the day Supra Telecom's equipment becomes operational as described in Section 4.2 of this Attachment 4.

4.2 Occupancy. BellSouth will notify Supra Telecom in writing that the Collocation Space is ready for occupancy. Supra Telecom must place operational telecommunications equipment in the Collocation Space and begin either receiving access to Network Elements or interconnecting with BellSouth's network within one hundred eighty (180) days after receipt of such notice. Supra Telecom must notify BellSouth in writing that collocation equipment installation is complete and is operational with BellSouth's network. If Supra Telecom fails to place operational telecommunications equipment in the Collocation Space within 180 calendar days and such failure continues for a period of thirty (30) days after receipt of written notice from BellSouth, then BellSouth may, upon thirty (30) days written notice, request Supra Telecom to return the space. Supra Telecom is not required to return the space if, within that thirty (30) day period: (1) Supra Telecom utilizes the space by placing equipment in the space; (2) Supra Telecom provides BellSouth a legitimate business plan within fifteen (15) calendar days showing its intent to utilize the space within forty-five (45) days of submitting the business plan; or (3) Supra Telecom enters into a sharing relationship for its space pursuant to Section 3.4 of this Attachment 4. In the event that Supra Telecom does not satisfy any of the foregoing conditions, its right to occupy the Collocation Space terminates and BellSouth shall have no further obligations to Supra Telecom with respect to said Collocation Space. However, for good cause shown, Supra Telecom may request and BellSouth will grant an extension of up to 30/60 days. Termination of Supra Telecom's rights to the Collocation Space pursuant to this section shall not operate to release Supra Telecom from its obligation to reimburse BellSouth for all unpaid costs reasonably incurred by BellSouth pursuant to Section 4.2.2 of this Attachment 4 in preparing the Collocation Space, but rather such obligation shall survive this Attachment. For purposes of this Section 4.2, Supra Telecom's telecommunications equipment will be deemed operational when cross-connected to BellSouth's network for the purpose of service provision.

4.2.1 If, after the initial installation of Supra Telecom's equipment, the initial connections provided by BellSouth on BellSouth's side of the demarcation point do not allow Supra Telecom's equipment to function in a manner that allows Supra Telecom to provide telecommunications services to its end users, BellSouth will credit Supra Telecom the floor space charges for the period of time that the Supra Telecom equipment is not operational due to the faulty connections. Such credit will also include a pro rata credit for cross-connections and any Network Elements ordered and installed and will not apply if the

malfunction results from BellSouth provisioning such connections in accordance with Supra Telecom specifications.

4.2.2 Termination. Except where otherwise agreed to by the Parties, Supra Telecom may terminate occupancy in a particular Collocation Space upon thirty (30) calendar days prior written notice to BellSouth. Upon termination of such occupancy, Supra Telecom at its expense shall remove its equipment and other property from the Collocation Space. Supra Telecom shall have thirty (30) calendar days from the termination date to complete such removal, including the removal of all equipment and facilities of any other occupant of Supra Telecom's Collocation Space; provided, however, that Supra Telecom shall continue payment of monthly fees to BellSouth until such date as Supra Telecom has fully vacated the Collocation Space. Upon expiration of this Attachment, Supra Telecom shall surrender the Collocation Space to BellSouth in the same condition as when first occupied by the Supra Telecom except for ordinary wear and tear. Unless otherwise agreed upon by the Parties, Supra Telecom shall be responsible for the cost of removing any enclosure, together with all support structures (e.g., racking, conduits), of an Adjacent Collocation arrangement at the termination of occupancy and restoring the grounds to their original condition.

5. USE OF COLLOCATION SPACE

5.1 Equipment Type. BellSouth shall permit the collocation of any type of equipment used or useful for interconnection or for access to Network Elements in the provision of telecommunications services. Such equipment used or useful for interconnection and access to Network Elements includes, but is not limited to transmission equipment including, but not limited to, optical terminating equipment and multiplexers, equipment being collocated to terminate basic transmission facilities pursuant to § 64.1401 and § 64.1402 of Title 47 of the Code of Federal Regulations as of August 1, 1996, and digital subscriber line access multiplexers, routers, asynchronous transfer mode multiplexers, remote switching modules, and digital/optical cross-connect panels, and digital loop carrier. Nothing in this section requires BellSouth to permit collocation of equipment used solely for switching or solely to provide enhanced services; provided, however, that BellSouth may not place any limitations on the ability of Supra Telecom to use all the features, functions, and capabilities of

equipment collocated including, but not limited to, switching and routing features and functions and enhanced services functionalities.

5.1.1 Such equipment must at a minimum meet the following BellCore (Telcordia) Network Equipment Building Specifications (NEBS) General Equipment Requirements: Criteria Level 1 requirements as outlined in the BellCore (Telcordia) Special Report SR-3580, Issue 1; equipment design spatial requirements per GR-63-CORE, Section 2; thermal heat dissipation per GR-063-CORE, Section 4, Criteria 77-79; acoustic noise per GR-063-CORE, Section 4, Criterion 128, and National Electric Code standards. BellSouth may not object to the Collocation of equipment on the ground that the equipment fails to comply with NEBS performance standards.

5.1.2 Supra Telecom shall not use the Collocation Space for marketing purposes nor shall it place any advertising signs or markings in the area surrounding the Collocation Space or on the grounds of the Premises.

5.1.3 Supra Telecom shall place a plaque or other identification affixed to Supra Telecom's equipment, cage or adjacent structure necessary to identify Supra Telecom's equipment, including a list of emergency contacts with telephone numbers.

5.1.4 BellSouth shall not impose any performance standards, except for safety, on Supra Telecom equipment. These safety standards will not exceed the standards that BellSouth imposes on its own equipment, its subsidiaries' equipment, or to the equipment of any third person.

5.2 For both Physical Collocation and Virtual Collocation, Supra Telecom may either purchase unbundled transmission facilities (and any necessary cross-connection) from BellSouth or provide its own or third-party leased transmission facilities and terminate those transmission facilities in its equipment located in its Collocation Space at BellSouth's Premises.

5.3 Entrance Facilities. Supra Telecom may elect to place Supra Telecom-owned or Supra Telecom-leased entrance facilities into the Collocation Space. BellSouth will designate the point of interconnection as close as reasonably possible to the Premises housing the Collocation Space, such as an entrance manhole or a cable vault which are physically accessible by both Parties. Supra Telecom will provide and place fiber cable at the point of interconnection of sufficient length to be pulled through conduit and into the splice location. If Supra Telecom desires to place cable other

than fiber, BellSouth shall permit interconnection using copper or coaxial cable if such interconnection is first approved by the Commission. Supra Telecom will provide and install a sufficient length of fire retardant riser cable, to which the entrance cable will be spliced, which will extend from the splice location to the Supra Telecom's equipment in the Collocation Space. Supra Telecom must arrange for BellSouth to splice the entrance facility to Supra Telecom–provided riser cable. In the event Supra Telecom utilizes a non-metallic, riser-type entrance facility, a splice will not be required. Pursuant to the Supra Telecom/BellSouth Right-of-Way Attachment 8, incorporated herein by this reference, Supra Telecom must contact BellSouth for instructions prior to placing the entrance facility cable in the manhole. Supra Telecom is responsible for maintenance of the entrance cable.

5.3.1 Dual Entrance. BellSouth will provide at least two (2) such Interconnection points at each BellSouth Premises at which there are at least two (2) entry points for BellSouth's cable facilities, and at which space is available for new facilities in at least two (2) of those entry points. In response to a request for physical collocation under this Attachment, BellSouth shall provide Supra Telecom with information regarding BellSouth's capacity to accommodate dual entrance facilities. Consistent with Attachment 8, incorporated herein by this reference, if conduit in the serving manhole(s) is available and is not reserved for another purpose, BellSouth will make the requested conduit space available for installing a second entrance facility to Supra Telecom's arrangement. The location of the serving manhole(s) will be determined at the sole discretion of BellSouth so long as the location selected is as close as reasonably possible. Where dual entrance is not available due to lack of capacity, BellSouth will so state in the Application Response.

5.3.2 Shared Use. Supra Telecom may utilize spare capacity on an existing telecommunications service providers entrance facility for the purpose of providing an entrance facility to another Supra Telecom collocation arrangement within the same Premises. Supra Telecom must arrange for BellSouth to splice the entrance facility to Supra Telecom–provided riser cable.

5.4 Splicing in the Entrance Manhole. Although not generally permitted, should Supra Telecom request a splice to occur in the entrance manhole(s), BellSouth, at its sole discretion, may grant such a request, provided that BellSouth will not unreasonably withhold approval of requests to make such a splice. When the request for a splice is granted to Supra Telecom by BellSouth, Supra Telecom shall ensure its employees or agents entering and/or performing work in the

entrance manhole(s) are trained and comply with BellSouth procedures and OSHA requirements regarding access to manholes and that BellSouth personnel are notified and present for all entrances and work performed in the entrance manhole(s). Manhole covers shall be properly closed and secured at the conclusion of entry and/or work. Advance notification to BellSouth shall occur at a minimum of 48 hours prior to desired entry for normal work activities and at a minimum of 2 hours prior to desired entry in an out of service condition.

5.5 Demarcation Point. For the purposes of this Attachment, BellSouth will designate the point(s) of interconnection between Supra Telecom's equipment and/or network and BellSouth's network located as close as reasonably possible to Supra Telecom's Collocation Space. Each Party will be responsible for maintenance and operation of all equipment/facilities on its side of the demarcation point. BellSouth will not require Supra Telecom to use an intermediate interconnection arrangement in lieu of direct connection to BellSouth's network, if technically feasible. For 2-wire and 4-wire connections to BellSouth's network, the demarcation point shall be a common block on the BellSouth designated conventional distributing frame. Supra Telecom shall be responsible for providing, and Supra Telecom's BellSouth Certified Vendor shall be responsible for installing and properly labeling/stenciling, the common block, and necessary cabling pursuant to Section 6.4 of this Attachment 4. For all other terminations BellSouth shall designate a demarcation point on a per arrangement basis. Supra Telecom or its agent must perform all required maintenance to equipment/facilities on its side of the demarcation point, pursuant to Section 5.6 of this Attachment 4, and may self-provision cross-connects that may be required within the collocation space to activate service requests. At Supra Telecom's option, expense, and if space permits, a Point of Termination ("POT") bay or frame may be placed in the Collocation Space but shall not serve as the demarcation point, but may serve as a testing point.

5.6 Supra Telecom's Equipment and Facilities. Supra Telecom, or if required by this Attachment, Supra Telecom's BellSouth certified vendor, is solely responsible for the design, engineering, installation, testing, provisioning, performance, monitoring, maintenance and repair of the equipment and facilities used by Supra Telecom. Such equipment and facilities may include but are not limited to cable(s); equipment; and point of termination connections. Before beginning delivery, installation, replacement or removal work for equipment and/or facilities located within the Collocation Space, Supra Telecom shall obtain BellSouth's approval of Supra Telecom's proposed scheduling of the work in order to coordinate use of temporary staging

areas and other building facilities. BellSouth may request additional information before granting approval.

5.7 Co-Carrier Cross-connect. In addition to, and not in lieu of, obtaining interconnection with, or access to, BellSouth telecommunications services, Network Elements, and facilities, Supra Telecom may directly connect to other telecommunications service providers within the designated BellSouth Premises (including to its other virtual or physical collocated arrangements) through facilities owned by Supra Telecom or through BellSouth facilities designated by Supra Telecom, at Supra Telecom's option. Such connections to other carriers may be made using either copper, optical, coaxial or electrical facilities. Supra Telecom may deploy such connections directly between its own facilities and the facilities of other carrier(s) without being routed through BellSouth equipment. Supra Telecom may provide connection between the equipment in the Collocation Spaces via a cross-connection or other connecting transmission facility that meets the same reasonable safety requirements that BellSouth imposes on its own equipment. Supra Telecom may make this connection to another collocating telecommunications carrier even if the equipment being connected is in the same room as BellSouth's equipment.

5.7.1 If Supra Telecom requests a co-carrier cross-connect after the initial installation, Supra Telecom must submit an application with a Subsequent Application Fee. Supra Telecom must use a BellSouth Certified Vendor to place the co-carrier cross connect, except in cases where the Supra Telecom equipment and the equipment of the other carrier are located within contiguous Collocation Spaces. In cases where Supra Telecom's equipment and the equipment of the other telecommunications carrier are located in contiguous Collocation Spaces, Supra Telecom will have the option to deploy the co-carrier cross connects between the sets of equipment. Where cable support structure exists for such connection there will be a recurring charge per linear foot of support structure used. When cable support structures do not exist and must be constructed, a non-recurring charge for the individual case will be assessed.

5.8 Easement Space. From time to time BellSouth may require access to the Collocation Space. BellSouth retains the right to access such space for the purpose of making BellSouth equipment and building modifications (e.g., running, altering or removing racking, ducts, electrical wiring, HVAC, and cables). BellSouth will give reasonable notice to Supra Telecom when access to the Collocation Space is required and provide a list of names of individuals authorized to enter said space. Supra Telecom may elect to be present whenever

BellSouth performs work in the Collocation Space. The Parties agree that Supra Telecom will not bear any of the expense associated with this work.

5.9 Access. Pursuant to Section 11 of this Attachment 4, Supra Telecom shall have access to the Collocation Space twenty-four (24) hours a day, seven (7) days a week. Supra Telecom agrees to provide the name and either Driver's License, social security number, or date of birth of each employee, contractor, or agents provided with Access Keys or cards ("Access Keys") prior to the issuance of said Access Keys. Access Keys shall not be duplicated under any circumstances. Supra Telecom agrees to be responsible for all Access Keys and for the return of all said Access Keys in the possession of Supra Telecom employees, contractors, other occupants of Supra Telecom's Collocation Space, or agents after termination of the employment relationship, contractual obligation with Supra Telecom or upon the termination of this Attachment or the termination of occupancy of an individual collocation arrangement. Within sixty (60) days of the Effective Date of this Agreement, BellSouth and Supra Telecom shall establish an agreed upon procedure for the return and confirmation of the return of Access Keys. Within ten (10) business days after receipt of Supra Telecom's Bona Fide Order, BellSouth and Supra Telecom will visit, without charge, Supra Telecom's designated collocation arrangement location.

5.9.1 Security Escort. A security escort will be required whenever Supra Telecom or its agent desires access to the entrance manhole or must have access to the Premises after the one accompanied site visit allowed after Bona Fide Firm Order without charge to Supra Telecom prior to completing BellSouth's Security Training requirements and/or prior to Space Acceptance. Rates for a security escort are assessed in one-half (1/2) hour increments according to the schedule appended hereto as Exhibit A.

5.9.2 Lost or Stolen Access Keys. Supra Telecom shall notify BellSouth in writing immediately in the case of lost or stolen Access Keys. Supra Telecom will reimburse BellSouth the reasonable costs to replace each Access Key lost or stolen. Should it become necessary for BellSouth to re-key buildings as a result of a lost Access Key(s) or for failure to return an Access Key(s), Supra Telecom shall pay for all reasonable costs associated with the re-keying. Supra Telecom must submit to BellSouth the completed Access Control Request Form (RF-2906-C) for all employees or agents requiring access to the BellSouth Premises a minimum of thirty (30) calendar days prior to the date Supra Telecom desires access to the Collocation Space.

5.9.3 Supra Telecom authorized personnel will have immediate access to health related facilities (e.g., bathrooms, eyewash stations, shower stations, drinking water, etc., within the collocated facility), as well as access to parking.

5.10 Interference or Impairment. Notwithstanding any other provisions of this Attachment, equipment and facilities placed in the Collocation Space by Supra Telecom shall not interfere with or impair service provided by BellSouth or by any other telecommunications carriers located in the Premises; shall not endanger or damage the facilities of BellSouth or of any other telecommunications carrier located in the Premises, the Collocation Space, or the Premises; shall not compromise the privacy of any communications carried in, from, or through the Premises; and shall not create an unreasonable risk of injury or death to any individual or to the public. If BellSouth reasonably determines that any equipment or facilities of Supra Telecom violates the provisions of this paragraph, BellSouth shall give written notice to Supra Telecom, which notice shall direct Supra Telecom to cure the violation within forty-eight (48) hours of Supra Telecom's actual receipt of written notice or, at a minimum, to commence curative measures within 24 hours and to exercise reasonable diligence to complete such measures as soon as possible thereafter. After receipt of the notice, the Parties agree to consult immediately and, if necessary, to inspect the arrangement. If Supra Telecom fails to take any action within 48 hours of receipt of the written notice or if the violation is of a character which poses an immediate and substantial threat of damage to property, injury or death to any person, or interference/impairment of the services provided by BellSouth or any other telecommunications carrier located in the Premises, then and only in that event BellSouth may take such action as it deems appropriate to correct the violation, including without limitation the interruption of electrical power to Supra Telecom's equipment. BellSouth will endeavor, but is not required, to provide notice to Supra Telecom prior to taking such action and shall have no liability to Supra Telecom for any damages arising from such action, except to the extent that such action by BellSouth constitutes willful misconduct.

5.10.1 Supra Telecom will be responsible for notifying BellSouth of any significant outages of Supra Telecom's equipment which could impact any of the services offered by BellSouth, and provide estimated clearing time for restoration.

5.11 Personalty and its Removal. Subject to requirements of this Attachment, Supra Telecom may place or install in or on the Collocation Space such facilities and equipment, including storage for and spare equipment, as it deems desirable for the conduct of business, provided that such equipment is telecommunications equipment, does not violate floor loading requirements, imposes or could impose or contains or could contain environmental conditions or hazards. Personal property, facilities and equipment placed by Supra Telecom in the Collocation Space shall not become a part of the Collocation Space, even if nailed, screwed or otherwise fastened to the Collocation Space, but shall retain their status as personalty and may be removed by Supra Telecom at any time. Any damage caused to the Collocation Space by Supra Telecom's employees, agents or representatives during the removal of such property shall be promptly repaired by Supra Telecom at its expense.

5.12 Alterations. In no case shall Supra Telecom or any person acting on behalf of Supra Telecom make any rearrangement, modification, improvement, addition, repair, or other alteration to the Collocation Space or the BellSouth Premises without the written consent of BellSouth, which consent shall not be unreasonably withheld. The cost of any such specialized alterations shall be paid by Supra Telecom.

5.13 Janitorial Service. Supra Telecom will not be responsible for costs associated with maintenance and upkeep of the building. Supra Telecom shall be responsible for the general upkeep and cleaning of the Caged Collocation Space and shall arrange directly with a BellSouth Certified Vendor for janitorial services. BellSouth shall provide a list of such contractors on a site-specific basis upon request.

6. ORDERING AND PREPARATION OF COLLOCATION SPACE

6.1 Application for Space. Supra Telecom shall submit an application document when Supra Telecom or Supra Telecom's Guest(s), as defined in Section 3.3 of this Attachment 4, desires to request or modify the use of the Collocation Space. BellSouth shall provide Supra Telecom with a single point of contact for all inquiries regarding collocation.

6.1.1 Initial Application. For Supra Telecom or Supra Telecom's Guest(s) initial equipment placement, Supra Telecom shall submit to BellSouth a complete and accurate (complete and accurate means all required

fields are filled in with the appropriate type of information) Application and Inquiry document ("Bona Fide Application"), together with payment of the Application Fee as stated in Exhibit A. The Bona Fide Application shall contain a detailed description and schematic drawing of the equipment to be placed in Supra Telecom's Collocation Space(s) and an estimate of the amount of square footage required.

6.1.2 Subsequent Application Fee. In the event Supra Telecom or Supra Telecom's Guest(s) desire to modify the use of the Collocation Space, Supra Telecom shall complete a Bona Fide Application detailing all information regarding the modification to the Collocation Space together with payment of the minimum Subsequent Application Fee as stated in Exhibit A. BellSouth shall determine what modifications, if any, to the Premises are required to accommodate the change requested by Supra Telecom in the Bona Fide Application. Such necessary modifications to the Premises may include but are not limited to, floor loading changes, changes necessary to meet HVAC requirements, changes to power plant requirements, and equipment additions. The fee paid by Supra Telecom for its request to modify the use of the Collocation Space shall be dependent upon the modification requested. Where the subsequent application does not require provisioning or construction work by BellSouth, no Subsequent Application Fee will be required and the Subsequent Application Fee shall be refunded to Supra Telecom. The fee for an application where the modification requested has limited effect (e.g., does not require capital expenditure by BellSouth) shall be the Subsequent Application Fee as set forth in Exhibit A to Attachment 4. In the event that the modification requires a capital expenditure by BellSouth, the Application Fee set forth in Exhibit A to Attachment 4 shall be assessed. In such event, the Subsequent Application Fee shall be considered a partial payment of the Application Fee, and the outstanding balance (Application Fee minus Subsequent Application Fee) shall be due from Supra Telecom within thirty (30) calendar days following Supra Telecom's receipt of a bill or invoice from BellSouth.

6.2 Application Response. In addition to the notice of space availability pursuant to Section 2.1 of this Attachment 4, BellSouth will include in its response whether the application is Bona Fide, and if it is not Bona Fide, the items necessary to cause the application to become Bona Fide. When space has been determined to be available, BellSouth will provide a comprehensive written response within thirty (30) business days of receipt of a Bona Fide Application. When more than 5 Bona Fide Applications are submitted within a fifteen (15) calendar day window within the same state, BellSouth will respond as soon as possible, but no later than the following: within thirty-six (36) business

days for Bona Fide Applications 6-10; within forty-two (42) business days for Bona Fide Applications 11-15. Response intervals for multiple Bona Fide Applications submitted within the same timeframe for the same state in excess of 15 must be negotiated. Such negotiations shall consider the total volume from all requests from telecommunications companies for collocation. The response will also include the configuration of the space and the estimated cost to prepare the space. When BellSouth's response includes an amount of space less than that requested by Supra Telecom or differently configured, Supra Telecom must amend its application to reflect the actual space available prior to submitting a Bona Fide Firm Order.

6.3 Bona Fide Firm Order. Supra Telecom shall indicate its intent to proceed with equipment installation in a BellSouth Premises by submitting a Bona Fide Firm Order to BellSouth. A Bona Fide Firm Order requires Supra Telecom to complete the Bona Fide Application process described in Section 6.1 of this Attachment 4, and submit the Expanded Interconnection Bona Fide Firm Order document (BSTEI-1P-F) indicating acceptance of the written application response provided by BellSouth ("Bona Fide Firm Order") and all appropriate fees. The Bona Fide Firm Order must be received by BellSouth no later than thirty (30) calendar days after BellSouth's response to Supra Telecom's Bona Fide Application. If Supra Telecom makes changes to its application in light of BellSouth's written Application Response, BellSouth will be required to re-evaluate and respond to the change(s). In this event, BellSouth's provisioning interval will be paused until the re-evaluation and response to the change(s) is complete and the Bona Fide Firm Order is received by BellSouth and all appropriate fees and duties have been executed. If BellSouth needs to reevaluate Supra Telecom's application as a result of changes requested by Supra Telecom to Supra Telecom's original application, then BellSouth will charge Supra Telecom a fee based upon the additional engineering hours required to do the reassessment. Major changes such as requesting additional space or adding additional equipment may require Supra Telecom to resubmit the application with an application fee.

6.3.1 The firm order date will be the date BellSouth receives a Bona Fide Firm Order. BellSouth will acknowledge the receipt of Supra Telecom's Bona Fide Firm Order within five (5) business days of receipt indicating that the Bona Fide Firm Order has been received. A BellSouth response to a Bona Fide Firm Order will include a Firm Order Confirmation containing the firm order date

6.3.2 Within ten (10) business days after receipt of Supra Telecom's Bona Fide Order, BellSouth and Supra Telecom will visit, without charge, Supra Telecom's designated collocation arrangement location.

6.3.3 Space preparation for the Collocation Space will not begin until BellSouth receives the Bona Fide Firm Order and all applicable fees.

6.4 Construction and Provisioning Interval. BellSouth will negotiate construction and provisioning intervals per request on an individual case basis. Excluding the time interval required to secure the appropriate government licenses and permits, BellSouth will use best efforts to complete construction for collocation arrangements under ordinary conditions as soon as possible and within a maximum of 100 calendar days from receipt of a complete and accurate Bona Fide Firm Order. Ordinary conditions are defined as space available with only minor changes to support systems required, such as but not limited to, HVAC, cabling and the power plant(s). BellSouth will negotiate construction and provisioning intervals to complete construction of all other collocation space ("extraordinary conditions"). Extraordinary conditions are defined to include but are not limited to major BellSouth equipment rearrangement or addition; power plant addition or upgrade; major mechanical addition or upgrade; major upgrade for ADA (Americans With Disabilities Act) compliance; environmental hazard or hazardous materials abatement; and arrangements for which equipment shipping intervals are extraordinary in length.

6.4.1 Joint Planning Meeting. Unless otherwise agreed to by the Parties, a joint planning meeting or other method of joint planning between BellSouth and Supra Telecom will commence within a maximum of 15 business days from BellSouth's receipt of a Bona Fide Firm Order and the payment of agreed upon fees. At such meeting, the Parties will agree to the preliminary design of the Collocation Space and the equipment configuration requirements as reflected in the Application and affirmed in the Bona Fide Firm Order. The Collocation Space Completion time period will be provided to Supra Telecom during the joint planning meeting or as soon as possible thereafter. BellSouth will complete all design work following the joint planning meeting.

6.4.2 Permits. Each Party or its agents will diligently pursue filing for the permits required for the scope of work to be performed by that Party or its agents within 7 business days of the completion of finalized construction designs and specifications.

6.4.3 Acceptance Walk Through. Supra Telecom and BellSouth will complete an acceptance walk through of each Collocation Space

requested from BellSouth by Supra Telecom. The acceptance walk through shall occur within 15 calendar days of BellSouth's notification to Supra Telecom that the collocation space is ready for occupancy. BellSouth will correct any deviations to Supra Telecom's original or jointly amended requirements within five (5) business days after the walk through, unless the Parties jointly agree upon a different time frame. The correction of these deviations from Supra Telecom's original request for collocation shall be at BellSouth's expense. At the end of the acceptance walk through or after any deviations are corrected, Supra Telecom will execute a written document accepting the Collocation Space.

6.5 Use of Certified Vendor. A "BellSouth Certified Vendor" is a vendor that has been certified by BellSouth to perform certain activities pursuant to BellSouth's certified vendor program. Supra Telecom shall select a vendor which has been approved as a BellSouth Certified Vendor to perform all engineering and installation work required in the Collocation Space. In some cases, Supra Telecom must select separate BellSouth Certified Vendors for transmission equipment, switching equipment and power equipment. BellSouth shall provide Supra Telecom with a list of Certified Vendors upon request. The Certified Vendor(s) shall be responsible for installing Supra Telecom's equipment and components, installing co-carrier cross connects, extending power cabling to the BellSouth power distribution frame, performing operational tests after installation is complete, and notifying BellSouth's equipment engineers and Supra Telecom upon successful completion of installation. The Certified Vendor shall bill Supra Telecom directly for all work performed for Supra Telecom pursuant to this Attachment and BellSouth shall have no liability for nor responsibility to pay such charges imposed by the Certified Vendor. BellSouth shall certify Supra Telecom or any vendor proposed by Supra Telecom when either satisfactorily completes BellSouth's certified vendor program.

6.6 Alarm and Monitoring. BellSouth shall place environmental alarms in the Premises for the protection of BellSouth's and Supra Telecom's equipment and facilities. Should Supra Telecom elect to place alarms within its Collocation Space, Supra Telecom shall be responsible for placement, monitoring and removal of environmental and equipment alarms used to service Supra Telecom's Collocation Space. Upon request, BellSouth will provide Supra Telecom with applicable tariffed service(s) to facilitate remote monitoring of collocated equipment by Supra Telecom. Both Parties shall use best efforts to notify the other of any verified environmental hazard known to that Party. The Parties

agree to utilize and adhere to the Environmental and Safety Principles identified as Exhibit B attached hereto.

6.7 Power. BellSouth shall supply -48 Volt (-48V) DC power, including back-up power, for Supra Telecom's Collocation Space within the Premises and shall make available AC power at Supra Telecom's option for Adjacent Arrangement collocation. The power provided to Supra Telecom by BellSouth shall be at least equal in quality and service level as that which is provided by BellSouth to itself or to any third party. When obtaining AC power from a BellSouth Service Panel, fuses and power cables must be engineered (sized) and installed by Supra Telecom's BellSouth Certified Vendor. Supra Telecom's BellSouth Certified Vendor must also provide a copy of the engineering power specification prior to the Commencement Date. When obtaining power from a BellSouth Battery Distribution Fuse Bay, fuses and power cables (A&B) must be engineered (sized) and installed by Supra Telecom's BellSouth Certified Vendor. Electrical engineering standards require that the fuse positions for power feeders must exceed the actual drain (or expected consumption) by 50%. When obtaining power from a BellSouth Power Board, power cables (A&B) must be engineered (sized) and installed by Supra Telecom's BellSouth Certified Vendor. Supra Telecom's BellSouth Certified Vendor must also provide a copy of the engineering power specification prior to the Commencement Date. BellSouth may be required to construct additional DC power plant or upgrade the existing DC power plant in a Premises as a result of Supra Telecom's request to collocate in that Premises ("Power Plant Construction"). The determination of whether Power Plant Construction is necessary shall be within BellSouth's sole, but reasonable, discretion. BellSouth shall comply with all Telcordia and ANSI Standards regarding power cabling, including Telcordia Network Equipment Building System (NEBS) Standard GR-63-CORE. If BellSouth has not previously provided for power plant capacity for collocation at a specific site, then Supra Telecom has the option to add its own dedicated power plant; provided, however, that such work shall be performed by a BellSouth Certified Vendor and such contractor shall comply with BellSouth's guidelines and specifications. Where Supra Telecom performs its own dedicated Power Plant Construction, upon termination of this Attachment Supra Telecom shall have the right to remove its equipment from the power plant room, but shall otherwise leave the room intact. The termination and grounding locations shall be as mutually agreed upon by the Parties.

6.8 Basic Telephone Service. Upon request of Supra Telecom, BellSouth will provide basic telephone service to the Collocation Space under the

rates, terms and conditions of the current tariff offering for the service requested.

6.9 Space Preparation. BellSouth shall pro rate the costs of any renovation or upgrade to central office space or support mechanisms which is required to accommodate physical collocation. Supra Telecom's pro rated share will be calculated by multiplying such cost by a percentage equal to the amount of square footage occupied by Supra Telecom divided by the total central office square footage receiving renovation or upgrade. For this section, support mechanisms provided by BellSouth may include, but not be limited to heating/ventilation/air conditioning ("HVAC") equipment, HVAC duct work, cable support structure, fire wall(s), mechanical upgrade, asbestos abatement, or ground plane addition. Such renovation or upgrade will be evaluated and the charges assessed on a per central office basis. BellSouth will reimburse Supra Telecom in an amount equal to Supra Telecom's reasonable, demonstrative and mitigated expenditures incurred as a direct result of delays to the completion and turnover dates caused by BellSouth.

6.10 Virtual Collocation Transition. BellSouth offers Virtual Collocation pursuant to the rates, terms and conditions set forth in its F.C.C. Tariff No. 1. For the interconnection to BellSouth's network and access to BellSouth Network Elements, Supra Telecom may purchase Cross-Connects as set forth in Exhibit A, and Supra Telecom may designate within its Virtual Collocation arrangements the placement of telecommunications equipment set forth in Section 5.1 of this Attachment 4. In the event physical collocation space was previously denied at a location due to technical reasons or space limitations, and that physical collocation space has subsequently become available, Supra Telecom may transition its virtual collocation arrangements to physical collocation arrangements and pay the appropriate non-recurring fees for physical collocation and for the rearrangement or reconfiguration of services terminated in the virtual collocation arrangement. In the event that BellSouth knows when additional space for physical collocation may become available at the location requested by Supra Telecom, such information will be provided to Supra Telecom in BellSouth's written denial of physical collocation. To the extent that (i) physical collocation space becomes available to Supra Telecom within 180 days of BellSouth's written denial of Supra Telecom's request for physical collocation, and (ii) Supra Telecom was not informed in the written denial that physical collocation space would become available within such 180 days, then Supra Telecom may transition its virtual collocation arrangement to a physical collocation arrangement and will receive a credit for any nonrecurring charges

previously paid for such virtual collocation. Supra Telecom must arrange with a BellSouth certified vendor for the relocation of equipment from its virtual collocation space to its physical collocation space and will bear the cost of such relocation.

6.10.1 BellSouth will authorize the conversion of virtual collocation arrangements to physical collocation arrangements without requiring the relocation of the virtual arrangement where there are no extenuating circumstances or technical reasons that would cause the arrangement to become a safety hazard within the Premises or otherwise being in conformance with the terms and conditions of this Attachment and where (1) there is no change to the arrangement; (2) the conversion of the virtual arrangement would not cause the arrangement to be located in the area of the Premises reserved for BellSouth's forecast of future growth; and (3) due to the location of the virtual collocation arrangement, the conversion of said arrangement to a physical arrangement would not impact BellSouth's ability to secure its own facilities. Notwithstanding the foregoing, if the BellSouth Premises is at or nearing space exhaust, BellSouth may authorize the conversion of the virtual arrangement to a physical arrangement even though BellSouth could no longer secure its own facilities.

6.11 Cancellation. If, at anytime, Supra Telecom cancels its order for the Collocation Space(s), BellSouth shall return that portion of the charges paid by Supra Telecom which exceed any expenses incurred up to the date that written notice of the cancellation is received. If BellSouth can demonstrate that BellSouth's expenses exceeded the estimated charges paid by Supra Telecom, Supra Telecom will pay BellSouth the additional charges. In no event will the level of reimbursement under this paragraph exceed the maximum amount Supra Telecom would have otherwise paid for work undertaken by BellSouth if no cancellation of the order had occurred.

6.12 Licenses. Supra Telecom, at its own expense, will be solely responsible for obtaining from governmental authorities, and any other appropriate agency, entity, or person, all rights, privileges, and licenses necessary or required to operate as a provider of telecommunications services to the public or to occupy the Collocation Space.

7. RATES AND CHARGES

7.1 Non-recurring Fees. In addition to the Application Fee referenced in Section 6 of this Attachment 4, Supra Telecom shall remit payment of a Cable Installation Fee and one-half (1/2) of the estimated Space Preparation Fee, as applicable, coincident with submission of a Bona Fide Firm Order. The outstanding balance of the actual Space Preparation Fee shall be due thirty (30) calendar days following Supra Telecom's receipt of a bill or invoice from BellSouth following space acceptance. Once the installation of the initial equipment arrangement is complete, a subsequent application fee may apply (as described in Section 6.1.2 of this Attachment 4, when Supra Telecom requests a modification to the arrangement.

7.2 BellSouth may begin billing Supra Telecom for recurring charges for the Collocation Space on the date that Supra Telecom executes the written document accepting the Collocation Space pursuant to Section 6.4.3 of this Attachment 4.

7.3 Documentation. BellSouth shall provide documentation to establish the actual Space Preparation Fee. The Space Preparation Fee will be pro rated as prescribed in Section 6.9 of this Attachment 4.

7.4 Cable Installation. Cable Installation Fee(s) are assessed per entrance cable placed.

7.5 Floor Space. The floor space charge includes reasonable charges for lighting, heat, air conditioning, ventilation and other allocated expenses associated with maintenance of the Premises but does not include amperage necessary to power Supra Telecom's equipment. When the Collocation Space is enclosed, Supra Telecom shall pay floor space charges based upon the number of square feet so enclosed. When the Collocation Space is not enclosed, Supra Telecom shall pay floor space charges based upon the following floor space calculation: [(depth of the equipment lineup in which the rack is placed) + (0.5 x maintenance aisle depth) + (0.5 x wiring aisle depth)] X (width of rack and spacers). For purposes of this calculation, the depth of the equipment lineup shall consider the footprint of equipment racks plus any equipment overhang. BellSouth will assign unenclosed Collocation Space in conventional equipment rack lineups where feasible. In the event Supra Telecom's collocated equipment requires special cable racking, isolated grounding or other treatment which prevents placement within conventional equipment rack lineups, Supra Telecom shall be required to request an amount of floor space sufficient to accommodate the total equipment arrangement. Floor space charges are due beginning with the date on which BellSouth

releases the Collocation Space for occupancy or on the date Supra Telecom first occupies the Collocation Space, whichever is sooner.

7.6 Charges for -48V DC power will be assessed per ampere per month based upon the BellSouth Certified Vendor engineered and installed power feed fused ampere capacity. Rates include redundant feeder fuse positions (A&B) and cable rack to Supra Telecom's equipment or space enclosure. In the event BellSouth shall be required to construct additional DC power plant or upgrade the existing DC power plant in a central office as a result of Supra Telecom's request to collocate in that central office ("Power Plant Construction"), Supra Telecom shall pay its pro-rata share of costs associated with the Power Plant Construction. BellSouth will notify Supra Telecom of the need for the Power Plant Construction and will estimate the costs associated with the Power Plant Construction if BellSouth were to perform the Power Plant Construction. The costs of power plant construction shall be prorated and shared among all telecommunications carriers that benefit from that construction. The proration shall be based on the cost of providing one (1) ampere of DC power multiplied by the nominal drain requirements indicated by Supra Telecom in its physical collocation application. Supra Telecom shall pay BellSouth one-half of its prorata share of the estimated Power Plant Construction costs prior to commencement of the work. Supra Telecom shall pay BellSouth the balance due (actual cost less one-half of the estimated cost) within thirty (30) days of completion of the Power Plant Construction.

7.6.1 Charges for AC power will be assessed per breaker ampere per month based upon the BellSouth Certified Vendor engineered and installed power feed fused ampere capacity. Rates include the provision of commercial and standby AC power. Charges for AC power shall be assessed pursuant to the rates specified in Exhibit A of this Attachment 4, incorporated herein by this reference. AC power voltage and phase ratings shall be determined on a per location basis.

7.7 Other. If no rate is identified in the contract, the rate for the specific service or function will be negotiated by the Parties upon request by either Party. Payment of all other charges under this Attachment shall be due thirty (30) days after receipt of the bill (payment due date). Supra Telecom will pay a late payment charge of one and one-half percent (1-1/2%) assessed monthly on any balance which remains unpaid after the payment due date.

8. INSURANCE

8.1 Insurance coverage shall be maintained pursuant to Section 21 of the General Terms and Conditions of this Agreement, incorporated herein by this reference.

9. MECHANICS LIENS

9.1 If any mechanics lien or other liens shall be filed against property owned by either Party (BellSouth or Supra Telecom), or any improvement thereon by reason of or arising out of any labor or materials furnished or alleged to have been furnished or to be furnished to or for the other Party or by reason of any changes, or additions to said property made at the request or under the direction of the other Party, the other Party directing or requesting those changes shall, within thirty (30) days after receipt of written notice from the Party against whose property said lien has been filed, either pay such lien or cause the same to be bonded off the affected property in the manner provided by law. The Party causing said lien to be placed against the property of the other shall also defend, at its sole cost and expense, on behalf of the other, any action, suit or proceeding which may be brought for the enforcement of such liens and shall pay any damage and discharge any judgment entered thereon.

10. INSPECTIONS

10.1 BellSouth shall conduct an inspection of Supra Telecom's equipment and facilities in the Collocation Space(s) prior to the activation of facilities between Supra Telecom's equipment and equipment of BellSouth. BellSouth may conduct an inspection if Supra Telecom adds equipment and may otherwise conduct routine inspections at reasonable intervals mutually agreed upon by the Parties. BellSouth shall provide Supra Telecom with a minimum of forty-eight (48) hours or two (2) business days, whichever is greater, advance notice of all such inspections. All costs of such inspection shall be borne by BellSouth. If, as a result of the inspection by BellSouth, Supra Telecom is found to be in non-compliance with the terms and conditions of this section, Supra Telecom must modify its installation to achieve compliance.

11. SECURITY AND SAFETY REQUIREMENTS

11.1 The security and safety requirements set forth in this section are as stringent as the security requirements that BellSouth will maintain at its own premises either for its own employees or for authorized contractors. Only BellSouth employees, BellSouth Certified Vendors and authorized employees, authorized Guests, pursuant to Section 3.3 of this Attachment 4, or authorized agents of Supra Telecom will be permitted in the BellSouth Premises. Supra Telecom shall provide its employees and agents with picture identification which must be worn and visible at all times while in the Collocation Space or other areas in or around the Premises. The photo identification card shall bear, at a minimum, the employee's or agent's name and photo, and Supra Telecom's name. BellSouth reserves the right to remove from its Premises any employee or agent of Supra Telecom not possessing identification issued by Supra Telecom. Supra Telecom shall hold BellSouth harmless for any damages resulting from such removal of its personnel from BellSouth Premises in accordance with Section 10 of the General Terms and Conditions of this Agreement, incorporated herein by this reference. Supra Telecom shall be solely responsible for ensuring that any Guest of Supra Telecom is in compliance with all subsections of this Section 11.

11.2 Supra Telecom will be required, at its own expense, to conduct a statewide investigation of criminal history records for each Supra Telecom employee or agent being considered for work on the BellSouth Premises, for the states/counties where the Supra Telecom employee or agent has worked and lived for the past five years. Where state law does not permit statewide collection or reporting, an investigation of the applicable counties is acceptable.

11.3 Supra Telecom will administer to their personnel assigned to the BellSouth Premises security training either provided by BellSouth or meeting criteria defined by BellSouth.

11.4 Supra Telecom shall not assign to the BellSouth Premises any personnel with records of felony criminal convictions. Supra Telecom shall not assign to the BellSouth Premises any personnel with records of misdemeanor convictions, except for misdemeanor traffic violations, without advising BellSouth of the nature and gravity of the offense(s). BellSouth reserves the right to refuse building access to any Supra Telecom personnel who have been identified to have misdemeanor convictions. Notwithstanding the foregoing, in the event that Supra Telecom chooses not to advise BellSouth of the nature and gravity of any misdemeanor conviction, Supra Telecom may, in the alternative, certify to BellSouth that it shall not assign to the BellSouth Premises

any personnel with records of misdemeanor convictions (other than misdemeanor traffic violations).

11.5 For each Supra Telecom employee or agent requiring access to a BellSouth Premises pursuant to this agreement, Supra Telecom shall furnish BellSouth, prior to an employee or agent gaining such access, a certification that the aforementioned background check and security training were completed. The certification will contain a statement that no felony convictions were found and certifying that the security training was completed by the employee or agent. If the employee's or agent's criminal history includes misdemeanor convictions, Supra Telecom will disclose the nature of the convictions to BellSouth at that time. In the alternative, Supra Telecom may certify to BellSouth that it shall not assign to the BellSouth Premises any personnel with records of misdemeanor convictions other than misdemeanor traffic violations.

11.6 At BellSouth's request, Supra Telecom shall promptly remove from the BellSouth Premises any employee or agent of Supra Telecom's BellSouth does not wish to grant access to its Premises pursuant to any investigation conducted by BellSouth.

11.7 Notification to BellSouth. BST reserves the right to interview Supra Telecom's employees, agents, or contractors in the event of wrongdoing in or around BellSouth's property or involving BellSouth's or another CLEC's property or personnel, provided that BellSouth shall provide reasonable notice to Supra Telecom's Security contact of such interview and arranges for Supra Telecom's Security personnel to participate. Supra Telecom and its contractors shall reasonably cooperate with BellSouth's investigation into allegations of wrongdoing or criminal conduct committed by, witnessed by, or involving Supra Telecom's employees, agents, or contractors. Additionally, BellSouth reserves the right to bill Supra Telecom for all reasonable costs associated with investigations involving its employees, agents or contractors if it is established and mutually agreed in good faith that Supra Telecom's employees, agents or contractors are responsible for the alleged act. BellSouth shall bill Supra Telecom for BellSouth property which is stolen or damaged where an investigation determines the culpability of Supra Telecom's employees, agents or contractors and where Supra Telecom agrees, in good faith, with the results of such investigation. Supra Telecom shall notify BellSouth in writing immediately in the event that Supra Telecom discovers one of its employees or agents already working on the BellSouth Premises is a possible security risk. Upon request of the other Party, the Party who is the employer shall discipline consistent with its employment practices, up to and including removal from the BellSouth Premises,

any employee or agent found to have violated the security and safety requirements of this section. Supra Telecom shall hold BellSouth harmless for any damages resulting from such removal of its personnel from BellSouth premises in accordance with Section 10 of the General Terms and Conditions of this Agreement, incorporated herein by this reference.

11.8 Use of Supplies. Unauthorized use of telecommunications equipment or supplies by either Party, whether or not used routinely to provide telephone service (e.g. plug-in cards), will be strictly prohibited and handled appropriately. Costs associated with such unauthorized use may be charged to the offending Party, as may be all associated investigative costs.

11.9 Use of Official Lines. Except for non-toll calls necessary in the performance of their work, neither party shall use the telephones of the other Party on the BellSouth Premises. Charges for unauthorized telephone calls may be charged to the offending Party, as may be all associated investigative costs.

11.10 Accountability. Full compliance with the Security requirements of this section shall in no way limit the accountability of either Party to the other for the improper actions of its employees or agents.

11.11 BellSouth shall not use any information it collects in the course of implementing or operating security arrangements or other activities for marketing or any other purpose.

11.12 BellSouth shall exercise the same level of care it provides to itself to prevent harm or damage to Supra Telecom, its employees, agents or end users, or their property. BellSouth agrees to take reasonable and prudent steps to ensure the adequate protection of Supra Telecom property located within BellSouth Premises including, but not limited to:

11.12.1 Agreeing not to use card access readers and devices that use cards that are encoded identically or mechanized coded locks on external doors or on internal doors to spaces that house Supra Telecom equipment.

11.12.2 Insure that the area that houses Supra Telecom's equipment is adequately secured and monitored to prevent unauthorized entry.

11.12.3 Assuring that the physical security and the means of ingress and admission to spaces that house Supra Telecom equipment or

equipment enclosures are equal to or exceed those provided for BellSouth pursuant to BellSouth admissions practices.

11.12.4 Installing security studs in the hinge plates of doors having exposed hinges with removable pins if such leads to spaces that contain or house Supra Telecom equipment or equipment enclosures.

11.12.5 Controlling access from passenger and freight elevators by continuous surveillance or by installing security partitions, security grills, locked gates or doors between elevator lobbies and spaces that contain or house Supra Telecom equipment or equipment enclosures.

11.12.6 BellSouth will provide notification to designated personnel of an actual or attempted security breach of Supra Telecom's Collocation Space, upon BellSouth discovery of such breach.

12. NOTIFICATION OF SERVICE AFFECTING ACTIVITY WITHIN THE BELLSOUTH PREMISES

12.1 BellSouth shall provide Supra Telecom with written notice five (5) business days prior to those instances where BellSouth or its subcontractors may be performing non-emergency work that may directly affect the Collocation Space occupied by Supra Telecom or that is directly related to Supra Telecom circuits that support Supra Telecom equipment. BellSouth will inform Supra Telecom by telephone of any emergency-related activity that BellSouth or its subcontractors may be performing that may directly affect the Collocation Space occupied by Supra Telecom or that is directly related to Supra Telecom circuits that support Supra Telecom equipment. Notification of any emergency-related activity shall be made as soon as practicable after BellSouth learns that such emergency activity is necessary but in no event longer than thirty (30) minutes after such time. To the extent that the Emergency Notification Process requires BellSouth to incur additional costs, Supra Telecom shall reimburse BellSouth for such costs. The ACAC (Access Carrier Advocacy Center) shall be the single point of contact on all matters pertaining to the following areas:

Equipment or Central Office Engineering
Outside Plant Engineering
Physical & Logical Security
Provisioning
Maintenance
Billing
Operations

Site and Building Managers
Environmental and Safety

13. DESTRUCTION OF COLLOCATION SPACE

13.1 In the event a Collocation Space is wholly or partially damaged by fire, windstorm, tornado, flood or by similar causes to such an extent as to be rendered wholly unsuitable for Supra Telecom's permitted use hereunder, then either Party may elect within ten (10) days after such damage, to terminate this Attachment, only with respect to the damaged Collocation Space, and if either Party shall so elect, by giving the other written notice of termination, both Parties shall stand released of and from further liability under the terms hereof. If a Collocation Space shall suffer only minor damage and shall not be rendered wholly unsuitable for Supra Telecom's permitted use, or is damaged and the option to terminate is not exercised by either Party, BellSouth covenants and agrees to proceed promptly without expense to Supra Telecom, except for improvements not the property of BellSouth, to repair the damage. BellSouth shall have a reasonable time within which to rebuild or make any repairs, and such rebuilding and repairing shall be subject to delays caused by storms, shortages of labor and materials, government regulations, strikes, walkouts, and causes beyond the control of BellSouth, which causes shall not be construed as limiting factors, but as exemplary only. Supra Telecom may, at its own expense, accelerate the rebuild of its Collocation Space and equipment, provided however, that a BellSouth Certified Vendor is used and the necessary space preparation has been completed. Rebuild of equipment must be performed by a BellSouth Certified Vendor. If Supra Telecom's acceleration of the project increases the cost of the project, then those additional charges will be incurred by Supra Telecom. Where allowed and where practical, Supra Telecom may erect a temporary facility while BellSouth rebuilds or makes repairs. In all cases where a damaged Collocation Space shall be rebuilt or repaired, Supra Telecom shall be entitled to an equitable abatement of rent and other charges, depending upon the unsuitability of such damaged Collocation Space for Supra Telecom's permitted use, until such Collocation Space is fully repaired and restored and Supra Telecom's equipment installed therein (but in no event later than thirty (30) days after the Collocation Space is fully repaired and restored). Where Supra Telecom has placed an Adjacent Arrangement pursuant to Section 3.4 of this Attachment 4, Supra Telecom shall have the sole responsibility to repair or replace said Adjacent Arrangement provided herein. Pursuant to this section,

BellSouth will restore the associated services to the Adjacent Arrangement.

14. EMINENT DOMAIN

14.1 If the whole of a Collocation Space or Adjacent Arrangement shall be taken by any public authority under the power of eminent domain, then this Attachment shall terminate only with respect to such taken Collocation Space or Adjacent Arrangement as of the day possession shall be taken by such public authority and rent and other charges for such taken Collocation Space or Adjacent Arrangement shall be paid up to that day with proportionate refund by BellSouth of such rent and charges as may have been paid in advance for a period subsequent to the date of the taking. If any part of the Collocation Space or Adjacent Arrangement shall be taken under eminent domain, BellSouth and Supra Telecom shall each have the right to terminate this Attachment only with respect to such part of the Collocation Space or Adjacent Arrangement taken and declare the same null and void, by written notice of such intention to the other Party within ten (10) days after such taking.

15. RELOCATION OF Supra Telecom'S EQUIPMENT

15.1 Except as otherwise stated in this Attachment, BellSouth shall use its best efforts to prevent Supra Telecom from having to relocate its equipment during the term of this Agreement. If Supra Telecom, at BellSouth's request, agrees to relocate its equipment, then BellSouth shall reimburse Supra Telecom for any and all costs reasonably associated with such relocation.

16. NONEXCLUSIVITY

16.1 Supra Telecom understands that this Attachment is not exclusive and that BellSouth may enter into similar agreements with other parties. Assignment of space pursuant to all such agreements shall be determined by space availability and made on a first come, first served basis in accordance with the procedures established in this Attachment of obtaining Collocation Space.

BELLSOUTH/Supra Telecom RATES – FLORIDA
PHYSICAL COLLOCATION

Rates marked with an asterisk (*) are interim and are subject to true-up

USOC	Rate Element Description	Unit	Recurring Rate (RC)	Non-Recurring Rate (NRC)
PE1BA	Application Fee	Per request	$15.53	$3,248.00

PE1PT	Premium Time		NA	$16.40

EXHIBIT A: BELLSOUTH/Supra Telecom RATES – FLORIDA
PHYSICAL COLLOCATION (continued)

Note(s):
N/A refers to rate elements which do not have a negotiated rate.

(1) **Subsequent Application Fee**: BellSouth requires the submission of an Application Fee for modifications to an existing arrangement. However, when the modifications do not require BellSouth to expend capital, BellSouth will assess the Subsequent Application Fee in lieu of the Application Fee. Proposed modifications that could result in assessment of a Subsequent Application Fee would cause BellSouth to analyze the following but are not limited to: floor loading changes, changes to HVAC requirements, power requirement changes which may result in a power plant upgrade, environmental or safety requirements, or equipment relocation. Should the Subsequent Application Fee not be included as part of this Attachment, Supra Telecom will be assessed the full Application Fee for all subsequent activity for completed arrangements.

(2) **Space Preparation Fee**: The Space Preparation Fee is a one-time fee, assessed per arrangement, per location. It recovers costs associated with the shared physical collocation area within a Premises, which include survey, engineering, design and modification costs for network, building and support systems. BellSouth will pro rate the total shared space preparation costs among the collocators at each location based on the amount of square footage occupied by each collocator. This charge may vary depending on the location and type of arrangement requested.

(3) **Space Enclosure Fee**: The Space Enclosure Construction Fee is a monthly recurring fee, assessed per enclosure, per location with a one-hundred (100) square foot minimum enclosure. It recovers costs associated with providing an optional equipment arrangement enclosure, which include architectural and engineering fees, materials, and installation costs. The cost for additional square feet is applicable only when ordered with the first 100 square feet and must be requested in fifty (50) square foot increments. Supra Telecom may, at its option, arrange with a BellSouth Certified Contractor to construct the space enclosure in accordance with BellSouth's guidelines and specifications. In this event, the BellSouth Certified Contractor shall directly bill Supra Telecom for the space enclosure, and this fee shall not be applicable.

(4) **Cross Connects**: Rates shown are the equivalent per cross connect rates based on the Florida PSC Ordered rates as follows:

Cross Connects	Per Cross Connect	RC	NRC
2-wire	Per 100 X-Connects	$5.24	$1,157.00
4-wire	Per 100 X-Connects	$5.24	$1,157.00
DS-1/DCS	Per 28 X-Connects	$226.39	$1,950.00
DS-1/DSX	Per 28 X-Connects	$11.51	$1,950.00
DS-3/DCS	Per Cross Connect	$56.97	$ 528.00
DS-3/DSX	Per Cross Connect	$10.06	$528.00
Optical Cross Connects	Per Cross Connect	$6.46	$2,431.00

EXHIBIT A: BELLSOUTH/Supra Telecom RATES – FLORIDA
PHYSICAL COLLOCATION (continued)

(5) **Co-Carrier Cross-Connect.** As stated in Section 5 of the Collocation Attachment, Supra Telecom may connect to other CLECs within the designated Premises in addition to, and not in lieu of, interconnection to BellSouth services and facilities. Where BellSouth must construct a cable rack structure to house the direct connection, construction charges will be applied on an individual case basis as described in Section 5.6.1 of the Collocation Attachment. BellSouth shall provide an estimate of these charges in the Application Response. Where an existing cable rack structure is in place and has sufficient capacity to accommodate the direct connection requested, the recurring charges as stated in this Exhibit A shall apply.

(6) **POT Bays**: BellSouth's Florida specific rates were established in the Florida Public Service Commission Docket No. 960833. The Commission did not set permanent rates for POT Bays, given the assumption by the Parties to the Proceeding that they will always provide their own POT Bays. It will be necessary for Supra Telecom to provide its own POT Bays per BellSouth specifications and provide the necessary information from which BellSouth can inventory.

(7) **Additional Engineering Fee**: BellSouth's additional engineering, and other labor costs associated with handling Supra Telecom-requested modifications to requests in progress or augmentations to existing arrangements shall be recovered as Additional Engineering charges, under provisions in BellSouth's F.C.C. Number 1 Tariff, Sections 13.1 and 13.2. Should Additional Engineering rates not be included, Supra Telecom agrees not to make changes to collocation arrangement after a Bona Fide Firm Order is submitted.

ENVIRONMENTAL AND SAFETY PRINCIPLES

The following principles provide basic guidance on environmental and safety issues when applying for and establishing Physical Collocation arrangements.

1. GENERAL PRINCIPLES

1.1 Compliance with Applicable Law. BellSouth and Supra Telecom agree to comply with applicable federal, state, and local environmental and safety laws and regulations including U.S. Environmental Protection Agency (USEPA) regulations issued under the Clean Air Act (CAA), Clean Water Act (CWA), Resource Conservation and Recovery Act (RCRA), Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), Superfund Amendments and Reauthorization Act (SARA), the Toxic Substances Control Act (TSCA), and OSHA regulations issued under the Occupational Safety and Health Act of 1970, as amended and NFPA and National Electrical Codes (NEC) and the NESC ("Applicable Laws"). Each Party shall notify the other if compliance inspections are conducted by regulatory agencies and/or citations are issued that relate to any aspect of this agreement.

1.2 Notice. BellSouth and Supra Telecom shall provide notice to the other, including Material Safety Data Sheets (MSDSs), of known and recognized physical hazards or Hazardous Chemicals existing on site or brought on site. Each Party is required to provide specific notice for known potential Imminent Danger conditions. Supra Telecom should contact 1-800-743-6737 for BellSouth MSDS sheets.

1.3 Practices/Procedures. BellSouth may make available additional environmental control procedures for Supra Telecom to follow when working at a BellSouth Premises (See Section 2, below). These practices/procedures will represent the regular work practices required to be followed by the employees and contractors of BellSouth for environmental protection. Supra Telecom will require its contractors, agents and others accessing the BellSouth Premises to comply with these practices. Section 2 lists the Environmental categories where BST practices should be followed by CLEC when operating in the BellSouth Premises.

1.4 Environmental and Safety Inspections. BellSouth reserves the right to inspect the Supra Telecom space with proper notification. BellSouth reserves the right to stop any Supra Telecom work operation that imposes Imminent Danger to the environment, employees or other persons in the area or Facility.

1.5 Hazardous Materials Brought On Site. Any hazardous materials brought into, used, stored or abandoned at the BellSouth Premises by Supra Telecom are owned by Supra Telecom. Supra Telecom will indemnify BellSouth for claims, lawsuits or damages to persons or property caused by these materials. Without prior written BellSouth approval, no substantial new safety or environmental hazards can be created by Supra Telecom or different hazardous materials used by Supra Telecom at BellSouth Facility. Supra Telecom

must demonstrate adequate emergency response capabilities for its materials used or remaining at the BellSouth Facility.

1.6 Spills and Releases. When contamination is discovered at a BellSouth Premises, the party discovering the condition must notify BellSouth. All Spills or Releases of regulated materials will immediately be reported by Supra Telecom to BellSouth.

1.7 Coordinated Environmental Plans and Permits. BellSouth and Supra Telecom will coordinate plans, permits or information required to be submitted to government agencies, such as emergency response plans, spill prevention control and countermeasures (SPCC) plans and community reporting. If fees are associated with filing, BellSouth and Supra Telecom will develop a cost sharing procedure. If BellSouth's permit or EPA identification number must be used, Supra Telecom must comply with all of BellSouth's permit conditions and environmental processes, including environmental "best management practices (BMP)" (see Section 2, below) and/or selection of BST disposition vendors and disposal sites.

1.8 Environmental and Safety Indemnification. BellSouth and Supra Telecom shall indemnify, defend and hold harmless the other party from and against any claims (including, without limitation, third-party claims for personal injury or death or real or personal property damage), judgments, damages, (including direct and indirect damages, and punitive damages), penalties, fines, forfeitures, costs, liabilities, interest and losses arising in connection with the violation or alleged violation of any Applicable Law or contractual obligation or the presence or alleged presence of contamination arising out of the acts or omissions of the indemnifying party, its agents, contractors, or employees concerning its operations at the Facility.

2. CATEGORIES FOR CONSIDERATION OF ENVIRONMENTAL ISSUES

When performing functions that fall under the following Environmental categories on BellSouth's Premises, Supra Telecom agrees to comply with the applicable sections of the current issue of BellSouth's Environmental and Safety Methods and Procedures (M&Ps), incorporated herein by this reference. Supra Telecom further agrees to cooperate with BellSouth to ensure that Supra Telecom's employees, agents, and/or subcontractors are knowledgeable of and satisfy those provisions of BellSouth's Environmental M&Ps which apply to the specific Environmental function being performed by Supra Telecom, its employees, agents and/or subcontractors.

The most current version of reference documentation must be requested from BellSouth.

2. Categories for Consideration of Environmental Issues (cont.)

ENVIRONMENTAL CATEGORIES	ENVIRONMENTAL ISSUES	ADDRESSED BY THE FOLLOWING DOCUMENTATION
Disposal of hazardous material or other regulated material (e.g., batteries, fluorescent tubes, solvents & cleaning materials)	Pollution liability insurance EVET approval of contractor	Std T&C 450 GU-BTEN-001BT, Chapter 4 Std T&C 660-3 GU-BTEN-001BT, Chapter 10

Removing or disturbing building materials that may contain asbestos	Asbestos work practices	GU-BTEN-001BT, Chapter 3

3. DEFINITIONS

Generator. Under RCRA, the person whose act produces a Hazardous Waste, as defined in 40 CFR 261, or whose act first causes a Hazardous Waste to become subject to regulation. The Generator is legally responsible for the proper management and disposal of Hazardous Wastes in accordance with regulations.

Hazardous Chemical. As defined in the U.S. Occupational Safety and Health (OSHA) hazard communication standard (29 CFR 1910.1200), any chemical which is a health hazard or physical hazard.

Hazardous Waste. As defined in section 1004 of RCRA.

Imminent Danger. Any conditions or practices at a facility which are such that a danger exists which could reasonably be expected to cause immediate death or serious harm to people or immediate significant damage to the environment or natural resources.

Spill or Release. As defined in Section 101 of CERCLA.

4. ACRONYMS

Exhibit A, The Local Number Portability Ordering Guide for CLECs

Exhibit B, Rates for Service Number Portability

ACCESS TO NUMBERS and NUMBER PORTABILITY

1 Non-Discriminatory Access to Telephone Numbers

1.1 During the term of this Agreement, Supra Telecom shall contact NeuStar for the assignment of numbering resources. In order to be assigned a Central Office Code, Supra Telecom will be required to complete the Central Office Code (NXX) Assignment Request and Confirmation Form (Code Request Form) in accordance with Industry Numbering Committee's Central Office Code (NXX) Assignment Guidelines (INC 95-0407-008).

1.2 For the purposes of the resale of BellSouth's telecommunications services by Supra Telecom, BellSouth will provide Supra Telecom with on line access to telephone numbers for reservation on a first come first served basis. Such reservations of telephone numbers, on a pre-ordering basis shall be for a period of nine (9) days. Supra Telecom acknowledges that there may be instances where there is a shortage of telephone numbers in a particular Common Language Location Identifier Code ("CLLIC") and in such instances BellSouth may request that Supra Telecom cancel all or a portion of its reservations of numbers. Supra Telecom's consent to such request shall not be unreasonably withheld.

1.3 Further, upon Supra Telecom request and for the purposes of the resale of BellSouth's telecommunications services by Supra Telecom, BellSouth will reserve up to 100 telephone numbers per CLLIC, for Supra Telecom's sole use. Such telephone number reservations shall be transmitted to Supra Telecom via electronic file transfer. Such reservations shall be valid for ninety (90) days from the reservation date. Supra Telecom acknowledges that there may be instances where there is a shortage of telephone numbers in a particular CLLIC and in such instances BellSouth shall use its best efforts to reserve for a ninety (90) day period a sufficient quantity for Supra Telecom's reasonable need in that particular CLLIC.

2 Permanent Number Portability

2.1 The FCC, the Commissions and industry forums have developed a permanent approach to providing service provider number portability and BellSouth is working to implement Permanent Number Portability

("PNP"). Both Parties agree to implement a permanent approach as developed and approved by the Commission, the FCC and industry forums. Consistent with the requirements to move to PNP, interim Service Provider Number Portability ("SPNP") is available pursuant to Section 3 of this Attachment 5.

2.2 BellSouth and Supra Telecom will adhere to the process flows and cutover guidelines outlined in "The Local Number Portability Ordering Guide for CLECs," Issue 1b, dated October 10, 1999, attached as Exhibit A to this Attachment 5.

2.2.1 BellSouth and Supra Telecom will work cooperatively to implement changes to PNP process flows ordered by the FCC or as recommended by standard industry forums addressing PNP.

2.2.2 Both Parties shall cooperate in the process of porting numbers from one carrier to another so as to limit service outage for the ported subscriber. BellSouth will set LRN unconditional or 10-digit triggers where applicable which should ensure no interruption to the end user. Where triggers are set, BellSouth removes the ported number at the same time the trigger is removed.

2.2.3 For porting of numbers where triggers are not set, the Parties shall coordinate the porting of the number between service providers so as to minimize service interruptions to the end user.

2.2.4 BellSouth will provide ordering support for Supra Telecom's PNP requests Monday through Friday 8:00 AM until 8:00 PM EST. BellSouth normal hours of operation for provisioning support are defined in Attachment 15, incorporated herein by this reference. Ordering and provisioning support required by Supra Telecom outside of these hours will be considered outside of normal business hours and will be subject to overtime billing. For stand alone PNP where LRN unconditional or 10-digit triggers are set, Supra Telecom may port numbers during times that are supported by NPAC 24 hours a day 7 days a week. BellSouth will provide maintenance assistance to Supra Telecom 24 hours a day 7 days a week to resolve issues arising from the porting of numbers for problems isolated to the BellSouth network.

2.2.5 Supra Telecom will provide ordering support for BellSouth's PNP requests Monday through Friday, 8:00 a.m. until 5:00 p.m. MST.

2.2.6 Performance Measurements for BellSouth providing PNP are located in Attachment 9 to this Agreement, incorporated herein by this reference.

2.3 BellSouth will use best efforts to update switch translations, where necessary, in time frames that are consistent with the time frames BellSouth's end users experiences or as offered to other CLECs.

2.4 Supra Telecom may request deployment of PNP according to and pursuant to the rules and regulations set forth in 47 CFR § 52.23.

2.5 End User Line Charge - Recovery of charges associated with implementing PNP through a monthly charge assessed to end users has been authorized by the FCC. This end user line charge will be as filed in BellSouth's FCC Tariff No. 1 and will be billed to Supra Telecom where Supra Telecom is a subscriber to local switching or where Supra Telecom is a reseller of BellSouth telecommunications services. This charge will not be discounted.

2.6 **LRN-LNP employs an "N-1" Query Methodology**

2.6.1 For interlata or intralata toll calls the originating carrier will pass the call to the appropriate toll carrier who will perform the LNP query. In this situation, the toll carrier is the N-1 carrier.

2.6.2 For a local call to a ported number, BellSouth or Supra Telecom, as the originating carrier, will be the N-1 carrier. The N-1 carrier will perform an external database query and pass the call to the appropriate terminating carrier.

2.6.3 For local calls to an NXX in which at least one number has been ported via LRN-PNP, the Party that owns the originating switch shall query an LRN-PNP database as soon as the call reaches the first LRN-PNP-capable switch in the call path. The Party that owns the originating switch shall query on a local call to an NXX in which at least one number has been ported via LRN-PNP prior to any attempts to route the call to any other switch. Prior to the first number in an NXX being ported via LRN-PNP, neither Party will charge a query charge to the other Party when the other Party is the N-1 carrier.

2.6.4 A Party shall be charged for an LRN-PNP query by the other Party only if the Party to be charged is the N-1 carrier and it was obligated to perform the LRN-PNP query but failed to do so. Parties are not obligated to perform the LNP-PNP query prior to the first port in an NXX.

2.6.5 On calls originating from a Party's network, the Party will populate, in the SS7 Initial Address Message, if technically feasible, the Jurisdiction Information Parameter ("JIP") with the first six digits of the

ten digit Location Routing Number ("LRN") in accordance with the applicable industry technical standards.

2.7 **SMS Administration**

2.7.1 Supra Telecom and BellSouth will adhere to the Number Portability Administration Center ("NPAC") Service Management System ("SMS") Functional Requirements Specification ("FRS") as described in the NANC-FRS-Number Portability Administration Center–SMS, Version 1.1, dated May 5, 1997, as required in FCC Order No. 97-289, released August 18, 1997, or as further required by the FCC in future proceedings.

2.8 **Project Management Guidelines for PNP**

2.8.1 BellSouth will project manage a PNP order from Supra Telecom if it meets one or more of the following criteria:

- 51 + telephone numbers on basic service;
- 15 + loops;
- telephone numbers associated with a complex class of service.

2.8.2 As used herein, the term "Project Manage" means that the Parties shall negotiate implementation details, including but not limited to, due dates, cut-over intervals and times, coordination of technical resources and completion notices.

2.9 **Excluded Numbers**

2.9.1 Neither Party shall be required to provide number portability for excluded numbers (e.g., 500 and 900 NPAs, 950 and 976 NXX number services, and others as excluded by FCC rulings issued from time to time) under this Agreement.

2.10 **Mass Calling Numbers/Choke Networks**

2.10.1 Mass Call Numbers will not be ported with LRN (i.e., there will be no database queries made for mass call number NXX's associated with choke networks). Until the FCC has adopted a standard for porting mass call numbers, the Parties will work cooperatively with each other to direct calls to the mass calling network using arrangements that are economical and efficient for both Parties.

2.11 **Operator Services, Line Information Database ("LIDB") and Directory Assistance**

2.11.1 If Operator Services, LIDB and Directory Assistance services are provided pursuant to this Agreement, they shall also apply when PNP is in place.

2.12 If Integrated Services Digital Network User Part ("ISUP") signaling is used, BellSouth and Supra Telecom shall provide, if technically feasible, the Jurisdiction Information Parameter ("JIP") in the SS7 Initial Address Message ("IAM") in accordance with applicable industry standard technical references.

2.13 **Porting of PNP DID Block Numbers**

BellSouth and Supra Telecom shall offer number portability to customers for any portion of an existing DID block without being required to port the entire block of DID numbers. BellSouth and Supra Telecom shall permit end users who port a portion of DID numbers to retain DID service on the remaining portion of the DID numbers. Porting a portion of a range of DID numbers can be provided by BellSouth pursuant to its General Subscriber Services Tariff. The lines remaining with BellSouth will be billed to BellSouth end users at the applicable tariffed rates or consistent with BellSouth pricing guidelines.

3 **Service Provider Number Portability**

3.1 Definition. Until the industry-wide permanent solution is implemented in an end office, BellSouth shall provide Service Provider Number Portability ("SPNP"). SPNP is an interim service arrangement whereby an end user who switches subscription of his local exchange service from BellSouth to a CLEC, or vice versa, is permitted to retain the use of his existing assigned telephone number, provided that the end user remains at the same location for his local exchange service or changes locations and service providers but stays within the same serving wire center of his existing number.

3.2 Methods of Providing Number Portability. SPNP is available on a per telephone number basis through either remote call forwarding ("SPNP-RCF"), LERG reassignments (SPNP-LERG), direct inward dialing trunks (SPNP-DID), or route indexing (SPNP-RI) at the election of the Party requesting SPNP.

4. SPNP Implementation

4.1 SPNP is available only where a Supra Telecom or BellSouth is currently providing, or will begin providing concurrent with provision of SPNP, basic local exchange service to the affected end user. SPNP

for a particular telephone number is available only from the central office originally providing local exchange service to the end user. SPNP for a particular assigned telephone number will be disconnected when any end user, Commission, BellSouth, or CLEC initiated activity (e.g., a change in exchange boundaries) would normally result in a telephone number change had the end user retained his initial local exchange service.

4.2 Signaling Requirements. SS7 Signaling is required for the provision of SPNP services. SPNP-DID is available from BellSouth on a per DS0, DS1, or DS3 basis.

4.3 The calling party shall be responsible for payment of the applicable charges for sent-paid calls to the SPNP number. For collect, third-party, or other operator-assisted non-sent paid calls to the ported telephone number, BellSouth or the CLEC shall be responsible for the payment of charges under the same terms and conditions for which the end user would have been liable for those charges. Either Party may request that the other block collect and third company non-sent paid calls to the SPNP-assigned telephone number. If a Party does not request blocking, the other Party will provide itemized local usage detail for the billing of non-sent paid calls an individual end user account level. The billable detail will be delivered to the requesting Party pursuant to the terms and conditions contained within Attachment 6, incorporated herein by this reference.

4.4 Each Party shall be responsible for obtaining authorization from the end user for the handling of the disconnection of the end user's service, the provision of new local service and the provision of SPNP services. Each Party shall be responsible for coordinating the provision of service with the other to assure that its switch is capable of accepting SPNP ported traffic. Each Party shall be responsible for providing equipment and facilities that are compatible with the other's service parameters, interfaces, equipment and facilities and shall be required to provide sufficient terminating facilities and services at the terminating end of an SPNP call to adequately handle all traffic to that location and shall be solely responsible to ensure that its facilities, equipment and services do not interfere with or impair any facility, equipment, or service of the other Party or any of its end users. In the event that either Party determines in its reasonable judgment that the other Party will likely impair or is impairing, or interfering with any equipment, facility or service or any of its end users, that Party may either refuse to provide SPNP service or may terminate SPNP service to the other Party after providing appropriate notice.

4.5 Each Party shall be responsible for providing an appropriate intercept announcement service for any telephone numbers subscribed to SPNP services for which it is not presently providing local exchange service or terminating to an end user. Where either Party chooses to disconnect or terminate any SPNP service, that Party shall be responsible for designating the preferred standard type of announcement to be provided.

4.6 Each Party shall be the other Party's single point of contact for all repair calls on behalf of each Party's end user. Each Party reserves the right to contact the other Party's customers if deemed necessary for maintenance purposes.

4.7 Neither Party shall be responsible for adverse effects on any service, facility or equipment from the use of SPNP services. End-to-end transmission characteristics may vary depending on the distance and routing necessary to complete calls over SPNP facilities and the fact that another carrier is involved in the provisioning of service. Therefore, end-to-end transmission characteristics cannot be specified by either Party for such calls. Neither Party shall be responsible to the other if any necessary change in protection criteria or in any of the facilities, operation, or procedures of either renders any facilities provided by the other Party obsolete or renders necessary modification of the other Party's equipment.

4.8 For terminating IXC traffic ported to either Party which requires use of either Party's tandem switching, the tandem provider will bill the IXC tandem switching, the interconnection charge, and a portion of the transport, and the other Party will bill the IXC local switching, the carrier common line and a portion of the transport. If the tandem provider is unable to provide the necessary access records to permit the other Party to bill the IXC directly for terminating access to ported numbers, then the tandem provider will bill the IXC full terminating switched access charges at the tandem provider's rate and will compensate the other Party at the tandem Party's tariff rates. If an intraLATA toll call is delivered, the delivering Party will pay terminating access rates to the other Party. This subsection does not apply in cases where SPNP-DID is utilized for number portability.

4.9 If SPNP is deployed by either Party and prior to conversion to PNP:

4.9.1 If requested by either Party, the other Party shall provide Emergency Interrupt ("EI") trunks to the requesting Party's End Office for Busy Line Verification/Busy Line Interrupt ("BLV/BLI") call requests for lines that terminate at the requesting Party's End Office;

4.9.2 When a BLV/BLI request for a ported number is directed to one Party's operator and the query is not successful (i.e., the request yields an abnormal result), the operator shall confirm whether the number has been ported and shall direct the request to the appropriate operator;

4.9.3 BellSouth shall remove from its LIDB all existing BellSouth issued Telephone Line Number ("TLN")-based card numbers when a customer ports its number to the Supra Telecom;

4.9.4 Where BellSouth has control of directory listings and/or directory assistance for NXX codes containing ported numbers, BellSouth shall process the requests for directory listings and Directory Assistance entries as specified by Supra Telecom on the appropriate service request.

4.9.5 Supra Telecom shall have the right to use the existing BellSouth 911 infrastructure for all 911 capabilities. With respect to 911 service associated with ported numbers under SPNP, the Parties agree that all ported numbers will remain in the Public Service Answering Points ("PSAP") routing databases. When remote call forwarding ("RCF") is used, both the ported numbers and shadow numbers for a Party's ported subscribers shall be stored in PSAP databases. Either Party shall have the right to verify the accuracy of the information in the PSAP databases.

4.9.6 Cut-over intervals for SPNP provided to Supra Telecom end users will be at parity with the intervals experienced by BellSouth end users, BellSouth itself, or any other CLEC, in accordance with the Performance Measurements in Attachment 9, incorporated herein by this reference.

4.10 SPNP-RCF, as contemplated by this Attachment 5, is a telecommunications service whereby a call dialed to an SPNP-RCF equipped telephone number is automatically forwarded to an assigned seven- or ten- digit telephone number within the local calling area as defined in BellSouth's General Subscriber Services Tariff. The forwarded-to number shall be specified by Supra Telecom or BellSouth, as appropriate. The forwarding company will provide identification of the originating telephone number, via SS7 signaling, to the receiving Party. Identification of the originating telephone number to the SPNP-RCF end user cannot be guaranteed. SPNP-RCF provides a single call path for the forwarding of no more than one simultaneous call to the receiving Party's specified forwarded-to number. Additional call paths are available and rates are set forth in Exhibit B.

4.11 SPNP-DID service, as contemplated by this Attachment 5, provides trunk side access to end office switches for direct inward dialing to the other company's premises equipment from the telecommunications network to lines associated with the other company's switching equipment and must be provided on all trunks in a group arranged for inward service.

4.11.1 A SPNP-DID trunk termination charge, provided with SS7 Signaling only, applies for each trunk voice grade equivalent. In addition, direct facilities are required from the end office where a ported number resides to the end office serving the ported end user customer. The rates for a switched local channel and switched dedicated transport apply as contained in BellSouth's Intrastate Access Services tariff, as said tariff is amended from time to time. Transport mileage will be calculated as the airline distance between the end office where the number is ported and the Point of Interface ("POI") using the V&H coordinate method.

4.11.2 SPNP-DID must be established with a minimum configuration of two channels and one unassigned telephone number per switch, per arrangement for control purposes.

4.11.3 Transport facilities arranged for SPNP-DID may not be mixed with any other type of trunk group, with no outgoing calls placed over said facilities.

4.11.4 SPNP-DID will be provided only where such facilities are available and where the switching equipment of the ordering company is properly equipped.

4.11.5 Where SPNP-DID service is required from more than one wire center or from separate trunk groups within the same wire center, such service provided from each wire center or each trunk group within the same wire center shall be considered a separate service.

4.11.6 Only customer-dialed sent-paid calls will be completed to the first number of a SPNP-DID number group; however, there are no restrictions on calls completed to other numbers of a SPNP-DID number group.

4.11.7 Interface group arrangements provided for terminating the switched transport at the Party's terminal location are as set forth in BellSouth's Intrastate Access Services Tariff, § E6.1.3.A as amended from time to time.

4.11.8 BellSouth and Supra Telecom shall offer number portability to customers for any portion of existing DID block without being required to port the entire block of DID numbers. BellSouth and Supra Telecom shall permit end users who port a portion of DID numbers to retain DID service on the remaining portion of the DID numbers. Porting a portion of a range of DID numbers can be provided by BellSouth pursuant to its General Subscriber Services Tariff. The lines remaining with BellSouth will be billed to BellSouth's end users at the applicable tariffed rates or consistent with BellSouth pricing guidelines.

4.11.9 SPNP-DID is available from BellSouth on a per DS1 or DS3 basis. Where SPNP-DID is technically feasible and is provided on a DS1 or a DS3 basis, the applicable rates are set forth in Exhibit A to this Attachment 5.

4.12 **Route Indexing**

4.12.1 Route Indexing ("RI") may take two forms: Route Index-Portability Hub ("RI-PH") or Directory Number-Route Index ("DN-RI").

4.12.2 RI-PH will route a dialed call to the first Party's (Party A's) switch associated with the NXX of the dialed number. Party A's switch shall then insert a prefix onto the dialed number which identifies how the call is to be routed to the other Party (Party B) as the local service provider. The prefixed dialed number is transmitted to Party A's tandem switch to which the Party B is connected. The prefix is removed by the operation of the tandem switch and the dialed number is routed to Party B's switch so the routing of the call can be completed by Party B.

4.12.3 DN-RI is a form of RI-PH that requires direct trunking from BellSouth's switch where the ported number was originally assigned to the Supra Telecom switch where the number has been ported. The BellSouth switch shall send without a prefix the originally dialed number to Supra Telecom's switch.

4.12.4 BellSouth shall provide RI-PH or DN-RI on an individual telephone number basis, as the other Party designates. Where technically feasible, Supra Telecom may designate both methods so that calls to ported numbers are first directed to Supra Telecom's switch over direct trunks but may overflow to tandem trunks if all trunks in the direct group are occupied.

4.12.5 For both RI-PH and DN-RI the trunks used may, at Supra Telecom's option, be the same as those used for exchange of other local traffic

with the other Party if technically feasible. At either Party's option, the trunks shall employ SS7 or in band signaling and may be one way or two way.

5. LERG Reassignment

5.1 BellSouth and Supra Telecom will mutually agree, on a case by case basis, when an entire NXX is to be reassigned using LERG reassignment. Both parties will work cooperatively to coordinate and complete the transfer prior to the date on which LERG changes become effective using processes and intervals agreed to by both Parties.

6. Rates

6.1 Rates for SPNP are set out in Exhibit B to this Attachment 5, incorporated herein by this reference. If no rate is identified in this Agreement, the rate for the specific service or function will be negotiated by the Parties upon request by either Party.

6.2 Rates for the interfaces to access Operations Support Systems functions shall be as set forth in Exhibit A of Attachment 2, incorporated herein by this reference.

7. Transition to Permanent Number Portability

7.1 Once PNP is implemented in an end office , with advance written notice, both Parties must withdraw their SPNP offerings. The transition from existing SPNP arrangements to PNP shall occur within one hundred twenty (120) days from the date PNP is implemented in the end office serving the telephone number. Neither Party shall charge the other Party for conversion from SPNP to PNP. The Parties shall comply with any SPNP/PNP transition processes established by the FCC and State commissions and appropriate industry number portability work groups.

NOTES:

If no rate is identified in the contract, the rate for the specific service or function will be as set forth in applicable BellSouth tariff or as negotiated by the Parties upon request by either Party.

1 Until the FCC issues its order implementing a cost recovery mechanism for permanent number portability, the Company will track its costs of providing interim SPNP with sufficient detail to verify the costs. This will facilitate the Florida PSCs consideration of the recovery of these costs in Docket 950737-TP. (FL)

2 BellSouth and CLEC will each bear their own costs of providing remote call forwarding as an interim number portability option. (KY)

Introduction

Purpose

This document contains information on Local Number Portability for CLECs interested in ordering this service from BellSouth. The Guide is intended to increase the CLEC's understanding of LNP Order Process at BellSouth; to provide guidelines for LSR completion; and to offer information on critical success factors for LSR submission.

This guide is intended to be used as a supplement to, not a replacement for, the **BellSouth Ordering Guide for CLECs** and the **LEO Implementation Guide**, which are available on-line through the BellSouth Interconnection website at: **http://www.interconnection.bellsouth.com/guides/guides.html**

Information resources reviewed for this guide include, but are not limited to:

- BellSouth CLEC Interconnections Web Site
- BellSouth Interconnection Services Ordering Guide for CLECs
- BellSouth LNP Documentation
- North American Numbering Council (NANC) Architecture and Administrative Plan for Local Number Portability
- North American Numbering Council (NANC) Inter-Service Provider LNP Operations Flows

1. Introduction to Local Number Portability

1.1 Description of LNP

Local Service Provider Portability

Local Number Portability (LNP) is a part of local competition that provides end users with the ability to retain their phone numbers when they change their Local Service Provider.

Phase	Description
Local Service Provider (SPP)	Allows customers to keep their current telephone number(s) if they chose to switch from their current Local Service Provider to another.

The Telecommunications Act of 1996 requires BellSouth to provide a mechanism for customers to retain their current telephone numbers when they change their Local Service Provider.

Orders of the FCC pursuant to the Telecommunications Act of 1996 provide deadlines for implementing Local Service Provider Portability (SPP) in the top 100 metropolitan areas in the United States. The BellSouth territory includes 21 of the top 100 metropolitan areas. To learn more about BellSouth's implementation schedule plan , please visit us at:

Note: http://g8058183.ga.bst.bls.com/ibu/files/infra_lnp/LNP/LNPtrack.xls

1.2 Network Provisioning for Local Number Portability

Interim Number Portability (INP) is a temporary solution for porting numbers which involves two telephone numbers to route calls to the serving wire center using one of the following methods:

- Remote Call Forwarding
- Direct Inward Dialing
- Route Index Hubbing

Local Number Portability (LNP) is the long range solution for Service Provider Portability (SPP) and includes the following characteristics:

- uses only one telephone number.
- requires significant network architecture hardware and software upgrades.
- uses the Advanced Intelligent Network (AIN).
- requires new routing methodology to send calls to the wire center of the company currently providing the local service.

Note: All calls to a port eligible NPA NXX will route using the AIN to look up the correct routing information (LRN) for the telephone number.

The **LNP Gateway (LNP GW)** is a major link in the LNP process for BellSouth since it provides both internal and external communications with various interfaces and processes, including:

- linking BellSouth to the Number Portability Administration Center (NPAC).
- allowing for inter-company communications between BellSouth and the CLECs for electronic ordering.
- providing interface between NPAC and AIN SMS for LNP routing processes.

The **Number Portability Administration Center (NPAC)** is a neutral third party organization that oversees the porting of telephone numbers for Local Number Portability. The NPAC maintains and communicates LNP-related data including

- Old Service Provider ID (OCN)
- New Service Provider ID (OCN)
- Local Routing Number (LRN)
- Due Dates
- CLASS-DPC
- CLASS-SSN
- LIDB-DPC
- LIDB-SSN
- CNAM-DPC
- CNAM-SSN
- ISVM-DPC
- ISVM-SSN

The BellSouth LNP Gateway must communicate with the NPAC as to whether numbers are porting out or porting in. The messages sent to and from the NPAC are called Subscription Versions (SVs). Subscription Versions are the messages that flow through the NPAC to provide information for routing calls to ported numbers. The SV can only contain one telephone number (TN), which means that one LSR may have many TNs and SVs associated with it.

LSRs for INP

LSRs requesting Interim Number Portability (INP) will not be accepted with due dates by BellSouth after the completion for each phase. If the due date is between ready to port and completion date, the CLEC may request INP or LNP.

1.3 LNP Order Status

Online Order Status Information For Faxed LSR's

CLEC PON Status Reports for faxed LNP LSRs are now available via BellSouth's website at **https:// clec.bellsouth.com**. This report is located in the same location as your company's measurement reports. The information can be found as report number 00 (PON Report) on the CLEC reports page.

The report will provide status for all orders tracked into BellSouth's Local Order Number (LON) systems for the most recent 31 days. The report is CLEC specific. This will answer the majority of questions CLECs have about orders that have been submitted.

Each CLEC will be required to have a specific login and password to access these reports. The application for this report is also found on the web. Once the form is completed, it should be sent to the account team for processing.

EDI/TAG POS and CN

Users submitting LSR's through EDI or TAG receive Pending Order Statuses (POS) and Jeopardy Notifications back through the return path for these systems. Completion notification (CN) is sent when all service orders associated with the LSR are complete.

2. LNP Order Process Flows

2.1 High Level LNP Order Process Flow and Narrative

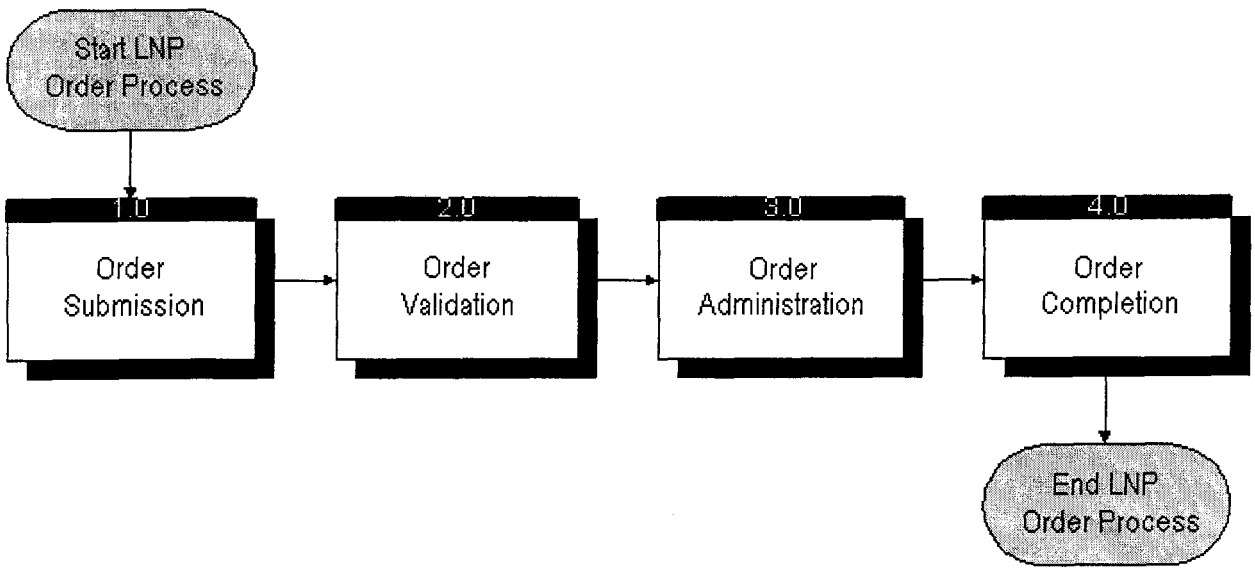

Figure 1 High Level LNP Order Process Flow

Step	Action
1.0 Order Submission:	CLEC sends LNP LSR to BellSouth LCSC via fax, EDI, or TAG.
2.0 Order Validation:	BellSouth validates CLEC LSR for errors, and requests clarification when necessary.

Step	Action
3.0 Order Administration:	BellSouth sends FOC to CLEC if clarification is not needed. CLEC receives FOC and immediately sends Create SV to NPAC. BellSouth then sends Concur SV to NPAC. The CLEC sends the Activate SV to NPAC on the Due Date, porting the number.
4.0 Order Completion:	BellSouth completes the Disconnect order and sends E911 Unlock message to SCC. CLEC sends E911 Migrate message to SCC.

000321

2.2 Detailed LNP Order Process Flow and Narrative

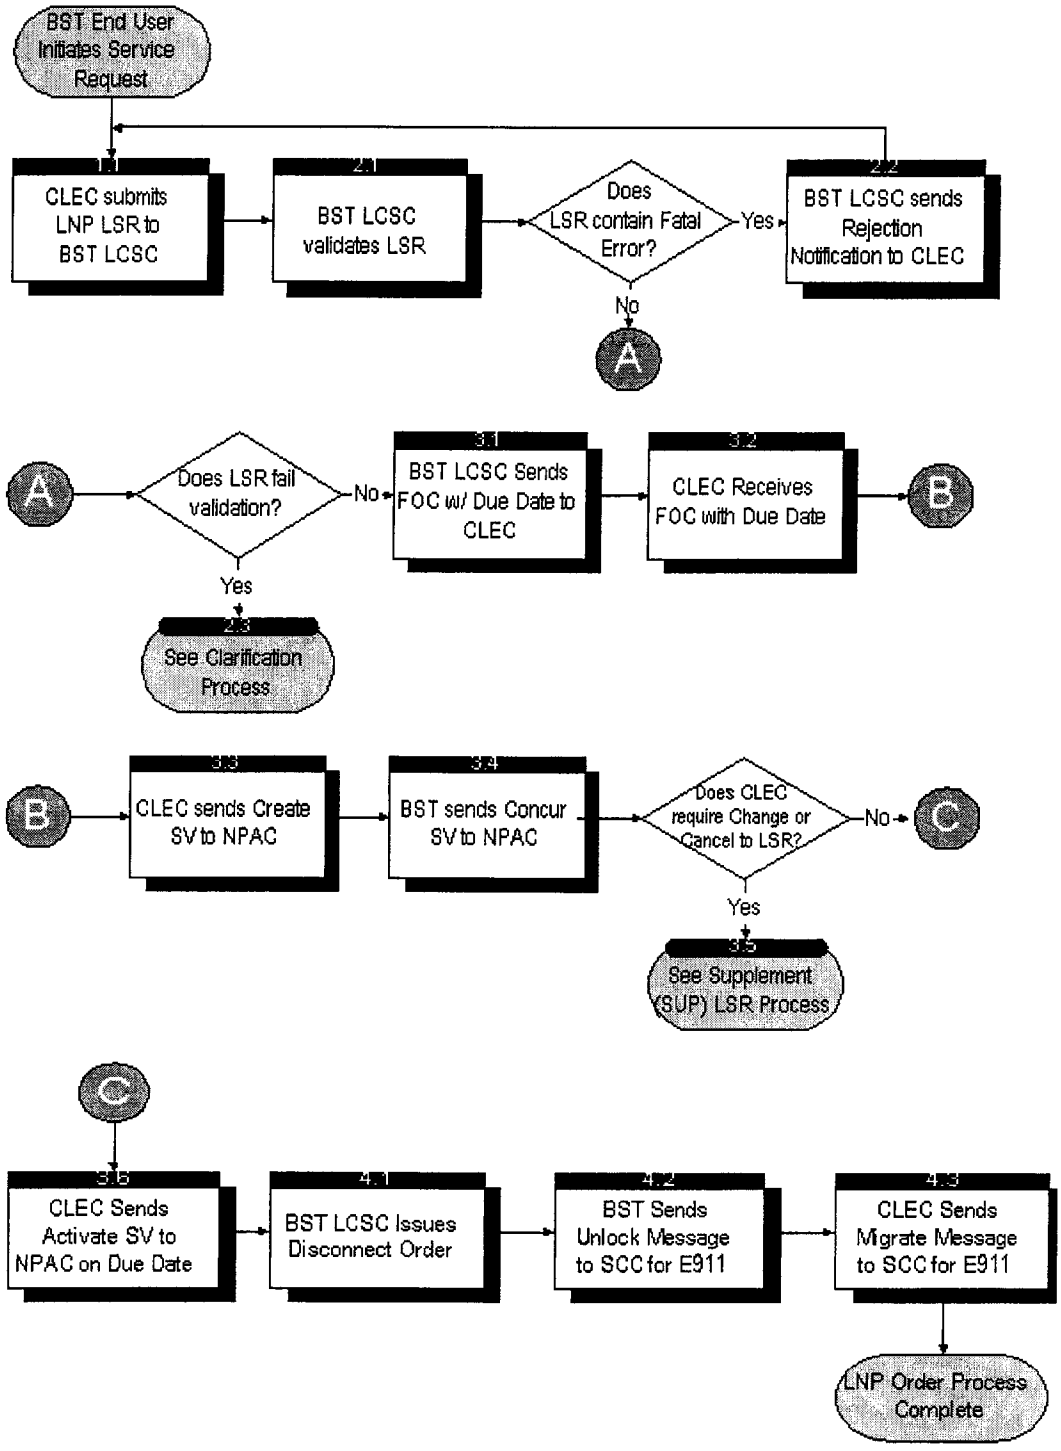

Figure 2 Detailed LNP Order Process Flow

000322

2.2.1 LNP Order Process - Port Out and Port Out with Loop

1.0 Order Submission

1.1

Step	Action
Process Step	**CLEC sends LNP LSR to BST LCSC via fax, EDI or TAG**
Predecessor	Bell South End User initiates LNP Request with CLEC
Input	End-user CSR; BellSouth Ordering Guide for CLECs; order forms; BellSouth Standard Interval information; BellSouth LNP Ordering Checklist (Section 8.0 of BellSouth LNP Ordering Guide for CLECs)
Output	BellSouth LCSC receives paper copy LSR via fax server OR digital LSR for EDI or TAG orders
Key Interface	Fax; EDI; TAG
Notes	LSR format defined by OBF

2.0 Order Validation

2.1

Step	Action
Process Step	**BST LCSC validates LSR**
Predecessor	CLEC submission of LSR
Input	CLEC LSR
Output	Validated LSR

000323

Step	Action
Key Interface	BellSouth LNP-Gateway
Notes	CLECs may access pre-order support using a web browser and the **LENS** interface. Use the Inquiry function to confirm the accuracy of customer record information, address, etc.

Decision Point

Step	Action
Process Step	**Does LSR contain Fatal Error*?**
If YES:	Proceed to 2.2 "BST LCSC sends Rejection Notification to CLEC"
If NO:	Proceed to Decision Point "Does LSR fail validation?"
Notes	*Fatal Reject errors include missing required fields, duplicate PON, and invalid entries.

2.2

Step	Action
Process Step	**BST LCSC sends Rejection Notification to CLEC**
Predecessor	CLEC LNP LSR contains fatal errors (e.g., missing fields, duplicate PON, invalid entries)
Input	Rejected LSR
Output	Notification of fatal errors sent to CLEC
Key Interface	Fax, EDI, TAG, BellSouth LNP-Gateway
Notes	Fatal reject notices for EDI or TAG orders will be transmitted electronically via EDI or TAG. Fatal reject notices for faxed orders will be transmitted via fax.

Decision Point

Step	Action
Process Step	**Does LSR fail validation?**
If YES:	Proceed to 2.3 "Clarification Process"
If NO:	Proceed to 3.1 "BellSouth LCSC Sends FOC with Due Date to CLEC"

2.3
See Clarification Process

3.0 Order Administration

3.1

Step	Action
Process Step	**BST LCSC Sends FOC with Due Date to CLEC**
Predecessor	CLEC LSR passes BellSouth LNP Gateway validation.
Input	Valid LSR
Output	FOC is sent to CLEC via EDI, TAG, or fax; BellSouth LCSC issues 10 digit trigger order if applicable
Key Interface	EDI; TAG; fax; BellSouth LNP Gateway
Notes	"Trigger" may not be applicable for all types of service. See Local Number Portability Rules in section 4.0 for more details.

3.2

Step	Action
Process Step	**CLEC receives FOC with Due Date**
Predecessor	BellSouth LCSC sends CLEC FOC via fax, EDI, or TAG
Input	Valid LSR with FOC
Output	CLEC receives FOC with Due Date
Key Interface	Fax; EDI; TAG

3.3

Step	Action
Process Step	**CLEC sends Create SV to NPAC with Due Date on FOC and Time set to 00:00**
Predecessor	FOC received by CLEC
Input	FOC with Due Date sent by BellSouth LCSC
Output	NPAC notifies BellSouth LCSC that CLEC has sent Create SV
Key Interface	NPAC - Service Order Administration (SOA); BellSouth LNP Gateway
Notes	SV - Subscription Version BellSouth will place SVs in Conflict if CLEC sends the Create SV to NPAC prior to CLEC receiving FOC from BellSouth.

3.4

Step	Action
Process Step	**BST LCSC sends Concur SV to NPAC with Due Date on FOC and Time set to 00:00**
Predecessor	BellSouth receives notification of Create SV from NPAC
Input	Create SV sent by CLEC to NPAC
Output	NPAC notifies CLEC that Concur SV has been sent by BellSouth
Key Interface	NPAC - Service Order Administration (SOA); BellSouth LNP Gateway
Notes	BellSouth LCSC has 18 hours after Create SV to send Concur SV to NPAC.
Decision Point	

Step	Action
Process Step	**Does CLEC require Change* or Cancel to Original LSR?**
If YES:	Proceed to 3.5 "Supplement (SUP) LSR Process"
If NO:	Proceed to 3.6 "CLEC sends Activate SV to NPAC with Due Date on FOC"
Notes	*Change to original LSR includes: Due Date change; Add/Remove TNs

3.5
See Supplement (SUP) LSR Process

000327

3.6

Step	Action
Process Step	**CLEC Sends Activate SV to NPAC on Due Date on FOC**
Predecessor	BellSouth LCSC sends Concur SV to NPAC
Input	CLEC receives Concur SV from NPAC
Output	NPAC receives Activate SV from CLEC on Due Date on FOC
Key Interface	NPAC - Service Management System (SMS); BellSouth LNP Gateway
Notes	BellSouth is no longer responsible for customer after CLEC sends Activate SV to port the number. Activate SV should be sent for all telephone numbers on the LSR.

4.0 Order Completion

4.1

Step	Action
Process Step	**BST LCSC Issues Disconnect Order**
Predecessor	CLEC sends Activate SV to port number.
Input	NPAC notification of CLEC Activate SV sent to BellSouth
Output	Disconnect service orders issued by BellSouth LCSC

000328

Step	Action
Key Interface	NPAC - Service Management System (SMS); BellSouth LNP Gateway
Notes	Following this point, questions regarding maintenance & repair should go to the UNE Center. LCSC will not issue disconnect until the Activate SV is received for all telephone numbers on LSR.

4.2

Step	Action
Process Step	**BST sends Unlock Message to SCC for E911**
Predecessor	BellSouth completes Disconnect service order
Input	Disconnect service order
Output	SCC receives BellSouth's Unlock message
Key Interface	SCC
Notes	BellSouth will not send the Unlock message to SCC before the Disconnect service order is complete. BellSouth will not send the Unlock message for E911 until Activate SV is received for all telephone numbers on LSR.

4.3

Step	Action
Process Step	**CLEC Sends Migrate Message to SCC for E911**
Predecessor	BellSouth Unlock message has been received by E911 SCC
Input	BellSouth Unlock message

000329

Step	Action
Output	E911 record locked
Key Interface	SCC
Notes	If CLEC Migrate (Lock) message makes it to SCC before BellSouth's Unlock Message, then the CLEC message goes on an error report. BellSouth will not send Unlock message to SCC until CLEC has sent Activate SVs to NPAC forall telephone numbers on LSR.

000331

3. LNP Clarification and Supplement (SUP) LSR Process Flows

3.1 Detailed LNP Clarification Process Flow and Narrative

Clarifications

Any LSR will be returned to the CLEC for clarification when BellSouth is not able to issue the orders requested due to:

- incomplete information
- incorrect information
- conflicting information

For faxed requests, clarifications will be sent via fax. Clarifications for EDI or TAG orders are sent via EDI or TAG. The CLEC has 10 business days to respond to the request for clarification by submitting a supplemental LSR. (SUP)* If no response is received, the LSR will be canceled on the eleventh day. If canceled by BellSouth, a new LSR (PON) must be submitted.

Note: * SUP LSRs must be sent using the same ordering method as the original LSR (i.e., Fax, EDI, TAG)

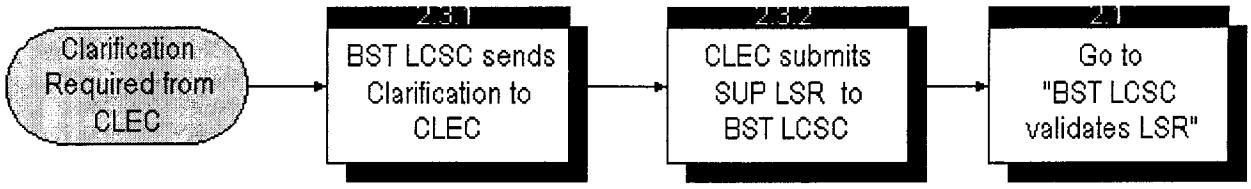

Figure 3 Detailed LNP Clarification Process Flow

3.1.1 Clarification Process

2.3.1

Step	Action
Process Step	**BST LCSC sends Clarification to CLEC via Fax, EDI, or TAG**
Predecessor	LSR falls out of BellSouth LNP-Gateway and requires clarification

Step	Action
Input	LSR rejected by BellSouth LNP-Gateway for clarification
Output	Clarification sent to CLEC via fax, EDI, or TAG
Key Interface	Fax; EDI; TAG

2.3.2

Step	Action
Process Step	**CLEC submits SUP LSR via fax, EDI, or TAG to BST LCSC**
Predecessor	LSR falls out of LNP-Gateway and requires clarification
Input	Clarification sent by LCSC via fax, EDI, or TAG to CLEC
Output	SUP LSR sent to LCSC
Key Interface	Fax; EDI; TAG
Notes	SUP must be sent via the same channel (EDI, TAG or fax) as the original LSR.

2.1
Go to "BST LCSC validates LSR"

3.2 Detailed Supplement (SUP) LSR Process Flow and Narrative

Supplement (SUP) LSR

A supplemental change (SUP) LSR will be required if a CLEC:

- has been asked for clarification on an LNP LSR,
- is requesting a Due Date Change,

000333

- would like to cancel an LSR,
- would like to add/remove telephone numbers for porting on LSR.

If a CLEC is changing the original LSR, a SUP LSR must be filed with BellSouth prior to any contact with NPAC.

Note: SUP LSRs must be sent using the same ordering method as the original LSR (i.e., Fax, EDI, TAG)

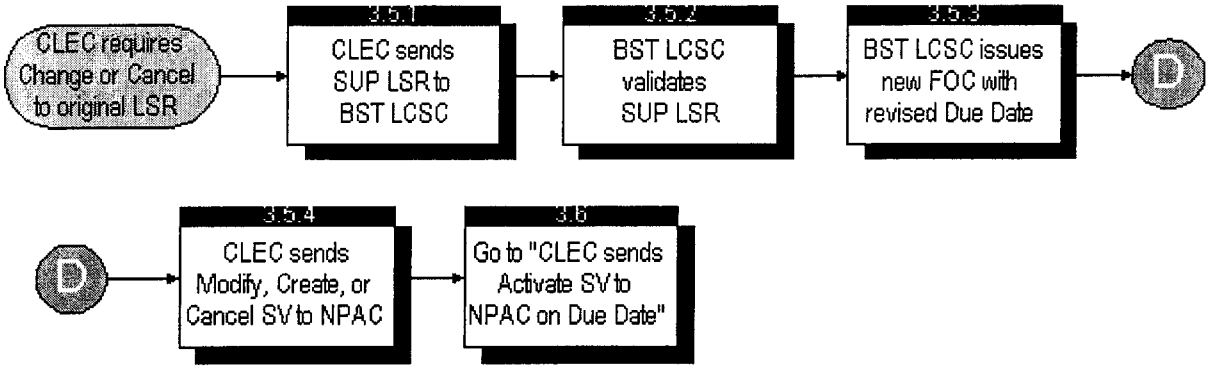

Figure 4 Detailed Supplement (SUP) LSR Process Flow

3.2.1 Supplement (SUP) LSR Change Process

3.5.1

Step	Action
Process Step	**CLEC sends SUP LSR to BST LCSC**
Predecessor	Create and Concur SV received by NPAC for original LSR
Input	Original FOC and LSR; SUP LSR
Output	BST LCSC receives SUP LSR via fax, EDI, or TAG

Step	Action
Key Interface	EDI; TAG; Fax
Notes	SUP LSR must be sent to BellSouth LCSC and revised FOC received by CLEC prior to CLEC sending Modify SV to NPAC. CLEC must complete SUP field and VER field on LSR form.

3.5.2

Step	Action
Process Step	**BST LCSC validates SUP LSR**
Predecessor	CLEC submission of SUP LSR
Input	CLEC SUP LSR
Output	Validated SUP LSR; BellSouth updates internal records with supplemental information on LSR
Key Interface	BellSouth LNP-Gateway

3.5.3

Step	Action
Process Step	
Predecessor	BellSouth receives and validates SUP LSR from CLEC
Input	SUP LSR; original LSR and FOC
Output	BellSouth LCSC updates internal records with new Due Date; new FOC sent to CLEC via fax, EDI, or TAG

Step	Action
Key Interface	BST LNP-Gateway; EDI; TAG; fax
Notes	CLEC must receive FOC prior to sending Modify SV to NPAC Revised Due Date on FOC will be based on the receipt of SUP LSR and the BST Standard Intervals.

3.4

Step	Action
Process Step	**CLEC sends Modify, Create or Cancel SV to NPAC**
Predecessor	CLEC receives revised FOC with new Due Date
Input	SUP LSR; Revised FOC with new Due Date
Output	NPAC receives Modify, Create, or Cancel SV
Key Interface	NPAC - Service Order Administration (SOA)
Notes	If changing the Due Date on LSR, CLEC sends a Modify SV If removing TNs to port from original LSR, CLEC sends a Cancel SV for each TN. If adding TNs for porting, CLEC sends Create SVs for each new TN on the SUP LSR. If canceling the original LSR, CLEC sends Cancel SV to NPAC.

3.6
Go to "CLEC Sends Activate SV to NPAC on Due Date"

4. Requirements for LNP Ordering

4.1 Requirements for LNP Ordering

A telephone number may port out when all of the fllowing are true:

- NPA NXX is portable.
- telephone number is a working number or end user is paying to reserve the number.
- end user name on the LSR matches the BellSouth customer record.
- end user address on the LSR is in the same Toll Message Rate Center (TMRC) as the address on the BellSouth customer record.
- number is associated with a line type that is portable. (Refer to Local Number Portability Rules - Section 4.2 below to determine if service type is portable and if a trigger order is necessary)

The responsibilities for porting out telephone numbers are described in the following table.

000338

Table B The responsibilities for porting out telephone numbers are described in the following table

Work Group	Responsibilities
CLEC	• Send LSR to BellSouth to request number(s) to be ported. • Receives FOC before sending SVs to NPAC. • Provide service to end user. • Notify the NPAC when ready to port the number. • Update E911 information. • Send SUP LSR to change Due Date, Cancel LSR, or modify TN on LSR.
LCSC	• Process LSR and FOC for port out requests. • Issue trigger/port out/listing/loop service orders. • Send and receive NPAC messages.
UNE Center	• Coordinate port out with loop orders with CLEC as needed. • Complete port out with loop orders as needed. **Note:** UNE Center is involved in provisioning only if loop is requested.

4.2 Local Number Portability Rules

The following table may be used to determine if the service type is portable and if a trigger order is required. The existing service or line type is for reference only because the service is not portable. Only the number is ported.

Table C Local Number Portability Rules

Service / Line Type	Portable - w/ LRN	Trigger	Notes
AdWatch	Y	N	The number will no longer work for AdWatch once it is Ported.
Choke Codes	N		Does not involve LRN

Table C Local Number Portability Rules (continued)

Service / Line Type	Portable - w/ LRN	Trigger	Notes
Denied for Non-Pay	Y	N	
DID (Block of 20)	Y	N	To Port a portion of a range will require special assembly.
ESSX / MultiServ	Y	Y	If lines are in a hunting arrangement, see hunting Lines below.
FX / FCO	Y	Y	The number can be ported within the same Toll Message Rate Center (TMRC). The BST designed circuit will be disconnected and the new service provider must establish the service.
Hunting Lines	Y	Y	If not all of the numbers in the hunt group are porting, the numbers porting must be removed from the hunt group the day before the port due date. CLEC can determine Frame Due Time or use BST default of 9:00 PM day before Port.
ISDN	Y	Y	
N11	N		
Out dial trunks	Y	N	
Party Line	Y	N	The number may be ported without loop. The BST service must be disconnected
Remote Call Forwarding / Interim Number Portability	Y	N	
Reserved numbers	Y	N	Only numbers reserved with chargeable USOCs may be ported
RingMaster	Y	N	
Sub-Let	Y	Y	
Surrogate Client Number	Y	N	
Suspend for season	Y	N	
Uniserve	N		

- continued -

000340

Table C Local Number Portability Rules (continued)

Service / Line Type	Portable - w/ LRN	Trigger	Notes
Warm Line	N		
ZipCONNECT	N		

4.3 Required Forms

Required Forms for Port Out

The CLEC submits the following forms to the LCSC to request telephone numbers to Port Out:

- Local Service Request (LSR)
- End User (EU)
- Number Portability (NP) or Loop Service with Number Portability (LSNP)

Conditional Forms for Porting Out

• Directory Listing Request (DLR)

If listings are required, the Directory Listing Request (DLR) will be needed unless the ACT code is **W** . The **W** ACT code is a switch as is for listings and directory delivery requirements. This activity code is only valid when porting out all numbers on an account. Without a **W** ACT code on a full port, all listings are deleted unless the CLEC submits a DLR.

LNP Order Form Matrix

Table D LNP Order Form Matrix

When Ordering:	These Forms Are:				
	LSR	EU	NP	LSNP	DLR
Number Portability	R	R	R	P	C*
Loop Service with Number Portability	R	R	P	R	C*

Form Names:	Form Requirements:
LSR = Local Service Request Form	R=Required
EU = End User Form	P=Prohibited
NP = Number Portability Form	C=Conditional

- continued -

LSNP = Loop Service with Number Portability Form	O=Optional
DLR = Directory Listing Request Form	

* If all the telephone numbers for the Account are converting (Full Migration) and no change is being made to the listing, the DLR is not required. (This requires an ACT code of **W**.) However, if only a portion of the lines on the account are converting (Partial Migration), the DLR should be submitted to request listings. A DLR is **not required** when associated with LNP (Local Number Portability), even for partial migration. However, directory listings or directory delivery will not be established without a DLR.

Required Forms for SUPs

A supplemental change (SUP) LSR will be required if a CLEC:

- has been asked for clarification on an LNP LSR,
- is requesting a Due Date Change,
- would like to cancel an LSR,
- would like to add/remove telephone numbers for porting on LSR.

Use the **LNP Order Matrix Form** above to determine which order forms must be used.

A supplemental change LSR (SUP) should contain complete information and will supersede the original LSR. The SUP must reflect the same PON and CC from the original request. It must also have a higher version number in the VER field. The SUP field must be populated with:

- (1) to Cancel. (Prohibited if CLEC has sent Activate SV to NPAC for any numbers on the LSR)
- (2) for Desired Due Date changes. The new date is specified in the DDD field. If the request is to establish a due date less than the standard interval (from the date the SUP is sent), the EXP field must also be populated.
- (3) for other types of changes. This includes adding or removing porting numbers. Also includes requests for a change in desired due date in conjunction with other changes to a pending order. The standard interval should be used to establish a new due date when adding or removing ported numbers.

EDI, TAG and Fax requests may not be combined for the same PON. If an LSR is submitted via:

- EDI all SUPs for the PON must be sent through EDI.
- Fax all SUPs for the PON must be faxed.
- TAG all SUPs for the PON must be sent through TAG.

4.4 Minimum Required Fields for Faxed LNP Orders

Minimal Required Fields on the Faxed LSR for LNP

Please review the notes for each field, as they may highlight common errors on LNP LSRs. The fields below are those required for LNP orders. They may be required, conditional, or optional for other types of orders.

4.4.1 LSR Minimal Required Fields for Faxed Orders (LNP Port-out With or Without Loop)

Table E LSR Minimal Required Fields for Faxed Orders (LNP Port-out With or Without Loop)

Field Abbreviation	Field Name	Explanation
CCNA	Customer Carrier Name Abbreviation	Refer to CLEC Order Guide 9.1.2.1 **Note:** Required for orders with loop.
PON	Purchase Order Number	Refer to CLEC Ordering Guide 9.1.2.2 **Note:** Every new request requires a unique PON number. **Note:** When issuing a SUP, the same PON number on the original LSR should be used; however, the (VER) must be different.
VER	Version Identification	Refer to CLEC Ordering Guide 9.1.2.3 **Note:** This field is conditional. When submitting a supplement (SUP) LSR, the CLEC must populate this field to uniquely distinguish this LSR from any other version. **Note:** If VER is entered, CLEC must also complete SUP field.
SC	Service Center	Refer to CLEC Ordering Guide 9.1.2.7
PG__OF__	Page number / Total pages	Refer to CLEC Ordering Guide 9.1.2.8
D / TSENT	Date and Time Sent	Refer to CLEC Ordering Guide 9.1.2.9

- continued -

000343

Table E LSR Minimal Required Fields for Faxed Orders (LNP Port-out With or Without Loop) (continued)

Field Abbreviation	Field Name	Explanation
DDD	Desired Due Date	Refer to CLEC ordering guide 9.1.2.10 **Note:** Reference BST Standard Intervals for LNP when completing this field.
DFDT	Desired Frame Due Time	Refer to CLEC Ordering guide 9.1.2.14
REQTYP	Requisition Type and Status	Refer to CLEC Ordering Guide 9.1.2.17 **Note:** LNP with loop, will always be **BB.** LNP without loop, will always be **CB**
ACT	Activity	Refer to CLEC Ordering Guide 9.1.2.18. **Note:** Will be **V** to indicate conversion to another local service provider or **C** for INP to LNP conversion or **W** for Conversion Listing as Is (LNP Full Migrations Only)
SUP	Supplement Type	Refer to CLEC Ordering Guide 9.1.2.19 **Note:** This field is conditional. When submitting a supplement (SUP) LSR, this field must be populated.
CC	Company Code	Refer to CLEC Ordering Guide 9.1.2.23 **Note:** This code must be the code used for the NPAC and for CLEC Q-accounts. The CC is also known as the four digit OPERATING COMPANY NUMBER (OCN)
ACTL	Access Customer Terminal Location	Refer to CLEC Ordering Guide 9.1.2.30 **Note:** Required for orders with designed loop.
LSO	Local Service Office	Refer to CLEC Ordering Guide 9.1.2.34 **Note:** Required for loop orders or when a directory listing is requested on the end user telephone number which is from a CLEC assigned NPA NXX.

- continued -

Table E LSR Minimal Required Fields for Faxed Orders (LNP Port-out With or Without Loop) (continued)

Field Abbreviation	Field Name	Explanation
TOS	Type of Service	Refer to CLEC Ordering Guide 9.1.2.35 **Note:** Identifies type of service (business, residential, or government) for the existing account which is porting out. **Note:** Be sure to use D as the second character for Complex service.
NC	Network Channel	Refer to CLEC Ordering Guide 9.1.2.37 **Note:** Required for loop orders.
NCI	Network Channel Interface	Refer to CLEC Ordering Guide 9.1.2.38 **Note:** Required for designed loop orders.
SECNCI	Secondary Network Channel Interface	Refer to CLEC Ordering Guide 9.1.2.40 **Note:** Required for designed loop orders.
CIC	Carrier Identification Code	Refer to CLEC Ordering Guide 9.1.2.48
CUST	Customer Name	Refer to CLEC Ordering Guide 9.1.2.49
BAN1	Billing Account Number 1	Refer to CLEC Ordering Guide 9.1.2.51
ACNA	Access Customer Name Abbreviation	Refer to CLEC Ordering Guide 9.1.2.54 **Note:** Required for orders with loop.
TE	Tax Exemption	Generated by BST
INIT	Initiator Identification	Refer to CLEC Ordering Guide 9.1.2.69
TEL NO (INIT)	Telephone Number	Refer to CLEC Ordering Guide 9.1.2.70
FAX NO	Initiator Fax Number	Refer to CLEC Ordering Guide 9.1.2.72 **Note:** Required to send FOC via fax
STREET	Initiator Street Address	Refer to CLEC Ordering Guide 9.1.2.73
CITY	City	Refer to CLEC Ordering Guide 9.1.2.76

- continued -

Table E LSR Minimal Required Fields for Faxed Orders (LNP Port-out With or Without Loop) (continued)

Field Abbreviation	Field Name	Explanation
STATE	State	Refer to CLEC Ordering Guide 9.1.2.77
ZIPCODE	Zip Code	Refer to CLEC Ordering Guide 9.1.2.78
MPCON	Implementation Contact	Refer to CLEC Ordering Guide 9.1.2.79 **Note:** : Required for orders with loop and for ACT of **V** (indicates conversion to another local service provider)
TEL NO	Telephone Number	Refer to CLEC Ordering Guide 9.1.2.80 **Note:** Required for orders with loop and for ACT of **V** (indicates conversion to another local service provider)
DRC	Design Routing Code	Refer to CLEC Ordering Guide 9.1.2.86 **Note:** Required on orders with non-designed loop when requesting a Loop Make-up.

Critical Fields on LSR

There are certain critical fields on the LSR that cannot be changed once the LSR has been validated. If these fields are to be changed, the first LSR must be canceled and a new LSR issued on a different PON. The critical fields are:

- PON
- CC
- ATN
- AN
- EATN
- EAN
- ACT
- NPT

4.4.2 Faxed End User Information Form Fields

Please review the notes for each field, as they may highlight common errors on LNP LSRs. The fields below are those required for LNP orders. They may be required, conditional, or optional for other types of orders

Table F Minimal Required Fields for Faxed End User Form

Field Abbreviations	Field Name	Explanation
PON	Purchase Order Number	Refer to CLEC Ordering Guide 9.2.2.1 **Note:** This entry must be identical to the PON entry on the LSR form.
VER	Version Identification	Refer to CLEC Ordering Guide 9.2.2.2 **Note:** This field is conditional. When submitting a supplement (SUP) LSR, this entry must be identical to VER entry on the SUP LSR.
PG__OF__	Page Number / Total Pages	Refer to CLEC Ordering Guide 9.2.2.6
NAME	End User Name	Refer to CLEC Ordering Guide 9.2.3.1
SANO*	Service Address House Number	Refer to CLEC Ordering Guide 9.2.3.4
SASN	Service Address Street Name	Refer to CLEC Ordering Guide 9.2.3.7
CITY	City	Refer to CLEC Ordering Guide 9.2.3.14
STATE	State / Province	Refer to CLEC Ordering Guide 9.2.3.15
ZIP CODE	Zip Code	Refer to CLEC Ordering Guide 9.2.3.16

Note: Depending on the address associated with the order, conditional address fields may be required to provide a complete and valid end user location.

Note: The CLEC must advise BellSouth how to handle additional telephone numbers on the end user account. The additional telephone numbers may be associated with features such as:

- Ringmaster
- Surrogate Client MemoryCall
- Flexible Call Forwarding Dial Around (FCPAN)

If these telephone numbers are not porting, use the disconnect section on the End User Form to detail this information.

4.4.3 Faxed Number Portability Form Fields

Faxed Number Portability Form Fields

Note: The PS Form must always be associated with the Local Service Request (LSR) and End User (EU) forms. Please review the notes for each field, as they may highlight common errors on LNP LSRs. The fields below are those required for LNP orders. They may be required, conditional, or optional for other types of orders.

Table G Minimal Required Fields for the Faxed Number Portability Form

Field Abbreviation	Field Name	Explanation
PON	Purchase Order Number	Refer to CLEC Ordering Guide 9.8.2.1 **Note:** This entry must be identical to the PON entry on the LSR form.
VER	Version Identification	Refer to CLEC Ordering Guide 9.8.2.2 **Note:** This field is conditional. When submitting a supplement (SUP) LSR, this entry must be identical to VER entry on the SUP LSR.
NPQTY	Number Portability Quantity	Refer to CLEC Ordering Guide 9.8.2.5
PG__OF__	Page Number / Total Pages	Refer to CLEC Ordering Guide 9.8.2.6
REF NUM	Reference Number	Refer to CLEC Ordering Guide 9.8.3.1 **Note:** REF NUMs must be unique on each form associated with the LSR. REF NUMs may not be duplicated and are associated with porting numbers, disconnecting numbers, and directory listings.

- continued -

C00348

Table G Minimal Required Fields for the Faxed Number Portability Form (continued)

Field Abbreviation	Field Name	Explanation
LNA	Line Activity	Refer to CLEC Ordering Guide 9.8.3.3 **Note:** V= conversion of service to new LSP C= change existing account (e.g. INP to LNP)
PORTED #	Ported Telephone Number	Refer to CLEC Ordering Guide 9.8.3.7
NPT	Number Portability Type	Refer to CLEC Ordering Guide 9.8.3.10 **Note:** D= Local Number Portability

4.4.4 Faxed Loop Service with Number Portability Form Fields

Faxed Loop Service with Number Portability Form Fields

Note: The LSNP form must always be associated with the Local Service Request (LSR) and End User (EU) forms. Please review the notes for each field, as they may highlight common errors on LNP LSRs. The fields below are those required for LNP orders. They may be required, conditional, or optional for other types of orders.

Table H Minimal Required Fields for Faxed Loop Service with Number Portability Form

Field	Abbreviation Field	Name Explanation
PON	Purchase Order Number	Refer to CLEC Ordering Guide 9.10.2.1 **Note:** This entry must be identical to the PON entry on the LSR form.
VER	Version Identification	Refer to CLEC Ordering Guide 9.10.2.2 **Note:** This field is conditional. When submitting a supplement (SUP) LSR, this entry must be identical to VER entry on the SUP LSR.
LQTY	Loop Quantity	Refer to CLEC Ordering Guide 9.10.2.5
PG__OF__	Page Number / Total Pages	Refer to CLEC Ordering Guide 9.10.2.6

- continued -

000349

Table H Minimal Required Fields for Faxed Loop Service with Number Portability Form (continued)

Field	Abbreviation Field	Name Explanation
REF NUM	Reference Number	Refer to CLEC Ordering Guide 9.10.3.1 **Note:** For LNP, REF NUMs must be unique on each form associated with the LSR. REF NUMs may not be duplicated and are associated with porting numbers, disconnecting numbers, and directory listings.
LNA	Line Activity	Refer to CLEC Ordering Guide 9.10.3.3 **Note:** V= conversion of service to new LSP
SYSTEM ID	System Identification	Refer to CLEC Ordering Guide 9.10.3.8
CABLE ID	Cable Identification	Refer to CLEC Ordering Guide 9.10.3.11 **Note:** Required for port-out with loop orders. **Note:** **Note:** In some wire centers, CFA (Connecting Facility Assignment) may be used instead of cable ID and chain/pair. Refer to CLEC Ordering Guide 9.10.3.9
SHELF		Refer to CLEC Ordering Guide 9.10.3.12
SLOT		Refer to CLEC Ordering Guide 9.10.3.13
RELAY RACK		Refer to CLEC Ordering Guide 9.10.3.14

- continued -

Table H Minimal Required Fields for Faxed Loop Service with Number Portability Form (continued)

Field	Abbreviation Field	Name Explanation
CHAN / PAIR	Channel / Pair	Refer to CLEC Ordering Guide 9.10.3.15 **Note:** Identifies the customer's system to be used in a collocation arrangement. Required when the customer has assignment control in a collocation arrangement, otherwise prohibited. **Note:** Required for port-out with loop orders. In some wire centers, CFA (Connecting Facility Assignment) may be used instead of cable ID and chain/pair. Refer to CLEC Ordering Guide 9.10.3.9
PORTED #	Ported Telephone Number	Refer to CLEC Ordering Guide 9.10.3.23
NPT	Number Portability Type	Refer to CLEC Ordering Guide 9.10.3.26 **Note:** D= Local Number Portability

4.5 Complex LNP Orders

Definition of Complex Services

The Local Number Portability (LNP) request is classified as complex if the number(s) being ported out is working on a complex class of service. Requests to port out telephone numbers working on the following types of service are considered complex:

- ESSEX / MultiServ
- Primary Rate ISDN
- Basic Rate ISDN
- Channelized Megalink
- PBX - DID, Inward/Outward/Combination trunks
- Pathlink

4.6 Faxed Loop Service with Number Portability Fields

Faxed Loop Service with Number Portability Fields

Note: The LSNP form must always ber associated with the Local Service Request (LSR) and End User (EU) forms. Please review the notes for each field, as they may highlight common errors on LNP LSRs. The fields below are those required for LNP orders. They may be required, conditional, or optional for other types of orders.

Field	Abbreviation Field	Name Explanantion
PON	Purchase Order Number	Refer to CLEC Ordering Guide 9.10.2.1 **Note:** This entry must be identical to the PON entry on the LSR form.
VER	Version Identification	Refer to CLEC Ordering Guide 9.10.2.2 **Note:** This field is conditional. When submitting a supplement (SUP) LSR, this enbtry must be identical to VER entry on the SUP LSR.
LQTY	Loop Quantity	Refer to CLEC Ordering Guide 9.10.2.5
PG_OF_	Page Number/Total Pages	Refer to CLEC Ordering Guide 9.10.2.6
REF NUM	Reference Number	Refer to CLEC Ordering Guide 9.10.3.1 **Note:** For LNP, REF Nums must be unique on each form associated with porting numbers, and directory listings.
LNA	Line Activity	Refer to CLEC Ordering Guide 9.10.3.3 **Note:** V= conversion of service to new LSP N= new loop
System ID	System Identification	Refer to CLEC Ordering Guide 9.10.3.8

4.7 Project Managed LNP Orders and Standard Intervals

Note: For information on project management and due date inetrvals, refer to BellSouth Products and Services Interval Guide Interconnection Services @ http:// interconnection.bellsouth.com/guides/guides_html

000352

000353

5. Critical Success Factors for LNP Ordering

5.1 Pre-Order Information

1. CLEC can proactively check the following points in the LSR before submitting via fax, EDI, or TAG.
   a. Customer address is RSAG valid and within the rate center;
   b. NPA-NXX is marked portable in the LERG;
   c. TNs on LSR match TNs on end user account;
   d. Due Date intervals are based on BellSouth Standard Intervals.
2. CLEC must have a Q-account for each OCN registered with NPAC and stated on LSR. All new OCNs registered with NPAC should be updated with BellSouth and a Q-account should be established.
3. CLEC should use correct OCN. OCN used at NPAC must match OCN used in CC field on CSR and OCN for Q account in BAN field.
4. CLEC must obtain end-user authorization to request LNP before submitting LNP LSR.

5.2 LSR Order Forms for LNP

1. CLEC should complete all required fields. Refer to Section 4.2, Minimum Required Fields, in this Guide.
2. CLEC should provide previously unassigned PON on LSR.
3. If CLEC is porting on any day other than the Due Date stated on the FOC, the CLEC should send BellSouth a SUP LSR prior to the Due Date stated on the LSR. BellSouth will then send a revised FOC with the new due date to the CLEC.
4. Per the BellSouth Ordering Guide for CLECs, a REF NUM may not be duplicated on an individual PON. **REF NUMs are associated with:**
   - porting numbers
   - disconnecting numbers
   - directory listings

     Example: If a REF NUM is used on the Directory Listing Request form, it may not be repeated on the Number Portability/Loop form or the End User Disconnect form.
   - PONs containing duplicate REF NUMs are placed in clarification.
5. The CLEC must advise BellSouth how to handle additional telephone numbers on the end user account. The additional telephone numbers may be associated with features such as:
   - Ringmaster
   - Surrogate Client MemoryCall
   - Flexible Call Forwarding Dial Around

If these telephone numbers are not porting, use the disconnect section on the End User Form to detail this information.

6. For all LNP orders, the LSR must provide the initiator's fax number in the FAX NO field, even for EDI or TAG LSRs.
7. CLEC should provide accurate cable & pair information for loop orders to avoid provisioning delays.
8. An LSR must contain numbers on one CSR. An LSR must be sent for each CSR..

5.3 Supplemental LSRs

1. If CLEC intends to port on any day other than the Due Date stated on the FOC, the CLEC should send BellSouth a SUP LSR prior to the due date originally stated on the FOC.
2. A supplemental change LSR (SUP) must reflect the same PON, CC, ATN, AN, EATN, EAN, ACT, and NPT as the original request.
3. SUP must also have a higher VER number and SUP field entry complete
4. EDI/TAG vs. FAX: EDI or TAG and Fax requests may not be combined for the same PON. If an LSR is submitted via:
   - EDI all SUPs for the PON must be sent through EDI.
   - TAG all SUPs for the PON must be sent through TAG.
   - Fax all SUPs for the PON must be faxed.

Example: The original LSR is sent via EDI and then placed in clarification by the LCSC. CLEC must send a SUP through EDI to change or cancel the request.

5.4 Clarifications

1. The CLEC has 10 business days to respond to the request for clarification by submitting a supplemental LSR.
2. If no response is received by BellSouth LCSC within 10 business days, the LSR will be canceled on the eleventh business day.
3. If original LSR is canceled by BellSouth, a new LSR with new PON must be submitted.
4. CLEC should not send Create SV to NPAC until an FOC has been received.
5. BellSouth will place SVs in Conflict if CLEC sends Create before FOC is received.

5.5 Standard Intervals

1. CLEC should review BellSouth Standard Interval Guide prior to submitting LSR.
2. The minimum Due Date for port-out is five business days after the FOC receipt date. The first TN ported in an NPA-NXX is no earlier than five business days after FOC receipt date.

5.6 NPAC Communication

1. CLEC must receive FOC from BellSouth prior to sending any NPAC SV messages (Create or Modify).
2. The CLEC should send the Create SV immediately upon receipt of FOC.
3. The Due Date on the Create SV sent to NPAC by the CLEC must match Due Date on FOC sent by BellSouth
4. The Due Time on the Create SV must be set to 00:00.
5. CLEC should send Activate SV to NPAC on FOC due date.
6. BellSouth LCSC does not issue the Disconnect service order until notification of CLEC Activate SV is received from NPAC for all TNs on the LSR. This is done to avoid disruption to end-user service.
7. For any change in the Due Date to port numbers, to cancel port, or to add/remove telephone numbers, a SUP LSR must be sent to BellSouth LCSC and CLEC must receive revised FOC prior to sending a Modify message to NPAC.

5.7 E911 Lock Down

1. CLEC must send Activate SV to NPAC before BellSouth LCSC will issue the Disconnect.
2. BellSouth will not send the Unlock Message until Disconnect service order is complete.
3. If CLEC Migrate message reaches SCC before BellSouth's Unlock Message, the CLEC Migrate message will be shown on an error report which is sent to CLECs daily. CLEC must be sure they have sent Activate SVs to NPAC for all TNs which appear on error reports from SCC. (Refer to Section 7.2 of this guide for more details)
4. CLEC and BellSouth should send Migrate and Unlock messages to SCC with the same due date as the Activate SV to NPAC.

000356

000357

6. System Interfaces

6.1 Interface Options for Order Submission

Ordering Options for LSRs

The CLEC must send the Local Service Request (LSRs) for Local Number Portability or Loop Service with Number Portability to the BellSouth LCSC for processing. The request may be faxed or sent electronically through Electronic Data Interchange (EDI) or Telecommunication Access Gateway (TAG).

If the LSR is received electronically, the FOC is sent to the CLEC automatically through EDI or TAG. The CLEC also receives completion notices through EDI or TAG once the service orders are complete. EDI, TAG and Fax requests may not be combined on the same PON. If an LSR is originally submitted via EDI, then all SUPS for this PON must be sent through EDI.

For further information on EDI, refer to **BellSouth Ordering Guide for CLECs**, Section 6.2.1 on Electronic Data Interchange. (EDI)

6.2 System Interface Descriptions

Local Exchange Navigational System (LENS)

Step	Action
Description	Front-end GUI application which provides pre-ordering support for LNP orders using the Inquiry function.
Inputs	Customer address, customer information
Outputs	RSAG Address Validation Service availability for a particular NPA NXX Customer record information
Notes	LNP LSRs can not be submitted via LENS.

000358

PON Order Status via the Web

Step	Action
Description	Supports on-line viewing of faxed LSR order status.
Inputs	Faxed LSRs
Outputs	CLEC-specific LSR status by PON
Notes	For faxed LSRs

Fax

Step	Action
Description	Supports the transmission of manual CLEC orders.
Inputs	Paper LSR
Outputs	Clarifications; FOCs
Notes	Clarifications and FOCs for faxed LSRs are sent via fax. SUP LSRs for faxed LSRs must be submitted via fax. EDI, TAG and faxed requests may not be combined on the same PON.

000359

Electronic Date Interchange (EDI)

Step	Action
Description	Supports the CLEC transmission of orders to BellSouth, and the acknowledgment of receipt of orders to CLEC by BellSouth.
Inputs	Digital LSR
Outputs	Clarifications; Rejects, FOCs, Pending Order Statuses, Completion Notices

Telecommunications Access Gateway (TAG)

Step	Action
Description	Supports the CLEC transmission of orders to BellSouth, and the acknowledgment of receipt of orders to CLEC by BellSouth. CLEC has access to ordering and pre-ordering functionality via TAG.
Inputs	Digital LSR
Outputs	Clarifications; Rejects, FOCs, Pending Order Statuses, Completion Notices

BellSouth LNP Gateway

Step	Action
Description	Supports both internal and external communications with various interfaces and processes, including NPAC (SOA & SMS), EDI, and TAG.
Inputs	· LNP LSRs, NPAC messages, EDI and TAG orders
Outputs	Rejects; Clarifications; FOCs NPAC concurrence messages Service orders to provisioning

NPAC

Step	Action
Description	NPAC is the third party organization that oversees the porting of telephone numbers for Local Number Portability.
Inputs	CLEC and BellSouth subscription versions.
Outputs	CLEC and BellSouth subscription versions.

Note: Interface descriptions are specific to LNP orders only.

000361

7. Frequently Asked Questions

7.1 General

1. 1. What should be done if it is determined that some numbers sent on an LSR are not to be ported?

A sup should be sent immediately to delete the telephone numbers from the NP or LSNP form if they are not porting. The account will not be disconnected until all telephone numbers on the NP or LSNP form have been ported.

2. 2. How is a CLEC LSR validated?

The validation process includes the following steps to ensure that the requested number(s) may be ported out.

Step	Action
1	Are the porting number(s) on the LSR working number(s) on the CSR (or customer is paying to reserve the numbers)? If yes, go to step 2. If no, go to step 7.
2	Does the end user name on the LSR match the listed name and/or billing name on the CSR? If yes, go to step 3. If no, go to step 7.
3	Are the telephone number(s) on the LSR associated with a line type that is portable? Refer to Local Number Portability Rules (Section 4.2 of this guide). If yes, go to step 4. If no, go to step 7.
4	Does the service address information on the LSR match the LA or SA on the CSR? If yes, go to step 6. If no, go to step 5. **Note:** If the line type on the existing end user service is FX/FCO, go to step 5.
5	Is the Toll Message Rate Center (TMRC) for the porting number(s) shown on the LSR the same as the TMRC for the address shown on the LSR? If yes, go to step 6. If no, go to step 7.
6	Is LNP available for the NPA NXX at this time? If yes, go to step 8. If no, go to step 7.
7	Send CLEC Clarification request and wait for receipt of SUP LSR.
8	Proceed with Service Order Issuance Process.

3. What CLEC actions would cause an LNP request to fall out of the order process at BellSouth?

Some reasons for an LSR to fall out of the order process are:

- CLEC sent a create SV before receiving an FOC. BellSouth will put SV in Conflict with NPAC

000362

- CLEC sent a create on the wrong TN
- CLEC sent create with due date different than FOC due date
- CLEC sent create with time other than 00:00
- CLEC ported number before or after Due Date on the FOC

If the CLEC LSR has fallen out of the order process, BellSouth will not be able to automatically send Concur SV to the CLEC Create SV.

- 4. What CLEC actions should be taken if the end user is continuing to receive a bill from BST after the account is ported out?
- CLEC should verify that the activate SV has been sent on all telephone numbers provided on the LSR. If yes, refer the account to the LCSC for investigation. If no, send the activate SV to the NPAC.

7.2 Ordering Options

1. In what form should a CLEC expect to receive an FOC, Clarification, or Reject response?
   - If an order was sent via EDI, the response will be sent via EDI.
   - If an order was send via TAG, the response will be sent via TAG
   - If an order was send via fax, the response will be sent via fax.
2. Why can't the status of an LSR submitted via EDI be viewed in the PON Status Reports which are available on-line?

The PON Status Reports are for orders which were submitted via fax. Status for orders submitted via EDI/TAG are received via EDI/TAG.

7.3 LSR Error Notices

1. What types of errors would require clarification?

Some examples of errors for which BellSouth will request clarification:

- Some numbers on an account are being ported, but information/instruction has not been provided on **ALL** numbers listed on the account (i.e., Ringmaster; Surrogate Client MemoryCall; Flexible Call Forwarding Dial Around (FCPAN))
- REF NUM are duplicated on the LSR
- LSR does not contain the minimum required fields
- Duplicate PON
- Data was entered into a prohibited field
- Busy cable & pair
- Incorrect address
- End user & central office are not in same wire center (may be wrong ACTL)
- Invalid ACT
- Invalid Q-account

000363

- TN listed is not a working BellSouth TN
- Listing 2 numbers to port from two different CSRs on one LSR

2. Why would the CLEC receive error reports from SCC, Manager of the E911 database?

If the CLEC sends the Migrate message to the SCC to lock E911 prior to SCC receiving BellSouth's Unlock message, the CLEC Migrate message will be placed on an error report (755) which is distributed daily to CLECs from SCC. SCC will mechanically process the Migrate/Unlock record match for 7 days for all 755 error messages. After 7 days the record will move to a 760 error file. SCC will manually continue to look for the record match there.

CLEC should be sure that the Activate SV has been sent to NPAC for the Migrate messages which appear on the 755 or 760 error reports.

7.4 Due Dates

1. What are the key steps to changing the Due Date for a previously submitted LNP LSR?

The most important part of a Due Date change is submitting a SUP LSR to the BellSouth LCSC and receipt of a revised FOC prior to sending the Modify SV to NPAC. If the Modify SV is sent to NPAC prior to receipt of the revised FOC from BellSouth, the LSR will fall out of the order process at BellSouth. Due Date changes should be requested prior to the due date and not later than the due date originally stated.

2. Why does the FOC have a Due Date which is different than the Desired Due Date?

If the Desired Due Date on the original LSR did not adhere to BellSouth Standard Intervals for LNP orders, then the Due Date on the FOC would reflect the appropriate interval. Refer to BellSouth Standard Interval Guide for more details.

3. Why does the CLEC have to send the Activate SV on the Due Date?

If the CLEC sends the Activate SV before or after the Due Date on the FOC, end user service could be impacted.

7.5 NPAC Communication

1. What does it mean when a CLEC receives an SV with Authorization set to NO (Conflict) from NPAC?

This SV indicates that the CLEC sent a Create SV to NPAC prior to receipt of an FOC for the TN. CLEC should check for receipt of an FOC for the TN.

2. Why can't the CLEC send the Create SV to NPAC prior to receiving an FOC from BellSouth?

If the CLEC sends the Create SV to NPAC prior to receiving an FOC from BellSouth, BellSouth will send SV with Authorization set to NO (Conflict) to NPAC. CLEC should follow industry flow for successful porting.

3. How does CLEC know BellSouth is ready to port number?

CLEC should complete the following steps at least the day before the due date:

- verify FOC was received
- verify FOC due date
- verify SV is Pending with Concurrence for all TNs on LSR

- verify SV due date is same as FOC due date for all TNs on LSR

4. What happens if the NPAC telephone number disconnect option is used after sending the activate (number ported) message?

The telephone number and not the end user is returned to BellSouth. The CLEC must arrange to provide service for the end user because upon receipt of the Activate SV, BST will proceed with the disconnect order.

000365

8. LNP Ordering Checklist

8.1 LNP Ordering Checklist

1. **Pre- Submission: The LSR Form for LNP**

Has the pre-order information been validated? CLECs may access pre-order support using a web browser and the LENS interface. Use the Inquiry function to confirm the accuracy of the following information:

- TNs on LSR match TNs on CSR
- LSR address is RSAG valid

2. Have you included/checked the following items:
   - Previously unassigned PON on LSR
   - Unique REF NUMs on all associated forms for LSR
   - Minimum required fields are complete
3. Is there a Q-account for each OCN registered at the NPAC and stated on the LSR in the CC field?
4. Were BellSouth Standard Due Date Intervals followed when assigning the Desired Due Date? (Refer to BellSouth Products and Services Interval Guide.)
5. **NPAC Communication**

Do not send NPAC messages (e.g., Create or Modify) prior to receipt of FOC. (For original LSR or SUP LSR)

6. The Create SV should be sent immediately upon receipt of FOC by the CLEC for all TNs on the LSR.
7. Does the Due Date on Create message must match Due Date on FOC sent by BST?
8. For any change in the Due Date to port numbers, a SUP LSR must be sent to BellSouth LCSC prior to sending a Modify message to NPAC. Any other changes, such as Cancellations, also require a SUP LSR.
9. Does the Due Time have setting of 00:00?
10. **E911 Lockdown**

The Migrate message to lock records at an E911 SCC should be sent after the Activate message is sent to NPAC.

Note: This list is not all inclusive, but highlights the actions which would most contribute to the submission of a valid LSR.

000366

000367

9. Glossary of LNP Terms

9.1 Glossary of LNP Terms

Advanced Intelligent Network (AIN)	Evolving, service-independent network architecture that provides important new capabilities for rapid creation of customized telecommunications services. AIN offers one way for a network element to query a central database to obtain local number portability routing information.
BST	Acronym used to indicate BellSouth.
Central Office (CO)	An environmentally controlled space in which a telecommunications network switching system and other associated operating systems are installed.
Central Office Exchange (CENTREX)	A telephone service offered by LSPs that provides the end-user with advanced features and services from the LSPs EO
Clarification	Requested by BellSouth LCSC when an CLEC LSR contains incomplete or inaccurate information which requires further documentation from the CLEC to allow order processing to continue.
Competitive Local Exchange Carrier (CLEC)	A new entrant into a market where there is already an incumbent LEC (ILEC) providing local phone service.
Conflict	An SV status which indicates that an error has occurred in the ordering process which will require further CLEC action for BellSouth to resume order processing. For example, BST will place SV in conflict if CLEC sends a Create SV before an FOC has been issued.
Directory Number (DN)	An end-user's telephone number, also known as a TN. In its most restrictive definition, an end-user number which is listed in a directory or with directory assistance.
Donor Switch	Switch/Office/Exchange Refers to the local switch from which an end-user was served, prior to changing SPs.

000368

End Office (EO)	A switching system used to provide local service for a local telephone company; also known as a central office. End offices are typically equipped with both line and trunk terminations.
Fall-Out	Human eyes are needed to review the order, e.g. with a partial migration.
Fatal Reject	A type of error which suggests that the minimal requirements of an LSR were not fulfilled. For example, a missing required field or a duplicate PON. A Fatal Reject will not allow the CLEC order to be processed further by the BellSouth LCSC.
Federal Communications Commission (FCC)	Congressionally credited governmental agency with the responsibility to direct the U.S. national and international telecommunications regulatory environment.
Firm Order Confirmation (FOC)	Verification/acknowledgment from one SP to another of receipt of a valid Local Service Request (LSR)
Incumbent Local Exchange Carrier (ILEC)	Typically, the RBOC or independent who services local end-users (prior to a market opening up to local competition)
Intelligent Network (IN)	Hardware and software platform used to provide enhanced voice, video and data services. IN offers one way for a network element to query a central database to obtain local number portability routing information.
Inter-Exchange Carrier (IXC)	A carrier that provides connections between LATAs, between serving areas, and between LATAs and serving areas where the calling or called end-user is located in the United States.
Interim Number Portability (INP)	A temporary solution for porting telephone numbers that routes calls to the CLEC wire center using: • Remote Call Forwarding (RCF) • Direct Inward Dialing (DID) • Route Index Hubbing (RTI)
Local Exchange Carrier (LEC)	A company that provides local telephone service. LECs also include independent local telephone companies.

Local Exchange Routing Guide (LERG)	Bellcore administered Network Routing and V&H Coordinate information for U.S. Telecommunications Industry and others.
Local Number Portability (LNP)	Provides end users with the ability to retain their numbers when they change their local service provider.
Local Number Portability Gateway (LNP GW)	A BellSouth System created to support LNP that: • includes desktop application for LCSC Service Representatives. • is used to process LNP LSR's on-line. • communicates with the NPAC. • interfaces with the AIN database to update call routing information.
Local Service Management System (LSMS)	The LSP owned network database which holds downloaded ported number information.
Local Service Provider (LSP)	A company that provides basic local telephone service.
Location Routing Number (LRN)	A routing code that is: • unique • 10 digits • identifies the switch in which a ported number resides. LRN utilizes AIN triggers, SS7 signaling, and unique 10-digit code for switch identification.
Lockheed-Martin IMS (LM-IMS)	The neutral third-party administrator for the LNP database NPAC.
New Service Provider (NSP)	Subscribers selection of exchange carrier that will be providing dial tone. This will usually be the exchange carrier that is not the default SP for the NPA NXX. This would be the recipient switch for the porting of a number when the end-user is being ported. When the end-user is changing from ported to non-ported the NSP would be the donor switch.
Non-Portable Number	Numbers are those that have not been designated as ported exchanges or portable capabilities in the LERG.
North American Numbering Council (NANC)	FCC -mandated task force assigned to oversee NPAC and NANP administration for the U.S. telecommunications industry.

000370

North American Numbering Plan (NANP)	A plan for the allocation of unique 10 digit address numbers. The numbers consist of a 3 digit area (numbering plan area) code, a 3 digit office code, and a 4 digit line number. The plan also extends to format variations (e.g., 3 digit and 7 digit address), prefixes (e.g., 1, 0, 01 and 011), and special code applications (e.g., Service Access Codes).
Number Portability Administration Center (NPAC)	A neutral third party vendor contracted by BellSouth and the CLEC's to: • maintain the master database for LNP. • coordinate the flow of information between service providers.
Numbering Plan Area (NPA)	A defined geographic area identified by a unique three digit code used in the North American Numbering Plan Area.
NXX	End Office Code A three digit code used to identify a central office exchange. However, in a portable environment the last 4 digits or the 7-digit telephone number may not always reside in the central office exchange to which the NXX was natively assigned.
Plain Old Telephone Service (POTS)	Basic residence or business telephone service which provides users with simple telephone features or service.
Port In	A term used with Local Number Portability to indicate that a customer is changing his facility based local service provider from a CLEC to BellSouth and wishes to keep his same telephone number.
Port Out	A term used with Local Number Portability to indicate that a BellSouth customer is taking his telephone number with him to another facility based local service provider.
Portability	The ability of the user to change local telephone companies, location and/or service without changing the telephone number.

Portable Number	Those numbers within an exchange that have portable capabilities and are assigned to a designated portable exchange. These are the numbers that are assigned to the designated default switch and have not been ported to another LSP. These numbers are commonly identified as working on the "Donor" switch. Portable numbers are all numbers in an NXX where portability is allowed. Numbers will be declared portable on an NXX basis.
Ported Number	Those that have been assigned to other LSPs providing recipient switch access for Portable exchanges. This is commonly termed as the numbers assigned to the "Recipient" switches. The "Recipient" switch is not the default switch in the SCP. Ported numbers are the subset of portable numbers that have actually been moved from the LERG based switch (donor) to another switch (recipient).
Private Branch Exchange (PBX)	System typically installed in a business that serves as the central telephone system for that business and which may provide certain enhanced services for that business.
Recipient Switch	Switch/Office/Exchange — Refers to local end office switch to which an end-user is served, after changing SPs.
Remote Call Forwarding (RCF)	LNP deployment model generally viewed as an interim solution. For customers changing their local telephone company and wanting to keep their phone number, routes all incoming calls to the old company switch first. Then the calls are forwarded to a new phone
SCC	Neutral third party responsible for the E911 database administration. (SCC is not an abbreviation.)
Service Management System (SMS)	Computer facility permitting access to records contained in the number portability database. Receives Number Ported messages from NPAC.
Service Order Administration (SOA)	Interface to the NPAC for porting end-user TNs. Receives create and sends concurrence SVs.
Service Provider (SP)	A company that provides telephone service.
Subscription Version (SV)	A message that flows through the NPAC to provide information regarding LNP.

Telecommunications Access Gateway (TAG)	TAG is a transaction based messaging system with data translation. TAG provides a by-directional flow of information between the CLEC and BellSouth, and gives the CLEC access to pre-ordering and ordering functionality.
Toll Message Rate Center (TMRC)	A uniquely defined geographic area: • created to allow for the proper rating of toll and message charges. • appears in LERG for a wire center/switch.
Trigger Order	6-Digit Trigger – identifies NPA XXX that is portable and causes querying. 10-Digit Trigger – end-users' telephone number. This trigger causes look up process so when the 10-digit trigger is dialed the call is routed through AIN to the SS7 database. **Note:** "Trigger" is not available for all service types.

CONNECTIVITY BILLING AND RECORDING

1.1 General

1.1.1 This Section describes the requirements for BellSouth to bill and record all charges Supra Telecom incurs for purchasing: (a) telecommunications services that BellSouth currently provides, or may offer hereafter for resale; (b) interconnection of BellSouth's network to Supra Telecom's network; (c) certain unbundled Network Elements and certain combinations of such unbundled Network Elements (Network Elements and Combinations) (resale, interconnection, Network Elements and Combinations shall collectively be referred to as "Billed Services"); and to provide Meet Point Billing and Mutual Compensation.

1.1.2 After receiving certification as a local exchange company from the appropriate regulatory agency, Supra Telecom will provide the appropriate BellSouth service center the necessary documentation in order for BellSouth to establish service for Supra Telecom.

1.1.3 Prior to submitting orders to BellSouth for local service, a master account must be established for Supra Telecom. Supra Telecom is required to provide the following before a master account is established: proof of PSC/PUC certification, the Application for Master Account, an Operating Company Number ("OCN") assigned by the National Exchange Carriers Association ("NECA") and a tax exemption certificate, if applicable.

1.1.4 Payment of all charges will be the responsibility of Supra Telecom. Supra Telecom shall make payment to BellSouth for all services billed. BellSouth is not responsible for payments not received by Supra Telecom from Supra Telecom's end user. BellSouth will not become involved in billing disputes that may arise between Supra Telecom and its end user. Payments made to BellSouth as payment on account will be credited to an accounts receivable master account and not to an end user's account.

1.1.5 Upon proof of tax exempt certification from Supra Telecom, the total amount billed to Supra Telecom will not include any taxes due from the end user to reflect the tax exempt certification and local tax laws. Supra Telecom will be solely responsible for the computation, tracking, reporting, and payment of taxes applicable to Supra Telecom's end user.

1.1.6 BellSouth will not perform billing and collection services for Supra Telecom as a result of the execution of this Agreement. All requests

for billing services should be referred to the appropriate entity or operational group within BellSouth.

1.2 Billable Information and Charges

1.2.1 BellSouth will bill and record in accordance with this Agreement those charges Supra Telecom incurs as a result of Supra Telecom's purchasing Billed Services from BellSouth. BellSouth will bill charges for Billed Services through Carriers Access Billing System ("CABS") or in the CABS format. BellSouth will format all bills in CBOS Standard or CRIS/CLUB format, depending on the type of service ordered, and will include sufficient bill detail to identify the particular services ordered. For those Billed Services where standards have not yet been developed, BellSouth's billing format will change as necessary when standards are finalized by the industry forum.

1.2.2 BellSouth shall provide Supra Telecom a monthly bill that includes all charges incurred by and credits and/or adjustments due to Supra Telecom for those Billed Services ordered, established, utilized, discontinued or performed pursuant to this Agreement. Each bill provided by BellSouth to Supra Telecom shall include: (1) all non-usage sensitive charges incurred for the period beginning with the day after the current bill date and extending to, and including, the next bill date; (2) any known unbilled non-usage sensitive charges for prior periods; (3) unbilled usage sensitive charges for the period beginning with the last bill date and extending through the current bill date, except for detail usage for resold services which could extend beyond the current bill date, which are: per use vertical services, directory services, operator charges, IntraLATA toll and optional calling plans, excluding Watsaver® Service; (4) any known unbilled usage sensitive charges for prior periods; and (5) any known unbilled adjustments. Each bill shall set forth the quantity and description of each such Billed Services billed to Supra Telecom. All charges billed to Supra Telecom must indicate the state from which such charges were incurred except in cross boundary state situations. A listing of cross boundary exchanges has been provided to Supra Telecom.

1.2.3 The Bill Date, as defined herein, must be present on each bill transmitted by BellSouth to Supra Telecom and must be a valid calendar date. Bills shall not be rendered for any charges which are incurred after the applicable statute of limitations has run or as stated in any Access Billing Supplier Quality Certification Operating Agreement. Until an Access Billing Supplier Quality Certification Operating Agreement is developed, the statute of limitations will apply. In addition, on each bill where "Jurisdiction" is identified, local charges shall be identified as "Local" and not as interstate, interstate/interLATA, intrastate, or intrastate/intraLATA. BellSouth will provide from and

through dates for charges rendered on all bills. In addition, BellSouth will separately identify business charges from residence charges, as appropriate.

~~1.1.4~~1.2.4 Charges for Billed Services shall be in conversation seconds for those services that are billed based on conversation time. For resold services, charges will be billed in accordance with retail billing standards. For other than resold services, the total seconds per chargeable rate element per end office will be totaled and rounded to the nearest whole minute. The incremental seconds per chargeable rate element per end office will be totaled and rounded to the next whole minute. Self reporting factors such as PLU and PIU will be used to determine jurisdiction of unidentifiable traffic.

1.2.5 Billing Account Numbers ("BANS") will be established in accordance with BellSouth billing policy and OBF standards. The BellSouth billing policy in effect at the time this Agreement is signed will govern the billing account structure during the term of this Agreement. BellSouth will provide such policy to Supra Telecom at such time. Changes to the BellSouth billing policy will be co-ordinated with Supra Telecom and the Supra Telecom Account Team to ensure that Supra Telecom will not be adversely impacted by such changes. Supra Telecom may request that certain categories of charges be included in separate bills which are to be sent to different billing addresses. Supra Telecom will submit such request through the Bona Fide Request/New Business Request ("BFR/NBR") process set forth in Attachment 10 of this Agreement, incorporated herein by this reference.

1.2.6 Each Party shall provide the other Party, at no additional charge, a contact person for the handling of any billing questions or problems that may arise during the implementation and performance of the terms and conditions of this Attachment 6. Billing questions subsequent to implementation will be directed to the appropriate BellSouth billing specialist.

1.3 Meet Point Billing

1.3.1 Where appropriate, Supra Telecom and BellSouth will establish meet-point billing ("MPB") arrangements in accordance with the Meet-Point Billing guidelines adopted by and contained in the OBF's MECAB and MECOD documents, except as modified herein. Both Parties will individually and collectively maintain provisions in their respective federal and state access tariffs, and/or provisions within the National Exchange Carrier Association ("NECA") Tariff No. 4, or any successor

tariff to reflect the MPB arrangements identified in this Agreement, in MECAB and in MECOD.

1.3.2 Supra Telecom and BellSouth will implement the "Multiple Bill/Multiple Tariff" option in order to bill any interexchange carrier ("IXC") for that portion of the jointly provided switched exchange access service provided by Supra Telecom or BellSouth.

1.3.3 BellSouth shall provide to Supra Telecom the billing name, billing address, and carrier identification code ("CIC") of the IXCs that may utilize any portion of Supra Telecom's network in an Supra Telecom/BellSouth MPB arrangement in order to comply with the MPB Notification process as outlined in the MECAB document. Such information shall be provided to Supra Telecom in the format and via the medium that the Parties agree. If BellSouth does not have a CIC for any IXC that will utilize a portion of Supra Telecom's network in an Supra Telecom/BellSouth MPB arrangement, and for whom BellSouth must supply to Supra Telecom MPB billing information, BellSouth agrees that it will assist such carrier in obtaining a CIC expeditiously. Until such carrier has obtained a CIC, BellSouth will submit BellSouth's CIC on those MPB records provided to Supra Telecom for MPB. BellSouth understands and agrees that it will be solely responsible for obtaining any reimbursements from those carriers who have utilized the jointly provided networks of BellSouth and Supra Telecom.

1.3.4 BellSouth and Supra Telecom agree that in an MPB arrangement where one Party provides local transport and the other Party provides the end office switching, the Party who provides the end office switching is entitled to bill any residual interconnection charges ("RIC") and common carrier line ("CCL") charges associated with the traffic. The Parties further agree that in those MPB situations where one Party sub-tends the other Party's access tandem, the Party providing the access tandem is only entitled to bill the access tandem fee and any associated local transport charges. The Parties also agree that the Party who provides the end office switching is entitled to bill end office switching fees, local transport charges, RIC and CCL charges, as appropriate, and such other applicable charges. BellSouth and Supra Telecom agree that in a MPB arrangement, where transport is jointly provided, and/or the tandem is owned by one Party and the end office is owned by the other Party, charges will be billed using tariff rates and in accordance to MECAB guidelines.

1.3.5 BellSouth and Supra Telecom will record and transmit switched exchange access service records in accordance with the MECAB standards. Such data shall be transmitted to the other Party within ten (10) days of its recording. BellSouth and Supra Telecom will coordinate and exchange the billing account reference ("BAR") and

billing account cross reference ("BACR") numbers or Operating Company Number ("OCN"), as appropriate, for the MPB arrangements described in this Agreement. Each Party will notify the other if the level of billing or other BAR/BACR elements change, resulting in a new BAR/BACR number.

1.3.6 If MPB data is not processed and delivered by either BellSouth or Supra Telecom and sent to the other Party within ten (10) days of their recording and in turn such Party is unable to bill the IXC for the appropriate charges, the Party who failed to deliver the data will be held liable for the amount of the unbillable charges.

1.3.7 If MPB data is not submitted within ten (10) days of their recording or is not in the proper format as set forth in this Agreement, and if as a result the other Party is delayed in billing the IXC for the appropriate charges it incurs, the delaying Party shall pay the other Party a late MPB data delivery charge which will be the total amount of the delayed charges times the highest interest rate (in decimal value) which may be levied by law for commercial transactions, compounded daily for the number of days from the date the MPB charges should have been received to and including the date the MPB charge information is actually received.

1.3.8 Errors in MPB data exchanged by the Parties may be discovered by Supra Telecom, BellSouth or the billable IXC. Both Supra Telecom and BellSouth agree to provide the other Party with notification of any discovered errors within two (2) business days of the discovery. The other Party shall correct the error within eight (8) business days of notification and resubmit the data. In the event the errors cannot be corrected within the time period specified above, the erroneous data shall be considered lost. If MPB data is lost due to incorrectable errors or otherwise, the Parties shall follow the procedures set forth in Section 1.15 of this Attachment 6.

1.3.9 Both Parties will provide the other a single point of contact to handle any MPB questions.

1.3.10 MPB will apply for all traffic bearing the 500, 700, 900, 8YY or any other non-geographic NPA which may be likewise designated for such traffic in the future.

1.4 Collocation

1.4.1 When Supra Telecom collocates with BellSouth in BellSouth's facility as described in this Agreement, capital expenditures (e.g., costs associated with building the "cage"), shall not be included in the bill provided to Supra Telecom pursuant to this Attachment 6. All such

capital expenses shall be given a unique BAN and invoice number. All invoices for capital expenses shall be sent to the location specified by Supra Telecom for payment. All other non-capital recurring collocation expenses shall be billed to Supra Telecom in accordance with this Agreement. The CABS Billing Output Specifications ("BOS") documents provide the guidelines on how to bill the charges associated with collocation. The bill label for those collocation charges shall be entitled "Expanded Interconnection Service." For those nonmechanized bills, the bill label for non-capital recurring collocation expenses shall be entitled "Collocation".

1.5 Right-of-Way

1.5.1 Billing for right-of-way, poles and conduits will be addressed in Attachment 8 of this Agreement, incorporated herein by this reference.

1.6 Information Services

1.6.1 The transport for 976 and other information services calls will be billed in accordance with the reciprocal compensation arrangement described in Section 2.1 of Attachment 3 of this Agreement, incorporated herein by this reference.

1.7 Local Number Portability

1.7.1 When an IXC terminates an interLATA or intraLATA toll call to an Supra Telecom local exchange customer whose telephone number has been ported from BellSouth, the Parties agree that Supra Telecom shall receive those IXC access charges associated with end office switching, local transport, RIC and CCL, as appropriate. BellSouth shall receive any access tandem fees, dedicated and common transport charges, to the extent provided by BellSouth, and any Service Provider Number Portability ("SPNP") fees (i.e., such as RCF charges) set forth in this Agreement. When a call for which access charges are not applicable is terminated to an Supra Telecom local exchange customer whose telephone number has been ported from BellSouth, and is terminated on Supra Telecom's own switch, the Parties agree that the mutual compensation arrangements described in this Agreement shall apply.

1.8 Issuance of Bills - General

1.8.1 BellSouth and Supra Telecom will issue all bills in accordance with the terms and conditions set forth in this Section. BellSouth and Supra Telecom will establish monthly billing dates ("Bill Date") for each Billing Account Number ("BAN"). Each BAN shall remain constant from month to month, unless changed as agreed to by the Parties. Each Party shall provide the other Party at least thirty (30) calendar days

written notice prior to changing, adding or deleting a BAN. The Parties will provide one billing invoice associated with each BAN. Each invoice must contain an invoice number (which will vary from month to month). The bill date is the only varying invoice number available on the Resale bill. On each bill associated with a BAN, the appropriate invoice number and the charges contained on such invoice must be reflected. All bills must be received by the other Party no later than ten (10) calendar days from Bill Date and at least twenty (20) calendar days prior to the payment due date, whichever is earlier. Any bill received on a Saturday, Sunday or a day designated as a holiday by the Chase Manhattan Bank of New York (or such other bank as Supra Telecom shall specify) will be deemed received the next business day. If either Party fails to receive billing data and information within the time period specified above, the payment due date will be extended by the number of days the bill is late.

1.8.2 BellSouth and Supra Telecom shall issue all CABS bills or bills in CBOS format containing such billing data and information in accordance with the most current version of CBOS, or if development time is required, within two (2) versions of the current CBOS standard. To the extent that there are no CBOS or MECAB standards governing the formatting of certain data, such data shall be issued in the format as mutually agreed upon by the parties.

1.8.3 Within thirty (30) days of finalizing the chosen billing media, each Party will provide the other Party written notice of which bills are to be deemed the official bills to assist the Parties in resolving any conflicts that may arise between the official bills and other bills received via a different media which purportedly contain the same charges as are on the official bill. If either Party requests an additional copy(ies) of a bill, such Party shall pay the other Party a reasonable fee per additional bill copy, unless such copy was requested due to errors, omissions, or corrections or the failure of the transmission to comply with the specifications set forth in this Agreement.

1.8.4 When sending bills via electronic transmission, to avoid transmission failures or the receipt of billing information that cannot be processed, the Parties shall provide each other with their respective process specifications. Each Party shall comply with the mutually acceptable billing processing specifications of the other. Supra Telecom and BellSouth shall provide each other reasonable notice if a billing transmission is received that does not meet such Party's specifications or that such Party cannot process. Such transmission shall be corrected and resubmitted to the other Party, at the resubmitting Party's sole expense, in a form that can be processed. The payment due date for such resubmitted transmissions will be twenty (20) days from the date that the transmission is received in a form that can be

processed and that meets the specifications set forth in this Attachment 6.

1.9 Electronic Transmissions

1.9.1 BellSouth and Supra Telecom agree that each Party will transmit billing information and data in the appropriate CABS format electronically via CONNECT:Direct to the other Party at the location specified by such Party. The Parties agree that a T1.5 or 56kb circuit to Gateway for CONNECT:Direct is required. Supra Telecom data centers will be responsible for originating the calls for data transmission via switched 56kb or T1.5 lines. If BellSouth has an established CONNECT:Direct link with Supra Telecom, that link can be used for data transmission if the location and applications are the same for the existing link. Otherwise, a new link for data transmission must be established. BellSouth must provide Supra Telecom/Alpharetta its CONNECT:Direct Node ID and corresponding VTAM APPL ID before the first transmission of data via CONNECT:Direct. Supra Telecom's CONNECT:Direct Node ID is "NDMATTA4" and VTAM APPL ID is "NDMATTA4" and must be included in BellSouth's CONNECT:Direct software. Supra Telecom will supply to BellSouth its RACF ID and password before the first transmission of data via CONNECT:Direct. Any changes to either Party's CONNECT:Direct Node ID must be sent to the other Party no later than twenty-one (21) calendar days before the changes take effect.

1.9.2 The following dataset format shall be used as applicable for those charges transmitted via CONNECT:Direct in CABS format:

Production Dataset

AF25.AXXXXYYY.AZZZ.DDDEE	Production Dataset Name
AF25 =	Job Naming Convention
AXXXX =	Numeric Company Code
YYY =	LEC Remote
AZZZ =	RAO (Revenue Accounting Office)
DDD =	BDT (Billing Data Tape with or without CSR), MEGA, JBILL, TDGXX (XX=Bill Period), or CSR (Customer Service Record)
EE =	01 thru 31 (Bill Period) (optional) or GA (US Postal-State Code)

Test Dataset

AF25.ATEST.AXXXX.DDD	Test Dataset Name
AF25.ATEST =	Job Naming Convention
AXXXX =	Numeric Company Code
DDD =	BDT (Billing Data Tape with or without CSR) or CSR (Customer Service Record)

1.10 Tape or Paper Transmissions

1.10.1 In the event either Party does not temporarily have the ability to send or receive data via CONNECT:Direct, that Party will transmit billing information to the other party via magnetic tape or paper, as agreed to by Supra Telecom and BellSouth. Billing information and data contained on magnetic tapes or paper for payment shall be sent to the Parties at the following locations. The Parties acknowledge that all tapes transmitted to the other Party via U.S. Mail or Overnight Delivery and which contain billing data will not be returned to the sending Party.

TO Supra Telecom:

Tape Transmissions via U.S. Mail:	Supra Telecom 300 North Point Parkway FLOC 217M01 Alpharetta, Georgia 30005 Attn: Access Bill Coordinator
Tape Transmissions via Overnight Delivery:	Supra Telecom 500 North Point Parkway FLOC B1404 Alpharetta, Georgia 30005 Attn: Access Bill Coordinator

Paper Transmissions via U.S. Mail:	Supra Telecom Caller Service 6908 Alpharetta, Georgia 30009 Attn: Access Bill Coordinator
Paper Transmissions via Overnight Delivery:	Supra Telecom 500 North Point Parkway FLOC B1404 Alpharetta, Georgia 30005 Attn: Access Bill Coordinator

TO BellSouth:

Tape Transmissions:	BellSouth 600 N. 19th Street 7th Floor Birmingham, Alabama 35203 Attn: Interconnection Purchasing Center
Paper Transmissions:	BellSouth 600 N. 19th Street 7th Floor Birmingham, Alabama 35203 Attn: Interconnection Purchasing Center

~~1.1.2~~1.10.2 Each Party will adhere to the tape packaging requirements set forth in this subsection. Where magnetic tape shipping containers are transported in freight compartments, adequate magnetic field protection shall be provided by keeping a typical 6-inch distance from any magnetic field generating device (except a magnetron-tape device). The Parties agree that they will only use those shipping containers that contain internal insulation to prevent damage. Each Party will clearly mark on the outside of each shipping container its name, contact and return address. Each Party further agrees that it will not ship any billing tapes in tape canisters.

1.10.3 All billing data transmitted via tape must be provided on a cartridge (cassette) tape and must be of high quality, conform to the Parties' record and label standards, 9-track, odd parity, 6250 BPI, group coded recording mode and extended binary-coded decimal interchange code ("EBCDIC"). Each reel of tape must be 100% tested at 20% or better "clipping" level with full width certification and permanent error free at final inspection. Supra Telecom reserves the right to destroy a tape that has been determined to have unrecoverable errors. Supra Telecom also reserves the right to replace a tape with one of equal or better quality.

1.10.4 Billing data tapes shall follow CBOS standards.

1.10.5 A single 6-digit serial number must appear on the external (flat) surface of the tape for visual identification. This number shall also appear in the "dataset serial number field" of the first header record of the IBM standard tape label. This serial number shall consist of the character "V" followed by the reporting location's four digit Originating Company Code and a numeric character chosen by the sending company. The external and internal label shall be the same. The dataset name shall appear on the flat side of the reel and also in the "data set name field" on the first header record of the IBM standard tape label. BellSouth's name, address, and contact shall appear on the flat side of the cartridge or reel.

1.10.6 Tape labels shall conform to IBM OS/VS Operating System Standards contained in the IBM Standard Labels Manual (GC26-3795-3). IBM standard labels are 80-character records recorded in EBCDIC, odd parity. The first four characters identify the labels:

Volume 1	**Volume label**
HDR1 and HDR2	Data set header labels
EOV1 and EOV2	Data set trailer labels (end-of-volume for multi-reel files)
EOF1 and EOF2	Data set trailer labels (end-of-data-set)

The HDR1, EOV1, and EOF1 labels use the same format and the HDR2, EOV2, and EOF2 labels use the same format.

~~1.1.7~~1.10.7 The Standard Volume Label Format (Vol. 1) is described below:

FIELD NAME	CONTENTS
Label Identifier (3 bytes)	The characters "VOL" identify this label as a volume label.
Label Number (1 byte)	The relative position of this label within a set of labels of the same type; it is always a 1 for the IBM standard volume label.
Volume Serial Number (6 bytes)	A unique identification code, normally numeric characters (000001-999999), but may be alpha-numeric; if fewer than 6 characters, must be left-justified. This same code should also appear on the external (flat) surface of the volume for visual identification.
Reserved (1 byte)	Reserved for future use - should be recorded as blanks.
VTOC Pointer (10 bytes)	Direct-access volumes only. This field is not used for tape volumes and should be recorded as blanks.
Reserved (10 bytes)	Reserved for future use - should be recorded as blanks.
Owner Name and Address Code(10 bytes)	Indicates a specific customer, person, installation, department, etc., to which the volume belongs. Any code or name is acceptable.
Reserved (29 bytes)	Reserved for future use - should be recorded as blanks.

~~1.1.8~~1.10.8 The IBM Standard Dataset Label 1 Format (HDR1, EOV1, EOF1) is described below:

FIELD NAME	CONTENTS
Label Identifier (3 bytes)	Three characters that identify the label are: HDR Header label (at the beginning of a dataset) EOV Trailer label (at the end of a tape volume, when the dataset continues on another volume) EOF Trailer label (at the end of a dataset).
Label Number (1 byte)	The relative position of this label within a set of labels of the same type; it is always a 1 for dataset label 1.
Dataset Identifier (17 bytes)	The rightmost 17 bytes of the dataset name (includes GnnnnVnn if the dataset is part of a generation data group). If the dataset name is less than 17 bytes, it is left-justified and the remainder of this field is padded with blanks.

FIELD NAME	CONTENTS
Dataset Serial Number (6 bytes)	The volume serial number of the tape volume containing the dataset. For multi-volume datasets, this field contains the serial number of the first volume of the aggregate created at the same time. The serial number can be any 6 alphanumeric characters, normally numeric (000001-999999). If the number of characters is fewer than 6 characters, the code must be left-justified and followed by blanks.
Volume Sequence Number (4 bytes)	A number (0001-9999) that indicates the order of volume within the multi-volume group created at the same time. This number is always 0001 for a single volume dataset.
Dataset Sequence Number (4 bytes)	A number (0001-9999) that indicates the relative position of the dataset within a multi-dataset group. This number is always 0001 for a single dataset organization.
Generation Number (4 bytes)	If the dataset is part of a generation data group, this field contains a number from 0001 to 9999 indicating the absolute generation number (the first generation is recorded as 0001). If the dataset is not part of a generation data group, this field contains blanks.
Version Number Of Generation (2 bytes)	If the dataset is part of a generation data group, this field a number from 00 to 99 indicating the version number of the generation (the first version is recorded as 00). If the dataset is not part of a generation data group, this field contains blanks.
Creation Date (6 bytes)	Year and day of the year when the dataset was created. The date is shown in the format byyddd where: b = blank yy = year(00-99) ddd = day(001-366)
Expiration Date (6 bytes)	Year and day of the year when the dataset may be scratched or overwritten. The data is shown in the format byyddd where: b = blank yy = year (00-99) ddd = day (001-366)
Dataset Security (1 byte)	A code number indicating the security status of the dataset is as follows: 0 No password protection 1 Password protection Additional identification of the dataset is required before it can be read, written, or deleted (ignored if volume is RACF-defined) 3 Password protection Additional identification of the dataset is required before it can be read, written, or deleted (ignored if volume is RACF-defined).

FIELD NAME	CONTENTS
Block Count (6 bytes)	This field in the trailer label shows the number of data blocks in the dataset on the current volume. This field in the header label is always zeros (000000).
System Code (13 bytes)	Unique code that identifies the system.
Reserved (7 bytes)	Reserved for future use - should be recorded as blanks.

~~1.1.9~~1.10.9 The IBM Standard Dataset Label 2 Format (HDR2, EOV2, EOF2) always follows dataset label 1 and contains additional information about the associated dataset as described below:

Label Identifier (3 bytes)	Three characters that identify the label are as follows: HDR Header label (at the beginning of a dataset) EOV Trailer label (at the end of a tape volume, when the dataset continues on another volume) EOF Trailer label (at the end of a dataset).
Label Number (1 byte)	The relative position of this label within a set of labels of the same type; it is always a 2 for dataset label 2.
Record Format (1 byte)	An alphabetic character that indicates the format of records in the associated dataset as follows: F Fixed length V Variable length U Undefined length.
Block Length (5 bytes)	A number up to 32760 that indicates the block length, in bytes. Interpretation of the number depends on the following associated record format in Field 3: Format F - Block length (must be a multiple of the logical record length in Field 5) Format V - Maximum block length (including the 4 byte length indicator in the block) Format U - Maximum block length.
Record Length (5 bytes)	A number that indicates the record length, in bytes. Interpretation of the number depends on the following associated record format in Field 3: Format F - Logical record length Format V - Maximum logical record length (including the 4 byte length indicator in the records) Format U - Zeros.

Tape Density (1 byte)	A code indicating the record density of the tape, as follows: Recording Density DEN Value 9-Track Tape 3 1600 (PE) 4 6250 (GCR) PE - is for phase encoded mode GCR - is for group coded recording mode.
Dataset Position (1 byte)	A code, indicating a volume switch, is as follows: 0 - No volume switch has occurred 1 - A volume switch previously occurred.
Job/Job Step (17 bytes)	Identification of the job and job step that created the dataset. The first 8 bytes contain the name of the job, the ninth byte is a slash (/), and the final 8 bytes contain the name of the job step.
Tape Recording Technique (2 bytes)	A code or blanks indicating the tape recording technique used. This field is recorded as blanks for 9-track tape. The only technique available for 9-track tape is odd parity and no translation.
Control Characters (1 byte)	A code indicating whether a control character set was used to create the dataset and the type of control characters used: A Contains ASCII control characters M Contains machine control characters b Contains no control characters.
Reserved (1 byte)	Reserved for future use - should be recorded as blanks.
Block Attribute (1 byte)	A code indicating the block attribute used to create the dataset: B Blocked records S Spanned records R Blocked and spanned records b No blocked and no spanned records.
Reserved (8 bytes)	Bytes 40-42 - reserved for future use –should be blanks. Bytes 43-47 - (3420 tape units only) serial number of creating tape unit. Blank for other units.
Checkpoint Dataset (1 byte)	In VS2-Release 2, this byte contains the identifier character C if the dataset is a checkpoint dataset; the byte is blank if the dataset is not a check point dataset or in other releases of the VS systems.
Reserved (32 bytes)	Reserved for future use - should be recorded as blanks.

1.11 Testing Requirements

1.11.1 At least thirty (30) calendar days prior to any BellSouth software releases that affect the mechanized bill format, BellSouth shall send to Supra Telecom bill data in the appropriate mechanized format for testing to ensure that the bills can be processed and that the bills comply with CBOS standards. After receipt of the test data from

BellSouth, Supra Telecom will notify BellSouth at least ten (10) days prior to the software release implementation date of any processing problems as a result of the software changes. If the transmission fails to meet CBOS standards, BellSouth shall make the necessary corrections prior to implementation to meet such CBOS standards.

1.11.2 BellSouth shall provide to Supra Telecom's Company Manager, located at 500 North Point Parkway, FLOC B1104B, Alpharetta, Georgia 30005, BellSouth's originating or state level company code so that it may be added to Supra Telecom's internal tables at least thirty (30) calendar days prior to testing or prior to a change in BellSouth's originating or state level company code.

1.11.3 Test tapes containing the transmitted Supra Telecom billing data and information will be sent during the testing period, per request, to the following location:

Test Tapes:	Supra Telecom 500 North Point Parkway FLOC B1104B Alpharetta, Georgia 30005 Attn: Access Bill Testing Coordinator

1.12 Additional Requirements

1.12.1 BellSouth agrees that if it transmits data to Supra Telecom in a mechanized

format, BellSouth will also comply with the following specifications which are not contained in CABS guidelines but which are necessary for Supra Telecom to process billing information and data:

~~1.1.1.1~~1.12.1.1 The BAN shall not contain embedded spaces or low values.

1.12.1.2 The Bill Date shall not contain spaces or non-numeric values.

1.12.1.3 Each bill must contain at least one detail record.

1.12.1.4 Any "From" Date should be less than the associated "Thru" Date and neither date can contain spaces.

1.12.1.5 The Invoice Number must not have embedded spaces or low values.

1.13 Bill Accuracy Certification

1.13.1 The Parties agree that in order to ensure the proper performance and integrity of the entire billing process, BellSouth will be responsible and accountable for transmitting to Supra Telecom an accurate and current bill. BellSouth agrees to implement control mechanisms and procedures to render a bill that accurately reflects the Billed Services ordered and used by Supra Telecom. Accordingly, at Supra Telecom's option on a connectivity by connectivity basis, Supra Telecom and BellSouth agree to model, for the purposes of this Agreement, the process and methodology for access certification set forth in the Access Billing Supplier Quality Certification Operating Agreement dated August 13, 1993, executed by Supra Telecom and BellSouth which governs certification of access bills for interLATA and intraLATA calls. At the point Supra Telecom and BellSouth mutually agree that pre-certification is complete, all billing disputes will be handled pursuant to a billing supplier quality certification operating agreement to be executed by the Parties.

1.14 Payment Of Charges

1.14.1 Subject to the terms of this Agreement, Supra Telecom and BellSouth will pay each other within thirty (30) calendar days from the Bill Date, or twenty (20) calendar days from the receipt of the bill, whichever is later. If the payment due date is a Sunday or is a Monday that has been designated a bank holiday by the Chase Manhattan Bank of New York (or such other bank as Supra Telecom specifies), payment will be made the next business day. If the payment due date is a Saturday or is on a Tuesday, Wednesday, Thursday or Friday that has been designated a bank holiday by the Chase Manhattan Bank of New York (or such other bank as Supra Telecom specifies), payment will be made on the preceding business day.

1.14.2 Payments shall be made in U.S. Dollars via electronic funds transfer ("EFT") to the other Party's bank account. At least thirty (30) days prior to the first transmission of billing data and information for payment, BellSouth and Supra Telecom shall provide each other the name and address of its bank, its account and routing number and to whom billing payments should be made payable. If such banking information changes, each Party shall provide the other Party at least sixty (60) days written notice of the change and such notice shall include the new banking information. The Parties will render payment via EFT. Supra Telecom will provide BellSouth with one address to which such payments shall be rendered and BellSouth will provide to Supra Telecom with only one address to which such payments shall be rendered. In the event Supra Telecom receives multiple bills from BellSouth which are payable on the same date, Supra Telecom may remit one payment for the sum of all bills payable to BellSouth's bank account specified in this subsection if Supra Telecom provides

payment advice to BellSouth. Each Party shall provide the other Party with a contact person for the handling of billing payment questions or problems.

1.15 Billing Disputes

1.15.1 On a connectivity by connectivity basis and until such time as a precertification process is in place, each party agrees to notify the other party in writing upon the discovery of a billing dispute. The disputing party agrees to provide the billing party sufficient documentation to investigate the dispute and may withhold any disputed amounts supported by such documentation. Until documentation is provided all outstanding billed amounts will be considered past due. In the event of a billing dispute, the parties will endeavor to resolve the dispute within sixty (60) calendar days of the dispute notification date. Resolution of the dispute is expected to occur at the first level of management resulting in a recommendation for settlement of the dispute.

1.15.2 If the issues are not resolved within the allotted time frame, each of the parties shall appoint a designated representative who has authority to settle the dispute and who is at a higher level of management than the persons with direct responsibility for administration of this Agreement. The designated representatives shall meet as often as they reasonably deem necessary in order to discuss the dispute and negotiate in good faith in an effort to resolve such dispute. The specific format for such discussions will be left to the discretion of the designated representatives, however all reasonable requests for relevant information made by one Party to the other Party shall be honored.

1.15.3 If the Parties are unable to resolve issues related to the disputed amounts within forty-five (45) days after the parties' appointment of designated representatives, the dispute will be resolved in accordance with the dispute resolution procedure set forth in Section 16 of the General Terms and Conditions of this Agreement, incorporated herein by this reference.

1.15.4 If a party disputes a charge and does not pay such charge by the payment due date, such charges shall be subject to late payment charges as set forth in Section 1.16 of this Attachment 6. If a party disputes charges and the dispute is resolved in favor of such party, the other party shall credit the bill of the disputing party for the amount of the disputed charges along with any late payment charges assessed no later than the second Bill Date after the resolution of the dispute. Accordingly, if a party disputes charges and the dispute is resolved in favor of the other party, the disputing party shall pay the other party the amount of the disputed charges and any associated late payment

charges assessed no later than the second bill payment due date after the resolution of the dispute.

1.16 Late Payment Charges

1.16.1 If either Party fails to remit payment for any charges described in this Attachment 6 by the payment due date, or if a payment or any portion of a payment is received by either Party after the payment due date, or if a payment or any portion of a payment is received in funds which are not immediately available to the other Party, then a late payment penalty shall be assessed. For bills rendered by BellSouth for payment by Supra Telecom, the late payment charge shall be calculated based on the portion of the payment not received by the payment due date times the late factor as set forth in the following BellSouth tariffs, based upon the service for which payment was not received: for general subscriber services, Section A2 of the General Subscriber Services Tariff; for private line service, Section B2 of the Private Line Service Tariff; and for access service, Section E2 of the Access Service Tariff. For bills rendered by Supra Telecom for payment by BellSouth the late payment charge shall be calculated based on the portion of the payment not received by the payment date times the lesser of (i) .one and one-half percent (1 ½%) per month or (ii) the highest interest rate (in decimal value) which may be charged by law for commercial transactions, compounded daily for the number of days from the payment date to and including the date that payment is actual made. In no event, however, shall interest be assessed by Supra Telecom on any previously assessed late payment charges. BellSouth shall only assess interest on previously assessed late payment charges in a state where it has the authority pursuant to its tariffs.

1.17 Discontinuance of Service

1.17.1 The procedures for discontinuing service to an end user are as follows:

1.17.1.1 Where possible, BellSouth will deny service to Supra Telecom's end user on behalf of, and at the request of, Supra Telecom. Upon restoration of the end user's service, restoral charges will apply and will be the responsibility of Supra Telecom.

1.17.1.2 At the request of Supra Telecom, BellSouth will disconnect an Supra Telecom end user.

1.17.1.3 All requests by Supra Telecom for denial or disconnection of an end user for nonpayment must be in writing.

1.17.1.4 Supra Telecom will be made solely responsible for notifying the end user of the proposed disconnection of the service.

1.17.1.5 BellSouth may disconnect and reuse facilities when the facility is in a denied state and BellSouth has received an order to establish new service or transfer of service from an end user or an end user's CLEC at the same address served by the denied facility.

1.17.2 The procedures for discontinuing service to Supra Telecom are as follows:

1.17.2.1 BellSouth reserves the right to suspend to terminate service for nonpayment of undisputed amounts or in the event of prohibited, unlawful or improper use of the facilities or service, abusse of the facilities by Supra Telecom.

1.17.2.2 If payment of undisputed amounts is not received by the bill day in the month after the original bill day, BellSouth may provide written notice to Supra Telecom, that additional applications for service will be refused and that any pending orders for service will not be completed if payment of undisputed amounts is not received by the fifteenth day following the date of the notice. In addition BellSouth may, at the same time, give thirty days notice to the person designated by Supra Telecom to receive notices of noncompliance, and discontinue the provision of existing services to Supra Telecom at any time thereafter.

1.17.2.3 In the case of such discontinuance, all billed undisputed charges, as well as applicable termination charges, shall become due.

1.17.2.4 If BellSouth does not discontinue the provision of the services involved on the date specified in the thirty (30) days' notice and Supra Telecom's noncompliance continues, nothing contained herein shall preclude BellSouth's right to discontinue the provision of the services to Supra Telecom without further notice.

1.17.2.5 If payment of undisputed charges is not received or arrangements made for payment by the date given in the written notification, Supra Telecom's services will be discontinued. Upon discontinuance of service on a Supra Telecom's account, service to Supra Telecom's end users will be denied. BellSouth will also reestablish service at the request of the end user or Supra Telecom upon payment of the appropriate connection fee and subject to BellSouth's normal application procedures. Supra Telecom is solely responsible for notifying the end user of the proposed disconnection of the service.

17.2.6 If within fifteen days after an end user's service has been denied, Supra Telecom has not contacted BellSouth in reference to restoring service, the end user's service will be disconnected.

1.18 Adjustments

1.18.1 Subject to the terms of this Attachment 6, BellSouth will adjust incorrect billing charges to Supra Telecom. Such adjustments shall be set forth in the appropriate section of the bill pursuant to CBOS or CLUB/EDI standards.

1.19 Revenue Protection

1.19.1 Where BellSouth services are being resold and where Supra Telecom is using a BellSouth port, Supra Telecom will have the use of all present and future fraud prevention or revenue protection features, including prevention, detection, or control functionality embedded within any of the network elements available to BellSouth. These features include, but are not limited to, screening codes, call blocking of international, 800, 900, and 976 numbers.

1.19.2 The Party causing a provisioning, maintenance or signal network routing error that results in uncollectible or unbillable revenues to the other Party shall be liable for the amount of the revenues lost by the Party unable to bill or collect the revenues less costs that would have been incurred from gaining such revenues.

1.19.3 Uncollectible or unbillable revenues resulting from the accidental or malicious alteration of software underlying Network Elements or their subtending operational support systems by unauthorized third parties shall be the responsibility of the Party having administrative control of access to said Network Element or operational support system software to the extent such unbillable or uncollectible revenue results from the gross negligence or willful act or omission of the Party having such administrative control.

1.19.4 BellSouth shall be responsible for any uncollectible or unbillable revenues resulting from the unauthorized physical attachment to loop facilities from the Main Distribution Frame up to and including the Network Interface Device, including clip-on fraud to the extent such unbillable or uncollectible revenue results from the gross negligence or willful act or omission of BellSouth. BellSouth shall provide soft dial tone to allow only the completion of calls to final termination points required by law.

2. PROVISION OF CUSTOMER USAGE DATA

2.1 Introduction

2.1.1 This Section sets forth the terms and conditions for BellSouth's provision of Recorded Usage Data to Supra Telecom.

2.1.2 Line Information Database ("LIDB") is a database system designed to provide for validation of calling card and other billing information. LIDB

provides screening validation on operator assisted calls on billing number records and is offered under a separate agreement. The Parties' agreement relating to LIDB Storage is included as Exhibit A to this Attachment 6, incorporated herein by this reference.

2.1.3 RAO Hosting is the process by which a telecommunications company agrees to "host" another company solely for the purpose of message exchange over the Centralized Message Distribution System ("CMDS"). RAO Hosting includes the following: RAO Code Assignment, Message Exchange via the CMDS system, and Inter-Company Settlements. The Parties' RAO Hosting Agreement is included as Exhibit B to this Attachment 6, incorporated herein by this reference.

2.1.4 Optional Daily Usage File ("ODUF") contains billable messages that were carried over the BellSouth Network and processed in the BellSouth Billing System, but billed to the Supra Telecom account. The Parties' ODUF agreement is included as Exhibit C to this Attachment 6, incorporated herein by this reference.

2.1.5 Enhanced Optional Daily Usage File ("EODUF") provides usage data for local calls originating from resold Flat Rate Business and Residential Lines. The Parties' EODUF agreement is included as Exhibit D to this Attachment 6, incorporated herein by this reference.

2.1.6 Access Daily Usage File ("ADUF") contains access messages associated with a port that Supra Telecom has purchased from BellSouth. The Parties' ADUF agreement is included as Exhibit E to this Attachment 6, incorporated herein by this reference.

3. LOCAL ACCOUNT MAINTENANCE

3.1 When BellSouth provides unbundled local switching to Supra Telecom (e.g., where Supra Telecom is reselling BellSouth's services or is employing loop port combination to provide local service) BellSouth shall provide local account maintenance information and service as described herein.

3.2 When notified by a CLEC (or from the end user to change to the ILEC service) that an Supra Telecom end user has switched its local service to the other CLEC's service (or to BellSouth), BellSouth shall send Supra Telecom a loss notification message to inform Supra Telecom that its end user has switched to another CLEC (or to BellSouth). The Parties agree to utilize LSOG4 or the most current industry ordering guideline standard established by the OBF that contains the loss notification message.

3.3 BellSouth shall send loss notification messages to Supra Telecom six (6) days a week using the applicable release of EDI as the electronic medium for transmitting the loss notification message.

3.4 BellSouth shall accept and process intraLATA and interLATA PIC changes sent by Supra Telecom. When an Supra Telecom local end user switches its IXC, Supra Telecom will enter the PIC change into the current local order system, and will generate an intraLATA or interLATA PIC Service Change Order that will be sent to BellSouth for provisioning over the existing ordering gateway.

3.5 When Supra Telecom is notified by an intraLATA or interLATA carrier using a Transaction Code ("TC") "01" PIC order record than an Supra Telecom local end user has changed its intraLATA or interLATA PIC, BellSouth shall reject the order and notify the intraLATA or interLATA carrier that a CARE PIC record should be sent to Supra Telecom. BellSouth shall notify the intraLATA or interLATA carrier by creating a '3148' (for resale or UNE-P) or a '3150' (for ported numbers) reject transaction record, and shall populate the Supra Telecom provided Supra Telecom Operating Company Code on the reject record. The intraLATA and interLATA carrier should redirect the TC01 order to Supra Telecom for processing the PIC.

LINE INFORMATION DATA BASE ("LIDB") STORAGE AGREEMENT

I. SCOPE

1.1 This Exhibit sets forth the terms and conditions pursuant to which BellSouth agrees to store in its LIDB certain information at the request of Supra Telecom and pursuant to which BellSouth, its LIDB customers and Supra Telecom shall have access to such information. Supra Telecom understands that BellSouth provides access to information in its LIDB to various telecommunications service providers pursuant to applicable tariffs and agrees that information stored at the request of Local Exchange Carrier, pursuant to this Exhibit, shall be available to those telecommunications service providers.

1.2 Definitions

1.2.1 Billing number - a number used by BellSouth for the purpose of identifying an account liable for charges. This number may be a line or a special billing number.

1.2.2 Line number - a ten-digit number assigned by BellSouth that identifies a telephone line associated with a resold local exchange service, or with a SPNP arrangement.

1.2.3 Special billing number - a ten-digit number that identifies a billing account established by BellSouth in connection with a resold local exchange service or with a SPNP arrangement.

1.2.4 Calling Card number - a billing number plus PIN number assigned by BellSouth.

1.2.5 PIN number - a four digit security code assigned by BellSouth which is added to a billing number to compose a fourteen digit calling card number.

1.2.6 Toll billing exception indicator - associated with a billing number to indicate that it is considered invalid for billing of collect calls or third number calls or both, by the Local Exchange Company.

1.2.7 Billed Number Screening - refers to the activity of determining whether a toll billing exception indicator is present for a particular billing number.

1.2.8 Calling Card Validation - refers to the activity of determining whether a particular calling card number exists as stated or otherwise provided by a caller.

1.2.9 Billing number information - information about billing number or Calling Card number as assigned by BellSouth and toll billing exception indicator provided to BellSouth by the Local Exchange Company.

1.3 LIDB is accessed for the following purposes:

Billed Number Screening
Calling Card Validation
Fraud Control

1.4.1 BellSouth will provide seven days per week, 24-hours per day, fraud monitoring on Calling Cards, bill-to-third and collect calls made to numbers in BellSouth's LIDB, provided that such information is included in the LIDB query. BellSouth will establish fraud alert thresholds and will notify Supra Telecom within 2 hours of fraud alerts so that the Supra Telecom may take action it deems appropriate. At Supra Telecom's request, BellSouth shall block and restrict calling card, third party billing and collect call, and validation in its LIDB within two (2) hours of receiving Supra Telecom's request. Local Exchange Company understands and agrees BellSouth will administer all data stored in the LIDB, including the data provided by Local Exchange Company pursuant to this Exhibit, in the same manner as BellSouth's data for BellSouth's end users. BellSouth shall not be responsible to Supra Telecom for any lost revenue which may result from BellSouth's administration of the LIDB pursuant to its established practices and procedures as they exist and as they may be changed by BellSouth in its sole discretion from time to time.

1.4.2 Supra Telecom understands that BellSouth currently has in effect numerous billing and collection agreements with various interexchange carriers and billing clearing houses. Supra Telecom further understands that these billing and collection customers of BellSouth query BellSouth's LIDB to determine whether to accept various billing options from end users. Additionally, Supra Telecom understands that

presently BellSouth has no method to differentiate between BellSouth's own billing and line data in

the LIDB and such data which it includes in the LIDB on Supra Telecom's behalf pursuant to this Exhibit. Therefore, until such time as BellSouth can and does implement in its LIDB and its supporting systems the means to differentiate Supra Telecom's data from BellSouth's data and the Parties execute appropriate amendments hereto, the following terms and conditions shall apply:

1.4.2.1 Supra Telecom agrees that it will accept responsibility for telecommunications services billed by BellSouth for its billing and collection customers for Supra Telecom's end user accounts which are resident in LIDB pursuant to this Exhibit. Supra Telecom's authorizes BellSouth to place such charges on Supra Telecom's bill from BellSouth and agrees that it shall pay all such charges. Charges for which Supra Telecom hereby takes responsibility include, but are not limited to, collect and third number calls.

1.4.2.2 Charges for such services shall appear on a separate BellSouth bill page identified with the name of the entity for which BellSouth is billing the charge.

1.4.2.3 Supra Telecom shall have the responsibility to render a billing statement to its end users for these charges, but Supra Telecom's obligation to pay BellSouth for the charges billed shall be independent of whether Supra Telecom is able or not to collect from the Supra Telecom's end users.

1.4.2.4 BellSouth shall not become involved in any disputes between Supra Telecom and the entities for which BellSouth performs billing and collection. BellSouth will not issue adjustments for charges billed on behalf of an entity to Supra Telecom. It shall be the responsibility of the Supra Telecom and the other entity to negotiate and arrange for any appropriate adjustments.

2. FEES FOR SERVICE AND TAXES

2.1 Supra Telecom will not be charged a fee for storage services provided by BellSouth to Supra Telecom, as described in Section I of this Exhibit.

3. MISCELLANEOUS

3.1 It is understood and agreed to by the parties that BellSouth may provide similar services to other companies.

3.2 All terms, conditions and operations under this Agreement shall be performed in accordance with, and subject to, all applicable local, state

or federal legal and regulatory tariffs, rulings, and other requirements of the federal courts, the U. S. Department of Justice and state and federal regulatory agencies. Nothing in this Agreement shall be construed to cause either party to violate any such legal or regulatory requirement and either party's obligation to perform shall be subject to all such requirements.

3.3 This Exhibit constitutes the entire agreement between Supra Telecom and BellSouth which supersedes all prior agreements or contracts, oral or written representations, statements, negotiations, understandings, proposals and undertakings with respect to the subject matter hereof.

4. RESALE

4.1 This Section sets forth the terms and conditions for Supra Telecom's provision of billing number information to BellSouth for inclusion in BellSouth's LIDB. BellSouth will store in its LIDB the billing number information provided by Supra Telecom, and BellSouth will provide responses to on-line, call-by-call queries to this information for purposes specified in Section 1.3 of this Exhibit A.

4.2 Responsibilities of Parties

4.2.1 BellSouth will include billing number information associated with resold exchange lines or SPNP arrangements in its LIDB. The Supra Telecom will request any toll billing exceptions via the Local Service Request ("LSR") form used to order resold exchange lines, or the SPNP service request form used to order SPNP arrangements.

4.2.2 Under normal operating conditions, BellSouth shall include the billing number information in its LIDB upon completion of the service order establishing either the resold local exchange service or the SPNP arrangement, provided that BellSouth shall not be held responsible for any delay or failure in performance to the extent such delay or failure is caused by circumstances or conditions beyond BellSouth's reasonable control. BellSouth will store in its LIDB an unlimited volume of the

working telephone numbers associated with either the resold local exchange lines or the SPNP arrangements. For resold local exchange lines or for SPNP arrangements, BellSouth will issue line-based calling cards only in the name of Supra Telecom. BellSouth will not issue line-based calling cards in the name of Supra Telecom's individual end users. In the event

that Supra Telecom wants to include calling card numbers assigned by Supra Telecom in the BellSouth LIDB, a separate agreement is required.

4.2.3 BellSouth will provide responses to on-line, call-by-call queries to the stored information for the specific purposes listed in the next paragraph.

4.2.4 BellSouth is authorized to use the billing number information to perform the following functions for authorized users on an on-line basis:

4.2.4.1 Validate a 14 digit Calling Card number where the first 10 digits are a line number or special billing number assigned by BellSouth, and where the last four digits (PIN) are a security code assigned by BellSouth.

4.2.4.2 Determine whether the Supra Telecom has identified the billing number as one which should not be billed for collect or third number calls, or both.

RAO HOSTING

1 RAO Hosting, Calling Card and Third Number Settlement System ("CATS") and Non-Intercompany Settlement System ("NICS") services provided to Supra Telecom by BellSouth will be in accordance with the methods and practices regularly adopted and applied by BellSouth to its own operations during the term of this Agreement, including such revisions as may be made from time to time by BellSouth. BellSouth shall provide Supra Telecom with notice of such revisions sixty (60) days prior to implementation.

2 Supra Telecom shall furnish all relevant information required by BellSouth for the provision of RAO Hosting, CATS and NICS.

3 Applicable compensation amounts will be billed by BellSouth to Supra Telecom on a monthly basis in arrears. Amounts due from one Party to the other (excluding adjustments) are payable within thirty (30) days of receipt of the billing statement.

4 Supra Telecom must have its own unique RAO code. Requests for establishment of RAO status where BellSouth is the selected Centralized Message Distribution System ("CMDS") interfacing host, require written notification from Supra Telecom to the BellSouth RAO Hosting coordinator at least eight (8) weeks prior to the proposed effective date. The proposed effective date will be mutually agreed upon between the Parties with consideration given to time necessary for the completion of required Telcordia (formerly BellCore) functions. BellSouth will request the assignment of an RAO code from its connecting contractor, currently Telcordia (formerly BellCore), on behalf of Supra Telecom and will coordinate all associated conversion activities.

5 BellSouth will receive messages from Supra Telecom that are to be processed by BellSouth, another LEC or CLEC in the BellSouth region or a LEC outside the BellSouth region.

6 BellSouth will perform invoice sequence checking, standard EMI format editing, and balancing of message data with the EMI trailer record counts on all data received from Supra Telecom.

7 All data received from Supra Telecom that is to be processed or billed by another LEC or CLEC within the BellSouth region will be distributed to

Exhibit B, Page 2 of 5

that LEC or CLEC in accordance with the agreement(s) which may be in effect between BellSouth and the involved LEC or CLEC.

8 All data received from Supra Telecom that is to be placed on the CMDS network for distribution outside the BellSouth region will be handled in accordance with the agreement(s) which may be in effect between BellSouth and its connecting contractor [currently Telcordia (formerly BellCore)].

9 BellSouth will receive messages from the CMDS network that are destined to be processed by Supra Telecom and will forward them to Supra Telecom on a daily basis.

10 Transmission of message data between BellSouth and Supra Telecom will be via CONNECT: Direct.

11 All messages and related data exchanged between BellSouth and Supra Telecom will be formatted in accordance with accepted industry standards for EMI formatted records and packed between appropriate EMI header and trailer records, also in accordance with accepted industry standards.

12 Supra Telecom will ensure that the recorded message detail necessary to recreate files provided to BellSouth will be maintained for back-up purposes for a period of three (3) calendar months beyond the related message dates.

13 Should it become necessary for Supra Telecom to send data to BellSouth more than sixty (60) days past the message date(s), Supra Telecom will notify BellSouth in advance of the transmission of the data. If there will be impacts outside the BellSouth region, BellSouth will work with its connecting contractor and Supra Telecom to notify all affected Parties.

14 In the event that data to be exchanged between the two Parties should become lost or destroyed, both Parties will work together to determine the source of the problem. Once the cause of the problem has been jointly determined and the responsible Party (BellSouth or Supra Telecom) identified and agreed to, the company responsible for

creating the data (BellSouth or Supra Telecom) will make every effort to have the affected data restored and retransmitted. If the data cannot be retrieved, the responsible Party will be liable to the other Party for any resulting lost revenue. Lost revenue may be a combination of revenues that could

not be billed to the end users and associated access revenues. Both Parties will work together to estimate the revenue amount based upon historical data through a method mutually agreed upon. The resulting estimated revenue loss will be paid by the responsible Party to the other Party within three (3) calendar months of the date of problem resolution, or as mutually agreed upon by the Parties.

15 Should an error be detected by the EMI format edits performed by BellSouth on data received from Supra Telecom, the entire pack containing the affected data will not be processed by BellSouth. BellSouth will notify Supra Telecom of the error condition. Supra Telecom will correct the error(s) and will resend the entire pack to BellSouth for processing. In the event that an out-of-sequence condition occurs on subsequent packs, Supra Telecom will resend these packs to BellSouth after the pack containing the error has been successfully reprocessed by BellSouth.

16 In association with message distribution service, BellSouth will provide Supra Telecom with associated intercompany settlements reports (CATS and NICS) as appropriate.

17 In no case shall either Party be liable to the other for any direct or consequential damages incurred as a result of the obligations set out in this agreement.

18 RAO Compensation

18.1 Rates for message distribution service provided by BellSouth for Supra Telecom are as set forth in Exhibit F to this Attachment 6, incorporated herein by this reference.

18.2 Rates for data transmission associated with message distribution service are as set forth in Exhibit F to this Attachment 6, incorporated herein by this reference.

18.3 Data circuits (private line or dial-up) will be required between BellSouth and Supra Telecom for the purpose of data transmission. Where a

dedicated line is required, Supra Telecom will be responsible for ordering the circuit, overseeing its installation and coordinating the installation with BellSouth. Supra Telecom will also be responsible for any charges associated with this line. Equipment required on the BellSouth end to attach the line to the mainframe computer and to transmit successfully ongoing will be negotiated on a case by case basis. Where a dial-up facility is

Exhibit B, Page 4 of 5

required, dial circuits will be installed in the BellSouth data center by BellSouth and the associated charges assessed to Supra Telecom. Additionally, all message toll charges associated with the use of the dial circuit by Supra Telecom will be the responsibility of Supra Telecom. Associated equipment on the BellSouth end, including a modem, will be negotiated on a case by case basis between the Parties.

18.4 All equipment, including modems and software, that is required on Supra Telecom's end for the purpose of data transmission will be the responsibility of Supra Telecom.

19 Intercompany Settlements Messages

19.1 This Section addresses the settlement of revenues associated with traffic originated from or billed by Supra Telecom as a facilities based provider of local exchange telecommunications services outside the BellSouth region. Only traffic that originates in one Bell operating territory and bills in another Bell operating territory is included. Traffic that originates and bills within the same Bell operating territory will be settled on a local basis between Supra Telecom and the involved company(ies), unless that company is participating in NICS.

19.2 Both traffic that originates outside the BellSouth region by Supra Telecom and is billed within the BellSouth region, and traffic that originates within the BellSouth region and is billed outside the BellSouth region by Supra Telecom, is covered by this Agreement (CATS). Also covered is traffic that either is originated by or billed by Supra Telecom, involves a company other than Supra Telecom, qualifies for inclusion in the CATS settlement, and is not originated or billed within the BellSouth region (NICS).

19.3 Once Supra Telecom is operating within the BellSouth territory, revenues associated with calls originated and billed within the

BellSouth region will be settled via Telcordia's (formerly BellCore), its successor or assign, NICS system.

19.4 BellSouth will receive the monthly NICS reports from Telcordia (formerly BellCore), its successor or assign, on behalf of Supra Telecom. BellSouth will distribute copies of these reports to Supra Telecom on a monthly basis.

19.5 BellSouth will receive the monthly CATS reports from Telcordia (formerly BellCore), its successor or assign, on behalf of Supra Telecom.

Exhibit B, Page 5 of 5

BellSouth will distribute copies of these reports to Supra Telecom on a monthly basis.

19.6 BellSouth will collect the revenue earned by Supra Telecom from the Bell operating company in whose territory the messages are billed (CATS), less a per message billing and collection fee of five cents ($0.05), on behalf of Supra Telecom. BellSouth will remit the revenue billed by Supra Telecom to the Bell operating company in whose territory the messages originated, less a per message billing and collection fee of five cents ($0.05), on behalf of Supra Telecom. These two amounts will be netted together by BellSouth and the resulting charge or credit issued to Supra Telecom via a monthly Carrier Access Billing System ("CABS") miscellaneous bill.

19.7 BellSouth will collect the revenue earned by Supra Telecom within the BellSouth territory from another CLEC also within the BellSouth territory (NICS) where the messages are billed, less a per message billing and collection fee of five cents ($0.05), on behalf of Supra Telecom. BellSouth will remit the revenue billed by Supra Telecom within the BellSouth region to the CLEC also within the BellSouth region, where the messages originated, less a per message billing and collection fee of five cents ($0.05). These two amounts will be netted together by BellSouth and the resulting charge or credit issued to Supra Telecom via a monthly CABS miscellaneous bill.

19.8 BellSouth and Supra Telecom agree that monthly netted amounts of less than fifty dollars ($50.00) will not be settled.

OPTIONAL DAILY USAGE FILE

1 Upon written request from Supra Telecom, BellSouth will provide the Optional Daily Usage File ("ODUF") service to Supra Telecom pursuant to the terms and conditions set forth in this section.

2 Supra Telecom shall furnish all relevant information required by BellSouth for the provision of the Optional Daily Usage File.

3 The Optional Daily Usage Feed will contain billable messages that were carried over the BellSouth Network and processed in the BellSouth Billing System, but billed to an Supra Telecom end user.

Charges for delivery of the Optional Daily Usage File will appear on the Supra Telecoms' monthly bills. The charges are as set forth in Exhibit A to this Attachment 6, incorporated herein by this reference.

4 The Optional Daily Usage Feed will contain both rated and unrated messages. All messages will be in the standard Alliance for Telecommunications Industry Solutions ("ATIS") EMI record format.

5 Messages that error in the billing system of the Supra Telecom will be the responsibility of the Supra Telecom. If, however, the Supra Telecom should encounter significant volumes of errored messages that prevent processing by the Supra Telecom within its systems, BellSouth will work with the Supra Telecom to determine the source of the errors and the appropriate resolution.

6 The following specifications shall apply to the Optional Daily Usage Feed.

6.1 Usage To Be Transmitted

6.1.1 The following messages recorded by BellSouth will be transmitted to the Supra Telecom:

- message recording for per use/per activation type services (examples: Three Way Calling, Verify, Interrupt, Call Return, ETC.)
- measured billable Local
- Directory Assistance messages
- intraLATA Toll

- WATS & 800 Service

-N11
-Information Service Provider Messages
-Operator Services Messages
-Operator Services Message Attempted Calls (UNE only)
-Credit/Cancel Records
-Usage for Voice Mail Message Service

6.1.2 Rated Incollects (originated in BellSouth and from other companies) can also be on Optional Daily Usage File. Rated Incollects will be intermingled with BellSouth recorded rated and unrated usage. Rated Incollects will not be packed separately.

6.1.3 BellSouth will perform duplicate record checks on records processed to Optional Daily Usage File. Any duplicate messages detected will be deleted and not sent to Supra Telecom.

6.1.4 In the event that Supra Telecom detects a duplicate on Optional Daily Usage File they receive from BellSouth, Supra Telecom will drop the duplicate message (Supra Telecom will not return the duplicate to BellSouth).

6.2 Physical File Characteristics

6.2.1 The Optional Daily Usage File will be distributed to Supra Telecom via an agreed medium with CONNECT:Direct being the preferred transport method. The Daily Usage Feed will be a variable block format (2476) with an LRECL of 2472. The data on the Daily Usage Feed will be in a non-compacted EMI format (175 byte format plus modules). It will be created on a daily basis (Monday through Friday except holidays). Details such as dataset name and delivery schedule will be addressed during negotiations of the distribution medium. There will be a maximum of one dataset per workday per OCN.

6.2.2 Data circuits (private line or dial-up) may be required between BellSouth and Supra Telecom for the purpose of data transmission. Where a dedicated line is required, Supra Telecom will be responsible for ordering the circuit, overseeing its installation and coordinating the installation with BellSouth. Supra Telecom will also be responsible for any charges associated with this line. Equipment required on the BellSouth end to attach the line to the mainframe computer and to

transmit successfully ongoing will be negotiated on a case by case basis. Where a dial-up facility is required, dial circuits will be installed in the BellSouth data center by

Exhibit C, Page 3 of 4

BellSouth and the associated charges assessed to Supra Telecom. Additionally, all message toll charges associated with the use of the dial circuit by Supra Telecom will be the responsibility of Supra Telecom. Associated equipment on the BellSouth end, including a modem, will be negotiated on a case by case basis between the parties. All equipment, including modems and software, that is required on Supra Telecom end for the purpose of data transmission will be the responsibility of Supra Telecom.

6.3 Packing Specifications

6.3.1 A pack will contain a minimum of one message record or a maximum of 99,999 message records plus a pack header record and a pack trailer record. One transmission can contain a maximum of 99 packs and a minimum of one pack.

6.3.2 The OCN, From RAO, and Invoice Number will control the invoice sequencing. The From RAO will be used to identify to Supra Telecom which BellSouth RAO that is sending the message. BellSouth and Supra Telecom will use the invoice sequencing to control data exchange. BellSouth will be notified of sequence failures identified by Supra Telecom and resend the data as appropriate.

THE DATA WILL BE PACKED USING ATIS EMI RECORDS.

6.4 Pack Rejection

6.4.1 Supra Telecom will notify BellSouth within one business day of rejected packs (via the mutually agreed medium). Packs could be rejected because of pack sequencing discrepancies or a critical edit failure on the Pack Header or Pack Trailer records (i.e., out-of-balance condition on grand totals, invalid data populated). Standard ATIS EMI Error Codes will be used. Supra Telecom will not be required to return the actual rejected data to BellSouth. Rejected packs will be corrected and retransmitted to Supra Telecom by BellSouth.

6.5 Control Data

Supra Telecom will send one confirmation record per pack that is received from BellSouth. This confirmation record will indicate Supra Telecom received the pack and the acceptance or rejection of the pack. Pack Status Code(s) will be populated using standard ATIS EMI error codes for

packs that were rejected by Supra Telecom for reasons stated in the above section.

6.6 Testing

6.6.1 Upon request from Supra Telecom, BellSouth shall send test files to Supra Telecom for the Optional Daily Usage File. The parties agree to review and discuss the file's content and/or format. For testing of usage results, BellSouth shall request that Supra Telecom set up a production (LIVE) file. The live test may consist of Supra Telecom's employees making test calls for the types of services Supra Telecom requests on the Optional Daily Usage File. These test calls are logged by Supra Telecom, and the logs are provided to BellSouth. These logs will be used to verify the files. Testing will be completed within 30 calendar days from the date on which the initial test file was sent.

ENHANCED OPTIONAL DAILY USAGE FILE

1 Upon written request from Supra Telecom, BellSouth will provide the Enhanced Optional Daily Usage File ("EODUF") service to Supra Telecom pursuant to the terms and conditions set forth in this section. EODUF will only be sent to existing ODUF subscribers who request the EODUF option.

2 Supra Telecom shall furnish all relevant information required by BellSouth for the provision of the Enhanced Optional Daily Usage File.

3 The EODUF will provide usage data for local calls originating from resold Flat Rate Business and Residential Lines.

4 Charges for delivery of the Enhanced Optional Daily Usage File will appear on the Supra Telecoms' monthly bills. The charges are as set forth in Exhibit A to this Attachment 6, incorporated herein by this reference.

5 All messages will be in the standard Alliance for Telecommunications Industry Solutions ("ATIS") EMI record format.

6 Messages that error in the billing system of the Supra Telecom will be the responsibility of the Supra Telecom. If, however, the Supra Telecom should encounter significant volumes of errored messages that prevent processing by the Supra Telecom within its systems, BellSouth will work with the Supra Telecom to determine the source of the errors and the appropriate resolution.

7 The following specifications shall apply to the Optional Daily Usage Feed.

7.1 Usage To Be Transmitted

7.1.1 The following messages recorded by BellSouth will be transmitted to Supra Telecom:

Customer usage data for flat rated local call originating from CLEC end user lines (1FB or 1FR). The EODUF record for flat rate messages will include:

Date of Call
From Number

To Number
Connect Time
Conversation Time

Method of Recording
From RAO
Rate Class
Message Type
Billing Indicators
Bill to Number

7.1.2 BellSouth will perform duplicate record checks on EODUF records processed to Optional Daily Usage File. Any duplicate messages detected will be deleted and not sent to Supra Telecom.

7.1.3 In the event that Supra Telecom detects a duplicate on Enhanced Optional Daily Usage File they receive from BellSouth, Supra Telecom will drop the duplicate message (Supra Telecom will not return the duplicate to BellSouth).

7.2 Physical File Characteristics

7.2.1 The Enhanced Optional Daily Usage Feed will be distributed to Supra Telecom over their existing ODUF feed. The EODUF messages will be intermingled among Supra Telecom's ODUF messages. The EODUF will be a variable block format (2476) with an LRECL of 2472. The data on the EODUF will be in a non-compacted EMI format (175 byte format plus modules). It will be created on a daily basis (Monday through Friday except holidays).

7.2.2 Data circuits (private line or dial-up) may be required between BellSouth and Supra Telecom for the purpose of data transmission. Where a dedicated line is required, Supra Telecom will be responsible for ordering the circuit, overseeing its installation and coordinating the installation with BellSouth. Supra Telecom will also be responsible for any charges associated with this line. Equipment required on the BellSouth end to attach the line to the mainframe computer and to transmit successfully ongoing will be negotiated on a case by case basis. Where a dial-up facility is required, dial circuits will be installed in the BellSouth data center by BellSouth and the associated charges assessed to Supra Telecom. Additionally, all message toll charges associated with the use of the dial circuit by Supra Telecom will be the responsibility of Supra Telecom. Associated equipment on the BellSouth end, including a modem, will be negotiated on a case by

case basis between the parties. All equipment, including modems and software, that is required on Supra Telecom end for the purpose of data transmission will be the responsibility of Supra Telecom.

7.3 Packing Specifications

7.3.1 A pack will contain a minimum of one message record or a maximum of 99,999 message records plus a pack header record and a pack trailer record. One transmission can contain a maximum of 99 packs and a minimum of one pack.

7.3.2 The Operating Company Number ("OCN"), From Revenue Accounting Office ("RAO"), and Invoice Number will control the invoice sequencing. The From RAO will be used to identify to Supra Telecom which BellSouth RAO that is sending the message. BellSouth and Supra Telecom will use the invoice sequencing to control data exchange. BellSouth will be notified of sequence failures identified by Supra Telecom and resend the data as appropriate.

7.3.3 THE DATA WILL BE PACKED USING ATIS EMI RECORDS.

BELLSOUTH/SUPRA TELECOM RATES
ODUF/EDOUF/ADUF/CMDS

DESCRIPTION	USOC	FL
ODUF/EODUF/ADUF/CMDS		
ODUF: Recording, per message	N/A	$0.008
ODUF: Message Processing, per message	N/A	$0.004
EODUF: Message Processing, per message	N/A	$0.004
ADUF: Message Processing, per message	N/A	$0.004
CMDS: Message Processing, per message	N/A	$0.004
ODUF: Message Processing, per magnetic tape provisioned	N/A	$54.95
EODUF: Message Processing, per magnetic tape provisioned	N/A	$47.30
ODUF: Data Transmission (CONNECT:DIRECT), per message	N/A	$0.001
EODUF: Data Transmission (CONNECT:DIRECT), per message	N/A	$0.0000364
ADUF: Data Transmission (CONNECT:DIRECT), per message	N/A	$0.001
CMDS: Data Transmission (CONNECT:DIRECT), per message	N/A	$0.001

NOTES:

If no rate is identified in the contract, the rate for the specific service or function will be as set forth in applicable BellSouth tariff or as negotiated by the parties upon request by either party.

INTERFACE REQUIREMENTS FOR ORDERING AND PROVISIONING, MAINTENANCE AND REPAIR AND PRE-ORDERING

TABLE OF CONTENTS

1 **General Conditions** 3

2 **Pre-ordering** 5

3 **Ordering and Provisioning** 6

4 **Maintenance** 9

5 **Operational Readiness Test ("ORT")** ..... 11~~10~~

INTERFACE REQUIREMENTS FOR ORDERING AND PROVISIONING, MAINTENANCE AND REPAIR AND PRE-ORDERING

1 General Conditions

1.1 BellSouth shall accept orders for Service and Elements in accordance with the Federal Communications Commission Rules or State Commission Rules. This Attachment 7 sets forth the terms and conditions under which BellSouth will provide Supra Telecom access to the following BellSouth Operations Support Systems ("OSS") functions. Access to these functions shall be via various interfaces and personnel and may be used by Supra Telecom for pre-ordering, ordering, provisioning, maintenance and repair, and billing functions, which are supported by BellSouth databases, information, and personnel. Ordering of Services and Elements shall be electronic in all instances except where electronic ordering capability has not been developed for the particular Services and Elements being ordered or in the instance where the electronic interface is temporarily unavailable. If the electronic interface is not available, orders may be sent to BellSouth via facsimile, United States Mail, or in a manner otherwise agreed to by the Parties. BellSouth's current interfaces to OSS functions are:

Interfaces	Function
EDI, TAG, LENS, LENS99	**Ordering**
TAG, LENS, LENS99	**Pre-order**
EDI, TAG, LENS, LENS99, CSOTS	**Provisioning**
EBI (ECTA), TAFI	**Maintenance and Repair**
CABS, CRIS, BIBS	**Billing and Recording**

1.2 BellSouth will provide Supra Telecom with access to the interfaces twenty-four (24) hours a day, seven (7) days a week, except for scheduled maintenance. BellSouth shall provide Supra Telecom a

minimum of fifteen (15) calendar days advance notice of any scheduled maintenance.

1.3 Downtime shall be scheduled when systems experience minimum usage.

1.4 Single Point of Contact ("SPOC")

1.4.1 BellSouth will provide a SPOC to provide technical support for the interfaces described herein. Supra Telecom will also provide a SPOC for technical issues related to said interfaces.

1.4.2 BellSouth will provide a SPOC for all ordering and provisioning contacts and order flow involved in the purchase and provisioning of BellSouth's Services and Elements.

1.4.3 BellSouth and Supra Telecom will provide one another with toll-free contact numbers for their respective SPOCs.

1.5 The Parties agree that the current Change Control Process attached hereto as Exhibit A, and incorporated herein by this reference, will be used to manage changes to existing interfaces, introduction of new interfaces and retirements of interfaces. Supra Telecom and BellSouth agree to comply with the provisions of the current Change Control Process.

1.6 Throughout the term of this Agreement, the quality of the technology, equipment, facilities, processes, and techniques (including, without limitation, such new architecture, equipment, facilities, and interfaces as BellSouth may deploy) that BellSouth provides to Supra Telecom under this Agreement must be at least equal in quality to that provided by BellSouth to itself and its affiliates. The service standards, measurements and performance incentives applicable to the interfaces are set forth in Attachment 9 of this Agreement, incorporated herein by this reference.

1.7 Supra Telecom and BellSouth will utilize standard industry formats and data elements developed by the Alliance for Telecommunications Industry Solutions ("ATIS"), including without limitation to the Ordering and Billing Forum ("OBF") ("ATIS and its associated committees"). Where standard industry formats and data elements are not developed by ATIS and its associated committees, Supra Telecom and BellSouth will use the Change Control Process to address the specific format or data element requirements. When an ATIS and its associated

committees standard or format is subsequently adopted, the Parties will utilize the Change Control Process to determine whether to continue to utilize the non-ATIS and its associated committees standard or format and when to implement the ATIS and its associated committees standard or format.

1.8 Subscription Functions. In cases where BellSouth performs subscription functions for an inter-exchange carrier [i.e., PIC, and LPIC changes via Customer Account Record Exchange ("CARE")], BellSouth will provide the affected inter-exchange carriers with the Operating Company Number ("OCN") of the local provider for the purpose of obtaining end user billing account and other end user information required under subscription requirements.

2 Pre-ordering

2.1 BellSouth shall provide access to the following pre-ordering functions: service address validation, telephone number selection, service and feature availability, due date information, dispatch and available installation appointments, PIC options for intraLATA and interLATA toll, loop qualification information and end user record information.

2.2 BellSouth shall provide Supra Telecom with non-discriminatory access to the loop qualification information that is available to BellSouth, so that Supra Telecom can make an independent judgment about whether the loop is capable of supporting the advanced services equipment that Supra Telecom intends to install. Loop qualification information is defined as information, such as the composition of the loop material, including but not limited to: fiber optics or copper; the existence, location and type of any electronic or other equipment on the loop, including but not limited to, digital loop carrier or other remote concentration devices, feeder/distribution interfaces, bridge taps, load coils, pair-gain devices, disturbers in the same or adjacent binder groups; the loop length, including the length and location of each type of transmission media; the wire gauge(s) of the loop; and the electrical parameters of the loop, which may determine the suitability of the loop for various technologies.

2.3 BellSouth and Supra Telecom will provide access to customer service record information where the Parties have the appropriate written authorization from the customer. Neither Party shall be required to present prior written authorization from each customer to the other Party before being allowed access to customer record information. Each Party will issue the other a blanket letter of authorization that

states that Supra Telecom and BellSouth will obtain the customer's permission before accessing customer records. Each Party shall retain the letters of authorization from its end users. If BellSouth desires to request a Customer Service Record ("CSR") for an Supra Telecom customer, BellSouth is required to complete a Customer Service Information Query ("SCIQ") form and send via facsimile to Supra Telecom. Supra Telecom will accept CSR requests from BellSouth as acting agent for the customer (BellSouth should retain Letter of Authorization ("LOA") on file). Supra Telecom will provide the CSR and return via facsimile both the CSIQ form and the CSR within 48 hours or 2 business days, if the first of the two days falls on a Friday or a holiday. The provisioning of local service for the territory served by BellSouth is handled by Supra Telecom's work center located in Atlanta, Georgia. The work center's facsimile telephone number is (404) 329-2169. Voice inquires on the CSIQ should be directed to (404) 982-6611.

3 Ordering and Provisioning

3.1 BellSouth will recognize Supra Telecom as the customer of record for services ordered by Supra Telecom pursuant to this Agreement and will send all notices, invoices and pertinent information directly to Supra Telecom. Except as otherwise specifically provided in this Agreement, Supra Telecom shall be the single and sole point of contact for all Supra Telecom end users.

3.2 Each Party shall refer all questions regarding the other Party's services or products directly to the other Party at a telephone number specified by the other Party. Each Party shall ensure that all their representatives who receive inquiries regarding the other Party's services or products: (i) provide such numbers to callers who inquire about the other Party's services or products; and (ii) do not in any way disparage or discriminate against the other Party, or its products or services.

3.3 BellSouth will provide access to ordering and provisioning functions via the interfaces as set forth in Section 1.1 of this Attachment 7. To order the services, Supra Telecom will format the service request pursuant to the requirements of the interface utilized.

3.4 Supra Telecom may submit, and BellSouth will accept, orders for Services and Elements on a single service request per end user account.

3.5 Currently all telecommunications services for resale; unbundled network elements, and interconnection are requested via BellSouth's Local Service Request ("LSR"). The exception to this is an industry wide exception dealing with ordering interconnection local trunking which is ordered on an Access Service Request ("ASR"). Ordering procedures are as outlined in the ordering guide posted on the web. Changes or additions to ordering procedures resulting from new Services and Elements shall be provided to Supra Telecom through its account team and BellSouth's Internet website and shall comply with Exhibit A, attached hereto and incorporated herein by this reference.

3.6 BellSouth shall provide all ordering and provisioning services to Supra Telecom during the same business hours of operation that BellSouth provisions service to its affiliates or end users. Ordering and provisioning support required by Supra Telecom outside of these hours will be considered outside of normal business hours and will be subject to overtime billing.

3.7 If Supra Telecom requests that BellSouth perform provisioning services at times or on days other than as required in the preceding sentence, BellSouth shall provide Supra Telecom a quote for such services consistent with the provisions set forth in Exhibit A of Attachment 2 of this Agreement, incorporated herein by this reference.

3.8 To ensure the most efficient use of facilities and resources, orders placed in the hold or pending status by Supra Telecom will be held for a maximum of thirty (30) days from the date the order is placed on hold. After such time, if Supra Telecom wishes to reinstate an order, Supra Telecom may be required to submit a new service order.

3.9 Upon request from Supra Telecom, and consistent with the provisions set forth in Attachment 2 of this Agreement, incorporated herein by this reference, BellSouth will provide an intercept referral message for any order for Services and Elements which include any new Supra Telecom telephone number.

3.10 BellSouth will provide Supra Telecom with a Firm Order Confirmation ("FOC") in compliance with the provisions of Attachment 9 of this Agreement, incorporated herein by this reference. The FOC will provide Supra Telecom with the BellSouth order number, the negotiated service due date, telephone/circuit numbers (as applicable to the service). Additional specific data may also be provided, if appropriate.

3.11 Supra Telecom will specify on each order its Desired Due Date ("DDD") for completion of that particular order. BellSouth shall not complete the order prior to DDD unless early turn-up is needed for testing purposes. BellSouth will notify Supra Telecom if the DDD cannot be met. BellSouth will make best effort to meet the DDD for service requests.

3.12 If, during the provisioning visit to the Supra Telecom end user premises, the Supra Telecom end user requests additional work, BellSouth will contact Supra Telecom for authorization to perform said work; will provide an estimate of time and materials required; will quote time and charges at the completion of the visit; and will notify Supra Telecom if a subsequent visit is required.

3.13 Expedite and Escalation Procedures:

3.14 Requests for due dates that are earlier than the BellSouth offered date will be treated as an expedite request. In order to request an expedited due date, Supra Telecom must request the expedite through the appropriate BellSouth service center on the appropriate service request form. The BellSouth service center will coordinate the request internally with the appropriate groups within BellSouth in order to establish the date BellSouth will target as the offered date. The BellSouth service center will advise Supra Telecom of this date on the FOC. If the date on the FOC does not meet Supra Telecom's expedited request, Supra Telecom may escalate to the appropriate center. BellSouth may bill expedite charges for expedited due date and will advise Supra Telecom of any charges at the time the offered date is provided. BellSouth will provide an escalation list to Supra Telecom containing the names and numbers of the appropriate personnel escalations are to be referred.

3.15 When Supra Telecom orders Services and Elements pursuant to this Agreement, BellSouth shall provide notification electronically of any instances when (1) BellSouth's Committed Due Dates are in jeopardy of not being met by BellSouth on any service, (2) an order contains Rejections/Errors in any of the data element(s) fields, or (3) completion notice. When Supra Telecom orders Services and Elements pursuant to this Agreement manually, BellSouth shall provide notification in the same manner in which it was sent of any instances when an order contains Rejections/Errors in any of the data element(s) fields. Any other notification or request for manual orders shall be available through BellSouth's Internet web site. Such notice will be made as soon as the jeopardy or reject is identified.

3.16 BellSouth and Supra Telecom will perform co-operative testing (including trouble shooting to isolate problems) to test any Services and Elements purchased by Supra Telecom pursuant to this Agreement in order to identify any performance problems identified at turn-up of the Services and Elements.

3.17 Where BellSouth provides installation on behalf of Supra Telecom, BellSouth shall advise the Supra Telecom end user to notify Supra Telecom immediately if the Supra Telecom end user requests a service change at the time of installation.

3.18 Upon Supra Telecom's request through a Suspend/Restore Order, BellSouth shall suspend or restore the functionality of any Services and Elements provided pursuant to this Agreement.

3.19 Unless otherwise ordered by Supra Telecom, when Supra Telecom orders Services and Elements pursuant to this Agreement, all pre-assigned trunk or telephone numbers currently associated with those Services and Elements shall be retained without loss of switched based features where such features exist. Supra Telecom shall be responsible for ensuring that associated functions (e.g., entries to databases and 911/E911 capability) are properly ordered or retained on the service request.

4 Maintenance

4.1 BellSouth shall perform maintenance functions for all Services and Elements provided pursuant to this Agreement in accordance with the terms and conditions of this Attachment 7 and as set forth in the Operational Understanding between BellSouth and Supra Telecom Maintenance Centers ("Operational Understanding"), incorporated herein by this reference.

4.2 BellSouth shall provide Supra Telecom with access to matineannce and repair fucntion sthrouigh its TAFI and EBI/ECTA interfaces.

4.2.1 The functionality provided through the EBI/ECTA interface shall be as set forth in the adopted applicable national standards.

4.2.2 When providing repair service for an Supra Telecom end user, the TAFI interface shall allow Supra Telecom personnel to: (i) enter a trouble ticket into the BellSouth maintenance system; (ii) track the current status on all Supra Telecom end user repair tickets; (iii) receive "estimated time to repair" on a real time basis; (iv) if the trouble is

feature related, display a list of the products and services that are programmed on a resold line or loop/port combination; (v) cause TAFI to perform an electronic test at the time of ticket entry and to display the test results on the screen; (vi) display pending orders associated with a resold line or loop/port combination; (vii) view the LMOS trouble report; (viii) query the switch serving the resold line or loop/port combination and view the current central office translations associated with said line or combination; (ix) view both abbreviated and extended trouble histories for a resold line or loop/port combination record in LMOS; (x) view the end user's resold line or loop/port combination record in LMOS; (xi) if the trouble is feature related, add or delete features to a resold line or loop/port combination; and (xii) route a repair ticket to the appropriate BellSouth work group for trouble handling (e.g., field dispatch, central office dispatch, further analysis of trouble by BellSouth personnel).

4.3 BellSouth service technicians shall provide to Supra Telecom end users repair service that is at least equal in quality to that provided to BellSouth end users and trouble calls from Supra Telecom shall receive response time priority that is at least equal to that of BellSouth end users and shall be handled on a "first come first served" basis regardless of whether the end user is an Supra Telecom end user or a BellSouth end user.

4.4 For services provided through resale, BellSouth agrees to provide Supra Telecom with scheduled maintenance for residence and small business end users consistent with the Operational Understanding. BellSouth agrees to provide Supra Telecom written notification of Central Office conversions and such conversions consistent with the Operational Understanding.

4.5 Maintenance charges for premises visits by BellSouth technicians shall be billed by Supra Telecom to its end user, and not by BellSouth. The BellSouth technician shall, (i) contact Supra Telecom for authorization, (ii) provide an estimate of time and materials required, (iii) quote time and charges at the completion of the repair visit to the end user, (iv) notify Supra Telecom if a subsequent visit is required. BellSouth will bill maintenance charges for premises visits to Supra Telecom.

4.6 When maintenance charges are incurred during premises visits, the BellSouth technician shall present the end user with a form that is consistent with Section 19 of the General Terms and Conditions of this Agreement, incorporated herein by this reference, detailing the time spent, the materials used, and an indication that the trouble has either

been resolved, or that additional work will be necessary, in which case, BellSouth technician shall make an additional appointment with the end user. The BellSouth technician shall obtain the end user's signature upon said form, and then use the signed form to input maintenance charges into BellSouth's billing database.

5 Operational Readiness Test ("ORT")

5.1 Prior to initial live access to interface functionality and subject to mutual agreement, the Parties shall conduct Operational Readiness Testing ("ORT") which will allow for the testing of the systems, interfaces, and processes for the OSS functions.

5.2 For each OSS training class offered by BellSouth, Supra Telecom shall receive at no cost, one seat per class per year. Job aids for updates to such OSS training information are available to Supra Telecom on the BST Website

5.3 Prior to live system usage, Supra Telecom will complete user education classes for BellSouth-provided interfaces that affect the BellSouth network.

BELLSOUTH

CHANGE CONTROL PROCESS

INTERIM

CCP.DOC

VERSION 1.5

APRIL 26, 2000

The following document consolidates input from CLECs and BellSouth. It is a working document for discussion purposes only.

Issued: 04/26/00

Jointly Developed by the Change Control Sub-team comprised

of BellSouth and CLEC Representatives.

BellSouth Telecommunications reserves the right to revise this document for any reason, with concurrence of the CLEC/BellSouth Review Board, including but not limited to, conformity with standards promulgated by various government or regulatory agencies, utilization of advance in the state of the technical arts, or the reflection of changes in the design of any equipment, techniques, or procedures described or referred to herein. LIABILITY TO ANYONE ARISING OUT OF USE OR RELIANCE UPON ANY INFORMATION SET FORTH HEREIN IS EXPRESSLY DISCLAIMED, AND NO REPRESENTATIONS OR WARRANTIES, EXPRESSED OR IMPLIED, ARE MADE WITH RESPECT TO THE ACCURACY OR UTILITY OF ANY INFORMATION SET FORTH HEREIN.

This document is not to be construed as a suggestion to any manufacturer to modify or change any of its products, nor does this document represent any commitment by BellSouth Telecommunications to purchase any product whether or not it provides the described characteristics.

This document is not to be construed as a contract. It does not create an obligation on the part of BellSouth Telecommunications or the Competitive Local Exchange Carriers to perform any modification, change or enhancement of any product or service.

Nothing contained herein shall be construed as conferring by implication, estoppel or otherwise, any license or right under any patent, whether or not the use of any information herein necessarily employs an invention of any existing or later issued patent.

VERSION CHANGE HISTORY

This section list changes made to the baseline Electronic Interface Change Control Process document since the last issue. New versions of this document may be obtained via BellSouth's Web site.

Version	Issue Date	Section Revised	Reason for Revision
1.0	04/14/98		Initial issue.
1.2	2/28/00	All	The EICCP Documentation has been modified to incorporate: - Multiple Change Request Types (CLEC Initiated, BST Initiated, Industry Standards, Regulatory and System Outages) - Incorporated manual process - Defined cycle times for process intervals and notifications - Defect Notification process - Escalation Process - Modified Change Control forms to support process changes - Changed EICCP to CCP
1.3	3/14/00	All	The CCP Documentation has been modified to incorporate: - Type 6 Change Request, CLEC Impacting Defect - Increased number of participants at Change Review meetings - Changed cycle time for Types 2-5 Step 3 from 20 days to 15 days - Defined Step 4 of the Defect Notification process to include communicating the workaround to the CLEC community - Web Site address for Change Control Process - Notification regarding the Retirement and

			Introduction of new interfaces - New status codes for Defect Change Requests - New status codes: 'S' for Scheduled Change Requests and 'I' for Implemented Change Requests (types 2-5 Change Requests) - Removed reference to EDI Helpdesk. Electronic Communications Support (ECS) will be the first point of contact for Type 1 System Outages. - Word changes to provide clarification throughout the document.
1.4	4/12/00	All	The CCP Documentation has been modified to incorporate: - Type 1 and 6 Notifications will be communicated to CLECs via e-mail and web posting - Step 3 Cycle Time (Types 2-5) changed from 15 business days to 20 business days - Verbiage to Step 10 (Types 2-5) regarding BellSouth presenting baseline requirements - Introduction and Retirement of New Interfaces Section - Dispute Resolution Process - Testing Environment Section - Word changes to provide clarification throughout the document - Monthly Status Meeting Agenda Template - RF1870 Change Request Form changes
1.5	4/26/00	Section 1 Section 8 Section 11	- Updated CCP web site address - Updated Escalation Contacts for Types 2-6 - Added definitions for Account Team and Electronic Communications Support (ECS)

Jointly Developed by the Change Control Sub-team comprised
of BellSouth and CLEC Representatives.

1.0 INTRODUCTION

This document establishes the process by which BellSouth Telecommunications (BST) and Competitive Local Exchange Carriers (CLECs) will manage requested changes to the BellSouth Local Interfaces, the introduction of new interfaces, and provide for the identification and resolution of issues related to Change Requests. This process will cover Change Requests that affect external users of BellSouth's Electronic Interface Applications, associated manual process improvements, performance or ability to provide service including defect notification. This process shall be referred to as the Change Control Process.

All parties should recognize that deviations from this process might be warranted where unanticipated circumstances arise such that strict application of these guidelines may not result in their intended purpose. Furthermore, deviations may be required due to specific regulatory and business requirements. Parties shall provide appropriate web notification to the CLEC/BST Change Control Team participants prior to deviating from the processes established within this document. All parties will comply with all legal and regulatory requirements.

The Change Control Process will cover change requests for the following interfaces and associated manual processes that have the potential to impact the interfaces connected to BellSouth:

- Local Exchange Navigation System (LENS)
- Electronic Data Interchange (EDI)
- Telecommunications Access Gateway (TAG)
- Trouble Administration Facilitation Interface (TAFI)
- Electronic Communications Trouble Administration (EC-TA) Local
- CLEC Service Order Tracking System (CSOTS)

The types of changes that will be handled by this process are as follows:

- Software
- Hardware
- Industry Standards
- Product and Services (i.e., new services available via the in-scope interfaces)
- New or Revised Edits
- Process (i.e., electronic interfaces and manual processes relative to order, pre-order, maintenance)
- Regulatory
- Documentation (i.e., business rules for electronic and manual processes relative to order, pre-order, maintenance)

- Defects

The scope of the Change Control Process **does not** include the following:

- BonaFide Requests (BFR)
- Production Support (i.e. adding new users to existing interfaces, existing users requesting first time use of existing BST functionality)
- Contractual Agreements
- Collocation
- Testing Support (i.e. negotiating/coordinating test agreements and dates)
- Issue Resolution/Questions (i.e. questions associated with interface functionality, interpreting documentation)

Change Requests of this nature will be handled through existing BellSouth processes.

OBJECTIVES OF THE CHANGE CONTROL PROCESS:

- Support the Industry guidelines that impact Electronic Interfaces and manual processes relative to order, pre-order, maintenance, and billing as appropriate
- Ensure continuity of business processes and systems operations
- Establish process for communicating and managing changes
- Allow for mutual impact assessment and resource planning to manage and schedule changes
- Capability to prioritize requested changes

The minimum requirements for participation in the Change Control Process electronically are:

- Word 6.0 or greater
- Excel 5.0 or greater
- Internet E-mail address
- Web access

The web site address for the Change Control Process is as follows:

http://www.interconnection.bellsouth.com/
Select "Local Exchange Carriers"
Select "Change Control Process"

000436

2.0 CHANGE CONTROL ORGANIZATION

The Change Control organizational structure supports the Change Control Process. Each position within the organization has defined roles and responsibilities as outlined in the Change Control Process Flow - Section 4 of this document. Identified positions, along with associated roles and responsibilities are as follows:

Change Review Participants. Representatives from Competitive Local Exchange Carriers (CLECs) and BellSouth. This team meets to review, prioritize, and make recommendations for Candidate Change Requests. The Candidate Change Requests are used as input to the Internal Change Management Processes (refer to process step 7).

CLECs and BellSouth will define points of contact in each of their companies for communicating and coordinating change notification. All change requests are made in writing. Notifications will be posted to the BellSouth web site.

Each company may bring the number of participants necessary to represent their position. If the number of participants grows to be unmanageable, CLECs and BellSouth will revisit the issue of representation to apply some restrictions.

BellSouth Change Control Manager (BCCM). The BCCM is responsible for managing the Change Control Process and is the main point of contact for Types 2 – 6 changes. This individual maintains the integrity of the Change Requests, prepares for and facilitates the Change Review Meetings, presents the Pending Change Requests to the BST Internal Change Management Process, and ensures that all Notifications are communicated to the appropriate parties.

CLEC Change Control Manager (CCCM). The CCCM is the CLEC point of contact for Change Requests. This individual is responsible for presenting and prioritizing Change Requests at the Change Review Meetings.

Release Management Project Team. A team of CLEC and BellSouth Project Managers who manage the implementation of scheduled changes and releases.

3.0 CHANGE CONTROL DECISION PROCESS

Change requests will be classified by Type. There are six Types:

Type 1 – System Outage

A Type 1 change is a BellSouth System Outage. A System Outage is where the system is totally unusable or there is degradation in an existing feature or functionality within the interface. If the System Outage is not resolved within 20 minutes, a notification will be provided via e-mail and posted to the web within one hour. Either BellSouth or a CLEC may initiate the change request. Type 1 system outages will be processed on an expedited basis. All Type 1 System Outages will be reported to the Electronic Communications Support (ECS) Help Desk. A Type 1 System Outage is a condition where the CLEC Pre-Orders/Orders/Queries/Maintenance Requests cannot be submitted or will not be accepted by BellSouth.

Type 2 – Regulatory Change.

Any non-Type 1 change to the interfaces between the CLEC's and BellSouth's operational support systems mandated by regulatory or legal entities, such as the Federal Communications Commission (FCC), a state commission/authority, or state and federal courts are Type 2 changes. Regulatory changes are not voluntary but are requisite to comply with newly passed legislation, regulatory requirements, or court rulings. While timely compliance is required, the systems requirements and methodology to achieve compliance are usually discretionary and within the scope of change management. Either BellSouth or a CLEC may initiate the change request.

Type 3 – Industry Standard Change.

Any non-Type 1 change to the interfaces between the CLEC's and BellSouth's operational support systems required to bring these interfaces in line with newly agreed upon telecommunications industry guidelines are Type 3 changes. Either BellSouth or a CLEC may initiate the change request.

Type 4 – BellSouth Initiated Change.

Any non-Type 1 change affecting the interfaces between the CLEC's and BellSouth's operational support systems which BellSouth desires to implement on its own accord. These changes might involve system enhancements, manual and/or business processes. These type changes might also include issues for Pre-Orders, Orders, Queries, and Maintenance Requests that can be submitted and accepted, but may require clarification. This classification does not include changes imposed upon these interfaces by third parties such as regulatory bodies (which are Type 2 Changes) or standards organizations (which are Type 3 Changes).

Type 5 – CLEC Initiated Change.

Any non-Type 1 change affecting interfaces between the CLEC's and BellSouth's operational support systems which the CLEC requests BellSouth to implement is a Type 5 change. These changes might involve system enhancements, manual and/or business processes. These type changes might also include issues for Pre-Orders, Orders, Queries, and Maintenance Requests that can be submitted and accepted, but may require clarification. This classification does not include changes imposed upon these interfaces by third parties such as regulatory bodies (which are Type 2 Changes) or standards organizations (which are Type 3 Changes).

Type 6- CLEC Impacting Defects.

Any non-Type 1 change where a CLEC Impacting defect is found in a production environment when the system is not operating as specified in the baselined business requirements. The CLEC and/or BellSouth may initiate these types of changes affecting interfaces between the CLEC's and BellSouth's operational support systems. These type changes might also include issues for Pre-Orders, Orders, Queries, and Maintenance Requests that can be submitted and accepted, but may require workarounds or clarification.

Figure 3-1 shows the top-level process that will be used to evaluate Change Requests. The BellSouth Account Team(s) will handle BFR requests and production support issues. Enhancements and defects will be handled through the Change Control Process.

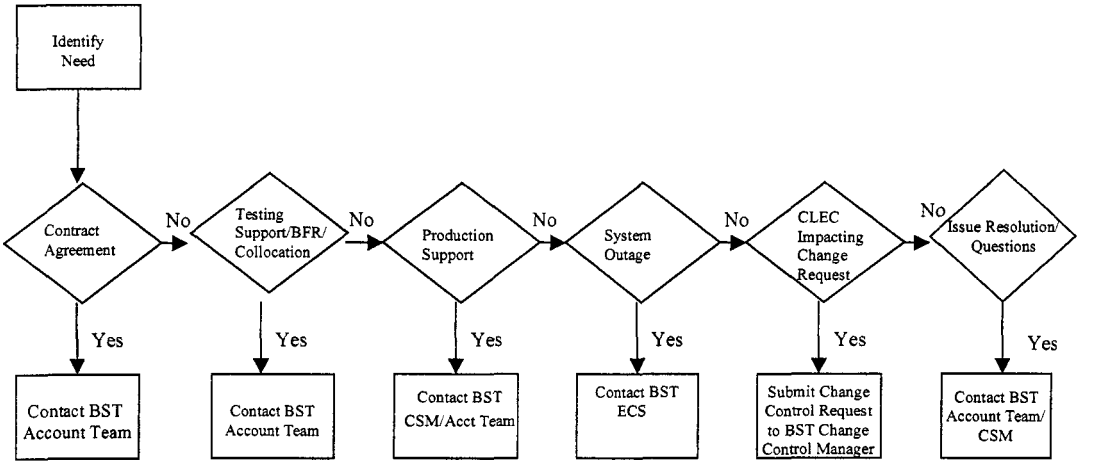

Figure 3-1. Change Control Decision Process

Jointly Developed by the Change Control Sub-team comprised of BellSouth and CLEC Representatives.

000440

4.0 CHANGE CONTROL PROCESS FLOW

The following two sub-sections describe the process flows for typical Type 1 through Type 5 changes. Each sub-section will describe the cycle times for an activity and document accountability, sub-process activities, inputs and outputs for each step in the process. Section 5 of this document describes the process flow for Type 6 changes. Based on the categorization of the request, the following diagram will help guide a CLEC or BellSouth representative to the appropriate process flow based on Change Control Request Type:

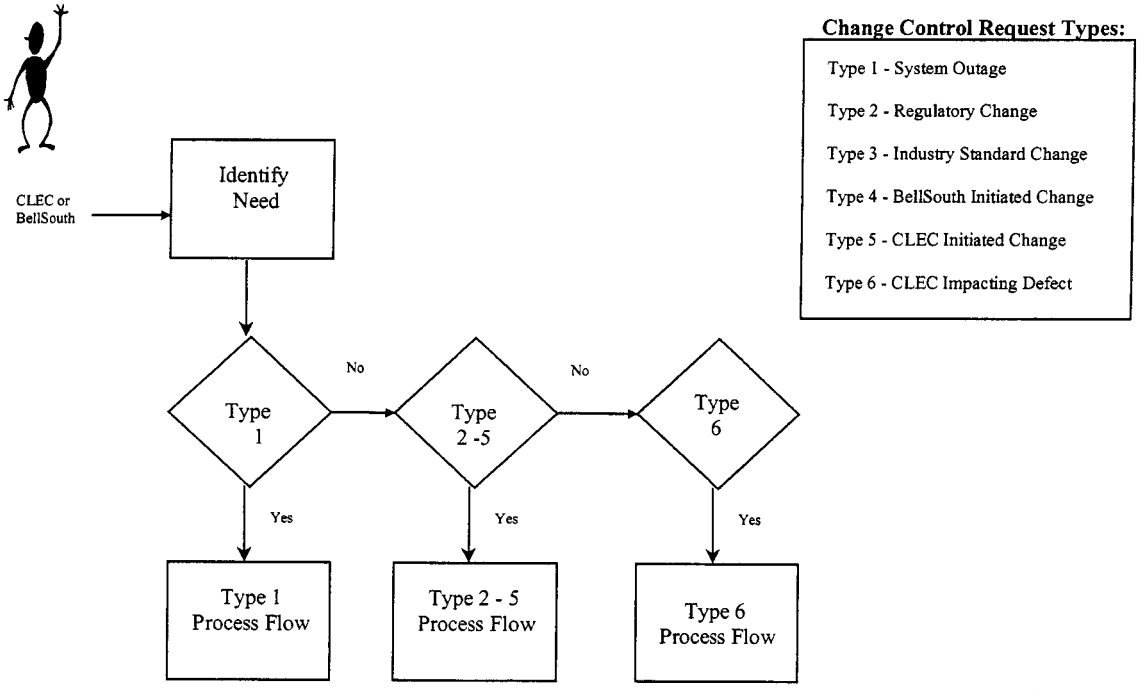

Figure 4-1. Change Control Process Flow

000441

Part 1 - Type 1 Process Flow

Figure 4-2 provides the process flow for resolving a typical Type 1 - System Outage. The Electronic Communications Support (ECS) Group will work with the CLEC community to resolve and communicate information about system outages in a timely manner - actual cycle times are documented in table 4-1 and the sub-process steps. The ECS Helpdesk number is 888-462-8030.

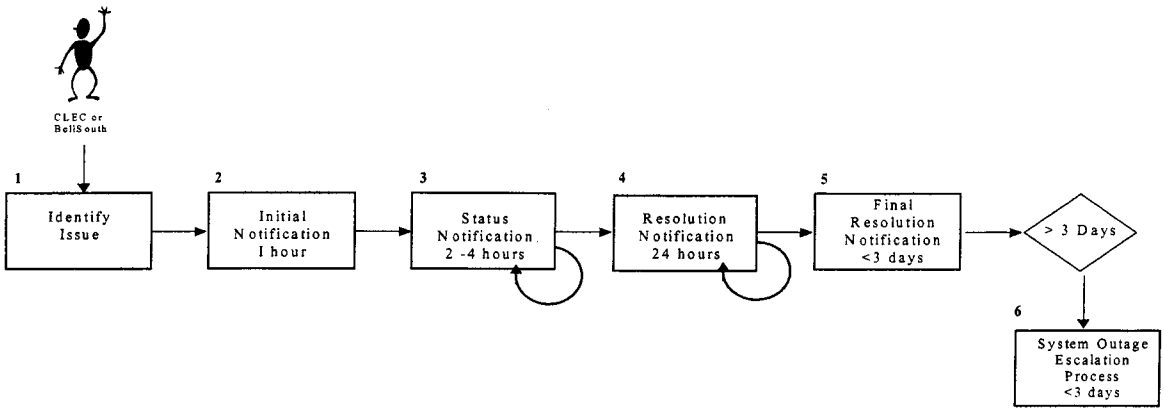

Figure: 4-2. Type 1 Process Flow

Table 4-1 describes the cycle times for each process step that is outlined in the Type 1 - System Outage Process Flow. These cycle times represent typical timeframes for completing the documented step and producing the desired output for the step. In sub-process step 2 "Initial Notification" timeframe for completing this step does not begin until after the outage has been reported. The sub-process steps 3 "Status Notification" and 4 "Resolution Notification" are iterative steps. Iterative steps will be performed one or more times until the exit criteria for that process are met. If resolution is not reached within 20 minutes, BellSouth will provide the initial notification to the CLEC community via e-mail and post outage information on the web.

Table 4-1. Type 1 Cycle Times

Process Description	1 Identify Issue	2 Initial Notification	3 Status Notification	4 Resolution Notification	5 Final Resolution Notification	6 Escalation
Cycle Time	N/A	1 hour E-mail & BST Website will be posted if outage exceeds 20 minutes	2 - 4 hours (Iterative)	24 hours (Iterative)	< 3 days	> 3 days System Outage Escalation Process

Note: The Escalation Process may be used at any time within Steps 3-6 if cycle times are not met and/or responses are not acceptable.

000443

The table below details the steps, accountable individuals, tasks, the inputs/outputs and the cycle time of each sub-process in the Type 1 Process Flow. This process will be used to capture and communicate system outage information, status notification(s), resolution and notification(s), and final resolution to the CLEC community. Steps shown in the table are sequential unless otherwise indicated.

Table 4-2. Type 1 Detail Process Flow

Step	Accountability	Sub-processes Activities	Inputs and Outputs	Cycle Time
1	CCCM ECS	**IDENTIFY ISSUE:** 1. Internally determine if outage exists with BellSouth Electronic Interface. (The CLEC should perform internal outage resolution activities to determine if the potential problem involves the BellSouth Electronic Interface). 2. Call the BST Electronic Communications Support (ECS) help desk at 888-462-8030. 3. ECS and individual CLEC will determine if the problem is likely to have no impact on the industry. If there is no impact, the outage will be worked on a bilateral basis. 4. ECS will record and track the outage.	**INPUTS:** • Issue Characteristics • Call to ECS Helpdesk **OUTPUTS:** • Recorded Outage	N/A
2	ECS	**INITIAL NOTIFICATION:** 1. ECS will post to the Web an Initial Industry Notification that a BellSouth Electronic Interface outage has been identified. An e-mail to the CLECs participating in Change Control will also be distributed. 2. The CLEC initiating the Type 1 System Outage will need to be available for communications on an as needed basis. 3. ECS will continue to work towards the resolution of the problem 4. If outage is resolved, this notice is the first and final notification. The	**INPUTS:** • Recorded Outage **OUTPUTS:** • Industry Notification posted on Web • E-mail to CLECs participating in Change Control	1 Hour If System Outage is not resolved within 20 minutes, a notification will be sent to CLECs via e-mail and posted to the web.

Step	Accountability	Sub-processes Activities	Inputs and Outputs	Cycle Time
		process for the item has ended. Outage Information will be reported in the monthly status meeting by the BCCM.		
3	ECS	**STATUS NOTIFICATION:** **(ITERATIVE)** 1. If the outage is not resolved, ECS will continue to work towards the resolution on the problem. 2. ECS may communicate with the industry / affected parties. The following information may be discussed: • Clarification of outage • Current status of resolution • Agreement of resolution 3. If a resolution has not been identified continue giving status notifications to the industry and continue repeating Step 3 "Status Notification" via the web. 4. Proceed to Step 4 "Resolution Notification" when a resolution has been identified.	**INPUTS:** • Industry Notification posted on Web **OUTPUTS:** • Status Notification posted on Web • Resolution information	2-4 hour intervals
4	ECS CCCM	**RESOLUTION NOTIFICATION:** **(ITERATIVE)** 1. The resolution notification is posted to the Web. 2. If the item is determined to be a defect, the CLEC that initiated the call will submit a "Change Request Form" checking the defect box. 3. If the resolution is not the final resolution the process will loop back to Step 3 "Status Notification". BellSouth will continue to work towards the final resolution. 4. When the final resolution has been created, proceed to Step 5 "Final Resolution Notification".	**INPUTS:** • Status Notification posted on Web • Resolution information **OUTPUTS:** • Resolution Information posted on Web • Final Resolution Information	24 hours after reporting outage
5		**FINAL RESOLUTION NOTIFICATION:**	**INPUTS:** • Final Resolution	< 3 days

Step	Accountability	Sub-processes Activities	Inputs and Outputs	Cycle Time
	ECS	1. The final resolution notification is posted on the Web.	Information **OUTPUTS:** • Final Resolution Notification	
6	CCCM ECS	**ESCALATION** 1. Escalation is appropriate anytime the interval exceeds the recommended guidelines for notification. 2. Refer to the Type 1 - Escalation Process documented in Section 7.	**INPUTS:** • Information or concern relating to a Type 1 - Systems Outage **OUTPUTS:** • Documented Escalation • Escalation Response	➢ 3 days (The Escalation Process may be used at any time within Steps 3-6 if cycle times are not met and/or responses are not acceptable.)

Part 2 – Types 2-5 Process Flow

Figure 4-3 provides the process flow for reviewing, scheduling and implementing a typical Type 2-5 Change Request. The process diagram applies to Change Requests submitted via the Change Control Process. Change Requests should be submitted to the BellSouth Change Control Manager using the standard Change Request form template. This template can be acquired on the Change Control web page.

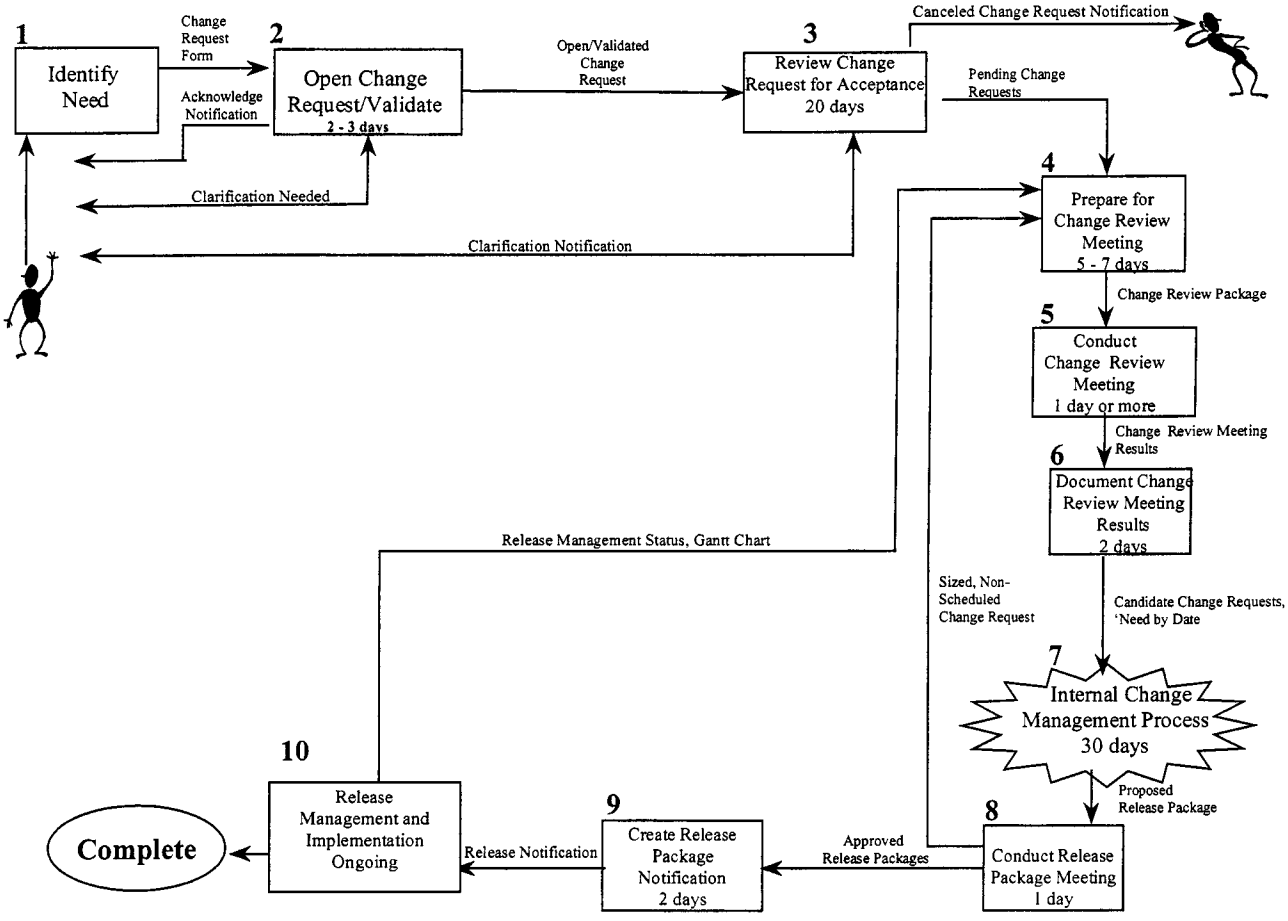

Figure 4-3. Change Control Process Flow

Jointly Developed by the Change Control Sub-team comprised of BellSouth and CLEC Representatives.

000447

Based on the process flow outlined above:

- Software Release Notifications will be provided 30 days or more in advance of the implementation date.
- Documentation changes will be provided 30 days or more in advance of implementation date.
- CLEC notification of documentation updates (non-system changes) will be posted 5 (five) business days in advance of documentation posting date.

The table below details the steps, accountable individuals, tasks, inputs/outputs and cycle times of each sub-process in the Change Control process. This process will be used to develop Candidate Change Requests that will be used as input to the Internal Change Management Process. Steps shown in the table are sequential unless otherwise indicated.

Table 4-3. Types 2-5 Detail Process Flow

Step	Accountability	Sub-processes Activities	Inputs and Outputs	Cycle Time
1	CCCM BCCM	**IDENTIFY NEED** 1. Internally determine need for change request. These change requests might involve system enhancements, manual and/or business process changes. 2. Originator and CCCM or BCCM should complete the standardized Change Request Form according to Checklist. 3. Attach related requirements and specification documents. (See Attachment A-1A, Item 22) 4. Appropriate CCCM/BCCM submits Change Request Form and related information via e-mail to BellSouth.	**INPUTS:** • Change Request Form (Attachment A-1) • Change Request Form Checklist (Attachment A-1A) **OUTPUTS:** • Completed Change Request Form with related documentation	N/A
2	BCCM	**OPEN CHANGE REQUEST/VALIDATE CHANGE REQUEST FOR COMPLETENESS** 1. Log Request in Change Request Log. 2. Send Acknowledgement Notification (Attachment A-3) via e-mail to originator.	**INPUTS:** • Completed Change Request Form with related documentation • Change Request Form Checklist • Change Request	2-3 Bus Days Clarification times would be in addition to cycle time.

000448

Step	Accountability	Sub-processes Activities	Inputs and Outputs	Cycle Time
		3. Establish request status ('N' for New Request) 4. Review change request for mandatory fields using the Change Request Form Checklist. 5. Verify Change Request specifications and related information exists. 6. Send Clarification Notification via email to the originator (Attachment A-4) if needed. 7. Update Change Request Status to "PC" for Pending Clarification if clarification is needed. **CLEC or BellSouth Originator** If clarification is needed, make necessary corrections per Clarification Notification and submit Change Request Clarification Response (Attachment A-2).	Clarification Response **OUTPUTS:** • New Change Request • Acknowledgment Notification • Validated Change Request • Clarification Notification • Industry Notification posted on web	
3	BCCM	**REVIEW CHANGE REQUEST FOR ACCEPTANCE** 1. Review Change Request and related information for content. 2. Determine status of request: • If change already exists or training issue forward Cancellation Notification (Attachment A-3) to CCCM or BCCM and update status to 'C' for Request Canceled or 'CT' for Training. If Training issue, refer to CSM or Account Team. • If Change Request Clarification Notification not received, validate with CLEC that change request is no longer needed. • If request is accepted, update Change Request status to "P" for Pending in Change Request Log. • If a request is not accepted, update change request status to 'CB' for "Cancelled BellSouth" and provide notification and explanation to originator.	**INPUTS:** • New Change Request • Validated Change Request • Clarification Notification (if required) **OUTPUTS:** • Pending Change Request • Clarification Notification (if required) • Cancellation Notification (if required) • CR status updated on web	20 Bus Days

000449

Step	Accountability	Sub-processes Activities	Inputs and Outputs	Cycle Time
8	BCCM CCCM	**CONDUCT RELEASE PACKAGE MEETING** 1. Prepare agenda. 2. Make meeting preparations. 3. Evaluate proposed release schedule. 4. Non-scheduled Change Requests returned to Step 4 as Input for the "Prepare for Change Review Meeting" process. 5. Based on BST/CLEC consensus create Approved Release Package. 6. Identify Release Management Project Manager, if possible. 7. Establish date for initial Release Management Project Meeting. 8. All Change Requests that are in the approved scheduled release will be changed to "S" status for "Scheduled".	**INPUTS:** • BellSouth's Proposed Release Package • BellSouth's Release Schedule • Change Request Log **OUTPUTS:** • Approved Release Package • Updated Change Request Log • Meeting Minutes • Scheduled Change Requests • Non-Scheduled Change Requests (Return to Step 4) • Date for initial Release Management Project Meeting	1 Bus Day
9	BCCM	**CREATE RELEASE PACKAGE NOTIFICATION** 1. Develop and distribute Release Notification Package via web.	**INPUTS:** • Approved Release Package **OUTPUTS:** • Release Package Notification	2 Bus Days after Release Package Mtg.
10	BCCM (Project Managers from each participating company)	**RELEASE MANAGEMENT AND IMPLEMENTATION** 1. Provide Project Management and Implementation of Release (See Release Management @ Appendix B). 2. Lead Project Manager communicates Release Management Project status to BCCM for inclusion in Monthly Status Meetings. 3. BellSouth Business Requirements will be presented to CLECs. If needed, changes will be incorporated and requirements re-baselined. 4. Once a Change Request is implemented in a release, the status will be changed to "I" for Change Implemented.	**INPUTS:** • Approved Release Package Notification **OUTPUTS:** • Project Release Status • Implementation Date • Project Plan, Work Breakdown Schedule, Risk Assessment, Executive Summary, etc • Implemented Change Request	Ongoing

Step	Accountability	Sub-processes Activities	Inputs and Outputs	Cycle Time

000451

5.0 DEFECT NOTIFICATION PROCESS

A CLEC identified defect will enter this process through the Change Management Team. If the defect is validated internally, it will route through this process, and notification provided to the CLEC community via e-mail and web posting. CLEC Notification of documentation updates (non-system changes) will be posted 5 (five) business days in advance of documentation posting date.

Figure 5-1 provides the process flow for the validation and resolution of a Type 6 Change – CLEC Impacting Defect.

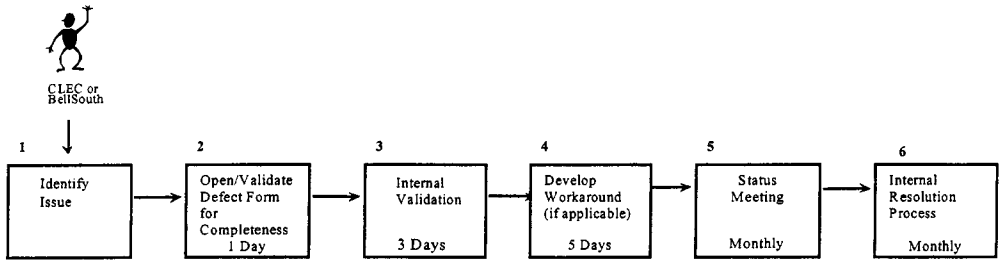

Figure 5-1. Type 6 Process Flow

000452

The table below details the steps, accountable individuals, tasks, inputs/outputs and cycle times of each sub-process in the Type 6 Process Flow. This process will be used to validate defects, provide defect and status notification(s), workarounds and final resolution to the CLEC community. Steps shown in the table are sequential unless otherwise indicated.

Table 5-1. Type 6 Detail Process Flow

Step	Accountability	Sub-processes Activities	Inputs and Outputs	Cycle Time
1	CCCM BCCM	**IDENTIFY NEED** 1. Identify Defect. 2. Originator and CCCM or BCCM should complete the standardized Change Request Form indicating that it is a defect. 3. Attach related requirements and specification documents. These attachments should include the following: • PON • OCN • Specific Scenario • Interface(s) affected • Error message (if applicable) • Release or API version (if applicable) 4. Appropriate CCCM/BCCM submits Change Request Form and related information via e-mail to BellSouth Change Management Team.	**INPUTS:** • Change Request with defect indicated **OUTPUTS:** • Completed Change Request Form (with related documentation if necessary)	N/A
2	BCCM	**OPEN & VALIDATE DEFECT FORM FOR COMPLETENESS** 1. Log Defect in Change Request Log. 2. Send Acknowledgment Notification via email to initiating CLEC. 3. Establish Defect status ('N' for New Defect). 4. BCCM reviews change request for mandatory fields using the Change Request Form Checklist. 5. Verify Defect specifications and related information exists. 6. Send Clarification Notification via email to the originator if needed. 7. Update Defect Status to' PC' for Pending Clarification if clarification is	**INPUTS:** • Completed Change Request Form (with related documentation if necessary) **OUTPUTS:** • New Defect • Acknowledgment Notification • Clarification Notification (if required)	1 Bus Day

000453

Step	Accountability	Sub-processes Activities	Inputs and Outputs	Cycle Time
		needed. If clarification is needed, CLEC or BST originator makes necessary corrections per Clarification Notification and submits via email Defect Clarification Response.		
3	BCCM	**INTERNAL VALIDATION** 1. Validate that it is a defect. 2. Perform internal defect analysis. 3. Determine status of request: • If change already exists or training issue forward Cancellation Notification to CCCM or BCCM and update status to 'C' for Request Cancelled or 'CT' for Training. If Training issue, refer to CSM or Account Team. • Send Clarification Notification via email if needed and update status to 'PC' for Pending Clarification. • If Change Request Clarification Notification not received, validate with CLEC that change request is no longer needed. • If request is valid, update Change Request status to 'V' for Validated Defect. • If the process is operating as specified in the baselined requirement, the "Defect Request" will be cancelled and supporting information provided via email to the originator. Update Change Request status to 'DC' for Defect Cancelled and send Cancellation Notification via email to originator. • If issue is re-classified as a feature change, update Change Request status to "P" for Pending and provide supporting information via email to the originator. **NOTE**: See Section 9.0 Terms and Definitions – Defect Status for valid status codes and descriptions. Defect notification will be provided to	**INPUTS:** • New Defect **OUTPUTS:** • Validated Defect • Defect notification to CLEC community via e-mail and web posting • Clarification Notification (if required) • Cancellation Notification (if required)	3 Bus Days

Step	Accountability	Sub-processes Activities	Inputs and Outputs	Cycle Time
		CLEC community via e-mail and web posting.		
4	BCCM	**DEVELOP WORKAROUND (IF APPLICABLE)** 1. Defect workaround identified. 2. Change Request status changed to "W" for workaround identified. 3. Workaround is communicated via e-mail to originating CLEC. 4. If appropriate, communication to the CLEC community regarding workaround will be discussed via conference call. Defect workaround notification will be provided to CLEC community via e-mail and web posting. If it is determined that additional time is needed to develop workaround due to the complexity of the defect, notification will be provided to CLEC community via e-mail and web posting.	**INPUTS:** • Validated Defect • Clarification Notification (if required) **OUTPUTS:** • Workaround (if applicable) • Clarification Notification (if required) • Cancellation Notification (if required) • E-mail and web posting of workaround	5 Bus Days
5	BCCM	**MONTHLY STATUS MEETING** 1. Provide status of Defect. 2. Solicit CLEC/ BST input. 3. Update Defect information as needed.	**INPUTS:** • Defects Received • Change Request Log • Defect Analysis • Workaround (if applicable) **OUTPUTS:** • Updated status • Updated Change Request Log • Meeting minutes	Monthly
6	BCCM	**INTERNAL RESOLUTION PROCESS** 1. Schedule and evaluate Defects based on capacity and business impacts. 2. Update status of scheduled Defects to 'S' for Scheduled. 3. Provide status and Defect Release Schedule at next Monthly Status Meeting.	**INPUTS:** • CLEC/ BST input **OUTPUTS:** • Defect Release Schedule • Scheduled Defects • Implemented Defects	Monthly

Step	Accountability	Sub-processes Activities	Inputs and Outputs	Cycle Time
		4. Update status of Implemented Defects to 'I' for Implemented.		

6.0 CHANGE REVIEW

Part 1 – Change Review Meeting

The Change Review meeting provides the forum for reviewing and prioritizing Pending Change Requests, generating Candidate Change Requests, submitting Candidate Change Requests for sizing, and reviewing the status of all release projects underway. Status update meetings will be held monthly and are open to all CLEC's. Meetings will be structured according to category (pre-order, order, and maintenance, etc.). Prioritization meetings will be scheduled to coincide with the published release schedules. For non-system impacting changes, there will be a 5 (five)-business day notice for documentation updates. The prioritization meeting dates will be communicated when the release schedule is published.

During the Change Review Meeting each originator of a Change Request will be allowed 5 (five) minutes to present their Change Request. A question and answer session not to exceed 15 minutes will follow this presentation. After all presentations for a particular interface are complete, the prioritization process will begin.

The Change Request Log will be distributed 5 - 7 (five to seven) business days prior to the Change Review meeting. A valid and complete Change Request must be received 33 business days prior to the Change Review Meeting to be placed on the agenda for the next scheduled meeting.

Note: Status Meetings will occur monthly. Prioritization meetings will be scheduled to coincide with the published release schedules and will include the monthly status meeting agenda items.

Part 2 – Change Review Package

The Change Review Package will be distributed to all participants 5 – 7 (five to seven) business days prior to the Change Review meeting. The package will include the following:

- Meeting Notice
- Agenda
- Change Request Log (List of Change Requests to be reviewed)

- Reference to Change Control Process on the BST website (for CLECs not familiar with the process, new CLECs or CLECs that choose to participate after the initial rollout)
- Status Reports from each of the active Release Management Project Teams

Part 3 – Prioritizing Change Requests

Prior to the Change Review Meeting, each participating CLEC should determine priorities for change requests and establish "desired/want" dates. The CLEC should use the Preliminary Priority List form as provided via the web.

Final prioritization will be determined at the Change Review meeting after presentation of the Change Requests for each category.

Prioritization Voting Rules

- Voting on an interface not used by the CLEC is prohibited
- One vote per CLEC, per interface
- No proxy voting
- Each company may bring the number of participants necessary to represent their position. If the number of participants grow to be unmanageable, CLECs and BellSouth will revisit the issue of representation to apply some restrictions.
- Forced Ranking (1 to N, with N being the highest) will be used
- Votes will be tallied to determine order of ranking
- Changes will be ranked by category, by interface
- Manual processes and documentation will be prioritized separately; however they will need to be synchronized with the electronic interface changes
- Sizing and sequencing of prioritized change requests will begin with the top priority items and continue down through the list until the capacity constraints have been reached
- In case of a tie, the affected Changes will be re-ranked and prioritized based on the re-ranking

Example: The top 2 Changes from high to low are E5 and E2, with E1 and E4 tied for 3rd. E1 and E4 would be re-ranked and prioritized according to the re-ranking.

Pre-Order LENS	CLEC 1	CLEC 2	CLEC 3	Total
E1	3	6	1	10
E2	4	2	6	12
E3	6	1	2	9
E4	2	4	4	10
E5	5	5	3	13
E6	1	3	5	9

7.0 INTRODUCTION AND RETIREMENT OF INTERFACES

Introduction of New Interfaces

BellSouth will introduce new interfaces to the CLEC Community as part of the Change Control Process. A description of the proposed interface will be submitted to the BCCM. The BCCM will add an agenda item to discuss the new interface at the monthly status meeting. BellSouth will be given 30 – 45 minutes to present information on the proposed interface. If BellSouth requests additional time for the presentation, a separate meeting will be scheduled to review the proposed interface, so that, the information can be presented in its entirety. The objective will be to identify interest in the new interface and socialize ideas. BellSouth will provide specifications on the interface being developed to the CLEC Community. As new interfaces are deployed, they will be added to the scope of this document as appropriate, based on the use by the CLEC community and requested changes will be managed by this process.

Retirement of Interfaces

The retirement of interfaces will not be part of the Change Control Process. As active interfaces are retired, BellSouth will post a CLEC Notification Letter to the web six (6) months prior to the retirement of the interface. BellSouth will have the discretion to give provide shorter notifications (30-60 days) on interfaces that are not actively used and/or have low volumes.

8.0 ESCALATION PROCESS

Guidelines

- The ability to escalate is left to the discretion of the CLEC based on the severity of the missed or unaccepted response/resolution.
- Escalations can involve issues related to the Change Control process itself.
- For change requests, the expectation is that escalation should occur only after normal Change Control procedures (e.g. communication timelines) have occurred per the Change Control agreement.
- Three levels of escalation will be used.
- For Type 1 issues, the escalation process is agreed to allow BellSouth a one day turnaround for each cycle of escalation.
- For Types 2-5 issues, the escalation process is agreed to allow BellSouth a five day turnaround for each cycle of escalation.
- Each level will go through the same Cycle, which is described below.
- All escalation communications may be optionally distributed by the CLEC to the industry and BellSouth Change Control e-mail unless there is a proprietary issue.

Cycle for Type 1 System Outages

Contact List for Escalation - ECS Group - Type I Changes

If the originator does not receive a call back from the EC Support Group according to the times specified in this document, they may escalate according to the following list:

Escalation Level	Name and Title	Office Number	Pager Number	Email Address
1st Level	Susan Hart Manager - EC Support Group Interconnection Operations	205-733-5393	1-800-946-4646 PIN 1436470	Susan.K.Hart@bridge.bellsouth.com
2nd Level	Bruce Smith Operations Director - EC Support Group Interconnection Operations	205-988-7211	1-800-542-3260	Bruce.Smith@bridge.bellsouth.com
3rd Level	Bill Reid Operations Assistant Vice President Interconnection Operations	205-988-1447	1-800-946-4646 PIN 1179523	Bill.C.Reid@bridge.bellsouth.com

NOTE: If a call is escalated without first attempting to contact the ECS Helpdesk, the caller will be referred back to the ECS Helpdesk.

Escalation Cycle for Types 2-6 Change Requests

- Item must be formally escalated as an e-mail sent to the appropriate escalation level within BellSouth with a copy to the industry and BellSouth Change Control e-mail.
- Subject of e-mail must be CLEC (CLEC Name) ESCALATION-CR#, if applicable, Level of Escalation, unless it is proprietary.
- Content of e-mail must include:
  - Definition and escalation of item.
  - History of item.
  - Reason for escalation.
  - Desired outcome of CLEC.
- Impact to CLEC of not meeting the desired outcome or item remaining on current course of action as previously discussed at the Change Control Meeting for enhancements.
- Contact information for appropriate Level including Name, Title, Phone Number, and E-mail ID.
- For escalation Level 2, forward original e-mail and include any additional information including the reason that the matter could not be resolved at Level 1.
- For escalation Level 3, forward original e-mail and include any additional information including the reason that the matter could not be resolved at Levels 1 and 2.
- BellSouth will reply to escalation request with acknowledgement of receipt within 4 hrs and begin the escalation process through Level of escalation.
- The escalating CLEC should respond to BellSouth within 5 days as to whether escalation will continue or the BellSouth response has been accepted as closure to the item.
- If the BellSouth position suggests a change in the current disposition of the item (i.e., what has already been communicated to the industry), a conference call will be held within 1 business day of the BellSouth decision in order to provide industry notification with the appropriate executives.

- BellSouth will publish the outcome of the conference call to the industry via web.
- If unsatisfied with an outcome, either party can seek appropriate relief.

Contact List for Escalation - Type 2 - 6 Changes

Within 5 business days of receipt (4 from acknowledgement), BellSouth Change Control appropriate executives will reply through BellSouth Change Control with BellSouth's position and explanation for that position. Escalations should be made according to the following list.

Escalation Level	Name and Title	Office Number	Email Address
1st Level	Valerie Cottingham Sales Director Change Control Process	205-321-2168	Valerie.cottingham@bridge.bellsouth.com
2nd Level	Linda Tate Director (for Systems Issues)	404-927-7878	Linda.Tate3@bridge.bellsouth.com
	Joy Lofton Director (for Business Rules/Operations Issues)	404-927-7828	Joy.A.Lofton@bridge.bellsouth.com
3rd Level	Peggy Caldwell Senior Director (for Systems Issues)	404-335-0872	Peggy.S.Caldwell@bridge.bellsouth.com
	Doug McDougal Senior Director (for Business Rules/Operations Issues)	404-927-7505	Doug.Mcdougal@bridge.bellsouth.com

Dispute Resolution Process

In the event that an issue is not resolved through the Escalation Process as described herein, BellSouth and the impacted CLEC(s) agree to follow this Dispute Resolution Process. BellSouth and the CLEC shall assemble a Joint Investigative Team, within one week, comprised of subject matter experts. The party prompting the dispute should initiate the formation of the team. The team should be co-chaired by representatives of BellSouth and the CLEC respectively. The investigative team will conduct a root-cause analysis to determine the source of the problem, if one exists, and then develop a plan for remedying it. The parties to the dispute must escalate the issue within each company to the person who has ultimate authority for State operations in an effort to achieve a resolution.

If the dispute cannot be resolved between the companies after these steps are taken, then either party to the dispute may file a formal complaint with the State PSC through the Director of the Telecommunications section for binding mediation. The Director of the Telecommunications section, or his appointee, shall rule upon the complaint within 30 days of its filing. If either party is then aggrieved, it may file a formal complaint with the State PSC.

000464

9.0 CHANGES TO THIS PROCESS

The current, approved version of this process document will be stored under the component name "Ccp.doc". The BellSouth Change Control Manager BCCM (and alternate) will be the only persons authorized to update the document version.

Requests for changes to the Change Control Process may be submitted to the BellSouth Change Control Manager (BCCM) using the Change Request form located in the Appendix A. Cosmetic changes may be made and published by the BCCM (or alternate) without further review. Other changes will be reviewed at the monthly Change Review status meetings. All changes will be submitted as a change request and reviewed.

10.0 TESTING ENVIRONMENT

BellSouth offers Carrier Testing to CLECs in an open proven test environment for Telecommunications Access Gateway (TAG) and Electronic Data Interchange (EDI) interfaces. The testing opportunities offered are BETA and New Carrier Testing.

BETA testing is offered to those CLECs that express an interest in assisting BellSouth validate a Telecommunications Industry Forum (TCIF) change for the affected interfaces. The opportunity for testing is submitted via the BellSouth Account Team and is negotiated with the Carrier Testing group. BellSouth opens the test environment for BETA testing only after "major releases". CLECs are selected on a "first come, first served basis".

New Carrier Testing is offered to those CLECs who are transitioning from a manual to an electronic environment or from one TCIF issue to another. New Carrier Testing is available to all CLECs and is scheduled with the BellSouth Account Team and Carrier Testing group.

For additional details on the testing environment, regulations and guidelines, you will be able to refer to the BellSouth public internet site by the end of May 2000. The internet web site is as follows:

www.interconnection.bellsouth.com/markets/lec.html

BellSouth is currently investigating and pricing the feasibility of a wholly separate, non-production testing environment for all pre-ordering and ordering interfaces per a CLEC request. This testing environment will mirror the production environment.

000466

11.0 TERMS AND DEFINITIONS

A

Account Team. The Account Teams represent the CLECs and all CLEC interests within BellSouth, that is, the Account Team is the CLECs' advocate within BellSouth. Some of the Account Team functions are listed below:

- Contract Negotiations
- Enhanced Billing Options Negotiations
- Customer Education
- Technical Assistance
- General Problem Resolution
- Tariff Interpretation
- BonaFide Requests (BFR)
- Production Support
- Collocation
- Testing Support
- Project/Order Coordination
- Rate Quotations

Accountability. Individual(s) having responsibility for completing and producing the outputs of each sub-process as defined in the Detailed Process Flow.

Acknowledgement Notification. Notification returned to originator by BCCM indicating receipt of Change Request.

Approved Release Package. Calendar of Candidate Change Requests with consensus target implementation dates as determined at the Release Package Meeting.

B

BellSouth Change Control Manager (BCCM). BellSouth Point of Contact for processing Change Requests and defects.

BFR (Bonafide Request). Process used for providing custom products and/or services. Bonafide Requests are outside the scope of the Change Control Process and should be referred to the appropriate BellSouth Account Team.

Business Day. A business day is considered any Monday-Friday workday that does not fall on an official BellSouth holiday.

Business Rules. The logical business requirements associated with the Interfaces referenced in this document. Business rules determine the when and the how to populate data for an Interface. Examples of data defined by Business Rules are:

- The five primary transactions sets: 850, 855, 860, 865, and 997
- Data Element Abbreviation and Definition
- Activity Types at the appropriate level (account, line, feature) and the associated Usage Type (optional, conditional, required, not applicable, prohibited)
- Conditions/rules associated with each Activity and Usage Type
  - ◊ Dependencies relative to other data elements
  - ◊ Conditions which will be edited within BellSouth's OSSs
- Valid Value Set
- Data Characteristics

C

Cancellation Notification. Notification returned to originator by the BCCM indicating a Change Request has been canceled for one of the following reasons: BST cancellation, duplicate request, training issue, or failure to respond to clarification.

Candidate Request List. List of prioritized Change Requests with associated "Need by Dates" as determined at an Change Review Meeting. These requests will be submitted for sizing and sequencing.

Candidate Change Request. Change Requests that have been prioritized at an Change Review Meeting and are eligible for independent sizing and sequencing by BellSouth and each CLEC.

Change Request. A formal request submitted on a Change Request Form, to add new functions, defects or Enhancements to existing Interfaces (as identified in the scope) in a production environment.

- Type 1 – BellSouth System Outage. A System Outage is where the system is totally unusable or there is degradation in an existing feature or functionality within the interface.
- Type 2 – Regulatory Change. Any non-Type 1 changes to the interfaces between the CLEC's and BellSouth's operational support systems mandated by regulatory or legal entities, such as the Federal Communications Commission (FCC), a state commission/authority or state and federal courts.

- Type 3 – Industry Standard Change. Any non-Type 1 changes to the interfaces between the CLEC's and BellSouth's operational support systems required to bring these interfaces in line with newly agreed upon telecommunications industry guidelines.
- Type 4 – BellSouth Initiated Change. Any non-Type 1 changes affecting the interfaces between the CLEC's and BellSouth's operational support systems which BellSouth desires to implement on its own accord.
- Type 5 – CLEC Initiated Change. Any non-Type 1 changes affecting the interfaces between the CLEC's and BellSouth's operational support systems, which the CLEC requests BellSouth to implement.
- Type 6 – CLEC Impacting Defect. Any non-Type 1 change where a CLEC Impacting Defect is found in a production environment when the system is not operating as specified in baseline business requirements.

Change Request Status. The status of a Change Request as it flows through the Change Control process as described in the Detailed Process Flow.

- **A = Appeal.** Indicates a cancelled Change Request is being appealed by the originator (Step 3).
- **C = Request Cancelled.** Indicates a Change Request has been canceled due to one of the following reasons (Step 3):
  - **CB = Cancellation by BellSouth.** BST may reject the change request based on the following reasons: cost/benefit, resource commitments, industry direction or BellSouth direction.
  - **CC = Clarification.** Requested clarification not received in allotted time (7 days).
  - **CD = Duplicate Request.** A request for this change already exists.
  - **CT = Training.** Requested change already exists, additional training may be required.
- **CRC** = Change Review Complete. Indicates a Change Request has been reviewed at an Change Review Meeting, but did not reach the Candidate Request List (Step 10).
- **D** = Request Purge. Indicates the cancellation of a Change Request that has been pending for 12 months and has failed to reach the Candidate Request List (Step 3).
- **I = Change Implemented.** Indicates a Change Request has been implemented in a release (Step 10).
- **N = New Change Request.** Indicates a Change Request has been received by the BCCM, but has not been validated (Step 2).

- **P = Pending.** Indicates a Change Request has been accepted by the BCCM and scheduled for Change Review (Step 3 moving to Step 4).
- **PC = Pending Clarification.** Indicates a Clarification Notification has been sent to the originator, BCCM awaiting response (Step 2 or 3).
- **PN = Pending N times.** Indicates a Change Request reached the Candidate Request List, was sized but not scheduled for a release and has cycled through the process N number of times. Example: P1 = 2nd time through process, P2 = 3rd time through process, etc (Step 8).
- **RC = Candidate Request.** Indicates a Change Request has completed the Change Review process and been assigned to the Candidate Request List for sizing and sequencing (Step 5).
- **S – Request Scheduled**. Indicates a Change Request has been scheduled for a release (Step 8).

Change Review Meeting. Meeting held by the Change Review participants to review and prioritize pending Change Request, generate Candidate Change Request, and submit Candidate Change Request for sizing and sequencing.

Change Review Package. Package distributed by the BCCM 5 – 7 business days prior to the Change Review Meeting. The package includes the Meeting Notice, Agenda, Approved Release Package, Change Request Log, etc.

Clarification Notification. Notification returned to the originator by the BCCM indicating required information has been omitted from the Change Request and must be provided prior to acceptance of the Change Request. The Change Request will be cancelled if clarification is not received by the date indicated on the Clarification Notification.

CLEC Affecting Change. Any change that requires the CLEC to modify the way they operate or to rewrite system code.

CLEC Change Control Manager (CCCM). CLEC Point of Contact for processing Change Requests.

CSM. Customer Support Manager which supports resale and facility based CLECs.

Cycle Time. The time allotted to complete each step in the Change Control Process prior to moving to the next step in the process.

D

Defect (Documentation). A condition where the documentation does not agree or accurately reflect the business environment.

Defect (Electronic Interfaces). A defect found in a production environment when the system is not operating as specified in a baseline business requirement's document.

Defect Status. The status of a CLEC Impacting Defect Change Request as it flows through the Change Control process as described in the Detailed Process Flow.

- **A = Appeal.** Indicates a cancelled Change Request is being appealed by the originator (Step 3).
- **C = Cancelled.** Indicates a Change Request has been canceled due to one of the following reasons (Step 3):
  - **CC = Clarification.** Requested clarification not received in allotted time (7 days).
  - **CD = Duplicate Request.** A request for this change already exists.
  - **CT = Training.** Requested change already exists, additional training may be required.
  - **DC = Defect Cancelled.** Process is operating as specified in the baseline requirements.
- **I = Implemented.** Indicates a Defect Change Request has been implemented in a release (Step 6).
- **N = New Defect Change Request.** Indicates a Defect Change Request has been received by the BCCM and the change request form validated for completeness (Step 2).
- **PC = Pending Clarification.** Indicates a Clarification Notification has been sent to the originator, BCCM awaiting response (Step 2 or 3).
- **S = Scheduled for Release.** Indicates a Defect Change Request has been scheduled for a release (Step 6).
- **V = Validated Defect.** Indicates internal analysis has been conducted and it is determined that it is a validated defect (Step 3).
- **W = Workaround Identified.** Indicates a workaround has been developed and communicated to impacted CLEC community (Step 4).

E

Electronic Communications Systems (ECS). ECS is the help desk for reporting system outages or degradation in an existing feature/functionality within an interface. The ECS group works with

the CLEC community to resolve system outages/degradation in a timely manner. The telephone number for the ECS group is 1-888-462-8030.

Enhancement. Functions which have never been introduced into the system; improving or expanding existing functions; required functional changes to system interfaces (user and other systems), data, or business rules (processing algorithms – how a process must be performed); any change in the User Requirements in a production system.

I

Internal Change Management Process. Internal process unique to BellSouth and each participating CLEC for managing and controlling Change Requests.

N

Need-by-Date. Date used to determine implementation of a Change Request. This date is derived at the Change Review Meeting through team consensus. Example: 1Q99 or Release XX.

P

Points of Contact (POC). An individual that functions as the unique entry point for change requests on this process.

Priority. The level of urgency assigned for resource allocation to implement a change. Priority may be initially entered by the originator of the Change Request, but may be changed by the BCCM with concurrence from the originator or the Review Meeting participants. In addition, level of priority is not an indication of the timeframe in which the Change Request will be worked. It is the originator's label to determine the priority of the request submitted.

One of four priorities may be assigned:

1-Urgent. Should be implemented as soon as possible. Resources may be pulled from scheduled release efforts to expedite this item. A need-by date will be established during the Change Review Meeting. A special release may be required if the next scheduled release does not meet the agreed upon need-by date.

2-High. Implement in the next possible scheduled major release, as determined during the Release Package Meeting.

3-Medium. Implement in a future scheduled major release. A scheduled release will be established during the Release Package Meeting.

4-Low. Implement in a future scheduled major release only after all other priorities. A scheduled release will be established during the Release Package Meeting.

Project Plan. Document which defines the strategy for Release Management and Implementation, including Scope Statement, Communication Plan, Work Breakdown Structure, etc. See Release Management Project Plan template, Attachment B-1.

Proposed Release Package: Proposed set of change requests slated for a release that the BCCM presents to the CLEC community during the Release Package Meeting

R

Release – Major. Implementation of scheduled Change(s) which may or may not impact all CLECs; may or may not require CLECs to make changes to their interface and may or may not prohibit the use of an interface upon implementation of the Change(s). Application-to-Application and Machine-to-Human.

Release – Minor. Implementation of scheduled Change(s) which do not require coordination with the entire CLEC industry, do not require CLECs to make changes to their interface or do not prohibit the use of an interface upon implementation of the Change(s). Machine-to-Human.

Release Package. Package distributed by the BCCM listing the Candidate Change Requests that have been targeted for a scheduled release.

Release Package Notification. Package distributed by the BCCM and used to conduct an initial Release Management and Implementation meeting. The package includes the list of participants, meeting date, time, Approved Release Package, Maintenance/Defect Notification, etc.

Release Schedule: Schedule that contains the intended dates for implementation of software enhancements. This release schedule is created annually.

S

Specifications. Detailed, exact document(s) describing enhancement and/or defects, business processes and documentation changes requested and included with the Change Request as additional information.

System Outage. A System Outage is where the system is totally unusable or there is degradation in an existing feature or functionality within the interface.

V

Version (Document). Indicates variation of an earlier Change Control process document. Users can identify the latest version by the version control number.

APPENDIX A – CHANGE CONTROL FORMS

See Attached Forms

This section identifies the forms to be used during the initial phases of the Change Control process accompanied by a brief explanation of their use. Attachments A1 – A-4A contains sample Change Control forms and line by line Checklists.

Change Request Form. Used when submitting a request for a change (Attachment A-1).

Change Request Form Checklist. Provides line-by-line instructions for completing the Change Request form (Attachment A-1A).

Change Request Clarification Response. Used when responding to request for clarification or Clarification Notification (Attachment A-2).

Change Request Clarification Checklist. Provides line-by-line instructions for completing the Change Request Clarification Response (Attachment A-2A).

Acknowledgement Notification. Advises originator of receipt of Change Request by BCCM (Attachment A-3).

Acknowledgement Notification Checklist. Provides line-by-lines instructions for completing the Acknowledgement Notification. (Attachment A-3A).

Cancellation Notification. Advises the originator of cancellation of a Change Request (Attachment A-3).

Cancellation Notification Checklist. Provides line-by-line instructions for completing the Cancellation Notification. (Attachment A-3B).

Clarification Notification. Advises originator that a Change Request is being held pending receipt of additional information (Attachment A-4).

Clarification Notification Checklist. Provides line-by-line instructions for completing the Clarification Notification. (Attachment A-4A).

APPENDIX B – RELEASE MANAGEMENT

See Attached Forms

Release Management and Project Implementation is described in Step 10 of the Change Control Process. Project Managers are responsible for confirming the release date, developing project plans and requirements, providing the WBS, Gantt chart and Executive Summary to the BCCM for input to the Change Review Package and ensuring the successful implementation of the release.

The BST Change Control Manager (BCCM) will distribute the Release Notification Information via web. The Notification should contain the following information:

- List of participants (Project Managers from each stakeholder)
- Date(s) for the next Project Manage Release meeting(s)
- Times
- Logistics
- Meeting facilitator and minutes originator (rotated between stakeholders)
- Current Approved Release Package (email attachment)
- Current Maintenance/Defect Notification Information (web posting)
- Draft Release Project Plan - WBS (email attachment created by the Lead Project Manager (s) assigned in step 8 of the Change Control Process)
- Lead Project Manager (s) assigned to the Release with reach numbers (s)

Attachments B1 – B12 contain templates designed to assist the Project Manager(s) in conducting project management responsibilities as needed for Release Management and Implementation.

RIGHTS OF WAY (ROW), CONDUITS AND POLE ATTACHMENTS

This Attachment 8 sets forth the terms and conditions under which BellSouth shall afford to Licensee access to BellSouth's poles, ducts, conduits and rights-of-way, pursuant to the Act.

1. DEFINITIONS

Definitions in General. Except as the context otherwise requires, the terms defined in this Section shall, as used herein, have the meanings set forth in Sections 1.1 through 1.29.

1.1 Anchor. The term "anchor" refers to a device, structure, or assembly which stabilizes a pole and holds it in place. An anchor assembly may consist of a rod and fixed object or plate, typically embedded in the ground, which is attached to a guy strand or guy wire, which, in turn, is attached to the pole. The term "anchor" does not include the guy strand which connects the anchor to the pole and includes only those anchors which are owned by BellSouth, as distinguished from anchors which are owned and controlled by other persons or entities.

1.2 Anchor/guy strand. The term "anchor/guy strand" refers to supporting wires, typically stranded together, or other devices attached to a pole and connecting that pole to an anchor or to another pole for the purpose of increasing pole stability. The term "anchor/guy strand" includes, but is not limited to, strands sometimes referred to as "anchor strands," "down guys," "guy strands," and "pole-to-pole guys."

1.3 Communications Act of 1934. The terms "Communications Act of 1934" and "Communications Act" refer to the Communications Act of June 19, 1934, 48 Stat. 1064, as amended, including the provisions codified as 47 U.S.C. Sections 151, et seq. The Communications Act includes the Pole Attachment Act of 1978, as defined in Section 1.23 following.

1.4 Assigned. The term "assigned", when used with respect to conduit or duct space or pole attachment space, refers to any space in such conduit or duct or on such pole that is occupied by a telecommunications service provider or a municipal or other governmental authority. To ensure the judicious use of poles and conduits, space "assigned" to a telecommunications service provider must be physically occupied by the service provider, be it BellSouth or a new entrant, within twelve (12) months of the space being "assigned".

1.5 Available. The term "available", when used with respect to conduit or duct space or pole attachment space, refers to any usable space in such conduit or duct or on such pole not assigned to a specific provider at the applicable time.

1.6 Conduit occupancy. The terms "conduit occupancy" and "occupancy" refer to the presence of wire, cable, optical conductors, or other facilities within any portion of BellSouth's conduit system.

1.7 Conduit system. The term "conduit system" refers to any combination of ducts, conduits, manholes, and handholes joined to form an integrated whole. In this Attachment 8, the term refers to conduit systems owned or controlled by BellSouth.

1.8 Cost. The term "cost" as used herein refers to charges made by BellSouth to Licensee for specific work performed, and shall be (a) the actual charges made by subcontractors to BellSouth for work and/or, (b) if the work was performed by BellSouth employees, the rates set forth in the Price Schedule of the General Terms and Conditions of BellSouth.

1.9 Duct. The term "duct" refers to a single enclosed tube, pipe, or channel for enclosing and carrying cables, wires, and other facilities. As used in thisAttachment 8, the term "duct" includes "inner ducts" created by subdividing a duct into smaller channels.

1.10 Facilities. The terms "facility" and "facilities" refer to any property or equipment utilized in the provision of telecommunication services.

1.11 The acronym "FCC" refers to the Federal Communications Commission.

1.12 Inner-Duct. The term "inner-duct" refers to a pathway created by subdividing a duct into smaller channels.

1.13 Joint User. The term "joint user" refers to a utility which has entered into an agreement with BellSouth providing reciprocal rights of attachment of facilities owned by each party to the poles, ducts, conduits and rights-of-way owned by the other party.

1.14 Licensee. The term "licensee" refers to a person or entity which has entered or may enter into an agreement or arrangement with BellSouth permitting such person or entity to place its facilities in BellSouth's conduit system or attach its facilities to BellSouth's poles or anchors.

1.15 Lashing. The term "lashing" refers to the attachment of a licensee's sheath or inner-duct to a supporting strand.

1.16 License. The term "license" refers to any license issued pursuant to this Attachment 8 and may, if the context requires, refer to conduit occupancy or pole attachment licenses issued by BellSouth prior to the date of this Attachment 8.

1.17 Make-Ready work. The term "make-ready work" refers to all work performed or to be performed to prepare BellSouth's conduit systems, poles or anchors and related facilities for the requested occupancy or attachment of Licensee's facilities. "Make-Ready work" includes, but is not limited to, clearing obstructions (e.g., by "rodding" ducts to ensure

clear passage), the rearrangement, transfer, replacement, and removal of existing facilities on a pole or in a conduit system where such work is required solely to accommodate Licensee's facilities and not to meet BellSouth's business needs or convenience. "Make-Ready work" may require "dig-ups" of existing facilities and may include the repair, enlargement or modification of BellSouth's facilities (including, but not limited to, conduits, ducts, handholes and manholes) or the performance of other work required to make a pole, anchor, conduit or duct usable for the initial placement of Licensee's facilities.

1.18 Manhole. The term "manhole" refers to an enclosure, usually below ground level and entered through a hole on the surface covered with a cast iron or concrete manhole cover, which personnel may enter and use for the purpose of installing, operating, and maintaining facilities in a conduit.

1.19 Occupancy. The term "occupancy" shall refer to the physical presence of telecommunication facilities in a duct, on a pole, or within a Right-of-way.

1.20 Person acting on Licensee's behalf. The terms "person acting on Licensee's behalf," "personnel performing work on Licensee's behalf," and similar terms include both natural persons and firms and ventures of every type, including, but not limited to, corporations, partnerships, limited liability companies, sole proprietorships, and joint ventures. The terms "person acting on Licensee's behalf," "personnel performing work on Licensee's behalf," and similar terms specifically include, but are not limited to, Licensee, its officers, directors, employees, agents, representatives, attorneys, contractors, subcontractors, and other persons or entities performing services at the request of or as directed by Licensee and their respective officers, directors, employees, agents, and representatives.

1.21 Person acting on BellSouth's behalf. The terms "person acting on BellSouth's behalf," "personnel performing work on BellSouth's behalf," and similar terms include both natural persons and firms and ventures of every type, including but not limited to corporations, partnerships, limited liability companies, sole proprietorships, and joint ventures. The terms "person acting on BellSouth's behalf," "personnel performing work on BellSouth's behalf," and similar terms specifically include, but are not limited to, BellSouth, its officers, directors, employees, agents, representatives, attorneys, contractors, subcontractors, and other persons or entities performing services at the request or on behalf of BellSouth and their respective officers, directors, employees, agents, and representatives.

1.22 Pole. The term "pole" refers to both utility poles and anchors but only to those utility poles and anchors owned or controlled by BellSouth, and

does not include utility poles or anchors with respect to which BellSouth has no legal authority to permit attachments by other persons or entities.

1.23 Pole Attachment Act. The terms "Pole Attachment Act" and "Pole Attachment Act of 1978" refer to those provisions of the Communications Act of 1934, as amended, now codified as 47 U.S.C. § 224.

1.24 Prelicense survey. The term "prelicense survey" refers to all work and activities performed or to be performed to determine whether there is adequate capacity on a pole or in a conduit or conduit system (including manholes and handholes) to accommodate Licensee's facilities and to determine what make-ready work, if any, is required to prepare the pole, conduit or conduit system to accommodate Licensee's facilities.

1.25 Right of Way (ROW). The term "right of way" refers to the right to use the land or other property of another party to place poles, conduits, cables, other structures and equipment, or to provide passage to access such structures and equipment. A Right of Way may run under, on, or above public or private property (including air space above public or private property) and may include the right to use discrete space in buildings, building complexes, or other locations.

1.26 Sheath. The term "sheath" refers to a single outer covering containing communications wires, fibers, or other communications media.

1.27 Spare Capacity. The term "spare capacity" refers to any pole attachment space, conduit, duct or inner-duct not currently assigned or subject to a pending application for attachment/occupancy. Spare capacity does not include an inner-duct (not to exceed one inner-duct per party) reserved by BellSouth, Licensee, or a third party for maintenance, repair, or emergency restoration.

1.28 State. When capitalized, the term "State" (as used in terms such as "this State") refers to the State in which the access to BellSouth poles, ducts, conduits or rights-of-way, granted pursuant to this Attachment 8, occurs or attachment is located.

1.29 Third Party. The terms "third party" and "third parties" refer to persons and entities other than Licensee and BellSouth. Use of the term "third party" does not signify that any such person or entity is a party to this Attachment 8 or has any contractual rights hereunder.

2. SCOPE OF AGREEMENT

2.1 Undertaking of BellSouth. BellSouth shall provide Licensee with equal and nondiscriminatory access to pole space, conduits, ducts, and rights-of-way on terms and conditions equal to those provided by BellSouth to itself, subsidiaries or affiliates, or to any other telecommunications service provider. Further, BellSouth shall not withhold or delay assignment of

such facilities to Licensee because of the potential or forecasted needs of itself or other parties.

2.2 Attachments and Occupancies Authorized by this Attachment 8. BellSouth shall issue one or more licenses to Licensee authorizing Licensee to attach facilities to BellSouth's owned or controlled poles and to place facilities within BellSouth's owned or controlled conduits, ducts or rights-of-way under the terms and conditions set forth in this Section and the Telecommunications Act of 1996.

2.2.1 Unless otherwise provided herein, authority to attach facilities to BellSouth's owned or controlled poles, to place facilities within BellSouth's owned or controlled conduits, ducts or rights-of-way shall be granted only in individual licenses granted under this Attachment 8 and the placement or use of such facilities shall be determined in accordance with such licenses and procedures established in this Attachment 8.

2.2.2 Licensee agrees that its attachment of facilities to BellSouth's owned or controlled poles, occupancy of BellSouth's owned or controlled conduits, ducts or rights-of-way shall take place pursuant to the licensing procedures set forth herein, and BellSouth agrees that it shall not unreasonably withhold or delay issuance of such licenses.

2.3 Licenses. Subject to the terms and conditions set forth in this Attachment 8, BellSouth shall issue to Licensee one or more licenses authorizing Licensee to place or attach facilities in or to specified poles, conduits, ducts or rights-of-way owned or controlled by BellSouth located within this state on a first come, first served basis. BellSouth may deny a license application if BellSouth determines that the pole, conduit or duct space specifically requested by Licensee is necessary to meet BellSouth's present needs, or is licensed by BellSouth to another licensee, or is otherwise unavailable based on reasonable engineering concerns. BellSouth shall provide written notice to Licensee within forty-five (45) days of the request as per ¶ 1224 of the FCC Docket 96-98 specifying in detail the reasons for denying Licensee's request. BellSouth shall have the right to designate the particular duct(s) to be occupied, the location and manner in which Licensee's facilities will enter and exit BellSouth's conduit system and the specific location and manner of installation for any associated equipment which is permitted by BellSouth to occupy the conduit system.

2.4 Access and Use of Rights-of-Way. BellSouth acknowledges that it is required by the Telecommunications Act of 1996 to afford Licensee access to and use of all associated rights-of-way to any sites where BellSouth's owned or controlled poles, manholes, conduits, ducts or other parts of BellSouth's owned or controlled conduit systems are located.

2.4.1 BellSouth shall provide Licensee with access to and use of such rights-of-way to the same extent and for the same purposes that BellSouth may access or use such rights-of-way, including but not limited to access for ingress, egress or other access and to construct, utilize, maintain, modify, and remove facilities for which pole attachment, conduit occupancy, or ROW use licenses have been issued, provided that any agreement with a third party under which BellSouth holds such rights expressly or impliedly grants BellSouth the right to provide such rights to others.

2.4.2 Where BellSouth notifies Licensee that BellSouth's agreement with a third party does not expressly or impliedly grant BellSouth the ability to provide such access and use rights to others, upon Licensee's request, BellSouth will use its best efforts to obtain the owner's consent and to otherwise secure such rights for Licensee. Licensee agrees to reimburse BellSouth for the reasonable and demonstrable costs incurred by BellSouth in obtaining such rights for Licensee.

2.4.3 In cases where a third party agreement does not grant BellSouth the right to provide access and use rights to others as contemplated in Section 2.4.1 and BellSouth, despite its best efforts, is unable to secure such access and use rights for Licensee in accordance with Section 2.4.2, or, in the case where Licensee elects not to invoke its rights under Section 2.4.1 or Section 2.4.2, Licensee shall be responsible for obtaining such permission to access and use such rights-of-way. BellSouth shall cooperate with Licensee in obtaining such permission and shall not prevent or delay any third party assignment of ROW's to Licensee.

2.4.4 Where BellSouth has any ownership or rights-of-way to buildings or building complexes, or within buildings or building complexes, BellSouth shall offer to Licensee through a license or other attachment:

2.4.4.1 The right to use any available space owned or controlled by BellSouth in the building or building complex to install Licensee equipment and facilities; and

2.4.4.2 Ingress and egress to such space.

2.4.5 Except to the extent necessary to meet the requirements of the Telecommunications Act of 1996, neither this Attachment 8 nor any license granted hereunder shall constitute a conveyance or assignment of any of either party's rights to use any public or private rights-of-way, and nothing contained in this Attachment 8 or in any license granted hereunder shall be construed as conferring on one party any right to interfere with the other party's access to any such public or private rights-of-way.

2.5 No Effect on BellSouth's Right to Convey Property. Nothing contained in this Attachment 8 or in any license issued hereunder shall in any way affect the right of BellSouth to convey to any other person or entity any

interest in real or personal property, including any poles, conduit or ducts to or in which Licensee has attached or placed facilities pursuant to licenses issued under this Attachment 8 provided however that BellSouth shall give Licensee reasonable advance written notice of such intent to convey.

2.6 No Effect on BellSouth's Rights to Manage its Own Facilities. This Attachment 8 shall not be construed as limiting or interfering with BellSouth's rights set forth below, except to the extent expressly provided by the provisions of this Attachment 8 or licenses issued hereunder or by the Telecommunications Act of 1996 or other applicable laws, rules or regulations:

2.6.1 To locate, relocate, move, replace, modify, maintain, and operate BellSouth's own facilities within BellSouth's conduits, ducts or rights-of way or any of BellSouth's facilities attached to BellSouth's poles at any time and in any reasonable manner which BellSouth deems appropriate to serve its customers, avail itself of new business opportunities, or otherwise meet its business needs; or

2.6.2 To enter into new agreements or arrangements with other persons or entities permitting them to attach or place their facilities to or in BellSouth's poles, conduits or ducts; provided, however, that such relocations, moves, replacements, modifications, maintenance and operations or new agreements or arrangements shall not substantially interfere with Licensee's pole attachment, conduit occupancy or ROW use, rights provided by licenses Issued pursuant to this Attachment 8.

2.7 No Effect on Licensee's Rights to Manage its Own Facilities. This Attachment 8 shall not be construed as limiting or interfering with Licensee's rights set forth below, except to the extent expressly provided by the provisions of this Attachment 8 or licenses issued hereunder or by the Telecommunications Act of 1996 or other applicable laws, rules or regulations:

2.7.1 To locate, relocate, move, replace, modify, maintain, and operate its own facilities within BellSouth's conduits, ducts or rights-of-way or its facilities attached to BellSouth's poles at any time and in any reasonable manner which Licensee deems appropriate to serve its customers, avail itself of new business opportunities, or otherwise meet its business needs; or

2.7.2 To enter into new agreements or arrangements with other persons or entities permitting Licensee to attach or place its facilities to or in such other persons' or entities' poles, conduits or ducts, or rights-of-way; provided, however, that such relocations, moves, replacements, modifications, maintenance and operations or new agreements or arrangements shall not conflict with Licensee's obligations under licenses issued pursuant to this Attachment 8.

2.8 No Right to Interfere with Facilities of Others. The provisions of this Attachment 8 or any license issued hereunder shall not be construed as authorizing either party to this Attachment 8 to rearrange or interfere in any way with any of the other party's facilities, with the facilities of other persons or entities, or with the use of or access to such facilities by such other party or such other persons or entities, except to the extent expressly provided by the provisions of this Attachment 8 or any license issued hereunder or by the Telecommunications Act of 1996 or other applicable laws, rules or regulations.

2.8.1 Licensee acknowledges that the facilities of persons or entities other than BellSouth and Licensee may be attached to or occupy BellSouth's poles, conduits, ducts and rights-of-way.

2.8.2 BellSouth shall not attach, or give permission to any third parties to attach facilities to, existing Licensee facilities without Licensee's prior written consent. If BellSouth becomes aware of any such unauthorized attachment to Licensee facilities, BellSouth shall use its best efforts to rectify the situation as soon as practicable.

2.8.3 With respect to facilities occupied by Licensee or the subject of an application for attachment by Licensee, BellSouth will give to Licensee 60 days' written notice for conduit extensions or reinforcements, 60 days' written notice for pole line extensions, 60 days' written notice for pole replacements, and 60 days' written notice of BellSouth's intention to construct, reconstruct, expand or place such facilities or of BellSouth's intention not to maintain or use any existing facility and, in the case of an existing facility which BellSouth elects not to maintain or use, BellSouth will grant to Licensee a right to maintain and use such facility. If an emergency or provisions of an applicable joint use agreement require BellSouth to construct, reconstruct, expand or replace poles, conduits or ducts occupied by Licensee or the subject of an application for attachment by Licensee, BellSouth will notify Licensee as soon as reasonably practicable of such proposed construction, reconstruction, expansion or replacement to enable Licensee, if it so desires, to request that a pole, conduit or duct of greater height or capacity be utilized to accommodate an anticipated facility need of Licensee.

2.8.4 At Licensee's expense, BellSouth shall remove any retired cable from conduit systems to allow for the efficient use of conduit space within a reasonable period of time.

2.9 Assignment of Space. Assignment of space on poles, in conduits or ducts and within ROW's will be made pursuant to licenses granted by BellSouth on an equal basis to BellSouth, Licensee and other telecommunication service providers.

3. REQUIREMENTS AND SPECIFICATIONS

3.1 Published Standards Incorporated in this Section by Reference. Licensee agrees that its facilities shall be placed, constructed, maintained, repaired, and removed in accordance with current (as of the date when such work is performed) editions of the following publications, each of which is incorporated by reference as part of this Section :

3.1.1 The Blue Book Manual of Construction Procedures, Special Report SR-TAP-001421, published by Bell Communications Research, Inc. ("BellCore"), and sometimes referred to as the "Blue Book";

3.1.2 The National Electrical Code (NEC); and

3.1.3 The National Electrical Safety Code (NESC).

3.2 Changes in Published Standards. Licensee agrees to rearrange its facilities in accordance with changes in the standards published in the publications specified in Section 3.1 of this Attachment 8 if required by law to do so or upon the mutual agreement of the parties.

3.3 Additional Electrical Design Specifications. Licensee agrees that, in addition to specifications and requirements referred to in Section 3.1 above, Licensee's facilities placed in BellSouth's conduit system shall meet all of the following electrical design specifications:

3.3.1 No facility shall be placed in BellSouth's conduit system in violation of FCC regulations.

3.3.2 Licensee's facilities placed in BellSouth's conduit system shall not be designed to use the earth as the sole conductor for any part of Licensee's circuits.

3.3.3 Licensee's facilities carrying more than 50 volts AC (rms) to ground or 135 volts DC to ground shall be enclosed in an effectively grounded sheath or shield.

3.3.4 No coaxial cable of Licensee shall occupy a conduit system containing BellSouth's cable unless such cable of Licensee meets the voltage limitations of Article 820 of the National Electrical Code.

3.3.5 Licensee's coaxial cable may carry continuous DC voltages up to 1800 volts to ground where the conductor current will not exceed one-half amperes and where such cable has two separate grounded metal sheaths or shields and a suitable insulating jacket over the outer sheath or shield. The power supply shall be so designed and maintained that the total current carried over the outer sheath shall not exceed 200 micro amperes under normal conditions. Conditions which would increase the current over this level shall be cleared promptly.

3.3.6 Neither party shall circumvent the other party's corrosion mitigation measures. Each party's new facilities shall be compatible with the other

party's facilities so as not to damage any facilities of the other party by corrosion or other chemical reaction.

3.4 Additional Physical Design Specifications. Licensee's facilities placed in BellSouth's conduit system must meet all of the following physical design specifications:

3.4.1 Cables bound or wrapped with cloth or having any kind of fibrous coverings or impregnated with an adhesive material shall not be placed in BellSouth's conduit or ducts.

3.4.2 The integrity of BellSouth's conduit system and overall safety of BellSouth's personnel and other personnel working in BellSouth's conduit system requires that "dielectric cable" be required when Licensee's cable facility utilizes an alternative duct or route that is shared in the same trench by any current carrying facility of a power utility.

3.4.3 New construction splices in Licensee's fiber optic and twisted pair cables shall be located in manholes, pull boxes or handholes.

3.5 Additional Specifications Applicable to Connections. The following specifications apply to connections of Licensee's conduit to BellSouth's conduit system:

3.5.1 Licensee will be permitted to connect its conduit or duct only at the point of a BellSouth manhole. No attachment will be made by entering or breaking into conduit between manholes. All necessary work to install Licensee facilities will be performed by Licensee or its contractor at Licensee's expense. In no event shall Licensee or its contractor "core bore" or make any other modification to BellSouth manhole(s) without the prior written approval of BellSouth, which approval will not be unreasonably delayed or withheld.

3.5.2 BellSouth may monitor, at Licensee's expense, the entrance and exit of Licensee's facilities into BellSouth's manholes and the placement of Licensee's facilities in BellSouth's manholes.

3.5.3 If Licensee constructs or utilizes a duct connected to BellSouth's manhole, the duct and all connections between that duct and BellSouth's manhole shall be sealed, to the extent practicable, to prevent the entry of gases or liquids into BellSouth's conduit system. If Licensee's duct enters a building, it shall also be sealed where it enters the building and at all other locations necessary to prevent the entry of gases and liquids from the building into BellSouth's conduit system.

3.6 Requirements Relating to Personnel, Equipment, Material, and Construction Procedures Generally. Duct clearing, rodding or modifications required to grant Licensee access to BellSouth's conduit systems may be performed by BellSouth at Licensee's expense at charges which represent BellSouth's actual costs. Alternatively (at

Licensee's option) such work may be performed by a contractor who demonstrates compliance with BellSouth certification requirements, which certification requirements shall be consistent with FCC rules. The parties acknowledge that Licensee, its contractors, and other persons acting on Licensee's behalf will perform work for Licensee (e.g., splicing Licensee's facilities) within BellSouth's conduit system. Licensee represents and warrants that neither Licensee nor any person acting on Licensee's behalf shall permit any person to climb or work on or in any of BellSouth's poles or to enter BellSouth's manholes or work within BellSouth's conduit system unless such person has the training, skill, and experience required to recognize potentially dangerous conditions relating to pole or the conduit systems and to perform the work safely.

3.6.1 Licensee's facilities within BellSouth's conduit system shall be constructed, placed, rearranged, modified, and removed upon receipt of license specified in Section 5.1. However, no such license will be required for the inspection, maintenance, repair or non-physical modifications of Licensee's facilities.

3.6.2 "Rodding" or clearing of ducts in BellSouth's conduit system shall be done only when specific authorization for such work has been obtained in advance from BellSouth, which authorization shall not be unreasonably delayed or withheld by BellSouth. The parties agree that such rodding or clearing shall be performed according to existing industry standards and practices. Licensee may contract with BellSouth for performance of such work or (at Licensee's option) with a contractor who demonstrates compliance with BellSouth certification requirements.

3.6.3 Personnel performing work on BellSouth's or Licensee's behalf in BellSouth's conduit system shall not climb on, step on, or otherwise disturb the other party's or any third party's cables, air pipes, equipment, or other facilities located in any manhole or other part of BellSouth's conduit system.

3.6.4 Personnel performing work on BellSouth's or Licensee's behalf within BellSouth's conduit system (including any manhole) shall, upon completing their work, make reasonable efforts to remove all tools, unused materials, wire clippings, cable sheathing and other materials brought by them to the work site.

3.6.5 All of Licensee's facilities shall be firmly secured and supported in accordance with BellCore and industry standards.

3.6.6 Licensee's facilities shall be plainly identified with Licensee's name in each manhole with a firmly affixed permanent tag that meets standards set by BellSouth for its own facilities.

3.6.7 Manhole pumping and purging required in order to allow Licensee's work operations to proceed shall be performed by a vendor approved by

BellSouth in compliance with BellSouth Practice Sec. 620-145-011BT, "Manhole Contaminants, Water, Sediment or Debris Removal and Reporting Procedures," and any amendments, revisions or supplements thereto and in compliance with all regulations and standards established by the United States Environmental Protection Agency and by any applicable state or local environmental regulators.

3.6.8 Planks or other types of platforms shall not be installed using cables, pipes or other equipment as a means of support. Platforms shall be supported only by cable racks.

3.6.9 Any leak detection liquid or device used by Licensee or personnel performing work on Licensee's facilities within BellSouth's conduit system shall be of a type approved by BellSouth or BellCore.

3.6.10 When Licensee or personnel performing work on Licensee's behalf are working within or in the vicinity of any part of BellSouth's poles or conduit system which is located within, under, over, or adjacent to streets, highways, alleys or other traveled rights-of-way, Licensee and all personnel performing work on Licensee's behalf shall follow procedures which Licensee deems appropriate for the protection of persons and property. Licensee shall be responsible, at all times, for determining and implementing the specific steps required to protect persons and property at the site. Licensee will provide all traffic control and warning devices required to protect pedestrian and vehicular traffic, workers and property from danger. Licensee has sole responsibility for the safety of all personnel performing work on Licensee's behalf, for the safety of bystanders, and for insuring that all operations conform to current OSHA regulations and all other governmental rules, ordinances or statutes. BellSouth reserves the right to suspend Licensee's activities on, in or in the vicinity of BellSouth's poles or conduit system if, in BellSouth's reasonable judgment, any hazardous condition arises due to the activity (including both acts and omissions) of Licensee or any personnel performing work on Licensee's behalf, which suspension shall cease when the condition has been rectified.

3.6.11 Except for protective screens, no temporary cover shall be placed by Licensee or personnel performing work on Licensee's behalf over an open manhole unless it is at least four feet above the surface level of the manhole opening.

3.6.12 Smoking or the use of any open flame is prohibited in BellSouth's manholes, in any other portion of BellSouth's conduit system, or within 10 feet of any open manhole entrance; provided that this provision will not prohibit the use of spark producing tools such as electric drills, fusion splicers, etc.

3.6.13 Artificial lighting, when required, will be provided by Licensee. Only explosion-proof lighting fixtures shall be used.

3.6.14 Neither Licensee nor personnel performing work on Licensee's behalf shall allow any combustible gas, vapor, liquid, or material to accumulate in BellSouth's conduit system (including any manhole) during work operations performed within or in the vicinity of BellSouth's conduit system.

3.6.15 Licensee will abide by any laws, regulations or ordinances regarding the use of spark producing tools, equipment or devices in BellSouth's manholes, in any other portions of BellSouth's conduit system, or within 10 feet of any open manhole opening. This includes, but is not limited to, such tools as electric drills and hammers, meggers, breakdown sets, induction sets, and the like.

3.7 Opening of Manholes. The following requirements apply to the opening of BellSouth's manholes and the authority of BellSouth personnel present when work on Licensee's behalf is being performed within or in the vicinity of BellSouth's conduit system.

3.7.1 BellSouth's manholes shall be opened only as permitted by BellSouth's authorized employees or agents, which permission shall not be unreasonably denied or delayed.

3.7.2 Licensee shall notify BellSouth forty-eight (48) hours in advance of any routine work operation requiring entry into any of BellSouth's manholes.

3.7.3 Licensee shall be responsible for obtaining any necessary authorization from appropriate authorities to open manholes for conduit work operations therein.

3.7.4 BellSouth's authorized employee or agent shall not direct or control the conduct of Licensee's work at the work site. The presence of BellSouth's authorized employee or agent at the work site shall not relieve Licensee or personnel performing work on Licensee's behalf of their responsibility to conduct all work operations within BellSouth's conduit system in a safe and workmanlike manner.

3.7.5 Although BellSouth's authorized employee or agent shall not direct or control the conduct of Licensee's work at the work site, BellSouth's employee or agent shall have the authority to suspend Licensee's work operations within BellSouth's conduit system if, in the reasonable discretion of such BellSouth employee or agent, it appears that any hazardous conditions arise or any unsafe practices are being followed by Licensee or personnel performing work on Licensee's behalf.

3.7.6 When an emergency situation arises which necessitates Carrier access to a manhole, Carrier should call BellSouth's Access Customer Advocate Center ("ACAC") or the Unbundled Network Element (UNE) Center.

BellSouth will then contact the Maintenance Supervisor who will return the Carrier's call and will arrange for access with on-call maintenance field personnel during the emergency condition on an emergency basis. (A list of contact telephone numbers is available to each CLEC for this purpose.)

3.8 OSHA Compliance: Notice to BellSouth of Unsafe Conditions. Licensee agrees that:

3.8.1 Its facilities shall be constructed, placed, maintained, repaired, and removed in accordance with the Occupational Safety and Health Act (OSHA) and all rules and regulations promulgated thereunder;

3.8.2 All persons acting on Licensee's behalf, including but not limited to Licensee's employees, agents, contractors, and subcontractors shall, when working on or within BellSouth's poles or conduit system, comply with OSHA and all rules and regulations thereunder;

3.8.3 Licensee shall establish appropriate procedures and controls to assure compliance with all requirements of this section; and

3.8.4 Licensee (and any person acting on Licensee's behalf) may report unsafe conditions on, in or in the vicinity of BellSouth's poles or conduit system to BellSouth.

3.9 Compliance with Environmental Laws and Regulations. Licensee acknowledges that, from time to time, environmental contaminants may enter BellSouth's conduit system and accumulate in manholes or other conduit facilities and that certain conduits (transite) are constructed with asbestos-containing materials. If BellSouth has knowledge of the presence of such contaminants in a conduit for which Licensee has applied for or holds a license, BellSouth will promptly notify Licensee of such fact.

Notwithstanding any of BellSouth's notification requirements in this Attachment, Licensee acknowledges that some of BellSouth's conduit is fabricated from asbestos-containing materials. Such conduit is generally marked with a designation of "C Fiber Cement Conduit, " "Transite," or "Johns-Manville." Until proven otherwise, Licensee will presume that all conduit not fabricated of plastic, tile, or wood is asbestos-containing and will handle it pursuant to all applicable regulations relating to worker safety and protection of the environment. BellSouth makes no representations to Licensee or personnel performing work on Licensee's behalf that BellSouth's conduit system or any specific portions thereof will be free from environmental contaminants at any particular time. The acknowledgments and representations set forth in the two preceding sentences are not intended to relieve BellSouth of any liability which it would otherwise have under applicable law for the presence of environmental contaminants in its conduit facilities. Licensee agrees to

comply with the following provisions relating to compliance with environmental laws and regulations:

3.9.1 Supra Telecom may, at its expense, perform such inspections and tests at the site of any pole, duct, conduit, or right-of-way occupied by or assigned to Supra Telecom as Supra Telecom may deem necessary to determine the presence at such sites of environmental contaminants. BellSouth will assist Supra Telecom, at Supra Telecom's request and expense, in the performance of such inspections and tests.

3.9.2 Licensee's facilities shall be constructed, placed, maintained, repaired, and removed in accordance with all applicable federal, state, and local environmental statutes, ordinances, rules, regulations, and other laws, including but not limited to the Resource Conservation and Recovery Act (42 U.S.C. §§ 9601, et seq.), the Toxic Substance Control Act (15 U.S.C. §§ 2601-2629), the Clean Water Act (33 U.S.C. §§ 1251, et seq.), and the Safe Drinking Water Act (42 U.S.C. §§ 300f-300j).

3.9.3 All persons acting on Licensee's behalf, including but not limited to Licensee's employees, agents, contractors, and subcontractors, shall, when working on, within or in the vicinity of BellSouth's poles or conduit system, comply with all applicable federal, state, and local environmental laws, including but not limited to all environmental statutes, ordinances, rules, and regulations.

3.9.4 Licensee shall establish appropriate procedures and controls to assure compliance with all requirements of this section. BellSouth will be afforded a reasonable opportunity to review such procedures and controls and provide comments that will be reasonably considered in advance of their implementation. Review and comment by BellSouth pursuant to this section will be provided in a timely manner.

3.9.5 Licensee and all personnel performing work on Licensee's behalf shall comply with such standards and practices as BellSouth and Licensee may from time to time mutually agree to adopt to comply with environmental laws and regulations including, without limitation, BellSouth Practice Sec. 620-145-011BT, "Manhole Contaminants, Water, Sediment or Debris Removal and Reporting Procedures". Pursuant to this practice, neither Licensee nor BellSouth nor personnel performing work on either party's behalf shall discharge water or any other substance from any BellSouth manhole or other conduit facility onto public or private property, including any storm water drainage system, without first testing such water or substance for contaminants in accordance with mutually agreed standards and practices and determining that such discharge would not violate any environmental law, create any environmental risk or hazard, or damage the property of any person. No such waste material shall be deposited on BellSouth premises for storage or disposal.

3.10 Compliance with Other Governmental Requirements. Licensee agrees that its facilities attached to BellSouth's facilities shall be constructed, placed, maintained, and removed in accordance with the ordinances, rules, and regulations of any governing body having jurisdiction of the subject matter. Licensee shall comply with all statutes, ordinances, rules, regulations and other laws requiring the marking and lighting of aerial wires, cables and other structures to ensure that such wires, cables and structures are not a hazard to aeronautical navigation. Licensee shall establish appropriate procedures and controls to assure such compliance by all persons acting on Licensee's behalf, including but not limited to, Licensee's employees, agents, contractors, and subcontractors.

3.11 Differences in Standards or Specifications. To the extent that there may be differences in any applicable standards or specifications referred to in this Section 3, the most stringent standard or specification shall apply.

3.12 Licensee Solely Responsible for the Condition of Its Facilities. Licensee shall be responsible at all times for the condition of its facilities and its compliance with the requirements, specifications, rules, regulations, ordinances, and laws specified above. In this regard, BellSouth shall have no duty to Licensee to inspect or monitor the condition of Licensee's facilities (including but not limited to splices and other facilities connections) located within BellSouth's conduit and ducts or any attachment of Licensee's facilities to BellSouth's poles, anchors, anchor/guy strands or other pole facilities. BellSouth may, however, conduct such inspections and audits of its poles and conduit system as BellSouth determines reasonable or necessary. Such inspection and audits shall be conducted at BellSouth's expense with the exception of (1) follow-up inspection to confirm remedial action after an observed Licensee violation of the requirements of this Attachment 8; and (2) inspection of Licensee facilities in compliance with a specific mandate of appropriate governmental authority for which inspections the cost shall be borne by Licensee. Either party may audit the other party's compliance with the terms of this Section. Observed safety hazards or imminent facility failure conditions of another party shall be reported to the affected party where such party can be readily identified.

3.13 Efficient use of Conduit. BellSouth will install inner-ducts to increase duct space in existing conduit as facilities permit. The full complement of inner-ducts will be installed which can be accommodated under sound engineering principles. The number of inner-ducts which can reasonably be installed will be determined by BellSouth.

4. ADDITIONAL LEGAL REQUIREMENTS

4.1 Third Party Property Owners. Licenses granted under this Section authorize Licensee to place facilities in, or attach facilities to, poles,

conduits and ducts owned or controlled by BellSouth but do not affect the rights of landowners to control terms and conditions of access to their property.

4.1.1 Licensee agrees that neither Licensee nor any persons acting on Licensee's behalf, including but not limited to Licensee's employees, agents, contractors, and subcontractors, shall engage in any conduct which damages public or private property in the vicinity of BellSouth's poles or conduit system, interferes in any way with the use or enjoyment of public or private property except as expressly permitted by the owner of such property, or creates a hazard or nuisance on such property (including, but not limited to, a hazard or nuisance resulting from any abandonment or failure to remove Licensee's facilities or any construction debris from the property, failure to erect warning signs or barricades as may be necessary to give notice to others of unsafe conditions on the premises while work performed on Licensee's behalf is in progress, or failure to restore the property to a safe condition after such work has been completed).

4.2 Required Permits, Certificates and Licenses. Licensee shall be responsible for obtaining any building permits or certificates from governmental authorities necessary to construct, operate, maintain and remove its facilities on public or private property.

4.2.1 Licensee shall not attach or place its facilities to or in BellSouth's poles, conduit or duct located on any property for which it or BellSouth has not first obtained all required authorizations.

4.2.2 BellSouth shall have the right to request evidence that all appropriate authorizations have been obtained. However, such request shall not delay BellSouth's prelicense survey work.

4.3 Lawful Purposes. All facilities placed by Licensee in BellSouth's conduit and ducts or on BellSouth's poles, anchors or anchor/guy strands must serve a lawful purpose and the uses made of Licensee's facilities must comply with all applicable federal, state, and local laws and with all federal, state, and local regulatory rules, regulations, and requirements. In this regard, Licensee shall not utilize any facilities occupying or attached to BellSouth's conduits, ducts or poles for the purpose of providing any services which it is not authorized by law to provide or for the purpose of enabling any other person or entity to provide any such services.

5. FACILITIES AND LICENSES

5.1 Licenses Required. Before placing any facilities in BellSouth's conduits or ducts or attaching any facilities to BellSouth's poles, anchors or anchor/guy strands, Licensee must first apply for and receive a written

license from BellSouth. BellSouth shall not unreasonably deny or delay issuance of any license.

5.2 Provision of Records and Information to Licensee. In order to obtain information regarding facilities, Licensee shall make a written request to BellSouth, identifying with reasonable specificity the geographic area for which facilities are required, the types and quantities of the required facilities and the required in-service date. In response to such request, BellSouth shall provide Licensee with information regarding the types, quantity and location (which may be provided by provision of route maps) and availability of BellSouth poles, conduit and right-of-way located within the geographic area specified by Licensee. Provision of information under the terms of this section shall include the right of Licensee employees or agents to inspect and copy engineering records or drawings which pertain to those facilities within the geographic area identified in Licensee's request. Such inspection and copying shall be done at a time and place mutually agreed upon by the parties. See Exhibit B, attached hereto and incorporated herein by this reference, for records location centers.

5.3 No Warranty of Record Information. Licensee acknowledges that records and information provided by BellSouth pursuant to paragraph 5.2 may not reflect field conditions and that physical inspection is necessary to verify presence and condition of outside plant facilities and right of way. In providing such records and information, BellSouth assumes no liability to Licensee or any third party for errors/omissions contained therein.

5.4 Determination of Availability. BellSouth shall provide pole, conduit and right-of-way availability information in response to a request from Licensee which identifies with reasonable specificity the facilities for which such information is desired. Licensee may elect to be present at any field based survey of facilities identified pursuant to this paragraph and BellSouth shall provide Licensee at least forty-eight (48) hours notice prior to initiating such field survey. Licensee employees or agents shall be permitted to enter BellSouth manholes and inspect such structures to confirm usability and/or evaluate condition of the structure(s) with at least forty-eight (48) hours notice to BellSouth, with a BellSouth representative present and at Licensee's expense.

6. MAKE-READY WORK

6.1 Work Performed by BellSouth. If performed by BellSouth, make-ready work to accommodate Licensee's facilities shall be included in the normal work load schedule of BellSouth with construction responsibilities in the geographic areas where the relevant poles or conduit systems are located and shall not be subjugated to BellSouth work, nor entitled to priority, advancement, or preference over other work to be performed by BellSouth in the ordinary course of BellSouth's business.

6.1.1 If Licensee desires make-ready work to be performed on an expedited basis and BellSouth agrees to perform the work on such a basis, BellSouth shall recalculate the estimated make-ready charges. If Licensee accepts BellSouth's offer, Licensee shall pay such additional charges.

6.2 All charges for make-ready work performed by BellSouth are payable in advance, with the amount of any such advance payment to be due within sixty (60) days after receipt of an invoice from BellSouth.

6.3 Work Performed by Certified Contractor. In lieu of obtaining performance of make-ready work by BellSouth, Licensee at its option may arrange for the performance of such work by a contractor certified by BellSouth to work on or in its facilities. Certification shall be granted based upon reasonable and customary criteria employed by BellSouth in the selection of its own contract labor. Notwithstanding any other provisions of this Section, Licensee may not employ a contractor to accomplish make-ready work if BellSouth is likewise precluded from contractor selection under the terms of an applicable joint use agreement or collective bargaining agreement. In accordance with Section 3.6.7, all manhole pumping and purging shall be performed by a vendor approved by BellSouth.

6.4 Completion of Make-Ready Work. BellSouth will issue a license to Licensee at the time all make-ready work necessary to Licensee's attachment or occupancy has been completed.

7. APPLICATION FORM AND FEES

7.1 Application Process. To apply for a license under this Section, Licensee shall submit to BellSouth two signed copies of an Application and Conduit Occupancy License form or an Application and Pole Attachment License form. BellSouth will process license applications in the order in which they are received; provided, however, that when Licensee has multiple applications on file with BellSouth, Licensee may designate its desired priority of completion of prelicense surveys and make-ready work with respect to all such applications.

7.1.1 Each application for a license under this Section shall specify the proposed route of Licensee's facilities and identify the conduits and ducts or poles and pole facilities along the proposed route in which Licensee desires to place or attach its facilities, and describe the physical size, weight and jacket material of the cable which Licensee desires to place in each conduit or duct or the number and type of cables, apparatus enclosures and other facilities which Licensee desires to attach to each pole.

7.1.2 Each application for a license under this Section shall be accompanied by a proposed (or estimated) construction schedule containing the information specified below in Section 10.1 of this Attachment 8, and an

indication of whether Licensee will, at its option, perform its own make-ready work.

7.2 Multiple Cables, Multiple Services, Lashing or Placing Additional Cables, and Replacement of Facilities. Licensee may include multiple cables in a single license application and multiple services (e.g., CATV and non-CATV services) may be provided by Licensee in the same cable sheath. Licensee's lashing additional cable to existing facilities and placing additional cables in conduits or ducts already occupied by Licensee's facilities shall be permitted, and no additional fees will be applied; provided, however, that if Licensee desires to lash additional cable to existing facilities of a third party Licensee shall provide BellSouth with reasonable notice, and shall obtain written permission from the owner of the existing facilities. If BellSouth determines that the requested lashing would violate safety or engineering requirements, BellSouth shall provide written notice to Licensee within a reasonable time specifying in detail BellSouth's findings. If Licensee desires to place additional cables in conduits or ducts which are already occupied, or to replace existing facilities with new facilities substantially different from those described in licenses in effect, Licensee must apply for and acquire a new license specifically describing the physical size, weight and jacket material of the cable to be placed in BellSouth's conduits and ducts or the physical size, weight, and jacket type of cables and the size and weight of apparatus enclosures and other facilities to be attached to BellSouth poles.

7.3 Each party hereby designates the employees named below as their single point of contact for any and all purposes of this Section, including, but not limited to, processing licenses and applications and providing records and information. Each party may at any time designate a new point of contact by giving written notice of such change.

8. PROCESSING OF APPLICATIONS (INCLUDING PRELICENSE SURVEYS AND FIELD INSPECTIONS)

8.1 Licensee's Priorities. When Licensee has multiple applications on file with BellSouth, Licensee shall designate its desired priority of completion of prelicense surveys and make-ready work with respect to all such applications.

8.2 Prelicense Survey. After Licensee has submitted its written application for a license, a prelicense survey (including a field inspection) will be performed by either party, in the company of a representative of the other party as mutually agreed, to determine whether BellSouth's poles, anchors and anchor/guy strands, or conduit system, in their present condition, can accommodate Licensee's facilities, without substantially interfering with the ability of BellSouth or any other authorized person or entity to use or access the pole, anchor or anchor/guy strand or any portion of BellSouth's conduit system or facilities attached to BellSouth's pole or placed within or connected to BellSouth's conduit system. If Licensee gives its prior written consent in writing, the determination of duct availability may include the "rodding" of ducts at Licensee's expense.

8.2.1 The purpose of the prelicense survey is to determine whether Licensee's proposed attachments to BellSouth's poles or occupancy of BellSouth's conduit and ducts will substantially interfere with use of BellSouth's facilities by BellSouth and others with facilities occupying, connected or attached to BellSouth's pole or conduit system; and to provide information to Licensee for its determination of whether the pole, anchor, anchor/guy strand, conduit, duct, or right-of-way is suitable for its use.

8.2.2 Based on information provided by BellSouth and the survey, Licensee shall determine whether BellSouth's pole, anchor, anchor/guy strand, conduit and duct facilities are suitable to meet Licensee's needs.

8.2.3 BellSouth may not unreasonably refuse to continue to process an application based on BellSouth's determination that Licensee's proposed use of BellSouth's facilities will not be in compliance with applicable requirements, specifications, rules, regulations, ordinances, and laws. Licensee shall be responsible for making its own, independent determination that its use of such facilities will be in compliance with such requirements, specifications, rules, regulations, ordinances and laws. Licensee acknowledges that BellSouth is not explicitly or implicitly warranting to Licensee that Licensee's proposed use of BellSouth's facilities will be in compliance with applicable requirements, specifications, rules, regulations, ordinances, and laws.

8.3 Administrative Processing. The administrative processing portion of the prelicense survey (which includes without limitation processing the application, preparing make-ready work orders, notifying joint users and other persons and entities of work requirements and schedules, coordinating the relocation/rearrangement of BellSouth and/or other licensed facilities) will be performed by BellSouth at Licensee's expense. Anything to the contrary herein notwithstanding, BellSouth shall bear no responsibility for the relocation, rearrangement or removal of facilities used for the transmission or distribution of electric power.

9. ISSUANCE OF LICENSES

9.1 Obligation to Issue Licenses. BellSouth shall issue a license to Licensee pursuant to this Section 9. BellSouth and Licensee acknowledge that each application for a license shall be evaluated on an individual basis. Nothing contained in this section shall be construed as abridging any independent pole attachment rights or conduit or duct access rights which Licensee may have under the provisions of any applicable federal or state laws or regulations governing access to BellSouth's poles, conduits and ducts, to the extent the same are not inconsistent with the Telecommunications Act of 1996. Each license issued hereunder shall be for an indefinite term, subject to Licensee's compliance with the provisions applicable to such license and further subject to Licensee's right to terminate such license at any time for any reason upon at least thirty (30) days' prior written notice.

9.2 Multiple Applications. Licensee acknowledges that multiple parties including BellSouth may seek to place their facilities in BellSouth's conduit and ducts at or about the same time, that the make-ready work required to prepare BellSouth's facilities to accommodate multiple applicants may differ from the make-ready work required to accommodate a single

applicant, that issues relating to the proper apportionment of costs arise in multi-applicant situations that do not arise in single-applicant situations, and that cooperation and negotiations between all applicants and BellSouth may be necessary to resolve disputes involving multiple applications for permission to place facilities in/on the same pole, conduit, duct, or right-of-way.

9.2.1 All applications will be processed on a first-come, first-served basis.

9.3 Agreement to Pay for All Make-Ready Work Completed. Licensee's submission of written authorization for make-ready work shall also constitute Licensee's agreement to pay additional cost-based charges, if any, for completed make-ready work.

9.4 Payments to Others for Expenses Incurred in Transferring or Arranging Their Facilities. Licensee shall make arrangements with the owners of other facilities located in or connected to BellSouth's conduit system or attached to BellSouth's poles, anchors or anchor/guy strands regarding reimbursement for any expenses incurred by them in transferring or rearranging their facilities to accommodate the placement or attachment of Licensee's facilities in or to BellSouth's structures.

9.5 Make-Ready Work on an Expedited Basis. If Licensee is willing to authorize BellSouth to perform make-ready work on an expedited basis, and if BellSouth agrees to perform the work on such a basis, BellSouth shall recalculate the estimated make-ready charges. If Licensee accepts BellSouth's offer, Licensee shall pay such additional charges, if any.

9.6 License. When Licensee's application for a pole attachment or conduit occupancy license is approved, and all required make-ready work completed, BellSouth will execute and return a signed authorization to Licensee, as appropriate, authorizing Licensee to attach or place the specified facilities on BellSouth's poles or in BellSouth's conduit or ducts.

9.6.1 Each license issued under this Section shall authorize Licensee to attach to BellSouth's poles or place or maintain in BellSouth's conduit or ducts only those facilities specifically described in the license, and no others.

9.6.2 Except as expressly stated to the contrary in individual licenses issued hereunder, each license issued pursuant to this Section shall incorporate all terms and conditions of this Section whether or not such terms or conditions are expressly incorporated by reference on the face of the license itself.

10. CONSTRUCTION OF LICENSEE'S FACILITIES

10.1 Construction Schedule. Licensee shall submit with Licensee's license application a proposed or estimated construction schedule. Promptly after the issuance of a license permitting Licensee to attach facilities to BellSouth's poles or place facilities in BellSouth's conduit or ducts,

Licensee shall provide BellSouth with an updated construction schedule and shall thereafter keep BellSouth informed of significant anticipated changes in the construction schedule. Construction schedules required by this Section shall include, at a minimum, the following information:

10.1.1 The name, title, business address, and business telephone number of the manager responsible for construction of the facilities;

10.1.2 The names of each contractor and subcontractor which will be involved in the construction activities;

10.1.3 The estimated dates when construction will begin and end; and

10.1.4 The approximate dates when Licensee or persons acting on Licensee's behalf will be performing construction work in connection with the placement of Licensee's facilities in BellSouth's conduit or ducts.

10.2 Additional Pre-construction Procedures for Facilities Placed in Conduit System. The following procedures shall apply before Licensee places facilities in BellSouth's conduit system:

10.2.1 Licensee shall give written notice of the type of facilities which are to be placed; and

10.2.2 BellSouth shall designate the particular duct or ducts or inner ducts (if available) to be occupied by Licensee's facilities, the location and manner in which Licensee's facilities will enter and exit BellSouth's conduit system, and the specific location and manner of installation of any associated equipment which is permitted by BellSouth to occupy the conduit system. Licensee may not occupy a duct other than the specified duct without the express written consent of BellSouth. BellSouth shall provide to Licensee space in manholes for racking and storage of up to fifty (50) feet of cable, provided space is available.

10.3 BellSouth Not Responsible for Constructing or Placing Facilities. BellSouth shall have no obligation to construct any facilities for Licensee or to attach Licensee's facilities to, or place Licensee's facilities in, BellSouth's poles or conduit system, except as may be necessary to facilitate the interconnection of unbundled network elements or except to the extent expressly provided in this Section, any license issued hereunder, or by the Telecommunications Act of 1996 or any other applicable law.

10.4 Licensee Responsible for Constructing, Attaching and Placing Facilities. Except where otherwise mutually agreed by Licensee and BellSouth, Licensee shall be responsible for constructing its own facilities and attaching those facilities to, or placing them in BellSouth's poles, conduit or ducts at Licensee's sole cost and expense. Licensee shall be solely responsible for paying all persons and entities who provide materials, labor, access to real or personal property, or other goods or services in

connection with the construction and placement of Licensee's facilities and for directing the activities of all persons acting on Licensee's behalf while they are physically present on BellSouth's pole, in any part of BellSouth's conduit system or in the vicinity of BellSouth's poles or conduit system.

10.5 Compliance with Applicable Standards, Health and Safety Requirements, and Other Legal Requirements. Licensee shall construct its facilities in accordance with the provisions of this Section and all licenses issued hereunder.

10.5.1 Licensee shall construct, attach and place its facilities in compliance with all Requirements and Specifications set forth above in this Attachment 8.

10.5.2 Licensee shall satisfy all Legal Requirements set forth above in this Attachment 8.

10.5.3 Licensee shall not permit any person acting on Licensee's behalf to perform any work on BellSouth's poles or within BellSouth's conduit system without first verifying, to the extent practicable, on each date when such work is to be performed, that the condition of the pole or conduit system is suitable for the work to be performed. If Licensee or any person working on Licensee's behalf determines that the condition of the pole or conduit system is not suitable for the work to be performed, Licensee shall notify BellSouth of the condition of the pole or conduit system in question and shall not proceed with construction activities until Licensee is satisfied that the work can be safely performed.

10.6 Construction Notices. If requested to do so, Licensee shall provide BellSouth with information to reasonably assure BellSouth that construction has been performed in accordance with all applicable standards and requirements.

10.7 Points for Attachment. BellSouth shall specify, using the same selection criteria it uses for its own operating company, the point of attachment of each pole or anchor to be occupied by Licensee's facilities. When the facilities of more than one applicant are involved, BellSouth will attempt, to the extent practicable, to designate the same relative position on each pole or anchor for each applicant's facilities.

10.8 Manhole and Conduit Break-Outs. Licensee shall be permitted to add conduit ports to BellSouth manholes when existing conduits do not provide the pathway connectivity needed by Licensee; provided the structural integrity of the manhole is maintained, and sound engineering judgment is employed.

11. USE AND ROUTINE MAINTENANCE OF LICENSEE'S FACILITIES

11.1 Use of Licensee's Facilities. Each license granted under this Section authorizes Licensee to have access to Licensee's facilities on or in BellSouth's poles, conduits and ducts as needed for the purpose of serving Licensee's customers, including, but not limited to, powering electronics, monitoring facilities, or transporting signaling.

11.2 Routine Maintenance of Licensee's Facilities. Each license granted under this Section authorizes Licensee to engage in routine maintenance of Licensee's facilities located on or in BellSouth's poles, conduits, ducts and ROW pursuant to such license. Licensee shall give reasonable notice to the affected public authority or private landowner as appropriate before commencing the construction or installation of its attachments or making any material alterations thereto. Licensee shall give reasonable notice to BellSouth before performing any work, whether or not of a routine nature, in BellSouth's conduit system.

11.3 Licensee Responsible for Maintenance of Licensee's Facilities. Licensee shall maintain its facilities in accordance with the provisions of this Section (including but not limited to all requirements set forth above in this Attachment 8) and all licenses issued hereunder. Licensee shall be solely responsible for paying all persons and entities who provide materials, labor, access to real or personal property, or other goods or services in connection with the maintenance of Licensee's facilities and for directing the activities of all persons acting on Licensee's behalf while they are physically present on BellSouth's poles, within BellSouth's conduit system or in the immediate vicinity of such poles or conduit system.

11.4 BellSouth Not Responsible for Maintaining Licensee's Facilities. BellSouth shall have no obligation to maintain any facilities which Licensee has attached or connected to, or placed in, BellSouth's poles, conduits, ducts or any portion of BellSouth's conduit system, except to the extent expressly provided by the provisions of this Section or any license issued hereunder, or by the Telecommunications Act of 1996 or other applicable laws, rules or regulations.

11.5 Information Concerning the Maintenance of Licensee's Facilities. Promptly after the issuance of a license permitting Licensee to attach facilities to, or place facilities in BellSouth's poles, conduits or ducts, Licensee shall provide BellSouth with the name, title, business address, and business telephone number of the manager responsible for routine maintenance of Licensee's facilities, and shall thereafter notify BellSouth of changes to such information. The manager responsible for routine maintenance of Licensee's facilities shall, on BellSouth's request, identify any contractor, subcontractor, or other person performing maintenance activities on Licensee's behalf at a specified site and shall, on BellSouth's request, provide such additional documentation relating to the maintenance of Licensee's facilities as reasonably necessary to

demonstrate that Licensee and all persons acting on Licensee's behalf are complying with the requirements of this Section and licenses issued hereunder.

11.6 Identification of Personnel Authorized to Have Access to Licensee's Facilities. All personnel authorized to have access to Licensee's facilities shall, while working on BellSouth's poles, in its conduit system or ducts or in the vicinity of such poles, ducts or conduit systems, carry with them suitable identification and shall, upon the request of any BellSouth employee, produce such identification.

12. MODIFICATION AND REPLACEMENT OF LICENSEE'S FACILITIES

12.1 Notification of Planned Modification or Replacement of Facilities. Licensee shall, when practicable, notify BellSouth in writing at least 60 days before adding to, relocating, replacing or otherwise modifying its facilities attached to a BellSouth pole, anchor or anchor/guy strand or located in any BellSouth conduit or duct. The notice shall contain sufficient information to enable BellSouth to determine whether the proposed addition, relocation, replacement, or modification is permitted under Licensee's present license or requires a new or amended license.

12.2 New or Amended License Required. A new or amended license will be required if the proposed addition, relocation, replacement, or modification:

12.2.1 Requires that Licensee use additional space on BellSouth's poles or in its conduits or ducts (including but not limited to any additional ducts, inner ducts, or substantial space in any handhole or manhole) on either a temporary or permanent basis; or

12.2.2 Results in the size or location of Licensee's facilities on BellSouth's poles or in its conduit or ducts being appreciably different from those described and authorized in Licensee's present license (e.g., different duct or size increase causing a need to re-calculate storm loadings, guying, or pole class).

13. REARRANGEMENT OF FACILITIES AT THE REQUEST OF ANOTHER

13.1 Make-Ready Work at the Request of Licensee. If, prior to the issuance of a license, Licensee determines that any pole, anchor, anchor/guy strand, conduit or duct is inadequate to accommodate Licensee's proposed pole attachment or conduit occupancy or that it will be necessary or desirable for BellSouth or any other person or entity to rearrange existing facilities or structures to accommodate Licensee, Licensee shall promptly advise BellSouth of the make-ready work it believes necessary to enable the accommodation of Licensee's facilities.

13.1.1 BellSouth shall determine, in the exercise of sound engineering judgment, whether or what make-ready work is necessary or possible. In determining whether make-ready work is necessary or what make-ready

work is necessary, BellSouth shall endeavor to minimize its costs to Licensee. If it is determined that such make-ready work is required, BellSouth shall provide Licensee with the estimated costs for make-ready work and a Make Ready Due Date.

13.1.2 Licensee shall be solely responsible for negotiating with persons or entities other than BellSouth for the rearrangement of such persons' or entities' facilities or structures and, except where such rearrangement is for the benefit of BellSouth and/or other licensees as well as Licensee, shall be solely responsible for paying all charges attributable to the rearrangement of such facilities; provided, however, that if facilities rearrangements require new licenses from BellSouth, BellSouth shall issue such licenses in conjunction with the issuance of the applied-for license to Licensee.

13.2 Rearrangement of Licensee's Facilities at BellSouth's Request. Licensee acknowledges that, from time to time, it may be necessary or desirable for BellSouth to change out poles, relocate, reconstruct, or modify portions of its conduit system or rearrange facilities contained therein or connected thereto and that such changes may be necessitated by BellSouth's business needs or authorized application of another entity seeking access to BellSouth's poles or conduit systems. Licensee agrees that Licensee will, upon BellSouth's request, and at BellSouth's expense, but at no cost to Licensee, participate with BellSouth (and other licensees) in the relocation, reconstruction, or modification of BellSouth's conduit system or facilities rearrangement. Licensee acknowledges that, from time to time, it may be necessary or desirable for BellSouth to change out poles, relocate, reconstruct, or modify portions of its conduit system or rearrange facilities contained therein or connected thereto as a result of an order by a municipality or other governmental authority. Licensee shall, upon BellSouth's request, participate with BellSouth (and other licensees) in the relocation, reconstruction, or modification of BellSouth's conduit system or facilities rearrangement and pay its proportionate share of any costs of such relocation, reconstruction, or modification that are not reimbursed by such municipality or governmental authority.

13.2.1 Licensee shall make all rearrangements of its facilities within such period of time as is jointly deemed reasonable by the parties based on the amount of rearrangements necessary and a desire to minimize chances for service interruption or facility-based service denial to a Licensee customer.

13.2.2 If Licensee fails to make the required rearrangements within the time prescribed or within such extended periods of time as may be granted by BellSouth in writing, BellSouth may perform such rearrangements with written notice to Licensee, and Licensee shall reimburse BellSouth for actual costs and expenses incurred by BellSouth in connection with the

rearrangement of Licensee's facilities; provided, however, that nothing contained in this Section or any license issued hereunder shall be construed as requiring Licensee to bear any expenses which, under the Telecommunications Act of 1996 or other applicable federal or state laws or regulations, are to be allocated to persons or entities other than Licensee; and provided further, however, that Licensee shall have no responsibility for rearrangement costs and expenses relating to rearrangements performed for the purpose of meeting BellSouth's business needs.

14. EMERGENCY REPAIRS AND POLE REPLACEMENTS

14.1 Licensee Responsible for Emergency Repairs to its Own Facilities. In general, Licensee shall be responsible for making emergency repairs to its own facilities and for formulating appropriate plans and practices which will enable it to make such emergency repairs. BellSouth shall be under no obligation to perform any repair or service restoration work of any kind with respect to Licensee's facilities.

15. INSPECTION BY BELLSOUTH OF LICENSEE'S FACILITIES

15.1 BellSouth's Right to Make Periodic or Spot Inspections. BellSouth shall have the right to make periodic or spot inspections at any time of any part of Licensee's facilities attached to BellSouth's poles, anchors or anchor/guy strands or occupying any BellSouth conduit or duct for the limited purpose of determining whether Licensee's facilities are in compliance with the terms of this Section and licenses hereunder; provided that such inspections must be non-invasive (e.g., no splice cases may be opened).

15.1.1 BellSouth will give Licensee advance written notice of such inspections, and Licensee shall have the right to have a representative attend such inspections, except in those instances where safety considerations justify the need for such inspection without the delay of waiting until written notice has been forwarded to Licensee.

15.1.2 Such inspections shall be conducted at BellSouth's expense; provided, however, that Licensee shall bear the cost of inspections as delineated in Section 3.12.

15.2 No Duty to Licensee. Neither the act of inspection by BellSouth of Licensee's facilities nor any failure to inspect such facilities shall operate to impose on BellSouth any liability of any kind whatsoever or to relieve Licensee of any responsibility, obligations or liability under this Section or otherwise existing.

16. NOTICE OF NONCOMPLIANCE

16.1 Notice of Noncompliance. If, at any time, BellSouth determines that Licensee's facilities or any part thereof have not been placed or

maintained or are not being used in accordance with the requirements of this Attachment 8, BellSouth may send written notice to Licensee specifying the alleged noncompliance. Licensee agrees to acknowledge receipt of the notice as soon as practicable. If Licensee does not dispute BellSouth's assertion that such facilities are not in compliance, Licensee agrees to provide BellSouth with a schedule for bringing such facilities into compliance, to bring the facilities into compliance within a reasonable time, and to notify BellSouth in writing when the facilities have been brought into compliance.

16.2 Disputes over Alleged Noncompliance. If Licensee disputes BellSouth's assertion that Licensee's facilities are not in compliance, Licensee shall notify BellSouth in writing of the basis for Licensee's assertion that its facilities are in compliance.

16.3 Failure to Bring Facilities into Compliance. If Licensee has not brought the facilities into compliance within a reasonable time or provided BellSouth with proof sufficient to persuade BellSouth that BellSouth erred in asserting that the facilities were not in compliance, and if BellSouth determines in good faith that the alleged noncompliance causes or is likely to cause material damage to BellSouth's facilities or those of other users, BellSouth may, at its option and Licensee's expense, take such non-service affecting steps as may be required to bring Licensee's facilities into compliance, including but not limited to correcting any conditions which do not meet the specifications of this Attachment 8.

16.4 Correction of Conditions by BellSouth. If BellSouth elects to bring Licensee's facilities into compliance, the provisions of this Section shall apply.

16.4.1 BellSouth will, whenever practicable, notify Licensee in writing before performing such work. The written notice shall describe the nature of the work to be performed and BellSouth's schedule for performing the work.

16.4.2 If Licensee's facilities have become detached or partially detached from supporting racks or wall supports located within a BellSouth manhole, BellSouth may, at Licensee's expense, reattach them but shall not be obligated to do so. If BellSouth does not reattach Licensee's facilities, BellSouth shall endeavor to arrange with Licensee for the reattachment of any facilities affected.

16.4.3 BellSouth shall, as soon as practicable after performing the work, advise Licensee in writing of the work performed or action taken. Upon receiving such notice, Licensee shall inspect the facilities and take such steps as Licensee may deem necessary to insure that the facilities meet Licensee's performance requirements.

16.5 Licensee to Bear Expenses. Licensee shall bear all expenses arising out of or in connection with any work performed to bring Licensee's facilities

into compliance with this Section; provided, however that nothing contained in this Section or any license issued hereunder shall be construed as requiring Licensee to bear any expenses which, under applicable federal or state laws or regulations, must be borne by persons or entities other than Licensee.

17. UNAUTHORIZED OCCUPANCY OR UTILIZATION OF BELLSOUTH'S FACILITIES

17.1 Licensing or Removal of Unauthorized Attachments. If any of Licensee's attachments shall be found attached to pole(s) or occupying conduit systems for which no license is outstanding, BellSouth, without prejudice to its other rights or remedies under this Attachment 8, including termination of licenses, may impose a charge and require Licensee to submit in writing, within thirty (30) days after receipt of written notification from BellSouth of the unauthorized attachment or conduit occupancy, a pole attachment or conduit occupancy license application. If such application is not received by BellSouth within the specified time period, Licensee may be required at BellSouth's option to remove its unauthorized attachment or occupancy within sixty (60) days of the final date for submitting the required application, or BellSouth may at BellSouth's option remove Licensee's facilities without liability, and the expense of such removal shall be borne by Licensee. Charges for any such unauthorized occupancy shall be equal to the applicable license fees and charges which would have been payable from and after the date such facilities were first placed on BellSouth's poles or in BellSouth's conduit system, if Licensee provides reasonable documentation of such placement. If Licensee is unable to provide such reasonable documentation, then Licensee will pay two years worth of the applicable charges.

17.1.1 Nothing contained in the Attachment 8 or any license issued hereunder shall be construed as requiring Licensee to bear any expenses which, under applicable federal or state laws or regulations, must be borne by persons or entities other than Licensee.

17.2 Prompt Payment of Applicable Fees and Charges. Fees and charges for pole attachments and conduit system occupancies, as specified herein and as modified from time to time, shall be due and payable immediately whether or not Licensee is permitted to continue the pole attachment or conduit occupancy. See Exhibit A, attached hereto and incorporated herein by this reference, for applicable annual rental fees.

17.3 No Implied Waiver or Ratification of Unauthorized Use. No act or failure to act by BellSouth with regard to said unlicensed use shall be deemed as a ratification of the unlicensed use; and if any license should be subsequently issued, said license shall not operate retroactively or

constitute a waiver by BellSouth of any of its rights or privileges under this Attachment 8 or otherwise; provided, however, that Licensee shall be subject to all liabilities, obligations and responsibilities of this Attachment 8 in regard to said unauthorized use from its inception.

18. REMOVAL OF LICENSEE'S FACILITIES

18.1 Pole Attachments. Licensee, at its expense, will remove its attachments from any of BellSouth's poles within thirty (30) days after termination of the license covering such attachments. If Licensee fails to remove its attachments within such thirty (30) day period, BellSouth shall have the right to remove such attachments at Licensee's expense and without any liability on the part of BellSouth for damage or injury to Licensee's attachments unless caused by the negligence or intentional misconduct of BellSouth.

18.2 Conduit Occupancy. Licensee, at its expense, will remove its communications facilities from a conduit system within sixty (60) days after:

18.2.1 Termination of the license covering such conduit occupancy; or

18.2.2 The date Licensee replaces its existing facilities in one duct with substitute facilities in another duct.

18.2.3 If Licensee fails to remove its facilities within the specified period, BellSouth shall have the right to remove such facilities at Licensee's expense and without any liability on the part of BellSouth for damage or injury to such facilities unless caused by the negligence or intentional misconduct of BellSouth.

18.3 Continuing Responsibility for Fees and Charges. Licensee shall remain liable for and pay to BellSouth all fees and charges pursuant to provisions of this Attachment 8 until all of Licensee's facilities are physically removed from BellSouth's poles or conduit system.

19. FEES, CHARGES, AND BILLING

19.1 License Charges. License charges commence on the first day of the calendar month following the date a license is issued. Such charges cease as of the final day of the calendar month preceding the month in which the attachment or occupancy is physically removed or the utilization is discontinued. A one-month minimum charge is applicable to all licenses.

19.2 Notice of Rate and Computation of Charges. On or about November 1 of each year, BellSouth will notify Licensee by certified mail, return receipt requested, of the rental rate and pole transfer rate to be applied in the subsequent calendar year. The letter of notification shall be incorporated in, and governed by, the terms and conditions of this Attachment 8.

Attachment and occupancy rates shall be applied to the number of pole(s) and duct feet of conduit for which licenses have been issued before December 1 of each calendar year. Charges for attachment(s) and occupancy which commenced during the preceding twelve (12) month period will be prorated accordingly.

20. ADVANCE PAYMENT AND IMPUTATION

20.1 Attachment and Occupancy Fees. Fees for pole attachment and conduit occupancy shall be based on the facilities for which licenses have been issued as of the date of billing by BellSouth, shall be computed as set forth herein.

20.1.1 Charges associated with newly licensed attachments or occupancies and other attachments or occupancies of less than the entire annual billing period shall be prorated.

20.1.2 Charges shall be prorated retroactively in the event of the removal of Licensee's facilities.

20.1.3 The amount of any advance payment required shall be due within sixty (60) days after receipt of an invoice from BellSouth.

20.2 Imputation. BellSouth shall impute to its costs of providing telecommunications services (and charge any affiliate, subsidiary, or associate company engaged in the provision of such services) an equal amount to the charges set forth in this Section for all of the conduits, ducts, and poles it occupies and uses.

21. ASSURANCE OF PAYMENT

21.1 Necessity and Level of Security. In the event Licensee fails to demonstrate credit worthiness, Licensee may be required to furnish a bond, letter of credit or other evidence of financial security having a minimum face amount of $10,000.00 per state or $50,000.00 per region. Such bond, letter of credit or other security shall be in a form satisfactory to BellSouth and may be increased from time to time as reasonably required by BellSouth to guarantee the performance of all obligations of Licensee hereunder. The amount of the bond, letter of credit or other security shall not operate as a limitation upon the obligations of Licensee hereunder.

22. INSURANCE

22.1 Licensee shall obtain and maintain insurance (or provide written evidence of being self-insured), including endorsements insuring the contractual liability and indemnification provisions of this Attachment 8, issued by an insurance carrier reasonably satisfactory to Licensor to protect the Licensor, other authorized Licensees, and Joint User(s) from and against all claims demands, causes of action, judgments, costs, including

reasonable attorneys' fees, expenses and liabilities of every kind and nature which may arise or result, directly or indirectly from or by reason of such loss, injury or damage as covered in this Attachment 8.

22.2 Licensee shall maintain the following amounts of insurance in compliance with Section 22.1 above:

22.2.1 Commercial General Liability Insurance with limits of not less than $1,000,000 per occurrence and $1,000,000 annual aggregate.

22.2.2 Umbrella or Excess Liability Insurance with limits of not less than $10,000,000 per occurrence and in the aggregate.

22.3 Licensee shall submit to Licensor certificates by each company insuring Licensee with respect to any insurance required hereunder, such certificate(s) to specify the coverage provided and that such company will not cancel or change any such policy of insurance issued to Licensee except after sixty (60) days written notice to Licensor.

22.4 Licensee shall also carry such insurance as will protect it from all claims under any Worker's Compensation Law in effect that may be applicable to it as a result of work performed pursuant to this Attachment 8.

22.5 All insurance required in accordance with Sections 22.2 and 22.3 preceding must be effective before Licensor will authorize attachment to a Pole and/or Anchor, or occupancy of a Conduit System and shall remain in force until such Licensee's facilities have been removed from all such Pole(s), Anchor(s), Conduit System, or Right of Way. In the event that the Licensee shall fail to maintain the required insurance coverage, Licensor may pay any premium thereon falling due, and the Licensee shall forthwith reimburse the Licensor for any such premium paid.

22.6 Licensee may self-insure any or all of the insurance coverages required in this Attachment 8.

23. AUTHORIZATION NOT EXCLUSIVE

23.1 Nothing herein contained shall be construed as a grant of any exclusive authorization, right or privilege to Licensee. BellSouth shall have the right to grant, renew and extend rights and privileges to others not parties to this Attachment 8, by contract or otherwise, to use any Pole, Anchor, or Conduit System covered by this Attachment 8 and Licensee's rights hereunder.

24. ASSIGNMENT OF RIGHTS

24.1 Any assignment by either party of any right, obligation, or duty, in whole or part, or of any interest, without the written consent of the other party (such consent not to be unreasonably withheld) shall be void. Notwithstanding the above, either party, upon written notice to the other party, may assign this agreement and any of its rights and privileges under this

Attachment 8, in whole or in part, to: (1) its parent, partners or their respective subsidiaries, affiliates or successors; (2) any entity which controls, is under the control of, or is under common control with the assigning party; or 3) any entity that purchases all or substantially all of the assets of the assigning party by way of merger, acquisition, or consolidation.

24.2 In the event such consent or consents are granted by BellSouth, then the provisions of this Attachment 8 shall apply to and bind the successors and assigns of the Licensee. Form NT-13 shall be used for this purpose.

25. FAILURE TO ENFORCE

25.1 Failure of BellSouth to enforce or insist upon compliance with any of the terms or conditions of this Attachment 8 or to give notice or declare this Attachment 8 or any authorization granted hereunder terminated shall not constitute a general waiver or relinquishment of any term or condition of this Attachment 8, but the same shall be and remain at all times in full force and effect.

26. DISPUTE RESOLUTION

When a dispute arises under this Attachment, either Party may avail itself of the complaint procedures set forth in 47 C.F.R. Ch. I, Subpart J--Pole Attachment Complaint Procedures, ¶¶ 1.1401-1.1416.

26.1 Termination of this Attachment 8 or any licenses issued hereunder shall not affect Licensee's liabilities and obligations incurred hereunder prior to the effective date of such termination.

27. SUPERSEDURE OF PREVIOUS AGREEMENT(S)

27.1 This Attachment 8 supersedes all previous agreements, whether written or oral, between BellSouth and Licensee for attachment and maintenance of Licensee's Communications Facilities on Pole(s), Anchor(s), and in Conduit Systems within the geographical area covered by this Attachment 8; and there are no other provisions, terms or conditions to this Attachment 8 except as expressed herein. All currently effective licenses heretofore granted pursuant to such previous agreements shall be subject to the terms and conditions of this Attachment 8.

2000 FCC Formula Supported Fees

for attachments and/or occupancy effective 1/1/2000

(Re-calculated annually)

Licensee shall pay to Licensor the following fees:

State	Poles *(ea. / yr.)*	Anchors *(ea. / yr.)*	Conduit	
				($ / ft. / yr.)
Alabama	$ 3.35	$ 4.89		$ 0.23
Kentucky ①				0.70
2-user	9.45	$ 12.90		
3-user	5.35	8.60		
Louisiana	6.90 ②			0.44
Mississippi	4.30			2.50 ③
Tennessee ④	4.57			0.30
Florida	3.74			0.36
		Miami River crossing		17.13
Georgia ⑤	4.69			0.35
North Carolina	3.55			0.35
South Carolina	2.93			0.30

① All rates in Kentucky are by tariff

② March 12, 1999 order placed a freeze on existing, approved rate until December 31, 2002. Therefore, $6.90 rate remains in effect.

③ Tariff rate in Mississippi

④ Tennessee rates are negotiated with CATV Association; conduit rates were established in 1998 and fixed indefinitely

⑤ FCC formula calculated rates; differs from Docket 7061-U

Conduit rates have been developed using the one-half (1/2) duct convention for 2000. This rate will apply to each passageway (innerduct).

i) For the purpose of determining the Duct feet chargeable, the Duct considered occupied shall be measured from the center to center of adjacent Manhole(s), or from the center of a Manhole to the end of a Duct not terminated in a Manhole.

ii) The above rates are not applicable for crossings of any navigable waterway. Rates for navigable waterway crossings will be calculated on an individual case basis.

Pole Attachment Transfer Rate

Per pole (throughout BellSouth region) $41.00

EXHIBIT A 10

EXHIBIT B 78

EXHIBIT C 84

EXHIBIT D 100

EXHIBIT E 106

Service Performance Measurements And Enforcement Mechanisms

1. Scope

This Attachment includes Enforcement Measurements with corresponding Enforcement Mechanisms applicable to this Agreement.

2. Reporting

2.1 In providing services pursuant to this Agreement, BellSouth will report its performance to Supra Telecom in accordance with BellSouth's Service Quality Measurements, which are contained in this Attachment as Exhibit A and in accordance with BellSouth's Enforcement Measurements, which are contained in this Attachment as Exhibit B.

2.2 BellSouth will make performance reports available to Supra Telecom on a monthly basis. The reports will contain information collected in each performance category and will be available to Supra Telecom through some electronic medium to be determined by BellSouth. BellSouth will also provide electronic access to the raw data underlying the performance measurements. Within thirty (30) days of execution of this Agreement, BellSouth will provide a detailed session of instruction to Supra Telecom regarding access to the reports and to the raw data as well as the nature of the format of the data provided.

3. Modifications to Measurements

3.1 Service Quality Measurements

3.1.1 BellSouth will update the Service Quality Measurements contained in Exhibit A of this Attachment each calendar quarter. BellSouth will not delete any Service Quality Measurement without prior written consent of Supra Telecom. Supra Telecom may provide input to BellSouth regarding any suggested additions, deletions or other modifications to the Service Quality Measurements. BellSouth will provide notice of all changes to the Service Quality Measurements via BellSouth's internet website.

3.1.2 Notwithstanding the foregoing, BellSouth may, from time to time, be ordered by a regulatory or judicial body to modify or amend the Service Quality Measurements. BellSouth will make all such changes to the Service Quality Measurements pursuant to Section ___ of the General Terms and Conditions of this Agreement, incorporated herein by reference.

3.1.3 Notwithstanding any other provision of this Agreement, in the event

a dispute arises regarding the modification or amendment of the Service Quality Measurements, the parties will refer the dispute to the Commission.

3.2 Enforcement Measurements and Statistical Test

3.2.1 In order for BellSouth to accurately administer the Enforcement Measurements contained in Exhibit B of this Attachment, the Enforcement Measurements shall be modified or amended only if BellSouth determines such modification or amendment is necessary. However, BellSouth will not delete any Enforcement Measurement without prior written consent of Supra Telecom. BellSouth will notify Supra Telecom of any such modification or amendment to the Enforcement
Measurements via BellSouth's internet website.

3.2.2 Notwithstanding the foregoing, BellSouth may, from time to time, be ordered by a regulatory or judicial body to modify or amend the Enforcement Measurements and/or Statistical Test. BellSouth will make all such changes to the Enforcement Measurements and/or Statistical Test pursuant to Section ___ of the General Terms and Conditions of this Agreement, incorporated herein by reference.

3.2.3 Notwithstanding any other provision of this Agreement, in the event a dispute arises regarding the modification or amendment of the Enforcement Measurements and/or Statistical Test, the parties will refer the dispute to the Commission.

4. **Enforcement Mechanisms**

4.1 Purpose

This section establishes meaningful and significant enforcement mechanisms voluntarily provided by BellSouth to verify and maintain compliance between BellSouth and Supra Telecom's operations as well as to maintain access to Operational Support System (OSS) functions. This section provides the terms and conditions for such self-effectuating enforcement mechanisms.

4.2 Effective Date

The enforcement mechanisms set forth in this section shall only become effective upon an effective FCC order, which has not been stayed, authorizing BellSouth to provide interLATA telecommunications services under section 271 of the Act within a particular state and shall only apply

to BellSouth's performance in any state in which the FCC has granted BellSouth interLATA authority.

4.3 Definitions

4.3.1 Enforcement Measurement Elements means the performance measurements set forth in Exhibit B, attached hereto and incorporated herein by this reference.

4.3.2 Enforcement Measurement Benchmark means a competitive level of performance negotiated by BellSouth used to compare the performance of BellSouth and Supra Telecom where no analogous process, product or service is feasible. See Exhibit B.

4.3.3 Enforcement Measurement Compliance means comparing performance levels provided to BellSouth retail customers with performance levels provided by BellSouth to the CLEC customer, as set forth in Exhibit C, attached hereto and incorporated herein by this reference.

4.3.4 Test Statistic and Balancing Critical Value is the means by which enforcement will be determine using statistically valid equations. See Exhibit C.

4.3.5 Cell is the point (below the wire center level) at which like-to-like comparisons are made. For example, all BellSouth retail POTS services, for residential customers, requiring a dispatch in a particular wire center, at a particular point in time will be compared directly to Supra Telecom resold services for residential customers, requiring a dispatch, in the same wire center, at a particular point in time. When determining compliance, these cells can have a positive or negative value. See Exhibit C.

4.3.6 Affected Volume means that proportion of the total Supra Telecom volume or CLEC Aggregate volume for which remedies will be paid.

4.3.7 Parity Gap refers to the incremental departure from a compliant-level of service. (See Exhibit D). This is also referred to as "diff" in the Statistical paper (See Exhibit C).

4.3.8 Tier-1 Enforcement Mechanisms means self-executing liquidated damages paid directly to Supra Telecom when BellSouth delivers non-compliant performance of any one of the Enforcement Measurement Elements for any month as calculated by BellSouth.

4.3.9 Tier-2 Enforcement Mechanisms means Assessments paid directly to a state Public Service Commission ("Commission") or its designee. Tier 2 Enforcement Mechanisms are triggered by three consecutive monthly failures in a quarter in which BellSouth performance is out of compliance

or does not meet the benchmarks for the aggregate of all CLEC data as calculated by BellSouth for a particular Enforcement Measurement Element.

4.3.10 Tier-3 Enforcement Mechanisms means the voluntary suspension of additional marketing and sales of long distance services triggered by excessive repeat failures of those specific submeasures as defined in Exhibit D attached hereto and incorporated herein by this reference.

4.4 Application

4.4.1 The application of the Tier-1, Tier-2, and Tier-3 Enforcement Mechanisms does not foreclose other non-contractual legal and regulatory claims and remedies available to Supra Telecom.

4.4.2 Proof of damages resulting from BellSouth's failure to maintain Enforcement Measurement Compliance would be difficult to ascertain and, therefore, liquidated damages are a reasonable approximation of any contractual damage. Liquidated damages under this provision are not intended to be a penalty.

4.5 Methodology

4.5.1 Tier-1 Enforcement Mechanisms will be triggered by BellSouth's failure to achieve Enforcement Measurement Compliance or Enforcement Measurement Benchmarks for the State for a given Enforcement Measurement Element in a given month based upon a test statistic and balancing critical value calculated by BellSouth utilizing BellSouth generated data. The method of calculation is attached hereto as Exhibit D and incorporated herein by this reference.

4.5.1.1 Tier-1 Enforcement Mechanisms apply on a per transaction basis for each negative cell and will escalate based upon the number of consecutive months that BellSouth has reported non-compliance.

4.5.1.2 Fee Schedule for Tier-1 Enforcement Mechanisms is shown in Table-1 attached hereto as Exhibit E and incorporated herein by this reference. Failures beyond Month 6 (as set forth in Table 1) will be subject to Month 6 fees.

4.5.2 Tier-2 Enforcement Mechanisms will be triggered by BellSouth's failure to achieve Enforcement Measurement Compliance or Enforcement Measurement Benchmarks for the State in a given calendar quarter based upon a statistically valid equation calculated by BellSouth utilizing BellSouth generated data. The method of calculation is attached hereto as Exhibit D and incorporated herein by reference.

4.5.2.1 Tier- 2 Enforcement Mechanisms apply, for an aggregate of all CLEC data generated by BellSouth, on a per transaction basis for each negative cell for a particular Enforcement Measurement Element.

4.5.2.2 Fee Schedule for Total Quarterly Tier-2 Enforcement Mechanisms is show in Table-2 attached hereto as Exhibit E and incorporated herein by this reference.

4.5.3 Tier-3 Enforcement Mechanisms will be triggered by BellSouth's failure to achieve Enforcement Measurement Compliance or Enforcement Measurement Benchmarks for a State in a given calendar quarter. The method of calculation for specified submeasures is identical to the method of calculation for Tier-2 Enforcement Mechanisms as described above. The specific submeasures which are the mechanism for triggering and removing a Tier-3 Enforcement Mechanisms are described in more detail in Exhibit D attached hereto and incorporated herein by this reference.

4.6 Payment of Tier-1 and Tier-2 Amounts

4.6.1 If BellSouth performance triggers an obligation to pay Tier-1 Enforcement Mechanisms to Supra Telecom or an obligation to remit Tier-2 Enforcement Mechanisms to the Commission, BellSouth shall make payment in the required amount on or before the thirtieth (30^{th}) day following the due date of the performance measurement report for the month in which the obligation arose.

4.6.2 For each day after the due date that BellSouth fails to pay Supra Telecom the required amount, BellSouth will pay interest to Supra Telecom at the maximum rate permitted by state law.

4.6.3 For each day after the due date that BellSouth fails to pay the Tier-2 Enforcement Mechanisms, BellSouth will pay the Commission an additional $1,000 per day.

4.6.4 If Supra Telecom disputes the amount paid to Supra Telecom for Tier-1 Enforcement Mechanisms, Supra Telecom shall submit a written claim to BellSouth within sixty (60) days after the date of the performance measurement report for which the obligation arose. BellSouth shall investigate all claims and provide Supra Telecom written findings within thirty (30) days after receipt of the claim. If BellSouth determines Supra Telecom is owed additional amounts, BellSouth shall pay Supra Telecom such additional amounts within thirty (30) days after its findings along with interest paid at the maximum rate permitted by law.

4.6.5 At the end of each calendar year, BellSouth will have its independent auditing and accounting firm certify that the results of all Tier-1 and Tier-2 Enforcement Mechanisms were paid and accounted for in accordance with Generally Accepted Account Principles (GAAP).

4.7 Limitations of Liability

4.7.1 BellSouth will not be responsible for Supra Telecom acts or omissions that cause performance measures to be missed or fail, including but not limited to accumulation and submission of orders at unreasonable quantities or times or failure to submit accurate orders or inquiries. BellSouth shall provide Supra Telecom with reasonable notice of such acts or omissions and provide Supra Telecom any such supporting documentation.

4.7.2 BellSouth shall not be obligated for Tier-1, Tier-2 or Tier 3 Enforcement Mechanisms for non-compliance with a performance measure if such non-compliance was the result of an act or omission by Supra Telecom that is in bad faith.

4.7.3 BellSouth shall not be obligated to pay Tier-1 Enforcement Mechanisms or Tier-2 Enforcement Mechanism for non-compliance with a performance measurement if such non-compliance was the result of any of the following: a Force Majeure event as set forth in the General Terms and Conditions of this Agreement; an act or omission by Supra Telecom that is contrary to any of its obligations under its Interconnection Agreement with BellSouth; an act or omission by Supra Telecom that is contrary to any of its obligations under the Act, Commission rule, or state law; an act or omission associated with third-party systems or equipment; or any occurrence that results from an incident reasonably related to the Y2K problem.

4.7.4 It is not the intent of the Parties that BellSouth be liable for both Tier-2 Enforcement Mechanisms and any other assessments or sanctions imposed by the Commission. Supra Telecom will not oppose any effort by BellSouth to set off Tier-2 Enforcement Mechanisms from any additional assessment imposed by the Commission.

4.7.5 Payment of any Tier-1 or Tier-2 Enforcement Mechanisms shall not be considered as an admission against interest or an admission of liability or culpability in any legal, regulatory or other proceeding relating to BellSouth's performance. The payment of any Tier-1 Enforcement Mechanisms to Supra Telecom shall release BellSouth for any liability associated with or related to the service performance measurement for the month for which the Enforcement Mechanisms was paid to Supra Telecom.

4.7.6 Supra Telecom acknowledges and argues that the Enforcement Mechanisms contained in this attachment have been provided by BellSouth on a completely voluntary basis in order to maintain compliance between BellSouth and Supra Telecom. Therefore, Supra Telecom may not use the existence of this section or any payments of any Tier-1 or Tier-2 Enforcement Mechanisms under this section as evidence that BellSouth has not complied with or has violated any state or federal law or regulation.

4.8 Enforcement Mechanism Caps

4.8.1 BellSouth's liability for the payment of Tier-1 and Tier-2 Enforcement Mechanisms shall be collectively capped at $625M per year for the entire BellSouth region as set forth below.

AL - $54M	MS - $44M
FL - $122M	NC - $77M
GA - $131M	SC - $47M
KY - $34M	TN - $57M
LA - $59M	
Regional Total - $625M	

4.8.2 If BellSouth's liability for the payment of Tier-1 and Tier-2 Enforcement Mechanisms exceed the caps referenced in this attachment, Supra Telecom may commence a proceeding with the Commission to demonstrate why BellSouth should pay any amount in excess of the cap. Supra Telecom shall have the burden of proof to demonstrate why, under the circumstances, BellSouth should have additional liability.

4.9 Dispute Resolution

4.9.1 Notwithstanding any other provision of this Agreement, any dispute regarding BellSouth's performance or obligations pursuant to this oAttachment shall be resolved by the Commission.

EXHIBIT A

ORDERING

Report/Measurement:	
O-7. Speed of Answer in Ordering Center	
Definition:	
Measures the average time a customer is in queue.	
Exclusions:	
None	
Business Rules:	
The clock starts when the appropriate option is selected (i.e. 1 for Resale Consumer, 2 for Resale Multiline, and 3 for UNE-LNP, etc.) and the call enters the queue for that particular group in the LCSC. The clock stops when a BST service representative in the LCSC answers the call. The speed of answer is determined by measuring and accumulating the elapsed time from the entry of a CLEC call into the BellSouth automatic call distributor (ACD) until the a service representative in BSTs Local Carrier Service Center (LCSC) answers the CLEC call.	
Calculation:	
(Total time in seconds to reach the LCSC) / (Total Number of Calls) in the Reporting Period.	
Report Structure:	
• CLEC Aggregate • BST Aggregate (Combination of Residence Service Center and Business Service Center data under development)	
Level of Disaggregation:	
• CLEC Aggregate • BST Aggregate (Combination of Residence Service Center and Business Service Center data under development)	
Data Retained Relating to CLEC Experience:	**Data Retained Relating to BST Performance:**
• Mechanized tracking through LCSC Automatic Call Distributor	• Mechanized tracking through BST Retail center support systems
Retail Analog/Benchmark:	
For CLEC, Speed of Answer in Ordering Center (LCSC) is comparable to Speed of Answer in BST Business Offices. See Appendix D	

Revision Date: 02/16/00 (lg)

ORDERING – (LNP)

Report/Measurement:

LNP-8. Percent Rejected Service Requests

Definition:

Percent Rejected Service Request is the percent of total Local Service Requests (LSRs) which are rejected due to error or omission. An LSR is considered valid when it is electronically submitted by the CLEC and passes LNP Gateway edit checks to insure the data received is correctly formatted and complete, i.e., fatal rejects are excluded.

Exclusions:

- Service Requests canceled by the CLEC
- Fatal Rejects
- Order Activities of BST or the CLEC associated with internal or administrative use of local services (Record Orders, Test Orders, etc.) where identifiable.

Business Rules:

An LSR is considered "rejected" when it is submitted electronically but does not pass edit checks in the ordering systems (EDI, TAG, LNP Gateway, LAUTO) and is returned to the CLEC without manual intervention.

Fully Mechanized: There are two types of "Rejects" in the Fully Mechanized category:

- A Fatal Reject occurs when a CLEC attempts to electronically submit an LSR (via EDI or TAG) but required fields are not populated correctly and the request is returned to the CLEC.
  Fatal rejects are reported in a separate column, and for informational purposes ONLY. They are not considered in the calculation of the percent of total LSRs rejected or the total number of rejected LSRs.
- An Auto Clarification is a valid LSR which is electronically submitted (via EDI or TAG), but is rejected from LAUTO because it does not pass further edit checks for order accuracy. Auto Clarifications are returned without manual intervention.

Partially Mechanized: A valid LSR which is electronically submitted (via EDI or TAG), but cannot be processed electronically due to a CLEC error and "falls out" for manual handling. It is then put into "clarification", and sent back to the CLEC.

Total Mechanized: Combination of Fully Mechanized and Partially Mechanized rejects.

Calculation

Percent Rejected Service Requests:
[(Number of Service Requests Rejected in the Reporting Period) / (Number of Service Requests Received in the Reporting Period)] x 100

Report Structure:

- Fully Mechanized, Partially Mechanized, Total Mechanized
- CLEC Specific
- CLEC Aggregate

Level of Disaggregation:

- Product Reporting Levels
  - LNP
  - UNE Loop with LNP
- Geographic Scope
  - .State, Region

Retail Analog/Benchmark:

See Appendix D

Revision Date: 02/16/00 (lg)

ORDERING – (LNP)

Report/Measurement:

LNP-9. Reject Interval Distribution & Average Reject Interval

Definition:

Reject Interval is the average reject time from receipt of an LSR to the distribution of a Reject. An LSR is considered valid when it is electronically submitted by the CLEC and passes LNP Gateway edit checks to insure the data received is correctly formatted and complete, i.e., fatal rejects are excluded.

Exclusions:

- Service Requests canceled by CLEC
- Fatal Rejects
- Order Activities of BST or the CLEC associated with internal or administrative use of local services (Record Orders, Test Orders, etc.) where identifiable.

Business Rules:

The Reject interval is determined for each rejected LSR processed during the reporting period. The Reject interval is the elapsed time from when BST receives LSR until that LSR is rejected back to the CLEC. Elapsed time for each LSR is accumulated for each reporting dimension. The accumulated time for each reporting dimension is then divided by the associated total number of rejected LSRs to produce the reject interval distribution.

An LSR is considered "rejected" when it is submitted electronically but does not pass edit checks in the ordering systems (EDI, TAG, LNP Gateway, LAUTO) and is returned to the CLEC without manual intervention.

Fully Mechanized: There are two types of "Rejects" in the Fully Mechanized category:

- A Fatal Reject occurs when a CLEC attempts to electronically submit an LSR but required fields are not populated correctly and the request is returned to the CLEC.
  Fatal rejects are reported in a separate column, and for informational purposes ONLY. They are not considered in the calculation of the percent of total LSRs rejected or the number of rejected LSRs.
- An Auto Clarification is a valid LSR which is electronically submitted (via EDI or TAG), but rejected from LAUTO because it does not pass further edit checks for order accuracy. Auto Clarifications are returned without manual intervention.

Partially Mechanized: A valid LSR which is electronically submitted (via EDI or TAG), but cannot be processed electronically due to a CLEC error and "falls out" for manual handling. It is then put into "clarification", and sent back to the CLEC.

Total Mechanized: Combination of Fully Mechanized and Partially Mechanized rejects.

Calculation:

Average Reject Interval:

Σ[(Date & Time of Service Request Rejection) - (Date & Time of Service Request Receipt)] / (Total Number of Service Requests Rejected in Reporting Period)

Reject Interval Distribution:

[Σ (Service Requests Rejected in "X" minutes/hours) / (Total Number of Service Requests Rejected in Reporting Period)] X 100

Report Structure:

- Fully Mechanized, Partially Mechanized, Total Mechanized
- CLEC Specific
- CLEC Aggregate

ORDERING – (LNP) - Reject Interval Distribution & Average Reject Interval – Continued)

Level of Disaggregation:
• Reported in intervals = 0 - 4 minutes, 4 - 8 minutes, 8 - 12 minutes, 12 - 60 minutes, 0 - 1 hours, 1 - 8 hours, 8 - 24 hours, >24 hours • Product Reporting Levels ➢ LNP ➢ UNE Loop with LNP • Geographic Scope ➢ .State, Region • Average Interval in Days
Retail Analog/Benchmark:
See Appendix D

Revision Date: 02/16/00 (lg)

ORDERING – (LNP)

Report/Measurement:

LNP-10. Firm Order Confirmation Timeliness Interval Distribution & Firm Order Confirmation Average Interval

Definition:

Interval for Return of a Firm Order Confirmation (FOC Interval) is the average response time from receipt of a valid LSR to distribution of a firm order confirmation.

Exclusions:

- Rejected LSRs (Clarifications or Fatal Rejects)
- Order Activities of BST or the CLEC associated with internal or administrative use of local services (Record Orders, Test Orders, etc.) where identifiable.

Business Rules:

The Firm Order Confirmation interval is determined for each FOC'd LSR processed during the reporting period. The Firm Order Confirmation interval is the elapsed time from when BST receives an LSR until that LSR is confirmed back to the CLEC. Elapsed time for each LSR is accumulated for each reporting dimension. The accumulated time for each reporting dimension is then divided by the associated total number of orders completed to produce the Firm Order Confirmation timeliness interval distribution.

- **Mechanized** - The elapsed time from receipt of a valid LSR until the LSR is processed and appropriate service orders are generated in SOCS without manual intervention.
- **Partially Mechanized** - The elapsed time from receipt of an electronically submitted LSR which falls out for manual handling by the LCSC personnel until appropriate service orders are issued by a BST service representative via Direct Order Entry (DOE) or Service Order Negotiation Generation System (SONGS).
- **Total Mechanized** - Combination of Fully Mechanized and Partially Mechanized FOCs.

Calculation:

Average FOC Interval:

Σ [(Date & Time of Firm Order Confirmation) - (Date & Time of Service Request Receipt)] / (Total number of Service Requests Confirmed in the Reporting Period)

FOC Interval Distribution:

Σ[(Service Requests Confirmed in "X" minutes/hours in the Reporting Period) / (Total Service Requests Confirmed in the Reporting Period)] X 100

Report Structure:

- Fully Mechanized, Partially Mechanized, Total Mechanized
- CLEC Specific
- CLEC Aggregate

Level of Disaggregation:

- Reported in intervals = 0 - 15 minutes, 15 - 30 minutes, 30 - 45 minutes, 45 - 60 minutes, 90 - 120 minutes, 120 - 240 minutes, 4 - 8 hours, 8 - 12 hours, 12 - 16 hours, 16 - 20 hours, 20 - 24 hours, 24 - 48 hours, >48 hours

UNE LOOPS without INP

PROVISIONING

Report/Measurement:
P-1. Mean Held Order Interval & Distribution Intervals
Definition:
When delays occur in completing CLEC orders, the average period that CLEC orders are held for BST reasons, pending a delayed completion, should be no worse for the CLEC when compared to BST delayed orders.
Exclusions:
Order Activities of BST associated with internal or administrative use of local services.
Business Rules:
Mean Held Order Interval: This metric is computed at the close of each report period. The held order interval is established by first identifying all orders, at the close of the reporting interval, that both have not been reported as completed in SOCS and have passed the currently committed due date for the order. For each such order, the number of calendar days between the committed due date and the close of the reporting period is established and represents the held order interval for that particular order. The held order interval is accumulated by the standard groupings, unless otherwise noted, and the reason for the order being held. The total number of days accumulated in a category is then divided by the number of held orders within the same category to produce the mean held order interval. The interval is by calendar days with no exclusions for Holidays or Sundays. CLEC Specific reporting is by type of held order (facilities, equipment, other), total number of orders held, and the total and average days. **Held Order Distribution Interval:** This measure provides data to report total days held and identifies these in categories of >15 days and > 90 days. (orders counted in >90 days are also included in >15 days).
Calculation:
Mean Held Order Interval: Σ(Reporting Period Close Date – Committed Order Due Date) / (Number of Orders Pending and Past The Committed Due Date) for all orders pending and past the committed due date. **Held Order Distribution Interval:** (# of Orders Held for ≥90 days) / (Total # of Orders Pending But Not Completed) X 100 (# of Orders Held for ≥15 days) / (Total # of Orders Pending But Not Completed) X 100
Report Structure:
• CLEC Specific • CLEC Aggregate • BST Aggregate
Level of Disaggregation:
Circuit breakout < 10, > = 10

PROVISIONING

Report/Measurement:

P-2. Average Jeopardy Notice Interval & Percentage of Orders Given Jeopardy Notices

Definition:

When BST can determine in advance that a committed due date is in jeopardy, it will provide advance notice to the CLEC.

Exclusions:

- Orders held for CLEC end user reasons
- Orders submitted to BST through non-mechanized methods

Business Rules:

When BST can determine in advance that a committed due date is in jeopardy it will provide advance notice to the CLEC. The number of committed orders in a report period is the number of orders that have a due date in the reporting period.

Calculation:

Average Jeopardy Interval = Σ [(Date and Time of Scheduled Due Date on Service Order) - (Date and Time of Jeopardy Notice)]/[Number of Orders Notified of Jeopardy in Reporting Period).
Percent of Orders Given Jeopardy Notice = Σ [(Number of Orders Given Jeopardy Notices in Reporting Period) / (Number of Orders Confirmed (due) in Reporting Period)

Report Structure:

- CLEC Specific
- CLEC Aggregate
- BST Aggregate

Data Retained Relating to CLEC Experience	Data Retained Relating to BST Experience

Revision Date: 01/05/00 (taf)

PROVISIONING

Report/Measurement:

P-3. Percent Missed Installation Appointments

Definition:

"Percent missed installation appointments" monitors the reliability of BST commitments with respect to committed due dates to assure that CLECs can reliably quote expected due dates to their retail customer as compared to BST.

Exclusions:

- Canceled Service Orders
- Order Activities of BST or the CLEC associated with internal or administrative use of local services (Record Orders, Test Orders, etc.)
- Disconnect (D) & From (F) orders
- End User Misses on Interconnection Trunks

Business Rules:

Percent Missed Installation Appointments is the percentage of total orders processed for which BST is unable to complete the service orders on the confirmed due dates. Missed Appointments caused by end-user reasons will be included and reported separately. A business day is any time period within the same date frame, which means there cannot be a cutoff time for commitments as certain types of orders are requested to be worked after standard business hours. Also, during Daylight Savings Time, field technicians are scheduled until 9PM in some areas and the customer is offered a greater range of intervals from which to select.

Calculation:

Percent Missed Installation Appointments = Σ (Number of Orders Not Complete by Committed Due Date in Reporting Period) / (Number of Orders Confirmed in Reporting Period) X 100

Report Structure:

- CLEC Specific
- CLEC Aggregate
- BST Aggregate

Report explanation: The difference between End User MA and Total MA is the result of BST caused misses. Here, Total MA is the total % of orders missed either by BST or CLEC end user. The End User MA represents the percentage of orders missed by the CLEC or their end user.

Level of Disaggregation:

- Reported in categories of <10 lines/circuits; > = 10 lines/circuits
- Dispatch/No Dispatch

PROVISIONING

Report/Measurement :
P-4. Average Completion Interval (OCI) & Order Completion Interval Distribution
Definition:
The "average completion interval" measure monitors the interval of time it takes BST to provide service for the CLEC or its' own customers. The "Order Completion Interval Distribution" provides the percentage of orders completed within certain time periods.
Exclusions:
• Canceled Service Orders • Order Activities of BST or the CLEC associated with internal or administrative use of local services (Record Orders, Test Orders, etc.) • D (Disconnect) and F (From) orders. (From is disconnect side of a move order when the customer moves to a new address). • "L" Appointment coded orders (where the customer has requested a later than offered interval)
Business Rules:
The actual completion interval is determined for each order processed during the reporting period. The completion interval is the elapsed time from when BST issues a FOC or SOCS date time stamp receipt of an order from the CLEC to BST's actual order completion date. The clock starts when a valid order number is assigned by SOCS and stops when the technician or system completes the order in SOCS. Elapsed time for each order is accumulated for each reporting dimension. The accumulated time for each reporting dimension is then divided by the associated total number of orders completed. The interval breakout for UNE and Design is: 0-5 = 0-4.99, 5-10 = 5-9.99, 10-15 = 10-14.99, 15-20 = 15-19.99 20-25 = 20-24.99, 25-30 = 25-29.99, >=30 = 30 and greater.
Calculation :
Average Completion Interval: Σ [(Completion Date & Time) - (Order Issue Date & Time)] / Σ (Count of Orders Completed in Reporting period) **Order Completion Interval Distribution:** Σ (Service Orders Completed in "X" days) / (Total Service Orders Completed in Reporting Period) X 100
Report Structure:
• CLEC Specific • CLEC Aggregate • BST Aggregate
Level of Disaggregation:
• ISDN Orders included in Non Design - GA Only • Dispatch/No Dispatch categories applicable to all levels except trunks. • Residence & Business reported in day intervals = 0,1,2,3,4, 5, 5+ • UNE and Design reported in day intervals = 0-5, 5-10, 10-15, 15-20, 20-25, 25-30, >=30 • All Levels are reported <10 line/circuits; >=10 line/circuits

PROVISIONING

Report/Measurement:	
P-5. Average Completion Notice Interval	
Definition:	
The Completion Notice Interval is the elapsed time between the BST reported completion of work and the issuance of a valid completion notice to the CLEC.	
Exclusions:	
• Non-mechanized Orders • Cancelled Service Orders • Order Activities of BST associated with internal or administrative use of local services • D & F orders	
Business Rules:	
Measurement of interval of completion date and time by a field technician on dispatched orders, and 5PM start time on the due date for non-dispatched orders; to the release of a notice to the CLEC/BST of the completion status. The field technician notifies the CLEC the work was complete and then he enters the completion time stamp information in his computer. This information switches through to the SOCS systems either completing the order or rejecting the order to the Work Management Center (WMC). If the completion is rejected, it is manually corrected and then completed by the WMC. The notice is returned on each individual order submitted and as the notice is sent electronically, it can only be switched to those orders that were submitted by the CLEC electronically. The start time is the completion stamp either by the field technician or the 5PM due date stamp; the end time is the time stamp the notice was submitted to the CLEC/BST system.	
Calculation:	
Σ (Date and Time of Notice of Completion) – (Date and Time of Work Completion) / (Number of Orders Completed in Reporting Period)	
Report Structure:	
• CLEC Specific • CLEC Aggregate • BST Aggregate	
Level of Disaggregation:	
• Reporting intervals in Hours: 0-1, 1-2, 2-4, 4-8, 8-12, 12-24, > 24, plus Overall Average Hour Interval • Reported in categories of <10 line/circuits; >= 10 line/circuits

Revision Date 02/24/00 (taf)

PROVISIONING

Report/Measurement:	
P-6. Coordinated Customer Conversions	
Definition:	
This category measures the average time it takes BST to disconnect an unbundled loop from the BST switch and cross connect it to a CLEC's equipment. This measurement applies to service orders with and without INP, and where the CLEC has requested BST to provide a coordinated cutover.	
Exclusions:	
• Any order canceled by the CLEC will be excluded from this measurement. • Delays due to CLEC following disconnection of the unbundled loop • Unbundled Loops where there is no existing subscriber loop and loops where coordination in not requested.	
Business Rules:	
Where the service order includes INP, the interval includes the total time for the cutover including the translation time to place the line back in service on the ported line. The interval is calculated for the entire cutover time for the service order and then divided by items worked in that time to give the average per item interval for each service order.	
Calculation:	
Σ [(Completion Date and Time for Cross Connection of an Coordinated Unbundled Loop)- (Disconnection Date and Time of an Coordinated Unbundled Loop)] / Total Number of Unbundled Loop with Coordinated Conversions (items) for the reporting period.	
Report Structure:	
• CLEC Specific • CLEC Aggregate	
Level of Disaggregation:	
Reported in intervals <=5 minutes; >5,<=15 minutes; >15 minutes, plus Overall Average interval	
Data Retained Relating to CLEC Experience	**Data Retained Relating to BST Experience**
• Report Month • CLEC Order Number • Committed Due Date (DD) • Service Type (CLASS_SVC_DESC) • Cutover Start Time • Cutover Completion time • Portability start and completion times (INP orders) • Total Conversions (Items) **NOTE:** Code in parentheses is the corresponding header found in the raw data file.	• No BST Analog Exists
Retail Analog/Benchmark:	
There is no retail analog for this measurement because it measures cutting loops to the CLEC. Benchmark – See Appendix D	

Revision Date: 02/28/00 (taf)

PROVISIONING

Report/Measurement:	
P-7. % Provisioning Troubles within 30 days of Service Order Activity	
Definition:	
Percent Provisioning Troubles within 30 days of Installation measures the quality and accuracy of installation activities.	
Exclusions:	
• Canceled Service Orders • Order Activities of BST or the CLEC associated with internal or administrative use of local services (R Orders, Test Orders, etc.) • D & F orders	
Business Rules:	
Measures the quality and accuracy of completed orders. The first trouble report from a service order after completion is counted in this measure. Subsequent trouble reports are measured in Repeat Report Rate. Reports are calculated searching in the prior report period for completed service orders and following 30 days after completion for a trouble report. D & F orders are excluded as there is no subsequent activity following a disconnect.	
Calculation:	
% Provisioning Troubles within 30 days of Service Order Activity = Σ (Trouble reports on all completed orders ≤ 30 days following service order(s) completion) / (All Service Orders completed in the report calendar month) X 100	
Report Structure:	
• CLEC Specific • CLEC Aggregate • BST Aggregate	
Level of Disaggregation:	
• Reported in categories of <10 line/circuits; > = 10 line/circuits • Dispatch / No Dispatch

Revision Date: 02/28/00 (taf)

PROVISIONING

Report/Measurement :

P-8. Total Service Order Cycle Time (TSOCT)

Definition:

This report measures the total service order cycle time from receipt of a valid service order request to the completion of the service order.

Exclusions:

- Canceled Service Orders
- Order Activities of BST or the CLEC associated with internal or administrative use of local services (Record Orders, Test Orders, etc.)
- D (Disconnect) and F (From) orders. (From is disconnect side of a move order when the customer moves to a new address).
- "L" Appointment coded orders (where the customer has requested a later than offered interval)
- Orders with CLEC/Subscriber caused delays or CLEC/Subscriber requested due date changes.

Business Rules:

The interval is determined for each order processed during the reporting period. This measurement combines two reports: FOC (Firm Order Confirmation) with Average Order Completion Interval.

This interval starts with the receipt of a valid service order request and stops when the technician or system completes the order in SOCS. Elapsed time for each order is accumulated for each reporting dimension. The accumulated time for each reporting dimension is then divided by the associated total number of orders completed.

Calculation :

Total Service Order Cycle Time

Σ(Date and Time of Service Request Receipt) – (Completion Date and Time of Service Order) (SOCS HIST-CD DATE) / (Count of Orders Completed in Reporting Period)

Report Structure:

- CLEC Specific
- CLEC Aggregate
- BST Aggregate

Level of Disaggregation:

- Reported in categories of < 10 line/circuits; > = 10 line/circuits
- Dispatch/No Dispatch categories applicable to all levels except trunks.
- Intervals 0-5, 5-10, 10-15, 15-20, 20-25, 25-30, > = 30 Days

Data Retained Relating to CLEC Experience	Data Retained Relating to BST Experience
• Report Month • Interval for FOC • CLEC Company Name • Order Number (PON) • Submission Date & Time (TICKET_ID) • Completion Date (CMPLTN_DT) • Service Type (CLASS_SVC_DESC) • Geographic Scope **NOTE:** Code in parentheses is the corresponding header found in the raw data file.	• Report Month • BST Order Number • Order Submission Date & Time • Order Completion Date & Time • Service Type • Geographic Scope

Retail Analog/Benchmark

See Appendix D

Revision Date: 02/28/00 (taf)

PROVISIONING

Report/Measurement:	
P-9. Service Order Accuracy GEORGIA ONLY	
Definition:	
The "service order accuracy" measurement measures the accuracy and completeness of BST service orders by comparing what was ordered and what was completed.	
Exclusions:	
• Cancelled Service Orders • Order Activities of BST associated with internal or administrative use of local services • & F orders	
Business Rules:	
A manual sampling of service orders, completed during a monthly reporting period, is compared to the original account profile and the order that the CLEC sent to BST. An order is "completed without error" if all service attributes and account detail changes (as determined by comparing the original order) completely and accurately reflect the activity specified on the original order and any supplemental CLEC order.	
Calculation:	
Percent Service Order Accuracy = Σ (Orders Completed without Error) / Σ (Orders Completed in Reporting Period) x 100	
Report Structure:	
CLEC Aggregate	
Level *of* Disaggregation:	
• Reported in categories of <10 line/circuits; > = 10 line/circuits • Dispatch / No Dispatch	
Data Retained Relating to CLEC Experience	**Data Retained Relating to BST Experience**
• Report Month • CLEC Order Number and PON • Local Service Request (LSR) • Order Submission Date • Committed Due Date • Service Type • Standard Order Activity **NOTE:** Code in parentheses is the corresponding header found in the raw data file.	• Being investigated at this time
Retail Analog/Benchmark: (Under Investigation)	

Revision Date: 01/05/00 (taf)

PROVISIONING

Report/Measurement:
LNP – 10. Percent Missed Installation Appointments
Definition:
Percent Missed Installation Appointments monitors the reliability of BST commitments with respect to committed due dates to assure that CLECs can reliably quote expected due dates to their retail customer as compared to BST.
Exclusions:
• Canceled Service Orders • Order Activities of BST or the CLEC associated with internal or administrative use of local services (Record Orders, Test Orders, etc.) where identifiable.
Business Rules:
Percent Missed Installation Appointments (PMI) is the percentage of total orders processed for which BST is unable to complete the service orders on the committed due dates. Missed Appointments caused by end-user reasons will be included and reported in a separate category. A business day is any time period within the same date frame, which means there cannot be a cutoff time for commitments as certain types of orders are requested to be worked after standard business hours. Also, during Daylight Savings Time, field technicians are scheduled until 9PM in some areas and the customer is offered a greater range of intervals from which to select.
Calculation:
Percent Missed Installation Appointments: [(Number of Orders Not Completed by Committed Due Date in Reporting Period) / (Number of Orders Completed in Reporting Period)] X 100
Report Structure:
• Mechanized (service orders generated by LSRs submitted via EDI or TAG) • CLEC Specific • CLEC Aggregate **Report explanation:** Total Missed Appointments is the total % of orders missed either by BST or the CLEC end user. End User MA represents the percentage of orders missed by the CLEC end user. The difference between End User Missed Appointments and Total Missed Appointments is the result of BST caused misses.
Level of Disaggregation:
• Product Reporting Levels ➢ LNP ➢ UNE Loop Associated w/LNP • Geographic Scope ➢ State, Region
Retail Analog/Benchmark:
See Appendix D

Revision Date: 02/16/00 (taf)

PROVISIONING – (LNP)

Report/Measurement :
LNP-11. Average Disconnect Timeliness Interval & Disconnect Timeliness Interval Distribution
Definition:
Disconnect Timeliness is defined as the interval between the time the LNP Gateway receives the 'Number Ported' message from NPAC (signifying the CLEC 'Activate') until the time that the Disconnect service order for an LSR is completed in SOCS. This interval effectively measures BST responsiveness by isolating it from impacts that are caused by CLEC related activities.
Exclusions:
• Canceled Service Orders • Order Activities of BST or the CLEC associated with internal or administrative use of local services (Record Orders, Test Orders, etc.) where identifiable.
Business Rules:
The Disconnect Timeliness interval is determined for the last Disconnect service order processed on an LSR during the reporting period. The Disconnect Timeliness interval is the elapsed time from when BST receives the last 'Number Ported' message for an LSR from NPAC (signifying the CLEC 'Activate') until the last Disconnect service order is completed in SOCS. Elapsed time for each order is accumulated for each reporting dimension. The accumulated time for each reporting dimension is then divided by the total number of selected disconnect orders which have been completed.
Calculation :
Average Disconnect Timeliness Interval: Σ[(Disconnect Service Order Completion Date & Time) - ('Number Ported' Message Received Date & Time)] / Σ (Total Number of Disconnect Service Orders Completed in Reporting Period) **Disconnect Timeliness Interval Distribution:** [Σ (Disconnect Service Orders Completed in "X" days) / (Total Disconnect Service Orders Completed in Reporting Period)] X 100
Report Structure:
• Mechanized (service orders generated by LSRs submitted via EDI or TAG) • CLEC Specific • CLEC Aggregate
Level of Disaggregation:
• Reported in day intervals = 0,1,2,3,4, 5, >5 days • Product Reporting Levels ➢LNP • Geographic Scope ➢State, Region
Retail Analog/Benchmark:
See Appendix D

Revision Date: 02/16/00 (taf)

PROVISIONING

Report/Measurement :
LNP-12. Total Service Order Cycle Time
Definition:
Total Service Order Cycle Time measures the interval from receipt of a valid service order request to the completion of the final service order associated with that service request.
Exclusions:
• Canceled Service Orders • Order Activities of BST or the CLEC associated with internal or administrative use of local services (Record Orders, Test Orders, etc.) where identifiable • "L" appointment coded orders (indicating the customer has requested a later than offered interval) • "S" missed appointment coded orders (indicating subscriber missed reasons), except for "SP" codes (indicating subscriber prior due date requested).
Business Rules:
The interval is determined for each service request processed during the reporting period. This measurement combines two reports: FOC (Firm Order Confirmation) with Average Order Completion Interval. This interval starts with the receipt of a valid service request and stops when the technician or system completes all the related service orders for the LSR in SOCS. Elapsed time for each service request is accumulated for each reporting dimension. The accumulated time for each reporting dimension is then divided by the associated total number of service requests completed to produce the total service order cycle time.
Calculation :
Average Total Service Order Cycle Time: Σ[(Service Order Completion Date & Time) - (Service Request Receipt Date & Time)] / Σ (Total Number Service Requests Completed in Reporting Period) **Total Service Order Cycle Time Interval Distribution:** [Σ (Total Number of Service Requests Completed in "X" minutes/hours) / (Total Number of Service Requests Received in Reporting Period)] X 100
Report Structure:
• Mechanized (service orders generated by LSRs submitted via EDI or TAG) • CLEC Specific • CLEC Aggregate • "W" Appointment Code Only (Company Offered)
Level of Disaggregation:
• Reported in day intervals 0 - 5, 5 - 10, 10 - 15, 15 - 20, 20 - 25, 25 - 30, >30 days • Product Reporting Levels ➢ LNP ➢ UNE Loop with LNP • Geographic Scope ➢ State, Region

MAINTENANCE & REPAIR

Report/Measurement:

M&R-1. Missed Repair Appointments

Definition:

The percent of trouble reports not cleared by the committed date and time.

Exclusions:

- Trouble tickets canceled at the CLEC request.
- BST trouble reports associated with internal or administrative service.
- Customer Provided Equipment (CPE) troubles or CLEC Equipment Trouble.

Business Rules:

The negotiated commitment date and time is established when the repair report is received. The cleared time is the date and time that BST personnel clear the trouble and closes the trouble report in his Computer Access Terminal (CAT) or workstation. If this is after the Commitment time, the report is flagged as a "Missed Commitment" or a missed repair appointment. When the data for this measure is collected for BST and a CLEC, it can be used to compare the percentage of the time repair appointments are missed due to BST reasons. Note: Appointment intervals vary with force availability in the POTS environment. Specials and Trunk intervals are standard interval appointments of no greater than 24 hours.

Calculation:

Percentage of Missed Repair Appointments =Σ (Count of Customer Troubles Not Cleared by the Quoted Commitment Date and Time) / Σ (Total Trouble reports closed in Reporting Period) X 100

Report Structure:

- CLEC Specific
- CLEC Aggregate
- BST Aggregate

Data Retained Relating to CLEC Experience	Data Retained Relating to BST Experience

Revision Date: 02/22/00 (see)

MAINTENANCE & REPAIR

Report/Measurement:

M&R-2. Customer Trouble Report Rate

Definition:

Initial and repeated customer direct or referred troubles reported within a calendar month per 100 lines/ circuits in service.

Exclusions:

- Trouble tickets canceled at the CLEC request.
- BST trouble reports associated with administrative service.
- Customer provided Equipment (CPE) troubles or CLEC equipment troubles.

Business Rules:

Customer Trouble Report Rate is computed by accumulating the number of maintenance initial and repeated trouble reports during the reporting period. The resulting number of trouble reports are divided by the total "number of service" lines, ports or combination that exist for the CLEC's and BST respectively at the end of the report month.

Calculation:

Customer Trouble Report Rate = (Count of Initial and Repeated Trouble Reports in the Current Period) / (Number of Service Access Lines in service at End of the Report Period) X 100

Report Structure:

- CLEC Specific
- CLEC Aggregate
- BST Aggregate

Data Retained Relating to CLEC Experience	Data Retained Relating to BST Experience
• Report Month • CLEC Company Name • Ticket Submission Date & Time (TICKET_ID) • Ticket Completion Date (CMPLTN_DT) • Service Type (CLASS_SVC_DESC) • Disposition and Cause (CAUSE_CD & CAUSE_DESC) • # Service Access Lines in Service at the end of period • Geographic Scope **NOTE:** Code in parentheses is the corresponding header found in the raw data file.	• Report Month • BST Company Code • Ticket Submission Date & Time • Ticket Completion Date • Service Type • Disposition and Cause (Non-Design / Non-Special Only) • Trouble Code (Design and Trunking Services) • # Service Access Lines in Service at the end of period • Geographic Scope

MAINTENANCE & REPAIR

Report/Measurement:

M&R-3. Maintenance Average Duration

Definition:

The Average duration of Customer Trouble Reports from the receipt of the Customer Trouble Report to the time the trouble report is cleared.

Exclusions:

- Trouble reports canceled at the CLEC request
- BST trouble reports associated with administrative service
- Customer Provided Equipment (CPE) troubles or CLEC Equipment Troubles.
- Trouble reports greater than 10 days

Business Rules:

For Average Duration the clock starts on the date and time of the receipt of a correct repair request. The clock stops on the date and time the service is restored and the customer notified (when the technician completes the trouble ticket on his/her CAT or work system).

NOTE: Customer can be BST or CLEC

Calculation:

Maintenance Average Duration = Σ(Date and Time of Service Restoration) – (Date and Time Trouble Ticket was Opened) / Σ(Total Closed Troubles in the reporting period)

Report Structure:

- CLEC Specific
- BST Aggregate
- CLEC Aggregate

Data Retained Relating to CLEC Experience	Data Retained Relating to BST Experience

MAINTENANCE & REPAIR

Report/Measurement:

M&R-4. Percent Repeat Troubles within 30 Days

Definition:

Trouble reports on the same line/circuit as a previous trouble report received within 30 calendar days as a percent of total troubles reported.

Exclusions:

- Trouble Reports canceled at the CLEC request
- BST Trouble Reports associated with administrative service
- Customer Provided Equipment (CPE) Troubles or CLEC Equipment Troubles.

Business Rules:

Includes Customer trouble reports received within 30 days of an original Customer trouble report.

Calculation:

Percent Repeat Troubles within 30 Days = (Count of Customer Troubles where more than one trouble report was logged for the same service line within a continuous 30 days) / (Total Trouble Reports Closed in Reporting Period) X 100

Report Structure:

- CLEC Specific
- CLEC Aggregate
- BST Aggregate

MANTENANCE & REPAIR

Report/Measurement:

M&R-5. Out of Service (OOS) > 24 Hours

Definition:

For Out of Service Troubles (no dial tone, cannot be called or cannot call out) the percentage of troubles cleared in excess of 24 hours. (All design services are considered to be out of service).

Exclusions:

- Trouble Reports canceled at the CLEC request
- BST Trouble Reports associated with administrative service
- Customer Provided Equipment (CPE) Troubles or CLEC Equipment Troubles.

Business Rules:

Customer Trouble reports that are out of service and cleared in excess of 24 hours. The clock begins when the trouble report is created in LMOS and the trouble is counted if the time exceeds 24 hours.

Calculation:

Out of Service (OOS) > 24 hours = (Total Troubles OOS > 24 Hours) / Total OOS Troubles in Reporting Period) X 100

Report Structure:

- CLEC Specific
- BST Aggregate
- CLEC Aggregate

Data Retained Relating to CLEC Experience	Data Retained Relating to BST Experience
• Report Month • Total Tickets • CLEC Company Name • Ticket Submission Date & Time (TICKET_ID) • Ticket Completion Date (CMPLTN_DT • Percentage of Customer Troubles out of • Service > 24 Hours (OOS>24_FLAG) • Service type (CLASS_SVC_DESC) • Disposition and Cause (CAUSE_CD & CAUSE-DESC) • Geographic Scope **NOTE:** Code in parentheses is the corresponding header found in the raw data file.	• Report Month • Total Tickets • BST Company Code • Ticket Submission Date • Ticket Submission time • Ticket Completion Date • Ticket Completion Time • Percent of Customer Troubles out of Service > 24 Hours • Service type • Disposition and Cause (Non – Design/Non-Special only) • Trouble Code (Design and Trunking Services) • Geographic Scope

Revision Date: 02/22/00 (see)

MAINTENANCE & REPAIR

Report/Measurement:	
M&R-6. Average Answer Time – Repair Centers	
Definition:	
This measures the average time a customers is in Que.	
Exclusions:	
None	
Business Rules:	
This measure is designed to measure the time required for CLEC & BST from the time of the ACD choice to the time of being answered. The clock starts when the CLEC Rep makes a choice to be put in queue for the next repair attendant and the clock stops when the repair attendant answers the call. (NOTE: The Column is a combined BST Residence and Business number)	
Level of Disaggregation:	
Region. CLEC/BST Service Centers and BST Repair Centers are regional.	
Calculation:	
Average Answer Time for BST's Repair Centers = (Time BST Repair Attendant Answers Call) – (Time of entry into queue until ACD Selection) / (Total number of calls by reporting period)	
Report Structure:	
• CLEC Aggregate • BST Aggregate	
Data Retained Relating to CLEC Experience	**Data Retained Relating to BST Experience**
• CLEC Average Answer Time	• BST Average Answer Time
Retail Analog/Benchmark:	
For CLEC, Average Answer Times in UNE Center and BRMC are comparable to the Average Answer Times in the BST Repair Centers. See Appendix D	

Revision Date: 02/22/00 (see)

BILLING

Report/Measurement:	
B-1. Invoice Accuracy	
Definition:	
This measure provides the percentage of accuracy of the billing invoices rendered to CLECs during the current month.	
Exclusions:	
• Adjustments not related to billing errors (e.g., credits for service outage, special promotion credits, adjustments to satisfy the customer)	
Business Rules:	
The accuracy of billing invoices delivered by BST to the CLEC must enable them to provide a degree of billing accuracy comparative to BST bills rendered to retail customers BST. CLECs request adjustments on bills determined to be incorrect. The BellSouth Billing verification process includes manually analyzing a sample of local bills from each bill period. The bill verification process draws from a mix of different customer billing options and types of service. An end-to-end auditing process is performed for new products and services. Internal measurements and controls are maintained on all billing processes.	
Calculation:	
Invoice Accuracy = (Total Billed Revenues during current month) – (Billing Related Adjustments during current month) / Total Billed Revenues during current month X 100	
Report Structure:	
• CLEC Specific • CLEC Aggregate • BST Aggregate	
Level of Disaggregation :	
• Product / Invoice Type ➢ Resale ➢ UNE ➢ Interconnection • Geographic Scope ➢ Region	
Data Retained Relating to CLEC Experience:	**Data Retained Relating to BST Performance:**
• Report Month • Invoice Type • Total Billed Revenue • Billing Related Adjustments	• Report Month • Retail Type ➢ CRIS ➢ CABS • Total Billed Revenue • Billing Related Adjustments
Retail Analog/Benchmark	
CLEC Invoice Accuracy is comparable to BST Invoice Accuracy See Appendix D	

Revision Date: 02/28/00 (dg)

BILLING

Report/Measurement:	
B-2. Mean Time to Deliver Invoices	
Definition:	
This measure provides the mean interval for billing invoices	
Exclusions:	
Any invoices rejected due to formatting or content errors.	
Business Rules:	
Measures the mean interval for timeliness of billing records delivered to CLECs in an agreed upon format. CRIS-based invoices are measured in business days, and CABS-based invoices in calendar days.	
Calculation:	
Mean Time To Deliver Invoices = Σ_[(Invoice Transmission Date)– (Close Date of Scheduled Bill Cycle)] / (Count of Invoices Transmitted in Reporting Period)	
Report Structure:	
• CLEC Specific • CLEC Aggregate • BST Aggregate	
Level of Disaggregation:	
• Product / Invoice Type ➢ Resale ➢ UNE ➢ Interconnection • Geographic Scope ➢ Region	
Data Retained Relating to CLEC Experience:	**Data Retained Relating to BST Performance:**
• Report Month • Invoice Type • Invoice Transmission Count • Date of Scheduled Bill Close	• Report Month • Retail Type ➢ CRIS ➢ CABS • Invoice Transmission Count • Date of Scheduled Bill Close
Retail Analog/Benchmark:	
CRIS-based invoices will be released for delivery within six (6) business days CABS-based invoices will be released for delivery within eight (8) calendar days. CLEC Average Delivery Intervals for both CRIS and CABS Invoices are comparable to BST Average delivery for both systems. See Appendix D	

Revision Date: 02/28/00 (dg)

BILLING

Report/Measurement:	
B-3. Usage Data Delivery Accuracy	
Definition:	
This measurement captures the percentage of recorded usage that is delivered error free and in an acceptable format to the appropriate Competitive Local Exchange Carrier (CLEC). These percentages will provide the necessary data for use as a comparative measurement for BellSouth performance. This measurement captures Data Delivery Accuracy rather than the accuracy of the individual usage recording.	
Exclusions:	
None	
Business Rules:	
The accuracy of the data delivery of usage records delivered by BST to the CLEC must enable them to provide a degree of accuracy comparative to BST bills rendered to their retail customers. If errors are detected in the delivery process, they are investigated, evaluated and documented. Errors are corrected and the data retransmitted to the CLEC.	
Calculations:	
Usage Data Delivery Accuracy = Σ[(Total number of usage data packs sent during current month) – (Total number of usage data packs requiring retransmission during current month)] / (Total number of usage data packs sent during current month) X 100	
Report Structure:	
• CLEC Specific • CLEC Aggregate • BST Aggregate	
Level of Disaggregation:	
• Geographic Scope ➢ Region	
Data Retained Relating to CLEC Experience:	**Data Retained Relating to BST Performance:**
• Report Month • Record Type ➢ BellSouth Recorded ➢ Non BellSouth Recorded	• Report Month • Record Type
Retail Analog/Benchmark:	
CLEC Usage Data Delivery Accuracy is comparable to BST Usage Data Delivery Accuracy See Appendix D	

Revision Date: 02/28/00 (dg)

BILLING

Report/Measurement:
B-4. Usage Data Delivery Completeness
Definition:
This measurement provides percentage of complete and accurately recorded usage data (usage recorded by BellSouth and usage recorded by other companies and sent to BST for billing) that is processed and transmitted to the CLEC within thirty (30) days of the message recording date. A parity measure is also provided showing completeness of BST messages processed and transmitted via CMDS. BellSouth delivers its own retail usage from recording location to billing location via CMDS as well as delivering billing data to other companies. Timeliness, Completeness and Mean Time to Deliver Usage measures are reported on the same report.
Exclusions:
None
Business Rules:
The purpose of these measurements is to demonstrate the level of quality of usage data delivered to the appropriate CLEC. Method of delivery is at the option of the CLEC.
Calculation:
Usage Data Delivery Completeness = Σ(Total number of Recorded usage records delivered during the current month that are within thirty (30) days of the message recording date) / Σ(Total number of Recorded usage records delivered during the current month) X 100
Report Structure
• CLEC Specific • CLEC Aggregate • BST Aggregate
Level of Disaggregation:
• Geographic Scope ➢ Region

Data Retained Relating to CLEC Experience:	Data Retained Relating to BST Performance:
• Report Month • Record Type ➢ BellSouth Recorded ➢ Non BellSouth Recorded	• Report Monthly • Record Type

Retail Analog/Benchmark:
CLEC Usage Delivery Completeness is comparable to BST Usage Delivery Completeness See Appendix D

Revision Date: 02/28/00 (dg)

BILLING

Report/Measurement:	
B-5. Usage Data Delivery Timeliness	
Definition:	
This measurement provides a percentage of recorded usage data (usage recorded by BST and usage recorded by other companies and sent to BST for billing) that is delivered to the appropriate CLEC within six (6) calendar days from the receipt of the initial recording. A parity measure is also provided showing timeliness of BST messages processed and transmitted via CMDS. Timeliness, Completeness and Mean Time to Deliver Usage measures are reported on the same report.	
Exclusions:	
None	
Business Rules:	
The purpose of this measurement is to demonstrate the level of timeliness for processing and transmission of usage data delivered to the appropriate CLEC. The usage data will be mechanically transmitted or mailed to the CLEC data processing center once daily. The Timeliness interval of usage recorded by other companies is measured from the date BST receives the records to the date BST distributes to the CLEC. Method of delivery is at the option of the CLEC.	
Calculation:	
Usage Data Delivery Timeliness = Σ(Total number of usage records sent within six (6) calendar days from initial recording/receipt) / Σ(Total number of usage records sent) X 100	
Report Structure:	
• CLEC Aggregate • CLEC Specific • BST Aggregate	
Level of Disaggregation:	
• Geographic Scope ➢ Region	
Data Retained Relating to CLEC Experience:	**Data Retained Relating to BST Performance:**
• Report Month • Record Type ➢ BellSouth Recorded ➢ Non-BellSouth Recorded	• Report Monthly • Record Type
Retail Analog/Benchmark:	
CLEC Usage Data Delivery Timeliness is comparable to BST Usage Data Delivery Timeliness See Appendix D	

Revision date: 02/28/00 (dg)

BILLING

Report/Measurement:	
B-6. Mean Time to Deliver Usage	
Definition:	
This measurement provides the average time it takes to deliver Usage Records to a CLEC. A parity measure is also provided showing timeliness of BST messages processed and transmitted via CMDS. Timeliness, Completeness and Mean Time to Deliver Usage measures are reported on the same report.	
Exclusions:	
None	
Business Rules:	
The purpose of this measurement is to demonstrate the average number of days it takes BST to deliver Usage data to the appropriate CLEC. Usage data is mechanically transmitted or mailed to the CLEC data processing center once daily. Method of delivery is at the option of the CLEC.	
Calculation:	
Mean Time to Deliver Usage = Σ_(Record volume X estimated number of days to deliver the Usage Record) / total record volume	
Report Structure:	
• CLEC Aggregate • CLEC Specific • BST Aggregate	
Level of Disaggregation:	
• Geographic Scope ➢ Region	
Data Retained Relating to CLEC Experience:	**Data Retained Relating to BST Performance:**
• Report Month • Record Type ➢ BellSouth Recorded ➢ Non-BellSouth Recorded	• Report Monthly • Record Type
Retail Analog/Benchmark:	
Mean Time to Deliver Usage to CLEC is comparable to Mean Time to Deliver Usage to BST See Appendix D	

Revision Date: 02/28/00 (dg)

OPERATOR SERVICES

Report/Measurement:
OS-1. Speed to Answer Performance/Average Speed to Answer – Toll
Definition:
Measurement of the average time in seconds calls wait before answered by a toll operator.
Exclusions:
Calls abandoned by customers are not reflected in the average speed to answer but are reflected in the conversion tables where the percent answered within "X" seconds is determined.
Business Rules:
The call waiting measurement scan starts when the customer enters the queue and ends when a BST representative answers the call. The average speed to answer is determined by measuring and accumulating the seconds of wait time from the entry of a customer into the BST call management system queue until the customer is transferred to a BST representative. No distinction is made between CLEC customers and BST customers.
Calculation:
The Average Speed to Answer for toll is calculated by using data from monthly system measurement reports taken from the centralized call routing switches. The "total call waiting seconds" is a sub-component of this measure which BST systems calculate by monitoring the number of calls in queue throughout the day multiplied by the time (in seconds) between monitoring events. The "total calls served" is the other sub-component of this measure, which BST systems record as the total number of calls handled by Operator Services toll centers. Since calls abandoned are not reflected in the calculation, the percent answered within the required timeframe is determined by using conversion tables with input for the abandonment rate.
Report Structure:
• Reported for the aggregate of BST and CLECs ➢ State
Level of Disaggregation:
None
Data Retained (on Aggregate Basis)
For the items below, BST's Performance Measurement Analysis Platform (PMAP) receives a final computation; therefore, no raw data file is available in PMAP. • Month • Call Type (Toll) • Average Speed of Answer
Retail Analog/Benchmark
Parity by Design See Appendix D

Revision Date: 02/28/00 (tg)

OPERATOR SERVICES

Report/Measurement:
OS-2. Speed to Answer Performance/Percent Answered within "X" Seconds – Toll
Definition:
Measurement of the percent of toll calls that are answered in less than "X" seconds. The number of seconds represented by "X" is thirty, except where a different regulatory benchmark has been set against the Average Speed to Answer by a State Commission.
Exclusions:
Calls abandoned by customers are not reflected in the average speed to answer but are reflected in the conversion tables where the percent answered within "X" seconds is determined.
Business Rules:
The call waiting measurement scan starts when the customer enters the queue and ends when a BST representative answers the call. The average speed to answer is determined by measuring and accumulating the seconds of wait time from the entry of a customer into the BST call management system queue until the customer is transferred to a BST representative. No distinction is made between CLEC customers and BST customers.
Calculation:
The Percent Answered within "X" Seconds measurement for toll is derived by using the BellCore Statistical Answer Conversion Tables, to convert the Average Speed to Answer measure into a percent of calls answered within "X" seconds. The BellCore Conversion Tables are specific to the defined parameters of work time, number of operators, max queue size and call abandonment rates.
Report Structure:
• Reported for the aggregate of BST and CLECs ➢ State
Level of Disaggregation:
None
Data Retained (on Aggregate Basis)
For the items below, BST's Performance Measurement Analysis Platform (PMAP) receives a final computation; therefore, no raw data file is available in PMAP. • Month • Call Type (Toll) • Average Speed of Answer
Retail Analog/Benchmark
Parity by Design See Appendix D

Revision Date: 02/28/00 (tg)

OPERATOR SERVICES

Report/Measurement:
OS-3. Speed to Answer Performance/Average Speed to Answer – Directory Assistance (DA)
Definition:
Measurement of the average time in seconds calls wait before answer by a DA operator.
Exclusions:
Calls abandoned by customers are not reflected in the average speed to answer but are reflected in the conversion tables where the percent answered within "X" seconds is determined.
Business Rules:
The call waiting measurement scan starts when the customer enters the queue and ends when a BST representative answers the call. The average speed to answer is determined by measuring and accumulating the seconds of wait time from the entry of a customer into the BST call management system queue until the customer is transferred to a BST representative. No distinction is made between CLEC customers and BST customers.
Calculation:
The Average Speed to Answer for DA is calculated by using data from monthly system measurement reports taken from the centralized call routing switches. The "total call waiting seconds" is a sub-component of this measure which BST systems calculate by monitoring the number of calls in queue throughout the day multiplied by the time (in seconds) between monitoring events. The "total calls served" is the other sub-component of this measure, which BST systems record as the total number of calls handled by Operator Services DA centers. Since calls abandoned are not reflected in the calculation, the percent answered within the required timeframe is determined by using conversion tables with input for the abandonment rate.
Report Structure:
• Reported for the aggregate of BST and CLECs ➢ State
Level of Disaggregation:
None
Data Retained (on Aggregate Basis)
For the items below, BST's Performance Measurement Analysis Platform (PMAP) receives a final computation; therefore, no raw data file is available in PMAP. • Month • Call Type (DA) • Average Speed of Answer
Retail Analog/Benchmark
Parity by Design See Appendix D

Revision Date: 02/28/00 (tg)

OPERATOR SERVICES

Report/Measurement:
OS-4. Speed to Answer Performance/Percent Answered within "X" Seconds – Directory Assistance (DA)
Definition:
Measurement of the percent of DA calls that are answered in less than "X" seconds. The number of seconds represented by "X" is twenty, except where a different regulatory benchmark has been set against the Average Speed to Answer by a State Commission.
Exclusions:
Calls abandoned by customers are not reflected in the average speed to answer but are reflected in the conversion tables where the percent answered within "X" seconds is determined.
Business Rules:
The call waiting measurement scan starts when the customer enters the queue and ends when a BST representative answers the call. The average speed to answer is determined by measuring and accumulating the seconds of wait time from the entry of a customer into the BST call management system queue until the customer is transferred to a BST representative. No distinction is made between CLEC customers and BST customers.
Calculation:
The Percent Answered within "X" Seconds measurement for DA is derived by using the BellCore Statistical Answer Conversion Tables, to convert the Average Speed to Answer measure into a percent of calls answered within "X" seconds. The BellCore Conversion Tables are specific to the defined parameters of work time, number of operators, max queue size and call abandonment rates.
Report Structure:
• Reported for the aggregate of BST and CLECs ➢ State
Level of Disaggregation:
None
Data Retained (on Aggregate Basis)
For the items below, BST's Performance Measurement Analysis Platform (PMAP) receives a final computation; therefore, no raw data file is available in PMAP. • Month • Call Type (DA) • Average Speed of Answer
Retail Analog/Benchmark
Parity by Design See Appendix D

Revision Date: 02/28/00 (tg)

E911

Report/Measurement:
E-1. Timeliness
Definition:
Measures the percentage of batch orders for E911 database updates (to CLEC resale and BST retail records) processed successfully within a 24-hour period.
Exclusions:
• Any resale order canceled by a CLEC • Facilities-based CLEC orders
Business Rules:
The 24-hour processing period is calculated based on the date and time processing starts on the batch orders and the date and time processing stops on the batch orders. Mechanical processing starts when SCC (BST's E911 vendor) receives E911 files containing batch orders extracted from BST's Service Order Communication System (SOCS). Processing stops when SCC loads the individual records to the E911 database. No distinctions are made between CLEC resale records and BST retail records.
Calculation:
E911 Timeliness = Σ (Number of batch orders processed within 24 hours ÷ Total number of batch orders submitted) X 100
Report Structure:
• Reported for the aggregate of CLEC resale updates and BST retail updates ➢ State ➢ Region
Levels of Disaggregation:
None
Data Retained
• Report month • Aggregate data
Retail Analog/Benchmark
Parity by Design See Appendix D

Revision Date: 02/28/00 (tg)

E911

Report/Measurement:
E-2. Accuracy
Definition:
Measures the individual E911 telephone number (TN) record updates (to CLEC resale and BST retail records) processed successfully for E911 with no errors.
Exclusions:
• Any resale order canceled by a CLEC • Facilities-based CLEC orders
Business Rules:
Accuracy is based on the number of records processed without error at the conclusion of the processing cycle. Mechanical processing starts when SCC (BST's E911 vendor) receives E911 files containing telephone number (TN) records extracted from BST's Service Order Communication System (SOCS). No distinctions are made between CLEC resale records and BST retail records.
Calculation:
E911 Accuracy = Σ(Number of record individual updates processed with no errors ÷ Total number of individual record updates) X 100
Report Structure:
• Reported for the aggregate of CLEC resale updates and BST retail updates ➢ State ➢ Region
Level of Disaggregation:
None
Data Retained
• Report month • Aggregate data
Retail Analog/Benchmark
Parity by Design See Appendix D

Revision Date: 02/28/00 (tg)

E911

Report/Measurement:
E-3. Mean Interval
Definition:
Measures the mean interval processing of E911 batch orders (to update CLEC resale and BST retail records).
Exclusions:
• Any resale order canceled by a CLEC • Facilities-based CLEC orders
Business Rules:
The processing period is calculated based on the date and time processing starts on the batch orders and the date and time processing stops on the batch orders. Data is posted in 4-hour increments up to and beyond 24 hours. No distinctions are made between CLEC resale records and BST retail records.
Calculation:
E911 Mean Interval = Σ (Date and time of batch order completion – Date and time of batch order submission) ÷ (Number of batch orders completed)
Report Structure:
• Reported for the aggregate of CLEC resale updates and BST retail updates ➢ State ➢ Region
Level of Disaggregation:
None
Data Retained (on Aggregate Basis)
• Report month • Aggregate data
Retail Analog/Benchmark
Parity by Design See Appendix D

Revision Date: 02/28/00 (tg)

TRUNK GROUP PERFORMANCE

Report/Measurement:

TGP-1. Trunk Group Performance-Aggregate

Definition:

A report of aggregate blocking information for CLEC trunk groups and BellSouth trunk groups.

Exclusions:

- Trunk Groups for which valid data is not available for an entire study period
- Duplicate trunk group information

Business Rules:

- Aggregate blocking results are created using the statistical analysis package and are output into Excel with separate table for each geographic area.

- For each geographic area, plots are generated for: a) the monthly blocking by hour for each affecting group (BellSouth or CLEC), and b) the difference between BellSouth blocking data and CLEC blocking data is calculated and plotted.

- The TCBH blocking is calculated by determining the monthly averaging blocking for each hour for each trunk. The hour with the highest usage is selected as the TCBH and the blocking for that hour is reported.

- Trunk Categorization: This report displays, over a reporting cycle, aggregate, weighted average blocking data for each hour of a day. Therefore, for each reporting cycle, 24 blocking data points are generated for two aggregate groups of selected trunk groups. These groups are CLEC affecting and BellSouth affecting trunk groups. In order to assign trunk groups to each aggregate group, all trunk groups are first assigned to a category. A trunk group's end points and the type of traffic that is transmitted on it define a category. Selected categories of trunk groups are assigned to the aggregate groups to that trunk reports can be generated. The categories to which trunk groups have been assigned for this report are as follows:

CLEC Affecting Categories:

	Point A	Point B
Category 1:	BellSouth End Office	BellSouth Access Tandem
Category 3:	BellSouth End Office	CLEC Switch
Category 4:	BellSouth Local Tandem	CLEC Switch
Category 5:	BellSouth Access Tandem	CLEC Switch
Category 10:	BellSouth End Office	BellSouth Local Tandem
Category 16:	BellSouth Tandem	BellSouth Tandem

BellSouth Affecting Category:

	Point A	Point B
Category 9:	BellSouth End Office	BellSouth End Office

TRUNK GROUP PERFORMANCE - (Trunk Group Performance-Aggregate – Continued)

Calculation:

Monthly Weighted Average Blocking:

(Blocking data for each hour X number of valid measurement days within each week) / Σ (Total number of valid measurement days within each week)

Example: Hour		Week 1	Week 2	Week 3	Week 4	Monthly
1	Blocking	1%	0.5%	2%	1.5%	1.8%
	# Days	7	7	5	6	
2	Blocking	0%	0%	0.2%	0.3%	.1%
	# Days	7	5	5	7	
3	Blocking	1%	1%	0.5%	2%	1.1%
	# Days	7	7	7	7	
24	Blocking	1%	0.5%	2%	1.5%	1.2%
	# Days	7	7	5	6	

The monthly weighted average blocking for hour 1 for a particular trunk group is calculated as follows:

$$\frac{(1x5)+(0.5x5)+(2x4)+(1.5x4)}{(5+5+4+4)} = 1.2\%$$

Aggregate Monthly Blocking:

(Monthly weighted average blocking value for each trunk group) X (number of trunks within each trunk group) / Σ (number of trunks in the aggregate group)

Example: Trunk Group	Trunks in Service	Blocking Hour 1	Blocking Hour 2	Blocking Hour 3	Blocking Hour 4	..... Blocking Hour 24
A	24	3%	0%	1%	0%	0%
B	144	2%	0%	1%	0.5%	0.5%
C	528	0%	0.5%	1%	1%	1%
D	316	1%	0%	1%	0.1%	0%
E	940	1%	1%	4%	0%	0%
Aggregate		0.8%	0.6%	2.4%	0.3%	0.3%

The aggregate weighted monthly blocking for hour 1 is calculated as follows:

$$\frac{(3x24)+(2x144)+(0x528)+(1x316)+(1x940)}{(24+144+528+316+940)} = 0.8\%$$

The purpose of the Trunk Group Performance Report is to provide trunk blocking measurements on CLEC and BST trunk groups for comparison only. It is not the intent of the report that it be used for network management and/or engineering.

Report Structure:

- CLEC Aggregate
  - ➢ State

Level of Disaggregation:

Trunk Group

Data Retained Relating to CLEC Experience	Data Retained Relating to BST Experience
• Report Month • Total Trunk Groups • Number of Trunk Groups by CLEC • Hourly average blocking per trunk group	• Report Month • Total Trunk Groups • Aggregate Hourly average blocking

Retail Analog/Benchmark:

Any 2 hour period in 24 hours where CLEC blockage exceeds BST blockage by more than 0.5% = a miss using trunk groups 1, 3, 4, 5, 10, 16 for CLECs and 9 for BST.

Revision Date: 02/28/00 (tm)

TRUNK GROUP PERFORMANCE

Report/Measurement:

TGP-2. Trunk Group Performance-CLEC Specific

Definition:

A report of blocking information for CLEC trunk groups.

Exclusions:

- Trunk Groups for which valid data is not available for an entire study period
- Duplicate trunk group information

Business Rules:

- Aggregate blocking results are created using the statistical analysis package and are output into Excel with separate table for each geographic area.
- For each geographic area, plots are generated for the monthly blocking by hour
- The TCBH blocking is calculated by determining the monthly averaging blocking for each hour for each trunk. The hour with the highest usage is selected as the TCBH and the blocking for that hour is reported.
- Trunk Categorization: This report displays, over a reporting cycle, aggregate, weighted average blocking data for each hour of a day. Therefore, for each reporting cycle, 24 blocking data points are generated for CLEC trunk groups. In order to assign trunk groups to the CLEC group, all trunk groups are first assigned to a category. A trunk group's end points and the type of traffic that is transmitted on it define a category. Selected categories of trunk groups are assigned to the aggregate groups to that trunk reports can be generated. The categories to which trunk groups have been assigned for this report are as follows:

CLEC Affecting Categories:

	Point A	Point B
Category 1:	BellSouth End Office	BellSouth Access Tandem
Category 3:	BellSouth End Office	CLEC Switch
Category 4:	BellSouth Local Tandem	CLEC Switch
Category 5:	BellSouth Access Tandem	CLEC Switch
Category 10:	BellSouth End Office	BellSouth Local Tandem
Category 16:	BellSouth Tandem	BellSouth Tandem

TRUNK GROUP PERFORMANCE - (Trunk Group Performance-CLEC Specific – Continued)

Calculation:

Monthly Weighted Average Blocking:

(Blocking data for each hour X number of valid measurement days within each week) / Σ (Total number of valid measurement days within each week)

Example: Hour		Week 1	Week 2	Week 3	Week 4	Monthly
1	Blocking	1%	0.5%	2%	1.5%	1.8%
	# Days	7	7	5	6	
2	Blocking	0%	0%	0.2%	0.3%	.1%
	# Days	7	5	5	7	
3	Blocking	1%	1%	0.5%	2%	1.1%
	# Days	7	7	7	7	5
24	Blocking	1%	0.5%	2%	1.5%	1.2%
	# Days	7	7	5	6	

The monthly weighted average blocking for hour 1 for a particular trunk group is calculated as follows:

$$\frac{(1x5)+(0.5x5)+(2x4)+(1.5x4)}{(5+5+4+4)} = 1.2\%$$

Aggregate Monthly Blocking:

(Monthly weighted average blocking value for each trunk group) X (number of trunks within each trunk group) / Σ (number of trunks in the aggregate group)

Example: Trunk Group	Trunks in Service	Blocking Hour 1	Blocking Hour 2	Blocking Hour 3	Blocking Hour 4	..... Blocking Hour 24
A	24	3%	0%	1%	0%	0%
B	144	2%	0%	1%	0.5%	0.5%
C	528	0%	0.5%	1%	1%	1%
D	316	1%	0%	1%	0.1%	0%
E	940	1%	1%	4%	0%	0%
Aggregate		0.8%	0.6%	2.4%	0.3%	0.3%

The aggregate weighted monthly blocking for hour 1 is calculated as follows:

$$\frac{(3x24)+(2x144)+(0x528)+(1x316)+(1x940)}{(24+144+528+316+940)} = 0.8\%$$

The purpose of the Trunk Group Performance Report is to provide trunk blocking measurements on CLEC and BST trunk groups for comparison only. It is not the intent of the report that it be used for network management and/or engineering.

Report Structure:

- CLEC Specific
- Trunk Group

Level of Disaggregation:

Revision Date: 02/28/00 (tm)

TRUNK GROUP PERFORMANCE

Report/Measurement:

TGP-3. Trunk Group Service Report

Definition:

A report of the percent blocking above the Measured Blocking Threshold (MBT) on all final trunk groups between CLEC Points of Termination and BST end offices or tandems.

Exclusions:

- Trunk groups for which valid traffic data is not available
- High use trunk groups

Business Rules:

Traffic trunking data measurements are validated and processed by the Total Network Data System/Trunking (TNDS/TK), a Telcordia (BellCore) supported application, on an hourly basis for Average Business Days (Monday through Friday). The traffic load sets, including offered load and observed blocking ratio (calls blocked divided by calls attempted), are averaged for a 20 day period, and the busy hour is selected. The busy hour average data for each trunk group is captured for reporting purposes. Although all trunk groups are available for reporting, the report highlight those trunk groups with blocking greater than the Measured Blocking Threshold (MBT) and the number of consecutive monthly reports that the trunk group blocking has exceeded the MBT. The MBT for CTTG is 2% and the MBT for all other trunk groups is 3%.

Calculation:

Measured blocking = (Total number of blocked calls) / (Total number of attempted calls) X 100

Report Structure:

- BST Aggregate
  - CTTG
  - Local
- CLEC Aggregate
  - BST Administered CLEC Trunk
  - CLEC Administered CLEC Trunk
- CLEC Specific
  - BST Administered CLEC Trunk
  - CLEC Administered CLEC Trunk

Retail Analog/Benchmark:

CLEC Trunk Blockage/BST Blockage
See Appendix D

Revision Date: 02/28/00 (tm)

COLLOCATION

Report/Measurement:
C-1. Average Response Time
Definition:
Measures the average time (counted in business days) from the receipt of a complete and accurate collocation application (including receipt of application fees) to the date BellSouth responds in writing.
Exclusions:
• Requests to augment previously completed arrangements • Any application cancelled by the CLEC
Business Rules:
The clock starts on the date that BST receives a complete and accurate collocation application accompanied by the appropriate application fee. The clock stops on the date that BST returns a response. The clock will restart upon receipt of changes to the original application request.
Calculation:
Average Response Time = Σ(Request Response Date) – (Request Submission Date) / Count of Responses Returned within Reporting Period.
Report Structure:
• Individual CLEC (alias) aggregate • Aggregate of all CLECs
Level of Disaggregation:
• State, Region and further geographic disaggregation as required by State Commission Order (e.g. Metropolitan Service Area – MSA) • Virtual • Physical
Data Retained:
• Report period • Aggregate data
Retail Analog/Benchmark:
See Appendix D

Revision Date: 01/27/00 (tg)

COLLOCATION

Report/Measurement:
C-2. Average Arrangement Time
Definition:
Measures the average time from the receipt of a complete and accurate Bona Fide firm order (including receipt of appropriate fee) to the date BST completes the collocation arrangement.
Exclusions:
• Any Bona Fide firm order cancelled by the CLEC • Bona Fide firm orders to augment previously completed arrangements • Time for BST to obtain permits • Time during which the collocation contract is being negotiated
Business Rules:
The clock starts on the date that BST receives a complete and accurate Bona Fide firm order accompanied by the appropriate fee. The clock stops upon submission of the permit request and restarts upon receipt of the approved permit. Changes (affecting the provisioning interval or capital expenditures) that are submitted while provisioning is in progress may alter the completion date. The clock stops on the date that BST completes the collocation arrangement.
Calculation:
Average Arrangement Time = Σ(Date Collocation Arrangement is Complete) – (Date Order for Collocation Arrangement Submitted) / Total Number of Collocation Arrangements Completed during Reporting Period.
Report Structure:
• Individual CLEC (alias) aggregate • Aggregate of all CLECs
Level of Disaggregation:
• State, Region and further geographic disaggregation as required by State Commission Order (e.g. Metropolitan Service Area – MSA) • Virtual • Physical
Data Retained:
• Report period • Aggregate data
Retail Analog/Benchmark:
See Appendix D

Revision Date: 01/27/00 (tg)

COLLOCATION

Report/Measurement:
C-3. Percent of Due Dates Missed
Definition:
Measures the percent of missed due dates for collocation arrangements.
Exclusions:
• Any Bona Fide firm order cancelled by the CLEC • Bona Fide firm orders to augment previously completed arrangements • Time for BST to obtain permits • Time during which the collocation contract is being negotiated
Business Rules:
The clock starts on the date that BST receives a complete and accurate Bona Fide firm order accompanied by the appropriate fee. The clock stops on the date that BST completes the collocation arrangement.
Calculation:
% of Due Dates Missed = Σ (Number of Orders not completed w/i ILEC Committed Due Date during Reporting Period) / Number of Orders Completed in Reporting Period) X 100
Report Structure:
• Individual CLEC (alias) aggregate • Aggregate of all CLECs
Level of Disaggregation:
• State, Region and further geographic disaggregation as required by State Commission Order (e.g. Metropolitan Service Area-MSA) • Virtual • Physical
Data Retained:
• Report period • Aggregate data
Retail Analog/Benchmark:
90% ≤ Commit Date

Revision Date: 01/27/00 (tg)

Appendix A: Reporting Scope*

Standard Service Groupings	*Pre-Order, Ordering* ➢ Resale Residence ➢ Resale Business ➢ Resale Special ➢ Local Interconnection Trunks ➢ UNE ➢ UNE - Loops w/LNP *Provisioning* ➢ UNE Non-Design ➢ UNE Design ➢ Local Interconnection Trunks ➢ Resale Residence ➢ Resale Business ➢ Resale Design ➢ BST Trunks ➢ BST Residence Retail ➢ BST Business Retail ➢ BST Design Retail *Maintenance and Repair* ➢ Local Interconnection Trunks ➢ UNE Non-Design ➢ UNE Design ➢ Resale Residence ➢ Resale Business ➢ Resale Design ➢ BST Interconnection Trunks ➢ BST Residence Retail ➢ BST Business Retail ➢ BST Design Retail Local Interconnection Trunk Group Blockage ➢ BST CTTG Trunk Groups ➢ CLEC Trunk Groups

Appendix A: Reporting Scope*

Standard Service Order Activities *These are the generic BST/CLEC service order activities which are included in the Pre-Ordering, Ordering, and Provisioning sections of this document. It is not meant to indicate specific reporting categories.*	➢ New Service Installations ➢ Service Migrations Without Changes ➢ Service Migrations With Changes ➢ Move and Change Activities ➢ Service Disconnects (Unless noted otherwise)
Pre-Ordering Query Types: **Maintenance Query Types:**	➢ Address ➢ Telephone Number ➢ Appointment Scheduling ➢ Customer Service Record ➢ Feature Availability
Report Levels	➢ CLEC RESH ➢ CLEC MSA ➢ CLEC State ➢ CLEC Region ➢ Aggregate CLEC State ➢ Aggregate CLEC Region ➢ BST State ➢ BST Region

* Scope is report, data source and system dependent, and, therefore, will differ with each report.

Appendix B: Glossary of Acronyms and Terms

A	**ACD**	Automatic Call Distributor - A service that provides status monitoring of agents in a call center and routes high volume incoming telephone calls to available agents while collecting management information on both callers and attendants.
	AGGREGATE	Sum total of all items in like category, e.g. CLEC aggregate equals the sum total of all CLECs' data for a given reporting level.
	ASR	Access Service Request - A request for access service terminating delivery of carrier traffic into a Local Exchange Carrier's network.
	ATLAS	Application for Telephone Number Load Administration System - The BellSouth Operations System used to administer the pool of available telephone numbers and to reserve selected numbers from the pool for use on pending service requests/service orders.
	ATLASTN	ATLAS software contract for Telephone Number
	AUTO CLARIFICATION	The number of LSRs that were electronically rejected from LESOG and electronically returned to the CLEC for correction.
B	**BILLING**	The process and functions by which billing data is collected and by which account information is processed in order to render accurate and timely billing.
	BOCRIS	Business Office Customer Record Information System - A front-end presentation manager used by BellSouth organizations to access the CRIS database.
	BRC	Business Repair Center – The BellSouth Business Systems trouble receipt center which serves large business and CLEC customers.
	BST	BellSouth Telecommunications, Inc.
C	**CKTID**	A unique identifier for elements combined in a service configuration
	CLEC	Competitive Local Exchange Carrier
	CMDS	Centralized Message Distribution System - BellCore administered national system used to transfer specially formatted messages among companies.
	COFFI	Central Office Feature File Interface - A BellSouth Operations System database which maintains Universal Service Order Code (USOC) information based on current tariffs.

Appendix B: Glossary of Acronyms and Terms – Continued

C	**COFIUSOC**	COFFI software contract for feature/service information
	CRIS	Customer Record Information System - The BellSouth proprietary corporate database and billing system for non-access customers and services.
	CRSACCTS	CRIS software contract for CSR information
	CSR	Customer Service Record
	CTTG	Common Transport Trunk Group - Final trunk groups between BST & Independent end offices and the BST access tandems.
D	**DESIGN**	Design Service is defined as any Special or Plain Old Telephone Service Order which requires BellSouth Design Engineering Activities
	DISPOSITION & CAUSE	Types of trouble conditions, e.g. No Trouble Found, Central Office Equipment, Customer Premises Equipment, etc.
	DLETH	Display Lengthy Trouble History - A history report that gives all activity on a line record for trouble reports in LMOS
	DLR	Detail Line Record - All the basic information maintained on a line record in LMOS, e.g. name, address, facilities, features etc.
	DOE	Direct Order Entry System - An internal BellSouth service order entry system used by BellSouth Service Representatives to input business service orders in BellSouth format.
	DSAP	DOE (Direct Order Entry) Support Application - The BellSouth Operations System which assists a Service Representative or similar carrier agent in negotiating service provisioning commitments for non-designed services and UNEs.
	DSAPDDI	DSAP software contract for schedule information
E	**E911**	Provides callers access to the applicable emergency services bureau by dialing a 3-digit universal telephone number.
	EDI	Electronic Data Interchange - The computer-to-computer exchange of inter and/or intra company business documents in a public standard format.
F	**FATAL REJECT**	The number of LSRs that were electronically rejected from LEO, which checks to see of the LSR has all the required fields correctly populated
	FLOW-THROUGH	In the context of this document, LSRs submitted electronically via the CLEC mechanized ordering process that flow through to the BST OSS without manual or human intervention.
	FOC	Firm Order Confirmation - A notification returned to the CLEC confirming that the LSR has been received and accepted, including the specified commitment date.

Appendix B: Glossary of Acronyms and Terms - Continued

G		
H	**HAL**	"Hands Off" Assignment Logic - Front end access and error resolution logic used in interfacing BellSouth Operations Systems such as ATLAS, BOCRIS, LMOS, PSIMS, RSAG and SOCS.
	HALCRIS	HAL software contract for CSR information
I	**ISDN**	Integrated Services Digital Network
K		
L	**LCSC**	Local Carrier Service Center - The BellSouth center which is dedicated to handling CLEC LSRs, ASRs, and Preordering transactions along with associated expedite requests and escalations.
	LEGACY SYSTEM	Term used to refer to BellSouth Operations Support Systems (see OSS)
	LENS	Local Exchange Negotiation System - The BellSouth LAN/web server/OS application developed to provide both preordering and ordering electronic interface functions for CLECs.
	LEO	Local Exchange Ordering - A BellSouth system which accepts the output of EDI, applies edit and formatting checks, and reformats the Local Service Requests in BellSouth Service Order format.
	LESOG	Local Exchange Service Order Generator - A BellSouth system which accepts the service order output of LEO and enters the Service Order into the Service Order Control System using terminal emulation technology.
	LMOS	Loop Maintenance Operations System - A BellSouth Operations System that stores the assignment and selected account information for use by downstream OSS and BellSouth personnel during provisioning and maintenance activities.
	LMOS HOST	LMOS host computer
	LMOSupd	LMOS updates
	LNP	Local Number Portability - In the context of this document, the capability for a subscriber to retain his current telephone number as he transfers to a different local service provider.
	LOOPS	Transmission paths from the central office to the customer premises.
	LSR	Local Service Request – A request for local resale service or unbundled network elements from a CLEC.
M	**MAINTENANCE & REPAIR**	The process and function by which trouble reports are passed to BellSouth and by which the related service problems are resolved.
	MARCH	A BellSouth Operations System which accepts service orders, interprets the coding contained in the service order image, and constructs the specific switching system Recent Change command messages for input into end office switches.

Appendix B: Glossary of Acronyms and Terms – Continued

N	NC	"No Circuits" - All circuits busy announcement
O	**OASIS**	Obtain Availability Services Information System - A BellSouth front-end processor, which acts as an interface between COFFI and RNS. This system takes the USOCs in COFFI and translates them to English for display in RNS.
	OASISBSN	OASIS software contract for feature/service
	OASISCAR	OASIS software contract for feature/service
	OASISLPC	OASIS software contract for feature/service
	OASISMTN	OASIS software contract for feature/service
	OASISNET	OASIS software contract for feature/service
	OASISOCP	OASIS software contract for feature/service
	ORDERING	The process and functions by which resale services or unbundled network elements are ordered from BellSouth as well as the process by which an LSR or ASR is placed with BellSouth.
	OSPCM	Outside Plant Contract Management System - Provides Scheduling Information.
	OSS	Operations Support System - A support system or database which is used to mechanize the flow or performance of work. The term is used to refer to the overall system consisting of hardware complex, computer operating system(s), and application which is used to provide the support functions.
	OUT OF SERVICE	Customer has no dial tone and cannot call out.
P	**POTS**	Plain Old Telephone Service
	PREDICTOR	The BellSouth Operations system which is used to administer proactive maintenance and rehabilitation activities on outside plant facilities, provide access to selected work groups (e.g. RRC & BRC) to Mechanized Loop Testing and switching system I/O ports, and provide certain information regarding the attributes and capabilities of outside plant facilities.
	PREORDERING	The process and functions by which vital information is obtained, verified, or validated prior to placing a service request.
	PROVISIONING	The process and functions by which necessary work is performed to activate a service requested via an LSR or ASR and to initiate the proper billing and accounting functions.
	PSIMS	Product/Service Inventory Management System - A BellSouth database Operations System which contains availability information on switching system features and capabilities and on BellSouth service availability. This database is used to verify the availability of a feature or service in an NXX prior to making a commitment to the customer.
	PSIMSORB	PSIMS software contract for feature/service

Appendix B: Glossary of Acronyms and Terms – Continued

Q		
R	**RNS**	Regional Negotiation System - An internal BellSouth service order entry system used by BellSouth Consumer Services to input service orders in BellSouth format.
	RRC	Residence Repair Center - The BellSouth Consumer Services trouble receipt center which serves residential customers.
	RSAG	Regional Street Address Guide - The BellSouth database, which contains street addresses validated to be accurate with state and local governments.
	RSAGADDR	RSAG software contract for address search
	RSAGTN	RSAG software contract for telephone number search
S	**SOCS**	Service Order Control System - The BellSouth Operations System which routes service order images among BellSouth drop points and BellSouth Operations Systems during the service provisioning process.
	SOIR	Service Order Interface Record - any change effecting activity to a customer account by service order that impacts 911/E911.
T	**TAFI**	Trouble Analysis Facilitation Interface - The BellSouth Operations System that supports trouble receipt center personnel in taking and handling customer trouble reports.
	TAG	Telecommunications Access Gateway – TAG was designed to provide an electronic interface, or machine-to-machine interface for the bi-directional flow of information between BellSouth's OSSs and participating CLECs.
	TN	Telephone Number
	TOTAL MANUAL FALLOUT	The number of LSRs which are entered electronically but require manual entering into a service order generator.
U	**UNE**	Unbundled Network Element
V		
W	**WTN**	A unique identifier for elements combined in a service configuration
X		
Y		
Z		
Σ		Sum of:

Appendix C

BELLSOUTH'S AUDIT POLICY:

BellSouth currently provides many CLECs with certain audit rights as a part of their individual interconnection agreements. However, it is not reasonable for BellSouth to undergo an audit of the SQM for every CLEC with which it has a contract. BellSouth has developed a proposed Audit Plan for use by the parties to an audit. If requested by a Public Service Commission or by a CLEC exercising contractual audit rights, BellSouth will agree to undergo a comprehensive audit of the aggregate level reports for both BellSouth and the CLEC(s) for each of the next five (5) years (2000 – 2005), to be conducted by an independent third party. The results of that audit will be made available to all the parties subject to proper safeguards to protect proprietary information. This aggregate level audit includes the following specifications:

1. The cost shall be borne 50% by BellSouth and 50% by the CLEC or CLECs.

2. The independent third party auditor shall be selected with input from BellSouth, the PSC, if applicable, and the CLEC(s).

3. BellSouth, the PSC and the CLEC(s) shall jointly determine the scope of the audit.

BellSouth reserves the right to make changes to this audit policy as growth and changes in the industry dictate.

EXHIBIT C

Statistical Methods for BellSouth Performance Measure Analysis

I. Necessary Properties for a Test Methodology

The statistical process for testing if competing local exchange carriers (CLECs) customers are being treat equally with BellSouth (BST) customers involves more than just a mathematical formula. Three key elements need to be considered before an appropriate decision process can be developed. These are

- the type of data,
- the type of comparison, and
- the type of performance measure.

Once these elements are determined a test methodology should be developed that complies with the following properties.

- Like-to-Like Comparisons. When possible, data should be compared at appropriate levels, e.g. wire center, time of month, dispatched, residential, new orders. The testing process should:
  - Identify variables that may affect the performance measure.
  - Record these important confounding covariates.
  - Adjust for the observed covariates in order to remove potential biases and to make the CLEC and the ILEC units as comparable as possible.
- Aggregate Level Test Statistic. Each performance measure of interest should be summarized by one overall test statistic giving the decision maker a rule that determines whether a statistically significant difference exists. The test statistic should have the following properties.
  - The method should provide a single overall index, on a standard scale.
  - If entries in comparison cells are exactly proportional over a covariate, the aggregated index should be very nearly the same as if comparisons on the covariate had not been done.
  - The contribution of each comparison cell should depend on the number of observations in the cell.
  - Cancellation between comparison cells should be limited.
  - The index should be a continuous function of the observations.
- Production Mode Process. The decision system must be developed so that it does not require intermediate manual intervention, i.e. the process must be a "black box."
  - Calculations are well defined for possible eventualities.
  - The decision process is an algorithm that needs no manual intervention.
  - Results should be arrived at in a timely manner.
  - The system must recognize that resources are needed for other performance measure-related processes that also must be run in a timely manner.
  - The system should be auditable, and adjustable over time.
- Balancing. The testing methodology should balance Type I and Type II Error probabilities.
  - P(Type I Error) = P(Type II Error) for well defined null and alternative hypotheses.
  - The formula for a test's balancing critical value should be simple enough to calculate using standard mathematical functions, i.e. one should avoid methods that require computationally intensive techniques.

- Little to no information beyond the null hypothesis, the alternative hypothesis, and the number of observations should be required for calculating the balancing critical value.

In the following sections we describe appropriate testing processes that adhere as much as possible to the testing principles.

Measurement Types

The performance measures that will undergo testing are of three types:

1) means
2) proportions, and
3) rates

While all three have similar characteristics (a proportion is the average of a measure that takes on only the values of 0 or 1), a proportion or rate is derived from count data while a mean is generally an average of interval measurements.

II. Testing Methodology – The Truncated Z

Many covariates are chosen in order to provide deep comparison levels. In each comparison cell, a Z statistic is calculated. The form of the Z statistic may vary depending on the performance measure, but it should be distributed approximately as a standard normal, with mean zero and variance equal to one. Assuming that the test statistic is derived so that it is negative when the performance for the CLEC is worse than for the ILEC, a positive truncation is done – i.e. if the result is negative it is left alone, if the result is positive it is changed to zero. A weighted average of the truncated statistics is calculated where a cell weight depends on the volume of BST and CLEC orders in the cell. The weighted average is re-centered by the theoretical mean of a truncated distribution, and this is divided by the standard error of the weighted average. The standard error is computed assuming a fixed effects model.

Proportion Measures

For performance measures that are calculated as a proportion, in each adjustment cell, the truncated Z and the moments for the truncated Z can be calculated in a direct manner. In adjustment cells where proportions are not close to zero or one, and where the sample sizes are reasonably large, a normal approximation can be used. In this case, the moments for the truncated Z come directly from properties of the standard normal distribution. If the normal approximation is not appropriate, then the Z statistic is calculated from the hypergeometric distribution. In this case, the moments of the truncated Z are calculated exactly using the hypergeometric probabilities.

Rate Measures

The truncated Z methodology for rate measures has the same general structure for calculating the Z in each cell as proportion measures. For a rate measure, there are a fixed number of circuits or units for the CLEC, n_{2j} and a fixed number of units for BST, n_{1j}. Suppose that the performance measure is a "trouble rate." The modeling assumption is that the occurrence of a trouble is independent between units and the number of troubles in n circuits follows a Poisson distribution with mean λ n where λ is the probability of a trouble in 1 circuit and n is the number of circuits.

In an adjustment cell, if the number of CLEC troubles is greater than 15 and the number of BST troubles is greater than 15, then the Z test is calculated using the normal approximation to the Poisson. In this case, the moments of the truncated Z come directly from properties of the standard normal distribution. Otherwise, if there are very few troubles, the number of CLEC troubles can be modeled using a binomial distribution with n equal to the total number of troubles (CLEC plus BST troubles.) In this case, the moments for the truncated Z are calculated explicitly using the binomial distribution.

Mean Measures

For mean measures, an adjusted t statistic is calculated for each like-to-like cell which has at least 7 BST and 7 CLEC transactions. A permutation test is used when one or both of the BST and CLEC sample sizes is less than 6. Both the adjusted t statistic and the permutation calculation are described in the technical appendix.

APPENDIX
TECHNICAL DESCRIPTION

We start by assuming that any necessary trimming of the data is complete, and that the data are disaggregated so that comparisons are made within appropriate classes or adjustment cells that define "like" observations.

NOTATION AND EXACT TESTING DISTRIBUTIONS

Below, we have detailed the basic notation for the construction of the truncated z statistic. In what follows the word "cell" should be taken to mean a like-to-like comparison cell that has both one (or more) ILEC observation and one (or more) CLEC observation.

L = the total number of occupied cells

j = 1,...,L; an index for the cells

n_{1j} = the number of ILEC transactions in cell j

n_{2j} = the number of CLEC transactions in cell j

n_j = the total number transactions in cell j; $n_{1j}+ n_{2j}$

X_{1jk} = individual ILEC transactions in cell j; k = 1,..., n_{1j}

X_{2jk} = individual CLEC transactions in cell j; k = 1,..., n_{2j}

Y_{jk} = individual transaction (both ILEC and CLEC) in cell j

$$= \begin{cases} X_{1jk} & k = 1,\mathrm{K}\ ,n_{1j} \\ X_{2jk} & k = n_{1j}+1,\mathrm{K}\ ,n_j \end{cases}$$

$\Phi^{-1}(\cdot)$ = the inverse of the cumulative standard normal distribution function

For Mean Performance Measures the following additional notation is needed.

$\overline{X}_{1j}$ = the ILEC sample mean of cell j

$\overline{X}_{2j}$ = the CLEC sample mean of cell j

s^2_{1j} = the ILEC sample variance in cell j

s^2_{2j} = the CLEC sample variance in cell j

y_{jk} = a random sample of size n_{2j} from the set of $Y_{j1},\mathrm{K}\ ,Y_{jn_j}$; k = 1,...,n_{2j}

M_j = the total number of distinct pairs of samples of size n_{1j} and n_{2j};

$$= \binom{n_j}{n_{1j}}$$

The exact parity test is the permutation test based on the "modified Z" statistic. For large samples, we can avoid permutation calculations since this statistic will be normal (or Student's t) to a good approximation. For small samples, where we cannot avoid permutation calculations, we have found that the difference between "modified Z" and the textbook "pooled Z" is negligible. We therefore propose to use the permutation test based on pooled Z for small samples. This decision speeds up the permutation computations considerably, because for each permutation we need only compute the sum of the CLEC sample values, and not the pooled statistic itself.

A permutation probability mass function distribution for cell j, based on the "pooled Z" can be written as

$$PM(t) = P(\sum_{k} y_{jk} = t) = \frac{\textit{the number of samples that sum to } t}{M_j},$$

and the corresponding cumulative permutation distribution is

$$CPM(t) = P(\sum_{k} y_{jk} \le t) = \frac{\textit{the number of samples with sum } \le t}{M_j}.$$

For Proportion Performance Measures the following notation is defined

a_{1j}= the number of ILEC cases possessing an attribute of interest in cell j

a_{2j}= the number of CLEC cases possessing an attribute of interest in cell j

a_j = the number of cases possessing an attribute of interest in cell j; $a_{1j}+ a_{2j}$

The exact distribution for a parity test is the hypergeometric distribution. The hypergeometric probability mass function distribution for cell j is

$$HG(h) = P(H = h) = \begin{cases} \dfrac{\binom{n_{1j}}{h}\binom{n_{2j}}{a_j - h}}{\binom{n_j}{a_j}}, & \max(0, a_j - n_{2j}) \le h \le \min(a_j, n_{1j}) \\ 0 & \text{otherwise} \end{cases},$$

and the cumulative hypergeometric distribution is

$$CHG(x) = P(H \le x) = \begin{cases} 0 & x < \max(0, a_j - n_{1j}) \\ \sum_{h=\max(0,a_j-n_{1j})}^{x} HG(h), & \max(0, a_j - n_{1j}) \le x \le \min(a_j, n_{2j}) \\ 1 & x > \min(a_j, n_{2j}) \end{cases}.$$

For Rate Measures, the notation needed is defined as

b_{1j} = the number of ILEC base elements in cell j

b_{2j} = the number of CLEC base elements in cell j

b_j = the total number of base elements in cell j; $b_{1j}+ b_{2j}$

π_{1j} = the ILEC sample rate of cell j; n_{1j}/b_{1j}

π_{2j} = the CLEC sample rate of cell j; n_{2j}/b_{2j}

q_j = the relative proportion of CLEC elements for cell j; b_{2j}/b_j

The exact distribution for a parity test is the binomial distribution. The binomial probability mass function distribution for cell j is

$$BN(k) = P(B = k) = \begin{cases} \binom{n_j}{k} q_j^k (1-q_j)^{n_j-k}, & 0 \le k \le n_j \\ 0 & \text{otherwise} \end{cases},$$

and the cumulative binomial distribution is

$$CBN(x) = P(B \le x) = \begin{cases} 0 & x < 0 \\ \sum_{k=0}^{x} BN(k), & 0 \le x \le n_j \\ 1 & x > n_j \end{cases}.$$

CALCULATING THE TRUNCATED Z

The general methodology for calculating an aggregate level test statistic is outlined below.

1. **Calculate cell weights,** W_j. A weight based on the number of transactions is used so that a cell which has a larger number of transactions has a larger weight. The actual weight formulae will depend on the type of measure.

Mean Measure

$$W_j = \sqrt{\frac{n_{1j} n_{2j}}{n_j}}$$

Proportion Measure

$$W_j = \sqrt{\frac{n_{2j} n_{1j}}{n_j} \cdot \frac{a_j}{n_j} \cdot \left(1 - \frac{a_j}{n_j}\right)}$$

Rate Measure

$$W_j = \sqrt{\frac{b_{1j} b_{2j}}{b_j} \cdot \frac{n_j}{b_j}}$$

2. **In each cell, calculate a Z value,** Z_j. A Z statistic with mean 0 and variance 1 is needed for each cell.

- If $W_j = 0$, set $Z_j = 0$.
- Otherwise, the actual Z statistic calculation depends on the type of performance measure.

Mean Measure

$$Z_j = \Phi^{-1}(\alpha)$$

where α is determine by the following algorithm.

If $\min(n_{1j}, n_{2j}) > 6$, then determine α as

$$\alpha = P(t_{n_{1j}-1} \le T_j),$$

that is, α is the probability that a t random variable with n_{1j} - 1 degrees of freedom, is less than

$$T_j = t_j + \frac{g}{6}\left(\frac{n_{1j}+2n_{2j}}{\sqrt{n_{1j}\,n_{2j}(n_{1j}+n_{2j})}}\right)\left(t^2 + \frac{n_{2j}-n_{1j}}{2n_{1j}+n_{2j}}\right),$$

where

$$t_j = \frac{\bar{X}_{1j} - \bar{X}_{2j}}{s_{1j}\sqrt{\frac{1}{n_{1j}} + \frac{1}{n_{2j}}}}$$

and the coefficient g is an estimate of the skewness of the parent population, which we assume is the same in all cells. It can be estimated from the ILEC values in the largest cells. This needs to be done only once for each measure. We have found that attempting to estimate this skewness parameter for each cell separately leads to excessive variability in the "adjusted" t. We therefore use a single compromise value in all cells.

Note, that t_j is the "modified Z" statistic. The statistic T_j is a "modified Z" corrected for the skewness of the ILEC data.

If $\min(n_{1j}, n_{2j}) \le 6$, and

a) $M_j \le 1{,}000$ (the total number of distinct pairs of samples of size n_{1j} and n_{2j} is 1,000 or less).

- Calculate the sample sum for all possible samples of size n_{2j}.
- Rank the sample sums from smallest to largest. Ties are dealt by using average ranks.
- Let R_0 be the rank of the observed sample sum with respect all the sample sums.

$$\alpha = 1 - \frac{R_0 - 0.5}{M_j}$$

b) $M_j > 1{,}000$

- Draw a random sample of 1,000 sample sums from the permutation distribution.
- Add the observed sample sum to the list. There is a total of 1001 sample sums. Rank the sample sums from smallest to largest. Ties are dealt by using average ranks.
- Let R_0 be the rank of the observed sample sum with respect all the sample sums.

$$\alpha = 1 - \frac{R_0 - 0.5}{1001}.$$

Proportion Measure

$$Z_j = \frac{n_j\,a_{1j} - n_{1j}\,a_j}{\sqrt{\frac{n_{1j}\,n_{2j}\,a_j\,(n_j - a_j)}{n_j - 1}}}.$$

Rate Measure

$$Z_j = \frac{n_{1j} - n_j\, q_j}{\sqrt{n_j\, q_j (1-q_j)}}.$$

3. **Obtain a truncated Z value for each cell, Z_j^*.** To limit the amount of cancellation that takes place between cell results during aggregation, cells whose results suggest possible favoritism are left alone. Otherwise the cell statistic is set to zero. This means that positive equivalent Z values are set to 0, and negative values are left alone. Mathematically, this is written as

$$Z_j^* = \min(0, Z_j).$$

4. **Calculate the theoretical mean and variance of the truncated statistic under the null hypothesis of parity, $E(Z_j^* | H_0)$ and $Var(Z_j^* | H_0)$.** In order to compensate for the truncation in step 3, an aggregated, weighted sum of the Z_j^* will need to be centered and scaled properly so that the final aggregate statistic follows a standard normal distribution.

   - If $W_j = 0$, then no evidence of favoritism is contained in the cell. The formulae for calculating $E(Z_j^* | H_0)$ and $Var(Z_j^* | H_0)$ cannot be used. Set both equal to 0.

   - If $\min(n_{1j}, n_{2j}) > 6$ for a mean measure, $\min\left\{a_{1j}\left(1-\frac{a_{1j}}{n_{1j}}\right), a_{2j}\left(1-\frac{a_{2j}}{n_{2j}}\right)\right\} > 9$ for a proportion measure, or $\min(n_{1j}, n_{2j}) > 15$ and $n_j q_j (1-q_j) > 9$ for a rate measure then

$$E(Z_j^* | H_0) = -\frac{1}{\sqrt{2\pi}}, \text{ and}$$

$$Var(Z_j^* | H_0) = \frac{1}{2} - \frac{1}{2\pi}.$$

   - Otherwise, determine the total number of values for Z_j^*. Let z_{ji} and θ_{ji}, denote the values of Z_j^* and the probabilities of observing each value, respectively.

$$E(Z_j^* | H_0) = \sum_i \theta_{ji} z_{ji}, \text{and}$$

$$Var(Z_j^* | H_0) = \sum_i \theta_{ji} z_{ji}^2 - \left[E(Z_j^* | H_0)\right]^2.$$

The actual values of the z's and θ's depends on the type of measure, and the sums in the equations are over all possible values of the index i.

Mean Measure

$$N_j = \min(M_j, 1{,}000),\ i = 1, \mathrm{K}\ , N_j$$

$$z_{ji} = \min\left\{0, 1 - \Phi^{-1}\left(\frac{R_i - 0.5}{N_j}\right)\right\} \quad \text{where } R_i \text{ is the rank of sample sum } i$$

$$\theta_j = \frac{1}{N_j}$$

Proportion Measure

$$z_{ji} = \min\left\{0, \frac{n_j\, i - n_{1j}\, a_j}{\sqrt{\frac{n_{1j}\, n_{2j}\, a_j\, (n_j - a_j)}{n_j - 1}}}\right\}, \quad i = \min(a_j, n_{2j}), \mathrm{K}\ , \max(0, a_j - n_{1j})$$

$$\theta_{ji} = \mathrm{HG}(i)$$

Rate Measure

$$z_{ji} = \min\left\{0, \frac{i - n_j\, q_j}{\sqrt{n_j\, q_j (1 - q_j)}}\right\}, \quad i = 0, \mathrm{K}\ , n_j$$

$$\theta_{ji} = \mathrm{BN}(i)$$

5. **Calculate the aggregate test statistic, Z^T.**

$$Z^T = \frac{\sum_j W_j Z_j^* - \sum_j W_j E(Z_j^* \mid H_0)}{\sqrt{\sum_j W_j^2 \mathrm{Var}(Z_j^* \mid H_0)}}$$

The Balancing Critical Value

There are four key elements of the statistical testing process:

1. the null hypothesis, H_0, that parity exists between ILEC and CLEC services
2. the alternative hypothesis, H_a, that the ILEC is giving better service to its own customers
3. the Truncated Z test statistic, Z^T, and
4. a critical value, *c*

The decision rule[1] is

- If $Z^T < c$ then accept H_a.
- If $Z^T \geq c$ then accept H_0.

There are two types of error possible when using such a decision rule:

[1] This decision rule assumes that a negative test statistic indicates poor service for the CLEC customer. If the opposite is true, then reverse the decision rule.

Type I Error: Deciding favoritism exists when there is, in fact, no favoritism.
Type II Error: Deciding parity exists when there is, in fact, favoritism.

The probabilities of each type of each are:

Type I Error: $\alpha = P(Z^T < c \mid H_0)$.

Type II Error: $\beta = P(Z^T \geq c \mid H_a)$.

We want a balancing critical value, c_B, so that $\alpha = \beta$.

It can be shown that.

$$c_B = \frac{\sum_j W_j M(m_j, se_j) - \sum_j W_j \frac{-1}{\sqrt{2\pi}}}{\sqrt{\sum_j W_j^2 V(m_j, se_j)} + \sqrt{\sum_j W_j^2 \left(\frac{1}{2} - \frac{1}{2\pi}\right)}}.$$

where

$$M(\mu, \sigma) = \mu \Phi(\tfrac{-\mu}{\sigma}) - \sigma \phi(\tfrac{-\mu}{\sigma})$$

$$V(\mu, \sigma) = (\mu^2 + \sigma^2)\Phi(\tfrac{-\mu}{\sigma}) - \mu\sigma\phi(\tfrac{-\mu}{\sigma}) - M(\mu, \sigma)^2$$

$\Phi(\cdot)$ is the cumulative standard normal distribution function, and $\phi(\cdot)$ is the standard normal density function.

This formula assumes that Z_j is approximately normally distributed within cell j. When the cell sample sizes, n_{1j} and n_{2j}, are small this may not be true. It is possible to determine the cell mean and variance under the null hypothesis when the cell sample sizes are small. It is much more difficult to determine these values under the alternative hypothesis. Since the cell weight, W_j will also be small (see calculate weights section above) for a cell with small volume, the cell mean and variance will not contribute much to the weighted sum. Therefore, the above formula provides a reasonable approximation to the balancing critical value.

The values of m_j and se_j will depend on the type of performance measure.

Mean Measure

For mean measures, one is concerned with two parameters in each cell, namely, the mean and variance. A possible lack of parity may be due to a difference in cell means, and/or a difference in cell variances. One possible set of hypotheses that capture this notion, and take into account the assumption that transaction are identically distributed within cells is:

H_0: $\mu_{1j} = \mu_{2j}$, $\sigma_{1j}^2 = \sigma_{2j}^2$

H_a: $\mu_{2j} = \mu_{1j} + \delta_j \cdot \sigma_{1j}$, $\sigma_{2j}^2 = \lambda_j \cdot \sigma_{1j}^2$ $\qquad \delta_j > 0$, $\lambda_j \geq 1$ and $j = 1,\ldots,L$.

Under this form of alternative hypothesis, the cell test statistic Z_j has mean and standard error given by

$$m_j = \frac{-\delta_j}{\sqrt{\frac{1}{n_{1j}} + \frac{1}{n_{2j}}}}, \text{ and}$$

$$se_j = \sqrt{\frac{\lambda_j n_{1j} + n_{2j}}{n_{1j} + n_{2j}}}$$

Proportion Measure

For a proportion measure there is only one parameter of interest in each cell, the proportion of transaction possessing an attribute of interest. A possible lack of parity may be due to a difference in cell proportions. A set of hypotheses that take into account the assumption that transaction are identically distributed within cells while allowing for an analytically tractable solution is:

$$H_0: \frac{p_{2j}(1-p_{1j})}{(1-p_{2j})p_{1j}} = 1$$

$$H_a: \frac{p_{2j}(1-p_{1j})}{(1-p_{2j})p_{1j}} = \psi_j \qquad \psi_j > 1 \text{ and } j = 1,\ldots,L.$$

These hypotheses are based on the "odds ratio." If the transaction attribute of interest is a missed trouble repair, then an interpretation of the alternative hypothesis is that a CLEC trouble repair appointment is ψ_j times more likely to be missed than an ILEC trouble.

Under this form of alternative hypothesis, the within cell asymptotic mean and variance of a_{1j} are given by[2]

$$E(a_{1j}) = n_j \pi_j^{(1)}$$

$$\text{var}(a_{1j}) = \frac{n_j}{\frac{1}{\pi_j^{(1)}} + \frac{1}{\pi_j^{(2)}} + \frac{1}{\pi_j^{(3)}} + \frac{1}{\pi_j^{(4)}}}$$

where

[2] Stevens, W. L. (1951) Mean and Variance of an entry in a Contingency Table. *Biometrica*, **38**, 468-470.

$$\pi_j^{(1)} = f_j^{(1)}\left(n_j^2 + f_j^{(2)} + f_j^{(3)} - f_j^{(4)}\right)$$
$$\pi_j^{(2)} = f_j^{(1)}\left(-n_j^2 - f_j^{(2)} + f_j^{(3)} + f_j^{(4)}\right)$$
$$\pi_j^{(3)} = f_j^{(1)}\left(-n_j^2 + f_j^{(2)} - f_j^{(3)} + f_j^{(4)}\right)$$
$$\pi_j^{(4)} = f_j^{(1)}\left(n_j^2\left(\tfrac{2}{\psi_j} - 1\right) - f_j^{(2)} - f_j^{(3)} - f_j^{(4)}\right)$$
$$f_j^{(1)} = \frac{1}{2n_j^2\left(\frac{1}{\psi_j} - 1\right)}$$
$$f_j^{(2)} = n_j n_{1j}\left(\tfrac{1}{\psi_j} - 1\right)$$
$$f_j^{(3)} = n_j a_j\left(\tfrac{1}{\psi_j} - 1\right)$$
$$f_j^{(4)} = \sqrt{n_j^2\left[4n_{1j}\left(n_j - a_j\right)\left(\tfrac{1}{\psi_j} - 1\right) + \left(n_j + \left(a_j - n_{1j}\right)\left(\tfrac{1}{\psi_j} - 1\right)\right)^2\right]}$$

Recall that the cell test statistic is given by

$$Z_j = \frac{n_j\, a_{1j} - n_{1j}\, a_j}{\sqrt{\frac{n_{1j}\, n_{2j}\, a_j\, (n_j - a_j)}{n_j - 1}}}.$$

Using the equations above, we see that Z_j has mean and standard error given by

$$m_j = \frac{n_j^2 \pi_j^{(1)} - n_{1j}\, a_j}{\sqrt{\frac{n_{1j}\, n_{2j}\, a_j\, (n_j - a_j)}{n_j - 1}}}, \text{ and}$$

$$se_j = \sqrt{\frac{n_j^3 (n_j - 1)}{n_{1j}\, n_{2j}\, a_j\, (n_j - a_j)\left(\frac{1}{\pi_j^{(1)}} + \frac{1}{\pi_j^{(2)}} + \frac{1}{\pi_j^{(3)}} + \frac{1}{\pi_j^{(4)}}\right)}}.$$

Rate Measure

A rate measure also has only one parameter of interest in each cell, the rate at which a phenomenon is observed relative to a base unit, e.g. the number of troubles per available line. A possible lack of parity may be due to a difference in cell rates. A set of hypotheses that take into account the assumption that transaction are identically distributed within cells is:

H_0: $r_{1j} = r_{2j}$

H_a: $r_{2j} = \varepsilon_j r_{1j}$ $\qquad \varepsilon_j > 1$ and $j = 1,\ldots,L$.

Given the total number of ILEC and CLEC transactions in a cell, n_j, and the number of base elements, b_{1j} and b_{2j}, the number of ILEC transaction, n_{1j}, has a binomial distribution from n_j trials and a probability of

$$q_j^* = \frac{r_{1j} b_{1j}}{r_{1j} b_{1j} + r_{2j} b_{2j}}.$$

Therefore, the mean and variance of n_{1j}, are given by

$$E(n_{1j}) = n_j q_j^*$$
$$\text{var}(n_{1j}) = n_j q_j^* (1 - q_j^*)$$

Under the null hypothesis

$$q_j^* = q_j = \frac{b_{1j}}{b_j},$$

but under the alternative hypothesis

$$q_j^* = q_j^a = \frac{b_{1j}}{b_{1j} + \varepsilon_j b_{2j}}.$$

Recall that the cell test statistic is given by

$$Z_j = \frac{n_{1j} - n_j q_j}{\sqrt{n_j q_j (1 - q_j)}}.$$

Using the relationships above, we see that Z_j has mean and standard error given by

$$m_j = \frac{n_j (q_j^a - q_j)}{\sqrt{n_j q_j (1 - q_j)}} = (1 - \varepsilon_j) \sqrt{\frac{n_j b_{1j} b_{2j}}{b_{1j} + \varepsilon_j b_{2j}}}, \text{ and}$$

$$se_j = \sqrt{\frac{q_j^a (1 - q_j^a)}{q_j (1 - q_j)}} = \sqrt{\varepsilon_j} \frac{b_j}{b_{1j} + \varepsilon_j b_{2j}}.$$

Determining the Parameters of the Alternative Hypothesis

In this appendix we have indexed the alternative hypothesis of mean measures by two sets of parameters, λ_j and δ_j. Proportion and rate measures have been indexed by one set of parameters each, ψ_j and ε_j respectively. While statistical science can be used to evaluate the impact of different choices of these parameters, there is not much that an appeal to statistical principles can offer in directing specific choices. Specific choices are best left to telephony experts. Still, it is possible to comment on some aspects of these choices:

- Parameter Choices for λ_j. The set of parameters λ_j index alternatives to the null hypothesis that arise because there might be greater unpredictability or variability in the delivery of service to a CLEC customer over that which would be achieved for an otherwise comparable ILEC customer. While concerns about differences in the variability of service are important, it turns out that the truncated Z testing which is being recommended here is relatively insensitive to all but very large values of the λ_j. Put another way, reasonable differences in the values chosen here could make very little difference in the balancing points chosen.

- Parameter Choices for δ_j. The set of parameters δ_j are much more important in the choice of the balancing point than was true for the λ_j. The reason for this is that they directly index differences in average service. The truncated Z test is very sensitive to any such differences; hence, even small disagreements among experts in the choice of the δ_j could be very important. Sample size matters here too. For example, setting all the δ_j to a single value – $\delta_j = \delta$ – might be fine for tests across individual CLECs where currently in Louisiana the CLEC customer bases are not too different. Using the same value of δ for the overall state testing does not seem sensible, however, since the state sample would be so much larger.

- Parameter Choices for ψ_j or ε_j. The set of parameters ψ_j or ε_j are also important in the choice of the balancing point for tests of their respective measures. The reason for this is that they directly index increases in the proportion or rate of service performance. The truncated Z test is sensitive to such increases; but not as sensitive as the case of δ_j for mean measures. Sample size matters here as well. As with mean measures, using the same value of ψ or ε for the overall state testing does not seem sensible since the state sample would be so much larger.

The bottom line here is that beyond a few general considerations, like those given above, a principled approach to the choice of the alternative hypotheses to guard against, must come from elsewhere.

DECISION PROCESS

Once Z^T has been calculated, it is compared to the balancing critical value to determine if the ILEC is favoring its own customers over a CLEC's customers.

This critical value changes as the ILEC and CLEC transaction volume change. One way to make this transparent to the decision maker, is to report the difference between the test statistic and the critical value, *diff* = $Z^T - c_B$. If favoritism is concluded when $Z^T < c_B$, then the *diff* < 0 indicates favoritism.

This make it very easy to determine favoritism: a positive *diff* suggests no favoritism, and a negative *diff* suggests favoritism.

EXHIBIT D

BST VSEEM REMEDY PROCEDURE

TIER-1 CALCULATION FOR RETAIL ANALOGUES:

1. Calculate the overall test statistic for each CLEC; z^{T}_{CLEC1} (See Exhibit C)
2. Calculate the balancing critical value(${}^{C}B_{CLEC1}$) that is associated with the alternative hypothesis (for fixed parameters δ, ψ or ε). (See Exhibit C)
3. If the overall test statistic is equal to or above the balancing critical value, stop here. Otherwise, go to step 4.
4. Calculate the Parity Gap by subtracting the value of step 2. from that of step 1.; $z^{T}_{CLEC1} - {}^{C}B_{CLEC1}$
5. Calculate the Volume Proportion using a linear distribution with slope of ¼. This can be accomplished by taking the absolute value of the Parity Gap from step 4. divided by 4; $ABS((z^{T}_{CLEC1} - {}^{C}B_{CLEC1}) / 4)$. All parity gaps equal or greater to 4 will result in a volume proportion of 100%.
6. Calculate the Affected Volume by multiplying the Volume Proportion from step 5. by the Total $CLEC_1$ Volume in the negatively affected cell; where the cell value is negative. (See Exhibit C)
7. Calculate the payment to Supra Telecom by multiplying the result of step 6. by the appropriate dollar amount from the fee schedule.

So, Supra Telecom payment = Affected $Volume_{CLEC1}$ * $$ from Fee Schedule

Example: Supra Telecom Missed Installation Appointments (MIA) for Resale POTS

	n_I	n_C	MIA_I	MIA_C	z^{T}_{CLEC1}	C_B	**Parity Gap**	Volume Proportion	Affected Volume
State	50000	600	9%	16%	-1.92	-0.21	**1.71**	0.4275	
Cell					z_{CLEC1}				
1		150	0.091	0.112	-1.994				64
2		75	0.176	0.098	0.734				
3		10	0.128	0.333	-2.619				4
4		50	0.158	0.242	-2.878				21
5		15	0.245	0.075	1.345				
6		200	0.156	0.130	0.021				
7		30	0.166	0.233	-0.600				13
8		20	0.106	0.127	-0.065				9
9		40	0.193	0.218	-0.918				17
10		10	0.160	0.235	-0.660				4
									133

where n_I = ILEC observations and n_C = Supra Telecom observations

Payout for Supra Telecom is (133 units) * ($100/unit) = $13,300

TIER-2 CALCULATION for RETAIL ANALOGUES:

1. Tier-2 is triggered by three monthly failures of any VSEEM submetric in the same quarter.

2. Calculate the overall test statistic for the CLEC Aggregate using all transactions from the calendar quarter; z^{T}_{CLECA}

3. Calculate the balancing critical value(${}^{C}B_{CLEC1}$) that is associated with the alternative hypothesis (for fixed parameters δ, ψ or ε). (See Exhibit C)

4. If the overall test statistic is equal to or above the balancing critical value for the calendar quarter, stop here. Otherwise, go to step 5.

5. Calculate the Parity Gap by subtracting the value of step 3. from that of step 2.; $z^{T}_{CLECA} - {}^{C}B_{CLECA}$

6. Calculate the Volume Proportion using a linear distribution with slope of ¼. This can be accomplished by dividing the Parity Gap from step 5. by 4; ABS(($z^{T}_{CLECA} - {}^{C}B_{CLECA}$) / 4). All parity gaps equal or greater to 4 will result in a volume proportion of 100%.

7. Calculate the Affected Volume by multiplying the Volume Proportion from step 6. by the Total $CLEC_A$ Volume (CLEC Aggregate) in the negatively affected cell; where the cell value is negative (See Exhibit C).

8. Calculate the payment to State Designated Agency by multiplying the result of step 7. by the appropriate dollar amount from the fee schedule.

   So, State Designated Agency payment = $\text{Affected Volume}_{CLECA}$ * $$ from Fee Schedule

Example: CLEC-A Missed Installation Appointments (MIA) for Resale POTS

State	n_I	n_C	MIA_I	MIA_C	z^{T}_{CLECA}	C_B	**Parity Gap**	Volume Proportion	Affected Volume
Quarter1	180000	2100	9%	16%	-1.92	-0.21	**1.71**	0.4275	
Cell					z_{CLECA}				
1		500	0.091	0.112	-1.994				214
2		300	0.176	0.098	0.734				
3		80	0.128	0.333	-2.619				34
4		205	0.158	0.242	-2.878				88
5		45	0.245	0.075	1.345				
6		605	0.156	0.130	0.021				
7		80	0.166	0.233	-0.600				34
8		40	0.106	0.127	-0.065				17

9	165	0.193	0.218	-0.918	71
10	80	0.160	0.235	-0.660	34
					492

where n_I = ILEC observations and n_C = CLEC-A observations

Payout for CLEC-A is (492 units) * ($300/unit) = $147,600

Tier-3

Tier-3 uses the monthly CLEC Aggregate results in a given State. Tier-3 is triggered when five of the twelve Tier-3 sub-metrics experience consecutive failures in a given calendar quarter. The table below displays a situation that would trigger a Tier-3 failure, and one that would not.

		TIER-3 FAILURE X = Miss			NOT A TIER-3 FAILURE X = Miss		
Process	Measures	Jan	Feb	Mar	Jan	Feb	Mar
Percent Missed Installation Appointments	Resale POTS	X	X	X	X		
	Resale Design	X			X	X	X
	UNE Loop & Port Combo		X				
	UNE Loops	X	X	X			
Percent Missed Repair Appointments	Resale POTS	X	X	X	X		X
	Resale Design		X	X		X	
	UNE Loop & Port Combo					X	X
	UNE Loops				X		
Billing	Billing Accuracy	X	X	X			
	Billing Timeliness				X	X	X
Trunk Blockage	Percent Trunk Blockage	X	X	X			
Collocation	Percent Missed Collocation Due Dates						

Tier-3 is effective immediately after quarter results, and can only be lifted when two of the five failed sub-metrics show compliance for two consecutive months in the following quarter.

All tiers standalone, such that triggering Tier-3 will not cease payout of any Tier-1 or Tier-2 failures.

TIER-1 CALCULATION FOR BENCHMARKS:

1. For each CLEC, with five or more observations, calculate monthly performance results for the State.

2. CLECs having observations (sample sizes) between 5 and 30 will use Table I below:

TABLE I SMALL SAMPLE SIZE TABLE
(95% Confidence)

Sample Size	Equivalent 90% Benchmark	Equivalent 95% Benchmark
5	60.00%	80.00%
6	66.67%	83.33%
7	71.43%	85.71%
8	75.00%	75.00%
9	66.67%	77.78%
10	70.00%	80.00%
11	72.73%	81.82%
12	75.00%	83.33%
13	76.92%	84.62%
14	78.57%	85.71%
15	73.33%	86.67%

Sample Size	Equivalent 90% Benchmark	Equivalent 95% Benchmark
16	75.00%	87.50%
17	76.47%	82.35%
18	77.78%	83.33%
19	78.95%	84.21%
20	80.00%	85.00%
21	76.19%	85.71%
22	77.27%	86.36%
23	78.26%	86.96%
24	79.17%	87.50%
25	80.00%	88.00%
26	80.77%	88.46%
27	81.48%	88.89%
28	78.57%	89.29%
29	79.31%	86.21%
30	80.00%	86.67%

3. If the percentage (or equivalent percentage for small samples) is equal to or below the benchmark standard, stop here. Otherwise, go to step 4.

4. Determine the Volume Proportion by taking the difference between the benchmark and the actual performance result.

5. Calculate the Affected Volume by multiplying the Volume Proportion from step 4. by the Total $CLEC_1$ Volume.

6. Calculate the payment to Supra Telecom by multiplying the result of step 5. by the appropriate dollar amount from the fee schedule.

So, Supra Telecom payment = Affected $Volume_{CLEC1}$ * $$ from Fee Schedule

Example: Supra Telecom Missed Installation Appointments (MIA) for UNE Loops

	n_c	Benchmark	MIA_c	Volume Proportion	Affected Volume
State	600	9%	12%	.03	18

Payout for Supra Telecom is (18 units) * ($400/unit) = $7,200

TIER-1 CALCULATION FOR BENCHMARKS (IN THE FORM OF A TARGET):

1. For each, with five or more observations, CLEC calculate monthly performance results for the State.
2. CLECs having observations (sample sizes) between 5 and 30 will use Table I above.
3. Calculate the interval distribution based on the same data set used in step 1.
4. If the 'percent within' is equal to or exceeds the benchmark standard, stop here. Otherwise, go to step 5.
5. Determine the Volume Proportion by taking the difference between 100% and the actual performance result.
6. Calculate the Affected Volume by multiplying the Volume Proportion from step 5. by the Total $CLEC_1$ Volume.
7. Calculate the payment to Supra Telecom by multiplying the result of step 6. by the appropriate dollar amount from the fee schedule.

So, Supra Telecom payment = Affected $Volume_{CLEC1}$ * $$ from Fee Schedule

Example: Supra Telecom Reject Timeliness

	n_c	Benchmark	Reject $Timeliness_c$	Volume Proportion	Affected Volume
State	600	95% within 1 hour	93% within 1 hour	.07	42

Payout for Supra Telecom is (42 units) * ($100/unit) = $4,200

TIER-2 CALCULATIONS for BENCHMARKS:

Tier-2 calculations for benchmark measures are the same as the Tier-1 benchmark calculations except the CLEC Aggregate data having failed for three months in a given calendar quarter is being assessed.

Attachment 10

Bona Fide Request/New Business Request Process

Bona Fide Request/New Business Request Process

1.0 When applicable. Bona Fide Request/New Business Requests ("BFR/NBR") are to be used when Supra Telecom requests any Services and Elements not already provided in this Agreement or the process needed to provide the Services and Elements, which process is not provided in this Agreement, (collectively for purposes of this Attachment 10, "the Services"). Supra Telecom may also utilize this process to make a request not already provided in this Agreement where said request does not constitute a request under the Telecommunications Act of 1996. This Attachment 10 does not apply to Section 9 of the General Terms and Conditions of this Agreement, incorporated herein by this reference.

1.1 Details required. A BFR/NBR shall be submitted in writing by Supra Telecom and shall specifically identify: (i) the date requested for the Services; (ii) the Services requested; (iii) the associated technical requirements; (iv) space requirements; and (v) other specifications necessary to clearly define the request. If applicable, such a request also shall include Supra Telecom's designation of the request as being an obligation of BellSouth pursuant to the Telecommunications Act of 1996.

1.2 Supra Telecom cancellation. Supra Telecom may cancel a BFR/NBR in writing at any time. BellSouth will then cease analysis of the request. If Supra Telecom cancels a BFR/NBR after BellSouth has received Supra Telecom's written "notice to proceed" as described in Section 1.6 of this Attachment 10, Supra Telecom agrees to pay BellSouth the reasonable, demonstrable, and actual costs directly related to complying with Supra Telecom's BFR/NBR up to the date of cancellation.

1.3 BellSouth acknowledgment. Within two (2) business days of receipt of a BFR/NBR, BellSouth shall acknowledge in writing its receipt and identify its single point of contact responsible for responding to the request and shall request any additional information needed to process the request. Notwithstanding the foregoing, BellSouth may reasonably request additional information from Supra Telecom at any time during the processing of the BFR/NBR.

1.4 Preliminary analysis delivery. Unless otherwise agreed by both parties in writing, within thirty-five (35) calendar days of its receipt of a BFR/NBR, BellSouth shall either provide to Supra Telecom a preliminary analysis of the BFR/NBR or notify Supra Telecom that it needs more time to provide Supra Telecom with its preliminary

analysis, at which time Supra Telecom and BellSouth will then determine a mutually agreeable date for delivery of the preliminary analysis.

1.5 Preliminary analysis details. The preliminary analysis will state whether BellSouth can meet Supra Telecom's requirements and shall include BellSouth's proposed price plus or minus 25 percent ("the Preliminary Analysis Range") and the date the request can be met. If BellSouth cannot provide the Services by the requested date, it shall provide an alternative proposed date together with a detailed explanation as to why BellSouth is not able to meet Supra Telecom's requested date. The preliminary analysis also will include a detailed breakdown of the costs supporting the proposed price, including the development costs, as defined in Section 1.7 below, necessary to complete Supra Telecom's BFR/NBR. BellSouth also shall indicate in the preliminary analysis its agreement or disagreement with Supra Telecom's designation of the request as an obligation under the Telecommunications Act of 1996. If BellSouth does not agree with Supra Telecom's designation, it may use the dispute resolution process set forth in Section 18 of the General Terms and Conditions of this Agreement, incorporated herein by this reference. In no event, however, shall any dispute delay BellSouth's processing of the request.

1.6 Notice to proceed. After providing the preliminary analysis to Supra Telecom, BellSouth shall proceed with Supra Telecom's BFR/NBR upon receipt of Supra Telecom's written "notice to proceed." This "notice to proceed" shall not be construed by BellSouth as a waiver of Supra Telecom's right to invoke dispute resolution process set forth in Section 16 of the General Terms and Conditions of this Agreement, incorporated herein by this reference, as to any issue, including BellSouth's proposed price, the reasonable, demonstrable, and actual costs incurred in the event of Supra Telecom's cancellation of a BFR/NBR, or the amount of development costs paid. All payments are subject to adjustment according to the outcome of the dispute resolution process set forth in Section 16 of the General Terms and Conditions of this Agreement, incorporated herein by this reference. In no event shall any dispute delay BellSouth proceeding with completing the BFR/NBR.

1.7 Development costs. Subject to the provision of Section 1.6 above, after receipt and review of BellSouth's preliminary analysis, if Supra Telecom decides to proceed, Supra Telecom agrees to pay the fixed amount identified in the preliminary analysis for the initial work required to develop the project plan, create the design parameters, and

establish all activities and resources required to complete the BFR/NBR. These costs will be referred to as "development" costs. The development costs identified in the preliminary analysis are fixed. Supra Telecom will begin processing the payment of development costs at the time it issues the written "notice to proceed" with payment due to BellSouth within 15 days of the issuance of the notice to proceed.

1.8 Interim payment in the event of price dispute. In the event of a dispute over payments made by Supra Telecom or requested by BellSouth, including development costs and any interim progress payment, upon BellSouth's written request, Supra Telecom agrees to negotiate an interim lump sum progress payment to compensate BellSouth for its reasonable, demonstrable and actual costs incurred in processing Supra Telecom's BFR/NBR. The interim lump sum progress payment shall be calculated by determining the average between BellSouth's proposed price and Supra Telecom's estimate of the price for processing its BFR/NBR. Supra Telecom agrees to pay 50% of this amount as the interim lump sum progress payment. If Supra Telecom's proposed price is less than 50% of BellSouth's proposed price, the average shall be calculated by assuming that Supra Telecom's price is exactly 50% of BellSouth's proposed price.

1.9 Firm quote delivery. As soon as possible, but in no event later than sixty-five (65) calendar days after receipt of the request, BellSouth shall provide Supra Telecom with a firm BFR/NBR response that will include, at a minimum, the firm availability date, the installation intervals, a binding price quote, which shall not exceed the Preliminary Analysis Range, and a final detailed breakdown of all costs supporting the final price.

1.10 Acceptance or rejection of firm quote. Within thirty (30) calendar days after receipt of the firm BFR/NBR response from BellSouth, Supra Telecom will notify BellSouth in writing of its acceptance or rejection of BellSouth's proposal. If BellSouth receives no response to the firm quote from Supra Telecom within the thirty day time frame, BellSouth shall issue a written request for confirmation that Supra Telecom does not wish to proceed with the BFR/NBR. If BellSouth receives no response from Supra Telecom within five (5) calendar days of its written request for confirmation, BellSouth may consider the BFR/NBR canceled. BellSouth may recover any costs incurred to the extent permitted under the provision of Section 1.2 of this Attachment 10.

1.11 Pricing Principles. Unless Supra Telecom agrees otherwise, all proposed prices shall be derived in accordance with the Act and any

applicable Commission rules and regulations. Payments for Services purchased under a BFR/NBR will be made as specified in thisAttachment 10, unless otherwise agreed to by Supra Telecom.

1.12 Amendment. Upon Supra Telecom's acceptance of the firm quote by BellSouth, the parties shall amend the Agreement to incorporate the Services contemplated by the BFR/NBR. The amendment shall include all pertinent rates, terms and conditions and shall be filed with the appropriate regulatory commission pursuant to the requirements of the Act.

NETWORK SECURITY

NETWORK SECURITY

1. **Network Security – Protection of Service and Property**

1.1 BellSouth agrees to take reasonable and prudent steps to ensure adequate protection of Supra Telecom property located with BellSouth Premises including, but not limited to:

1.1.1 Controlling all approved system and modem access through security servers. Access to, or connection with, a network element shall be established through a secure network or security gateway and/or firewall. Dial-up access to modems connected to network entry points must be protected by individual authentication of the user, e.g., via Network Access passwords, smart cards, tokens;

1.1.2 A security software package will be used, or at a minimum, perform manual checks that monitor user and machine integrity and confidentiality, such as password assignment and aging, directory and permission configuration, and system accounting data; and

1.1.3 Maintain accurate and complete records detailing the individual data connections and systems to which they have granted the other party access or interface privileges. These records will include, but are not limited to, login identification, user request records, system configuration, time limits of user access or system interfaces.

7.0 Acronyms	10

1.0 PURPOSE

In the unlikely event of a disaster occurring that affects BellSouth's long-term ability to deliver traffic to a Competitive Local Exchange Carrier (CLEC), general procedures have been developed to hasten the recovery process. Since each location is different and could be affected by an assortment of potential problems, a detailed recovery plan is impractical. However, in the process of reviewing recovery activities for specific locations, some basic procedures emerge that appear to be common in most cases.

These general procedures should apply to any disaster that affects the delivery of traffic for an extended time period. Each CLEC will be given the same consideration during an outage and service will be restored as quickly as possible.

This document will cover the basic recovery procedures that would apply to every CLEC.

2.0 SINGLE POINT OF CONTACT

When a problem is experienced, regardless of the severity, the BellSouth Network Management Center (NMC) will observe traffic anomalies and begin monitoring the situation. Controls will be appropriately applied to insure the sanity of BellSouth's network; and, in the event that a switch or facility node is lost, the NMC will attempt to circumvent the failure using available reroutes.

BellSouth's NMC will remain in control of the restoration efforts until the problem has been identified as being a long-term outage. At that time, the NMC will contact BellSouth's Emergency Control Center (ECC) and relinquish control of the recovery efforts. Even though the ECC may take charge of the situation, the NMC will continue to monitor the circumstances and restore traffic as soon as damaged network elements are revitalized.

The telephone number for the BellSouth Network Management Center in Atlanta, as published in Telcordia's National Network Management Directory, is 404-321-2516.

3.0 IDENTIFYING THE PROBLEM

During the early stages of problem detection, the NMC will be able to tell which CLECs are affected by the catastrophe. Further analysis and/or first hand observation will determine if the disaster has affected CLEC equipment only; BellSouth equipment only or a combination. The initial restoration activity will be largely determined by the equipment that is affected.

Once the nature of the disaster is determined and after verifying the cause of the problem, the NMC will initiate reroutes and/or transfers that are jointly agreed upon by the affected CLECs' Network Management Center and the BellSouth NMC. The type and percentage of controls used will depend upon available network capacity. Controls necessary to stabilize the situation will be invoked and the NMC will attempt to re-establish as much traffic as possible.

For long term outages, recovery efforts will be coordinated by the Emergency Control Center (ECC). Traffic controls will continue to be applied by the NMC until facilities are re-established. As equipment is made available for service, the ECC will instruct the NMC to begin removing the controls and allow traffic to resume.

3.1 SITE CONTROL

In the total loss of building use scenario, what likely exists will be a smoking pile of rubble. This rubble will contain many components that could be dangerous. It could also contain any personnel on the premises at the time of the disaster. For these reasons, the local fire marshal with the assistance of the police will control the site until the building is no longer a threat to surrounding properties and the companies have secured the site from the general public.

During this time, the majority owner of the building should be arranging for a demolition contractor to mobilize to the site with the primary objective of reaching the cable entrance facility for a damage assessment. The results of this assessment would then dictate immediate plans for restoration, both short term and permanent.

In a less catastrophic event, i.e., the building is still standing and the cable entrance facility is usable, the situation is more complex. The site will initially be controlled by local authorities until the threat to adjacent property has diminished. Once the site is returned to the control of the companies, the following events should occur.

An initial assessment of the main building infrastructure systems (mechanical, electrical, fire & life safety, elevators, and others) will establish building needs. Once these needs are determined, the majority owner should lead the building restoration efforts. There may be situations where the site will not be totally restored within the confines of the building. The companies must individually determine their needs and jointly assess the cost of permanent restoration to determine the overall plan of action.

Multiple restoration trailers from each company will result in the need for designated space and installation order. This layout and control is required to maximize the amount of restoration equipment that can be placed at the site, and the priority of placements.

Care must be taken in this planning to insure other restoration efforts have logistical access to the building. Major components of telephone and building equipment will need to be removed and replaced. A priority for this equipment must also be jointly established to facilitate overall site restoration. (Example: If the AC switchgear has sustained damage, this would be of the highest priority in order to regain power, lighting, and HVAC throughout the building.)

If the site will not accommodate the required restoration equipment, the companies would then need to quickly arrange with local authorities for street closures, rights of way or other possible options available.

3.2 ENVIRONMENTAL CONCERNS

In the worse case scenario, many environmental concerns must be addressed. Along with the police and fire marshal, the state environmental protection department will be on site to monitor the situation.

Items to be concerned with in a large central office building could include:

1. Emergency engine fuel supply. Damage to the standby equipment and the fuel handling equipment could have created "spill" conditions that have to be handled within state and federal regulations.

2. Asbestos containing materials that may be spread throughout the wreckage. Asbestos could be in many components of building, electrical, mechanical, outside plant distribution, and telephone systems.

3. Lead and acid. These materials could be present in potentially large quantities depending upon the extent of damage to the power room.

4. Mercury and other regulated compounds resident in telephone equipment.

5. Other compounds produced by the fire or heat.

Once a total loss event occurs at a large site, local authorities will control immediate clean up (water placed on the wreckage by the fire department) and site access.

At some point, the companies will become involved with local authorities in the overall planning associated with site clean up and restoration. Depending on the clean up approach taken, delays in the restoration of several hours to several days may occur.

In a less severe disaster, items listed above are more defined and can be addressed individually depending on the damage.

In each case, the majority owner should coordinate building and environmental restoration as well as maintain proper planning and site control.

4.0 THE EMERGENCY CONTROL CENTER (ECC)

The ECC is located in the Colonnade Building in Birmingham, Alabama. During an emergency, the ECC staff will convene a group of pre-selected experts to inventory the damage and initiate corrective actions. These experts have regional access to BellSouth's personnel and equipment and will assume control of the restoration activity anywhere in the nine-state area.

In the past, the ECC has been involve with restoration activities resulting from hurricanes, ice storms and floods. They have demonstrated their capabilities during these calamities as well as

during outages caused by human error or equipment failures. This group has an excellent record of restoring service as quickly as possible.

During a major disaster, the ECC may move emergency equipment to the affected location, direct recovery efforts of local personnel and coordinate service restoration activities with the CLECs. The ECC will attempt to restore service as quickly as possible using whatever means is available; leaving permanent solutions, such as the replacement of damaged buildings or equipment, for local personnel to administer.

Part of the ECC's responsibility, after temporary equipment is in place, is to support the NMC efforts to return service to the CLECs. Once service has been restored, the ECC will return control of the network to normal operational organizations. Any long-term changes required after service is restored will be made in an orderly fashion and will be conducted as normal activity.

5.0 RECOVERY PROCEDURES

The nature and severity of any disaster will influence the recovery procedures. One crucial factor in determining how BellSouth will proceed with restoration is whether or not BellSouth's equipment is incapacitated. Regardless of who's equipment is out of service, BellSouth will move as quickly as possible to aid with service recovery; however, the approach that will be taken may differ depending upon the location of the problem.

5.1 CLEC OUTAGE

For a problem limited to one CLEC (or a building with multiple CLECs), BellSouth has several options available for restoring service quickly. For those CLECs that have agreements with other CLECs, BellSouth can immediately start directing traffic to a provisional CLEC for completion. This alternative is dependent upon BellSouth having concurrence from the affected CLECs.

Whether or not the affected CLECs have requested a traffic transfer to another CLEC will not impact BellSouth's resolve to re-establish traffic to the original destination as quickly as possible.

5.2 BELLSOUTH OUTAGE

Because BellSouth's equipment has varying degrees of impact on the service provided to the CLECs, restoring service from damaged BellSouth equipment is different. The outage will probably impact a number of Carriers simultaneously. However, the ECC will be able to initiate immediate actions to correct the problem.

A disaster involving any of BellSouth's equipment locations could impact the CLECs, some more than others. A disaster at a Central Office (CO) would only impact the delivery of traffic to and from that one location, but the incident could affect many Carriers. If the Central Office is a Serving Wire Center (SWC), then traffic from the entire area to those Carriers served from that switch would also be impacted. If the switch functions as an Access Tandem, or there is a tandem in the building, traffic from every CO to every CLEC could be interrupted. A disaster that destroys a facility hub could disrupt various traffic flows, even though the switching equipment may be unaffected.

The NMC would be the first group to observe a problem involving BellSouth's equipment. Shortly after a disaster, the NMC will begin applying controls and finding re-routes for the

completion of as much traffic as possible. These reroutes may involve delivering traffic to alternate Carriers upon receiving approval from the CLECs involved. In some cases, changes in translations will be required. If the outage is caused by the destruction of equipment, then the ECC will assume control of the restoration.

5.2.1 Loss of a Central Office

When BellSouth loses a Central Office, the ECC will

a) Place specialists and emergency equipment on notice;

b) Inventory the damage to determine what equipment and/or functions are lost;

c) Move containerized emergency equipment and facility equipment to the stricken area, if necessary;

d) Begin reconnecting service for Hospitals, Police and other emergency agencies; and

e) Begin restoring service to CLECs and other customers.

5.2.2 Loss of a Central Office with Serving Wire Center Functions

The loss of a Central Office that also serves as a Serving Wire Center (SWC) will be restored as described in section 5.2.1.

5.2.3 Loss of a Central Office with Tandem Functions

When BellSouth loses a Central Office building that serves as an Access Tandem and as a SWC, the ECC will

a) Place specialists and emergency equipment on notice;

b) Inventory the damage to determine what equipment and/or functions are lost;

c) Move containerized emergency equipment and facility equipment to the stricken area, if necessary;

d) Begin reconnecting service for Hospitals, Police and other emergency agencies;

e) Re-direct as much traffic as possible to the alternate access tandem (if available) for delivery to those CLECs utilizing a different location as a SWC;

f) Begin aggregating traffic to a location near the damaged building. From this location, begin re-establishing trunk groups to the CLECs for the delivery of traffic normally found on the direct trunk groups. (This aggregation point may be the alternate access tandem location or another CO on a primary facility route.)

g) Begin restoring service to CLECs and other customers.

5.2.4 Loss of a Facility Hub

In the event that BellSouth loses a facility hub, the recovery process is much the same as above. Once the NMC has observed the problem and administered the appropriate controls, the ECC will assume authority for the repairs. The recovery effort will include

a) Placing specialists and emergency equipment on notice;

b) Inventorying the damage to determine what equipment and/or functions are lost;

c) Moving containerized emergency equipment to the stricken area, if necessary;

d) Reconnecting service for Hospitals, Police and other emergency agencies; and

e) Restoring service to CLECs and other customers. If necessary, BellSouth will aggregate the traffic at another location and build temporary facilities. This alternative would be viable for a location that is destroyed and building repairs are required.

5.3 COMBINED OUTAGE (CLEC AND BELLSOUTH EQUIPMENT)

In some instances, a disaster may impact BellSouth's equipment as well as the CLECs'. This situation will be handled in much the same way as described in section 5.2.3. Since BellSouth and the CLECs will be utilizing temporary equipment, close coordination will be required.

6.0 T1 IDENTIFICATION PROCEDURES

During the restoration of service after a disaster, BellSouth may be forced to aggregate traffic for delivery to a CLEC. During this process, T1 traffic may be consolidated onto DS3s and may become unidentifiable to the Carrier. Because resources will be limited, BellSouth may be forced to "package" this traffic entirely differently then normally received by the CLECs. Therefore, a method for identifying the T1 traffic on the DS3s and providing the information to the Carriers is required.

7.0 ACRONYMS

CO	-	Central Office (BellSouth)
DS3	-	Facility that carries 28 T1s (672 circuits)
ECC	-	Emergency Control Center (BellSouth)
CLEC	-	Competitive Local Exchange Carrier
NMC	-	Network Management Center
SWC	-	Serving Wire Center (BellSouth switch)
T1	-	Facility that carries 24 circuits

Hurricane Information

During a hurricane, BellSouth will make every effort to keep CLECs updated on the status of our network. Information centers will be set up throughout BellSouth Telecommunications. These centers are not intended to be used for escalations, but rather to keep the CLEC informed of network related issues, area damages and dispatch conditions, etc.

Hurricane-related information can also be found on line at http://www.interconnection.bellsouth.com/network/disaster/dis_resp.htm. Information concerning Mechanized Disaster Reports can also be found at this website by clicking on CURRENT MDR REPORTS or by going directly to http://www.interconnection.bellsouth.com/network/disaster/mdrs.htm.

BST Disaster Management Plan

BellSouth maintenance centers have geographical and redundant communication capabilities. In the event of a disaster removing any maintenance center from service another geographical center would assume maintenance responsibilities. The contact numbers will not change and the transfer will be transparent to the CLEC.
