RE: JUNE 19, 2000 INVESTIGATION INTO POTENTIAL OVEREARNINGS
IN HIGHLANDS COUNTY BY HIGHLANDS RIDGE ASSOCIATES INC.
MEETING AT HIGHLANDS RIDGE, AVON PARK, FL, USA @ 1500 HRS

ATTACHED ARE COPIES OF: MEETING NOTIFICATION - CURRENT WATER
BILL - 1999 H.R.A ANNUAL DRINKING WATER QUALITY REPORT

We contracted for our home in Highland Ridge in January 1992, and finalized the sale in July 1992. We were one of the first 100 homeowners, and felt secure in the protection the State of Florida offered to its seniors when purchasing a home in an adult community. Highlands Ridge Associates enjoyed an excellent reputation for 'living by their word'.

At the time we purchased our home, the prospectus claimed that the water usage could be budgeted at around twenty-five dollars [\$25.00] per month as the water and sewage treatment plant were owned/operated by the Highlands Ridge Associates. Because we are 'Snowbirds', we would be in a position to budget a lesser amount.

During the initial purchase, we decided to utilize a satellite TV connection as soon as it was available. Not only would we have a broader base of programming from which to choose, we would also be free of the high reconnection charges levied by the local cable company. [Arrangements were made to pay for cable by the year, but that was of no benefit to we 'Snowbirds'.] TV was of no initial import, but would negatively impact all within the year.

Within six months of taking possession of our home, we were advised of a substantial increase in the cost of obtaining our water. We were also advised that we would be financially responsible for the cost of water used to maintain the rented land on which our owned manufactured home was located, and expected maintain a high standard of well cared for property.

Graham reinstalled our outdoor watering system to include a water sensor on the roof, five-zones to control how much watering is done and when, micro jets to decrease water wastage, and, working with Highlands County Agriculture Centre, chose drought resistant plants, shrubs and trees.

We, although teased about our degree of cleanliness, are quite conscience of water conservation and recycling within our home as well as in our community in the USA and Canada.

In January 1993, Highlands Ridge Associates announced that because of the unhappiness over the water issue, they would supply free TV Cable Service for five years to the residents. We were allowed no choice, nor input, pertaining to this unacceptable financial burden for a necessary commodity.

We, of course, did not benefit at all!

Over the years, the water and sewage rates were raised 'according to the limits set by the State of Florida' as often as possible. We currently pay an average of sixty dollars [\$60.00] per month when in residence, and fifty dollars [\$50.00] per month when we are not in residence.

Of major concern to us is the breakdown of our monthly bill. The [connection] 'base charges' for water and sewage are the primary reason for our high water bills. Water used to maintain the [outside] rented land is secondary. Our personal, in house use is relatively minor. Who sets the 'base charges'?

Another concern is having the sewage costs tied to the metered water usage. When we are away for six months, having first shut off the household water supply, none of the water used enters the sewage system. Water used for irrigation purposes puts no additional strain on the sewage treatment plant, as it is entirely utilized by the lawn, etc

Although we have not had a sample of our household water tested, by a government lab for quality and safety, we have noticed that it is not clear when accumulated in a clean bathtub. We, while acknowledging this is a personal choice, purchase bottled drinking water because of the aforementioned appearance of the tap water, and because of what we consider an 'odd' taste.

The attached report forwarded to us by HRA states that their water meets Florida standards. We are unsure of the impact of the warning: 'Some people may be more vulnerable to contaminants in drinking water than the general population..... Is our water safe to those who are immuno-comprised or isn't it?

June 8, 2000

In as much as we feel that most of the water used is for the benefit of the HRA, to assist them in their efforts to make further sales, we feel that we are paying more than a fair rate for the water and sewage services we use.

The HRA appear to be making an unfair profit on a resource that belongs to all residents of the State of Florida.

Our comments are respectfully submitted without prejudice.

Sincerely,

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION
NOTICE OF CUSTOMER MEETING TO THE CUSTOMERS
OF HIGHLANDS RIDGE ASSOCIATES, INC.
AND ALL OTHER INTERESTED PARTIES
DOCKET NO. 981147-WS

INVESTIGATION INTO POTENTIAL OVEREARNINGS IN
HIGHLANDS COUNTY BY HIGHLANDS RIDGE
ASSOCIATES, INC.

DATED: JUNE 2, 2000

Notice is hereby given that the Staff of the Florida Public Service Commission will conduct a customer meeting to discuss the above investigation of Highlands Ridge Associates, Inc. in Highlands County, at the following date, time and location:

Monday, June 19, 2000
Grand Room at Highlands Ridge
3003 South Fairway Vista Drive
Avon Park, Florida
3:00 PM

All persons who wish to testify are urged to be present at the beginning of the meeting, since the meeting may be adjourned early if no customers are present. One or more of the Commissioners of the Florida Public Service Commission may attend and participate in this meeting.

PURPOSE

The purpose of the meeting is to give customers and other interested persons an opportunity to offer sworn testimony to the Commission staff regarding the quality of service provided by the utility and to ask questions or offer comments on the Staff's proposed rates as well as other issues. These other issues include: 1) an appropriate disposition of any overearnings, (to the extent such overearnings are found to exist); and 2) a presentation by the Southwest Florida Water Management District (the "District") regarding the customers' high per capita usage and methods to reduce such usage including conservation programs and an inclining block rate structure for residential customers. Staff members will summarize the preliminary work accomplished and answer questions. A representative from the utility will also be present.

Any person who wishes to comment or provide information to Staff may do so at the meeting, orally or in writing. Written comments may also be sent to the Commission at the address given at the end of this notice.

Any person requiring some accommodation at the customer meeting because of a physical impairment should call the Division of Records and Reporting at (850) 486-8371 at least five calendar days prior to the meeting. If you are hearing or speech impaired, please contact the Florida Relay Service by using the following numbers: 1-800-955-8700(VOICE) or 1-800-955-8771(TDD).

How to Contact the Commission

Written comments regarding Highlands Ridge Associates, Inc.'s service or the proposed rates and charges may be sent to the Commission at the following address and should refer to Docket No. 981147-WS, which is the docket number assigned to this proceeding:

Director, Division of Records and Reporting
Florida Public Service Commission
2540 Shumard Oak Boulevard
Tallahassee, FL 32399-08570

Complaints regarding Highlands Ridge Associates, Inc.'s service or the proposed restructuring of rates may be made to the Commission's Division of Consumer Affairs at the following toll free number: 1-800-342-3553.

This note was prepared by the Utility at the direction and with the approval of the Commission staff for distribution to the Utility's customers.

Dear Highlands Ridge Residents

The State of Florida's Department of Environmental Protection recently mandated that every community public water system prepare and publish a yearly Consumer Confidence Report in accordance with rule 62-550.842, F.A.C.

Enclosed you will find the Annual Drinking Water Quality Report for the period 1/1/98 through 12/31/98 which includes test results in earlier years for contaminants sampled less often than annually. For contaminants not required to be tested for in 1998, test results are for the most recent testing done in accordance with the regulations. We are very pleased to report our system had no violations.

Our maintenance staff, with additional help from Short Utility Service, is dedicated to meeting your water needs. We are proud that our drinking water meets or exceeds all Federal and State requirements. We pledge to continue to provide top quality water to every resident at Highlands Ridge.

Very truly yours,

Diane Granholm
Property Manager

P.O. Box 768, Sebring, Florida 33871-0768
Phone 941-471-1117
Fax 941-471-3398

1999 Annual Drinking Water Quality Report

Highlands Ridge of Lake Bonnet

We're pleased to present to you this year's Annual Quality Water Report. This report is designed to inform you about the quality water and services we deliver to you every day. Our constant goal is to provide you with a safe and dependable supply of drinking water. We want you to understand the efforts we make to continually improve the water treatment process and protect our water resources. We are committed to ensuring the quality of your water. Our water source is two wells that draw water from the Floridan aquifer.

We are pleased to report that our drinking water meets federal and state requirements.

If you have any questions about this report or concerning your water utility, please contact Diane Granholm at (863) 471-1117. We want our valued customers to be informed about their water utility.

Highlands Ridge routinely monitors for contaminants in your drinking water according to Federal and State laws. This table shows the results of our monitoring for the period of January 1st to December 31st, 1999 and includes test results in earlier years for contaminants sampled less often than annually. For contaminants not required to be tested for in 1999, test results are for the most recent testing done in accordance with the regulations.

As water travels over the land or underground it can pick up substances or contaminants such as microbes, inorganic and organic chemicals, and radioactive substances. It's important to remember that the presence of these contaminants does not necessarily pose a health risk.

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally-occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity.

Contaminants that may be present in source water include:

Microbial contaminants, such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.

Inorganic contaminants, such as salts and metals, which can be naturally-occurring or result from urban stormwater runoff, industrial or domestic wastewater discharges, oil and gas production, mining, or farming.

Pesticides and herbicides, which may come from a variety of sources such as agriculture, urban stormwater runoff, and residential uses.

Organic chemical contaminants, including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations, urban stormwater runoff, and septic systems.

Radioactive contaminants, which can be naturally-occurring or be the result of oil and gas production and mining activities.

In order to ensure that tap water is safe to drink, EPA prescribes regulations which limit the amount of certain contaminants in water provided by public water systems. FDA regulations establish limits for contaminants in bottled water which must provide the same protection for public health.

All drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that the water poses a health risk. More

information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline at 1-800-426-4791.

In this table you will find many terms and abbreviations you might not be familiar with. To help you better understand these terms we've provided the following definitions:

Non-Detects (ND) - laboratory analysis indicates that the constituent is not present.

Parts per million (ppm) or Milligrams per liter (mg/l) - one part per million corresponds to one minute in two years or a single penny in \$10,000.

Parts per billion (ppb) or Micrograms per liter - one part per billion corresponds to one minute in 2,000 years, or a single penny in \$10,000,000.

Picocuries per liter (pCi/L) - picocuries per liter is a measure of radioactivity in water.

Action Level - the concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

Maximum Contaminant Level - The "Maximum Allowed" (MCL) is the highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

Maximum Contaminant Level Goal - The "Goal"(MCLG) is the level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

TEST RESULTS TABLE							
Contaminant and Unit of Measurement	MCL or /AL Violation Yes/No	Level Detected	Range	MCLG	MCL	Date of Sample	Likely Source of Contamination
Radiological Contaminants							
Alpha (pCi/l)	NO	2.2	N/A	0	15	1997	Decay of natural and man-made deposits
Inorganic Contaminants							
Barium (ppm)	NO	0.03	N/A	2	2	1997	Discharge of drilling wastes; discharge from metal refineries; erosion of natural deposits
Copper (tap water) (ppm)	NO	0.49	All sampling sites below action level	1.3	AL=1.3	1999	Corrosion of household plumbing systems; erosion of natural deposits; leaching from wood preservatives
Fluoride (ppm)	NO	0.09	N/A	4	4	1997	Erosion of natural deposits; water additive which promotes strong teeth; discharge from fertilizer and aluminum factories
Lead (tap water) (ppb)	NO	3	All sampling sites below action level	0	AL=15	1999	Corrosion of household plumbing systems, erosion of natural deposits
Lead (point of entry) (ppb)	NO	2	N/A	n/a	15	1997	Residue from man-made pollution such as auto emissions and paint.; lead pipe, casing, and solder
Sodium (ppm)	NO	4.1	N/A	n/a	160	1997	Salt water intrusion, leaching from soil

Some people may be more vulnerable to contaminants in drinking water than the general population. Immunocompromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly

at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by cryptosporidium and other microbiological contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

As you can see by the table, our system had no violations. We're proud that your drinking water meets or exceeds all Federal and State requirements. We have learned through our monitoring and testing that some constituents have been detected.

MCLs are set at very stringent levels. To understand the possible health effects described for many regulated constituents, a person would have to drink 2 liters of water every day at the MCL level for a lifetime to have a one-in-a-million chance of having the described health effect.

In our continuing efforts to maintain a safe and dependable water supply it may be necessary to make improvements in your water system. The costs of these improvements may be reflected in the rate structure. Rate adjustments may be necessary in order to address these improvements.

We at Highlands Ridge work around the clock to provide top quality water to every tap. We ask that all our customers help us protect our water sources, which are the heart of our community, our way of life and our children's future.

CONSUMER COMMENTS

① We don't use 10,000 gal. of wastewater ^{amount} It is drastically below what you say the average per household use is. It is.

② We are being charged for sewer use for irrigation water which doesn't go to the sewer.

③ We have installed a separate meter for monitoring irrigation water use. Therefore, we can show we use substantially LESS water ~~we~~ than billed for sewer use.

④ We filed a complaint with PSC which we have not heard about, although we have spoken on the phone with Stanley Rieger in May. We understand there is a policy that complaints must be answered in writing within 20 days. We are still waiting. We informed the consumer complaint division of our address up north.

Case # 316623 w

⑤ Water is turned off in summer months for household use although irrigation water is used. We are still charged for household use for irrigation water.
