Each Series G Senior Note shall bear interest at the rate of 4.35% per annum from the date of original issuance, payable semiannually in arrears on January 15 and July 15 of each year to the person in whose name such Series G Senior Note is registered at the close of business on the fifteenth calendar day prior to such payment date (whether or not a Business Day). The initial interest payment date is January 15, 2004. The amount of interest payable will be computed on the basis of a 360-day year of twelve 30-day months. In the event that any date on which interest is payable on the Series G Senior Notes is not a Business Day, then payment of the interest payable on such date will be made on the next succeeding day which is a Business Day (and without any interest or other payment in respect of any such delay), with the same force and effect as if made on such date. "Business Day" means a day other than (i) a Saturday or Sunday, (ii) a day on which banks in New York, New York are authorized or obligated by law or executive order to remain closed or (iii) a day on which the Senior Note Indenture Trustee's corporate trust office is closed for business.

**Ranking**

The Series G Senior Notes will be direct, unsecured and unsubordinated obligations of the Company ranking equally with all other unsecured and unsubordinated obligations of the Company. The Series G Senior Notes will be effectively subordinated to all secured debt of the Company, including its first mortgage bonds, aggregating approximately $170,000,000 outstanding at March 31, 2003. The Senior Note Indenture contains no restrictions on the amount of additional indebtedness that may be incurred by the Company.

**Redemption**

The Series G Senior Notes will not be redeemable at the option of the Company prior to maturity.

**Book-Entry Only Issuance—The Depository Trust Company**

The Depository Trust Company ("DTC") will act as the initial securities depositary for the Series G Senior Notes. The Series G Senior Notes will be issued only as fully-registered securities in the name of Cede & Co., DTC's nominee, or such other name as may be requested by an authorized representative of DTC. One or more fully registered global Series G Senior Notes certificates will be issued, representing in the aggregate the total principal amount of Series G Senior Notes, and will be deposited with DTC or a custodian therefor.

DTC is a limited-purpose trust company organized under the New York Banking Law, a "banking organization" within the meaning of the New York Banking Law, a member of the Federal Reserve System, a "clearing corporation" within the meaning of the New York Uniform Commercial Code and a "clearing agency" registered pursuant to the provisions of Section 17A of the Securities Exchange Act of 1934, as amended. DTC holds and provides asset servicing for over 2 million issues of U.S. and non-U.S. equity issues, corporate and municipal debt issues and money market instruments from over 85 countries that DTC's participants ("Direct Participants") deposit with DTC. DTC also facilitates the post-trade settlement among Direct Participants of sales and other securities transactions in deposited securities, through electronic computerized book-entry transfers and pledges between Direct Participants' accounts. This eliminates the need for physical movement of securities certificates. Direct Participants include both U.S. and non-U.S. securities brokers and dealers, banks, trust companies, clearing corporations and certain other organizations. DTC is a wholly-owned subsidiary of The Depository Trust & Clearing Corporation ("DTCC"). DTCC, in turn, is owned by a number of Direct Participants of DTC and members of the National Securities Clearing Corporation, Government Securities Clearing Corporation, MBS Clearing Corporation and Emerging Markets Clearing Corporation (NSCC, GSCC, MBSCC

and EMCC, also subsidiaries of DTCC), as well as by the New York Stock Exchange, Inc., the American Stock Exchange LLC and the National Association of Securities Dealers, Inc. Access to the DTC system is also available to others such as both U.S. and non-U.S. securities brokers and dealers, banks, trust companies and clearing corporations that clear through or maintain a custodial relationship with a Direct Participant, either directly or indirectly ("Indirect Participants" and, together with Direct Participants, "Participants"). The DTC rules applicable to its Participants are on file with the Securities and Exchange Commission. More information about DTC can be found at www. dtcc.com.

Purchases of Series G Senior Notes under the DTC system must be made by or through Direct Participants, which will receive a credit for the Series G Senior Notes on DTC's records. The ownership interest of each actual purchaser of Series G Senior Notes ("Beneficial Owner") is in turn to be recorded on the Participants' records. Beneficial Owners will not receive written confirmation from DTC of their purchases, but Beneficial Owners are expected to receive written confirmations providing details of the transactions, as well as periodic statements of their holdings, from the Participants through which the Beneficial Owners purchased Series G Senior Notes. Transfers of ownership interests in the Series G Senior Notes are to be accomplished by entries made on the books of Participants acting on behalf of Beneficial Owners. Beneficial Owners will not receive certificates representing their ownership interests in Series G Senior Notes, except in the event that use of the book-entry system for the Series G Senior Notes is discontinued.

To facilitate subsequent transfers, all Series G Senior Notes deposited by Direct Participants with DTC are registered in the name of DTC's partnership nominee, Cede & Co., or such other name as may be requested by an authorized representative of DTC. The deposit of Series G Senior Notes with DTC and their registration in the name Cede & Co. or such other DTC nominee do not effect any changes in beneficial ownership. DTC has no knowledge of the actual Beneficial Owners of the Series G Senior Notes. DTC's records reflect only the identity of the Direct Participants to whose accounts such Series G Senior Notes are credited, which may or may not be the Beneficial Owners. The Participants will remain responsible for keeping account of their holdings on behalf of their customers.

Conveyance of notices and other communications by DTC to Direct Participants, by Direct Participants to Indirect Participants, and by Direct Participants and Indirect Participants to Beneficial Owners will be governed by arrangements among them, subject to any statutory or regulatory requirements as may be in effect from time to time.

Although voting with respect to the Series G Senior Notes is limited, in those cases where a vote is required, neither DTC nor Cede & Co. (or such other DTC nominee) will itself consent or vote with respect to Series G Senior Notes. Under its usual procedures, DTC would mail an Omnibus Proxy to the Company as soon as possible after the record date. The Omnibus Proxy assigns Cede & Co.'s (or such other DTC nominee's) consenting or voting rights to those Direct Participants to whose accounts the Series G Senior Notes are credited on the record date (identified in a listing attached to the Omnibus Proxy).

Payments on the Series G Senior Notes will be made to Cede & Co. or such other nominee as may be requested by an authorized representative of DTC. DTC's practice is to credit Direct Participants' accounts upon DTC's receipt of funds and corresponding detail information from the Company or the Senior Note Indenture Trustee on the relevant payment date in accordance with their respective holdings shown on DTC's records unless DTC has reason to believe that it will not receive payments on such payment date. Payments by Participants to Beneficial Owners will be governed by standing instructions and customary practices, as is the case with securities held for the account of customers registered in "street name," and will be the responsibility of such Participant and not of DTC or the Company, subject to any statutory or regulatory requirements as may be in effect from time to time. Payment to Cede & Co. (or such other nominee as may be requested by an authorized representative of DTC) is the responsibility of the Company, disbursement of such payments to Direct Participants is the responsibility of DTC), and disbursement of such payments to the Beneficial Owners is the responsibility of Participants.

Except as provided herein, a Beneficial Owner of a global Series G Senior Note will not be entitled to receive physical delivery of Series G Senior Notes. Accordingly, each Beneficial Owner must rely on the procedures of DTC to exercise any rights under the Series G Senior Notes. The laws of some jurisdictions require that certain purchasers of securities take physical delivery of securities in definitive form. Such laws may impair the ability to transfer beneficial interests in a global Series G Senior Note.

DTC may discontinue providing its services as securities depositary with respect to the Series G Senior Notes at any time by giving reasonable notice to the Company. Under such circumstances, in the event that a successor securities depositary is not obtained, Series G Senior Notes certificates will be printed and delivered to the holders of record. Additionally, the Company may decide to discontinue use of the system of book-entry transfers through DTC (or a successor depositary) with respect to the Series G Senior Notes. In that event, certificates for the Series G Senior Notes will be printed and delivered to the holders of record.

The information in this section concerning DTC and DTC's book-entry system has been obtained from sources that the Company believes to be reliable, but the Company takes no responsibility for the accuracy thereof. The Company has no responsibility for the performance by DTC or its Participants of their respective obligations as described herein or under the rules and procedures governing their respective operations.

## UNDERWRITING

Subject to the terms and conditions set forth in the Underwriting Agreement dated the date hereof, the Company has agreed to sell to each of the Underwriters named below (for whom Lehman Brothers Inc. and Scotia Capital (USA) Inc. are acting as Representatives) and each of the Underwriters severally has agreed to purchase the principal amount of Series G Senior Notes set forth opposite its name below:

| Name | Principal Amount of Series G Senior Notes |
|---|---|
| Lehman Brothers Inc. | $27,000,000 |
| Scotia Capital (USA) Inc. | $27,000,000 |
| KBC Financial Products USA Inc. | $ 6,000,000 |
| Total | $60,000,000 |

The Underwriting Agreement provides that the obligations of the several Underwriters to pay for and accept delivery of the Series G Senior Notes are subject to, among other things, the approval of certain legal matters by their counsel and certain other conditions. The Underwriters are obligated to take and pay for all the Series G Senior Notes if any are taken.

The Underwriters propose initially to offer all or part of the Series G Senior Notes to the public at the public offering price set forth on the cover page of this Prospectus Supplement and may offer the Series G Senior Notes to certain securities dealers at such price less a concession not in excess of 0.400% of the principal amount of the Series G Senior Notes. The Underwriters may allow, and such dealers may reallow, a discount not in excess of 0.200% of the principal amount of the Series G Senior Notes to certain brokers and dealers. After the initial public offering, the public offering price, concession and discount may be changed.

The Company has agreed, during the period of 15 days from the date of the Underwriting Agreement, not to sell, offer to sell, grant any option for the sale of or otherwise dispose of any Series G Senior Notes, any security convertible into or exchangeable into or exercisable for Series G Senior Notes or any debt securities substantially similar to the Series G Senior Notes (except for the Series G Senior Notes issued pursuant to the Underwriting Agreement and the Series H Senior Notes), without the prior written consent of the Representatives.

The underwriting discounts and commissions to be paid to the Underwriters by the Company with this offering will be 0.650% per Series G Senior Note, for a total of $390,000. In addition, the Company estimates that it will incur other offering expenses of approximately $230,000.

In order to facilitate the offering of the Series G Senior Notes, the Underwriters or their affiliates may engage in transactions that stabilize, maintain or otherwise affect the price of the Series G Senior Notes. Specifically, the Underwriters or their affiliates may over-allot in connection with this offering, creating short positions in the Series G Senior Notes for their own account. In addition, to cover over-allotments or to stabilize the price of the Series G Senior Notes, the Underwriters or their affiliates may bid for and purchase Series G Senior Notes in the open market. Finally, the Underwriters or their affiliates may reclaim selling concessions allowed to an underwriter or dealer for distributing Series G Senior Notes in this offering, if the Underwriters or their affiliates repurchase previously distributed Series G Senior Notes in transactions that cover syndicate short positions, in stabilization transactions or otherwise. Any of these activities may stabilize or maintain the market price of the Series G Senior Notes above independent market levels. The Underwriters or their affiliates are not required to engage in these activities, and may end any of these activities at any time.

In general, purchases of a security for the purpose of stabilization or to reduce a short position could cause the price of the security to be higher than it might be in the absence of such purchases. The imposition of a penalty bid might also have an effect on the price of a security to the extent that it were to discourage resales of the security.

Neither the Company nor any of the Underwriters makes any representation or prediction as to the direction or magnitude of any effect that the transactions described above may have on the price of the Series G Senior Notes. In addition, neither the Company nor any of the Underwriters makes any representation that such transactions will be engaged in or that such transactions, once commenced, will not be discontinued without notice.

The Company has agreed to indemnify the Underwriters against certain liabilities, including liabilities under the Securities Act of 1933, as amended.

The Underwriters and their affiliates engage in transactions with and perform services for the Company in the ordinary course of business and have engaged, and may in the future engage, in commercial banking and/or investment banking transactions with the Company or its affiliates.

The Series G Senior Notes will not have an established trading market when issued. There can be no assurance of a secondary market for the Series G Senior Notes or the continued liquidity of such market if one develops. It is not anticipated that the Series G Senior Notes will be listed on any securities exchange.

PROSPECTUS

**$360,000,000**

# Gulf Power Company

## Senior Notes

## Junior Subordinated Notes

---

# Gulf Power Capital Trust V
# Gulf Power Capital Trust VI

## Trust Preferred Securities

**Fully and unconditionally guaranteed, as set forth in this Prospectus, by**

# Gulf Power Company

**a subsidiary of The Southern Company**

---

We will provide the specific terms of these securities in supplements to this Prospectus. You should read this Prospectus and the applicable prospectus supplement carefully before you invest.

See "Risk Factors" on page 2 for information on certain risks related to the purchase of securities offered by this Prospectus.

**Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this Prospectus is truthful or complete. Any representation to the contrary is a criminal offense.**

**April 25, 2003**

## ABOUT THIS PROSPECTUS

This Prospectus is part of a registration statement filed with the Securities and Exchange Commission (the "Commission") using a "shelf" registration process under the Securities Act of 1933, as amended (the "1933 Act"). Under the shelf process, Gulf Power Company (the "Company") may sell, in one or more transactions,

- senior notes (the "Senior Notes")
- junior subordinated notes (the "Junior Subordinated Notes")

and Gulf Power Capital Trust V and Gulf Power Capital Trust VI (individually, a "Trust" and collectively, the "Trusts") may sell

- trust preferred securities or capital securities (the "Preferred Securities")

in one or more offerings up to a total dollar amount of $360,000,000. This Prospectus provides a general description of those securities. Each time the Company sells securities, the Company will provide a prospectus supplement that will contain specific information about the terms of that offering ("Prospectus Supplement"). The Prospectus Supplement may also add, update or change information contained in this Prospectus. You should read this Prospectus and the applicable Prospectus Supplement together with additional information under the heading "Available Information."

## RISK FACTORS

Investing in the Company's securities involves risk. Please see the risk factors described in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2002, which is incorporated by reference in this Prospectus. Before making an investment decision, you should carefully consider these risks as well as other information contained or incorporated by reference in this Prospectus. The risks and uncertainties described are not the only ones facing the Company. Additional risks and uncertainties not presently known to the Company or that the Company currently deems immaterial may also impair its business operations, its financial results and the value of its securities.

## AVAILABLE INFORMATION

The Company and the Trusts have filed with the Commission a combined registration statement on Form S-3 (the "Registration Statement," which term encompasses any amendments of the Registration Statement and exhibits to the Registration Statement) under the 1933 Act. As permitted by the rules and regulations of the Commission, this Prospectus does not contain all of the information set forth in the Registration Statement and the exhibits and schedules thereto, to which reference is made.

The Company is subject to the informational requirements of the Securities Exchange Act of 1934, as amended (the "1934 Act"), and in accordance with the 1934 Act files reports and other information with the Commission. Such reports and other information can be inspected and copied at the public reference facilities of the Commission at 450 Fifth Street, N.W., Washington, D.C. 20549. Information on the operation of the Public Reference Room may be obtained by calling the Commission at 1-800-SEC-0330. The Commission maintains a Web site that contains reports, proxy and information statements and other information regarding registrants including the Company that file electronically at http://www.sec.gov. In addition, reports and other material concerning the Company can be inspected at the offices of the New York Stock Exchange, 20 Broad Street, New York, New York 10005.

No separate financial statements of any Trust are included in this Prospectus. The Company considers that such statements would not be material to holders of the Preferred Securities because each Trust has no

independent operations and exists for the sole purpose of investing the proceeds of the sale of its Trust Securities (as defined below) in Junior Subordinated Notes.

## INCORPORATION OF CERTAIN DOCUMENTS BY REFERENCE

The following documents have been filed with the Commission pursuant to the 1934 Act and are incorporated by reference in this Prospectus and made a part of this Prospectus:

(a) the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2002; and

(b) the Company's Current Report on Form 8-K dated March 21, 2003

All documents filed by the Company with the Commission pursuant to Section 13(a), 13(c), 14 or 15(d) of the 1934 Act subsequent to the date of this Prospectus and prior to the termination of this offering shall be deemed to be incorporated by reference in this Prospectus and made a part of this Prospectus from the date of filing of such documents. Any statement contained in a document incorporated or deemed to be incorporated by reference in this Prospectus shall be deemed to be modified or superseded for purposes of this Prospectus to the extent that a statement contained in this Prospectus or in any other subsequently filed document which also is or is deemed to be incorporated by reference in this Prospectus modifies or supersedes such statement. Any statement so modified or superseded shall not be deemed, except as so modified or superseded, to constitute a part of this Prospectus.

**The Company will provide without charge to each person to whom this Prospectus is delivered, on the written or oral request of any such person, a copy of any or all documents incorporated herein by reference in this Prospectus (other than the exhibits to such documents unless such exhibits are specifically incorporated by reference in this Prospectus). Such requests should be directed to Warren E. Tate, Vice President, Secretary and Treasurer, Gulf Power Company, One Energy Place, Pensacola, Florida 32520, telephone: (850) 444-6111.**

## GULF POWER COMPANY

The Company is a corporation organized under the laws of the State of Maine on November 2, 1925, and was admitted to do business in Florida on January 15, 1926, in Mississippi on October 25, 1976 and in Georgia on November 20, 1984. The principal executive offices of the Company are located at 500 Bayfront Parkway, Pensacola, Florida 32501, and the telephone number is (850) 444-6111.

The Company is a wholly owned subsidiary of The Southern Company ("Southern"), a holding company registered under the Public Utility Holding Company Act of 1935, as amended. The Company is engaged, within the northwestern portion of the State of Florida, in the generation and purchase of electricity and the distribution and sale of such electricity at retail in 71 communities as well as in rural areas, and at wholesale to a nonaffiliated utility and to a municipality.

## SELECTED INFORMATION

*The following material, which is presented in this Prospectus solely to furnish limited introductory information regarding the Company, has been selected from, or is based upon, the detailed information and financial statements appearing in the documents incorporated in this Prospectus by reference or elsewhere in this Prospectus, is qualified in its entirety by reference to those documents and, therefore, should be read together with those documents.*

### Gulf Power Company

| | |
|---|---|
| Business | Generation, transmission, distribution and sale of electric energy |
| Service Area | Approximately 7,400 square miles within the northwestern portion of the State of Florida |
| Customers at December 31, 2002 | 383,923 |
| Generating Capacity at December 31, 2002 (kilowatts) | 2,808,550 |
| Sources of Generation during 2002 (kilowatt-hours) | Coal (82%), Gas (18%) |

### Certain Ratios

The following table sets forth the Ratios of Earnings to Fixed Charges and Earnings to Fixed Charges Plus Preferred Dividend Requirements (Pre-Income Tax Basis) for the periods indicated.

| | Year Ended December 31, | | | | |
|---|---|---|---|---|---|
| | 1998 | 1999 | 2000 | 2001 | 2002 |
| Ratio of Earnings to Fixed Charges(1) | 3.83 | 3.62 | 3.38 | 3.64 | 3.52 |
| Ratio of Earnings to Fixed Charges Plus Preferred Dividend Requirements (Pre-Income Tax Basis)(2) | 3.72 | 3.58 | 3.34 | 3.60 | 3.50 |

(1) This ratio is computed as follows: (i) "Earnings" have been calculated by adding to "Earnings Before Income Taxes" "Interest Expense, Net of Amounts Capitalized," "Distributions on Preferred Securities of Subsidiary" and the debt portion of allowance for funds used during construction, and (ii) "Fixed Charges" consist of "Interest Expense, Net of Amounts Capitalized," "Distributions on Preferred Securities of Subsidiary" and the debt portion of allowance for funds used during construction.

(2) In computing this ratio, "Preferred Dividend Requirements" represent the before tax earnings necessary to pay such dividends, computed at the effective tax rates for the applicable periods.

## THE TRUSTS

Each Trust is a statutory trust created under Delaware law pursuant to the filing of a certificate of trust with the Delaware Secretary of State on April 7, 2003. Each Trust's business is defined in a trust agreement, executed by the Company, as Depositor, and the Delaware Trustee of each Trust. This trust agreement of each Trust will be amended and restated in its entirety substantially in the form filed as an exhibit to the Registration Statement of which this Prospectus forms a part (the "Trust Agreement"). Each Trust Agreement will be qualified as an indenture under the Trust Indenture Act of 1939, as amended (the "1939 Act"). The Company will own all of the common securities (the "Common Securities" and, together with the Preferred Securities, the "Trust Securities") of each Trust. The Trust Securities represent undivided beneficial interests in the assets of the respective Trusts. Each Trust exists for the exclusive purposes of (i) issuing its Trust Securities representing undivided beneficial interests in the assets of such Trust, (ii) investing the gross proceeds of its Trust Securities in a related series of Junior Subordinated Notes, and (iii) engaging in only those other activities necessary, appropriate, convenient or incidental to these purposes. The payment of periodic cash distributions on the Preferred Securities of each Trust and payments on liquidation and redemption with respect to the Preferred Securities of each Trust, in each case to the extent each Trust has funds legally and immediately available for these purposes, will be guaranteed by the Company (individually, a "Guarantee" and collectively, the "Guarantees") to the extent set forth under "Description of the Guarantees."

Each Trust's business and affairs will be conducted by its trustees, which shall be appointed by the Company as the holder of the Common Securities: two officers of the Company as Administrative Trustees; JPMorgan Chase Bank as Property Trustee; and Chase Manhattan Bank USA, National Association as Delaware Trustee (collectively, the "Securities Trustees"). The Property Trustee of each Trust will act as the indenture trustee with respect to such Trust for purposes of compliance with the provisions of the 1939 Act.

The principal place of business of each Trust shall be c/o the Company, 500 Bayfront Parkway, Pensacola, Florida 32501, telephone (850) 444-6111, Attn: Treasurer.

Reference is made to the Prospectus Supplement relating to the Preferred Securities of a Trust for further information concerning such Trust.

## ACCOUNTING TREATMENT OF TRUSTS

For financial reporting purposes, the Trusts will be treated as subsidiaries of the Company and, accordingly, the accounts of the Trusts will be included in the consolidated financial statements of the Company. The Preferred Securities will be presented as a separate line item in the consolidated balance sheet of the Company, and appropriate disclosures concerning the Preferred Securities, the Guarantees and the Junior Subordinated Notes will be included in the notes to the consolidated financial statements. For financial reporting purposes, the Company will record distributions payable on the Preferred Securities as an expense.

## USE OF PROCEEDS

Each Trust will invest the proceeds received from the sale of its Preferred Securities in Junior Subordinated Notes. Except as may be otherwise described in an applicable Prospectus Supplement, the net proceeds received by the Company from such investment and any proceeds received from the sale of its Senior Notes or other sales of its Junior Subordinated Notes will be used in connection with its ongoing construction program, to pay scheduled maturities and/or refundings of its securities, to repay short-term indebtedness to the extent outstanding and for other general corporate purposes.

## DESCRIPTION OF THE SENIOR NOTES

Set forth below is a description of the general terms of the Senior Notes. The following description does not purport to be complete and is subject to, and is qualified in its entirety by reference to, the Senior Note Indenture, dated as of January 1, 1998, between the Company and JPMorgan Chase Bank (formerly known as The Chase Manhattan Bank), as trustee (the "Senior Note Indenture Trustee"), as to be supplemented by a supplemental indenture to the Senior Note Indenture establishing the Senior Notes of each series (the Senior Note Indenture, as so supplemented, is referred to as the "Senior Note Indenture"), the forms of which are filed as exhibits to the Registration Statement of which this Prospectus forms a part. The terms of the Senior Notes will include those stated in the Senior Note Indenture and those made a part of the Senior Note Indenture by reference to the 1939 Act. Certain capitalized terms used in this Prospectus and not defined in this Prospectus are defined in the Senior Note Indenture.

### General

The Senior Notes will be issued as unsecured senior debt securities under the Senior Note Indenture and will rank equally with all other unsecured and unsubordinated debt of the Company. The Senior Notes will be effectively subordinated to all secured debt of the Company, including its first mortgage bonds, aggregating approximately $170,000,000 outstanding at December 31, 2002. The Senior Note Indenture does not limit the aggregate principal amount of Senior Notes that may be issued under the Senior Note Indenture and provides that Senior Notes may be issued from time to time in one or more series pursuant to an indenture supplemental to the Senior Note Indenture. The Senior Note Indenture gives the Company the ability to reopen a previous issue of Senior Notes and issue additional Senior Notes of such series, unless otherwise provided.

Reference is made to the Prospectus Supplement that will accompany this Prospectus for the following terms of the series of Senior Notes being offered by such Prospectus Supplement: (i) the title of such Senior Notes; (ii) any limit on the aggregate principal amount of such Senior Notes; (iii) the date or dates on which the principal of such Senior Notes is payable; (iv) the rate or rates at which such Senior Notes shall bear interest, if any, or any method by which such rate or rates will be determined, the date or dates from which such interest will accrue, the interest payment dates on which such interest shall be payable, and the regular record date for the interest payable on any interest payment date; (v) the place or places where the principal of (and premium, if any) and interest, if any, on such Senior Notes shall be payable; (vi) the period or periods within which, the price or prices at which and the terms and conditions on which such Senior Notes may be redeemed, in whole or in part, at the option of the Company or at the option of the holder prior to their maturity; (vii) the obligation, if any, of the Company to redeem or purchase such Senior Notes; (viii) the denominations in which such Senior Notes shall be issuable; (ix) if other than the principal amount of the Senior Notes, the portion of the principal amount of such Senior Notes which shall be payable upon declaration of acceleration of the maturity of such Senior Notes; (x) any deletions from, modifications of or additions to the Events of Default or covenants of the Company as provided in the Senior Note Indenture pertaining to such Senior Notes; (xi) whether such Senior Notes shall be issued in whole or in part in the form of a Global Security; and (xii) any other terms of such Senior Notes.

The Senior Note Indenture does not contain provisions that afford holders of Senior Notes protection in the event of a highly leveraged transaction involving the Company.

### Events of Default

The Senior Note Indenture provides that any one or more of the following described events with respect to the Senior Notes of any series, which has occurred and is continuing, constitutes an "Event of Default" with respect to the Senior Notes of such series:

(a) failure for 10 days to pay interest on the Senior Notes of such series, when due on an interest payment date other than at maturity or upon earlier redemption; or

(b) failure to pay principal or premium, if any, or interest on the Senior Notes of such series when due at maturity or upon earlier redemption; or

(c) failure for three Business Days to deposit any sinking fund payment when due by the terms of a Senior Note of such series; or

(d) failure to observe or perform any other covenant or warranty of the Company in the Senior Note Indenture (other than a covenant or warranty which has expressly been included in the Senior Note Indenture solely for the benefit of one or more series of Senior Notes other than such series) for 90 days after written notice to the Company from the Senior Note Indenture Trustee or the holders of at least 25% in principal amount of the outstanding Senior Notes of such series; or

(e) certain events of bankruptcy, insolvency or reorganization of the Company.

The holders of not less than a majority in aggregate outstanding principal amount of the Senior Notes of any series have the right to direct the time, method and place of conducting any proceeding for any remedy available to the Senior Note Indenture Trustee with respect to the Senior Notes of such series. If a Senior Note Indenture Event of Default occurs and is continuing with respect to the Senior Notes of any series, then the Senior Note Indenture Trustee or the holders of not less than 25% in aggregate outstanding principal amount of the Senior Notes of such series may declare the principal amount of the Senior Notes due and payable immediately by notice in writing to the Company (and to the Senior Note Indenture Trustee if given by the holders), and upon any such declaration such principal amount shall become immediately due and payable. At any time after such a declaration of acceleration with respect to the Senior Notes of any series has been made and before a judgment or decree for payment of the money due has been obtained as provided in Article Five of the Senior Note Indenture, the holders of not less than a majority in aggregate outstanding principal amount of the Senior Notes of such series may rescind and annul such declaration and its consequences if the default has been cured or waived and the Company has paid or deposited with the Senior Note Indenture Trustee a sum sufficient to pay all matured installments of interest and principal due otherwise than by acceleration and all sums paid or advanced by the Senior Note Indenture Trustee, including reasonable compensation and expenses of the Senior Note Indenture Trustee.

The holders of not less than a majority in aggregate outstanding principal amount of the Senior Notes of any series may, on behalf of the holders of all the Senior Notes of such series, waive any past default with respect to such series, except (i) a default in the payment of principal or interest or (ii) a default in respect of a covenant or provision which under Article Nine of the Senior Note Indenture cannot be modified or amended without the consent of the holder of each outstanding Senior Note of such series affected.

**Registration and Transfer**

The Company shall not be required to (i) issue, register the transfer of or exchange Senior Notes of any series during a period of 15 days immediately preceding the date notice is given identifying the Senior Notes of such series called for redemption, or (ii) register the transfer of or exchange any Senior Notes so selected for redemption, in whole or in part, except the unredeemed portion of any Senior Note being redeemed in part.

**Payment and Paying Agent**

Unless otherwise indicated in an applicable Prospectus Supplement, payment of principal of any Senior Notes will be made only against surrender to the Paying Agent of such Senior Notes. Principal of and interest on Senior Notes will be payable subject to any applicable laws and regulations, at the office of such Paying Agent or Paying Agents as the Company may designate from time to time, except that, at the option of the Company, payment of any interest may be made by wire transfer or by check mailed to the address of the person entitled to an interest payment as such address shall appear in the Security Register with respect to the Senior Notes.

Payment of interest on Senior Notes on any interest payment date will be made to the person in whose name the Senior Notes (or predecessor security) are registered at the close of business on the record date for such interest payment.

Unless otherwise indicated in an applicable Prospectus Supplement, the Senior Note Indenture Trustee will act as Paying Agent with respect to the Senior Notes. The Company may at any time designate additional Paying Agents or rescind the designation of any Paying Agents or approve a change in the office through which any Paying Agent acts.

All moneys paid by the Company to a Paying Agent for the payment of the principal of or interest on the Senior Notes of any series which remain unclaimed at the end of two years after such principal or interest shall have become due and payable will be repaid to the Company, and the holder of such Senior Notes will from that time forward look only to the Company for payment of such principal and interest.

**Modification**

The Senior Note Indenture contains provisions permitting the Company and the Senior Note Indenture Trustee, with the consent of the holders of not less than a majority in principal amount of the outstanding Senior Notes of each series that is affected, to modify the Senior Note Indenture or the rights of the holders of the Senior Notes of such series; provided, that no such modification may, without the consent of the holder of each outstanding Senior Note that is affected, (i) change the stated maturity of the principal of, or any installment of principal of or interest on, any Senior Note, or reduce the principal amount of any Senior Note or the rate of interest on any Senior Note or any premium payable upon the redemption thereof, or change the method of calculating the rate of interest on any Senior Note, or impair the right to institute suit for the enforcement of any such payment on or after the stated maturity of any Senior Note (or, in the case of redemption, on or after the redemption date), or (ii) reduce the percentage of principal amount of the outstanding Senior Notes of any series, the consent of whose holders is required for any such supplemental indenture, or the consent of whose holders is required for any waiver (of compliance with certain provisions of the Senior Note Indenture or certain defaults under the Senior Note Indenture and their consequences) provided for in the Senior Note Indenture, or (iii) modify any of the provisions of the Senior Note Indenture relating to supplemental indentures, waiver of past defaults, or waiver of certain covenants, except to increase any such percentage or to provide that certain other provisions of the Senior Note Indenture cannot be modified or waived without the consent of the holder of each outstanding Senior Note that is affected.

In addition, the Company and the Senior Note Indenture Trustee may execute, without the consent of any holders of Senior Notes, any supplemental indenture for certain other usual purposes, including the creation of any new series of Senior Notes.

**Consolidation, Merger and Sale**

The Company shall not consolidate with or merge into any other corporation or convey, transfer or lease its properties and assets substantially as an entirety to any person, unless (1) such other corporation or person is a corporation organized and existing under the laws of the United States, any state in the United States or the District of Columbia and such other corporation or person expressly assumes, by supplemental indenture executed and delivered to the Senior Note Indenture Trustee, the payment of the principal of (and premium, if any) and interest on all the Senior Notes and the performance of every covenant of the Senior Note Indenture on the part of the Company to be performed or observed; (2) immediately after giving effect to such transactions, no Event of Default, and no event which, after notice or lapse of time or both, would become an Event of Default, shall have happened and be continuing; and (3) the Company has delivered to the Senior Note Indenture Trustee an officers' certificate and an opinion of counsel, each stating that such transaction complies with the provisions of the Senior Note Indenture governing consolidation, merger, conveyance, transfer or lease and that all conditions precedent to the transaction have been complied with.

### Information Concerning the Senior Note Indenture Trustee

The Senior Note Indenture Trustee, prior to an Event of Default with respect to Senior Notes of any series, undertakes to perform, with respect to Senior Notes of such series, only such duties as are specifically set forth in the Senior Note Indenture and, in case an Event of Default with respect to Senior Notes of any series has occurred and is continuing, shall exercise, with respect to Senior Notes of such series, the same degree of care as a prudent individual would exercise in the conduct of his or her own affairs. Subject to such provision, the Senior Note Indenture Trustee is under no obligation to exercise any of the powers vested in it by the Senior Note Indenture at the request of any holder of Senior Notes of any series, unless offered reasonable indemnity by such holder against the costs, expenses and liabilities which might be incurred by the Senior Note Indenture Trustee. The Senior Note Indenture Trustee is not required to expend or risk its own funds or otherwise incur any financial liability in the performance of its duties if the Senior Note Indenture Trustee reasonably believes that repayment or adequate indemnity is not reasonably assured to it.

JPMorgan Chase Bank, the Senior Note Indenture Trustee, also serves as Subordinated Note Indenture Trustee, as Property Trustee and as Guarantee Trustee. The Company and certain of its affiliates maintain deposit accounts and banking relationships with JPMorgan Chase Bank. JPMorgan Chase Bank also serves as trustee under other indentures pursuant to which securities of the Company and affiliates of the Company are outstanding.

### Governing Law

The Senior Note Indenture and the Senior Notes will be governed by, and construed in accordance with, the internal laws of the State of New York.

### Miscellaneous

The Company will have the right at all times to assign any of its rights or obligations under the Senior Note Indenture to a direct or indirect wholly-owned subsidiary of the Company; provided, that, in the event of any such assignment, the Company will remain primarily liable for all such obligations. Subject to the foregoing, the Senior Note Indenture will be binding upon and inure to the benefit of the parties of the Senior Note Indenture and their respective successors and assigns.

## DESCRIPTION OF THE JUNIOR SUBORDINATED NOTES

Set forth below is a description of the general terms of the Junior Subordinated Notes. The following description does not purport to be complete and is subject to, and is qualified in its entirety by reference to, the Subordinated Note Indenture, dated as of January 1, 1997, between the Company and JPMorgan Chase Bank (formerly known as The Chase Manhattan Bank), as trustee (the "Subordinated Note Indenture Trustee"), as to be supplemented by a supplemental indenture to the Subordinated Note Indenture establishing the Junior Subordinated Notes of each series (the Subordinated Note Indenture, as so supplemented, is referred to as the "Subordinated Note Indenture"), the forms of which are filed as exhibits to the Registration Statement of which this Prospectus forms a part. The terms of the Junior Subordinated Notes will include those stated in the Subordinated Note Indenture and those made a part of the Subordinated Note Indenture by reference to the 1939 Act. Certain capitalized terms used in this Prospectus and not defined in this Prospectus are defined in the Subordinated Note Indenture.

### General

The Junior Subordinated Notes will be issued as unsecured junior subordinated debt securities under the Subordinated Note Indenture. The Subordinated Note Indenture does not limit the aggregate principal amount of Junior Subordinated Notes that may be issued under the Subordinated Note Indenture and provides that Junior Subordinated Notes may be issued from time to time in one or more series pursuant to an indenture supplemental to the Subordinated Note Indenture. The Subordinated Note Indenture gives the Company the ability to reopen a previous issue of Junior Subordinated Notes and issue additional Junior Subordinated Notes of such series, unless otherwise provided.

Reference is made to the Prospectus Supplement that will accompany this Prospectus for the following terms of the series of Junior Subordinated Notes being offered by such Prospectus Supplement: (i) the title of such Junior Subordinated Notes; (ii) any limit on the aggregate principal amount of such Junior Subordinated Notes; (iii) the date or dates on which the principal of such Junior Subordinated Notes is payable; (iv) the rate or rates at which such Junior Subordinated Notes shall bear interest, if any, or any method by which such rate or rates will be determined, the date or dates from which such interest will accrue, the interest payment dates on which such interest shall be payable, and the regular record date for the interest payable on any interest payment date; (v) the place or places where the principal of (and premium, if any) and interest, if any, on such Junior Subordinated Notes shall be payable; (vi) the period or periods within which, the price or prices at which and the terms and conditions on which such Junior Subordinated Notes may be redeemed, in whole or in part, at the option of the Company or at the option of the holder prior to their maturity; (vii) the obligation, if any, of the Company to redeem or purchase such Junior Subordinated Notes; (viii) the denominations in which such Junior Subordinated Notes shall be issuable; (ix) if other than the principal amount of the Junior Subordinated Notes, the portion of the principal amount of such Junior Subordinated Notes which shall be payable upon declaration of acceleration of the maturity of such Junior Subordinated Notes; (x) any deletions from, modifications of or additions to the Events of Default or covenants of the Company as provided in the Subordinated Note Indenture pertaining to such Junior Subordinated Notes; (xi) whether such Junior Subordinated Notes shall be issued in whole or in part in the form of a Global Security; (xii) the right, if any, of the Company to extend the interest payment periods of such Junior Subordinated Notes; and (xiii) any other terms of such Junior Subordinated Notes. The terms of each series of Junior Subordinated Notes issued to a Trust will correspond to those of the related Preferred Securities of such Trust as described in the Prospectus Supplement relating to such Preferred Securities.

The Subordinated Note Indenture does not contain provisions that afford holders of Junior Subordinated Notes protection in the event of a highly leveraged transaction involving the Company.

### Subordination

The Junior Subordinated Notes are subordinated and junior in right of payment to all Senior Indebtedness (as defined below) of the Company. No payment of principal of (including redemption payments, if any), or premium,

if any, or interest on (including Additional Interest (as defined below)) the Junior Subordinated Notes may be made if (a) any Senior Indebtedness is not paid when due and any applicable grace period with respect to such default has ended with such default not being cured or waived or otherwise ceasing to exist, or (b) the maturity of any Senior Indebtedness has been accelerated because of a default, or (c) notice has been given of the exercise of an option to require repayment, mandatory payment or prepayment or otherwise. Upon any payment or distribution of assets of the Company to creditors upon any liquidation, dissolution, winding-up, reorganization, assignment for the benefit of creditors, marshalling of assets or liabilities, or any bankruptcy, insolvency or similar proceedings of the Company, the holders of Senior Indebtedness shall be entitled to receive payment in full of all amounts due or to become due on or in respect of all Senior Indebtedness before the holders of the Junior Subordinated Notes are entitled to receive or retain any payment or distribution. Subject to the prior payment of all Senior Indebtedness, the rights of the holders of the Junior Subordinated Notes will be subrogated to the rights of the holders of Senior Indebtedness to receive payments and distributions applicable to such Senior Indebtedness until all amounts owing on the Junior Subordinated Notes are paid in full.

The term "Senior Indebtedness" means, with respect to the Company, (i) any payment due in respect of indebtedness of the Company, whether outstanding at the date of execution of the Subordinated Note Indenture or incurred, created or assumed after the execution of the Subordinated Note Indenture, (a) in respect of money borrowed (including any financial derivative, hedging or futures contract or similar instrument) and (b) evidenced by securities, debentures, bonds, notes or other similar instruments issued by the Company that, by their terms, are senior or senior subordinated debt securities including, without limitation, all obligations under its indentures with various trustees; (ii) all capital lease obligations; (iii) all obligations issued or assumed as the deferred purchase price of property, all conditional sale obligations and all obligations of the Company under any title retention agreement (but excluding trade accounts payable arising in the ordinary course of business and long-term purchase obligations); (iv) all obligations for the reimbursement of any letter of credit, banker's acceptance, security purchase facility or similar credit transaction; (v) all obligations of the type referred to in clauses (i) through (iv) above of other persons the payment of which the Company is responsible or liable as obligor, guarantor or otherwise; and (vi) all obligations of the type referred to in clauses (i) through (v) above of other persons secured by any lien on any property or asset of the Company (whether or not such obligation is assumed by the Company), except for (1) any such indebtedness that is by its terms subordinated to or *pari passu* with the Junior Subordinated Notes and (2) any unsecured indebtedness between or among the Company or its affiliates. Such Senior Indebtedness shall continue to be Senior Indebtedness and be entitled to the benefits of the subordination provisions contained in the Subordinated Note Indenture irrespective of any amendment, modification or waiver of any term of such Senior Indebtedness.

The Subordinated Note Indenture does not limit the aggregate amount of Senior Indebtedness that may be issued by the Company. As of December 31, 2002, Senior Indebtedness of the Company aggregated approximately $550,000,000.

**Additional Interest**

"Additional Interest" is defined in the Subordinated Note Indenture as (i) such additional amounts as may be required so that the net amounts received and retained by a holder of Junior Subordinated Notes (if the holder is a Trust) after paying taxes, duties, assessments or governmental charges of whatever nature (other than withholding taxes) imposed by the United States or any other taxing authority will not be less than the amounts the holder would have received had no such taxes, duties, assessments or other governmental charges been imposed; and (ii) any interest due and not paid on an interest payment date, together with interest on such interest due from such interest payment date to the date of payment, compounded quarterly, on each interest payment date.

**Certain Covenants**

The Company covenants in the Subordinated Note Indenture, for the benefit of the holders of each series of Junior Subordinated Notes, that, (i) if at such time the Company shall have given notice of its election to extend an interest payment period for such series of Junior Subordinated Notes and such extension shall be continuing,

(ii) if at such time the Company shall be in default with respect to its payment or other obligations under the Guarantee with respect to the Trust Securities, if any, related to such series of Junior Subordinated Notes, or (iii) if at such time an Event of Default under the Subordinated Note Indenture with respect to such series of Junior Subordinated Notes shall have occurred and be continuing, (a) the Company shall not declare or pay any dividend or make any distributions with respect to, or redeem, purchase, acquire or make a liquidation payment with respect to, any of its capital stock, and (b) the Company shall not make any payment of interest, principal or premium, if any, on or repay, repurchase or redeem any debt securities (including guarantees other than the Guarantees) issued by the Company which rank equally with or junior to the Junior Subordinated Notes. None of the foregoing, however, shall restrict (i) any of the actions described in the preceding sentence resulting from any reclassifications of the Company's capital stock or the exchange or conversion of one class or series of the Company's capital stock for another class or series of the Company's capital stock, or (ii) the purchase of fractional interests in shares of the Company's capital stock pursuant to the conversion or exchange provisions of such capital stock or the security being converted or exchanged.

The Subordinated Note Indenture further provides that, for so long as the Trust Securities of any Trust remain outstanding, the Company covenants (i) to directly or indirectly maintain 100% ownership of the Common Securities of such Trust; provided, however, that any permitted successor of the Company under the Subordinated Note Indenture may succeed to the Company's ownership of such Common Securities, and (ii) to use its reasonable efforts to cause such Trust (a) to remain a statutory trust, except in connection with the distribution of Junior Subordinated Notes to the holders of Trust Securities in liquidation of such Trust, the redemption of all of the Trust Securities of such Trust, or certain mergers, consolidations or amalgamations, each as permitted by the related Trust Agreement, and (b) to otherwise continue to be classified as a grantor trust for United States federal income tax purposes.

**Events of Default**

The Subordinated Note Indenture provides that any one or more of the following described events with respect to the Junior Subordinated Notes of any series, which has occurred and is continuing, constitutes an "Event of Default" with respect to the Junior Subordinated Notes of such series:

(a) failure for 10 days to pay interest on the Junior Subordinated Notes of such series, including any Additional Interest (as defined in clause (ii) of the definition of Additional Interest in the Subordinated Note Indenture) in respect of the Junior Subordinated Notes, when due on an interest payment date other than at maturity or upon earlier redemption; provided, however, that a valid extension of the interest payment period by the Company shall not constitute a default in the payment of interest for this purpose; or

(b) failure for 10 days to pay Additional Interest (as defined in clause (i) of the definition of Additional Interest in the Subordinated Note Indenture); or

(c) failure to pay principal or premium, if any, or interest, including Additional Interest (as defined in clause (ii) of the definition of Additional Interest in the Subordinated Note Indenture), on the Junior Subordinated Notes of such series when due at maturity or upon earlier redemption; or

(d) failure for three Business Days to deposit any sinking fund payment when due by the terms of a Junior Subordinated Note of such series; or

(e) failure to observe or perform any other covenant or warranty of the Company in the Subordinated Note Indenture (other than a covenant or warranty which has expressly been included in the Subordinated Note Indenture solely for the benefit of one or more series of Junior Subordinated Notes other than such series) for 90 days after written notice to the Company from the Subordinated Note Indenture Trustee or the holders of at least 25% in principal amount of the outstanding Junior Subordinated Notes of such series; or

(f) certain events of bankruptcy, insolvency or reorganization of the Company.

The holders of not less than a majority in aggregate outstanding principal amount of the Junior Subordinated Notes of any series have the right to direct the time, method and place of conducting any proceeding for any remedy available to the Subordinated Note Indenture Trustee with respect to the Junior Subordinated Notes of such series. If a Subordinated Note Indenture Event of Default occurs and is continuing with respect to the Junior Subordinated Notes of any series, then the Subordinated Note Indenture Trustee or the holders of not less than

25% in aggregate outstanding principal amount of the Junior Subordinated Notes of such series may declare the principal amount of the Junior Subordinated Notes due and payable immediately by notice in writing to the Company (and to the Subordinated Note Indenture Trustee if given by the holders), and upon any such declaration such principal amount shall become immediately due and payable. At any time after such a declaration of acceleration with respect to the Junior Subordinated Notes of any series had been made and before a judgment or decree for payment of the money due has been obtained as provided in Article Five of the Subordinated Note Indenture, the holders of not less than a majority in aggregate outstanding principal amount of the Junior Subordinated Notes of such series may rescind and annul such declaration and its consequences if the default has been cured or waived and the Company has paid or deposited with the Subordinated Note Indenture Trustee a sum sufficient to pay all matured installments of interest (including any Additional Interest) and principal due otherwise than by acceleration and all sums paid or advanced by the Subordinated Note Indenture Trustee, including reasonable compensation and expenses of the Subordinated Note Indenture Trustee.

A holder of Preferred Securities may institute a legal proceeding directly against the Company, without first instituting a legal proceeding against the Property Trustee or any other person or entity, for enforcement of payment to such holder of principal of or interest on the Junior Subordinated Notes of the related series having a principal amount equal to the aggregate stated liquidation amount of the Preferred Securities of such holder on or after the due dates specified in the Junior Subordinated Notes of such series.

The holders of not less than a majority in aggregate outstanding principal amount of the Junior Subordinated Notes of any series may, on behalf of the holders of all the Junior Subordinated Notes of such series, waive any past default with respect to such series, except (i) a default in the payment of principal or interest or (ii) a default in respect of a covenant or provision which under Article Nine of the Subordinated Note Indenture cannot be modified or amended without the consent of the holder of each outstanding Junior Subordinated Note of such series affected.

**Registration and Transfer**

The Company shall not be required to (i) issue, register the transfer of or exchange Junior Subordinated Notes of any series during a period of 15 days immediately preceding the date notice is given identifying the Junior Subordinated Notes of such series called for redemption, or (ii) register the transfer of or exchange any Junior Subordinated Notes so selected for redemption, in whole or in part, except the unredeemed portion of any Junior Subordinated Note being redeemed in part.

**Payment and Paying Agent**

Unless otherwise indicated in an applicable Prospectus Supplement, payment of principal of any Junior Subordinated Notes will be made only against surrender to the Paying Agent of such Junior Subordinated Notes. Principal of and interest on Junior Subordinated Notes will be payable, subject to any applicable laws and regulations, at the office of such Paying Agent or Paying Agents as the Company may designate from time to time, except that, at the option of the Company, payment of any interest may be made by wire transfer or by check mailed to the address of the person entitled to an interest payment as such address shall appear in the Security Register with respect to the Junior Subordinated Notes. Payment of interest on Junior Subordinated Notes on any interest payment date will be made to the person in whose name the Junior Subordinated Notes (or predecessor security) are registered at the close of business on the record date for such interest payment.

Unless otherwise indicated in an applicable Prospectus Supplement, the Subordinated Note Indenture Trustee will act as Paying Agent with respect to the Junior Subordinated Notes. The Company may at any time designate additional Paying Agents or rescind the designation of any Paying Agents or approve a change in the office through which any Paying Agent acts.

All moneys paid by the Company to a Paying Agent for the payment of the principal of or interest on the Junior Subordinated Notes of any series which remain unclaimed at the end of two years after such principal or interest shall have become due and payable will be repaid to the Company, and the holder of such Junior Subordinated Notes will from that time forward look only to the Company for payment of such principal and interest.

**Modification**

The Subordinated Note Indenture contains provisions permitting the Company and the Subordinated Note Indenture Trustee, with the consent of the holders of not less than a majority in principal amount of the outstanding Junior Subordinated Notes of each series that is affected, to modify the Subordinated Note Indenture or the rights of the holders of the Junior Subordinated Notes of such series; provided, that no such modification may, without the consent of the holder of each outstanding Junior Subordinated Note that is affected, (i) change the stated maturity of the principal of, or any installment of principal of or interest on, any Junior Subordinated Note, or reduce the principal amount of any Junior Subordinated Note or the rate of interest (including Additional Interest) on any Junior Subordinated Note or any premium payable upon the redemption thereof, or change the method of calculating the rate of interest on any Junior Subordinated Note, or impair the right to institute suit for the enforcement of any such payment on or after the stated maturity of any Junior Subordinated Note (or, in the case of redemption, on or after the redemption date), or (ii) reduce the percentage of principal amount of the outstanding Junior Subordinated Notes of any series, the consent of whose holders is required for any such supplemental indenture, or the consent of whose holders is required for any waiver (of compliance with certain provisions of the Subordinated Note Indenture or certain defaults under the Subordinated Note Indenture and their consequences) provided for in the Subordinated Note Indenture, or (iii) modify any of the provisions of the Subordinated Note Indenture relating to supplemental indentures, waiver of past defaults, or waiver of certain covenants, except to increase any such percentage or to provide that certain other provisions of the Subordinated Note Indenture cannot be modified or waived without the consent of the holder of each outstanding Junior Subordinated Note that is affected, or (iv) modify the provisions of the Subordinated Note Indenture with respect to the subordination of the Junior Subordinated Notes in a manner adverse to such holder.

In addition, the Company and the Subordinated Note Indenture Trustee may execute, without the consent of any holders of Junior Subordinated Notes, any supplemental indenture for certain other usual purposes, including the creation of any new series of Junior Subordinated Notes.

**Consolidation, Merger and Sale**

The Company shall not consolidate with or merge into any other corporation or convey, transfer or lease its properties and assets substantially as an entirety to any person, unless (1) such other corporation or person is a corporation organized and existing under the laws of the United States, any state of the United States or the District of Columbia and such other corporation or person expressly assumes, by supplemental indenture executed and delivered to the Subordinated Note Indenture Trustee, the payment of the principal of (and premium, if any) and interest (including Additional Interest) on all the Junior Subordinated Notes and the performance of every covenant of the Subordinated Note Indenture on the part of the Company to be performed or observed; (2) immediately after giving effect to such transactions, no Event of Default, and no event which, after notice or lapse of time or both, would become an Event of Default, shall have happened and be continuing; and (3) the Company has delivered to the Subordinated Note Indenture Trustee an officers' certificate and an opinion of counsel, each stating that such transaction complies with the provisions of the Subordinated Note Indenture governing consolidation, merger, conveyance, transfer or lease and that all conditions precedent to the transaction have been complied with.

**Information Concerning the Subordinated Note Indenture Trustee**

The Subordinated Note Indenture Trustee, prior to an Event of Default with respect to Junior Subordinated Notes of any series, undertakes to perform, with respect to Junior Subordinated Notes of such series, only such duties as are specifically set forth in the Subordinated Note Indenture and, in case an Event of Default with respect to Junior Subordinated Notes of any series has occurred and is continuing, shall exercise, with respect to Junior Subordinated Notes of such series, the same degree of care as a prudent individual would exercise in the conduct of his or her own affairs. Subject to such provision, the Subordinated Note Indenture Trustee is under no obligation to exercise any of the powers vested in it by the Subordinated Note Indenture at the request of any

holder of Junior Subordinated Notes of any series, unless offered reasonable indemnity by such holder against the costs, expenses and liabilities which might be incurred by the Subordinated Note Indenture Trustee. The Subordinated Note Indenture Trustee is not required to expend or risk its own funds or otherwise incur any financial liability in the performance of its duties if the Subordinated Note Indenture Trustee reasonably believes that repayment or adequate indemnity is not reasonably assured to it.

JPMorgan Chase Bank, the Subordinated Note Indenture Trustee, also serves as Senior Note Indenture Trustee, as Property Trustee and as Guarantee Trustee. The Company and certain of its affiliates maintain deposit accounts and banking relationships with JPMorgan Chase Bank. JPMorgan Chase Bank also serves as trustee under other indentures pursuant to which securities of the Company and affiliates of the Company are outstanding.

### Governing Law

The Subordinated Note Indenture and the Junior Subordinated Notes will be governed by, and construed in accordance with, the internal laws of the State of New York.

### Miscellaneous

The Company will have the right at all times to assign any of its rights or obligations under the Subordinated Note Indenture to a direct or indirect wholly-owned subsidiary of the Company; provided, that, in the event of any such assignment, the Company will remain primarily liable for all such obligations. Subject to the foregoing, the Subordinated Note Indenture will be binding upon and inure to the benefit of the parties to the Subordinated Note Indenture and their respective successors and assigns.

## DESCRIPTION OF THE PREFERRED SECURITIES

Each Trust may issue only one series of Preferred Securities having terms described in the Prospectus Supplement relating to the Preferred Securities. The Trust Agreement of each Trust will authorize the Administrative Trustees, on behalf of the Trust, to issue the Preferred Securities of such Trust. The Preferred Securities of each Trust will have such terms, including distributions, redemption, voting, liquidation rights and such other preferred, deferral or other special rights or such restrictions as shall be set forth in the Trust Agreement of such Trust. Reference is made to the Prospectus Supplement relating to the Preferred Securities of a Trust for specific terms, including (i) the distinctive designation of such Preferred Securities; (ii) the number of Preferred Securities issued by such Trust; (iii) the annual distribution rate (or method of determining such rate) for Preferred Securities of such Trust and the date or dates on which such distributions shall be payable; (iv) whether distributions on such Preferred Securities shall be cumulative and, in the case of Preferred Securities having cumulative distribution rights, the date or dates, or method of determining the date or dates, from which distributions on such Preferred Securities shall be cumulative; (v) the amount or amounts that shall be paid out of the assets of such Trust to the holders of the Preferred Securities of such Trust upon voluntary or involuntary dissolution, winding-up or termination of such Trust; (vi) the obligation, if any, of such Trust to purchase or redeem such Preferred Securities and the price or prices at which, the period or periods within which, and the terms and conditions upon which such Preferred Securities shall be purchased or redeemed, in whole or in part, pursuant to such obligation; (vii) the voting rights, if any, of such Preferred Securities in addition to those required by law, including the number of votes per Preferred Security and any requirement for the approval by the holders of Preferred Securities as a condition to specified action or amendments to the Trust Agreement of such Trust; (viii) the rights, if any, to defer distributions on the Preferred Securities by extending the interest payment period on the related Junior Subordinated Notes; and (ix) any other relative rights, preferences, privileges, limitations or restrictions of such Preferred Securities not inconsistent with the Trust Agreement of such Trust or applicable law. All Preferred Securities offered by this Prospectus will be guaranteed by the Company to the extent set forth under "Description of the Guarantees." Any material United States federal income tax considerations applicable to an offering of Preferred Securities will be described in the Prospectus Supplement relating to the Preferred Securities.

## DESCRIPTION OF THE GUARANTEES

Set forth below is a summary of information concerning the Guarantees that will be executed and delivered by the Company for the benefit of the holders of Preferred Securities of the respective Trusts from time to time. Each Guarantee will be qualified as an indenture under the 1939 Act. JPMorgan Chase Bank will act as indenture trustee under each Guarantee (the "Guarantee Trustee") for purposes of the 1939 Act. The terms of the respective Guarantees will be those set forth in such Guarantee and those made part of such Guarantee by the 1939 Act. The following summary does not purport to be complete and is subject in all respects to the provisions of, and is qualified in its entirety by reference to, the Guarantees, the form of which is filed as an exhibit to the Registration Statement of which this Prospectus forms a part, and the 1939 Act. Each Guarantee will be held by the Guarantee Trustee for the benefit of holders of the Preferred Securities to which it relates.

### General

Pursuant to each Guarantee, the Company will irrevocably and unconditionally agree, to the extent set forth in such Guarantee, to pay in full, to the holders of the related Preferred Securities, the Guarantee Payments (as defined below), to the extent not paid by, or on behalf of, the related Trust, regardless of any defense, right of set-off or counterclaim that the Company may have or assert against any person. The following payments or distributions with respect to the Preferred Securities of any Trust to the extent not paid or made by, or on behalf of, such Trust will be subject to the Guarantee related to the Preferred Securities (without duplication): (i) any accrued and unpaid distributions required to be paid on the Preferred Securities of such Trust but if and only if and to the extent that such Trust has funds legally and immediately available for these distributions, (ii) the redemption price, including all accrued and unpaid distributions to the date of redemption (the "Redemption Price"), with respect to any Preferred Securities called for redemption by such Trust, but if and only to the extent such Trust has funds legally and immediately available to pay such Redemption Price, and (iii) upon a dissolution, winding-up or termination of such Trust (other than in connection with the distribution of Junior Subordinated Notes to the holders of Trust Securities of such Trust or the redemption of all of the Preferred Securities of such Trust), the lesser of (a) the aggregate of the liquidation amount and all accrued and unpaid distributions on the Preferred Securities of such Trust to the date of payment, to the extent such Trust has funds legally and immediately available for such purpose, and (b) the amount of assets of such Trust remaining available for distribution to holders of Preferred Securities of such Trust in liquidation of such Trust (the "Guarantee Payments"). The Company's obligation to make a Guarantee Payment may be satisfied by direct payment of the required amounts by the Company to the holders of the related Preferred Securities or by causing the related Trust to pay such amounts to such holders.

Each Guarantee will be a guarantee of the Guarantee Payments with respect to the related Preferred Securities from the time of issuance of such Preferred Securities, but will not apply to the payment of distributions and other payments on such Preferred Securities when the related Trust does not have sufficient funds legally and immediately available to make such distributions or other payments. **If the Company does not make interest payments on the Junior Subordinated Notes held by the Property Trustee under any Trust, such Trust will not make distributions on its Preferred Securities.**

### Subordination

The Company's obligations under each Guarantee to make the Guarantee Payments will constitute an unsecured obligation of the Company and will rank (i) subordinate and junior in right of payment to all other liabilities of the Company, including the Junior Subordinated Notes, except those obligations or liabilities made equal or subordinate by their terms, (ii) equal to the most senior preferred or preference stock now issued by the Company or issued at a later date by the Company and with any guarantee now entered into by the Company or entered into at a later date by the Company in respect of any preferred or preference securities of any affiliate of the Company, and (iii) senior to all common stock of the Company. The terms of the Preferred Securities will provide that each holder of Preferred Securities by acceptance of the Preferred Securities agrees to the subordination

provisions and other terms of the Guarantee related thereto. The Company has outstanding preferred stock that ranks equal to the Guarantees and common stock that ranks junior to the Guarantees.

Each Guarantee will constitute a guarantee of payment and not of collection (that is, the guaranteed party may institute a legal proceeding directly against the guarantor to enforce its rights under the guarantee without first instituting a legal proceeding against any other person or entity).

**Amendments and Assignment**

Except with respect to any changes that do not materially and adversely affect the rights of holders of the related Preferred Securities (in which case no consent will be required), each Guarantee may be amended only with the prior approval of the holders of not less than 66⅔% in liquidation amount of such outstanding Preferred Securities. The manner of obtaining any such approval of holders of the Preferred Securities will be as set forth in an accompanying Prospectus Supplement. All guarantees and agreements contained in each Guarantee shall bind the successors, assigns, receivers, trustees and representatives of the Company and shall inure to the benefit of the holders of the related Preferred Securities then outstanding.

**Termination**

Each Guarantee will terminate and be of no further force and effect as to the related Preferred Securities upon full payment of the Redemption Price of all such Preferred Securities, upon distribution of Junior Subordinated Notes to the holders of such Preferred Securities, or upon full payment of the amounts payable upon liquidation of the related Trust. Each Guarantee will continue to be effective or will be reinstated, as the case may be, if at any time any holder of the related Preferred Securities must restore payment of any sums paid with respect to such Preferred Securities or under such Guarantee.

**Events of Default**

An event of default under each Guarantee will occur upon the failure by the Company to perform any of its payment obligations under such Guarantee. The holders of a majority in liquidation amount of the Preferred Securities to which any Guarantee relates have the right to direct the time, method and place of conducting any proceeding for any remedy available to the Guarantee Trustee in respect of such Guarantee or to direct the exercise of any trust or power conferred upon the Guarantee Trustee under such Guarantee. Any holder of the related Preferred Securities may institute a legal proceeding directly against the Company to enforce its rights under such Guarantee without first instituting a legal proceeding against the Guarantee Trustee or any other person or entity. The holders of a majority in liquidation amount of Preferred Securities of any series may, by vote, on behalf of the holders of all the Preferred Securities of such series, waive any past event of default and its consequences.

**Information Concerning the Guarantee Trustee**

The Guarantee Trustee, prior to the occurrence of any event of default with respect to any Guarantee and after the curing or waiving of all events of default with respect to such Guarantee, undertakes to perform only such duties as are specifically set forth in such Guarantee and, in case an event of default has occurred, shall exercise the same degree of care as a prudent individual would exercise in the conduct of his or her own affairs. Subject to such provisions, the Guarantee Trustee is under no obligation to exercise any of the powers vested in it by any Guarantee at the request of any holder of the related Preferred Securities, unless offered reasonable indemnity against the costs, expenses and liabilities which might be incurred by the Guarantee Trustee.

JPMorgan Chase Bank, the Guarantee Trustee, also serves as Property Trustee, as Senior Note Indenture Trustee and as Subordinated Note Indenture Trustee. The Company and certain of its affiliates maintain deposit accounts and banking relationships with JPMorgan Chase Bank. JPMorgan Chase Bank serves as trustee under other indentures pursuant to which securities of the Company and affiliates of the Company are outstanding.

### Governing Law

Each Guarantee will be governed by, and construed in accordance with, the internal laws of the State of New York.

### The Agreements as to Expenses and Liabilities

Pursuant to an Agreement as to Expenses and Liabilities to be entered into by the Company under each Trust Agreement, the Company will irrevocably and unconditionally guarantee to each person or entity to whom each Trust becomes indebted or liable the full payment of any indebtedness, expenses or liabilities of such Trust, other than obligations of such Trust to pay to the holders of the related Preferred Securities or other similar interests in such Trust the amounts due such holders pursuant to the terms of such Preferred Securities or such other similar interests, as the case may be.

## RELATIONSHIP AMONG THE PREFERRED SECURITIES, THE JUNIOR SUBORDINATED NOTES AND THE GUARANTEES

As long as payments of interest and other payments are made when due on each series of Junior Subordinated Notes issued to a Trust, such payments will be sufficient to cover distributions and payments due on the related Trust Securities of such Trust primarily because (i) the aggregate principal amount of each series of Junior Subordinated Notes will be equal to the sum of the aggregate stated liquidation amount of the related Trust Securities; (ii) the interest rate and interest and other payment dates on each series of Junior Subordinated Notes will match the distribution rate and distribution and other payment dates for the related Preferred Securities; (iii) the Company shall pay for all costs and expenses of each Trust pursuant to the Agreements as to Expenses and Liabilities; and (iv) each Trust Agreement provides that the Securities Trustees thereunder shall not cause or permit the Trust to, among other things, engage in any activity that is not consistent with the purposes of the Trust.

Payments of distributions (to the extent funds for such purpose are legally and immediately available) and other payments due on the Preferred Securities (to the extent funds for such purpose are legally and immediately available) will be guaranteed by the Company as and to the extent set forth under "Description of the Guarantees." If the Company does not make interest payments on any series of Junior Subordinated Notes, it is not expected that the related Trust will have sufficient funds to pay distributions on its Preferred Securities. Each Guarantee is a guarantee from the time of its issuance, but does not apply to any payment of distributions unless and until the related Trust has sufficient funds legally and immediately available for the payment of such distributions.

If the Company fails to make interest or other payments on any series of Junior Subordinated Notes when due (taking into account any extension period as described in the applicable Prospectus Supplement), the Trust Agreement provides a mechanism that allows the holders of the related Preferred Securities to appoint a substitute Property Trustee. Such holders may also direct the Property Trustee to enforce its rights under the Junior Subordinated Notes of such series, including proceeding directly against the Company to enforce such Junior Subordinated Notes. If the Property Trustee fails to enforce its rights under any series of Junior Subordinated Notes, to the fullest extent permitted by applicable law, any holder of related Preferred Securities may institute a legal proceeding directly against the Company to enforce the Property Trustee's rights under such series of Junior Subordinated Notes without first instituting any legal proceeding against the Property Trustee or any other person or entity. Notwithstanding the foregoing, a holder of Preferred Securities may institute a legal proceeding directly against the Company, without first instituting a legal proceeding against the Property Trustee or any other person or entity, for enforcement of payment to such holder of principal of or interest on Junior Subordinated Notes of the related series having a principal amount equal to the aggregate stated liquidation amount of the Preferred Securities of such holder on or after the due dates specified in the Junior Subordinated Notes of such series.

If the Company fails to make payments under any Guarantee, such Guarantee provides a mechanism that allows the holders of the Preferred Securities to which such Guarantee relates to direct the Guarantee Trustee to enforce its rights under such Guarantee. In addition, any holder of Preferred Securities may institute a legal proceeding directly against the Company to enforce the Guarantee Trustee's rights under the related Guarantee without first instituting a legal proceeding against the Guarantee Trustee or any other person or entity.

Each Guarantee, the Subordinated Note Indenture, the Junior Subordinated Notes of the related series, the related Trust Agreement and the related Agreement as to Expenses and Liabilities, as described above, constitute a full and unconditional guarantee by the Company of the payments due on the related series of Preferred Securities.

Upon any voluntary or involuntary dissolution, winding-up or termination of any Trust, unless Junior Subordinated Notes of the related series are distributed in connection with such action, the holders of the Preferred Securities of such Trust will be entitled to receive, out of assets legally available for distribution to holders, a liquidation distribution in cash as described in the applicable Prospectus Supplement. Upon any voluntary or involuntary liquidation or bankruptcy of the Company, the Property Trustee, as holder of the related series of Junior Subordinated Notes, would be a subordinated creditor of the Company, subordinated in right of payment to all Senior Indebtedness, but entitled to receive payment in full of principal and interest, before any stockholders of the Company receive payments or distributions. Because the Company is guarantor under each Guarantee and has agreed to pay for all costs, expenses and liabilities of each Trust (other than the Trust's obligations to holders of the Preferred Securities) pursuant to the related Agreement as to Expenses and Liabilities, the positions of a holder of Preferred Securities and a holder of Junior Subordinated Notes of the related series relative to other creditors and to stockholders of the Company in the event of liquidation or bankruptcy of the Company would be substantially the same.

A default or event of default under any Senior Indebtedness would not constitute a default or Event of Default under the Subordinated Note Indenture. However, in the event of payment defaults under, or acceleration of, Senior Indebtedness, the subordination provisions of the Junior Subordinated Notes provide that no payments may be made in respect of the Junior Subordinated Notes until such Senior Indebtedness has been paid in full or any payment default of Senior Indebtedness has been cured or waived. Failure to make required payments on the Junior Subordinated Notes of any series would constitute an Event of Default under the Subordinated Note Indenture with respect to the Junior Subordinated Notes of such series except that failure to make interest payments on the Junior Subordinated Notes of such series will not be an Event of Default during an extension period as described in the applicable Prospectus Supplement.

## PLAN OF DISTRIBUTION

The Company may sell the Senior Notes and the Junior Subordinated Notes and the Trusts may sell the Preferred Securities in one or more of the following ways from time to time: (i) to underwriters for resale to the public or to institutional investors; (ii) directly to institutional investors; or (iii) through agents to the public or to institutional investors. The Prospectus Supplement with respect to each series of Senior Notes, Junior Subordinated Notes or Preferred Securities will set forth the terms of the offering of such Senior Notes, Junior Subordinated Notes or Preferred Securities, including the name or names of any underwriters or agents, the purchase price of such Senior Notes, Junior Subordinated Notes or Preferred Securities and the proceeds to the Company or the applicable Trust from such sale, any underwriting discounts or agency fees and other items constituting underwriters' or agents' compensation, any initial public offering price, any discounts or concessions allowed or reallowed or paid to dealers and any securities exchange on which such Senior Notes, Junior Subordinated Notes or Preferred Securities may be listed.

If underwriters participate in the sale, such Senior Notes, Junior Subordinated Notes or Preferred Securities will be acquired by the underwriters for their own account and may be resold from time to time in one or more transactions, including negotiated transactions, at a fixed public offering price or at varying prices determined at the time of sale.

Unless otherwise set forth in the Prospectus Supplement, the obligations of the underwriters to purchase any series of Senior Notes, Junior Subordinated Notes or Preferred Securities will be subject to certain conditions precedent and the underwriters will be obligated to purchase all of such series of Senior Notes, Junior Subordinated Notes or Preferred Securities, if any are purchased.

Underwriters and agents may be entitled under agreements entered into with the Company and/or the applicable Trust to indemnification against certain civil liabilities, including liabilities under the 1933 Act. Underwriters and agents may engage in transactions with, or perform services for, the Company in the ordinary course of business.

Each series of Senior Notes, Junior Subordinated Notes or Preferred Securities will be a new issue of securities and will have no established trading market. Any underwriters to whom Senior Notes, Junior Subordinated Notes or Preferred Securities are sold for public offering and sale may make a market in such Senior Notes, Junior Subordinated Notes or Preferred Securities, but such underwriters will not be obligated to do so and may discontinue any market making at any time without notice. The Senior Notes, Junior Subordinated Notes or Preferred Securities may or may not be listed on a national securities exchange.

## LEGAL MATTERS

Certain matters of Delaware law relating to the validity of the Preferred Securities will be passed upon on behalf of the Company and the Trusts by Richards, Layton & Finger, P.A., Wilmington, Delaware, special Delaware counsel to the Company and the Trusts. The validity of the Senior Notes, the Junior Subordinated Notes, the Guarantees and certain matters relating to such securities will be passed upon on behalf of the Company by Beggs & Lane, a Registered Limited Liability Partnership, Pensacola, Florida, and by Troutman Sanders LLP, Atlanta, Georgia. Certain legal matters will be passed upon for the Underwriters by Dewey Ballantine LLP, New York, New York.

## EXPERTS

The financial statements and the related financial statement schedule as of and for the year ended December 31, 2002 incorporated by reference in this Prospectus have been audited by Deloitte & Touche LLP, independent auditors, as stated in their report, which is incorporated by reference in this Prospectus, and has been so incorporated in reliance upon the report of such firm given upon their authority as experts in accounting and auditing.

Certain of the Company's financial statements incorporated by reference in this Prospectus have been audited by Arthur Andersen LLP ("Andersen"), independent public accountants, as indicated in their reports with respect to the financial statements, and are incorporated by reference in this Prospectus, in reliance upon the authority of Andersen as experts in giving such reports On March 28, 2002, Southern's Board of Directors, upon recommendation of its Audit Committee, decided not to engage Andersen as the Company's principal public accountants. The Company has not obtained a reissued report from Andersen and has been unable to obtain, after reasonable efforts, Andersen's written consent to incorporate by reference Andersen's reports on the financial statements. Under these circumstances, Rule 437a under the 1933 Act permits this Prospectus to be filed without a written consent from Andersen. The absence of such written consent from Andersen may limit a holder's ability to assert claims against Andersen under Section 11(a) of the 1933 Act for any untrue statement of a material fact contained in the financial statements audited by Andersen or any omissions to state a material fact required to be stated in the financial statements.

GULF POWER COMPANY
SERIES G 4.35% SENIOR NOTES
DUE JULY 15, 2013

Ladies and Gentlemen:

We have acted as general counsel to Gulf Power Company (the "Company") in connection with (i) the Company's issuance and sale of $60,000,000 aggregate principal amount of its Series G 4.35% Senior Notes due July 15, 2013 (the "Notes") pursuant to the Senior Note Indenture dated as of January 1, 1998, by and between the Company and JPMorgan Chase Bank (formerly known as The Chase Manhattan Bank), as trustee (the "Trustee"), as heretofore supplemented and as further supplemented by the Seventh Supplemental Indenture dated as of July 22, 2003 (collectively, the "Indenture") and (ii) the purchase by the Underwriters (as defined below) of the Notes pursuant to the terms of an Underwriting Agreement dated July 14, 2003 (the "Underwriting Agreement"), among the Company and the Underwriters named in Schedule I thereto (the "Underwriters") for whom you are acting as Representatives. This opinion is being delivered to you as Representatives pursuant to Section 5(c)(1) of the Underwriting Agreement.

All capitalized terms not otherwise defined herein shall have the meanings set forth in the Underwriting Agreement.

In rendering the opinions expressed below, we have examined the registration statement on Form S-3 (File Nos. 333-104449, 333-104449-01 and 333-104449-02) pertaining to the Notes (the "Registration Statement") filed under the Securities Act of 1933, as amended (the "Act"), and the prospectus of the Company dated April 25, 2003, as supplemented by a final prospectus

supplement relating to the Notes dated July 14, 2003 (the "Final Supplemented Prospectus"), which pursuant to Form S-3 incorporates by reference the Annual Report on Form 10-K of the Company for the fiscal year ended December 31, 2002, the Quarterly Report on Form 10-Q of the Company for the quarter ended March 31, 2003 and the Current Reports on Form 8-K of the Company dated March 21, 2003 and July 10, 2003 (the "Exchange Act Documents"), each as filed under the Securities Exchange Act of 1934, as amended (the "Exchange Act").

In addition, we have examined, and have relied as to matters of fact upon, the documents delivered to you at the closing (except the certificate representing the Notes, of which we have examined a specimen), and we have made such other and further investigations as we deemed necessary to express the opinions hereinafter set forth. In such examination, we have assumed the genuineness of all signatures, the legal capacity of natural persons, the authenticity of all documents submitted to us as originals, the conformity to original documents of all documents submitted to us as certified or photostatic copies and the authenticity of the originals of such latter documents.

The Indenture and the Underwriting Agreement are herein referred to collectively as the "Agreements."

Based upon the foregoing, and subject to the qualifications and limitations stated herein, we are of the opinion, relying as to matters of Georgia law and the federal law of the United States upon the opinion dated the date hereof rendered to you by Troutman Sanders LLP and relying as to matters of New York law upon the opinion dated the date hereof rendered to you by Dewey Ballantine LLP, that:

1. The Company has been duly incorporated and is validly existing as a corporation in good standing under the laws of the State of Maine, is duly qualified to carry on its business as a foreign corporation under the laws of the States of Florida, Georgia and Mississippi and has due corporate authority to carry on the public utility business in which it is engaged, to own and operate the properties used by it in such business and to enter into and perform its obligations under the Agreements and the Notes.

2. The execution, delivery and performance by the Company of the Underwriting Agreement have been duly authorized by all necessary corporate action, and the Underwriting Agreement has been duly executed and delivered by the Company.

3. All orders, consents or other authorizations or approvals of the Florida Public Service Commission and the Commission legally required for the issuance and sale of the Notes have been obtained; such orders are sufficient for the issuance and sale of the Notes; the issuance and sale of the Notes conform in all material respects with the terms of such orders; and no other

Registration Statement, as of its effective date, and the Final Supplemented Prospectus, as of July 14, 2003, complied as to form in all material respects with the requirements of the Act and the applicable rules and regulations of the Commission thereunder and that the Exchange Act Documents, as of their respective dates of filing with the Commission, complied as to form in all material respects with the relevant requirements of the Exchange Act and the applicable rules and regulations of the Commission thereunder, except that in each case we express no opinion as to the financial statements or other financial or statistical data contained or incorporated by reference in the Registration Statement, the Final Supplemented Prospectus or the Exchange Act Documents and (ii) nothing came to our attention which gives us reason to believe that the Registration Statement, as of its effective date (including the Exchange Act Documents on file with the Commission as of such date), contained any untrue statement of a material fact or omitted to state any material fact required to be stated therein or necessary in order to make the statements therein not misleading, or that the Final Supplemented Prospectus (including the Exchange Act Documents) contained, as of its date, or contains, on the date hereof, any untrue statement of a material fact or omitted, as of its date, or omits, on the date hereof, to state a material fact necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading, except that in each case we express no opinion or belief with respect to the financial statements or other financial or statistical data contained or incorporated by reference in the Registration Statement, the Final Supplemented Prospectus or the Exchange Act Documents and with respect to information set forth in the Final Supplemented Prospectus under the caption "Description of the Series G Senior Notes – Book-Entry Only Issuance – The Depository Trust Company."

We are members of the Florida Bar and we do not express any opinion herein concerning any law other than the law of the States of Maine, Florida and Mississippi and, to the extent set forth herein, the laws of the States of Georgia and New York and the federal law of the United States.

This opinion is rendered to you in connection with the above-described transaction. This opinion may not be relied upon by you for any other purpose or relied upon by or furnished to any other person without our prior written consent, except that Troutman Sanders LLP and Dewey Ballantine LLP may rely on this opinion in giving their opinions pursuant to Section 5(c) of the Underwriting Agreement insofar as such opinions relate to matters of Maine, Florida and Mississippi law.

Yours very truly,

Beggs & Lane

GULF POWER COMPANY
SERIES G 4.35% SENIOR NOTES
DUE JULY 15, 2013

Ladies and Gentlemen:

We have acted as counsel to Gulf Power Company (the "Company") in connection with (i) the Company's issuance and sale of $60,000,000 aggregate principal amount of its Series G 4.35% Senior Notes due July 15, 2013 (the "Notes") pursuant to the Senior Note Indenture dated as of January 1, 1998, by and between the Company and JPMorgan Chase Bank (formerly known as The Chase Manhattan Bank), as trustee (the "Trustee"), as heretofore supplemented and as further supplemented by the Seventh Supplemental Indenture dated as of July 22, 2003 (collectively, the "Indenture") and (ii) the purchase by the Underwriters (as defined below) of the Notes pursuant to the terms of an Underwriting Agreement dated July 14, 2003 (the "Underwriting Agreement"), among the Company and the Underwriters named in Schedule I thereto (the "Underwriters") for whom you are acting as Representatives. This opinion is being delivered to you as Representatives pursuant to Section 5(c)(2) of the Underwriting Agreement.

All capitalized terms not otherwise defined herein shall have the meanings set forth in the Underwriting Agreement.

In rendering the opinions expressed below, we have examined the registration statement on Form S-3 (Nos. 333-104449, 333-104449-01 and 333-104449-02) pertaining to the Notes and certain other securities (the "Registration Statement") filed under the Securities Act of 1933, as

amended (the "Act"), and the prospectus of the Company dated April 25, 2003, as supplemented by the prospectus supplement dated July 14, 2003 (the "Final Supplemented Prospectus"), which pursuant to Form S-3 incorporates by reference the Annual Report on Form 10-K of the Company for the fiscal year ended December 31, 2002, the Quarterly Report on Form 10-Q of the Company for the quarter ended March 31, 2003 and the Current Reports on Form 8-K of the Company dated March 21, 2003 and July 10, 2003 (the "Exchange Act Documents"), each as filed under the Securities Exchange Act of 1934, as amended (the "Exchange Act").

In addition, we have examined, and have relied as to matters of fact upon, the documents delivered to you at the closing (except the certificate representing the Notes, of which we have examined a specimen), and we have made such other and further investigations as we deemed necessary to express the opinions hereinafter set forth. In such examination, we have assumed the genuineness of all signatures, the legal capacity of natural persons, the authenticity of all documents submitted to us as originals, the conformity to original documents of all documents submitted to us as certified or photostatic copies and the authenticity of the originals of such latter documents.

The Indenture and the Underwriting Agreement are herein referred to collectively as the "Agreements."

Based upon the foregoing, and subject to the qualifications and limitations stated herein, we are of the opinion, relying as to matters of New York law upon the opinion dated the date hereof rendered to you by Dewey Ballantine LLP and as to matters of Maine, Florida and Mississippi law upon the opinion dated the date hereof rendered to you by Beggs & Lane, a Registered Limited Liability Partnership ("Beggs & Lane"), that:

1. The Company has been duly incorporated and is validly existing as a corporation in good standing under the laws of the State of Maine, is duly qualified to carry on its business as a foreign corporation in the States of Florida, Georgia and Mississippi and has due corporate authority to carry on the public utility business in which it is engaged, to own and operate the properties used by it in such business and to enter into and perform its obligations under the Agreements and the Notes.

2. The execution, delivery and performance by the Company of the Underwriting Agreement have been duly authorized by all necessary corporate action, and the Underwriting Agreement has been duly executed and delivered by the Company.

3. All orders, consents or other authorizations or approvals of the Florida Public Service Commission and the Commission legally required for the issuance and sale of the Notes

have been obtained; such orders are sufficient for the issuance and sale of the Notes; the issuance and sale of the Notes conform in all material respects with the terms of such orders; and no other order, consent or other authorization or approval of any Florida or United States governmental body (other than in connection or in compliance with the provisions of the securities or "blue sky" laws of any jurisdiction, as to which we express no opinion) is legally required for the issuance and sale of the Notes in accordance with the terms of the Underwriting Agreement.

4. The Indenture has been duly authorized, executed and delivered by the Company and, assuming the due authorization, execution and delivery thereof by the Trustee, constitutes a valid and legally binding instrument of the Company, enforceable against the Company in accordance with its terms, subject to the qualifications that the enforceability of the Company's obligations under the Indenture may be limited by bankruptcy, insolvency, reorganization, moratorium and other similar laws relating to or affecting creditors' rights generally and by general principles of equity (regardless of whether such enforceability is considered in a proceeding in equity or at law); and the Indenture conforms as to legal matters in all material respects to the description thereof in the Final Supplemented Prospectus.

5. The Notes have been duly authorized and executed by the Company and, when authenticated by the Trustee in the manner provided in the Indenture and delivered to and paid for by the Underwriters pursuant to the Underwriting Agreement, will constitute valid and binding obligations of the Company, enforceable against the Company in accordance with their terms, subject to the qualifications that the enforceability of the Company's obligations under the Notes may be limited by bankruptcy, insolvency, reorganization, moratorium and other similar laws relating to or affecting creditors' rights generally and by general principles of equity (regardless of whether such enforceability is considered in a proceeding in equity or at law); and the Notes conform as to legal matters in all material respects to the description thereof in the Final Supplemented Prospectus.

6. The Indenture has been duly qualified under the Trust Indenture Act of 1939, as amended.

We have not independently verified the accuracy, completeness or fairness of the statements made or included in the Registration Statement, the Final Supplemented Prospectus or the Exchange Act Documents and take no responsibility therefor, except as and to the extent set forth in paragraphs 4 and 5 above. In the course of the preparation by the Company of the Registration Statement, the Final Supplemented Prospectus and the Exchange Act Documents, we participated in conferences with certain officers and employees of the Company, with other counsel for the Company, with representatives of Deloitte & Touche LLP and with your counsel. Based upon our examination of the Registration Statement, the Final Supplemented Prospectus

and the Exchange Act Documents, our investigations made in connection with the preparation of the Registration Statement, the Final Supplemented Prospectus and the Exchange Act Documents and our participation in the conferences referred to above (i) we are of the opinion that the Registration Statement, as of its effective date, and the Final Supplemented Prospectus, as of July 14, 2003, complied as to form in all material respects with the requirements of the Act and the applicable rules and regulations of the Commission thereunder and that the Exchange Act Documents, as of their respective dates of filing with the Commission, complied as to form in all material respects with the relevant requirements of the Exchange Act and the applicable rules and regulations of the Commission thereunder, except that in each case we express no opinion as to the financial statements or other financial or statistical data contained or incorporated by reference in the Registration Statement, the Final Supplemented Prospectus or the Exchange Act Documents and (ii) nothing came to our attention which gives us reason to believe that the Registration Statement, as of its effective date (including the Exchange Act Documents on file with the Commission as of such date), contained any untrue statement of a material fact or omitted to state any material fact required to be stated therein or necessary in order to make the statements therein not misleading, or that the Final Supplemented Prospectus (including the Exchange Act Documents) contained, as of its date, or contains, on the date hereof, any untrue statement of a material fact or omitted, as of its date, or omits, on the date hereof, to state a material fact necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading, except that in each case we express no opinion or belief with respect to the financial statements or other financial or statistical data contained or incorporated by reference in the Registration Statement, the Final Supplemented Prospectus or the Exchange Act Documents and with respect to information set forth in the Final Supplemented Prospectus under the caption "Description of the Series G Senior Notes – Book-Entry Only Issuance – The Depository Trust Company."

We are members of the State Bar of Georgia and we do not express any opinion herein concerning any law other than the law of the State of Georgia and the federal law of the United States and, to the extent set forth herein, the laws of the States of Florida, Maine, Mississippi and New York.

This opinion is rendered to you in connection with the above-described transaction. This opinion may not be relied upon by you for any other purpose or relied upon by or furnished to any other person without our prior written consent, except that Beggs & Lane may rely on this opinion in giving its opinion pursuant to Section 5(c) of the Underwriting Agreement insofar as

such opinion relates to matters of Georgia law and the federal law of the United States and Dewey Ballantine LLP may rely on this opinion in giving its opinion pursuant to Section 5(c) of the Underwriting Agreement insofar as such opinion relates to matters of Georgia law.

Very truly yours,

Troutman Sanders LLP

INFORMATION REQUIRED

Item 1. Description of Proposed Transactions.

1.1 Gulf Power Company ("Gulf") is a wholly-owned subsidiary of The Southern Company ("Southern"), a registered holding company under the Public Utility Holding Company Act of 1935, as amended (the "Act").

Gulf proposes to incur, from time to time or at any time on or before March 31, 2006, obligations in connection with the issuance and sale by public instrumentalities of one or more series of pollution control revenue bonds in an aggregate principal amount of up to $180,000,000.

Gulf further proposes to issue and sell, from time to time or at any time on or before March 31, 2006, one or more series of its senior debentures, senior promissory notes or other senior debt instruments (individually a "Senior Note" and collectively the "Senior Notes"), one or more series of its first mortgage bonds and one or more series of its preferred stock in an aggregate amount of up to $450,000,000 in any combination of issuance.

1.2 Each issue of the proposed pollution control revenue bonds will be issued for the financing or refinancing of the costs of certain air and water pollution control facilities and sewage and solid waste disposal facilities at one or more of Gulf's electric generating plants or other facilities located in various counties. It is proposed that each such county or the otherwise appropriate public body or instrumentality (the "County") will issue its revenue bonds (the "Revenue Bonds") to finance or refinance the costs of the acquisition, construction, installation and equipping of said facilities at the plant or other facility located in its jurisdiction (the

"Project"). Each County is authorized by relevant state law to issue its Revenue Bonds for such purposes.

While the actual amount of Revenue Bonds to be issued by each County has not yet been determined, such amount will be based upon the cost of refunding outstanding bonds or the cost of the Project located in its jurisdiction.

Gulf proposes to enter into a Loan or Installment Sale Agreement with the County, substantially in the form of Exhibit B-1 hereto, relating to each issue of the Revenue Bonds (the "Agreement"). Under the Agreement, the County will loan to Gulf the proceeds of the sale of the County's Revenue Bonds, and Gulf may issue a non-negotiable promissory note therefor (the "Note"), or the County will undertake to purchase and sell the related Project to Gulf. The installment sale structure may be used because it is required by applicable state law or to the extent it affords transactional advantages to Gulf. Such proceeds will be deposited with a Trustee (the "Trustee") under an indenture to be entered into between the County and such Trustee (the "Trust Indenture"), pursuant to which such Revenue Bonds are to be issued and secured, and will be applied by Gulf to payment of the Cost of Construction (as defined in the Agreement) of the Project or to refund outstanding pollution control revenue obligations.

The Note or the Agreement will provide for payments to be made by Gulf at times and in amounts which shall correspond to the payments with respect to the principal of, premium, if any, and interest on the related Revenue Bonds whenever and in whatever manner the same shall become due, whether at stated maturity, upon redemption or declaration or otherwise.

The Agreement will provide for the assignment to the Trustee of the County's interest in, and of the moneys receivable by the County under, the Agreement and the Note.

The Agreement will also obligate Gulf to pay the fees and charges of the Trustee and may provide that Gulf may at any time, so long as it is not in default thereunder, prepay the amount due under the Agreement or the Note, including interest thereon, in whole or in part, such payment to be sufficient to redeem or purchase outstanding Revenue Bonds in the manner and to the extent provided in the Trust Indenture.

The Trust Indenture will provide that the Revenue Bonds issued thereunder (i) may be redeemable at any time on or after a specified date from the date of issuance, in whole or in part, at the option of Gulf, and may require the payment of a premium at a specified percentage of the principal amount which may decline annually thereafter, and (ii) will be redeemed in whole, at the option of Gulf, in certain other cases of undue burdens or excessive liabilities imposed with respect to the related Project, its destruction or damage beyond practicable or desirable repairability or condemnation or taking by eminent domain, or if operation of the related facility is enjoined and Gulf determines to discontinue operation thereof, such redemption of all such outstanding Revenue Bonds to be at the principal amount thereof plus accrued interest, but without premium. It is proposed that the Revenue Bonds will mature not more than 40 years from the first day of the month in which they are initially issued and may, if it is deemed advisable for purposes of the marketability of the Revenue Bonds, be entitled to the benefit of a mandatory redemption sinking fund calculated to retire a portion of the aggregate principal amount of the Revenue Bonds prior to maturity.

The Trust Indenture and the Agreement may give the holders of the Revenue Bonds the right, during such time as the Revenue Bonds bear interest at a fluctuating rate or otherwise, to require Gulf to purchase the Revenue Bonds from time to time, and arrangements may be made for the remarketing of any such Revenue Bonds through a remarketing agent. Gulf also

may be required to purchase the Revenue Bonds, or the Revenue Bonds may be subject to mandatory redemption, at any time if the interest thereon is determined to be subject to federal income tax. Also in the event of taxability, interest on the Revenue Bonds may be effectively converted to a higher variable or fixed rate, and Gulf also may be required to indemnify the bondholders against any other additions to interest, penalties and additions to tax; such terms are not considered to constitute the issuance of a separate security under Sections 6(a) and 7 of the Act, but rather possible additional terms of the Revenue Bonds and Gulf's obligations with respect thereto.

In order to obtain the benefit of ratings for the Revenue Bonds equivalent to the rating of Gulf's first mortgage bonds outstanding under the indenture dated as of September 1, 1941 between Gulf and JPMorgan Chase Bank (formerly The Chase Manhattan Bank), as trustee, as supplemented and amended (the "Mortgage"), which ratings Gulf has been advised may be thus attained, Gulf may determine to secure its obligations under the Note and the related Agreement by delivering to the Trustee, to be held as collateral, a series of its first mortgage bonds (the "Collateral Bonds") in principal amount either (i) equal to the principal amount of the Revenue Bonds or (ii) equal to the sum of such principal amount of the Revenue Bonds plus interest payments thereon for a specified period. Such series of Collateral Bonds will be issued under an indenture supplemental to the Mortgage (the "Supplemental Indenture"), will mature on the maturity date of such Revenue Bonds and will be non-transferable by the Trustee. The Collateral Bonds, in the case of clause (i) above, would bear interest at a rate or rates equal to the interest rate or rates to be borne by the related Revenue Bonds and, in the case of clause (ii) above, would be non-interest bearing.

The Supplemental Indenture will provide, however, that the obligation of Gulf to make payments with respect to the Collateral Bonds will be satisfied to the extent that payments are made under the Note or the Agreement sufficient to meet payments when due in respect of the related Revenue Bonds. The Supplemental Indenture will provide that, upon acceleration by the Trustee of the principal amount of all related outstanding Revenue Bonds under the Trust Indenture, the Trustee may demand the mandatory redemption of the related Collateral Bonds then held by it as collateral at a redemption price equal to the principal amount thereof plus accrued interest, if any, to the date fixed for redemption. The Supplemental Indenture may also provide that, upon the optional redemption of the Revenue Bonds, in whole or in part, a related principal amount of the Collateral Bonds will be redeemed at the redemption price of the Revenue Bonds.

In the case of interest bearing Collateral Bonds, because interest accrues in respect of such Collateral Bonds until satisfied by payments under the Note or the Agreement, "annual interest charges" in respect of such Collateral Bonds will be included in computing the "interest earnings requirement" of the Mortgage which restricts the amount of first mortgage bonds which may be issued and sold to the public in relation to Gulf's net earnings. In the case of non-interest bearing Collateral Bonds, since no interest would accrue in respect of such Collateral Bonds, the "interest earnings requirement" would be unaffected.

The Trust Indenture will provide that, upon deposit with the Trustee of funds sufficient to pay or redeem all or any part of the related Revenue Bonds, or upon direction to the Trustee by Gulf to so apply funds available therefor, or upon delivery of such outstanding Revenue Bonds to the Trustee by or for the account of Gulf, the Trustee will be obligated to deliver to Gulf the Collateral Bonds then held as collateral in an aggregate principal amount as

they relate to the aggregate principal amount of such Revenue Bonds for the payment or redemption of which such funds have been deposited or applied or which shall have been so delivered.

As an alternative to or in conjunction with Gulf's securing its obligations through the issuance of the Collateral Bonds as above described, Gulf may cause an irrevocable Letter of Credit or other credit facility (the "Letter of Credit") of a bank or other financial institution (the "Bank") to be delivered to the Trustee. The Letter of Credit would be an irrevocable obligation of the Bank to pay to the Trustee, upon request, up to an amount necessary in order to pay principal of and accrued interest on the Revenue Bonds when due. Pursuant to a separate agreement with the Bank, Gulf would agree to pay to the Bank, on demand or pursuant to a borrowing under such agreement, all amounts that are drawn under the Letter of Credit, as well as certain fees and expenses. Such delivery of the Letter of Credit to the Trustee would obtain for the Revenue Bonds the benefit of a rating equivalent to the credit rating of the Bank. In the event that the Letter of Credit is delivered to the Trustee as an alternative to the issuance of the Collateral Bonds, Gulf may also convey to the County a subordinated security interest in the Project or other property of Gulf as further security for Gulf's obligations under the Agreement and the Note. Such subordinated security interest would be assigned by the County to the Trustee.

As a further alternative to, or in conjunction with, securing its obligations under the Agreement and Note as above described, and in order to obtain a "AAA" rating for the Revenue Bonds by one or more nationally recognized securities rating services, Gulf may cause an insurance company to issue a policy of insurance guaranteeing the payment when due of the principal of and interest on such series of the Revenue Bonds. Such insurance policy would

extend for the term of the related Revenue Bonds and would be non-cancelable by the insurance company for any reason. Gulf's payment of the premium with respect to said insurance policy could be in various forms, including a non-refundable, one-time insurance premium paid at the time the policies are issued, and/or an additional interest percentage to be paid to said insurer in correlation with regular interest payments. In addition, Gulf may be obligated to make payments of certain specified amounts into separate escrow funds and to increase the amounts on deposit in such funds under certain circumstances. The amount in each escrow fund would be payable to the insurance company as indemnity for any amounts paid pursuant to the related insurance policy in respect of principal of or interest on the related Revenue Bonds.

It is contemplated that the Revenue Bonds will be sold by the County pursuant to arrangements with one or more purchasers, placement agents or underwriters. In accordance with applicable state laws, the interest rate to be borne by the Revenue Bonds will be approved by the County and will be either a fixed rate, which fixed rate may be convertible to a rate which will fluctuate in accordance with a specified prime or base rate or rates or may be determined pursuant to certain remarketing or auction procedures, or a fluctuating rate, which fluctuating rate may be convertible to a fixed rate. While Gulf may not be party to the purchase, placement or underwriting arrangements for the Revenue Bonds, such arrangements will provide that the terms of the Revenue Bonds and their sale by the County shall be satisfactory to Gulf. Bond Counsel will issue an opinion that, based upon existing law, interest on the Revenue Bonds will generally be excludable from gross income for federal income tax purposes. Gulf has been advised that the interest rates on obligations, the interest on which is tax exempt, recently have been and can be expected at the time of issue of the Revenue Bonds to be lower than the rates on obligations of like tenor and comparable quality, interest on which is fully subject to federal income taxation.

The effective cost to Gulf of any series of the Revenue Bonds will not exceed the greater of (i) 200 basis points over comparable term U.S. Treasury securities, or (ii) a gross spread over such Treasury securities which is consistent with comparable securities. Such effective cost will reflect the applicable interest rate or rates and any underwriters' discount or commission.

The premium (if any) payable upon the redemption of any Revenue Bonds at the option of Gulf will not exceed the greater of (i) 5% of the principal amount of the Revenue Bonds so to be redeemed, or (ii) a percentage of such principal amount equal to the rate of interest per annum borne by such Revenue Bonds.

The purchase price payable by or on behalf of Gulf in respect of Revenue Bonds tendered for purchase at the option of the holders thereof will not exceed 100% of the principal amount thereof, plus accrued interest to the purchase date.

Any Letter of Credit issued as security for the payment of Revenue Bonds will be issued pursuant to a Reimbursement Agreement between Gulf and the financial institution issuing such Letter of Credit. Pursuant to the Reimbursement Agreement, Gulf will agree to pay or cause to be paid to the financial institution, on each date that any amount is drawn under such institution's Letter of Credit, an amount equal to the amount of such drawing, whether by cash or by means of a borrowing from such institution pursuant to the Reimbursement Agreement. Any such borrowing may have a term of up to 10 years and will bear interest at the lending institution's prevailing rate offered to corporate borrowers of similar quality which will not exceed (i) the London Interbank Offered Rate plus up to 3%, (ii) the lending institution's certificate of deposit rate plus up to 2-3/4%, or (iii) a rate not to exceed the prime rate plus 1%, to be established by agreement with the lending institution prior to the borrowing.

1.3 It is proposed that each series of Senior Notes will have a maturity that will not exceed approximately 50 years.

The interest rate on each issue of Senior Notes may be either a fixed rate or an adjustable rate to be determined on a periodic basis by auction or remarketing procedures, in accordance with formula or formulae based upon certain reference rates, or by other predetermined methods.

The Senior Notes will be direct, unsecured and unsubordinated obligations of Gulf ranking pari passu with all other unsecured and unsubordinated obligations of Gulf. The Senior Notes will be effectively subordinated to all secured debt of Gulf, including its first mortgage bonds. The Senior Notes will be governed by an indenture or other document.

The underwriting fees, commissions or other similar expenses paid in connection with the issue, sale or distribution of the Senior Notes of each series will not exceed 5% of the aggregate principal amount of such series.

The effective cost of money on the Senior Notes will not exceed the greater of (i) 300 basis points over comparable term U.S. Treasury securities, or (ii) a gross spread over such Treasury securities which is consistent with comparable securities.

The Senior Notes will be sold in any of the following ways: (i) through underwriters or dealers; (ii) directly to a limited number of purchasers or to a single purchaser, or (iii) through agents or dealers. If underwriters are used in the sale of the Senior Notes, such Senior Notes will be acquired by the underwriters for their own account and may be resold from time to time in one or more transactions, including negotiated transactions, at a fixed public offering price or at varying prices determined at the time of sale. The Senior Notes may be offered to the public either through underwriting syndicates (which may be represented by managing underwriters) or

directly by one or more underwriters acting alone. The Senior Notes may be sold directly by Gulf or through agents designated from time to time. If dealers are used in the sale of any Senior Notes, such Senior Notes will be sold to the dealers as principal. Any dealer may then resell such Senior Notes to the public at varying prices to be determined by such dealer at the time of resale.

Senior Notes may be sold pursuant to "delayed delivery contracts" which permit the underwriters to locate buyers who will agree to buy the Senior Notes at the same price but at a later date than the date of the closing of the sale to the underwriters. Senior Notes may also be sold through the use of medium-term note and similar programs, including in transactions covered by Rule 144A under the Securities Act of 1933, as amended.

Any Senior Notes would have such designations, aggregate principal amount, maturity, interest rate(s) or methods of determining the same, interest payment terms, redemption provisions, non-refunding provisions, sinking fund terms, conversion or put terms and other terms and conditions as Gulf may determine at the time of issuance.

1.4 It is proposed that each series of Gulf's first mortgage bonds (the "new Bonds") will have a term of not more than 40 years and will be sold for the best price obtainable but for a price to Gulf of not less than 98% nor more than 101-3/4% of the principal amount thereof, plus accrued interest (if any).

The new Bonds will be issued under the Mortgage as heretofore supplemented by various indentures supplemental thereto, and as to be further supplemented by a Supplemental Indenture providing for each series of the new Bonds to be issued.

Gulf may provide that none of the new Bonds of any series will be redeemed for a five-year or other period commencing on or about the first day of the month of issuance at a regular redemption price if such redemption is for the purpose or in anticipation of refunding

such new Bonds through the use, directly or indirectly, of funds borrowed by Gulf at an effective interest cost to Gulf (computed in accordance with generally accepted financial practice) of less than the effective interest cost to Gulf of the new Bonds of such series. Such limitation will not apply to redemptions at a special redemption price by operation of the improvement fund or the replacement provisions of the Mortgage or by the use of proceeds of released property.

Gulf may covenant that it will not redeem the new Bonds of any series, in any year prior to the fifth or other specified year after the issuance of such series, through the operation of the improvement fund provisions of the Mortgage in a principal amount which would exceed 1% of the initial aggregate principal amount of such series.

Gulf also may covenant that it will not, in any calendar year, redeem the new Bonds of any series through the operation of the replacement provisions of the Mortgage in a principal amount which would exceed 1% of the initial aggregate principal amount of such series.

In addition, Gulf may make provision for a mandatory cash sinking fund for the benefit of any series of the new Bonds. In connection therewith, Gulf may have the non-cumulative option in any year of making an optional sinking fund payment in an amount not exceeding such mandatory sinking fund payment.

In order to enhance the marketability of the new Bonds, it may be desirable to cause an insurance company to issue a policy of insurance for the payment when due of the new Bonds of a particular series. It also may be desirable that the terms of the new Bonds, or any series thereof, provide for an adjustable interest rate thereon to be determined on a periodic basis, rather than a fixed interest rate. In such event, it is proposed that the rate of interest on such new Bonds for an initial period would be a fixed rate per annum. Periodically thereafter, the interest rate

would be adjusted by periodic auction or remarketing procedures, or in accordance with a formula or formulae based upon certain reference rates, or by other predetermined methods.

In connection with any such adjustable rate issue, it is proposed that such series of the new Bonds may not be redeemable at the option of Gulf during certain short-term interest periods. It is further proposed that the non-refunding limitation described above, as well as the restriction on redemptions through operation of the improvement fund provisions, may apply with respect to each long-term interest period commencing with the first day of the month in which any such interest period begins.

1.5 It is proposed that each issuance of Gulf's preferred stock, par or stated value of up to $100 per share (the "new Preferred Stock"), will be sold for the best price obtainable (after giving effect to the purchasers' compensation) but for a price to Gulf (before giving effect to such purchasers' compensation) of not less than 100% of the par or stated value per share.

The authorized number of shares of preferred stock of Gulf may be increased by amendment to the Articles of Incorporation of Gulf and the new Preferred Stock of each series will be created, and its terms established, by resolution of the board of directors of Gulf which when filed with the Secretary of State of Maine will constitute an amendment to the charter of Gulf. Gulf may make provision for a cumulative sinking fund for the benefit of a particular series of the new Preferred Stock which would retire a certain number of shares of such series annually, commencing at a specified date after the sale. In connection therewith, Gulf may have the non-cumulative option of redeeming up to an additional like number of shares of such series annually.

Gulf may provide that no share of a particular series of the new Preferred Stock will be redeemed for a five-year or other period commencing on or about the first day of the month of

issuance, if such redemption is for the purpose or in anticipation of refunding such share directly or indirectly through the incurring of debt, or through the issuance of stock ranking equally with or prior to the new Preferred Stock as to dividends or assets, if such debt has an effective interest cost to Gulf (computed in accordance with generally accepted financial practice) or such stock has an effective dividend cost to Gulf (so computed) of less than the effective dividend cost to Gulf of the respective series of the new Preferred Stock.

Gulf may determine that, in light of the current market conditions at the time any series of the new Preferred Stock is offered, it is in the best interest of Gulf and its investors and consumers that the terms of such new Preferred Stock provide for an adjustable dividend rate thereon to be determined on a periodic basis, rather than a fixed rate dividend. In such event, it is proposed that the rate of dividends on such new Preferred Stock for an initial period would be a fixed amount or rate per annum. Periodically thereafter, the rate would be adjusted by periodic auction or remarketing procedures, or in accordance with a formula or formulae based upon certain reference rates, or by other predetermined methods.

1.6 Gulf may determine to use the proceeds from the sale of the Revenue Bonds, the Senior Notes, the new Bonds and the new Preferred Stock to redeem or otherwise retire its outstanding senior notes, first mortgage bonds, pollution control bonds and/or preferred stock if such use is considered advisable. To the extent that the redemption or other retirement of outstanding preferred stock using the proceeds from security sales as proposed herein may require authorization under Section 12(c) of the Act, Gulf hereby requests such authorization. Gulf also proposes that it may use the proceeds from the sale of the Senior Notes, the new Bonds and new Preferred Stock, along with other funds, to pay a portion of its cash requirements to carry on its electric utility business.

1.7 Gulf represents that it will maintain its common equity as a percentage of capitalization (inclusive of short-term debt) at no less than thirty percent. Gulf will not publicly issue any of the securities for which authorization by the Commission is requested herein unless such securities are rated (to the extent that they are rated at the time of issuance) at the investment grade level as established by at least one "nationally recognized statistical rating organization", as that term is used in paragraphs (c)(2)(vi) (E), (F) and (H) of Rule 15c3-1 under the Securities Exchange Act of 1934, as amended. Gulf requests that the Commission reserve jurisdiction over the issuance by Gulf of any such securities that are rated below investment grade.

1.8 Pursuant to orders of the Commission, Gulf has authority to issue and sell $350,000,000 of senior notes (of which, $280,000,000 has been sold), $400,000,000 of first mortgage bonds and/or preferred stock and $200,000,000 of pollution control revenue bonds (of which, $95,930,000 has been sold) as set forth in Commission File No. 70-9171 (HCAR No. 35-26870, dated May 14, 1998) and in Commission File No. 70-8949 (HCAR No. 35-26736, dated June 30, 1997). Gulf hereby requests that the authority described in the above-mentioned orders remain in effect until such time as the order with respect to the matters requested herein is issued.

Item 2. Fees, Commissions and Expenses.

The fees and expenses in connection with the proposed transactions (other than underwriting discounts and commissions) are estimated not to exceed $2,000,000. The prospectus supplement or offering circular relating to each offering will reflect the actual expenses based upon the amount of the related offering.

Item 3. Applicable Statutory Provisions.

Sections 6(a), 7 and 12(c) of the Act and Rules 23, 42 and 54 thereunder are applicable to the proposed transactions.

Gulf further considers that the sale or granting of subordinated security interests in the Projects or other property of Gulf, as set forth under Item 1.3 above, may be subject to Section 12(d) of the Act, and that the exception afforded by subparagraph (b)(3) of Rule 44 thereunder may be applicable.

Gulf considers that any guarantee of payment of the Revenue Bonds may be subject to Sections 6(a) and 7 of the Act.

Gulf considers that Sections 9(a) and 10 of the Act may be applicable to any purchase of Revenue Bonds by Gulf as described herein and to the extent that the transactions contemplated herein in connection with the Revenue Bonds involve an Installment Sale Agreement or Agreements pursuant to which the County undertakes to sell the related Project to Gulf.

Gulf considers that the acquisition, retirement or redemption of Senior Notes, new Bonds and new Preferred Stock in connection with any sinking fund provisions with respect thereto (including any optional redemptions included as part of such sinking fund provisions) are excepted from the requirements of Section 12(c) of the Act by Rule 42 thereunder.

The proposed transactions will be carried out in accordance with the procedure specified in Rule 23 and pursuant to an order or orders of the Commission in respect thereto.

Rule 54 Analysis: The proposed transactions are also subject to Rule 54, which provides that, in determining whether to approve an application which does not relate to any "exempt wholesale generator" ("EWG") or "foreign utility company" ("FUCO"), the

Commission shall not consider the effect of the capitalization or earnings of any such EWG or FUCO which is a subsidiary of a registered holding company if the requirements of Rule 53(a), (b) and (c) are satisfied.

Southern currently meets all of the conditions of Rule 53(a). At September 30, 2002, Southern's "aggregate investment," as defined in Rule 53(a)(1), in EWGs and FUCOs was approximately $231.3 million, or 4.99% of Southern's "consolidated retained earnings," also as defined in Rule 53(a)(1), as of September 30, 2002 ($4.640 billion).[1]

In addition, Southern has complied and will continue to comply with the record-keeping requirements of Rule 53(a)(2), the limitation under Rule 53(a)(3) on the use of operating company personnel to render services to EWGs and FUCOs, and the requirements of Rule 53(a)(4) concerning the submission of copies of certain filings under the Act to retail rate

---

[1] As discussed in Southern's Application on Form U-1 (File No. 70-9727) relating to the spin-off of Mirant Corporation ("Mirant"), Southern and Mirant reorganized certain energy-related and FUCO activities and Mirant completed a tax-free distribution to Southern of these activities on March 5, 2001 (the "Mini-Spin"). On April 2, 2001, Southern completed the spin-off of its remaining ownership interest in Mirant to Southern's shareholders. Therefore, the four indirect subsidiaries (EPZ Lease, Inc., Dutch Gas Lease, Inc., GAMOG Lease, Inc. and NUON Lease, Inc.) obtained through the Mini-Spin are the only remaining FUCO investments held by Southern. Although Southern now owns all of the equity in these companies as a result of the Mini-Spin, Southern has no direct or indirect investment or any aggregate investment within the meaning of Rule 53 in these FUCOs, including any direct or indirect guarantees or credit positions related to any capital or financing leases. Furthermore, the only remaining EWG investment held by Southern after the spin-off is Southern Company-Florida LLC, which was organized during the first quarter of 2001. Southern has executed limited keep-well commitments whereby Southern would be required to make capital contributions to Southern Energy Finance Capital Corp. or to Southern Energy Finance Company, Inc. in the event of a shortfall in the scheduled debt service resulting from certain changes in the payments due from Southern under the Southern Company Income Tax Allocation Agreement. The maximum potential capital contribution required under these commitments is the unamortized balance of the related loans, which totaled approximately $372 million as of September 30, 2002.

regulatory commissions. Further, none of the circumstances described in Rule 53(b) has occurred.

Item 4. Regulatory Approval.

Gulf's obligations with respect to the Collateral Bonds, the borrowings under the Agreements, the issuance of the Notes in respect thereof and the issuance and sale of the Senior Notes, the new Bonds and the new Preferred Stock will have been expressly authorized by the Florida Public Service Commission, which has jurisdiction over the issuance of stocks, bonds and certain evidence of indebtedness by public utility companies operating in Florida.

The transactions by Gulf proposed herein are not subject to the jurisdiction of any state commission or of any federal commission other than the Commission.

Item 5. Procedure.

Gulf requests that the Commission's order herein be issued as soon as the rules allow and that there be no 30-day waiting period between the issuance of the Commission's order and the date on which it is to become effective. Gulf hereby waives a recommended decision by a hearing officer or other responsible officer of the Commission and hereby consents that the Division of Investment Management may assist in the preparation of the Commission's decision and/or order in this matter unless such Division opposes the matters covered hereby.

Item 6. Exhibits and Financial Statements.

(a) Exhibits.

A-1(a) - Indenture dated as of September 1, 1941, between Gulf and JPMorgan Chase Bank (formerly The Chase Manhattan Bank), as Trustee, and indentures supplemental thereto through November 1, 1996. (Designated in Registration Nos. 2-4833 as Exhibit B-3, 2-62319 as Exhibit 2(a)-3, 2-63765 as Exhibit 2(a)-3, 2-66260 as Exhibit 2(a)-3, 33-2809 as Exhibit 4(a)-2, 33-43739 as Exhibit 4(a)-2, in Gulf's Form 10-K for the year ended December 31, 1991, File No. 0-2429, as Exhibit 4(b), in Form 8-K dated August 18, 1992, File No. 0-2429, as Exhibit 4(a)-3, in Registration No. 33-50165 as Exhibit 4(a)-2, in Form 8-K dated July 12, 1993, File No. 0-2429, as Exhibit 4, in Certificate of Notification, File No. 70-8229, as Exhibit A, in Certificate of Notification, File No. 70-8229, as Exhibits E and F, in Form 8-K dated January 17, 1996, File No. 0-2429, as Exhibit 4, in Certificate of Notification, File No. 70-8229, as Exhibit A, in Certificate of Notification, File No. 70-8229, as Exhibit A and in Form 8-K dated November 6, 1996, File No. 0-2429, as Exhibit 4.)

A-1(b) - Form of Supplemental Indenture with respect to the new Bonds, between Gulf and JPMorgan Chase Bank, as Trustee. (To be filed by amendment.)

A-2(a) - Senior Note Indenture dated as of January 1, 1998, between Gulf and JPMorgan Chase Bank (formerly The Chase Manhattan Bank), as Trustee, and indentures supplemental thereto through January 30, 2002. (Designated in Form 8-K dated June 17, 1998, File No. 0-2429, as Exhibits 4.1 and 4.2, in Form 8-K dated August 17, 1999, File No. 0-2429, as Exhibit 4.2, in Form 8-K dated July 31, 2001, File No. 0-2429, as Exhibit 4.2, in Form 8-K dated October 5, 2001, File No. 0-2429, as Exhibit 4.2 and in Form 8-K dated January 18, 2002, File No. 0-2429, as Exhibit 4.2.)

A-2(b) - Form of Supplemental Indenture to Senior Note Indenture between Gulf and JPMorgan Chase Bank . (To be filed by amendment.)

A-3(a) - Restated Articles of Incorporation of Gulf and amendments thereto through February 9, 2001. (Designated in Registration No. 33-43739 as Exhibit 4(b)-1, in Form 8-K dated January 15, 1992, File No. 0-2429, as Exhibit 1(b), in Form 8-K dated August 18, 1992, File No. 0-2429, as Exhibit 4(b)-2, in Form 8-K dated September 22, 1993, File No. 0-2429, as Exhibit 4, in Form 8-K dated November 3, 1993, File No. 0-2429, as Exhibit 4, in Gulf's Form 10-K for the year ended December 31, 1997,

File No. 0-2429, as Exhibit 3(d)2 and in Gulf's Form 10-K for the year ended December 31, 2000, File No. 0-2429, as Exhibit 3(d)2.)

A-3(b) - Form proposed amendment to articles of incorporation of Gulf increasing the amount of authorized preferred stock. (To be filed by amendment.)

A-3(c) - By-laws of Gulf as amended effective July 26, 2002, and as presently in effect.

B-1 - Form of Loan or Installment Sale Agreement between Gulf and the County relating to the Revenue Bonds. (To be filed by amendment.)

B-2 - Form of Trust Indenture between the County and the Trustee relating to the Revenue Bonds. (To be filed by amendment.)

C - Registration statement pursuant to the Securities Act of 1933, as amended. (Filed electronically May 1, 2001 File No. 333-59942.)

D - None.

E - None.

F - Opinion of Beggs & Lane, counsel for Gulf. (To be filed by amendment.)

G - Form of Notice.

Exhibits heretofore filed with the Securities and Exchange Commission and designated as set forth above are hereby incorporated herein by reference and made a part hereof with the same effect as if filed herewith.

(b) Financial Statements.

Balance sheet of Gulf at September 30, 2002. (Designated in Gulf's Form 10-Q for the quarter ended September 30, 2002, File No. 0-2429.)

Statements of Income of Gulf for the period ended September 30, 2002. (Designated in Gulf's Form 10-Q for the quarter ended September 30, 2002, File No. 0-2429.)

Since September 30, 2002, there have been no material adverse changes, not in the ordinary course of business, in the financial condition of Gulf from that set forth in or contemplated by the foregoing financial statements.

Item 7. Information as to Environmental Effects.

(a) The proposed transactions are strictly financial in nature in the ordinary course of Gulf's business. Accordingly, the Commission's action in these matters will not constitute any major federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act.

(b) No other federal agency has prepared or is preparing an environmental impact statement with regard to the proposed transactions.

SIGNATURE

Pursuant to the requirements of the Public Utility Holding Company Act of 1935, the undersigned company has duly caused this Form U-1 to be signed on its behalf by the undersigned thereunto duly authorized.

INFORMATION REQUIRED

Item 1. Description of Proposed Transactions.

1.1 Gulf Power Company ("Gulf") is a wholly-owned subsidiary of The Southern Company ("Southern"), a registered holding company under the Public Utility Holding Company Act of 1935, as amended (the "Act").

Gulf proposes to incur, from time to time or at any time on or before March 31, 2006, obligations in connection with the issuance and sale by public instrumentalities of one or more series of pollution control revenue bonds in an aggregate principal amount of up to $180,000,000.

Gulf further proposes to issue and sell, from time to time or at any time on or before March 31, 2006, one or more series of its senior debentures, senior promissory notes or other senior debt instruments (individually a "Senior Note" and collectively the "Senior Notes"), one or more series of its first mortgage bonds and one or more series of its preferred stock in an aggregate amount of up to $450,000,000 in any combination of issuance.

1.2 Each issue of the proposed pollution control revenue bonds will be issued for the financing or refinancing of the costs of certain air and water pollution control facilities and sewage and solid waste disposal facilities at one or more of Gulf's electric generating plants or other facilities located in various counties. It is proposed that each such county or the otherwise appropriate public body or instrumentality (the "County") will issue its revenue bonds (the "Revenue Bonds") to finance or refinance the costs of the acquisition, construction, installation and equipping of said facilities at the plant or other facility located in its jurisdiction (the

"Project"). Each County is authorized by relevant state law to issue its Revenue Bonds for such purposes.

While the actual amount of Revenue Bonds to be issued by each County has not yet been determined, such amount will be based upon the cost of refunding outstanding bonds or the cost of the Project located in its jurisdiction.

Gulf proposes to enter into a Loan or Installment Sale Agreement with the County, substantially in the form of Exhibit B-1 hereto, relating to each issue of the Revenue Bonds (the "Agreement"). Under the Agreement, the County will loan to Gulf the proceeds of the sale of the County's Revenue Bonds, and Gulf may issue a non-negotiable promissory note therefor (the "Note"), or the County will undertake to purchase and sell the related Project to Gulf. The installment sale structure may be used because it is required by applicable state law or to the extent it affords transactional advantages to Gulf. Such proceeds will be deposited with a Trustee (the "Trustee") under an indenture to be entered into between the County and such Trustee (the "Trust Indenture"), pursuant to which such Revenue Bonds are to be issued and secured, and will be applied by Gulf to payment of the Cost of Construction (as defined in the Agreement) of the Project or to refund outstanding pollution control revenue obligations.

The Note or the Agreement will provide for payments to be made by Gulf at times and in amounts which shall correspond to the payments with respect to the principal of, premium, if any, and interest on the related Revenue Bonds whenever and in whatever manner the same shall become due, whether at stated maturity, upon redemption or declaration or otherwise.

The Agreement will provide for the assignment to the Trustee of the County's interest in, and of the moneys receivable by the County under, the Agreement and the Note.

The Agreement will also obligate Gulf to pay the fees and charges of the Trustee and may provide that Gulf may at any time, so long as it is not in default thereunder, prepay the amount due under the Agreement or the Note, including interest thereon, in whole or in part, such payment to be sufficient to redeem or purchase outstanding Revenue Bonds in the manner and to the extent provided in the Trust Indenture.

The Trust Indenture will provide that the Revenue Bonds issued thereunder (i) may be redeemable at any time on or after a specified date from the date of issuance, in whole or in part, at the option of Gulf, and may require the payment of a premium at a specified percentage of the principal amount which may decline annually thereafter, and (ii) will be redeemed in whole, at the option of Gulf, in certain other cases of undue burdens or excessive liabilities imposed with respect to the related Project, its destruction or damage beyond practicable or desirable repairability or condemnation or taking by eminent domain, or if operation of the related facility is enjoined and Gulf determines to discontinue operation thereof, such redemption of all such outstanding Revenue Bonds to be at the principal amount thereof plus accrued interest, but without premium. It is proposed that the Revenue Bonds will mature not more than 40 years from the first day of the month in which they are initially issued and may, if it is deemed advisable for purposes of the marketability of the Revenue Bonds, be entitled to the benefit of a mandatory redemption sinking fund calculated to retire a portion of the aggregate principal amount of the Revenue Bonds prior to maturity.

The Trust Indenture and the Agreement may give the holders of the Revenue Bonds the right, during such time as the Revenue Bonds bear interest at a fluctuating rate or otherwise, to require Gulf to purchase the Revenue Bonds from time to time, and arrangements may be made for the remarketing of any such Revenue Bonds through a remarketing agent. Gulf also

may be required to purchase the Revenue Bonds, or the Revenue Bonds may be subject to mandatory redemption, at any time if the interest thereon is determined to be subject to federal income tax. Also in the event of taxability, interest on the Revenue Bonds may be effectively converted to a higher variable or fixed rate, and Gulf also may be required to indemnify the bondholders against any other additions to interest, penalties and additions to tax; such terms are not considered to constitute the issuance of a separate security under Sections 6(a) and 7 of the Act, but rather possible additional terms of the Revenue Bonds and Gulf's obligations with respect thereto.

In order to obtain the benefit of ratings for the Revenue Bonds equivalent to the rating of Gulf's first mortgage bonds outstanding under the indenture dated as of September 1, 1941 between Gulf and JPMorgan Chase Bank (formerly The Chase Manhattan Bank), as trustee, as supplemented and amended (the "Mortgage"), which ratings Gulf has been advised may be thus attained, Gulf may determine to secure its obligations under the Note and the related Agreement by delivering to the Trustee, to be held as collateral, a series of its first mortgage bonds (the "Collateral Bonds") in principal amount either (i) equal to the principal amount of the Revenue Bonds or (ii) equal to the sum of such principal amount of the Revenue Bonds plus interest payments thereon for a specified period. Such series of Collateral Bonds will be issued under an indenture supplemental to the Mortgage (the "Supplemental Indenture"), will mature on the maturity date of such Revenue Bonds and will be non-transferable by the Trustee. The Collateral Bonds, in the case of clause (i) above, would bear interest at a rate or rates equal to the interest rate or rates to be borne by the related Revenue Bonds and, in the case of clause (ii) above, would be non-interest bearing.

The Supplemental Indenture will provide, however, that the obligation of Gulf to make payments with respect to the Collateral Bonds will be satisfied to the extent that payments are made under the Note or the Agreement sufficient to meet payments when due in respect of the related Revenue Bonds. The Supplemental Indenture will provide that, upon acceleration by the Trustee of the principal amount of all related outstanding Revenue Bonds under the Trust Indenture, the Trustee may demand the mandatory redemption of the related Collateral Bonds then held by it as collateral at a redemption price equal to the principal amount thereof plus accrued interest, if any, to the date fixed for redemption. The Supplemental Indenture may also provide that, upon the optional redemption of the Revenue Bonds, in whole or in part, a related principal amount of the Collateral Bonds will be redeemed at the redemption price of the Revenue Bonds.

In the case of interest bearing Collateral Bonds, because interest accrues in respect of such Collateral Bonds until satisfied by payments under the Note or the Agreement, "annual interest charges" in respect of such Collateral Bonds will be included in computing the "interest earnings requirement" of the Mortgage which restricts the amount of first mortgage bonds which may be issued and sold to the public in relation to Gulf's net earnings. In the case of non-interest bearing Collateral Bonds, since no interest would accrue in respect of such Collateral Bonds, the "interest earnings requirement" would be unaffected.

The Trust Indenture will provide that, upon deposit with the Trustee of funds sufficient to pay or redeem all or any part of the related Revenue Bonds, or upon direction to the Trustee by Gulf to so apply funds available therefor, or upon delivery of such outstanding Revenue Bonds to the Trustee by or for the account of Gulf, the Trustee will be obligated to deliver to Gulf the Collateral Bonds then held as collateral in an aggregate principal amount as

they relate to the aggregate principal amount of such Revenue Bonds for the payment or redemption of which such funds have been deposited or applied or which shall have been so delivered.

As an alternative to or in conjunction with Gulf's securing its obligations through the issuance of the Collateral Bonds as above described, Gulf may cause an irrevocable Letter of Credit or other credit facility (the "Letter of Credit") of a bank or other financial institution (the "Bank") to be delivered to the Trustee. The Letter of Credit would be an irrevocable obligation of the Bank to pay to the Trustee, upon request, up to an amount necessary in order to pay principal of and accrued interest on the Revenue Bonds when due. Pursuant to a separate agreement with the Bank, Gulf would agree to pay to the Bank, on demand or pursuant to a borrowing under such agreement, all amounts that are drawn under the Letter of Credit, as well as certain fees and expenses. Such delivery of the Letter of Credit to the Trustee would obtain for the Revenue Bonds the benefit of a rating equivalent to the credit rating of the Bank. In the event that the Letter of Credit is delivered to the Trustee as an alternative to the issuance of the Collateral Bonds, Gulf may also convey to the County a subordinated security interest in the Project or other property of Gulf as further security for Gulf's obligations under the Agreement and the Note. Such subordinated security interest would be assigned by the County to the Trustee.

As a further alternative to, or in conjunction with, securing its obligations under the Agreement and Note as above described, and in order to obtain a "AAA" rating for the Revenue Bonds by one or more nationally recognized securities rating services, Gulf may cause an insurance company to issue a policy of insurance guaranteeing the payment when due of the principal of and interest on such series of the Revenue Bonds. Such insurance policy would

extend for the term of the related Revenue Bonds and would be non-cancelable by the insurance company for any reason. Gulf's payment of the premium with respect to said insurance policy could be in various forms, including a non-refundable, one-time insurance premium paid at the time the policies are issued, and/or an additional interest percentage to be paid to said insurer in correlation with regular interest payments. In addition, Gulf may be obligated to make payments of certain specified amounts into separate escrow funds and to increase the amounts on deposit in such funds under certain circumstances. The amount in each escrow fund would be payable to the insurance company as indemnity for any amounts paid pursuant to the related insurance policy in respect of principal of or interest on the related Revenue Bonds.

It is contemplated that the Revenue Bonds will be sold by the County pursuant to arrangements with one or more purchasers, placement agents or underwriters. In accordance with applicable state laws, the interest rate to be borne by the Revenue Bonds will be approved by the County and will be either a fixed rate, which fixed rate may be convertible to a rate which will fluctuate in accordance with a specified prime or base rate or rates or may be determined pursuant to certain remarketing or auction procedures, or a fluctuating rate, which fluctuating rate may be convertible to a fixed rate. While Gulf may not be party to the purchase, placement or underwriting arrangements for the Revenue Bonds, such arrangements will provide that the terms of the Revenue Bonds and their sale by the County shall be satisfactory to Gulf. Bond Counsel will issue an opinion that, based upon existing law, interest on the Revenue Bonds will generally be excludable from gross income for federal income tax purposes. Gulf has been advised that the interest rates on obligations, the interest on which is tax exempt, recently have been and can be expected at the time of issue of the Revenue Bonds to be lower than the rates on obligations of like tenor and comparable quality, interest on which is fully subject to federal income taxation.

The effective cost to Gulf of any series of the Revenue Bonds will not exceed the greater of (i) 200 basis points over comparable term U.S. Treasury securities, or (ii) a gross spread over such Treasury securities which is consistent with comparable securities. Such effective cost will reflect the applicable interest rate or rates and any underwriters' discount or commission.

The premium (if any) payable upon the redemption of any Revenue Bonds at the option of Gulf will not exceed the greater of (i) 5% of the principal amount of the Revenue Bonds so to be redeemed, or (ii) a percentage of such principal amount equal to the rate of interest per annum borne by such Revenue Bonds.

The purchase price payable by or on behalf of Gulf in respect of Revenue Bonds tendered for purchase at the option of the holders thereof will not exceed 100% of the principal amount thereof, plus accrued interest to the purchase date.

Any Letter of Credit issued as security for the payment of Revenue Bonds will be issued pursuant to a Reimbursement Agreement between Gulf and the financial institution issuing such Letter of Credit. Pursuant to the Reimbursement Agreement, Gulf will agree to pay or cause to be paid to the financial institution, on each date that any amount is drawn under such institution's Letter of Credit, an amount equal to the amount of such drawing, whether by cash or by means of a borrowing from such institution pursuant to the Reimbursement Agreement. Any such borrowing may have a term of up to 10 years and will bear interest at the lending institution's prevailing rate offered to corporate borrowers of similar quality which will not exceed (i) the London Interbank Offered Rate plus up to 3%, (ii) the lending institution's certificate of deposit rate plus up to 2-3/4%, or (iii) a rate not to exceed the prime rate plus 1%, to be established by agreement with the lending institution prior to the borrowing.

1.3 It is proposed that each series of Senior Notes will have a maturity that will not exceed approximately 50 years.

The interest rate on each issue of Senior Notes may be either a fixed rate or an adjustable rate to be determined on a periodic basis by auction or remarketing procedures, in accordance with formula or formulae based upon certain reference rates, or by other predetermined methods.

The Senior Notes will be direct, unsecured and unsubordinated obligations of Gulf ranking pari passu with all other unsecured and unsubordinated obligations of Gulf. The Senior Notes will be effectively subordinated to all secured debt of Gulf, including its first mortgage bonds. The Senior Notes will be governed by an indenture or other document.

The underwriting fees, commissions or other similar expenses paid in connection with the issue, sale or distribution of the Senior Notes of each series will not exceed 5% of the aggregate principal amount of such series.

The effective cost of money on the Senior Notes will not exceed the greater of (i) 300 basis points over comparable term U.S. Treasury securities, or (ii) a gross spread over such Treasury securities which is consistent with comparable securities.

The Senior Notes will be sold in any of the following ways: (i) through underwriters or dealers; (ii) directly to a limited number of purchasers or to a single purchaser, or (iii) through agents or dealers. If underwriters are used in the sale of the Senior Notes, such Senior Notes will be acquired by the underwriters for their own account and may be resold from time to time in one or more transactions, including negotiated transactions, at a fixed public offering price or at varying prices determined at the time of sale. The Senior Notes may be offered to the public either through underwriting syndicates (which may be represented by managing underwriters) or

directly by one or more underwriters acting alone. The Senior Notes may be sold directly by Gulf or through agents designated from time to time. If dealers are used in the sale of any Senior Notes, such Senior Notes will be sold to the dealers as principal. Any dealer may then resell such Senior Notes to the public at varying prices to be determined by such dealer at the time of resale.

Senior Notes may be sold pursuant to "delayed delivery contracts" which permit the underwriters to locate buyers who will agree to buy the Senior Notes at the same price but at a later date than the date of the closing of the sale to the underwriters. Senior Notes may also be sold through the use of medium-term note and similar programs, including in transactions covered by Rule 144A under the Securities Act of 1933, as amended.

Any Senior Notes would have such designations, aggregate principal amount, maturity, interest rate(s) or methods of determining the same, interest payment terms, redemption provisions, non-refunding provisions, sinking fund terms, conversion or put terms and other terms and conditions as Gulf may determine at the time of issuance.

1.4 It is proposed that each series of Gulf's first mortgage bonds (the "new Bonds") will have a term of not more than 40 years and will be sold for the best price obtainable but for a price to Gulf of not less than 98% nor more than 101-3/4% of the principal amount thereof, plus accrued interest (if any).

The new Bonds will be issued under the Mortgage as heretofore supplemented by various indentures supplemental thereto, and as to be further supplemented by a Supplemental Indenture providing for each series of the new Bonds to be issued.

Gulf may provide that none of the new Bonds of any series will be redeemed for a five-year or other period commencing on or about the first day of the month of issuance at a regular redemption price if such redemption is for the purpose or in anticipation of refunding

such new Bonds through the use, directly or indirectly, of funds borrowed by Gulf at an effective interest cost to Gulf (computed in accordance with generally accepted financial practice) of less than the effective interest cost to Gulf of the new Bonds of such series. Such limitation will not apply to redemptions at a special redemption price by operation of the improvement fund or the replacement provisions of the Mortgage or by the use of proceeds of released property.

Gulf may covenant that it will not redeem the new Bonds of any series, in any year prior to the fifth or other specified year after the issuance of such series, through the operation of the improvement fund provisions of the Mortgage in a principal amount which would exceed 1% of the initial aggregate principal amount of such series.

Gulf also may covenant that it will not, in any calendar year, redeem the new Bonds of any series through the operation of the replacement provisions of the Mortgage in a principal amount which would exceed 1% of the initial aggregate principal amount of such series.

In addition, Gulf may make provision for a mandatory cash sinking fund for the benefit of any series of the new Bonds. In connection therewith, Gulf may have the non-cumulative option in any year of making an optional sinking fund payment in an amount not exceeding such mandatory sinking fund payment.

In order to enhance the marketability of the new Bonds, it may be desirable to cause an insurance company to issue a policy of insurance for the payment when due of the new Bonds of a particular series. It also may be desirable that the terms of the new Bonds, or any series thereof, provide for an adjustable interest rate thereon to be determined on a periodic basis, rather than a fixed interest rate. In such event, it is proposed that the rate of interest on such new Bonds for an initial period would be a fixed rate per annum. Periodically thereafter, the interest rate

would be adjusted by periodic auction or remarketing procedures, or in accordance with a formula or formulae based upon certain reference rates, or by other predetermined methods.

In connection with any such adjustable rate issue, it is proposed that such series of the new Bonds may not be redeemable at the option of Gulf during certain short-term interest periods. It is further proposed that the non-refunding limitation described above, as well as the restriction on redemptions through operation of the improvement fund provisions, may apply with respect to each long-term interest period commencing with the first day of the month in which any such interest period begins.

1.5 It is proposed that each issuance of Gulf's preferred stock, par or stated value of up to $100 per share (the "new Preferred Stock"), will be sold for the best price obtainable (after giving effect to the purchasers' compensation) but for a price to Gulf (before giving effect to such purchasers' compensation) of not less than 100% of the par or stated value per share.

The authorized number of shares of preferred stock of Gulf may be increased by amendment to the Articles of Incorporation of Gulf and the new Preferred Stock of each series will be created, and its terms established, by resolution of the board of directors of Gulf which when filed with the Secretary of State of Maine will constitute an amendment to the charter of Gulf. Gulf may make provision for a cumulative sinking fund for the benefit of a particular series of the new Preferred Stock which would retire a certain number of shares of such series annually, commencing at a specified date after the sale. In connection therewith, Gulf may have the non-cumulative option of redeeming up to an additional like number of shares of such series annually.

Gulf may provide that no share of a particular series of the new Preferred Stock will be redeemed for a five-year or other period commencing on or about the first day of the month of

issuance, if such redemption is for the purpose or in anticipation of refunding such share directly or indirectly through the incurring of debt, or through the issuance of stock ranking equally with or prior to the new Preferred Stock as to dividends or assets, if such debt has an effective interest cost to Gulf (computed in accordance with generally accepted financial practice) or such stock has an effective dividend cost to Gulf (so computed) of less than the effective dividend cost to Gulf of the respective series of the new Preferred Stock.

Gulf may determine that, in light of the current market conditions at the time any series of the new Preferred Stock is offered, it is in the best interest of Gulf and its investors and consumers that the terms of such new Preferred Stock provide for an adjustable dividend rate thereon to be determined on a periodic basis, rather than a fixed rate dividend. In such event, it is proposed that the rate of dividends on such new Preferred Stock for an initial period would be a fixed amount or rate per annum. Periodically thereafter, the rate would be adjusted by periodic auction or remarketing procedures, or in accordance with a formula or formulae based upon certain reference rates, or by other predetermined methods.

1.6 Gulf may determine to use the proceeds from the sale of the Revenue Bonds, the Senior Notes, the new Bonds and the new Preferred Stock to redeem or otherwise retire its outstanding senior notes, first mortgage bonds, pollution control bonds and/or preferred stock if such use is considered advisable. To the extent that the redemption or other retirement of outstanding preferred stock using the proceeds from security sales as proposed herein may require authorization under Section 12(c) of the Act, Gulf hereby requests such authorization. Gulf also proposes that it may use the proceeds from the sale of the Senior Notes, the new Bonds and new Preferred Stock, along with other funds, to pay a portion of its cash requirements to carry on its electric utility business.

1.7 Pursuant to orders of the Commission, Gulf has authority to issue and sell $350,000,000 of senior notes (of which, $345,000,000 has been sold), $400,000,000 of first mortgage bonds and/or preferred stock and $200,000,000 of pollution control revenue bonds (of which, $157,555,000 has been sold) as set forth in Commission File No. 70-9171 (HCAR No. 35-26870, dated May 14, 1998) and in Commission File No. 70-8949 (HCAR No. 35-26736, dated June 30, 1997). Gulf hereby requests that the authority described in the above-mentioned orders remain in effect until such time as the order with respect to the matters requested herein is issued.

1.8 Gulf represents that it will maintain its common equity as a percentage of capitalization (inclusive of short-term debt) at no less than thirty percent. Gulf further represents that no guarantees or other securities may be issued unless: (i) the security to be issued, if rated, is rated investment grade; (ii) all outstanding securities of Gulf that are rated are rated investment grade; and (iii) all outstanding securities of Southern that are rated are rated investment grade. For purposes of this condition, a security will be considered rated investment grade if it is rated investment grade by at least one "nationally recognized statistical rating organization", as that term is used in paragraphs (c)(2)(vi) (E), (F) and (H) of Rule 15c3-1 under the Securities Exchange Act of 1934, as amended. Gulf requests that it be permitted to issue a security that does not satisfy the foregoing condition if the requirements of Rule 52(a)(i) and Rule 52(a)(iii) are met and the issue and sale of the security have been expressly authorized by the Florida Public Service Commission.

1.9 The effective cost of money on the new Bonds and the new Preferred Stock will not exceed competitive market rates available at the time of issuance for securities having the

same or reasonably similar terms and conditions issued by similar companies of reasonably comparable credit quality; provided that in no event will such effective cost of money on the new Bonds exceed 300 basis points over comparable term U.S. Treasury securities. The credit ratings by Moody's Investors Services, Inc. ("Moody's") and Standard & Poor's, a division of The McGraw Hill Companies ("S&P"), on Gulf's outstanding securities which are rated are as follows:

| Type of Security | Moody's Rating | S&P Rating |
|---|---|---|
| First Mortgage Bonds | A+ | A1 |
| Preferred Stock | BBB+ | Baa1 |
| Senior Notes | A | A2 |
| Trust Preferred Securities | BBB+ | A3 |

1.10 As of March 31, 2003, Gulf's capital structure, excluding amounts due within one year, consisted of 47.5% ($556,870,000) common stock equity, 0.4% ($4,236,000) cumulative preferred stock, 9.8% ($115,000,000) company obligated mandatorily redeemable preferred securities of subsidiary trusts holding company junior subordinated notes, 24.0% ($281,725,000) senior notes and 18.3% ($214,390,000) other long-term debt.

As of March 31, 2003, Gulf's capital structure, including amounts due within one year, consisted of 43.5% ($556,870,000) common stock equity, 0.3% ($4,236,000) cumulative preferred stock, 9.0% ($115,000,000) company obligated mandatorily redeemable preferred securities of subsidiary trusts holding company junior subordinated notes, 26.7% ($341,725,000) senior notes and 20.5% ($262,381,000) other debt.

Item 2. Fees, Commissions and Expenses.

The fees and expenses in connection with the proposed transactions (other than underwriting discounts and commissions) are estimated not to exceed $2,000,000. The prospectus supplement or offering circular relating to each offering will reflect the actual expenses based upon the amount of the related offering.

Item 3. Applicable Statutory Provisions.

Sections 6(a), 7 and 12(c) of the Act and Rules 23, 42 and 54 thereunder are applicable to the proposed transactions.

Gulf further considers that the sale or granting of subordinated security interests in the Projects or other property of Gulf, as set forth under Item 1.3 above, may be subject to Section 12(d) of the Act, and that the exception afforded by subparagraph (b)(3) of Rule 44 thereunder may be applicable.

Gulf considers that any guarantee of payment of the Revenue Bonds may be subject to Sections 6(a) and 7 of the Act.

Gulf considers that Sections 9(a) and 10 of the Act may be applicable to any purchase of Revenue Bonds by Gulf as described herein and to the extent that the transactions contemplated herein in connection with the Revenue Bonds involve an Installment Sale Agreement or Agreements pursuant to which the County undertakes to sell the related Project to Gulf.

Gulf considers that the acquisition, retirement or redemption of Senior Notes, new Bonds and new Preferred Stock in connection with any sinking fund provisions with respect

thereto (including any optional redemptions included as part of such sinking fund provisions) are excepted from the requirements of Section 12(c) of the Act by Rule 42 thereunder.

The proposed transactions will be carried out in accordance with the procedure specified in Rule 23 and pursuant to an order or orders of the Commission in respect thereto.

Rule 54 Analysis: The proposed transactions are also subject to Rule 54, which provides that, in determining whether to approve an application which does not relate to any "exempt wholesale generator" ("EWG") or "foreign utility company" ("FUCO"), the Commission shall not consider the effect of the capitalization or earnings of any such EWG or FUCO which is a subsidiary of a registered holding company if the requirements of Rule 53(a), (b) and (c) are satisfied.

Southern currently meets all of the conditions of Rule 53(a). At March 31, 2003, Southern's "aggregate investment," as defined in Rule 53(a)(1), in EWGs and FUCOs was approximately $275.9 million, or 5.71% of Southern's "consolidated retained earnings," also as defined in Rule 53(a)(1), as of March 31, 2003 ($4.835 billion).[1]

---

[1] As discussed in Southern's Application on Form U-1 (File No. 70-9727) relating to the spin-off of Mirant Corporation ("Mirant"), Southern and Mirant reorganized certain energy-related and FUCO activities and Mirant completed a tax-free distribution to Southern of these activities on March 5, 2001 (the "Mini-Spin"). On April 2, 2001, Southern completed the spin-off of its remaining ownership interest in Mirant to Southern's shareholders. Therefore, the four indirect subsidiaries (EPZ Lease, Inc., Dutch Gas Lease, Inc., GAMOG Lease, Inc. and NUON Lease, Inc.) obtained through the Mini-Spin are the only remaining FUCO investments held by Southern. Although Southern now owns all of the equity in these companies as a result of the Mini-Spin, Southern has no direct or indirect investment or any aggregate investment within the meaning of Rule 53 in these FUCOs, including any direct or indirect guarantees or credit positions related to any capital or financing leases. Southern has executed limited keep-well commitments whereby Southern would be required to make capital contributions to Southern Energy Finance Capital Corp. or to Southern Energy Finance Company, Inc. in the event of a shortfall in the scheduled debt service resulting from certain changes in the payments due from Southern under the Southern Company Income Tax Allocation Agreement. The maximum

In addition, Southern has complied and will continue to comply with the record-keeping requirements of Rule 53(a)(2), the limitation under Rule 53(a)(3) on the use of operating company personnel to render services to EWGs and FUCOs, and the requirements of Rule 53(a)(4) concerning the submission of copies of certain filings under the Act to retail rate regulatory commissions. Further, none of the circumstances described in Rule 53(b) has occurred.

Item 4. Regulatory Approval.

Gulf's obligations with respect to the Collateral Bonds, the borrowings under the Agreements, the issuance of the Notes in respect thereof and the issuance and sale of the Senior Notes, the new Bonds and the new Preferred Stock will have been expressly authorized by the Florida Public Service Commission, which has jurisdiction over the issuance of stocks, bonds and certain evidence of indebtedness by public utility companies operating in Florida.

The transactions by Gulf proposed herein are not subject to the jurisdiction of any other state commission or of any federal commission other than the Commission.

Item 5. Procedure.

Gulf requests that the Commission's order herein be issued as soon as the rules allow and that there be no 30-day waiting period between the issuance of the Commission's order and the date on which it is to become effective. Gulf hereby waives a recommended decision by a

---

potential capital contribution required under these commitments is the unamortized balance of the related loans, which totaled approximately $422 million as of March 31, 2003.

hearing officer or other responsible officer of the Commission and hereby consents that the Division of Investment Management may assist in the preparation of the Commission's decision and/or order in this matter unless such Division opposes the matters covered hereby.

Item 6. Exhibits and Financial Statements.

(a) Exhibits.

A-1(a) - Indenture dated as of September 1, 1941, between Gulf and JPMorgan Chase Bank (formerly The Chase Manhattan Bank), as Trustee, and indentures supplemental thereto through November 1, 1996. (Designated in Registration Nos. 2-4833 as Exhibit B-3, 2-62319 as Exhibit 2(a)-3, 2-63765 as Exhibit 2(a)-3, 2-66260 as Exhibit 2(a)-3, 33-2809 as Exhibit 4(a)-2, 33-43739 as Exhibit 4(a)-2, in Gulf's Form 10-K for the year ended December 31, 1991, File No. 0-2429, as Exhibit 4(b), in Form 8-K dated August 18, 1992, File No. 0-2429, as Exhibit 4(a)-3, in Registration No. 33-50165 as Exhibit 4(a)-2, in Form 8-K dated July 12, 1993, File No. 0-2429, as Exhibit 4, in Certificate of Notification, File No. 70-8229, as Exhibit A, in Certificate of Notification, File No. 70-8229, as Exhibits E and F, in Form 8-K dated January 17, 1996, File No. 0-2429, as Exhibit 4, in Certificate of Notification, File No. 70-8229, as Exhibit A, in Certificate of Notification, File No. 70-8229, as Exhibit A and in Form 8-K dated November 6, 1996, File No. 0-2429, as Exhibit 4.)

A-1(b) - Form of Supplemental Indenture with respect to the new Bonds, between Gulf and JPMorgan Chase Bank, as Trustee.

A-2(a) - Senior Note Indenture dated as of January 1, 1998, between Gulf and JPMorgan Chase Bank (formerly The Chase Manhattan Bank), as Trustee, and indentures supplemental thereto through March 26, 2003. (Designated in Form 8-K dated June 17, 1998, File No. 0-2429, as Exhibits 4.1 and 4.2, in Form 8-K dated August 17, 1999, File No. 0-2429, as Exhibit 4.2, in Form 8-K dated July 31, 2001, File No. 0-2429, as Exhibit 4.2, in Form 8-K dated October 5, 2001, File No. 0-2429, as Exhibit 4.2, in Form 8-K dated January 18, 2002, File No. 0-2429, as Exhibit 4.2 and in Form 8-K dated March 21, 2003, File No. 0-2429, as Exhibit 4.2.)

A-2(b) - Form of Supplemental Indenture to Senior Note Indenture between Gulf and JPMorgan Chase Bank.

A-3(a) - Restated Articles of Incorporation of Gulf and amendments thereto through February 9, 2001. (Designated in Registration No. 33-43739 as Exhibit 4(b)-1, in Form 8-K dated January 15, 1992, File No. 0-2429, as Exhibit 1(b), in Form 8-K dated August 18, 1992, File No. 0-2429, as Exhibit 4(b)-2, in Form 8-K dated September 22, 1993, File No. 0-2429, as Exhibit 4, in Form 8-K dated November 3, 1993, File No. 0-2429, as Exhibit 4, in Gulf's Form 10-K for the year ended December 31, 1997, File No. 0-2429, as Exhibit 3(d)2 and in Gulf's Form 10-K for the year ended December 31, 2000, File No. 0-2429, as Exhibit 3(d)2.)

A-3(b) - Form proposed amendment to articles of incorporation of Gulf increasing the amount of authorized preferred stock.

A-3(c) - By-laws of Gulf as amended effective July 26, 2002, and as presently in effect. (Designated in Gulf's Form 10-K for the year ended December 31, 2002, File No. 0-2429, as Exhibit 3(d)2.)

B-1 - Form of Loan or Installment Sale Agreement between Gulf and the County relating to the Revenue Bonds.

B-2 - Form of Trust Indenture between the County and the Trustee relating to the Revenue Bonds.

C - Registration statement pursuant to the Securities Act of 1933, as amended. (Filed electronically April 11, 2003 File No. 333-104449.)

D - None.

E - None.

F - Opinion of Beggs & Lane, counsel for Gulf.

G - Form of Notice. (Previously Filed.)

Exhibits heretofore filed with the Securities and Exchange Commission and designated as set forth above are hereby incorporated herein by reference and made a part hereof with the same effect as if filed herewith.

(b) Financial Statements.

Balance sheet of Gulf at March 31, 2003. (Designated in Gulf's Form 10-Q for the quarter ended March 31, 2003, File No. 0-2429.)

Statements of Income of Gulf for the period ended March 31, 2003. (Designated in Gulf's Form 10-Q for the quarter ended March 31, 2003, File No. 0-2429.)

Since March 31, 2003, there have been no material adverse changes, not in the ordinary course of business, in the financial condition of Gulf from that set forth in or contemplated by the foregoing financial statements.

Item 7. Information as to Environmental Effects.

(a) The proposed transactions are strictly financial in nature in the ordinary course of Gulf's business. Accordingly, the Commission's action in these matters will not constitute any major federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act.

(b) No other federal agency has prepared or is preparing an environmental impact statement with regard to the proposed transactions.

SIGNATURE

Pursuant to the requirements of the Public Utility Holding Company Act of 1935, the undersigned company has duly caused this amendment to be signed on its behalf by the undersigned thereunto duly authorized.

## CALCULATION OF REGISTRATION FEE

| Title of Each Class of Securities to be Registered | Amount to be Registered(1) | Proposed Maximum Offering Price Per Unit(1)(2)(3) | Proposed Maximum Aggregate Offering Price(1)(2)(3) | Amount of Registration Fee(1) |
|---|---|---|---|---|
| Gulf Power Capital Trust V Preferred Securities | | | | |
| Gulf Power Capital Trust VI Preferred Securities | | | | |
| Gulf Power Company Senior Notes | | | | |
| Gulf Power Company Junior Subordinated Notes | | | | |
| Gulf Power Company Guarantees with respect to Preferred Securities of Gulf Power Capital Trust V and Gulf Power Capital Trust VI(4)(5) | | | | |
| Total | $325,000,000 | 100% | $325,000,000 | $26,325 |

(1) There are being registered hereunder such presently indeterminate number of Preferred Securities of Gulf Power Capital Trust V and Gulf Power Capital Trust VI and such presently indeterminate principal amount of Senior Notes and Junior Subordinated Notes of Gulf Power Company with an aggregate initial offering price not to exceed $325,000,000. Junior Subordinated Notes also may be issued to Gulf Power Capital Trust V or Gulf Power Capital Trust VI and later distributed upon dissolution and distribution of the assets thereof, which would include such Junior Subordinated Notes for which no separate consideration will be received. Pursuant to Rule 457(o) under the Securities Act of 1933, which permits the registration fee to be calculated on the basis of the maximum offering price of all the securities listed, the table does not specify by each class information as to the amount to be registered, proposed maximum offering price per unit or proposed maximum aggregate offering price.

(2) Estimated solely for the purpose of determining the registration fee.

(3) Exclusive of accrued interest and distributions, if any

(4) No separate consideration will be received for the Gulf Power Company Guarantees. Pursuant to Rule 457(n) no separate fee is payable in respect of the Gulf Power Company Guarantees

(5) Includes the obligations of Gulf Power Company under the respective Trust Agreements, the Subordinated Note Indenture, the related series of Junior Subordinated Notes, the respective Guarantees and the respective Agreements as to Expenses and Liabilities, which include the Company's covenant to pay any indebtedness, expenses or liabilities of the Trusts (other than obligations pursuant to the terms of the Preferred Securities or other similar interests), all as described in this registration statement.

**The registrants hereby amend this registration statement on such date or dates as may be necessary to delay its effective date until the registrants shall file a further amendment which specifically states that this registration statement shall thereafter become effective in accordance with Section 8(a) of the Securities Act of 1933 or until this registration statement shall become effective on such date as the Commission, acting pursuant to said Section 8(a), may determine.**

**The within Prospectus contains the information required by Rule 429 of the Commission under the Securities Act of 1933 with respect to the $35,000,000 of securities remaining unsold under Registration Statement No. 333-59942.**

The information in this prospectus is not complete and may be changed. We may not sell these securities until the registration statement filed with the Securities and Exchange Commission is effective. This prospectus is not an offer to sell these securities and it is not soliciting an offer to buy these securities in any state where the offer or sale is not permitted.

SUBJECT TO COMPLETION DATED APRIL 11, 2003

## ABOUT THIS PROSPECTUS

This Prospectus is part of a registration statement filed with the Securities and Exchange Commission (the "Commission") using a "shelf" registration process under the Securities Act of 1933, as amended (the "1933 Act"). Under the shelf process, Gulf Power Company (the "Company") may sell, in one or more transactions,

- senior notes (the "Senior Notes")
- junior subordinated notes (the "Junior Subordinated Notes")

and Gulf Power Capital Trust V and Gulf Power Capital Trust VI (individually, a "Trust" and collectively, the "Trusts") may sell

- trust preferred securities or capital securities (the "Preferred Securities")

in one or more offerings up to a total dollar amount of $360,000,000. This Prospectus provides a general description of those securities. Each time the Company sells securities, the Company will provide a prospectus supplement that will contain specific information about the terms of that offering ("Prospectus Supplement"). The Prospectus Supplement may also add, update or change information contained in this Prospectus. You should read this Prospectus and the applicable Prospectus Supplement together with additional information under the heading "Available Information."

## RISK FACTORS

Investing in the Company's securities involves risk. Please see the risk factors described in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2002, which is incorporated by reference in this Prospectus. Before making an investment decision, you should carefully consider these risks as well as other information contained or incorporated by reference in this Prospectus. The risks and uncertainties described are not the only ones facing the Company. Additional risks and uncertainties not presently known to the Company or that the Company currently deems immaterial may also impair its business operations, its financial results and the value of its securities.

## AVAILABLE INFORMATION

The Company and the Trusts have filed with the Commission a combined registration statement on Form S-3 (the "Registration Statement," which term encompasses any amendments of the Registration Statement and exhibits to the Registration Statement) under the 1933 Act. As permitted by the rules and regulations of the Commission, this Prospectus does not contain all of the information set forth in the Registration Statement and the exhibits and schedules thereto, to which reference is made.

The Company is subject to the informational requirements of the Securities Exchange Act of 1934, as amended (the "1934 Act"), and in accordance with the 1934 Act files reports and other information with the Commission. Such reports and other information can be inspected and copied at the public reference facilities of the Commission at 450 Fifth Street, N.W., Washington, D.C. 20549. Information on the operation of the Public Reference Room may be obtained by calling the Commission at 1-800-SEC-0330. The Commission maintains a Web site that contains reports, proxy and information statements and other information regarding registrants including the Company that file electronically at http://www.sec.gov. In addition, reports and other material concerning the Company can be inspected at the offices of the New York Stock Exchange, 20 Broad Street, New York, New York 10005.

No separate financial statements of any Trust are included in this Prospectus. The Company considers that such statements would not be material to holders of the Preferred Securities because each Trust has no

independent operations and exists for the sole purpose of investing the proceeds of the sale of its Trust Securities (as defined below) in Junior Subordinated Notes.

## INCORPORATION OF CERTAIN DOCUMENTS BY REFERENCE

The following documents have been filed with the Commission pursuant to the 1934 Act and are incorporated by reference in this Prospectus and made a part of this Prospectus:

(a) the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2002; and

(b) the Company's Current Report on Form 8-K dated March 21, 2003.

All documents filed by the Company with the Commission pursuant to Section 13(a), 13(c), 14 or 15(d) of the 1934 Act subsequent to the date of this Prospectus and prior to the termination of this offering shall be deemed to be incorporated by reference in this Prospectus and made a part of this Prospectus from the date of filing of such documents. Any statement contained in a document incorporated or deemed to be incorporated by reference in this Prospectus shall be deemed to be modified or superseded for purposes of this Prospectus to the extent that a statement contained in this Prospectus or in any other subsequently filed document which also is or is deemed to be incorporated by reference in this Prospectus modifies or supersedes such statement. Any statement so modified or superseded shall not be deemed, except as so modified or superseded, to constitute a part of this Prospectus.

**The Company will provide without charge to each person to whom this Prospectus is delivered, on the written or oral request of any such person, a copy of any or all documents incorporated herein by reference in this Prospectus (other than the exhibits to such documents unless such exhibits are specifically incorporated by reference in this Prospectus). Such requests should be directed to Warren E. Tate, Vice President, Secretary and Treasurer, Gulf Power Company, One Energy Place, Pensacola, Florida 32520, telephone: (850) 444-6111.**

## GULF POWER COMPANY

The Company is a corporation organized under the laws of the State of Maine on November 2, 1925, and was admitted to do business in Florida on January 15, 1926, in Mississippi on October 25, 1976 and in Georgia on November 20, 1984. The principal executive offices of the Company are located at 500 Bayfront Parkway, Pensacola, Florida 32501, and the telephone number is (850) 444-6111.

The Company is a wholly owned subsidiary of The Southern Company ("Southern"), a holding company registered under the Public Utility Holding Company Act of 1935, as amended. The Company is engaged, within the northwestern portion of the State of Florida, in the generation and purchase of electricity and the distribution and sale of such electricity at retail in 71 communities as well as in rural areas, and at wholesale to a nonaffiliated utility and to a municipality.

## SELECTED INFORMATION

*The following material, which is presented in this Prospectus solely to furnish limited introductory information regarding the Company, has been selected from, or is based upon, the detailed information and financial statements appearing in the documents incorporated in this Prospectus by reference or elsewhere in this Prospectus, is qualified in its entirety by reference to those documents and, therefore, should be read together with those documents.*

### Gulf Power Company

| | |
|---|---|
| Business | Generation, transmission, distribution and sale of electric energy |
| Service Area | Approximately 7,400 square miles within the northwestern portion of the State of Florida |
| Customers at December 31, 2002 | 383,923 |
| Generating Capacity at December 31, 2002 (kilowatts) | 2,808,550 |
| Sources of Generation during 2002 (kilowatt-hours) | Coal (82%), Gas (18%) |

### Certain Ratios

The following table sets forth the Ratios of Earnings to Fixed Charges and Earnings to Fixed Charges Plus Preferred Dividend Requirements (Pre-Income Tax Basis) for the periods indicated.

| | Year Ended December 31, | | | | |
|---|---|---|---|---|---|
| | 1998 | 1999 | 2000 | 2001 | 2002 |
| Ratio of Earnings to Fixed Charges(1) | 3.83 | 3.62 | 3.38 | 3.64 | 3.52 |
| Ratio of Earnings to Fixed Charges Plus Preferred Dividend Requirements (Pre-Income Tax Basis)(2) | 3.72 | 3.58 | 3.34 | 3.60 | 3.50 |

(1) This ratio is computed as follows: (i) "Earnings" have been calculated by adding to "Earnings Before Income Taxes" "Interest Expense, Net of Amounts Capitalized," "Distributions on Preferred Securities of Subsidiary" and the debt portion of allowance for funds used during construction, and (ii) "Fixed Charges" consist of "Interest Expense, Net of Amounts Capitalized," "Distributions on Preferred Securities of Subsidiary" and the debt portion of allowance for funds used during construction.

(2) In computing this ratio, "Preferred Dividend Requirements" represent the before tax earnings necessary to pay such dividends, computed at the effective tax rates for the applicable periods.

## THE TRUSTS

Each Trust is a statutory trust created under Delaware law pursuant to the filing of a certificate of trust with the Delaware Secretary of State on April 7, 2003. Each Trust's business is defined in a trust agreement, executed by the Company, as Depositor, and the Delaware Trustee of each Trust. This trust agreement of each Trust will be amended and restated in its entirety substantially in the form filed as an exhibit to the Registration Statement of which this Prospectus forms a part (the "Trust Agreement"). Each Trust Agreement will be qualified as an indenture under the Trust Indenture Act of 1939, as amended (the "1939 Act"). The Company will own all of the common securities (the "Common Securities" and, together with the Preferred Securities, the "Trust Securities") of each Trust. The Trust Securities represent undivided beneficial interests in the assets of the respective Trusts. Each Trust exists for the exclusive purposes of (i) issuing its Trust Securities representing undivided beneficial interests in the assets of such Trust, (ii) investing the gross proceeds of its Trust Securities in a related series of Junior Subordinated Notes, and (iii) engaging in only those other activities necessary, appropriate, convenient or incidental to these purposes. The payment of periodic cash distributions on the Preferred Securities of each Trust and payments on liquidation and redemption with respect to the Preferred Securities of each Trust, in each case to the extent each Trust has funds legally and immediately available for these purposes, will be guaranteed by the Company (individually, a "Guarantee" and collectively, the "Guarantees") to the extent set forth under "Description of the Guarantees."

Each Trust's business and affairs will be conducted by its trustees, which shall be appointed by the Company as the holder of the Common Securities: two officers of the Company as Administrative Trustees; JPMorgan Chase Bank as Property Trustee; and Chase Manhattan Bank USA, National Association as Delaware Trustee (collectively, the "Securities Trustees"). The Property Trustee of each Trust will act as the indenture trustee with respect to such Trust for purposes of compliance with the provisions of the 1939 Act.

The principal place of business of each Trust shall be c/o the Company, 500 Bayfront Parkway, Pensacola, Florida 32501, telephone (850) 444-6111, Attn: Treasurer.

Reference is made to the Prospectus Supplement relating to the Preferred Securities of a Trust for further information concerning such Trust.

## ACCOUNTING TREATMENT OF TRUSTS

For financial reporting purposes, the Trusts will be treated as subsidiaries of the Company and, accordingly, the accounts of the Trusts will be included in the consolidated financial statements of the Company. The Preferred Securities will be presented as a separate line item in the consolidated balance sheet of the Company, and appropriate disclosures concerning the Preferred Securities, the Guarantees and the Junior Subordinated Notes will be included in the notes to the consolidated financial statements. For financial reporting purposes, the Company will record distributions payable on the Preferred Securities as an expense.

## USE OF PROCEEDS

Each Trust will invest the proceeds received from the sale of its Preferred Securities in Junior Subordinated Notes. Except as may be otherwise described in an applicable Prospectus Supplement, the net proceeds received by the Company from such investment and any proceeds received from the sale of its Senior Notes or other sales of its Junior Subordinated Notes will be used in connection with its ongoing construction program, to pay scheduled maturities and/or refundings of its securities, to repay short-term indebtedness to the extent outstanding and for other general corporate purposes.

## DESCRIPTION OF THE SENIOR NOTES

Set forth below is a description of the general terms of the Senior Notes. The following description does not purport to be complete and is subject to, and is qualified in its entirety by reference to, the Senior Note Indenture, dated as of January 1, 1998, between the Company and JPMorgan Chase Bank (formerly known as The Chase Manhattan Bank), as trustee (the "Senior Note Indenture Trustee"), as to be supplemented by a supplemental indenture to the Senior Note Indenture establishing the Senior Notes of each series (the Senior Note Indenture, as so supplemented, is referred to as the "Senior Note Indenture"), the forms of which are filed as exhibits to the Registration Statement of which this Prospectus forms a part. The terms of the Senior Notes will include those stated in the Senior Note Indenture and those made a part of the Senior Note Indenture by reference to the 1939 Act. Certain capitalized terms used in this Prospectus and not defined in this Prospectus are defined in the Senior Note Indenture.

### General

The Senior Notes will be issued as unsecured senior debt securities under the Senior Note Indenture and will rank equally with all other unsecured and unsubordinated debt of the Company. The Senior Notes will be effectively subordinated to all secured debt of the Company, including its first mortgage bonds, aggregating approximately $170,000,000 outstanding at December 31, 2002. The Senior Note Indenture does not limit the aggregate principal amount of Senior Notes that may be issued under the Senior Note Indenture and provides that Senior Notes may be issued from time to time in one or more series pursuant to an indenture supplemental to the Senior Note Indenture. The Senior Note Indenture gives the Company the ability to reopen a previous issue of Senior Notes and issue additional Senior Notes of such series, unless otherwise provided.

Reference is made to the Prospectus Supplement that will accompany this Prospectus for the following terms of the series of Senior Notes being offered by such Prospectus Supplement: (i) the title of such Senior Notes; (ii) any limit on the aggregate principal amount of such Senior Notes; (iii) the date or dates on which the principal of such Senior Notes is payable; (iv) the rate or rates at which such Senior Notes shall bear interest, if any, or any method by which such rate or rates will be determined, the date or dates from which such interest will accrue, the interest payment dates on which such interest shall be payable, and the regular record date for the interest payable on any interest payment date; (v) the place or places where the principal of (and premium, if any) and interest, if any, on such Senior Notes shall be payable; (vi) the period or periods within which, the price or prices at which and the terms and conditions on which such Senior Notes may be redeemed, in whole or in part, at the option of the Company or at the option of the holder prior to their maturity; (vii) the obligation, if any, of the Company to redeem or purchase such Senior Notes; (viii) the denominations in which such Senior Notes shall be issuable; (ix) if other than the principal amount of the Senior Notes, the portion of the principal amount of such Senior Notes which shall be payable upon declaration of acceleration of the maturity of such Senior Notes; (x) any deletions from, modifications of or additions to the Events of Default or covenants of the Company as provided in the Senior Note Indenture pertaining to such Senior Notes; (xi) whether such Senior Notes shall be issued in whole or in part in the form of a Global Security; and (xii) any other terms of such Senior Notes.

The Senior Note Indenture does not contain provisions that afford holders of Senior Notes protection in the event of a highly leveraged transaction involving the Company.

### Events of Default

The Senior Note Indenture provides that any one or more of the following described events with respect to the Senior Notes of any series, which has occurred and is continuing, constitutes an "Event of Default" with respect to the Senior Notes of such series:

(a) failure for 10 days to pay interest on the Senior Notes of such series, when due on an interest payment date other than at maturity or upon earlier redemption; or

(b) failure to pay principal or premium, if any, or interest on the Senior Notes of such series when due at maturity or upon earlier redemption; or

(c) failure for three Business Days to deposit any sinking fund payment when due by the terms of a Senior Note of such series; or

(d) failure to observe or perform any other covenant or warranty of the Company in the Senior Note Indenture (other than a covenant or warranty which has expressly been included in the Senior Note Indenture solely for the benefit of one or more series of Senior Notes other than such series) for 90 days after written notice to the Company from the Senior Note Indenture Trustee or the holders of at least 25% in principal amount of the outstanding Senior Notes of such series; or

(e) certain events of bankruptcy, insolvency or reorganization of the Company.

The holders of not less than a majority in aggregate outstanding principal amount of the Senior Notes of any series have the right to direct the time, method and place of conducting any proceeding for any remedy available to the Senior Note Indenture Trustee with respect to the Senior Notes of such series. If a Senior Note Indenture Event of Default occurs and is continuing with respect to the Senior Notes of any series, then the Senior Note Indenture Trustee or the holders of not less than 25% in aggregate outstanding principal amount of the Senior Notes of such series may declare the principal amount of the Senior Notes due and payable immediately by notice in writing to the Company (and to the Senior Note Indenture Trustee if given by the holders), and upon any such declaration such principal amount shall become immediately due and payable. At any time after such a declaration of acceleration with respect to the Senior Notes of any series has been made and before a judgment or decree for payment of the money due has been obtained as provided in Article Five of the Senior Note Indenture, the holders of not less than a majority in aggregate outstanding principal amount of the Senior Notes of such series may rescind and annul such declaration and its consequences if the default has been cured or waived and the Company has paid or deposited with the Senior Note Indenture Trustee a sum sufficient to pay all matured installments of interest and principal due otherwise than by acceleration and all sums paid or advanced by the Senior Note Indenture Trustee, including reasonable compensation and expenses of the Senior Note Indenture Trustee.

The holders of not less than a majority in aggregate outstanding principal amount of the Senior Notes of any series may, on behalf of the holders of all the Senior Notes of such series, waive any past default with respect to such series, except (i) a default in the payment of principal or interest or (ii) a default in respect of a covenant or provision which under Article Nine of the Senior Note Indenture cannot be modified or amended without the consent of the holder of each outstanding Senior Note of such series affected.

**Registration and Transfer**

The Company shall not be required to (i) issue, register the transfer of or exchange Senior Notes of any series during a period of 15 days immediately preceding the date notice is given identifying the Senior Notes of such series called for redemption, or (ii) register the transfer of or exchange any Senior Notes so selected for redemption, in whole or in part, except the unredeemed portion of any Senior Note being redeemed in part.

**Payment and Paying Agent**

Unless otherwise indicated in an applicable Prospectus Supplement, payment of principal of any Senior Notes will be made only against surrender to the Paying Agent of such Senior Notes. Principal of and interest on Senior Notes will be payable subject to any applicable laws and regulations, at the office of such Paying Agent or Paying Agents as the Company may designate from time to time, except that, at the option of the Company, payment of any interest may be made by wire transfer or by check mailed to the address of the person entitled to an interest payment as such address shall appear in the Security Register with respect to the Senior Notes.

Payment of interest on Senior Notes on any interest payment date will be made to the person in whose name the Senior Notes (or predecessor security) are registered at the close of business on the record date for such interest payment.

Unless otherwise indicated in an applicable Prospectus Supplement, the Senior Note Indenture Trustee will act as Paying Agent with respect to the Senior Notes. The Company may at any time designate additional Paying Agents or rescind the designation of any Paying Agents or approve a change in the office through which any Paying Agent acts.

All moneys paid by the Company to a Paying Agent for the payment of the principal of or interest on the Senior Notes of any series which remain unclaimed at the end of two years after such principal or interest shall have become due and payable will be repaid to the Company, and the holder of such Senior Notes will from that time forward look only to the Company for payment of such principal and interest.

**Modification**

The Senior Note Indenture contains provisions permitting the Company and the Senior Note Indenture Trustee, with the consent of the holders of not less than a majority in principal amount of the outstanding Senior Notes of each series that is affected, to modify the Senior Note Indenture or the rights of the holders of the Senior Notes of such series; provided, that no such modification may, without the consent of the holder of each outstanding Senior Note that is affected, (i) change the stated maturity of the principal of, or any installment of principal of or interest on, any Senior Note, or reduce the principal amount of any Senior Note or the rate of interest on any Senior Note or any premium payable upon the redemption thereof, or change the method of calculating the rate of interest on any Senior Note, or impair the right to institute suit for the enforcement of any such payment on or after the stated maturity of any Senior Note (or, in the case of redemption, on or after the redemption date), or (ii) reduce the percentage of principal amount of the outstanding Senior Notes of any series, the consent of whose holders is required for any such supplemental indenture, or the consent of whose holders is required for any waiver (of compliance with certain provisions of the Senior Note Indenture or certain defaults under the Senior Note Indenture and their consequences) provided for in the Senior Note Indenture, or (iii) modify any of the provisions of the Senior Note Indenture relating to supplemental indentures, waiver of past defaults, or waiver of certain covenants, except to increase any such percentage or to provide that certain other provisions of the Senior Note Indenture cannot be modified or waived without the consent of the holder of each outstanding Senior Note that is affected.

In addition, the Company and the Senior Note Indenture Trustee may execute, without the consent of any holders of Senior Notes, any supplemental indenture for certain other usual purposes, including the creation of any new series of Senior Notes.

**Consolidation, Merger and Sale**

The Company shall not consolidate with or merge into any other corporation or convey, transfer or lease its properties and assets substantially as an entirety to any person, unless (1) such other corporation or person is a corporation organized and existing under the laws of the United States, any state in the United States or the District of Columbia and such other corporation or person expressly assumes, by supplemental indenture executed and delivered to the Senior Note Indenture Trustee, the payment of the principal of (and premium, if any) and interest on all the Senior Notes and the performance of every covenant of the Senior Note Indenture on the part of the Company to be performed or observed; (2) immediately after giving effect to such transactions, no Event of Default, and no event which, after notice or lapse of time or both, would become an Event of Default, shall have happened and be continuing; and (3) the Company has delivered to the Senior Note Indenture Trustee an officers' certificate and an opinion of counsel, each stating that such transaction complies with the provisions of the Senior Note Indenture governing consolidation, merger, conveyance, transfer or lease and that all conditions precedent to the transaction have been complied with.

**Information Concerning the Senior Note Indenture Trustee**

The Senior Note Indenture Trustee, prior to an Event of Default with respect to Senior Notes of any series, undertakes to perform, with respect to Senior Notes of such series, only such duties as are specifically set forth in the Senior Note Indenture and, in case an Event of Default with respect to Senior Notes of any series has occurred and is continuing, shall exercise, with respect to Senior Notes of such series, the same degree of care as a prudent individual would exercise in the conduct of his or her own affairs. Subject to such provision, the Senior Note Indenture Trustee is under no obligation to exercise any of the powers vested in it by the Senior Note Indenture at the request of any holder of Senior Notes of any series, unless offered reasonable indemnity by such holder against the costs, expenses and liabilities which might be incurred by the Senior Note Indenture Trustee. The Senior Note Indenture Trustee is not required to expend or risk its own funds or otherwise incur any financial liability in the performance of its duties if the Senior Note Indenture Trustee reasonably believes that repayment or adequate indemnity is not reasonably assured to it.

JPMorgan Chase Bank, the Senior Note Indenture Trustee, also serves as Subordinated Note Indenture Trustee, as Property Trustee and as Guarantee Trustee. The Company and certain of its affiliates maintain deposit accounts and banking relationships with JPMorgan Chase Bank. JPMorgan Chase Bank also serves as trustee under other indentures pursuant to which securities of the Company and affiliates of the Company are outstanding.

**Governing Law**

The Senior Note Indenture and the Senior Notes will be governed by, and construed in accordance with, the internal laws of the State of New York.

**Miscellaneous**

The Company will have the right at all times to assign any of its rights or obligations under the Senior Note Indenture to a direct or indirect wholly-owned subsidiary of the Company; provided, that, in the event of any such assignment, the Company will remain primarily liable for all such obligations. Subject to the foregoing, the Senior Note Indenture will be binding upon and inure to the benefit of the parties of the Senior Note Indenture and their respective successors and assigns.

## DESCRIPTION OF THE JUNIOR SUBORDINATED NOTES

Set forth below is a description of the general terms of the Junior Subordinated Notes. The following description does not purport to be complete and is subject to, and is qualified in its entirety by reference to, the Subordinated Note Indenture, dated as of January 1, 1997, between the Company and JPMorgan Chase Bank (formerly known as The Chase Manhattan Bank), as trustee (the "Subordinated Note Indenture Trustee"), as to be supplemented by a supplemental indenture to the Subordinated Note Indenture establishing the Junior Subordinated Notes of each series (the Subordinated Note Indenture, as so supplemented, is referred to as the "Subordinated Note Indenture"), the forms of which are filed as exhibits to the Registration Statement of which this Prospectus forms a part. The terms of the Junior Subordinated Notes will include those stated in the Subordinated Note Indenture and those made a part of the Subordinated Note Indenture by reference to the 1939 Act. Certain capitalized terms used in this Prospectus and not defined in this Prospectus are defined in the Subordinated Note Indenture.

### General

The Junior Subordinated Notes will be issued as unsecured junior subordinated debt securities under the Subordinated Note Indenture. The Subordinated Note Indenture does not limit the aggregate principal amount of Junior Subordinated Notes that may be issued under the Subordinated Note Indenture and provides that Junior Subordinated Notes may be issued from time to time in one or more series pursuant to an indenture supplemental to the Subordinated Note Indenture. The Subordinated Note Indenture gives the Company the ability to reopen a previous issue of Junior Subordinated Notes and issue additional Junior Subordinated Notes of such series, unless otherwise provided.

Reference is made to the Prospectus Supplement that will accompany this Prospectus for the following terms of the series of Junior Subordinated Notes being offered by such Prospectus Supplement: (i) the title of such Junior Subordinated Notes; (ii) any limit on the aggregate principal amount of such Junior Subordinated Notes; (iii) the date or dates on which the principal of such Junior Subordinated Notes is payable; (iv) the rate or rates at which such Junior Subordinated Notes shall bear interest, if any, or any method by which such rate or rates will be determined, the date or dates from which such interest will accrue, the interest payment dates on which such interest shall be payable, and the regular record date for the interest payable on any interest payment date; (v) the place or places where the principal of (and premium, if any) and interest, if any, on such Junior Subordinated Notes shall be payable; (vi) the period or periods within which, the price or prices at which and the terms and conditions on which such Junior Subordinated Notes may be redeemed, in whole or in part, at the option of the Company or at the option of the holder prior to their maturity; (vii) the obligation, if any, of the Company to redeem or purchase such Junior Subordinated Notes; (viii) the denominations in which such Junior Subordinated Notes shall be issuable; (ix) if other than the principal amount of the Junior Subordinated Notes, the portion of the principal amount of such Junior Subordinated Notes which shall be payable upon declaration of acceleration of the maturity of such Junior Subordinated Notes; (x) any deletions from, modifications of or additions to the Events of Default or covenants of the Company as provided in the Subordinated Note Indenture pertaining to such Junior Subordinated Notes; (xi) whether such Junior Subordinated Notes shall be issued in whole or in part in the form of a Global Security; (xii) the right, if any, of the Company to extend the interest payment periods of such Junior Subordinated Notes; and (xiii) any other terms of such Junior Subordinated Notes. The terms of each series of Junior Subordinated Notes issued to a Trust will correspond to those of the related Preferred Securities of such Trust as described in the Prospectus Supplement relating to such Preferred Securities.

The Subordinated Note Indenture does not contain provisions that afford holders of Junior Subordinated Notes protection in the event of a highly leveraged transaction involving the Company.

### Subordination

The Junior Subordinated Notes are subordinated and junior in right of payment to all Senior Indebtedness (as defined below) of the Company. No payment of principal of (including redemption payments, if any), or premium,

if any, or interest on (including Additional Interest (as defined below)) the Junior Subordinated Notes may be made if (a) any Senior Indebtedness is not paid when due and any applicable grace period with respect to such default has ended with such default not being cured or waived or otherwise ceasing to exist, or (b) the maturity of any Senior Indebtedness has been accelerated because of a default, or (c) notice has been given of the exercise of an option to require repayment, mandatory payment or prepayment or otherwise. Upon any payment or distribution of assets of the Company to creditors upon any liquidation, dissolution, winding-up, reorganization, assignment for the benefit of creditors, marshalling of assets or liabilities, or any bankruptcy, insolvency or similar proceedings of the Company, the holders of Senior Indebtedness shall be entitled to receive payment in full of all amounts due or to become due on or in respect of all Senior Indebtedness before the holders of the Junior Subordinated Notes are entitled to receive or retain any payment or distribution. Subject to the prior payment of all Senior Indebtedness, the rights of the holders of the Junior Subordinated Notes will be subrogated to the rights of the holders of Senior Indebtedness to receive payments and distributions applicable to such Senior Indebtedness until all amounts owing on the Junior Subordinated Notes are paid in full.

The term "Senior Indebtedness" means, with respect to the Company, (i) any payment due in respect of indebtedness of the Company, whether outstanding at the date of execution of the Subordinated Note Indenture or incurred, created or assumed after the execution of the Subordinated Note Indenture, (a) in respect of money borrowed (including any financial derivative, hedging or futures contract or similar instrument) and (b) evidenced by securities, debentures, bonds, notes or other similar instruments issued by the Company that, by their terms, are senior or senior subordinated debt securities including, without limitation, all obligations under its indentures with various trustees; (ii) all capital lease obligations; (iii) all obligations issued or assumed as the deferred purchase price of property, all conditional sale obligations and all obligations of the Company under any title retention agreement (but excluding trade accounts payable arising in the ordinary course of business and long-term purchase obligations); (iv) all obligations for the reimbursement of any letter of credit, banker's acceptance, security purchase facility or similar credit transaction; (v) all obligations of the type referred to in clauses (i) through (iv) above of other persons the payment of which the Company is responsible or liable as obligor, guarantor or otherwise; and (vi) all obligations of the type referred to in clauses (i) through (v) above of other persons secured by any lien on any property or asset of the Company (whether or not such obligation is assumed by the Company), except for (1) any such indebtedness that is by its terms subordinated to or *pari passu* with the Junior Subordinated Notes and (2) any unsecured indebtedness between or among the Company or its affiliates. Such Senior Indebtedness shall continue to be Senior Indebtedness and be entitled to the benefits of the subordination provisions contained in the Subordinated Note Indenture irrespective of any amendment, modification or waiver of any term of such Senior Indebtedness.

The Subordinated Note Indenture does not limit the aggregate amount of Senior Indebtedness that may be issued by the Company. As of December 31, 2002, Senior Indebtedness of the Company aggregated approximately $550,000,000.

**Additional Interest**

"Additional Interest" is defined in the Subordinated Note Indenture as (i) such additional amounts as may be required so that the net amounts received and retained by a holder of Junior Subordinated Notes (if the holder is a Trust) after paying taxes, duties, assessments or governmental charges of whatever nature (other than withholding taxes) imposed by the United States or any other taxing authority will not be less than the amounts the holder would have received had no such taxes, duties, assessments or other governmental charges been imposed; and (ii) any interest due and not paid on an interest payment date, together with interest on such interest due from such interest payment date to the date of payment, compounded quarterly, on each interest payment date.

**Certain Covenants**

The Company covenants in the Subordinated Note Indenture, for the benefit of the holders of each series of Junior Subordinated Notes, that, (i) if at such time the Company shall have given notice of its election to extend an interest payment period for such series of Junior Subordinated Notes and such extension shall be continuing,

(ii) if at such time the Company shall be in default with respect to its payment or other obligations under the Guarantee with respect to the Trust Securities, if any, related to such series of Junior Subordinated Notes, or (iii) if at such time an Event of Default under the Subordinated Note Indenture with respect to such series of Junior Subordinated Notes shall have occurred and be continuing, (a) the Company shall not declare or pay any dividend or make any distributions with respect to, or redeem, purchase, acquire or make a liquidation payment with respect to, any of its capital stock, and (b) the Company shall not make any payment of interest, principal or premium, if any, on or repay, repurchase or redeem any debt securities (including guarantees other than the Guarantees) issued by the Company which rank equally with or junior to the Junior Subordinated Notes. None of the foregoing, however, shall restrict (i) any of the actions described in the preceding sentence resulting from any reclassifications of the Company's capital stock or the exchange or conversion of one class or series of the Company's capital stock for another class or series of the Company's capital stock, or (ii) the purchase of fractional interests in shares of the Company's capital stock pursuant to the conversion or exchange provisions of such capital stock or the security being converted or exchanged.

The Subordinated Note Indenture further provides that, for so long as the Trust Securities of any Trust remain outstanding, the Company covenants (i) to directly or indirectly maintain 100% ownership of the Common Securities of such Trust; provided, however, that any permitted successor of the Company under the Subordinated Note Indenture may succeed to the Company's ownership of such Common Securities, and (ii) to use its reasonable efforts to cause such Trust (a) to remain a statutory trust, except in connection with the distribution of Junior Subordinated Notes to the holders of Trust Securities in liquidation of such Trust, the redemption of all of the Trust Securities of such Trust, or certain mergers, consolidations or amalgamations, each as permitted by the related Trust Agreement, and (b) to otherwise continue to be classified as a grantor trust for United States federal income tax purposes.

**Events of Default**

The Subordinated Note Indenture provides that any one or more of the following described events with respect to the Junior Subordinated Notes of any series, which has occurred and is continuing, constitutes an "Event of Default" with respect to the Junior Subordinated Notes of such series:

(a) failure for 10 days to pay interest on the Junior Subordinated Notes of such series, including any Additional Interest (as defined in clause (ii) of the definition of Additional Interest in the Subordinated Note Indenture) in respect of the Junior Subordinated Notes, when due on an interest payment date other than at maturity or upon earlier redemption; provided, however, that a valid extension of the interest payment period by the Company shall not constitute a default in the payment of interest for this purpose; or

(b) failure for 10 days to pay Additional Interest (as defined in clause (i) of the definition of Additional Interest in the Subordinated Note Indenture); or

(c) failure to pay principal or premium, if any, or interest, including Additional Interest (as defined in clause (ii) of the definition of Additional Interest in the Subordinated Note Indenture), on the Junior Subordinated Notes of such series when due at maturity or upon earlier redemption; or

(d) failure for three Business Days to deposit any sinking fund payment when due by the terms of a Junior Subordinated Note of such series; or

(e) failure to observe or perform any other covenant or warranty of the Company in the Subordinated Note Indenture (other than a covenant or warranty which has expressly been included in the Subordinated Note Indenture solely for the benefit of one or more series of Junior Subordinated Notes other than such series) for 90 days after written notice to the Company from the Subordinated Note Indenture Trustee or the holders of at least 25% in principal amount of the outstanding Junior Subordinated Notes of such series; or

(f) certain events of bankruptcy, insolvency or reorganization of the Company.

The holders of not less than a majority in aggregate outstanding principal amount of the Junior Subordinated Notes of any series have the right to direct the time, method and place of conducting any proceeding for any remedy available to the Subordinated Note Indenture Trustee with respect to the Junior Subordinated Notes of such series. If a Subordinated Note Indenture Event of Default occurs and is continuing with respect to the Junior Subordinated Notes of any series, then the Subordinated Note Indenture Trustee or the holders of not less than

25% in aggregate outstanding principal amount of the Junior Subordinated Notes of such series may declare the principal amount of the Junior Subordinated Notes due and payable immediately by notice in writing to the Company (and to the Subordinated Note Indenture Trustee if given by the holders), and upon any such declaration such principal amount shall become immediately due and payable. At any time after such a declaration of acceleration with respect to the Junior Subordinated Notes of any series had been made and before a judgment or decree for payment of the money due has been obtained as provided in Article Five of the Subordinated Note Indenture, the holders of not less than a majority in aggregate outstanding principal amount of the Junior Subordinated Notes of such series may rescind and annul such declaration and its consequences if the default has been cured or waived and the Company has paid or deposited with the Subordinated Note Indenture Trustee a sum sufficient to pay all matured installments of interest (including any Additional Interest) and principal due otherwise than by acceleration and all sums paid or advanced by the Subordinated Note Indenture Trustee, including reasonable compensation and expenses of the Subordinated Note Indenture Trustee.

A holder of Preferred Securities may institute a legal proceeding directly against the Company, without first instituting a legal proceeding against the Property Trustee or any other person or entity, for enforcement of payment to such holder of principal of or interest on the Junior Subordinated Notes of the related series having a principal amount equal to the aggregate stated liquidation amount of the Preferred Securities of such holder on or after the due dates specified in the Junior Subordinated Notes of such series.

The holders of not less than a majority in aggregate outstanding principal amount of the Junior Subordinated Notes of any series may, on behalf of the holders of all the Junior Subordinated Notes of such series, waive any past default with respect to such series, except (i) a default in the payment of principal or interest or (ii) a default in respect of a covenant or provision which under Article Nine of the Subordinated Note Indenture cannot be modified or amended without the consent of the holder of each outstanding Junior Subordinated Note of such series affected.

**Registration and Transfer**

The Company shall not be required to (i) issue, register the transfer of or exchange Junior Subordinated Notes of any series during a period of 15 days immediately preceding the date notice is given identifying the Junior Subordinated Notes of such series called for redemption, or (ii) register the transfer of or exchange any Junior Subordinated Notes so selected for redemption, in whole or in part, except the unredeemed portion of any Junior Subordinated Note being redeemed in part.

**Payment and Paying Agent**

Unless otherwise indicated in an applicable Prospectus Supplement, payment of principal of any Junior Subordinated Notes will be made only against surrender to the Paying Agent of such Junior Subordinated Notes. Principal of and interest on Junior Subordinated Notes will be payable, subject to any applicable laws and regulations, at the office of such Paying Agent or Paying Agents as the Company may designate from time to time, except that, at the option of the Company, payment of any interest may be made by wire transfer or by check mailed to the address of the person entitled to an interest payment as such address shall appear in the Security Register with respect to the Junior Subordinated Notes. Payment of interest on Junior Subordinated Notes on any interest payment date will be made to the person in whose name the Junior Subordinated Notes (or predecessor security) are registered at the close of business on the record date for such interest payment.

Unless otherwise indicated in an applicable Prospectus Supplement, the Subordinated Note Indenture Trustee will act as Paying Agent with respect to the Junior Subordinated Notes. The Company may at any time designate additional Paying Agents or rescind the designation of any Paying Agents or approve a change in the office through which any Paying Agent acts.

All moneys paid by the Company to a Paying Agent for the payment of the principal of or interest on the Junior Subordinated Notes of any series which remain unclaimed at the end of two years after such principal or interest shall have become due and payable will be repaid to the Company, and the holder of such Junior Subordinated Notes will from that time forward look only to the Company for payment of such principal and interest.

**Modification**

The Subordinated Note Indenture contains provisions permitting the Company and the Subordinated Note Indenture Trustee, with the consent of the holders of not less than a majority in principal amount of the outstanding Junior Subordinated Notes of each series that is affected, to modify the Subordinated Note Indenture or the rights of the holders of the Junior Subordinated Notes of such series; provided, that no such modification may, without the consent of the holder of each outstanding Junior Subordinated Note that is affected, (i) change the stated maturity of the principal of, or any installment of principal of or interest on, any Junior Subordinated Note, or reduce the principal amount of any Junior Subordinated Note or the rate of interest (including Additional Interest) on any Junior Subordinated Note or any premium payable upon the redemption thereof, or change the method of calculating the rate of interest on any Junior Subordinated Note, or impair the right to institute suit for the enforcement of any such payment on or after the stated maturity of any Junior Subordinated Note (or, in the case of redemption, on or after the redemption date), or (ii) reduce the percentage of principal amount of the outstanding Junior Subordinated Notes of any series, the consent of whose holders is required for any such supplemental indenture, or the consent of whose holders is required for any waiver (of compliance with certain provisions of the Subordinated Note Indenture or certain defaults under the Subordinated Note Indenture and their consequences) provided for in the Subordinated Note Indenture, or (iii) modify any of the provisions of the Subordinated Note Indenture relating to supplemental indentures, waiver of past defaults, or waiver of certain covenants, except to increase any such percentage or to provide that certain other provisions of the Subordinated Note Indenture cannot be modified or waived without the consent of the holder of each outstanding Junior Subordinated Note that is affected, or (iv) modify the provisions of the Subordinated Note Indenture with respect to the subordination of the Junior Subordinated Notes in a manner adverse to such holder.

In addition, the Company and the Subordinated Note Indenture Trustee may execute, without the consent of any holders of Junior Subordinated Notes, any supplemental indenture for certain other usual purposes, including the creation of any new series of Junior Subordinated Notes.

**Consolidation, Merger and Sale**

The Company shall not consolidate with or merge into any other corporation or convey, transfer or lease its properties and assets substantially as an entirety to any person, unless (1) such other corporation or person is a corporation organized and existing under the laws of the United States, any state of the United States or the District of Columbia and such other corporation or person expressly assumes, by supplemental indenture executed and delivered to the Subordinated Note Indenture Trustee, the payment of the principal of (and premium, if any) and interest (including Additional Interest) on all the Junior Subordinated Notes and the performance of every covenant of the Subordinated Note Indenture on the part of the Company to be performed or observed; (2) immediately after giving effect to such transactions, no Event of Default, and no event which, after notice or lapse of time or both, would become an Event of Default, shall have happened and be continuing; and (3) the Company has delivered to the Subordinated Note Indenture Trustee an officers' certificate and an opinion of counsel, each stating that such transaction complies with the provisions of the Subordinated Note Indenture governing consolidation, merger, conveyance, transfer or lease and that all conditions precedent to the transaction have been complied with.

**Information Concerning the Subordinated Note Indenture Trustee**

The Subordinated Note Indenture Trustee, prior to an Event of Default with respect to Junior Subordinated Notes of any series, undertakes to perform, with respect to Junior Subordinated Notes of such series, only such duties as are specifically set forth in the Subordinated Note Indenture and, in case an Event of Default with respect to Junior Subordinated Notes of any series has occurred and is continuing, shall exercise, with respect to Junior Subordinated Notes of such series, the same degree of care as a prudent individual would exercise in the conduct of his or her own affairs. Subject to such provision, the Subordinated Note Indenture Trustee is under no obligation to exercise any of the powers vested in it by the Subordinated Note Indenture at the request of any

holder of Junior Subordinated Notes of any series, unless offered reasonable indemnity by such holder against the costs, expenses and liabilities which might be incurred by the Subordinated Note Indenture Trustee. The Subordinated Note Indenture Trustee is not required to expend or risk its own funds or otherwise incur any financial liability in the performance of its duties if the Subordinated Note Indenture Trustee reasonably believes that repayment or adequate indemnity is not reasonably assured to it.

JPMorgan Chase Bank, the Subordinated Note Indenture Trustee, also serves as Senior Note Indenture Trustee, as Property Trustee and as Guarantee Trustee. The Company and certain of its affiliates maintain deposit accounts and banking relationships with JPMorgan Chase Bank. JPMorgan Chase Bank also serves as trustee under other indentures pursuant to which securities of the Company and affiliates of the Company are outstanding.

### Governing Law

The Subordinated Note Indenture and the Junior Subordinated Notes will be governed by, and construed in accordance with, the internal laws of the State of New York.

### Miscellaneous

The Company will have the right at all times to assign any of its rights or obligations under the Subordinated Note Indenture to a direct or indirect wholly-owned subsidiary of the Company; provided, that, in the event of any such assignment, the Company will remain primarily liable for all such obligations. Subject to the foregoing, the Subordinated Note Indenture will be binding upon and inure to the benefit of the parties to the Subordinated Note Indenture and their respective successors and assigns.

## DESCRIPTION OF THE PREFERRED SECURITIES

Each Trust may issue only one series of Preferred Securities having terms described in the Prospectus Supplement relating to the Preferred Securities. The Trust Agreement of each Trust will authorize the Administrative Trustees, on behalf of the Trust, to issue the Preferred Securities of such Trust. The Preferred Securities of each Trust will have such terms, including distributions, redemption, voting, liquidation rights and such other preferred, deferral or other special rights or such restrictions as shall be set forth in the Trust Agreement of such Trust. Reference is made to the Prospectus Supplement relating to the Preferred Securities of a Trust for specific terms, including (i) the distinctive designation of such Preferred Securities; (ii) the number of Preferred Securities issued by such Trust; (iii) the annual distribution rate (or method of determining such rate) for Preferred Securities of such Trust and the date or dates on which such distributions shall be payable; (iv) whether distributions on such Preferred Securities shall be cumulative and, in the case of Preferred Securities having cumulative distribution rights, the date or dates, or method of determining the date or dates, from which distributions on such Preferred Securities shall be cumulative; (v) the amount or amounts that shall be paid out of the assets of such Trust to the holders of the Preferred Securities of such Trust upon voluntary or involuntary dissolution, winding-up or termination of such Trust; (vi) the obligation, if any, of such Trust to purchase or redeem such Preferred Securities and the price or prices at which, the period or periods within which, and the terms and conditions upon which such Preferred Securities shall be purchased or redeemed, in whole or in part, pursuant to such obligation; (vii) the voting rights, if any, of such Preferred Securities in addition to those required by law, including the number of votes per Preferred Security and any requirement for the approval by the holders of Preferred Securities as a condition to specified action or amendments to the Trust Agreement of such Trust; (viii) the rights, if any, to defer distributions on the Preferred Securities by extending the interest payment period on the related Junior Subordinated Notes; and (ix) any other relative rights, preferences, privileges, limitations or restrictions of such Preferred Securities not inconsistent with the Trust Agreement of such Trust or applicable law. All Preferred Securities offered by this Prospectus will be guaranteed by the Company to the extent set forth under "Description of the Guarantees." Any material United States federal income tax considerations applicable to an offering of Preferred Securities will be described in the Prospectus Supplement relating to the Preferred Securities.

## DESCRIPTION OF THE GUARANTEES

Set forth below is a summary of information concerning the Guarantees that will be executed and delivered by the Company for the benefit of the holders of Preferred Securities of the respective Trusts from time to time. Each Guarantee will be qualified as an indenture under the 1939 Act. JPMorgan Chase Bank will act as indenture trustee under each Guarantee (the "Guarantee Trustee") for purposes of the 1939 Act. The terms of the respective Guarantees will be those set forth in such Guarantee and those made part of such Guarantee by the 1939 Act. The following summary does not purport to be complete and is subject in all respects to the provisions of, and is qualified in its entirety by reference to, the Guarantees, the form of which is filed as an exhibit to the Registration Statement of which this Prospectus forms a part, and the 1939 Act. Each Guarantee will be held by the Guarantee Trustee for the benefit of holders of the Preferred Securities to which it relates.

### General

Pursuant to each Guarantee, the Company will irrevocably and unconditionally agree, to the extent set forth in such Guarantee, to pay in full, to the holders of the related Preferred Securities, the Guarantee Payments (as defined below), to the extent not paid by, or on behalf of, the related Trust, regardless of any defense, right of set-off or counterclaim that the Company may have or assert against any person. The following payments or distributions with respect to the Preferred Securities of any Trust to the extent not paid or made by, or on behalf of, such Trust will be subject to the Guarantee related to the Preferred Securities (without duplication): (i) any accrued and unpaid distributions required to be paid on the Preferred Securities of such Trust but if and only if and to the extent that such Trust has funds legally and immediately available for these distributions, (ii) the redemption price, including all accrued and unpaid distributions to the date of redemption (the "Redemption Price"), with respect to any Preferred Securities called for redemption by such Trust, but if and only to the extent such Trust has funds legally and immediately available to pay such Redemption Price, and (iii) upon a dissolution, winding-up or termination of such Trust (other than in connection with the distribution of Junior Subordinated Notes to the holders of Trust Securities of such Trust or the redemption of all of the Preferred Securities of such Trust), the lesser of (a) the aggregate of the liquidation amount and all accrued and unpaid distributions on the Preferred Securities of such Trust to the date of payment, to the extent such Trust has funds legally and immediately available for such purpose, and (b) the amount of assets of such Trust remaining available for distribution to holders of Preferred Securities of such Trust in liquidation of such Trust (the "Guarantee Payments"). The Company's obligation to make a Guarantee Payment may be satisfied by direct payment of the required amounts by the Company to the holders of the related Preferred Securities or by causing the related Trust to pay such amounts to such holders.

Each Guarantee will be a guarantee of the Guarantee Payments with respect to the related Preferred Securities from the time of issuance of such Preferred Securities, but will not apply to the payment of distributions and other payments on such Preferred Securities when the related Trust does not have sufficient funds legally and immediately available to make such distributions or other payments. **If the Company does not make interest payments on the Junior Subordinated Notes held by the Property Trustee under any Trust, such Trust will not make distributions on its Preferred Securities.**

### Subordination

The Company's obligations under each Guarantee to make the Guarantee Payments will constitute an unsecured obligation of the Company and will rank (i) subordinate and junior in right of payment to all other liabilities of the Company, including the Junior Subordinated Notes, except those obligations or liabilities made equal or subordinate by their terms, (ii) equal to the most senior preferred or preference stock now issued by the Company or issued at a later date by the Company and with any guarantee now entered into by the Company or entered into at a later date by the Company in respect of any preferred or preference securities of any affiliate of the Company, and (iii) senior to all common stock of the Company. The terms of the Preferred Securities will provide that each holder of Preferred Securities by acceptance of the Preferred Securities agrees to the subordination

provisions and other terms of the Guarantee related thereto. The Company has outstanding preferred stock that ranks equal to the Guarantees and common stock that ranks junior to the Guarantees.

Each Guarantee will constitute a guarantee of payment and not of collection (that is, the guaranteed party may institute a legal proceeding directly against the guarantor to enforce its rights under the guarantee without first instituting a legal proceeding against any other person or entity).

**Amendments and Assignment**

Except with respect to any changes that do not materially and adversely affect the rights of holders of the related Preferred Securities (in which case no consent will be required), each Guarantee may be amended only with the prior approval of the holders of not less than 66⅔% in liquidation amount of such outstanding Preferred Securities. The manner of obtaining any such approval of holders of the Preferred Securities will be as set forth in an accompanying Prospectus Supplement. All guarantees and agreements contained in each Guarantee shall bind the successors, assigns, receivers, trustees and representatives of the Company and shall inure to the benefit of the holders of the related Preferred Securities then outstanding.

**Termination**

Each Guarantee will terminate and be of no further force and effect as to the related Preferred Securities upon full payment of the Redemption Price of all such Preferred Securities, upon distribution of Junior Subordinated Notes to the holders of such Preferred Securities, or upon full payment of the amounts payable upon liquidation of the related Trust. Each Guarantee will continue to be effective or will be reinstated, as the case may be, if at any time any holder of the related Preferred Securities must restore payment of any sums paid with respect to such Preferred Securities or under such Guarantee.

**Events of Default**

An event of default under each Guarantee will occur upon the failure by the Company to perform any of its payment obligations under such Guarantee. The holders of a majority in liquidation amount of the Preferred Securities to which any Guarantee relates have the right to direct the time, method and place of conducting any proceeding for any remedy available to the Guarantee Trustee in respect of such Guarantee or to direct the exercise of any trust or power conferred upon the Guarantee Trustee under such Guarantee. Any holder of the related Preferred Securities may institute a legal proceeding directly against the Company to enforce its rights under such Guarantee without first instituting a legal proceeding against the Guarantee Trustee or any other person or entity. The holders of a majority in liquidation amount of Preferred Securities of any series may, by vote, on behalf of the holders of all the Preferred Securities of such series, waive any past event of default and its consequences.

**Information Concerning the Guarantee Trustee**

The Guarantee Trustee, prior to the occurrence of any event of default with respect to any Guarantee and after the curing or waiving of all events of default with respect to such Guarantee, undertakes to perform only such duties as are specifically set forth in such Guarantee and, in case an event of default has occurred, shall exercise the same degree of care as a prudent individual would exercise in the conduct of his or her own affairs. Subject to such provisions, the Guarantee Trustee is under no obligation to exercise any of the powers vested in it by any Guarantee at the request of any holder of the related Preferred Securities, unless offered reasonable indemnity against the costs, expenses and liabilities which might be incurred by the Guarantee Trustee.

JPMorgan Chase Bank, the Guarantee Trustee, also serves as Property Trustee, as Senior Note Indenture Trustee and as Subordinated Note Indenture Trustee. The Company and certain of its affiliates maintain deposit accounts and banking relationships with JPMorgan Chase Bank. JPMorgan Chase Bank serves as trustee under other indentures pursuant to which securities of the Company and affiliates of the Company are outstanding.

### Governing Law

Each Guarantee will be governed by, and construed in accordance with, the internal laws of the State of New York.

### The Agreements as to Expenses and Liabilities

Pursuant to an Agreement as to Expenses and Liabilities to be entered into by the Company under each Trust Agreement, the Company will irrevocably and unconditionally guarantee to each person or entity to whom each Trust becomes indebted or liable the full payment of any indebtedness, expenses or liabilities of such Trust, other than obligations of such Trust to pay to the holders of the related Preferred Securities or other similar interests in such Trust the amounts due such holders pursuant to the terms of such Preferred Securities or such other similar interests, as the case may be.

## RELATIONSHIP AMONG THE PREFERRED SECURITIES, THE JUNIOR SUBORDINATED NOTES AND THE GUARANTEES

As long as payments of interest and other payments are made when due on each series of Junior Subordinated Notes issued to a Trust, such payments will be sufficient to cover distributions and payments due on the related Trust Securities of such Trust primarily because (i) the aggregate principal amount of each series of Junior Subordinated Notes will be equal to the sum of the aggregate stated liquidation amount of the related Trust Securities; (ii) the interest rate and interest and other payment dates on each series of Junior Subordinated Notes will match the distribution rate and distribution and other payment dates for the related Preferred Securities; (iii) the Company shall pay for all costs and expenses of each Trust pursuant to the Agreements as to Expenses and Liabilities; and (iv) each Trust Agreement provides that the Securities Trustees thereunder shall not cause or permit the Trust to, among other things, engage in any activity that is not consistent with the purposes of the Trust.

Payments of distributions (to the extent funds for such purpose are legally and immediately available) and other payments due on the Preferred Securities (to the extent funds for such purpose are legally and immediately available) will be guaranteed by the Company as and to the extent set forth under "Description of the Guarantees." If the Company does not make interest payments on any series of Junior Subordinated Notes, it is not expected that the related Trust will have sufficient funds to pay distributions on its Preferred Securities. Each Guarantee is a guarantee from the time of its issuance, but does not apply to any payment of distributions unless and until the related Trust has sufficient funds legally and immediately available for the payment of such distributions.

If the Company fails to make interest or other payments on any series of Junior Subordinated Notes when due (taking into account any extension period as described in the applicable Prospectus Supplement), the Trust Agreement provides a mechanism that allows the holders of the related Preferred Securities to appoint a substitute Property Trustee. Such holders may also direct the Property Trustee to enforce its rights under the Junior Subordinated Notes of such series, including proceeding directly against the Company to enforce such Junior Subordinated Notes. If the Property Trustee fails to enforce its rights under any series of Junior Subordinated Notes, to the fullest extent permitted by applicable law, any holder of related Preferred Securities may institute a legal proceeding directly against the Company to enforce the Property Trustee's rights under such series of Junior Subordinated Notes without first instituting any legal proceeding against the Property Trustee or any other person or entity. Notwithstanding the foregoing, a holder of Preferred Securities may institute a legal proceeding directly against the Company, without first instituting a legal proceeding against the Property Trustee or any other person or entity, for enforcement of payment to such holder of principal of or interest on Junior Subordinated Notes of the related series having a principal amount equal to the aggregate stated liquidation amount of the Preferred Securities of such holder on or after the due dates specified in the Junior Subordinated Notes of such series.

If the Company fails to make payments under any Guarantee, such Guarantee provides a mechanism that allows the holders of the Preferred Securities to which such Guarantee relates to direct the Guarantee Trustee to enforce its rights under such Guarantee. In addition, any holder of Preferred Securities may institute a legal proceeding directly against the Company to enforce the Guarantee Trustee's rights under the related Guarantee without first instituting a legal proceeding against the Guarantee Trustee or any other person or entity.

Each Guarantee, the Subordinated Note Indenture, the Junior Subordinated Notes of the related series, the related Trust Agreement and the related Agreement as to Expenses and Liabilities, as described above, constitute a full and unconditional guarantee by the Company of the payments due on the related series of Preferred Securities.

Upon any voluntary or involuntary dissolution, winding-up or termination of any Trust, unless Junior Subordinated Notes of the related series are distributed in connection with such action, the holders of the Preferred Securities of such Trust will be entitled to receive, out of assets legally available for distribution to holders, a liquidation distribution in cash as described in the applicable Prospectus Supplement. Upon any voluntary or involuntary liquidation or bankruptcy of the Company, the Property Trustee, as holder of the related series of Junior Subordinated Notes, would be a subordinated creditor of the Company, subordinated in right of payment to all Senior Indebtedness, but entitled to receive payment in full of principal and interest, before any stockholders of the Company receive payments or distributions. Because the Company is guarantor under each Guarantee and has agreed to pay for all costs, expenses and liabilities of each Trust (other than the Trust's obligations to holders of the Preferred Securities) pursuant to the related Agreement as to Expenses and Liabilities, the positions of a holder of Preferred Securities and a holder of Junior Subordinated Notes of the related series relative to other creditors and to stockholders of the Company in the event of liquidation or bankruptcy of the Company would be substantially the same.

A default or event of default under any Senior Indebtedness would not constitute a default or Event of Default under the Subordinated Note Indenture. However, in the event of payment defaults under, or acceleration of, Senior Indebtedness, the subordination provisions of the Junior Subordinated Notes provide that no payments may be made in respect of the Junior Subordinated Notes until such Senior Indebtedness has been paid in full or any payment default of Senior Indebtedness has been cured or waived. Failure to make required payments on the Junior Subordinated Notes of any series would constitute an Event of Default under the Subordinated Note Indenture with respect to the Junior Subordinated Notes of such series except that failure to make interest payments on the Junior Subordinated Notes of such series will not be an Event of Default during an extension period as described in the applicable Prospectus Supplement.

## PLAN OF DISTRIBUTION

The Company may sell the Senior Notes and the Junior Subordinated Notes and the Trusts may sell the Preferred Securities in one or more of the following ways from time to time: (i) to underwriters for resale to the public or to institutional investors; (ii) directly to institutional investors; or (iii) through agents to the public or to institutional investors. The Prospectus Supplement with respect to each series of Senior Notes, Junior Subordinated Notes or Preferred Securities will set forth the terms of the offering of such Senior Notes, Junior Subordinated Notes or Preferred Securities, including the name or names of any underwriters or agents, the purchase price of such Senior Notes, Junior Subordinated Notes or Preferred Securities and the proceeds to the Company or the applicable Trust from such sale, any underwriting discounts or agency fees and other items constituting underwriters' or agents' compensation, any initial public offering price, any discounts or concessions allowed or reallowed or paid to dealers and any securities exchange on which such Senior Notes, Junior Subordinated Notes or Preferred Securities may be listed.

If underwriters participate in the sale, such Senior Notes, Junior Subordinated Notes or Preferred Securities will be acquired by the underwriters for their own account and may be resold from time to time in one or more transactions, including negotiated transactions, at a fixed public offering price or at varying prices determined at the time of sale.

Unless otherwise set forth in the Prospectus Supplement, the obligations of the underwriters to purchase any series of Senior Notes, Junior Subordinated Notes or Preferred Securities will be subject to certain conditions precedent and the underwriters will be obligated to purchase all of such series of Senior Notes, Junior Subordinated Notes or Preferred Securities, if any are purchased.

Underwriters and agents may be entitled under agreements entered into with the Company and/or the applicable Trust to indemnification against certain civil liabilities, including liabilities under the 1933 Act. Underwriters and agents may engage in transactions with, or perform services for, the Company in the ordinary course of business.

Each series of Senior Notes, Junior Subordinated Notes or Preferred Securities will be a new issue of securities and will have no established trading market. Any underwriters to whom Senior Notes, Junior Subordinated Notes or Preferred Securities are sold for public offering and sale may make a market in such Senior Notes, Junior Subordinated Notes or Preferred Securities, but such underwriters will not be obligated to do so and may discontinue any market making at any time without notice. The Senior Notes, Junior Subordinated Notes or Preferred Securities may or may not be listed on a national securities exchange.

## LEGAL MATTERS

Certain matters of Delaware law relating to the validity of the Preferred Securities will be passed upon on behalf of the Company and the Trusts by Richards, Layton & Finger, Wilmington, Delaware, special Delaware counsel to the Company and the Trusts. The validity of the Senior Notes, the Junior Subordinated Notes, the Guarantees and certain matters relating to such securities will be passed upon on behalf of the Company by Beggs & Lane, a Registered Limited Liability Partnership, Pensacola, Florida, and by Troutman Sanders LLP, Atlanta, Georgia. Certain legal matters will be passed upon for the Underwriters by Dewey Ballantine LLP, New York, New York.

## EXPERTS

The financial statements and the related financial statement schedule as of and for the year ended December 31, 2002 incorporated by reference in this Prospectus have been audited by Deloitte & Touche LLP, independent auditors, as stated in their report, which is incorporated by reference in this Prospectus, and has been so incorporated in reliance upon the report of such firm given upon their authority as experts in accounting and auditing.

Certain of the Company's financial statements incorporated by reference in this Prospectus have been audited by Arthur Andersen LLP ("Andersen"), independent public accountants, as indicated in their reports with respect to the financial statements, and are incorporated by reference in this Prospectus, in reliance upon the authority of Andersen as experts in giving such reports. On March 28, 2002, Southern's Board of Directors, upon recommendation of its Audit Committee, decided not to engage Andersen as the Company's principal public accountants. The Company has not obtained a reissued report from Andersen and has been unable to obtain, after reasonable efforts, Andersen's written consent to incorporate by reference Andersen's reports on the financial statements. Under these circumstances, Rule 437a under the 1933 Act permits this Prospectus to be filed without a written consent from Andersen. The absence of such written consent from Andersen may limit a holder's ability to assert claims against Andersen under Section 11(a) of the 1933 Act for any untrue statement of a material fact contained in the financial statements audited by Andersen or any omissions to state a material fact required to be stated in the financial statements.

## PART II

## INFORMATION NOT REQUIRED IN PROSPECTUS

**Item 14.** ***Other Expenses of Issuance and Distribution.***

The estimated expenses of issuance and distribution, other than underwriting discounts and commissions, to be borne by the Company are as follows:

| | |
|---|---|
| Securities and Exchange Commission registration fee | $ 26,325 |
| Fees and expenses of trustees and/or Transfer Agent and Registrar | 60,000 |
| Listing fees of New York Stock Exchange | 36,900 |
| Printing expenses | 130,000 |
| Rating Agency fees | 447,000 |
| Services of Southern Company Services, Inc. | 120,000 |
| Fees and expenses of counsel | 240,000 |
| Blue sky fees and expenses | 30,000 |
| Fees of accountants | 215,000 |
| Miscellaneous expenses | 14,775 |
| Total | $1,320,000* |

* Each Prospectus Supplement will reflect estimated expenses of the Company based upon the amount of the related offering.

**Item 15.** ***Indemnification of Directors and Officers.***

Section 719 of Title 13-A of the Maine Revised Statutes, as amended in 1987, provides that a corporation shall have the power to indemnify, or if so provided in the bylaws shall in all cases indemnify, any person who was or is a party or is threatened to be made a party to any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative, by reason of the fact that that person is or was a director, officer, employee or agent of the corporation, or is or was serving at the request of the corporation as a director, officer, trustee, partner, fiduciary, employee or agent of another corporation, partnership, joint venture, trust, pension or other employee benefit plan or other enterprise, against expenses, including attorneys' fees, judgments, fines and amounts paid in settlement actually and reasonably incurred by that person in connection with such action, suit or proceeding; provided that no indemnification shall be provided for any person with respect to any matter as to which that person shall have been finally adjudicated not to have acted honestly or in the reasonable belief that that person's action was in or not opposed to the best interests of the corporation or its shareholders or, in the case of a person serving as a fiduciary of an employee benefit plan or trust, in or not opposed to the best interests of that plan or trust, or its participants or beneficiaries; or, with respect to any criminal action or proceeding, had reasonable cause to believe that that person's conduct was unlawful. The termination of any action, suit or proceeding by judgment, order or conviction adverse to that person, or by settlement or plea of nolo contendere or its equivalent, shall not of itself create a presumption that that person did not act honestly or in the reasonable belief that that person's action was in or not opposed to the best interests of the corporation or its shareholders or, in the case of a person serving as a fiduciary of an employee benefit plan or trust, in or not opposed to the best interests of that plan or trust or its participants or beneficiaries and, with respect to any criminal action or proceeding, had reasonable cause to believe that that person's conduct was unlawful.

Section 21 of the By-laws of the Company provides in pertinent part as follows:

To the fullest extent permitted by law, the Company shall indemnify each person made, or threatened to be made, a party to any threatened, pending, or completed claim, action, suit or proceeding, whether civil or criminal, administrative or investigative, and whether by or in the right of the Company or otherwise, by reason of the fact that such person, or such person's testator or intestate, is or was a director, officer or was an employee of the Company holding one or more management positions through and inclusive of managers (but not positions below the level of managers) (such positions being hereinafter referred to as "Management Positions") or is or was serving at the request of the Company as a director, officer, employee, agent or trustee of another corporation, partnership, joint venture, trust, employee benefit plan or other enterprise, in any capacity at the request of the Company, against all loss and expense actually or reasonably incurred by him including, without limiting the generality of the foregoing, judgments, fines, penalties, liabilities, sanctions and amounts paid in settlement and attorneys fees and disbursements actually and necessarily incurred by him in defense of such action or proceeding, or any appeal therefrom. The indemnification provided by this Section shall inure to the benefit of the heirs, executors and administrators of such person.

In any case in which a director, officer of the Company or employee of the Company holding one or more Management Positions requests indemnification with respect to the defense of any such claim, action, suit or proceedings, the Company may advance expenses (including attorney's fees) incurred by such person prior to the final disposition of such claim, action, suit or proceeding, as authorized by the Board of Directors in the specific case, upon receipt of a written undertaking by or on behalf of such person to repay amounts advanced if it shall ultimately be determined that such person was not entitled to be indemnified by the Company under this Section or otherwise; provided, however, that the advancement of such expenses shall not be deemed to be indemnification unless and until it shall ultimately be determined that such person is entitled to be indemnified by the Company. Such a person claiming indemnification shall be entitled to indemnification upon a determination that no judgment or other final adjudication adverse to such person has established that such person's acts were committed in bad faith or were the result of active and deliberate dishonesty and were material to the cause of action so adjudicated, or such person personally obtained an economic benefit including a financial profit or other advantage to which such person was not legally entitled. Without limiting the generality of the foregoing provision, no former, present or future director or officer of the Company or employee of the Company holding one or more management positions, or his heirs, executors or administrators, shall be liable for any undertaking entered into by the Company or its subsidiaries or affiliates as required by the Securities and Exchange Commission pursuant to any rule or regulation of the Securities and Exchange Commission now or hereafter in effect or orders issued pursuant to the Public Utility Holding Company Act of 1935, the Federal Power Act, or any undertaking entered into by the Company due to environmental requirements including all legally enforceable environmental compliance obligations imposed by federal, state or local statute, regulation, permit, judicial or administrative decree, order and judgment or other similar means, or any undertaking entered into by the Company pursuant to any approved Company compliance plan or any federal or state or municipal ordinance which directly or indirectly regulates the Company, or its parent by reason of their being holding or investment companies, public utility companies, public utility holding companies or subsidiaries of public utility holding companies.

The foregoing rights shall not be exclusive of any other rights to which any such director, officer or employee may otherwise be entitled and shall be available whether or not the director, officer or employee continues to be a director, officer or employee at the time of incurring any such expenses and liabilities.

The Company has an insurance policy covering its liabilities and expenses which might arise in connection with its lawful indemnification of its directors and officers for certain of their liabilities and expenses and also covering its officers and directors against certain other liabilities and expenses.

* To be subsequently filed or incorporated by reference.

**Item 17.** ***Undertakings.***

(a) Undertaking related to Rule 415 offering:

The undersigned registrants hereby undertake:

(1) To file, during any period in which offers or sales are being made, a post-effective amendment to this registration statement:

(i) To include any prospectus required by Section 10(a)(3) of the Securities Act of 1933;

(ii) To reflect in the prospectus any facts or events arising after the effective date of the registration statement (or the most recent post-effective amendment thereof) which, individually or in the aggregate, represent a fundamental change in the information set forth in the registration statement; Notwithstanding the foregoing, any increase or decrease in volume of securities offered (if the total dollar value of securities offered would not exceed that which was registered) and any deviation from the low or high end of the estimated maximum offering range may be reflected in the form of prospectus filed with the Commission pursuant to Rule 424(b) if, in the aggregate, the changes in volume and price represent no more than 20% change in the maximum aggregate offering price set forth in the "Calculation of Registration Fee" table in the effective registration statement.

(iii) To include any material information with respect to the plan of distribution not previously disclosed in the registration statement or any material change to such information in the registration statement;

Provided, however, that paragraphs (a)(1)(i) and (a)(1)(ii) do not apply if the registration statement is on Form S-3, S-8 or F-3 and the information required to be included in a post-effective amendment by those paragraphs is contained in periodic reports filed by the registrants pursuant to Section 13 or Section 15(d) of the Securities Exchange Act of 1934 that are incorporated by reference in the registration statement.

(2) That, for the purpose of determining any liability under the Securities Act of 1933, each such post-effective amendment shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof.

(3) To remove from registration by means of a post-effective amendment any of the securities being registered which remain unsold at the termination of the offering.

(b) Undertaking related to filings incorporating subsequent Securities Exchange Act of 1934 documents by reference:

The undersigned registrants hereby undertake that, for purposes of determining any liability under the Securities Act of 1933, each filing of the Company's annual report pursuant to Section 13(a) or Section 15(d) of the Securities Exchange Act of 1934 that is incorporated by reference in the registration statement shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof.

(c) Undertaking related to acceleration of effectiveness:

Insofar as indemnification for liabilities arising under the Securities Act of 1933 may be permitted to directors, officers and controlling persons of the registrants pursuant to the foregoing provisions or otherwise, the registrants have been advised that in the opinion of the Securities and Exchange Commission such indemnification is against public policy as expressed in the Act and is, therefore, unenforceable. In the event that a claim for indemnification against such liabilities (other than the payment by the registrants of expenses incurred or paid by a director, officer or controlling person of the registrants in the successful defense of any action, suit or proceeding) is asserted by such director, officer or controlling person in connection with the securities being registered, the registrants will, unless in the opinion of their counsel the matter has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question whether such indemnification by it is against public policy as expressed in the Act and will be governed by the final adjudication of such issue.

(d) The undersigned registrants hereby undertake that:

(1) For purposes of determining any liability under the Securities Act of 1933, the information omitted from the form of prospectus filed as part of this registration statement in reliance upon Rule 430A and contained in a form of prospectus filed by the registrants pursuant to Rule 424(b)(1) or (4) or 497(h) under the Act shall be deemed to be part of this registration statement as of the time it was declared effective.

(2) For the purpose of determining any liability under the Securities Act of 1933, each post-effective amendment that contains a form of prospectus shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof.

## SIGNATURES

**Pursuant to the requirements of the Securities Act of 1933, Gulf Power Company certifies that it has reasonable grounds to believe that it meets all of the requirements for filing on Form S-3 and has duly caused this registration statement to be signed on its behalf by the undersigned, thereunto duly authorized, in the City of Atlanta, State of Georgia, on the 10th day of April, 2003.**

EXHIBIT E.1.

$60,000,000 Series H 5.25% Senior Notes

due July 15, 2033

**GULF POWER COMPANY**

UNDERWRITING AGREEMENT

July 10, 2003

Morgan Stanley & Co. Incorporated
1585 Broadway
New York, New York 10036

Wachovia Capital Markets, LLC
One First Union Center, TW-8
301 South College Street
Charlotte, North Carolina 28288

As Representatives of the Underwriters listed on Schedule I hereto.

Ladies and Gentlemen:

Gulf Power Company, a Maine corporation (the "Company"), confirms its agreement (the "Agreement") with you and the other Underwriter named in Schedule I hereto (collectively, the "Underwriters", which term shall also include any underwriter substituted as hereinafter provided in Section 10 hereof) for whom you are acting as representatives (in such capacity you shall hereinafter be referred to as the "Representatives"), with respect to the sale by the Company and the purchase by the Underwriters, acting severally and not jointly, of $60,000,000 aggregate principal amount of the Series H 5.25% Senior Notes due July 15, 2033 (the "Senior Notes") as set forth in Schedule I hereto.

The Company understands that the Underwriters are making a public offering of the Senior Notes pursuant to this Agreement. The Senior Notes will be issued pursuant to an indenture, dated as of January 1, 1998, as heretofore supplemented (the "Base Indenture"), between the Company and JPMorgan Chase Bank (formerly known as The Chase Manhattan Bank), as trustee (the "Trustee"), and as further supplemented by a eighth supplemental indenture, dated as of July 22, 2003, to the Base Indenture relating to the Senior Notes (the "Supplemental Indenture" and, together with the Base Indenture and any other amendments or supplements thereto, the "Indenture"), between the Company and the Trustee.

SECTION 1. REPRESENTATIONS AND WARRANTIES. The Company represents and warrants to the Underwriters as follows:

(a) A registration statement on Form S-3 (File Nos. 333-104449, 333-104449-01 and 333-104449-02) in respect of the Senior Notes and certain other securities has been prepared and filed in accordance with the provisions of the Securities Act of 1933, as amended (the "1933 Act"), with the Securities and Exchange Commission (the "Commission"); such registration statement and any post-effective amendment thereto, each in the form heretofore delivered or to be delivered to the Underwriters, has been declared effective by the Commission in such form (except that copies of the registration statement and any post-effective amendment delivered to the Underwriters need not include exhibits but shall include all documents incorporated by reference therein); and no stop order suspending the effectiveness of such registration statement has been issued and no proceeding for that purpose has been initiated or, to the best knowledge of the Company, threatened by the Commission (any preliminary prospectus, as supplemented by a preliminary prospectus supplement, included in such registration statement or filed with the Commission pursuant to Rule 424(a) of the rules and regulations of the Commission under the 1933 Act, being hereinafter called a "Preliminary Prospectus"); such registration statement, as it became effective, including the exhibits thereto and all documents incorporated by reference therein pursuant to Item 12 of Form S-3 at the time such registration statement became effective, being hereinafter called the "Registration Statement"; the prospectus relating to the Senior Notes, in the form in which it was included in the Registration Statement at the time it became effective, being hereinafter called the "Prospectus"; any reference herein to any Preliminary Prospectus or the Prospectus shall be deemed to refer to and include the documents incorporated by reference therein pursuant to Item 12 of Form S-3 under the 1933 Act, as of the date of such Preliminary Prospectus or Prospectus, as the case may be; any reference to any amendment or supplement to any Preliminary Prospectus or the Prospectus shall be deemed to refer to and include any documents filed after the date of such Preliminary Prospectus or Prospectus, as the case may be, under the Securities Exchange Act of 1934, as amended (the "1934 Act"), and incorporated by reference in such Preliminary Prospectus or Prospectus, as the case may be; any reference to any amendment to the Registration Statement shall be deemed to refer to and include any annual report of the Company filed pursuant to Section 13(a) or 15(d) of the 1934 Act after the effective date of the Registration Statement that is incorporated by reference in the Registration Statement; and the Prospectus as amended or supplemented in final form by a prospectus supplement relating to the Senior Notes in the form in which it is filed with the Commission, pursuant to Rule 424(b) under the 1933 Act in accordance with Section 3(f) hereof, including any documents incorporated by reference therein as of the date of such filing, being hereinafter called the "Final Supplemented Prospectus".

(b) The documents incorporated by reference in the Registration Statement or Prospectus, when they were filed with the Commission, complied in all material respects with the applicable provisions of the 1934 Act and the rules and

regulations of the Commission thereunder, and as of such time of filing, when read together with the Prospectus, none of such documents contained an untrue statement of a material fact or omitted to state a material fact required to be stated therein or necessary to make the statements therein, in the light of the circumstances under which they were made, not misleading; and any further documents so filed and incorporated by reference in the Prospectus or any further amendment or supplement thereto, when such documents are filed with the Commission, will comply in all material respects with the applicable provisions of the 1934 Act and the rules and regulations of the Commission thereunder and, when read together with the Prospectus as it otherwise may be amended or supplemented, will not contain an untrue statement of a material fact or omit to state a material fact required to be stated therein or necessary to make the statements therein, in the light of the circumstances under which they were made, not misleading, except that the Company makes no warranty or representation to the Underwriters with respect to: (A) any statements or omissions made in reliance upon and in conformity with information furnished in writing to the Company by the Underwriters through the Representatives expressly for use in the Final Supplemented Prospectus; or (B) any information set forth in the Final Supplemented Prospectus under the captions "Description of the Series H Senior Notes — Book-Entry Only Issuance — The Depository Trust Company," "The Policy and the Insurer" and "Experts" in the prospectus supplement to the Prospectus dated July 10, 2003 or in Appendix A thereto.

(c) The Registration Statement, the Prospectus and the Final Supplemented Prospectus comply, and any further amendments or supplements to the Registration Statement or the Prospectus, when any such post-effective amendments are declared effective or supplements are filed with the Commission, as the case may be, will comply, in all material respects with the applicable provisions of the 1933 Act, the 1934 Act, the 1939 Act (hereinafter defined) and the General Rules and Regulations of the Commission thereunder and do not and will not, (i) as of the applicable effective date as to the Registration Statement and any amendment thereto and (ii) as of the applicable filing date of the Final Supplemented Prospectus and any Prospectus as further amended or supplemented, contain an untrue statement of a material fact or omit to state a material fact necessary in order to make the statements therein not misleading in the case of the Registration Statement and any amendment thereto, and, in the light of the circumstances under which they were made, not misleading in the case of the Final Supplemented Prospectus and any Prospectus as further amended or supplemented; except that the Company makes no warranties or representations with respect to: (A) that part of the Registration Statement which shall constitute the Statements of Eligibility (Form T-1) under the Trust Indenture Act of 1939, as amended (the "1939 Act"); (B) statements or omissions made in the Registration Statement or the Final Supplemented Prospectus in reliance upon and in conformity with information furnished in writing to the Company by the Underwriters through the Representatives expressly for use therein; or (C) any information set forth in the Final Supplemented Prospectus under the captions "Description of the Series H Senior Notes — Book-Entry Only Issuance — The

Depository Trust Company" and "The Policy and the Insurer" or in Appendix A thereto.

(d) With respect to the Registration Statement, the conditions for use of Form S-3, as set forth in the General Instructions thereof, have been satisfied.

(e) Since the respective dates as of which information is given in the Registration Statement and the Final Supplemented Prospectus, except as otherwise stated therein, there has been no material adverse change in the business, properties or financial condition of the Company.

(f) The Company is a corporation duly organized and existing under the laws of the State of Maine, is duly qualified to carry on its business as a foreign corporation under the laws of the States of Florida, Georgia and Mississippi, and has due corporate authority to carry on the public utility business in which it is engaged and to own and operate the properties used by it in such business, to enter into and perform its obligations under this Agreement and the Indenture and to issue and sell the Senior Notes to the Underwriters.

(g) This Agreement has been duly authorized, executed and delivered by the Company.

(h) The Indenture has been duly authorized by the Company and, on the Closing Date (as hereinafter defined), will have been duly executed and delivered by the Company, and, assuming due authorization, execution and delivery of the Indenture by the Trustee, the Indenture will, on the Closing Date, constitute a valid and binding obligation of the Company, enforceable against the Company in accordance with its terms, except to the extent that enforcement thereof may be limited by (1) bankruptcy, insolvency, reorganization, receivership, liquidation, fraudulent conveyance, moratorium or other similar laws affecting creditors' rights generally or (2) general principles of equity (regardless of whether enforcement is considered in a proceeding at law or in equity) (the "Enforceability Exceptions"); the Indenture will conform in all material respects to all statements relating thereto contained in the Final Supplemented Prospectus; and, on the Closing Date, the Indenture will have been duly qualified under the 1939 Act.

(i) The issuance and delivery of the Senior Notes have been duly authorized by the Company and, on the Closing Date, the Senior Notes will have been duly executed by the Company and, when authenticated in the manner provided for in the Indenture and delivered against payment therefor as described in the Final Supplemented Prospectus, will constitute valid and legally binding obligations of the Company, enforceable against the Company in accordance with their terms, except to the extent that enforcement thereof may be limited by the Enforceability Exceptions, will be in the form contemplated by, and entitled to the benefits of, the Indenture and will conform in all material respects to all statements relating thereto in the Final Supplemented Prospectus.

(j) The execution, delivery and performance by the Company of this Agreement, the Indenture and the Senior Notes and the consummation by the Company of the transactions contemplated herein and therein and compliance by the Company with its obligations hereunder and thereunder shall have been duly authorized by all necessary corporate action on the part of the Company and do not and will not result in any violation of the charter or bylaws of the Company, and do not and will not conflict with, or result in a breach of any of the terms or provisions of, or constitute a default under, or result in the creation or imposition of any lien, charge or encumbrance upon any property or assets of the Company under (A) any contract, indenture, mortgage, loan agreement, note, lease or other agreement or instrument to which the Company is a party or by which it may be bound or to which any of its properties may be subject (except for conflicts, breaches or defaults which would not, individually or in the aggregate, be materially adverse to the Company or materially adverse to the transactions contemplated by this Agreement), or (B) any existing applicable law, rule, regulation, judgment, order or decree of any government, governmental instrumentality or court, domestic or foreign, or any regulatory body or administrative agency or other governmental body having jurisdiction over the Company, or any of its properties.

(k) The Company has duly authorized all necessary action to be taken by it for the procurement of an irrevocable financial guaranty insurance policy (the "Insurance Policy") issued by XL Capital Assurance Inc. (the "Insurer"), insuring the payment of principal and interest on the Senior Notes, when due.

(l) No authorization, approval, consent or order of any court or governmental authority or agency is necessary in connection with the issuance and sale by the Company of the Senior Notes or the transactions by the Company contemplated in this Agreement, except (A) such as may be required under the 1933 Act or the rules and regulations thereunder; (B) such as may be required under the Public Utility Holding Company Act of 1935, as amended; (C) the qualification of the Indenture under the 1939 Act; (D) the approval of the Florida Public Service Commission (the "Florida Commission"); and (E) such consents, approvals, authorizations, registrations or qualifications as may be required under state securities or "blue sky" laws.

(m) The financial statements incorporated by reference in the Registration Statement and the Final Supplemented Prospectus, together with the related schedules and notes, present fairly, in all material respects, the financial position, results of operations and cash flows of the Company as of and for the dates indicated; said financial statements have been prepared in conformity with accounting principles generally accepted in the United States ("GAAP") applied on a consistent basis (except that the unaudited financial statements may be subject to normal year-end adjustments) throughout the periods involved and necessarily include amounts that are based on the best estimates and judgments of management. The selected financial data and the summary financial information included in the Registration Statement and the Final Supplemented Prospectus

present fairly the information shown therein and have been compiled on a basis consistent with that of the audited and unaudited financial statements incorporated by reference in the Registration Statement.

SECTION 2. SALE AND DELIVERY TO THE UNDERWRITERS; CLOSING.

(a) On the basis of the representations and warranties herein contained and subject to the terms and conditions herein set forth, the Company agrees to sell to each Underwriter, severally and not jointly, and each Underwriter, severally and not jointly, agrees to purchase from the Company, the principal amount of Senior Notes set forth in Schedule I to this Agreement opposite the name of such Underwriter (plus any additional amount of Senior Notes that such Underwriter may become obligated to purchase pursuant to the provisions of Section 10 hereof), at a price equal to 96.85% of the principal amount thereof.

(b) Payment for and delivery of certificates for the Senior Notes shall be made at the offices of Dewey Ballantine LLP, 1301 Avenue of the Americas, New York, New York 10019 at 10:00 A.M., New York City time, on July 22, 2003 (unless postponed in accordance with the provisions of Section 10) or such other time, place or date as shall be agreed upon by the Representatives and the Company (such time and date of payment and delivery being herein called the "Closing Date"). Payment shall be made to the Company by wire transfer in federal funds at the Closing Date against delivery of the Senior Notes to the Representatives. It is understood that each Underwriter has authorized the Representatives, for each Underwriter's account, to accept delivery of, receipt for, and make payment of the principal amount of the Senior Notes which each Underwriter has agreed to purchase. The Representatives, individually and not as representatives of the Underwriters, may (but shall not be obligated to) make payment of the principal amount of the Senior Notes to be purchased by any Underwriter whose payment has not been received by the Closing Date, but such payment shall not relieve such Underwriter from its obligations hereunder.

The delivery of the Senior Notes shall be made in fully registered form, registered in the name of CEDE & CO., to the offices of The Depository Trust Company in New York, New York or its designee, and the Underwriters shall accept such delivery.

The certificate(s) for the Senior Notes will be made available for examination by the Representatives not later than 12:00 Noon, New York City time, on the last business day prior to the Closing Date.

SECTION 3. COVENANTS OF THE COMPANY. The Company covenants with the Underwriters as follows:

(a) The Company, on or prior to the Closing Date, will deliver to the Underwriters conformed copies of the Registration Statement as originally filed

and of all amendments thereto, heretofore or hereafter made, including any post-effective amendment (in each case including all exhibits filed therewith, and including unsigned copies of each consent and certificate included therein or filed as an exhibit thereto, except exhibits incorporated by reference, unless specifically requested). As soon as the Company is advised thereof, it will advise the Representatives orally of the issuance of any stop order under the 1933 Act with respect to the Registration Statement, or the institution of any proceedings therefor, of which the Company shall have received notice, and will use its best efforts to prevent the issuance of any such stop order and to secure the prompt removal thereof, if issued. The Company will deliver to the Representatives sufficient conformed copies of the Registration Statement, the Prospectus and the Final Supplemented Prospectus and of all supplements and amendments thereto (in each case without exhibits) for distribution to the Underwriters and, from time to time, as many copies of the Prospectus and the Final Supplemented Prospectus as the Underwriters may reasonably request for the purposes contemplated by the 1933 Act or the 1934 Act.

(b) The Company will furnish the Underwriters with copies of each amendment and supplement to the Final Supplemented Prospectus relating to the offering of the Senior Notes in such quantities as the Underwriters may from time to time reasonably request. If, during the period (not exceeding nine months) when the delivery of a prospectus shall be required by law in connection with the sale of any Senior Notes by an Underwriter, any event relating to or affecting the Company, or of which the Company shall be advised in writing by the Underwriters, shall occur, which in the opinion of the Company or of Underwriters' counsel should be set forth in a supplement to or an amendment of the Final Supplemented Prospectus in order to make the Final Supplemented Prospectus not misleading in the light of the circumstances when it is delivered, or if for any other reason it shall be necessary during such period to amend or supplement the Final Supplemented Prospectus or to file under the 1934 Act any document incorporated by reference in the Preliminary Prospectus or Prospectus in order to comply with the 1933 Act or the 1934 Act, the Company forthwith will (i) notify the Underwriters to suspend solicitation of purchases of the Senior Notes and (ii) at its expense, make any such filing or prepare and furnish to the Underwriters a reasonable number of copies of a supplement or supplements or an amendment or amendments to the Final Supplemented Prospectus which will supplement or amend the Final Supplemented Prospectus so that, as supplemented or amended, it will not contain any untrue statement of a material fact or omit to state any material fact necessary in order to make the statements therein, in the light of the circumstances when the Final Supplemented Prospectus is delivered, not misleading or which will effect any other necessary compliance. In case any Underwriter is required to deliver a prospectus in connection with the sale of any Senior Notes after the expiration of the period specified in the preceding sentence, the Company, upon the request of such Underwriter, will furnish to such Underwriter, at the expense of such Underwriter, a reasonable quantity of a supplemented or amended prospectus, or supplements or amendments to the Final Supplemented Prospectus, complying with Section 10(a) of the 1933 Act. During

the period specified in the second sentence of this subsection, the Company will continue to prepare and file with the Commission on a timely basis all documents or amendments required under the 1934 Act and the rules and regulations thereunder; provided, that the Company shall not file such documents or amendments without also furnishing copies thereof prior to such filing to the Representatives and Dewey Ballantine LLP.

(c) The Company will endeavor, in cooperation with the Underwriters, to qualify the Senior Notes for offering and sale under the applicable securities laws of such states and the other jurisdictions of the United States as the Representatives may designate; provided, however, that the Company shall not be obligated to qualify as a foreign corporation in any jurisdiction in which it is not so qualified or to file a consent to service of process or to file annual reports or to comply with any other requirements in connection with such qualification deemed by the Company to be unduly burdensome.

(d) The Company will make generally available to its security holders as soon as practicable but not later than 45 days after the close of the period covered thereby, an earnings statement of the Company (in form complying with the provisions of Rule 158 of the rules and regulations under the 1933 Act) covering a twelve-month period beginning not later than the first day of the Company's fiscal quarter next following the "effective date" (as defined in Rule 158) of the Registration Statement.

(e) The Company will use its best efforts to effect the listing of the Senior Notes on the New York Stock Exchange.

(f) As soon as practicable after the date of this Agreement, and in any event within the time prescribed by Rule 424 under the 1933 Act, to file the Final Supplemented Prospectus with the Commission and to advise the Representatives of such filing and to confirm such advice in writing.

(g) During a period of 15 days from the date of this Agreement, the Company will not, without the Representatives' prior written consent, directly or indirectly, sell, offer to sell, grant any option for the sale of, or otherwise dispose of, any Senior Notes or any security convertible into or exchangeable into or exercisable for the Senior Notes or any debt securities substantially similar to the Senior Notes (except for the Senior Notes issued pursuant to this Agreement and the Series G Senior Notes). The Representatives agree that commercial paper or other debt securities with scheduled maturities of less than one year are not subject to this Section 3(g).

SECTION 4. PAYMENT OF EXPENSES. The Company will pay all expenses incidental to the performance of its obligations under this Agreement, including but not limited to, the expenses of (i) the printing and filing of the Registration Statement as originally filed and of each amendment thereto, (ii) the preparation, issuance and delivery of the certificate(s) for the Senior Notes, (iii) the fees and disbursements of the

Company's counsel and accountants, (iv) the qualification of the Senior Notes under securities laws in accordance with the provisions of Section 3(c) hereof, including filing fees and the reasonable fees and disbursements of counsel for the Underwriters in connection therewith and in connection with the preparation of any blue sky survey (such fees and disbursements of counsel shall not exceed $3,500), (v) the printing and delivery to the Underwriters of copies of the Registration Statement as originally filed and of each amendment thereto and of the Prospectus, the Final Supplemented Prospectus and any amendments or supplements thereto, (vi) the printing and delivery to the Underwriters of copies of any blue sky survey, (vii) the fee of the National Association of Securities Dealers, Inc. in connection with its review of the offering contemplated by this Agreement, if applicable, (viii) the fees and expenses of the Trustee, including the fees and disbursements of counsel for the Trustee in connection with the Indenture and the Senior Notes, (ix) any fees payable in connection with the rating of the Senior Notes, (x) the cost and charges of any transfer agent or registrar, (xi) the premium payable to the Insurer in connection with the issuance of the Insurance Policy, (xii) the fees and expenses incurred in connection with the listing of the Senior Notes on the New York Stock Exchange and (xiii) the cost of qualifying the Senior Notes with The Depository Trust Company.

Except as otherwise provided in Section 9 hereof, the Underwriters shall pay all other expenses incurred by them in connection with their offering of the Senior Notes, including fees and disbursements of their counsel, Dewey Ballantine LLP.

SECTION 5. CONDITIONS OF UNDERWRITERS' OBLIGATIONS. The obligations of the Underwriters to purchase and pay for the Senior Notes are subject to the following conditions:

(a) No stop order suspending the effectiveness of the Registration Statement shall be in effect on the Closing Date and no proceedings for that purpose shall be pending before, or to the knowledge of the Company threatened by, the Commission on such date. If filing of the Final Supplemented Prospectus, or any supplement thereto, is required pursuant to Rule 424, the Final Supplemented Prospectus, and any such supplement, shall have been filed in the manner and within the time period required by Rule 424.

(b) Any required orders of the Florida Commission and the Commission permitting the transactions contemplated hereby substantially in accordance with the terms and conditions hereof shall be in full force and effect and shall contain no provision unacceptable to the Underwriters or the Company (but all provisions of such order or orders heretofore entered, copies of which have heretofore been delivered to the Representatives, are deemed acceptable to the Underwriters and the Company and all provisions of such order or orders hereafter entered shall be deemed acceptable to the Underwriters and the Company unless within 24 hours after receiving a copy of any such order any party to this Agreement shall give notice to the other parties to the effect that such order contains an unacceptable provision).

(c) On the Closing Date, the Representatives shall have received:

(1) The opinion, dated the Closing Date, of Beggs & Lane, a Registered Limited Liability Partnership, general counsel for the Company, substantially in the form attached hereto as Schedule II-A.

(2) The opinion, dated the Closing Date, of Troutman Sanders LLP, counsel for the Company, substantially in the form attached hereto as Schedule II-B.

(3) The opinion, dated the Closing Date, of Cravath, Swaine & Moore LLP, counsel to the Trustee, substantially in the form attached hereto as Schedule III.

(4) The opinion, dated the Closing Date, of Dewey Ballantine LLP, counsel for the Underwriters, substantially in the form attached hereto as Schedule IV.

(5) The opinion, dated the Closing Date, of counsel for the Insurer, substantially in the form attached hereto as Schedule V.

(6) At the Closing Date, there shall not have been, since the date hereof or since the respective dates as of which information is given in the Registration Statement and the Final Supplemented Prospectus, any material adverse change in the business, properties or financial condition of the Company, whether or not arising in the ordinary course of business, and the Representatives shall have received a certificate of the President or any Vice President of the Company, and dated as of the Closing Date, to the effect that (i) there has been no such material adverse change, (ii) the representations and warranties in Section 1 hereof are true and correct with the same force and effect as though expressly made at and as of the Closing Date, (iii) the Company has complied with all agreements and satisfied all conditions on its part to be performed or satisfied on or prior to the Closing Date, and (iv) no stop order suspending the effectiveness of the Registration Statement has been issued and no proceedings for that purpose have been initiated or, to the knowledge of the Company, threatened by the Commission.

(7) On the Closing Date, the Representatives shall have received from Deloitte & Touche LLP a letter dated the Closing Date to the effect that: (A) they are independent certified public accountants with respect to the Company within the meaning of the 1933 Act and the rules and regulations under the 1933 Act; (B) in their opinion, the financial statements audited by them and incorporated by reference in the Final Supplemented Prospectus comply as to form in all material respects with the applicable accounting requirements of the 1934 Act and the rules and regulations under the 1934 Act; and (C) on the basis of certain limited procedures performed through a specified date not more than five business days prior to the date of such letter, namely (i) reading the minute books of the Company; (ii) performing the procedures specified by the American Institute of Certified Public Accountants for a review of interim financial information as described in Statement on Auditing Standards No. 71, "Interim Financial Information" or Statement on Auditing Standards No. 100, "Interim Financial Information", as applicable, on the unaudited financial statements, if any, of the Company incorporated in the Prospectus and on the latest available unaudited financial statements of the Company, if

any, for any calendar quarter subsequent to the date of those incorporated by reference in the Prospectus; and (iii) making inquiries of certain officials of the Company who have responsibility for financial and accounting matters regarding such unaudited financial statements or any specified unaudited amounts derived therefrom (it being understood that the foregoing procedures do not constitute an audit performed in accordance with generally accepted auditing standards and they would not necessarily reveal matters of significance with respect to the comments made in such letter, and accordingly that Deloitte & Touche LLP make no representations as to the sufficiency of such procedures for the Underwriters' purposes), nothing came to their attention that caused them to believe that: (1) any material modifications should be made to the unaudited condensed financial statements, if any, incorporated by reference in the Prospectus, for them to be in conformity with GAAP; (2) such unaudited condensed financial statements do not comply as to form in all material respects with the applicable accounting requirements of the 1934 Act as it applies to Form 10-Q and the related published rules and regulations thereunder; (3) the unaudited amounts for Operating Revenues, Earnings Before Income Taxes and Net Income After Dividends on Preferred Stock and the unaudited Ratio of Earnings to Fixed Charges set forth in the Prospectus do not agree with the amounts set forth in or derived from the unaudited financial statements for the same period; (4) as of a specified date not more than five business days prior to the date of delivery of such letter, there has been any change in the capital stock or long-term debt of the Company or any decrease in net assets as compared with amounts shown in the latest audited balance sheet incorporated by reference in the Prospectus, except in each case for changes or decreases which (i) the Prospectus discloses have occurred or may occur, (ii) are occasioned by the declaration of dividends, (iii) are occasioned by draw-downs under existing pollution control financing arrangements, (iv) are occasioned by draw-downs and regularly scheduled payments of capitalized lease obligations, (v) are occasioned by the purchase or redemption of bonds or stock to satisfy mandatory or optional redemption provisions relating thereto, (vi) are occasioned by the reclassification of current maturities of long-term debt, or (vii) are disclosed in such letter; and (5) the unaudited amounts for Operating Revenues, Earnings Before Income Taxes and Net Income After Dividends on Preferred Stock and the unaudited Ratio of Earnings to Fixed Charges for any calendar quarter subsequent to those set forth in (3) above, which, if available, shall be set forth in such letter, do not agree with the amounts set forth in or derived from the unaudited financial statements for the same period or were not determined on a basis substantially consistent with that of the corresponding audited amounts or ratios included or incorporated by reference in the Prospectus.

(8) On the Closing Date, counsel for the Underwriters shall have been furnished with such documents and opinions as it may reasonably require for the purpose of enabling it to pass upon the issuance and sale of the Senior Notes as herein contemplated and related proceedings, or in order to evidence the accuracy of any of the representations or warranties, or the fulfillment of any of the conditions, herein contained; and all proceedings taken by the Company in connection with the issuance and sale of the Senior Notes as herein contemplated shall be satisfactory in form and substance to the Representatives and Dewey Ballantine LLP, counsel for the Underwriters.

(9) On the Closing Date, the Senior Notes shall have been approved for listing on the New York Stock Exchange upon notice of issuance.

(10) That no amendment or supplement to the Registration Statement, or the Final Supplemented Prospectus filed subsequent to the date of this Agreement (including any filing made by the Company pursuant to Section 13 or 14 of the 1934 Act) shall be unsatisfactory in form to Dewey Ballantine LLP or shall contain information (other than with respect to an amendment or supplement relating solely to the activity of the Underwriters) which, in the reasonable judgment of the Representatives, shall materially impair the marketability of the Senior Notes.

(11) The Company shall have performed its obligations when and as provided under this Agreement.

(12) Evidence that the Insurance Policy has been issued by the Insurer and confirmation that the Senior Notes have been rated at least "Aaa" by Moody's Investors Service, Inc. and at least "AAA" by Standard & Poor's, a division of The McGraw-Hill Companies.

If any condition specified in this Section shall not have been fulfilled when and as required to be fulfilled, this Agreement may be terminated by the Representatives by notice to the Company at any time prior to the Closing Date, and such termination shall be without liability of any party to any other party except as provided in Sections 4, 7 and 9(b) hereof.

SECTION 6. CONDITIONS OF THE OBLIGATIONS OF THE COMPANY. The obligations of the Company shall be subject to the conditions set forth in the first sentence of Section 5(a) and in Section 5(b). In case such conditions shall not have been fulfilled, this Agreement may be terminated by the Company by mailing or delivering written notice thereof to the Representatives. Any such termination shall be without liability of any party to any other party except as otherwise provided in Sections 4, 7 and 9(b) hereof.

SECTION 7. INDEMNIFICATION.

(a) The Company agrees to indemnify and hold harmless each of the Underwriters and each person, if any, who controls any such Underwriter within the meaning of Section 15 of the 1933 Act or Section 20(a) of the 1934 Act, against any and all losses, claims, damages or liabilities, joint or several, to which they or any of them may become subject under the 1933 Act, 1934 Act or otherwise, and to reimburse any such Underwriter and such controlling person or persons, if any, for any legal or other expenses incurred by them in connection with defending any actions, insofar as such losses, claims, damages, liabilities or actions arise out of or are based upon any untrue statement or alleged untrue statement of a material fact contained in any Preliminary Prospectus, the Registration Statement, the Prospectus or the Final Supplemented Prospectus or, if the Company shall furnish to the Underwriters any amendments or any

supplements thereto, or shall make any filings pursuant to Section 13 or 14 of the 1934 Act which are incorporated therein by reference, in any Preliminary Prospectus, the Registration Statement, the Prospectus or the Final Supplemented Prospectus as so amended or supplemented, or arise out of or are based upon any omission or alleged omission to state therein a material fact required to be stated therein or necessary to make the statements therein not misleading, except insofar as such losses, claims, damages, liabilities or actions arise out of or are based upon any such untrue statement or alleged untrue statement or omission or alleged omission which was made in such Registration Statement, Preliminary Prospectus, Prospectus or Final Supplemented Prospectus in reliance upon and in conformity with information furnished in writing to the Company by, or through the Representatives on behalf of, any Underwriter for use therein and except that this indemnity with respect to the Preliminary Prospectus, the Prospectus or the Final Supplemented Prospectus, if the Company shall have furnished any amendment or supplement thereto, shall not inure to the benefit of any Underwriter (or of any person controlling such Underwriter) on account of any losses, claims, damages, liabilities or actions arising from the sale of the Senior Notes to any person if a copy of the Preliminary Prospectus, the Prospectus or the Final Supplemented Prospectus (exclusive of documents incorporated therein by reference pursuant to Item 12 of Form S-3), as the same may then be amended or supplemented, shall not have been sent or given by or on behalf of such Underwriter to such person with or prior to the written confirmation of the sale involved and the untrue statement or alleged untrue statement or omission or alleged omission was corrected in the Preliminary Prospectus, the Prospectus or the Final Supplemented Prospectus as supplemented or amended at the time of such confirmation. Each Underwriter agrees, within ten days after the receipt by it of notice of the commencement of any action in respect of which indemnity may be sought by it, or by any person controlling it, from the Company on account of its agreement contained in this Section 7, to notify the Company in writing of the commencement thereof but the omission of such Underwriter so to notify the Company of any such action shall not release the Company from any liability which it may have to such Underwriter or to such controlling person otherwise than on account of the indemnity agreement contained in this Section 7. In case any such action shall be brought against an Underwriter or any such person controlling such Underwriter and such Underwriter shall notify the Company of the commencement thereof as above provided, the Company shall be entitled to participate in (and, to the extent that it shall wish, including the selection of counsel, to direct) the defense thereof, at its own expense. In case the Company elects to direct such defense and select such counsel, any Underwriter or controlling person shall have the right to employ its own counsel, but, in any such case, the fees and expenses of such counsel shall be at the expense of such Underwriter or such controlling person unless the employment of such counsel has been authorized in writing by the Company in connection with defending such action. No indemnifying party shall, without the written consent of the indemnified party, effect the settlement or compromise of, or consent to the entry of any judgment with respect to, any pending or threatened action or claim in

respect of which indemnification may be sought hereunder (whether or not the indemnified party is an actual or potential party to such action or claim) unless such settlement, compromise or judgment (i) includes an unconditional release of the indemnified party from all liability arising out of such action or claim and (ii) does not include any statement as to, or an admission of, fault, culpability or a failure to act, by or on behalf of any indemnified party. In no event shall any indemnifying party have any liability or responsibility in respect of the settlement or compromise of, or consent to the entry of any judgment with respect to, any pending or threatened action or claim effected without its prior written consent.

(b) Each Underwriter agrees severally and not jointly, to indemnify and hold harmless the Company, its directors and such of its officers who have signed the Registration Statement and each person, if any, who controls the Company within the meaning of Section 15 of the 1933 Act or Section 20(a) of the 1934 Act to the same extent and upon the same terms as the indemnity agreement of the Company set forth in Section 7(a) hereof, but only with respect to alleged untrue statements or omissions made in the Registration Statement, the Preliminary Prospectus, the Prospectus or the Final Supplemented Prospectus, or such documents as amended or supplemented, in reliance upon and in conformity with information furnished in writing to the Company by, or through the Representatives on behalf of, such Underwriter for use therein.

SECTION 8. REPRESENTATIONS, WARRANTIES AND AGREEMENTS TO SURVIVE DELIVERY. All representations, warranties and agreements contained in this Agreement, or contained in certificates of officers of the Company submitted pursuant hereto, shall remain operative and in full force and effect, regardless of any investigation made by or on behalf of any Underwriter or controlling person, or by, or on behalf of the Company and shall survive delivery of the Senior Notes to the Underwriters.

SECTION 9. TERMINATION OF AGREEMENT.

(a) The Representatives may terminate this Agreement, by notice to the Company, at any time at or prior to the Closing Date if (i) trading in securities on the New York Stock Exchange shall have been generally suspended or there shall have been a material disruption in settlement of securities generally, (ii) minimum or maximum ranges for prices shall have been generally established on the New York Stock Exchange by the Commission or by the New York Stock Exchange, (iii) a general banking moratorium shall have been declared by federal or New York State authorities, or (iv) there shall have occurred any outbreak or escalation of major hostilities in which the United States is involved, any declaration of war by the United States Congress or any other substantial national or international calamity, crisis or emergency (including, without limitation, acts of terrorism) affecting the United States, in any such case provided for in clauses (i) through (iv) with the result that, in the reasonable judgment of the Representatives, the marketability of the Senior Notes shall have been materially impaired.

(b) If this Agreement shall be terminated by the Representatives pursuant to subsection (a) above or because of any failure or refusal on the part of the Company to comply with the terms or to fulfill any of the conditions of this Agreement, or if for any reason the Company shall be unable to perform its obligations under this Agreement, then in any such case, the Company will reimburse the Underwriters for the reasonable fees and disbursements of Dewey Ballantine LLP and for the out of pocket expenses (in an amount not exceeding $10,000) reasonably incurred by the Underwriters in making preparations for the purchase, sale and delivery of the Senior Notes and, upon such reimbursement, the Company shall be absolved from any further liability hereunder, except as provided in Sections 4 and 7.

SECTION 10. DEFAULT BY AN UNDERWRITER. If an Underwriter shall fail on the Closing Date to purchase the Senior Notes that it is obligated to purchase under this Agreement (the "Defaulted Securities"), the Representatives shall have the right, within 24 hours thereafter, to make arrangements for the non-defaulting Underwriters, or any other underwriters, to purchase all, but not less than all, of the Defaulted Securities in such amounts as may be agreed upon and upon the terms herein set forth. If, however, the Representatives shall not have completed such arrangements within such 24-hour period, then:

(a) if the principal amount of Defaulted Securities does not exceed 10% of the Senior Notes, the non-defaulting Underwriters shall be obligated, severally and not jointly, to purchase the full amount thereof in the proportion that their respective underwriting obligations hereunder bear to the underwriting obligations of all non-defaulting Underwriters, or

(b) if the principal amount of Defaulted Securities exceeds 10% of the Senior Notes, this Agreement shall terminate without liability on the part of any non-defaulting Underwriter.

No action taken pursuant to this Section shall relieve any defaulting Underwriter from liability in respect of its default.

In the event of any such default which does not result in a termination of this Agreement, either the Representatives or the Company shall have the right to postpone the Closing Date for a period not exceeding seven days in order to effect any required changes in the Registration Statement or Final Supplemented Prospectus or in any other documents or arrangements.

SECTION 11. NOTICES. All notices and other communications hereunder shall be in writing and shall be deemed to have been duly given if mailed or transmitted by any standard form of telecommunication. Notices to the Underwriters shall be directed to the Underwriters at Morgan Stanley & Co. Incorporated, 1585 Broadway, New York, New York 10036, attn: Bradford Hart or Wachovia Capital Markets, LLC, One First Union Center, TW-8, 301 South College Street, Charlotte, North Carolina 28288, attn: Jim Williams, and notices to the Company shall be mailed to

One Energy Place, Pensacola, Florida, 32520-0100, Attention: Corporate Secretary, with a copy to Southern Company Services, Inc., 270 Peachtree Street, N.W., Atlanta, Georgia 30303, Attention: David B. Brooks.

SECTION 12. PARTIES. This Agreement shall inure to the benefit of and be binding upon the Underwriters, the Company and their respective successors. Nothing expressed or mentioned in this Agreement is intended or shall be construed to give any person, firm or corporation, other than the Underwriters and the Company and their respective successors and the controlling persons and officers and directors referred to in Section 7 and their heirs and legal representatives, any legal or equitable right, remedy or claim under or in respect of this Agreement or any provision herein contained. This Agreement and all conditions and provisions hereof are intended to be for the sole and exclusive benefit of the Underwriters and the Company and their respective successors, and said controlling persons and officers and directors and their heirs and legal representatives, and for the benefit of no other person, firm or corporation. No purchaser of Senior Notes from any of the Underwriters shall be deemed to be a successor by reason merely of such purchase.

SECTION 13. GOVERNING LAW AND TIME. This Agreement shall be governed by and construed in accordance with the laws of the State of New York applicable to agreements made and to be performed in said State. Except as otherwise set forth herein, specified times of day refer to New York City time.

SECTION 14. COUNTERPARTS. This Agreement may be executed by any one or more of the parties hereto in any number of counterparts, each of which shall be deemed to be an original, but all such respective counterparts shall together constitute one and the same instrument.

If the foregoing is in accordance with your understanding of our agreement, please sign and return to the Company a counterpart hereof, whereupon this instrument, along with all counterparts, will become a binding agreement between the Underwriters and the Company in accordance with its terms.

Very truly yours,

GULF POWER COMPANY

to the Underwriting Agreement.

GULF POWER COMPANY
Series H 5.25% Senior Notes due July 15, 2033

Ladies and Gentlemen:

We have acted as general counsel to Gulf Power Company (the "Company") in connection with (i) the Company's issuance and sale of $60,000,000 aggregate principal amount of its Series H 5.25% Senior Notes due July 15, 2033 (the "Notes") pursuant to a Senior Note Indenture dated as of January 1, 1998, by and between the Company and JPMorgan Chase Bank (formerly known as The Chase Manhattan Bank), as trustee (the "Trustee"), as heretofore supplemented and as further supplemented by the Eighth Supplemental Indenture dated as of July 22, 2003(collectively, the "Indenture"); and (ii) the purchase by the Underwriters of the Notes pursuant to the terms of an Underwriting Agreement (the "Underwriting Agreement") dated July 10, 2003, among the Company and the Underwriters named in Schedule I thereof (the "Underwriters") for whom you are acting as Representatives. This opinion is being delivered to you pursuant to Section 5(c)(1) thereof.

All capitalized terms not otherwise defined herein shall have the meanings set forth in the Underwriting Agreement.

In rendering the opinions expressed below, we have examined the registration statement on Form S-3 (File Nos. 333-104449, 333-104449-01 and 333-104449-02) pertaining to the Notes (the "Registration Statement") filed under the

Securities Act of 1933, as amended (the "Act"), and the prospectus dated April 25, 2003 as supplemented by a final prospectus supplement relating to the Notes dated July 10, 2003 (the "Final Supplemented Prospectus"), which pursuant to Form S-3 incorporates by reference the Annual Report on Form 10-K of the Company for the fiscal year ended December 31, 2002, the Quarterly Report on Form 10-Q of the Company for the quarter ended March 31, 2003 and the Current Reports on Form 8-K of the Company dated March 21, 2003, July __, 2003 and July __, 2003 (the "Exchange Act Documents"), each as filed under the Securities Exchange Act of 1934, as amended (the "Exchange Act").

In addition, we have examined, and have relied as to matters of fact upon, the documents delivered to you at the closing (except the certificate representing the Notes, of which we have examined a specimen), and we have made such other and further investigations as we deemed necessary to express the opinions hereinafter set forth. In such examination, we have assumed the genuineness of all signatures, the legal capacity of natural persons, the authenticity of all documents submitted to us as originals, the conformity to original documents of all documents submitted to us as certified or photostatic copies and the authenticity of the originals of such latter documents.

The Indenture and the Underwriting Agreement are herein referred to collectively as the "Agreements".

Based upon the foregoing, and subject to the qualifications and limitations stated herein, we are of the opinion, relying as to matters of Georgia law and the federal law of the United States upon the opinion dated the date hereof rendered to you by Troutman Sanders LLP and relying as to matters of New York law upon the opinion dated the date hereof rendered to you by Dewey Ballantine LLP, that:

1. The Company has been duly incorporated and is validly existing as a corporation in good standing under the laws of the State of Maine, is duly qualified to carry on its business as a foreign corporation under the laws of the States of Florida, Georgia and Mississippi, and has due corporate authority to carry on the public utility business in which it is engaged, to own and operate the properties used by it in such business and to enter into and perform its obligations under the Agreements and the Notes.

2. The execution, delivery and performance by the Company of the Underwriting Agreement have been duly authorized by all necessary corporate action, and the Underwriting Agreement has been duly executed and delivered by the Company.

3. All orders, consents or other authorizations or approvals of the Florida Public Service Commission and the Commission legally required for the issuance and sale of the Notes have been obtained; such orders are sufficient for the issuance and sale of the Notes; the issuance and sale of the Notes conform in all material respects with the terms of such orders; and no other order, consent or other authorization or approval of any Florida or United States governmental body (other than in connection or in compliance with the provisions of the securities or "blue sky" laws of any jurisdiction, as

to which we express no opinion) is legally required for the issuance and sale of the Notes in accordance with the terms of the Underwriting Agreement.

4. The Indenture has been duly authorized, executed and delivered by the Company and, assuming the due authorization, execution and delivery thereof by the Trustee, constitutes a valid and legally binding instrument of the Company, enforceable against the Company in accordance with its terms, subject to the qualifications that the enforceability of the Company's obligations under the Indenture may be limited by bankruptcy, insolvency, reorganization, moratorium and other similar laws relating to or affecting creditors' rights generally and by general principles of equity (regardless of whether such enforceability is considered in a proceeding in equity or at law); and the Indenture conforms as to legal matters in all material respects to the description thereof in the Final Supplemented Prospectus.

5. The Notes have been duly authorized and executed by the Company and, when authenticated by the Trustee in the manner provided in the Indenture and delivered to and paid for by the Underwriters pursuant to the Underwriting Agreement, will constitute valid and binding obligations of the Company, enforceable against the Company in accordance with their terms, subject to the qualifications that the enforceability of the Company's obligations under the Notes may be limited by bankruptcy, insolvency, reorganization, moratorium and other similar laws relating to or affecting creditors' rights generally and by general principles of equity (regardless of whether such enforceability is considered in a proceeding in equity or at law); and the Notes conform as to legal matters in all material respects to the description thereof in the Final Supplemented Prospectus.

6. The Indenture has been duly qualified under the Trust Indenture Act of 1939, as amended.

We have not independently verified the accuracy, completeness or fairness of the statements made or included in the Registration Statement, the Final Supplemented Prospectus or the Exchange Act Documents and take no responsibility therefor, except as and to the extent set forth in paragraphs 4 and 5 above. In the course of the preparation by the Company of the Registration Statement, the Final Supplemented Prospectus and the Exchange Act Documents, we participated in conferences with certain officers and employees of the Company, with other counsel for the Company, with representatives of Deloitte & Touche LLP and with your counsel. Based upon our examination of the Registration Statement, the Final Supplemented Prospectus and the Exchange Act Documents, our investigations made in connection with the preparation of the Registration Statement, the Final Supplemented Prospectus and the Exchange Act Documents and our participation in the conferences referred to above, (i) we are of the opinion that the Registration Statement, as of its effective date, and the Final Supplemented Prospectus, as of July 10, 2003, complied as to form in all material respects with the requirements of the Act and the applicable rules and regulations of the Commission thereunder and that the Exchange Act Documents, as of their respective dates of filing with the Commission, complied as to form in all material respects with the

requirements of the Exchange Act and the applicable rules and regulations of the Commission thereunder, except that in each case we express no opinion as to the financial statements or other financial or statistical data contained or incorporated by reference in the Registration Statement, the Final Supplemented Prospectus or the Exchange Act Documents, and (ii) nothing came to our attention which gives us reason to believe that the Registration Statement, as of its effective date (including the Exchange Act Documents on file with the Commission as of such date), contained any untrue statement of a material fact or omitted to state any material fact required to be stated therein or necessary in order to make the statements therein not misleading, or that the Final Supplemented Prospectus (including the Exchange Act Documents) contained, as of its date, or contains, on the date hereof, any untrue statement therein of a material fact or omitted, as of its date, or omits, on the date hereof, to state a material fact necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading, except that in each case we express no opinion or belief with respect to the financial statements or other financial or statistical data contained or incorporated by reference in the Registration Statement, the Final Supplemented Prospectus or the Exchange Act Documents and with respect to information set forth in the Final Supplemented Prospectus under the captions "Description of the Series H Senior Notes — Book-Entry Only Issuance — The Depository Trust Company" and "The Policy and the Insurer" or in Appendix A thereto.

We are members of the Florida Bar and we do not express any opinion herein concerning any law other than the law of the States of Maine, Florida and Mississippi and, to the extent set forth herein, the laws of the States of Georgia and New York and the federal law of the United States.

This opinion is rendered to you in connection with the above-described transaction. This opinion may not be relied upon by you for any other purpose or relied upon by or furnished to any other person without our prior written consent, except that Troutman Sanders LLP and Dewey Ballantine LLP may rely on this opinion in giving their opinions pursuant to Section 5(c) of the Underwriting Agreement insofar as such opinions relates to matters of Maine, Florida and Mississippi law.

Yours very truly,

BEGGS & LANE

As Representatives of the Underwriters named on Schedule I
to the Underwriting Agreement.

GULF POWER COMPANY
Series H 5.25% Senior Notes due July 15, 2033

Ladies and Gentlemen:

We have acted as counsel to Gulf Power Company (the "Company") in connection with (i) the Company's issuance of $60,000,000 aggregate principal amount of its Series H 5.25% Senior Notes due July 15, 2033 (the "Notes") pursuant to a Senior Note Indenture dated as of January 1, 1998, by and between the Company and JPMorgan Chase Bank (formerly known as The Chase Manhattan Bank), as trustee (the "Trustee"), as heretofore supplemented and as further supplemented by the Eighth Supplemental Indenture dated as of July 22, 2003 (collectively, the "Indenture"); and (ii) the purchase by you of the Notes pursuant to the terms of an Underwriting Agreement (the "Underwriting Agreement") dated July 10, 2003, among the Company and the Underwriters named in Schedule I thereof (the "Underwriters") for whom you are acting as Representatives. This opinion is being delivered to you pursuant to Section 5(c)(2) thereof.

All capitalized terms not otherwise defined herein shall have the meanings set forth in the Underwriting Agreement.

In rendering the opinions expressed below, we have examined the registration statement on Form S-3 (File Nos. 333-104449, 333-104449-01 and 333-104449-02) pertaining to the Notes (the "Registration Statement") filed under the Securities Act of 1933, as amended (the "Act"), and the prospectus dated April 25, 2003 as supplemented by a final prospectus supplement dated July 10, 2003 (the "Final Supplemented Prospectus"), which pursuant to Form S-3 incorporates by reference the Annual Report on Form 10-K of the Company for the fiscal year ended December 31, 2002, the Quarterly Report on Form 10-Q for the quarter ended March 31, 2003 and the Current Reports on Form 8-K of the Company dated March 21, 2003, July ___, 2003 and July __, 2003 (the "Exchange Act Documents"), each as filed under the Securities Exchange Act of 1934, as amended (the "Exchange Act").

In addition, we have examined, and have relied as to matters of fact upon, the documents delivered to you at the closing (except the certificate representing the Notes, of which we have examined a specimen), and we have made such other and further investigations as we deemed necessary to express the opinions hereinafter set forth. In such examination, we have assumed the genuineness of all signatures, the legal capacity of natural persons, the authenticity of all documents submitted to us as originals, the conformity to original documents of all documents submitted to us as certified or photostatic copies, and the authenticity of the originals of such latter documents.

The Indenture and the Underwriting Agreement are herein referred to collectively as the "Agreements".

Based upon the foregoing, and subject to the qualifications and limitations stated herein, we are of the opinion, relying as to matters of Maine, Florida and Mississippi law upon the opinion dated the date hereof rendered to you by Beggs & Lane, a Registered Limited Liability Partnership ("Beggs & Lane"), and relying as to matters of New York law upon the opinion dated the date hereof rendered to you by Dewey Ballantine LLP, that:

1. The Company has been duly incorporated and is validly existing as a corporation in good standing under the laws of the State of Maine, is duly qualified to carry on its business as a foreign corporation under the laws of the States of Florida, Georgia and Mississippi, and has due corporate authority to carry on the public utility business in which it is engaged, to own and operate the properties used by it in such business and to enter into and perform its obligations under the Agreements and the Notes.

2. The execution, delivery and performance by the Company of the Underwriting Agreement have been duly authorized by all necessary corporate action, and the Underwriting Agreement has been duly executed and delivered by the Company.

3. All orders, consents or other authorizations or approvals of the Florida Public Service Commission and the Commission legally required for the issuance and sale of the Notes have been obtained; such orders are sufficient for the issuance and sale of the Notes; the issuance and sale of the Notes conform in all material respects with the

terms of such orders; and no other order, consent or other authorization or approval of any Florida or United States governmental body (other than in connection or in compliance with the provisions of the securities or "blue sky" laws of any jurisdiction, as to which we express no opinion) is legally required for the issuance and sale of the Notes in accordance with the terms of the Underwriting Agreement.

4. The Indenture has been duly authorized, executed and delivered by the Company and, assuming the due authorization, execution and delivery thereof by the Trustee, constitutes a valid and legally binding instrument of the Company, enforceable against the Company in accordance with its terms, subject to the qualifications that the enforceability of the Company's obligations under the Indenture may be limited by bankruptcy, insolvency, reorganization, moratorium and other similar laws relating to or affecting creditors' rights generally and by general principles of equity (regardless of whether such enforceability is considered in a proceeding in equity or at law); and the Indenture conforms as to legal matters in all material respects to the description thereof in the Final Supplemented Prospectus.

5. The Notes have been duly authorized and executed by the Company and, when authenticated by the Trustee in the manner provided in the Indenture and delivered to and paid for by the Underwriters pursuant to the Underwriting Agreement, will constitute valid and binding obligations of the Company, enforceable against the Company in accordance with their terms, subject to the qualifications that the enforceability of the Company's obligations under the Notes may be limited by bankruptcy, insolvency, reorganization, moratorium and other similar laws relating to or affecting creditors' rights generally and by general principles of equity (regardless of whether such enforceability is considered in a proceeding in equity or at law); and the Notes conform as to legal matters in all material respects to the description thereof in the Final Supplemented Prospectus.

6. The Indenture has been duly qualified under the Trust Indenture Act of 1939, as amended.

We have not independently verified the accuracy, completeness or fairness of the statements made or included in the Registration Statement, the Final Supplemented Prospectus or the Exchange Act Documents and take no responsibility therefor, except as and to the extent set forth in paragraphs 4 and 5 above. In the course of the preparation by the Company of the Registration Statement, the Final Supplemented Prospectus and the Exchange Act Documents, we participated in conferences with certain officers and employees of the Company, with other counsel for the Company, with representatives of Deloitte & Touche LLP and with your counsel. Based upon our examination of the Registration Statement, the Final Supplemented Prospectus and the Exchange Act Documents, our investigations made in connection with the preparation of the Registration Statement, the Final Supplemented Prospectus and the Exchange Act Documents and our participation in the conferences referred to above, (i) we are of the opinion that the Registration Statement, as of its effective date, and the Final Supplemented Prospectus, as of July 10, 2003, complied as to form in all material

respects with the requirements of the Act and the applicable rules and regulations of the Commission thereunder and that the Exchange Act Documents, as of their respective dates of filing with the Commission, complied as to form in all material respects with the relevant requirements of the Exchange Act and the applicable rules and regulations of the Commission thereunder, except that in each case we express no opinion as to the financial statements or other financial or statistical data contained or incorporated by reference in the Registration Statement, the Final Supplemented Prospectus or the Exchange Act Documents, and (ii) nothing came to our attention which gives us reason to believe that the Registration Statement, as of its effective date (including the Exchange Act Documents on file with the Commission as of such date), contained any untrue statement of a material fact or omitted to state any material fact required to be stated therein or necessary in order to make the statements therein not misleading, or that the Final Supplemented Prospectus (including the Exchange Act Documents) contained, as of its date, or contains, on the date hereof, any untrue statement of a material fact or omitted, as of its date, or omits, as of the date hereof, to state a material fact necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading, except that in each case we express no opinion or belief with respect to the financial statements or other financial or statistical data contained or incorporated by reference in the Registration Statement, the Final Supplemented Prospectus or the Exchange Act Documents and with respect to information set forth in the Final Supplemented Prospectus under the captions "Description of the Series H Senior Notes — Book-Entry Only Issuance — The Depository Trust Company" and "The Policy and the Insurer" or in Appendix A thereto.

We are members of the State Bar of Georgia and we do not express any opinion herein concerning any law other than the law of the State of Georgia and the federal law of the United States and, to the extent set forth herein, the laws of the States of Maine, Florida, Mississippi and New York.

This opinion is rendered to you in connection with the above-described transaction. This opinion may not be relied upon by you for any other purpose or relied upon by or furnished to any other person without our prior written consent, except that Beggs & Lane may rely on this opinion in giving its opinion pursuant to Section 5(c) of the Underwriting Agreement insofar as such opinion relates to matters of Georgia law and the federal law of the United States and Dewey Ballantine LLP may rely on this opinion in giving its opinion pursuant to Section 5(c) of the Underwriting Agreement insofar as such opinion relates to matters of Georgia law.

Yours very truly,

TROUTMAN SANDERS LLP

New York, NY 10020-1001

Gulf Power Company
Series H 5.25% Senior Notes
due July 15, 2033

Ladies and Gentlemen:

We have acted as counsel to JPMorgan Chase Bank (formerly known as The Chase Manhattan Bank) (the "Bank") in connection with (a) the Senior Note Indenture, dated as of January 1, 1998 as heretofore supplemented (the "Original Indenture"), between Gulf Power Company (the "Company") and the Bank, as Trustee, and (b) the Eighth Supplemental Indenture dated as of July 22, 2003 (together with the Original Indenture, herein called the "Indenture"), between the Company and the Bank, as Trustee.

In that connection, we have examined originals, or copies certified or otherwise identified to our satisfaction, of such documents, records and other instruments as we have deemed necessary or appropriate for the purpose of this opinion, including

copies of the Indenture and certain resolutions adopted by the Board of Directors of the Bank.

Based upon the foregoing, we are of the opinion that:

(i) the Bank has been duly incorporated and is validly existing as a banking corporation in good standing under the laws of the State of New York;

(ii) the Bank has the corporate trust power and authority to execute, deliver and perform its duties under the Indenture, has duly executed and delivered the Indenture, and, insofar as the laws governing the trust powers of the Bank are concerned and assuming due authorization, execution and delivery thereof by the Company, the Indenture constitutes a legal, valid and binding agreement of the Bank, enforceable against the Bank in accordance with its terms, subject to applicable bankruptcy, insolvency, fraudulent transfer, reorganization, moratorium or other laws affecting creditors' rights generally from time to time in effect and to general principles of equity (including, without limitation, concepts of materiality, reasonableness, good faith and fair dealing), regardless of whether considered in a proceeding in equity or at law;

(iii) the execution, delivery and performance by the Bank of the Indenture do not conflict with or constitute a breach of the charter or bylaws of the Bank; and

(iv) no approval, authorization or other action by, or filing with, any governmental authority of the United States of America or the State of New York having jurisdiction over the trust powers of the Bank is required in connection with the execution and delivery by the Bank of the Indenture or the performance by the Bank of its duties thereunder, except such as have been obtained, taken or made.

We are admitted to practice only in the State of New York, and we express no opinion as to matters governed by any laws other than the laws of the State of New York and the Federal law of the United States of America. We are furnishing this opinion to you solely for your benefit. This opinion is not to be relied upon by any other person or used, circulated, quoted or otherwise referred to for any other purpose.

Very truly yours,

CRAVATH, SWAINE & MOORE LLP

As Representatives of the Underwriters named on Schedule I
to the Underwriting Agreement.

GULF POWER COMPANY
Series H 5.25% Senior Notes
due July 15, 2033

Ladies and Gentlemen:

We have represented the Underwriters (as hereinafter defined) in connection with (i) the issuance by Gulf Power Company (the "Company") of $60,000,000 of its Series H 5.25% Senior Notes due July 15, 2033 (the "Notes") pursuant to a Senior Note Indenture dated as of January 1, 1998, by and between the Company and JPMorgan Chase Bank (formerly known as The Chase Manhattan Bank), as trustee (the "Trustee"), as heretofore supplemented and as further supplemented by the Eighth Supplemental Indenture dated as of July 22, 2003 (collectively, the "Indenture"); and (ii) the purchase by the Underwriters of the Notes pursuant to the terms of an Underwriting Agreement (the "Underwriting Agreement") dated July 10, 2003, among the Company and the underwriters named in Schedule I thereof (the "Underwriters") for whom you are acting as Representatives. This opinion is being delivered to you pursuant to Section 5(c)(4) thereof.

All capitalized terms not otherwise defined herein shall have the meanings set forth in the Underwriting Agreement.

In rendering the opinions expressed below, we have examined the registration statement on Form S-3 (File Nos. 333-104449, 333-104449-01 and 333-104449-02) pertaining to the Notes (the "Registration Statement") filed under the Securities Act of 1933, as amended (the "Act"), and the prospectus dated April 25, 2003 as supplemented by a final prospectus supplement dated July 10, 2003 (the "Final Supplemented Prospectus"), which pursuant to Form S-3 incorporates by reference the Annual Report on Form 10-K of the Company for the fiscal year ended December 31, 2002, the Quarterly Report on Form 10-Q for the quarter ended March 31, 2003 and the Current Reports on Form 8-K of the Company dated March 21, 2003, July ___, 2003 and July __, 2003 (the "Exchange Act Documents"), each as filed under the Securities Exchange Act of 1934, as amended (the "Exchange Act").

In addition, we have examined, and have relied as to matters of fact upon, the documents delivered to you at the closing (except the certificate representing the Notes, of which we have examined a specimen), and we have made such other and further investigations as we deemed necessary to express the opinions hereinafter set forth. In such examination, we have assumed the genuineness of all signatures, the legal capacity of natural persons, the authenticity of all documents submitted to us as originals, the conformity to original documents of all documents submitted to us as certified or photostatic copies, and the authenticity of the originals of such latter documents.

The Indenture and the Underwriting Agreement are herein referred to as the "Agreements".

Based upon the foregoing, and subject to the qualifications and limitations stated herein, we are of the opinion, relying as aforesaid and as to all matters covered hereby which are governed by or dependent upon the laws of the States of Maine, Florida and Mississippi upon the opinion of Beggs & Lane, a Registered Limited Liability Partnership ("Beggs & Lane"), dated the date hereof and addressed to you and as to all matters covered hereby which are governed by or dependent upon the law of the State of Georgia upon the opinion of Troutman Sanders LLP dated the date hereof and addressed to you, that:

1. The Company has been duly incorporated and is validly existing as a corporation in good standing under the laws of the State of Maine, is duly qualified to carry on its business as a foreign corporation under the laws of the States of Florida, Georgia and Mississippi, and has due corporate authority to carry on the public utility business in which it is engaged, to own and operate the properties used by it in such business and to enter into and perform its obligations under the Agreements and the Notes.

2. The execution, delivery and performance by the Company of the Underwriting Agreement have been duly authorized by all necessary corporate action, and the Underwriting Agreement has been duly executed and delivered by the Company.

3. All orders, consents, or other authorizations or approvals of the Florida Public Service Commission and the Commission legally required for the issuance

and sale of the Notes have been obtained; such orders are sufficient for the issuance and sale of the Notes; the issuance and sale of the Notes conform in all material respects with the terms of such orders; and no other order, consent or other authorization or approval of any Florida or United States governmental body (other than in connection or in compliance with the provisions of the securities or "blue sky" laws of any jurisdiction, as to which we express no opinion) is legally required for the issuance and sale of the Notes in accordance with the terms of the Underwriting Agreement.

4. The Indenture has been duly authorized, executed and delivered by the Company and, assuming the due authorization, execution and delivery thereof by the Trustee, constitutes a valid and legally binding instrument of the Company, enforceable against the Company in accordance with its terms, subject to the qualifications that the enforceability of the Company's obligations under the Indenture may be limited by bankruptcy, insolvency, reorganization, moratorium and other similar laws relating to or affecting creditors' rights generally and by general principles of equity (regardless of whether such enforceability is considered in a proceeding in equity or at law); and the Indenture conforms as to legal matters in all material respects to the description thereof in the Final Supplemented Prospectus.

5. The Notes have been duly authorized and executed by the Company and, when authenticated by the Trustee in the manner provided in the Indenture and delivered to and paid for by the Underwriters pursuant to the Underwriting Agreement, will constitute valid and binding obligations of the Company enforceable against the Company in accordance with their terms, subject to the qualifications that the enforceability of the Company's obligations under the Notes may be limited by bankruptcy, insolvency, reorganization, moratorium and other similar laws relating to or affecting creditors' rights generally and by general principles of equity (regardless of whether such enforceability is considered in a proceeding in equity or at law); and the Notes conform as to legal matters in all material respects to the description thereof in the Final Supplemented Prospectus.

6. The Indenture has been duly qualified under the Trust Indenture Act of 1939, as amended.

We have not independently verified the accuracy, completeness or fairness of the statements made or included in the Registration Statement, the Final Supplemented Prospectus or the Exchange Act Documents and take no responsibility therefor, except as and to the extent set forth in paragraphs 4 and 5 above. In the course of the preparation by the Company of the Registration Statement, the Final Supplemented Prospectus and the Exchange Act Documents, we participated in conferences with certain officers and employees of the Company, with representatives of Deloitte & Touche LLP and with counsel to the Company. Based upon our examination of the Registration Statement, the Final Supplemented Prospectus and the Exchange Act Documents, our investigations made in connection with the preparation of the Registration Statement and the Final Supplemented Prospectus and our participation in the conferences referred to above, (i) we are of the opinion that the Registration Statement, as of its effective date, and the

Final Supplemented Prospectus, as of July 10, 2003, complied as to form in all material respects with the requirements of the Act and the applicable rules and regulations of the Commission thereunder and that the Exchange Act Documents, as of their respective dates of filing with the Commission, complied as to form in all material respects with the relevant requirements of the Exchange Act and the applicable rules and regulations of the Commission thereunder, except that in each case we express no opinion as to the financial statements or other financial or statistical data contained or incorporated by reference in the Registration Statement, the Final Supplemented Prospectus or the Exchange Act Documents, and (ii) nothing came to our attention which gives us reason to believe that the Registration Statement, as of its effective date (including the Exchange Act Documents on file with the Commission as of such date), contained any untrue statement of a material fact or omitted to state any material fact required to be stated therein or necessary in order to make the statements therein not misleading, or that the Final Supplemented Prospectus (including the Exchange Act Documents) contained, as of its date, or contains, on the date hereof, any untrue statement of a material fact or omitted, as of its date, or omits, on the date hereof, to state a material fact necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading, except that in each case we express no opinion or belief with respect to the financial statements or other financial or statistical data contained or incorporated by reference in the Registration Statement, the Final Supplemented Prospectus or the Exchange Act Documents and with respect to information set forth in the Final Supplemented Prospectus under the captions "Description of the Series H Senior Notes —Book-Entry Only Issuance —The Depository Trust Company" and "The Policy and the Insurer" or in Appendix A thereto.

We are members of the State Bar of New York and we do not express any opinion herein concerning any law other than the law of the State of New York and the federal law of the United States, and to the extent set forth herein, the law of the States of Maine, Florida, Georgia and Mississippi.

This opinion is rendered solely to you in connection with the above matter. This opinion may not be relied upon by you for any other purpose or relied upon by or furnished to any other person without our prior written consent except that Beggs & Lane and Troutman Sanders LLP may rely on this opinion in giving their opinions pursuant to Section 5(c) of the Underwriting Agreement, insofar as such opinions relate to matters of New York law, and Troutman Sanders LLP may rely on this opinion in giving its opinion pursuant to Sections 102, 302 and 904 of the Indenture, insofar as such opinion relates to matters of New York law.

Very truly yours,

DEWEY BALLANTINE LLP

Schedule V

Letterhead of XL CAPITAL ASSURANCE INC.

July __, 2003

To Each of the Addressees Listed
on the Attached Schedule A

GULF POWER COMPANY
Series H 5.25% Senior Notes
due July 15, 2033

Ladies and Gentlemen:

I am [Associate] General Counsel of XL Capital Assurance Inc., a New York stock insurance corporation (the "Corporation"), and have acted as counsel to the Corporation in connection with the issuance of Financial Guaranty Insurance Policy No. [ ] (the "Policy") relating to the above-captioned notes (the "Notes").

In so acting, I have examined a copy of (a) the Policy, (b) the Insurance and Indemnity Agreement, dated as of [ ] (the "Insurance Agreement"), among [ ], (c) the Indemnification Agreement, dated as of [ ] (the "Indemnification Agreement"), among [ ], (d) information under the heading "The Policy and the Insurer" contained in the Prospectus of Gulf Power Company dated April 25, 2003, as supplemented by a Prospectus Supplement dated July 10, 2003 relating to the Notes (the "Final Supplemented Prospectus") and (e) such other relevant documents as I have deemed necessary.

Based upon the foregoing, I am of the following opinion:

1. The Corporation is a stock insurance corporation, duly incorporated and validly existing under the laws of the State of New York and is licensed and authorized to issue the Policy and to perform its obligations under the Policy under the laws of the State of New York.

2. The Policy, the Insurance Agreement and the Indemnification Agreement (collectively, the "Insurance Documents") have been duly executed, and

the Policy, and assuming due authorization, execution and delivery of the Insurance Agreement and the Indemnification Agreement by the parties thereto (other than the Corporation), the Insurance Agreement and the Indemnification Agreement are valid and binding obligations of the Corporation enforceable in accordance with their terms except that the enforcement of the Insurance Documents may be limited by laws relating to bankruptcy, insolvency, reorganization, moratorium, receivership and other similar laws affecting creditors' rights generally and by general principles of equity (regardless of whether such enforceability is considered in a proceeding in equity or at law) and the enforceability of rights to indemnification under the Insurance Agreement and the Indemnification Agreement may be subject to limitations of public policy under applicable securities laws.

3. The execution, delivery and performance by the Corporation of its obligations under the Insurance Documents do not contravene any provision of the charter or by-laws of the Corporation. The execution, delivery and performance by the Corporation of its obligations under the Insurance Documents do not, to the extent that either of the following would affect the validity or enforceability of any of the Insurance Documents, (a) contravene any law or government regulation or order presently binding on the Corporation or (b) contravene any provision of or constitute a default under any indenture, contract or other instrument to which the Corporation is a party or by which the Corporation is bound.

4. The Policy is exempt from the registration requirements of the Securities Act of 1933, as amended (the "Act").

5. The information in the Final Supplemented Prospectus under the heading "The Policy and the Insurer" is limited and does not purport to provide the scope of disclosure required to be included in a prospectus with respect to a registrant under the Act in connection with a public offering and sale of securities of such registrant. Within such limited scope of disclosure, however, there has not come to my attention any information that would cause me to believe that the description of the Corporation referred to above, as of the date of the Final Supplemented Prospectus and as of the date hereof, contained or contains any untrue statement of a material fact or omitted, as of its date, or omits, on the date hereof, to state a material fact necessary to make the statements therein, in the light of the circumstances under which they were made, not misleading (except that no opinion is rendered with respect to any financial statements or other financial information contained or referred to therein).

I am qualified to practice law in the State of New York and do not purport to be an expert on, or to express any opinion concerning, any law other than the laws of the State of New York and the federal laws of the United States of America.

This opinion is being delivered to you in connection with the issuance of the Policy and the execution of the other Insurance Documents and may not be relied upon for any other purposes or by any other person without my express written consent.

Very truly yours,

[Fred Hnat]
[Susan Comparato]
[Mary Jane Constant]

THIS EIGHTH SUPPLEMENTAL INDENTURE is made as of the 22nd day of July, 2003, by and between GULF POWER COMPANY, a Maine corporation, One Energy Place, Pensacola, Florida 32520-0100 (the "Company"), and JPMORGAN CHASE BANK, a New York banking corporation, 4 New York Plaza, New York, New York 10004 (the "Trustee").

W I T N E S S E T H:

WHEREAS, the Company has heretofore entered into a Senior Note Indenture, dated as of January 1, 1998 (the "Original Indenture"), with JPMorgan Chase Bank (formerly known as The Chase Manhattan Bank), as heretofore supplemented;

WHEREAS, the Original Indenture is incorporated herein by this reference and the Original Indenture, as heretofore supplemented and as further supplemented by this Eighth Supplemental Indenture, is herein called the "Indenture";

WHEREAS, under the Original Indenture, a new series of Senior Notes may at any time be established pursuant to a supplemental indenture executed by the Company and the Trustee;

WHEREAS, the Company proposes to create under the Indenture a new series of Senior Notes;

WHEREAS, additional Senior Notes of other series hereafter established, except as may be limited in the Original Indenture as at the time supplemented and modified, may be issued from time to time pursuant to the Indenture as at the time supplemented and modified; and

WHEREAS, all conditions necessary to authorize the execution and delivery of this Eighth Supplemental Indenture and to make it a valid and binding obligation of the Company have been done or performed.

NOW, THEREFORE, in consideration of the agreements and obligations set forth herein and for other good and valuable consideration, the sufficiency of which is hereby acknowledged, the parties hereto hereby agree as follows:

## ARTICLE 1

### Series H Senior Notes

SECTION 101. Establishment. There is hereby established a new series of Senior Notes to be issued under the Indenture, to be designated as the Company's Series H 5.25% Senior Notes due July 15, 2033 (the "Series H Notes").

There are to be authenticated and delivered $60,000,000 principal amount of Series H Notes, and such principal amount of the Series H Notes need not be issued at the same time and such series may be reopened at any time, without the consent of the Holders thereof, for issuance of additional Series H Notes. Any such additional Series H Notes will have the same interest rate,

maturity and other terms, including the benefit of the Policy, as those initially issued. No Series H Notes shall be authenticated and delivered except as provided by Sections 203, 303, 304, 907 or 1107 of the Original Indenture. The Series H Notes shall be issued in definitive fully registered form.

The Series H Notes shall be issued in the form of one or more Global Securities in substantially the form set out in Exhibit A hereto. The Depositary with respect to the Series H Notes shall be The Depository Trust Company.

The form of the Trustee's Certificate of Authentication for the Series H Notes shall be in substantially the form set forth in Exhibit B hereto.

Each Series H Note shall be dated the date of authentication thereof and shall bear interest from the date of original issuance thereof or from the most recent Interest Payment Date to which interest has been paid or duly provided for.

SECTION 102. Definitions. The following defined terms used herein shall, unless the context otherwise requires, have the meanings specified below. Capitalized terms used herein for which no definition is provided herein shall have the meanings set forth in the Original Indenture.

"Insurer" means XL Capital Assurance Inc., a New York stock insurance corporation.

"Interest Payment Dates" means January 15, April 15, July 15 and October 15 of each year, commencing October 15, 2003.

"Original Issue Date" means July 22, 2003.

"Policy" means the financial guaranty insurance policy issued by the Insurer with respect to payments due for principal of and interest on the Series H Notes as provided in such policy.

"Regular Record Date" means, with respect to each Interest Payment Date, the close of business on the 15th calendar day preceding such Interest Payment Date (whether or not a Business Day).

"Stated Maturity" means July 15, 2033.

SECTION 103. Payment of Principal and Interest. The principal of the Series H Notes shall be due at Stated Maturity (unless earlier redeemed). The unpaid principal amount of the Series H Notes shall bear interest at the rate of 5.25% per annum until paid or duly provided for. Interest shall be paid quarterly in arrears on each Interest Payment Date to the Person in whose name the Series H Notes are registered on the Regular Record Date for such Interest Payment Date, *provided* that interest payable at the Stated Maturity of principal or on a Redemption Date as provided herein will be paid to the Person to whom principal is payable. Any such interest that is not so punctually paid or duly provided for will forthwith cease to be payable to the Holders on such Regular Record Date and may either be paid to the Person or Persons in whose name the Series H Notes are registered at the close of business on a Special Record Date for the payment of such defaulted

interest to be fixed by the Trustee, notice whereof shall be given to Holders of the Series H Notes not less than ten (10) days prior to such Special Record Date, or be paid at any time in any other lawful manner not inconsistent with the requirements of any securities exchange, if any, on which the Series H Notes shall be listed, and upon such notice as may be required by any such exchange, all as more fully provided in the Original Indenture.

Payments of interest on the Series H Notes will include interest accrued to but excluding the respective Interest Payment Dates. Interest payments for the Series H Notes shall be computed and paid on the basis of a 360-day year of twelve 30-day months. In the event that any date on which interest is payable on the Series H Notes is not a Business Day, then a payment of the interest payable on such date will be made on the next succeeding day that is a Business Day (and without any interest or other payment in respect of any such delay), with the same force and effect as if made on the date the payment was originally payable.

Payment of the principal and interest due at the Stated Maturity or earlier redemption of the Series H Notes shall be made upon surrender of the Series H Notes at the Corporate Trust Office of the Trustee. The principal of and interest on the Series H Notes shall be paid in such coin or currency of the United States of America as at the time of payment is legal tender for payment of public and private debts. Payments of interest (including interest on any Interest Payment Date) will be made, subject to such surrender where applicable, at the option of the Company, (i) by check mailed to the address of the Person entitled thereto as such address shall appear in the Security Register or (ii) by wire transfer or other electronic transfer at such place and to such account at a banking institution in the United States as may be designated in writing to the Trustee at least sixteen (16) days prior to the date for payment by the Person entitled thereto.

SECTION 104. Denominations. The Series H Notes may be issued in the denominations of $25, or any integral multiple thereof.

SECTION 105. Global Securities. The Series H Notes will be issued in the form of one or more Global Securities registered in the name of the Depositary (which shall be The Depository Trust Company) or its nominee. Except under the limited circumstances described below, Series H Notes represented by one or more Global Securities will not be exchangeable for, and will not otherwise be issuable as, Series H Notes in definitive form. The Global Securities described above may not be transferred except by the Depositary to a nominee of the Depositary or by a nominee of the Depositary to the Depositary or another nominee of the Depositary or to a successor Depositary or its nominee.

Owners of beneficial interests in such a Global Security will not be considered the Holders thereof for any purpose under the Indenture, and no Global Security representing a Series H Note shall be exchangeable, except for another Global Security of like denomination and tenor to be registered in the name of the Depositary or its nominee or to a successor Depositary or its nominee. The rights of Holders of such Global Security shall be exercised only through the Depositary.

A Global Security shall be exchangeable for Series H Notes registered in the names of persons other than the Depositary or its nominee only if (i) the Depositary notifies the Company that it is unwilling or unable to continue as a Depositary for such Global Security and no successor

Depositary shall have been appointed by the Company, or if at any time the Depositary ceases to be a clearing agency registered under the Securities Exchange Act of 1934, as amended, at a time when the Depositary is required to be so registered to act as such Depositary and no successor Depositary shall have been appointed by the Company, in each case within 90 days after the Company receives such notice or becomes aware of such cessation, (ii) the Company in its sole discretion determines that such Global Security shall be so exchangeable, or (iii) there shall have occurred an Event of Default with respect to the Series H Notes. Any Global Security that is exchangeable pursuant to the preceding sentence shall be exchangeable for Series H Notes registered in such names as the Depositary shall direct.

SECTION 106. Transfer. No service charge will be made for any transfer or exchange of Series H Notes, but payment will be required of a sum sufficient to cover any tax or other governmental charge that may be imposed in connection therewith.

The Company shall not be required (a) to issue, transfer or exchange any Series H Notes except to the Insurer during a period beginning at the opening of business fifteen (15) days before the day of the mailing of a notice pursuant to Section 1104 of the Original Indenture identifying the serial numbers of the Series H Notes to be called for redemption, and ending at the close of business on the day of the mailing, or (b) to transfer or exchange any Series H Notes theretofore selected for redemption in whole or in part, except the unredeemed portion of any Series H Note redeemed in part.

SECTION 107. Redemption. The Series H Notes shall be subject to redemption at the option of the Company, in whole or in part, without premium or penalty, at any time or from time to time on or after July 22, 2008, at a Redemption Price equal to 100% of the principal amount to be redeemed plus accrued but unpaid interest to the Redemption Date.

In the event of redemption of the Series H Notes in part only, a new Series H Note or Notes for the unredeemed portion will be issued in the name or names of the Holders thereof upon the surrender thereof.

The Series H Notes will not have a sinking fund.

Notice of redemption shall be given as provided in Section 1104 of the Original Indenture.

Any redemption of less than all of the Series H Notes shall, with respect to the principal thereof, be divisible by $25.

## ARTICLE 2

### Special Insurance Provisions

SECTION 201. Supplemental Indentures. The consent of the Insurer shall be required with respect to any indenture or indentures supplemental to the Original Indenture requiring the consent of the Holders of the Series H Notes pursuant to Section 902 of the Original Indenture.

SECTION 202. Events of Default and Remedies. Subject to Section 107 of the Original Indenture and to the Trust Indenture Act, including, without limitation, Sections 316(a)(1) and 317(a) thereof, if an Event of Default occurs and is continuing, the Insurer shall be entitled to control and direct the enforcement of all rights and remedies granted to the Holders of the Series H Notes or the Trustee for the benefit of the Holders of the Series H Notes under this Indenture, including, without limitation, (i) the right to accelerate the principal of the Series H Notes as provided in Section 502 of the Original Indenture, and (ii) the right to annul any such declaration of acceleration, and the Insurer shall also be entitled to approve any waiver of an Event of Default with respect to the Series H Notes, the obligation of the Trustee to comply with any such direction to be subject to compliance with the conditions set forth in Sections 512 and 603(e) of the Original Indenture (as if references in those Sections to Holders were references to the Insurer) and the protections provided to the Trustee by Section 601(c)(3) of the Original Indenture shall be applicable with respect to any direction from the Insurer given pursuant hereto (as if references in said Section to Holders were references to the Insurer).

SECTION 203. Insurance Policy Payment Procedures. (a) The Insurer will make payments of principal or interest due on the Series H Notes in accordance with the Policy on or before the first Business Day next following the date on which the Insurer shall have received notice of Nonpayment (as defined in the Policy) from the Trustee.

(b) In the event of Nonpayment and notification thereof to the Insurer, the Trustee shall make available to the Insurer the books kept by the Trustee for the registration and for the registration of transfer of Series H Notes as provided in the Indenture.

(c) The Trustee shall, at the time it provides notice to the Insurer pursuant to (a) above, notify Holders of Series H Notes entitled to receive the payment of principal or interest thereon from the Insurer (i) as to the fact of such entitlement, (ii) that the Insurer will remit to them all or a part of the interest payments next coming due upon proof of Holder entitlement to interest payments and delivery to the Insurer, in form satisfactory to the Insurer, of an appropriate assignment of the Holder's right to payment, (iii) that should they be entitled to receive full payment of principal from the Insurer, they must surrender their Series H Notes (along with an appropriate instrument of assignment in form satisfactory to the Insurer to permit ownership of such Series H Notes to be registered in the name of the Insurer) for payment to the Insurer, and not the Trustee or any paying agent, and (iv) that should they be entitled to receive partial payment of principal from the Insurer, they must surrender their Series H Notes for payment thereon first to the Trustee, who shall note on such Series H Notes the portion of the principal paid by the Trustee, and then, along with an appropriate instrument of assignment in form satisfactory to the Insurer, to the Insurer, which will then pay the unpaid portion of principal.

(d) In the event that the Trustee has notice that any payment of principal of or interest on a Series H Note which has become due for payment (under the terms of the Policy) and which is made to a Holder by or on behalf of the Company has been deemed a preferential transfer and theretofore recovered from its Holder pursuant to the United States Bankruptcy Code by a trustee in bankruptcy in accordance with a final, nonappealable order of a court having competent

jurisdiction, the Trustee shall, at the time the Insurer is notified pursuant to (a) above, notify all Holders of the Series H Notes that in the event that any Holder's payment is so recovered, such Holder will be entitled to payment from the Insurer to the extent of such recovery if sufficient funds are not otherwise available, and the Trustee shall furnish to the Insurer its records evidencing the payments of principal of and interest on the Series H Notes which have been made by the Trustee and subsequently recovered from Holders and the dates on which such payments were made.

(e) In addition to those rights granted the Insurer under the Indenture, the Insurer shall, to the extent it makes payment of principal of or interest on Series H Notes, become subrogated to the rights of the recipients of such payments in accordance with the terms of the Policy, and to evidence such subrogation (i) in the case of subrogation as to claims for past due interest, the Trustee shall note the Insurer's rights as subrogee on the registration books of the Company maintained by the Trustee upon receipt from the Insurer of proof of the payment of interest thereon to the Holders of the Series H Notes, and (ii) in the case of subrogation as to claims for past due principal, the Trustee shall note the Insurer's rights as subrogee on the registration books of the Company maintained by the Trustee upon surrender of the Series H Notes by the Holders thereof together with proof of the payment of principal thereof.

SECTION 204. Application of Term "Outstanding" to Series H Notes. In the event that the principal and/or interest due on the Series H Notes shall be paid by the Insurer pursuant to the Policy, the Series H Notes shall remain Outstanding for all purposes of the Indenture, not be considered defeased or otherwise satisfied and not be considered paid by the Company, and the assignment and pledge of the Indenture and all covenants, agreements and other obligations of the Company to the Holders of the Series H Notes shall continue to exist and shall run to the benefit of the Insurer, and the Insurer shall be subrogated to the rights of such Holders to the extent of each such payment.

SECTION 205. Insurer as Third Party Beneficiary. To the extent that the Indenture confers upon or gives or grants to the Insurer any right, remedy or claim under or by reason of the Indenture, the Insurer is hereby explicitly recognized as being a third-party beneficiary hereunder and may enforce any such right, remedy or claim conferred, given or granted hereunder.

SECTION 206. Concerning the Special Insurance Provisions. The provisions of this Article 2 shall apply notwithstanding anything in the Indenture to the contrary, but only so long as the Policy shall be in full force and effect and the Insurer is not in default thereunder.

## ARTICLE 3

### Miscellaneous Provisions

SECTION 301. Recitals by Company. The recitals in this Eighth Supplemental Indenture are made by the Company only and not by the Trustee, and all of the provisions contained in the Original Indenture in respect of the rights, privileges, immunities, powers and duties of the Trustee

shall be applicable in respect of Series H Notes and of this Eighth Supplemental Indenture as fully and with like effect as if set forth herein in full.

SECTION 302. Ratification and Incorporation of Original Indenture. As heretofore supplemented and as supplemented hereby, the Original Indenture is in all respects ratified and confirmed, and the Original Indenture as heretofore supplemented and as supplemented by this Eighth Supplemental Indenture shall be read, taken and construed as one and the same instrument.

SECTION 303. Executed in Counterparts. This Eighth Supplemental Indenture may be simultaneously executed in several counterparts, each of which shall be deemed to be an original, and such counterparts shall together constitute but one and the same instrument.

IN WITNESS WHEREOF, each party hereto has caused this instrument to be signed in its name and behalf by its duly authorized officers, all as of the day and year first above written.

EXHIBIT A

FORM OF SERIES H NOTE

NO. ____ CUSIP NO. 402479794

GULF POWER COMPANY
SERIES H 5.25% SENIOR NOTE
DUE JULY 15, 2033

| | |
|---|---|
| Principal Amount: | $_____ |
| Regular Record Date: | 15th calendar day prior to the applicable Interest Payment Date (whether or not a Business Day) |
| Original Issue Date: | July 22, 2003 |
| Stated Maturity: | July 15, 2033 |
| Interest Payment Dates: | January 15, April 15, July 15 and October 15 |
| Interest Rate: | 5.25% per annum |
| Authorized Denominations: | $25 or any integral multiple thereof |
| Initial Redemption Date: | July 22, 2008 |

Gulf Power Company, a Maine corporation (the "Company", which term includes any successor corporation under the Indenture referred to on the reverse hereof), for value received, hereby promises to pay to _____, or registered assigns, the principal sum of _____DOLLARS ($_____) on the Stated Maturity shown above (or upon earlier redemption), and to pay interest thereon from the Original Issue Date shown above, or from the most recent Interest Payment Date to which interest has been paid or duly provided for, quarterly in arrears on each Interest Payment Date as specified above, commencing October 15, 2003, and on the Stated Maturity (or upon earlier redemption) at the rate per annum shown above until the principal hereof is paid or made available for payment and on any overdue principal and on any overdue installment of interest. The interest so payable, and punctually paid or duly provided for, on any Interest Payment Date (other than an Interest Payment Date that is the Stated Maturity or on a Redemption Date) will, as provided in such Indenture, be paid to the Person in whose name this Note (the "Note") is registered at the close of business on the Regular Record Date as specified above next preceding such Interest Payment Date, provided that any interest payable at Stated Maturity or on any Redemption Date will be paid to the Person to whom principal is payable. Except as otherwise provided in the Indenture, any such interest not so punctually paid or duly provided for will forthwith cease to be payable to the Holder on such Regular Record Date and may either be paid to the Person in whose name this Note is registered at the close of business on a Special Record Date for the payment of such defaulted interest to be fixed by the Trustee, notice

whereof shall be given to Holders of Notes of this series not less than 10 days prior to such Special Record Date, or be paid at any time in any other lawful manner not inconsistent with the requirements of any securities exchange, if any, on which the Notes of this series shall be listed, and upon such notice as may be required by any such exchange, all as more fully provided in the Indenture.

Payments of interest on this Note will include interest accrued to but excluding the respective Interest Payment Dates. Interest payments for this Note shall be computed and paid on the basis of a 360-day year of twelve 30-day months. In the event that any date on which interest is payable on this Note is not a Business Day, then payment of the interest payable on such date will be made on the next succeeding day that is a Business Day (and without interest or other payment in respect of any such delay), with the same force and effect as if made on the date the payment was originally payable. A "Business Day" shall mean any day other than a Saturday or a Sunday or a day on which banking institutions in New York City are authorized or required by law or executive order to remain closed or a day on which the Corporate Trust Office of the Trustee is closed for business.

Payment of the principal of and interest due at the Stated Maturity or earlier redemption of the Series H Notes shall be made upon surrender of the Series H Notes at the Corporate Trust Office of the Trustee. The principal of and interest on the Series H Notes shall be paid in such coin or currency of the United States of America as at the time of payment is legal tender for payment of public and private debts. Payment of interest (including interest on an Interest Payment Date) will be made, subject to such surrender where applicable, at the option of the Company, (i) by check mailed to the address of the Person entitled thereto as such address shall appear in the Security Register or (ii) by wire transfer or other electronic transfer at such place and to such account at a banking institution in the United States as may be designated in writing to the Trustee at least 16 days prior to the date for payment by the Person entitled thereto.

XL Capital Assurance Inc. (the "Insurer"), New York, New York, has delivered its financial guaranty insurance policy (the "Policy") with respect to the scheduled payments due of principal of and interest on this Note to the principal Corporate Trust Office of the Trustee. **Said Policy is on file and available for inspection at the principal Corporate Trust Office of the Trustee and a copy thereof may be obtained from the Insurer or the Trustee.**

REFERENCE IS HEREBY MADE TO THE FURTHER PROVISIONS OF THIS NOTE SET FORTH ON THE REVERSE HEREOF, WHICH FURTHER PROVISIONS SHALL FOR ALL PURPOSES HAVE THE SAME EFFECT AS IF SET FORTH AT THIS PLACE.

Unless the certificate of authentication hereon has been executed by the Trustee by manual signature, this Note shall not be entitled to any benefit under the Indenture or be valid or obligatory for any purpose.

IN WITNESS WHEREOF, the Company has caused this instrument to be duly executed under its corporate seal.

CERTIFICATE OF AUTHENTICATION

This is one of the Senior Notes referred to in the within-mentioned Indenture.

JPMORGAN CHASE BANK,
as Trustee

By:_____
Authorized Officer

(Reverse Side of Note)

This Note is one of a duly authorized issue of Senior Notes of the Company (the "Notes"), issued and issuable in one or more series under a Senior Note Indenture, dated as of January 1, 1998, as supplemented (the "Indenture"), between the Company and JPMorgan Chase Bank (formerly known as The Chase Manhattan Bank), Trustee (the "Trustee," which term includes any successor trustee under the Indenture), to which Indenture and all indentures incidental thereto reference is hereby made for a statement of the respective rights, limitation of rights, duties and immunities thereunder of the Company, the Trustee and the Holders of the Notes issued thereunder and of the terms upon which said Notes are, and are to be, authenticated and delivered. This Note is one of the series designated on the face hereof as Series H 5.25% Senior Notes due July 15, 2033 (the "Series H Notes") which is unlimited in aggregate principal amount. Capitalized terms used herein for which no definition is provided herein shall have the meanings set forth in the Indenture.

The Company shall have the right, subject to the terms and conditions of the Indenture, to redeem this Note at any time on or after July 22, 2008 at the option of the Company, without premium or penalty, in whole or in part, at a Redemption Price equal to 100% of the principal amount to be redeemed plus accrued but unpaid interest to the Redemption Date.

In the event of redemption of this Note in part only, a new Note or Notes of this series for the unredeemed portion hereof will be issued in the name of the Holder hereof upon the surrender hereof. The Notes will not have a sinking fund.

If an Event of Default with respect to the Notes of this series shall occur and be continuing, the principal of the Notes of this series may be declared due and payable in the manner, with the effect and subject to the conditions provided in the Indenture.

The Indenture permits, with certain exceptions as therein provided, the amendment thereof and the modification of the rights and obligations of the Company and the rights of the Holders of the Notes of each series to be affected under the Indenture at any time by the Company and the Trustee with the consent of the Holders of not less than a majority in principal amount of the Notes at the time Outstanding of each series to be affected. The Indenture also contains provisions permitting the Holders of specified percentages in principal amount of the Notes of each series at the time Outstanding, on behalf of the Holders of all Notes of such series, to waive compliance by the Company with certain provisions of the Indenture and certain past defaults under the Indenture and their consequences. Any such consent or waiver by the Holder of this Note shall be conclusive and binding upon such Holder and upon all future Holders of this Note and of any Note issued upon the registration of transfer hereof or in exchange hereof or in lieu hereof, whether or not notation of such consent or waiver is made upon this Note.

No reference herein to the Indenture and no provision of this Note or of the Indenture shall alter or impair the obligation of the Company, which is absolute and unconditional, to pay the principal of and interest on this Note at the times, place and rate, and in the coin or currency, herein prescribed.

As provided in the Indenture and subject to certain limitations therein set forth, the transfer of this Note is registrable in the Security Register, upon surrender of this Note for registration of transfer at the office or agency of the Company for such purpose, duly endorsed by, or accompanied by a written instrument of transfer in form satisfactory to the Company and the Security Registrar and duly executed by, the Holder hereof or his attorney duly authorized in writing, and thereupon one or more new Notes of this series, of authorized denominations and of like tenor and for the same aggregate principal amount, will be issued to the designated transferee or transferees. No service charge shall be made for any such registration of transfer or exchange, but the Company may require payment of a sum sufficient to cover any tax or other governmental charge payable in connection therewith.

Prior to due presentment of this Note for registration of transfer, the Company, the Trustee and any agent of the Company or the Trustee may treat the Person in whose name this Note is registered as the owner hereof for all purposes, whether or not this Note be overdue, and neither the Company, the Trustee nor any such agent shall be affected by notice to the contrary.

The Notes of this series are issuable only in registered form without coupons in denominations of $25 and any integral multiple thereof. As provided in the Indenture and subject to certain limitations therein set forth, Notes of this series are exchangeable for a like aggregate principal amount of Notes of this series of a different authorized denomination, as requested by the Holder surrendering the same upon surrender of the Note or Notes to be exchanged at the office or agency of the Company.

This Note shall be governed by, and construed in accordance with, the internal laws of the State of New York.

**PROSPECTUS SUPPLEMENT**

**(To Prospectus dated April 25, 2003)**

# $60,000,000

GULF POWER

A SOUTHERN COMPANY

## Series H 5.25% Senior Notes due July 15, 2033

The Series H Senior Notes bear interest at the rate of 5.25% per year. Interest on the Series H Senior Notes is payable quarterly on January 15, April 15, July 15 and October 15 of each year, beginning October 15, 2003. The Series H Senior Notes will mature on July 15, 2033. The Series H Senior Notes are redeemable by Gulf Power Company on or after July 22, 2008. The Series H Senior Notes do not have the benefit of any sinking fund.

The Series H Senior Notes are unsecured and rank equally with all of Gulf Power Company's other unsecured indebtedness and will be effectively subordinated to all secured debt of Gulf Power Company. The Series H Senior Notes will be issued only in registered form in denominations of $25 and any integral multiple thereof.

Payments of principal and interest on the Series H Senior Notes when due will be insured by a financial guaranty insurance policy to be issued by XL Capital Assurance Inc.

XL CAPITAL ASSURANCE

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this Prospectus Supplement or the accompanying Prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

| | Per Series H Senior Note | Total |
|---|---|---|
| Initial Public Offering Price(1) | 100.00% | $60,000,000 |
| Underwriting Discounts and Commissions | 3.15% | $ 1,890,000 |
| Net Proceeds, before expenses, to Gulf Power Company | 96.85% | $58,110,000 |

(1) The initial public offering price set forth above does not include accrued interest, if any. Interest on the Series H Senior Notes will accrue from the date the Series H Senior Notes are issued.

*See "Risk Factors" on page S-3 for a description of certain risks associated with investing in the Series H Senior Notes.*

Gulf Power Company plans to list the Series H Senior Notes on the New York Stock Exchange. Trading of the Series H Senior Notes is expected to begin on the New York Stock Exchange within 30 days after the Series H Senior Notes are first issued.

It is expected that the Series H Senior Notes will be ready for delivery in book-entry form only through The Depository Trust Company, on or about July 22, 2003.

## RISK FACTORS

Investing in the Series H Senior Notes involves risk. Please see the risk factors in Gulf Power Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2002, which is incorporated by reference in this Prospectus Supplement. Before making an investment decision, you should carefully consider these risks as well as other information contained or incorporated by reference in this Prospectus Supplement and the accompanying Prospectus. The risks and uncertainties not presently known to Gulf Power Company or that Gulf Power Company currently deems immaterial may also impair its business operations, its financial results and the value of the Series H Senior Notes.

## THE COMPANY

Gulf Power Company (the "Company") is a corporation organized under the laws of the State of Maine on November 2, 1925, and admitted to do business in Florida on January 15, 1926, in Mississippi on October 25, 1976 and in Georgia on November 20, 1984. The mailing address of the Company's principal executive offices is One Energy Place, Pensacola, Florida 32520-0100, and the telephone number is (850) 444-6111. The Company is a wholly owned subsidiary of The Southern Company.

The Company is a regulated public utility engaged in the generation, transmission, distribution and sale of electric energy within an approximately 7,400 square mile service area within the northwestern portion of the State of Florida.

## SELECTED FINANCIAL INFORMATION

The following selected financial data for the years ended December 31, 1998 through December 31, 2002 and the three months ended March 31, 2003 have been derived from the Company's financial statements and related notes, incorporated by reference in this Prospectus Supplement. The information set forth below is qualified in its entirety by reference to and, therefore, should be read together with management's discussion and analysis of results of operations and financial information, the financial statements and related notes and other financial information incorporated by reference in this Prospectus Supplement.

| | Year Ended December 31, | | | | | Three Months Ended March 31, |
|---|---|---|---|---|---|---|
| | 1998 | 1999 | 2000 | 2001 | 2002 | 2003 |
| | (Thousands, except ratios) | | | | | (unaudited) |
| Operating Revenues | $650,518 | $674,099 | $714,319 | $725,203 | $820,467 | $197,838 |
| Earnings Before Income Taxes | 89,356 | 86,515 | 82,607 | 89,716 | 104,397 | 22,291 |
| Net Income After Dividends on Preferred Stock | 56,521 | 53,667 | 51,843 | 58,307 | 67,036 | 13,972 |
| Ratio of Earnings to Fixed Charges(1) | 3.83 | 3.62 | 3.38 | 3.64 | 3.52 | 3.21 |

| | Capitalization As of March 31, 2003 | | |
|---|---|---|---|
| | Actual | As Adjusted(2) | |
| | (Thousands, except percentages) | | (unaudited) |
| Common Stock Equity | $ 556,870 | $ 556,870 | 46.4% |
| Cumulative Preferred Stock | 4,236 | 4,236 | 0.4 |
| Company Obligated Mandatorily Redeemable Preferred Securities of Subsidiary Trusts Holding Company Junior Subordinated Notes | 115,000 | 115,000 | 9.6 |
| Senior Notes | 281,725 | 310,000 | 25.8 |
| Other Long-Term Debt | 214,390 | 214,390 | 17.8 |
| Total | $1,172,221 | $1,200,496 | 100.0% |

(1) This ratio is computed as follows: (i) "Earnings" have been calculated by adding to "Earnings Before Income Taxes" "Interest Expense, Net of Amounts Capitalized," "Distributions on Preferred Securities of Subsidiary" and the debt portion of allowance for funds used during construction; and (ii) "Fixed Charges" consist of "Interest Expense, Net of Amounts Capitalized," "Distributions on Preferred Securities of Subsidiary" and the debt portion of allowance for funds used during construction.

(2) Reflects (i) the redemption in April 2003 of $5,000, the redemption in July 2003 of $25,000 and the proposed redemption in August 2003 of $46,695,000 aggregate principal amount of Series A 6.70% Senior Insured Quarterly Notes due June 30, 2038; (ii) the redemption in May 2003 of $45,000,000 aggregate principal amount of Series E 6.00% Senior Notes due January 30, 2012; (iii) the proposed issuance in July 2003 of $60,000,000 aggregate principal amount of Series G Senior Notes (the "Series G Senior Notes"); and (iv) the issuance of the Series H Senior Notes offered hereby.

## USE OF PROCEEDS

A portion of the proceeds from the sale of the Series H Senior Notes will be used by the Company to redeem in August 2003 the $46,695,000 outstanding principal amount of its Series A 6.70% Senior Insured Quarterly Notes due June 30, 2038. This redemption is subject to the Company's closing of the sale of the Series H Senior Notes. The balance of the proceeds will be used by the Company to repay a portion of its outstanding short-term indebtedness, which aggregated approximately $55,000,000 as of July 10, 2003.

## DESCRIPTION OF THE SERIES H SENIOR NOTES

Set forth below is a description of the specific terms of the Series H 5.25% Senior Notes due July 15, 2033 (the "Series H Senior Notes"). This description supplements, and should be read together with, the description of the general terms and provisions of the senior notes set forth in the accompanying Prospectus under the caption "Description of the Senior Notes." The following description does not purport to be complete and is subject to, and is qualified in its entirety by reference to, the description in the accompanying Prospectus and the Senior Note Indenture dated as of January 1, 1998, as supplemented (the "Senior Note Indenture"), between the Company and JPMorgan Chase Bank (formerly known as The Chase Manhattan Bank), as trustee (the "Senior Note Indenture Trustee").

### General

The Series H Senior Notes will be issued as a series of senior notes under the Senior Note Indenture. The Series H Senior Notes will initially be issued in the aggregate principal amount of $60,000,000. The Company may, without the consent of the holders of the Series H Senior Notes, issue additional notes having the same ranking and the same interest rate, maturity and other terms, including the benefit of the Policy (as defined below), as the Series H Senior Notes. Any additional notes having such similar terms, together with the Series H Senior Notes, will constitute a single series of senior notes under the Senior Note Indenture.

The entire principal amount of the Series H Senior Notes will mature and become due and payable, together with any accrued and unpaid interest thereon, on July 15, 2033. The Series H Senior Notes are not subject to any sinking fund provision. The Series H Senior Notes are available for purchase in denominations of $25 and any integral multiple thereof.

### Interest

Each Series H Senior Note shall bear interest at the rate of 5.25% per annum (the "Securities Rate") from the date of original issuance, payable quarterly in arrears on January 15, April 15, July 15 and October 15 of each year (each, an "Interest Payment Date") to the person in whose name such Series H Senior Note is registered at the close of business on the fifteenth calendar day prior to such payment date (whether or not a Business Day).

The initial interest payment date is October 15, 2003. The amount of interest payable will be computed on the basis of a 360-day year of twelve 30-day months. In the event that any date on which interest is payable on the Series H Senior Notes is not a Business Day, then payment of the interest payable on such date will be made on the next succeeding day which is a Business Day (and without any interest or other payment in respect of any such delay), with the same force and effect as if made on such date. "Business Day" means a day other than (i) a Saturday or Sunday, (ii) a day on which banks in New York, New York are authorized or obligated by law or executive order to remain closed or (iii) a day on which the Senior Note Indenture Trustee's corporate trust office is closed for business.

**Ranking**

The Series H Senior Notes will be direct, unsecured and unsubordinated obligations of the Company ranking equally with all other unsecured and unsubordinated obligations of the Company. The Series H Senior Notes will be effectively subordinated to all secured debt of the Company, including its first mortgage bonds, aggregating approximately $170,000,000 outstanding at March 31, 2003. The Senior Note Indenture contains no restrictions on the amount of additional indebtedness that may be incurred by the Company.

**Trading Characteristics**

The Series H Senior Notes are expected to trade at a price that takes into account the value, if any, of accrued but unpaid interest; thus, purchasers will not pay and sellers will not receive accrued and unpaid interest with respect to the Series H Senior Notes that is not included in the trading price thereof. Any portion of the trading price of a Series H Senior Note received that is attributable to accrued interest will be treated as ordinary interest income for federal income tax purposes and will not be treated as part of the amount realized for purposes of determining gain or loss on the disposition of the Series H Senior Note.

The trading price of the Series H Senior Notes is likely to be sensitive to the level of interest rates generally. If interest rates rise in general, the trading price of the Series H Senior Notes may decline to reflect the additional yield requirements of the purchasers. Conversely, a decline in interest rates may increase the trading price of the Series H Senior Notes, although any increase will be moderated by the Company's ability to call the Series H Senior Notes at any time on or after July 22, 2008.

**Special Insurance Provisions of the Senior Note Indenture**

Subject to the provisions of the Senior Note Indenture, so long as the Insurer (as defined below) is not in default under the Policy, the Insurer shall be entitled to control and direct the enforcement of all rights and remedies with respect to the Series H Senior Notes upon the occurrence and continuation of an Event of Default (as defined in the Senior Note Indenture).

**Optional Redemption**

The Company shall have the right to redeem the Series H Senior Notes, in whole or in part, without premium, from time to time, on or after July 22, 2008, upon not less than 30 nor more than 60 days' notice, at a redemption price (the "Redemption Price") equal to 100% of the principal amount to be redeemed plus any accrued and unpaid interest to the date of redemption (the "Redemption Date").

If notice of redemption is given as aforesaid, the Series H Senior Notes so to be redeemed shall, on the Redemption Date, become due and payable at the Redemption Price together with any accrued interest thereon, and from and after such date (unless the Company shall default in the payment of the Redemption Price and accrued interest) such Series H Senior Notes shall cease to bear interest. If any Series H Senior Note called for redemption shall not be paid upon surrender thereof for redemption, the principal shall, until paid, bear interest from the Redemption Date at the Securities Rate. See "Description of the Senior Notes—Events of Default" in the accompanying Prospectus.

Subject to the foregoing and to applicable law (including, without limitation, United States federal securities laws), the Company or its affiliates may, at any time and from time to time, purchase outstanding Series H Senior Notes by tender, in the open market or by private agreement.

**Book-Entry Only Issuance—The Depository Trust Company**

The Depository Trust Company ("DTC") will act as the initial securities depositary for the Series H Senior Notes. The Series H Senior Notes will be issued only as fully-registered securities registered in the name of Cede & Co., DTC's nominee, or such other name as may be requested by an authorized representative of DTC. One or more fully registered global Series H Senior Notes certificates will be issued, representing in the aggregate the total principal amount of Series H Senior Notes, and will be deposited with DTC or a custodian therefor.

DTC is a limited-purpose trust company organized under the New York Banking Law, a "banking organization" within the meaning of the New York Banking Law, a member of the Federal Reserve System, a "clearing corporation" within the meaning of the New York Uniform Commercial Code and a "clearing agency" registered pursuant to the provisions of Section 17A of the Securities Exchange Act of 1934, as amended (the "1934 Act"). DTC holds and provides asset servicing for over 2 million issues of U.S. and non-U.S. equity issues, corporate and municipal debt issues and money market instruments from over 85 countries that DTC's participants ("Direct Participants") deposit with DTC. DTC also facilitates the post-trade settlement among Direct Participants of sales and other securities transactions in deposited securities, through electronic computerized book-entry transfers and pledges between Direct Participants' accounts. This eliminates the need for physical movement of securities certificates. Direct Participants include both U.S. and non-U.S. securities brokers and dealers, banks, trust companies, clearing corporations and certain other organizations. DTC is a wholly-owned subsidiary of The Depository Trust & Clearing Corporation ("DTCC"). DTCC, in turn, is owned by a number of Direct Participants of DTC and members of the National Securities Clearing Corporation, Government Securities Clearing Corporation, MBS Clearing Corporation and Emerging Markets Clearing Corporation (NSCC, GSCC, MBSCC and EMCC, also subsidiaries of DTCC), as well as by the New York Stock Exchange, Inc. (the "NYSE"), the American Stock Exchange LLC and the National Association of Securities Dealers, Inc. Access to the DTC system is also available to others such as both U.S. and non-U.S. securities brokers and dealers, banks, trust companies and clearing corporations that clear through or maintain a custodial relationship with a Direct Participant, either directly or indirectly ("Indirect Participants" and, together with Direct Participants, "Participants"). The DTC rules applicable to its Participants are on file with the Securities and Exchange Commission (the "Commission"). More information about DTC can be found at www.dtcc.com.

Purchases of Series H Senior Notes under the DTC system must be made by or through Direct Participants, which will receive a credit for the Series H Senior Notes on DTC's records. The ownership interest of each actual purchaser of Series H Senior Notes ("Beneficial Owner") is in turn to be recorded on the Participants' records. Beneficial Owners will not receive written confirmation from DTC of their purchases, but Beneficial Owners are expected to receive written confirmations providing details of the transactions, as well as periodic statements of their holdings, from the Participants through which the Beneficial Owners purchased Series H Senior Notes. Transfers of ownership interests in the Series H Senior Notes are to be accomplished by entries made on the books of Participants acting on behalf of Beneficial Owners. Beneficial Owners will not receive certificates representing their ownership interests in Series H Senior Notes, except in the event that use of the book-entry system for the Series H Senior Notes is discontinued.

To facilitate subsequent transfers, all Series H Senior Notes deposited by Direct Participants with DTC are registered in the name of DTC's partnership nominee, Cede & Co., or such other name as may be requested by an authorized representative of DTC. The deposit of Series H Senior Notes with DTC and their registration in the name of Cede & Co. or such other DTC nominee do not effect any changes in beneficial ownership. DTC has no knowledge of the actual Beneficial Owners of the Series H Senior Notes. DTC's records reflect only the identity of the Direct Participants to whose accounts such Series H Senior Notes are credited, which may or may not be the Beneficial Owners. The Participants will remain responsible for keeping account of their holdings on behalf of their customers.

Redemption notices shall be sent to DTC. If less than all of the Series H Senior Notes are being redeemed, DTC's practice is to determine by lot the amount of the interest of each Direct Participant in such Series H Senior Notes to be redeemed.

Conveyance of notices and other communications by DTC to Direct Participants, by Direct Participants to Indirect Participants, and by Direct Participants and Indirect Participants to Beneficial Owners will be governed by arrangements among them, subject to any statutory or regulatory requirements as may be in effect from time to time.

Although voting with respect to the Series H Senior Notes is limited, in those cases where a vote is required, neither DTC nor Cede & Co. (or such other DTC nominee) will itself consent or vote with respect to Series H Senior Notes. Under its usual procedures, DTC would mail an Omnibus Proxy to the Company as soon as possible after the record date. The Omnibus Proxy assigns Cede & Co.'s (or such other DTC nominee's) consenting or voting rights to those Direct Participants to whose accounts the Series H Senior Notes are credited on the record date (identified in a listing attached to the Omnibus Proxy).

Payments on the Series H Senior Notes will be made to Cede & Co. or such other nominee as may be requested by an authorized representative of DTC. DTC's practice is to credit Direct Participants' accounts upon DTC's receipt of funds and corresponding detail information from the Company or the Senior Note Indenture Trustee on the relevant payment date in accordance with their respective holdings shown on DTC's records unless DTC has reason to believe that it will not receive payments on such payment date. Payments by Participants to Beneficial Owners will be governed by standing instructions and customary practices, as is the case with securities held for the account of customers registered in "street name," and will be the responsibility of such Participant and not of DTC or the Company, subject to any statutory or regulatory requirements as may be in effect from time to time. Payment to Cede & Co. (or such other nominee as may be requested by an authorized representative of DTC) is the responsibility of the Company, disbursement of such payments to Direct Participants is the responsibility of DTC, and disbursement of such payments to the Beneficial Owners is the responsibility of Participants.

Except as provided herein, a Beneficial Owner of a global Series H Senior Note will not be entitled to receive physical delivery of Series H Senior Notes. Accordingly, each Beneficial Owner must rely on the procedures of DTC to exercise any rights under the Series H Senior Notes. The laws of some jurisdictions require that certain purchasers of securities take physical delivery of securities in definitive form. Such laws may impair the ability to transfer beneficial interests in a global Series H Senior Note.

DTC may discontinue providing its services as securities depositary with respect to the Series H Senior Notes at any time by giving reasonable notice to the Company. Under such circumstances, in the event that a successor securities depositary is not obtained, Series H Senior Notes certificates will be printed and delivered to the holders of record. Additionally, the Company may decide to discontinue use of the system of book-entry transfers through DTC (or a successor depositary) with respect to the Series H Senior Notes. In that event, certificates for the Series H Senior Notes will be printed and delivered to the holders of record.

The information in this section concerning DTC and DTC's book-entry system has been obtained from sources that the Company believes to be reliable, but the Company takes no responsibility for the accuracy thereof. The Company has no responsibility for the performance by DTC or its Participants of their respective obligations as described herein or under the rules and procedures governing their respective operations.

## THE POLICY AND THE INSURER

### The Policy

Concurrently with the issuance of the Series H Senior Notes, XL Capital Assurance Inc. (the "Insurer") will issue a financial guaranty insurance policy relating to the Series H Senior Notes (the "Policy"). The form of the Policy is attached to this Prospectus Supplement as Appendix A. The following summary of the terms of the Policy does not purport to be complete and is qualified in its entirety by reference to the Policy. Any capitalized terms used in this section but not defined herein have the meanings ascribed to them in the Policy.

The Policy guarantees the scheduled payment of principal of and interest on the Series H Senior Notes when due. The Policy will extend for the term of the Series H Senior Notes and, once issued, cannot be canceled by the Insurer. The Policy will insure payment only on the stated maturity date, in the case of principal, and on stated dates for payment, in the case of interest. If any Series H Senior Notes become subject to redemption and insufficient funds are available for redemption of all such outstanding Series H Senior Notes, the Insurer will remain obligated to pay principal of and interest on such outstanding Series H Senior Notes on the originally scheduled principal and interest payment dates. In the event of any acceleration of the principal of the Series H Senior Notes, the insured payments will be made at such times and in such amounts as would have been made had there not been an acceleration.

In the event the Senior Note Indenture Trustee has notice that any payment of principal of or interest on a Series H Senior Note which has become Due for Payment on any regularly scheduled principal payment date or Interest Payment Date and which is made to a holder by or on behalf of the Company has been deemed a preferential transfer and theretofore recovered from its holder pursuant to the United States Bankruptcy Code in accordance with a final, nonappealable order of a court of competent jurisdiction, such holder will be entitled to payment from the Insurer to the extent of such recovery if sufficient funds are not otherwise available.

The Policy does not insure any risk other than Nonpayment. Specifically, the Policy does not cover:

a. payment on acceleration, as a result of a call for redemption or as a result of any other advancement of maturity;

b. nonpayment of principal or interest caused by the insolvency or negligence of the Senior Note Indenture Trustee; or

c. losses suffered as a result of a holder's inability to sell Series H Senior Notes.

Upon payment of the insurance benefits with respect to a Series H Senior Note, the Insurer will become the owner of such Series H Senior Note or right to payment of principal or interest on such Series H Senior Note and will be fully subrogated to the rights to payment of the surrendering holder.

**The Insurer**

*The information set forth below has been provided by the Insurer for use in this Prospectus Supplement. None of the Company, the Senior Note Indenture Trustee or any Underwriter makes any representation or warranty or assumes any responsibility with respect to the information concerning the Insurer, its parent or the Policy contained or incorporated into this Prospectus Supplement. Neither the Company nor any Underwriter has made any independent investigation of the Policy or the Insurer, and reference should be made to the information set forth below for a description of the Policy. The Policy does not constitute a part of the contract between the Company and the holders. Except for the payment of the premium for the Policy to the Insurer, the Company has no responsibility whatsoever with respect to the Policy, including the maintenance or enforcement of the Policy or collection of amounts payable under the Policy.*

*The Insurer accepts no responsibility for the accuracy or completeness of this Prospectus Supplement or any other information or disclosure contained herein, or omitted herefrom, other than with respect to the accuracy of the information regarding the Insurer and its affiliates set forth under this heading. In addition, the Insurer makes no representation regarding the Series H Senior Notes or the advisability of investing in the Series H Senior Notes.*

*General.* The Insurer is a monoline financial guaranty insurance company incorporated under the laws of the State of New York. The Insurer is currently licensed to do insurance business in, and is subject to the insurance regulation and supervision by, the State of New York, forty-seven other states, the District of Columbia, Puerto Rico, the U.S. Virgin Islands and Singapore. The Insurer has license applications pending, or intends to file an application, in each of those states in which it is not currently licensed.

The Insurer is an indirect wholly owned subsidiary of XL Capital Ltd, a Cayman Islands corporation ("XL Capital Ltd"). Through its subsidiaries, XL Capital Ltd is a leading provider of insurance and reinsurance coverages and financial products to industrial, commercial and professional service firms, insurance companies and other enterprises on a worldwide basis. The common stock of XL Capital Ltd is publicly traded in the United States and listed on the New York Stock Exchange (NYSE:XL). **XL Capital Ltd is not obligated to pay the debts of or claims against the Insurer.**

The Insurer was formerly known as The London Assurance of America Inc. ("London"), which was incorporated on July 25, 1991 under the laws of the State of New York. On February 22, 2001, XL Reinsurance America Inc. ("XL Re") acquired 100% of the stock of London. XL Re merged its former financial guaranty subsidiary, known as XL Capital Assurance Inc. (formed September 13, 1999), with and into London, with London as the surviving entity. London immediately changed its name to XL Capital Assurance Inc. All previous business of London was 100% reinsured to Royal Indemnity Company, the previous owner at the time of acquisition.

*Reinsurance.* The Insurer has entered into a facultative quota share reinsurance agreement with XL Financial Assurance Ltd ("XLFA"), an insurance company organized under the laws of Bermuda and an affiliate of the Insurer. Pursuant to this reinsurance agreement, the Insurer expects to cede up to 90% of its business to XLFA. The Insurer may also cede reinsurance to third parties on a transaction-specific basis, which cessions may be any or a combination of quota share, first loss or excess of loss. Such reinsurance is used by the Insurer as a risk management device and to comply with statutory and rating agency requirements and does not alter or limit the Insurer's obligations under any financial guaranty insurance policy. With respect to any transaction insured by the Insurer, the percentage of risk ceded to XLFA may be less than 90% depending on certain factors including, without limitation, whether the Insurer has obtained third party reinsurance covering the risk. As a result, there can be no assurance as to the percentage reinsured by XLFA of any given financial guaranty insurance policy issued by the Insurer, including the Policy.

*Ratings.* Based on the audited financials of XLFA as of December 31, 2002, XLFA had total assets, liabilities, redeemable preferred shares and shareholders' equity of $611,791,000, $245,750,000, $39,000,000 and $327,041,000, respectively, determined in accordance with generally accepted accounting principles in the United States. XLFA's insurance financial strength is rated "Aaa" by Moody's Investors Service, Inc. ("Moody's") and "AAA" by Standard & Poor's, a division of The McGraw-Hill Companies ("Standard & Poor's"), and Fitch Ratings ("Fitch"). In addition, XLFA has obtained a financial enhancement rating of "AAA" from Standard & Poor's.

The obligations of XLFA to the Insurer under the reinsurance agreement described above are unconditionally guaranteed by XL Insurance (Bermuda) Ltd ("XLI"), a Bermuda company and one of the world's leading excess commercial insurers. XLI is a wholly owned indirect subsidiary of XL Capital Ltd. In addition to having an "A+" rating from A.M. Best, XLI's financial strength rating is "Aa2" by Moody's and "AA" by Standard & Poor's and Fitch. The ratings of XLFA and XLI are not recommendations to buy, sell or hold securities, including the Series H Senior Notes, and are subject to revision or withdrawal at any time by Moody's, Standard & Poor's or Fitch.

Notwithstanding the capital support provided to the Insurer described in this section, the holders of the Series H Senior Notes will have direct recourse against the Insurer only, and neither XLFA nor XLI will be directly liable to the holders of the Series H Senior Notes.

*Financial Strength and Financial Enhancement Ratings of the Insurer.* The Insurer's insurance financial strength is rated "Aaa" by Moody's and "AAA" by Standard & Poor's and Fitch. In addition, the Insurer has obtained a financial enhancement rating of "AAA" from Standard & Poor's. These ratings reflect Moody's, Standard & Poor's and Fitch's current assessment of the Insurer's creditworthiness and claims-paying ability as well as the reinsurance arrangement with XLFA described under "—Reinsurance" above.

The above ratings are not recommendations to buy, sell or hold securities, including the Series H Senior Notes, and are subject to revision or withdrawal at any time by Moody's, Standard & Poor's or Fitch. Any downward revision or withdrawal of these ratings may have an adverse effect on the market price of the Series H Senior Notes. The Insurer does not guaranty the market price of the Series H Senior Notes nor does it guaranty that the ratings on the Series H Senior Notes will not be revised or withdrawn.

*Capitalization of the Insurer.* Based on the audited statutory financial statements for the Insurer as of December 31, 2001, the Insurer had total admitted assets of $158,442,157, total liabilities of $48,899,961 and total capital and surplus of $109,542,696 determined in accordance with statutory accounting practices prescribed or permitted by insurance regulatory authorities ("SAP"). Based on the audited statutory financial statements for the Insurer as of December 31, 2002, the Insurer has total admitted assets of $180,993,189, total liabilities of $58,685,217 and total capital and surplus of $122,307,972 determined in accordance with SAP.

For further information concerning the Insurer and XLFA, see the financial statements of the Insurer and XLFA, and the notes thereto, incorporated by reference in this Prospectus Supplement. The financial statements of the Insurer and XLFA are included as exhibits to the periodic reports filed with the Commission by XL Capital Ltd and may be reviewed at the EDGAR website maintained by the Commission. All financial statements of the Insurer and XLFA included in, or as exhibits to, documents filed by XL Capital Ltd pursuant to Section 13(a), 13(c), 14 or 15(d) of the 1934 Act on or prior to the date of this Prospectus Supplement, or after the date of this Prospectus Supplement but prior to termination of the offering of the Series H Senior Notes, shall be deemed incorporated by reference in this Prospectus Supplement. Except for the financial statements of the Insurer and XLFA, no other information contained in XL Capital Ltd's reports filed with the Commission is incorporated by reference. Copies of the statutory quarterly and annual statements filed with the State of New York Insurance Department by the Insurer are available upon request to the State of New York Insurance Department.

*Regulation of the Insurer.* The Insurer is regulated by the Superintendent of Insurance of the State of New York. In addition, the Insurer is subject to regulation by the insurance laws and regulations of the other jurisdictions in which it is licensed. As a financial guaranty insurance company licensed in the State of New York, the Insurer is subject to Article 69 of the New York Insurance Law, which, among other things, limits the business of each insurer to financial guaranty insurance and related lines, prescribes minimum standards of solvency, including minimum capital requirements, establishes contingency, loss and unearned premium reserve requirements, requires the maintenance of minimum surplus to policyholders and limits the aggregate amount of insurance which may be written and the maximum size of any single risk exposure which may be assumed. The Insurer is also required to file detailed annual financial statements with the New York Insurance Department and similar supervisory agencies in each of the other jurisdictions in which it is licensed.

The extent of state insurance regulation and supervision varies by jurisdiction, but New York and most other jurisdictions have laws and regulations prescribing permitted investments and governing the payment of dividends, transactions with affiliates, mergers, consolidations, acquisitions or sales of assets and incurrence of liabilities for borrowings.

THE FINANCIAL GUARANTY INSURANCE POLICIES ISSUED BY THE INSURER, INCLUDING THE POLICY, ARE NOT COVERED BY THE FLORIDA INSURANCE GUARANTY ASSOCIATION ACT SPECIFIED IN PART II OF CHAPTER 631 OF THE FLORIDA INSURANCE LAW OR THE PROPERTY/ CASUALTY INSURANCE SECURITY FUND SPECIFIED IN ARTICLE 76 OF THE NEW YORK INSURANCE LAW.

The principal executive offices of the Insurer are located at 1221 Avenue of the Americas, 31st Floor, New York, New York 10020-1001 and its telephone number at this address is (212) 478-3400.

## RATINGS

It is anticipated that Standard & Poor's and Moody's will assign the Series H Senior Notes the ratings of "AAA" and "Aaa", respectively, conditioned upon the issuance and delivery by the Insurer at the time of delivery of the Series H Senior Notes of the Policy, insuring the timely payment of the principal of and interest on the Series H Senior Notes. Such ratings reflect only the views of such ratings agencies, and an explanation of the significance of such ratings may be obtained only from such rating agencies at the following addresses: Moody's Investors Service, Inc., 99 Church Street, New York, New York 10007; and Standard & Poor's, 25 Broadway, New York, New York 10004. There is no assurance that such ratings will remain in effect for any period of time or that they will not be revised downward or withdrawn entirely by said rating agencies if, in their judgment, circumstances warrant. Neither the Company nor any Underwriter has undertaken any responsibility to oppose any proposed downward revision or withdrawal of a rating on the Series H Senior Notes. Any such downward revision or withdrawal of such ratings may have an adverse effect on the market price of the Series H Senior Notes.

At present, each of such rating agencies maintains four categories of investment grade ratings. They are for Standard & Poor's—AAA, AA, A and BBB and for Moody's—Aaa, Aa, A and Baa. Standard & Poor's defines "AAA" as the highest rating assigned to a debt obligation. Moody's defines "Aaa" as representing the best quality debt obligation carrying the smallest degree of investment risk.

## UNDERWRITING

Subject to the terms and conditions set forth in the Underwriting Agreement dated the date hereof, the Company has agreed to sell to each of the Underwriters named below (for whom Morgan Stanley & Co. Incorporated and Wachovia Capital Markets, LLC are acting as Representatives) and each of the Underwriters severally has agreed to purchase the principal amount of the Series H Senior Notes set forth opposite its name below:

| Name | Principal Amount of Series H Senior Notes |
|---|---|
| Morgan Stanley & Co. Incorporated | $27,000,000 |
| Wachovia Capital Markets, LLC | 27,000,000 |
| SunTrust Capital Markets, Inc. | 6,000,000 |
| Total | $60,000,000 |

The Underwriting Agreement provides that the obligations of the several Underwriters to pay for and accept delivery of the Series H Senior Notes are subject to, among other things, the approval of certain legal matters by their counsel and certain other conditions. The Underwriters are obligated to take and pay for all the Series H Senior Notes if any are taken.

Series H Senior Notes sold by the Underwriters to the public will initially be offered at the initial public offering price set forth on the cover of this Prospectus Supplement. The Underwriters may offer the Series H Senior Notes to certain securities dealers at such price less a concession not in excess of $.50 per Series H Senior Note. The Underwriters may allow, and such dealers may reallow, a concession not in excess of $.45 per Series H Senior Note to certain brokers and dealers. If all the Series H Senior Notes are not sold at the initial offering price, the Underwriters may change the offering price and the other selling terms.

Prior to this offering, there has been no public market for the Series H Senior Notes. The Series H Senior Notes are expected to be approved for listing on the NYSE, subject to official notice of issuance. In order to meet the requirements for listing the Series H Senior Notes, the Underwriters will undertake to sell the Series H Senior Notes to a minimum of 400 beneficial holders. Trading of the Series H Senior Notes on the NYSE is expected to commence within a 30-day period after the initial delivery of the Series H Senior Notes. The Representatives have advised the Company that they intend to make a market in the Series H Senior Notes prior to the commencement of trading on the NYSE. The Representatives will have no obligation to make a market in the Series H Senior Notes, however, and may cease market making activities, if commenced, at any time.

The Company has agreed, during the period of 15 days from the date of the Underwriting Agreement, not to sell, offer to sell, grant any option for the sale of or otherwise dispose of any Series H Senior Notes, any security convertible into or exchangeable into or exercisable for Series H Senior Notes or any debt securities substantially similar to the Series H Senior Notes (except for the Series H Senior Notes issued pursuant to the Underwriting Agreement and the Series G Senior Notes), without the prior written consent of the Representatives.

The Company estimates that it will incur offering expenses of approximately $1,350,000, which includes the premium for the Policy.

In connection with this offering and in compliance with applicable law and industry practice, the Underwriters may overallot or effect transactions which stabilize, maintain or otherwise affect the market price of the Series H Senior Notes at levels above those which might otherwise prevail in the open market, including by entering stabilizing bids, purchasing Series H Senior Notes to cover syndicate short positions and imposing penalty bids. A stabilizing bid means the placing of any bid, or the effecting of any purchase, for the purpose of pegging, fixing or maintaining the price of a security. Covering a syndicate short position means placing a bid or effecting a purchase of a security on behalf of the underwriting syndicate to reduce a short position created in connection with the offering. Imposing a penalty bid means purchasing a security in the open market to reduce

the underwriting syndicate's short position or to stabilize the price of the security and in connection therewith reclaiming the amount of the selling concession from the underwriters and selling group members who sold such securities as part of the offering.

In general, purchases of a security for the purpose of stabilization or to reduce a short position could cause the price of the security to be higher than it might be in the absence of such purchases. The imposition of a penalty bid might also have an effect on the price of a security to the extent that it were to discourage resales of the security.

Neither the Company nor any of the Underwriters makes any representation or prediction as the direction or magnitude of any effect that the transactions described above may have on the price of the Series H Senior Notes. In addition, neither the Company nor any of the Underwriters makes any representation that such transactions will be engaged in or that such transactions, once commenced, will not be discontinued without notice.

The Company has agreed to indemnify the Underwriters against certain liabilities, including liabilities under the Securities Act of 1933, as amended.

The Underwriters and their affiliates engage in transactions with and, from time to time, have performed services for, the Company and its affiliates in the ordinary course of business.

## EXPERTS

The consolidated balance sheets of the Insurer as of December 31, 2002 and December 31, 2001 and the related consolidated statements of operations and comprehensive income, changes in shareholder's equity and cash flows for each of the three years in the period ended December 31, 2002, incorporated by reference in this Prospectus Supplement, have been incorporated in this Prospectus Supplement in reliance on the report of PricewaterhouseCoopers LLP, independent accountants, given on the authority of that firm as experts in accounting and auditing.

The balance sheets of XLFA as of December 31, 2002 and December 31, 2001 and the related statements of operations and comprehensive income, changes in shareholder's equity and cash flows for each of the three years in the period ended December 31, 2002, incorporated by reference in this Prospectus Supplement, have been incorporated in this Prospectus Supplement in reliance on the report of PricewaterhouseCoopers, independent accountants, given on the authority of that firm as experts in accounting and auditing.

# FINANCIAL GUARANTY INSURANCE POLICY

**OBLIGOR:** **Policy No:**

**INSURED OBLIGATIONS:** **Effective Date:**

**XL Capital Assurance Inc. (XLCA),** a New York stock insurance company, in consideration of the payment of the premium, hereby unconditionally and irrevocably guarantees to the Trustee for the benefit of the Owners of the Insured Obligations, the full and complete payment by the Obligor of Scheduled Payments in respect of the Insured Obligations, subject only to the terms of this Policy (which includes the Endorsement attached hereto).

XLCA will pay the Insured Amount to the Trustee upon the presentation of a Payment Notice to XLCA (which Payment Notice shall include an irrevocable assignment to XLCA of all rights and claims in respect of the relevant Insured Obligation, as specified in the Payment Notice), on the later of (a) one (1) Business Day following receipt by XLCA of a Payment Notice or (b) the Business Day on which Scheduled Payments are due for payment. XLCA shall be subrogated to the Owners' rights to payment on the Insured Obligations to the extent of any payment by XLCA hereunder. The obligations of XLCA with respect to a Scheduled Payment will be discharged to the extent funds to pay such Scheduled Payment are deposited in the account specified in the Payment Notice, whether such funds are properly applied by the Trustee or claimed by an Owner.

In addition, in the event that any Scheduled Payment which has become due for payment and which is made to an Owner by or on behalf of the Trustee is recovered or is recoverable from the Owner pursuant to a final order of a court of competent jurisdiction in an Insolvency Proceeding that such payment constitutes an avoidable preference to such Owner within the meaning of any applicable bankruptcy law, XLCA unconditionally and irrevocably guarantees payment of the amount of such recovery (in accordance with the Endorsement attached hereto).

This Policy sets forth in full the undertaking of XLCA and shall not be cancelled or revoked by XLCA for any reason, including failure to receive payment of any premium due hereunder or under the Insurance Agreement, and may not be further endorsed or modified without the written consent of XLCA. The premium on this Policy is not refundable for any reason. This Policy does not insure against loss of any prepayment or other acceleration payment which at any time may become due in respect of any Insured Obligation, other than at the sole option of XLCA, nor against any risk other than Nonpayment and Avoided Payment, including any shortfalls, if any, attributable to the liability of the Obligor for taxes or withholding taxes if any, including interest and penalties in respect of such liability.

SPECIMEN

THIS POLICY IS NOT COVERED BY THE PROPERTY/CASUALTY INSURANCE SECURITY FUND SPECIFIED IN ARTICLE 76 OF THE NEW YORK INSURANCE LAW.

Any capitalized terms not defined herein shall have the meaning given such terms in the Endorsement attached hereto and forming a part hereof, or in the Insurance Agreement referenced therein. In witness whereof, XLCA has caused this Policy to be executed as of the Effective Date.

**Financial Guaranty Insurance Policy Endorsement**
**Effective Date**

**Attached to and forming part of**
**Financial Guaranty Insurance Policy No.**

Obligor:

Insured Obligations:

Beneficiary:

*Capitalized terms used herein and not otherwise defined herein or in the Policy shall have the meanings assigned to them in the Insurance Agreement as defined below.*

As used herein the term "Business Day" means any day other than Saturday or Sunday on which commercial banking institutions in New York, New York are generally open for banking business.

As used herein the term "Insolvency Proceeding" means the commencement, after the date hereof, of any bankruptcy, insolvency, readjustment of debt, reorganization, marshalling of assets and liabilities or similar proceedings by or against any Person, the commencement, after the date hereof, of any proceedings by or against any Person for the winding up or liquidation of its affairs, or the consent, after the date hereof, to the appointment of a trustee, conservator, receiver or liquidator in any bankruptcy, insolvency, readjustment of debt, reorganization, marshalling of assets and liabilities or similar proceedings of or relating to any Person.

As used herein the term "Indenture" means the _____ Indenture dated as of _____ between the Obligor and _____, as Trustee (the "Trustee"), as amended and supplemented, including by the _____ Supplemental Indenture dated as of _____.

As used herein the term "Insurance Agreement" means the Insurance Agreement dated as of _____ by and among XLCA, _____ and the Trustee, as may be amended or modified from time to time.

As used herein the term "Insured Amount" means that portion of the Scheduled Payments that shall become due for payment but shall be unpaid by reason of Nonpayment.

As used herein the term "Nonpayment" means, with respect to any Payment Date, the failure of the Trustee to receive in full, in accordance with the terms of the Indenture, that Scheduled Payment that is due for payment with respect to such date.

SPECIMEN

As used herein the term "Owner" means the registered owner of any Insured Obligation as indicated in the registration books maintained by or on behalf of the Obligor for such purpose or, if the Insured Obligation is in bearer form, the holder of the Insured Obligation.

As used herein, the term "Payment Date" means, in the case of scheduled interest on the Insured Obligations, each _____, _____, _____ and _____ of each year during the Term of this Policy, beginning _____, and, in the case of scheduled principal of the Insured Obligations, _____.

As used herein, the term "Person" means an individual, a partnership, a limited liability company, a joint venture, a corporation, a trust, an unincorporated organization, and a government or any department or agency thereof.

As used herein the term "Scheduled Payment" means, with respect to any Payment Date during the Term of this Policy, scheduled payments of interest and principal, in accordance with the original terms of the Insured Obligations and the Indenture when issued and without regard to any subsequent amendment or modification of the Insured Obligations or the Indenture that has not been consented to in writing by XLCA. Notwithstanding the foregoing, "Scheduled Payments" shall in no event include payments which become due on an accelerated basis as a result of (a) any default by the Obligor, (b) the occurrence of an Event of Default under the Indenture, (c) mandatory or optional redemption, in whole or in part or (d) any other cause, unless XLCA elects, in its sole discretion, to pay such amounts in whole or in part (in which event Scheduled Payments shall include such accelerated payments as, when, and to the extent so elected by XLCA). In the event that it does not make such election, Scheduled Payments shall include payments due in accordance with the original scheduled terms without regard to any acceleration. In addition, "Scheduled Payment" shall not include, nor shall coverage be provided under the Policy in respect of, (i) any make whole, redemption or call premium payable in respect of the Insured Obligations, (ii) any amounts due in respect of the Insured Obligations attributable to any increase in interest rate, penalty or other sum payable by the Issuer by reason of any default or event of default in respect of the Insured Obligations, or by reason of any deterioration of the creditworthiness of the Issuer or (iii) any taxes, withholding or other charge imposed by any governmental authority due in connection with the payment of any Scheduled Payment to any holder of an Insured Obligation.

As used herein the term "Term of this Policy" means the period from and including the Effective Date to and including the first date on which (i) all Scheduled Payments have been paid that are required to be paid by the Obligor under the Indenture; (ii) the 91-day period during which any Scheduled Payment could have been avoided in whole or in part as a preference payment under applicable bankruptcy, insolvency, receivership or similar law has expired, and (iii) if any proceedings requisite to avoidance as a preference payment have been commenced prior to the occurrence of (i) and (ii) above, a final and nonappealable order in resolution of each such proceeding has been entered; *provided, however*, that if the Owners are required to return any Avoided

SPECIMEN

Payment (as defined below) as a result of such insolvency proceeding, then the Term of the Policy shall terminate on the date on which XLCA has made all payments required to be made under the terms of this Policy in respect of all such Avoided Payments.

To make a claim under the Policy, the Trustee shall deliver to XLCA Payment Notice in the form of Exhibit A hereto (a "Payment Notice"), appropriately completed and executed by the Trustee. A Payment Notice under this Policy may be presented to XLCA by (i) delivery of the original Payment Notice to XLCA at its address set forth below, or (ii) facsimile transmission of the original Payment Notice to XLCA at its facsimile number set forth below. If presentation is made by facsimile transmission, the Trustee shall (x) simultaneously confirm transmission by telephone to XLCA at its telephone number set forth below, and (y) as soon as reasonably practicable, deliver the original Payment Notice to XLCA at its address set forth below. Any Payment Notice received by XLCA after 10:00 a.m., New York City time, on a Business Day, or on any day that is not a Business Day, will be deemed to be received by XLCA at 9:00 a.m., New York City time, on the next succeeding Business Day. XLCA shall make payments due in respect of Insured Amounts no later than 2:00 p.m. New York City time to the Trustee upon the presentation of a Payment Notice to XLCA on the later of (a) one (1) Business Day following receipt by XLCA of a Payment Notice or (b) the Business Day on which Scheduled Payments are due for payment.

Subject to the foregoing, if the payment of any amount with respect to the Scheduled Payment is voided (a "Preference Event") as a result of an Insolvency Proceeding and as a result of such Preference Event, the Owner is required to return such voided payment, or any portion of such voided payment, made in respect of the Insured Obligation (an "Avoided Payment"), XLCA will pay an amount equal to such Avoided Payment, as and when such payment would otherwise be due pursuant to the Insured Obligation and the Indenture without regard to acceleration or prepayment, and upon payment of such Avoided Payment and receipt by XLCA from the Trustee on behalf of such Owner of (x) a certified copy of a final order of a court exercising jurisdiction in such Insolvency Proceeding to the effect that the Owner or the Trustee on behalf of the Owner is required to return any such payment or portion thereof because such payment was voided under applicable law, with respect to which order the appeal period has expired without an appeal having been filed (the "Final Order"), (y) an assignment, substantially in the form attached hereto as Exhibit B, properly completed and executed by such Owner irrevocably assigning to XLCA all rights and claims of such Owner relating to or arising under such Avoided Payment, and (z) a Payment Notice in the form of Exhibit A hereto appropriately completed and executed by the Trustee.

XLCA shall make payments due in respect of Avoided Payments no later than 2:00 p.m. New York City time on the Business Day following XLCA's receipt of the documents required under clauses (x) through (z) of the preceding paragraph. Any such documents received by XLCA after 10:00 a.m. New York City time on any Business Day or on any day that is not a Business Day shall be deemed to have been received by XLCA at 9:00 a.m., New York City time, on the next succeeding Business Day. All payments made by XLCA hereunder on account of any Avoided Payment shall be disbursed to the receiver, conservator, debtor-in-possession or trustee in bankruptcy named in the Final

SAMPLE

Order and not to any Owner directly (unless an Owner previously paid such amount to the receiver, conservator, debtor-in-possession or trustee in bankruptcy named in the Final Order, in which case such payment shall be disbursed to the Trustee for distribution to such Owner upon proof of such payment reasonably satisfactory to XLCA).

XLCA hereby waives and agrees not to assert any and all rights to require the Trustee to make demand on or to proceed against any person, party or security prior to the Trustee demanding payment under this Policy.

No defenses, set-offs and counterclaims of any kind available to XLCA so as to deny payment of any amount due in respect of this Policy will be valid and XLCA hereby waives and agrees not to assert any and all such defenses (including, without limitation, defense of fraud in the inducement or fact, or any other circumstances which would have the effect of discharging a surety in law or in equity), set-offs and counterclaims, including, without limitation, any such rights acquired by subrogation, assignment or otherwise. Upon any payment hereunder, in furtherance and not in limitation of XLCA's equitable right of subrogation and XLCA's rights under the Insurance Agreement, XLCA will be subrogated to the rights of the Owner in respect of which such payment was made to receive any and all amounts due in respect of the obligations in respect of which XLCA has made a payment hereunder. Any rights of subrogation acquired by XLCA as a result of any payment made under this Policy shall, in all respects, be subordinate and junior in right of payment to the prior indefeasible payment in full of any amounts due the Owner on account of payments due under the Insured Obligation.

This Policy is neither transferable nor assignable, in whole or in part, except to a successor trustee duly appointed and qualified under the Indenture. All Payment Notices and other notices, presentations, transmissions, deliveries and communications made by the Trustee to XLCA with respect to this Policy shall specifically refer to the number of this Policy and shall be made to XLCA at:

XL Capital Assurance Inc.
1221 Avenue of the Americas
New York, New York 10020
Attention: Surveillance
Telephone: (212) 478-3400
Facsimile: (212) 478- 3597

or such other address, telephone number or facsimile number as XLCA may designate to the Trustee in writing from time to time. Each such Payment Notice and other notice, presentation, transmission, delivery and communication shall be effective only upon actual receipt by XLCA.

The obligations of XLCA under this Policy are irrevocable, primary, absolute and unconditional, subject to satisfaction of the conditions for making a claim under the Policy, and neither the failure of any Person to perform any covenant or obligation in favor of XLCA (or otherwise), nor the failure or omission to make a

SPECIMEN

demand permitted hereunder, nor the failure of any assignment or grant of any security interest, nor the commencement of any Insolvency Proceeding shall in any way affect or limit XLCA's obligations under this Policy. If a successful action or proceeding to enforce this Policy is brought by the Trustee, the Trustee shall be entitled to recover from XLCA costs and expenses reasonably incurred, including, without limitation, reasonable fees and expenses of counsel.

This Policy and the obligations of XLCA hereunder shall terminate on the expiration of the Term of this Policy. This Policy shall be returned to XLCA by the Trustee upon the expiration of the Term of this Policy.

The Property/Casualty Insurance Security Fund specified in Article 76 of the New York Insurance Law does not cover this Policy. The Florida Insurance Guaranty Association created under Part II of Chapter 631 of the Florida Insurance Code does not cover this Policy. In the event that XLCA were to become insolvent, the California Insurance Guaranty Association, established pursuant to Article 14.2 of Chapter 1 of Part 2 of Division 1 of the California Insurance Code excludes from coverage any claims arising under this Policy.

**THIS POLICY SHALL BE CONSTRUED, AND THE OBLIGATIONS, RIGHTS AND REMEDIES OF THE PARTIES HEREUNDER SHALL BE DETERMINED, IN ACCORDANCE WITH THE LAWS OF THE STATE OF NEW YORK, WITHOUT REGARD TO CONFLICT OF LAWS PRINCIPLES THAT WOULD REQUIRE THE APPLICATION OF THE LAWS OF ANY OTHER JURISDICTION.**

In the event any term or provision of the form of this Policy is inconsistent with the provision of this Endorsement, the provision of this Endorsement shall take precedence and be binding.

[Remainder of Page Intentionally Left Blank]

SPECIMEN

**IN WITNESS WHEREOF**, XL Capital Assurance Inc. has caused this Endorsement to the Policy to be executed on the Effective Date.

**Exhibit A to Financial Guaranty Policy No.**

XL Capital Assurance Inc.
1221 Avenue of the Americas
New York, New York 10020
Attention: Surveillance

**PAYMENT NOTICE**
**UNDER FINANCIAL GUARANTY POLICY No.**

_____, as Trustee (the "Trustee"), hereby certifies to XL Capital Assurance Inc. ("XLCA") with reference to that certain Financial Guaranty Policy, No. _____, dated _____ (the "Policy"), issued by XLCA in favor of the Trustee under the _____ Indenture dated as of _____ between _____ and the Trustee, as amended and supplemented, including by the _____ Supplemental Indenture dated as of _____ (the "Indenture"), as follows:

1. The Trustee is the trustee under the Indenture and the beneficiary on behalf of each Owner of the Policy.

2. The Trustee is entitled to make a demand under the Policy pursuant to the Indenture.

3. This notice relates to the [insert date] Payment Date. The amount demanded is to be paid in immediately available funds to the [Specify Account] at [Identify Financial Institution Holding Account] account number[_____].

[For a Payment Notice in respect of Insured Amounts other than Avoided Payment, use paragraph 4.]

4. The Trustee demands payment of $_____ which is an amount equal to the amount by which the Scheduled Payment due on the above Payment Date exceeds the funds made available to the Trustee to pay such Scheduled Payment.

[For a Payment Notice in respect of an Avoided Payment use the following paragraphs [4] or [5].]

[4.] or [5.] The Trustee hereby represents and warrants, based upon information available to it, that (i) the amount entitled to be drawn under the Policy on the date hereof in respect of Avoided Payments is the amount paid or to be paid simultaneously with such draw on the Policy by the Owner on account of a Preference Event [$_____] (the "Avoided Payment Amount"), (ii) the Owner with respect to which the drawing is being made under the Policy has paid or simultaneously with such draw on the Policy will pay such Avoided Payment Amount, and (iii) the documents required by the Policy to be delivered in connection with such Avoided Payment and Avoided Payment Amount have previously been presented to XLCA or are attached hereto.

SPECIMEN

[6] The Trustee agrees that, following payment of funds by XLCA, it shall use reasonable efforts to procure (a) that such amounts are applied directly to the payment of any Insured Amount which is due for payment, (b) that such funds are not applied for any other purpose; and (c) the maintenance of accurate records of such payments in respect of the Insured Obligation and the corresponding claim on the Policy and the proceeds thereof.

[7] The Trustee, on behalf of itself and the Owners, hereby assigns to XLCA all rights and claims (including rights of actions and claims in respect of securities laws violations or otherwise) of the Trustee and the Owners with respect to the Insured Obligation to the extent of any payments under the Policy. The foregoing assignment is in addition to, and not in limitation of, rights of subrogation otherwise available to XLCA in respect of such payments. The Trustee shall take such action and deliver such instruments as may be reasonably required by XLCA to effectuate the purposes of this paragraph [7].

[8] The Trustee, on behalf of itself and the Owners, hereby appoints XLCA as agent and attorney-in-fact for the Trustee and the Owners in any legal proceeding in respect of the Insured Obligation. The Trustee, on behalf of itself and the Owners, thereby (and without limiting the generality of the preceding sentence) agrees that XLCA may, at any time during the continuation of any proceeding by or against any debtor with respect to which a Preference Claim (as defined below) or other claim with respect to the Insured Obligation is asserted under any Insolvency Proceeding, direct all matters relating to such Insolvency Proceeding, including, without limitation, (a) all matters relating to any claim in connection with a Insolvency Proceeding seeking the avoidance as a preferential transfer of any payment made with respect to the obligations (a "Preference Claim"), (b) the direction of any appeal of any order relating to any Preference Claim and (c) the posting of any surety, supersedeas or performance bond pending any such appeal. In addition, the Trustee, on behalf of itself and the Owners, hereby agrees that XLCA shall be subrogated to, and the Trustee, on behalf of itself and the Owners, hereby delegates and assigns, to the fullest extent permitted by law, the rights of the Trustee and the Owners in the conduct of any Insolvency Proceeding, including, without limitation, all rights of any party to an adversary proceeding or action with respect to any court order issued in connection with any such Insolvency Proceeding.

**$360,000,000**

# Gulf Power Company

## Senior Notes

## Junior Subordinated Notes

---

# Gulf Power Capital Trust V
# Gulf Power Capital Trust VI

## Trust Preferred Securities

**Fully and unconditionally guaranteed, as set forth in this Prospectus, by**

# Gulf Power Company

**a subsidiary of The Southern Company**

---

We will provide the specific terms of these securities in supplements to this Prospectus. You should read this Prospectus and the applicable prospectus supplement carefully before you invest.

See "Risk Factors" on page 2 for information on certain risks related to the purchase of securities offered by this Prospectus.

**Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this Prospectus is truthful or complete. Any representation to the contrary is a criminal offense.**

**April 25, 2003**

## ABOUT THIS PROSPECTUS

This Prospectus is part of a registration statement filed with the Securities and Exchange Commission (the "Commission") using a "shelf" registration process under the Securities Act of 1933, as amended (the "1933 Act"). Under the shelf process, Gulf Power Company (the "Company") may sell, in one or more transactions,

- senior notes (the "Senior Notes")
- junior subordinated notes (the "Junior Subordinated Notes")

and Gulf Power Capital Trust V and Gulf Power Capital Trust VI (individually, a "Trust" and collectively, the "Trusts") may sell

- trust preferred securities or capital securities (the "Preferred Securities")

in one or more offerings up to a total dollar amount of $360,000,000. This Prospectus provides a general description of those securities. Each time the Company sells securities, the Company will provide a prospectus supplement that will contain specific information about the terms of that offering ("Prospectus Supplement"). The Prospectus Supplement may also add, update or change information contained in this Prospectus. You should read this Prospectus and the applicable Prospectus Supplement together with additional information under the heading "Available Information."

## RISK FACTORS

Investing in the Company's securities involves risk. Please see the risk factors described in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2002, which is incorporated by reference in this Prospectus. Before making an investment decision, you should carefully consider these risks as well as other information contained or incorporated by reference in this Prospectus. The risks and uncertainties described are not the only ones facing the Company. Additional risks and uncertainties not presently known to the Company or that the Company currently deems immaterial may also impair its business operations, its financial results and the value of its securities.

## AVAILABLE INFORMATION

The Company and the Trusts have filed with the Commission a combined registration statement on Form S-3 (the "Registration Statement," which term encompasses any amendments of the Registration Statement and exhibits to the Registration Statement) under the 1933 Act. As permitted by the rules and regulations of the Commission, this Prospectus does not contain all of the information set forth in the Registration Statement and the exhibits and schedules thereto, to which reference is made.

The Company is subject to the informational requirements of the Securities Exchange Act of 1934, as amended (the "1934 Act"), and in accordance with the 1934 Act files reports and other information with the Commission. Such reports and other information can be inspected and copied at the public reference facilities of the Commission at 450 Fifth Street, N.W., Washington, D.C. 20549. Information on the operation of the Public Reference Room may be obtained by calling the Commission at 1-800-SEC-0330. The Commission maintains a Web site that contains reports, proxy and information statements and other information regarding registrants including the Company that file electronically at http://www.sec.gov. In addition, reports and other material concerning the Company can be inspected at the offices of the New York Stock Exchange, 20 Broad Street, New York, New York 10005.

No separate financial statements of any Trust are included in this Prospectus. The Company considers that such statements would not be material to holders of the Preferred Securities because each Trust has no

independent operations and exists for the sole purpose of investing the proceeds of the sale of its Trust Securities (as defined below) in Junior Subordinated Notes.

## INCORPORATION OF CERTAIN DOCUMENTS BY REFERENCE

The following documents have been filed with the Commission pursuant to the 1934 Act and are incorporated by reference in this Prospectus and made a part of this Prospectus:

(a) the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2002; and

(b) the Company's Current Report on Form 8-K dated March 21, 2003.

All documents filed by the Company with the Commission pursuant to Section 13(a), 13(c), 14 or 15(d) of the 1934 Act subsequent to the date of this Prospectus and prior to the termination of this offering shall be deemed to be incorporated by reference in this Prospectus and made a part of this Prospectus from the date of filing of such documents. Any statement contained in a document incorporated or deemed to be incorporated by reference in this Prospectus shall be deemed to be modified or superseded for purposes of this Prospectus to the extent that a statement contained in this Prospectus or in any other subsequently filed document which also is or is deemed to be incorporated by reference in this Prospectus modifies or supersedes such statement. Any statement so modified or superseded shall not be deemed, except as so modified or superseded, to constitute a part of this Prospectus.

**The Company will provide without charge to each person to whom this Prospectus is delivered, on the written or oral request of any such person, a copy of any or all documents incorporated herein by reference in this Prospectus (other than the exhibits to such documents unless such exhibits are specifically incorporated by reference in this Prospectus). Such requests should be directed to Warren E. Tate, Vice President, Secretary and Treasurer, Gulf Power Company, One Energy Place, Pensacola, Florida 32520, telephone: (850) 444-6111.**

## GULF POWER COMPANY

The Company is a corporation organized under the laws of the State of Maine on November 2, 1925, and was admitted to do business in Florida on January 15, 1926, in Mississippi on October 25, 1976 and in Georgia on November 20, 1984. The principal executive offices of the Company are located at 500 Bayfront Parkway, Pensacola, Florida 32501, and the telephone number is (850) 444-6111.

The Company is a wholly owned subsidiary of The Southern Company ("Southern"), a holding company registered under the Public Utility Holding Company Act of 1935, as amended. The Company is engaged, within the northwestern portion of the State of Florida, in the generation and purchase of electricity and the distribution and sale of such electricity at retail in 71 communities as well as in rural areas, and at wholesale to a nonaffiliated utility and to a municipality.

## SELECTED INFORMATION

*The following material, which is presented in this Prospectus solely to furnish limited introductory information regarding the Company, has been selected from, or is based upon, the detailed information and financial statements appearing in the documents incorporated in this Prospectus by reference or elsewhere in this Prospectus, is qualified in its entirety by reference to those documents and, therefore, should be read together with those documents.*

### Gulf Power Company

| | |
|---|---|
| Business | Generation, transmission, distribution and sale of electric energy |
| Service Area | Approximately 7,400 square miles within the northwestern portion of the State of Florida |
| Customers at December 31, 2002 | 383,923 |
| Generating Capacity at December 31, 2002 (kilowatts) | 2,808,550 |
| Sources of Generation during 2002 (kilowatt-hours) | Coal (82%), Gas (18%) |

### Certain Ratios

The following table sets forth the Ratios of Earnings to Fixed Charges and Earnings to Fixed Charges Plus Preferred Dividend Requirements (Pre-Income Tax Basis) for the periods indicated.

| | Year Ended December 31, | | | | |
|---|---|---|---|---|---|
| | 1998 | 1999 | 2000 | 2001 | 2002 |
| Ratio of Earnings to Fixed Charges(1) | 3.83 | 3.62 | 3.38 | 3.64 | 3.52 |
| Ratio of Earnings to Fixed Charges Plus Preferred Dividend Requirements (Pre-Income Tax Basis)(2) | 3.72 | 3.58 | 3.34 | 3.60 | 3.50 |

(1) This ratio is computed as follows: (i) "Earnings" have been calculated by adding to "Earnings Before Income Taxes" "Interest Expense, Net of Amounts Capitalized," "Distributions on Preferred Securities of Subsidiary" and the debt portion of allowance for funds used during construction, and (ii) "Fixed Charges" consist of "Interest Expense, Net of Amounts Capitalized," "Distributions on Preferred Securities of Subsidiary" and the debt portion of allowance for funds used during construction.

(2) In computing this ratio, "Preferred Dividend Requirements" represent the before tax earnings necessary to pay such dividends, computed at the effective tax rates for the applicable periods.

## THE TRUSTS

Each Trust is a statutory trust created under Delaware law pursuant to the filing of a certificate of trust with the Delaware Secretary of State on April 7, 2003. Each Trust's business is defined in a trust agreement, executed by the Company, as Depositor, and the Delaware Trustee of each Trust. This trust agreement of each Trust will be amended and restated in its entirety substantially in the form filed as an exhibit to the Registration Statement of which this Prospectus forms a part (the "Trust Agreement"). Each Trust Agreement will be qualified as an indenture under the Trust Indenture Act of 1939, as amended (the "1939 Act"). The Company will own all of the common securities (the "Common Securities" and, together with the Preferred Securities, the "Trust Securities") of each Trust. The Trust Securities represent undivided beneficial interests in the assets of the respective Trusts. Each Trust exists for the exclusive purposes of (i) issuing its Trust Securities representing undivided beneficial interests in the assets of such Trust, (ii) investing the gross proceeds of its Trust Securities in a related series of Junior Subordinated Notes, and (iii) engaging in only those other activities necessary, appropriate, convenient or incidental to these purposes. The payment of periodic cash distributions on the Preferred Securities of each Trust and payments on liquidation and redemption with respect to the Preferred Securities of each Trust, in each case to the extent each Trust has funds legally and immediately available for these purposes, will be guaranteed by the Company (individually, a "Guarantee" and collectively, the "Guarantees") to the extent set forth under "Description of the Guarantees."

Each Trust's business and affairs will be conducted by its trustees, which shall be appointed by the Company as the holder of the Common Securities: two officers of the Company as Administrative Trustees; JPMorgan Chase Bank as Property Trustee; and Chase Manhattan Bank USA, National Association as Delaware Trustee (collectively, the "Securities Trustees"). The Property Trustee of each Trust will act as the indenture trustee with respect to such Trust for purposes of compliance with the provisions of the 1939 Act.

The principal place of business of each Trust shall be c/o the Company, 500 Bayfront Parkway, Pensacola, Florida 32501, telephone (850) 444-6111, Attn: Treasurer.

Reference is made to the Prospectus Supplement relating to the Preferred Securities of a Trust for further information concerning such Trust.

## ACCOUNTING TREATMENT OF TRUSTS

For financial reporting purposes, the Trusts will be treated as subsidiaries of the Company and, accordingly, the accounts of the Trusts will be included in the consolidated financial statements of the Company. The Preferred Securities will be presented as a separate line item in the consolidated balance sheet of the Company, and appropriate disclosures concerning the Preferred Securities, the Guarantees and the Junior Subordinated Notes will be included in the notes to the consolidated financial statements. For financial reporting purposes, the Company will record distributions payable on the Preferred Securities as an expense.

## USE OF PROCEEDS

Each Trust will invest the proceeds received from the sale of its Preferred Securities in Junior Subordinated Notes. Except as may be otherwise described in an applicable Prospectus Supplement, the net proceeds received by the Company from such investment and any proceeds received from the sale of its Senior Notes or other sales of its Junior Subordinated Notes will be used in connection with its ongoing construction program, to pay scheduled maturities and/or refundings of its securities, to repay short-term indebtedness to the extent outstanding and for other general corporate purposes.

## DESCRIPTION OF THE SENIOR NOTES

Set forth below is a description of the general terms of the Senior Notes. The following description does not purport to be complete and is subject to, and is qualified in its entirety by reference to, the Senior Note Indenture, dated as of January 1, 1998, between the Company and JPMorgan Chase Bank (formerly known as The Chase Manhattan Bank), as trustee (the "Senior Note Indenture Trustee"), as to be supplemented by a supplemental indenture to the Senior Note Indenture establishing the Senior Notes of each series (the Senior Note Indenture, as so supplemented, is referred to as the "Senior Note Indenture"), the forms of which are filed as exhibits to the Registration Statement of which this Prospectus forms a part. The terms of the Senior Notes will include those stated in the Senior Note Indenture and those made a part of the Senior Note Indenture by reference to the 1939 Act. Certain capitalized terms used in this Prospectus and not defined in this Prospectus are defined in the Senior Note Indenture.

### General

The Senior Notes will be issued as unsecured senior debt securities under the Senior Note Indenture and will rank equally with all other unsecured and unsubordinated debt of the Company. The Senior Notes will be effectively subordinated to all secured debt of the Company, including its first mortgage bonds, aggregating approximately $170,000,000 outstanding at December 31, 2002. The Senior Note Indenture does not limit the aggregate principal amount of Senior Notes that may be issued under the Senior Note Indenture and provides that Senior Notes may be issued from time to time in one or more series pursuant to an indenture supplemental to the Senior Note Indenture. The Senior Note Indenture gives the Company the ability to reopen a previous issue of Senior Notes and issue additional Senior Notes of such series, unless otherwise provided.

Reference is made to the Prospectus Supplement that will accompany this Prospectus for the following terms of the series of Senior Notes being offered by such Prospectus Supplement: (i) the title of such Senior Notes; (ii) any limit on the aggregate principal amount of such Senior Notes; (iii) the date or dates on which the principal of such Senior Notes is payable; (iv) the rate or rates at which such Senior Notes shall bear interest, if any, or any method by which such rate or rates will be determined, the date or dates from which such interest will accrue, the interest payment dates on which such interest shall be payable, and the regular record date for the interest payable on any interest payment date; (v) the place or places where the principal of (and premium, if any) and interest, if any, on such Senior Notes shall be payable; (vi) the period or periods within which, the price or prices at which and the terms and conditions on which such Senior Notes may be redeemed, in whole or in part, at the option of the Company or at the option of the holder prior to their maturity; (vii) the obligation, if any, of the Company to redeem or purchase such Senior Notes; (viii) the denominations in which such Senior Notes shall be issuable; (ix) if other than the principal amount of the Senior Notes, the portion of the principal amount of such Senior Notes which shall be payable upon declaration of acceleration of the maturity of such Senior Notes; (x) any deletions from, modifications of or additions to the Events of Default or covenants of the Company as provided in the Senior Note Indenture pertaining to such Senior Notes; (xi) whether such Senior Notes shall be issued in whole or in part in the form of a Global Security; and (xii) any other terms of such Senior Notes.

The Senior Note Indenture does not contain provisions that afford holders of Senior Notes protection in the event of a highly leveraged transaction involving the Company.

### Events of Default

The Senior Note Indenture provides that any one or more of the following described events with respect to the Senior Notes of any series, which has occurred and is continuing, constitutes an "Event of Default" with respect to the Senior Notes of such series:

(a) failure for 10 days to pay interest on the Senior Notes of such series, when due on an interest payment date other than at maturity or upon earlier redemption; or

(b) failure to pay principal or premium, if any, or interest on the Senior Notes of such series when due at maturity or upon earlier redemption; or

(c) failure for three Business Days to deposit any sinking fund payment when due by the terms of a Senior Note of such series; or

(d) failure to observe or perform any other covenant or warranty of the Company in the Senior Note Indenture (other than a covenant or warranty which has expressly been included in the Senior Note Indenture solely for the benefit of one or more series of Senior Notes other than such series) for 90 days after written notice to the Company from the Senior Note Indenture Trustee or the holders of at least 25% in principal amount of the outstanding Senior Notes of such series; or

(e) certain events of bankruptcy, insolvency or reorganization of the Company.

The holders of not less than a majority in aggregate outstanding principal amount of the Senior Notes of any series have the right to direct the time, method and place of conducting any proceeding for any remedy available to the Senior Note Indenture Trustee with respect to the Senior Notes of such series. If a Senior Note Indenture Event of Default occurs and is continuing with respect to the Senior Notes of any series, then the Senior Note Indenture Trustee or the holders of not less than 25% in aggregate outstanding principal amount of the Senior Notes of such series may declare the principal amount of the Senior Notes due and payable immediately by notice in writing to the Company (and to the Senior Note Indenture Trustee if given by the holders), and upon any such declaration such principal amount shall become immediately due and payable. At any time after such a declaration of acceleration with respect to the Senior Notes of any series has been made and before a judgment or decree for payment of the money due has been obtained as provided in Article Five of the Senior Note Indenture, the holders of not less than a majority in aggregate outstanding principal amount of the Senior Notes of such series may rescind and annul such declaration and its consequences if the default has been cured or waived and the Company has paid or deposited with the Senior Note Indenture Trustee a sum sufficient to pay all matured installments of interest and principal due otherwise than by acceleration and all sums paid or advanced by the Senior Note Indenture Trustee, including reasonable compensation and expenses of the Senior Note Indenture Trustee.

The holders of not less than a majority in aggregate outstanding principal amount of the Senior Notes of any series may, on behalf of the holders of all the Senior Notes of such series, waive any past default with respect to such series, except (i) a default in the payment of principal or interest or (ii) a default in respect of a covenant or provision which under Article Nine of the Senior Note Indenture cannot be modified or amended without the consent of the holder of each outstanding Senior Note of such series affected.

**Registration and Transfer**

The Company shall not be required to (i) issue, register the transfer of or exchange Senior Notes of any series during a period of 15 days immediately preceding the date notice is given identifying the Senior Notes of such series called for redemption, or (ii) register the transfer of or exchange any Senior Notes so selected for redemption, in whole or in part, except the unredeemed portion of any Senior Note being redeemed in part.

**Payment and Paying Agent**

Unless otherwise indicated in an applicable Prospectus Supplement, payment of principal of any Senior Notes will be made only against surrender to the Paying Agent of such Senior Notes. Principal of and interest on Senior Notes will be payable subject to any applicable laws and regulations, at the office of such Paying Agent or Paying Agents as the Company may designate from time to time, except that, at the option of the Company, payment of any interest may be made by wire transfer or by check mailed to the address of the person entitled to an interest payment as such address shall appear in the Security Register with respect to the Senior Notes.

Payment of interest on Senior Notes on any interest payment date will be made to the person in whose name the Senior Notes (or predecessor security) are registered at the close of business on the record date for such interest payment.

Unless otherwise indicated in an applicable Prospectus Supplement, the Senior Note Indenture Trustee will act as Paying Agent with respect to the Senior Notes. The Company may at any time designate additional Paying Agents or rescind the designation of any Paying Agents or approve a change in the office through which any Paying Agent acts.

All moneys paid by the Company to a Paying Agent for the payment of the principal of or interest on the Senior Notes of any series which remain unclaimed at the end of two years after such principal or interest shall have become due and payable will be repaid to the Company, and the holder of such Senior Notes will from that time forward look only to the Company for payment of such principal and interest.

**Modification**

The Senior Note Indenture contains provisions permitting the Company and the Senior Note Indenture Trustee, with the consent of the holders of not less than a majority in principal amount of the outstanding Senior Notes of each series that is affected, to modify the Senior Note Indenture or the rights of the holders of the Senior Notes of such series; provided, that no such modification may, without the consent of the holder of each outstanding Senior Note that is affected, (i) change the stated maturity of the principal of, or any installment of principal of or interest on, any Senior Note, or reduce the principal amount of any Senior Note or the rate of interest on any Senior Note or any premium payable upon the redemption thereof, or change the method of calculating the rate of interest on any Senior Note, or impair the right to institute suit for the enforcement of any such payment on or after the stated maturity of any Senior Note (or, in the case of redemption, on or after the redemption date), or (ii) reduce the percentage of principal amount of the outstanding Senior Notes of any series, the consent of whose holders is required for any such supplemental indenture, or the consent of whose holders is required for any waiver (of compliance with certain provisions of the Senior Note Indenture or certain defaults under the Senior Note Indenture and their consequences) provided for in the Senior Note Indenture, or (iii) modify any of the provisions of the Senior Note Indenture relating to supplemental indentures, waiver of past defaults, or waiver of certain covenants, except to increase any such percentage or to provide that certain other provisions of the Senior Note Indenture cannot be modified or waived without the consent of the holder of each outstanding Senior Note that is affected.

In addition, the Company and the Senior Note Indenture Trustee may execute, without the consent of any holders of Senior Notes, any supplemental indenture for certain other usual purposes, including the creation of any new series of Senior Notes.

**Consolidation, Merger and Sale**

The Company shall not consolidate with or merge into any other corporation or convey, transfer or lease its properties and assets substantially as an entirety to any person, unless (1) such other corporation or person is a corporation organized and existing under the laws of the United States, any state in the United States or the District of Columbia and such other corporation or person expressly assumes, by supplemental indenture executed and delivered to the Senior Note Indenture Trustee, the payment of the principal of (and premium, if any) and interest on all the Senior Notes and the performance of every covenant of the Senior Note Indenture on the part of the Company to be performed or observed; (2) immediately after giving effect to such transactions, no Event of Default, and no event which, after notice or lapse of time or both, would become an Event of Default, shall have happened and be continuing; and (3) the Company has delivered to the Senior Note Indenture Trustee an officers' certificate and an opinion of counsel, each stating that such transaction complies with the provisions of the Senior Note Indenture governing consolidation, merger, conveyance, transfer or lease and that all conditions precedent to the transaction have been complied with.

### Information Concerning the Senior Note Indenture Trustee

The Senior Note Indenture Trustee, prior to an Event of Default with respect to Senior Notes of any series, undertakes to perform, with respect to Senior Notes of such series, only such duties as are specifically set forth in the Senior Note Indenture and, in case an Event of Default with respect to Senior Notes of any series has occurred and is continuing, shall exercise, with respect to Senior Notes of such series, the same degree of care as a prudent individual would exercise in the conduct of his or her own affairs. Subject to such provision, the Senior Note Indenture Trustee is under no obligation to exercise any of the powers vested in it by the Senior Note Indenture at the request of any holder of Senior Notes of any series, unless offered reasonable indemnity by such holder against the costs, expenses and liabilities which might be incurred by the Senior Note Indenture Trustee. The Senior Note Indenture Trustee is not required to expend or risk its own funds or otherwise incur any financial liability in the performance of its duties if the Senior Note Indenture Trustee reasonably believes that repayment or adequate indemnity is not reasonably assured to it.

JPMorgan Chase Bank, the Senior Note Indenture Trustee, also serves as Subordinated Note Indenture Trustee, as Property Trustee and as Guarantee Trustee. The Company and certain of its affiliates maintain deposit accounts and banking relationships with JPMorgan Chase Bank. JPMorgan Chase Bank also serves as trustee under other indentures pursuant to which securities of the Company and affiliates of the Company are outstanding.

### Governing Law

The Senior Note Indenture and the Senior Notes will be governed by, and construed in accordance with, the internal laws of the State of New York.

### Miscellaneous

The Company will have the right at all times to assign any of its rights or obligations under the Senior Note Indenture to a direct or indirect wholly-owned subsidiary of the Company; provided, that, in the event of any such assignment, the Company will remain primarily liable for all such obligations. Subject to the foregoing, the Senior Note Indenture will be binding upon and inure to the benefit of the parties of the Senior Note Indenture and their respective successors and assigns.

## DESCRIPTION OF THE JUNIOR SUBORDINATED NOTES

Set forth below is a description of the general terms of the Junior Subordinated Notes. The following description does not purport to be complete and is subject to, and is qualified in its entirety by reference to, the Subordinated Note Indenture, dated as of January 1, 1997, between the Company and JPMorgan Chase Bank (formerly known as The Chase Manhattan Bank), as trustee (the "Subordinated Note Indenture Trustee"), as to be supplemented by a supplemental indenture to the Subordinated Note Indenture establishing the Junior Subordinated Notes of each series (the Subordinated Note Indenture, as so supplemented, is referred to as the "Subordinated Note Indenture"), the forms of which are filed as exhibits to the Registration Statement of which this Prospectus forms a part. The terms of the Junior Subordinated Notes will include those stated in the Subordinated Note Indenture and those made a part of the Subordinated Note Indenture by reference to the 1939 Act. Certain capitalized terms used in this Prospectus and not defined in this Prospectus are defined in the Subordinated Note Indenture.

### General

The Junior Subordinated Notes will be issued as unsecured junior subordinated debt securities under the Subordinated Note Indenture. The Subordinated Note Indenture does not limit the aggregate principal amount of Junior Subordinated Notes that may be issued under the Subordinated Note Indenture and provides that Junior Subordinated Notes may be issued from time to time in one or more series pursuant to an indenture supplemental to the Subordinated Note Indenture. The Subordinated Note Indenture gives the Company the ability to reopen a previous issue of Junior Subordinated Notes and issue additional Junior Subordinated Notes of such series, unless otherwise provided.

Reference is made to the Prospectus Supplement that will accompany this Prospectus for the following terms of the series of Junior Subordinated Notes being offered by such Prospectus Supplement: (i) the title of such Junior Subordinated Notes; (ii) any limit on the aggregate principal amount of such Junior Subordinated Notes; (iii) the date or dates on which the principal of such Junior Subordinated Notes is payable; (iv) the rate or rates at which such Junior Subordinated Notes shall bear interest, if any, or any method by which such rate or rates will be determined, the date or dates from which such interest will accrue, the interest payment dates on which such interest shall be payable, and the regular record date for the interest payable on any interest payment date; (v) the place or places where the principal of (and premium, if any) and interest, if any, on such Junior Subordinated Notes shall be payable; (vi) the period or periods within which, the price or prices at which and the terms and conditions on which such Junior Subordinated Notes may be redeemed, in whole or in part, at the option of the Company or at the option of the holder prior to their maturity; (vii) the obligation, if any, of the Company to redeem or purchase such Junior Subordinated Notes; (viii) the denominations in which such Junior Subordinated Notes shall be issuable; (ix) if other than the principal amount of the Junior Subordinated Notes, the portion of the principal amount of such Junior Subordinated Notes which shall be payable upon declaration of acceleration of the maturity of such Junior Subordinated Notes; (x) any deletions from, modifications of or additions to the Events of Default or covenants of the Company as provided in the Subordinated Note Indenture pertaining to such Junior Subordinated Notes; (xi) whether such Junior Subordinated Notes shall be issued in whole or in part in the form of a Global Security; (xii) the right, if any, of the Company to extend the interest payment periods of such Junior Subordinated Notes; and (xiii) any other terms of such Junior Subordinated Notes. The terms of each series of Junior Subordinated Notes issued to a Trust will correspond to those of the related Preferred Securities of such Trust as described in the Prospectus Supplement relating to such Preferred Securities.

The Subordinated Note Indenture does not contain provisions that afford holders of Junior Subordinated Notes protection in the event of a highly leveraged transaction involving the Company.

### Subordination

The Junior Subordinated Notes are subordinated and junior in right of payment to all Senior Indebtedness (as defined below) of the Company. No payment of principal of (including redemption payments, if any), or premium,

if any, or interest on (including Additional Interest (as defined below)) the Junior Subordinated Notes may be made if (a) any Senior Indebtedness is not paid when due and any applicable grace period with respect to such default has ended with such default not being cured or waived or otherwise ceasing to exist, or (b) the maturity of any Senior Indebtedness has been accelerated because of a default, or (c) notice has been given of the exercise of an option to require repayment, mandatory payment or prepayment or otherwise. Upon any payment or distribution of assets of the Company to creditors upon any liquidation, dissolution, winding-up, reorganization, assignment for the benefit of creditors, marshalling of assets or liabilities, or any bankruptcy, insolvency or similar proceedings of the Company, the holders of Senior Indebtedness shall be entitled to receive payment in full of all amounts due or to become due on or in respect of all Senior Indebtedness before the holders of the Junior Subordinated Notes are entitled to receive or retain any payment or distribution. Subject to the prior payment of all Senior Indebtedness, the rights of the holders of the Junior Subordinated Notes will be subrogated to the rights of the holders of Senior Indebtedness to receive payments and distributions applicable to such Senior Indebtedness until all amounts owing on the Junior Subordinated Notes are paid in full.

The term "Senior Indebtedness" means, with respect to the Company, (i) any payment due in respect of indebtedness of the Company, whether outstanding at the date of execution of the Subordinated Note Indenture or incurred, created or assumed after the execution of the Subordinated Note Indenture, (a) in respect of money borrowed (including any financial derivative, hedging or futures contract or similar instrument) and (b) evidenced by securities, debentures, bonds, notes or other similar instruments issued by the Company that, by their terms, are senior or senior subordinated debt securities including, without limitation, all obligations under its indentures with various trustees; (ii) all capital lease obligations; (iii) all obligations issued or assumed as the deferred purchase price of property, all conditional sale obligations and all obligations of the Company under any title retention agreement (but excluding trade accounts payable arising in the ordinary course of business and long-term purchase obligations); (iv) all obligations for the reimbursement of any letter of credit, banker's acceptance, security purchase facility or similar credit transaction; (v) all obligations of the type referred to in clauses (i) through (iv) above of other persons the payment of which the Company is responsible or liable as obligor, guarantor or otherwise; and (vi) all obligations of the type referred to in clauses (i) through (v) above of other persons secured by any lien on any property or asset of the Company (whether or not such obligation is assumed by the Company), except for (1) any such indebtedness that is by its terms subordinated to or *pari passu* with the Junior Subordinated Notes and (2) any unsecured indebtedness between or among the Company or its affiliates. Such Senior Indebtedness shall continue to be Senior Indebtedness and be entitled to the benefits of the subordination provisions contained in the Subordinated Note Indenture irrespective of any amendment, modification or waiver of any term of such Senior Indebtedness.

The Subordinated Note Indenture does not limit the aggregate amount of Senior Indebtedness that may be issued by the Company. As of December 31, 2002, Senior Indebtedness of the Company aggregated approximately $550,000,000.

**Additional Interest**

"Additional Interest" is defined in the Subordinated Note Indenture as (i) such additional amounts as may be required so that the net amounts received and retained by a holder of Junior Subordinated Notes (if the holder is a Trust) after paying taxes, duties, assessments or governmental charges of whatever nature (other than withholding taxes) imposed by the United States or any other taxing authority will not be less than the amounts the holder would have received had no such taxes, duties, assessments or other governmental charges been imposed; and (ii) any interest due and not paid on an interest payment date, together with interest on such interest due from such interest payment date to the date of payment, compounded quarterly, on each interest payment date.

**Certain Covenants**

The Company covenants in the Subordinated Note Indenture, for the benefit of the holders of each series of Junior Subordinated Notes, that, (i) if at such time the Company shall have given notice of its election to extend an interest payment period for such series of Junior Subordinated Notes and such extension shall be continuing,

(ii) if at such time the Company shall be in default with respect to its payment or other obligations under the Guarantee with respect to the Trust Securities, if any, related to such series of Junior Subordinated Notes, or (iii) if at such time an Event of Default under the Subordinated Note Indenture with respect to such series of Junior Subordinated Notes shall have occurred and be continuing, (a) the Company shall not declare or pay any dividend or make any distributions with respect to, or redeem, purchase, acquire or make a liquidation payment with respect to, any of its capital stock, and (b) the Company shall not make any payment of interest, principal or premium, if any, on or repay, repurchase or redeem any debt securities (including guarantees other than the Guarantees) issued by the Company which rank equally with or junior to the Junior Subordinated Notes. None of the foregoing, however, shall restrict (i) any of the actions described in the preceding sentence resulting from any reclassifications of the Company's capital stock or the exchange or conversion of one class or series of the Company's capital stock for another class or series of the Company's capital stock, or (ii) the purchase of fractional interests in shares of the Company's capital stock pursuant to the conversion or exchange provisions of such capital stock or the security being converted or exchanged.

The Subordinated Note Indenture further provides that, for so long as the Trust Securities of any Trust remain outstanding, the Company covenants (i) to directly or indirectly maintain 100% ownership of the Common Securities of such Trust; provided, however, that any permitted successor of the Company under the Subordinated Note Indenture may succeed to the Company's ownership of such Common Securities, and (ii) to use its reasonable efforts to cause such Trust (a) to remain a statutory trust, except in connection with the distribution of Junior Subordinated Notes to the holders of Trust Securities in liquidation of such Trust, the redemption of all of the Trust Securities of such Trust, or certain mergers, consolidations or amalgamations, each as permitted by the related Trust Agreement, and (b) to otherwise continue to be classified as a grantor trust for United States federal income tax purposes.

**Events of Default**

The Subordinated Note Indenture provides that any one or more of the following described events with respect to the Junior Subordinated Notes of any series, which has occurred and is continuing, constitutes an "Event of Default" with respect to the Junior Subordinated Notes of such series:

(a) failure for 10 days to pay interest on the Junior Subordinated Notes of such series, including any Additional Interest (as defined in clause (ii) of the definition of Additional Interest in the Subordinated Note Indenture) in respect of the Junior Subordinated Notes, when due on an interest payment date other than at maturity or upon earlier redemption; provided, however, that a valid extension of the interest payment period by the Company shall not constitute a default in the payment of interest for this purpose; or

(b) failure for 10 days to pay Additional Interest (as defined in clause (i) of the definition of Additional Interest in the Subordinated Note Indenture); or

(c) failure to pay principal or premium, if any, or interest, including Additional Interest (as defined in clause (ii) of the definition of Additional Interest in the Subordinated Note Indenture), on the Junior Subordinated Notes of such series when due at maturity or upon earlier redemption; or

(d) failure for three Business Days to deposit any sinking fund payment when due by the terms of a Junior Subordinated Note of such series; or

(e) failure to observe or perform any other covenant or warranty of the Company in the Subordinated Note Indenture (other than a covenant or warranty which has expressly been included in the Subordinated Note Indenture solely for the benefit of one or more series of Junior Subordinated Notes other than such series) for 90 days after written notice to the Company from the Subordinated Note Indenture Trustee or the holders of at least 25% in principal amount of the outstanding Junior Subordinated Notes of such series; or

(f) certain events of bankruptcy, insolvency or reorganization of the Company.

The holders of not less than a majority in aggregate outstanding principal amount of the Junior Subordinated Notes of any series have the right to direct the time, method and place of conducting any proceeding for any remedy available to the Subordinated Note Indenture Trustee with respect to the Junior Subordinated Notes of such series. If a Subordinated Note Indenture Event of Default occurs and is continuing with respect to the Junior Subordinated Notes of any series, then the Subordinated Note Indenture Trustee or the holders of not less than

25% in aggregate outstanding principal amount of the Junior Subordinated Notes of such series may declare the principal amount of the Junior Subordinated Notes due and payable immediately by notice in writing to the Company (and to the Subordinated Note Indenture Trustee if given by the holders), and upon any such declaration such principal amount shall become immediately due and payable. At any time after such a declaration of acceleration with respect to the Junior Subordinated Notes of any series had been made and before a judgment or decree for payment of the money due has been obtained as provided in Article Five of the Subordinated Note Indenture, the holders of not less than a majority in aggregate outstanding principal amount of the Junior Subordinated Notes of such series may rescind and annul such declaration and its consequences if the default has been cured or waived and the Company has paid or deposited with the Subordinated Note Indenture Trustee a sum sufficient to pay all matured installments of interest (including any Additional Interest) and principal due otherwise than by acceleration and all sums paid or advanced by the Subordinated Note Indenture Trustee, including reasonable compensation and expenses of the Subordinated Note Indenture Trustee.

A holder of Preferred Securities may institute a legal proceeding directly against the Company, without first instituting a legal proceeding against the Property Trustee or any other person or entity, for enforcement of payment to such holder of principal of or interest on the Junior Subordinated Notes of the related series having a principal amount equal to the aggregate stated liquidation amount of the Preferred Securities of such holder on or after the due dates specified in the Junior Subordinated Notes of such series.

The holders of not less than a majority in aggregate outstanding principal amount of the Junior Subordinated Notes of any series may, on behalf of the holders of all the Junior Subordinated Notes of such series, waive any past default with respect to such series, except (i) a default in the payment of principal or interest or (ii) a default in respect of a covenant or provision which under Article Nine of the Subordinated Note Indenture cannot be modified or amended without the consent of the holder of each outstanding Junior Subordinated Note of such series affected.

**Registration and Transfer**

The Company shall not be required to (i) issue, register the transfer of or exchange Junior Subordinated Notes of any series during a period of 15 days immediately preceding the date notice is given identifying the Junior Subordinated Notes of such series called for redemption, or (ii) register the transfer of or exchange any Junior Subordinated Notes so selected for redemption, in whole or in part, except the unredeemed portion of any Junior Subordinated Note being redeemed in part.

**Payment and Paying Agent**

Unless otherwise indicated in an applicable Prospectus Supplement, payment of principal of any Junior Subordinated Notes will be made only against surrender to the Paying Agent of such Junior Subordinated Notes. Principal of and interest on Junior Subordinated Notes will be payable, subject to any applicable laws and regulations, at the office of such Paying Agent or Paying Agents as the Company may designate from time to time, except that, at the option of the Company, payment of any interest may be made by wire transfer or by check mailed to the address of the person entitled to an interest payment as such address shall appear in the Security Register with respect to the Junior Subordinated Notes. Payment of interest on Junior Subordinated Notes on any interest payment date will be made to the person in whose name the Junior Subordinated Notes (or predecessor security) are registered at the close of business on the record date for such interest payment.

Unless otherwise indicated in an applicable Prospectus Supplement, the Subordinated Note Indenture Trustee will act as Paying Agent with respect to the Junior Subordinated Notes. The Company may at any time designate additional Paying Agents or rescind the designation of any Paying Agents or approve a change in the office through which any Paying Agent acts.

All moneys paid by the Company to a Paying Agent for the payment of the principal of or interest on the Junior Subordinated Notes of any series which remain unclaimed at the end of two years after such principal or interest shall have become due and payable will be repaid to the Company, and the holder of such Junior Subordinated Notes will from that time forward look only to the Company for payment of such principal and interest.

**Modification**

The Subordinated Note Indenture contains provisions permitting the Company and the Subordinated Note Indenture Trustee, with the consent of the holders of not less than a majority in principal amount of the outstanding Junior Subordinated Notes of each series that is affected, to modify the Subordinated Note Indenture or the rights of the holders of the Junior Subordinated Notes of such series; provided, that no such modification may, without the consent of the holder of each outstanding Junior Subordinated Note that is affected, (i) change the stated maturity of the principal of, or any installment of principal of or interest on, any Junior Subordinated Note, or reduce the principal amount of any Junior Subordinated Note or the rate of interest (including Additional Interest) on any Junior Subordinated Note or any premium payable upon the redemption thereof, or change the method of calculating the rate of interest on any Junior Subordinated Note, or impair the right to institute suit for the enforcement of any such payment on or after the stated maturity of any Junior Subordinated Note (or, in the case of redemption, on or after the redemption date), or (ii) reduce the percentage of principal amount of the outstanding Junior Subordinated Notes of any series, the consent of whose holders is required for any such supplemental indenture, or the consent of whose holders is required for any waiver (of compliance with certain provisions of the Subordinated Note Indenture or certain defaults under the Subordinated Note Indenture and their consequences) provided for in the Subordinated Note Indenture, or (iii) modify any of the provisions of the Subordinated Note Indenture relating to supplemental indentures, waiver of past defaults, or waiver of certain covenants, except to increase any such percentage or to provide that certain other provisions of the Subordinated Note Indenture cannot be modified or waived without the consent of the holder of each outstanding Junior Subordinated Note that is affected, or (iv) modify the provisions of the Subordinated Note Indenture with respect to the subordination of the Junior Subordinated Notes in a manner adverse to such holder.

In addition, the Company and the Subordinated Note Indenture Trustee may execute, without the consent of any holders of Junior Subordinated Notes, any supplemental indenture for certain other usual purposes, including the creation of any new series of Junior Subordinated Notes.

**Consolidation, Merger and Sale**

The Company shall not consolidate with or merge into any other corporation or convey, transfer or lease its properties and assets substantially as an entirety to any person, unless (1) such other corporation or person is a corporation organized and existing under the laws of the United States, any state of the United States or the District of Columbia and such other corporation or person expressly assumes, by supplemental indenture executed and delivered to the Subordinated Note Indenture Trustee, the payment of the principal of (and premium, if any) and interest (including Additional Interest) on all the Junior Subordinated Notes and the performance of every covenant of the Subordinated Note Indenture on the part of the Company to be performed or observed; (2) immediately after giving effect to such transactions, no Event of Default, and no event which, after notice or lapse of time or both, would become an Event of Default, shall have happened and be continuing; and (3) the Company has delivered to the Subordinated Note Indenture Trustee an officers' certificate and an opinion of counsel, each stating that such transaction complies with the provisions of the Subordinated Note Indenture governing consolidation, merger, conveyance, transfer or lease and that all conditions precedent to the transaction have been complied with.

**Information Concerning the Subordinated Note Indenture Trustee**

The Subordinated Note Indenture Trustee, prior to an Event of Default with respect to Junior Subordinated Notes of any series, undertakes to perform, with respect to Junior Subordinated Notes of such series, only such duties as are specifically set forth in the Subordinated Note Indenture and, in case an Event of Default with respect to Junior Subordinated Notes of any series has occurred and is continuing, shall exercise, with respect to Junior Subordinated Notes of such series, the same degree of care as a prudent individual would exercise in the conduct of his or her own affairs. Subject to such provision, the Subordinated Note Indenture Trustee is under no obligation to exercise any of the powers vested in it by the Subordinated Note Indenture at the request of any

holder of Junior Subordinated Notes of any series, unless offered reasonable indemnity by such holder against the costs, expenses and liabilities which might be incurred by the Subordinated Note Indenture Trustee. The Subordinated Note Indenture Trustee is not required to expend or risk its own funds or otherwise incur any financial liability in the performance of its duties if the Subordinated Note Indenture Trustee reasonably believes that repayment or adequate indemnity is not reasonably assured to it.

JPMorgan Chase Bank, the Subordinated Note Indenture Trustee, also serves as Senior Note Indenture Trustee, as Property Trustee and as Guarantee Trustee. The Company and certain of its affiliates maintain deposit accounts and banking relationships with JPMorgan Chase Bank. JPMorgan Chase Bank also serves as trustee under other indentures pursuant to which securities of the Company and affiliates of the Company are outstanding.

### Governing Law

The Subordinated Note Indenture and the Junior Subordinated Notes will be governed by, and construed in accordance with, the internal laws of the State of New York.

### Miscellaneous

The Company will have the right at all times to assign any of its rights or obligations under the Subordinated Note Indenture to a direct or indirect wholly-owned subsidiary of the Company; provided, that, in the event of any such assignment, the Company will remain primarily liable for all such obligations. Subject to the foregoing, the Subordinated Note Indenture will be binding upon and inure to the benefit of the parties to the Subordinated Note Indenture and their respective successors and assigns.

## DESCRIPTION OF THE PREFERRED SECURITIES

Each Trust may issue only one series of Preferred Securities having terms described in the Prospectus Supplement relating to the Preferred Securities. The Trust Agreement of each Trust will authorize the Administrative Trustees, on behalf of the Trust, to issue the Preferred Securities of such Trust. The Preferred Securities of each Trust will have such terms, including distributions, redemption, voting, liquidation rights and such other preferred, deferral or other special rights or such restrictions as shall be set forth in the Trust Agreement of such Trust. Reference is made to the Prospectus Supplement relating to the Preferred Securities of a Trust for specific terms, including (i) the distinctive designation of such Preferred Securities; (ii) the number of Preferred Securities issued by such Trust; (iii) the annual distribution rate (or method of determining such rate) for Preferred Securities of such Trust and the date or dates on which such distributions shall be payable; (iv) whether distributions on such Preferred Securities shall be cumulative and, in the case of Preferred Securities having cumulative distribution rights, the date or dates, or method of determining the date or dates, from which distributions on such Preferred Securities shall be cumulative; (v) the amount or amounts that shall be paid out of the assets of such Trust to the holders of the Preferred Securities of such Trust upon voluntary or involuntary dissolution, winding-up or termination of such Trust; (vi) the obligation, if any, of such Trust to purchase or redeem such Preferred Securities and the price or prices at which, the period or periods within which, and the terms and conditions upon which such Preferred Securities shall be purchased or redeemed, in whole or in part, pursuant to such obligation; (vii) the voting rights, if any, of such Preferred Securities in addition to those required by law, including the number of votes per Preferred Security and any requirement for the approval by the holders of Preferred Securities as a condition to specified action or amendments to the Trust Agreement of such Trust; (viii) the rights, if any, to defer distributions on the Preferred Securities by extending the interest payment period on the related Junior Subordinated Notes; and (ix) any other relative rights, preferences, privileges, limitations or restrictions of such Preferred Securities not inconsistent with the Trust Agreement of such Trust or applicable law. All Preferred Securities offered by this Prospectus will be guaranteed by the Company to the extent set forth under "Description of the Guarantees." Any material United States federal income tax considerations applicable to an offering of Preferred Securities will be described in the Prospectus Supplement relating to the Preferred Securities.

## DESCRIPTION OF THE GUARANTEES

Set forth below is a summary of information concerning the Guarantees that will be executed and delivered by the Company for the benefit of the holders of Preferred Securities of the respective Trusts from time to time. Each Guarantee will be qualified as an indenture under the 1939 Act. JPMorgan Chase Bank will act as indenture trustee under each Guarantee (the "Guarantee Trustee") for purposes of the 1939 Act. The terms of the respective Guarantees will be those set forth in such Guarantee and those made part of such Guarantee by the 1939 Act. The following summary does not purport to be complete and is subject in all respects to the provisions of, and is qualified in its entirety by reference to, the Guarantees, the form of which is filed as an exhibit to the Registration Statement of which this Prospectus forms a part, and the 1939 Act. Each Guarantee will be held by the Guarantee Trustee for the benefit of holders of the Preferred Securities to which it relates.

### General

Pursuant to each Guarantee, the Company will irrevocably and unconditionally agree, to the extent set forth in such Guarantee, to pay in full, to the holders of the related Preferred Securities, the Guarantee Payments (as defined below), to the extent not paid by, or on behalf of, the related Trust, regardless of any defense, right of set-off or counterclaim that the Company may have or assert against any person. The following payments or distributions with respect to the Preferred Securities of any Trust to the extent not paid or made by, or on behalf of, such Trust will be subject to the Guarantee related to the Preferred Securities (without duplication): (i) any accrued and unpaid distributions required to be paid on the Preferred Securities of such Trust but if and only if and to the extent that such Trust has funds legally and immediately available for these distributions, (ii) the redemption price, including all accrued and unpaid distributions to the date of redemption (the "Redemption Price"), with respect to any Preferred Securities called for redemption by such Trust, but if and only to the extent such Trust has funds legally and immediately available to pay such Redemption Price, and (iii) upon a dissolution, winding-up or termination of such Trust (other than in connection with the distribution of Junior Subordinated Notes to the holders of Trust Securities of such Trust or the redemption of all of the Preferred Securities of such Trust), the lesser of (a) the aggregate of the liquidation amount and all accrued and unpaid distributions on the Preferred Securities of such Trust to the date of payment, to the extent such Trust has funds legally and immediately available for such purpose, and (b) the amount of assets of such Trust remaining available for distribution to holders of Preferred Securities of such Trust in liquidation of such Trust (the "Guarantee Payments"). The Company's obligation to make a Guarantee Payment may be satisfied by direct payment of the required amounts by the Company to the holders of the related Preferred Securities or by causing the related Trust to pay such amounts to such holders.

Each Guarantee will be a guarantee of the Guarantee Payments with respect to the related Preferred Securities from the time of issuance of such Preferred Securities, but will not apply to the payment of distributions and other payments on such Preferred Securities when the related Trust does not have sufficient funds legally and immediately available to make such distributions or other payments. **If the Company does not make interest payments on the Junior Subordinated Notes held by the Property Trustee under any Trust, such Trust will not make distributions on its Preferred Securities.**

### Subordination

The Company's obligations under each Guarantee to make the Guarantee Payments will constitute an unsecured obligation of the Company and will rank (i) subordinate and junior in right of payment to all other liabilities of the Company, including the Junior Subordinated Notes, except those obligations or liabilities made equal or subordinate by their terms, (ii) equal to the most senior preferred or preference stock now issued by the Company or issued at a later date by the Company and with any guarantee now entered into by the Company or entered into at a later date by the Company in respect of any preferred or preference securities of any affiliate of the Company, and (iii) senior to all common stock of the Company. The terms of the Preferred Securities will provide that each holder of Preferred Securities by acceptance of the Preferred Securities agrees to the subordination

provisions and other terms of the Guarantee related thereto. The Company has outstanding preferred stock that ranks equal to the Guarantees and common stock that ranks junior to the Guarantees.

Each Guarantee will constitute a guarantee of payment and not of collection (that is, the guaranteed party may institute a legal proceeding directly against the guarantor to enforce its rights under the guarantee without first instituting a legal proceeding against any other person or entity).

**Amendments and Assignment**

Except with respect to any changes that do not materially and adversely affect the rights of holders of the related Preferred Securities (in which case no consent will be required), each Guarantee may be amended only with the prior approval of the holders of not less than 66⅔% in liquidation amount of such outstanding Preferred Securities. The manner of obtaining any such approval of holders of the Preferred Securities will be as set forth in an accompanying Prospectus Supplement. All guarantees and agreements contained in each Guarantee shall bind the successors, assigns, receivers, trustees and representatives of the Company and shall inure to the benefit of the holders of the related Preferred Securities then outstanding.

**Termination**

Each Guarantee will terminate and be of no further force and effect as to the related Preferred Securities upon full payment of the Redemption Price of all such Preferred Securities, upon distribution of Junior Subordinated Notes to the holders of such Preferred Securities, or upon full payment of the amounts payable upon liquidation of the related Trust. Each Guarantee will continue to be effective or will be reinstated, as the case may be, if at any time any holder of the related Preferred Securities must restore payment of any sums paid with respect to such Preferred Securities or under such Guarantee.

**Events of Default**

An event of default under each Guarantee will occur upon the failure by the Company to perform any of its payment obligations under such Guarantee. The holders of a majority in liquidation amount of the Preferred Securities to which any Guarantee relates have the right to direct the time, method and place of conducting any proceeding for any remedy available to the Guarantee Trustee in respect of such Guarantee or to direct the exercise of any trust or power conferred upon the Guarantee Trustee under such Guarantee. Any holder of the related Preferred Securities may institute a legal proceeding directly against the Company to enforce its rights under such Guarantee without first instituting a legal proceeding against the Guarantee Trustee or any other person or entity. The holders of a majority in liquidation amount of Preferred Securities of any series may, by vote, on behalf of the holders of all the Preferred Securities of such series, waive any past event of default and its consequences.

**Information Concerning the Guarantee Trustee**

The Guarantee Trustee, prior to the occurrence of any event of default with respect to any Guarantee and after the curing or waiving of all events of default with respect to such Guarantee, undertakes to perform only such duties as are specifically set forth in such Guarantee and, in case an event of default has occurred, shall exercise the same degree of care as a prudent individual would exercise in the conduct of his or her own affairs. Subject to such provisions, the Guarantee Trustee is under no obligation to exercise any of the powers vested in it by any Guarantee at the request of any holder of the related Preferred Securities, unless offered reasonable indemnity against the costs, expenses and liabilities which might be incurred by the Guarantee Trustee.

JPMorgan Chase Bank, the Guarantee Trustee, also serves as Property Trustee, as Senior Note Indenture Trustee and as Subordinated Note Indenture Trustee. The Company and certain of its affiliates maintain deposit accounts and banking relationships with JPMorgan Chase Bank. JPMorgan Chase Bank serves as trustee under other indentures pursuant to which securities of the Company and affiliates of the Company are outstanding.

### Governing Law

Each Guarantee will be governed by, and construed in accordance with, the internal laws of the State of New York.

### The Agreements as to Expenses and Liabilities

Pursuant to an Agreement as to Expenses and Liabilities to be entered into by the Company under each Trust Agreement, the Company will irrevocably and unconditionally guarantee to each person or entity to whom each Trust becomes indebted or liable the full payment of any indebtedness, expenses or liabilities of such Trust, other than obligations of such Trust to pay to the holders of the related Preferred Securities or other similar interests in such Trust the amounts due such holders pursuant to the terms of such Preferred Securities or such other similar interests, as the case may be.

## RELATIONSHIP AMONG THE PREFERRED SECURITIES, THE JUNIOR SUBORDINATED NOTES AND THE GUARANTEES

As long as payments of interest and other payments are made when due on each series of Junior Subordinated Notes issued to a Trust, such payments will be sufficient to cover distributions and payments due on the related Trust Securities of such Trust primarily because (i) the aggregate principal amount of each series of Junior Subordinated Notes will be equal to the sum of the aggregate stated liquidation amount of the related Trust Securities; (ii) the interest rate and interest and other payment dates on each series of Junior Subordinated Notes will match the distribution rate and distribution and other payment dates for the related Preferred Securities; (iii) the Company shall pay for all costs and expenses of each Trust pursuant to the Agreements as to Expenses and Liabilities; and (iv) each Trust Agreement provides that the Securities Trustees thereunder shall not cause or permit the Trust to, among other things, engage in any activity that is not consistent with the purposes of the Trust.

Payments of distributions (to the extent funds for such purpose are legally and immediately available) and other payments due on the Preferred Securities (to the extent funds for such purpose are legally and immediately available) will be guaranteed by the Company as and to the extent set forth under "Description of the Guarantees." If the Company does not make interest payments on any series of Junior Subordinated Notes, it is not expected that the related Trust will have sufficient funds to pay distributions on its Preferred Securities. Each Guarantee is a guarantee from the time of its issuance, but does not apply to any payment of distributions unless and until the related Trust has sufficient funds legally and immediately available for the payment of such distributions.

If the Company fails to make interest or other payments on any series of Junior Subordinated Notes when due (taking into account any extension period as described in the applicable Prospectus Supplement), the Trust Agreement provides a mechanism that allows the holders of the related Preferred Securities to appoint a substitute Property Trustee. Such holders may also direct the Property Trustee to enforce its rights under the Junior Subordinated Notes of such series, including proceeding directly against the Company to enforce such Junior Subordinated Notes. If the Property Trustee fails to enforce its rights under any series of Junior Subordinated Notes, to the fullest extent permitted by applicable law, any holder of related Preferred Securities may institute a legal proceeding directly against the Company to enforce the Property Trustee's rights under such series of Junior Subordinated Notes without first instituting any legal proceeding against the Property Trustee or any other person or entity. Notwithstanding the foregoing, a holder of Preferred Securities may institute a legal proceeding directly against the Company, without first instituting a legal proceeding against the Property Trustee or any other person or entity, for enforcement of payment to such holder of principal of or interest on Junior Subordinated Notes of the related series having a principal amount equal to the aggregate stated liquidation amount of the Preferred Securities of such holder on or after the due dates specified in the Junior Subordinated Notes of such series.

If the Company fails to make payments under any Guarantee, such Guarantee provides a mechanism that allows the holders of the Preferred Securities to which such Guarantee relates to direct the Guarantee Trustee to enforce its rights under such Guarantee. In addition, any holder of Preferred Securities may institute a legal proceeding directly against the Company to enforce the Guarantee Trustee's rights under the related Guarantee without first instituting a legal proceeding against the Guarantee Trustee or any other person or entity.

Each Guarantee, the Subordinated Note Indenture, the Junior Subordinated Notes of the related series, the related Trust Agreement and the related Agreement as to Expenses and Liabilities, as described above, constitute a full and unconditional guarantee by the Company of the payments due on the related series of Preferred Securities.

Upon any voluntary or involuntary dissolution, winding-up or termination of any Trust, unless Junior Subordinated Notes of the related series are distributed in connection with such action, the holders of the Preferred Securities of such Trust will be entitled to receive, out of assets legally available for distribution to holders, a liquidation distribution in cash as described in the applicable Prospectus Supplement. Upon any voluntary or involuntary liquidation or bankruptcy of the Company, the Property Trustee, as holder of the related series of Junior Subordinated Notes, would be a subordinated creditor of the Company, subordinated in right of payment to all Senior Indebtedness, but entitled to receive payment in full of principal and interest, before any stockholders of the Company receive payments or distributions. Because the Company is guarantor under each Guarantee and has agreed to pay for all costs, expenses and liabilities of each Trust (other than the Trust's obligations to holders of the Preferred Securities) pursuant to the related Agreement as to Expenses and Liabilities, the positions of a holder of Preferred Securities and a holder of Junior Subordinated Notes of the related series relative to other creditors and to stockholders of the Company in the event of liquidation or bankruptcy of the Company would be substantially the same.

A default or event of default under any Senior Indebtedness would not constitute a default or Event of Default under the Subordinated Note Indenture. However, in the event of payment defaults under, or acceleration of, Senior Indebtedness, the subordination provisions of the Junior Subordinated Notes provide that no payments may be made in respect of the Junior Subordinated Notes until such Senior Indebtedness has been paid in full or any payment default of Senior Indebtedness has been cured or waived. Failure to make required payments on the Junior Subordinated Notes of any series would constitute an Event of Default under the Subordinated Note Indenture with respect to the Junior Subordinated Notes of such series except that failure to make interest payments on the Junior Subordinated Notes of such series will not be an Event of Default during an extension period as described in the applicable Prospectus Supplement.

## PLAN OF DISTRIBUTION

The Company may sell the Senior Notes and the Junior Subordinated Notes and the Trusts may sell the Preferred Securities in one or more of the following ways from time to time: (i) to underwriters for resale to the public or to institutional investors; (ii) directly to institutional investors; or (iii) through agents to the public or to institutional investors. The Prospectus Supplement with respect to each series of Senior Notes, Junior Subordinated Notes or Preferred Securities will set forth the terms of the offering of such Senior Notes, Junior Subordinated Notes or Preferred Securities, including the name or names of any underwriters or agents, the purchase price of such Senior Notes, Junior Subordinated Notes or Preferred Securities and the proceeds to the Company or the applicable Trust from such sale, any underwriting discounts or agency fees and other items constituting underwriters' or agents' compensation, any initial public offering price, any discounts or concessions allowed or reallowed or paid to dealers and any securities exchange on which such Senior Notes, Junior Subordinated Notes or Preferred Securities may be listed.

If underwriters participate in the sale, such Senior Notes, Junior Subordinated Notes or Preferred Securities will be acquired by the underwriters for their own account and may be resold from time to time in one or more transactions, including negotiated transactions, at a fixed public offering price or at varying prices determined at the time of sale.

Unless otherwise set forth in the Prospectus Supplement, the obligations of the underwriters to purchase any series of Senior Notes, Junior Subordinated Notes or Preferred Securities will be subject to certain conditions precedent and the underwriters will be obligated to purchase all of such series of Senior Notes, Junior Subordinated Notes or Preferred Securities, if any are purchased.

Underwriters and agents may be entitled under agreements entered into with the Company and/or the applicable Trust to indemnification against certain civil liabilities, including liabilities under the 1933 Act. Underwriters and agents may engage in transactions with, or perform services for, the Company in the ordinary course of business.

Each series of Senior Notes, Junior Subordinated Notes or Preferred Securities will be a new issue of securities and will have no established trading market. Any underwriters to whom Senior Notes, Junior Subordinated Notes or Preferred Securities are sold for public offering and sale may make a market in such Senior Notes, Junior Subordinated Notes or Preferred Securities, but such underwriters will not be obligated to do so and may discontinue any market making at any time without notice. The Senior Notes, Junior Subordinated Notes or Preferred Securities may or may not be listed on a national securities exchange.

## LEGAL MATTERS

Certain matters of Delaware law relating to the validity of the Preferred Securities will be passed upon on behalf of the Company and the Trusts by Richards, Layton & Finger, P.A., Wilmington, Delaware, special Delaware counsel to the Company and the Trusts. The validity of the Senior Notes, the Junior Subordinated Notes, the Guarantees and certain matters relating to such securities will be passed upon on behalf of the Company by Beggs & Lane, a Registered Limited Liability Partnership, Pensacola, Florida, and by Troutman Sanders LLP, Atlanta, Georgia. Certain legal matters will be passed upon for the Underwriters by Dewey Ballantine LLP, New York, New York.

## EXPERTS

The financial statements and the related financial statement schedule as of and for the year ended December 31, 2002 incorporated by reference in this Prospectus have been audited by Deloitte & Touche LLP, independent auditors, as stated in their report, which is incorporated by reference in this Prospectus, and has been so incorporated in reliance upon the report of such firm given upon their authority as experts in accounting and auditing.

Certain of the Company's financial statements incorporated by reference in this Prospectus have been audited by Arthur Andersen LLP ("Andersen"), independent public accountants, as indicated in their reports with respect to the financial statements, and are incorporated by reference in this Prospectus, in reliance upon the authority of Andersen as experts in giving such reports. On March 28, 2002, Southern's Board of Directors, upon recommendation of its Audit Committee, decided not to engage Andersen as the Company's principal public accountants. The Company has not obtained a reissued report from Andersen and has been unable to obtain, after reasonable efforts, Andersen's written consent to incorporate by reference Andersen's reports on the financial statements. Under these circumstances, Rule 437a under the 1933 Act permits this Prospectus to be filed without a written consent from Andersen. The absence of such written consent from Andersen may limit a holder's ability to assert claims against Andersen under Section 11(a) of the 1933 Act for any untrue statement of a material fact contained in the financial statements audited by Andersen or any omissions to state a material fact required to be stated in the financial statements.

GULF POWER COMPANY
SERIES H 5.25% SENIOR NOTES
DUE JULY 15, 2033

Ladies and Gentlemen:

We have acted as general counsel to Gulf Power Company (the "Company") in connection with (i) the Company's issuance and sale of $60,000,000 aggregate principal amount of its Series H 5.25% Senior Notes due July 15, 2033 (the "Notes") pursuant to the Senior Note Indenture dated as of January 1, 1998, by and between the Company and JPMorgan Chase Bank (formerly known as The Chase Manhattan Bank), as trustee (the "Trustee"), as heretofore supplemented and as further supplemented by the Eighth Supplemental Indenture dated as of July 22, 2003 (collectively, the "Indenture") and (ii) the purchase by the Underwriters (as defined below) of the Notes pursuant to the terms of an Underwriting Agreement dated July 10, 2003 (the "Underwriting Agreement"), among the Company and the Underwriters named in Schedule 1 thereto (the "Underwriters") for whom you are acting as Representatives. This opinion is being delivered to you as Representatives pursuant to Section 5(c)(1) of the Underwriting Agreement.

All capitalized terms not otherwise defined herein shall have the meanings set forth in the Underwriting Agreement.

In rendering the opinions expressed below, we have examined the registration statement on Form S-3 (File Nos. 333-104449, 333-104449-01 and 333-104449-02) pertaining to the Notes (the "Registration Statement") filed under the Securities Act of 1933, as amended (the "Act"),

and the prospectus of the Company dated April 25, 2003, as supplemented by a final prospectus supplement relating to the Notes dated July 10, 2003 (the "Final Supplemented Prospectus"), which pursuant to Form S-3 incorporates by reference the Annual Report on Form 10-K of the Company for the fiscal year ended December 31, 2002, the Quarterly Report on Form 10-Q of the Company for the quarter ended March 31, 2003 and the Current Reports on Form 8-K of the Company dated March 21, 2003 and July 10, 2003 (the "Exchange Act Documents"), each as filed under the Securities Exchange Act of 1934, as amended (the "Exchange Act").

In addition, we have examined, and have relied as to matters of fact upon, the documents delivered to you at the closing (except the certificate representing the Notes, of which we have examined a specimen), and we have made such other and further investigations as we deemed necessary to express the opinions hereinafter set forth. In such examination, we have assumed the genuineness of all signatures, the legal capacity of natural persons, the authenticity of all documents submitted to us as originals, the conformity to original documents of all documents submitted to us as certified or photostatic copies and the authenticity of the originals of such latter documents.

The Indenture and the Underwriting Agreement are herein referred to collectively as the "Agreements."

Based upon the foregoing, and subject to the qualifications and limitations stated herein, we are of the opinion, relying as to matters of Georgia law and the federal law of the United States upon the opinion dated the date hereof rendered to you by Troutman Sanders LLP and relying as to matters of New York law upon the opinion dated the date hereof rendered to you by Dewey Ballantine LLP, that:

1. The Company has been duly incorporated and is validly existing as a corporation in good standing under the laws of the State of Maine, is duly qualified to carry on its business as a foreign corporation under the laws of the States of Florida, Georgia and Mississippi and has due corporate authority to carry on the public utility business in which it is engaged, to own and operate the properties used by it in such business and to enter into and perform its obligations under the Agreements and the Notes.

2. The execution, delivery and performance by the Company of the Underwriting Agreement have been duly authorized by all necessary corporate action, and the Underwriting Agreement has been duly executed and delivered by the Company.

3. All orders, consents or other authorizations or approvals of the Florida Public Service Commission and the Commission legally required for the issuance and sale of the Notes have been obtained; such orders are sufficient for the issuance and sale of the Notes; the issuance

and sale of the Notes conform in all material respects with the terms of such orders; and no other order, consent or other authorization or approval of any Florida or United States governmental body (other than in connection or in compliance with the provisions of the securities or "blue sky" laws of any jurisdiction, as to which we express no opinion) is legally required for the issuance and sale of the Notes in accordance with the terms of the Underwriting Agreement.

4. The Indenture has been duly authorized, executed and delivered by the Company and, assuming the due authorization, execution and delivery thereof by the Trustee, constitutes a valid and legally binding instrument of the Company, enforceable against the Company in accordance with its terms, subject to the qualifications that the enforceability of the Company's obligations under the Indenture may be limited by bankruptcy, insolvency, reorganization, moratorium and other similar laws relating to or affecting creditors' rights generally and by general principles of equity (regardless of whether such enforceability is considered in a proceeding in equity or at law); and the Indenture conforms as to legal matters in all material respects to the description thereof in the Final Supplemented Prospectus.

5. The Notes have been duly authorized and executed by the Company and, when authenticated by the Trustee in the manner provided in the Indenture and delivered to and paid for by the Underwriters pursuant to the Underwriting Agreement, will constitute valid and binding obligations of the Company, enforceable against the Company in accordance with their terms, subject to the qualifications that the enforceability of the Company's obligations under the Notes may be limited by bankruptcy, insolvency, reorganization, moratorium and other similar laws relating to or affecting creditors' rights generally and by general principles of equity (regardless of whether such enforceability is considered in a proceeding in equity or at law); and the Notes conform as to legal matters in all material respects to the description thereof in the Final Supplemented Prospectus.

6. The Indenture has been duly qualified under the Trust Indenture Act of 1939, as amended.

We have not independently verified the accuracy, completeness or fairness of the statements made or included in the Registration Statement, the Final Supplemented Prospectus or the Exchange Act Documents and take no responsibility therefor, except as and to the extent set forth in paragraphs 4 and 5 above. In the course of the preparation by the Company of the Registration Statement, the Final Supplemented Prospectus and the Exchange Act Documents, we participated in conferences with certain officers and employees of the Company, with other counsel for the Company, with representatives of Deloitte & Touche LLP and with your counsel. Based upon our examination of the Registration Statement, the Final Supplemented Prospectus and the Exchange Act Documents, our investigations made in connection with the preparation of the Registration Statement, the Final Supplemented Prospectus and the Exchange Act Documents

and our participation in the conferences referred to above, (i) we are of the opinion that the Registration Statement, as of its effective date, and the Final Supplemented Prospectus, as of July 10, 2003, complied as to form in all material respects with the requirements of the Act and the applicable rules and regulations of the Commission thereunder and that the Exchange Act Documents, as of their respective dates of filing with the Commission, complied as to form in all material respects with the relevant requirements of the Exchange Act and the applicable rules and regulations of the Commission thereunder, except that in each case we express no opinion as to the financial statements or other financial or statistical data contained or incorporated by reference in the Registration Statement, the Final Supplemented Prospectus or the Exchange Act Documents and (ii) nothing came to our attention which gives us reason to believe that the Registration Statement, as of its effective date (including the Exchange Act Documents on file with the Commission as of such date), contained any untrue statement of a material fact or omitted to state any material fact required to be stated therein or necessary in order to make the statements therein not misleading, or that the Final Supplemented Prospectus (including the Exchange Act Documents) contained, as of its date, or contains, on the date hereof, any untrue statement of a material fact or omitted, as of its date, or omits, on the date hereof, to state a material fact necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading, except that in each case we express no opinion or belief with respect to the financial statements or other financial or statistical data contained or incorporated by reference in the Registration Statement, the Final Supplemented Prospectus or the Exchange Act Documents and with respect to information set forth in the Final Supplemented Prospectus under the captions "Description of the Series H Senior Notes – Book-Entry Only Issuance – The Depository Trust Company" and "The Policy and the Insurer" or in Appendix A thereto.

We are members of the Florida Bar and we do not express any opinion herein concerning any law other than the law of the States of Maine, Florida and Mississippi and, to the extent set forth herein, the laws of the States of Georgia and New York and the federal law of the United States.

This opinion is rendered to you in connection with the above-described transaction. This opinion may not be relied upon by you for any other purpose or relied upon by or furnished to any other person without our prior written consent, except that Dewey Ballantine LLP may rely on this opinion in giving its opinion pursuant to Section 5(c) of the Underwriting Agreement insofar as such opinion relates to matters of Maine, Florida and Mississippi law, and Troutman Sanders LLP may rely on this opinion in giving its opinions pursuant to Section 5(c) of the Underwriting

Agreement and in connection with the Company's listing application with respect to the Notes to the New York Stock Exchange, Inc., insofar as such opinions relate to matters of Maine, Florida and Mississippi law.

Yours very truly,

Beggs & Lane

GULF POWER COMPANY
SERIES H 5.25% SENIOR NOTES
DUE JULY 15, 2033

Ladies and Gentlemen:

We have acted as counsel to Gulf Power Company (the "Company") in connection with (i) the Company's issuance and sale of $60,000,000 aggregate principal amount of its Series H 5.25% Senior Notes due July 15, 2033 (the "Notes") pursuant to the Senior Note Indenture dated as of January 1, 1998, by and between the Company and JPMorgan Chase Bank (formerly known as The Chase Manhattan Bank), as trustee (the "Trustee"), as heretofore supplemented and as further supplemented by the Eighth Supplemental Indenture dated as of July 22, 2003 (collectively, the "Indenture") and (ii) the purchase by the Underwriters (as defined below) of the Notes pursuant to the terms of an Underwriting Agreement dated July 10, 2003 (the "Underwriting Agreement"), among the Company and the Underwriters named in Schedule I thereto (the "Underwriters") for whom you are acting as Representatives. This opinion is being delivered to you as Representatives pursuant to Section 5(c)(2) of the Underwriting Agreement.

All capitalized terms not otherwise defined herein shall have the meanings set forth in the Underwriting Agreement.

In rendering the opinions expressed below, we have examined the registration statement on Form S-3 (Nos. 333-104449, 333-104449-01 and 333-104449-02) pertaining to the Notes and certain other securities (the "Registration Statement") filed under the Securities Act of 1933, as

amended (the "Act"), and the prospectus of the Company dated April 25, 2003, as supplemented by the prospectus supplement dated July 10, 2003 (the "Final Supplemented Prospectus"), which pursuant to Form S-3 incorporates by reference the Annual Report on Form 10-K of the Company for the fiscal year ended December 31, 2002, the Quarterly Report on Form 10-Q of the Company for the quarter ended March 31, 2003 and the Current Reports on Form 8-K of the Company dated March 21, 2003 and July 10, 2003 (the "Exchange Act Documents"), each as filed under the Securities Exchange Act of 1934, as amended (the "Exchange Act").

In addition, we have examined, and have relied as to matters of fact upon, the documents delivered to you at the closing (except the certificate representing the Notes, of which we have examined a specimen), and we have made such other and further investigations as we deemed necessary to express the opinions hereinafter set forth. In such examination, we have assumed the genuineness of all signatures, the legal capacity of natural persons, the authenticity of all documents submitted to us as originals, the conformity to original documents of all documents submitted to us as certified or photostatic copies and the authenticity of the originals of such latter documents.

The Indenture and the Underwriting Agreement are herein referred to collectively as the "Agreements."

Based upon the foregoing, and subject to the qualifications and limitations stated herein, we are of the opinion, relying as to matters of New York law upon the opinion dated the date hereof rendered to you by Dewey Ballantine LLP and as to matters of Maine, Florida and Mississippi law upon the opinion dated the date hereof rendered to you by Beggs & Lane, a Registered Limited Liability Partnership ("Beggs & Lane"), that:

1. The Company has been duly incorporated and is validly existing as a corporation in good standing under the laws of the State of Maine, is duly qualified to carry on its business as a foreign corporation in the States of Florida, Georgia and Mississippi and has due corporate authority to carry on the public utility business in which it is engaged, to own and operate the properties used by it in such business and to enter into and perform its obligations under the Agreements and the Notes.

2. The execution, delivery and performance by the Company of the Underwriting Agreement have been duly authorized by all necessary corporate action, and the Underwriting Agreement has been duly executed and delivered by the Company.

3. All orders, consents or other authorizations or approvals of the Florida Public Service Commission and the Commission legally required for the issuance and sale of the Notes

have been obtained; such orders are sufficient for the issuance and sale of the Notes; the issuance and sale of the Notes conform in all material respects with the terms of such orders; and no other order, consent or other authorization or approval of any Florida or United States governmental body (other than in connection or in compliance with the provisions of the securities or "blue sky" laws of any jurisdiction, as to which we express no opinion) is legally required for the issuance and sale of the Notes in accordance with the terms of the Underwriting Agreement.

4. The Indenture has been duly authorized, executed and delivered by the Company and, assuming the due authorization, execution and delivery thereof by the Trustee, constitutes a valid and legally binding instrument of the Company, enforceable against the Company in accordance with its terms, subject to the qualifications that the enforceability of the Company's obligations under the Indenture may be limited by bankruptcy, insolvency, reorganization, moratorium and other similar laws relating to or affecting creditors' rights generally and by general principles of equity (regardless of whether such enforceability is considered in a proceeding in equity or at law); and the Indenture conforms as to legal matters in all material respects to the description thereof in the Final Supplemented Prospectus.

5. The Notes have been duly authorized and executed by the Company and, when authenticated by the Trustee in the manner provided in the Indenture and delivered to and paid for by the Underwriters pursuant to the Underwriting Agreement, will constitute valid and binding obligations of the Company, enforceable against the Company in accordance with their terms, subject to the qualifications that the enforceability of the Company's obligations under the Notes may be limited by bankruptcy, insolvency, reorganization, moratorium and other similar laws relating to or affecting creditors' rights generally and by general principles of equity (regardless of whether such enforceability is considered in a proceeding in equity or at law); and the Notes conform as to legal matters in all material respects to the description thereof in the Final Supplemented Prospectus.

6. The Indenture has been duly qualified under the Trust Indenture Act of 1939, as amended.

We have not independently verified the accuracy, completeness or fairness of the statements made or included in the Registration Statement, the Final Supplemented Prospectus or the Exchange Act Documents and take no responsibility therefor, except as and to the extent set forth in paragraphs 4 and 5 above. In the course of the preparation by the Company of the Registration Statement, the Final Supplemented Prospectus and the Exchange Act Documents, we participated in conferences with certain officers and employees of the Company, with other counsel for the Company, with representatives of Deloitte & Touche LLP and with your counsel. Based upon our examination of the Registration Statement, the Final Supplemented Prospectus

and the Exchange Act Documents, our investigations made in connection with the preparation of the Registration Statement, the Final Supplemented Prospectus and the Exchange Act Documents and our participation in the conferences referred to above, (i) we are of the opinion that the Registration Statement, as of its effective date and the Final Supplemented Prospectus, as of July 10, 2003, complied as to form in all material respects with the requirements of the Act and the applicable rules and regulations of the Commission thereunder and that the Exchange Act Documents, as of their respective dates of filing with the Commission, complied as to form in all material respects with the relevant requirements of the Exchange Act and the applicable rules and regulations of the Commission thereunder, except that in each case we express no opinion as to the financial statements or other financial or statistical data contained or incorporated by reference in the Registration Statement, the Final Supplemented Prospectus or the Exchange Act Documents and (ii) nothing came to our attention which gives us reason to believe that the Registration Statement, as of its effective date (including the Exchange Act Documents on file with the Commission as of such date), contained any untrue statement of a material fact or omitted to state any material fact required to be stated therein or necessary in order to make the statements therein not misleading, or that the Final Supplemented Prospectus (including the Exchange Act Documents) contained, as of its date, or contains, on the date hereof, any untrue statement of a material fact or omitted, as of its date, or omits, on the date hereof, to state a material fact necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading, except that in each case we express no opinion or belief with respect to the financial statements or other financial or statistical data contained or incorporated by reference in the Registration Statement, the Final Supplemented Prospectus or the Exchange Act Documents and with respect to information set forth in the Final Supplemented Prospectus under the captions "Description of the Series H Senior Notes – Book-Entry Only Issuance – The Depository Trust Company" and "The Policy and the Insurer" or in Appendix A thereto.

We are members of the State Bar of Georgia and we do not express any opinion herein concerning any law other than the law of the State of Georgia and the federal law of the United States and, to the extent set forth herein, the laws of the States of Florida, Maine, Mississippi and New York.

This opinion is rendered to you in connection with the above-described transaction. This opinion may not be relied upon by you for any other purpose or relied upon by or furnished to any other person without our prior written consent, except that Beggs & Lane may rely on this opinion in giving its opinion pursuant to Section 5(c) of the Underwriting Agreement insofar as

such opinion relates to matters of Georgia law and the federal law of the United States and Dewey Ballantine LLP may rely on this opinion in giving its opinion pursuant to Section 5(c) of the Underwriting Agreement insofar as such opinion relates to matters of Georgia law.

Very truly yours,

Troutman Sanders LLP

$40,000,000 Series I 5.75% Senior Notes

due September 15, 2033

**GULF POWER COMPANY**

UNDERWRITING AGREEMENT

September 5, 2003

Morgan Stanley & Co. Incorporated
1585 Broadway
New York, New York 10036
As Representative of the Underwriters listed on Schedule I hereto.

Ladies and Gentlemen:

Gulf Power Company, a Maine corporation (the "Company"), confirms its agreement (the "Agreement") with you and the other Underwriter named in Schedule I hereto (collectively, the "Underwriters", which term shall also include any underwriter substituted as hereinafter provided in Section 10 hereof) for whom you are acting as representative (in such capacity you shall hereinafter be referred to as the "Representative"), with respect to the sale by the Company and the purchase by the Underwriters, acting severally and not jointly, of $40,000,000 aggregate principal amount of the Series I 5.75% Senior Notes due September 15, 2033 (the "Senior Notes") as set forth in Schedule I hereto.

The Company understands that the Underwriters are making a public offering of the Senior Notes pursuant to this Agreement. The Senior Notes will be issued pursuant to an indenture, dated as of January 1, 1998, as heretofore supplemented (the "Base Indenture"), between the Company and JPMorgan Chase Bank (formerly known as The Chase Manhattan Bank), as trustee (the "Trustee"), and as further supplemented by a ninth supplemental indenture, dated as of September 16, 2003, to the Base Indenture relating to the Senior Notes (the "Supplemental Indenture" and, together with the Base Indenture and any other amendments or supplements thereto, the "Indenture"), between the Company and the Trustee.

SECTION 1. REPRESENTATIONS AND WARRANTIES. The Company represents and warrants to the Underwriters as follows:

(a) A registration statement on Form S-3 (File Nos. 333-104449, 333-104449-01 and 333-104449-02) in respect of the Senior Notes and certain other securities has been prepared and filed in accordance with the provisions of the Securities Act of 1933, as amended (the "1933 Act"), with the Securities and Exchange

Commission (the "Commission"); such registration statement and any post-effective amendment thereto, each in the form heretofore delivered or to be delivered to the Underwriters, has been declared effective by the Commission in such form (except that copies of the registration statement and any post-effective amendment delivered to the Underwriters need not include exhibits but shall include all documents incorporated by reference therein); and no stop order suspending the effectiveness of such registration statement has been issued and no proceeding for that purpose has been initiated or, to the best knowledge of the Company, threatened by the Commission (any preliminary prospectus, as supplemented by a preliminary prospectus supplement, included in such registration statement or filed with the Commission pursuant to Rule 424(a) of the rules and regulations of the Commission under the 1933 Act, being hereinafter called a "Preliminary Prospectus"); such registration statement, as it became effective, including the exhibits thereto and all documents incorporated by reference therein pursuant to Item 12 of Form S-3 at the time such registration statement became effective, being hereinafter called the "Registration Statement"; the prospectus relating to the Senior Notes, in the form in which it was included in the Registration Statement at the time it became effective, being hereinafter called the "Prospectus"; any reference herein to any Preliminary Prospectus or the Prospectus shall be deemed to refer to and include the documents incorporated by reference therein pursuant to Item 12 of Form S-3 under the 1933 Act, as of the date of such Preliminary Prospectus or Prospectus, as the case may be; any reference to any amendment or supplement to any Preliminary Prospectus or the Prospectus shall be deemed to refer to and include any documents filed after the date of such Preliminary Prospectus or Prospectus, as the case may be, under the Securities Exchange Act of 1934, as amended (the "1934 Act"), and incorporated by reference in such Preliminary Prospectus or Prospectus, as the case may be; any reference to any amendment to the Registration Statement shall be deemed to refer to and include any annual report of the Company filed pursuant to Section 13(a) or 15(d) of the 1934 Act after the effective date of the Registration Statement that is incorporated by reference in the Registration Statement; and the Prospectus as amended or supplemented in final form by a prospectus supplement relating to the Senior Notes in the form in which it is filed with the Commission, pursuant to Rule 424(b) under the 1933 Act in accordance with Section 3(f) hereof, including any documents incorporated by reference therein as of the date of such filing, being hereinafter called the "Final Supplemented Prospectus".

(b) The documents incorporated by reference in the Registration Statement or Prospectus, when they were filed with the Commission, complied in all material respects with the applicable provisions of the 1934 Act and the rules and regulations of the Commission thereunder, and as of such time of filing, when read together with the Prospectus, none of such documents contained an untrue statement of a material fact or omitted to state a material fact required to be stated therein or necessary to make the statements therein, in the light of the circumstances under which they were made, not misleading; and any further documents so filed and incorporated by reference in the Prospectus or any further amendment or supplement thereto, when such documents are filed with the

Commission, will comply in all material respects with the applicable provisions of the 1934 Act and the rules and regulations of the Commission thereunder and, when read together with the Prospectus as it otherwise may be amended or supplemented, will not contain an untrue statement of a material fact or omit to state a material fact required to be stated therein or necessary to make the statements therein, in the light of the circumstances under which they were made, not misleading, except that the Company makes no warranty or representation to the Underwriters with respect to: (A) any statements or omissions made in reliance upon and in conformity with information furnished in writing to the Company by the Underwriters through the Representative expressly for use in the Final Supplemented Prospectus; or (B) any information set forth in the prospectus supplement portion of the Final Supplemented Prospectus under the captions "Description of the Series I Senior Notes — Book-Entry Only Issuance — The Depository Trust Company," "The Policy and the Insurer" and "Experts" or in Appendix A thereto.

(c) The Registration Statement, the Prospectus and the Final Supplemented Prospectus comply, and any further amendments or supplements to the Registration Statement or the Prospectus, when any such post-effective amendments are declared effective or supplements are filed with the Commission, as the case may be, will comply, in all material respects with the applicable provisions of the 1933 Act, the 1934 Act, the 1939 Act (hereinafter defined) and the General Rules and Regulations of the Commission thereunder and do not and will not, (i) as of the applicable effective date as to the Registration Statement and any amendment thereto and (ii) as of the applicable filing date of the Final Supplemented Prospectus and any Prospectus as further amended or supplemented, contain an untrue statement of a material fact or omit to state a material fact necessary in order to make the statements therein not misleading in the case of the Registration Statement and any amendment thereto, and, in the light of the circumstances under which they were made, not misleading in the case of the Final Supplemented Prospectus and any Prospectus as further amended or supplemented; except that the Company makes no warranties or representations with respect to: (A) that part of the Registration Statement which shall constitute the Statements of Eligibility (Form T-1) under the Trust Indenture Act of 1939, as amended (the "1939 Act"); (B) statements or omissions made in the Registration Statement or the Final Supplemented Prospectus in reliance upon and in conformity with information furnished in writing to the Company by the Underwriters through the Representative expressly for use therein; or (C) any information set forth in the prospectus supplement portion of the Final Supplemented Prospectus under the captions "Description of the Series I Senior Notes — Book-Entry Only Issuance — The Depository Trust Company," "The Policy and the Insurer" and "Experts" or in Appendix A thereto.

(d) With respect to the Registration Statement, the conditions for use of Form S-3, as set forth in the General Instructions thereof, have been satisfied.

(e) Since the respective dates as of which information is given in the Registration Statement and the Final Supplemented Prospectus, except as otherwise stated therein, there has been no material adverse change in the business, properties or financial condition of the Company.

(f) The Company is a corporation duly organized and existing under the laws of the State of Maine, is duly qualified to carry on its business as a foreign corporation under the laws of the States of Florida, Georgia and Mississippi, and has due corporate authority to carry on the public utility business in which it is engaged and to own and operate the properties used by it in such business, to enter into and perform its obligations under this Agreement and the Indenture and to issue and sell the Senior Notes to the Underwriters.

(g) This Agreement has been duly authorized, executed and delivered by the Company.

(h) The Indenture has been duly authorized by the Company and, on the Closing Date (as hereinafter defined), will have been duly executed and delivered by the Company, and, assuming due authorization, execution and delivery of the Indenture by the Trustee, the Indenture will, on the Closing Date, constitute a valid and binding obligation of the Company, enforceable against the Company in accordance with its terms, except to the extent that enforcement thereof may be limited by (1) bankruptcy, insolvency, reorganization, receivership, liquidation, fraudulent conveyance, moratorium or other similar laws affecting creditors' rights generally or (2) general principles of equity (regardless of whether enforcement is considered in a proceeding at law or in equity) (the "Enforceability Exceptions"); the Indenture will conform in all material respects to all statements relating thereto contained in the Final Supplemented Prospectus; and, on the Closing Date, the Indenture will have been duly qualified under the 1939 Act.

(i) The issuance and delivery of the Senior Notes have been duly authorized by the Company and, on the Closing Date, the Senior Notes will have been duly executed by the Company and, when authenticated in the manner provided for in the Indenture and delivered against payment therefor as described in the Final Supplemented Prospectus, will constitute valid and legally binding obligations of the Company, enforceable against the Company in accordance with their terms, except to the extent that enforcement thereof may be limited by the Enforceability Exceptions, will be in the form contemplated by, and entitled to the benefits of, the Indenture and will conform in all material respects to all statements relating thereto in the Final Supplemented Prospectus.

(j) The execution, delivery and performance by the Company of this Agreement, the Indenture and the Senior Notes and the consummation by the Company of the transactions contemplated herein and therein and compliance by the Company with its obligations hereunder and thereunder shall have been duly authorized by all necessary corporate action on the part of the Company and do not and will not result in any violation of the charter or bylaws of the Company,

and do not and will not conflict with, or result in a breach of any of the terms or provisions of, or constitute a default under, or result in the creation or imposition of any lien, charge or encumbrance upon any property or assets of the Company under (A) any contract, indenture, mortgage, loan agreement, note, lease or other agreement or instrument to which the Company is a party or by which it may be bound or to which any of its properties may be subject (except for conflicts, breaches or defaults which would not, individually or in the aggregate, be materially adverse to the Company or materially adverse to the transactions contemplated by this Agreement), or (B) any existing applicable law, rule, regulation, judgment, order or decree of any government, governmental instrumentality or court, domestic or foreign, or any regulatory body or administrative agency or other governmental body having jurisdiction over the Company, or any of its properties.

(k) The Company has duly authorized all necessary action to be taken by it for the procurement of an irrevocable financial guaranty insurance policy (the "Insurance Policy") issued by XL Capital Assurance Inc. (the "Insurer"), insuring the payment of principal and interest on the Senior Notes, when due.

(l) No authorization, approval, consent or order of any court or governmental authority or agency is necessary in connection with the issuance and sale by the Company of the Senior Notes or the transactions by the Company contemplated in this Agreement, except (A) such as may be required under the 1933 Act or the rules and regulations thereunder; (B) such as may be required under the Public Utility Holding Company Act of 1935, as amended; (C) the qualification of the Indenture under the 1939 Act; (D) the approval of the Florida Public Service Commission (the "Florida Commission"); and (E) such consents, approvals, authorizations, registrations or qualifications as may be required under state securities or "blue sky" laws.

(m) The financial statements incorporated by reference in the Registration Statement and the Final Supplemented Prospectus, together with the related schedules and notes, present fairly, in all material respects, the financial position, results of operations and cash flows of the Company as of and for the dates indicated; said financial statements have been prepared in conformity with accounting principles generally accepted in the United States ("GAAP") applied on a consistent basis (except that the unaudited financial statements may be subject to normal year-end adjustments) throughout the periods involved and necessarily include amounts that are based on the best estimates and judgments of management. The selected financial data and the summary financial information included in the Registration Statement and the Final Supplemented Prospectus present fairly the information shown therein and have been compiled on a basis consistent with that of the audited and unaudited financial statements incorporated by reference in the Registration Statement.

SECTION 2. SALE AND DELIVERY TO THE UNDERWRITERS; CLOSING.

(a) On the basis of the representations and warranties herein contained and subject to the terms and conditions herein set forth, the Company agrees to sell to each Underwriter, severally and not jointly, and each Underwriter, severally and not jointly, agrees to purchase from the Company, the principal amount of Senior Notes set forth in Schedule I to this Agreement opposite the name of such Underwriter (plus any additional amount of Senior Notes that such Underwriter may become obligated to purchase pursuant to the provisions of Section 10 hereof), at a price equal to 96.85% of the principal amount thereof.

(b) Payment for and delivery of certificates for the Senior Notes shall be made at the offices of Troutman Sanders LLP, Bank of America Plaza, 600 Peachtree Street, N.E., Atlanta, Georgia at 10:00 A.M., Atlanta time, on September 16, 2003 (unless postponed in accordance with the provisions of Section 10) or such other time, place or date as shall be agreed upon by the Representative and the Company (such time and date of payment and delivery being herein called the "Closing Date"). Payment shall be made to the Company by wire transfer in federal funds at the Closing Date against delivery of the Senior Notes to the Representative. It is understood that each Underwriter has authorized the Representative, for each Underwriter's account, to accept delivery of, receipt for, and make payment of the principal amount of the Senior Notes which each Underwriter has agreed to purchase. The Representative, individually and not as representative of the Underwriters, may (but shall not be obligated to) make payment of the principal amount of the Senior Notes to be purchased by any Underwriter whose payment has not been received by the Closing Date, but such payment shall not relieve such Underwriter from its obligations hereunder.

The delivery of the Senior Notes shall be made in fully registered form, registered in the name of CEDE & CO., to the offices of The Depository Trust Company in New York, New York or its designee, and the Underwriters shall accept such delivery.

The certificate(s) for the Senior Notes will be made available for examination by the Representative not later than 12:00 Noon, New York City time, on the last business day prior to the Closing Date.

SECTION 3. COVENANTS OF THE COMPANY. The Company covenants with the Underwriters as follows:

(a) The Company, on or prior to the Closing Date, will deliver to the Underwriters conformed copies of the Registration Statement as originally filed and of all amendments thereto, heretofore or hereafter made, including any post-effective amendment (in each case including all exhibits filed therewith, and including unsigned copies of each consent and certificate included therein or filed as an exhibit thereto, except exhibits incorporated by reference, unless specifically

requested). As soon as the Company is advised thereof, it will advise the Representative orally of the issuance of any stop order under the 1933 Act with respect to the Registration Statement, or the institution of any proceedings therefor, of which the Company shall have received notice, and will use its best efforts to prevent the issuance of any such stop order and to secure the prompt removal thereof, if issued. The Company will deliver to the Representative sufficient conformed copies of the Registration Statement, the Prospectus and the Final Supplemented Prospectus and of all supplements and amendments thereto (in each case without exhibits) for distribution to the Underwriters and, from time to time, as many copies of the Prospectus and the Final Supplemented Prospectus as the Underwriters may reasonably request for the purposes contemplated by the 1933 Act or the 1934 Act.

(b) The Company will furnish the Underwriters with copies of each amendment and supplement to the Final Supplemented Prospectus relating to the offering of the Senior Notes in such quantities as the Underwriters may from time to time reasonably request. If, during the period (not exceeding nine months) when the delivery of a prospectus shall be required by law in connection with the sale of any Senior Notes by an Underwriter, any event relating to or affecting the Company, or of which the Company shall be advised in writing by the Underwriters, shall occur, which in the opinion of the Company or of Underwriters' counsel should be set forth in a supplement to or an amendment of the Final Supplemented Prospectus in order to make the Final Supplemented Prospectus not misleading in the light of the circumstances when it is delivered, or if for any other reason it shall be necessary during such period to amend or supplement the Final Supplemented Prospectus or to file under the 1934 Act any document incorporated by reference in the Preliminary Prospectus or Prospectus in order to comply with the 1933 Act or the 1934 Act, the Company forthwith will (i) notify the Underwriters to suspend solicitation of purchases of the Senior Notes and (ii) at its expense, make any such filing or prepare and furnish to the Underwriters a reasonable number of copies of a supplement or supplements or an amendment or amendments to the Final Supplemented Prospectus which will supplement or amend the Final Supplemented Prospectus so that, as supplemented or amended, it will not contain any untrue statement of a material fact or omit to state any material fact necessary in order to make the statements therein, in the light of the circumstances when the Final Supplemented Prospectus is delivered, not misleading or which will effect any other necessary compliance. In case any Underwriter is required to deliver a prospectus in connection with the sale of any Senior Notes after the expiration of the period specified in the preceding sentence, the Company, upon the request of such Underwriter, will furnish to such Underwriter, at the expense of such Underwriter, a reasonable quantity of a supplemented or amended prospectus, or supplements or amendments to the Final Supplemented Prospectus, complying with Section 10(a) of the 1933 Act. During the period specified in the second sentence of this subsection, the Company will continue to prepare and file with the Commission on a timely basis all documents or amendments required under the 1934 Act and the rules and regulations thereunder; provided, that the Company shall not file such documents or

amendments without also furnishing copies thereof prior to such filing to the Representative and Dewey Ballantine LLP.

(c) The Company will endeavor, in cooperation with the Underwriters, to qualify the Senior Notes for offering and sale under the applicable securities laws of such states and the other jurisdictions of the United States as the Representative may designate; provided, however, that the Company shall not be obligated to qualify as a foreign corporation in any jurisdiction in which it is not so qualified or to file a consent to service of process or to file annual reports or to comply with any other requirements in connection with such qualification deemed by the Company to be unduly burdensome.

(d) The Company will make generally available to its security holders as soon as practicable but not later than 45 days after the close of the period covered thereby, an earnings statement of the Company (in form complying with the provisions of Rule 158 of the rules and regulations under the 1933 Act) covering a twelve-month period beginning not later than the first day of the Company's fiscal quarter next following the "effective date" (as defined in Rule 158) of the Registration Statement.

(e) The Company will use its best efforts to effect the listing of the Senior Notes on the New York Stock Exchange.

(f) As soon as practicable after the date of this Agreement, and in any event within the time prescribed by Rule 424 under the 1933 Act, to file the Final Supplemented Prospectus with the Commission and to advise the Representative of such filing and to confirm such advice in writing.

(g) During a period of 15 days from the date of this Agreement, the Company will not, without the Representative's prior written consent, directly or indirectly, sell, offer to sell, grant any option for the sale of, or otherwise dispose of, any Senior Notes or any security convertible into or exchangeable into or exercisable for the Senior Notes or any debt securities substantially similar to the Senior Notes (except for the Senior Notes issued pursuant to this Agreement). The Representative agrees that commercial paper or other debt securities with scheduled maturities of less than one year are not subject to this Section 3(g).

SECTION 4. PAYMENT OF EXPENSES. The Company will pay all expenses incidental to the performance of its obligations under this Agreement, including but not limited to, the expenses of (i) the printing and filing of the Registration Statement as originally filed and of each amendment thereto, (ii) the preparation, issuance and delivery of the certificate(s) for the Senior Notes, (iii) the fees and disbursements of the Company's counsel and accountants, (iv) the qualification of the Senior Notes under securities laws in accordance with the provisions of Section 3(c) hereof, including filing fees and the reasonable fees and disbursements of counsel for the Underwriters in connection therewith and in connection with the preparation of any blue sky survey (such fees and disbursements of counsel shall not exceed $3,500), (v) the printing and delivery

to the Underwriters of copies of the Registration Statement as originally filed and of each amendment thereto and of the Prospectus, the Final Supplemented Prospectus and any amendments or supplements thereto, (vi) the printing and delivery to the Underwriters of copies of any blue sky survey, (vii) the fee of the National Association of Securities Dealers, Inc. in connection with its review of the offering contemplated by this Agreement, if applicable, (viii) the fees and expenses of the Trustee, including the fees and disbursements of counsel for the Trustee in connection with the Indenture and the Senior Notes, (ix) any fees payable in connection with the rating of the Senior Notes, (x) the cost and charges of any transfer agent or registrar, (xi) the premium payable to the Insurer in connection with the issuance of the Insurance Policy, (xii) the fees and expenses incurred in connection with the listing of the Senior Notes on the New York Stock Exchange and (xiii) the cost of qualifying the Senior Notes with The Depository Trust Company.

Except as otherwise provided in Section 9 hereof, the Underwriters shall pay all other expenses incurred by them in connection with their offering of the Senior Notes, including fees and disbursements of their counsel, Dewey Ballantine LLP.

SECTION 5. CONDITIONS OF UNDERWRITERS' OBLIGATIONS. The obligations of the Underwriters to purchase and pay for the Senior Notes are subject to the following conditions:

(a) No stop order suspending the effectiveness of the Registration Statement shall be in effect on the Closing Date and no proceedings for that purpose shall be pending before, or to the knowledge of the Company threatened by, the Commission on such date. If filing of the Final Supplemented Prospectus, or any supplement thereto, is required pursuant to Rule 424, the Final Supplemented Prospectus, and any such supplement, shall have been filed in the manner and within the time period required by Rule 424.

(b) Any required orders of the Florida Commission and the Commission permitting the transactions contemplated hereby substantially in accordance with the terms and conditions hereof shall be in full force and effect and shall contain no provision unacceptable to the Underwriters or the Company (but all provisions of such order or orders heretofore entered, copies of which have heretofore been delivered to the Representative, are deemed acceptable to the Underwriters and the Company and all provisions of such order or orders hereafter entered shall be deemed acceptable to the Underwriters and the Company unless within 24 hours after receiving a copy of any such order any party to this Agreement shall give notice to the other parties to the effect that such order contains an unacceptable provision).

(c) On the Closing Date, the Representative shall have received:

(1) The opinion, dated the Closing Date, of Beggs & Lane, a Registered Limited Liability Partnership, general counsel for the Company, substantially in the form attached hereto as Schedule II-A.

(2) The opinion, dated the Closing Date, of Troutman Sanders LLP, counsel for the Company, substantially in the form attached hereto as Schedule II-B.

(3) The opinion, dated the Closing Date, of Cravath, Swaine & Moore LLP, counsel to the Trustee, substantially in the form attached hereto as Schedule III.

(4) The opinion, dated the Closing Date, of Dewey Ballantine LLP, counsel for the Underwriters, substantially in the form attached hereto as Schedule IV.

(5) The opinion, dated the Closing Date, of counsel for the Insurer, substantially in the form attached hereto as Schedule V.

(6) At the Closing Date, there shall not have been, since the date hereof or since the respective dates as of which information is given in the Registration Statement and the Final Supplemented Prospectus, any material adverse change in the business, properties or financial condition of the Company, whether or not arising in the ordinary course of business, and the Representative shall have received a certificate of the President or any Vice President of the Company, and dated as of the Closing Date, to the effect that (i) there has been no such material adverse change, (ii) the representations and warranties in Section 1 hereof are true and correct with the same force and effect as though expressly made at and as of the Closing Date, (iii) the Company has complied with all agreements and satisfied all conditions on its part to be performed or satisfied on or prior to the Closing Date, and (iv) no stop order suspending the effectiveness of the Registration Statement has been issued and no proceedings for that purpose have been initiated or, to the knowledge of the Company, threatened by the Commission.

(7) On the Closing Date, the Representative shall have received from Deloitte & Touche LLP a letter dated the Closing Date to the effect that: (A) they are independent certified public accountants with respect to the Company within the meaning of the 1933 Act and the rules and regulations under the 1933 Act; (B) in their opinion, the financial statements audited by them and incorporated by reference in the Final Supplemented Prospectus comply as to form in all material respects with the applicable accounting requirements of the 1934 Act and the rules and regulations under the 1934 Act; and (C) on the basis of certain limited procedures performed through a specified date not more than five business days prior to the date of such letter, namely (i) reading the minute books of the Company; (ii) performing the procedures specified by the American Institute of Certified Public Accountants for a review of interim financial information as described in Statement on Auditing Standards No. 71, "Interim Financial Information" or Statement on Auditing Standards No. 100, "Interim Financial Information", as applicable, on the unaudited financial statements, if any, of the Company incorporated in the Prospectus and on the latest available unaudited financial statements of the Company, if any, for any calendar quarter subsequent to the date of those incorporated by reference in the Prospectus; and (iii) making inquiries of certain officials of the Company who have responsibility for financial and accounting matters regarding such unaudited financial statements or any specified unaudited amounts derived therefrom (it being understood that the foregoing procedures do not constitute an audit performed in accordance with generally accepted auditing standards and they would not necessarily reveal matters of

significance with respect to the comments made in such letter, and accordingly that Deloitte & Touche LLP make no representations as to the sufficiency of such procedures for the Underwriters' purposes), nothing came to their attention that caused them to believe that: (1) any material modifications should be made to the unaudited condensed financial statements, if any, incorporated by reference in the Prospectus, for them to be in conformity with GAAP; (2) such unaudited condensed financial statements do not comply as to form in all material respects with the applicable accounting requirements of the 1934 Act as it applies to Form 10-Q and the related published rules and regulations thereunder; (3) the unaudited amounts for Operating Revenues, Earnings Before Income Taxes and Net Income After Dividends on Preferred Stock and the unaudited Ratio of Earnings to Fixed Charges set forth in the Prospectus do not agree with the amounts set forth in or derived from the unaudited financial statements for the same period; (4) as of a specified date not more than five business days prior to the date of delivery of such letter, there has been any change in the capital stock or long-term debt of the Company or any decrease in net assets as compared with amounts shown in the latest audited balance sheet incorporated by reference in the Prospectus, except in each case for changes or decreases which (i) the Prospectus discloses have occurred or may occur, (ii) are occasioned by the declaration of dividends, (iii) are occasioned by draw-downs under existing pollution control financing arrangements, (iv) are occasioned by draw-downs and regularly scheduled payments of capitalized lease obligations, (v) are occasioned by the purchase or redemption of bonds or stock to satisfy mandatory or optional redemption provisions relating thereto, (vi) are occasioned by the reclassification of current maturities of long-term debt, or (vii) are disclosed in such letter; and (5) the unaudited amounts for Operating Revenues, Earnings Before Income Taxes and Net Income After Dividends on Preferred Stock and the unaudited Ratio of Earnings to Fixed Charges for any calendar quarter subsequent to those set forth in (3) above, which, if available, shall be set forth in such letter, do not agree with the amounts set forth in or derived from the unaudited financial statements for the same period or were not determined on a basis substantially consistent with that of the corresponding audited amounts or ratios included or incorporated by reference in the Prospectus.

(8) On the Closing Date, counsel for the Underwriters shall have been furnished with such documents and opinions as it may reasonably require for the purpose of enabling it to pass upon the issuance and sale of the Senior Notes as herein contemplated and related proceedings, or in order to evidence the accuracy of any of the representations or warranties, or the fulfillment of any of the conditions, herein contained; and all proceedings taken by the Company in connection with the issuance and sale of the Senior Notes as herein contemplated shall be satisfactory in form and substance to the Representative and Dewey Ballantine LLP, counsel for the Underwriters.

(9) On the Closing Date, the Senior Notes shall have been approved for listing on the New York Stock Exchange upon notice of issuance.

(10) That no amendment or supplement to the Registration Statement, or the Final Supplemented Prospectus filed subsequent to the date of this Agreement (including any filing made by the Company pursuant to Section 13 or 14 of the 1934 Act) shall be unsatisfactory in form to Dewey Ballantine LLP or shall contain information

(other than with respect to an amendment or supplement relating solely to the activity of the Underwriters) which, in the reasonable judgment of the Representative, shall materially impair the marketability of the Senior Notes.

(11) The Company shall have performed its obligations when and as provided under this Agreement.

(12) Evidence that the Insurance Policy has been issued by the Insurer and confirmation that the Senior Notes have been rated at least "Aaa" by Moody's Investors Service, Inc. and at least "AAA" by Standard & Poor's, a division of The McGraw-Hill Companies.

If any condition specified in this Section shall not have been fulfilled when and as required to be fulfilled, this Agreement may be terminated by the Representative by notice to the Company at any time prior to the Closing Date, and such termination shall be without liability of any party to any other party except as provided in Sections 4, 7 and 9(b) hereof.

SECTION 6. CONDITIONS OF THE OBLIGATIONS OF THE COMPANY. The obligations of the Company shall be subject to the conditions set forth in the first sentence of Section 5(a) and in Section 5(b). In case such conditions shall not have been fulfilled, this Agreement may be terminated by the Company by mailing or delivering written notice thereof to the Representative. Any such termination shall be without liability of any party to any other party except as otherwise provided in Sections 4, 7 and 9(b) hereof.

SECTION 7. INDEMNIFICATION.

(a) The Company agrees to indemnify and hold harmless each of the Underwriters and each person, if any, who controls any such Underwriter within the meaning of Section 15 of the 1933 Act or Section 20(a) of the 1934 Act, against any and all losses, claims, damages or liabilities, joint or several, to which they or any of them may become subject under the 1933 Act, 1934 Act or otherwise, and to reimburse any such Underwriter and such controlling person or persons, if any, for any legal or other expenses incurred by them in connection with defending any actions, insofar as such losses, claims, damages, liabilities or actions arise out of or are based upon any untrue statement or alleged untrue statement of a material fact contained in any Preliminary Prospectus, the Registration Statement, the Prospectus or the Final Supplemented Prospectus or, if the Company shall furnish to the Underwriters any amendments or any supplements thereto, or shall make any filings pursuant to Section 13 or 14 of the 1934 Act which are incorporated therein by reference, in any Preliminary Prospectus, the Registration Statement, the Prospectus or the Final Supplemented Prospectus as so amended or supplemented, or arise out of or are based upon any omission or alleged omission to state therein a material fact required to be stated therein or necessary to make the statements therein not misleading, except insofar as such losses, claims, damages, liabilities or actions arise out of or are based

upon any such untrue statement or alleged untrue statement or omission or alleged omission which was made in such Registration Statement, Preliminary Prospectus, Prospectus or Final Supplemented Prospectus in reliance upon and in conformity with information furnished in writing to the Company by, or through the Representative on behalf of, any Underwriter for use therein and except that this indemnity with respect to the Preliminary Prospectus, the Prospectus or the Final Supplemented Prospectus, if the Company shall have furnished any amendment or supplement thereto, shall not inure to the benefit of any Underwriter (or of any person controlling such Underwriter) on account of any losses, claims, damages, liabilities or actions arising from the sale of the Senior Notes to any person if a copy of the Preliminary Prospectus, the Prospectus or the Final Supplemented Prospectus (exclusive of documents incorporated therein by reference pursuant to Item 12 of Form S-3), as the same may then be amended or supplemented, shall not have been sent or given by or on behalf of such Underwriter to such person with or prior to the written confirmation of the sale involved and the untrue statement or alleged untrue statement or omission or alleged omission was corrected in the Preliminary Prospectus, the Prospectus or the Final Supplemented Prospectus as supplemented or amended at the time of such confirmation. Each Underwriter agrees, within ten days after the receipt by it of notice of the commencement of any action in respect of which indemnity may be sought by it, or by any person controlling it, from the Company on account of its agreement contained in this Section 7, to notify the Company in writing of the commencement thereof but the omission of such Underwriter so to notify the Company of any such action shall not release the Company from any liability which it may have to such Underwriter or to such controlling person otherwise than on account of the indemnity agreement contained in this Section 7. In case any such action shall be brought against an Underwriter or any such person controlling such Underwriter and such Underwriter shall notify the Company of the commencement thereof as above provided, the Company shall be entitled to participate in (and, to the extent that it shall wish, including the selection of counsel, to direct) the defense thereof, at its own expense. In case the Company elects to direct such defense and select such counsel, any Underwriter or controlling person shall have the right to employ its own counsel, but, in any such case, the fees and expenses of such counsel shall be at the expense of such Underwriter or such controlling person unless the employment of such counsel has been authorized in writing by the Company in connection with defending such action. No indemnifying party shall, without the written consent of the indemnified party, effect the settlement or compromise of, or consent to the entry of any judgment with respect to, any pending or threatened action or claim in respect of which indemnification may be sought hereunder (whether or not the indemnified party is an actual or potential party to such action or claim) unless such settlement, compromise or judgment (i) includes an unconditional release of the indemnified party from all liability arising out of such action or claim and (ii) does not include any statement as to, or an admission of, fault, culpability or a failure to act, by or on behalf of any indemnified party. In no event shall any indemnifying party have any liability or responsibility in respect of the settlement

or compromise of, or consent to the entry of any judgment with respect to, any pending or threatened action or claim effected without its prior written consent.

(b) Each Underwriter agrees severally and not jointly, to indemnify and hold harmless the Company, its directors and such of its officers who have signed the Registration Statement and each person, if any, who controls the Company within the meaning of Section 15 of the 1933 Act or Section 20(a) of the 1934 Act to the same extent and upon the same terms as the indemnity agreement of the Company set forth in Section 7(a) hereof, but only with respect to alleged untrue statements or omissions made in the Registration Statement, the Preliminary Prospectus, the Prospectus or the Final Supplemented Prospectus, or such documents as amended or supplemented, in reliance upon and in conformity with information furnished in writing to the Company by, or through the Representative on behalf of, such Underwriter for use therein.

SECTION 8. REPRESENTATIONS, WARRANTIES AND AGREEMENTS TO SURVIVE DELIVERY. All representations, warranties and agreements contained in this Agreement, or contained in certificates of officers of the Company submitted pursuant hereto, shall remain operative and in full force and effect, regardless of any investigation made by or on behalf of any Underwriter or controlling person, or by, or on behalf of the Company and shall survive delivery of the Senior Notes to the Underwriters.

SECTION 9. TERMINATION OF AGREEMENT.

(a) The Representative may terminate this Agreement, by notice to the Company, at any time at or prior to the Closing Date if (i) trading in securities on the New York Stock Exchange shall have been generally suspended or there shall have been a material disruption in settlement of securities generally, (ii) minimum or maximum ranges for prices shall have been generally established on the New York Stock Exchange by the Commission or by the New York Stock Exchange, (iii) a general banking moratorium shall have been declared by federal or New York State authorities, or (iv) there shall have occurred any outbreak or escalation of major hostilities in which the United States is involved, any declaration of war by the United States Congress or any other substantial national or international calamity, crisis or emergency (including, without limitation, acts of terrorism) affecting the United States, in any such case provided for in clauses (i) through (iv) with the result that, in the reasonable judgment of the Representative, the marketability of the Senior Notes shall have been materially impaired.

(b) If this Agreement shall be terminated by the Representative pursuant to subsection (a) above or because of any failure or refusal on the part of the Company to comply with the terms or to fulfill any of the conditions of this Agreement, or if for any reason the Company shall be unable to perform its obligations under this Agreement, then in any such case, the Company will reimburse the Underwriters for the reasonable fees and disbursements of Dewey Ballantine LLP and for the out of pocket expenses (in an amount not exceeding

$10,000) reasonably incurred by the Underwriters in making preparations for the purchase, sale and delivery of the Senior Notes and, upon such reimbursement, the Company shall be absolved from any further liability hereunder, except as provided in Sections 4 and 7.

SECTION 10. DEFAULT BY AN UNDERWRITER. If an Underwriter shall fail on the Closing Date to purchase the Senior Notes that it is obligated to purchase under this Agreement (the "Defaulted Securities"), the Representative shall have the right, within 24 hours thereafter, to make arrangements for the non-defaulting Underwriters, or any other underwriters, to purchase all, but not less than all, of the Defaulted Securities in such amounts as may be agreed upon and upon the terms herein set forth. If, however, the Representative shall not have completed such arrangements within such 24-hour period, then:

(a) if the principal amount of Defaulted Securities does not exceed 10% of the Senior Notes, the non-defaulting Underwriters shall be obligated, severally and not jointly, to purchase the full amount thereof in the proportion that their respective underwriting obligations hereunder bear to the underwriting obligations of all non-defaulting Underwriters, or

(b) if the principal amount of Defaulted Securities exceeds 10% of the Senior Notes, this Agreement shall terminate without liability on the part of any non-defaulting Underwriter.

No action taken pursuant to this Section shall relieve any defaulting Underwriter from liability in respect of its default.

In the event of any such default which does not result in a termination of this Agreement, either the Representative or the Company shall have the right to postpone the Closing Date for a period not exceeding seven days in order to effect any required changes in the Registration Statement or Final Supplemented Prospectus or in any other documents or arrangements.

SECTION 11. NOTICES. All notices and other communications hereunder shall be in writing and shall be deemed to have been duly given if mailed or transmitted by any standard form of telecommunication. Notices to the Underwriters shall be directed to the Representative at Morgan Stanley & Co. Incorporated, 1585 Broadway, New York, New York 10036, attn: Bradford Hart, and notices to the Company shall be mailed to One Energy Place, Pensacola, Florida, 32520-0100, Attention: Corporate Secretary, with a copy to Southern Company Services, Inc., 270 Peachtree Street, N.W., Atlanta, Georgia 30303, Attention: David B. Brooks.

SECTION 12. PARTIES. This Agreement shall inure to the benefit of and be binding upon the Underwriters, the Company and their respective successors. Nothing expressed or mentioned in this Agreement is intended or shall be construed to give any person, firm or corporation, other than the Underwriters and the Company and

their respective successors and the controlling persons and officers and directors referred to in Section 7 and their heirs and legal representatives, any legal or equitable right, remedy or claim under or in respect of this Agreement or any provision herein contained. This Agreement and all conditions and provisions hereof are intended to be for the sole and exclusive benefit of the Underwriters and the Company and their respective successors, and said controlling persons and officers and directors and their heirs and legal representatives, and for the benefit of no other person, firm or corporation. No purchaser of Senior Notes from any of the Underwriters shall be deemed to be a successor by reason merely of such purchase.

SECTION 13. GOVERNING LAW AND TIME. This Agreement shall be governed by and construed in accordance with the laws of the State of New York applicable to agreements made and to be performed in said State. Except as otherwise set forth herein, specified times of day refer to New York City time.

SECTION 14. COUNTERPARTS. This Agreement may be executed by any one or more of the parties hereto in any number of counterparts, each of which shall be deemed to be an original, but all such respective counterparts shall together constitute one and the same instrument.

If the foregoing is in accordance with your understanding of our agreement, please sign and return to the Company a counterpart hereof, whereupon this instrument, along with all counterparts, will become a binding agreement between the Underwriters and the Company in accordance with its terms.

Very truly yours,

GULF POWER COMPANY

New York, New York 10036
As Representative of the Underwriters named in Schedule I
to the Underwriting Agreement.

GULF POWER COMPANY
Series I 5.75% Senior Notes due September 15, 2033

Ladies and Gentlemen:

We have acted as general counsel to Gulf Power Company (the "Company") in connection with (i) the Company's issuance and sale of $40,000,000 aggregate principal amount of its Series I 5.75% Senior Notes due September 15, 2033 (the "Notes") pursuant to a Senior Note Indenture dated as of January 1, 1998, by and between the Company and JPMorgan Chase Bank (formerly known as The Chase Manhattan Bank), as trustee (the "Trustee"), as heretofore supplemented and as further supplemented by the Ninth Supplemental Indenture dated as of September 16, 2003 (collectively, the "Indenture"); and (ii) the purchase by the Underwriters of the Notes pursuant to the terms of an Underwriting Agreement (the "Underwriting Agreement") dated September 5, 2003, among the Company and the Underwriters named in Schedule I thereof (the "Underwriters") for whom you are acting as Representative. This opinion is being delivered to you pursuant to Section 5(c)(1) thereof.

All capitalized terms not otherwise defined herein shall have the meanings set forth in the Underwriting Agreement.

In rendering the opinions expressed below, we have examined the registration statement on Form S-3 (File Nos. 333-104449, 333-104449-01 and 333-104449-02) pertaining to the Notes (the "Registration Statement") filed under the Securities Act of 1933, as amended (the "Act"), and the prospectus dated April 25, 2003 as supplemented by a final prospectus supplement relating to the Notes dated September 5, 2003 (the "Final Supplemented Prospectus"), which pursuant to Form S-3 incorporates by reference the Annual Report on Form 10-K of the Company for the fiscal year ended December 31, 2002, the Quarterly Reports on Form 10-Q of the Company for the quarters ended March 31, 2003 and June 30, 2003 and the Current Reports on Form 8-K

of the Company dated March 21, 2003, July 10, 2003 and September __, 2003 (the "Exchange Act Documents"), each as filed under the Securities Exchange Act of 1934, as amended (the "Exchange Act").

In addition, we have examined, and have relied as to matters of fact upon, the documents delivered to you at the closing (except the certificate representing the Notes, of which we have examined a specimen), and we have made such other and further investigations as we deemed necessary to express the opinions hereinafter set forth. In such examination, we have assumed the genuineness of all signatures, the legal capacity of natural persons, the authenticity of all documents submitted to us as originals, the conformity to original documents of all documents submitted to us as certified or photostatic copies and the authenticity of the originals of such latter documents.

The Indenture and the Underwriting Agreement are herein referred to collectively as the "Agreements".

Based upon the foregoing, and subject to the qualifications and limitations stated herein, we are of the opinion, relying as to matters of Georgia law and the federal law of the United States upon the opinion dated the date hereof rendered to you by Troutman Sanders LLP and relying as to matters of New York law upon the opinion dated the date hereof rendered to you by Dewey Ballantine LLP, that:

1. The Company has been duly incorporated and is validly existing as a corporation in good standing under the laws of the State of Maine, is duly qualified to carry on its business as a foreign corporation under the laws of the States of Florida, Georgia and Mississippi, and has due corporate authority to carry on the public utility business in which it is engaged, to own and operate the properties used by it in such business and to enter into and perform its obligations under the Agreements and the Notes.

2. The execution, delivery and performance by the Company of the Underwriting Agreement have been duly authorized by all necessary corporate action, and the Underwriting Agreement has been duly executed and delivered by the Company.

3. All orders, consents or other authorizations or approvals of the Florida Public Service Commission and the Commission legally required for the issuance and sale of the Notes have been obtained; such orders are sufficient for the issuance and sale of the Notes; the issuance and sale of the Notes conform in all material respects with the terms of such orders; and no other order, consent or other authorization or approval of any Florida or United States governmental body (other than in connection or in compliance with the provisions of the securities or "blue sky" laws of any jurisdiction, as to which we express no opinion) is legally required for the issuance and sale of the Notes in accordance with the terms of the Underwriting Agreement.

4. The Indenture has been duly authorized, executed and delivered by the Company and, assuming the due authorization, execution and delivery thereof by the Trustee, constitutes a valid and legally binding instrument of the Company, enforceable

against the Company in accordance with its terms, subject to the qualifications that the enforceability of the Company's obligations under the Indenture may be limited by bankruptcy, insolvency, reorganization, moratorium and other similar laws relating to or affecting creditors' rights generally and by general principles of equity (regardless of whether such enforceability is considered in a proceeding in equity or at law); and the Indenture conforms as to legal matters in all material respects to the description thereof in the Final Supplemented Prospectus.

5. The Notes have been duly authorized and executed by the Company and, when authenticated by the Trustee in the manner provided in the Indenture and delivered to and paid for by the Underwriters pursuant to the Underwriting Agreement, will constitute valid and binding obligations of the Company, enforceable against the Company in accordance with their terms, subject to the qualifications that the enforceability of the Company's obligations under the Notes may be limited by bankruptcy, insolvency, reorganization, moratorium and other similar laws relating to or affecting creditors' rights generally and by general principles of equity (regardless of whether such enforceability is considered in a proceeding in equity or at law); and the Notes conform as to legal matters in all material respects to the description thereof in the Final Supplemented Prospectus.

6. The Indenture has been duly qualified under the Trust Indenture Act of 1939, as amended.

We have not independently verified the accuracy, completeness or fairness of the statements made or included in the Registration Statement, the Final Supplemented Prospectus or the Exchange Act Documents and take no responsibility therefor, except as and to the extent set forth in paragraphs 4 and 5 above. In the course of the preparation by the Company of the Registration Statement, the Final Supplemented Prospectus and the Exchange Act Documents, we participated in conferences with certain officers and employees of the Company, with other counsel for the Company, with representatives of Deloitte & Touche LLP and with your counsel. Based upon our examination of the Registration Statement, the Final Supplemented Prospectus and the Exchange Act Documents, our investigations made in connection with the preparation of the Registration Statement, the Final Supplemented Prospectus and the Exchange Act Documents and our participation in the conferences referred to above, (i) we are of the opinion that the Registration Statement, as of its effective date, and the Final Supplemented Prospectus, as of September 5, 2003, complied as to form in all material respects with the requirements of the Act and the applicable rules and regulations of the Commission thereunder and that the Exchange Act Documents, as of their respective dates of filing with the Commission, complied as to form in all material respects with the requirements of the Exchange Act and the applicable rules and regulations of the Commission thereunder, except that in each case we express no opinion as to the financial statements or other financial or statistical data contained or incorporated by reference in the Registration Statement, the Final Supplemented Prospectus or the Exchange Act Documents, and (ii) nothing came to our attention which gives us reason to believe that the Registration Statement, as of its effective date (including the Exchange

Act Documents on file with the Commission as of such date), contained any untrue statement of a material fact or omitted to state any material fact required to be stated therein or necessary in order to make the statements therein not misleading, or that the Final Supplemented Prospectus (including the Exchange Act Documents) contained, as of its date, or contains, on the date hereof, any untrue statement therein of a material fact or omitted, as of its date, or omits, on the date hereof, to state a material fact necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading, except that in each case we express no opinion or belief with respect to the financial statements or other financial or statistical data contained or incorporated by reference in the Registration Statement, the Final Supplemented Prospectus or the Exchange Act Documents and with respect to information set forth in the Final Supplemented Prospectus under the captions "Description of the Series I Senior Notes — Book-Entry Only Issuance — The Depository Trust Company" and "The Policy and the Insurer" or in Appendix A thereto.

We are members of the Florida Bar and we do not express any opinion herein concerning any law other than the law of the States of Maine, Florida and Mississippi and, to the extent set forth herein, the laws of the States of Georgia and New York and the federal law of the United States.

This opinion is rendered to you in connection with the above-described transaction. This opinion may not be relied upon by you for any other purpose or relied upon by or furnished to any other person without our prior written consent, except that Troutman Sanders LLP and Dewey Ballantine LLP may rely on this opinion in giving their opinions pursuant to Section 5(c) of the Underwriting Agreement insofar as such opinions relates to matters of Maine, Florida and Mississippi law.

Yours very truly,

BEGGS & LANE

Schedule II-B

[Letterhead of TROUTMAN SANDERS LLP]

New York, New York 10036
As Representative of the Underwriters named on Schedule I
to the Underwriting Agreement.

GULF POWER COMPANY
Series I 5.75% Senior Notes due September 15, 2033

Ladies and Gentlemen:

We have acted as counsel to Gulf Power Company (the "Company") in connection with (i) the Company's issuance of $40,000,000 aggregate principal amount of its Series I 5.75% Senior Notes due September 15, 2033 (the "Notes") pursuant to a Senior Note Indenture dated as of January 1, 1998, by and between the Company and JPMorgan Chase Bank (formerly known as The Chase Manhattan Bank), as trustee (the "Trustee"), as heretofore supplemented and as further supplemented by the Ninth Supplemental Indenture dated as of September 16, 2003 (collectively, the "Indenture"); and (ii) the purchase by you of the Notes pursuant to the terms of an Underwriting Agreement (the "Underwriting Agreement") dated September 5, 2003, among the Company and the Underwriters named in Schedule I thereof (the "Underwriters") for whom you are acting as Representative. This opinion is being delivered to you pursuant to Section 5(c)(2) thereof.

All capitalized terms not otherwise defined herein shall have the meanings set forth in the Underwriting Agreement.

In rendering the opinions expressed below, we have examined the registration statement on Form S-3 (File Nos. 333-104449, 333-104449-01 and 333-104449-02) pertaining to the Notes (the "Registration Statement") filed under the Securities Act of 1933, as amended (the "Act"), and the prospectus dated April 25, 2003 as supplemented by a final prospectus supplement dated September 5, 2003 (the "Final

Supplemented Prospectus"), which pursuant to Form S-3 incorporates by reference the Annual Report on Form 10-K of the Company for the fiscal year ended December 31, 2002, the Quarterly Reports on Form 10-Q for the quarters ended March 31, 2003 and June 30, 2003 and the Current Reports on Form 8-K of the Company dated March 21, 2003, July 10, 2003 and September ___, 2003 (the "Exchange Act Documents"), each as filed under the Securities Exchange Act of 1934, as amended (the "Exchange Act").

In addition, we have examined, and have relied as to matters of fact upon, the documents delivered to you at the closing (except the certificate representing the Notes, of which we have examined a specimen), and we have made such other and further investigations as we deemed necessary to express the opinions hereinafter set forth. In such examination, we have assumed the genuineness of all signatures, the legal capacity of natural persons, the authenticity of all documents submitted to us as originals, the conformity to original documents of all documents submitted to us as certified or photostatic copies, and the authenticity of the originals of such latter documents.

The Indenture and the Underwriting Agreement are herein referred to collectively as the "Agreements".

Based upon the foregoing, and subject to the qualifications and limitations stated herein, we are of the opinion, relying as to matters of Maine, Florida and Mississippi law upon the opinion dated the date hereof rendered to you by Beggs & Lane, a Registered Limited Liability Partnership ("Beggs & Lane"), and relying as to matters of New York law upon the opinion dated the date hereof rendered to you by Dewey Ballantine LLP, that:

1. The Company has been duly incorporated and is validly existing as a corporation in good standing under the laws of the State of Maine, is duly qualified to carry on its business as a foreign corporation under the laws of the States of Florida, Georgia and Mississippi, and has due corporate authority to carry on the public utility business in which it is engaged, to own and operate the properties used by it in such business and to enter into and perform its obligations under the Agreements and the Notes.

2. The execution, delivery and performance by the Company of the Underwriting Agreement have been duly authorized by all necessary corporate action, and the Underwriting Agreement has been duly executed and delivered by the Company.

3. All orders, consents or other authorizations or approvals of the Florida Public Service Commission and the Commission legally required for the issuance and sale of the Notes have been obtained; such orders are sufficient for the issuance and sale of the Notes; the issuance and sale of the Notes conform in all material respects with the terms of such orders; and no other order, consent or other authorization or approval of any Florida or United States governmental body (other than in connection or in compliance with the provisions of the securities or "blue sky" laws of any jurisdiction, as to which we express no opinion) is legally required for the issuance and sale of the Notes in accordance with the terms of the Underwriting Agreement.

4. The Indenture has been duly authorized, executed and delivered by the Company and, assuming the due authorization, execution and delivery thereof by the Trustee, constitutes a valid and legally binding instrument of the Company, enforceable against the Company in accordance with its terms, subject to the qualifications that the enforceability of the Company's obligations under the Indenture may be limited by bankruptcy, insolvency, reorganization, moratorium and other similar laws relating to or affecting creditors' rights generally and by general principles of equity (regardless of whether such enforceability is considered in a proceeding in equity or at law); and the Indenture conforms as to legal matters in all material respects to the description thereof in the Final Supplemented Prospectus.

5. The Notes have been duly authorized and executed by the Company and, when authenticated by the Trustee in the manner provided in the Indenture and delivered to and paid for by the Underwriters pursuant to the Underwriting Agreement, will constitute valid and binding obligations of the Company, enforceable against the Company in accordance with their terms, subject to the qualifications that the enforceability of the Company's obligations under the Notes may be limited by bankruptcy, insolvency, reorganization, moratorium and other similar laws relating to or affecting creditors' rights generally and by general principles of equity (regardless of whether such enforceability is considered in a proceeding in equity or at law); and the Notes conform as to legal matters in all material respects to the description thereof in the Final Supplemented Prospectus.

6. The Indenture has been duly qualified under the Trust Indenture Act of 1939, as amended.

We have not independently verified the accuracy, completeness or fairness of the statements made or included in the Registration Statement, the Final Supplemented Prospectus or the Exchange Act Documents and take no responsibility therefor, except as and to the extent set forth in paragraphs 4 and 5 above. In the course of the preparation by the Company of the Registration Statement, the Final Supplemented Prospectus and the Exchange Act Documents, we participated in conferences with certain officers and employees of the Company, with other counsel for the Company, with representatives of Deloitte & Touche LLP and with your counsel. Based upon our examination of the Registration Statement, the Final Supplemented Prospectus and the Exchange Act Documents, our investigations made in connection with the preparation of the Registration Statement, the Final Supplemented Prospectus and the Exchange Act Documents and our participation in the conferences referred to above, (i) we are of the opinion that the Registration Statement, as of its effective date, and the Final Supplemented Prospectus, as of September 5, 2003, complied as to form in all material respects with the requirements of the Act and the applicable rules and regulations of the Commission thereunder and that the Exchange Act Documents, as of their respective dates of filing with the Commission, complied as to form in all material respects with the relevant requirements of the Exchange Act and the applicable rules and regulations of the Commission thereunder, except that in each case we express no opinion as to the

financial statements or other financial or statistical data contained or incorporated by reference in the Registration Statement, the Final Supplemented Prospectus or the Exchange Act Documents, and (ii) nothing came to our attention which gives us reason to believe that the Registration Statement, as of its effective date (including the Exchange Act Documents on file with the Commission as of such date), contained any untrue statement of a material fact or omitted to state any material fact required to be stated therein or necessary in order to make the statements therein not misleading, or that the Final Supplemented Prospectus (including the Exchange Act Documents) contained, as of its date, or contains, on the date hereof, any untrue statement of a material fact or omitted, as of its date, or omits, as of the date hereof, to state a material fact necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading, except that in each case we express no opinion or belief with respect to the financial statements or other financial or statistical data contained or incorporated by reference in the Registration Statement, the Final Supplemented Prospectus or the Exchange Act Documents and with respect to information set forth in the Final Supplemented Prospectus under the captions "Description of the Series I Senior Notes — Book-Entry Only Issuance — The Depository Trust Company" and "The Policy and the Insurer" or in Appendix A thereto.

We are members of the State Bar of Georgia and we do not express any opinion herein concerning any law other than the law of the State of Georgia and the federal law of the United States and, to the extent set forth herein, the laws of the States of Maine, Florida, Mississippi and New York.

This opinion is rendered to you in connection with the above-described transaction. This opinion may not be relied upon by you for any other purpose or relied upon by or furnished to any other person without our prior written consent, except that Beggs & Lane may rely on this opinion in giving its opinion pursuant to Section 5(c) of the Underwriting Agreement insofar as such opinion relates to matters of Georgia law and the federal law of the United States and Dewey Ballantine LLP may rely on this opinion in giving its opinion pursuant to Section 5(c) of the Underwriting Agreement insofar as such opinion relates to matters of Georgia law.

Yours very truly,

TROUTMAN SANDERS LLP

Schedule III

[Letterhead of Cravath, Swaine & Moore LLP]

September __, 2003

Morgan Stanley & Co. Incorporated
1585 Broadway
New York, New York 10036
As Representative of the Underwriters named on Schedule I
to the Underwriting Agreement.

Gulf Power Company
500 Bayfront Parkway
Pensacola, Florida 32520

XL Capital Assurance Inc.
1221 Avenue of the Americas, 31st Floor
New York, NY 10020-1001

Gulf Power Company
Series I 5.75% Senior Notes
due September 15, 2033

Ladies and Gentlemen:

We have acted as counsel to JPMorgan Chase Bank (formerly known as The Chase Manhattan Bank) (the "Bank") in connection with (a) the Senior Note Indenture, dated as of January 1, 1998 as heretofore supplemented (the "Original Indenture"), between Gulf Power Company (the "Company") and the Bank, as Trustee, and (b) the Ninth Supplemental Indenture dated as of September 16, 2003 (together with the Original Indenture, herein called the "Indenture"), between the Company and the Bank, as Trustee.

In that connection, we have examined originals, or copies certified or otherwise identified to our satisfaction, of such documents, records and other instruments as we have deemed necessary or appropriate for the purpose of this opinion, including copies of the Indenture and certain resolutions adopted by the Board of Directors of the Bank.

Based upon the foregoing, we are of the opinion that:

(i) the Bank has been duly incorporated and is validly existing as a banking corporation in good standing under the laws of the State of New York;

(ii) the Bank has the corporate trust power and authority to execute, deliver and perform its duties under the Indenture, has duly executed and delivered the Indenture, and, insofar as the laws governing the trust powers of the Bank are concerned and assuming due authorization, execution and delivery thereof by the Company, the Indenture constitutes a legal, valid and binding agreement of the Bank, enforceable against the Bank in accordance with its terms, subject to applicable bankruptcy, insolvency, fraudulent transfer, reorganization, moratorium or other laws affecting creditors' rights generally from time to time in effect and to general principles of equity (including, without limitation, concepts of materiality, reasonableness, good faith and fair dealing), regardless of whether considered in a proceeding in equity or at law;

(iii) the execution, delivery and performance by the Bank of the Indenture do not conflict with or constitute a breach of the charter or bylaws of the Bank; and

(iv) no approval, authorization or other action by, or filing with, any governmental authority of the United States of America or the State of New York having jurisdiction over the trust powers of the Bank is required in connection with the execution and delivery by the Bank of the Indenture or the performance by the Bank of its duties thereunder, except such as have been obtained, taken or made.

We are admitted to practice only in the State of New York, and we express no opinion as to matters governed by any laws other than the laws of the State of New York and the Federal law of the United States of America. We are furnishing this opinion to you solely for your benefit. This opinion is not to be relied upon by any other person or used, circulated, quoted or otherwise referred to for any other purpose.

Very truly yours,

CRAVATH, SWAINE & MOORE LLP

Schedule IV

[Letterhead of DEWEY BALLANTINE LLP]

September __, 2003

Morgan Stanley & Co. Incorporated
1585 Broadway
New York, New York 10036
As Representative of the Underwriters named on Schedule I
to the Underwriting Agreement.

GULF POWER COMPANY
Series I 5.75% Senior Notes
due September 15, 2033

Ladies and Gentlemen:

We have represented the Underwriters (as hereinafter defined) in connection with (i) the issuance by Gulf Power Company (the "Company") of $40,000,000 of its Series I 5.75% Senior Notes due September 15, 2033 (the "Notes") pursuant to a Senior Note Indenture dated as of January 1, 1998, by and between the Company and JPMorgan Chase Bank (formerly known as The Chase Manhattan Bank), as trustee (the "Trustee"), as heretofore supplemented and as further supplemented by the Ninth Supplemental Indenture dated as of September 16, 2003 (collectively, the "Indenture"); and (ii) the purchase by the Underwriters of the Notes pursuant to the terms of an Underwriting Agreement (the "Underwriting Agreement") dated September 5, 2003, among the Company and the underwriters named in Schedule I thereof (the "Underwriters") for whom you are acting as Representative. This opinion is being delivered to you pursuant to Section 5(c)(4) thereof.

All capitalized terms not otherwise defined herein shall have the meanings set forth in the Underwriting Agreement.

In rendering the opinions expressed below, we have examined the registration statement on Form S-3 (File Nos. 333-104449, 333-104449-01 and 333-104449-02) pertaining to the Notes (the "Registration Statement") filed under the Securities Act of 1933, as amended (the "Act"), and the prospectus dated April 25, 2003 as supplemented by a final prospectus supplement dated September 5, 2003 (the "Final

Supplemented Prospectus"), which pursuant to Form S-3 incorporates by reference the Annual Report on Form 10-K of the Company for the fiscal year ended December 31, 2002, the Quarterly Reports on Form 10-Q for the quarters ended March 31, 2003 and June 30, 2003 and the Current Reports on Form 8-K of the Company dated March 21, 2003, July 10, 2003 and September __, 2003 (the "Exchange Act Documents"), each as filed under the Securities Exchange Act of 1934, as amended (the "Exchange Act").

In addition, we have examined, and have relied as to matters of fact upon, the documents delivered to you at the closing (except the certificate representing the Notes, of which we have examined a specimen), and we have made such other and further investigations as we deemed necessary to express the opinions hereinafter set forth. In such examination, we have assumed the genuineness of all signatures, the legal capacity of natural persons, the authenticity of all documents submitted to us as originals, the conformity to original documents of all documents submitted to us as certified or photostatic copies, and the authenticity of the originals of such latter documents.

The Indenture and the Underwriting Agreement are herein referred to as the "Agreements".

Based upon the foregoing, and subject to the qualifications and limitations stated herein, we are of the opinion, relying as aforesaid and as to all matters covered hereby which are governed by or dependent upon the laws of the States of Maine, Florida and Mississippi upon the opinion of Beggs & Lane, a Registered Limited Liability Partnership ("Beggs & Lane"), dated the date hereof and addressed to you and as to all matters covered hereby which are governed by or dependent upon the law of the State of Georgia upon the opinion of Troutman Sanders LLP dated the date hereof and addressed to you, that:

1. The Company has been duly incorporated and is validly existing as a corporation in good standing under the laws of the State of Maine, is duly qualified to carry on its business as a foreign corporation under the laws of the States of Florida, Georgia and Mississippi, and has due corporate authority to carry on the public utility business in which it is engaged, to own and operate the properties used by it in such business and to enter into and perform its obligations under the Agreements and the Notes.

2. The execution, delivery and performance by the Company of the Underwriting Agreement have been duly authorized by all necessary corporate action, and the Underwriting Agreement has been duly executed and delivered by the Company.

3. All orders, consents, or other authorizations or approvals of the Florida Public Service Commission and the Commission legally required for the issuance and sale of the Notes have been obtained; such orders are sufficient for the issuance and sale of the Notes; the issuance and sale of the Notes conform in all material respects with the terms of such orders; and no other order, consent or other authorization or approval of any Florida or United States governmental body (other than in connection or in compliance with the provisions of the securities or "blue sky" laws of any jurisdiction, as

to which we express no opinion) is legally required for the issuance and sale of the Notes in accordance with the terms of the Underwriting Agreement.

4. The Indenture has been duly authorized, executed and delivered by the Company and, assuming the due authorization, execution and delivery thereof by the Trustee, constitutes a valid and legally binding instrument of the Company, enforceable against the Company in accordance with its terms, subject to the qualifications that the enforceability of the Company's obligations under the Indenture may be limited by bankruptcy, insolvency, reorganization, moratorium and other similar laws relating to or affecting creditors' rights generally and by general principles of equity (regardless of whether such enforceability is considered in a proceeding in equity or at law); and the Indenture conforms as to legal matters in all material respects to the description thereof in the Final Supplemented Prospectus.

5. The Notes have been duly authorized and executed by the Company and, when authenticated by the Trustee in the manner provided in the Indenture and delivered to and paid for by the Underwriters pursuant to the Underwriting Agreement, will constitute valid and binding obligations of the Company enforceable against the Company in accordance with their terms, subject to the qualifications that the enforceability of the Company's obligations under the Notes may be limited by bankruptcy, insolvency, reorganization, moratorium and other similar laws relating to or affecting creditors' rights generally and by general principles of equity (regardless of whether such enforceability is considered in a proceeding in equity or at law); and the Notes conform as to legal matters in all material respects to the description thereof in the Final Supplemented Prospectus.

6. The Indenture has been duly qualified under the Trust Indenture Act of 1939, as amended.

We have not independently verified the accuracy, completeness or fairness of the statements made or included in the Registration Statement, the Final Supplemented Prospectus or the Exchange Act Documents and take no responsibility therefor, except as and to the extent set forth in paragraphs 4 and 5 above. In the course of the preparation by the Company of the Registration Statement, the Final Supplemented Prospectus and the Exchange Act Documents, we participated in conferences with certain officers and employees of the Company, with representatives of Deloitte & Touche LLP and with counsel to the Company. Based upon our examination of the Registration Statement, the Final Supplemented Prospectus and the Exchange Act Documents, our investigations made in connection with the preparation of the Registration Statement and the Final Supplemented Prospectus and our participation in the conferences referred to above, (i) we are of the opinion that the Registration Statement, as of its effective date, and the Final Supplemented Prospectus, as of September 5, 2003, complied as to form in all material respects with the requirements of the Act and the applicable rules and regulations of the Commission thereunder and that the Exchange Act Documents, as of their respective dates of filing with the Commission, complied as to form in all material respects with the relevant requirements of the Exchange Act and the applicable rules and

regulations of the Commission thereunder, except that in each case we express no opinion as to the financial statements or other financial or statistical data contained or incorporated by reference in the Registration Statement, the Final Supplemented Prospectus or the Exchange Act Documents, and (ii) nothing came to our attention which gives us reason to believe that the Registration Statement, as of its effective date (including the Exchange Act Documents on file with the Commission as of such date), contained any untrue statement of a material fact or omitted to state any material fact required to be stated therein or necessary in order to make the statements therein not misleading, or that the Final Supplemented Prospectus (including the Exchange Act Documents) contained, as of its date, or contains, on the date hereof, any untrue statement of a material fact or omitted, as of its date, or omits, on the date hereof, to state a material fact necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading, except that in each case we express no opinion or belief with respect to the financial statements or other financial or statistical data contained or incorporated by reference in the Registration Statement, the Final Supplemented Prospectus or the Exchange Act Documents and with respect to information set forth in the Final Supplemented Prospectus under the captions "Description of the Series I Senior Notes —Book-Entry Only Issuance —The Depository Trust Company" and "The Policy and the Insurer" or in Appendix A thereto.

We are members of the State Bar of New York and we do not express any opinion herein concerning any law other than the law of the State of New York and the federal law of the United States, and to the extent set forth herein, the law of the States of Maine, Florida, Georgia and Mississippi.

This opinion is rendered solely to you in connection with the above matter. This opinion may not be relied upon by you for any other purpose or relied upon by or furnished to any other person without our prior written consent except that Beggs & Lane and Troutman Sanders LLP may rely on this opinion in giving their opinions pursuant to Section 5(c) of the Underwriting Agreement, insofar as such opinions relate to matters of New York law, and Troutman Sanders LLP may rely on this opinion in giving its opinion pursuant to Sections 102, 302 and 904 of the Indenture, insofar as such opinion relates to matters of New York law.

Very truly yours,

DEWEY BALLANTINE LLP

Schedule V

Letterhead of XL CAPITAL ASSURANCE INC.

September __, 2003

To Each of the Addressees Listed
on the Attached Schedule A

GULF POWER COMPANY
Series I 5.75% Senior Notes
due September 15, 2033

Ladies and Gentlemen:

I am [Associate] General Counsel of XL Capital Assurance Inc., a New York stock insurance corporation (the "Corporation"), and have acted as counsel to the Corporation in connection with the issuance of Financial Guaranty Insurance Policy No. [ ] (the "Policy") relating to the above-captioned notes (the "Notes").

In so acting, I have examined a copy of (a) the Policy, (b) the Insurance and Indemnity Agreement, dated as of [ ] (the "Insurance Agreement"), among [ ], (c) the Indemnification Agreement, dated as of [ ] (the "Indemnification Agreement"), among [ ], (d) information under the heading "The Policy and the Insurer" contained in the Prospectus of Gulf Power Company dated April 25, 2003, as supplemented by a Prospectus Supplement dated September ___, 2003 relating to the Notes (the "Final Supplemented Prospectus") and (e) such other relevant documents as I have deemed necessary.

Based upon the foregoing, I am of the following opinion:

1. The Corporation is a stock insurance corporation, duly incorporated and validly existing under the laws of the State of New York and is licensed and authorized to issue the Policy and to perform its obligations under the Policy under the laws of the State of New York.

2. The Policy, the Insurance Agreement and the Indemnification Agreement (collectively, the "Insurance Documents") have been duly executed, and

the Policy, and assuming due authorization, execution and delivery of the Insurance Agreement and the Indemnification Agreement by the parties thereto (other than the Corporation), the Insurance Agreement and the Indemnification Agreement are valid and binding obligations of the Corporation enforceable in accordance with their terms except that the enforcement of the Insurance Documents may be limited by laws relating to bankruptcy, insolvency, reorganization, moratorium, receivership and other similar laws affecting creditors' rights generally and by general principles of equity (regardless of whether such enforceability is considered in a proceeding in equity or at law) and the enforceability of rights to indemnification under the Insurance Agreement and the Indemnification Agreement may be subject to limitations of public policy under applicable securities laws.

3. The execution, delivery and performance by the Corporation of its obligations under the Insurance Documents do not contravene any provision of the charter or by-laws of the Corporation. The execution, delivery and performance by the Corporation of its obligations under the Insurance Documents do not, to the extent that either of the following would affect the validity or enforceability of any of the Insurance Documents, (a) contravene any law or government regulation or order presently binding on the Corporation or (b) contravene any provision of or constitute a default under any indenture, contract or other instrument to which the Corporation is a party or by which the Corporation is bound.

4. The Policy is exempt from the registration requirements of the Securities Act of 1933, as amended (the "Act").

5. The information in the Final Supplemented Prospectus under the heading "The Policy and the Insurer" is limited and does not purport to provide the scope of disclosure required to be included in a prospectus with respect to a registrant under the Act in connection with a public offering and sale of securities of such registrant. Within such limited scope of disclosure, however, there has not come to my attention any information that would cause me to believe that the description of the Corporation referred to above, as of the date of the Final Supplemented Prospectus and as of the date hereof, contained or contains any untrue statement of a material fact or omitted, as of its date, or omits, on the date hereof, to state a material fact necessary to make the statements therein, in the light of the circumstances under which they were made, not misleading (except that no opinion is rendered with respect to any financial statements or other financial information contained or referred to therein).

I am qualified to practice law in the State of New York and do not purport to be an expert on, or to express any opinion concerning, any law other than the laws of the State of New York and the federal laws of the United States of America.

This opinion is being delivered to you in connection with the issuance of the Policy and the execution of the other Insurance Documents and may not be relied upon for any other purposes or by any other person without my express written consent.

Very truly yours,

[Fred Hnat]
[Susan Comparato]

THIS NINTH SUPPLEMENTAL INDENTURE is made as of the 16th day of September, 2003, by and between GULF POWER COMPANY, a Maine corporation, One Energy Place, Pensacola, Florida 32520-0100 (the "Company"), and JPMORGAN CHASE BANK, a New York banking corporation, 4 New York Plaza, New York, New York 10004 (the "Trustee").

W I T N E S S E T H:

WHEREAS, the Company has heretofore entered into a Senior Note Indenture, dated as of January 1, 1998 (the "Original Indenture"), with JPMorgan Chase Bank (formerly known as The Chase Manhattan Bank), as heretofore supplemented;

WHEREAS, the Original Indenture is incorporated herein by this reference and the Original Indenture, as heretofore supplemented and as further supplemented by this Ninth Supplemental Indenture, is herein called the "Indenture";

WHEREAS, under the Original Indenture, a new series of Senior Notes may at any time be established pursuant to a supplemental indenture executed by the Company and the Trustee;

WHEREAS, the Company proposes to create under the Indenture a new series of Senior Notes;

WHEREAS, additional Senior Notes of other series hereafter established, except as may be limited in the Original Indenture as at the time supplemented and modified, may be issued from time to time pursuant to the Indenture as at the time supplemented and modified; and

WHEREAS, all conditions necessary to authorize the execution and delivery of this Ninth Supplemental Indenture and to make it a valid and binding obligation of the Company have been done or performed.

NOW, THEREFORE, in consideration of the agreements and obligations set forth herein and for other good and valuable consideration, the sufficiency of which is hereby acknowledged, the parties hereto hereby agree as follows:

## ARTICLE 1

### Series I Senior Notes

SECTION 101. Establishment. There is hereby established a new series of Senior Notes to be issued under the Indenture, to be designated as the Company's Series I 5.75% Senior Notes due September 15, 2033 (the "Series I Notes").

There are to be authenticated and delivered $40,000,000 principal amount of Series I Notes, and such principal amount of the Series I Notes need not be issued at the same time and such series may be reopened at any time, without the consent of the Holders thereof, for issuance of additional Series I Notes. Any such additional Series I Notes will have the same interest rate, maturity and

other terms, including the benefit of the Policy, as those initially issued. No Series I Notes shall be authenticated and delivered except as provided by Sections 203, 303, 304, 907 or 1107 of the Original Indenture. The Series I Notes shall be issued in definitive fully registered form.

The Series I Notes shall be issued in the form of one or more Global Securities in substantially the form set out in Exhibit A hereto. The Depositary with respect to the Series I Notes shall be The Depository Trust Company.

The form of the Trustee's Certificate of Authentication for the Series I Notes shall be in substantially the form set forth in Exhibit B hereto.

Each Series I Note shall be dated the date of authentication thereof and shall bear interest from the date of original issuance thereof or from the most recent Interest Payment Date to which interest has been paid or duly provided for.

SECTION 102. Definitions. The following defined terms used herein shall, unless the context otherwise requires, have the meanings specified below. Capitalized terms used herein for which no definition is provided herein shall have the meanings set forth in the Original Indenture.

"Insurer" means XL Capital Assurance Inc., a New York stock insurance corporation.

"Interest Payment Dates" means March 15, June 15, September 15 and December 15 of each year, commencing December15, 2003.

"Original Issue Date" means September 16, 2003.

"Policy" means the financial guaranty insurance policy issued by the Insurer with respect to payments due for principal of and interest on the Series I Notes as provided in such policy.

"Regular Record Date" means, with respect to each Interest Payment Date, the close of business on the 15th calendar day preceding such Interest Payment Date (whether or not a Business Day).

"Stated Maturity" means September 15, 2033.

SECTION 103. Payment of Principal and Interest. The principal of the Series I Notes shall be due at Stated Maturity (unless earlier redeemed). The unpaid principal amount of the Series I Notes shall bear interest at the rate of 5.75% per annum until paid or duly provided for. Interest shall be paid quarterly in arrears on each Interest Payment Date to the Person in whose name the Series I Notes are registered on the Regular Record Date for such Interest Payment Date, *provided* that interest payable at the Stated Maturity of principal or on a Redemption Date as provided herein will be paid to the Person to whom principal is payable. Any such interest that is not so punctually paid or duly provided for will forthwith cease to be payable to the Holders on such Regular Record Date and may either be paid to the Person or Persons in whose name the Series I Notes are registered at the close of business on a Special Record Date for the payment of such defaulted interest to be fixed by the Trustee, notice whereof shall be given to Holders of the Series I Notes not

less than ten (10) days prior to such Special Record Date, or be paid at any time in any other lawful manner not inconsistent with the requirements of any securities exchange, if any, on which the Series I Notes shall be listed, and upon such notice as may be required by any such exchange, all as more fully provided in the Original Indenture.

Payments of interest on the Series I Notes will include interest accrued to but excluding the respective Interest Payment Dates. Interest payments for the Series I Notes shall be computed and paid on the basis of a 360-day year of twelve 30-day months. In the event that any date on which interest is payable on the Series I Notes is not a Business Day, then a payment of the interest payable on such date will be made on the next succeeding day that is a Business Day (and without any interest or other payment in respect of any such delay), with the same force and effect as if made on the date the payment was originally payable.

Payment of the principal and interest due at the Stated Maturity or earlier redemption of the Series I Notes shall be made upon surrender of the Series I Notes at the Corporate Trust Office of the Trustee. The principal of and interest on the Series I Notes shall be paid in such coin or currency of the United States of America as at the time of payment is legal tender for payment of public and private debts. Payments of interest (including interest on any Interest Payment Date) will be made, subject to such surrender where applicable, at the option of the Company, (i) by check mailed to the address of the Person entitled thereto as such address shall appear in the Security Register or (ii) by wire transfer or other electronic transfer at such place and to such account at a banking institution in the United States as may be designated in writing to the Trustee at least sixteen (16) days prior to the date for payment by the Person entitled thereto.

SECTION 104. Denominations. The Series I Notes may be issued in the denominations of $25, or any integral multiple thereof.

SECTION 105. Global Securities. The Series I Notes will be issued in the form of one or more Global Securities registered in the name of the Depositary (which shall be The Depository Trust Company) or its nominee. Except under the limited circumstances described below, Series I Notes represented by one or more Global Securities will not be exchangeable for, and will not otherwise be issuable as, Series I Notes in definitive form. The Global Securities described above may not be transferred except by the Depositary to a nominee of the Depositary or by a nominee of the Depositary to the Depositary or another nominee of the Depositary or to a successor Depositary or its nominee.

Owners of beneficial interests in such a Global Security will not be considered the Holders thereof for any purpose under the Indenture, and no Global Security representing a Series I Note shall be exchangeable, except for another Global Security of like denomination and tenor to be registered in the name of the Depositary or its nominee or to a successor Depositary or its nominee. The rights of Holders of such Global Security shall be exercised only through the Depositary.

A Global Security shall be exchangeable for Series I Notes registered in the names of persons other than the Depositary or its nominee only if (i) the Depositary notifies the Company that it is unwilling or unable to continue as a Depositary for such Global Security and no successor Depositary shall have been appointed by the Company, or if at any time the Depositary ceases to be

a clearing agency registered under the Securities Exchange Act of 1934, as amended, at a time when the Depositary is required to be so registered to act as such Depositary and no successor Depositary shall have been appointed by the Company, in each case within 90 days after the Company receives such notice or becomes aware of such cessation, (ii) the Company in its sole discretion determines that such Global Security shall be so exchangeable, or (iii) there shall have occurred an Event of Default with respect to the Series I Notes. Any Global Security that is exchangeable pursuant to the preceding sentence shall be exchangeable for Series I Notes registered in such names as the Depositary shall direct.

SECTION 106. Transfer. No service charge will be made for any transfer or exchange of Series I Notes, but payment will be required of a sum sufficient to cover any tax or other governmental charge that may be imposed in connection therewith.

The Company shall not be required (a) to issue, transfer or exchange any Series I Notes except to the Insurer during a period beginning at the opening of business fifteen (15) days before the day of the mailing of a notice pursuant to Section 1104 of the Original Indenture identifying the serial numbers of the Series I Notes to be called for redemption, and ending at the close of business on the day of the mailing, or (b) to transfer or exchange any Series I Notes theretofore selected for redemption in whole or in part, except the unredeemed portion of any Series I Note redeemed in part.

SECTION 107. Redemption. The Series I Notes shall be subject to redemption at the option of the Company, in whole or in part, without premium or penalty, at any time or from time to time on or after September 16, 2008, at a Redemption Price equal to 100% of the principal amount to be redeemed plus accrued but unpaid interest to the Redemption Date.

In the event of redemption of the Series I Notes in part only, a new Series I Note or Notes for the unredeemed portion will be issued in the name or names of the Holders thereof upon the surrender thereof.

The Series I Notes will not have a sinking fund.

Notice of redemption shall be given as provided in Section 1104 of the Original Indenture.

Any redemption of less than all of the Series I Notes shall, with respect to the principal thereof, be divisible by $25.

## ARTICLE 2

### Special Insurance Provisions

SECTION 201. Supplemental Indentures. The consent of the Insurer shall be required with respect to any indenture or indentures supplemental to the Original Indenture requiring the consent of the Holders of the Series I Notes pursuant to Section 902 of the Original Indenture.

SECTION 202. Events of Default and Remedies. Subject to Section 107 of the Original Indenture and to the Trust Indenture Act, including, without limitation, Sections 316(a)(1) and 317(a) thereof, if an Event of Default occurs and is continuing, the Insurer shall be entitled to control and direct the enforcement of all rights and remedies granted to the Holders of the Series I Notes or the Trustee for the benefit of the Holders of the Series I Notes under this Indenture, including, without limitation, (i) the right to accelerate the principal of the Series I Notes as provided in Section 502 of the Original Indenture, and (ii) the right to annul any such declaration of acceleration, and the Insurer shall also be entitled to approve any waiver of an Event of Default with respect to the Series I Notes, the obligation of the Trustee to comply with any such direction to be subject to compliance with the conditions set forth in Sections 512 and 603(e) of the Original Indenture (as if references in those Sections to Holders were references to the Insurer) and the protections provided to the Trustee by Section 601(c)(3) of the Original Indenture shall be applicable with respect to any direction from the Insurer given pursuant hereto (as if references in said Section to Holders were references to the Insurer).

SECTION 203. Insurance Policy Payment Procedures. (a) The Insurer will make payments of principal or interest due on the Series I Notes in accordance with the Policy on or before the first Business Day next following the date on which the Insurer shall have received notice of Nonpayment (as defined in the Policy) from the Trustee.

(b) In the event of Nonpayment and notification thereof to the Insurer, the Trustee shall make available to the Insurer the books kept by the Trustee for the registration and for the registration of transfer of Series I Notes as provided in the Indenture.

(c) The Trustee shall, at the time it provides notice to the Insurer pursuant to (a) above, notify Holders of Series I Notes entitled to receive the payment of principal or interest thereon from the Insurer (i) as to the fact of such entitlement, (ii) that the Insurer will remit to them all or a part of the interest payments next coming due upon proof of Holder entitlement to interest payments and delivery to the Insurer, in form satisfactory to the Insurer, of an appropriate assignment of the Holder's right to payment, (iii) that should they be entitled to receive full payment of principal from the Insurer, they must surrender their Series I Notes (along with an appropriate instrument of assignment in form satisfactory to the Insurer to permit ownership of such Series I Notes to be registered in the name of the Insurer) for payment to the Insurer, and not the Trustee or any paying agent, and (iv) that should they be entitled to receive partial payment of principal from the Insurer, they must surrender their Series I Notes for payment thereon first to the Trustee, who shall note on such Series I Notes the portion of the principal paid by the Trustee, and then, along with an appropriate instrument of assignment in form satisfactory to the Insurer, to the Insurer, which will then pay the unpaid portion of principal.

(d) In the event that the Trustee has notice that any payment of principal of or interest on a Series I Note which has become due for payment (under the terms of the Policy) and which is made to a Holder by or on behalf of the Company has been deemed a preferential transfer and theretofore recovered from its Holder pursuant to the United States Bankruptcy Code by a trustee in bankruptcy in accordance with a final, nonappealable order of a court having competent jurisdiction, the Trustee shall, at the time the Insurer is notified pursuant to (a) above, notify all

Holders of the Series I Notes that in the event that any Holder's payment is so recovered, such Holder will be entitled to payment from the Insurer to the extent of such recovery if sufficient funds are not otherwise available, and the Trustee shall furnish to the Insurer its records evidencing the payments of principal of and interest on the Series I Notes which have been made by the Trustee and subsequently recovered from Holders and the dates on which such payments were made.

(e) In addition to those rights granted the Insurer under the Indenture, the Insurer shall, to the extent it makes payment of principal of or interest on Series I Notes, become subrogated to the rights of the recipients of such payments in accordance with the terms of the Policy, and to evidence such subrogation (i) in the case of subrogation as to claims for past due interest, the Trustee shall note the Insurer's rights as subrogee on the registration books of the Company maintained by the Trustee upon receipt from the Insurer of proof of the payment of interest thereon to the Holders of the Series I Notes, and (ii) in the case of subrogation as to claims for past due principal, the Trustee shall note the Insurer's rights as subrogee on the registration books of the Company maintained by the Trustee upon surrender of the Series I Notes by the Holders thereof together with proof of the payment of principal thereof.

SECTION 204. Application of Term "Outstanding" to Series I Notes. In the event that the principal and/or interest due on the Series I Notes shall be paid by the Insurer pursuant to the Policy, the Series I Notes shall remain Outstanding for all purposes of the Indenture, not be considered defeased or otherwise satisfied and not be considered paid by the Company, and the assignment and pledge of the Indenture and all covenants, agreements and other obligations of the Company to the Holders of the Series I Notes shall continue to exist and shall run to the benefit of the Insurer, and the Insurer shall be subrogated to the rights of such Holders to the extent of each such payment.

SECTION 205. Insurer as Third Party Beneficiary. To the extent that the Indenture confers upon or gives or grants to the Insurer any right, remedy or claim under or by reason of the Indenture, the Insurer is hereby explicitly recognized as being a third-party beneficiary hereunder and may enforce any such right, remedy or claim conferred, given or granted hereunder.

SECTION 206. Concerning the Special Insurance Provisions. The provisions of this Article 2 shall apply notwithstanding anything in the Indenture to the contrary, but only so long as the Policy shall be in full force and effect and the Insurer is not in default thereunder.

## ARTICLE 3

### Miscellaneous Provisions

SECTION 301. Recitals by Company. The recitals in this Ninth Supplemental Indenture are made by the Company only and not by the Trustee, and all of the provisions contained in the Original Indenture in respect of the rights, privileges, immunities, powers and duties of the Trustee

shall be applicable in respect of Series I Notes and of this Ninth Supplemental Indenture as fully and with like effect as if set forth herein in full.

SECTION 302. Ratification and Incorporation of Original Indenture. As heretofore supplemented and as supplemented hereby, the Original Indenture is in all respects ratified and confirmed, and the Original Indenture as heretofore supplemented and as supplemented by this Ninth Supplemental Indenture shall be read, taken and construed as one and the same instrument.

SECTION 303. Executed in Counterparts. This Ninth Supplemental Indenture may be simultaneously executed in several counterparts, each of which shall be deemed to be an original, and such counterparts shall together constitute but one and the same instrument.

IN WITNESS WHEREOF, each party hereto has caused this instrument to be signed in its name and behalf by its duly authorized officers, all as of the day and year first above written.

## FORM OF SERIES I NOTE

NO. ____ CUSIP NO. 402479786

GULF POWER COMPANY
SERIES I 5.75% SENIOR NOTE
DUE SEPTEMBER 15, 2033

| | |
|---|---|
| Principal Amount: | $_____ |
| Regular Record Date: | 15th calendar day prior to the applicable Interest Payment Date (whether or not a Business Day) |
| Original Issue Date: | September 16, 2003 |
| Stated Maturity: | September 15, 2033 |
| Interest Payment Dates: | March 15, June 15, September 15 and December 15 |
| Interest Rate: | 5.75% per annum |
| Authorized Denominations: | $25 or any integral multiple thereof |
| Initial Redemption Date: | September 16, 2008 |

Gulf Power Company, a Maine corporation (the "Company", which term includes any successor corporation under the Indenture referred to on the reverse hereof), for value received, hereby promises to pay to _____, or registered assigns, the principal sum of _____DOLLARS ($_____) on the Stated Maturity shown above (or upon earlier redemption), and to pay interest thereon from the Original Issue Date shown above, or from the most recent Interest Payment Date to which interest has been paid or duly provided for, quarterly in arrears on each Interest Payment Date as specified above, commencing December 15, 2003, and on the Stated Maturity (or upon earlier redemption) at the rate per annum shown above until the principal hereof is paid or made available for payment and on any overdue principal and on any overdue installment of interest. The interest so payable, and punctually paid or duly provided for, on any Interest Payment Date (other than an Interest Payment Date that is the Stated Maturity or on a Redemption Date) will, as provided in such Indenture, be paid to the Person in whose name this Note (the "Note") is registered at the close of business on the Regular Record Date as specified above next preceding such Interest Payment Date, provided that any interest payable at Stated Maturity or on any Redemption Date will be paid to the Person to whom principal is payable. Except as otherwise provided in the Indenture, any such interest not so punctually paid or duly provided for will forthwith cease to be payable to the Holder on such Regular Record Date and may either be paid to the Person in whose name this Note is registered at the close of business on a Special Record Date for the payment of such defaulted interest to be fixed by the Trustee, notice

whereof shall be given to Holders of Notes of this series not less than 10 days prior to such Special Record Date, or be paid at any time in any other lawful manner not inconsistent with the requirements of any securities exchange, if any, on which the Notes of this series shall be listed, and upon such notice as may be required by any such exchange, all as more fully provided in the Indenture.

Payments of interest on this Note will include interest accrued to but excluding the respective Interest Payment Dates. Interest payments for this Note shall be computed and paid on the basis of a 360-day year of twelve 30-day months. In the event that any date on which interest is payable on this Note is not a Business Day, then payment of the interest payable on such date will be made on the next succeeding day that is a Business Day (and without interest or other payment in respect of any such delay), with the same force and effect as if made on the date the payment was originally payable. A "Business Day" shall mean any day other than a Saturday or a Sunday or a day on which banking institutions in New York City are authorized or required by law or executive order to remain closed or a day on which the Corporate Trust Office of the Trustee is closed for business.

Payment of the principal of and interest due at the Stated Maturity or earlier redemption of the Series I Notes shall be made upon surrender of the Series I Notes at the Corporate Trust Office of the Trustee. The principal of and interest on the Series I Notes shall be paid in such coin or currency of the United States of America as at the time of payment is legal tender for payment of public and private debts. Payment of interest (including interest on an Interest Payment Date) will be made, subject to such surrender where applicable, at the option of the Company, (i) by check mailed to the address of the Person entitled thereto as such address shall appear in the Security Register or (ii) by wire transfer or other electronic transfer at such place and to such account at a banking institution in the United States as may be designated in writing to the Trustee at least 16 days prior to the date for payment by the Person entitled thereto.

XL Capital Assurance Inc. (the "Insurer"), New York, New York, has delivered its financial guaranty insurance policy (the "Policy") with respect to the scheduled payments due of principal of and interest on this Note to the principal Corporate Trust Office of the Trustee. **Said Policy is on file and available for inspection at the principal Corporate Trust Office of the Trustee and a copy thereof may be obtained from the Insurer or the Trustee.**

REFERENCE IS HEREBY MADE TO THE FURTHER PROVISIONS OF THIS NOTE SET FORTH ON THE REVERSE HEREOF, WHICH FURTHER PROVISIONS SHALL FOR ALL PURPOSES HAVE THE SAME EFFECT AS IF SET FORTH AT THIS PLACE.

Unless the certificate of authentication hereon has been executed by the Trustee by manual signature, this Note shall not be entitled to any benefit under the Indenture or be valid or obligatory for any purpose.

IN WITNESS WHEREOF, the Company has caused this instrument to be duly executed under its corporate seal.

CERTIFICATE OF AUTHENTICATION

This is one of the Senior Notes referred to in the within-mentioned Indenture.

JPMORGAN CHASE BANK,
as Trustee

By:_____
Authorized Officer

(Reverse Side of Note)

This Note is one of a duly authorized issue of Senior Notes of the Company (the "Notes"), issued and issuable in one or more series under a Senior Note Indenture, dated as of January 1, 1998, as supplemented (the "Indenture"), between the Company and JPMorgan Chase Bank (formerly known as The Chase Manhattan Bank), Trustee (the "Trustee," which term includes any successor trustee under the Indenture), to which Indenture and all indentures incidental thereto reference is hereby made for a statement of the respective rights, limitation of rights, duties and immunities thereunder of the Company, the Trustee and the Holders of the Notes issued thereunder and of the terms upon which said Notes are, and are to be, authenticated and delivered. This Note is one of the series designated on the face hereof as Series I 5.75% Senior Notes due September 15, 2033 (the "Series I Notes") which is unlimited in aggregate principal amount. Capitalized terms used herein for which no definition is provided herein shall have the meanings set forth in the Indenture.

The Company shall have the right, subject to the terms and conditions of the Indenture, to redeem this Note at any time on or after September 16, 2008 at the option of the Company, without premium or penalty, in whole or in part, at a Redemption Price equal to 100% of the principal amount to be redeemed plus accrued but unpaid interest to the Redemption Date.

In the event of redemption of this Note in part only, a new Note or Notes of this series for the unredeemed portion hereof will be issued in the name of the Holder hereof upon the surrender hereof. The Notes will not have a sinking fund.

If an Event of Default with respect to the Notes of this series shall occur and be continuing, the principal of the Notes of this series may be declared due and payable in the manner, with the effect and subject to the conditions provided in the Indenture.

The Indenture permits, with certain exceptions as therein provided, the amendment thereof and the modification of the rights and obligations of the Company and the rights of the Holders of the Notes of each series to be affected under the Indenture at any time by the Company and the Trustee with the consent of the Holders of not less than a majority in principal amount of the Notes at the time Outstanding of each series to be affected. The Indenture also contains provisions permitting the Holders of specified percentages in principal amount of the Notes of each series at the time Outstanding, on behalf of the Holders of all Notes of such series, to waive compliance by the Company with certain provisions of the Indenture and certain past defaults under the Indenture and their consequences. Any such consent or waiver by the Holder of this Note shall be conclusive and binding upon such Holder and upon all future Holders of this Note and of any Note issued upon the registration of transfer hereof or in exchange hereof or in lieu hereof, whether or not notation of such consent or waiver is made upon this Note.

No reference herein to the Indenture and no provision of this Note or of the Indenture shall alter or impair the obligation of the Company, which is absolute and unconditional, to pay the principal of and interest on this Note at the times, place and rate, and in the coin or currency, herein prescribed.

As provided in the Indenture and subject to certain limitations therein set forth, the transfer of this Note is registrable in the Security Register, upon surrender of this Note for registration of transfer at the office or agency of the Company for such purpose, duly endorsed by, or accompanied by a written instrument of transfer in form satisfactory to the Company and the Security Registrar and duly executed by, the Holder hereof or his attorney duly authorized in writing, and thereupon one or more new Notes of this series, of authorized denominations and of like tenor and for the same aggregate principal amount, will be issued to the designated transferee or transferees. No service charge shall be made for any such registration of transfer or exchange, but the Company may require payment of a sum sufficient to cover any tax or other governmental charge payable in connection therewith.

Prior to due presentment of this Note for registration of transfer, the Company, the Trustee and any agent of the Company or the Trustee may treat the Person in whose name this Note is registered as the owner hereof for all purposes, whether or not this Note be overdue, and neither the Company, the Trustee nor any such agent shall be affected by notice to the contrary.

The Notes of this series are issuable only in registered form without coupons in denominations of $25 and any integral multiple thereof. As provided in the Indenture and subject to certain limitations therein set forth, Notes of this series are exchangeable for a like aggregate principal amount of Notes of this series of a different authorized denomination, as requested by the Holder surrendering the same upon surrender of the Note or Notes to be exchanged at the office or agency of the Company.

This Note shall be governed by, and construed in accordance with, the internal laws of the State of New York.

## ABBREVIATIONS

## RISK FACTORS

Investing in the Series I Senior Notes involves risk. Please see the risk factors in Gulf Power Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2002, which is incorporated by reference in this Prospectus Supplement. Before making an investment decision, you should carefully consider these risks as well as other information contained or incorporated by reference in this Prospectus Supplement and the accompanying Prospectus. The risks and uncertainties not presently known to Gulf Power Company or that Gulf Power Company currently deems immaterial may also impair its business operations, its financial results and the value of the Series I Senior Notes.

## THE COMPANY

Gulf Power Company (the "Company") is a corporation organized under the laws of the State of Maine on November 2, 1925, and admitted to do business in Florida on January 15, 1926, in Mississippi on October 25, 1976 and in Georgia on November 20, 1984. The mailing address of the Company's principal executive offices is One Energy Place, Pensacola, Florida 32520-0100, and the telephone number is (850) 444-6111. The Company is a wholly owned subsidiary of The Southern Company.

The Company is a regulated public utility engaged in the generation, transmission, distribution and sale of electric energy within an approximately 7,400 square mile service area within the northwestern portion of the State of Florida.

## SELECTED FINANCIAL INFORMATION

The following selected financial data for the years ended December 31, 1998 through December 31, 2002 and the six months ended June 30, 2003 have been derived from the Company's financial statements and related notes, incorporated by reference in this Prospectus Supplement. The information set forth below is qualified in its entirety by reference to and, therefore, should be read together with management's discussion and analysis of results of operations and financial condition, the financial statements and related notes and other financial information incorporated by reference in this Prospectus Supplement.

| | Year Ended December 31, | | | | | Six Months Ended June 30, |
|---|---|---|---|---|---|---|
| | 1998 | 1999 | 2000 | 2001 | 2002 | 2003 |
| | (Thousands, except ratios) | | | | | (unaudited) |
| Operating Revenues | $650,518 | $674,099 | $714,319 | $725,203 | $820,467 | $413,047 |
| Earnings Before Income Taxes | 89,356 | 86,515 | 82,607 | 89,716 | 104,397 | 52,557 |
| Net Income After Dividends on Preferred Stock | 56,521 | 53,667 | 51,843 | 58,307 | 67,036 | 32,757 |
| Ratio of Earnings to Fixed Charges(1) | 3.83 | 3.62 | 3.38 | 3.64 | 3.52 | 3.59 |

| | Capitalization As of June 30, 2003 | | |
|---|---|---|---|
| | Actual | As Adjusted(2) | |
| | (Thousands, except percentages) | | (unaudited) |
| Common Stock Equity | $ 556,503 | $ 556,503 | 46.5% |
| Cumulative Preferred Stock | 4,236 | 4,236 | 0.4 |
| Company Obligated Mandatorily Redeemable Preferred Securities of Subsidiary Trusts Holding Company Junior Subordinated Notes | 115,000 | 70,000 | 5.8 |
| Senior Notes | 236,720 | 350,000 | 29.2 |
| Other Long-Term Debt | 216,625 | 216,625 | 18.1 |
| Total | $1,129,084 | $1,197,364 | 100.0% |

(1) This ratio is computed as follows: (i) "Earnings" have been calculated by adding to "Earnings Before Income Taxes" "Interest Expense, Net of Amounts Capitalized," "Distributions on Preferred Securities of Subsidiary" and the debt portion of allowance for funds used during construction; and (ii) "Fixed Charges" consist of "Interest Expense, Net of Amounts Capitalized," "Distributions on Preferred Securities of Subsidiary" and the debt portion of allowance for funds used during construction.

(2) Reflects (i) the redemption in July 2003 and August 2003 of $46,720,000 aggregate principal amount of Series A 6.70% Senior Insured Quarterly Notes due June 30, 2038; (ii) the issuance in July 2003 of $60,000,000 aggregate principal amount of Series G 4.35% Senior Notes due July 15, 2013; (iii) the issuance in July 2003 of $60,000,000 aggregate principal amount of Series H 5.25% Senior Notes due July 15, 2033; (iv) the proposed redemption in October 2003 of $45,000,000 aggregate liquidation amount of Gulf Power Capital Trust II 7.00% Cumulative Quarterly Income Preferred Securities; and (v) the issuance of the Series I Senior Notes offered hereby.

## USE OF PROCEEDS

The proceeds from the sale of the Series I Senior Notes, together with other monies of the Company, will be used by the Company to redeem in October 2003 the $45,000,000 outstanding principal amount of Gulf Power Capital Trust II 7.00% Cumulative Quarterly Income Preferred Securities. The redemption is subject to the Company's closing of the sale of the Series I Senior Notes.

## DESCRIPTION OF THE SERIES I SENIOR NOTES

Set forth below is a description of the specific terms of the Series I 5.75% Senior Notes due September 15, 2033 (the "Series I Senior Notes"). This description supplements, and should be read together with, the description of the general terms and provisions of the senior notes set forth in the accompanying Prospectus under the caption "Description of the Senior Notes." The following description does not purport to be complete and is subject to, and is qualified in its entirety by reference to, the description in the accompanying Prospectus and the Senior Note Indenture dated as of January 1, 1998, as supplemented (the "Senior Note Indenture"), between the Company and JPMorgan Chase Bank (formerly known as The Chase Manhattan Bank), as trustee (the "Senior Note Indenture Trustee").

### General

The Series I Senior Notes will be issued as a series of senior notes under the Senior Note Indenture. The Series I Senior Notes will initially be issued in the aggregate principal amount of $40,000,000. The Company may, without the consent of the holders of the Series I Senior Notes, issue additional notes having the same ranking and the same interest rate, maturity and other terms, including the benefit of the Policy (as defined below), as the Series I Senior Notes. Any additional notes having such similar terms, together with the Series I Senior Notes, will constitute a single series of senior notes under the Senior Note Indenture.

The entire principal amount of the Series I Senior Notes will mature and become due and payable, together with any accrued and unpaid interest thereon, on September 15, 2033. The Series I Senior Notes are not subject to any sinking fund provision. The Series I Senior Notes are available for purchase in denominations of $25 and any integral multiple thereof.

### Interest

Each Series I Senior Note shall bear interest at the rate of 5.75% per annum (the "Securities Rate") from the date of original issuance, payable quarterly in arrears on March 15, June 15, September 15 and December 15 of each year (each, an "Interest Payment Date") to the person in whose name such Series I Senior Note is registered at the close of business on the fifteenth calendar day prior to such payment date (whether or not a Business Day). The initial interest payment date is December 15, 2003. The amount of interest payable will be computed on the basis of a 360-day year of twelve 30-day months. In the event that any date on which interest is payable on the Series I Senior Notes is not a Business Day, then payment of the interest payable on such date will be made on the next succeeding day which is a Business Day (and without any interest or other payment in respect of any such delay), with the same force and effect as if made on such date. "Business Day" means a day other than (i) a Saturday or Sunday, (ii) a day on which banks in New York, New York are authorized or obligated by law or executive order to remain closed or (iii) a day on which the Senior Note Indenture Trustee's corporate trust office is closed for business.

### Ranking

The Series I Senior Notes will be direct, unsecured and unsubordinated obligations of the Company ranking equally with all other unsecured and unsubordinated obligations of the Company. The Series I Senior Notes will be effectively subordinated to all secured debt of the Company, including its first mortgage bonds, aggregating approximately $108,000,000 outstanding at June 30, 2003. The Senior Note Indenture contains no restrictions on the amount of additional indebtedness that may be incurred by the Company.

### Trading Characteristics

The Series I Senior Notes are expected to trade at a price that takes into account the value, if any, of accrued but unpaid interest; thus, purchasers will not pay and sellers will not receive accrued and unpaid interest with respect to the Series I Senior Notes that is not included in the trading price thereof. Any portion of the trading

price of a Series I Senior Note received that is attributable to accrued interest will be treated as ordinary interest income for federal income tax purposes and will not be treated as part of the amount realized for purposes of determining gain or loss on the disposition of the Series I Senior Note.

The trading price of the Series I Senior Notes is likely to be sensitive to the level of interest rates generally. If interest rates rise in general, the trading price of the Series I Senior Notes may decline to reflect the additional yield requirements of the purchasers. Conversely, a decline in interest rates may increase the trading price of the Series I Senior Notes, although any increase will be moderated by the Company's ability to call the Series I Senior Notes at any time on or after September 16, 2008.

**Special Insurance Provisions of the Senior Note Indenture**

Subject to the provisions of the Senior Note Indenture, so long as the Insurer (as defined below) is not in default under the Policy, the Insurer shall be entitled to control and direct the enforcement of all rights and remedies with respect to the Series I Senior Notes upon the occurrence and continuation of an Event of Default (as defined in the Senior Note Indenture).

**Optional Redemption**

The Company shall have the right to redeem the Series I Senior Notes, in whole or in part, without premium, from time to time, on or after September 16, 2008, upon not less than 30 nor more than 60 days' notice, at a redemption price (the "Redemption Price") equal to 100% of the principal amount to be redeemed plus any accrued and unpaid interest to the date of redemption (the "Redemption Date").

If notice of redemption is given as aforesaid, the Series I Senior Notes so to be redeemed shall, on the Redemption Date, become due and payable at the Redemption Price together with any accrued interest thereon, and from and after such date (unless the Company shall default in the payment of the Redemption Price and accrued interest) such Series I Senior Notes shall cease to bear interest. If any Series I Senior Note called for redemption shall not be paid upon surrender thereof for redemption, the principal shall, until paid, bear interest from the Redemption Date at the Securities Rate. See "Description of the Senior Notes—Events of Default" in the accompanying Prospectus.

Subject to the foregoing and to applicable law (including, without limitation, United States federal securities laws), the Company or its affiliates may, at any time and from time to time, purchase outstanding Series I Senior Notes by tender, in the open market or by private agreement.

**Book-Entry Only Issuance—The Depository Trust Company**

The Depository Trust Company ("DTC") will act as the initial securities depositary for the Series I Senior Notes. The Series I Senior Notes will be issued only as fully-registered securities registered in the name of Cede & Co., DTC's nominee, or such other name as may be requested by an authorized representative of DTC. One or more fully registered global Series I Senior Notes certificates will be issued, representing in the aggregate the total principal amount of Series I Senior Notes, and will be deposited with DTC or a custodian therefor.

DTC is a limited-purpose trust company organized under the New York Banking Law, a "banking organization" within the meaning of the New York Banking Law, a member of the Federal Reserve System, a "clearing corporation" within the meaning of the New York Uniform Commercial Code and a "clearing agency" registered pursuant to the provisions of Section 17A of the Securities Exchange Act of 1934, as amended (the "1934 Act"). DTC holds and provides asset servicing for over 2 million issues of U.S. and non-U.S. equity issues, corporate and municipal debt issues and money market instruments from over 85 countries that DTC's participants ("Direct Participants") deposit with DTC. DTC also facilitates the post-trade settlement among Direct Participants of sales and other securities transactions in deposited securities, through electronic

computerized book-entry transfers and pledges between Direct Participants' accounts. This eliminates the need for physical movement of securities certificates. Direct Participants include both U.S. and non-U.S. securities brokers and dealers, banks, trust companies, clearing corporations and certain other organizations. DTC is a wholly-owned subsidiary of The Depository Trust & Clearing Corporation ("DTCC"). DTCC, in turn, is owned by a number of Direct Participants of DTC and members of the National Securities Clearing Corporation, Government Securities Clearing Corporation, MBS Clearing Corporation and Emerging Markets Clearing Corporation (NSCC, GSCC, MBSCC and EMCC, also subsidiaries of DTCC), as well as by the New York Stock Exchange, Inc. (the "NYSE"), the American Stock Exchange LLC and the National Association of Securities Dealers, Inc. Access to the DTC system is also available to others such as both U.S. and non-U.S. securities brokers and dealers, banks, trust companies and clearing corporations that clear through or maintain a custodial relationship with a Direct Participant, either directly or indirectly ("Indirect Participants" and, together with Direct Participants, "Participants"). The DTC rules applicable to its Participants are on file with the Securities and Exchange Commission (the "Commission"). More information about DTC can be found at www.dtcc.com.

Purchases of Series I Senior Notes under the DTC system must be made by or through Direct Participants, which will receive a credit for the Series I Senior Notes on DTC's records. The ownership interest of each actual purchaser of Series I Senior Notes ("Beneficial Owner") is in turn to be recorded on the Participants' records. Beneficial Owners will not receive written confirmation from DTC of their purchases, but Beneficial Owners are expected to receive written confirmations providing details of the transactions, as well as periodic statements of their holdings, from the Participants through which the Beneficial Owners purchased Series I Senior Notes. Transfers of ownership interests in the Series I Senior Notes are to be accomplished by entries made on the books of Participants acting on behalf of Beneficial Owners. Beneficial Owners will not receive certificates representing their ownership interests in Series I Senior Notes, except in the event that use of the book-entry system for the Series I Senior Notes is discontinued.

To facilitate subsequent transfers, all Series I Senior Notes deposited by Direct Participants with DTC are registered in the name of DTC's partnership nominee, Cede & Co., or such other name as may be requested by an authorized representative of DTC. The deposit of Series I Senior Notes with DTC and their registration in the name of Cede & Co. or such other DTC nominee do not effect any changes in beneficial ownership. DTC has no knowledge of the actual Beneficial Owners of the Series I Senior Notes. DTC's records reflect only the identity of the Direct Participants to whose accounts such Series I Senior Notes are credited, which may or may not be the Beneficial Owners. The Participants will remain responsible for keeping account of their holdings on behalf of their customers.

Redemption notices shall be sent to DTC. If less than all of the Series I Senior Notes are being redeemed, DTC's practice is to determine by lot the amount of the interest of each Direct Participant in such Series I Senior Notes to be redeemed.

Conveyance of notices and other communications by DTC to Direct Participants, by Direct Participants to Indirect Participants, and by Direct Participants and Indirect Participants to Beneficial Owners will be governed by arrangements among them, subject to any statutory or regulatory requirements as may be in effect from time to time.

Although voting with respect to the Series I Senior Notes is limited, in those cases where a vote is required, neither DTC nor Cede & Co. (or such other DTC nominee) will itself consent or vote with respect to Series I Senior Notes. Under its usual procedures, DTC would mail an Omnibus Proxy to the Company as soon as possible after the record date. The Omnibus Proxy assigns Cede & Co.'s (or such other DTC nominee's) consenting or voting rights to those Direct Participants to whose accounts the Series I Senior Notes are credited on the record date (identified in a listing attached to the Omnibus Proxy).

Payments on the Series I Senior Notes will be made to Cede & Co. or such other nominee as may be requested by an authorized representative of DTC. DTC's practice is to credit Direct Participants' accounts upon DTC's receipt of funds and corresponding detail information from the Company or the Senior Note Indenture

Trustee on the relevant payment date in accordance with their respective holdings shown on DTC's records unless DTC has reason to believe that it will not receive payments on such payment date. Payments by Participants to Beneficial Owners will be governed by standing instructions and customary practices, as is the case with securities held for the account of customers registered in "street name," and will be the responsibility of such Participant and not of DTC or the Company, subject to any statutory or regulatory requirements as may be in effect from time to time. Payment to Cede & Co. (or such other nominee as may be requested by an authorized representative of DTC) is the responsibility of the Company, disbursement of such payments to Direct Participants is the responsibility of DTC, and disbursement of such payments to the Beneficial Owners is the responsibility of Participants.

Except as provided herein, a Beneficial Owner of a global Series I Senior Note will not be entitled to receive physical delivery of Series I Senior Notes. Accordingly, each Beneficial Owner must rely on the procedures of DTC to exercise any rights under the Series I Senior Notes. The laws of some jurisdictions require that certain purchasers of securities take physical delivery of securities in definitive form. Such laws may impair the ability to transfer beneficial interests in a global Series I Senior Note.

DTC may discontinue providing its services as securities depositary with respect to the Series I Senior Notes at any time by giving reasonable notice to the Company. Under such circumstances, in the event that a successor securities depositary is not obtained, Series I Senior Notes certificates will be printed and delivered to the holders of record. Additionally, the Company may decide to discontinue use of the system of book-entry transfers through DTC (or a successor depositary) with respect to the Series I Senior Notes. In that event, certificates for the Series I Senior Notes will be printed and delivered to the holders of record.

The information in this section concerning DTC and DTC's book-entry system has been obtained from sources that the Company believes to be reliable, but the Company takes no responsibility for the accuracy thereof. The Company has no responsibility for the performance by DTC or its Participants of their respective obligations as described herein or under the rules and procedures governing their respective operations.

## THE POLICY AND THE INSURER

### The Policy

Concurrently with the issuance of the Series I Senior Notes, XL Capital Assurance Inc. (the "Insurer") will issue a financial guaranty insurance policy relating to the Series I Senior Notes (the "Policy"). The form of the Policy is attached to this Prospectus Supplement as Appendix A. The following summary of the terms of the Policy does not purport to be complete and is qualified in its entirety by reference to the Policy. Any capitalized terms used in this section but not defined herein have the meanings ascribed to them in the Policy.

The Policy guarantees the scheduled payment of principal of and interest on the Series I Senior Notes when due. The Policy will extend for the term of the Series I Senior Notes and, once issued, cannot be canceled by the Insurer. The Policy will insure payment only on the stated maturity date, in the case of principal, and on stated dates for payment, in the case of interest. If any Series I Senior Notes become subject to redemption and insufficient funds are available for redemption of all such outstanding Series I Senior Notes, the Insurer will remain obligated to pay principal of and interest on such outstanding Series I Senior Notes on the originally scheduled principal and interest payment dates. In the event of any acceleration of the principal of the Series I Senior Notes, the insured payments will be made at such times and in such amounts as would have been made had there not been an acceleration.

In the event the Senior Note Indenture Trustee has notice that any payment of principal of or interest on a Series I Senior Note which has become Due for Payment on any regularly scheduled principal payment date or Interest Payment Date and which is made to a holder by or on behalf of the Company has been deemed a preferential transfer and theretofore recovered from its holder pursuant to the United States Bankruptcy Code in accordance with a final, nonappealable order of a court of competent jurisdiction, such holder will be entitled to payment from the Insurer to the extent of such recovery if sufficient funds are not otherwise available

The Policy does not insure any risk other than Nonpayment. Specifically, the Policy does not cover:

a. payment on acceleration, as a result of a call for redemption or as a result of any other advancement of maturity;

b. nonpayment of principal or interest caused by the insolvency or negligence of the Senior Note Indenture Trustee; or

c. losses suffered as a result of a holder's inability to sell Series I Senior Notes.

Upon payment of the insurance benefits with respect to a Series I Senior Note, the Insurer will become the owner of such Series I Senior Note or right to payment of principal or interest on such Series I Senior Note and will be fully subrogated to the rights to payment of the surrendering holder.

**The Insurer**

*The information set forth below has been provided by the Insurer for use in this Prospectus Supplement. None of the Company, the Senior Note Indenture Trustee or any Underwriter makes any representation or warranty or assumes any responsibility with respect to the information concerning the Insurer, its parent or the Policy contained or incorporated into this Prospectus Supplement. Neither the Company nor any Underwriter has made any independent investigation of the Policy or the Insurer, and reference should be made to the information set forth below for a description of the Policy. The Policy does not constitute a part of the contract between the Company and the holders. Except for the payment of the premium for the Policy to the Insurer, the Company has no responsibility whatsoever with respect to the Policy, including the maintenance or enforcement of the Policy or collection of amounts payable under the Policy.*

*The Insurer accepts no responsibility for the accuracy or completeness of this Prospectus Supplement or any other information or disclosure contained herein, or omitted herefrom, other than with respect to the accuracy of the information regarding the Insurer and its affiliates set forth under this heading. In addition, the Insurer makes no representation regarding the Series I Senior Notes or the advisability of investing in the Series I Senior Notes.*

*General.* The Insurer is a monoline financial guaranty insurance company incorporated under the laws of the State of New York. The Insurer is currently licensed to do insurance business in, and is subject to the insurance regulation and supervision by, the State of New York, forty-seven other states, the District of Columbia, Puerto Rico, the U.S. Virgin Islands and Singapore. The Insurer has license applications pending, or intends to file an application, in each of those states in which it is not currently licensed.

The Insurer is an indirect wholly owned subsidiary of XL Capital Ltd, a Cayman Islands corporation ("XL Capital Ltd"). Through its subsidiaries, XL Capital Ltd is a leading provider of insurance and reinsurance coverages and financial products to industrial, commercial and professional service firms, insurance companies and other enterprises on a worldwide basis. The common stock of XL Capital Ltd is publicly traded in the United States and listed on the New York Stock Exchange (NYSE:XL). **XL Capital Ltd is not obligated to pay the debts of or claims against the Insurer**.

The Insurer was formerly known as The London Assurance of America Inc. ("London"), which was incorporated on July 25, 1991 under the laws of the State of New York. On February 22, 2001, XL Reinsurance America Inc. ("XL Re") acquired 100% of the stock of London. XL Re merged its former financial guaranty subsidiary, known as XL Capital Assurance Inc. (formed September 13, 1999), with and into London, with London as the surviving entity. London immediately changed its name to XL Capital Assurance Inc. All previous business of London was 100% reinsured to Royal Indemnity Company, the previous owner at the time of acquisition.

*Reinsurance.* The Insurer has entered into a facultative quota share reinsurance agreement with XL Financial Assurance Ltd ("XLFA"), an insurance company organized under the laws of Bermuda and an affiliate of the Insurer. Pursuant to this reinsurance agreement, the Insurer expects to cede up to 90% of its business to

XLFA. The Insurer may also cede reinsurance to third parties on a transaction-specific basis, which cessions may be any or a combination of quota share, first loss or excess of loss. Such reinsurance is used by the Insurer as a risk management device and to comply with statutory and rating agency requirements and does not alter or limit the Insurer's obligations under any financial guaranty insurance policy. With respect to any transaction insured by the Insurer, the percentage of risk ceded to XLFA may be less than 90% depending on certain factors including, without limitation, whether the Insurer has obtained third party reinsurance covering the risk. As a result, there can be no assurance as to the percentage reinsured by XLFA of any given financial guaranty insurance policy issued by the Insurer, including the Policy.

*Ratings.* Based on the audited financials of XLFA as of December 31, 2002, XLFA had total assets, liabilities, redeemable preferred shares and shareholders' equity of $611,791,000, $245,750,000, $39,000,000 and $327,041,000, respectively, determined in accordance with generally accepted accounting principles in the United States. XLFA's insurance financial strength is rated "Aaa" by Moody's Investors Service, Inc. ("Moody's") and "AAA" by Standard & Poor's, a division of The McGraw-Hill Companies ("Standard & Poor's"), and Fitch Ratings ("Fitch"). In addition, XLFA has obtained a financial enhancement rating of "AAA" from Standard & Poor's.

The obligations of XLFA to the Insurer under the reinsurance agreement described above are unconditionally guaranteed by XL Insurance (Bermuda) Ltd ("XLI"), a Bermuda company and one of the world's leading excess commercial insurers. XLI is a wholly owned indirect subsidiary of XL Capital Ltd. In addition to having an "A+" rating from A.M. Best, XLI's financial strength rating is "Aa2" by Moody's and "AA" by Standard & Poor's and Fitch. The ratings of XLFA and XLI are not recommendations to buy, sell or hold securities, including the Series I Senior Notes, and are subject to revision or withdrawal at any time by Moody's, Standard & Poor's or Fitch.

Notwithstanding the capital support provided to the Insurer described in this section, the holders of the Series I Senior Notes will have direct recourse against the Insurer only, and neither XLFA nor XLI will be directly liable to the holders of the Series I Senior Notes.

*Financial Strength and Financial Enhancement Ratings of the Insurer.* The Insurer's insurance financial strength is rated "Aaa" by Moody's and "AAA" by Standard & Poor's and Fitch. In addition, the Insurer has obtained a financial enhancement rating of "AAA" from Standard & Poor's. These ratings reflect Moody's, Standard & Poor's and Fitch's current assessment of the Insurer's creditworthiness and claims-paying ability as well as the reinsurance arrangement with XLFA described under "—Reinsurance" above.

The above ratings are not recommendations to buy, sell or hold securities, including the Series I Senior Notes, and are subject to revision or withdrawal at any time by Moody's, Standard & Poor's or Fitch. Any downward revision or withdrawal of these ratings may have an adverse effect on the market price of the Series I Senior Notes. The Insurer does not guaranty the market price of the Series I Senior Notes nor does it guaranty that the ratings on the Series I Senior Notes will not be revised or withdrawn.

*Capitalization of the Insurer.* Based on the audited statutory financial statements for the Insurer as of December 31, 2001, the Insurer had total admitted assets of $158,442,157, total liabilities of $48,899,961 and total capital and surplus of $109,542,696 determined in accordance with statutory accounting practices prescribed or permitted by insurance regulatory authorities ("SAP"). Based on the audited statutory financial statements for the Insurer as of December 31, 2002, the Insurer has total admitted assets of $180,993,189, total liabilities of $58,685,217 and total capital and surplus of $122,307,972 determined in accordance with SAP.

For further information concerning the Insurer and XLFA, see the financial statements of the Insurer and XLFA, and the notes thereto, incorporated by reference in this Prospectus Supplement. The financial statements of the Insurer and XLFA are included as exhibits to the periodic reports filed with the Commission by XL Capital Ltd and may be reviewed at the EDGAR website maintained by the Commission. All financial statements of the Insurer and XLFA included in, or as exhibits to, documents filed by XL Capital Ltd pursuant to Section 13(a),

13(c), 14 or 15(d) of the 1934 Act on or prior to the date of this Prospectus Supplement, or after the date of this Prospectus Supplement but prior to termination of the offering of the Series I Senior Notes, shall be deemed incorporated by reference in this Prospectus Supplement. Except for the financial statements of the Insurer and XLFA, no other information contained in XL Capital Ltd's reports filed with the Commission is incorporated by reference. Copies of the statutory quarterly and annual statements filed with the State of New York Insurance Department by the Insurer are available upon request to the State of New York Insurance Department.

*Regulation of the Insurer.* The Insurer is regulated by the Superintendent of Insurance of the State of New York. In addition, the Insurer is subject to regulation by the insurance laws and regulations of the other jurisdictions in which it is licensed. As a financial guaranty insurance company licensed in the State of New York, the Insurer is subject to Article 69 of the New York Insurance Law, which, among other things, limits the business of each insurer to financial guaranty insurance and related lines, prescribes minimum standards of solvency, including minimum capital requirements, establishes contingency, loss and unearned premium reserve requirements, requires the maintenance of minimum surplus to policyholders and limits the aggregate amount of insurance which may be written and the maximum size of any single risk exposure which may be assumed. The Insurer is also required to file detailed annual financial statements with the New York Insurance Department and similar supervisory agencies in each of the other jurisdictions in which it is licensed.

The extent of state insurance regulation and supervision varies by jurisdiction, but New York and most other jurisdictions have laws and regulations prescribing permitted investments and governing the payment of dividends, transactions with affiliates, mergers, consolidations, acquisitions or sales of assets and incurrence of liabilities for borrowings.

**THE FINANCIAL GUARANTY INSURANCE POLICIES ISSUED BY THE INSURER, INCLUDING THE POLICY, ARE NOT COVERED BY THE FLORIDA INSURANCE GUARANTY ASSOCIATION ACT SPECIFIED IN PART II OF CHAPTER 631 OF THE FLORIDA INSURANCE LAW OR THE PROPERTY/CASUALTY INSURANCE SECURITY FUND SPECIFIED IN ARTICLE 76 OF THE NEW YORK INSURANCE LAW.**

The principal executive offices of the Insurer are located at 1221 Avenue of the Americas, 31st Floor, New York, New York 10020-1001 and its telephone number at this address is (212) 478-3400.

## RATINGS

It is anticipated that Standard & Poor's and Moody's will assign the Series I Senior Notes the ratings of "AAA" and "Aaa", respectively, conditioned upon the issuance and delivery by the Insurer at the time of delivery of the Series I Senior Notes of the Policy, insuring the timely payment of the principal of and interest on the Series I Senior Notes. Such ratings reflect only the views of such ratings agencies, and an explanation of the significance of such ratings may be obtained only from such rating agencies at the following addresses: Moody's Investors Service, Inc., 99 Church Street, New York, New York 10007; and Standard & Poor's, 25 Broadway, New York, New York 10004. There is no assurance that such ratings will remain in effect for any period of time or that they will not be revised downward or withdrawn entirely by said rating agencies if, in their judgment, circumstances warrant. Neither the Company nor any Underwriter has undertaken any responsibility to oppose any proposed downward revision or withdrawal of a rating on the Series I Senior Notes. Any such downward revision or withdrawal of such ratings may have an adverse effect on the market price of the Series I Senior Notes.

At present, each of such rating agencies maintains four categories of investment grade ratings. They are for Standard & Poor's—AAA, AA, A and BBB and for Moody's—Aaa, Aa, A and Baa. Standard & Poor's defines "AAA" as the highest rating assigned to a debt obligation. Moody's defines "Aaa" as representing the best quality debt obligation carrying the smallest degree of investment risk.

## UNDERWRITING

Subject to the terms and conditions set forth in the Underwriting Agreement dated the date hereof, the Company has agreed to sell to each of the Underwriters named below (for whom Morgan Stanley & Co. Incorporated is acting as Representative) and each of the Underwriters severally has agreed to purchase the principal amount of the Series I Senior Notes set forth opposite its name below:

| Name | Principal Amount of Series I Senior Notes |
|---|---|
| Morgan Stanley & Co. Incorporated | $30,000,000 |
| SunTrust Capital Markets, Inc. | $10,000,000 |
| Total | $40,000,000 |

The Underwriting Agreement provides that the obligations of the several Underwriters to pay for and accept delivery of the Series I Senior Notes are subject to, among other things, the approval of certain legal matters by their counsel and certain other conditions. The Underwriters are obligated to take and pay for all the Series I Senior Notes if any are taken.

Series I Senior Notes sold by the Underwriters to the public will initially be offered at the initial public offering price set forth on the cover of this Prospectus Supplement. The Underwriters may offer the Series I Senior Notes to certain securities dealers at such price less a concession not in excess of $.50 per Series I Senior Note. The Underwriters may allow, and such dealers may reallow, a concession not in excess of $.45 per Series I Senior Note to certain brokers and dealers. If all the Series I Senior Notes are not sold at the initial offering price, the Underwriters may change the offering price and the other selling terms.

Prior to this offering, there has been no public market for the Series I Senior Notes. The Series I Senior Notes are expected to be approved for listing on the NYSE, subject to official notice of issuance. In order to meet the requirements for listing the Series I Senior Notes, the Underwriters will undertake to sell the Series I Senior Notes to a minimum of 400 beneficial holders. Trading of the Series I Senior Notes on the NYSE is expected to commence within a 30-day period after the initial delivery of the Series I Senior Notes. The Representative has advised the Company that the Underwriters intend to make a market in the Series I Senior Notes prior to the commencement of trading on the NYSE. The Underwriters will have no obligation to make a market in the Series I Senior Notes, however, and may cease market making activities, if commenced, at any time.

The Company has agreed, during the period of 15 days from the date of the Underwriting Agreement, not to sell, offer to sell, grant any option for the sale of or otherwise dispose of any Series I Senior Notes, any security convertible into, exchangeable into or exercisable for Series I Senior Notes or any debt securities substantially similar to the Series I Senior Notes (except for the Series I Senior Notes issued pursuant to the Underwriting Agreement), without the prior written consent of the Representative. This agreement does not apply to issuances of commercial paper or other debt securities with scheduled maturities of less than one year.

The Company estimates that it will incur offering expenses of approximately $1,025,000, which includes the premium for the Policy.

In connection with this offering and in compliance with applicable law and industry practice, the Underwriters may overallot or effect transactions which stabilize, maintain or otherwise affect the market price of the Series I Senior Notes at levels above those which might otherwise prevail in the open market, including by entering stabilizing bids, purchasing Series I Senior Notes to cover syndicate short positions and imposing penalty bids. A stabilizing bid means the placing of any bid, or the effecting of any purchase, for the purpose of pegging, fixing or maintaining the price of a security. Covering a syndicate short position means placing a bid or effecting a purchase of a security on behalf of the underwriting syndicate to reduce a short position created in connection with the offering. Imposing a penalty bid means purchasing a security in the open market to reduce

the underwriting syndicate's short position or to stabilize the price of the security and in connection therewith reclaiming the amount of the selling concession from the underwriters and selling group members who sold such securities as part of the offering.

In general, purchases of a security for the purpose of stabilization or to reduce a short position could cause the price of the security to be higher than it might be in the absence of such purchases. The imposition of a penalty bid might also have an effect on the price of a security to the extent that it were to discourage resales of the security.

Neither the Company nor any of the Underwriters makes any representation or prediction as the direction or magnitude of any effect that the transactions described above may have on the price of the Series I Senior Notes. In addition, neither the Company nor any of the Underwriters makes any representation that such transactions will be engaged in or that such transactions, once commenced, will not be discontinued without notice.

It is expected that the delivery of the Series I Senior Notes will be made on the date specified on the cover page of this Prospectus Supplement which will be the seventh Business Day following the date of this Prospectus Supplement. Under Rule 15c6-1 of the Commission under the 1934 Act, trades in the secondary market generally are required to settle in three Business Days, unless the parties to any such trade expressly agree otherwise. Accordingly, the purchasers who wish to trade the Series I Senior Notes on the date of this Prospectus Supplement or the next three succeeding Business Days will be required to specify an alternative settlement cycle at the time of any such trade to prevent failed settlement and should consult their own advisor.

The Company has agreed to indemnify the Underwriters against certain liabilities, including liabilities under the Securities Act of 1933, as amended.

The Underwriters and their affiliates engage in transactions with and, from time to time, have performed services for, the Company and its affiliates in the ordinary course of business.

## EXPERTS

The consolidated balance sheets of the Insurer as of December 31, 2002 and December 31, 2001 and the related consolidated statements of operations and comprehensive income, changes in shareholder's equity and cash flows for each of the three years in the period ended December 31, 2002, incorporated by reference in this Prospectus Supplement, have been incorporated in this Prospectus Supplement in reliance on the report of PricewaterhouseCoopers LLP, independent accountants, given on the authority of that firm as experts in accounting and auditing.

The balance sheets of XLFA as of December 31, 2002 and December 31, 2001 and the related statements of operations and comprehensive income, changes in shareholder's equity and cash flows for each of the three years in the period ended December 31, 2002, incorporated by reference in this Prospectus Supplement, have been incorporated in this Prospectus Supplement in reliance on the report of PricewaterhouseCoopers, independent accountants, given on the authority of that firm as experts in accounting and auditing.

## FINANCIAL GUARANTY INSURANCE POLICY

**OBLIGOR:** **Policy No:**

**INSURED OBLIGATIONS:** **Effective Date:**

**XL Capital Assurance Inc. (XLCA),** a New York stock insurance company, in consideration of the payment of the premium, hereby unconditionally and irrevocably guarantees to the Trustee for the benefit of the Owners of the Insured Obligations, the full and complete payment by the Obligor of Scheduled Payments in respect of the Insured Obligations, subject only to the terms of this Policy (which includes the Endorsement attached hereto).

XLCA will pay the Insured Amount to the Trustee upon the presentation of a Payment Notice to XLCA (which Payment Notice shall include an irrevocable assignment to XLCA of all rights and claims in respect of the relevant Insured Obligation, as specified in the Payment Notice), on the later of (a) one (1) Business Day following receipt by XLCA of a Payment Notice or (b) the Business Day on which Scheduled Payments are due for payment. XLCA shall be subrogated to the Owners' rights to payment on the Insured Obligations to the extent of any payment by XLCA hereunder. The obligations of XLCA with respect to a Scheduled Payment will be discharged to the extent funds to pay such Scheduled Payment are deposited in the account specified in the Payment Notice, whether such funds are properly applied by the Trustee or claimed by an Owner.

In addition, in the event that any Scheduled Payment which has become due for payment and which is made to an Owner by or on behalf of the Trustee is recovered or is recoverable from the Owner pursuant to a final order of a court of competent jurisdiction in an Insolvency Proceeding that such payment constitutes an avoidable preference to such Owner within the meaning of any applicable bankruptcy law, XLCA unconditionally and irrevocably guarantees payment of the amount of such recovery (in accordance with the Endorsement attached hereto).

This Policy sets forth in full the undertaking of XLCA and shall not be cancelled or revoked by XLCA for any reason, including failure to receive payment of any premium due hereunder or under the Insurance Agreement, and may not be further endorsed or modified without the written consent of XLCA. The premium on this Policy is not refundable for any reason. This Policy does not insure against loss of any prepayment or other acceleration payment which at any time may become due in respect of any Insured Obligation, other than at the sole option of XLCA, nor against any risk other than Nonpayment and Avoided Payment, including any shortfalls, if any, attributable to the liability of the Obligor for taxes or withholding taxes if any, including interest and penalties in respect of such liability

THIS POLICY IS NOT COVERED BY THE FLORIDA INSURANCE GUARANTY ASSOCIATION ACT SPECIFIED IN PART II OF CHAPTER 631 OF THE FLORIDA INSURANCE LAW OR THE PROPERTY/CASUALTY INSURANCE SECURITY FUND SPECIFIED IN ARTICLE 76 OF THE NEW YORK INSURANCE LAW.

Any capitalized terms not defined herein shall have the meaning given such terms in the Endorsement attached hereto and forming a part hereof, or in the Insurance Agreement referenced therein. In witness whereof, XLCA has caused this Policy to be executed as of the Effective Date.

**Financial Guaranty Insurance Policy No.**

Obligor:

Insured Obligations:

Beneficiary:

*Capitalized terms used herein and not otherwise defined herein or in the Policy shall have the meanings assigned to them in the Insurance Agreement as defined below.*

As used herein the term "Business Day" means any day other than Saturday or Sunday on which commercial banking institutions in New York, New York are generally open for banking business.

As used herein the term "Insolvency Proceeding" means the commencement, after the date hereof, of any bankruptcy, insolvency, readjustment of debt, reorganization, marshalling of assets and liabilities or similar proceedings by or against any Person, the commencement, after the date hereof, of any proceedings by or against any Person for the winding up or liquidation of its affairs, or the consent, after the date hereof, to the appointment of a trustee, conservator, receiver or liquidator in any bankruptcy, insolvency, readjustment of debt, reorganization, marshalling of assets and liabilities or similar proceedings of or relating to any Person.

As used herein the term "Indenture" means the _____ Indenture dated as of _____ between the Obligor and _____, as Trustee (the "Trustee"), as amended and supplemented, including by the _____ Supplemental Indenture dated as of _____.

As used herein the term "Insurance Agreement" means the Insurance Agreement dated as of _____ by and among XLCA, _____ and the Trustee, as may be amended or modified from time to time.

As used herein the term "Insured Amount" means that portion of the Scheduled Payments that shall become due for payment but shall be unpaid by reason of Nonpayment.

As used herein the term "Nonpayment" means, with respect to any Payment Date, the failure of the Trustee to receive in full, in accordance with the terms of the Indenture, that Scheduled Payment that is due for payment with respect to such date.

SPECIMEN

As used herein the term "Owner" means the registered owner of any Insured Obligation as indicated in the registration books maintained by or on behalf of the Obligor for such purpose or, if the Insured Obligation is in bearer form, the holder of the Insured Obligation.

As used herein, the term "Payment Date" means, in the case of scheduled interest on the Insured Obligations, each _____, _____, _____ and _____ of each year during the Term of this Policy, beginning _____, and, in the case of scheduled principal of the Insured Obligations, _____.

As used herein, the term "Person" means an individual, a partnership, a limited liability company, a joint venture, a corporation, a trust, an unincorporated organization, and a government or any department or agency thereof.

As used herein the term "Scheduled Payment" means, with respect to any Payment Date during the Term of this Policy, the scheduled payments of interest and principal, in accordance with the original terms of the Insured Obligations and the Indenture when issued and without regard to any subsequent amendment or modification of the Insured Obligations or the Indenture that has not been consented to in writing by XLCA. Notwithstanding the foregoing, "Scheduled Payments" shall in no event include payments which become due on an accelerated basis as a result of (a) any default by the Obligor, (b) the occurrence of an Event of Default under the Indenture, (c) mandatory or optional redemption, in whole or in part or (d) any other cause, unless XLCA elects, in its sole discretion, to pay such amounts in whole or in part (in which event Scheduled Payments shall include such accelerated payments as, when, and to the extent so elected by XLCA). In the event that it does not make such election, Scheduled Payments shall include payments due in accordance with the original scheduled terms without regard to any acceleration. In addition, "Scheduled Payment" shall not include, nor shall coverage be provided under the Policy in respect of, (i) any make whole, redemption or call premium payable in respect of the Insured Obligations, (ii) any amounts due in respect of the Insured Obligations attributable to any increase in interest rate, penalty or other sum payable by the Issuer by reason of any default or event of default in respect of the Insured Obligations, or by reason of any deterioration of the creditworthiness of the Issuer or (iii) any taxes, withholding or other charge imposed by any governmental authority due in connection with the payment of any Scheduled Payment to any holder of an Insured Obligation.

As used herein the term "Term of this Policy" means the period from and including the Effective Date to and including the first date on which (i) all Scheduled Payments have been paid that are required to be paid by the Obligor under the Indenture; (ii) the 91-day period during which any Scheduled Payment could have been avoided in whole or in part as a preference payment under applicable bankruptcy, insolvency, receivership or similar law has expired, and (iii) if any proceedings requisite to avoidance as a preference payment have been commenced prior to the occurrence of (i) and (ii) above, a final and nonappealable order in resolution of each such proceeding has been entered; *provided, however*, that if the Owners are required to return any Avoided

SPECIMEN

Payment (as defined below) as a result of such insolvency proceeding, then the Term of the Policy shall terminate on the date on which XLCA has made all payments required to be made under the terms of this Policy in respect of all such Avoided Payments.

To make a claim under the Policy, the Trustee shall deliver to XLCA Payment Notice in the form of Exhibit A hereto (a "Payment Notice"), appropriately completed and executed by the Trustee. A Payment Notice under this Policy may be presented to XLCA by (i) delivery of the original Payment Notice to XLCA at its address set forth below, or (ii) facsimile transmission of the original Payment Notice to XLCA at its facsimile number set forth below. If presentation is made by facsimile transmission, the Trustee shall (x) simultaneously confirm transmission by telephone to XLCA at its telephone number set forth below, and (y) as soon as reasonably practicable, deliver the original Payment Notice to XLCA at its address set forth below. Any Payment Notice received by XLCA after 10:00 a.m , New York City time, on a Business Day, or on any day that is not a Business Day, will be deemed to be received by XLCA at 9:00 a.m., New York City time, on the next succeeding Business Day. XLCA shall make payments due in respect of Insured Amounts no later than 2:00 p.m New York City time to the Trustee upon the presentation of a Payment Notice to XLCA on the later of (a) one (1) Business Day following receipt by XLCA of a Payment Notice or (b) the Business Day on which Scheduled Payments are due for payment.

Subject to the foregoing, if the payment of any amount with respect to the Scheduled Payment is voided (a "Preference Event") as a result of an Insolvency Proceeding and as a result of such Preference Event, the Owner is required to return such voided payment, or any portion of such voided payment, made in respect of the Insured Obligation (an "Avoided Payment"), XLCA will pay an amount equal to such Avoided Payment, as and when such payment would otherwise be due pursuant to the Insured Obligation and the Indenture without regard to acceleration or prepayment, and upon payment of such Avoided Payment and receipt by XLCA from the Trustee on behalf of such Owner of (x) a certified copy of a final order of a court exercising jurisdiction in such Insolvency Proceeding to the effect that the Owner or the Trustee on behalf of the Owner is required to return any such payment or portion thereof because such payment was voided under applicable law, with respect to which order the appeal period has expired without an appeal having been filed (the "Final Order"), (y) an assignment, substantially in the form attached hereto as Exhibit B, properly completed and executed by such Owner irrevocably assigning to XLCA all rights and claims of such Owner relating to or arising under such Avoided Payment, and (z) a Payment Notice in the form of Exhibit A hereto appropriately completed and executed by the Trustee.

XLCA shall make payments due in respect of Avoided Payments no later than 2:00 p.m. New York City time on the Business Day following XLCA's receipt of the documents required under clauses (x) through (z) of the preceding paragraph. Any such documents received by XLCA after 10:00 a.m. New York City time on any Business Day or on any day that is not a Business Day shall be deemed to have been received by XLCA at 9:00 a.m., New York City time, on the next succeeding Business Day. All payments made by XLCA hereunder on account of any Avoided Payment shall be disbursed to the receiver, conservator, debtor-in-possession or trustee in bankruptcy named in the Final

SPECIMEN

Order and not to any Owner directly (unless an Owner previously paid such amount to the receiver, conservator, debtor-in-possession or trustee in bankruptcy named in the Final Order, in which case such payment shall be disbursed to the Trustee for distribution to such Owner upon proof of such payment reasonably satisfactory to XLCA).

XLCA hereby waives and agrees not to assert any and all rights to require the Trustee to make demand on or to proceed against any person, party or security prior to the Trustee demanding payment under this Policy.

No defenses, set-offs and counterclaims of any kind available to XLCA so as to deny payment of any amount due in respect of this Policy will be valid and XLCA hereby waives and agrees not to assert any and all such defenses (including, without limitation, defense of fraud in the inducement or fact, or any other circumstances which would have the effect of discharging a surety in law or in equity), set-offs and counterclaims, including, without limitation, any such rights acquired by subrogation, assignment or otherwise. Upon any payment hereunder, in furtherance and not in limitation of XLCA's equitable right of subrogation and XLCA's rights under the Insurance Agreement, XLCA will be subrogated to the rights of the Owner in respect of which such payment was made to receive any and all amounts due in respect of the obligations in respect of which XLCA has made a payment hereunder. Any rights of subrogation acquired by XLCA as a result of any payment made under this Policy shall, in all respects, be subordinate and junior in right of payment to the prior indefeasible payment in full of any amounts due the Owner on account of payments due under the Insured Obligation.

This Policy is neither transferable nor assignable, in whole or in part, except to a successor trustee duly appointed and qualified under the Indenture. All Payment Notices and other notices, presentations, transmissions, deliveries and communications made by the Trustee to XLCA with respect to this Policy shall specifically refer to the number of this Policy and shall be made to XLCA at:

XL Capital Assurance Inc.
1221 Avenue of the Americas
New York, New York 10020
Attention: Surveillance
Telephone: (212) 478-3400
Facsimile: (212) 478- 3597

or such other address, telephone number or facsimile number as XLCA may designate to the Trustee in writing from time to time. Each such Payment Notice and other notice, presentation, transmission, delivery and communication shall be effective only upon actual receipt by XLCA.

The obligations of XLCA under this Policy are irrevocable, primary, absolute and unconditional, subject to satisfaction of the conditions for making a claim under the Policy, and neither the failure of any Person to perform any covenant or obligation in favor of XLCA (or otherwise), nor the failure or omission to make a

SPECIMEN

demand permitted hereunder, nor the failure of any assignment or grant of any security interest, nor the commencement of any Insolvency Proceeding shall in any way affect or limit XLCA's obligations under this Policy. If a successful action or proceeding to enforce this Policy is brought by the Trustee, the Trustee shall be entitled to recover from XLCA costs and expenses reasonably incurred, including, without limitation, reasonable fees and expenses of counsel.

This Policy and the obligations of XLCA hereunder shall terminate on the expiration of the Term of this Policy. This Policy shall be returned to XLCA by the Trustee upon the expiration of the Term of this Policy.

The Property/Casualty Insurance Security Fund specified in Article 76 of the New York Insurance Law does not cover this Policy. The Florida Insurance Guaranty Association created under Part II of Chapter 631 of the Florida Insurance Code does not cover this Policy. In the event that XLCA were to become insolvent, the California Insurance Guaranty Association, established pursuant to Article 14.2 of Chapter 1 of Part 2 of Division 1 of the California Insurance Code excludes from coverage any claims arising under this Policy.

**THIS POLICY SHALL BE CONSTRUED, AND THE OBLIGATIONS, RIGHTS AND REMEDIES OF THE PARTIES HEREUNDER SHALL BE DETERMINED, IN ACCORDANCE WITH THE LAWS OF THE STATE OF NEW YORK, WITHOUT REGARD TO CONFLICT OF LAWS PRINCIPLES THAT WOULD REQUIRE THE APPLICATION OF THE LAWS OF ANY OTHER JURISDICTION.**

In the event any term or provision of the form of this Policy is inconsistent with the provision of this Endorsement, the provision of this Endorsement shall take precedence and be binding.

[Remainder of Page Intentionally Left Blank]

**Exhibit A to Financial Guaranty Policy No.**

XL Capital Assurance Inc.
1221 Avenue of the Americas
New York, New York 10020
Attention: Surveillance

**PAYMENT NOTICE**
**UNDER FINANCIAL GUARANTY POLICY No.**

_____, as Trustee (the "Trustee"), hereby certifies to XL Capital Assurance Inc. ("XLCA") with reference to that certain Financial Guaranty Policy, No. _____, dated _____ (the "Policy"), issued by XLCA in favor of the Trustee under the _____ Indenture dated as of _____ between _____ and the Trustee, as amended and supplemented, including by the _____ Supplemental Indenture dated as of _____ (the "Indenture"), as follows:

1. The Trustee is the trustee under the Indenture and the beneficiary on behalf of each Owner of the Policy.

2. The Trustee is entitled to make a demand under the Policy pursuant to the Indenture.

3. This notice relates to the [insert date] Payment Date. The amount demanded is to be paid in immediately available funds to the [Specify Account] at [Identify Financial Institution Holding Account] account number[_____].

[For a Payment Notice in respect of Insured Amounts other than Avoided Payment, use paragraph 4.]

4. The Trustee demands payment of $_____ which is an amount equal to the amount by which the Scheduled Payment due on the above Payment Date exceeds the funds made available to the Trustee to pay such Scheduled Payment.

[For a Payment Notice in respect of an Avoided Payment use the following paragraphs [4] or [5].]

[4.] or [5.] The Trustee hereby represents and warrants, based upon information available to it, that (i) the amount entitled to be drawn under the Policy on the date hereof in respect of Avoided Payments is the amount paid or to be paid simultaneously with such draw on the Policy by the Owner on account of a Preference Event [$_____] (the "Avoided Payment Amount"), (ii) the Owner with respect to which the drawing is being made under the Policy has paid or simultaneously with such draw on the Policy will pay such Avoided Payment Amount, and (iii) the documents required by the Policy to be delivered in connection with such Avoided Payment and Avoided Payment Amount have previously been presented to XLCA or are attached hereto.

SPECIMEN

[6] The Trustee agrees that, following payment of funds by XLCA, it shall use reasonable efforts to procure (a) that such amounts are applied directly to the payment of any Insured Amount which is due for payment; (b) that such funds are not applied for any other purpose; and (c) the maintenance of accurate records of such payments in respect of the Insured Obligation and the corresponding claim on the Policy and the proceeds thereof.

[7] The Trustee, on behalf of itself and the Owners, hereby assigns to XLCA all rights and claims (including rights of actions and claims in respect of securities laws violations or otherwise) of the Trustee and the Owners with respect to the Insured Obligation to the extent of any payments under the Policy. The foregoing assignment is in addition to, and not in limitation of, rights of subrogation otherwise available to XLCA in respect of such payments. The Trustee shall take such action and deliver such instruments as may be reasonably required by XLCA to effectuate the purposes of this paragraph [7].

[8] The Trustee, on behalf of itself and the Owners, hereby appoints XLCA as agent and attorney-in-fact for the Trustee and the Owners in any legal proceeding in respect of the Insured Obligation. The Trustee, on behalf of itself and the Owners, thereby (and without limiting the generality of the preceding sentence) agrees that XLCA may, at any time during the continuation of any proceeding by or against any debtor with respect to which a Preference Claim (as defined below) or other claim with respect to the Insured Obligation is asserted under any Insolvency Proceeding, direct all matters relating to such Insolvency Proceeding, including, without limitation, (a) all matters relating to any claim in connection with a Insolvency Proceeding seeking the avoidance as a preferential transfer of any payment made with respect to the obligations (a "Preference Claim"), (b) the direction of any appeal of any order relating to any Preference Claim and (c) the posting of any surety, supersedeas or performance bond pending any such appeal. In addition, the Trustee, on behalf of itself and the Owners, hereby agrees that XLCA shall be subrogated to, and the Trustee, on behalf of itself and the Owners, hereby delegates and assigns, to the fullest extent permitted by law, the rights of the Trustee and the Owners in the conduct of any Insolvency Proceeding, including, without limitation, all rights of any party to an adversary proceeding or action with respect to any court order issued in connection with any such Insolvency Proceeding.

---

We will provide the specific terms of these securities in supplements to this Prospectus. You should read this Prospectus and the applicable prospectus supplement carefully before you invest.

See "Risk Factors" on page 2 for information on certain risks related to the purchase of securities offered by this Prospectus.

**Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this Prospectus is truthful or complete. Any representation to the contrary is a criminal offense.**

**April 25, 2003**

## ABOUT THIS PROSPECTUS

This Prospectus is part of a registration statement filed with the Securities and Exchange Commission (the "Commission") using a "shelf" registration process under the Securities Act of 1933, as amended (the "1933 Act"). Under the shelf process, Gulf Power Company (the "Company") may sell, in one or more transactions,

- senior notes (the "Senior Notes")
- junior subordinated notes (the "Junior Subordinated Notes")

and Gulf Power Capital Trust V and Gulf Power Capital Trust VI (individually, a "Trust" and collectively, the "Trusts") may sell

- trust preferred securities or capital securities (the "Preferred Securities")

in one or more offerings up to a total dollar amount of $360,000,000. This Prospectus provides a general description of those securities. Each time the Company sells securities, the Company will provide a prospectus supplement that will contain specific information about the terms of that offering ("Prospectus Supplement"). The Prospectus Supplement may also add, update or change information contained in this Prospectus. You should read this Prospectus and the applicable Prospectus Supplement together with additional information under the heading "Available Information."

## RISK FACTORS

Investing in the Company's securities involves risk. Please see the risk factors described in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2002, which is incorporated by reference in this Prospectus. Before making an investment decision, you should carefully consider these risks as well as other information contained or incorporated by reference in this Prospectus. The risks and uncertainties described are not the only ones facing the Company. Additional risks and uncertainties not presently known to the Company or that the Company currently deems immaterial may also impair its business operations, its financial results and the value of its securities.

## AVAILABLE INFORMATION

The Company and the Trusts have filed with the Commission a combined registration statement on Form S-3 (the "Registration Statement," which term encompasses any amendments of the Registration Statement and exhibits to the Registration Statement) under the 1933 Act. As permitted by the rules and regulations of the Commission, this Prospectus does not contain all of the information set forth in the Registration Statement and the exhibits and schedules thereto, to which reference is made.

The Company is subject to the informational requirements of the Securities Exchange Act of 1934, as amended (the "1934 Act"), and in accordance with the 1934 Act files reports and other information with the Commission. Such reports and other information can be inspected and copied at the public reference facilities of the Commission at 450 Fifth Street, N.W., Washington, D.C. 20549. Information on the operation of the Public Reference Room may be obtained by calling the Commission at 1-800-SEC-0330. The Commission maintains a Web site that contains reports, proxy and information statements and other information regarding registrants including the Company that file electronically at http://www.sec.gov. In addition, reports and other material concerning the Company can be inspected at the offices of the New York Stock Exchange, 20 Broad Street, New York, New York 10005.

No separate financial statements of any Trust are included in this Prospectus. The Company considers that such statements would not be material to holders of the Preferred Securities because each Trust has no

independent operations and exists for the sole purpose of investing the proceeds of the sale of its Trust Securities (as defined below) in Junior Subordinated Notes.

## INCORPORATION OF CERTAIN DOCUMENTS BY REFERENCE

The following documents have been filed with the Commission pursuant to the 1934 Act and are incorporated by reference in this Prospectus and made a part of this Prospectus:

(a) the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2002; and

(b) the Company's Current Report on Form 8-K dated March 21, 2003.

All documents filed by the Company with the Commission pursuant to Section 13(a), 13(c), 14 or 15(d) of the 1934 Act subsequent to the date of this Prospectus and prior to the termination of this offering shall be deemed to be incorporated by reference in this Prospectus and made a part of this Prospectus from the date of filing of such documents. Any statement contained in a document incorporated or deemed to be incorporated by reference in this Prospectus shall be deemed to be modified or superseded for purposes of this Prospectus to the extent that a statement contained in this Prospectus or in any other subsequently filed document which also is or is deemed to be incorporated by reference in this Prospectus modifies or supersedes such statement. Any statement so modified or superseded shall not be deemed, except as so modified or superseded, to constitute a part of this Prospectus.

**The Company will provide without charge to each person to whom this Prospectus is delivered, on the written or oral request of any such person, a copy of any or all documents incorporated herein by reference in this Prospectus (other than the exhibits to such documents unless such exhibits are specifically incorporated by reference in this Prospectus). Such requests should be directed to Warren E. Tate, Vice President, Secretary and Treasurer, Gulf Power Company, One Energy Place, Pensacola, Florida 32520, telephone: (850) 444-6111.**

## GULF POWER COMPANY

The Company is a corporation organized under the laws of the State of Maine on November 2, 1925, and was admitted to do business in Florida on January 15, 1926, in Mississippi on October 25, 1976 and in Georgia on November 20, 1984. The principal executive offices of the Company are located at 500 Bayfront Parkway, Pensacola, Florida 32501, and the telephone number is (850) 444-6111.

The Company is a wholly owned subsidiary of The Southern Company ("Southern"), a holding company registered under the Public Utility Holding Company Act of 1935, as amended. The Company is engaged, within the northwestern portion of the State of Florida, in the generation and purchase of electricity and the distribution and sale of such electricity at retail in 71 communities as well as in rural areas, and at wholesale to a nonaffiliated utility and to a municipality.

## SELECTED INFORMATION

*The following material, which is presented in this Prospectus solely to furnish limited introductory information regarding the Company, has been selected from, or is based upon, the detailed information and financial statements appearing in the documents incorporated in this Prospectus by reference or elsewhere in this Prospectus, is qualified in its entirety by reference to those documents and, therefore, should be read together with those documents.*

### Gulf Power Company

| | |
|---|---|
| Business | Generation, transmission, distribution and sale of electric energy |
| Service Area | Approximately 7,400 square miles within the northwestern portion of the State of Florida |
| Customers at December 31, 2002 | 383,923 |
| Generating Capacity at December 31, 2002 (kilowatts) | 2,808,550 |
| Sources of Generation during 2002 (kilowatt-hours) | Coal (82%), Gas (18%) |

### Certain Ratios

The following table sets forth the Ratios of Earnings to Fixed Charges and Earnings to Fixed Charges Plus Preferred Dividend Requirements (Pre-Income Tax Basis) for the periods indicated.

| | Year Ended December 31, | | | | |
|---|---|---|---|---|---|
| | 1998 | 1999 | 2000 | 2001 | 2002 |
| Ratio of Earnings to Fixed Charges(1) | 3.83 | 3.62 | 3.38 | 3.64 | 3.52 |
| Ratio of Earnings to Fixed Charges Plus Preferred Dividend Requirements (Pre-Income Tax Basis)(2) | 3.72 | 3.58 | 3.34 | 3.60 | 3.50 |

(1) This ratio is computed as follows: (i) "Earnings" have been calculated by adding to "Earnings Before Income Taxes" "Interest Expense, Net of Amounts Capitalized," "Distributions on Preferred Securities of Subsidiary" and the debt portion of allowance for funds used during construction, and (ii) "Fixed Charges" consist of "Interest Expense, Net of Amounts Capitalized," "Distributions on Preferred Securities of Subsidiary" and the debt portion of allowance for funds used during construction.

(2) In computing this ratio, "Preferred Dividend Requirements" represent the before tax earnings necessary to pay such dividends, computed at the effective tax rates for the applicable periods.

## THE TRUSTS

Each Trust is a statutory trust created under Delaware law pursuant to the filing of a certificate of trust with the Delaware Secretary of State on April 7, 2003. Each Trust's business is defined in a trust agreement, executed by the Company, as Depositor, and the Delaware Trustee of each Trust. This trust agreement of each Trust will be amended and restated in its entirety substantially in the form filed as an exhibit to the Registration Statement of which this Prospectus forms a part (the "Trust Agreement"). Each Trust Agreement will be qualified as an indenture under the Trust Indenture Act of 1939, as amended (the "1939 Act"). The Company will own all of the common securities (the "Common Securities" and, together with the Preferred Securities, the "Trust Securities") of each Trust. The Trust Securities represent undivided beneficial interests in the assets of the respective Trusts. Each Trust exists for the exclusive purposes of (i) issuing its Trust Securities representing undivided beneficial interests in the assets of such Trust, (ii) investing the gross proceeds of its Trust Securities in a related series of Junior Subordinated Notes, and (iii) engaging in only those other activities necessary, appropriate, convenient or incidental to these purposes. The payment of periodic cash distributions on the Preferred Securities of each Trust and payments on liquidation and redemption with respect to the Preferred Securities of each Trust, in each case to the extent each Trust has funds legally and immediately available for these purposes, will be guaranteed by the Company (individually, a "Guarantee" and collectively, the "Guarantees") to the extent set forth under "Description of the Guarantees."

Each Trust's business and affairs will be conducted by its trustees, which shall be appointed by the Company as the holder of the Common Securities: two officers of the Company as Administrative Trustees; JPMorgan Chase Bank as Property Trustee; and Chase Manhattan Bank USA, National Association as Delaware Trustee (collectively, the "Securities Trustees"). The Property Trustee of each Trust will act as the indenture trustee with respect to such Trust for purposes of compliance with the provisions of the 1939 Act.

The principal place of business of each Trust shall be c/o the Company, 500 Bayfront Parkway, Pensacola, Florida 32501, telephone (850) 444-6111, Attn: Treasurer.

Reference is made to the Prospectus Supplement relating to the Preferred Securities of a Trust for further information concerning such Trust.

## ACCOUNTING TREATMENT OF TRUSTS

For financial reporting purposes, the Trusts will be treated as subsidiaries of the Company and, accordingly, the accounts of the Trusts will be included in the consolidated financial statements of the Company. The Preferred Securities will be presented as a separate line item in the consolidated balance sheet of the Company, and appropriate disclosures concerning the Preferred Securities, the Guarantees and the Junior Subordinated Notes will be included in the notes to the consolidated financial statements. For financial reporting purposes, the Company will record distributions payable on the Preferred Securities as an expense.

## USE OF PROCEEDS

Each Trust will invest the proceeds received from the sale of its Preferred Securities in Junior Subordinated Notes. Except as may be otherwise described in an applicable Prospectus Supplement, the net proceeds received by the Company from such investment and any proceeds received from the sale of its Senior Notes or other sales of its Junior Subordinated Notes will be used in connection with its ongoing construction program, to pay scheduled maturities and/or refundings of its securities, to repay short-term indebtedness to the extent outstanding and for other general corporate purposes.

## DESCRIPTION OF THE SENIOR NOTES

Set forth below is a description of the general terms of the Senior Notes. The following description does not purport to be complete and is subject to, and is qualified in its entirety by reference to, the Senior Note Indenture, dated as of January 1, 1998, between the Company and JPMorgan Chase Bank (formerly known as The Chase Manhattan Bank), as trustee (the "Senior Note Indenture Trustee"), as to be supplemented by a supplemental indenture to the Senior Note Indenture establishing the Senior Notes of each series (the Senior Note Indenture, as so supplemented, is referred to as the "Senior Note Indenture"), the forms of which are filed as exhibits to the Registration Statement of which this Prospectus forms a part. The terms of the Senior Notes will include those stated in the Senior Note Indenture and those made a part of the Senior Note Indenture by reference to the 1939 Act. Certain capitalized terms used in this Prospectus and not defined in this Prospectus are defined in the Senior Note Indenture.

### General

The Senior Notes will be issued as unsecured senior debt securities under the Senior Note Indenture and will rank equally with all other unsecured and unsubordinated debt of the Company. The Senior Notes will be effectively subordinated to all secured debt of the Company, including its first mortgage bonds, aggregating approximately $170,000,000 outstanding at December 31, 2002. The Senior Note Indenture does not limit the aggregate principal amount of Senior Notes that may be issued under the Senior Note Indenture and provides that Senior Notes may be issued from time to time in one or more series pursuant to an indenture supplemental to the Senior Note Indenture. The Senior Note Indenture gives the Company the ability to reopen a previous issue of Senior Notes and issue additional Senior Notes of such series, unless otherwise provided.

Reference is made to the Prospectus Supplement that will accompany this Prospectus for the following terms of the series of Senior Notes being offered by such Prospectus Supplement: (i) the title of such Senior Notes; (ii) any limit on the aggregate principal amount of such Senior Notes; (iii) the date or dates on which the principal of such Senior Notes is payable; (iv) the rate or rates at which such Senior Notes shall bear interest, if any, or any method by which such rate or rates will be determined, the date or dates from which such interest will accrue, the interest payment dates on which such interest shall be payable, and the regular record date for the interest payable on any interest payment date; (v) the place or places where the principal of (and premium, if any) and interest, if any, on such Senior Notes shall be payable; (vi) the period or periods within which, the price or prices at which and the terms and conditions on which such Senior Notes may be redeemed, in whole or in part, at the option of the Company or at the option of the holder prior to their maturity; (vii) the obligation, if any, of the Company to redeem or purchase such Senior Notes; (viii) the denominations in which such Senior Notes shall be issuable; (ix) if other than the principal amount of the Senior Notes, the portion of the principal amount of such Senior Notes which shall be payable upon declaration of acceleration of the maturity of such Senior Notes; (x) any deletions from, modifications of or additions to the Events of Default or covenants of the Company as provided in the Senior Note Indenture pertaining to such Senior Notes; (xi) whether such Senior Notes shall be issued in whole or in part in the form of a Global Security; and (xii) any other terms of such Senior Notes.

The Senior Note Indenture does not contain provisions that afford holders of Senior Notes protection in the event of a highly leveraged transaction involving the Company.

### Events of Default

The Senior Note Indenture provides that any one or more of the following described events with respect to the Senior Notes of any series, which has occurred and is continuing, constitutes an "Event of Default" with respect to the Senior Notes of such series:

(a) failure for 10 days to pay interest on the Senior Notes of such series, when due on an interest payment date other than at maturity or upon earlier redemption; or

(b) failure to pay principal or premium, if any, or interest on the Senior Notes of such series when due at maturity or upon earlier redemption; or

(c) failure for three Business Days to deposit any sinking fund payment when due by the terms of a Senior Note of such series; or

(d) failure to observe or perform any other covenant or warranty of the Company in the Senior Note Indenture (other than a covenant or warranty which has expressly been included in the Senior Note Indenture solely for the benefit of one or more series of Senior Notes other than such series) for 90 days after written notice to the Company from the Senior Note Indenture Trustee or the holders of at least 25% in principal amount of the outstanding Senior Notes of such series; or

(e) certain events of bankruptcy, insolvency or reorganization of the Company.

The holders of not less than a majority in aggregate outstanding principal amount of the Senior Notes of any series have the right to direct the time, method and place of conducting any proceeding for any remedy available to the Senior Note Indenture Trustee with respect to the Senior Notes of such series. If a Senior Note Indenture Event of Default occurs and is continuing with respect to the Senior Notes of any series, then the Senior Note Indenture Trustee or the holders of not less than 25% in aggregate outstanding principal amount of the Senior Notes of such series may declare the principal amount of the Senior Notes due and payable immediately by notice in writing to the Company (and to the Senior Note Indenture Trustee if given by the holders), and upon any such declaration such principal amount shall become immediately due and payable. At any time after such a declaration of acceleration with respect to the Senior Notes of any series has been made and before a judgment or decree for payment of the money due has been obtained as provided in Article Five of the Senior Note Indenture, the holders of not less than a majority in aggregate outstanding principal amount of the Senior Notes of such series may rescind and annul such declaration and its consequences if the default has been cured or waived and the Company has paid or deposited with the Senior Note Indenture Trustee a sum sufficient to pay all matured installments of interest and principal due otherwise than by acceleration and all sums paid or advanced by the Senior Note Indenture Trustee, including reasonable compensation and expenses of the Senior Note Indenture Trustee.

The holders of not less than a majority in aggregate outstanding principal amount of the Senior Notes of any series may, on behalf of the holders of all the Senior Notes of such series, waive any past default with respect to such series, except (i) a default in the payment of principal or interest or (ii) a default in respect of a covenant or provision which under Article Nine of the Senior Note Indenture cannot be modified or amended without the consent of the holder of each outstanding Senior Note of such series affected.

**Registration and Transfer**

The Company shall not be required to (i) issue, register the transfer of or exchange Senior Notes of any series during a period of 15 days immediately preceding the date notice is given identifying the Senior Notes of such series called for redemption, or (ii) register the transfer of or exchange any Senior Notes so selected for redemption, in whole or in part, except the unredeemed portion of any Senior Note being redeemed in part.

**Payment and Paying Agent**

Unless otherwise indicated in an applicable Prospectus Supplement, payment of principal of any Senior Notes will be made only against surrender to the Paying Agent of such Senior Notes. Principal of and interest on Senior Notes will be payable subject to any applicable laws and regulations, at the office of such Paying Agent or Paying Agents as the Company may designate from time to time, except that, at the option of the Company, payment of any interest may be made by wire transfer or by check mailed to the address of the person entitled to an interest payment as such address shall appear in the Security Register with respect to the Senior Notes.

Payment of interest on Senior Notes on any interest payment date will be made to the person in whose name the Senior Notes (or predecessor security) are registered at the close of business on the record date for such interest payment.

Unless otherwise indicated in an applicable Prospectus Supplement, the Senior Note Indenture Trustee will act as Paying Agent with respect to the Senior Notes. The Company may at any time designate additional Paying Agents or rescind the designation of any Paying Agents or approve a change in the office through which any Paying Agent acts.

All moneys paid by the Company to a Paying Agent for the payment of the principal of or interest on the Senior Notes of any series which remain unclaimed at the end of two years after such principal or interest shall have become due and payable will be repaid to the Company, and the holder of such Senior Notes will from that time forward look only to the Company for payment of such principal and interest.

**Modification**

The Senior Note Indenture contains provisions permitting the Company and the Senior Note Indenture Trustee, with the consent of the holders of not less than a majority in principal amount of the outstanding Senior Notes of each series that is affected, to modify the Senior Note Indenture or the rights of the holders of the Senior Notes of such series; provided, that no such modification may, without the consent of the holder of each outstanding Senior Note that is affected, (i) change the stated maturity of the principal of, or any installment of principal of or interest on, any Senior Note, or reduce the principal amount of any Senior Note or the rate of interest on any Senior Note or any premium payable upon the redemption thereof, or change the method of calculating the rate of interest on any Senior Note, or impair the right to institute suit for the enforcement of any such payment on or after the stated maturity of any Senior Note (or, in the case of redemption, on or after the redemption date), or (ii) reduce the percentage of principal amount of the outstanding Senior Notes of any series, the consent of whose holders is required for any such supplemental indenture, or the consent of whose holders is required for any waiver (of compliance with certain provisions of the Senior Note Indenture or certain defaults under the Senior Note Indenture and their consequences) provided for in the Senior Note Indenture, or (iii) modify any of the provisions of the Senior Note Indenture relating to supplemental indentures, waiver of past defaults, or waiver of certain covenants, except to increase any such percentage or to provide that certain other provisions of the Senior Note Indenture cannot be modified or waived without the consent of the holder of each outstanding Senior Note that is affected.

In addition, the Company and the Senior Note Indenture Trustee may execute, without the consent of any holders of Senior Notes, any supplemental indenture for certain other usual purposes, including the creation of any new series of Senior Notes.

**Consolidation, Merger and Sale**

The Company shall not consolidate with or merge into any other corporation or convey, transfer or lease its properties and assets substantially as an entirety to any person, unless (1) such other corporation or person is a corporation organized and existing under the laws of the United States, any state in the United States or the District of Columbia and such other corporation or person expressly assumes, by supplemental indenture executed and delivered to the Senior Note Indenture Trustee, the payment of the principal of (and premium, if any) and interest on all the Senior Notes and the performance of every covenant of the Senior Note Indenture on the part of the Company to be performed or observed; (2) immediately after giving effect to such transactions, no Event of Default, and no event which, after notice or lapse of time or both, would become an Event of Default, shall have happened and be continuing; and (3) the Company has delivered to the Senior Note Indenture Trustee an officers' certificate and an opinion of counsel, each stating that such transaction complies with the provisions of the Senior Note Indenture governing consolidation, merger, conveyance, transfer or lease and that all conditions precedent to the transaction have been complied with.

**Information Concerning the Senior Note Indenture Trustee**

The Senior Note Indenture Trustee, prior to an Event of Default with respect to Senior Notes of any series, undertakes to perform, with respect to Senior Notes of such series, only such duties as are specifically set forth in the Senior Note Indenture and, in case an Event of Default with respect to Senior Notes of any series has occurred and is continuing, shall exercise, with respect to Senior Notes of such series, the same degree of care as a prudent individual would exercise in the conduct of his or her own affairs. Subject to such provision, the Senior Note Indenture Trustee is under no obligation to exercise any of the powers vested in it by the Senior Note Indenture at the request of any holder of Senior Notes of any series, unless offered reasonable indemnity by such holder against the costs, expenses and liabilities which might be incurred by the Senior Note Indenture Trustee. The Senior Note Indenture Trustee is not required to expend or risk its own funds or otherwise incur any financial liability in the performance of its duties if the Senior Note Indenture Trustee reasonably believes that repayment or adequate indemnity is not reasonably assured to it.

JPMorgan Chase Bank, the Senior Note Indenture Trustee, also serves as Subordinated Note Indenture Trustee, as Property Trustee and as Guarantee Trustee. The Company and certain of its affiliates maintain deposit accounts and banking relationships with JPMorgan Chase Bank. JPMorgan Chase Bank also serves as trustee under other indentures pursuant to which securities of the Company and affiliates of the Company are outstanding.

**Governing Law**

The Senior Note Indenture and the Senior Notes will be governed by, and construed in accordance with, the internal laws of the State of New York.

**Miscellaneous**

The Company will have the right at all times to assign any of its rights or obligations under the Senior Note Indenture to a direct or indirect wholly-owned subsidiary of the Company; provided, that, in the event of any such assignment, the Company will remain primarily liable for all such obligations. Subject to the foregoing, the Senior Note Indenture will be binding upon and inure to the benefit of the parties of the Senior Note Indenture and their respective successors and assigns.

## DESCRIPTION OF THE JUNIOR SUBORDINATED NOTES

Set forth below is a description of the general terms of the Junior Subordinated Notes. The following description does not purport to be complete and is subject to, and is qualified in its entirety by reference to, the Subordinated Note Indenture, dated as of January 1, 1997, between the Company and JPMorgan Chase Bank (formerly known as The Chase Manhattan Bank), as trustee (the "Subordinated Note Indenture Trustee"), as to be supplemented by a supplemental indenture to the Subordinated Note Indenture establishing the Junior Subordinated Notes of each series (the Subordinated Note Indenture, as so supplemented, is referred to as the "Subordinated Note Indenture"), the forms of which are filed as exhibits to the Registration Statement of which this Prospectus forms a part. The terms of the Junior Subordinated Notes will include those stated in the Subordinated Note Indenture and those made a part of the Subordinated Note Indenture by reference to the 1939 Act. Certain capitalized terms used in this Prospectus and not defined in this Prospectus are defined in the Subordinated Note Indenture.

### General

The Junior Subordinated Notes will be issued as unsecured junior subordinated debt securities under the Subordinated Note Indenture. The Subordinated Note Indenture does not limit the aggregate principal amount of Junior Subordinated Notes that may be issued under the Subordinated Note Indenture and provides that Junior Subordinated Notes may be issued from time to time in one or more series pursuant to an indenture supplemental to the Subordinated Note Indenture. The Subordinated Note Indenture gives the Company the ability to reopen a previous issue of Junior Subordinated Notes and issue additional Junior Subordinated Notes of such series, unless otherwise provided.

Reference is made to the Prospectus Supplement that will accompany this Prospectus for the following terms of the series of Junior Subordinated Notes being offered by such Prospectus Supplement: (i) the title of such Junior Subordinated Notes; (ii) any limit on the aggregate principal amount of such Junior Subordinated Notes; (iii) the date or dates on which the principal of such Junior Subordinated Notes is payable; (iv) the rate or rates at which such Junior Subordinated Notes shall bear interest, if any, or any method by which such rate or rates will be determined, the date or dates from which such interest will accrue, the interest payment dates on which such interest shall be payable, and the regular record date for the interest payable on any interest payment date; (v) the place or places where the principal of (and premium, if any) and interest, if any, on such Junior Subordinated Notes shall be payable; (vi) the period or periods within which, the price or prices at which and the terms and conditions on which such Junior Subordinated Notes may be redeemed, in whole or in part, at the option of the Company or at the option of the holder prior to their maturity; (vii) the obligation, if any, of the Company to redeem or purchase such Junior Subordinated Notes; (viii) the denominations in which such Junior Subordinated Notes shall be issuable; (ix) if other than the principal amount of the Junior Subordinated Notes, the portion of the principal amount of such Junior Subordinated Notes which shall be payable upon declaration of acceleration of the maturity of such Junior Subordinated Notes; (x) any deletions from, modifications of or additions to the Events of Default or covenants of the Company as provided in the Subordinated Note Indenture pertaining to such Junior Subordinated Notes; (xi) whether such Junior Subordinated Notes shall be issued in whole or in part in the form of a Global Security; (xii) the right, if any, of the Company to extend the interest payment periods of such Junior Subordinated Notes; and (xiii) any other terms of such Junior Subordinated Notes. The terms of each series of Junior Subordinated Notes issued to a Trust will correspond to those of the related Preferred Securities of such Trust as described in the Prospectus Supplement relating to such Preferred Securities.

The Subordinated Note Indenture does not contain provisions that afford holders of Junior Subordinated Notes protection in the event of a highly leveraged transaction involving the Company.

### Subordination

The Junior Subordinated Notes are subordinated and junior in right of payment to all Senior Indebtedness (as defined below) of the Company. No payment of principal of (including redemption payments, if any), or premium,

if any, or interest on (including Additional Interest (as defined below)) the Junior Subordinated Notes may be made if (a) any Senior Indebtedness is not paid when due and any applicable grace period with respect to such default has ended with such default not being cured or waived or otherwise ceasing to exist, or (b) the maturity of any Senior Indebtedness has been accelerated because of a default, or (c) notice has been given of the exercise of an option to require repayment, mandatory payment or prepayment or otherwise. Upon any payment or distribution of assets of the Company to creditors upon any liquidation, dissolution, winding-up, reorganization, assignment for the benefit of creditors, marshalling of assets or liabilities, or any bankruptcy, insolvency or similar proceedings of the Company, the holders of Senior Indebtedness shall be entitled to receive payment in full of all amounts due or to become due on or in respect of all Senior Indebtedness before the holders of the Junior Subordinated Notes are entitled to receive or retain any payment or distribution. Subject to the prior payment of all Senior Indebtedness, the rights of the holders of the Junior Subordinated Notes will be subrogated to the rights of the holders of Senior Indebtedness to receive payments and distributions applicable to such Senior Indebtedness until all amounts owing on the Junior Subordinated Notes are paid in full.

The term "Senior Indebtedness" means, with respect to the Company, (i) any payment due in respect of indebtedness of the Company, whether outstanding at the date of execution of the Subordinated Note Indenture or incurred, created or assumed after the execution of the Subordinated Note Indenture, (a) in respect of money borrowed (including any financial derivative, hedging or futures contract or similar instrument) and (b) evidenced by securities, debentures, bonds, notes or other similar instruments issued by the Company that, by their terms, are senior or senior subordinated debt securities including, without limitation, all obligations under its indentures with various trustees; (ii) all capital lease obligations; (iii) all obligations issued or assumed as the deferred purchase price of property, all conditional sale obligations and all obligations of the Company under any title retention agreement (but excluding trade accounts payable arising in the ordinary course of business and long-term purchase obligations); (iv) all obligations for the reimbursement of any letter of credit, banker's acceptance, security purchase facility or similar credit transaction; (v) all obligations of the type referred to in clauses (i) through (iv) above of other persons the payment of which the Company is responsible or liable as obligor, guarantor or otherwise; and (vi) all obligations of the type referred to in clauses (i) through (v) above of other persons secured by any lien on any property or asset of the Company (whether or not such obligation is assumed by the Company), except for (1) any such indebtedness that is by its terms subordinated to or *pari passu* with the Junior Subordinated Notes and (2) any unsecured indebtedness between or among the Company or its affiliates. Such Senior Indebtedness shall continue to be Senior Indebtedness and be entitled to the benefits of the subordination provisions contained in the Subordinated Note Indenture irrespective of any amendment, modification or waiver of any term of such Senior Indebtedness.

The Subordinated Note Indenture does not limit the aggregate amount of Senior Indebtedness that may be issued by the Company. As of December 31, 2002, Senior Indebtedness of the Company aggregated approximately $550,000,000.

**Additional Interest**

"Additional Interest" is defined in the Subordinated Note Indenture as (i) such additional amounts as may be required so that the net amounts received and retained by a holder of Junior Subordinated Notes (if the holder is a Trust) after paying taxes, duties, assessments or governmental charges of whatever nature (other than withholding taxes) imposed by the United States or any other taxing authority will not be less than the amounts the holder would have received had no such taxes, duties, assessments or other governmental charges been imposed; and (ii) any interest due and not paid on an interest payment date, together with interest on such interest due from such interest payment date to the date of payment, compounded quarterly, on each interest payment date.

**Certain Covenants**

The Company covenants in the Subordinated Note Indenture, for the benefit of the holders of each series of Junior Subordinated Notes, that, (i) if at such time the Company shall have given notice of its election to extend an interest payment period for such series of Junior Subordinated Notes and such extension shall be continuing,

(ii) if at such time the Company shall be in default with respect to its payment or other obligations under the Guarantee with respect to the Trust Securities, if any, related to such series of Junior Subordinated Notes, or (iii) if at such time an Event of Default under the Subordinated Note Indenture with respect to such series of Junior Subordinated Notes shall have occurred and be continuing, (a) the Company shall not declare or pay any dividend or make any distributions with respect to, or redeem, purchase, acquire or make a liquidation payment with respect to, any of its capital stock, and (b) the Company shall not make any payment of interest, principal or premium, if any, on or repay, repurchase or redeem any debt securities (including guarantees other than the Guarantees) issued by the Company which rank equally with or junior to the Junior Subordinated Notes. None of the foregoing, however, shall restrict (i) any of the actions described in the preceding sentence resulting from any reclassifications of the Company's capital stock or the exchange or conversion of one class or series of the Company's capital stock for another class or series of the Company's capital stock, or (ii) the purchase of fractional interests in shares of the Company's capital stock pursuant to the conversion or exchange provisions of such capital stock or the security being converted or exchanged.

The Subordinated Note Indenture further provides that, for so long as the Trust Securities of any Trust remain outstanding, the Company covenants (i) to directly or indirectly maintain 100% ownership of the Common Securities of such Trust; provided, however, that any permitted successor of the Company under the Subordinated Note Indenture may succeed to the Company's ownership of such Common Securities, and (ii) to use its reasonable efforts to cause such Trust (a) to remain a statutory trust, except in connection with the distribution of Junior Subordinated Notes to the holders of Trust Securities in liquidation of such Trust, the redemption of all of the Trust Securities of such Trust, or certain mergers, consolidations or amalgamations, each as permitted by the related Trust Agreement, and (b) to otherwise continue to be classified as a grantor trust for United States federal income tax purposes.

**Events of Default**

The Subordinated Note Indenture provides that any one or more of the following described events with respect to the Junior Subordinated Notes of any series, which has occurred and is continuing, constitutes an "Event of Default" with respect to the Junior Subordinated Notes of such series:

(a) failure for 10 days to pay interest on the Junior Subordinated Notes of such series, including any Additional Interest (as defined in clause (ii) of the definition of Additional Interest in the Subordinated Note Indenture) in respect of the Junior Subordinated Notes, when due on an interest payment date other than at maturity or upon earlier redemption; provided, however, that a valid extension of the interest payment period by the Company shall not constitute a default in the payment of interest for this purpose; or

(b) failure for 10 days to pay Additional Interest (as defined in clause (i) of the definition of Additional Interest in the Subordinated Note Indenture); or

(c) failure to pay principal or premium, if any, or interest, including Additional Interest (as defined in clause (ii) of the definition of Additional Interest in the Subordinated Note Indenture), on the Junior Subordinated Notes of such series when due at maturity or upon earlier redemption; or

(d) failure for three Business Days to deposit any sinking fund payment when due by the terms of a Junior Subordinated Note of such series; or

(e) failure to observe or perform any other covenant or warranty of the Company in the Subordinated Note Indenture (other than a covenant or warranty which has expressly been included in the Subordinated Note Indenture solely for the benefit of one or more series of Junior Subordinated Notes other than such series) for 90 days after written notice to the Company from the Subordinated Note Indenture Trustee or the holders of at least 25% in principal amount of the outstanding Junior Subordinated Notes of such series; or

(f) certain events of bankruptcy, insolvency or reorganization of the Company.

The holders of not less than a majority in aggregate outstanding principal amount of the Junior Subordinated Notes of any series have the right to direct the time, method and place of conducting any proceeding for any remedy available to the Subordinated Note Indenture Trustee with respect to the Junior Subordinated Notes of such series. If a Subordinated Note Indenture Event of Default occurs and is continuing with respect to the Junior Subordinated Notes of any series, then the Subordinated Note Indenture Trustee or the holders of not less than

25% in aggregate outstanding principal amount of the Junior Subordinated Notes of such series may declare the principal amount of the Junior Subordinated Notes due and payable immediately by notice in writing to the Company (and to the Subordinated Note Indenture Trustee if given by the holders), and upon any such declaration such principal amount shall become immediately due and payable. At any time after such a declaration of acceleration with respect to the Junior Subordinated Notes of any series had been made and before a judgment or decree for payment of the money due has been obtained as provided in Article Five of the Subordinated Note Indenture, the holders of not less than a majority in aggregate outstanding principal amount of the Junior Subordinated Notes of such series may rescind and annul such declaration and its consequences if the default has been cured or waived and the Company has paid or deposited with the Subordinated Note Indenture Trustee a sum sufficient to pay all matured installments of interest (including any Additional Interest) and principal due otherwise than by acceleration and all sums paid or advanced by the Subordinated Note Indenture Trustee, including reasonable compensation and expenses of the Subordinated Note Indenture Trustee.

A holder of Preferred Securities may institute a legal proceeding directly against the Company, without first instituting a legal proceeding against the Property Trustee or any other person or entity, for enforcement of payment to such holder of principal of or interest on the Junior Subordinated Notes of the related series having a principal amount equal to the aggregate stated liquidation amount of the Preferred Securities of such holder on or after the due dates specified in the Junior Subordinated Notes of such series.

The holders of not less than a majority in aggregate outstanding principal amount of the Junior Subordinated Notes of any series may, on behalf of the holders of all the Junior Subordinated Notes of such series, waive any past default with respect to such series, except (i) a default in the payment of principal or interest or (ii) a default in respect of a covenant or provision which under Article Nine of the Subordinated Note Indenture cannot be modified or amended without the consent of the holder of each outstanding Junior Subordinated Note of such series affected.

**Registration and Transfer**

The Company shall not be required to (i) issue, register the transfer of or exchange Junior Subordinated Notes of any series during a period of 15 days immediately preceding the date notice is given identifying the Junior Subordinated Notes of such series called for redemption, or (ii) register the transfer of or exchange any Junior Subordinated Notes so selected for redemption, in whole or in part, except the unredeemed portion of any Junior Subordinated Note being redeemed in part.

**Payment and Paying Agent**

Unless otherwise indicated in an applicable Prospectus Supplement, payment of principal of any Junior Subordinated Notes will be made only against surrender to the Paying Agent of such Junior Subordinated Notes. Principal of and interest on Junior Subordinated Notes will be payable, subject to any applicable laws and regulations, at the office of such Paying Agent or Paying Agents as the Company may designate from time to time, except that, at the option of the Company, payment of any interest may be made by wire transfer or by check mailed to the address of the person entitled to an interest payment as such address shall appear in the Security Register with respect to the Junior Subordinated Notes. Payment of interest on Junior Subordinated Notes on any interest payment date will be made to the person in whose name the Junior Subordinated Notes (or predecessor security) are registered at the close of business on the record date for such interest payment.

Unless otherwise indicated in an applicable Prospectus Supplement, the Subordinated Note Indenture Trustee will act as Paying Agent with respect to the Junior Subordinated Notes. The Company may at any time designate additional Paying Agents or rescind the designation of any Paying Agents or approve a change in the office through which any Paying Agent acts.

All moneys paid by the Company to a Paying Agent for the payment of the principal of or interest on the Junior Subordinated Notes of any series which remain unclaimed at the end of two years after such principal or interest shall have become due and payable will be repaid to the Company, and the holder of such Junior Subordinated Notes will from that time forward look only to the Company for payment of such principal and interest.

**Modification**

The Subordinated Note Indenture contains provisions permitting the Company and the Subordinated Note Indenture Trustee, with the consent of the holders of not less than a majority in principal amount of the outstanding Junior Subordinated Notes of each series that is affected, to modify the Subordinated Note Indenture or the rights of the holders of the Junior Subordinated Notes of such series; provided, that no such modification may, without the consent of the holder of each outstanding Junior Subordinated Note that is affected, (i) change the stated maturity of the principal of, or any installment of principal of or interest on, any Junior Subordinated Note, or reduce the principal amount of any Junior Subordinated Note or the rate of interest (including Additional Interest) on any Junior Subordinated Note or any premium payable upon the redemption thereof, or change the method of calculating the rate of interest on any Junior Subordinated Note, or impair the right to institute suit for the enforcement of any such payment on or after the stated maturity of any Junior Subordinated Note (or, in the case of redemption, on or after the redemption date), or (ii) reduce the percentage of principal amount of the outstanding Junior Subordinated Notes of any series, the consent of whose holders is required for any such supplemental indenture, or the consent of whose holders is required for any waiver (of compliance with certain provisions of the Subordinated Note Indenture or certain defaults under the Subordinated Note Indenture and their consequences) provided for in the Subordinated Note Indenture, or (iii) modify any of the provisions of the Subordinated Note Indenture relating to supplemental indentures, waiver of past defaults, or waiver of certain covenants, except to increase any such percentage or to provide that certain other provisions of the Subordinated Note Indenture cannot be modified or waived without the consent of the holder of each outstanding Junior Subordinated Note that is affected, or (iv) modify the provisions of the Subordinated Note Indenture with respect to the subordination of the Junior Subordinated Notes in a manner adverse to such holder.

In addition, the Company and the Subordinated Note Indenture Trustee may execute, without the consent of any holders of Junior Subordinated Notes, any supplemental indenture for certain other usual purposes, including the creation of any new series of Junior Subordinated Notes.

**Consolidation, Merger and Sale**

The Company shall not consolidate with or merge into any other corporation or convey, transfer or lease its properties and assets substantially as an entirety to any person, unless (1) such other corporation or person is a corporation organized and existing under the laws of the United States, any state of the United States or the District of Columbia and such other corporation or person expressly assumes, by supplemental indenture executed and delivered to the Subordinated Note Indenture Trustee, the payment of the principal of (and premium, if any) and interest (including Additional Interest) on all the Junior Subordinated Notes and the performance of every covenant of the Subordinated Note Indenture on the part of the Company to be performed or observed; (2) immediately after giving effect to such transactions, no Event of Default, and no event which, after notice or lapse of time or both, would become an Event of Default, shall have happened and be continuing; and (3) the Company has delivered to the Subordinated Note Indenture Trustee an officers' certificate and an opinion of counsel, each stating that such transaction complies with the provisions of the Subordinated Note Indenture governing consolidation, merger, conveyance, transfer or lease and that all conditions precedent to the transaction have been complied with.

**Information Concerning the Subordinated Note Indenture Trustee**

The Subordinated Note Indenture Trustee, prior to an Event of Default with respect to Junior Subordinated Notes of any series, undertakes to perform, with respect to Junior Subordinated Notes of such series, only such duties as are specifically set forth in the Subordinated Note Indenture and, in case an Event of Default with respect to Junior Subordinated Notes of any series has occurred and is continuing, shall exercise, with respect to Junior Subordinated Notes of such series, the same degree of care as a prudent individual would exercise in the conduct of his or her own affairs. Subject to such provision, the Subordinated Note Indenture Trustee is under no obligation to exercise any of the powers vested in it by the Subordinated Note Indenture at the request of any

holder of Junior Subordinated Notes of any series, unless offered reasonable indemnity by such holder against the costs, expenses and liabilities which might be incurred by the Subordinated Note Indenture Trustee. The Subordinated Note Indenture Trustee is not required to expend or risk its own funds or otherwise incur any financial liability in the performance of its duties if the Subordinated Note Indenture Trustee reasonably believes that repayment or adequate indemnity is not reasonably assured to it.

JPMorgan Chase Bank, the Subordinated Note Indenture Trustee, also serves as Senior Note Indenture Trustee, as Property Trustee and as Guarantee Trustee. The Company and certain of its affiliates maintain deposit accounts and banking relationships with JPMorgan Chase Bank. JPMorgan Chase Bank also serves as trustee under other indentures pursuant to which securities of the Company and affiliates of the Company are outstanding.

### Governing Law

The Subordinated Note Indenture and the Junior Subordinated Notes will be governed by, and construed in accordance with, the internal laws of the State of New York.

### Miscellaneous

The Company will have the right at all times to assign any of its rights or obligations under the Subordinated Note Indenture to a direct or indirect wholly-owned subsidiary of the Company; provided, that, in the event of any such assignment, the Company will remain primarily liable for all such obligations. Subject to the foregoing, the Subordinated Note Indenture will be binding upon and inure to the benefit of the parties to the Subordinated Note Indenture and their respective successors and assigns.

## DESCRIPTION OF THE PREFERRED SECURITIES

Each Trust may issue only one series of Preferred Securities having terms described in the Prospectus Supplement relating to the Preferred Securities. The Trust Agreement of each Trust will authorize the Administrative Trustees, on behalf of the Trust, to issue the Preferred Securities of such Trust. The Preferred Securities of each Trust will have such terms, including distributions, redemption, voting, liquidation rights and such other preferred, deferral or other special rights or such restrictions as shall be set forth in the Trust Agreement of such Trust. Reference is made to the Prospectus Supplement relating to the Preferred Securities of a Trust for specific terms, including (i) the distinctive designation of such Preferred Securities; (ii) the number of Preferred Securities issued by such Trust; (iii) the annual distribution rate (or method of determining such rate) for Preferred Securities of such Trust and the date or dates on which such distributions shall be payable; (iv) whether distributions on such Preferred Securities shall be cumulative and, in the case of Preferred Securities having cumulative distribution rights, the date or dates, or method of determining the date or dates, from which distributions on such Preferred Securities shall be cumulative; (v) the amount or amounts that shall be paid out of the assets of such Trust to the holders of the Preferred Securities of such Trust upon voluntary or involuntary dissolution, winding-up or termination of such Trust; (vi) the obligation, if any, of such Trust to purchase or redeem such Preferred Securities and the price or prices at which, the period or periods within which, and the terms and conditions upon which such Preferred Securities shall be purchased or redeemed, in whole or in part, pursuant to such obligation; (vii) the voting rights, if any, of such Preferred Securities in addition to those required by law, including the number of votes per Preferred Security and any requirement for the approval by the holders of Preferred Securities as a condition to specified action or amendments to the Trust Agreement of such Trust; (viii) the rights, if any, to defer distributions on the Preferred Securities by extending the interest payment period on the related Junior Subordinated Notes; and (ix) any other relative rights, preferences, privileges, limitations or restrictions of such Preferred Securities not inconsistent with the Trust Agreement of such Trust or applicable law. All Preferred Securities offered by this Prospectus will be guaranteed by the Company to the extent set forth under "Description of the Guarantees." Any material United States federal income tax considerations applicable to an offering of Preferred Securities will be described in the Prospectus Supplement relating to the Preferred Securities.

## DESCRIPTION OF THE GUARANTEES

Set forth below is a summary of information concerning the Guarantees that will be executed and delivered by the Company for the benefit of the holders of Preferred Securities of the respective Trusts from time to time. Each Guarantee will be qualified as an indenture under the 1939 Act. JPMorgan Chase Bank will act as indenture trustee under each Guarantee (the "Guarantee Trustee") for purposes of the 1939 Act. The terms of the respective Guarantees will be those set forth in such Guarantee and those made part of such Guarantee by the 1939 Act. The following summary does not purport to be complete and is subject in all respects to the provisions of, and is qualified in its entirety by reference to, the Guarantees, the form of which is filed as an exhibit to the Registration Statement of which this Prospectus forms a part, and the 1939 Act. Each Guarantee will be held by the Guarantee Trustee for the benefit of holders of the Preferred Securities to which it relates.

### General

Pursuant to each Guarantee, the Company will irrevocably and unconditionally agree, to the extent set forth in such Guarantee, to pay in full, to the holders of the related Preferred Securities, the Guarantee Payments (as defined below), to the extent not paid by, or on behalf of, the related Trust, regardless of any defense, right of set-off or counterclaim that the Company may have or assert against any person. The following payments or distributions with respect to the Preferred Securities of any Trust to the extent not paid or made by, or on behalf of, such Trust will be subject to the Guarantee related to the Preferred Securities (without duplication): (i) any accrued and unpaid distributions required to be paid on the Preferred Securities of such Trust but if and only if and to the extent that such Trust has funds legally and immediately available for these distributions, (ii) the redemption price, including all accrued and unpaid distributions to the date of redemption (the "Redemption Price"), with respect to any Preferred Securities called for redemption by such Trust, but if and only to the extent such Trust has funds legally and immediately available to pay such Redemption Price, and (iii) upon a dissolution, winding-up or termination of such Trust (other than in connection with the distribution of Junior Subordinated Notes to the holders of Trust Securities of such Trust or the redemption of all of the Preferred Securities of such Trust), the lesser of (a) the aggregate of the liquidation amount and all accrued and unpaid distributions on the Preferred Securities of such Trust to the date of payment, to the extent such Trust has funds legally and immediately available for such purpose, and (b) the amount of assets of such Trust remaining available for distribution to holders of Preferred Securities of such Trust in liquidation of such Trust (the "Guarantee Payments"). The Company's obligation to make a Guarantee Payment may be satisfied by direct payment of the required amounts by the Company to the holders of the related Preferred Securities or by causing the related Trust to pay such amounts to such holders.

Each Guarantee will be a guarantee of the Guarantee Payments with respect to the related Preferred Securities from the time of issuance of such Preferred Securities, but will not apply to the payment of distributions and other payments on such Preferred Securities when the related Trust does not have sufficient funds legally and immediately available to make such distributions or other payments. **If the Company does not make interest payments on the Junior Subordinated Notes held by the Property Trustee under any Trust, such Trust will not make distributions on its Preferred Securities.**

### Subordination

The Company's obligations under each Guarantee to make the Guarantee Payments will constitute an unsecured obligation of the Company and will rank (i) subordinate and junior in right of payment to all other liabilities of the Company, including the Junior Subordinated Notes, except those obligations or liabilities made equal or subordinate by their terms, (ii) equal to the most senior preferred or preference stock now issued by the Company or issued at a later date by the Company and with any guarantee now entered into by the Company or entered into at a later date by the Company in respect of any preferred or preference securities of any affiliate of the Company, and (iii) senior to all common stock of the Company. The terms of the Preferred Securities will provide that each holder of Preferred Securities by acceptance of the Preferred Securities agrees to the

subordination provisions and other terms of the Guarantee related thereto. The Company has outstanding preferred stock that ranks equal to the Guarantees and common stock that ranks junior to the Guarantees.

Each Guarantee will constitute a guarantee of payment and not of collection (that is, the guaranteed party may institute a legal proceeding directly against the guarantor to enforce its rights under the guarantee without first instituting a legal proceeding against any other person or entity).

**Amendments and Assignment**

Except with respect to any changes that do not materially and adversely affect the rights of holders of the related Preferred Securities (in which case no consent will be required), each Guarantee may be amended only with the prior approval of the holders of not less than 66⅔% in liquidation amount of such outstanding Preferred Securities. The manner of obtaining any such approval of holders of the Preferred Securities will be as set forth in an accompanying Prospectus Supplement. All guarantees and agreements contained in each Guarantee shall bind the successors, assigns, receivers, trustees and representatives of the Company and shall inure to the benefit of the holders of the related Preferred Securities then outstanding.

**Termination**

Each Guarantee will terminate and be of no further force and effect as to the related Preferred Securities upon full payment of the Redemption Price of all such Preferred Securities, upon distribution of Junior Subordinated Notes to the holders of such Preferred Securities, or upon full payment of the amounts payable upon liquidation of the related Trust. Each Guarantee will continue to be effective or will be reinstated, as the case may be, if at any time any holder of the related Preferred Securities must restore payment of any sums paid with respect to such Preferred Securities or under such Guarantee.

**Events of Default**

An event of default under each Guarantee will occur upon the failure by the Company to perform any of its payment obligations under such Guarantee. The holders of a majority in liquidation amount of the Preferred Securities to which any Guarantee relates have the right to direct the time, method and place of conducting any proceeding for any remedy available to the Guarantee Trustee in respect of such Guarantee or to direct the exercise of any trust or power conferred upon the Guarantee Trustee under such Guarantee. Any holder of the related Preferred Securities may institute a legal proceeding directly against the Company to enforce its rights under such Guarantee without first instituting a legal proceeding against the Guarantee Trustee or any other person or entity. The holders of a majority in liquidation amount of Preferred Securities of any series may, by vote, on behalf of the holders of all the Preferred Securities of such series, waive any past event of default and its consequences.

**Information Concerning the Guarantee Trustee**

The Guarantee Trustee, prior to the occurrence of any event of default with respect to any Guarantee and after the curing or waiving of all events of default with respect to such Guarantee, undertakes to perform only such duties as are specifically set forth in such Guarantee and, in case an event of default has occurred, shall exercise the same degree of care as a prudent individual would exercise in the conduct of his or her own affairs. Subject to such provisions, the Guarantee Trustee is under no obligation to exercise any of the powers vested in it by any Guarantee at the request of any holder of the related Preferred Securities, unless offered reasonable indemnity against the costs, expenses and liabilities which might be incurred by the Guarantee Trustee.

JPMorgan Chase Bank, the Guarantee Trustee, also serves as Property Trustee, as Senior Note Indenture Trustee and as Subordinated Note Indenture Trustee. The Company and certain of its affiliates maintain deposit accounts and banking relationships with JPMorgan Chase Bank. JPMorgan Chase Bank serves as trustee under other indentures pursuant to which securities of the Company and affiliates of the Company are outstanding.

### Governing Law

Each Guarantee will be governed by, and construed in accordance with, the internal laws of the State of New York.

### The Agreements as to Expenses and Liabilities

Pursuant to an Agreement as to Expenses and Liabilities to be entered into by the Company under each Trust Agreement, the Company will irrevocably and unconditionally guarantee to each person or entity to whom each Trust becomes indebted or liable the full payment of any indebtedness, expenses or liabilities of such Trust, other than obligations of such Trust to pay to the holders of the related Preferred Securities or other similar interests in such Trust the amounts due such holders pursuant to the terms of such Preferred Securities or such other similar interests, as the case may be.

## RELATIONSHIP AMONG THE PREFERRED SECURITIES, THE JUNIOR SUBORDINATED NOTES AND THE GUARANTEES

As long as payments of interest and other payments are made when due on each series of Junior Subordinated Notes issued to a Trust, such payments will be sufficient to cover distributions and payments due on the related Trust Securities of such Trust primarily because (i) the aggregate principal amount of each series of Junior Subordinated Notes will be equal to the sum of the aggregate stated liquidation amount of the related Trust Securities; (ii) the interest rate and interest and other payment dates on each series of Junior Subordinated Notes will match the distribution rate and distribution and other payment dates for the related Preferred Securities; (iii) the Company shall pay for all costs and expenses of each Trust pursuant to the Agreements as to Expenses and Liabilities; and (iv) each Trust Agreement provides that the Securities Trustees thereunder shall not cause or permit the Trust to, among other things, engage in any activity that is not consistent with the purposes of the Trust.

Payments of distributions (to the extent funds for such purpose are legally and immediately available) and other payments due on the Preferred Securities (to the extent funds for such purpose are legally and immediately available) will be guaranteed by the Company as and to the extent set forth under "Description of the Guarantees." If the Company does not make interest payments on any series of Junior Subordinated Notes, it is not expected that the related Trust will have sufficient funds to pay distributions on its Preferred Securities. Each Guarantee is a guarantee from the time of its issuance, but does not apply to any payment of distributions unless and until the related Trust has sufficient funds legally and immediately available for the payment of such distributions.

If the Company fails to make interest or other payments on any series of Junior Subordinated Notes when due (taking into account any extension period as described in the applicable Prospectus Supplement), the Trust Agreement provides a mechanism that allows the holders of the related Preferred Securities to appoint a substitute Property Trustee. Such holders may also direct the Property Trustee to enforce its rights under the Junior Subordinated Notes of such series, including proceeding directly against the Company to enforce such Junior Subordinated Notes. If the Property Trustee fails to enforce its rights under any series of Junior Subordinated Notes, to the fullest extent permitted by applicable law, any holder of related Preferred Securities may institute a legal proceeding directly against the Company to enforce the Property Trustee's rights under such series of Junior Subordinated Notes without first instituting any legal proceeding against the Property Trustee or any other person or entity. Notwithstanding the foregoing, a holder of Preferred Securities may institute a legal proceeding directly against the Company, without first instituting a legal proceeding against the Property Trustee or any other person or entity, for enforcement of payment to such holder of principal of or interest on Junior Subordinated Notes of the related series having a principal amount equal to the aggregate stated liquidation amount of the Preferred Securities of such holder on or after the due dates specified in the Junior Subordinated Notes of such series.

If the Company fails to make payments under any Guarantee, such Guarantee provides a mechanism that allows the holders of the Preferred Securities to which such Guarantee relates to direct the Guarantee Trustee to enforce its rights under such Guarantee. In addition, any holder of Preferred Securities may institute a legal proceeding directly against the Company to enforce the Guarantee Trustee's rights under the related Guarantee without first instituting a legal proceeding against the Guarantee Trustee or any other person or entity.

Each Guarantee, the Subordinated Note Indenture, the Junior Subordinated Notes of the related series, the related Trust Agreement and the related Agreement as to Expenses and Liabilities, as described above, constitute a full and unconditional guarantee by the Company of the payments due on the related series of Preferred Securities.

Upon any voluntary or involuntary dissolution, winding-up or termination of any Trust, unless Junior Subordinated Notes of the related series are distributed in connection with such action, the holders of the Preferred Securities of such Trust will be entitled to receive, out of assets legally available for distribution to holders, a liquidation distribution in cash as described in the applicable Prospectus Supplement. Upon any voluntary or involuntary liquidation or bankruptcy of the Company, the Property Trustee, as holder of the related series of Junior Subordinated Notes, would be a subordinated creditor of the Company, subordinated in right of payment to all Senior Indebtedness, but entitled to receive payment in full of principal and interest, before any stockholders of the Company receive payments or distributions. Because the Company is guarantor under each Guarantee and has agreed to pay for all costs, expenses and liabilities of each Trust (other than the Trust's obligations to holders of the Preferred Securities) pursuant to the related Agreement as to Expenses and Liabilities, the positions of a holder of Preferred Securities and a holder of Junior Subordinated Notes of the related series relative to other creditors and to stockholders of the Company in the event of liquidation or bankruptcy of the Company would be substantially the same.

A default or event of default under any Senior Indebtedness would not constitute a default or Event of Default under the Subordinated Note Indenture. However, in the event of payment defaults under, or acceleration of, Senior Indebtedness, the subordination provisions of the Junior Subordinated Notes provide that no payments may be made in respect of the Junior Subordinated Notes until such Senior Indebtedness has been paid in full or any payment default of Senior Indebtedness has been cured or waived. Failure to make required payments on the Junior Subordinated Notes of any series would constitute an Event of Default under the Subordinated Note Indenture with respect to the Junior Subordinated Notes of such series except that failure to make interest payments on the Junior Subordinated Notes of such series will not be an Event of Default during an extension period as described in the applicable Prospectus Supplement.

## PLAN OF DISTRIBUTION

The Company may sell the Senior Notes and the Junior Subordinated Notes and the Trusts may sell the Preferred Securities in one or more of the following ways from time to time: (i) to underwriters for resale to the public or to institutional investors; (ii) directly to institutional investors; or (iii) through agents to the public or to institutional investors. The Prospectus Supplement with respect to each series of Senior Notes, Junior Subordinated Notes or Preferred Securities will set forth the terms of the offering of such Senior Notes, Junior Subordinated Notes or Preferred Securities, including the name or names of any underwriters or agents, the purchase price of such Senior Notes, Junior Subordinated Notes or Preferred Securities and the proceeds to the Company or the applicable Trust from such sale, any underwriting discounts or agency fees and other items constituting underwriters' or agents' compensation, any initial public offering price, any discounts or concessions allowed or reallowed or paid to dealers and any securities exchange on which such Senior Notes, Junior Subordinated Notes or Preferred Securities may be listed.

If underwriters participate in the sale, such Senior Notes, Junior Subordinated Notes or Preferred Securities will be acquired by the underwriters for their own account and may be resold from time to time in one or more transactions, including negotiated transactions, at a fixed public offering price or at varying prices determined at the time of sale.

Unless otherwise set forth in the Prospectus Supplement, the obligations of the underwriters to purchase any series of Senior Notes, Junior Subordinated Notes or Preferred Securities will be subject to certain conditions precedent and the underwriters will be obligated to purchase all of such series of Senior Notes, Junior Subordinated Notes or Preferred Securities, if any are purchased.

Underwriters and agents may be entitled under agreements entered into with the Company and/or the applicable Trust to indemnification against certain civil liabilities, including liabilities under the 1933 Act. Underwriters and agents may engage in transactions with, or perform services for, the Company in the ordinary course of business.

Each series of Senior Notes, Junior Subordinated Notes or Preferred Securities will be a new issue of securities and will have no established trading market. Any underwriters to whom Senior Notes, Junior Subordinated Notes or Preferred Securities are sold for public offering and sale may make a market in such Senior Notes, Junior Subordinated Notes or Preferred Securities, but such underwriters will not be obligated to do so and may discontinue any market making at any time without notice. The Senior Notes, Junior Subordinated Notes or Preferred Securities may or may not be listed on a national securities exchange.

## LEGAL MATTERS

Certain matters of Delaware law relating to the validity of the Preferred Securities will be passed upon on behalf of the Company and the Trusts by Richards, Layton & Finger, P.A., Wilmington, Delaware, special Delaware counsel to the Company and the Trusts. The validity of the Senior Notes, the Junior Subordinated Notes, the Guarantees and certain matters relating to such securities will be passed upon on behalf of the Company by Beggs & Lane, a Registered Limited Liability Partnership, Pensacola, Florida, and by Troutman Sanders LLP, Atlanta, Georgia. Certain legal matters will be passed upon for the Underwriters by Dewey Ballantine LLP, New York, New York.

## EXPERTS

The financial statements and the related financial statement schedule as of and for the year ended December 31, 2002 incorporated by reference in this Prospectus have been audited by Deloitte & Touche LLP, independent auditors, as stated in their report, which is incorporated by reference in this Prospectus, and has been so incorporated in reliance upon the report of such firm given upon their authority as experts in accounting and auditing.

Certain of the Company's financial statements incorporated by reference in this Prospectus have been audited by Arthur Andersen LLP ("Andersen"), independent public accountants, as indicated in their reports with respect to the financial statements, and are incorporated by reference in this Prospectus, in reliance upon the authority of Andersen as experts in giving such reports. On March 28, 2002, Southern's Board of Directors, upon recommendation of its Audit Committee, decided not to engage Andersen as the Company's principal public accountants. The Company has not obtained a reissued report from Andersen and has been unable to obtain, after reasonable efforts, Andersen's written consent to incorporate by reference Andersen's reports on the financial statements. Under these circumstances, Rule 437a under the 1933 Act permits this Prospectus to be filed without a written consent from Andersen. The absence of such written consent from Andersen may limit a holder's ability to assert claims against Andersen under Section 11(a) of the 1933 Act for any untrue statement of a material fact contained in the financial statements audited by Andersen or any omissions to state a material fact required to be stated in the financial statements.

to the Underwriting Agreement

GULF POWER COMPANY
SERIES I 5.75% SENIOR NOTES
DUE SEPTEMBER 15, 2033

Ladies and Gentlemen:

We have acted as general counsel to Gulf Power Company (the "Company") in connection with (i) the Company's issuance and sale of $40,000,000 aggregate principal amount of its Series I 5.75% Senior Notes due September 15, 2033 (the "Notes") pursuant to the Senior Note Indenture dated as of January 1, 1998, by and between the Company and JPMorgan Chase Bank (formerly known as The Chase Manhattan Bank), as trustee (the "Trustee"), as heretofore supplemented and as further supplemented by the Ninth Supplemental Indenture dated as of September 16, 2003 (collectively, the "Indenture") and (ii) the purchase by the Underwriters (as defined below) of the Notes pursuant to the terms of an Underwriting Agreement dated September 5, 2003 (the "Underwriting Agreement"), among the Company and the Underwriters named in Schedule I thereto (the "Underwriters") for whom you are acting as Representative. This opinion is being delivered to you as Representative pursuant to Section 5(c)(1) of the Underwriting Agreement.

All capitalized terms not otherwise defined herein shall have the meanings set forth in the Underwriting Agreement.

In rendering the opinions expressed below, we have examined the registration statement on Form S-3 (File Nos. 333-104449, 333-104449-01 and 333-104449-02) pertaining to the Notes (the "Registration Statement") filed under the Securities Act of 1933, as amended (the "Act"), and the prospectus of the Company dated April 25, 2003, as supplemented by a final prospectus supplement relating to the Notes dated September 5, 2003 (the "Final Supplemented Prospectus"), which pursuant to Form S-3 incorporates by reference the Annual Report on Form 10-K of the Company for the fiscal year ended December 31, 2002, the Quarterly Reports on Form 10-Q of the Company for the quarters ended March 31, 2003 and June 30, 2003 and the Current Reports on Form 8-K of the Company dated March 21, 2003, July 10, 2003 and September 5, 2003 (the "Exchange Act Documents"), each as filed under the Securities Exchange Act of 1934, as amended (the "Exchange Act").

In addition, we have examined, and have relied as to matters of fact upon, the documents delivered to you at the closing (except the certificate representing the Notes, of which we have examined a specimen), and we have made such other and further investigations as we deemed necessary to express the opinions hereinafter set forth. In such examination, we have assumed the genuineness of all signatures, the legal capacity of natural persons, the authenticity of all documents submitted to us as originals, the conformity to original documents of all documents submitted to us as certified or photostatic copies and the authenticity of the originals of such latter documents.

The Indenture and the Underwriting Agreement are herein referred to collectively as the "Agreements."

Based upon the foregoing, and subject to the qualifications and limitations stated herein, we are of the opinion, relying as to matters of Georgia law and the federal law of the United States upon the opinion dated the date hereof rendered to you by Troutman Sanders LLP and relying as to matters of New York law upon the opinion dated the date hereof rendered to you by Dewey Ballantine LLP, that:

1. The Company has been duly incorporated and is validly existing as a corporation in good standing under the laws of the State of Maine, is duly qualified to carry on its business as a foreign corporation under the laws of the States of Florida, Georgia and Mississippi and has due corporate authority to carry on the public utility business in which it is engaged, to own and operate the properties used by it in such business and to enter into and perform its obligations under the Agreements and the Notes.

2. The execution, delivery and performance by the Company of the Underwriting Agreement have been duly authorized by all necessary corporate action, and the Underwriting Agreement has been duly executed and delivered by the Company.

3. All orders, consents or other authorizations or approvals of the Florida Public Service Commission and the Commission legally required for the issuance and sale of the Notes have been obtained; such orders are sufficient for the issuance and sale of the Notes; the issuance and sale of the Notes conform in all material respects with the terms of such orders; and no other order, consent or other authorization or approval of any Florida or United States governmental body (other than in connection or in compliance with the provisions of the securities or "blue sky" laws of any jurisdiction, as to which we express no opinion) is legally required for the issuance and sale of the Notes in accordance with the terms of the Underwriting Agreement.

4. The Indenture has been duly authorized, executed and delivered by the Company and, assuming the due authorization, execution and delivery thereof by the Trustee, constitutes a valid and legally binding instrument of the Company, enforceable against the Company in accordance with its terms, subject to the qualifications that the enforceability of the Company's obligations under the Indenture may be limited by bankruptcy, insolvency, reorganization, moratorium and other similar laws relating to or affecting creditors' rights generally and by general principles of equity (regardless of whether such enforceability is considered in a proceeding in equity or at law); and the Indenture conforms as to legal matters in all material respects to the description thereof in the Final Supplemented Prospectus.

5. The Notes have been duly authorized and executed by the Company and, when authenticated by the Trustee in the manner provided in the Indenture and delivered to and paid for by the Underwriters pursuant to the Underwriting Agreement, will constitute valid and binding obligations of the Company, enforceable against the Company in accordance with their terms, subject to the qualifications that the enforceability of the Company's obligations under the Notes may be limited by bankruptcy, insolvency, reorganization, moratorium and other similar laws relating to or affecting creditors' rights generally and by general principles of equity (regardless of whether such enforceability is considered in a proceeding in equity or at law); and the Notes conform as to legal matters in all material respects to the description thereof in the Final Supplemented Prospectus.

6. The Indenture has been duly qualified under the Trust Indenture Act of 1939, as amended.

We have not independently verified the accuracy, completeness or fairness of the statements made or included in the Registration Statement, the Final Supplemented Prospectus or the Exchange Act Documents and take no responsibility therefor, except as and to the extent set forth in paragraphs 4 and 5 above. In the course of the preparation by the Company of the Registration Statement, the Final Supplemented Prospectus and the Exchange Act Documents, we participated in conferences with certain officers and employees of the Company, with other

counsel for the Company, with representatives of Deloitte & Touche LLP and with your counsel. Based upon our examination of the Registration Statement, the Final Supplemented Prospectus and the Exchange Act Documents, our investigations made in connection with the preparation of the Registration Statement, the Final Supplemented Prospectus and the Exchange Act Documents and our participation in the conferences referred to above, (i) we are of the opinion that the Registration Statement, as of its effective date, and the Final Supplemented Prospectus, as of September 5, 2003, complied as to form in all material respects with the requirements of the Act and the applicable rules and regulations of the Commission thereunder and that the Exchange Act Documents, as of their respective dates of filing with the Commission, complied as to form in all material respects with the relevant requirements of the Exchange Act and the applicable rules and regulations of the Commission thereunder, except that in each case we express no opinion as to the financial statements or other financial or statistical data contained or incorporated by reference in the Registration Statement, the Final Supplemented Prospectus or the Exchange Act Documents and (ii) nothing came to our attention which gives us reason to believe that the Registration Statement, as of its effective date (including the Exchange Act Documents on file with the Commission as of such date), contained any untrue statement of a material fact or omitted to state any material fact required to be stated therein or necessary in order to make the statements therein not misleading, or that the Final Supplemented Prospectus (including the Exchange Act Documents) contained, as of its date, or contains, on the date hereof, any untrue statement of a material fact or omitted, as of its date, or omits, on the date hereof, to state a material fact necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading, except that in each case we express no opinion or belief with respect to the financial statements or other financial or statistical data contained or incorporated by reference in the Registration Statement, the Final Supplemented Prospectus or the Exchange Act Documents and with respect to information set forth in the Final Supplemented Prospectus under the captions "Description of the Series I Senior Notes – Book-Entry Only Issuance – The Depository Trust Company" and "The Policy and the Insurer" or in Appendix A thereto.

We are members of the Florida Bar and we do not express any opinion herein concerning any law other than the law of the States of Maine, Florida and Mississippi and, to the extent set forth herein, the laws of the States of Georgia and New York and the federal law of the United States.

This opinion is rendered to you in connection with the above-described transaction. This opinion may not be relied upon by you for any other purpose or relied upon by or furnished to any other person without our prior written consent, except that Dewey Ballantine LLP may rely on this opinion in giving its opinion pursuant to Section 5(c) of the Underwriting Agreement insofar as such opinion relates to matters of Maine, Florida and Mississippi law, and Troutman Sanders LLP may rely on this opinion in giving its opinions pursuant to Section 5(c) of the Underwriting Agreement and in connection with the Company's listing application with respect to the Notes to the New York Stock Exchange, Inc., insofar as such opinions relate to matters of Maine, Florida and Mississippi law.

Yours very truly,

Beggs & Lane

GULF POWER COMPANY
SERIES I 5.75% SENIOR NOTES
DUE SEPTEMBER 15, 2033

Ladies and Gentlemen:

We have acted as counsel to Gulf Power Company (the "Company") in connection with (i) the Company's issuance and sale of $40,000,000 aggregate principal amount of its Series I 5.75% Senior Notes due September 15, 2033 (the "Notes") pursuant to the Senior Note Indenture dated as of January 1, 1998, by and between the Company and JPMorgan Chase Bank (formerly known as The Chase Manhattan Bank), as trustee (the "Trustee"), as heretofore supplemented and as further supplemented by the Ninth Supplemental Indenture dated as of September 16, 2003 (collectively, the "Indenture") and (ii) the purchase by the Underwriters (as defined below) of the Notes pursuant to the terms of an Underwriting Agreement dated September 5, 2003 (the "Underwriting Agreement"), among the Company and the Underwriters named in Schedule I thereto (the "Underwriters") for whom you are acting as Representative. This opinion is being delivered to you as Representative pursuant to Section 5(c)(2) of the Underwriting Agreement.

All capitalized terms not otherwise defined herein shall have the meanings set forth in the Underwriting Agreement.

In rendering the opinions expressed below, we have examined the registration statement on Form S-3 (Nos. 333-104449, 333-104449-01 and 333-104449-02) pertaining to the Notes and certain other securities (the "Registration Statement") filed under the Securities Act of 1933, as amended (the "Act"), and the prospectus of the Company dated April 25, 2003, as supplemented by the prospectus supplement dated September 5, 2003 (the "Final Supplemented Prospectus"), which pursuant to Form S-3 incorporates by reference the Annual Report on Form 10-K of the

Company for the fiscal year ended December 31, 2002, the Quarterly Reports on Form 10-Q of the Company for the quarters ended March 31, 2003 and June 30, 2003 and the Current Reports on Form 8-K of the Company dated March 21, 2003, July 10, 2003 and September 5, 2003 (the "Exchange Act Documents"), each as filed under the Securities Exchange Act of 1934, as amended (the "Exchange Act").

In addition, we have examined, and have relied as to matters of fact upon, the documents delivered to you at the closing (except the certificate representing the Notes, of which we have examined a specimen), and we have made such other and further investigations as we deemed necessary to express the opinions hereinafter set forth. In such examination, we have assumed the genuineness of all signatures, the legal capacity of natural persons, the authenticity of all documents submitted to us as originals, the conformity to original documents of all documents submitted to us as certified or photostatic copies and the authenticity of the originals of such latter documents.

The Indenture and the Underwriting Agreement are herein referred to collectively as the "Agreements."

Based upon the foregoing, and subject to the qualifications and limitations stated herein, we are of the opinion, relying as to matters of New York law upon the opinion dated the date hereof rendered to you by Dewey Ballantine LLP and as to matters of Maine, Florida and Mississippi law upon the opinion dated the date hereof rendered to you by Beggs & Lane, a Registered Limited Liability Partnership ("Beggs & Lane"), that:

1. The Company has been duly incorporated and is validly existing as a corporation in good standing under the laws of the State of Maine, is duly qualified to carry on its business as a foreign corporation in the States of Florida, Georgia and Mississippi and has due corporate authority to carry on the public utility business in which it is engaged, to own and operate the properties used by it in such business and to enter into and perform its obligations under the Agreements and the Notes.

2. The execution, delivery and performance by the Company of the Underwriting Agreement have been duly authorized by all necessary corporate action, and the Underwriting Agreement has been duly executed and delivered by the Company.

3. All orders, consents or other authorizations or approvals of the Florida Public Service Commission and the Commission legally required for the issuance and sale of the Notes have been obtained; such orders are sufficient for the issuance and sale of the Notes; the issuance and sale of the Notes conform in all material respects with the terms of such orders; and no other

order, consent or other authorization or approval of any Florida or United States governmental body (other than in connection or in compliance with the provisions of the securities or "blue sky" laws of any jurisdiction, as to which we express no opinion) is legally required for the issuance and sale of the Notes in accordance with the terms of the Underwriting Agreement.

4. The Indenture has been duly authorized, executed and delivered by the Company and, assuming the due authorization, execution and delivery thereof by the Trustee, constitutes a valid and legally binding instrument of the Company, enforceable against the Company in accordance with its terms, subject to the qualifications that the enforceability of the Company's obligations under the Indenture may be limited by bankruptcy, insolvency, reorganization, moratorium and other similar laws relating to or affecting creditors' rights generally and by general principles of equity (regardless of whether such enforceability is considered in a proceeding in equity or at law); and the Indenture conforms as to legal matters in all material respects to the description thereof in the Final Supplemented Prospectus.

5. The Notes have been duly authorized and executed by the Company and, when authenticated by the Trustee in the manner provided in the Indenture and delivered to and paid for by the Underwriters pursuant to the Underwriting Agreement, will constitute valid and binding obligations of the Company, enforceable against the Company in accordance with their terms, subject to the qualifications that the enforceability of the Company's obligations under the Notes may be limited by bankruptcy, insolvency, reorganization, moratorium and other similar laws relating to or affecting creditors' rights generally and by general principles of equity (regardless of whether such enforceability is considered in a proceeding in equity or at law); and the Notes conform as to legal matters in all material respects to the description thereof in the Final Supplemented Prospectus.

6. The Indenture has been duly qualified under the Trust Indenture Act of 1939, as amended.

We have not independently verified the accuracy, completeness or fairness of the statements made or included in the Registration Statement, the Final Supplemented Prospectus or the Exchange Act Documents and take no responsibility therefor, except as and to the extent set forth in paragraphs 4 and 5 above. In the course of the preparation by the Company of the Registration Statement, the Final Supplemented Prospectus and the Exchange Act Documents, we participated in conferences with certain officers and employees of the Company, with other counsel for the Company, with representatives of Deloitte & Touche LLP and with your counsel. Based upon our examination of the Registration Statement, the Final Supplemented Prospectus and the Exchange Act Documents, our investigations made in connection with the preparation of the Registration Statement, the Final Supplemented Prospectus and the Exchange Act

Documents and our participation in the conferences referred to above, (i) we are of the opinion that the Registration Statement, as of its effective date and the Final Supplemented Prospectus, as of September 5, 2003, complied as to form in all material respects with the requirements of the Act and the applicable rules and regulations of the Commission thereunder and that the Exchange Act Documents, as of their respective dates of filing with the Commission, complied as to form in all material respects with the relevant requirements of the Exchange Act and the applicable rules and regulations of the Commission thereunder, except that in each case we express no opinion as to the financial statements or other financial or statistical data contained or incorporated by reference in the Registration Statement, the Final Supplemented Prospectus or the Exchange Act Documents and (ii) nothing came to our attention which gives us reason to believe that the Registration Statement, as of its effective date (including the Exchange Act Documents on file with the Commission as of such date), contained any untrue statement of a material fact or omitted to state any material fact required to be stated therein or necessary in order to make the statements therein not misleading, or that the Final Supplemented Prospectus (including the Exchange Act Documents) contained, as of its date, or contains, on the date hereof, any untrue statement of a material fact or omitted, as of its date, or omits, on the date hereof, to state a material fact necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading, except that in each case we express no opinion or belief with respect to the financial statements or other financial or statistical data contained or incorporated by reference in the Registration Statement, the Final Supplemented Prospectus or the Exchange Act Documents and with respect to information set forth in the Final Supplemented Prospectus under the captions "Description of the Series I Senior Notes – Book-Entry Only Issuance – The Depository Trust Company" and "The Policy and the Insurer" or in Appendix A thereto.

We are members of the State Bar of Georgia and we do not express any opinion herein concerning any law other than the law of the State of Georgia and the federal law of the United States and, to the extent set forth herein, the laws of the States of Florida, Maine, Mississippi and New York.

This opinion is rendered to you in connection with the above-described transaction. This opinion may not be relied upon by you for any other purpose or relied upon by or furnished to any other person without our prior written consent, except that Beggs & Lane may rely on this opinion in giving its opinion pursuant to Section 5(c) of the Underwriting Agreement insofar as

such opinion relates to matters of Georgia law and the federal law of the United States and Dewey Ballantine LLP may rely on this opinion in giving its opinion pursuant to Section 5(c) of the Underwriting Agreement insofar as such opinion relates to matters of Georgia law.

Very truly yours,

Troutman Sanders LLP

Indicate by check mark whether the registrants (1) have filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrants were required to file such reports), and (2) have been subject to such filing requirements for the past 90 days. Yes _X_ No___

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrants' knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. ( )

Indicate by checkmark if the registrants are accelerated filers as defined in Rule 12b-2 of the Securities Exchange Act of 1934. Yes _X_ No___

Aggregate market value of voting and non-voting stock held by non-affiliates of The Southern Company at June 30, 2003: $22.7 billion and at January 30, 2004: $21.9 billion. Each of such other registrants is a wholly-owned subsidiary of The Southern Company. A description of registrants' common stock follows:

| Registrant | Description of Common Stock | Shares Outstanding at January 31, 2004 |
|---|---|---|
| The Southern Company | Par Value $5 Per Share | 735,504,409 |
| Alabama Power Company | Par Value $40 Per Share | 7,250,000 |
| Georgia Power Company | Without Par Value | 7,761,500 |
| Gulf Power Company | Without Par Value | 992,717 |
| Mississippi Power Company | Without Par Value | 1,121,000 |
| Savannah Electric and Power Company | Par Value $5 Per Share | 10,844,635 |
| Southern Power Company | Par Value $0.01 Per Share | 1,000 |

Documents incorporated by reference: specified portions of The Southern Company's Proxy Statement relating to the 2004 Annual Meeting of Stockholders are incorporated by reference into PART III. In addition, specified portions of the Information Statements of Alabama Power Company, Georgia Power Company, Gulf Power Company and Mississippi Power Company relating to each of their respective 2004 Annual Meetings of Shareholders are incorporated by reference into PART III.

This combined Form 10-K is separately filed by The Southern Company, Alabama Power Company, Georgia Power Company, Gulf Power Company, Mississippi Power Company, Savannah Electric and Power Company and Southern Power Company. Information contained herein relating to any individual company is filed by such company on its own behalf. Each company makes no representation as to information relating to the other companies.

| TVA | Tennessee Valley Authority |

# CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING INFORMATION

This Annual Report on Form 10-K contains forward-looking statements in addition to historical information. Forward-looking information includes, among other things, statements concerning the strategic goals for Southern Company's wholesale business, estimated construction and other expenditures and Southern Company's projections for energy sales and its goals for future generating capacity, dividend payout ratio, earnings per share and earnings growth. In some cases, forward-looking statements can be identified by terminology such as "may," "will," "could," "should," "expects," "plans," "anticipates," "believes," "estimates," "projects," "predicts," "potential" or "continue" or the negative of these terms or other comparable terminology. The registrants caution that there are various important factors that could cause actual results to differ materially from those indicated in the forward-looking statements; accordingly, there can be no assurance that such indicated results will be realized. These factors include:

- the impact of recent and future federal and state regulatory change, including legislative and regulatory initiatives regarding deregulation and restructuring of the electric utility industry and also changes in environmental, tax and other laws and regulations to which Southern Company and its subsidiaries are subject, as well as changes in application of existing laws and regulations;
- current and future litigation, regulatory investigations, proceedings or inquiries, including the pending EPA civil actions against certain Southern Company subsidiaries and current IRS audits;
- the effects, extent and timing of the entry of additional competition in the markets in which Southern Company's subsidiaries operate;
- the impact of fluctuations in commodity prices, interest rates and customer demand;
- available sources and costs of fuels;
- ability to control costs;
- investment performance of Southern Company's employee benefit plans;
- advances in technology;
- state and federal rate regulations and pending and future rate cases and negotiations;
- effects of and changes in political, legal and economic conditions and developments in the United States, including the current soft economy;
- the performance of projects undertaken by the non-traditional business and the success of efforts to invest in and develop new opportunities;
- internal restructuring or other restructuring options that may be pursued;
- potential business strategies, including acquisitions or dispositions of assets or businesses, which cannot be assured to be completed or beneficial to Southern Company or its subsidiaries;
- the ability of counterparties of Southern Company and its subsidiaries to make payments as and when due;
- the ability to obtain new short- and long-term contracts with neighboring utilities;
- the direct or indirect effect on Southern Company's business resulting from the terrorist incidents on September 11, 2001, or any similar incidents or responses to such incidents;
- financial market conditions and the results of financing efforts, including Southern Company's and its subsidiaries' credit ratings;
- the ability of Southern Company and its subsidiaries to obtain additional generating capacity at competitive prices;
- weather and other natural phenomena;
- the direct and indirect effects on Southern Company's business resulting from the August 2003 power outage in the Northeast, or any similar incidents;
- the effect of accounting pronouncements issued periodically by standard-setting bodies; and
- other factors discussed elsewhere herein and in other reports filed by the registrants from time to time with the SEC.

# PART I

## Item 1. BUSINESS

Southern Company was incorporated under the laws of Delaware on November 9, 1945. Southern Company is domesticated under the laws of Georgia and is qualified to do business as a foreign corporation under the laws of Alabama. Southern Company owns all the outstanding common stock of Alabama Power, Georgia Power, Gulf Power, Mississippi Power and Savannah Electric, each of which is an operating public utility company. The retail operating companies supply electric service in the states of Alabama, Georgia, Florida, Mississippi and Georgia, respectively. More particular information relating to each of the retail operating companies is as follows:

*Alabama Power* is a corporation organized under the laws of the State of Alabama on November 10, 1927, by the consolidation of a predecessor Alabama Power Company, Gulf Electric Company and Houston Power Company. The predecessor Alabama Power Company had had a continuous existence since its incorporation in 1906.

*Georgia Power* was incorporated under the laws of the State of Georgia on June 26, 1930, and admitted to do business in Alabama on September 15, 1948.

*Gulf Power* is a corporation which was organized under the laws of the State of Maine on November 2, 1925, and admitted to do business in Florida on January 15, 1926, in Mississippi on October 25, 1976, and in Georgia on November 20, 1984.

*Mississippi Power* was incorporated under the laws of the State of Mississippi on July 12, 1972, was admitted to do business in Alabama on November 28, 1972, and effective December 21, 1972, by the merger into it of the predecessor Mississippi Power Company, succeeded to the business and properties of the latter company. The predecessor Mississippi Power Company was incorporated under the laws of the State of Maine on November 24, 1924, and was admitted to do business in Mississippi on December 23, 1924, and in Alabama on December 7, 1962.

*Savannah Electric* is a corporation existing under the laws of the State of Georgia; its charter was granted by the Secretary of State on August 5, 1921.

In addition, Southern Company owns all of the common stock of Southern Power, which is also an operating public utility company. Southern Power constructs, owns and manages Southern Company's competitive generation assets and sells electricity at market-based rates in the wholesale market. Southern Power is a corporation organized under the laws of Delaware on January 8, 2001, and admitted to do business in Alabama, Florida and Georgia on January 10, 2001 and in Mississippi on January 30, 2001.

Southern Company also owns all the outstanding common stock of Southern LINC, Southern Company GAS, Southern Nuclear, SCS, Southern Telecom, Southern Holdings and other direct and indirect subsidiaries. Southern LINC provides digital wireless communications services to Southern Company's retail operating companies and also markets these services to the public within the Southeast. Southern Company GAS, which began operation in August 2002, is a competitive retail natural gas marketer serving communities in Georgia. Southern Nuclear provides services to Alabama Power's and Georgia Power's nuclear plants. SCS is the system service company providing, at cost, specialized services to Southern Company and its subsidiary companies. Southern Telecom provides wholesale fiber optic solutions to telecommunication providers in the Southeastern United States. Southern Holdings is an intermediate holding subsidiary for Southern Company's investments in leveraged leases and synthetic fuel products and an energy services business.

Alabama Power and Georgia Power each own 50% of the outstanding common stock of SEGCO. SEGCO owns electric generating units with an aggregate capacity of 1,019,680 kilowatts at Plant Gaston on the Coosa River near Wilsonville, Alabama, and Alabama Power and Georgia Power are each entitled to one-half of SEGCO's capacity and energy. Alabama Power acts as SEGCO's agent in the operation of SEGCO's units and furnishes coal to SEGCO as fuel for its units. SEGCO also owns three 230,000 volt transmission lines extending from Plant Gaston to the Georgia state line at which point connection is made with the Georgia Power transmission line system.

Reference is made to Note 10 to the financial statements of Southern Company in Item 8 herein for additional information regarding Southern Company's segment and related information.

The registrants' Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and all amendments to those reports are made available, free of charge, as soon as reasonably practicable after such material is electronically filed with or furnished to the SEC. Southern Company's internet address is http://www.southerncompany.com.

## The SOUTHERN System

### Retail Operating Companies

The transmission facilities of each of the retail operating companies are connected to the respective company's own generating plants and other sources of power and are interconnected with the transmission facilities of the other retail operating companies and SEGCO by means of heavy-duty high voltage lines. (For information on Georgia Power's integrated transmission system, see Item 1 - BUSINESS - "Territory Served by the Utilities" herein.)

Operating contracts covering arrangements in effect with principal neighboring utility systems provide for capacity exchanges, capacity purchases and sales, transfers of economy energy and other similar transactions. Additionally, the retail operating companies have entered into voluntary reliability agreements with the subsidiaries of Entergy Corporation, Florida Electric Power Coordinating Group and TVA and with Carolina Power & Light Company, Duke Energy Corporation, South Carolina Electric & Gas Company and Virginia Electric and Power Company, each of which provides for the establishment and periodic review of principles and procedures for planning and operation of generation and transmission facilities, maintenance schedules, load retention programs, emergency operations and other matters affecting the reliability of bulk power supply. The retail operating companies have joined with other utilities in the Southeast (including those referred to above) to form the SERC to augment further the reliability and adequacy of bulk power supply. Through the SERC, the retail operating companies are represented on the National Electric Reliability Council.

An intra-system interchange agreement provides for coordinating operations of the power producing facilities of the retail operating companies and Southern Power and the capacities available to such companies from non-affiliated sources and for the pooling of surplus energy available for interchange. Coordinated operation of the entire interconnected system is conducted through a central power supply coordination office maintained by SCS. The available sources of energy are allocated to the retail operating companies and Southern Power to provide the most economical sources of power consistent with good operation. The resulting benefits and savings are apportioned among each of the companies.

SCS has contracted with Southern Company, each retail operating company, Southern Power, Southern Nuclear, SEGCO and other subsidiaries to furnish, at direct or allocated cost and upon request, the following services: general and design engineering, purchasing, accounting and statistical analysis, finance and treasury, tax, information resources, marketing, auditing, insurance and pension administration, human resources, systems and procedures; and other services with respect to business and operations and power pool transactions. Southern Power, Southern Company GAS, Southern LINC and Southern Telecom have also secured from the retail operating companies certain services which are furnished at cost.

Southern Nuclear has contracts with Alabama Power to operate Plant Farley and with Georgia Power to operate Plants Hatch and Vogtle. See Item 1 - BUSINESS - "Regulation - Atomic Energy Act of 1954" herein.

### Southern Power

Southern Power is an electric wholesale generation subsidiary with market-based rates. Southern Power constructs, owns and manages generating facilities and sells the output under long-term, fixed-price capacity contracts both to unaffiliated wholesale purchasers as well as to the retail operating companies (under PPAs approved by the respective PSCs). Southern Power's business activities are not subject to traditional state regulation of utilities but are subject to regulation by the FERC. Southern Power has attempted to insulate itself from significant fuel supply, fuel transportation and electric transmission risk by making such risks the

responsibility of the counterparties to the PPAs. However, Southern Power's overall profit will depend on the parameters of the wholesale market and its efficient operation of its wholesale generating assets. By the end of 2005, Southern Power plans to have approximately 6,000 megawatts of available generating capacity in commercial operation. At December 31, 2003, Southern Power had approximately 4,800 megawatts of generating capacity in commercial operation.

## Other Business

In June 2002, Southern Company formed a wholly-owned subsidiary, Southern Company GAS. Southern Company GAS operates as a retail gas marketer in the State of Georgia. Southern Company GAS completed its acquisition out of bankruptcy from The New Power Company (New Power) and began operations in July 2002. Southern Company GAS also purchased proprietary risk management software and hardware systems, natural gas inventory and accounts receivable from New Power. The total purchase price was approximately $60 million. Southern Company GAS has a 13.5% market share as of December 31, 2003.

Southern Holdings is an intermediate holding subsidiary for Southern Company's investments in leveraged leases and synthetic fuel products, in addition to Southern Company Energy Solutions LLC (SCES LLC), which provides energy services.

In 1996, Southern LINC began serving Southern Company's retail operating companies and marketing its services to non-affiliates within the Southeast. Its system covers approximately 127,000 square miles and combines the functions of two-way radio dispatch, cellular phone, short text and numeric messaging and wireless internet access and data transfer.

These continuing efforts to invest in and develop new business opportunities offer potential returns exceeding those of rate-regulated operations. However, these activities also involve a higher degree of risk.

In 1999, MESH, a subsidiary of Southern Company, filed a petition for Chapter 11 bankruptcy relief in the U.S. Bankruptcy Court. In 2001, MESH filed an amended plan of reorganization, which the U. S. Bankruptcy Court confirmed in September 2003. The plan became effective in late 2003, and Southern Company's equity interest in MESH, which had been written off entirely prior to 2001, was extinguished. Reference is made to Item 3 - "Legal Proceedings" and Note 3 to the financial statements of Southern Company in Item 8 herein under the heading "Mirant Related Matters - *Mobile Energy Services' Petition for Bankruptcy*" for additional information relating to this matter.

## Mirant Corporation

In April 2001, the spin off of Mirant was completed. As a result of the spin off, Southern Company's financial statements and related information reflect Mirant as discontinued operations. Reference is made to Note 3 to the financial statements of Southern Company in Item 8 herein under the heading "Mirant Related Matters" for additional information regarding Mirant.

## Risk Factors

**In addition to the other information in this Form 10-K and other documents filed by Southern Company and/or its subsidiaries with the SEC from time to time, the following factors should be carefully considered in evaluating Southern Company and its subsidiaries. Such factors could affect actual results and cause results to differ materially from those expressed in any forward-looking statements made by, or on behalf of, Southern Company and/or its subsidiaries. Some or all of these factors may apply to Southern Company and/or its subsidiaries.**

### Risks Related to the Energy Industry

**Southern Company is subject to substantial governmental regulation. Compliance with current and future regulatory requirements and procurement of necessary approvals, permits and certificates may result in substantial costs to Southern Company.**

Southern Company is subject to substantial regulation from federal, state and local regulatory agencies. Southern Company and its subsidiaries are required to comply with numerous laws and regulations and to obtain numerous permits, approvals and certificates from the governmental agencies that regulate various aspects of their businesses, including customer rates, service regulations, retail service territories, sales

of securities, asset acquisitions and sales, accounting policies and practices, and the operation of fossil-fuel, hydroelectric and nuclear generating facilities. For example, the rates charged to wholesale customers by the retail operating companies and by Southern Power must be approved by the FERC. In addition, the respective state PSCs must approve the retail operating companies' rates for retail customers. Southern Company believes the necessary permits, approvals and certificates have been obtained for its existing operations and that its business is conducted in accordance with applicable laws; however, Southern Company is unable to predict the impact on its operating results from future regulatory activities of these agencies.

Southern Company is also subject to regulation by the SEC under the Holding Company Act. The rules and regulations promulgated under the Holding Company Act impose a number of restrictions on the operations of registered utility holding companies and their subsidiaries. These restrictions include a requirement that, subject to a number of exceptions, the SEC approve in advance securities issuances, acquisitions and dispositions of utility assets or of securities of utility companies, and acquisitions of other businesses. The Holding Company Act also generally limits the operations of a registered holding company to a single integrated public utility system, plus additional energy-related businesses. The Holding Company Act requires that transactions between affiliated companies in a registered holding company system be performed at cost, with limited exceptions.

The impact of any future revision or changes in interpretations of existing regulations or the adoption of new laws and regulations applicable to Southern Company or any of its subsidiaries cannot now be predicted. Changes in regulation or the imposition of additional regulations could influence Southern Company's operating environment and may result in substantial costs to Southern Company.

**General Risks Related to Operation of Southern Company's Utility Subsidiaries**

**The regional power market in which Southern Company and its subsidiaries compete has changing transmission regulatory structures, which could affect the ownership of these assets and related revenues and expenses.**

The retail operating companies currently own and operate transmission facilities as part of a vertically integrated utility. Transmission revenues are not separated from generation and distribution revenues in their approved retail rates. Federal governmental authorities are advocating the formation of RTOs and are proposing the adoption of new regulations that would impact electric markets, including the transmission regulatory structure. Under this new transmission regulatory structure, the retail operating companies would transfer functional control (but not ownership) of their transmission facilities to an independent third party. Because it remains unclear how RTOs will develop or what new market rules will be established, Southern Company is unable to assess fully the impact that these developments may have on its business. Southern Company's revenues, expenses, assets and liabilities could be adversely affected by changes in the transmission regulatory structure in its regional power market.

**Recent events in the energy markets that are beyond Southern Company's control have increased the level of public and regulatory scrutiny in the energy industry and in the capital markets. The reaction to these events may result in new laws or regulations related to Southern Company's business operations or the accounting treatment of its existing operations which could have a negative impact on Southern Company's net income or access to capital.**

As a result of the energy crisis in California during the summer of 2001, the filing of bankruptcy by Enron Corporation, investigations by governmental authorities into energy trading activities and the August 2003 power outage in the Northeast, companies generally in the regulated and unregulated utility businesses have been under an increased amount of public and regulatory scrutiny with respect to, among other things, accounting practices, financial disclosures and relationships with independent auditors. The capital markets and ratings agencies also have increased their level of scrutiny. This increased scrutiny could lead to substantial changes in laws and regulations affecting Southern Company, including new accounting standards that could change the way Southern Company is required to record revenues, expenses, assets and liabilities. These types of disruptions in the industry and any resulting regulations may have a negative impact on Southern Company's net income or access to capital.

**Deregulation or restructuring in the electric industry may result in increased competition and unrecovered costs which could negatively impact Southern Company's earnings.**

Increased competition which may result from restructuring efforts could have a significant adverse financial impact on Southern Company and its retail operating companies. Increased competition could result in increased pressure to lower the cost of electricity. Any adoption in the territories served by the retail operating companies of retail competition and the unbundling of regulated energy service could have a significant adverse financial impact on Southern Company and the retail operating companies due to an impairment of assets, a loss of retail customers, lower profit margins, an inability to recover reasonable costs or increased costs of capital. Southern Company cannot predict if or when it will be subject to changes in legislation or regulation, nor can Southern Company predict the impact of these changes.

Additionally, the electric utility industry has experienced a substantial increase in competition at the wholesale level, caused by changes in federal law and regulatory policy. As a result of the Public Utility Regulatory Policies Act of 1978 and the Energy Act, competition in the wholesale electricity market has greatly increased due to a greater participation by traditional electricity suppliers, non-utility generators, independent power producers, wholesale power marketers and brokers, and due to the trading of energy futures contracts on various commodities exchanges. In 1996, the FERC issued new rules on transmission service to facilitate competition in the wholesale market on a nationwide basis. The rules give greater flexibility and more choices to wholesale power customers. Also, in July 2002, the FERC issued a notice of proposed rulemaking (which has not yet been adopted) related to open access transmission service and standard electricity market design. In addition, in April 2003, the FERC issued a White Paper in response to public comments received on such proposed rulemaking on standard electricity market design. Reactions to the White Paper by Southeastern state regulators reflect significant continuing differences in opinion between the FERC and various state regulatory commissions over questions of jurisdiction and protection of retail customers. As a result of the changing regulatory environment and the relatively low barriers to entry (which include, in addition to open access transmission service, relatively low construction costs for new generating facilities), Southern Company expects competition to steadily increase. This increased competition could affect Southern Company's load forecasts, plans for power supply and wholesale energy sales and related revenues. The effect on Southern Company's net income and financial condition could vary depending on the extent to which: (i) additional generation is built to compete in the wholesale market; (ii) new opportunities are created for Southern Company to expand its wholesale load; or (iii) current wholesale customers elect to purchase from other suppliers after existing contracts expire.

Southern Power currently has general authorization from the FERC to sell power to nonaffiliates at market-based prices. In addition, each of the retail operating companies has obtained FERC approval to sell power to nonaffiliates at market-based prices under specific contracts. Southern Power and the retail operating companies also have FERC authority to make short-term opportunity sales at market rates. Specific FERC approval must be obtained with respect to a market-based contract with an affiliate. In November 2001, the FERC modified the test it uses to consider utilities' applications to charge market-based rates and adopted a new test called the Supply Margin Assessment (SMA). The FERC applied the SMA to several utilities, including Southern Company, and found Southern Company and others to be "pivotal suppliers" in their service areas and ordered the implementation of several mitigation measures. Southern Company and others sought rehearing of the FERC order, and the FERC delayed the implementation of certain mitigation measures. Southern Company and others submitted comments to the FERC in 2002 regarding these issues. In December 2003, the FERC issued a staff paper discussing alternatives and held a technical conference in January 2004. Southern Company anticipates that the FERC will address the requests for rehearing in the near future. Regardless of the outcome of the SMA proposal, the FERC retains the ability to modify or withdraw the authorization for any seller to sell at market-based rates, if it determines that the underlying conditions for having such authority are no longer applicable. In that event, Southern Power would be required to obtain FERC approval of rates based on cost of service, which may be lower than those in negotiated market-based rates. The final outcome of this matter will depend on the form in which the SMA test and mitigation measures' rules may be ultimately adopted and cannot be determined at this time.

PPAs by Georgia Power and Savannah Electric for Southern Power's Plant McIntosh capacity were certified by the Georgia PSC in December 2002 after a competitive bidding process. In April 2003, Southern Power applied for FERC approval of these PPAs. Interveners opposed the FERC's acceptance of the PPAs, alleging that the PPAs do not meet the applicable standards for market-based rates between affiliates. In July 2003, the FERC accepted the PPAs to become effective as scheduled on June 1, 2005, subject to refund, and ordered that hearings be held. For additional information, see Note 3 to the financial statements of Southern Company, Georgia Power, Savannah Electric and Southern Power under "FERC Matters" in Item 8 herein.

**Risks Related to Environmental Regulation**

**Southern Company's costs of compliance with environmental laws are significant. The costs of compliance with future environmental laws and the incurrence of environmental liabilities could harm Southern Company's cash flow and profitability.**

Southern Company and its subsidiaries are subject to extensive federal, state and local environmental requirements which, among other things, regulate air emissions, water discharges and the management of hazardous and solid waste in order to adequately protect the environment. Compliance with these legal requirements requires Southern Company to commit significant expenditures for installation of pollution control equipment, environmental monitoring, emissions fees and permits at all of its facilities. These expenditures are significant and Southern Company expects that they will increase in the future. For example, construction expenditures for achieving compliance with Title IV of the Clean Air Act totaled approximately $400 million. Construction expenditures for compliance with the nitrogen oxide emission reduction requirements totaled approximately $980 million through 2003.

Litigation over environmental issues and claims of various types, including property damage, personal injury, and citizen enforcement of environmental requirements, has increased generally throughout the United States. In particular, personal injury claims for damages caused by alleged exposure to hazardous materials and electromagnetic fields have become more frequent. Although the ultimate outcome of such litigation cannot be predicted, management does not anticipate that the liabilities, if any, arising from such current proceedings would have a material adverse effect on the financial statements of Southern Company and its subsidiaries.

If Southern Company fails to comply with environmental laws and regulations, even if caused by factors beyond its control, that failure may result in the assessment of civil or criminal penalties and fines against Southern Company. The EPA has filed civil actions against Alabama Power, Georgia Power and Savannah Electric alleging violations of the new source review provisions of the Clean Air Act. The EPA has also issued notices of violation to Gulf Power and Mississippi Power. An adverse outcome in any one of these cases could require substantial capital expenditures that cannot be determined at this time and could require payment of substantial penalties.

Existing environmental laws and regulations may be revised or new laws and regulations seeking to protect the environment may be adopted or become applicable to Southern Company. Revised or additional laws and regulations could result in significant additional expense and operating restrictions on Southern Company's facilities or increased compliance costs which may not be fully recoverable from Southern Company's customers and would therefore reduce Southern Company's net income. The cost impact of such legislation would depend upon the specific requirements enacted and cannot be determined at this time.

**Risks Related to Southern Company and its Business**

**Southern Company may be unable to meet its ongoing and future financial obligations and to pay dividends on its common stock if its subsidiaries are unable to pay upstream dividends or repay funds to Southern Company.**

Southern Company is a holding company and, as such, Southern Company has no operations of its own. Southern Company's ability to meet its financial obligations and to pay dividends on its common stock at the current rate is primarily dependent on the earnings and cash flows of its subsidiaries and their ability to pay upstream dividends or to repay funds to Southern Company. Prior to funding Southern Company, Southern Company's subsidiaries have financial obligations that must be satisfied, including among

others, debt service and preferred stock dividends. In addition, the Holding Company Act rules limit the dividends that Southern Company's subsidiaries may pay from unearned surplus.

**Southern Company's financial performance may be adversely affected if its subsidiaries are unable to successfully operate their facilities.**

Southern Company's financial performance depends on the successful operation of its subsidiaries' electric generating, transmission and distribution facilities. Operating these facilities involves many risks, including:

- operator error and breakdown or failure of equipment or processes;
- operating limitations that may be imposed by environmental or other regulatory requirements;
- labor disputes;
- terrorist attacks;
- fuel supply interruptions; and
- catastrophic events such as fires, earthquakes, explosions, floods or other similar occurrences.

A decrease or elimination of revenues from power produced by the electric generating facilities or an increase in the cost of operating the facilities would reduce Southern Company's net income and could decrease or eliminate funds available to Southern Company.

**Southern Company's revenues depend in part on sales under PPAs. The failure of a counterparty to one of these PPAs to perform its obligations, or the failure to renew the PPAs, could have a negative impact on Southern Company's earnings.**

Most of Southern Power's generating capacity under construction, or planned, has been sold to purchasers under PPAs having initial terms of five to 15 years. Southern Power's revenues are dependent on the continued performance by the purchasers of their obligations under the PPAs. Even though Southern Power has a rigorous credit evaluation, the failure of one of the purchasers to perform its obligations could have a negative impact on Southern Power's earnings. Although Southern Power's credit evaluations take into account the possibility of default by a purchaser, Southern Power's actual exposure to a default by a purchaser may be greater than Southern Power's credit evaluation predicts. Further, while the PPAs are currently a substantial portion of Southern Power's business, Southern Power cannot predict whether they will be renewed at the end of their respective terms or on what terms any renewals may be made. If a PPA is not renewed, Southern Power cannot predict whether it will be replaced.

**Southern Company and its subsidiaries may incur additional costs or delays in power plant construction and may not be able to recover their investment. Southern Company's facilities require ongoing capital expenditures.**

Southern Power is in the process of constructing new generating facilities and intends to continue its strategy of developing and constructing other new facilities and expanding existing facilities. The completion of these facilities without delays or cost overruns is subject to substantial risks, including:

- shortages and inconsistent quality of equipment, materials and labor;
- work stoppages;
- permits, approvals and other regulatory matters;
- adverse weather conditions;
- unforeseen engineering problems;
- environmental and geological conditions;
- delays or increased costs to interconnect its facilities to transmission grids;
- unanticipated cost increases; and
- attention to other projects.

If Southern Power is unable to complete the development or construction of a facility, or if Southern Power decides to delay or cancel construction of a facility, Southern Power may not be able to recover its investment in that facility. In addition, construction delays and contractor performance shortfalls can result in the loss of revenues and may, in turn, adversely affect Southern Power's results of operations and financial position. Furthermore, if construction projects are not completed according to specification, Southern Power may incur liabilities and suffer reduced plant efficiency, higher operating costs and reduced earnings.

Once facilities come into commercial operation, ongoing capital expenditures are required to maintain reliable levels of operation.

**Changes in technology may make Southern Company's electric generating facilities less competitive.**

A key element of Southern Company's business model is that generating power at central power plants achieves economies of scale and produces power at relatively low cost. There are other technologies that produce power, most notably fuel cells, microturbines, windmills and solar cells. It is possible that advances in technology will reduce the cost of alternative methods of producing power to a level that is competitive with that of most central power station electric production. If this were to happen and if these technologies achieved economies of scale, Southern Company's market share could be eroded, and the value of its electric generating facilities could be reduced. Changes in technology could also alter the channels through which retail electric customers buy power, which could reduce Southern Company's revenues or increase expenses.

**Operation of nuclear facilities involves inherent risks, including environmental, health, regulatory, terrorism and financial risks that could result in fines or the closure of Southern Company's nuclear units, and which may present potential exposures in excess of Southern Company's insurance coverage.**

Southern Company owns six nuclear units through Alabama Power (two units) and through Georgia Power, which holds undivided interests in, and contracts for operation of, four units. These six nuclear units are operated by Southern Nuclear and represent approximately 3,680 megawatts, or 9.5% of Southern Company's generation capacity as of December 31, 2003. Southern Company's nuclear facilities are subject to environmental, health and financial risks such as on-site storage of spent nuclear fuel, the ability to dispose of such spent nuclear fuel, the ability to maintain adequate reserves for decommissioning, potential liabilities arising out of the operation of these facilities and the threat of a possible terrorist attack. Southern Company maintains decommissioning trusts and external insurance coverage to minimize the financial exposure to these risks; however, it is possible that damages could exceed the amount of Southern Company's insurance coverage.

The NRC has broad authority under federal law to impose licensing and safety-related requirements for the operation of nuclear generation facilities. In the event of non-compliance, the NRC has the authority to impose fines or shut down a unit, or both, depending upon its assessment of the severity of the situation, until compliance is achieved. Recent NRC orders related to increased security measures and any future safety requirements promulgated by the NRC could require Southern Company to make substantial operating and capital expenditures at its nuclear plants. In addition, although Southern Company has no reason to anticipate a serious nuclear incident at its plants, if an incident did occur, it could result in substantial costs to Southern Company. A major incident at a nuclear facility anywhere in the world could cause the NRC to limit or prohibit the operation or licensing of any domestic nuclear unit.

Southern Company's nuclear units require licenses that need to be renewed or extended in order to continue operating beyond their initial forty-year terms. As a result of potential terrorist threats and increased public scrutiny of utilities, the licensing process could result in increased licensing or compliance costs that are difficult or impossible to predict.

**Southern Company's generation and energy marketing operations are subject to risks, many of which are beyond its control, that may reduce Southern Company's revenues and increase its costs.**

Southern Company's generation and energy marketing operations are subject to changes in power prices or fuel costs, which could increase the cost of producing power or decrease the amount Southern Company receives from the sale of power. The market prices for these commodities may fluctuate over relatively short periods of time. Southern Company attempts to mitigate risks associated with fluctuating fuel costs by passing these costs on to customers in its PPAs. Among the factors that could influence power prices and fuel costs are:

- prevailing market prices for coal, natural gas, fuel oil and other fuels used in Southern Company's generation facilities, including associated transportation costs, and supplies of such commodities;

- demand for energy and the extent of additional supplies of energy available from current or new competitors;
- liquidity in the general wholesale electricity market;
- weather conditions impacting demand for electricity;
- seasonality;
- transmission or transportation constraints or inefficiencies;
- availability of competitively priced alternative energy sources;
- economy in the service territory;
- natural disasters, wars, embargos, acts of terrorism and other catastrophic events; and
- federal, state and foreign energy and environmental regulation and legislation.

Certain of these factors could increase Southern Company's expenses. For the retail operating companies, such increases may not be fully recoverable through rates. Other of these factors could reduce Southern Company's revenues.

**The use of derivative contracts by Southern Company and its subsidiaries in the normal course of business could result in financial losses that negatively impact the results of operations of Southern Company and its subsidiaries.**

Southern Company and its subsidiaries use derivative instruments, such as swaps, options, futures and forwards, to manage their commodity and financial market risks and, to a lesser extent, engage in limited trading activities. Southern Company and its subsidiaries could recognize financial losses as a result of volatility in the market values of these contracts, or if a counterparty fails to perform.

**Southern Company may not be able to obtain adequate fuel supplies, which could limit its ability to operate its facilities.**

Southern Company purchases fuel from a number of suppliers. Disruption in the delivery of fuel, including disruptions as a result of, among other things, weather, labor relations or environmental regulations affecting Southern Company's fuel suppliers, could limit Southern Company's ability to operate its facilities, and thus, reduce its net income.

**Demand for power could exceed Southern Company's supply capacity, resulting in increased costs to Southern Company for purchasing capacity in the open market or building additional generation capabilities.**

Southern Company is currently obligated to supply power to regulated retail and wholesale customers. At peak times, the demand for power required to meet this obligation could exceed Southern Company's available generation capacity. Market or competitive forces may require that Southern Company purchase capacity on the open market or build additional generation capabilities. Because regulators may not permit the retail operating companies to pass all of these purchase or construction costs on to their customers, the retail operating companies may not be able to recover any of these costs or may have exposure to regulatory lag associated with the time between the incurrence of costs of purchased or constructed capacity and the retail operating companies' recovery in customers' rates. Under Southern Power's long-term fixed price PPAs, Southern Power would not have the ability to recover any of these costs.

**Southern Company's operating results are affected by weather conditions and may fluctuate on a seasonal and quarterly basis.**

Electric power generation is generally a seasonal business. In many parts of the country, demand for power peaks during the hot summer months, with market prices also peaking at that time. In other areas, power demand peaks during the winter. As a result, Southern Company's overall operating results in the future may fluctuate substantially on a seasonal basis. In addition, Southern Company has historically sold less power, and consequently earned less income, when weather conditions are milder. Unusually mild weather in the future could reduce Southern Company's revenues, net income, available cash and borrowing ability.

Risks Related to Market and Economic Volatility

**Southern Company's business is dependent on its ability to successfully access capital markets. Southern Company's inability to access capital may limit its ability to execute its business plan or pursue improvements and make acquisitions that Southern Company may otherwise rely on for future growth.**

Southern Company relies on access to both short-term money markets and longer-term capital markets as a significant source of liquidity for capital requirements not satisfied by the cash flow from its operations. If Southern Company is not able to access capital at competitive rates, its ability to implement its business plan or pursue improvements and make acquisitions that Southern Company may otherwise rely on for future growth will be limited. Southern Company believes that it will maintain sufficient access to these financial markets based upon current credit ratings. However, certain market disruptions or a downgrade of Southern Company's credit rating may increase its cost of borrowing or adversely affect its ability to raise capital through the issuance of securities or other borrowing arrangements. Such disruptions could include:

- an economic downturn;
- the bankruptcy of an unrelated energy company;
- capital market conditions generally;
- market prices for electricity and gas;
- terrorist attacks or threatened attacks on Southern Company's facilities or unrelated energy companies;
- war or threat of war; or
- the overall health of the utility industry.

**Southern Company is subject to risks associated with a changing economic environment, including Southern Company's ability to obtain insurance, the financial stability of its customers and Southern Company's ability to raise capital.**

Due to the September 11, 2001 terrorist attacks and the resulting ongoing war against terrorism by the United States, the nation's economy and financial markets were disrupted in general. The insurance industry has also been disrupted by these events. The availability of insurance covering risks Southern Company and its competitors typically insure against may decrease, and the insurance that Southern Company is able to obtain may have higher deductibles, higher premiums and more restrictive policy terms. Any economic downturn or disruption of financial markets could constrain the capital available to Southern Company's industry and could reduce Southern Company's access to funding for its operations, as well as the financial stability of its customers and counterparties. These factors could adversely affect Southern Company's subsidiaries' ability to achieve energy sales growth, thereby decreasing Southern Company's level of future earnings.

**Construction Programs**

The subsidiary companies of Southern Company are engaged in continuous construction programs to accommodate existing and estimated future loads on their respective systems. Construction expenditures during 2004 through 2006 by the retail operating companies, Southern Power, SEGCO, SCS, Southern LINC and other subsidiaries are estimated as follows:

| | 2004 | 2005 | 2006 |
|---|---|---|---|
| | (in millions) | | |
| Alabama Power | $ 791 | $ 863 | $ 884 |
| Georgia Power | 747 | 812 | 1,043 |
| Gulf Power | 166 | 149 | 108 |
| Mississippi Power | 80 | 70 | 98 |
| Savannah Electric | 52 | 43 | 41 |
| Southern Power | 259 | 254 | 356 |
| SEGCO | 13 | 9 | 7 |
| SCS | 27 | 24 | 20 |
| Southern LINC | 22 | 22 | 20 |
| Other | 7 | 3 | 2 |
| Southern Company system | $2,164 | $2,249 | $2,579 |

Also included in the foregoing construction expenditure estimates are the estimates for environmental expenditures. Reference is made to each registrant's "Management Discussion and Analysis – Capital Requirements and Contractual Obligations" in Item 7 herein for information on estimated environmental expenditures.

Estimated construction costs in 2004 are expected to be apportioned approximately as follows: (in millions)

| | Southern Company system* | Alabama Power | Georgia Power | Gulf Power | Mississippi Power | Savannah Electric | Southern Power |
|---|---|---|---|---|---|---|---|
| New generation | $ 259 | $ - | $ - | $- | $ - | $ - | $259 |
| Other generating facilities including associated plant substations | 646 | 324 | 169 | 101 | 29 | 11 | - |
| New business | 365 | 130 | 187 | 24 | 13 | 11 | - |
| Transmission | 342 | 128 | 167 | 18 | 13 | 15 | - |
| Joint line and substation | 56 | - | 48 | 4 | 4 | - | - |
| Distribution | 221 | 110 | 70 | 12 | 16 | 13 | - |
| Nuclear fuel | 92 | 40 | 52 | - | - | - | - |
| General plant | 183 | 59 | 54 | 7 | 5 | 2 | - |
| | $2,164 | $791 | $747 | $166 | $80 | $52 | $259 |

*SCS, Southern LINC and other businesses plan capital additions to general plant in 2004 of $27 million, $22 million and $7 million, respectively, while SEGCO plans capital additions of $12 million to generating facilities and $1 million to transmission facilities. (See Item 1 - BUSINESS - "Other Business" herein.)

The construction programs are subject to periodic review and revision, and actual construction costs may vary from the above estimates because of changes in such factors as: business conditions; acquisition of additional generating assets; environmental regulations; nuclear plant regulations; FERC rules and transmission regulations; load projections; the cost and efficiency of construction labor, equipment and materials; and cost of capital. In addition, there can be no assurance that costs related to capital expenditures will be fully recovered.

Southern Company has approximately 1,200 megawatts of new generating capacity scheduled to be placed in service by 2005. The additional new capacity will be dedicated to the wholesale market and owned by Southern Power. Reference is made to Note 3 to the financial statements of Southern Company, Georgia Power, Savannah Electric and Southern Power in Item 8 herein under the heading "FERC Matters" for additional information regarding contracts for this capacity. In addition, capital improvements, including those needed to meet the environmental standards previously discussed for the retail operating companies' generation, transmission, and distribution facilities are ongoing.

Under Georgia law, Georgia Power and Savannah Electric each are required to file an Integrated Resource Plan for approval by the Georgia PSC. Under the plan rules, the Georgia PSC must pre-certify the construction of new power plants and new PPAs. (See Item 1 - BUSINESS - "Rate Matters - Integrated Resource Planning" herein and Note 3 to the financial statements of Southern Company in Item 8 herein under the heading "FERC Matters" for information regarding PPAs by Georgia Power and Savannah Electric for Southern Power's Plant McIntosh capacity.)

See Item 1 - BUSINESS - "Regulation - Environmental Statutes and Regulations" herein for information with respect to certain existing and proposed environmental requirements and Item 2 - PROPERTIES - "Jointly-Owned Facilities" herein for additional information concerning Alabama Power's, Georgia Power's and Southern Power's joint ownership of certain generating units and related facilities with certain non-affiliated utilities.

## Financing Programs

The amount and timing of additional equity capital to be raised in 2004, as well as in subsequent years, will be contingent on Southern Company's investment opportunities. Equity capital can be provided from any combination of public offerings, private placements and Southern Company's stock plans.

The retail operating companies plan to obtain the funds required for construction and other purposes from sources similar to those used in the past, which were primarily from internal sources and by the issuances of new debt and preferred equity securities, term loans and short-term borrowings. However, the type and timing of any financings -- if needed -- will depend on market conditions and regulatory approval. In recent years, financings primarily have been unsecured debt and trust preferred securities.

Southern Power will use both external funds and equity capital from Southern Company to finance its construction program. External funds are expected to be obtained from the issuance of unsecured senior debt and commercial paper or through existing credit arrangements from banks.

Southern Company and each retail operating company obtain financing separately without credit support from any affiliate. Currently, Southern Company provides limited credit support to Southern Power. Reference is made to Note 6 to the financial statements of Southern Company and Southern Power in Item 8 herein under the headings, "Bank Credit Arrangements" and "Parent Company Transactions," respectively, for additional information. The Southern Company system does not maintain a centralized cash or money pool. Therefore, funds of each company are not commingled with funds of any other company. In accordance with the Holding Company Act, most loans between affiliated companies must be approved by the SEC.

Short-term debt is utilized as appropriate at Southern Company, the retail operating companies and Southern Power.

The maximum amounts of short-term and/or term-loan indebtedness authorized by the appropriate regulatory authorities and, in the case of Southern Power, long-term debt which also falls under Southern Power's regulatory authority, are shown in the following table:

| | Amount Authorized | Outstanding at December 31, 2003 |
|---|---|---|
| | (in millions) | |
| Alabama Power | $1,000(1) | $ 0 |
| Georgia Power | 3,200(2) | 137 |
| Gulf Power | 600(1) | 38 |
| Mississippi Power | 500(1) | 0 |
| Savannah Electric | 120(2) | 20 |
| Southern Power | 2,500(3) | 1,264 |
| Southern Company | 2,000(1) | 259 |

Notes:

(1) Alabama Power's authority is based on authorization received from the Alabama PSC, which expires December 31, 2005. No SEC authorization is required for Alabama Power. Gulf Power, Mississippi Power and Southern Company have received SEC authorization to issue from time to time short-term and/or term-loan notes to banks and commercial paper to dealers in the amounts shown through January 1, 2007, March 31, 2006 and December 31, 2004, respectively.

(2) Georgia Power and Savannah Electric have received SEC authorization to issue from time to time short-term and term-loan notes to banks and commercial paper to dealers in the amounts shown through March 31, 2006. Authorization for term-loan indebtedness is also required by the Georgia PSC. Savannah Electric has $75 million remaining authority for long-term debt and term loans expiring December 31, 2005. At February 25, 2004, Georgia Power has $681 million remaining refunding authority from the Georgia PSC expiring December 31, 2005. Georgia Power also has Georgia PSC authority for borrowings under the term loan provisions of its credit facilities of $725 million.

(3) Southern Power has been authorized by the SEC to enter into various financing arrangements, including short-term loans, through June 30, 2005, which in the aggregate may not exceed $2.5 billion.

Reference is made to Note 6 to the financial statements for each of the registrants under the heading "Bank Credit Arrangements" in Item 8 herein for information regarding the registrants' bank credit arrangements.

## Fuel Supply

The retail operating companies' and SEGCO's supply of electricity is derived predominantly from coal. Southern Power's supply of electricity is primarily fueled by natural gas. The sources of generation for the years 2001 through 2003 are shown below:

| | Coal % | Nuclear % | Hydro % | Gas % | Oil % |
|---|---|---|---|---|---|
| **Alabama Power** | | | | | |
| 2001 | 64 | 18 | 6 | 12 | * |
| 2002 | 62 | 19 | 6 | 13 | * |
| 2003 | 64 | 19 | 8 | 9 | * |
| **Georgia Power** | | | | | |
| 2001 | 75 | 23 | 1 | 1 | * |
| 2002 | 78 | 21 | 1 | * | * |
| 2003 | 75 | 22 | 3 | * | * |
| **Gulf Power** | | | | | |
| 2001 | 99 | ** | ** | 1 | * |
| 2002 | 82 | ** | ** | 18 | * |
| 2003 | 87 | ** | ** | 13 | * |
| **Mississippi Power** | | | | | |
| 2001 | 59 | ** | ** | 41 | * |
| 2002 | 57 | ** | ** | 43 | * |
| 2003 | 74 | ** | ** | 26 | * |
| **Savannah Electric** | | | | | |
| 2001 | 93 | ** | ** | 6 | 1 |
| 2002 | 91 | ** | ** | 8 | 1 |
| 2003 | 94 | ** | ** | 4 | 2 |
| **SEGCO** | | | | | |
| 2001 | 100 | ** | ** | * | * |
| 2002 | 100 | ** | ** | * | * |
| 2003 | 100 | ** | ** | * | * |
| **Southern Power** | | | | | |
| 2001 | ** | ** | ** | 100 | * |
| 2002 | ** | ** | ** | 100 | * |
| 2003 | ** | ** | ** | 99 | 1 |
| **Southern Company system*** ** | | | | | |
| 2001 | 72 | 16 | 3 | 9 | * |
| 2002 | 69 | 16 | 3 | 12 | * |
| 2003 | 71 | 16 | 4 | 9 | * |

* Less than 0.5%.

** Not applicable.

*** Amounts shown for the Southern Company system are weighted averages of the retail operating companies, Southern Power and SEGCO.

The average costs of fuel in cents per net kilowatt-hour generated for 2001 through 2003 are shown below:

| | 2001 | 2002 | 2003 |
|---|---|---|---|
| **Alabama Power** | 1.56 | 1.47 | 1.67 |
| **Georgia Power** | 1.38 | 1.42 | 1.46 |
| **Gulf Power** | 1.76 | 2.08 | 2.11 |
| **Mississippi Power** | 1.89 | 2.03 | 1.95 |
| **Savannah Electric** | 2.16 | 2.44 | 2.38 |
| **SEGCO** | 1.44 | 1.50 | 1.52 |
| **Southern Power** | 4.07 | 2.81 | 2.01 |
| **Southern Company system*** | 1.56 | 1.61 | 1.72 |

* Amounts shown for the Southern Company system are weighted averages of the retail operating companies, Southern Power and SEGCO.

The retail operating companies have long-term agreements in place from which they expect to receive approximately 80% of their coal burn requirements in 2004. These agreements cover remaining terms up to 8 years. In 2003, the weighted average sulfur content of all coal burned by the retail operating companies was 0.75% sulfur. This sulfur level, along with banked sulfur dioxide allowances, allowed the retail operating companies to remain within limits as set forth by Phase II of the Clean Air Act. As more strict environmental regulations are proposed that impact the utilization of coal, the fuel mix will be monitored to insure that sufficient quantities of the proper type of coal or natural gas are in place to remain in compliance with applicable laws and regulations. See Item 1 - BUSINESS - "Regulation - Environmental Statutes and Regulations" herein.

The retail operating companies, Southern Power and Southern Company GAS also have long-term agreements in place for their natural gas burn requirements. For 2004, the retail operating companies, Southern Power and Southern Company GAS have contracted for 130 billion cubic feet of natural gas supply. These agreements cover remaining terms up to 4 years. In addition to gas supply, the retail operating companies, Southern Power and Southern Company GAS have contracts in place for both firm gas transportation and storage. Management believes that these contracts provide sufficient natural gas supplies, transportation and storage to ensure normal operations of the Southern Company system's natural gas generating units.

Changes in fuel prices to the retail operating companies and Southern Company GAS are generally reflected in fuel adjustment clauses contained in rate schedules. See Item 1 - BUSINESS - "Rate Matters - Rate Structure" herein.

Alabama Power and Georgia Power have numerous contracts covering a portion of their nuclear fuel needs for uranium, conversion services, enrichment services and fuel fabrication. These contracts have varying expiration dates and most are short to medium term (less than 10 years). Management believes that sufficient capacity for nuclear fuel supplies and processing exists to preclude the impairment of normal operations of the Southern Company system's nuclear generating units.

Alabama Power and Georgia Power have contracts with the DOE that provide for the permanent disposal of spent nuclear fuel. The DOE failed to begin disposing of spent fuel in January 1998, as required by the contracts, and the companies are pursuing legal remedies against the government for breach of contract. Sufficient pool storage capacity is available at Plant Farley to maintain full-core discharge capability until the refueling outages scheduled for 2006 and 2008 for units 1 and 2, respectively. Sufficient pool storage capacity for spent fuel is available at Plant Vogtle to maintain full-core discharge capability for both units into 2015. At Plant Hatch, an on-site dry storage facility became operational in 2000 and can be expanded to accommodate spent fuel through the life of the plant. Construction of an on-site dry storage facility at Plant Farley is in progress and scheduled for operation in 2005. Construction of an on-site dry storage facility at Plant Vogtle will begin in sufficient time to maintain pool full-core discharge capability.

The Energy Act required the establishment of a Uranium Enrichment Decontamination and Decommissioning Fund, which is funded in part by a special assessment on utilities with nuclear plants, including Alabama Power and Georgia Power. This assessment is being paid over a 15-year period which began in 1993. This fund will be used by the DOE for the decontamination and decommissioning of its nuclear fuel enrichment facilities. The law provides that utilities will recover these payments in the same manner as any other fuel expense. For additional information, reference is made to Note 1 to the financial statements of Southern Company, Alabama Power and Georgia Power in Item 8 herein under the heading "Revenues and Fuel Costs."

## Territory Served by the Utilities

The territory in which the retail operating companies provide electric service comprises most of the states of Alabama and Georgia together with the northwestern portion of Florida and southeastern Mississippi. In this territory there are non-affiliated electric distribution systems which obtain some or all of their power requirements either directly or indirectly from the retail operating companies. The territory has an area of approximately 120,000 square miles and an estimated population of approximately 11 million.

Alabama Power is engaged, within the State of Alabama, in the generation and purchase of electricity and the distribution and sale of such electricity at retail in

over 1,000 communities (including Anniston, Birmingham, Gadsden, Mobile, Montgomery and Tuscaloosa) and at wholesale to 15 municipally-owned electric distribution systems, 11 of which are served indirectly through sales to AMEA, and two rural distributing cooperative associations. Alabama Power also supplies steam service in downtown Birmingham. Alabama Power also sells, and cooperates with dealers in promoting the sale of, electric appliances.

Georgia Power is engaged in the generation and purchase of electricity and the distribution and sale of such electricity within the State of Georgia at retail in over 600 communities, as well as in rural areas, and at wholesale currently to OPC, MEAG, Dalton and the City of Hampton.

Gulf Power is engaged, within the northwestern portion of Florida, in the generation and purchase of electricity and the distribution and sale of such electricity at retail in 71 communities (including Pensacola, Panama City and Fort Walton Beach), as well as in rural areas, and at wholesale to a non-affiliated utility and a municipality.

Mississippi Power is engaged in the generation and purchase of electricity and the distribution and sale of such energy within the 23 counties of southeastern Mississippi, at retail in 123 communities (including Biloxi, Gulfport, Hattiesburg, Laurel, Meridian and Pascagoula), as well as in rural areas, and at wholesale to one municipality, six rural electric distribution cooperative associations and one generating and transmitting cooperative.

Savannah Electric is engaged, within a five-county area in eastern Georgia, in the generation and purchase of electricity and the distribution and sale of such electricity at retail.

Through the Southern Company system power pool, the retail operating companies are also engaged in the transmission and sale of wholesale energy.

For information relating to kilowatt-hour sales by classification for the retail operating companies, reference is made to "Management's Discussion and Analysis - Results of Operations" in Item 7 herein. Also, for information relating to the sources of revenues for the Southern Company system, each of the retail operating companies and Southern Power, reference is made to Item 6 herein.

A portion of the area served by the retail operating companies adjoins the area served by TVA and its municipal and cooperative distributors. An Act of Congress limits the distribution of TVA power, unless otherwise authorized by Congress, to specified areas or customers which generally were those served on July 1, 1957.

The RUS has authority to make loans to cooperative associations or corporations to enable them to provide electric service to customers in rural sections of the country. There are 71 electric cooperative organizations operating in the territory in which the retail operating companies provide electric service at retail or wholesale.

One of these, AEC, is a generating and transmitting cooperative selling power to several distributing cooperatives, municipal systems and other customers in south Alabama and northwest Florida. AEC owns generating units with approximately 1,776 megawatts of nameplate capacity, including an undivided 8.25% ownership interest in Alabama Power's Plant Miller Units 1 and 2. AEC's facilities were financed with RUS loans secured by long-term contracts requiring distributing cooperatives to take their requirements from AEC to the extent such energy is available. Two of the 14 distributing cooperatives operating in Alabama Power's service territory obtain a portion of their power requirements directly from Alabama Power.

Four electric cooperative associations, financed by the RUS, operate within Gulf Power's service area. These cooperatives purchase their full requirements from AEC and SEPA (a federal power marketing agency). A non-affiliated utility also operates within Gulf Power's service area and purchases its full requirements from Gulf Power.

Alabama Power and Gulf Power have entered into separate agreements with AEC involving interconnection between their respective systems. The delivery of capacity and energy from AEC to certain distributing cooperatives in the service areas of Alabama Power and Gulf Power is governed by the Southern Company/AEC Network Transmission Service Agreement. The rates for this service to AEC are based on the negotiated agreement on file with the FERC. See Item 2 - PROPERTIES - "Jointly-Owned Facilities" herein for

details of Alabama Power's joint-ownership with AEC of a portion of Plant Miller.

Mississippi Power has an interchange agreement with SMEPA, a generating and transmitting cooperative, pursuant to which various services are provided, including the furnishing of protective capacity by Mississippi Power to SMEPA. SMEPA has a generating capacity of 1,947 megawatts and a transmission system estimated to be 1,570 miles in length.

There are 43 electric cooperative organizations operating in, or in areas adjoining, territory in the State of Georgia in which Georgia Power provides electric service at retail or wholesale. Three of these organizations obtain their power from TVA and one from other sources. OPC has a wholesale power contract with the remaining 39 of these cooperative organizations. OPC utilizes self-owned generation, some of which is acquired and jointly-owned with Georgia Power, megawatt capacity purchases from Georgia Power under power supply agreements, and other arrangements to meet its power supply obligations. Pursuant to the latest agreement entered into in April 1999, OPC will purchase 250 megawatts of steam capacity through March 2006.

Starting in January 2005, 30 electric cooperative organizations served by OPC will start purchasing a total of 700 megawatts of steam capacity from Georgia Power under individual contracts for a 10 year term and starting in April 2006, AMEA will start purchasing the 250 megawatts, currently being purchased by OPC, for a 10 year term.

There are 65 municipally-owned electric distribution systems operating in the territory in which the retail operating companies provide electric service at retail or wholesale.

AMEA was organized under an act of the Alabama legislature and is comprised of 11 municipalities. In October 1991, Alabama Power entered into a power sales contract with AMEA entitling AMEA to scheduled amounts of additional capacity (up to a maximum 80 megawatts) for a period of 15 years. Under the terms of the contract, Alabama Power received payments from AMEA representing the net present value of the revenues associated with the respective capacity entitlements. (See Note 6 to Alabama Power's financial statements under the heading "First Mortgage Bonds" in Item 8 herein for further information on this contract.)

Forty-eight municipally-owned electric distribution systems and one county-owned system receive their requirements through MEAG, which was established by a Georgia state statute in 1975. MEAG serves these requirements from self-owned generation facilities, some of which are acquired and jointly-owned with Georgia Power, power purchased from Georgia Power and purchases from other resources. In 1997, a pseudo scheduling and services agreement was implemented between Georgia Power and MEAG. Since 1977, Dalton has filled its requirements from self-owned generation facilities, some of which are acquired and jointly-owned with Georgia Power, and through purchases from Georgia Power pursuant to their partial requirements tariff. Beginning January 1, 2003, Dalton has entered into a new power supply agreement pursuant to which it will purchase 134 megawatts from Georgia Power for a fifteen-year term. One municipally-owned electric distribution system's full requirements are served under a market-based contract by Georgia Power. (See Item 2 - PROPERTIES - "Jointly-Owned Facilities" herein.)

Georgia Power has entered into substantially similar agreements with Georgia Transmission Corporation (formerly OPC's transmission division), MEAG and Dalton providing for the establishment of an integrated transmission system to carry the power and energy of each. The agreements require an investment by each party in the integrated transmission system in proportion to its respective share of the aggregate system load. (See Item 2 - PROPERTIES - "Jointly-Owned Facilities" herein.)

SCS, acting on behalf of the retail operating companies, also has a contract with SEPA providing for the use of those companies' facilities at government expense to deliver to certain cooperatives and municipalities, entitled by federal statute to preference in the purchase of power from SEPA, quantities of power equivalent to the amounts of power allocated to them by SEPA from certain United States government hydroelectric projects.

The retail service rights of all electric suppliers in the State of Georgia are regulated by the 1973 State Territorial Electric Service Act. Pursuant to the provisions of this Act, all areas within existing municipal limits were assigned to the primary electric supplier therein on March 29, 1973 (451 municipalities, including Atlanta, Columbus, Macon, Augusta, Athens, Rome and Valdosta, to Georgia Power; 115 to electric cooperatives;

and 50 to publicly-owned systems). Areas outside of such municipal limits were either to be assigned or to be declared open for customer choice of supplier by action of the Georgia PSC pursuant to standards set forth in the Act. Consistent with such standards, the Georgia PSC has assigned substantially all of the land area in the state to a supplier. Notwithstanding such assignments, the Act provides that any new customer locating outside of 1973 municipal limits and having a connected load of at least 900 kilowatts may receive electric service from the supplier of its choice. (See also Item 1 - BUSINESS - "Competition" herein.)

Under and subject to the provisions of its franchises and concessions and the 1973 State Territorial Electric Service Act, Savannah Electric has the full but nonexclusive right to serve the City of Savannah, the Towns of Bloomingdale, Pooler, Garden City, Guyton, Newington, Oliver, Port Wentworth, Rincon, Tybee Island, Springfield, Thunderbolt and Vernonburg, and in conjunction with a secondary supplier, the Town of Richmond Hill. In addition, Savannah Electric has been assigned certain unincorporated areas in Chatham, Effingham, Bryan, Bulloch and Screven Counties by the Georgia PSC. (See also Item 1 - BUSINESS - "Competition" herein.)

Pursuant to the 1956 Utility Act, the Mississippi PSC issued "Grandfather Certificates" of public convenience and necessity to Mississippi Power and to six distribution rural cooperatives operating in southeastern Mississippi, then served in whole or in part by Mississippi Power, authorizing them to distribute electricity in certain specified geographically described areas of the state. The six cooperatives serve approximately 300,000 retail customers in a certificated area of approximately 10,300 square miles. In areas included in a "Grandfather Certificate," the utility holding such certificate may, without further certification, extend its lines up to five miles; other extensions within that area by such utility, or by other utilities, may not be made except upon a showing of, and a grant of a certificate of, public convenience and necessity. Areas included in such a certificate which are subsequently annexed to municipalities may continue to be served by the holder of the certificate, irrespective of whether it has a franchise in the annexing municipality. On the other hand, the holder of the municipal franchise may not extend service into such newly annexed area without authorization by the Mississippi PSC.

In January 2003, Southern Power entered into contracts with North Carolina Municipal Power Authority 1 (North Carolina) and Dalton. Under the North Carolina contract, Southern Power will be responsible for supplying North Carolina's capacity and energy needs in excess of North Carolina's existing resources and disposing of North Carolina's surplus energy. The contract term is January 1, 2003 through December 31, 2004. Under the Dalton contract, Southern Power is responsible for supplying Dalton's requirements for capacity and energy in excess of Dalton's existing resources. The contract term is for 15 years, beginning January 1, 2003, with a customer option to convert to a fixed capacity purchase at the end of 2013.

In July 2003, Southern Power entered into a requirements service agreement with Piedmont Municipal Power Agency (PMPA). PMPA is a full requirements provider to 10 South Carolina cities. Under this agreement, Southern Power will be responsible for supplying PMPA's capacity and energy needs in excess of PMPA's existing resources and will purchase PMPA's surplus energy. The initial contract term is for 5 years beginning in 2006 with mutual renewal options through 2015.

## Competition

The electric utility industry in the United States is continuing to evolve as a result of regulatory and competitive factors. Among the early primary agents of change was the Energy Act. The Energy Act allowed IPPs to access a utility's transmission network in order to sell electricity to other utilities. Reference is made to Alabama Power, Georgia Power, Gulf Power, Mississippi Power and Savannah Electric, "Management's Discussion and Analysis – Future Earnings Potential" in Item 7 herein for further information.

Alabama Power currently has cogeneration contracts in effect with 11 industrial customers. Under the terms of these contracts, Alabama Power purchases excess generation of such companies. During 2003, Alabama Power purchased approximately 151.7 million kilowatt-hours from such companies at a cost of $3.8 million.

Georgia Power currently has contracts in effect with nine small power producers whereby Georgia Power purchases their excess generation. During 2003, Georgia

Power purchased 12.3 million kilowatt-hours from such companies at a cost of $0.5 million. Georgia Power has PPAs for electricity with two cogeneration facilities. Payments are subject to reductions for failure to meet minimum capacity output. During 2003, Georgia Power purchased 545 million kilowatt-hours at a cost of $77 million from these facilities. Reference is made to Note 7 to the financial statements for Georgia Power in Item 8 herein for information regarding purchased power commitments.

Gulf Power currently has agreements in effect with various industrial, commercial and qualifying facilities pursuant to which Gulf Power purchases "as available" energy from customer-owned generation. During 2003, Gulf Power purchased 54 million kilowatt-hours from such companies for $1.3 million.

During 2003, Savannah Electric purchased energy from six customer owned generating facilities. Five of the six provide only excess energy to Savannah Electric and are paid Savannah Electric's avoided energy cost. These five customers make no capacity commitment and are not dispatched by Savannah Electric. Savannah Electric does have a contract for five megawatts of dispatchable capacity and energy with one customer. During 2003, Savannah Electric purchased a total of 14 million kilowatt-hours from the six suppliers at a cost of approximately $556 thousand.

The competition for retail energy sales among competing suppliers of energy is influenced by various factors, including price, availability, technological advancements and reliability. These factors are, in turn, affected by, among other influences, regulatory, political and environmental considerations, taxation and supply.

The retail operating companies have experienced, and expect to continue to experience, competition in their respective retail service territories in varying degrees as the result of self-generation (as described above) and fuel switching by customers and other factors. (See also Item 1 - BUSINESS - "Territory Served by the Utilities" herein for information concerning suppliers of electricity operating within or near the areas served at retail by the retail operating companies.)

## Regulation

### State Commissions

The retail operating companies are subject to the jurisdiction of their respective state regulatory commissions, which have broad powers of supervision and regulation over public utilities operating in the respective states, including their rates, service regulations, sales of securities (except for the Mississippi PSC) and, in the cases of the Georgia PSC and Mississippi PSC, in part, retail service territories. (See Item 1 - BUSINESS - "Rate Matters" and "Territory Served by the Utilities" herein.)

### Holding Company Act

Southern Company is registered as a holding company under the Holding Company Act, and it and its subsidiary companies are subject to the regulatory provisions of said Act, including provisions relating to the issuance of securities, sales and acquisitions of securities and utility assets, services performed by SCS and Southern Nuclear and the activities of certain of Southern Company's other subsidiaries.

While various proposals have been introduced in Congress regarding the Holding Company Act, the prospects for legislative reform or repeal are uncertain at this time.

### Federal Power Act

The Federal Power Act subjects the retail operating companies, Southern Power and SEGCO to regulation by the FERC as companies engaged in the transmission or sale at wholesale of electric energy in interstate commerce, including regulation of accounting policies and practices.

Alabama Power and Georgia Power are also subject to the provisions of the Federal Power Act or the earlier Federal Water Power Act applicable to licensees with respect to their hydroelectric developments. Among the hydroelectric projects subject to licensing by the FERC are 14 existing Alabama Power generating stations having an aggregate installed capacity of 1,608,550 kilowatts and 18 existing Georgia Power generating stations having an aggregate installed capacity of 1,074,696 kilowatts.

Georgia Power filed a relicensing application with the FERC for the Middle Chattahoochee project in December 2002 and is currently waiting for the FERC to issue the public notice declaring that the application is ready for environmental analysis. This project consists of the Goat Rock, Oliver and North Highlands facilities. Georgia Power also started the relicensing process for the Morgan Falls Project in 2003 and filed the Notice of Intent and Preliminary Document required by FERC's Integrated Licensing Process on January 15, 2004. Alabama Power initiated the relicensing process in 2002 for its seven projects on the Coosa River (Weiss, Henry, Logan Martin, Lay, Mitchell, Jordan and Bouldin) and the Smith and Bankhead Projects on the Warrior River. The FERC licenses for all of these nine projects expire in 2007.

Georgia Power and OPC also have a license, expiring in 2027, for the Rocky Mountain Plant, a pure pumped storage facility of 847,800 kilowatt capacity which began commercial operation in 1995. (See Item 2 - PROPERTIES - "Jointly-Owned Facilities" herein.)

Licenses for all projects, excluding those discussed above, expire in the period 2007-2033 in the case of Alabama Power's projects and in the period 2005-2039 in the case of Georgia Power's projects.

Upon or after the expiration of each license, the United States Government, by act of Congress, may take over the project or the FERC may relicense the project either to the original licensee or to a new licensee. In the event of takeover or relicensing to another, the original licensee is to be compensated in accordance with the provisions of the Federal Power Act, such compensation to reflect the net investment of the licensee in the project, not in excess of the fair value of the property taken, plus reasonable damages to other property of the licensee resulting from the severance therefrom of the property taken.

**Atomic Energy Act of 1954**

Alabama Power, Georgia Power and Southern Nuclear are subject to the provisions of the Atomic Energy Act of 1954, as amended, which vests jurisdiction in the NRC over the construction and operation of nuclear reactors, particularly with regard to certain public health and safety and antitrust matters. The National Environmental Policy Act has been construed to expand the jurisdiction of the NRC to consider the environmental impact of a facility licensed under the Atomic Energy Act of 1954, as amended.

NRC operating licenses currently expire in June 2017 and March 2021 for Plant Farley units 1 and 2, respectively, and in January 2027 and February 2029 for Plant Vogtle units 1 and 2, respectively. In January 2002, the NRC granted Georgia Power a 20-year extension of the licenses for both units at Plant Hatch which permits the operation of units 1 and 2 until 2034 and 2038, respectively. Alabama Power filed an application with the NRC in September 2003 to extend the operating license for Plant Farley for an additional 20 years.

Reference is made to Notes 1 and 9 to Southern Company's financial statements and Notes 1 and 8 to each of Alabama Power's financial statements and Georgia Power's financial statements in Item 8 herein for information on nuclear decommissioning costs and nuclear insurance. Additionally, Note 3 to Georgia Power's financial statements contains information regarding nuclear performance standards imposed by the Georgia PSC that may impact retail rates.

**FERC Matters**

Reference is made to Southern Company, Alabama Power, Georgia Power, Gulf Power, Mississippi Power, Savannah Electric and Southern Power, "Management's Discussion and Analysis – Future Earnings Potential - *FERC Matters*" in Item 7 herein for information on matters regarding the FERC.

**Environmental Statutes and Regulations**

Southern Company's operations are subject to extensive regulation by state and federal environmental agencies under a variety of statutes and regulations governing environmental media, including air, water, and land resources. Compliance with these environmental requirements involves significant costs, a major portion of which is expected to be recovered through existing ratemaking provisions. There is no assurance, however, that all such costs will, in fact, be recovered.

Compliance with the federal Clean Air Act and resulting regulations has been, and will continue to be, a significant focus for Southern Company. For additional information about the Clean Air Act and

other environmental issues, including the litigation brought under the New Source Review provisions of the Clean Air Act, reference is made to each registrant's "Management's Discussion and Analysis – Environmental Matters" in Item 7 herein. Also see Item 3 - "Legal Proceedings" herein for information about lawsuits brought on behalf of the EPA or by citizen's groups with respect to environmental compliance matters.

Additionally, each retail operating company and SEGCO has incurred costs for environmental remediation of various sites. Reference is made to each registrant's "Management's Discussion and Analysis – Financial Condition and Liquidity" in Item 7 herein for information regarding the registrants' environmental remediation efforts. Also, see Note 3 to the financial statements of Southern Company, Georgia Power, Gulf Power and Mississippi Power in Item 8 herein under "Georgia Power Potentially Responsible Party Status," "Potentially Responsible Party Status," "Environmental Cost Recovery" and "Potentially Responsible Party Status," respectively, for information regarding the identification of sites that may require environmental remediation.

The retail operating companies, Southern Power and SEGCO are unable to predict at this time what additional steps they may be required to take as a result of the implementation of existing or future quality control requirements for air, water and hazardous or toxic materials, but such steps could adversely affect system operations and result in substantial additional costs.

The outcome of the matters mentioned above under "Regulation" cannot now be determined, except that these developments may result in delays in obtaining appropriate licenses for generating facilities, increased construction and operating costs or reduced generation, the nature and extent of which, while not determinable at this time, could be substantial.

## Rate Matters

### Rate Structure

The rates and service regulations of the retail operating companies are uniform for each class of service throughout their respective service areas. Rates for residential electric service are generally of the block type based upon kilowatt-hours used and include minimum charges.

Residential and other rates contain separate customer charges. Rates for commercial service are presently of the block type and, for large customers, the billing demand is generally used to determine capacity and minimum bill charges. These large customers' rates are generally based upon usage by the customer and include rates with special features to encourage off-peak usage. Additionally, the retail operating companies are allowed by their respective PSCs to negotiate the terms and compensation of service to large customers. Such terms and compensation of service, however, are subject to final PSC approval. Alabama Power, Georgia Power, Mississippi Power and Savannah Electric are allowed by state law to recover fuel and net purchased energy costs through fuel cost recovery provisions which are adjusted to reflect increases or decreases in such costs as needed. Gulf Power also recovers from retail customers costs of fuel, net purchased power, energy conservation and environmental compliance through provisions approved by the Florida PSC which are adjusted annually to reflect increases or decreases in such costs. Revenues are adjusted for differences between recoverable costs and amounts actually recovered in current rates.

Reference is made to "Management's Discussion and Analysis – Future Earnings Potential" in Item 7 and to Note 3 to the financial statements in Item 8 herein for Alabama Power, Georgia Power, Gulf Power, Mississippi Power and Savannah Electric for a discussion of rate matters.

### Integrated Resource Planning

Georgia Power and Savannah Electric must file plans with the Georgia PSC that specify how each intends to meet the future electrical needs of its customers through a combination of demand-side and supply-side resources. The Georgia PSC must certify these new resources. Once certified, all prudently incurred construction costs and purchase power costs will be recoverable through rates.

On January 30, 2004, Georgia Power and Savannah Electric filed the 2004 IRP with the Georgia PSC. In the 2004 IRP, Georgia Power requested the de-certification of the Atkinson combustion turbine Units 5A and 5B totaling approximately 80 megawatts of capacity. Plans for meeting Georgia Power's future supply-side capacity

needs identified in the 2004 IRP (2009 and beyond) will be provided to the Georgia PSC in 2005. Georgia Power will also continue the residential load management program, Power Credit, which was certified by the Georgia PSC for up to 40 megawatts of equivalent supply-side capacity. Georgia Power will continue to utilize approximately 8 megawatts of capacity from existing Qualifying Facilities under firm contracts and continue to add additional resources as outlined in the Georgia PSC's Avoided Cost Order, Docket No. 4822-U.

In December 2002, the Georgia PSC approved Georgia Power's and Savannah Electric's 2005 certification and plant retirement request. The request was filed June 7, 2002 for approximately 1,800 megawatts of purchased power and 414 megawatts of generation to be retired in December 2002. The certification request included a seven-year PPA with Duke Energy for one gas-fired, combined cycle unit at Plant Murray near Dalton, Georgia and a 15 year PPA with Southern Power for two gas-fired, combined cycle units to be constructed at Plant McIntosh. The Duke Energy (Murray) PPA is for 620 megawatts to be purchased for Georgia Power beginning in 2005. The Southern Power (McIntosh) units will produce a combined 1,240 megawatts of which Georgia Power will purchase 1,040 megawatts and Savannah Electric will purchase 200 megawatts. This new generation will be available by June 2005.

In July 2001, the Georgia PSC approved Georgia Power's 2003/04 certification request for approximately 1,800 megawatts of purchased power and 12 megawatts of upgraded hydro generation. This certification request included a seven-year PPA with Southern Power for two gas-fired combined cycle units to be constructed at Plant Franklin. Plant Franklin Units 1 and 2 began commercial operation in June 2002 and June 2003, respectively. Also, an upgrade of 12 megawatts was approved for the existing Goat Rock hydro Units 1 and 2. In addition, this certification request included a seven-year PPA with Southern Power for 615 megawatts of gas-fired combined cycle generation at Plant Harris in Alabama. Based on an agreement with the Georgia PSC, the seven-year term was modified to be 15 years.

Reference is made to Note 3 to the financial statements of Southern Company, Georgia Power, Savannah Electric and Southern Power in Item 8 herein under "FERC Matters" for information regarding PPAs by Georgia Power and Savannah Electric for Southern Power's Plant McIntosh capacity.

**Environmental Cost Recovery Plans**

In 1993, the Florida Legislature adopted legislation for an Environmental Cost Recovery Clause (ECRC), which allows Gulf Power to petition the Florida PSC for recovery of prudent environmental compliance costs that are not being recovered through base rates or any other recovery mechanism. Such environmental costs include operation and maintenance expense, emission allowance expense, depreciation and a return on invested capital.

This legislation was amended in 2002 to allow recovery of costs incurred as a result of an agreement between Gulf Power and the Florida Department of Environmental Protection for the purpose of ensuring compliance with ozone ambient air quality standards adopted by the EPA. For additional information, reference is made to Note 3 to the financial statements of Gulf Power in Item 8 herein under "Environmental Cost Recovery."

In 1992, the Mississippi PSC approved Mississippi Power's Environmental Compliance Overview Plan (ECO Plan). The ECO Plan establishes procedures to facilitate the Mississippi PSC's overview of Mississippi Power's environmental strategy and provides for recovery of costs (including costs of capital associated with environmental projects approved by the Mississippi PSC). Under the ECO Plan, any increase in the annual revenue requirement is limited to 2 percent of retail revenues. However, the ECO Plan also provides for carryover of any amount over the 2 percent limit into the next year's revenue requirement. Mississippi Power conducts studies, when possible, to determine the extent of any required environmental remediation. Should such remediation be determined to be probable, reasonable estimates of costs to clean up such sites are developed and recognized in the financial statements. Mississippi Power recovers such costs under the ECO Plan as they are incurred, as provided for in Mississippi Power's 1995 ECO Plan order. Mississippi Power filed its 2004 ECO Plan in January 2004, which, if approved as filed, will result in a slight decrease in customer prices.

## Employee Relations

The Southern Company system had a total of 25,762 employees on its payroll at December 31, 2003.

| | Employees at December 31, 2003 |
|---|---|
| Alabama Power | 6,730 |
| Georgia Power | 8,714 |
| Gulf Power | 1,337 |
| Mississippi Power | 1,290 |
| Savannah Electric | 549 |
| SCS | 3,294 |
| Southern Nuclear | 3,264 |
| Southern Power | * |
| Other | 584 |
| Total | 25,762 |

* Southern Power has no employees. Southern Power has agreements with SCS and the retail operating companies whereby employee services are rendered at cost.

The retail operating companies have separate agreements with local unions of the IBEW generally covering wages, working conditions and procedures for handling grievances and arbitration. These agreements apply with certain exceptions to operating, maintenance and construction employees.

Alabama Power has agreements with the IBEW on a three-year contract extending to August 14, 2004. Upon notice given at least 60 days prior to that date, negotiations may be initiated with respect to agreement terms to be effective after such date.

Georgia Power has an agreement with the IBEW covering wages and working conditions, which is in effect through June 30, 2005.

Gulf Power has an agreement with the IBEW on a three-year contract extending to August 15, 2005.

Mississippi Power has an agreement with the IBEW on a four-year contract extending to August 16, 2006.

Savannah Electric has three-year labor agreements with the IBEW and the Office and Professional Employees International Union that expire April 15, 2006 and December 1, 2006, respectively.

Southern Nuclear has agreements with the IBEW on a five-year contract extending to August 15, 2006 for Plant Farley, and a three-year contract extending to June 30, 2005 for Plants Hatch and Vogtle. Southern Nuclear also has an agreement with the Security, Police and Fire Professionals of America on a three-year contract extending to September 30, 2004 for Plant Hatch. Upon notice given at least 60 days prior to these dates, negotiations may be initiated with respect to agreement terms to be effective after such dates.

The agreements also subject the terms of the pension plans for the companies discussed above to collective bargaining with the unions at either a five-year or a ten-year cycle, depending upon union and company actions.

# Item 2. PROPERTIES

## Electric Properties – The Electric Utilities

The retail operating companies, Southern Power and SEGCO, at December 31, 2003, owned and/or operated 34 hydroelectric generating stations, 32 fossil fuel generating stations, three nuclear generating stations and 10 combined cycle/cogeneration stations. The amounts of capacity for each company are shown in the table below.

| Generating Station | Location | Nameplate Capacity (1) (Kilowatts) |
|---|---|---|
| **Fossil Steam** | | |
| Gadsden | Gadsden, AL | 120,000 |
| Gorgas | Jasper, AL | 1,221,250 |
| Barry | Mobile, AL | 1,525,000 |
| Greene County | Demopolis, AL | 300,000 (2) |
| Gaston Unit 5 | Wilsonville, AL | 880,000 |
| Miller | Birmingham, AL | 2,532,288 (3) |
| **Alabama Power Total** | | 6,578,538 |
| Bowen | Cartersville, GA | 3,160,000 |
| Branch | Milledgeville, GA | 1,539,700 |
| Hammond | Rome, GA | 800,000 |
| McDonough | Atlanta, GA | 490,000 |
| McManus | Brunswick, GA | 115,000 |
| Mitchell | Albany, GA | 125,000 |
| Scherer | Macon, GA | 750,924 (4) |
| Wansley | Carrollton, GA | 925,550 (5) |
| Yates | Newnan, GA | 1,250,000 |
| **Georgia Power Total** | | 9,156,174 |

| 6 Other Plants | | 18,080 |
| **Georgia Power Total** | | 1,077,736 |
| **Total Hydroelectric Facilities** | | 2,698,136 |
| **Total Generating Capacity** | | 38,678,225 |

**Notes:**

(1) For additional information regarding facilities jointly-owned with non-affiliated parties, see Item 2 - PROPERTIES - "Jointly-Owned Facilities" herein.

(2) Owned by Alabama Power and Mississippi Power as tenants in common in the proportions of 60% and 40%, respectively.

(3) Excludes the capacity owned by AEC.

(4) Capacity shown for Georgia Power is 8.4% of Units 1 and 2 and 75% of Unit 3. Capacity shown for Gulf Power is 25% of Unit 3.

(5) Capacity shown is Georgia Power's portion (53.5%) of total plant capacity.

(6) Represents 50% of the plant which is owned as tenants in common by Gulf Power and Mississippi Power.

(7) SEGCO is jointly-owned by Alabama Power and Georgia Power. (See Item 1 - BUSINESS herein.)

(8) Capacity shown is Georgia Power's portion (50.1%) of total plant capacity.

(9) Capacity shown is Georgia Power's portion (45.7%) of total plant capacity.

(10) Capacity shown represents 33-1/3% of total plant capacity. Georgia Power owns a 1/3 interest in the unit with 100% use of the unit from June through September. FPC operates the unit.

(11) Generation is dedicated to a single industrial customer.

(12) Capacity shown is Georgia Power's portion (25.4%) of total plant capacity. OPC operates the plant.

(13) Capacity shown is Southern Power's portion (65%) of total plant capacity.

Except as discussed below under "Titles to Property," the principal plants and other important units of the retail operating companies, Southern

Power and SEGCO are owned in fee by the respective companies. It is the opinion of management of each such company that its operating properties are adequately maintained and are substantially in good operating condition.

Mississippi Power owns a 79-mile length of 500-kilovolt transmission line which is leased to Entergy Gulf States. The line, completed in 1984, extends from Plant Daniel to the Louisiana state line. Entergy Gulf States is paying a use fee over a 40-year period covering all expenses and the amortization of the original $57 million cost of the line. At December 31, 2003, the unamortized portion of this cost was approximately $30.6 million.

The all-time maximum demand on the retail operating companies, Southern Power and SEGCO was 32,949,200 kilowatts and occurred in August 2003. This amount excludes demand served by capacity retained by MEAG and Dalton and excludes demand associated with power purchased from OPC and SEPA by its preference customers. The reserve margin for the retail operating companies, Southern Power and SEGCO at that time was 21.4%. For additional information on peak demands, reference is made to Item 6 - SELECTED FINANCIAL DATA herein.

## Jointly-Owned Facilities

Alabama Power and Georgia Power have sold and Georgia Power has purchased undivided interests in certain generating plants and other related facilities to or from non-affiliated parties. Southern Power also owns an undivided interest in a facility with non-affiliated parties. The percentages of ownership resulting from these transactions are as follows:

| | | Percentage Ownership | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | Total Capacity | Alabama Power | AEC | Georgia Power | OPC | MEAG | DALTON | FPC | Southern Power | OUA | FMPA | KUA |
| | (Megawatts) | | | | | | | | | | | |
| Plant Miller Units 1 and 2 | 1,320 | 91.8% | 8.2% | -% | -% | -% | -% | -% | -% | -% | -% | -% |
| Plant Hatch | 1,796 | - | - | 50.1 | 30.0 | 17.7 | 2.2 | - | - | - | - | - |
| Plant Vogtle | 2,320 | - | - | 45.7 | 30.0 | 22.7 | 1.6 | - | - | - | - | - |
| Plant Scherer Units 1 and 2 | 1,636 | - | - | 8.4 | 60.0 | 30.2 | 1.4 | - | - | - | - | - |
| Plant Wansley | 1,779 | - | - | 53.5 | 30.0 | 15.1 | 1.4 | - | - | - | - | - |
| Rocky Mountain | 848 | - | - | 25.4 | 74.6 | - | - | - | - | - | - | - |
| Intercession City, FL | 143 | - | - | 33.3 | - | - | - | 66.7 | - | - | - | - |
| Plant Stanton Unit A | 660 | - | - | - | - | - | - | - | 65% | 28% | 3.5% | 3.5% |

Alabama Power and Georgia Power have contracted to operate and maintain the respective units in which each has an interest (other than Rocky Mountain and Intercession City) as agent for the joint owners. SCS provides operation and maintenance services for Plant Stanton Unit A.

In addition, Georgia Power has commitments regarding a portion of a 5 percent interest in Plant Vogtle owned by MEAG that are in effect until the later of retirement of the plant or the latest stated maturity date of MEAG's bonds issued to finance such ownership interest. The payments for capacity are required whether any capacity is available. The energy cost is a function of each unit's variable operating costs. Except for the portion of the capacity payments related to the 1987 and 1990 write-offs of Plant Vogtle costs, the cost of such capacity and energy is included in purchased power from non-affiliates in Georgia Power's Statements of Income in Item 8 herein.

## Titles to Property

The retail operating companies', Southern Power's and SEGCO's interests in the principal plants (other than certain pollution control facilities, one small hydroelectric generating station leased by Georgia Power, combined cycle units at Plant Daniel leased by Mississippi Power and the land on which five combustion turbine generators of Mississippi Power are located, which is held by easement) and other important units of the respective companies are owned in fee by such companies, subject only to the liens of applicable mortgage indentures of Alabama Power, Gulf Power, Mississippi Power and Savannah Electric and to excepted encumbrances as defined therein. The retail operating companies own the fee interests in certain of their principal plants as tenants in common. (See Item 2 - PROPERTIES - "Jointly-Owned Facilities" herein.) Properties such as electric transmission and distribution lines and steam heating mains are constructed principally on rights-of-way which are maintained under franchise or are held by easement only. A substantial portion of lands submerged by reservoirs is held under flood right easements.

## Item 3. LEGAL PROCEEDINGS

(1) **United States of America v. Alabama Power**
(United States District Court for the Northern District of Alabama)

**United States of America v. Georgia Power and Savannah Electric**
(United States District Court for the Northern District of Georgia)

In November 1999, the EPA brought a civil action in the U.S. District Court for the Northern District of Georgia against Alabama Power, Georgia Power, and SCS. The complaint alleged violations of the New Source Review (NSR) provisions of the Clean Air Act with respect to five coal-fired generating facilities in Alabama and Georgia and violations of related state laws. The civil action requested penalties and injunctive relief, including an order requiring the installation of the best available control technology at the affected units. The EPA concurrently issued to the retail operating companies notices of violation relating to 10 generating facilities, which include the five facilities mentioned previously. In early 2000, the EPA filed a motion to amend its complaint to add the violations alleged in its notices of violation and to add Gulf Power, Mississippi Power, and Savannah Electric as defendants.

In August 2000, the U.S. District Court in Georgia granted Alabama Power's motion to dismiss for lack of jurisdiction in Georgia and granted SCS' motion to dismiss on the grounds that it neither owned nor operated the generating units involved in the proceedings. In March 2001, the court granted the EPA's motion to add Savannah Electric as a defendant, but it denied the motion to add Gulf Power and Mississippi Power based on lack of jurisdiction in Georgia over those companies. As directed by the court, the EPA refiled its amended complaint limiting claims to those brought against Georgia Power and Savannah Electric. In addition, the EPA refiled its claims against Alabama Power in the U.S. District Court for the Northern District of Alabama. These complaints allege violations with respect to eight coal-fired generating facilities in Alabama and Georgia, and they request the same kinds of relief as was requested in the original complaint, i.e. penalties and injunctive relief, including installation of the best available control technology. The EPA has not refiled against Gulf Power, Mississippi Power, or SCS.

The actions against Alabama Power, Georgia Power, and Savannah Electric were stayed in the spring of 2001 during the appeal of a very similar NSR enforcement action against the Tennessee Valley Authority (TVA) before the U.S. Court of Appeals for the Eleventh Circuit. The TVA appeal involves many of the same legal issues raised by the actions against Alabama Power, Georgia Power, and Savannah Electric. Because the final resolution of the TVA appeal could have a significant impact on Alabama Power and Georgia Power, both companies have been involved in that appeal. On June 24, 2003, the court of appeals issued its ruling in the TVA case. It found unconstitutional the statutory scheme set forth in the Clean Air Act that allowed the EPA to impose penalties for failing to comply with an administrative compliance order, like the one issued to TVA, without the EPA having to prove the underlying violation. Thus, the court of appeals held that the compliance order was of no legal consequence, and TVA was free to ignore it. The court did not, however, rule directly on the substantive legal issues about the proper interpretation and application of certain NSR provisions that had been raised in the TVA appeal. On September 16, 2003, the court of appeals denied the EPA's request for a rehearing of the decision. On February 13, 2004, the EPA petitioned the U.S. Supreme Court to review the decision of the court of appeals. The EPA also filed a motion to lift the stay in the action against Alabama Power. At this time, no party to the Georgia Power and Savannah Electric action, which was administratively closed two years ago, has asked the court to reopen that case.

Since the inception of the NSR proceedings against Georgia Power, Alabama Power, and Savannah Electric, the EPA has also been proceeding with similar NSR enforcement actions against other utilities, involving many of the same legal issues. In each case, the EPA

alleged that the utilities failed to comply with the NSR permitting requirements when performing maintenance and construction activities at coal-burning plants, which activities the utilities considered to be routine or otherwise not subject to NSR. In 2003, district courts addressing these cases have issued opinions that reached conflicting conclusions.

In October 2003, the EPA issued final revisions to its NSR regulations under the Clean Air Act clarifying the scope of the existing Routine Maintenance, Repair, and Replacement exclusion. On December 24, 2003, the U.S. Court of Appeals for the District of Columbia Circuit stayed the effectiveness of these revisions pending resolution of related litigation. In January 2004, the Bush Administration announced that it would continue to enforce the existing rules.

Southern Company believes that the retail operating companies complied with applicable laws and the EPA's regulations and interpretations in effect at the time the work in question took place. The Clean Air Act authorizes civil penalties of up to $27,500 per day, per violation at each generating unit. Prior to January 30, 1997, the penalty was $25,000 per day. An adverse outcome in any one of these cases could require substantial capital expenditures that cannot be determined at this time and could possibly require payment of substantial penalties. This could affect future results of operations, cash flows, and possibly financial condition if such costs are not recovered through regulated rates.

(2) **Cooper et al. v. Georgia Power, Southern Company, SCS and Energy Solutions**
(Superior Court of Fulton County, Georgia)

In July 2000, a lawsuit alleging race discrimination was filed by three Georgia Power employees against Georgia Power, Southern Company, and SCS in the Superior Court of Fulton County, Georgia. Shortly thereafter, the lawsuit was removed to the United States District Court for the Northern District of Georgia. The lawsuit also raised claims on behalf of a purported class. The plaintiffs seek compensatory and punitive damages in an unspecified amount, as well as injunctive relief. In August 2000, the lawsuit was amended to add four more plaintiffs. Also, an additional indirect subsidiary of Southern Company, Energy Solutions, was named a defendant.

In October 2001, the district court denied the plaintiffs' motion for class certification. The plaintiffs filed a motion to reconsider the order denying class certification, and the court denied the plaintiffs' motion to reconsider. In December 2001, the plaintiffs filed a petition in the U.S. Court of Appeals for the Eleventh Circuit seeking permission to file an appeal of the October 2001 decision, and this petition was denied. After discovery was completed on the claims raised by the seven named plaintiffs, the defendants filed motions for summary judgment on all of the named plaintiffs' claims. On March 31, 2003, the U.S. District Court for the Northern District of Georgia granted summary judgment in favor of the defendants on all claims raised by all seven plaintiffs. On April 23, 2003, plaintiffs filed an appeal to the U.S. Court of Appeals for the Eleventh Circuit challenging these adverse summary judgment rulings, as well as the District Court's October 2001 ruling denying class certification. Oral argument occurred on January 27, 2004, and the parties await the court's decision. The final outcome of this matter cannot now be determined.

(3) **Georgia Power Potentially Responsible Party**

Georgia Power has been designated as a potentially responsible party at sites governed by the Georgia Hazardous Site Response Act and/or by the federal Comprehensive Environmental Response, Compensation, and Liability Act. Georgia Power has recognized

$34 million in cumulative expenses through December 31, 2003, for the assessment and anticipated cleanup of sites on the Georgia Hazardous Sites Inventory. In addition, in 1995 the EPA designated Georgia Power and four other unrelated entities as potentially responsible parties at a site in Brunswick, Georgia that is listed on the federal National Priorities List. Georgia Power has contributed to the removal and remedial investigation and feasibility study costs for the site. Additional claims for recovery of natural resource damages at the site are anticipated. As of December 31, 2003, Georgia Power had recorded approximately $6 million in cumulative expenses associated with Georgia Power's agreed upon share of the removal and remedial investigation and feasibility study costs for the Brunswick site.

The final outcome of each of these matters cannot now be determined. However, based on the currently known conditions at these sites and the nature and extent of Georgia Power's activities relating to these sites, management does not believe that Georgia Power's additional liability, if any, at these sites would be material to the financial statements.

Reference is made to Note 3 to Southern Company's and Georgia Power's financial statements in Item 8 herein under the headings "Georgia Power Potentially Responsible Party Status" and "Potentially Responsible Party Status," respectively.

(4) **In re: Mobile Energy Services Company, LLC; In re: Mobile Energy Services Holdings, Inc.**
(U.S. Bankruptcy Court for the Southern District of Alabama)

MESH is the owner and operator of a facility that generates electricity, produces steam, and processes black liquor as part of a pulp and paper complex in Mobile, Alabama. In January 1999, MESH filed a petition for Chapter 11 bankruptcy with the U.S. Bankruptcy Court. In 2001, MESH filed an amended plan of reorganization, which the U.S. Bankruptcy Court confirmed in September 2003. The plan became effective in late 2003 and Southern Company's equity interest in MESH – which had been written off entirely prior to 2001 – was extinguished. Southern Company will continue to have contingent liabilities to the pulp and paper complex owners associated with a guarantee of certain potential environmental obligations and with a potential obligation to fund a maintenance reserve account that expires in 2019 and 2021, respectively. The combined maximum contingent liabilities were $19 million at December 31, 2003. MESH and Mirant have each separately agreed to indemnify Southern Company for any amounts required to be paid under such obligations. The final outcome of these matters cannot now be determined.

(5) **California Electricity Markets Investigation**

Southern Company received a subpoena in November 2002 to provide information to a federal grand jury in the Northern District of California. The subpoena covered a number of broad areas, including specific information regarding electricity production and sales activities in California. Mirant participated in energy marketing and trading in California during the period relevant to the subpoena. Southern Company has produced documents in response to the subpoena and has fully cooperated in the investigation.

(6) **In re: Mirant Corporation, et. al**
(U.S. Bankruptcy Court for the Northern District of Texas)

On July 14, 2003, Mirant filed for voluntary reorganization under Chapter 11 with the U.S. Bankruptcy Court. Southern Company has certain contingent liabilities associated with guarantees of contractual commitments made by Mirant's subsidiaries discussed in Note 7 to Southern Company's financial statements in

## Item 3. LEGAL PROCEEDINGS (Continued)

Item 8 herein under "Guarantees" and with various lawsuits related to Mirant discussed elsewhere in this Item 3. Also, Southern Company has joint and several liability with Mirant regarding the joint consolidated federal income tax return as discussed in Note 5 to the financial statements of Southern Company in Item 8 herein. Under the terms of the separation agreement, Mirant agreed to indemnify Southern Company for costs associated with these guarantees, lawsuits, and additional Internal Revenue Service (IRS) assessments. The impact of Mirant's bankruptcy filing on Mirant's indemnity obligations, if any, cannot now be determined. If Southern Company is ultimately required to make any payments related to these potentially material obligations, Mirant's indemnification obligation to Southern Company would represent an unsecured pre-bankruptcy claim, subject to compromise pursuant to Mirant's final reorganization plan.

The Bankruptcy Code automatically stays all litigation as to Mirant. A motion filed with the bankruptcy court requesting an extension of this automatic stay to all other non-debtor defendants, including Southern Company and the named current and/or former Southern Company officers was granted in November 2003. Although the Mirant securities litigation is stayed until further order from the bankruptcy court, Mirant is authorized to agree with parties in pending actions to allow discovery or other matters to proceed without violating the stay. Mirant and plaintiffs' counsel in the Mirant securities litigation have agreed that document discovery may proceed. Mirant and plaintiffs' counsel in the ERISA litigation have agreed to allow defendants to file responsive pleadings and to permit the court to decide any motions to dismiss without violating the stay. On October 23, 2003, the bankruptcy court entered an order authorizing Southern Company's insurance companies to pay related defense costs.

On February 20, 2004, the Official Committee of Unsecured Creditors of Mirant informed Southern Company of its intent to examine Southern Company in accordance with federal bankruptcy rules to determine whether there is a legitimate basis to bring claims against Southern Company in connection with Mirant's initial public offering, Southern Company's spinoff of Mirant and the related separation agreements.

The final outcome of these matters cannot now be determined.

(7) **In re: Mirant Corporation Securities Litigation**
(United States District Court for the Northern District of Georgia)

In November 2002, Southern Company, certain former and current senior officers of Southern Company, and 12 underwriters of Mirant's initial public offering were added as defendants in a putative class action lawsuit that several Mirant shareholders originally filed against Mirant and certain Mirant officers in May 2002. The original lawsuit was based on allegations related to alleged improper energy trading and marketing activities involving the California energy market. Several other similar lawsuits filed subsequently were consolidated into this litigation in the U.S. District Court for the Northern District of Georgia. The amended complaint is based on allegations related to alleged improper energy trading and marketing activities involving the California energy market, alleged false statements and omissions in Mirant's prospectus for its initial public offering and in subsequent public statements by Mirant, and accounting-related issues previously disclosed by Mirant. The lawsuit purports to include persons who acquired Mirant securities between September 26, 2000, and September 5, 2002.

On July 14, 2003, the court dismissed all claims based on Mirant's alleged improper energy trading and marketing activities involving the California energy market. The remaining claims are based on alleged false statements and omissions in Mirant's prospectus for its initial public offering and accounting-related issues previously disclosed

## Item 3. LEGAL PROCEEDINGS (Continued)

by Mirant. Such claims do not allege any improper trading and marketing activity, accounting errors, or material misstatements or omissions on the part of Southern Company, but rather seek to impose liability on Southern Company based on allegations that Southern Company was a "control person" as to Mirant prior to the spin off date. Southern Company filed an answer to the consolidated amended class action complaint on September 3, 2003. Plaintiffs have also filed a motion for class certification.

Under certain circumstances, Southern Company will be obligated under its Bylaws to indemnify the four current and/or former Southern Company officers who served as directors of Mirant at the time of its initial public offering through the date of the spin off and are also named as defendants in this lawsuit. Except for limited document discovery, litigation has been stayed until further order from the bankruptcy court. The final outcome of these matters cannot now be determined.

(8) **In re: Mirant Corporation ERISA Litigation**
(United States District Court for the Northern District of Georgia)

In April 2003, a retired employee of Mirant filed a complaint in the U.S. District Court for the Northern District of Georgia alleging violations of ERISA and naming as defendants Mirant, Southern Company, several current and former directors and officers of Mirant and/or Southern Company, and "Unknown Fiduciary Defendants 1-100." In June 2003, a substantially similar complaint was filed. Neither complaint contained any specific allegations of wrongdoing with respect to Southern Company. On September 2, 2003, the court consolidated all pending and future ERISA actions arising out of the same facts, and the plaintiffs filed a consolidated amended ERISA complaint on September 23, 2003. The plaintiffs sought to represent a class of persons who were participants in or beneficiaries of certain Mirant employee benefit plans between September 27, 2000, and July 22, 2003. The consolidated amended complaint named as defendants Mirant, certain Mirant benefit committees, Southern Company, and several of Mirant's current and former officers, directors, and employees. The consolidated amended complaint alleged that the defendants breached their fiduciary duties and violated ERISA by failing to investigate whether Mirant stock was a prudent investment for the plans, by continuing and promoting Mirant stock as an investment alternative for participants in the plans, and by failing to disclose information about Mirant's financial condition and about its improper activities in the California energy markets.

On February 19, 2004, plaintiffs dismissed Southern Company from this action without prejudice. The plaintiffs are not barred from naming Southern Company in some future lawsuit, but management believes the possibility of having to pay damages in any such lawsuit is remote.

(9) **Sierra Club, et al v. Georgia Power**
(United States District Court for the Northern District of Georgia)

On December 30, 2002, the Sierra Club, Physicians for Social Responsibility, Georgia ForestWatch, and one individual filed a civil suit in the U.S. District Court in Georgia against Georgia Power for alleged violations of the Clean Air Act at four of the generating units at Plant Wansley. The complaint alleges Clean Air Act violations at both the existing coal-fired units and the new combined cycle units. Specifically, the plaintiffs allege (1) opacity violations at the coal-fired units, (2) violations of a permit provision that requires the combined cycle units to operate above certain levels, (3) violation of nitrogen oxide emission offset requirements, and (4) violation of hazardous air pollutant requirements. The civil action requests injunctive and declaratory relief, civil penalties, a supplemental environmental project, and attorneys' fees. The Clean Air Act authorizes civil penalties of up to $27,500 per day, per violation at each generating unit.

On June 19, 2003, the court granted Georgia Power's motion to dismiss the allegations regarding hazardous air pollutants and denied Georgia Power's motion to dismiss the allegations regarding emission offsets. On August 29, 2003, Georgia Power filed a motion for partial summary judgment regarding emission offsets. On January 20, 2004, Georgia Power filed a motion for summary judgment on the remaining three counts, and the plaintiffs have filed motions for partial summary judgment. The case is currently scheduled for trial during the summer of 2004. While Georgia Power believes that it has complied with applicable laws and regulations, an adverse outcome could require payment of substantial penalties. The final outcome of this matter cannot now be determined.

**(10) Right of Way Litigation**

Southern Company and certain of its subsidiaries, including Georgia Power, Gulf Power, Mississippi Power, and Southern Telecom (collectively, defendants), have been named as defendants in numerous lawsuits brought by landowners since 2001 regarding the installation and use of fiber optic cable over defendants' rights of way located on the landowners' property. The plaintiffs' lawsuits claim that defendants may not use or sublease to third parties some or all of the fiber optic communications lines on the rights of way that cross the plaintiffs' properties and that such actions by defendants exceed the easements or other property rights held by defendants. The plaintiffs assert claims for, among other things, trespass and unjust enrichment. The plaintiffs seek compensatory and punitive damages and injunctive relief. With respect to one such lawsuit brought by landowners regarding the installation and use of fiber optic cable over Gulf Power rights of way located on the landowners' property, on November 7, 2003, the Second Circuit Court in Gadsden County, Florida, ruled in favor of the plaintiffs on their motion for partial summary judgment concerning liability. The question of damages, if any, will be decided at a future trial. In the event of an adverse verdict on damages, Gulf Power could appeal the verdicts on both liability and damages. Management of Southern Company and its subsidiaries believe that the defendant companies in the pending right of way litigation have complied with applicable laws and that the plaintiffs' claims are without merit. An adverse outcome in these matters could result in substantial judgments; however, the final outcome of these matters cannot now be determined.

In addition, in late 2001, certain subsidiaries of Southern Company, including Alabama Power, Georgia Power, Gulf Power, Mississippi Power, Savannah Electric, and Southern Telecom (collectively, defendants), were named as defendants in a lawsuit brought by a telecommunications company that uses certain of the defendants' rights of way. This lawsuit alleges, among other things, that the defendants are contractually obligated to indemnify, defend, and hold harmless the telecommunications company from any liability that may be assessed against the telecommunications company in pending and future right of way litigation. The defendants believe that the plaintiff's claims are without merit. An adverse outcome in this matter, combined with an adverse outcome against the telecommunications company in one or more of the right of way lawsuits, could result in substantial judgments; however, the final outcome of these matters cannot now be determined.

**(11) Jerry A. Carter v. Gulf Power**

On January 28, 2003, a jury in Escambia County, Florida, returned a verdict of $3 million against Gulf Power arising out of an alleged electrical injury sustained by the plaintiff in January 1999 while inside his apartment. This matter is on appeal to Florida's First District Court of Appeal. If this verdict is upheld, there is insurance coverage available to offset a substantial portion of this amount. The ultimate outcome of this matter cannot now be determined, but is not expected to have a

## Item 3. LEGAL PROCEEDINGS (Continued)

material impact on Gulf Power's financial statements.

Southern Company and its subsidiaries are subject to certain claims and legal actions arising in the ordinary course of business. In addition, the business activities of Southern Company and its subsidiaries are subject to extensive governmental regulation related to public health and the environment. Litigation over environmental issues and claims of various types, including property damage, personal injury and citizen enforcement of environmental requirements, has increased generally throughout the United States. In particular, personal injury claims for damages caused by alleged exposure to hazardous materials have become more frequent. The ultimate outcome of such litigation against Southern Company and its subsidiaries cannot be predicted at this time; however, management does not anticipate that the liabilities, if any, arising from such current proceedings would have a material adverse effect on the financial statements of Southern Company and its subsidiaries.

See Item 1 - BUSINESS - "Construction Programs," "Fuel Supply," "Regulation - Federal Power Act" and "Rate Matters" as well as Note 3 to each registrant's financial statements in Item 8 herein for a description of certain other administrative and legal proceedings discussed therein.

## Item 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS.

None.

## EXECUTIVE OFFICERS OF SOUTHERN COMPANY

*(Identification of executive officers of Southern Company is inserted in Part I in accordance with Regulation S-K, Item 401(b), Instruction 3.)* The ages of the officers set forth below are as of December 31, 2003.

Previously served as Northern Cluster Manager at Georgia Power for Plants Hammond, Bowen and McDonough-Atkinson from July 2000 to September 2000; and Manager of Plant Bowen at Georgia Power from 1997 to 2000.

(1) *Mr. Garrett was elected President and Director of Georgia Power effective January 1, 2004. In addition, he will become Chief Executive Officer of Georgia Power effective April 2004.*

(2) *Mr. Topazi was elected President, Chief Executive Officer and Director of Mississippi Power effective January 1, 2004.*

The officers of Mississippi Power were elected for a term running from the last annual meeting of the directors (April 23, 2003) for one year until the next annual meeting or until their successors are elected and have qualified, except for Mr. Kerley and Mr. Topazi whose elections were effective November 14, 2003 and January 1, 2004, respectively.

# PART II

## Item 5. MARKET FOR REGISTRANTS' COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

(a) The common stock of Southern Company is listed and traded on the New York Stock Exchange. The stock is also traded on regional exchanges across the United States. High and low stock prices, per the New York Stock Exchange Composite Tape, during each quarter for the past two years were as follows:

| | High | Low |
|---|---|---|
| **2003** | | |
| First Quarter | $30.81 | $27.71 |
| Second Quarter | 31.81 | 27.94 |
| Third Quarter | 30.53 | 27.76 |
| Fourth Quarter | 30.40 | 28.65 |
| **2002** | | |
| First Quarter | $26.78 | $24.49 |
| Second Quarter | 28.39 | 25.65 |
| Third Quarter | 29.02 | 23.89 |
| Fourth Quarter | 30.85 | 25.17 |

There is no market for the other registrants' common stock, all of which is owned by Southern Company. On February 25, 2004, the closing price of Southern Company's common stock was $29.79.

(b) Number of Southern Company's common stockholders of record at December 31, 2003:
134,068

Each of the other registrants have one common stockholder, Southern Company.

(c) Dividends on each registrant's common stock are payable at the discretion of their respective board of directors. The dividends on common stock declared by Southern Company and the retail operating companies to their stockholder(s) for the past two years were as follows:

| Registrant | Quarter | 2003 | 2002 |
|---|---|---|---|
| | | (in thousands) | |
| **Southern Company** | First | $ 245,745 | $ 234,272 |
| | Second | 247,324 | 236,154 |
| | Third | 255,042 | 242,850 |
| | Fourth | 256,334 | 244,309 |
| **Alabama Power** | First | 107,550 | 107,750 |
| | Second | 107,550 | 107,750 |
| | Third | 107,550 | 107,750 |
| | Fourth | 107,550 | 107,750 |
| **Georgia Power** | First | 141,450 | 135,725 |
| | Second | 141,450 | 135,725 |
| | Third | 141,450 | 135,725 |
| | Fourth | 141,450 | 135,725 |
| **Gulf Power** | First | 17,550 | 16,375 |
| | Second | 17,550 | 16,375 |
| | Third | 17,550 | 16,375 |
| | Fourth | 17,550 | 16,375 |
| **Mississippi Power** | First | 16,500 | 15,875 |
| | Second | 16,500 | 15,875 |
| | Third | 16,500 | 15,875 |
| | Fourth | 16,500 | 15,875 |
| **Savannah Electric** | First | 5,750 | 5,675 |
| | Second | 5,750 | 5,675 |
| | Third | 5,750 | 5,675 |
| | Fourth | 5,750 | 5,675 |

Southern Power did not pay a dividend in 2002, but paid a $77 million dividend to Southern Company in the third quarter of 2003.

The dividend paid per share by Southern Company was 33.5¢ first two quarters of 2002 and 34.25¢ for the two remaining quarters in 2002. The dividend paid on Southern Company's common stock for the first and second quarters of 2003 was 34.25¢ per share and for the third and fourth quarters of 2003 was 35¢ per share.

The amount of dividends on their common stock that may be paid by the subsidiary registrants (except Alabama Power, Georgia Power and Southern Power) is restricted in accordance with their respective first mortgage bond indenture. See Note 8 of Southern Company and Note 6 of Gulf Power, Mississippi Power and Savannah Electric to the financial statements in Item 8 herein for additional information regarding these restrictions. The amounts of earnings retained in the business and the amounts restricted against the payment of cash dividends on common stock at December 31, 2003 were as follows:

| | Retained Earnings | Restricted Amount |
|---|---|---|
| | (in millions) | |
| Alabama Power | $ 1,292 | $ - |
| Georgia Power | 2,010 | - |
| Gulf Power | 161 | 127 |
| Mississippi Power | 203 | 118 |
| Savannah Electric | 110 | 68 |
| Southern Power | 218 | - |
| Consolidated | 5,343 | $313 |

## Item 6. SELECTED FINANCIAL DATA

## Item 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

Previously reported by each registrant, except for Southern Power, in separate Current Reports on Form 8-K dated March 28, 2002.

## Item 9A. CONTROLS AND PROCEDURES

(a) Evaluation of disclosure controls and procedures.

As of the end of the period covered by this annual report, Southern Company, the retail operating companies and Southern Power conducted separate evaluations under the supervision and with the participation of each company's management, including the Chief Executive Officer and the Chief Financial Officer, of the effectiveness of the design and operation of the disclosure controls and procedures (as defined in Sections 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934). Based upon those evaluations, the Chief Executive Officer and the Chief Financial Officer, in each case, concluded that the disclosure controls and procedures are effective in alerting them in a timely manner to material information relating to each company (including its consolidated subsidiaries) required to be included in periodic filings with the SEC.

(b) Changes in internal controls.

There have been no changes in Southern Company's, the retail operating companies' or Southern Power's internal controls over financial reporting (as such term is defined in Rules 13a-15(f) and 15(d)-15(f) under the Securities Exchange Act of 1934) during the fourth quarter 2003 that have materially affected or are reasonably likely to materially affect, Southern Company's, the retail operating companies' or Southern Power's internal controls over financial reporting.

## MANAGEMENT'S REPORT

**Southern Company and Subsidiary Companies 2003 Annual Report**

The management of Southern Company has prepared -- and is responsible for -- the consolidated financial statements and related information included in this report. These statements were prepared in accordance with accounting principles generally accepted in the United States and necessarily include amounts that are based on the best estimates and judgments of management. Financial information throughout this annual report is consistent with the financial statements.

The company maintains a system of internal accounting controls to provide reasonable assurance that assets are safeguarded and that the accounting records reflect only authorized transactions of the company. Limitations exist in any system of internal controls, however, based on a recognition that the cost of the system should not exceed its benefits. The company believes its system of internal accounting controls maintains an appropriate cost/benefit relationship.

The company's internal accounting controls are evaluated on an ongoing basis by the company's internal audit staff. The company's independent public accountants also consider certain elements of the internal control system in order to determine their auditing procedures for the purpose of expressing an opinion on the financial statements.

The audit committee of the board of directors, composed of four independent directors, provides a broad overview of management's financial reporting and control functions. Periodically, this committee meets with management, the internal auditors, and the independent public accountants to ensure that these groups are fulfilling their obligations and to discuss auditing, internal controls, and financial reporting matters. The internal auditors and independent public accountants have access to the members of the audit committee at any time.

Management believes that its policies and procedures provide reasonable assurance that the company's operations are conducted according to a high standard of business ethics.

In management's opinion, the consolidated financial statements present fairly, in all material respects, the financial position, results of operations, and cash flows of Southern Company and its subsidiary companies in conformity with accounting principles generally accepted in the United States.

H. Allen Franklin
Chairman, President, and Chief Executive Officer

Thomas A. Fanning

## INDEPENDENT AUDITORS' REPORT

**To the Board of Directors and Stockholders of Southern Company**

We have audited the accompanying consolidated balance sheets and consolidated statements of capitalization of Southern Company and Subsidiary Companies as of December 31, 2003 and 2002, and the related consolidated statements of income, comprehensive income, common stockholder's equity, and cash flows for the years then ended. These financial statements are the responsibility of Southern Company's management. Our responsibility is to express an opinion on these financial statements based on our audits. The consolidated financial statements of Southern Company and Subsidiary Companies for the year ended December 31, 2001 were audited by other auditors who have ceased operations. Those auditors expressed an unqualified opinion on those consolidated financial statements and included an explanatory paragraph that described a change in the method of accounting for derivative instruments and hedging activities in their report dated February 13, 2002.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements (pages II-29 to II-61) present fairly, in all material respects, the financial position of Southern Company and Subsidiary Companies at December 31, 2003 and 2002, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note 1 to the financial statements, in 2003 Southern Company changed its method of accounting for asset retirement obligations.

Deloitte & Touche LLP

Atlanta, Georgia
March 1, 2004

**THE FOLLOWING REPORT OF INDEPENDENT PUBLIC ACCOUNTANTS IS A COPY OF THE REPORT PREVIOUSLY ISSUED IN CONNECTION WITH THE COMPANY'S 2001 ANNUAL REPORT AND HAS NOT BEEN REISSUED BY ARTHUR ANDERSEN LLP. SEE EXHIBIT 23(a)2 FOR ADDITIONAL INFORMATION.**

**To Southern Company:**

We have audited the accompanying consolidated balance sheets and consolidated statements of capitalization of Southern Company (a Delaware corporation) and subsidiary companies as of December 31, 2001 and 2000, and the related consolidated statements of income, common stockholder's equity, and cash flows for each of the three years in the period ended December 31, 2001. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements (pages II-19 through II-42) referred to above present fairly, in all material respects, the financial position of Southern Company and subsidiary companies as of December 31, 2001 and 2000, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2001, in conformity with accounting principles generally accepted in the United States.

As explained in Note 1 to the financial statements, effective January 1, 2001, Southern Company changed its method of accounting for derivative instruments and hedging activities.

Arthur Andersen LLP

## OVERVIEW OF CONSOLIDATED EARNINGS AND BUSINESS ACTIVITIES

### *Earnings*

Southern Company's financial performance in 2003 was very strong and one of the best in the electric utility industry. This performance reflected our goal to deliver solid results to stockholders and to provide low-cost energy to more than 4 million customers. Net income of $1.5 billion increased 11.8 percent over income reported in 2002. Net income from continuing operations was $1.3 billion in 2002 and $1.1 billion in 2001. This was a 17.6 percent and 12.7 percent increase in 2002 and 2001, respectively. Basic earnings per share from continuing operations in 2003 were $2.03 per share, $1.86 in 2002, and $1.62 in 2001. Dilution -- which factors in additional shares related to stock options -- decreased earnings per share in 2003, 2002, and 2001 by 1 cent each year.

On April 2, 2001, Southern Company completed the spin off of its remaining 80.1 percent ownership of Mirant Corporation (Mirant) in a tax-free transaction. As a result of the spin off, Southern Company's 2001 financial statements and related information reflect Mirant as discontinued operations.

### *Dividends*

Southern Company has paid dividends on its common stock since 1948. Dividends paid per share on common stock were $1.385 in 2003, $1.355 in 2002, and $1.34 in 2001. In January 2004, Southern Company declared a quarterly dividend of 35 cents per share. This is the 225th consecutive quarter that Southern Company has paid a dividend equal to or higher than the previous quarter. The company's goal for the dividend payout ratio is 70 percent.

### *Southern Company Business Activities*

Discussion of the results of operations is focused on Southern Company's primary business of electricity sales in the Southeast by the retail operating companies -- Alabama Power, Georgia Power, Gulf Power, Mississippi Power, and Savannah Electric -- and Southern Power. Southern Power is an electric wholesale generation subsidiary with market-based rate authority. Southern Company's other business activities include investments in synthetic fuels and leveraged lease projects, telecommunications, energy-related services, natural gas marketing, and the parent holding company.

Several factors affect the opportunities, challenges, and risk of Southern Company's primary business of selling electricity. These factors include the retail operating companies' ability to maintain a stable regulatory environment, to achieve energy sales growth while containing costs, and to recover costs related to growing demand and increasingly stricter environmental standards. Another major factor is the profitability of the competitive market-based wholesale generating business and federal regulatory policy, which may impact Southern Company's level of participation in this market. Future earnings for the electricity business in the near term will depend, in part, upon growth in energy sales, which is subject to a number of factors. These factors include weather, competition, new energy contracts with neighboring utilities, energy conservation practiced by customers, the price of electricity, the price elasticity of demand, and the rate of economic growth in the service area.

## RESULTS OF OPERATIONS

### Electricity Businesses

Southern Company's electric utilities generate and sell electricity to retail and wholesale customers in the Southeast. A condensed income statement for the six companies that make up the electricity business is as follows:

| | Amount | Increase (Decrease) From Prior Year | | |
|---|---|---|---|---|
| | **2003** | **2003** | 2002 | 2001 |
| | | (in millions) | | |
| Operating revenues | **$10,747** | **$541** | $ 300 | $46 |
| Fuel | **2,998** | **212** | 209 | 13 |
| Purchased power | **473** | **24** | (269) | 41 |
| Other operation and maintenance | **2,858** | **107** | 262 | 19 |
| Depreciation and amortization | **972** | **(16)** | (155) | 9 |
| Taxes other than income taxes | **584** | **29** | 22 | 1 |
| Total operating expenses | **7,885** | **356** | 69 | 83 |
| Operating income | **2,862** | **185** | 231 | (37) |
| Other income, net | **2** | **20** | (32) | 51 |
| Interest expenses and other, net | **595** | **9** | (24) | (25) |
| Income taxes | **845** | **68** | 76 | (1) |
| Net income | **$ 1,424** | **$128** | $ 147 | $40 |

*Revenues*

Details of electric operating revenues are as follows:

| | 2003 | 2002 | 2001 |
|---|---|---|---|
| | | (in millions) | |
| Retail -- prior year | **$ 8,728** | $ 8,440 | $8,600 |
| Change in -- | | | |
| Base rates | **75** | 33 | 23 |
| Sales growth | **104** | 98 | 61 |
| Weather | **(135)** | 158 | (177) |
| Fuel cost recovery and other | **103** | (1) | (67) |
| Retail -- current year | **8,875** | 8,728 | 8,440 |
| Sales for resale -- | | | |
| Within service area | **403** | 393 | 338 |
| Outside service area | **955** | 775 | 836 |
| Total sales for resale | **1,358** | 1,168 | 1,174 |
| Other electric operating revenues | **514** | 310 | 292 |
| Electric operating revenues | **$10,747** | $10,206 | $9,906 |
| Percent change | **5.3%** | 3.0% | 0.5% |

Retail revenues increased $147 million in 2003 and $288 million in 2002 and declined $160 million in 2001. The significant factors driving these changes are shown in the table above.

Electric rates -- for the retail operating companies -- include provisions to adjust billings for fluctuations in fuel costs, the energy component of purchased energy costs, and certain other costs. Under these fuel cost recovery provisions, fuel revenues generally equal fuel expenses -- including the fuel component of purchased energy -- and do not affect net income.

Sales for resale revenues within the service area for 2003 increased $10 million, which reflected increased customer growth offset by milder weather, compared with sales in 2002. Revenues from sales for resale within the service area in 2002 increased $55 million as a result of above normal weather. The same sales for resale category in 2001 was $338 million, down 10.2 percent from the prior year. This sharp decline resulted primarily from the mild weather experienced in the Southeast during 2001.

Revenues from energy sales for resale outside the service area increased $180 million as a result of new contracts, higher gas prices, and milder weather. The new contracts reflected some 2,400 megawatts of new generating capacity being placed into service in 2003. As a result of mild weather, more coal-fired generation was available for sale to utilities outside the service area. In general, sales for resale outside the service area can be significantly influenced by weather, which affects both customer demand and generating availability for these type sales. Neighboring utilities that depend heavily on gas-fired generation purchase larger amounts of power as natural gas prices increase. These factors contribute to the large fluctuations in sales from year to year.

In 2002, revenues from energy sales for resale outside the service area were down 7.3 percent after having increased 39 percent in 2001. The decline in 2002 resulted from the expiration of certain short-term energy sales contracts in effect in 2001. Revenues from outside the service area have increased $355 million since 2000 as a result of growth driven by new longer-term contracts. As Southern Company increases its competitive wholesale generation business, sales for resale outside the service area should reflect steady increases over the near term. Recent wholesale contracts with market-based capacity and energy rates have shorter contract periods than the traditional cost-based contracts entered into in the 1980s. The older contracts are principally unit power sales to Florida utilities. Under the unit power sales contracts, capacity revenues reflect the recovery of fixed costs and a return on investment, and energy is generally sold at variable cost. The capacity and energy components of the unit power contracts and other long-term contracts were as follows:

| | 2003 | 2002 | 2001 |
|---|---|---|---|
| | | (in millions) | |
| Unit power -- | | | |
| Capacity | **$182** | $175 | $170 |
| Energy | **211** | 198 | 201 |
| Other long term -- | | | |
| Capacity | **111** | 100 | 112 |
| Energy | **451** | 306 | 353 |
| Total | **$955** | $779 | $836 |

Capacity revenues for unit power contracts in 2003, 2002, and 2001 each varied slightly compared with the prior year as a result of adjustments and true-ups related to contractual pricing. No significant declines in the amount of capacity are scheduled until the termination of the contracts in 2010.

In May 2003, Mississippi Power and Southern Power entered into agreements with Dynegy, Inc. (Dynegy) that resolved and terminated in 2003 all outstanding matters related to capacity sales contracts with

subsidiaries of Dynegy. The termination payments from Dynegy resulted in an increase in other electric revenues of $135 million for the year 2003.

***Energy Sales***

Changes in revenues are influenced heavily by the volume of energy sold each year. Kilowatt-hour sales for 2003 and the percent change by year were as follows:

| (billions of kilowatt-hours) | Amount 2003 | Percent Change 2003 | 2002 | 2001 |
|---|---|---|---|---|
| Residential | **47.8** | **(1.9)%** | 9.5% | (3.6)% |
| Commercial | **48.4** | **0.3** | 2.8 | 1.5 |
| Industrial | **54.4** | **1.0** | 1.8 | (6.8) |
| Other | **1.0** | **(0.2)** | 2.3 | 0.7 |
| Total retail | **151.6** | **(0.2)** | 4.5 | (3.2) |
| Sales for resale -- | | | | |
| Within service area | **9.4** | **(11.2)** | 12.9 | (2.0) |
| Outside service area | **31.1** | **41.7** | 2.7 | 24.4 |
| Total | **192.1** | **4.2** | 4.7 | (0.5) |

Residential energy sales in 2003 reflected a decrease in customer demand as a result of very mild weather partially offset by an increase of 1.6 percent in new customers. Commercial sales continued to show steady growth while industrial sales increased somewhat over the depressed results of recent years. In 2002, the rate of growth in total retail energy sales was very strong. Residential energy sales reflected an increase as a result of hotter-than-normal summer weather and a 1.6 percent increase in customers served. In 2001, retail energy sales registered a 3.2 percent decline. This was the first decrease since 1982 and was driven by extremely mild weather and the sluggish economy, which severely impacted industrial sales. Energy sales to retail customers are projected to increase at an average annual rate of 1.6 percent during the period 2004 through 2014.

Sales to customers outside the service area under contracts and opportunity sales increased by 8.0 billion, 1.0 billion, and 3.9 billion kilowatt-hours in 2003, 2002, and 2001, respectively. In 2003, these sales reflected the expansion of the competitive wholesale contract business discussed earlier, as well as increased availability of coal-fired generation resulting from weather-related lower retail demand coupled with higher natural gas prices, which increase the wholesale market price related to opportunity sales. Unit power energy sales increased 4.0 percent in 2003, decreased 3.3 percent in 2002, and increased 2.7 percent in 2001. Fluctuations in oil and natural gas prices, which are the primary fuel sources for unit power sales customers, influence changes in sales. However, these fluctuations in energy sales under long-term contracts have minimal effect on earnings because the energy is generally sold at variable cost.

***Expenses***

Electric operating expenses in 2003 were $7.9 billion, an increase of $356 million over 2002 expenses. Electricity production costs exceeded last year's cost by $210 million as a result of increased electricity sales and a 6.8 percent increase in the average unit cost of fuel. Non-production electricity operation and maintenance costs also increased by $159 million in 2003. This increase in expenses was primarily driven by additional administrative and general expenses of $45 million, customer service expenses of $15 million, and a $60 million regulatory expense related to Plant Daniel. For more information regarding this regulatory expense, see Note 3 to the financial statements under "Mississippi Power Regulatory Filing." Taxes other than income taxes increased $29 million in 2003 as a result of new facilities with a higher tax basis for property taxes. Depreciation and amortization declined by $16 million in 2003, primarily as a result of Georgia Power's 2001 rate order to recognize certain purchased power costs evenly over a three-year period. This amortization reduced depreciation expense by $49 million in 2003. This expense was partially offset by a higher depreciable plant basis. For more information regarding the 2001 rate action, see Note 3 to the financial statements under "Georgia Power Retail Rate Orders."

In 2002, electric operating expenses were $7.5 billion, an increase of $69 million over 2001 expenses. Electricity production costs exceeded 2001 cost by $88 million as a result of increased electricity sales. Non-production electricity operation and maintenance costs also increased in 2002 by $109 million. Taxes other than income taxes increased $22 million in 2002. Depreciation and amortization declined by $155 million in 2002 primarily as a result of Georgia Power's 2001 rate order to reverse and amortize over three years $333 million that had been previously expensed related to accelerated depreciation under a previous rate order. This amortization reduced depreciation expense in 2002 by $111 million.

Electric operating expenses in 2001 increased only $83 million compared with the prior year. The moderate increase reflected flat energy sales and tighter cost-containment measures, which included lower staffing levels and reductions in certain non-critical expenses. The costs to produce electricity in 2001 increased $96 million. However, non-production operation and maintenance expenses declined by $23 million.

Fuel costs constitute the single largest expense for the six electric utilities. The mix of fuel sources for generation of electricity is determined primarily by demand, the unit cost of fuel consumed, and the availability of generating units. The amount and sources of generation, the average cost of fuel per net kilowatt-hour generated, and the average cost of purchased power were as follows:

| | **2003** | 2002 | 2001 |
|---|---|---|---|
| Total generation (billions of kilowatt-hours) | **189** | 183 | 174 |
| Sources of generation (percent) -- | | | |
| Coal | **71** | 69 | 72 |
| Nuclear | **16** | 16 | 16 |
| Gas | **9** | 12 | 9 |
| Hydro | **4** | 3 | 3 |
| Average cost of fuel per net kilowatt-hour generated (cents) | **1.72** | 1.61 | 1.56 |
| Average cost of purchased power per net kilowatt-hour (cents) | **3.82** | 4.17 | 6.10 |

Fuel and purchased power costs to produce electricity were $3.5 billion in 2003, an increase of $295 million or 7.4 percent above the prior year costs. This increase was attributed to higher unit fuel cost and increased customer demand. The additional demand was met by generating 6 billion and purchasing 1.6 billion more kilowatt-hours than in 2002.

In 2002, fuel and purchased power costs to produce electricity were $3.23 billion, a decrease of $79 million or 2.4 percent below the prior year costs. An additional 8.9 billion kilowatt-hours were generated in 2002, at a slightly higher average cost; however, this lowered requirements to purchase more expensive electricity from other utilities. Fuel and purchased power costs in 2001 were $3.3 billion, an increase of $54 million. Continued efforts to control energy costs, combined with additional efficient gas-fired generating units, helped to hold the increase in fuel expense to $13 million in 2001.

Total interest charges and other financing costs in 2003 increased by $19 million as a result of Southern Power issuing $575 million of senior notes in both 2003 and 2002 to finance new generating facilities. This increase offset the reduction in interest costs related to the retail operating companies refinancing higher-cost debt in 2003. Total interest charges and other financing costs declined by $24 million in 2002 and $25 million in 2001 as a result of much lower interest rates on short-term debt and continued refinancing of higher-cost long-term securities.

**Other Business Activities**

Southern Company's other business activities include the parent company -- which does not allocate operating expenses to business units -- investments in synthetic fuels and leveraged lease projects, telecommunications, energy services, and natural gas marketing. These businesses are classified in general categories and may comprise one or more of the following subsidiaries. Southern Company Holdings invests in synthetic fuels and leveraged lease projects that receive tax benefits, which contribute significantly to the economic results of these investments; Southern LINC provides digital wireless communications services to the retail operating companies and also markets these services to the public within the Southeast; Southern Telecom provides fiber optics services in the Southeast; and Southern Company Energy Solutions provides energy services, including energy efficiency improvements, for large commercial and industrial customers, municipalities, and government entities. Southern Company GAS is a retail gas marketer serving Georgia.

A condensed income statement for Southern Company's other business activities is shown below:

| | Amount | Increase (Decrease) From Prior Year | | |
|---|---|---|---|---|
| | **2003** | **2003** | 2002 | 2001 |
| | | (in millions) | | |
| Operating revenues | **$ 504** | **$161** | $ 94 | $ 43 |
| Operation and maintenance | **414** | **101** | 41 | 29 |
| Depreciation and amortization | **55** | **(4)** | 30 | (7) |
| Taxes other than income taxes | **2** | **--** | -- | (2) |
| Total operating expenses | **471** | **97** | 71 | 20 |
| Operating income | **33** | **64** | 23 | 23 |
| Equity in losses of unconsolidated subsidiaries | **(185)** | **(30)** | (102) | (31) |
| Leveraged lease income | **66** | **8** | (1) | (2) |
| Other income, net | **7** | **8** | (11) | 5 |
| Interest expenses | **104** | **6** | (37) | (62) |
| Income taxes | **(233)** | **16** | (105) | (29) |
| Net income | **$ 50** | **$ 28** | $ 51 | $ 86 |

Southern Company's non-regulated business investments continued to provide financial returns consistent with the company's earnings goals. Non-regulated revenues increased $161 million in 2003.

Southern Company GAS began operations in August 2002 and recorded revenues of $168 million in 2003 and $68 million in 2002. Southern LINC's revenues increased $8 million, $32 million, and $12 million in 2003, 2002, and 2001, respectively, as a result of increased wireless subscribers. Revenues from a subsidiary formed in April 2001 that provides services related to synthetic fuel products were $93 million in 2003, increasing by $37 million and $26 million in 2003 and 2002, respectively, as a result of increased production at the facilities. The majority of these revenues relate to transportation services that are billed at cost and, therefore, have no effect on net income.

The increases in 2003 and 2002 operating and maintenance expenses were primarily driven by Southern Company GAS' increases in operating expenses of $120 million and $60 million, respectively. These increases reflect only a partial year of operation in 2002 for Southern Company GAS. Natural gas purchases represent their primary operating expense. Also, the average cost of natural gas per decatherm increased 24 percent in 2003. These increases were partially offset by intersegment eliminations related to synthetic fuels being sold to the retail operating companies. See Note 1 to the financial statements under "Related Party Transactions" for additional information. In 2002, expenses increased $19 million for Southern LINC as a result of their additional subscribers, and expenses for synthetic fuel product services increased by $30 million as a result of increased production. In 2001, operation and maintenance expenses increased $37 million as a result of a subsidiary formed in April 2001 to produce synthetic fuel. This increase was partially offset by a reduction in expenses related to a private security subsidiary that was sold in late 2000.

The changes in depreciation expense in 2002 reflects a $16 million charge at Southern Company Energy Solutions related to the impairment of assets under contracts to certain customers, as well as the impact of property additions at Southern LINC. The 2001 decreases relate to investment write offs in 2000.

The increases in equity in losses of unconsolidated subsidiaries in 2002 and 2001 reflect the results of additional investments in synthetic fuel partnerships that produce operating losses. These partnerships also claim federal income tax credits that offset these operating losses and make the projects profitable. These credits totaled $120 million in 2003, $108 million in 2002, and $71 million in 2001.

The increase in other income in 2003 reflected a $15 million gain for a Southern Telecom contract settlement during the year. This gain was offset by an increase of $7 million in charitable contributions above the amount in 2002 made by the parent holding company.

Interest expenses for 2003 increased $18 million for the redemption of $430 million of preferred securities. This increase was partially offset by less short-term debt outstanding at the parent company. Interest expense charges in 2002 and 2001 reflect lower interest rates and less amounts of debt outstanding for the parent company.

**Effects of Inflation**

The retail operating companies and Southern Power are subject to rate regulation and long-term contracts, respectively, that are based on the recovery of historical costs. In addition, the income tax laws are also based on historical costs. Therefore, inflation creates an economic loss because the company is recovering its costs of investments in dollars that have less purchasing power. While the inflation rate has been relatively low in recent years, it continues to have an adverse effect on Southern Company because of the large investment in utility plant with long economic lives. Conventional accounting for historical cost does not recognize this economic loss nor the partially offsetting gain that arises through financing facilities with fixed-money obligations such as long-term debt and preferred securities. Any recognition of inflation by regulatory authorities is reflected in the rate of return allowed in the retail operating companies' approved electric rates.

**Future Earnings Potential**

***General***

The results of continuing operations for the past three years are not necessarily indicative of future earnings potential. The level of Southern Company's future earnings depends on numerous factors. These factors affect the opportunities, challenges, and risk of Southern Company's primary business of selling electricity. These factors include the retail operating companies' ability to maintain a stable regulatory environment, to achieve energy sales growth while containing costs, and to recover costs related to growing demand and increasingly stricter environmental standards. Another major factor is the profitability of the competitive market-based wholesale generating business and federal regulatory policy, which may impact Southern Company's level of participation in this market. Future earnings for the electricity business in the near term will depend, in part, upon growth in energy sales, which is subject to a number of factors. These factors include weather, competition, new energy contracts with neighboring

utilities, energy conservation practiced by customers, the price of electricity, the price elasticity of demand, and the rate of economic growth in the service area.

***Industry Restructuring***

The retail operating companies operate as vertically integrated companies providing electricity to customers within the service area of the southeastern United States. Prices for electricity provided to retail customers are set by state public service commissions under cost-based regulatory principles. Retail rates and earnings are reviewed and adjusted periodically within certain limitations based on earned return on equity. See Note 3 to the financial statements for additional information about these and other regulatory matters.

The electric utility industry in the United States is continuing to evolve as a result of regulatory and competitive factors. Among the early primary agents of change was the Energy Policy Act of 1992 (Energy Act). The Energy Act allowed independent power producers to access a utility's transmission network and sell electricity to other utilities.

Although the Energy Act does not provide for retail customer access, it was a major catalyst for restructuring and consolidations that took place within the utility industry. Numerous federal and state initiatives that promote wholesale and retail competition are in varying stages. Among other things, these initiatives allow retail customers in some states to choose their electricity provider. Some states have approved initiatives that result in a separation of the ownership and/or operation of generating facilities from the ownership and/or operation of transmission and distribution facilities. While various restructuring and competition initiatives have been discussed in Alabama, Florida, Georgia, and Mississippi, none have been enacted. Enactment could require numerous issues to be resolved, including significant ones relating to recovery of any stranded investments, full cost recovery of energy produced, and other issues related to the energy crisis that occurred in California, as well as the August 2003 power outage in the Northeast. As a result of these issues, many states, including those in Southern Company's retail service area, have either discontinued or delayed consideration of initiatives involving retail deregulation.

Since 2001, merchant energy companies and traditional electric utilities with significant energy marketing and trading activities have come under severe financial pressures. Many of these companies have completely exited or drastically reduced all energy marketing and trading activities and sold foreign and domestic electric infrastructure assets. Southern Company has not experienced any material adverse financial impact regarding its limited energy trading operations and recent generating capacity additions. In general, Southern Company only constructs new generating capacity after entering into long-term capacity contracts for the new facilities or to meet requirements of Southern Company's regulated retail markets, both of which are optimized by limited energy trading activities.

Southern Company continues to maintain and expand its wholesale energy business in the Southeast. In 2001, Southern Company formed Southern Power to construct, own, and manage wholesale generating assets in the Southeast. Southern Power is the primary growth engine for Southern Company's competitive wholesale energy business. By the end of 2005, Southern Power plans to have approximately 6,000 megawatts of available generating capacity in commercial operation. At December 31, 2003, approximately 4,800 megawatts were in commercial operation.

Continuing to be a low-cost producer could provide opportunities to increase the size and profitability of the electricity sales business in markets that evolve with changing regulation and competition. Conversely, future regulatory changes could adversely affect the company's growth, and if Southern Company's electric utilities do not remain low-cost producers and provide quality service, then energy sales growth could be limited, and this could significantly erode earnings.

To adapt to a less regulated, more competitive environment, Southern Company continues to evaluate and consider a wide array of potential business strategies. These strategies may include business combinations, acquisitions involving other utility or non-utility businesses or properties, internal restructuring, disposition of certain assets, or some combination thereof. Furthermore, Southern Company may engage in new business ventures that arise from competitive and regulatory changes in the utility industry. Pursuit of any of the above strategies, or any combination thereof, may significantly affect the business operations and financial condition of Southern Company.

***Environmental Matters***

*New Source Review Actions*

In November 1999, the Environmental Protection Agency (EPA) brought a civil action against certain Southern Company subsidiaries, including Alabama Power and Georgia Power, and alleged that these subsidiaries had violated the New Source Review (NSR) provisions of the Clean Air Act at five coal-fired

generating facilities. Through subsequent amendments and other legal procedures, the EPA added Savannah Electric as a defendant to the original action. The EPA filed a separate action against Alabama Power after it was dismissed from the original action. As of the date of this report, the EPA alleges that NSR violations occurred at eight coal-fired generating facilities operated by Alabama Power, Georgia Power, and Savannah Electric. The civil actions request penalties and injunctive relief, including an order requiring the installation of the best available control technology at the affected units. The actions against Alabama Power, Georgia Power, and Savannah Electric have been stayed since the spring of 2001 during the appeal of a very similar NSR action against the Tennessee Valley Authority before the U.S. Court of Appeals for the Eleventh Circuit. The Eleventh Circuit appeal was decided on September 16, 2003, and on February 13, 2004, the EPA petitioned the U.S. Supreme Court to review the Eleventh Circuit's decision. The EPA also filed a motion to lift the stay in the action against Alabama Power. At this time, no party to the Georgia Power and Savannah Electric action, which was administratively closed two years ago, has asked the court to reopen that case. See Note 3 to the financial statements under "New Source Review Actions" for additional information.

In December 2002 and October 2003, the EPA issued final revisions to its NSR regulations under the Clean Air Act. The December 2002 revisions included changes to the regulatory exclusions and the methods of calculating emissions increases. The October 2003 regulations clarified the scope of the existing Routine Maintenance, Repair, and Replacement exclusion. A coalition of states and environmental organizations filed petitions for review of these revisions with the U.S. Court of Appeals for the District of Columbia Circuit. On December 24, 2003, the court of appeals granted a stay of the October 2003 revisions pending its review of the rules and ordered that its review be conducted on an expedited basis. In January 2004, the Bush Administration announced that it would continue to enforce the existing rules until the courts resolve legal challenges to the EPA's revised NSR regulations. In any event, the final regulations must be adopted by the states in the company's service area in order to apply to facilities in the Southern Company system. The effect of these final regulations and the related legal challenges cannot be determined at this time.

Southern Company believes that its retail operating companies complied with applicable laws and the EPA's regulations and interpretations in effect at the time the work in question took place. The Clean Air Act authorizes civil penalties of up to $27,500 per day, per violation at each generating unit. Prior to January 30, 1997, the penalty was $25,000 per day. An adverse outcome in any one of these cases could require substantial capital expenditures that cannot be determined at this time and could possibly require payment of substantial penalties. This could affect future results of operations, cash flows, and possibly financial condition if such costs are not recovered through regulated rates.

*Plant Wansley Environmental Litigation*

On December 30, 2002, the Sierra Club, Physicians for Social Responsibility, Georgia ForestWatch, and one individual filed a civil suit in the U.S. District Court in Georgia against Georgia Power for alleged violations of the Clean Air Act at four of the units at Plant Wansley. The civil action requests injunctive and declaratory relief, civil penalties, a supplemental environmental project, and attorneys' fees. The Clean Air Act authorizes civil penalties of up to $27,500 per day, per violation at each generating unit. The case is currently scheduled for trial during the summer of 2004. See Note 3 to the financial statements under "Plant Wansley Environmental Litigation" for additional information.

While the company believes that it has complied with applicable laws and regulations, an adverse outcome could require payment of substantial penalties. The final outcome of this matter cannot now be determined.

*Environmental Statutes and Regulations*

Southern Company's operations are subject to extensive regulation by state and federal environmental agencies under a variety of statutes and regulations governing environmental media, including air, water, and land resources. Compliance with these environmental requirements will involve significant costs -- both capital and operating -- a major portion of which is expected to be recovered through existing ratemaking provisions. Environmental costs that are known and estimable at this time are included in capital expenditures discussed under "Capital Requirements and Contractual Obligations." There is no assurance, however, that all such costs will, in fact, be recovered.

Compliance with the federal Clean Air Act and resulting regulations has been and will continue to be a significant focus for the company. The Title IV acid rain provisions of the Clean Air Act, for example, required significant reductions in sulfur dioxide and nitrogen oxide emissions. Title IV compliance was effective in 2000 and associated construction expenditures totaled approximately $400 million. Some of these expenditures also assisted the company in complying with nitrogen oxide emission reduction requirements under Title I of the Clean Air Act, which were designed to address one-hour ozone

nonattainment problems in Atlanta, Georgia and Birmingham, Alabama. The states of Alabama and Georgia adopted regulations that required additional nitrogen oxide emission reductions from May through September of each year at plants in and/or near those nonattainment areas. Seven generating plants in the Atlanta area and two plants in the Birmingham area are currently subject to those requirements, the most recent of which went into effect in 2003. Construction expenditures for compliance with the nitrogen oxide emission reduction requirements are estimated to be approximately $950 million, of which $17 million remains to be spent.

On September 26, 2003, the EPA published a final rule, effective January 1, 2004, reclassifying the Atlanta area from a "serious" to a "severe" nonattainment area for the one-hour ozone air quality standard under Title I of the Clean Air Act. The attainment deadline is to be as expeditious as practicable but not later than November 15, 2005. If the Atlanta area fails to attain the one-hour ozone standard by the deadline, all major sources of nitrogen oxides and volatile organic compounds located in the nonattainment area, including Georgia Power's plants McDonough and Yates, could be subject to payment of annual emissions fees for nitrogen oxides emitted above 80 percent of the baseline period. The baseline period is expected to be the calendar year 2005. Based on average emissions at these units over the past three years, such fees could reach $23 million annually. The final outcome of this matter will depend on the baseline period selected and the development, approval, and implementation of applicable regulations, including new regulations for the eight-hour ozone air quality standard.

In 2002, Gulf Power entered into an agreement with the state of Florida to install additional controls on certain units and to retire three older units at a plant near Pensacola to help ensure attainment of the ozone standard in the area. The conditions of the agreement will be fully implemented by 2005 at a cost of approximately $133 million, of which $100 million remains to be spent. Gulf Power's costs have been approved under its environmental cost recovery clause.

To help ozone nonattainment areas attain the one-hour ozone standard, the EPA issued regional nitrogen oxide reduction rules in 1998. Those rules required 21 states, including Alabama and Georgia, to reduce and cap nitrogen oxide emissions from power plants and other large industrial sources. Affected sources, including five of the company's coal-fired plants in Alabama, must comply with the reduction requirements by May 31, 2004. Additional construction expenditures for compliance with these rules are currently estimated at approximately $380 million, of which $330 million remains to be spent. As a result of litigation challenging the rule, the courts required the EPA to complete a separate rulemaking before the requirements can be applied in Georgia. The final EPA rules have not been issued in Georgia.

In July 1997, the EPA revised the national ambient air quality standards for ozone and particulate matter. These revisions made the standards significantly more stringent. In the subsequent litigation of these standards, the U.S. Supreme Court found the EPA's implementation program for the new eight-hour ozone standard unlawful and remanded it to the EPA for further rulemaking. During 2003, the EPA proposed implementation rules designed to address the court's concerns. The EPA plans to designate areas as attainment or nonattainment with the new eight-hour ozone standard in April 2004 and with the new fine particulate matter standard by the end of 2004. These designations will be based on air quality data for 2001 through 2003. Several areas within Southern Company's service area are likely to be designated nonattainment under these standards. State implementation plans (SIPs), including new emission control regulations necessary to bring those areas into attainment, could be required as early as 2007. These SIPs could require reductions in sulfur dioxide emissions and could require further reductions in nitrogen oxide emissions from power plants. If so, reductions could be required sometime after 2007. The impact of any new standards will depend on the development and implementation of applicable regulations and cannot be determined at this time.

In January 2004, the EPA issued a proposed Interstate Air Quality Rule to address interstate transport of ozone and fine particles. This proposed rule would require additional year-round sulfur dioxide and nitrogen oxide emission reductions from power plants in the eastern United States in two phases – in 2010 and 2015. The EPA currently plans to finalize this rule by 2005. If finalized, the rule could modify or supplant other SIP requirements for attainment of the fine particulate matter standard and the eight-hour ozone standard. The impact of this rule on the company will depend upon the specific requirements of the final rule and cannot be determined at this time.

Further reductions in sulfur dioxide and nitrogen oxides could also be required under the EPA's Regional Haze rules. The Regional Haze rules require states to establish Best Available Retrofit Technology (BART) standards for certain sources that contribute to regional haze. The company has a number of plants that could be subject to these rules. The EPA's Regional Haze program calls for states to submit SIPs in 2007. The

SIPs must contain emission reduction strategies for implementing BART and achieving progress toward the Clean Air Act's visibility improvement goal. In 2002, however, the U.S. Court of Appeals for the District of Columbia Circuit vacated and remanded the BART provisions of the federal Regional Haze rules to the EPA for further rulemaking. The EPA has entered into an agreement that requires proposed revised rules in April 2004 and final rules in 2005. Because new BART rules have not been developed and state visibility assessments for progress are only beginning, it is not possible to determine the effect of these rules on the company at this time.

The EPA's Compliance Assurance Monitoring (CAM) regulations under Title V of the Clean Air Act require that monitoring be performed to ensure compliance with emissions limitations on an ongoing basis. In 2004 and 2005, a number of the company's plants will likely become subject to CAM requirements for at least one pollutant, in most cases particulate matter. The company is in the process of developing CAM plans. Because the plans are still under development, the company cannot determine the costs associated with implementation of the CAM regulations. Actual ongoing monitoring costs are expensed as incurred and are not material for any year presented.

In January 2004, the EPA issued proposed rules regulating mercury emissions from electric utility boilers. The proposal solicits comments on two possible approaches for the new regulations – a Maximum Achievable Control Technology approach and a cap-and-trade approach. Either approach would require significant reductions in mercury emissions from company facilities. The regulations are scheduled to be finalized by the end of 2004, and compliance could be required as early as 2007. Because the regulations have not been finalized, the impact on the company cannot be determined at this time.

Several major bills to amend the Clean Air Act to impose more stringent emissions limitations on power plants have been proposed by Congress. Three of these, the Bush Administration's Clear Skies Act, the Clean Power Act of 2003, and the Clean Air Planning Act of 2003, propose to further limit power plant emissions of sulfur dioxide, nitrogen oxides, and mercury. The latter two bills also propose to limit emissions of carbon dioxide. The cost impacts of such legislation would depend upon the specific requirements enacted and cannot be determined at this time.

Domestic efforts to limit greenhouse gas emissions have been spurred by international discussions surrounding the Framework Convention on Climate Change and specifically the Kyoto Protocol, which proposes international constraints on the emissions of greenhouse gases. The Bush Administration does not support U.S. ratification of the Kyoto Protocol or other mandatory carbon dioxide reduction legislation and has instead announced a new voluntary climate initiative, known as Climate VISION, which seeks an 18 percent reduction by 2012 in the rate of greenhouse gas emissions relative to the dollar value of the U.S. economy. Southern Company is involved in a voluntary electric utility industry sector climate change initiative in partnership with the government. The electric utility sector has pledged to reduce its greenhouse gas intensity 3 percent to 5 percent over the next decade and is in the process of developing a memorandum of understanding with the Department of Energy (DOE) to cover this voluntary program.

Southern Company must comply with other environmental laws and regulations that cover the handling and disposal of waste and releases of hazardous substances. Under these various laws and regulations, the subsidiaries could incur substantial costs to clean up properties. The subsidiaries conduct studies to determine the extent of any required cleanup and have recognized in their respective financial statements the costs to clean up known sites. Amounts for cleanup and ongoing monitoring costs were not material for any year presented. The subsidiaries may be liable for some or all required cleanup costs for additional sites that may require environmental remediation. See Note 3 to the financial statements under "Georgia Power Potentially Responsible Status" for additional information.

Under the Clean Water Act, the EPA has been developing new rules aimed at reducing impingement and entrainment of fish and fish larvae at power plants' cooling water intake structures. On February 16, 2004, the EPA finalized these rules. These rules will require biological studies and, perhaps, retrofits to some intake structures at existing power plants. The impact of these new rules will depend on the results of studies and analyses performed as part of the rules' implementation.

The company is also planning to install cooling towers at some of its facilities to cool water prior to discharge under the Clean Water Act. Cooling towers for two Georgia Power plants near Atlanta are scheduled for completion in 2004 and 2008 at a total estimated cost of $160 million, of which $90 million remains to be spent. Also, Georgia Power is conducting a study of the aquatic environment at another facility to determine if additional controls are necessary.

In addition, under the Clean Water Act, the EPA and state environmental regulatory agencies are developing total maximum daily loads (TMDLs) for certain impaired waters. Establishment of maximum loads by the EPA or state agencies may result in lowering permit limits for various pollutants and a requirement to take additional measures to control non-point source pollution (e.g., storm water runoff) at facilities that discharge into waters for which TMDLs are established. Because the effect on Southern Company will depend on the actual TMDLs and permit limitations established by the implementing agency, it is not possible to determine the effect on the company at this time.

Several major pieces of environmental legislation are periodically considered for reauthorization or amendment by Congress. These include: the Clean Air Act; the Clean Water Act; the Comprehensive Environmental Response, Compensation, and Liability Act; the Resource Conservation and Recovery Act; the Toxic Substances Control Act; the Emergency Planning & Community Right-to-Know Act; and the Endangered Species Act.

Compliance with possible additional federal or state legislation or regulations related to global climate change, electromagnetic fields, or other environmental and health concerns could also significantly affect Southern Company. The impact of any new legislation, changes to existing legislation, or environmental regulations could affect many areas of Southern Company's operations. The full impact of any such changes cannot, however, be determined at this time.

***FERC Matters***

*Transmission*

In December 1999, the Federal Energy Regulatory Commission (FERC) issued its final rule (Order 2000) on Regional Transmission Organizations (RTOs). Order 2000 encouraged utilities owning transmission systems to form RTOs on a voluntary basis. Southern Company worked with a number of utilities in the Southeast to develop a for-profit RTO known as SeTrans. In 2002, the sponsors of SeTrans established a Stakeholder Advisory Committee to provide input into the development of the RTO from other sectors of the electric industry, as well as consumers. During the development of SeTrans, state regulatory authorities expressed concern over certain aspects of the FERC's policies regarding RTOs. In December 2003, the SeTrans sponsors announced that they would suspend work on SeTrans because the regulated utility participants, including Southern Company, had determined that it was highly unlikely to obtain support of both federal and state regulatory authorities. Any impact of the FERC's rule on Southern Company and its subsidiaries will depend on the regulatory reaction to the suspension of SeTrans and future developments, which cannot now be determined.

In July 2002, the FERC issued a notice of proposed rulemaking regarding open access transmission service and standard electricity market design. The proposal, if adopted, would among other things: (1) require transmission assets of jurisdictional utilities to be operated by an independent entity; (2) establish a standard market design; (3) establish a single type of transmission service that applies to all customers; (4) assert jurisdiction over the transmission component of bundled retail service; (5) establish a generation reserve margin; (6) establish bid caps for day ahead and spot energy markets; and (7) revise the FERC policy on the pricing of transmission expansions. Comments on the proposal were submitted by many interested parties, including Southern Company, and the FERC has indicated that it has revised certain aspects of the proposal in response to public comments. Proposed energy legislation would prohibit the FERC from issuing the final rule before October 31, 2006, and from making any final rule effective before December 31, 2006. That legislation has been approved by the House of Representatives but remains pending before the Senate. Passage of the legislation now appears in doubt. It is uncertain whether in the absence of legislation the FERC will move forward with any part or all of the proposed rule. Any impact of this proposal on Southern Company and its subsidiaries will depend on the form in which the final rule may be ultimately adopted. However, Southern Company's financial statements could be adversely affected by changes in the transmission regulatory structure in its regional power market.

*Market-Based Rate Authority*

Southern Power currently has general authorization from the FERC to sell power to nonaffiliates at market-based prices. In addition, each of the retail operating companies has obtained FERC approval to sell power to nonaffiliates at market-based prices under specific contracts. Southern Power and the retail operating companies also have FERC authority to make short-term opportunity sales at market rates. Specific FERC approval must be obtained with respect to a market-based contract with an affiliate. In November 2001, the FERC modified the test it uses to consider utilities' applications to charge market-based rates and adopted a new test called the Supply Margin Assessment

(SMA). The FERC applied the SMA to several utilities, including Southern Company, and found Southern Company and others to be "pivotal suppliers" in their service areas and ordered the implementation of several mitigation measures. Southern Company and others sought rehearing of the FERC order, and the FERC delayed the implementation of certain mitigation measures. Southern Company and others submitted comments to the FERC in 2002 regarding these issues. In December 2003, the FERC issued a staff paper discussing alternatives and held a technical conference in January 2004. Southern Company anticipates that the FERC will address the requests for rehearing in the near future. Regardless of the outcome of the SMA proposal, the FERC retains the ability to modify or withdraw the authorization for any seller to sell at market-based rates, if it determines that the underlying conditions for having such authority are no longer applicable. In that event, Southern Power would be required to obtain FERC approval of rates based on cost of service, which may be lower than those in negotiated market-based rates. The final outcome of this matter will depend on the form in which the SMA test and mitigation measures' rules may be ultimately adopted and cannot be determined at this time.

Purchased Power Agreements (PPAs) by Georgia Power and Savannah Electric for Southern Power's Plant McIntosh capacity were certified by the Georgia Public Service Commission in December 2002 after a competitive bidding process. In April 2003, Southern Power applied for FERC approval of these PPAs. Interveners opposed the FERC's acceptance of the PPAs, alleging that the PPAs do not meet the applicable standards for market-based rates between affiliates. In July 2003, the FERC accepted the PPAs to become effective as scheduled on June 1, 2005, subject to refund, and ordered that hearings be held. For additional information, see Note 3 to the financial statements under "FERC Matters."

***Income Tax Matters***

*Synthetic Fuel Tax Credits*

As discussed in Note 3 to the financial statements under "Synthetic Fuel Tax Credits," Southern Company has investments in two entities that produce synthetic fuel and receive tax credits under Section 29 of the tax code. Both entities have received private letter rulings from the Internal Revenue Service (IRS) concluding that significant chemical change occurred based on the procedures and results submitted. From the inception of Southern Company's investment in these entities through December 31, 2003, Southern Company has recognized through income approximately $274 million (net of approximately $37 million reserved) in tax credits related to its share of the synthetic fuel production at these entities. However, if the IRS were to challenge these credits, there could be a significant tax liability due for tax credits previously taken, which could have a significant impact on earnings and cash flows.

*Leveraged Lease Transactions*

As discussed in Note 1 to the financial statements under "Leveraged Leases," Southern Company participates in four international leveraged lease transactions. Southern Company receives federal income tax deductions for rent, depreciation and amortization, as well as interest on related debt. The IRS has proposed to disallow the tax losses for one of the lease transactions, as discussed in Note 3 to the financial statements under "Leveraged Lease Transactions," resulting in additional taxes and interest of approximately $30 million. Southern Company accounted for this payment as a deposit and filed a refund claim that the IRS has proposed to disallow. If Southern Company is unsuccessful in defending its position, additional taxes and interest would be assessed that could have a material impact on earnings and cash flows. Although the IRS has not proposed any disallowances related to the three other lease transactions, subsequent audits may do so. The final outcome of these matters cannot now be determined.

***Other Matters***

In accordance with Financial Accounting Standards Board (FASB) Statement No. 87, Employers' Accounting for Pensions, Southern Company recorded non-cash pension income, before tax, of approximately $99 million, $117 million, and $124 million in 2003, 2002, and 2001, respectively. Future pension income is dependent on several factors including trust earnings and changes to the plan. The decline in pension income is expected to continue and become an expense as early as 2006. Postretirement benefit costs for Southern Company were $101 million, $99 million, and $96 million in 2003, 2002, and 2001, respectively, and are expected to continue to trend upward. A portion of pension income and postretirement benefit costs is capitalized based on construction-related labor charges. For the retail operating companies, pension income or expense and postretirement benefit costs are a component of the regulated rates and generally do not have a long-term effect on net income. For more information regarding pension and postretirement benefits, see Note 2 to the financial statements.

On December 8, 2003, President Bush signed into law the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (Medicare Act). The Medicare Act introduces a prescription drug benefit for Medicare-eligible retirees starting in 2006, as well as a federal subsidy to plan sponsors like Southern Company that provide prescription drug benefits. In accordance with FASB Staff Position No. 106-1, Southern Company has elected to defer recognizing the effects of the Medicare Act for its postretirement plans under FASB Statement No. 106, Employers' Accounting for Postretirement Benefits Other than Pension until authoritative guidance on accounting for the federal subsidy is issued or until a significant event occurs that would require remeasurement of the plans' assets and obligations. Southern Company anticipates that the benefits it pays after 2006 will be lower as a result of the Medicare Act; however, the retiree medical obligations and costs reported in Note 2 to the financial statements do not reflect these changes. The final accounting guidance could require changes to previously reported information.

Georgia Power is required to file a general retail rate case in July 2004. The outcome will have a significant impact on future earnings. See Note 3 to the financial statements under "Georgia Power Retail Rate Orders" for additional information.

On May 21, 2003, Mississippi Power and Southern Power entered into agreements with Dynegy that resolved and terminated in 2003 all outstanding matters related to capacity sales contracts with subsidiaries of Dynegy. The termination payments from Dynegy resulted in a one-time gain to Southern Company of approximately $88 million after tax -- $38 million for Mississippi Power and $50 million for Southern Power. As a result of the Dynegy capacity contract terminations, Southern Power is completing limited construction activities on Plant Franklin Unit 3 to preserve the long-term viability of the project but has deferred final completion until the 2008-2011 period. The length of the deferral period will depend on forecasted capacity needs and other wholesale market opportunities. Southern Power is continuing to explore alternatives for its existing capacity. On December 5, 2003, Mississippi Power filed a request with the Mississippi Public Service Commission (MPSC) to include 266 megawatts of Plant Daniel units 3 and 4 generating capacity in jurisdictional cost of service. See Note 3 to the financial statements under "Uncontracted Generating Capacity" and "Mississippi Power Regulatory Filing" for additional information.

On July 14, 2003, Mirant filed for voluntary reorganization under Chapter 11 with the U.S. Bankruptcy Court. Southern Company has certain contingent liabilities associated with guarantees of contractual commitments made by Mirant's subsidiaries discussed in Note 7 to the financial statements under "Guarantees" and with various lawsuits related to Mirant discussed in Note 3 to the financial statements under "Mirant Related Matters." Also, Southern Company has joint and several liability with Mirant regarding the joint consolidated federal income tax return as discussed in Note 5 to the financial statements. If Southern Company is ultimately required to make any payments related to these potential obligations, Mirant's indemnification obligation to Southern Company would represent an unsecured pre-bankruptcy claim, subject to compromise pursuant to Mirant's final reorganization plan.

Nuclear security legislation was recently introduced and considered in Congress both as a free-standing bill in the Senate and as a part of comprehensive energy legislation in a House-Senate Conference Report. Neither of the proposals has been enacted. The Nuclear Regulatory Commission (NRC) also ordered additional security measures for licensees in 2003. Southern Company is in the process of implementation and must be in full compliance with these orders by October 29, 2004. The requirements of the latest orders will have an impact on Southern Company's nuclear power plants and result in increased operation and maintenance expenses as well as additional capital expenditures. The precise impact of the new requirements will depend upon the details of the implementation of the new requirements, which have not been finalized.

Southern Company is involved in various matters being litigated, regulatory matters, and significant tax related issues that could affect future earnings. See Note 3 to the financial statements for information regarding material issues.

## ACCOUNTING POLICIES

### Application of Critical Accounting Policies and Estimates

Southern Company prepares its consolidated financial statements in accordance with accounting principles generally accepted in the United States. Significant accounting policies are described in Note 1 to the financial statements. In the application of these policies, certain estimates are made that may have a material impact on Southern Company's results of operations and related disclosures. Different assumptions and measurements could produce estimates that are significantly different from those recorded in the financial statements. Senior management has discussed the development and selection of the critical accounting

policies and estimates described below with the Audit Committee of Southern Company's Board of Directors.

*Electric Utility Regulation*

Southern Company's retail operating companies, which comprise approximately 85 percent of Southern Company's total earnings, are subject to retail regulation by their respective state public service commissions and wholesale regulation by the FERC. These regulatory agencies set the rates the retail operating companies are permitted to charge customers based on allowable costs. As a result, the retail operating companies apply FASB Statement No. 71, Accounting for the Effects of Certain Types of Regulation. Through the ratemaking process, the regulators may require the inclusion of costs or revenues in periods different than when they would be recognized by a non-regulated company. This treatment may result in the deferral of expenses and the recording of related regulatory assets based on anticipated future recovery through rates or the deferral of gains or creation of liabilities and the recording of related regulatory liabilities. The application of Statement No. 71 has a further effect on the company's financial statements as a result of the estimates of allowable costs used in the ratemaking process. These estimates may differ from those actually incurred by the retail operating companies; therefore, the accounting estimates inherent in specific costs such as depreciation, nuclear decommissioning, and pension and post-retirement benefits have less of a direct impact on the company's results of operations than they would on a non-regulated company.

As reflected in Note 1 to the financial statements, significant regulatory assets and liabilities have been recorded. Management reviews the ultimate recoverability of these regulatory assets and liabilities based on applicable regulatory guidelines. However, adverse legislation and judicial or regulatory actions could materially impact the amounts of such regulatory assets and liabilities and could adversely impact the company's financial statements.

*Contingent Obligations*

Southern Company and its subsidiaries are subject to a number of federal and state laws and regulations, as well as other factors and conditions that potentially subject them to environmental, litigation, income tax, and other risks. See "Future Earnings Potential" and Note 3 to the financial statements for more information regarding certain of these contingencies. Southern Company and its subsidiaries periodically evaluate their exposure to such risks and record reserves for those matters where a loss is considered probable and reasonably estimable in accordance with generally accepted accounting principles. The adequacy of reserves can be significantly affected by external events or conditions that can be unpredictable; thus, the ultimate outcome of such matters could materially affect Southern Company's financial statements or those of its subsidiaries. These events or conditions include the following:

- Changes in existing state or federal regulation by governmental authorities having jurisdiction over air quality, water quality, control of toxic substances, hazardous and solid wastes, and other environmental matters.
- Changes in existing income tax regulations or changes in IRS interpretations of existing regulations.
- Identification of additional sites that require environmental remediation or the filing of other complaints in which Southern Company or its subsidiaries may be asserted to be a potentially responsible party.
- Identification and evaluation of other potential lawsuits or complaints in which Southern Company or its subsidiaries may be named as a defendant.
- Resolution or progression of existing matters through the legislative process, the court systems, the IRS, or the EPA.

*Plant Daniel Capacity*

As discussed in Note 3 to the financial statements, Mississippi Power requested and received an interim accounting order from the MPSC on December 16, 2003. The order directed Mississippi Power to expense and record in 2003 a regulatory liability of $60 million pending the conclusion of the MPSC's evaluation of Mississippi Power's request to include an additional 266 megawatts of Plant Daniel units 3 and 4 generating capacity in jurisdictional cost of service. The MPSC is not expected to complete its evaluation and issue a final order until the second quarter of 2004. Management believes that the interim accounting order represents a probable liability and that recognition of the expense in 2003 is appropriate. However, if the MPSC ultimately refuses Mississippi Power's request, the regulatory liability will be required to be reversed.

**New Accounting Standards**

Prior to January 2003, Southern Company accrued for the ultimate cost of retiring most long-lived assets over the life of the related asset through depreciation expense. FASB Statement No. 143, Accounting for Asset Retirement Obligations established new accounting and reporting standards for legal obligations associated with the ultimate cost of retiring long-lived assets. The present

value of the ultimate costs for an asset's future retirement is recorded in the period in which the liability is incurred. The costs are capitalized as part of the related long-lived asset and depreciated over the asset's useful life. Additionally, non-regulated companies are no longer permitted to continue accruing future retirement costs for long-lived assets that they do not have a legal obligation to retire. For more information regarding the impact of adopting this standard effective January 1, 2003, see Note 1 to the financial statements under "Asset Retirement Obligations and Other Costs of Removal."

FASB Statement No. 149, Amendment of Statement 133 on Derivative Instruments and Hedging Activities, which further amends and clarifies the accounting and reporting for derivative instruments, became effective generally for financial instruments entered into or modified after June 30, 2003. Current interpretations of Statement No. 149 indicate that certain electricity forward transactions subject to unplanned netting -- including those typically referred to as "book outs" -- may only qualify as cash flow hedges if an entity can demonstrate that physical delivery or receipt of power occurred. Southern Company's forward electricity contracts continue to be exempt from fair value accounting requirements or to qualify as cash flow hedges, with the related gains and losses deferred in other comprehensive income. The implementation of Statement No. 149 did not have a material effect on Southern Company's financial statements.

In July 2003, the Emerging Issues Task Force (EITF) of FASB issued EITF No. 03-11, which became effective on October 1, 2003. The standard addresses the reporting of realized gains and losses on derivative instruments and is being interpreted to require book outs to be recorded on a net basis in operating revenues. Adoption of this standard did not have a material impact on Southern Company's financial statements.

FASB Interpretation No. 46, Consolidation of Variable Interest Entities, which was originally issued in January 2003, requires the primary beneficiary of a variable interest entity to consolidate the related assets and liabilities. Southern Company's previous interest in a variable interest entity related to Mississippi Power's lease arrangement for certain facilities at Plant Daniel was restructured prior to the original effective date of July 1, 2003, and is no longer subject to Interpretation No. 46. See Note 7 to the financial statements under "Operating Leases" for additional information. In December 2003, the FASB revised Interpretation No. 46 and deferred the effective date until March 31, 2004, for interests held in variable interest entities other than special purpose entities.

Current analysis indicates that the trusts established by Southern Company and the retail operating companies to issue preferred securities are variable interest entities under Interpretation No. 46, and that Southern Company and the retail operating companies are not the primary beneficiaries of these trusts. If this conclusion is finalized, effective March 31, 2004, the trust assets and liabilities -- including the preferred securities issued by the trusts -- will be deconsolidated. The investments in the trusts and the loans from the trusts to Southern Company and the retail operating companies will be reflected as equity method investments and as long-term notes payable to affiliates, respectively, on the Consolidated Balance Sheets. Based on December 31, 2003 values, this treatment would result in an increase of approximately $59 million to both total assets and total liabilities. See Note 6 to the financial statements under "Mandatorily Redeemable Preferred Securities" for additional information.

Southern Company has also identified certain other significant variable interest investments. These include two entities that produce synthetic fuel and are further described in Note 3 to the financial statements under "Synthetic Fuel Tax Credits." Southern Company is not the primary beneficiary of these entities. Southern Company also holds an 85 percent limited partnership investment in an energy/telecom venture capital fund that is currently accounted for under the equity method. At December 31, 2003, this investment totaled $17 million; the company has committed to a maximum investment of $75 million. Southern Company is continuing to review its transactions in light of the revised Interpretation No. 46; however, adoption is not currently expected to have a material impact on Southern Company's financial statements.

In May 2003, the FASB issued Statement No. 150, Accounting for Certain Financial Instruments with Characteristics of Both Liabilities and Equity, which requires classification of certain financial instruments within its scope, including shares that are mandatorily redeemable, as liabilities. Statement No. 150 was effective for financial instruments entered into or modified after May 31, 2003, and otherwise on July 1, 2003. In accordance with Statement No. 150, mandatorily redeemable preferred securities are reflected in the Consolidated Balance Sheets as liabilities. The adoption of Statement No. 150 had no impact on the Consolidated Statements of Income and Cash Flows.

## FINANCIAL CONDITION AND LIQUIDITY

### Overview

Southern Company's financial condition continues to be strong. At December 31, 2003, each of the retail operating companies was within its allowed range of return on equity. They operated at high levels of reliability while achieving industry-leading customer satisfaction levels and continuing to have retail prices below the national average. Also, earnings from the competitive generation business and other business activities made a significant contribution to the company's earnings goal of 5 percent average long-term growth.

At the close of 2003, the market value of Southern Company's common stock was $30.25 per share, compared with book value of $13.13 per share. The market-to-book value ratio was 230 percent at the end of 2003, compared with 233 percent at year-end 2002.

Gross property additions to utility plant were $2.0 billion in 2003. The majority of funds needed for gross property additions since 2000 has been provided from operating activities. The Consolidated Statements of Cash Flows provide additional details.

### Sources of Capital

Southern Company intends to meet its future capital needs through internal cash flow and externally through the issuance of debt, preferred securities, and equity. The amount and timing of additional equity capital to be raised in 2004 -- as well as in subsequent years -- will be contingent on Southern Company's investment opportunities. The company does not currently anticipate any equity offerings in 2004. Equity capital can be provided from any combination of the company's stock plans, private placements, or public offerings.

The retail operating companies plan to obtain the funds required for construction and other purposes from sources similar to those used in the past, which were primarily from operating cash flows. However, the type and timing of any financings -- if needed -- will depend on market conditions and regulatory approval. In recent years, financings primarily have utilized unsecured debt and preferred securities.

Southern Power will use both external funds and equity capital from Southern Company to finance its construction program. External funds are expected to be obtained from the issuance of unsecured senior debt and commercial paper or through existing credit arrangements from banks.

Southern Company and each operating company obtain financing separately without credit support from any affiliate. Currently, Southern Company provides limited credit support to Southern Power. See Note 6 to the financial statements under "Bank Credit Arrangements" for additional information. The Southern Company system does not maintain a centralized cash or money pool. Therefore, funds of each company are not commingled with funds of any other company. In accordance with the Public Utility Holding Company Act, most loans between affiliated companies must be approved in advance by the Securities and Exchange Commission (SEC).

Southern Company's current liabilities exceed current assets because of the continued use of short-term debt as a funding source to meet cash needs as well as scheduled maturities of long-term debt.

To meet short-term cash needs and contingencies, Southern Company has various internal and external sources of liquidity. At the beginning of 2004, Southern Company and its subsidiaries had approximately $311 million of cash and cash equivalents and $3.5 billion of unused credit arrangements with banks, as shown in the following table. In addition, Southern Company has substantial cash flow from operating activities and access to the capital markets, including commercial paper programs, to meet liquidity needs. Cash flows from operating activities were $3.1 billion in 2003, $2.8 billion in 2002, and $2.4 billion in 2001.

At the beginning of 2004, bank credit arrangements are as follows:

| | | Expires | |
|---|---|---|---|
| Total | Unused | 2004 | 2005 & Beyond |
| | | (in millions) | |
| $3,496 | $3,476 | $2,806 | $670 |

Approximately $2.25 billion of the credit facilities expiring in 2004 allow for the execution of term loans for an additional two-year period and $265 million allow for the execution for one-year term loans. See Note 6 to the financial statements under "Bank Credit Arrangements" for additional information.

**Financing Activities**

During 2003, Southern Company and its subsidiaries issued $3.5 billion of long-term debt and $125 million of preferred securities. In addition, Southern Company issued 18 million new shares of common stock through the company's stock plans and realized proceeds of $470 million. The issuances were used to refund $3.0 billion of long-term debt and $480 million of mandatorily redeemable preferred securities and to provide $575 million of permanent financing for Southern Power's new generating facilities. The remainder was used to reduce short-term debt, provide capital contributions to subsidiaries, and fund Southern Company's ongoing construction program.

Subsequent to December 31, 2003, the retail operating companies have issued $850 million of securities to redeem $400 million of long-term debt and mandatorily redeemable preferred securities and for other corporate purposes.

**Off-Balance Sheet Financing Arrangements**

In May 2001, Mississippi Power began the initial 10-year term of a lease agreement signed in 1999 for a combined cycle generating facility built at Plant Daniel. The facility cost approximately $370 million. In 2003, the generating facility was acquired by Juniper Capital L.P. (Juniper), a limited partnership whose investors are unaffiliated with Mississippi Power. Simultaneously, Juniper entered into a restructured lease agreement with Mississippi Power. Juniper has also entered into leases with other parties unrelated to Mississippi Power. The assets leased by Mississippi Power comprise less than 50 percent of Juniper's assets. Mississippi Power is not required to consolidate the leased assets and related liabilities, and the lease with Juniper is considered an operating lease under FASB Statement No. 13. The lease also provides for a residual value guarantee -- approximately 73 percent of the acquisition cost -- by Mississippi Power that is due upon termination of the lease in the event that the company does not renew the lease or purchase the assets and that the fair market value is less than the unamortized cost of the assets. See Note 7 to the financial statements under "Operating Leases" for additional information regarding this lease.

**Credit Rating Risk**

Southern Company and its subsidiaries do not have any credit agreements that would require material changes in payment schedules or terminations as a result of a credit rating downgrade. There are contracts that could require collateral -- but not accelerated payment -- in the event of a credit rating change to below investment grade. These contracts are primarily for physical electricity purchases and sales, fixed-price physical gas purchases, and agreements covering interest rate swaps. At December 31, 2003, the maximum potential collateral requirements under the electricity purchase and sale contracts were approximately $415 million. Generally, collateral may be provided for by a Southern Company guaranty, a letter of credit, or cash. At December 31, 2003, there were no material collateral requirements for the gas purchase contracts or other financial instrument agreements.

**Market Price Risk**

Southern Company is exposed to market risks, including changes in interest rates and certain energy-related commodity prices. To manage the volatility attributable to these exposures, the company nets the exposures to take advantage of natural offsets and enters into various derivative transactions for the remaining exposures pursuant to the company's policies in areas such as counterparty exposure and hedging practices. Company policy is that derivatives are to be used primarily for hedging purposes. Derivative positions are monitored using techniques that include market valuation and sensitivity analysis.

To mitigate exposure to interest rates, the company has entered into interest rate swaps that have been designated as hedges. The weighted average interest rate on $1.0 billion variable long-term debt that has not been hedged at December 31, 2003 was 1.5 percent. If Southern Company sustained a 100 basis point change in interest rates for all unhedged variable rate long-term debt, the change would affect annualized interest expense by approximately $10 million at December 31, 2003. The company is not aware of any facts or circumstances that would significantly affect such exposures in the near term. For further information, see notes 1 and 6 to the financial statements under "Financial Instruments."

Due to cost-based rate regulations, the retail operating companies have limited exposure to market volatility in interest rates, commodity fuel prices, and prices of electricity. In addition, Southern Power's exposure to market volatility in commodity fuel prices and prices of electricity is limited because its long-term sales contracts shift substantially all fuel cost responsibility to the purchaser. To mitigate residual risks relative to movements in electricity prices, the retail operating companies and Southern Power enter

into fixed price contracts for the purchase and sale of electricity through the wholesale electricity market and, to a lesser extent, into similar contracts for gas purchases. The retail operating companies have implemented fuel-hedging programs at the instruction of their respective public service commissions. Southern Company GAS also has gas-hedging programs to substantially mitigate its exposure to price volatility for its gas purchases.

The fair value of changes in energy-related derivative contracts and year-end valuations were as follows at December 31:

| | Changes in Fair Value | |
|---|---|---|
| | **2003** | 2002 |
| | (in millions) | |
| Contracts beginning of year | **$ 47.3** | $ 1.3 |
| Contracts realized or settled | **(73.2)** | (32.2) |
| New contracts at inception | **–** | – |
| Changes in valuation techniques | **–** | – |
| Current period changes | **41.7** | 78.2 |
| Contracts end of year | **$ 15.8** | $ 47.3 |

Source of 2003 Year-End Valuation Prices

| | Total Fair Value | Maturity 2004 | Maturity 2005-2006 |
|---|---|---|---|
| | | (in millions) | |
| Actively quoted | **$15.8** | **$16.9** | **$(1.1)** |
| External sources | **–** | **–** | **–** |
| Models and other methods | **–** | **–** | **–** |
| Contracts end of year | **$15.8** | **$16.9** | **$(1.1)** |

Unrealized gains and losses from mark to market adjustments on derivative contracts related to the retail operating companies' fuel hedging programs are recorded as regulatory assets and liabilities. Realized gains and losses from these programs are included in fuel expense and are recovered through the retail operating companies' fuel cost recovery clauses. In addition, unrealized gains and losses on energy-related derivatives used by Southern Power and Southern Company GAS to hedge anticipated purchases and sales are deferred in other comprehensive income. Gains and losses on derivative contracts that are not designated as hedges are recognized in the income statement as incurred. At December 31, 2003, the fair value of derivative energy contracts was reflected in the financial statements as follows:

| | Amounts |
|---|---|
| | (in millions) |
| Regulatory liabilities, net | **$14.9** |
| Other comprehensive income | **1.5** |
| Net income | **(0.6)** |
| Total fair value | **$15.8** |

Unrealized pre-tax gains (losses) of $(2) million, $(5) million, and $9 million were recognized in income in 2003, 2002, and 2001, respectively. Southern Company is exposed to market price risk in the event of nonperformance by counterparties to the derivative energy contracts. Southern Company's policy is to enter into agreements with counterparties that have investment grade credit ratings by Moody's and Standard & Poor's or with counterparties who have posted collateral to cover potential credit exposure. Therefore, Southern Company does not anticipate market risk exposure from nonperformance by the counterparties. For additional information, see notes 1 and 6 to the financial statements under "Financial Instruments."

**Capital Requirements and Contractual Obligations**

The construction program of Southern Company is currently estimated to be $2.2 billion for 2004, $2.2 billion for 2005, and $2.6 billion for 2006. Environmental expenditures included in these amounts are $349 million, $403 million, and $646 million for 2004, 2005, and 2006, respectively. Actual construction costs may vary from this estimate because of changes in such factors as: business conditions; environmental regulations; nuclear plant regulations; FERC rules and transmission regulations; load projections; the cost and efficiency of construction labor, equipment, and materials; and the cost of capital. In addition, there can be no assurance that costs related to capital expenditures will be fully recovered.

Southern Company has approximately 1,200 megawatts of new generating capacity scheduled to be placed in service by 2005. The additional new capacity will be dedicated to the wholesale market and

owned by Southern Power. In addition, capital improvements, including those needed to meet the environmental standards previously discussed for the retail operating companies' generation, transmission, and distribution facilities are ongoing.

As a result of requirements by the NRC, Alabama Power and Georgia Power have established external trust funds for nuclear decommissioning costs. For additional information, see Note 1 to the financial statements under "Nuclear Decommissioning." Also, as discussed in Note 1 to the financial statements under "Revenues and Fuel Costs," in 1993 the DOE implemented a special assessment over a 15-year period on utilities with nuclear plants to be used for the decontamination and decommissioning of its nuclear fuel enrichment facilities.

In addition, as discussed in Note 2 to the financial statements, Southern Company provides postretirement benefits to substantially all employees and funds trusts to the extent required by the retail operating companies' respective regulatory commissions.

Other funding requirements related to obligations associated with scheduled maturities of long-term debt and preferred securities, as well as the related interest and distributions, preferred stock dividends, leases, and other purchase commitments are as follows. See notes 1, 6, and 7 to the financial statements for additional information.

| | 2004 | 2005-2006 | 2007-2008 | After 2008 | Total |
|---|---|---|---|---|---|
| | | | (in millions) | | |
| Long-term debt and preferred securities[a] -- | | | | | |
| Principal | $ 741 | $ 1,842 | $1,448 | $ 8,795 | $12,826 |
| Interest and distributions | 614 | 1,116 | 968 | 8,468 | 11,166 |
| Preferred stock dividends[b] | 22 | 44 | 44 | – | 110 |
| Operating leases | 128 | 208 | 143 | 262 | 741 |
| Purchase commitments[c] -- | | | | | |
| Capital[d] | 2,121 | 4,799 | – | – | 6,920 |
| Coal and nuclear fuel | 2,409 | 3,198 | 1,675 | 182 | 7,464 |
| Natural gas[e] | 814 | 1,029 | 619 | 2,763 | 5,225 |
| Purchased power | 139 | 355 | 367 | 918 | 1,779 |
| Long-term service agreements | 54 | 98 | 169 | 988 | 1,309 |
| Trusts -- | | | | | |
| Nuclear decommissioning | 29 | 58 | 58 | 317 | 462 |
| Postretirement benefits[f] | 15 | 75 | – | – | 90 |
| DOE | 8 | 16 | – | – | 24 |
| Total | $7,094 | $12,838 | $5,491 | $22,693 | $48,116 |

(a) All amounts are reflected based on final maturity dates. Southern Company and the subsidiaries will continue to retire higher-cost securities and replace these obligations with lower-cost capital if market conditions permit. Variable rate interest obligations are estimated based on rates as of January 1, 2004, as reflected in the Consolidated Statements of Capitalization.

(b) Preferred stock does not mature; therefore, amounts are provided for the next five years only.

(c) Southern Company generally does not enter into non-cancelable commitments for other operation and maintenance expenditures. Total other operation and maintenance expenses for the last three years were $3.2 billion, $3.1 billion, and $2.8 billion, respectively.

(d) Southern Company forecasts capital expenditures over a three-year period. Amounts represent current estimates of total expenditures excluding those amounts related to contractual purchase commitments for uranium and nuclear fuel conversion, enrichment, and fabrication services. At December 31, 2003, significant purchase commitments were outstanding in connection with the construction program.

(e) Natural gas purchase commitments are based on various indices at the time of delivery. Amounts reflected have been estimated based on the New York Mercantile future prices at December 31, 2003.

(f) Southern Company forecasts postretirement trust contributions over a three-year period. No contributions related to Southern Company's pension trust are currently expected during this period. See Note 2 to the financial statements for additional information related to the pension plans.

## Cautionary Statement Regarding Forward-Looking Information

Southern Company's 2003 Annual Report includes forward-looking statements in addition to historical information. Forward-looking information includes, among other things, statements concerning the strategic goals for Southern Company's wholesale business, estimated construction and other expenditures, and Southern Company's projections for energy sales and its goals for future generating capacity, dividend payout ratio, earnings per share, and earnings growth. In some cases, forward-looking statements can be identified by terminology such as "may," "will," "could," "should," "expects," "plans," "anticipates," "believes," "estimates," "projects," "predicts," "potential," or "continue" or the negative of these terms or other comparable terminology. Southern Company cautions that there are various important factors that could cause actual results to differ materially from those indicated in the forward-looking statements; accordingly, there can be no assurance that such indicated results will be realized. These factors include:

- the impact of recent and future federal and state regulatory change, including legislative and regulatory initiatives regarding deregulation and restructuring of the electric utility industry and also changes in environmental, tax, and other laws and regulations to which Southern Company and its subsidiaries are subject, as well as changes in application of existing laws and regulations;
- current and future litigation, regulatory investigations, proceedings, or inquiries, including the pending EPA civil actions against certain Southern Company subsidiaries and current IRS audits;
- the effects, extent, and timing of the entry of additional competition in the markets in which Southern Company's subsidiaries operate;
- the impact of fluctuations in commodity prices, interest rates, and customer demand;
- available sources and costs of fuels;
- ability to control costs;
- investment performance of Southern Company's employee benefit plans;
- advances in technology;
- state and federal rate regulations and pending and future rate cases and negotiations;
- effects of and changes in political, legal, and economic conditions and developments in the United States, including the current soft economy;
- the performance of projects undertaken by the non-traditional business and the success of efforts to invest in and develop new opportunities;
- internal restructuring or other restructuring options that may be pursued;
- potential business strategies, including acquisitions or dispositions of assets or businesses, which cannot be assured to be completed or beneficial to Southern Company or its subsidiaries;
- the ability of counterparties of Southern Company and its subsidiaries to make payments as and when due;
- the ability to obtain new short- and long-term contracts with neighboring utilities;
- the direct or indirect effects on Southern Company's business resulting from the terrorist incidents on September 11, 2001, or any similar incidents or responses to such incidents;
- financial market conditions and the results of financing efforts, including Southern Company's and its subsidiaries' credit ratings;
- the ability of Southern Company and its subsidiaries to obtain additional generating capacity at competitive prices;
- weather and other natural phenomena;
- the direct or indirect effects on Southern Company's business resulting from the August 2003 power outage in the Northeast, or any similar incidents;
- the effect of accounting pronouncements issued periodically by standard-setting bodies; and
- other factors discussed elsewhere herein and in other reports (including the Form 10-K) filed from time to time with the SEC.

## CONSOLIDATED STATEMENTS OF INCOME

## 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

### General

Southern Company is the parent company of five retail operating companies, Southern Power Company (Southern Power), Southern Company Services (SCS), Southern Communications Services (Southern LINC), Southern Company Gas (Southern Company GAS), Southern Company Holdings (Southern Holdings), Southern Nuclear Operating Company (Southern Nuclear), Southern Telecom, and other direct and indirect subsidiaries. The retail operating companies -- Alabama Power, Georgia Power, Gulf Power, Mississippi Power, and Savannah Electric -- provide electric service in four Southeastern states. Southern Power constructs, owns, and manages Southern Company's competitive generation assets and sells electricity at market-based rates in the wholesale market. Contracts among the retail operating companies and Southern Power -- related to jointly owned generating facilities, interconnecting transmission lines, or the exchange of electric power -- are regulated by the Federal Energy Regulatory Commission (FERC) and/or the Securities and Exchange Commission (SEC). SCS -- the system service company -- provides, at cost, specialized services to Southern Company and subsidiary companies. Southern LINC provides digital wireless communications services to the retail operating companies and also markets these services to the public within the Southeast. Southern Telecom provides fiber cable services within the Southeast. Southern Company GAS is a competitive retail natural gas marketer serving customers in Georgia. Southern Holdings is an intermediate holding subsidiary for Southern Company's investments in synthetic fuels and leveraged leases and an energy services business. Southern Nuclear operates and provides services to Southern Company's nuclear power plants.

On April 2, 2001, the spin off of Mirant Corporation (Mirant) was completed. As a result of the spin off, Southern Company's financial statements and related information reflect Mirant as discontinued operations. For additional information regarding Mirant, see Note 3 under "Mirant Related Matters."

The financial statements reflect Southern Company's investments in the subsidiaries on a consolidated basis. The equity method is used for subsidiaries in which the company has significant influence but does not control. All material intercompany items have been eliminated in consolidation. Certain prior years' data presented in the consolidated financial statements have been reclassified to conform with the current year presentation.

Southern Company is registered as a holding company under the Public Utility Holding Company Act of 1935 (PUHCA). Both the company and its subsidiaries are subject to the regulatory provisions of the PUHCA. In addition, the retail operating companies and Southern Power are subject to regulation by the FERC, and the retail operating companies are also subject to regulation by their respective state public service commissions. The companies follow accounting principles generally accepted in the United States and comply with the accounting policies and practices prescribed by their respective commissions. The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires the use of estimates, and the actual results may differ from those estimates.

### Related Party Transactions

Alabama Power and Georgia Power purchase synthetic fuel from Alabama Fuel Products, LLC (AFP), an entity in which Southern Holdings holds a 30 percent ownership interest. Total fuel purchases for 2003 and 2002 were $301 million and $211 million, respectively. The financial statements reflect the elimination of 30 percent of these amounts. Another subsidiary of Southern Holdings provides services to AFP. In connection with these services, revenues of approximately $74 million and $44 million in 2003 and 2002, respectively, have been billed to an entity that is a subsidiary of AFP's majority owner.

### Revenues and Fuel Costs

Capacity revenues are generally recognized on a levelized basis over the appropriate contract periods. Energy and other revenues are recognized as services are provided. Unbilled revenues are accrued at the end of each fiscal period. Fuel costs are expensed as the fuel is used. Electric rates for the retail operating companies include provisions to adjust billings for fluctuations in fuel costs, fuel hedging, the energy component of purchased power costs, and certain other costs. Revenues are adjusted for differences between recoverable fuel costs and amounts actually recovered in current regulated rates.

Southern Company has a diversified base of customers. No single customer or industry comprises 10 percent or more of revenues. For all periods presented, uncollectible accounts continued to average less than 1 percent of revenues.

Fuel expense includes the amortization of the cost of nuclear fuel and a charge, based on nuclear generation, for the permanent disposal of spent nuclear fuel. Total

charges for nuclear fuel included in fuel expense amounted to $138 million in 2003, $134 million in 2002, and $133 million in 2001. Alabama Power and Georgia Power have contracts with the U.S. Department of Energy (DOE) that provide for the permanent disposal of spent nuclear fuel. The DOE failed to begin disposing of spent nuclear fuel in January 1998 as required by the contracts, and the companies are pursuing legal remedies against the government for breach of contract. Sufficient pool storage capacity for spent fuel is available at Plant Farley to maintain full-core discharge capability until the refueling outages scheduled for 2006 and 2008 for units 1 and 2, respectively. Sufficient pool storage capacity for spent fuel is available at Plant Vogtle to maintain full-core discharge capability for both units into 2015. At Plant Hatch, an on-site dry storage facility became operational in 2000 and can be expanded to accommodate spent fuel through the life of the plant. Construction of an on-site dry storage facility at Plant Farley is in progress and scheduled for operation in 2005. Construction of an on-site dry storage facility at Plant Vogtle will begin in sufficient time to maintain pool full-core discharge capability.

Also, the Energy Policy Act of 1992 required the establishment of a Uranium Enrichment Decontamination and Decommissioning Fund, which is funded in part by a special assessment on utilities with nuclear plants. This assessment is being paid over a 15-year period, which began in 1993. This fund will be used by the DOE for the decontamination and decommissioning of its nuclear fuel enrichment facilities. The law provides that utilities will recover these payments in the same manner as any other fuel expense. Alabama Power and Georgia Power -- based on its ownership interest -- estimate their respective remaining liability at December 31, 2003, under this law to be approximately $13 million and $10 million.

### Income Taxes

Southern Company uses the liability method of accounting for deferred income taxes and provides deferred income taxes for all significant income tax temporary differences. Investment tax credits utilized are deferred and amortized to income over the average lives of the related property.

### Regulatory Assets and Liabilities

The retail operating companies are subject to the provisions of Financial Accounting Standards Board (FASB) Statement No. 71, Accounting for the Effects of Certain Types of Regulation. Regulatory assets represent probable future revenues associated with certain costs that are expected to be recovered from customers through the ratemaking process. Regulatory liabilities represent probable future reductions in revenues associated with amounts that are expected to be credited to customers through the ratemaking process. Regulatory assets and (liabilities) reflected in the Consolidated Balance Sheets at December 31 relate to:

| | 2003 | 2002 | Note |
|---|---|---|---|
| | (in millions) | | |
| Deferred income tax charges | $ 874 | $ 898 | (a) |
| Loss on reacquired debt | 326 | 313 | (b) |
| DOE assessments | 26 | 33 | (c) |
| Vacation pay | 97 | 98 | (d) |
| Building lease | 54 | 54 | (f) |
| Generating plant outage costs | 35 | 38 | (f) |
| Other assets | 75 | 73 | (f) |
| Asset retirement obligations | (138) | – | (a) |
| Other cost of removal obligations | (1,269) | (1,944) | (a) |
| Deferred income tax credits | (409) | (450) | (a) |
| Accelerated cost recovery | (115) | (229) | (e) |
| Plant Daniel capacity | (60) | – | (g) |
| Storm damage reserves | (53) | (38) | (f) |
| Fuel-hedging liabilities | (13) | (38) | (c) |
| Environmental remediation reserves | (41) | (42) | (f) |
| Deferred purchased power | (92) | (63) | (f) |
| Other liabilities | (13) | (12) | (f) |
| Total | $ (716) | $(1,309) | |

Note: The recovery and amortization periods for these regulatory assets and (liabilities) are as follows:

(a) Asset retirement and removal liabilities are recorded, deferred income tax assets are recovered, and deferred tax liabilities are amortized over the related property lives, which may range up to 50 years. Asset retirement and removal liabilities will be settled and trued up following completion of the related activities

(b) Recovered over either the remaining life of the original issue or, if refinanced, over the life of the new issue, which may range up to 50 years.

(c) Assessments for the decontamination and decommissioning of the DOE's nuclear fuel enrichment facilities are recorded annually from 1993 through 2008. Fuel-hedging assets and liabilities are recorded over the life of the underlying hedged purchase contracts, which generally do not exceed two years. Upon final settlement, actual costs incurred are recovered through the fuel cost recovery clauses.

(d) Recorded as earned by employees and recovered as paid, generally within one year.

(e) Amortized over three-year period ending in 2004

(f) Recorded and recovered or amortized as approved by the appropriate state public service commissions.

(g) See Note 3 under "Mississippi Power Regulatory Filing."

In the event that a portion of an operating company's operations is no longer subject to the provisions of FASB Statement No. 71, the company would be required to write off related regulatory assets and liabilities that are not specifically recoverable through regulated rates. In addition, the operating company would be required to determine if any impairment to

other assets exists, including plant, and write down the assets, if impaired, to their fair value. All regulatory assets and liabilities are to be reflected in rates.

**Depreciation and Amortization**

Depreciation of the original cost of plant in service is provided primarily by using composite straight-line rates, which approximated 3.1 percent in 2003, 3.2 percent in 2002, and 3.4 percent in 2001. When property subject to depreciation is retired or otherwise disposed of in the normal course of business, its original cost -- together with the cost of removal, less salvage -- is charged to accumulated depreciation. Minor items of property included in the original cost of the plant are retired when the related property unit is retired.

Under previous rate orders, Georgia Power recorded accelerated depreciation and amortization amounting to $91 million in 2001. Effective January 2002, Georgia Power discontinued recording accelerated depreciation and amortization in accordance with a new retail rate order. Also, Georgia Power was ordered to amortize $333 million -- the cumulative balance previously expensed -- equally over three years as a credit to depreciation and amortization expense beginning January 2002. Also, effective January 2002, Georgia Power was ordered by the Georgia Public Service Commission (GPSC) to recognize new certified purchased power costs in rates evenly over the three years covered by the current retail rate order. As a result of this regulatory adjustment, Georgia Power recorded in depreciation and amortization expense $14 million and $63 million in 2003 and 2002, respectively. Georgia Power will record a credit to amortization expense of $77 million in 2004. See Note 3 under "Georgia Power Retail Rate Orders" for additional information.

**Asset Retirement Obligations And Other Costs of Removal**

In accordance with regulatory requirements, prior to January 2003, Southern Company followed the industry practice of accruing for the ultimate cost of retiring most long-lived assets over the life of the related asset as part of the annual depreciation expense provision. In accordance with SEC requirements, such amounts are reflected on the Consolidated Balance Sheet as regulatory liabilities. Effective January 1, 2003, Southern Company adopted FASB Statement No. 143, Accounting for Asset Retirement Obligations. Statement No. 143 establishes new accounting and reporting standards for legal obligations associated with the ultimate costs of retiring long-lived assets. The present value of the ultimate costs for an asset's future retirement must be recorded in the period in which the liability is incurred. The costs must be capitalized as part of the related long-lived asset and depreciated over the asset's useful life. Additionally, Statement No. 143 does not permit the continued accrual of future retirement costs for long-lived assets that the company does not have a legal obligation to retire. However, the retail operating companies have received guidance regarding accounting for the financial statement impacts of Statement No. 143 from their respective state public service commissions and will continue to recognize the accumulated removal costs for other obligations as a regulatory liability. Therefore, the retail operating companies had no cumulative effect to net income resulting from the adoption of Statement No. 143.

The liability recognized to retire long-lived assets primarily relates to Southern Company's nuclear facilities, which include Alabama Power's Plant Farley and Georgia Power's ownership interests in plants Hatch and Vogtle. The fair value of assets legally restricted for settling retirement obligations related to nuclear facilities as of December 31, 2003 was $808 million. In addition, the retail operating companies have retirement obligations related to various landfill sites, ash ponds, and underground storage tanks. The retail operating companies have also identified retirement obligations related to certain transmission and distribution facilities. However, liabilities for the removal of these transmission and distribution assets have not been recorded because no reasonable estimate can be made regarding the timing of the obligations. The retail operating companies will continue to recognize in the income statement allowed removal costs in accordance with each company's respective regulatory treatment. Any difference between costs recognized under Statement No. 143 and those reflected in rates are recognized as either a regulatory asset or liability and are reflected in the Consolidated Balance Sheets. See "Nuclear Decommissioning" for further information on amounts included in rates.

Details of the asset retirement obligations included in the Consolidated Balance Sheets are as follows:

| | 2003 |
|---|---|
| | (in millions) |
| Balance beginning of year | $ – |
| Liabilities incurred | 780 |
| Liabilities settled | – |
| Accretion | 55 |
| Cash flow revisions | 10 |
| Balance end of year | $845 |

If Statement No. 143 had been adopted on January 1, 2002, the pro-forma asset retirement obligations would have been $729 million.

### Nuclear Decommissioning

The Nuclear Regulatory Commission (NRC) requires all licensees operating commercial nuclear power reactors to establish a plan for providing, with reasonable assurance, funds for decommissioning. Alabama Power and Georgia Power have external trust funds to comply with the NRC's regulations. The funds set aside for decommissioning are managed and invested in accordance with applicable requirements of various regulatory bodies, including the NRC, the FERC, and state public utility commissions, as well as the Internal Revenue Service (IRS). Funds are invested in a tax efficient manner in a diversified mix of equity and fixed income securities. Equity securities typically range from 50 to 75 percent of the funds and fixed income securities from 25 to 50 percent. Amounts previously recorded in internal reserves are being transferred into the external trust funds over periods approved by the respective state public service commissions. The NRC's minimum external funding requirements are based on a generic estimate of the cost to decommission the radioactive portions of a nuclear unit based on the size and type of reactor. Alabama Power and Georgia Power have filed plans with the NRC to ensure that -- over time -- the deposits and earnings of the external trust funds will provide the minimum funding amounts prescribed by the NRC.

Site study cost is the estimate to decommission a specific facility as of the site study year. The estimated costs of decommissioning based on the most current study as of December 31, 2003, for Alabama Power's Plant Farley and Georgia Power's ownership interests in plants Hatch and Vogtle were as follows:

| | Plant Farley | Plant Hatch | Plant Vogtle |
|---|---|---|---|
| Site study year | 2003 | 2003 | 2003 |
| Decommissioning periods: | | | |
| Beginning year | 2017 | 2034 | 2027 |
| Completion year | 2046 | 2065 | 2048 |
| | | (in millions) | |
| Site study costs: | | | |
| Radiated structures | $892 | $497 | $452 |
| Non-radiated structures | 63 | 49 | 58 |
| Total | $955 | $546 | $510 |
| Significant assumptions: | | | |
| Inflation rate | 4.5% | 3.1% | 3.1% |
| Trust earning rate | 7.0 | 6.6 | 6.6 |

The decommissioning cost estimates are based on prompt dismantlement and removal of the plant from service. The actual decommissioning costs may vary from the above estimates because of changes in the assumed date of decommissioning, changes in NRC requirements, or changes in the assumptions used in making these estimates.

Annual provisions for nuclear decommissioning are based on an annuity method as approved by the respective state public service commissions. The amount expensed in 2003 and fund balances were as follows:

| | Plant Farley | Plant Hatch | Plant Vogtle |
|---|---|---|---|
| | | (in millions) | |
| **Amount expensed in 2003** | **$18** | **$7** | **$2** |
| Accumulated provisions: | | | |
| External trust funds, at fair value | $385 | $269 | $154 |
| Internal reserves | 31 | 7 | 4 |
| Total | $416 | $276 | $158 |

Alabama Power's decommissioning costs for ratemaking are based on the site study. Effective January 1, 2002, the GPSC decreased Georgia Power's annual decommissioning costs for ratemaking to $9 million. This amount is based on the NRC generic estimate to decommission the radioactive portion of the facilities as of 2000. The estimates are $383 million and $282 million for plants Hatch and Vogtle, respectively. Assumptions used to determine these costs for ratemaking were an inflation rate of 4.5 percent and 4.7 percent for Alabama Power and Georgia Power, respectively, and a trust earning rate of 7.0 percent and 6.5 percent for Alabama Power and Georgia Power, respectively. Alabama Power and Georgia Power expect their respective state public service commissions to periodically review and adjust, if necessary, the amounts collected in rates for the anticipated cost of decommissioning.

In January 2002, Georgia Power received NRC approval for a 20-year extension of the license at Plant Hatch, which permits the operation of units 1 and 2 until 2034 and 2038, respectively. The site study decommissioning costs reflect the license extension; however, the updated costs will not be reflected in rates until the GPSC issues a new rate order, which is not expected until December 2004. Alabama Power filed an application with the NRC in September 2003 to extend the operating license for Plant Farley for an additional 20 years.

### Allowance for Funds Used During Construction (AFUDC) and Interest Capitalized

In accordance with regulatory treatment, the retail operating companies record AFUDC. AFUDC represents the estimated debt and equity costs of capital funds that are necessary to finance the construction of new regulated facilities. While cash is not realized currently from such allowance, it increases the revenue requirement over the service life of the plant through a higher rate base and higher depreciation expense. Interest related to the construction of new facilities not included in the retail operating companies' regulated rates is capitalized in accordance with standard interest capitalization requirements.

Cash payments for interest totaled $603 million, $544 million, and $624 million in 2003, 2002, and 2001, respectively, net of amounts capitalized of $49 million, $59 million, and $57 million, respectively.

### Property, Plant, and Equipment

Property, plant, and equipment is stated at original cost less regulatory disallowances and impairments. Original cost includes: materials; labor; minor items of property; appropriate administrative and general costs; payroll-related costs such as taxes, pensions, and other benefits; and the interest capitalized and/or cost of funds used during construction.

The cost of replacements of property -- exclusive of minor items of property -- is capitalized. The cost of maintenance, repairs, and replacement of minor items of property is charged to maintenance expense as incurred or performed with the exception of nuclear refueling costs, which are recorded in accordance with specific public service commission orders. Alabama Power accrues estimated refueling costs in advance of the unit's next refueling outage. Georgia Power defers and amortizes refueling costs over the unit's operating cycle before the next refueling. The refueling cycles for Alabama Power and Georgia Power range from 18 to 24 months for each unit. In accordance with retail accounting orders, both Georgia Power and Savannah Electric will defer the costs of certain significant inspection costs for the combustion turbines at Plant McIntosh and amortize such costs over 10 years, which approximates the expected maintenance cycle.

### Impairment of Long-Lived Assets and Intangibles

Southern Company evaluates long-lived assets for impairment when events or changes in circumstances indicate that the carrying value of such assets may not be recoverable. The determination of whether an impairment has occurred is based on either a specific regulatory disallowance or an estimate of undiscounted future cash flows attributable to the assets, as compared with the carrying value of the assets. If an impairment has occurred, the amount of the impairment recognized is determined by either the amount of regulatory disallowance or by estimating the fair value of the assets and recording a loss if the carrying value is greater than the fair value. For assets identified as held for sale, the carrying value is compared to the estimated fair value less the cost to sell in order to determine if an impairment provision is required. Until the assets are disposed of, their estimated fair value is re-evaluated when circumstances or events change.

### Leveraged Leases

Southern Company has several leveraged lease agreements -- ranging up to 45 years -- that relate to international and domestic energy generation, distribution, and transportation assets. Southern Company receives federal income tax deductions for rent or depreciation and amortization, as well as interest on long-term debt related to these investments.

Southern Company's net investment in leveraged leases consists of the following at December 31:

| | **2003** | 2002 |
|---|---|---|
| | (in millions) | |
| Net rentals receivable | **$1,512** | $1,531 |
| Unearned income | **(674)** | (740) |
| Investment in leveraged leases | **838** | 791 |
| Deferred taxes arising from leveraged leases | **(351)** | (260) |
| Net investment in leveraged leases | **$ 487** | $ 531 |

A summary of the components of income from leveraged leases is as follows:

| | **2003** | 2002 | 2001 |
|---|---|---|---|
| | | (in millions) | |
| Pretax leveraged lease income | **$66** | $58 | $59 |
| Income tax expense | **23** | 21 | 21 |
| Net leveraged lease income | **$43** | $37 | $38 |

### Cash and Cash Equivalents

For purposes of the consolidated financial statements, temporary cash investments are considered cash equivalents. Temporary cash investments are securities with original maturities of 90 days or less.

### Materials and Supplies

Generally, materials and supplies include the average costs of transmission, distribution, and generating plant materials. Materials are charged to inventory when purchased and then expensed or capitalized to plant, as appropriate, when installed.

### Stock Options

Southern Company accounts for its stock-based compensation plans in accordance with Accounting Principles Board Opinion No. 25. Accordingly, no compensation expense has been recognized because the exercise price of all options granted equaled the fair-market value on the date of grant.

### Financial Instruments

Southern Company uses derivative financial instruments to limit exposure to fluctuations in interest rates, the prices of certain fuel purchases, and electricity purchases and sales. All derivative financial instruments are recognized as either assets or liabilities and are measured at fair value. Substantially all of Southern Company's bulk energy purchases and sales contracts that meet the definition of a derivative are exempt from fair value accounting requirements and are accounted for under the accrual method. Other derivative contracts qualify as cash flow hedges of anticipated transactions. This results in the deferral of related gains and losses in other comprehensive income or regulatory assets or liabilities as appropriate until the hedged transactions occur. Any ineffectiveness is recognized currently in net income. Other derivative contracts are marked to market through current period income and are recorded on a net basis in the Consolidated Statements of Income.

Southern Company is exposed to losses related to financial instruments in the event of counterparties' nonperformance. The company has established controls to determine and monitor the creditworthiness of counterparties in order to mitigate the company's exposure to counterparty credit risk.

The other Southern Company financial instruments for which the carrying amount does not equal fair value at December 31 were as follows:

| | Carrying Amount | Fair Value |
|---|---|---|
| | (in millions) | |
| Long-term debt: | | |
| **At December 31, 2003** | **$10,759** | **$10,971** |
| At December 31, 2002 | 10,226 | 10,510 |
| Preferred securities: | | |
| **At December 31, 2003** | **1,940** | **2,059** |
| At December 31, 2002 | 2,428 | 2,498 |

The fair values were based on either closing market price or closing price of comparable instruments.

### Comprehensive Income

The objective of comprehensive income is to report a measure of all changes in common stock equity of an enterprise that result from transactions and other economic events of the period other than transactions with owners. Comprehensive income consists of net income and changes in the fair value of qualifying cash flow hedges and changes in additional minimum pension liability, less income taxes and reclassifications for amounts included in net income. Comprehensive income from discontinued operations also includes foreign currency translation adjustments, net of income taxes.

## 2. RETIREMENT BENEFITS

Southern Company has a defined benefit, trusteed, pension plan covering substantially all employees. The plan is funded in accordance with Employee Retirement Income Security Act (ERISA) requirements. No contributions to the plan are expected for the year ending December 31, 2004. Southern Company also provides certain non-qualified benefit plans for a selected group of management and highly compensated employees. Benefits under these non-qualified plans are funded on a cash basis. In addition, Southern Company provides certain medical care and life insurance benefits for retired employees. The retail operating companies fund related trusts to the extent required by their respective regulatory commissions. For the year ended December 31, 2004, postretirement benefit contributions are expected to total approximately $15 million.

The measurement date for plan assets and obligations is September 30 for each year. In 2002, Southern Company adopted several plan changes that had the effect of increasing benefits to both current and future retirees.

**Pension Plans**

The accumulated benefit obligation for the pension plans was $4.2 billion in 2003 and $3.6 billion in 2002. Changes during the year in the projected benefit obligations, accumulated benefit obligations, and fair value of plan assets were as follows:

| | Projected Benefit Obligations | |
|---|---|---|
| | **2003** | 2002 |
| | (in millions) | |
| Balance at beginning of year | **$4,094** | $3,760 |
| Service cost | **115** | 109 |
| Interest cost | **261** | 277 |
| Benefits paid | **(197)** | (184) |
| Plan amendments | **11** | 88 |
| Actuarial (gain) loss | **289** | 44 |
| Balance at end of year | **$4,573** | $4,094 |

| | Plan Assets | |
|---|---|---|
| | **2003** | 2002 |
| | (in millions) | |
| Balance at beginning of year | **$4,600** | $5,109 |
| Actual return on plan assets | **735** | (343) |
| Benefits paid | **(176)** | (166) |
| Balance at end of year | **$5,159** | $4,600 |

Pension plan assets are managed and invested in accordance with all applicable requirements, including ERISA and the IRS revenue code. The company's investment policy covers a diversified mix of assets, including equity and fixed income securities, real estate, and private equity, as described in the table below. Derivative instruments are used primarily as hedging tools but may also be used to gain efficient exposure to the various asset classes. The company primarily minimizes the risk of large losses through diversification but also monitors and manages other aspects of risk.

| | | Plan Assets | |
|---|---|---|---|
| | Target | **2003** | 2002 |
| Domestic equity | 37% | **37%** | 35% |
| International equity | 20 | **20** | 18 |
| Global fixed income | 26 | **24** | 25 |
| Real estate | 10 | **11** | 12 |
| Private equity | 7 | **8** | 10 |
| Total | 100% | **100%** | 100% |

The accrued pension costs recognized in the Consolidated Balance Sheets were as follows:

| | **2003** | 2002 |
|---|---|---|
| | (in millions) | |
| Funded status | **$586** | $ 506 |
| Unrecognized transition amount | **(26)** | (39) |
| Unrecognized prior service cost | **314** | 334 |
| Unrecognized net (gain) loss | **(70)** | (115) |
| Prepaid pension asset, net | **804** | 686 |
| Portion included in benefit obligations | **107** | 100 |
| Total prepaid assets recognized in the Consolidated Balance Sheets | **$911** | $ 786 |

In 2003 and 2002, amounts recognized in the Consolidated Balance Sheets for accumulated other comprehensive income and intangible assets to record the minimum pension liability related to the non-qualified plans were $77 million and $49 million and $42 million and $35 million, respectively.

Components of the pension plans' net periodic cost were as follows:

| | **2003** | 2002 | 2001 |
|---|---|---|---|
| | | (in millions) | |
| Service cost | **$ 115** | $ 109 | $ 104 |
| Interest cost | **261** | 277 | 260 |
| Expected return on plan assets | **(450)** | (449) | (423) |
| Recognized net gain | **(42)** | (65) | (73) |
| Net amortization | **17** | 11 | 8 |
| Net pension cost (income) | **$ (99)** | $(117) | $(124) |

**Postretirement Benefits**

Changes during the year in the accumulated benefit obligations and in the fair value of plan assets were as follows:

| | Accumulated Benefit Obligations | |
|---|---|---|
| | **2003** | 2002 |
| | (in millions) | |
| Balance at beginning of year | **$1,461** | $1,239 |
| Service cost | **25** | 21 |
| Interest cost | **93** | 91 |
| Benefits paid | **(66)** | (62) |
| Actuarial (gain) loss | **142** | 172 |
| Balance at end of year | **$1,655** | $1,461 |

| | Plan Assets | |
|---|---|---|
| | **2003** | 2002 |
| | (in millions) | |
| Balance at beginning of year | **$417** | $425 |
| Actual return on plan assets | **70** | (34) |
| Employer contributions | **101** | 88 |
| Benefits paid | **(66)** | (62) |
| Balance at end of year | **$522** | $417 |

Postretirement benefits plan assets are managed and invested in accordance with all applicable requirements, including ERISA and the IRS revenue code. The company's investment policy covers a diversified mix of assets, including equity and fixed income securities, real estate, and private equity, as described in the table below. Derivative instruments are used primarily as hedging tools but may also be used to gain efficient exposure to the various asset classes. The company primarily minimizes the risk of large losses through diversification but also monitors and manages other aspects of risk.

| | | Plan Assets | |
|---|---|---|---|
| | Target | **2003** | 2002 |
| Domestic equity | 43% | **44%** | 38% |
| International equity | 17 | **18** | 16 |
| Global fixed income | 33 | **31** | 37 |
| Real estate | 4 | **4** | 5 |
| Private equity | 3 | **3** | 4 |
| Total | 100% | **100%** | 100% |

The accrued postretirement costs recognized in the Consolidated Balance Sheets were as follows:

| | **2003** | 2002 |
|---|---|---|
| | (in millions) | |
| Funded status | **$(1,133)** | $(1,043) |
| Unrecognized transition obligation | **144** | 159 |
| Unrecognized prior service cost | **211** | 225 |
| Unrecognized net loss (gain) | **357** | 239 |
| Fourth quarter contributions | **19** | 51 |
| Accrued liability recognized in the Consolidated Balance Sheets | **$ (402)** | $ (369) |

Components of the postretirement plans' net periodic cost were as follows:

| | **2003** | 2002 | 2001 |
|---|---|---|---|
| | | (in millions) | |
| Service cost | **$ 25** | $ 21 | $ 22 |
| Interest cost | **93** | 91 | 88 |
| Expected return on plan assets | **(47)** | (42) | (40) |
| Net amortization | **30** | 29 | 26 |
| Net postretirement cost | **$101** | $ 99 | $ 96 |

The weighted average rates assumed in the actuarial calculations used to determine both the benefit obligations and the net periodic costs for the pension and postretirement benefit plans were as follows:

| | **2003** | 2002 | 2001 |
|---|---|---|---|
| Discount | **6.00%** | 6.50% | 7.50% |
| Annual salary increase | **3.75** | 4.00 | 5.00 |
| Long-term return on plan assets | **8.50** | 8.50 | 8.50 |

The company determined the long-term rate of return based on historical asset class returns and current market conditions, taking into account the diversification benefits of investing in multiple asset classes.

An additional assumption used in measuring the accumulated postretirement benefit obligation was a weighted average medical care cost trend rate of 8.25 percent for 2003, decreasing gradually to 5.25 percent through the year 2010 and remaining at that level thereafter. An annual increase or decrease in the assumed medical care cost trend rate of 1 percent would affect the accumulated benefit obligation and the service and interest cost components at December 31, 2003, as follows:

| | 1 Percent Increase | 1 Percent Decrease |
|---|---|---|
| | (in millions) | |
| Benefit obligation | **$140** | **$124** |
| Service and interest costs | **10** | **8** |

**Employee Savings Plan**

Southern Company also sponsors a 401(k) defined contribution plan covering substantially all employees. The company provides a 75 percent matching contribution up to 6 percent of an employee's base salary. Total matching contributions made to the plan for the years 2003, 2002, and 2001 were $55 million, $53 million, and $51 million, respectively.

## 3. CONTINGENCIES AND REGULATORY MATTERS

**General Litigation Matters**

Southern Company is subject to certain claims and legal actions arising in the ordinary course of business. In addition, Southern Company's business activities are subject to extensive governmental regulation related to public health and the environment. Litigation over environmental issues and claims of various types, including property damage, personal injury, and citizen enforcement of environmental requirements, has

increased generally throughout the United States. In particular, personal injury claims for damages caused by alleged exposure to hazardous materials have become more frequent. The ultimate outcome of such litigation against Southern Company and its subsidiaries cannot be predicted at this time; however, management does not anticipate that the liabilities, if any, arising from such current proceedings would have a material adverse effect on Southern Company's financial statements.

**Mirant Related Matters**

***Mirant Spin Off***

In April 2000, Southern Company announced an initial public offering of up to 19.9 percent of Mirant and its intention to spin off the remaining ownership of Mirant to Southern Company stockholders. On October 2, 2000, Mirant completed its initial public offering of 66.7 million shares. On April 2, 2001, the tax-free distribution of Mirant shares was completed at a ratio of approximately 0.4 for every share of Southern Company common stock held at record date.

***Potential Mirant Restatement***

In November 2002, Mirant first announced that it had identified accounting errors in previously issued financial statements. Mirant has restated and reduced its net income for 2001 by $159 million. Mirant has stated that the specific quarters in 2001 to which the overstatement apply have not been determined. If any adjustments are necessary prior to April 2, 2001, before Southern Company's spin off of Mirant, then Southern Company's earnings from discontinued operations for such periods would be affected. The impact of any such adjustments cannot be determined until Mirant's 2001 revised quarterly financial statements are filed and would not affect Southern Company's 2002 or any future financial statements.

***Mirant Bankruptcy***

On July 14, 2003, Mirant filed for voluntary reorganization under Chapter 11 with the U.S. Bankruptcy Court. Southern Company has certain contingent liabilities associated with guarantees of contractual commitments made by Mirant's subsidiaries discussed in Note 7 under "Guarantees" and with various lawsuits related to Mirant discussed later in this note. Also, Southern Company has joint and several liability with Mirant regarding the joint consolidated federal income tax return as discussed in Note 5. Under the terms of the separation agreement, Mirant agreed to indemnify Southern Company for costs associated with these guarantees, lawsuits, and additional IRS assessments. The impact of Mirant's bankruptcy filing on Mirant's indemnity obligations, if any, cannot now be determined. If Southern Company is ultimately required to make any payments related to these potentially material obligations, Mirant's indemnification obligation to Southern Company would represent an unsecured pre-bankruptcy claim, subject to compromise pursuant to Mirant's final reorganization plan.

The Bankruptcy Code automatically stays all litigation as to Mirant. A motion filed with the bankruptcy court requesting an extension of this automatic stay to all other non-debtor defendants, including Southern Company and the named current and/or former Southern Company officers, was granted in November 2003. Although the Mirant securities litigation is stayed until further order from the bankruptcy court, Mirant is authorized to agree with parties in pending actions to allow discovery or other matters to proceed without violating the stay. Mirant and plaintiffs' counsel in the Mirant securities litigation have agreed that document discovery may proceed. On October 23, 2003, the bankruptcy court entered an order authorizing Southern Company's insurance companies to pay related defense costs.

On February 20, 2004, the Official Committee of Unsecured Creditors of Mirant informed Southern Company of its intent to examine Southern Company in accordance with federal bankruptcy rules to determine whether there is a legitimate basis to bring claims against Southern Company in connection with Mirant's initial public offering, Southern Company's spinoff of Mirant, and the related separation agreements.

The final outcome of these matters cannot now be determined.

***California Electricity Markets Investigation***

Southern Company received a subpoena in November 2002 to provide information to a federal grand jury in the Northern District of California. The subpoena covered a number of broad areas, including specific information regarding electricity production and sales activities in California. Mirant participated in energy marketing and trading in California during the period relevant to the subpoena. Southern Company has produced documents in response to the subpoena and has fully cooperated in the investigation.

***Mirant Securities Litigation***

In November 2002, Southern Company, certain former and current senior officers of Southern Company, and

12 underwriters of Mirant's initial public offering were added as defendants in a putative class action lawsuit that several Mirant shareholders originally filed against Mirant and certain Mirant officers in May 2002. The original lawsuit was based on allegations related to alleged improper energy trading and marketing activities involving the California energy market. Several other similar lawsuits filed subsequently were consolidated into this litigation in the U.S. District Court for the Northern District of Georgia. The amended complaint is based on allegations related to alleged improper energy trading and marketing activities involving the California energy market, alleged false statements and omissions in Mirant's prospectus for its initial public offering and in subsequent public statements by Mirant, and accounting-related issues previously disclosed by Mirant. The lawsuit purports to include persons who acquired Mirant securities between September 26, 2000, and September 5, 2002.

On July 14, 2003, the court dismissed all claims based on Mirant's alleged improper energy trading and marketing activities involving the California energy market. The remaining claims are based on alleged false statements and omissions in Mirant's prospectus for its initial public offering and accounting-related issues previously disclosed by Mirant. Such claims do not allege any improper trading and marketing activity, accounting errors, or material misstatements or omissions on the part of Southern Company, but rather seek to impose liability on Southern Company based on allegations that Southern Company was a "control person" as to Mirant prior to the spin off date. Southern Company filed an answer to the consolidated amended class action complaint on September 3, 2003. Plaintiffs have also filed a motion for class certification.

Under certain circumstances, Southern Company will be obligated under its Bylaws to indemnify the four current and/or former Southern Company officers who served as directors of Mirant at the time of its initial public offering through the date of the spin off and are also named as defendants in this lawsuit. Except for limited document discovery, litigation has been stayed until further order from the bankruptcy court. The final outcome of these matters cannot now be determined.

***Mirant ERISA Litigation***

In April 2003, a retired employee of Mirant filed a complaint in the U.S. District Court for the Northern District of Georgia alleging violations of ERISA and naming as defendants Mirant, Southern Company, several current and former directors and officers of Mirant and/or Southern Company, and "Unknown Fiduciary Defendants 1-100." In June 2003, a substantially similar complaint was filed. Neither complaint contained any specific allegations of wrongdoing with respect to Southern Company. On September 2, 2003, the court consolidated all pending and future ERISA actions arising out of the same facts, and the plaintiffs filed a consolidated amended ERISA complaint on September 23, 2003. The plaintiffs sought to represent a class of persons who were participants in or beneficiaries of certain Mirant employee benefit plans between September 27, 2000, and July 22, 2003. The consolidated amended complaint named as defendants Mirant, certain Mirant benefit committees, Southern Company, and several of Mirant's current and former officers, directors, and employees. The consolidated amended complaint alleged that the defendants breached their fiduciary duties and violated ERISA by failing to investigate whether Mirant stock was a prudent investment for the plans, by continuing and promoting Mirant stock as an investment alternative for participants in the plans, and by failing to disclose information about Mirant's financial condition and about its improper activities in the California energy markets.

On February 19, 2004, plaintiffs dismissed Southern Company from this action without prejudice. The plaintiffs are not barred from naming Southern Company in some future lawsuit, but management believes the possibility of having to pay damages in any such lawsuit is remote.

***Mobile Energy Services' Petition for Bankruptcy***

Mobile Energy Services Holdings (MESH) is the owner and operator of a facility that generates electricity, produces steam, and processes black liquor as part of a pulp and paper complex in Mobile, Alabama. In January 1999, MESH filed a petition for Chapter 11 bankruptcy with the U.S. Bankruptcy Court. In 2001, MESH filed an amended plan of reorganization, which the U.S. Bankruptcy Court confirmed in September 2003. The plan became effective in late 2003 and Southern Company's equity interest in MESH – which had been written off entirely prior to 2001 – was extinguished. Southern Company will continue to have contingent liabilities to the pulp and paper complex owners associated with a guarantee of certain potential environmental obligations and with a potential obligation to fund a maintenance reserve account that expires in 2019 and 2021, respectively. The combined maximum contingent liabilities were $19 million at December 31, 2003. MESH and Mirant have each separately agreed to indemnify Southern Company for any amounts required

to be paid under such obligations. The final outcome of these matters cannot now be determined.

**Georgia Power Potentially Responsible Party Status**

Georgia Power has been designated as a potentially responsible party at sites governed by the Georgia Hazardous Site Response Act and/or by the federal Comprehensive Environmental Response, Compensation, and Liability Act. Georgia Power has recognized $34 million in cumulative expenses through December 31, 2003, for the assessment and anticipated cleanup of sites on the Georgia Hazardous Sites Inventory. In addition, in 1995 the Environmental Protection Agency (EPA) designated Georgia Power and four other unrelated entities as potentially responsible parties at a site in Brunswick, Georgia, that is listed on the federal National Priorities List. Georgia Power has contributed to the removal and remedial investigation and feasibility study costs for the site. Additional claims for recovery of natural resource damages at the site are anticipated. As of December 31, 2003, Georgia Power had recorded approximately $6 million in cumulative expenses associated with Georgia Power's agreed-upon share of the removal and remedial investigation and feasibility study costs for the Brunswick site.

The final outcome of each of these matters cannot now be determined. However, based on the currently known conditions at these sites and the nature and extent of Georgia Power's activities relating to these sites, management does not believe that the company's additional liability, if any, at these sites would be material to the financial statements.

**New Source Review Actions**

In November 1999, the EPA brought a civil action in the U.S. District Court for the Northern District of Georgia against Alabama Power, Georgia Power, and SCS. The complaint alleged violations of the New Source Review (NSR) provisions of the Clean Air Act with respect to five coal-fired generating facilities in Alabama and Georgia and violations of related state laws. The civil action requested penalties and injunctive relief, including an order requiring the installation of the best available control technology at the affected units. The EPA concurrently issued to the retail operating companies notices of violation relating to 10 generating facilities, which include the five facilities mentioned previously. In early 2000, the EPA filed a motion to amend its complaint to add the violations alleged in its notices of violation and to add Gulf Power, Mississippi Power, and Savannah Electric as defendants.

In August 2000, the U.S. District Court in Georgia granted Alabama Power's motion to dismiss for lack of jurisdiction in Georgia and granted SCS' motion to dismiss on the grounds that it neither owned nor operated the generating units involved in the proceedings. In March 2001, the court granted the EPA's motion to add Savannah Electric as a defendant, but it denied the motion to add Gulf Power and Mississippi Power based on lack of jurisdiction in Georgia over those companies. As directed by the court, the EPA refiled its amended complaint limiting claims to those brought against Georgia Power and Savannah Electric. In addition, the EPA refiled its claims against Alabama Power in the U.S. District Court for the Northern District of Alabama. These complaints allege violations with respect to eight coal-fired generating facilities in Alabama and Georgia, and they request the same kinds of relief as was requested in the original complaint, i.e. penalties and injunctive relief, including installation of the best available control technology. The EPA has not refiled against Gulf Power, Mississippi Power, or SCS.

The actions against Alabama Power, Georgia Power, and Savannah Electric were stayed in the spring of 2001 during the appeal of a very similar NSR enforcement action against the Tennessee Valley Authority (TVA) before the U.S. Court of Appeals for the Eleventh Circuit. The TVA appeal involves many of the same legal issues raised by the actions against Alabama Power, Georgia Power, and Savannah Electric. Because the final resolution of the TVA appeal could have a significant impact on Alabama Power and Georgia Power, both companies have been involved in that appeal. On June 24, 2003, the court of appeals issued its ruling in the TVA case. It found unconstitutional the statutory scheme set forth in the Clean Air Act that allowed the EPA to impose penalties for failing to comply with an administrative compliance order, like the one issued to TVA, without the EPA having to prove the underlying violation. Thus, the court of appeals held that the compliance order was of no legal consequence, and TVA was free to ignore it. The court did not, however, rule directly on the substantive legal issues about the proper interpretation and application of certain NSR provisions that had been raised in the TVA appeal. On September 16, 2003, the court of appeals denied the EPA's request for a rehearing of the decision. On February 13, 2004, the EPA petitioned the U.S. Supreme Court to review the decision of the court of appeals. The EPA also filed a motion to lift the stay in the action against Alabama Power. At this time, no party to the Georgia Power and Savannah Electric action, which was administratively closed two years ago, has asked the court to reopen that case.

Since the inception of the NSR proceedings against Georgia Power, Alabama Power, and Savannah Electric, the EPA has also been proceeding with similar NSR enforcement actions against other utilities, involving many of the same legal issues. In each case, the EPA alleged that the utilities failed to comply with the NSR permitting requirements when performing maintenance and construction activities at coal-burning plants, which activities the utilities considered to be routine or otherwise not subject to NSR. In 2003, district courts addressing these cases issued opinions that reached conflicting conclusions.

In October 2003, the EPA issued final revisions to its NSR regulations under the Clean Air Act clarifying the scope of the existing Routine Maintenance, Repair, and Replacement exclusion. On December 24, 2003, the U.S. Court of Appeals for the District of Columbia Circuit stayed the effectiveness of these revisions pending resolution of related litigation. In January 2004, the Bush Administration announced that it would continue to enforce the existing rules.

Southern Company believes that its retail operating companies complied with applicable laws and the EPA's regulations and interpretations in effect at the time the work in question took place. The Clean Air Act authorizes civil penalties of up to $27,500 per day, per violation at each generating unit. Prior to January 30, 1997, the penalty was $25,000 per day. An adverse outcome in any one of these cases could require substantial capital expenditures that cannot be determined at this time and could possibly require payment of substantial penalties. This could affect future results of operations, cash flows, and possibly financial condition if such costs are not recovered through regulated rates.

**Plant Wansley Environmental Litigation**

On December 30, 2002, the Sierra Club, Physicians for Social Responsibility, Georgia ForestWatch, and one individual filed a civil suit in the U.S. District Court in Georgia against Georgia Power for alleged violations of the Clean Air Act at four of the generating units at Plant Wansley. The complaint alleges Clean Air Act violations at both the existing coal-fired units and the new combined cycle units. Specifically, the plaintiffs allege (1) opacity violations at the coal-fired units, (2) violations of a permit provision that requires the combined cycle units to operate above certain levels, (3) violation of nitrogen oxide emission offset requirements, and (4) violation of hazardous air pollutant requirements. The civil action requests injunctive and declaratory relief, civil penalties, a supplemental environmental project, and attorneys' fees. The Clean Air Act authorizes civil penalties of up to $27,500 per day, per violation at each generating unit.

On June 19, 2003, the court granted Georgia Power's motion to dismiss the allegations regarding hazardous air pollutants and denied Georgia Power's motion to dismiss the allegations regarding emission offsets. On August 29, 2003, Georgia Power filed a motion for partial summary judgment regarding emission offsets. On January 20, 2004, Georgia Power filed a motion for summary judgment on the remaining three counts, and the plaintiffs have filed motions for partial summary judgment. The case is currently scheduled for trial during the summer of 2004. While Georgia Power believes that it has complied with applicable laws and regulations, an adverse outcome could require payment of substantial penalties. The final outcome of this matter cannot now be determined.

**Race Discrimination Litigation**

In July 2000, a lawsuit alleging race discrimination was filed by three Georgia Power employees against Georgia Power, Southern Company, and SCS in the Superior Court of Fulton County, Georgia. Shortly thereafter, the lawsuit was removed to the U.S. District Court for the Northern District of Georgia. The lawsuit also raised claims on behalf of a purported class. The plaintiffs seek compensatory and punitive damages in an unspecified amount, as well as injunctive relief. In August 2000, the lawsuit was amended to add four more plaintiffs. Also, an additional indirect subsidiary of Southern Company, Southern Company Energy Solutions, was named a defendant.

In October 2001, the district court denied the plaintiffs' motion for class certification. The plaintiffs filed a motion to reconsider the order denying class certification, and the court denied the plaintiffs' motion to reconsider. In December 2001, the plaintiffs filed a petition in the U.S. Court of Appeals for the Eleventh Circuit seeking permission to file an appeal of the October 2001 decision, and this petition was denied. After discovery was completed on the claims raised by the seven named plaintiffs, the defendants filed motions for summary judgment on all of the named plaintiffs' claims. On March 31, 2003, the U.S. District Court for the Northern District of Georgia granted summary judgment in favor of the defendants on all claims raised by all seven plaintiffs. On April 23, 2003, plaintiffs filed an appeal to the U.S. Court of Appeals for the Eleventh Circuit challenging these adverse summary judgment rulings, as well as the District Court's October 2001

ruling denying class certification. Oral argument occurred on January 27, 2004, and the parties await the court's decision. The final outcome of this matter cannot now be determined.

**Right of Way Litigation**

Southern Company and certain of its subsidiaries, including Georgia Power, Gulf Power, Mississippi Power, and Southern Telecom (collectively, defendants), have been named as defendants in numerous lawsuits brought by landowners since 2001 regarding the installation and use of fiber optic cable over defendants' rights of way located on the landowners' property. The plaintiffs' lawsuits claim that defendants may not use or sublease to third parties some or all of the fiber optic communications lines on the rights of way that cross the plaintiffs' properties and that such actions by defendants exceed the easements or other property rights held by defendants. The plaintiffs assert claims for, among other things, trespass and unjust enrichment. The plaintiffs seek compensatory and punitive damages and injunctive relief. With respect to one such lawsuit brought by landowners regarding the installation and use of fiber optic cable over Gulf Power rights of way located on the landowners' property, on November 7, 2003, the Second Circuit Court in Gadsden County, Florida, ruled in favor of the plaintiffs on their motion for partial summary judgment concerning liability. The question of damages, if any, will be decided at a future trial. In the event of an adverse verdict on damages, Gulf Power could appeal the verdicts on both liability and damages. Management of Southern Company and its subsidiaries believe that the defendant companies in the pending right of way litigation have complied with applicable laws and that the plaintiffs' claims are without merit. An adverse outcome in these matters could result in substantial judgments; however, the final outcome of these matters cannot now be determined.

In addition, in late 2001, certain subsidiaries of Southern Company, including Alabama Power, Georgia Power, Gulf Power, Mississippi Power, Savannah Electric, and Southern Telecom (collectively, defendants), were named as defendants in a lawsuit brought by a telecommunications company that uses certain of the defendants' rights of way. This lawsuit alleges, among other things, that the defendants are contractually obligated to indemnify, defend, and hold harmless the telecommunications company from any liability that may be assessed against the telecommunications company in pending and future right of way litigation. The defendants believe that the plaintiff's claims are without merit. An adverse outcome in this matter, combined with an adverse outcome against the telecommunications company in one or more of the right of way lawsuits, could result in substantial judgments; however, the final outcome of these matters cannot now be determined.

**Income Tax Issues**

***Synthetic Fuel Tax Credits***

Southern Company has investments in two entities that produce synthetic fuel and receive tax credits under Section 29 of the IRS revenue code. In April 2001, Southern Company acquired a 30 percent membership interest in AFP. In 1998, Southern Company acquired a 24.975 percent limited partnership interest in Carbontronics Synfuels Investors, L.P. (Carbontronics). At December 31, 2003, Southern Company's total investment in these entities was approximately $30 million.

On June 30, 2003, the IRS issued an announcement that suspended the issuance of new private letter rulings and indicated that it might also revoke existing private letter rulings for synthetic fuels Section 29 tax credits pending a review of the scientific validity of test procedures and results that have been presented as evidence that a significant chemical change occurred in such synthetic fuel. On October 29, 2003, the IRS announced that it has completed its review and determined that the test procedures and results used by taxpayers are scientifically valid if the procedures are applied in a consistent and unbiased manner. The IRS stated that the processes they approved do not produce the level of chemical change required by Section 29, but they will, nevertheless, resume issuing private letter rulings. The IRS will require taxpayers applying for future rulings to implement and maintain certain sampling and quality control procedures, as well as additional documentation and record retention procedures. The IRS also plans to extend these procedures to taxpayers already holding rulings on the issue of significant chemical change.

On October 30, 2003, the Senate Governmental Affairs Permanent Subcommittee on Investigations announced that it has begun a separate investigation of the synthetic fuel industry and its producers for potential abuses of these tax credits.

In January 2004, the IRS completed an audit of AFP for tax years 1999 and 2000. The IRS raised no issues related to the Section 29 tax credits for these years and issued a "no-change" audit report to AFP's tax matters partner. The IRS is currently auditing Carbontronics for tax years 2000 and 2001. From the inception of Southern Company's investment in these entities through December 31, 2003, Southern Company has recognized through income approximately $274 million

(net of approximately $37 million reserved) in tax credits related to its share of the synthetic fuel production at these entities.

Both entities have private letter rulings from the IRS that concluded significant chemical change occurred based on the procedures and results submitted. In addition, both entities regularly use independent laboratories and experts to test for chemical change. These tests replicated significant chemical changes consistent with the procedures submitted with the private letter rulings. Southern Company has relied on these private letter rulings and believes that the test results presented in connection with such private letter rulings are valid and that the entities have operated in compliance with their respective private letter rulings and Section 29 of the revenue code. The ultimate outcome of these matters cannot now be determined.

***Leveraged Lease Transactions***

Southern Company undergoes audits by the IRS for each of its tax years. The IRS has completed its audits of Southern Company's consolidated federal income tax returns for all years through 1999. As part of the audit for the 1996-1999 tax years, the IRS reviewed Southern Company's four international leveraged lease transactions. Based on its review, the IRS proposed to disallow the tax losses associated with one of these transactions, resulting in an additional tax payment of approximately $30 million, including interest. To finalize the audit and eliminate any additional interest charges, Southern Company made this payment to the IRS in May 2003 and filed a refund claim for this amount. On January 5, 2004, the IRS proposed to disallow the refund claim. Southern Company has accounted for the payment as a deposit. Southern Company continues to believe that the transaction remains a valid lease for U.S. tax purposes and, accordingly, intends to file a petition for refund in federal court. If Southern Company is not successful in its defense of the tax treatment for this transaction, it could also affect the timing of the related revenue recognition for book purposes. A cumulative effect adjustment could be required to reduce net income based on the revised cash flows as a result of the changes in the allowed tax deductions.

The IRS did not disallow any tax losses or make any other adjustments for the 1996-1999 period with respect to any of Southern Company's other lease transactions. However, there can be no assurance that subsequent IRS audits would not raise similar disallowance issues. See Note 1 under "Leveraged Leases" for additional information on deferred taxes arising from these transactions. The ultimate outcome of these matters cannot now be determined.

**Alabama Power Retail Rate Adjustment Procedures**

In November 1982, the Alabama Public Service Commission (APSC) adopted rates that provide for periodic adjustments based upon Alabama Power's earned return on end-of-period retail common equity. The rates also provide for adjustments to recognize the placing of new generating facilities in retail service and for the recovery of retail costs associated with certificated purchased power agreements. Both increases and decreases have been placed into effect since the adoption of these rates. Rate adjustment procedures were revised by the APSC on March 5, 2002. The new procedures provide for periodic rate adjustments annually rather than quarterly and limit any annual adjustment to 3 percent. The return on common equity range of 13 percent to 14.5 percent remained unchanged. The ratemaking procedures will remain in effect until the APSC votes to modify or discontinue them.

In accordance with the Rate Stabilization Equalization plan, a 2 percent increase in retail rates was effective in both April 2002 and October 2001, amounting to an annual increase of $55 million and $58 million, respectively. Also, to recover certificated purchased power costs, an increase of 2.6 percent in retail rates, or $79 million annually, was effective July 2003. An additional increase of $25 million annually is scheduled to be effective in June 2004 for new certificated purchased power costs.

**Georgia Power Retail Rate Orders**

In December 2001, the GPSC approved a three-year retail rate order for Georgia Power ending December 31, 2004. Retail rates were decreased by $118 million effective January 1, 2002. Under the terms of the order, earnings are evaluated against a retail return on common equity range of 10 percent to 12.95 percent. Two-thirds of any earnings above the 12.95 percent return will be applied to rate refunds, with the remaining one-third retained by Georgia Power. Georgia Power's earnings in both 2002 and 2003 were within the common equity range.

Under a previous three-year order ending December 2001, Georgia Power's earnings were evaluated against a retail return on common equity range of 10 percent to 12.5 percent. The order further provided for $85 million in each year, plus up to $50 million of any earnings above the 12.5 percent return during the second and third years, to be applied to accelerated amortization or depreciation of assets. Two-thirds of additional earnings above the

12.5 percent return were applied to rate refunds, with the remaining one-third retained by Georgia Power. Pursuant to the order, Georgia Power recorded $333 million of accelerated amortization and interest thereon, which was credited to a regulatory liability account as mandated by the GPSC.

Under the 2001 rate order, Georgia Power discontinued recording accelerated depreciation and amortization and began amortizing the accumulated balance equally over three years as a credit to expense beginning in 2002. Also, the rate order required Georgia Power to recognize capacity and operating and maintenance costs related to certified purchase power contracts evenly into rates over a three-year period ending December 31, 2004.

Georgia Power is required to file a general rate case on July 1, 2004, in response to which the GPSC would be expected to determine whether the rate order should be continued, modified, or discontinued.

**Uncontracted Generating Capacity**

On May 21, 2003, Mississippi Power and Southern Power entered into agreements with Dynegy, Inc. (Dynegy) to resolve all outstanding matters related to capacity sales contracts with subsidiaries of Dynegy. Under the terms of the agreements, Dynegy made a cash payment of $75 million to Mississippi Power and $80 million to Southern Power. The contracts between Southern Power and Dynegy were terminated in May 2003, and the Mississippi Power contract was terminated effective October 31, 2003.

The termination payments from Dynegy resulted in a one-time gain to Southern Company of approximately $88 million after tax ($38 million for Mississippi Power and $50 million for Southern Power).

As a result of these contract terminations, Southern Power is completing limited construction activities on Plant Franklin Unit 3 to preserve the long-term viability of the project but has deferred final completion until the 2008-2011 period. The length of the deferral period will depend on forecasted capacity needs and other wholesale market opportunities. As of December 31, 2003, Southern Power's investment in Unit 3 of Plant Franklin was $156 million. Southern Power is continuing to explore alternatives for its existing capacity. The final outcome of these matters cannot now be determined.

**Mississippi Power Regulatory Filing**

On December 5, 2003, Mississippi Power filed a request with the Mississippi Public Service Commission (MPSC) to modify certain portions of its Performance Evaluation Plan (PEP) and to include 266 megawatts of Plant Daniel units 3 and 4 generating capacity not currently included in jurisdictional cost of service.

As part of Mississippi Power's proposal to include the additional Plant Daniel capacity in retail rates, the MPSC issued an interim accounting order in December 2003 directing Mississippi Power to expense and record in 2003 a regulatory liability in the amount of approximately $60 million while the MPSC fully considers the entire request. However, if the MPSC ultimately denies Mississippi Power's request, the regulatory liability will be required to be reversed.

In the second quarter of 2004, Mississippi Power expects the MPSC to render a final order on the inclusion of the additional Plant Daniel capacity in rates, the amortization period for the regulatory liability, and the requested changes to PEP.

**FERC Matters**

Southern Power currently has general authorization from the FERC to sell power to nonaffiliates at market-based prices. In addition, each of the retail operating companies has obtained FERC approval to sell power to nonaffiliates at market-based prices under specific contracts. Southern Power and the retail operating companies also have FERC authority to make short-term opportunity sales at market rates. Specific FERC approval must be obtained with respect to a market-based contract with an affiliate. In November 2001, the FERC modified the test it uses to consider utilities' applications to charge market-based rates and adopted a new test called the Supply Margin Assessment (SMA). The FERC applied the SMA to several utilities, including Southern Company, and found Southern Company and others to be "pivotal suppliers" in their service areas and ordered the implementation of several mitigation measures. Southern Company and others sought rehearing of the FERC order, and the FERC delayed the implementation of certain mitigation measures. Southern Company and others submitted comments to the FERC in 2002 regarding these issues. In December 2003, the FERC issued a staff paper discussing alternatives and held a technical conference in January 2004. Southern Company anticipates that the FERC will address the requests for rehearing in the near future. The final outcome of this matter will depend on the form in which the SMA test and mitigation measures rules may be ultimately adopted and cannot be determined at this time.

Purchased Power Agreements (PPAs) by Georgia Power and Savannah Electric for Southern Power's Plant McIntosh capacity were certified by the GPSC in December 2002 after a competitive bidding process. In April 2003, Southern Power applied for FERC approval of these PPAs. Interveners opposed the FERC's acceptance of the PPAs, alleging that the PPAs do not meet the applicable standards for market-based rates between affiliates. In July 2003, the FERC accepted the PPAs to become effective as scheduled on June 1, 2005, subject to refund, and ordered that hearings be held to determine: (a) whether, in the design and implementation of the GPSC competitive bidding process, Georgia Power and Savannah Electric unduly preferred Southern Power; (b) whether the analysis of the competitive bids unduly favored Southern Power, particularly with respect to evaluation of non-price factors; (c) whether Georgia Power and Savannah Electric selected their affiliate, Southern Power, based upon a reasonable combination of price and non-price factors; (d) whether Southern Power received an undue preference or competitive advantage in the competitive bidding process as a result of access to its affiliate's transmission system; (e) whether and to what extent the PPAs impact wholesale competition; and (f) whether the PPAs are just and reasonable and not unduly discriminatory. Hearings are scheduled to begin in March 2004. Management believes that the PPAs should be approved by the FERC; however, the ultimate outcome of this matter cannot now be determined.

## 4. JOINT OWNERSHIP AGREEMENTS

Alabama Power owns an undivided interest in units 1 and 2 of Plant Miller and related facilities jointly with Alabama Electric Cooperative, Inc.

Georgia Power owns undivided interests in plants Vogtle, Hatch, Scherer, and Wansley in varying amounts jointly with Oglethorpe Power Corporation (OPC), the Municipal Electric Authority of Georgia, the city of Dalton, Georgia, Florida Power & Light Company, and Jacksonville Electric Authority. In addition, Georgia Power has joint ownership agreements with OPC for the Rocky Mountain facilities and with Florida Power Corporation for a combustion turbine unit at Intercession City, Florida.

Southern Power owns an undivided interest in Stanton Unit A and related facilities jointly with the Orlando Utilities Commission, Kissimmee Utility Authority, and Florida Municipal Power Agency.

At December 31, 2003, Alabama Power's, Georgia Power's, and Southern Power's ownership and investment (exclusive of nuclear fuel) in jointly owned facilities with the above entities were as follows:

| | Jointly Owned Facilities | | |
|---|---|---|---|
| | Percent Ownership | Amount of Investment | Accumulated Depreciation |
| | | (in millions) | |
| Plant Vogtle (nuclear) | **45.7%** | **$3,307** | **$1,706** |
| Plant Hatch (nuclear) | **50.1** | **908** | **469** |
| Plant Miller (coal) Units 1 and 2 | **91.8** | **767** | **355** |
| Plant Scherer (coal) Units 1 and 2 | **8.4** | **115** | **52** |
| Plant Wansley (coal) | **53.5** | **390** | **160** |
| Rocky Mountain (pumped storage) | **25.4** | **169** | **85** |
| Intercession City (combustion turbine) | **33.3** | **12** | **1** |
| Plant Stanton (combined cycle) Unit A | **65.0** | **155** | **1** |

Alabama Power, Georgia Power, and Southern Power have contracted to operate and maintain the jointly owned facilities -- except for the Rocky Mountain project and Intercession City -- as agents for their respective co-owners. The companies' proportionate share of their plant operating expenses is included in the corresponding operating expenses in the Consolidated Statements of Income.

## 5. INCOME TAXES

Southern Company files a consolidated federal income tax return. In 2002, Southern Company began filing a combined state of Georgia income tax return. Under a joint consolidated income tax agreement, each subsidiary's current and deferred tax expense is computed on a stand-alone basis. In accordance with IRS regulations, each company is jointly and severally liable for the tax liability.

Mirant was included in the consolidated federal tax return through April 2, 2001. Under the terms of the separation agreement, Mirant will indemnify Southern Company for subsequent assessment of any additional taxes related to its transactions prior to the spin off. The IRS is currently auditing the consolidated tax returns for 2001 and 2000. For additional tax-related information, see Note 3 under "Mirant Bankruptcy" and "Income Tax Issues."

At December 31, 2003, the tax-related regulatory assets and liabilities were $874 million and $409 million, respectively. These assets are attributable to tax benefits flowed through to customers in prior years and to taxes applicable to capitalized interest. These liabilities are attributable to deferred taxes previously recognized at rates higher than the current enacted tax law and to unamortized investment tax credits.

Details of income tax provisions are as follows:

| | **2003** | 2002 | 2001 |
|---|---|---|---|
| | | (in millions) | |
| Total provision for income taxes: | | | |
| Federal -- | | | |
| Current | **$130** | $284 | $477 |
| Deferred | **404** | 167 | (10) |
| | **534** | 451 | 467 |
| State -- | | | |
| Current | **42** | 64 | 103 |
| Deferred | **36** | 13 | (12) |
| | **78** | 77 | 91 |
| Total | **$612** | $528 | $558 |

Net cash payments for income taxes related to continuing operations in 2003, 2002, and 2001 were $188 million, $374 million, and $558 million, respectively.

The tax effects of temporary differences between the carrying amounts of assets and liabilities in the financial statements and their respective tax bases, which give rise to deferred tax assets and liabilities, are as follows:

| | **2003** | 2002 |
|---|---|---|
| | | (in millions) |
| Deferred tax liabilities: | | |
| Accelerated depreciation | **$3,737** | $3,364 |
| Property basis differences | **970** | 1,011 |
| Other | **985** | 840 |
| Total | **5,692** | 5,215 |
| Deferred tax assets: | | |
| Federal effect of state deferred taxes | **119** | 111 |
| Other property basis differences | **171** | 185 |
| Deferred costs | **128** | 188 |
| Pension and other benefits | **160** | 146 |
| Other | **483** | 428 |
| Total | **1,061** | 1,058 |
| Total deferred tax liabilities, net | **4,631** | 4,157 |
| Portion included in prepaid expenses (accrued income taxes), net | **(55)** | 33 |
| Deferred state tax assets | **10** | 13 |
| Accumulated deferred income taxes in the Consolidated Balance Sheets | **$4,586** | $4,203 |

At December 31, 2003, Southern Company also had available state of Georgia net operating loss carryforward deductions totaling $1.0 billion, which could result in net state income tax benefits of $60 million, if utilized. Less than $27 million of such deductions will expire by 2008; the remainder will expire between 2009 and 2021. During 2003, Southern Company realized $19 million in such state income tax benefits. Beginning in 2002, the state of Georgia allows the filing of a combined return, which should substantially reduce any additional net operating loss carryforwards.

In accordance with regulatory requirements, deferred investment tax credits are amortized over the lives of the related property with such amortization normally applied as a credit to reduce depreciation in the Consolidated Statements of Income. Credits amortized in this manner amounted to $29 million in 2003, $27 million in 2002, and $30 million in 2001. At December 31, 2003, all investment tax credits available to reduce federal income taxes payable had been utilized.

The provision for income taxes differs from the amount of income taxes determined by applying the applicable U.S. federal statutory rate to earnings before income taxes and preferred dividends of subsidiaries, as a result of the following:

| | **2003** | 2002 | 2001 |
|---|---|---|---|
| Federal statutory rate | **35.0%** | 35.0% | 35.0% |
| State income tax, net of federal deduction | **2.4** | 2.7 | 3.7 |
| Synthetic fuel tax credits | **(5.7)** | (5.8) | (4.2) |
| Employee stock plans dividend deduction | **(1.5)** | (2.9) | – |
| Non-deductible book depreciation | **1.1** | 1.3 | 1.7 |
| Difference in prior years' deferred and current tax rate | **(0.7)** | (1.0) | (1.1) |
| Other | **(1.5)** | (0.9) | (2.2) |
| Effective income tax rate | **29.1%** | 28.4% | 32.9% |

## 6. FINANCING

### Mandatorily Redeemable Preferred Securities

Southern Company and the retail operating companies have each formed certain wholly owned trust subsidiaries for the purpose of issuing preferred securities. The proceeds of the related equity investments and preferred security sales were loaned back to Southern Company and the retail operating companies through the issuance of junior subordinated notes totaling $2.0 billion, which constitute substantially all assets of these trusts.

Southern Company and the retail operating companies each considers that the mechanisms and obligations relating to the preferred securities issued for its benefit, taken together, constitute a full and unconditional guarantee by it of the respective trusts' payment obligations with respect to these securities. At December 31, 2003, preferred securities of $1.9 billion were outstanding and recognized as liabilities in the Consolidated Balance Sheets. Southern Company guarantees the notes related to $555 million of these securities issued on its behalf.

### Long-Term Debt Due Within One Year

A summary of scheduled maturities and redemptions of long-term debt due within one year at December 31 is as follows:

| | 2003 | 2002 |
|---|---|---|
| | (in millions) | |
| First mortgage bond maturities and redemptions | $ – | $ 33 |
| Pollution control bonds | – | 1 |
| Capitalized leases | 11 | 11 |
| Senior notes | 655 | 1,552 |
| Other long-term debt | 35 | 42 |
| Total | $701 | $1,639 |

Debt redemptions and/or serial maturities through 2008 applicable to total long-term debt are as follows: $701 million in 2004; $891 million in 2005; $951 million in 2006; $975 million in 2007; and $473 million in 2008.

### Assets Subject to Lien

Each of Southern Company's subsidiaries is organized as a legal entity, separate and apart from Southern Company and its other subsidiaries. The subsidiary companies' mortgages, which secure the first mortgage bonds issued by the retail operating companies, constitute a direct first lien on substantially all of the retail operating companies' respective fixed property and franchises. Georgia Power discharged its mortgage in 2002 and the lien was removed. There are no agreements or other arrangements among the subsidiary companies under which the assets of one company have been pledged or otherwise made available to satisfy obligations of Southern Company or any of its other subsidiaries.

### Bank Credit Arrangements

At the beginning of 2004, unused credit arrangements with banks totaled $3.5 billion, of which $2.8 billion expires during 2004 and $670 million expires during 2005 and beyond. The following table outlines the credit arrangements by company:

| | Amount of Credit | | Expires | |
|---|---|---|---|---|
| Company | Total | Unused | 2004 | 2005 & beyond |
| | (in millions) | | | |
| Alabama Power | $ 865 | $ 865 | $ 865 | $ – |
| Georgia Power | 725 | 725 | 725 | – |
| Gulf Power | 56 | 56 | 56 | – |
| Mississippi Power | 100 | 100 | 100 | – |
| Savannah Electric | 80 | 60 | 40 | 20 |
| Southern Company | 1,000 | 1,000 | 1,000 | – |
| Southern Power | 650 | 650 | – | 650 |
| Other | 20 | 20 | 20 | – |
| Total | $3,496 | $3,476 | $2,806 | $670 |

Approximately $2.25 billion of the credit facilities expiring in 2004 allow the execution of term loans for an additional two-year period, and $265 million allow execution of one-year term loans. Most of these agreements include stated borrowing rates but also allow for competitive bid loans.

All of the credit arrangements require payment of commitment fees based on the unused portion of the commitments or the maintenance of compensating balances with the banks. Commitment fees are less than ⅛ of 1 percent for Southern Company and the retail operating companies and less than ⅜ of 1 percent for Southern Power. Compensating balances are not legally restricted from withdrawal. Included in the total $3.5 billion of unused credit arrangements is $2.8 billion of syndicated credit arrangements that require the payment of agent fees.

Most of Southern Company's, Southern Power's, and the retail operating companies' credit arrangements with banks have covenants that limit debt levels to 65 percent of total capitalization, as defined in the agreements. Exceeding these debt levels would result in a default under the credit arrangements. At December 31, 2003, Southern Company, Southern Power, and the retail operating companies were in compliance with their respective debt limit covenants. In addition, the credit arrangements typically contain cross default provisions that would be triggered if the borrower defaulted on other indebtedness above a specified threshold. Under the credit arrangements for Southern Company and the retail operating companies, the cross default provisions are restricted only to the indebtedness, including any guarantee obligations, of the company that has the credit arrangement with the bank. For Southern Power's bank credit arrangements, there is a cross

default to Southern Company's indebtedness, which if triggered would require prepayment of debt related to projects financed under the credit arrangement that are not complete. Southern Company has committed to fund at least 35 percent on Southern Power's construction project financing and to pay for construction overruns to the extent that Southern Power's cash flow is insufficient. Southern Company and its subsidiaries are currently in compliance with all such covenants. Borrowings under certain retail operating companies' unused credit arrangements totaling $50 million would be prohibited if the borrower experiences a material adverse change, as defined in such agreements. Initial borrowings for new projects under Southern Power's credit facility would be prohibited if Southern Power or Southern Company experiences a material adverse change, as defined in that credit facility.

A portion of the $3.5 billion unused credit with banks is allocated to provide liquidity support to the companies' variable rate pollution control bonds. The amount of variable rate pollution control bonds requiring liquidity support as of December 31, 2003, was $659 million.

Southern Company, the retail operating companies, and Southern Power borrow through commercial paper programs that have the liquidity support of committed bank credit arrangements. In addition, Southern Company and the retail operating companies from time to time borrow through extendible commercial note programs. As of December 31, 2003, no extendible commercial notes were outstanding. The amount of commercial paper outstanding at December 31, 2003, and December 31, 2002, was $568 million and $858 million, respectively. During 2003, the peak amount outstanding for commercial paper was $1.66 billion, and the average amount outstanding was $900 million. The average annual interest rate on commercial paper was 1.3 percent in 2003. Commercial paper is included in notes payable on the Consolidated Balance Sheets.

**Financial Instruments**

The retail operating companies, Southern Power, and Southern Company GAS enter into energy-related derivatives to hedge exposures to electricity, gas, and other fuel price changes. However, due to cost-based rate regulations, the retail operating companies have limited exposure to market volatility in commodity fuel prices and prices of electricity. In addition, Southern Power's exposure to market volatility in commodity fuel prices and prices of electricity is limited because its long-term sales contracts shift substantially all fuel cost responsibility to the purchaser. Each of the retail operating companies has implemented fuel-hedging programs at the instruction of their respective public service commissions. Together with Southern Power, the retail operating companies may enter into hedges of forward electricity sales. Southern Company GAS has gas-hedging programs to substantially mitigate its exposure to price volatility for its gas purchases.

At December 31, 2003, the fair value of derivative energy contracts was reflected in the financial statements as follows:

| | Amounts |
|---|---|
| | (in millions) |
| Regulatory liabilities, net | **$14.9** |
| Other comprehensive income | **1.5** |
| Net income | **(0.6)** |
| Total fair value | **$15.8** |

The fair value gains or losses for cash flow hedges that are recoverable through the regulatory fuel clauses are recorded as regulatory assets and liabilities and are recognized in earnings at the same time the hedged items affect earnings. For Southern Power and Southern Company GAS, the fair value gains or losses for cash flow hedges are recorded in other comprehensive income and are reclassified into earnings at the same time the hedged items affect earnings. For the year 2003, approximately $22 million of pre-tax gains were reclassified from other comprehensive income to fuel expense. For the year 2004, approximately $5 million of pre-tax gains are expected to be reclassified from other comprehensive income to fuel expense.

Southern Company and certain subsidiaries also enter into derivatives to hedge exposure to interest rate changes. Derivatives related to fixed rate securities are accounted for as fair value hedges. Derivatives related to variable rate securities or forecasted transactions are accounted for as cash flow hedges. The derivatives are generally structured to match the critical terms of the hedged debt instruments; therefore, no material ineffectiveness has been recorded in earnings.

At December 31, 2003, Southern Company had $3.0 billion notional amount of interest rate swaps outstanding with net fair value gains of $33 million as follows:

Fair Value Hedges

| Company | Maturity | Variable Rate Paid | Notional Amount | Fair Value Gain |
|---|---|---|---|---|
| | | | (in millions) | |
| Southern Company | 2007 | 6-month LIBOR – 0.10% | $400 | $30.9 |
| | 2009 | 6-month LIBOR + 2.92% | $40 | $0.8 |

Cash Flow Hedges

| Company | Maturity | Weighted Average Fixed Rate Paid | Notional Amount | Fair Value Gain/ (Loss) |
|---|---|---|---|---|
| | | | (in millions) | |
| Southern Company | 2004 | 3.20% | $200 | $(2.0) |
| Alabama Power | 2004 | 1.63* | 486 | (0.2) |
| | 2006 | 1.89 | 195 | 1.5 |
| | 2007 | 1.99* | 486 | 4.4 |
| Georgia Power | 2004 | 1.39* | 873 | (0.8) |
| | 2005 | 1.56 | 50 | – |
| | 2005 | 1.96 | 250 | (1.1) |
| Savannah Electric | 2004 | 2.06 | 20 | (0.1) |

*Hedged using the Bond Market Association Municipal Swap Index.

For fair value hedges where the hedged item is an asset, liability, or firm commitment, the changes in the fair value of the hedging derivatives are recorded in earnings and are offset by the changes in the fair value of the hedged item.

The fair value gain or loss for cash flow hedges is recorded in other comprehensive income and is reclassified into earnings at the same time the hedged items affect earnings. In 2003 and 2002, the company recognized losses of $116 million and $14 million, respectively, upon termination of certain interest derivatives at the same time it issued debt. These losses have been deferred in other comprehensive income and will be amortized to interest expense over the life of the related debt. For 2003, approximately $26 million of pre-tax losses were reclassified from other comprehensive income to interest expense. For 2004, pre-tax losses of approximately $22 million are expected to be reclassified from other comprehensive income to interest expense.

## 7. COMMITMENTS

### Construction Program

Southern Company is engaged in continuous construction programs, currently estimated to total $2.2 billion in 2004, $2.2 billion in 2005, and $2.6 billion in 2006. These amounts include $41 million, $31 million, and $27 million in 2004, 2005, and 2006, respectively, for construction expenditures related to contractual purhase commitments for uranium and nuclear fuel conversion, enrichment, and fabrication services included in this note under "Fuel and Purchased Power Commitments." The construction programs are subject to periodic review and revision, and actual construction costs may vary from the above estimates because of numerous factors. These factors include: changes in business conditions; acquisition of additional generating assets; revised load growth estimates; changes in environmental regulations; changes in existing nuclear plants to meet new regulatory requirements; changes in FERC rules and transmission regulations; increasing costs of labor, equipment, and materials; and cost of capital. At December 31, 2003, significant purchase commitments were outstanding in connection with the construction program. Southern Company has approximately 1,200 megawatts of additional generating capacity scheduled to be placed in service by 2005. In addition, capital improvements to generation, transmission, and distribution facilities -- including those to meet environmental standards -- will continue.

### Long-Term Service Agreements

The retail operating companies and Southern Power have entered into several Long-Term Service Agreements (LTSAs) with General Electric (GE) for the purpose of securing maintenance support for the combined cycle and combustion turbine generating facilities owned by the subsidiaries. In summary, the LTSAs stipulate that GE will perform all planned inspections on the covered equipment, which includes the cost of all labor and materials. GE is also obligated to cover the costs of unplanned maintenance on the covered equipment subject to a limit specified in each contract.

In general, except for Southern Power's Plant Dahlberg, these LTSAs are in effect through two major inspection cycles per unit. The Dahlberg agreement is in effect through the first major inspection of each unit. Scheduled payments to GE are made at various intervals based on actual operating hours of the

respective units. Total payments to GE under these agreements for facilities owned are currently estimated at $1.3 billion over the remaining life of the agreements, which may range up to 30 years. However, the LTSAs contain various cancellation provisions at the option of the purchasers.

Payments made to GE prior to the performance of any planned inspections are recorded as a prepayment in the Consolidated Balance Sheets. Inspection costs are capitalized or charged to expense based on the nature of the work performed.

**Fuel and Purchased Power Commitments**

To supply a portion of the fuel requirements of the generating plants, Southern Company has entered into various long-term commitments for the procurement of fossil and nuclear fuel. In most cases, these contracts contain provisions for price escalations, minimum purchase levels, and other financial commitments. Natural gas purchase commitments contain given volumes with prices based on various indices at the time of delivery. Amounts included in the chart below represent estimates based on New York Mercantile future prices at December 31, 2003. Also, Southern Company has entered into various long-term commitments for the purchase of electricity. Total estimated minimum long-term obligations at December 31, 2003 were as follows:

| Year | Natural Gas | Coal and Nuclear Fuel | Purchased Power |
|---|---|---|---|
| | | (in millions) | |
| 2004 | $ 814 | $2,409 | $ 139 |
| 2005 | 538 | 1,723 | 174 |
| 2006 | 491 | 1,475 | 181 |
| 2007 | 350 | 1,131 | 183 |
| 2008 | 269 | 544 | 184 |
| 2009 and thereafter | 2,763 | 182 | 918 |
| Total commitments | $5,225 | $7,464 | $1,779 |

Additional commitments for fuel will be required to supply Southern Company's future needs.

**Operating Leases**

In May 2001, Mississippi Power began the initial 10-year term of a lease agreement signed in 1999 for a combined cycle generating facility built at Plant Daniel. The facility cost approximately $370 million. In 2003, the generating facility was acquired by Juniper Capital L.P. (Juniper), whose partners are unaffiliated with Mississippi Power. Simultaneously, Juniper entered into a restructured lease agreement with Mississippi Power. Juniper has also entered into leases with other parties unrelated to Mississippi Power. The assets leased by Mississippi Power comprise less than 50 percent of Juniper's assets. In accordance with FASB Interpretation No. 46, Mississippi Power is not required to consolidate the leased assets and related liabilities, and the lease with Juniper is considered an operating lease under FASB Statement No. 13. The initial lease term ends in 2011, and the lease includes a purchase and renewal option based on the cost of the facility at the inception of the lease, which was $369 million. Mississippi Power is required to amortize approximately four percent of the initial acquisition cost over the initial lease term. Eighteen months prior to the end of the initial lease, Mississippi Power may elect to renew for 10 years. If the lease is renewed, the agreement calls for Mississippi Power to amortize an additional 17 percent of the initial completion cost over the renewal period. Upon termination of the lease, at Mississippi Power's option, it may either exercise its purchase option or the facility can be sold to a third party.

The lease provides for a residual value guarantee -- approximately 73 percent of the acquisition cost -- by Mississippi Power that is due upon termination of the lease in the event that Mississippi Power does not renew the lease or purchase the assets and that the fair market value is less than the unamortized cost of the asset. Mississippi Power has recognized in the balance sheet a liability of approximately $15 million for the fair market value of this residual value guarantee. In 2003, approximately $11 million in lease termination costs were included in operation expenses and $26 million in lease expense. The amount of future minimum operating lease payments will be approximately $29 million annually during the initial term.

Southern Company has other operating lease agreements with various terms and expiration dates. Total operating lease expenses were $156 million, $171 million, and $64 million for 2003, 2002, and 2001, respectively. At December 31, 2003, estimated minimum rental commitments for noncancelable operating leases were as follows:

| Year | Rail Cars | Other | Total |
|---|---|---|---|
| | | (in millions) | |
| 2004 | $ 36 | $ 92 | $128 |
| 2005 | 33 | 80 | 113 |
| 2006 | 28 | 67 | 95 |
| 2007 | 19 | 57 | 76 |
| 2008 | 19 | 48 | 67 |
| 2009 and thereafter | 106 | 156 | 262 |
| Total minimum payments | $241 | $500 | $741 |

For the retail operating companies, the rail car lease expenses are recoverable through fuel cost recovery provisions. In addition to the above rental commitments, Alabama Power and Georgia Power have obligations upon expiration of certain rail car leases with respect to the residual value of the leased property. These leases expire in 2004, 2006, and 2010, and the maximum obligations are $39 million, $66 million, and $40 million, respectively. At the termination of the leases, the lessee may either exercise its purchase option, or the property can be sold to a third party. Alabama Power and Georgia Power expect that the fair market value of the leased property would substantially reduce or eliminate the payments under the residual value obligations.

**Guarantees**

Southern Company has made separate guarantees to certain counterparties regarding performance of contractual commitments by Mirant's trading and marketing subsidiaries. At December 31, 2003, the total notional amount of guarantees outstanding was less than $30 million, all of which will expire by 2009. Under the terms of the separation agreement, Mirant may not enter into any new commitments under these guarantees after the spin off date and must use reasonable efforts to release Southern Company from all such support arrangements and indemnify Southern Company for any obligations incurred. Subsequent to the spin off, Mirant began paying Southern Company a fee of 1 percent annually on the average aggregate maximum principal amount of all guarantees outstanding until they are replaced or expire. However, in December 2003, Mirant notified Southern Company that the Bankruptcy Code provides relief from paying this fee.

Southern Company has executed a keep-well agreement with a subsidiary of Southern Holdings to make capital contributions in the event of any shortfall in payments due under a participation agreement with an entity in which the subsidiary holds a 30 percent investment. The maximum aggregate amount of Southern Company's liability under this keep-well agreement is $50 million.

As discussed earlier in this note under "Operating Leases," Alabama Power, Georgia Power, and Mississippi Power have entered into certain residual value guarantees. Also, Southern Company has certain contingent liabilities as discussed in Note 3 under "Mobile Energy Services' Petition for Bankruptcy."

## 8. COMMON STOCK

**Stock Issued**

Southern Company raised $470 million or 18 million shares in 2003 and $378 million or 16 million shares in 2002 from the issuance of new common shares under the company's various stock plans. Southern Company issued 2 million and 17 million treasury shares of common stock in 2002 and 2001, respectively, through various company stock plans. Proceeds from the issuance of treasury stock were $56 million in 2002 and $395 million in 2001.

**Shares Reserved**

At December 31, 2003, a total of 60 million shares was reserved for issuance pursuant to the Southern Investment Plan, the Employee Savings Plan, the Outside Directors Stock Plan, and the Omnibus Incentive Compensation Plan (stock option plan).

**Stock Option Plan**

Southern Company provides non-qualified stock options to a large segment of its employees ranging from line management to executives. As of December 31, 2003, 6,202 current and former employees participated in the stock option plan. The maximum number of shares of common stock that may be issued under this plan may not exceed 55 million. The prices of options granted to date have been at the fair market value of the shares on the dates of grant. Options granted to date become exercisable pro rata over a maximum period of three years from the date of grant. Options outstanding will expire no later than 10 years after the date of grant, unless terminated earlier by the Southern Company Board of Directors in accordance with the plan. Stock option data for the plan has been adjusted to reflect the

Mirant spin off. Activity from 2001 to 2003 for the plan is summarized below:

| | Shares Subject To Option | Average Option Price Per Share |
|---|---|---|
| Balance at December 31, 2000 | 22,566,627 | $14.92 |
| Options granted | 13,623,210 | 20.31 |
| Options canceled | (3,397,152) | 15.39 |
| Options exercised | (3,161,800) | 13.83 |
| Balance at December 31, 2001 | 29,630,885 | 17.46 |
| Options granted | 8,040,495 | 25.28 |
| Options canceled | (104,212) | 19.64 |
| Options exercised | (4,892,354) | 15.16 |

| At December 31, 2003 | **18,872,769** | |

The following table summarizes information about options outstanding at December 31, 2003:

| | Dollar Price Range of Options | | |
|---|---|---|---|
| | 13-19 | 19-25 | 25-30 |
| Outstanding: | | | |
| Shares (in thousands) | **7,428** | **11,719** | **14,785** |
| Average remaining life (in years) | **4.7** | **6.2** | **8.3** |
| Average exercise price | **$15.32** | **$20.39** | **$26.57** |
| Exercisable: | | | |
| Shares (in thousands) | **7,428** | **8,303** | **3,142** |
| Average exercise price | **$15.32** | **$20.40** | **$25.49** |

The estimated fair values of stock options granted in 2003, 2002, and 2001 were derived using the Black-Scholes stock option pricing model. The following table shows the assumptions and the weighted average fair values of stock options:

| | **2003** | 2002 | 2001 |
|---|---|---|---|
| Interest rate | **2.7%** | 2.8% | 4.8% |
| Average expected life of stock options (in years) | **4.3** | 4.3 | 4.3 |
| Expected volatility of common stock | **23.6%** | 26.3% | 25.4% |
| Expected annual dividends on common stock | **$1.37** | $1.34 | $1.34 |
| Weighted average fair value of stock options granted | **$3.59** | $3.37 | $2.82 |

The pro forma impact of fair-value accounting for options granted on earnings from continuing operations is as follows:

| | As Reported | Pro Forma |
|---|---|---|
| **2003** | | |
| Net income (in millions) | **$1,474** | **$1,456** |
| Earnings per share (dollars): | | |
| Basic | **$2.03** | **$2.00** |
| Diluted | **$2.02** | **$1.99** |
| 2002 | | |
| Net income (in millions) | $1,318 | $1,299 |
| Earnings per share (dollars): | | |
| Basic | $1.86 | $1.83 |
| Diluted | $1.85 | $1.82 |
| 2001 | | |
| Net income (in millions) | $1,119 | $1,102 |
| Earnings per share (dollars): | | |
| Basic | $1.62 | $1.60 |
| Diluted | $1.61 | $1.59 |

**Diluted Earnings Per Share**

For Southern Company, the only difference in computing basic and diluted earnings per share is attributable to outstanding options under the stock option plan. The effect of the stock options was determined using the treasury stock method. Shares used to compute diluted earnings per share are as follows:

| | Average Common Stock Shares | | |
|---|---|---|---|
| | **2003** | 2002 | 2001 |
| | | (in thousands) | |
| As reported shares | **726,702** | 708,161 | 689,352 |
| Effect of options | **5,202** | 5,409 | 4,191 |
| Diluted shares | **731,904** | 713,570 | 693,543 |

### Common Stock Dividend Restrictions

The income of Southern Company is derived primarily from equity in earnings of its subsidiaries. At December 31, 2003, consolidated retained earnings included $3.9 billion of undistributed retained earnings of the subsidiaries. Of this amount, $313 million was restricted against the payment by the subsidiary companies of cash dividends on common stock under terms of bond indentures.

In accordance with the PUHCA, the subsidiaries are also restricted from paying common dividends from paid-in capital without SEC approval.

## 9. NUCLEAR INSURANCE

Under the Price-Anderson Amendments Act of 1988, Alabama Power and Georgia Power maintain agreements of indemnity with the NRC that, together with private insurance, cover third-party liability arising from any nuclear incident occurring at the companies' nuclear power plants. The act provides funds up to $10.9 billion for public liability claims that could arise from a single nuclear incident. Each nuclear plant is insured against this liability to a maximum of $300 million by American Nuclear Insurers (ANI), with the remaining coverage provided by a mandatory program of deferred premiums that could be assessed, after a nuclear incident, against all owners of nuclear reactors. A company could be assessed up to $101 million per incident for each licensed reactor it operates but not more than an aggregate of $10 million per incident to be paid in a calendar year for each reactor. Such maximum assessment, excluding any applicable state premium taxes, for Alabama Power and Georgia Power -- based on its ownership and buyback interests -- is $201 million and $203 million, respectively, per incident, but not more than an aggregate of $20 million per company to be paid for each incident in any one year. The Price-Anderson Amendments Act expired in August 2002; however, the indemnity provisions of the act remain in place for commercial nuclear reactors.

Alabama Power and Georgia Power are members of Nuclear Electric Insurance Limited (NEIL), a mutual insurer established to provide property damage insurance in an amount up to $500 million for members' nuclear generating facilities.

Additionally, both companies have policies that currently provide decontamination, excess property insurance, and premature decommissioning coverage up to $2.25 billion for losses in excess of the $500 million primary coverage. This excess insurance is also provided by NEIL.

NEIL also covers the additional costs that would be incurred in obtaining replacement power during a prolonged accidental outage at a member's nuclear plant. Members can purchase this coverage, subject to a deductible waiting period of up to 26 weeks, with a maximum per occurrence per unit limit of $490 million. After this deductible period, weekly indemnity payments would be received until either the unit is operational or until the limit is exhausted in approximately three years. Alabama Power and Georgia Power each purchase the maximum limit allowed by NEIL subject to ownership limitations. Each facility has elected a 12 week waiting period.

Under each of the NEIL policies, members are subject to assessments if losses each year exceed the accumulated funds available to the insurer under that policy. The current maximum annual assessments for Alabama Power and Georgia Power under the NEIL policies would be $36 million and $40 million, respectively.

Following the terrorist attacks of September 2001, both ANI and NEIL confirmed that terrorist acts against commercial nuclear power plants would be covered under their insurance. Both companies, however, revised their policy terms on a prospective basis to include an industry aggregate for all "non-certified" terrorist acts, i.e., acts that are not certified acts of terrorism pursuant to the Terrorism Risk Insurance Act of 2002 (TRIA). The NEIL aggregate -- applies to non-certified claims stemming from terrorism within a 12-month duration -- is $3.24 billion plus any amounts available through reinsurance or indemnity from an outside source. The non-certified ANI cap is a $300 million shared industry aggregate. Any act of terrorism that is certified pursuant to the TRIA will not be subject to the foregoing NEIL and ANI limitations but will be subject to the TRIA annual aggregate limitation of $100 billion of insured losses arising from certified acts of terrorism. The TRIA will expire on December 31, 2005.

For all on-site property damage insurance policies for commercial nuclear power plants, the NRC requires that the proceeds of such policies shall be dedicated first for the sole purpose of placing the reactor in a safe and stable condition after an accident. Any remaining proceeds are to be applied next toward the costs of decontamination and debris removal operations ordered by the NRC, and any further remaining proceeds are to be paid either to the company or to its bond trustees as may be appropriate under the policies and applicable trust indentures.

All retrospective assessments -- whether generated for liability, property, or replacement power -- may be subject to applicable state premium taxes.

## 10. SEGMENT AND RELATED INFORMATION

Southern Company's reportable business segment is the sale of electricity in the Southeast by the five retail operating companies and Southern Power. Net income and total assets for discontinued operations are included in the reconciling eliminations column. The all other column includes parent Southern Company, which does not allocate operating expenses to business segments. Also, this category includes segments below the quantitative threshold for separate disclosure. These segments include investments in synthetic fuels and leveraged lease projects, telecommunications, energy-related services, and natural gas marketing. Intersegment revenues are not material. Financial data for business segments and products and services are as follows:

### Business Segments

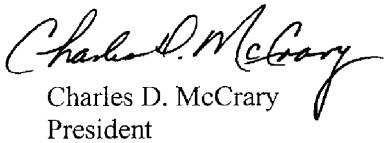
ALABAMA POWER COMPANY

FINANCIAL SECTION

## MANAGEMENT'S REPORT

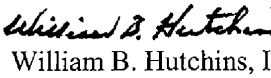
**Alabama Power Company 2003 Annual Report**

The management of Alabama Power Company has prepared -- and is responsible for -- the financial statements and related information included in this report. These statements were prepared in accordance with accounting principles generally accepted in the United States and necessarily include amounts that are based on the best estimates and judgments of management. Financial information throughout this annual report is consistent with the financial statements.



The Company maintains a system of internal accounting controls to provide reasonable assurance that assets are safeguarded and that the accounting records reflect only authorized transactions of the Company. Limitations exist in any system of internal controls, however, based on a recognition that the cost of the system should not exceed its benefits. The Company believes its system of internal accounting controls maintains an appropriate cost/benefit relationship.

The Company's internal accounting controls are evaluated on an ongoing basis by the Company's internal audit staff. The Company's independent public accountants also consider certain elements of the internal control system in order to determine their auditing procedures for the purpose of expressing an opinion on the financial statements.



Southern Company's audit committee of its board of directors, composed of four independent directors, provides a broad overview of management's financial reporting and control functions. Additionally, the controls and compliance committee of Alabama Power's board of directors, composed of three outside directors, meets periodically with management, the internal auditors, and the independent public accountants to discuss auditing, internal controls, and compliance matters. The internal auditors and independent public accountants have access to the members of these committees at any time.

Management believes that its policies and procedures provide reasonable assurance that the Company's operations are conducted according to a high standard of business ethics.

In management's opinion, the financial statements present fairly, in all material respects, the financial position, results of operations and cash flows of Alabama Power Company in conformity with accounting principles generally accepted in the United States.

Charles D. McCrary

## INDEPENDENT AUDITORS' REPORT

**Alabama Power Company:**

We have audited the accompanying balance sheets and statements of capitalization of Alabama Power Company (a wholly owned subsidiary of Southern Company) as of December 31, 2003 and 2002, and the related statements of income, comprehensive income, common stockholder's equity, and cash flows for the years then ended. These financial statements are the responsibility of Alabama Power Company's management. Our responsibility is to express an opinion on these financial statements based on our audits. The financial statements of Alabama Power Company for the year ended December 31, 2001 were audited by other auditors who have ceased operations. Those auditors expressed an unqualified opinion on those financial statements and included an explanatory paragraph that described a change in the method of accounting for derivative instruments and hedging activities in their report dated February 13, 2002.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements (pages II-83 to II-105) present fairly, in all material respects, the financial position of Alabama Power Company at December 31, 2003 and 2002, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note 1 to the financial statements, in 2003 Alabama Power Company changed its method of accounting for asset retirement obligations.

Deloitte & Touche LLP

Birmingham, Alabama
March 1, 2004

**THE FOLLOWING REPORT OF INDEPENDENT PUBLIC ACCOUNTANTS IS A COPY OF THE REPORT PREVIOUSLY ISSUED IN CONNECTION WITH THE COMPANY'S 2001 ANNUAL REPORT AND HAS NOT BEEN REISSUED BY ARTHUR ANDERSEN LLP. SEE EXHIBIT 23(b)2 FOR ADDITIONAL INFORMATION.**

**To Alabama Power Company:**

We have audited the accompanying balance sheets and statements of capitalization of Alabama Power Company (an Alabama corporation and a wholly owned subsidiary of Southern Company) as of December 31, 2001 and 2000, and the related statements of income, common stockholder's equity, and cash flows for each of the three years in the period ended December 31, 2001. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements (pages II-58 through II-76) referred to above present fairly, in all material respects, the financial position of Alabama Power Company as of December 31, 2001 and 2000, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2001, in conformity with accounting principles generally accepted in the United States.

As explained in Note 1 to the financial statements, effective January 1, 2001, Alabama Power Company changed its method of accounting for derivative instruments and hedging activities.

Arthur Andersen LLP

Birmingham, Alabama
February 13, 2002

## OVERVIEW OF EARNINGS AND BUSINESS ACTIVITIES

### *Earnings*

Alabama Power Company's 2003 net income after dividends on preferred stock was $473 million, representing a $12 million (2.5 percent) increase from the prior year. This improvement is due primarily to higher sales for resale, increases in other revenues, and lower interest expense, partially offset by higher non-fuel operating expenses.

In 2002, earnings were $461 million, representing a 19.3 percent increase from the prior year. This improvement was primarily attributable to increased territorial energy sales and higher retail rates when compared to the prior year. More favorable weather conditions in 2002 as compared to the unusually mild weather experienced in 2001 contributed to the increases in territorial sales. The increases in revenues were partially offset by increased non-fuel operating expenses. Earnings in 2001 were $387 million, representing a 7.9 percent decrease from the prior year. This decline was primarily attributable to a decrease in territorial energy sales as a result of an economic downturn and milder temperatures.

The return on average common equity for 2003 was 13.75 percent compared to 13.80 percent in 2002 and 11.89 percent in 2001.

### *Business Activities*

The Company operates as a vertically integrated utility providing electricity to retail customers within its traditional service area located within the State of Alabama and to wholesale customers in the Southeast.

Several factors affect the opportunities, challenges, and risk of the Company's primary business of selling electricity. These factors include the ability to maintain a stable regulatory environment, to achieve energy sales growth while containing costs, and to recover costs related to growing demand and increasingly stricter environmental standards. Future earnings in the near term will depend, in part, upon growth in energy sales, which is subject to a number of factors. These factors include weather, competition, new energy contracts with neighboring utilities, energy conservation practiced by customers, the price elasticity of demand, and the rate of economic growth in the service area.

## RESULTS OF OPERATIONS

A condensed income statement is as follows:

| | Amount | Increase (Decrease) From Prior Year | | |
|---|---|---|---|---|
| | **2003** | **2003** | 2002 | 2001 |
| | | (in millions) | | |
| Operating revenues | **$3,960** | **$250** | $124 | $(81) |
| Fuel | **1,068** | **98** | (31) | 38 |
| Purchased power | **315** | **66** | (44) | (56) |
| Other operation and maintenance | **921** | **67** | 71 | (56) |
| Depreciation and amortization | **413** | **15** | 15 | 19 |
| Taxes other than income taxes | **228** | **11** | 2 | 5 |
| Total operating expenses | **2,945** | **257** | 13 | (50) |
| Operating income | **1,015** | **(7)** | 111 | (31) |
| Other income (expense), net | **(252)** | **17** | 7 | (15) |
| Less -- Income taxes | **290** | **(2)** | 44 | (13) |
| Net Income | **$ 473** | **$ 12** | $ 74 | $(33) |

### *Revenues*

Operating revenues for 2003 were nearly $4.0 billion, reflecting a $250 million increase from 2002. The following table summarizes the principal factors that have affected operating revenues for the past three years:

| | Amount | | |
|---|---|---|---|
| | **2003** | 2002 | 2001 |
| | | (in millions) | |
| Retail -- prior year | **$2,951** | $2,748 | $2,953 |
| Change in - | | | |
| Base rates | **51** | 76 | 23 |
| Sales growth | **68** | 70 | (36) |
| Weather | **(61)** | 60 | (62) |
| Fuel cost recovery and other | **42** | (3) | (130) |
| Retail -- current year | **3,051** | 2,951 | 2,748 |
| Sales for resale -- | | | |
| Non-affiliates | **488** | 474 | 486 |
| Affiliates | **277** | 188 | 245 |
| Total sales for resale | **765** | 662 | 731 |
| Other operating revenues | **144** | 97 | 107 |
| Total operating revenues | **$3,960** | $3,710 | $3,586 |
| Percent change | **6.7%** | 3.5% | (2.2)% |

Retail revenues in 2003 were $3.1 billion. Revenues increased $100 million (3.4 percent) from the prior year, increased $203 million (7.4 percent) in 2002, and decreased $205 million (6.9 percent) in 2001. All sectors of retail revenues increased for the Company in 2003 primarily due to increased fuel revenue and a 2.6 percent increase in retail base rates which went into effect in July 2003. See Note 3 to the financial statements under "Retail Rate Adjustment Procedures" for additional information.

The primary contributors to the increase in revenues in 2002, shown in the table above, were the positive effect of favorable weather conditions on energy sales and increases in retail base rates (0.6 percent increase in July 2001 and 2 percent increases in both October 2001 and April 2002). The Company mitigated the effect of these increases to customers with a decrease to the energy cost recovery factor in April 2002.

The revenue decrease in 2001 was primarily due to the negative impact of milder temperatures on energy sales and an economic downturn in the Company's service territory.

Fuel rates billed to customers are designed to fully recover fluctuating fuel costs over a period of time. At December 31, 2003, the Company had no unrecovered fuel costs. Fuel revenues have no effect on net income because they represent the recording of revenues to offset fuel expenses.

Sales for resale to non-affiliates are predominantly unit power sales under long-term contracts to Florida utilities. Revenues from power sales contracts have both capacity and energy components. Capacity revenues reflect the recovery of fixed costs and a return on investment under the contracts. Energy is generally sold at variable cost. These capacity and energy components of the unit power contracts were as follows:

| | **2003** | 2002 | 2001 |
|---|---|---|---|
| | | (in thousands) | |
| Unit power - | | | |
| Capacity | **$130,022** | $119,193 | $124,720 |
| Energy | **145,342** | 134,051 | 134,006 |
| Total | **$275,364** | $253,244 | $258,726 |

There are no significant scheduled declines in unit power sales capacity until the termination of the unit power sales contracts in 2010.

Short-term opportunity energy sales are also included in sales for resale to non-affiliates. These opportunity sales are made at market rates that generally include the recovery of fixed costs and a return, in addition to the variable energy cost. Revenues associated with other power sales to non-affiliates were as follows:

| | **2003** | 2002 | 2001 |
|---|---|---|---|
| | | (in thousands) | |
| Other power sales - | | | |
| Capacity and other | **$33,858** | $14,613 | $ 13,324 |
| Variable cost of energy | **44,627** | 61,925 | 91,608 |
| Total | **$78,485** | $76,538 | $104,932 |

Revenues from sales to affiliated companies within the Southern electric system, as well as purchases of energy, will vary from year to year depending on demand and the availability and cost of generating resources at each company. Sales for resale revenues increased $26.6 million in 2003 due to increased capacity payments received in accordance with the affiliated company interchange agreements as a result of increased capacity. Excluding the capacity revenues, these transactions do not have a significant impact on earnings since the energy is generally sold at marginal cost and energy purchases are generally offset by energy revenues through the Company's energy cost recovery clause.

Other operating revenues in 2003 increased $47 million (48.6 percent) from 2002 due to an increase of $19.4 million in revenues from gas-fueled co-generation steam facilities -- primarily as a result of higher gas prices -- and a $14.8 million increase in revenues from Alabama Public Service Commission (Alabama PSC) approved fees charged to customers for connection, reconnection, and collection when compared to the same period in 2002. Since co-generation steam revenues are generally offset by fuel expenses, these revenues did not have a significant impact on earnings.

The $11 million (9.9 percent) decrease in other operating revenues in 2002 resulted primarily from a $7.0 million decrease in revenues from gas-fueled co-generation steam facilities due to lower gas prices and lower demand. The $21 million (23.9 percent) increase in 2001 was primarily attributed to a $6.4 million increase in steam sales in conjunction with the operation of the Company's co-generation facilities, a $5.3 million increase in fuel sales, and a $5.1 million increase in rent from electric property.

*Energy Sales*

Changes in revenues are influenced heavily by the volume of energy sold each year. Kilowatt-hour (KWH) sales for 2003 and the percent change by year were as follows:

| | KWH | Percent Change | | |
|---|---|---|---|---|
| | **2003** | **2003** | 2002 | 2001 |
| | (millions) | | | |
| Residential | **16,960** | **(2.5)%** | 9.6% | (5.3)% |
| Commercial | **13,452** | **0.7** | 4.4 | (1.5) |
| Industrial | **21,593** | **2.3** | 3.1 | (7.4) |
| Other | **203** | **(1.1)** | 3.7 | (3.9) |
| Total retail | **52,208** | **0.3** | 5.5 | (5.2) |
| Sales for resale - | | | | |
| Non-affiliates | **17,086** | **9.9** | 1.8 | 2.9 |
| Affiliates | **9,422** | **6.5** | - | 64.7 |
| Total | **78,716** | **2.9** | 4.1 | 1.6 |

Residential energy sales for 2003 experienced a 2.5 percent decrease over the prior year and total retail energy sales grew by 0.3 percent primarily as a result of milder-than-normal summer temperatures compared to the previous year. Although retail sales to industrial customers increased 2.3 percent in 2003 and 3.1 percent in 2002, overall sales to industrial customers remained depressed due to the continuing effect of sluggish economic conditions.

Residential energy sales for 2002 experienced a 9.6 percent increase over the prior year and total retail energy sales grew by 5.5 percent primarily as a result of warmer summer temperatures and colder winter weather conditions compared to the previous year.

The decrease in 2001 retail energy sales was primarily due to milder temperatures and an economic downturn in the Company's service area. This was offset by an increase in sales for resale to affiliates. Increased operation of the Company's combined cycle facilities due to lower natural gas prices and an increase in the Company's combined cycle capacity contributed to the increase in sales for resale.

Assuming normal weather, sales to retail customers are projected to grow approximately 1.7 percent annually on average during 2004 through 2008.

*Expenses*

The total operating expenses in 2003 were approximately $3.0 billion, an increase of $257 million (9.6 percent) over the previous year. This increase is mainly due to a $98 million increase in fuel expense primarily related to an increase in the average cost of natural gas and coal. In addition, purchased power expenses increased a total of $66 million, maintenance expense increased $30 million primarily related to transmission and distribution overhead lines, and depreciation and amortization expense increased $15 million.

In 2002, total operating expenses of $2.7 billion increased by $13 million (0.5 percent) over the previous year. This slight increase was mainly due to a $35 million increase in administrative and general expenses primarily related to employee salaries, insurance expense, and accrued expenses for liability insurance, litigation and workers compensation, a $19 million increase in production expenses related to boiler plant maintenance, and a $15 million increase in depreciation and amortization expenses due to an increase in depreciable property. These increases were offset by a $43 million decrease in purchased power expenses and a $14 million decrease in fuel expenses related to lower coal prices.

In 2001, total operating expenses of $2.7 billion were down $50 million (1.8 percent) compared with 2000. This decline was mainly due to an $18 million net decrease in fuel and purchased power costs related to lower fuel prices, increased hydro generation and added capacity. The Company also had a $56 million decrease in non-production operation and maintenance expense related to settlements received in connection with the Company's insurance program, lower costs related to services provided by Southern Company Services (SCS) and Southern Nuclear Operating Company, and a reduction to the natural disaster reserve accrual. These decreases in expense were partially offset by a $19 million increase in depreciation and amortization due to an increase in depreciable property.

Fuel costs constitute the single largest expense for the Company. The mix of fuel sources for generation of electricity is determined primarily by demand, the unit cost of fuel consumed, and the availability of fossil and nuclear generating units and hydro generation. The amount and sources of generation and the average cost of fuel per net KWH generated and the average cost of purchased power were as follows:

| | 2003 | 2002 | 2001 |
|---|---|---|---|
| Total generation (billions of KWHs) | **72** | 71 | 68 |
| Sources of generation (percent) -- | | | |
| Coal | **64** | 62 | 64 |
| Nuclear | **19** | 19 | 18 |
| Hydro | **8** | 6 | 6 |
| Gas | **9** | 13 | 12 |
| Average cost of fuel per net kilowatt-hour generated (cents) | **1.67** | 1.47 | 1.56 |
| Average cost of purchased power per net kilowatt-hour (cents) | **3.56** | 2.91 | 3.28 |

In 2003, total fuel and purchased power expenses of $1.4 billion increased $164 million (13.4 percent) over 2002 due to a 58.3 percent increase in average gas prices and a 2.2 percent increase in average coal prices. Fuel and purchased power expenses in 2002 of $1.2 billion decreased $75 million (5.8 percent) due primarily to lower average fuel cost, while total energy sales increased 3.0 billion kilowatt hours (4.1 percent) compared with the amounts recorded in 2001. Fuel and purchased power expenses in 2001 decreased $18 million (1.4 percent) compared to 2000 because of reduced generation due to milder temperatures in 2001. Fuel expenses, including purchased power, are offset by fuel revenues through the Company's energy cost recovery clause and have no effect on net income.

Purchased power consists of purchases from affiliates in the Southern electric system and non-affiliated companies. Purchased power transactions among the Company and its affiliates will vary from period to period depending on demand, the availability, and the variable production cost of generating resources at each company. In 2003, purchased power from non-affiliates increased $20 million (22 percent) due to a 19.3 percent increase in price and a 9.5 percent increase in energy purchased when compared to 2002. During 2002, purchased power transactions from non-affiliates decreased $54 million (37 percent) due to the addition in May 2001 of a combined cycle unit which generated 6.1 billion kilowatt hours in 2002, an 18.4 percent increase over the previous year. Purchased power transactions from non-affiliates also declined in 2001 because of the addition of the combined cycle unit and an increase in hydro generation resulting in a $20 million (12 percent) decline from the year 2000.

Depreciation and amortization expense increased 3.6 percent in 2003, 3.9 percent in 2002, and 5.2 percent in 2001. These increases reflect additions to property, plant, and equipment.

Allowance for Equity Funds Used During Construction (AFUDC) increased $1.4 million (12.8 percent) in 2003 due to an increase in the applicable AFUDC rate. AFUDC increased $4 million (57.5 percent) in 2002 due to an increase in the amount of construction work in progress over the prior year. AFUDC decreased $16 million (68.9 percent) in 2001 due to completing construction of Plant Barry Unit 7 and placing it in service in May 2001.

Interest expense, net of amounts capitalized, of $214 million in 2003 decreased $11.4 million (5.1 percent) from 2002, which had decreased $21 million (8.4 percent) from 2001. Both years reflect a decrease in interest rates on long-term debt due to refinancing activities. Interest expense increased $11 million (4.7 percent) in 2001 compared to 2000.

## Effects of Inflation

The Company is subject to rate regulation that is based on the recovery of historical costs. In addition, the income tax laws are also based on historical costs. Therefore, inflation creates an economic loss because the Company is recovering its costs of investments in dollars that have less purchasing power. While the inflation rate has been relatively low in recent years, it continues to have an adverse effect on the Company because of the large investment in utility plant with long economic lives. Conventional accounting for historical cost does not recognize this economic loss nor the partially offsetting gain that arises through financing facilities with fixed-money obligations, such as long-term debt and preferred securities. Any recognition of inflation by regulatory authorities is reflected in the rate of return allowed.

## Future Earnings Potential

### *General*

The results of operations for the past three years are not necessarily indicative of future earnings potential. The level of the Company's future earnings depends on numerous factors. Major factors include the ability of the Company to maintain a stable regulatory environment, to achieve energy sales growth while containing costs, and to recover costs related to growing demand and increasingly

stricter environmental standards. Growth in energy sales is subject to a number of factors. These factors include weather, competition, new energy contracts with neighboring utilities, energy conservation practiced by customers, the price elasticity of demand, and the rate of economic growth in the Company's service area.

***Industry Restructuring***

The Company operates as a vertically integrated utility providing electricity to customers within its traditional service area located in the State of Alabama and to wholesale customers in the Southeast.

The electric utility industry in the United States is continuing to evolve as a result of regulatory and competitive factors. Among the early primary agents of change was the Energy Policy Act of 1992 (Energy Act). The Energy Act allowed independent power producers to access a utility's transmission network and sell electricity to other utilities.

Although the Energy Act does not provide for retail customer access, it was a major catalyst for restructuring and consolidations that took place within the utility industry. Numerous federal and state initiatives that promote wholesale and retail competition are in varying stages. Among other things, these initiatives allow retail customers in some states to choose their electricity provider. Some states have approved initiatives that result in a separation of the ownership and/or operation of generating facilities from the ownership and/or operation of transmission and distribution facilities. While various restructuring and competition initiatives have been discussed in Alabama, none have been enacted. In October 2000, the Alabama PSC completed a two-year study of electric industry restructuring, concluding that (i) restructuring of the electric utility industry in Alabama was not in the public interest and (ii) the Alabama PSC itself could not mandate retail competition or electric industry restructuring without enabling state legislation. Electric utility restructuring could require numerous issues to be resolved, including significant ones relating to recovery of any stranded investments, full cost recovery of energy produced, and other issues related to the energy crisis that occurred in California as well as the August 2003 power outage in the Northeast.

Since 2001, merchant energy companies and traditional electric utilities with significant energy marketing and trading activities have come under severe financial pressures. Many of these companies have completely exited or drastically reduced all energy marketing and trading activities and sold foreign and domestic electric infrastructure assets. The Company has not experienced any material adverse financial impact regarding its limited energy trading operations through SCS.

Continuing to be a low-cost producer could provide opportunities to increase the size and profitability in markets that evolve with changing regulation and competition. Conversely, future regulatory changes could adversely affect the Company's growth, and if the Company does not remain a low-cost producer and provide quality service, then energy sales growth could be limited, and this could significantly erode earnings.

***Environmental Matters***

*New Source Review Actions*

In November 1999, the Environmental Protection Agency (EPA) brought a civil action against the Company alleging that the Company had violated the New Source Review (NSR) provisions of the Clean Air Act with respect to coal-fired generating facilities at the Company's Plants Miller, Barry, and Gorgas. The civil action requests penalties and injunctive relief, including an order requiring the installation of the best available control technology at the affected units. The action against the Company has been stayed since the spring of 2001 during the appeal of a very similar NSR action against the Tennessee Valley Authority before the U.S. Court of Appeals for the Eleventh Circuit. The Eleventh Circuit appeal was decided on September 16, 2003, and, on February 13, 2004, the EPA petitioned the U.S. Supreme Court to review the Eleventh Circuit's decision. The EPA also filed a motion to lift the stay in the action against the Company. See Note 3 to the financial statements under "New Source Review Actions" for additional information.

In December 2002 and October 2003, the EPA issued final revisions to its NSR regulations under the Clean Air Act. The December 2002 revisions included changes to the regulatory exclusions and the methods of calculating emissions increases. The October 2003 regulations clarified the scope of the existing Routine Maintenance, Repair, and Replacement exclusion. A coalition of states and environmental organizations filed petitions for review of these revisions with the U.S. Court of Appeals for the District of Columbia Circuit. On December 24, 2003, the Court of Appeals granted a stay of the October 2003 revisions pending its review of the rules and ordered that

its review be conducted on an expedited basis. In January 2004, the Bush Administration announced that it would continue to enforce the existing rules until the courts resolve legal challenges to the EPA's revised NSR regulations. In any event, the final regulations must be adopted by the State of Alabama in order to apply to the Company's facilities. The effect of these final regulations and the related legal challenges cannot be determined at this time.

The Company believes that it complied with applicable laws and the EPA's regulations and interpretations in effect at the time the work in question took place. The Clean Air Act authorizes civil penalties of up to $27,500 per day, per violation at each generating unit. Prior to January 30, 1997, the penalty was $25,000 per day. An adverse outcome in this matter could require substantial capital expenditures that cannot be determined at this time and could possibly require payment of substantial penalties. This could affect future results of operations, cash flows, and possibly financial condition if such costs are not recovered through regulated rates.

*Environmental Statutes and Regulations*

The Company's operations are subject to extensive regulation by state and federal environmental agencies under a variety of statutes and regulations governing environmental media, including air, water, and land resources. Compliance with these environmental requirements will involve significant costs -- both capital and operating -- a major portion of which is expected to be recovered through existing ratemaking provisions. Environmental costs that are known and estimable at this time are included in capital expenditures discussed under "Capital Requirements and Contractual Obligations." There is no assurance, however, that all such costs will, in fact, be recovered.

Compliance with the federal Clean Air Act and resulting regulations has been and will continue to be a significant focus for the Company. The Title IV acid rain provisions of the Clean Air Act, for example, required significant reductions in sulfur dioxide and nitrogen oxide emissions. Title IV compliance, effective in 2000, and associated construction expenditures totaled approximately $88 million. Some of these expenditures also assisted the Company in complying with nitrogen oxide emission reduction requirements under Title I of the Clean Air Act, which were designed to address one-hour ozone nonattainment problems in Birmingham, Alabama. In December 2000, the Alabama Department of Environmental Management (ADEM) adopted revisions to the State Implementation Plan (SIP) for meeting the one-hour ozone standard. These revisions required additional nitrogen oxide emission reductions from May through September of each year at plants in and/or near those nonattainment areas. Two plants in the Birmingham area are currently subject to those requirements, the most recent of which went into effect in 2003. Construction expenditures for compliance with the nitrogen oxide emission reduction requirements are estimated to be approximately $249 million.

To help ozone nonattainment areas attain the one-hour ozone standard, the EPA issued regional nitrogen oxide reduction rules in 1998. Those rules required 21 states, including Alabama, to reduce and cap nitrogen oxide emissions from power plants and other large industrial sources. Affected sources, including five of the Company's coal-fired plants, must comply with the reduction requirements by May 31, 2004. Additional construction expenditures for compliance with these rules are currently estimated at approximately $361 million, of which $317 million remains to be spent.

In July 1997, the EPA revised the national ambient air quality standards for ozone and particulate matter. These revisions made the standards significantly more stringent. In the subsequent litigation of these standards, the U.S. Supreme Court found the EPA's implementation program for the new eight-hour ozone standard unlawful and remanded it to the EPA for further rulemaking. During 2003, the EPA proposed implementation rules designed to address the court's concerns. The EPA plans to designate areas as attainment or nonattainment with the new eight-hour ozone standard in April 2004 and with the new fine particulate matter standard by the end of 2004. These designations will be based on air quality data for 2001 through 2003. Several areas within the Company's service area are likely to be designated nonattainment under these standards. SIPs, including new emission control regulations necessary to bring those areas into attainment, could be required as early as 2007. These SIPs could require reductions in sulfur dioxide emissions and could require further reductions in nitrogen oxide emissions from power plants. If so, reductions could be required sometime after 2007. The impact of any new standards will depend on the development and implementation of applicable regulations and cannot be determined at this time.

In January 2004, the EPA issued a proposed Interstate Air Quality Rule to address interstate transport of ozone and fine particles. This proposed rule would require additional year-round sulfur dioxide and nitrogen oxide emission reductions from power plants in the eastern United States in two phases – in 2010 and 2015. The EPA currently plans to finalize this rule by 2005. If finalized, the rule could modify or supplant other SIP requirements for attainment of the fine particulate matter standard and the eight-hour ozone standard. The impact of this rule on the Company will depend upon the specific requirements of the final rule and cannot be determined at this time.

Further reductions in sulfur dioxide and nitrogen oxides could also be required under the EPA's Regional Haze rules. The Regional Haze rules require states to establish Best Available Retrofit Technology (BART) standards for certain sources that contribute to regional haze. The Company has a number of plants that could be subject to these rules. The EPA's Regional Haze program calls for states to submit SIPs in 2007. The SIPs must contain emission reduction strategies for implementing BART and achieving progress toward the Clean Air Act's visibility improvement goal. In 2002, however, the U.S. Court of Appeals for the District of Columbia Circuit vacated and remanded the BART provisions of the federal Regional Haze rules to the EPA for further rulemaking. The EPA has entered into an agreement that requires proposed revised rules in April 2004 and final rules in 2005. Because new BART rules have not been developed and state visibility assessments for progress are only beginning, it is not possible to determine the effect of these rules on the Company at this time.

The EPA's Compliance Assurance Monitoring (CAM) regulations under Title V of the Clean Air Act require that monitoring be performed to ensure compliance with emissions limitations on an ongoing basis. In 2004 and 2005, a number of the Company's plants will likely become subject to CAM requirements for at least one pollutant, in most cases particulate matter. The Company is in the process of developing CAM plans. Because the plans are still under development, the Company cannot determine the costs associated with implementation of the CAM regulations. Actual ongoing monitoring costs are expensed as incurred and are not material for any year presented.

In January 2004, the EPA issued proposed rules regulating mercury emissions from electric utility boilers. The proposal solicits comments on two possible approaches for the new regulations – a Maximum Achievable Control Technology approach and a cap-and-trade approach. Either approach would require significant reductions in mercury emissions from Company facilities. The regulations are scheduled to be finalized by the end of 2004, and compliance could be required as early as 2007. Because the regulations have not been finalized, the impact on the Company cannot be determined at this time.

Several major bills to amend the Clean Air Act to impose more stringent emissions limitations on power plants have been proposed by Congress. Three of these, the Bush Administration's Clear Skies Act, the Clean Power Act of 2003, and the Clean Air Planning Act of 2003, propose to further limit power plant emissions of sulfur dioxide, nitrogen oxides, and mercury. The latter two bills also propose to limit emissions of carbon dioxide. The cost impacts of such legislation would depend upon the specific requirements enacted and cannot be determined at this time.

Domestic efforts to limit greenhouse gas emissions, have been spurred by international discussions surrounding the Framework Convention on Climate Change and, specifically, the Kyoto Protocol, which proposes international constraints on the emissions of greenhouse gases. The Bush Administration does not support U.S. ratification of the Kyoto Protocol or other mandatory carbon dioxide reduction legislation and has instead announced a new voluntary climate initiative, known as Climate VISION, which seeks an 18 percent reduction by 2012 in the rate of greenhouse gas emissions relative to the dollar value of the U.S. economy. The Company is involved in a voluntary electric utility industry sector climate change initiative in partnership with the government. The electric utility sector has pledged to reduce its greenhouse gas intensity 3 percent to 5 percent over the next decade and is in the process of developing a memorandum of understanding with the Department of Energy (DOE) to cover this voluntary program.

The Company must comply with other environmental laws and regulations that cover the handling and disposal of waste and releases of hazardous substances. Under these various laws and regulations, the Company could incur substantial costs to clean up properties. The Company conducts studies to determine the extent of any required cleanup and will recognize in its financial statements costs to clean up known sites. Amounts for cleanup and ongoing monitoring costs were not material

for any new year presented. The Company may be liable for some or all required cleanup costs for additional sites that may require environmental remediation. The Company has not incurred any significant cleanup costs to date.

Under the Clean Water Act, the EPA has been developing new rules aimed at reducing impingement and entrainment of fish and fish larvae at power plants' cooling water intake structures. On February 16, 2004, the EPA finalized these rules. These rules will require biological studies and, perhaps, retrofits to some intake structures at existing power plants. The impact of these new rules will depend on the results of studies and analyses performed as part of the rules' implementation.

In addition, under the Clean Water Act, the EPA and the ADEM are developing total maximum daily loads (TMDLs) for certain impaired waters. Establishment of maximum loads by the EPA or the ADEM may result in lowering permit limits for various pollutants and a requirement to take additional measures to control non-point source pollution (e.g., storm water runoff) at facilities that discharge into waters for which TMDLs are established. Because the effect on the Company will depend on the actual TMDLs and permit limitations established by the implementing agency, it is not possible to determine the effect on the Company at this time.

Several major pieces of environmental legislation are periodically considered for reauthorization or amendment by Congress. These include: the Clean Air Act; the Clean Water Act; the Comprehensive Environmental Response, Compensation, and Liability Act; the Resource Conservation and Recovery Act; the Toxic Substances Control Act; the Emergency Planning & Community Right-to-Know Act; and the Endangered Species Act.

Compliance with possible additional federal or state legislation or regulations related to global climate change, electromagnetic fields, or other environmental and health concerns could also significantly affect the Company. The impact of any new legislation, changes to existing legislation, or environmental regulations could affect many areas of the Company's operations. The full impact of any such changes cannot, however, be determined at this time.

***FERC Matters***

*Transmission*

In December 1999, the Federal Energy Regulatory Commission (FERC) issued its final rule (Order 2000) on Regional Transmission Organizations (RTOs). Order 2000 encouraged utilities owning transmission systems to form RTOs on a voluntary basis. Through Southern Company, the Company worked with a number of utilities in the Southeast to develop a for-profit RTO known as SeTrans. In 2002, the sponsors of SeTrans established a Stakeholder Advisory Committee to provide input into the development of the RTO from other sectors of the electric industry, as well as consumers. During the development of SeTrans, state regulatory authorities expressed concern over certain aspects of the FERC's policies regarding RTOs. In December 2003, the SeTrans sponsors announced that they would suspend work on SeTrans because the regulated utility participants, including Southern Company's retail operating companies, had determined that it was highly unlikely to obtain support of both federal and state regulatory authorities. Any impact of the FERC's rule on the Company will depend on the regulatory reaction to the suspension of SeTrans and future developments, which cannot now be determined.

In July 2002, the FERC issued a notice of proposed rulemaking regarding open access transmission service and standard electricity market design. The proposal, if adopted, would among other things: (1) require transmission assets of jurisdictional utilities to be operated by an independent entity; (2) establish a standard market design; (3) establish a single type of transmission service that applies to all customers; (4) assert jurisdiction over the transmission component of bundled retail service; (5) establish a generation reserve margin; (6) establish bid caps for day ahead and spot energy markets; and (7) revise the FERC policy on the pricing of transmission expansions. Comments on the proposal were submitted by many interested parties, including Southern Company and the Company, and the FERC has indicated that it has revised certain aspects of the proposal in response to public comments. Proposed energy legislation would prohibit the FERC from issuing the final rule before October 31, 2006, and from making any final rule effective before December 31, 2006. That legislation has been approved by the House of Representatives but remains pending before the Senate. Passage of the legislation now appears in doubt. It is uncertain whether in the absence of legislation the FERC will move forward

with any part or all of the proposed rule. Any impact of this proposal on the Company will depend on the form in which the final rule may be ultimately adopted. However, the Company's financial statements could be adversely affected by changes in the transmission regulatory structure in its regional power market.

*Hydro Relicensing*

In 2002, the Company initiated the relicensing process for the Company's seven hydroelectric projects on the Coosa River (Weiss, Henry, Logan Martin, Lay, Mitchell, Jordan, and Bouldin) and the Smith and Bankhead Projects on the Warrior River. The FERC licenses for all of these nine projects expire in 2007. Upon or after the expiration of each license, the United States Government, by act of Congress, may take over the project or the FERC may relicense the project either to the original licensee or to a new licensee. The FERC may grant relicenses subject to certain requirements that could result in additional costs to the Company.

*Market-Based Rate Authority*

The Company has obtained FERC approval to sell power to nonaffiliates at market-based prices under specific contracts. Through SCS, as agent, the Company also has FERC authority to make short-term opportunity sales at market rates. Specific FERC approval must be obtained with respect to a market-based contract with an affiliate. In November 2001, the FERC modified the test it uses to consider utilities' applications to charge market-based rates and adopted a new test called the Supply Margin Assessment (SMA). The FERC applied the SMA to several utilities, including Southern Company's retail operating companies, and found them to be "pivotal suppliers" in their service areas and ordered the implementation of several mitigation measures. SCS, on behalf of the retail operating companies, sought rehearing of the FERC order, and the FERC delayed the implementation of certain mitigation measures. SCS, on behalf of the retail operating companies, submitted comments to the FERC in 2002 regarding these issues. In December 2003, the FERC issued a staff paper discussing alternatives and held a technical conference in January 2004. The Company anticipates that the FERC will address the requests for rehearing in the near future. Regardless of the outcome of the SMA proposal, the FERC retains the ability to modify or withdraw the authorization for any seller to sell at market-based rates, if it determines that the underlying conditions for having such authority are no longer applicable. The final outcome of this matter will depend on the form in which the SMA test and mitigation measures rules may be ultimately adopted and cannot be determined at this time.

***Other Matters***

In accordance with Financial Accounting Standards Board (FASB) Statement No. 87, Employers' Accounting for Pensions, the Company recorded non-cash pension income, before tax, of approximately $52 million, $56 million, and $57 million in 2003, 2002, and 2001, respectively. Future pension income is dependent on several factors including trust earnings and changes to the plan. The decline in pension income is expected to continue and become an expense as early as 2011. Postretirement benefit costs for the Company were $23 million, $23 million, and $21 million in 2003, 2002, and 2001, respectively, and are expected to continue to trend upward. A portion of pension income and postretirement benefit costs is capitalized based on construction-related labor charges. Pension income or expense and postretirement benefit costs are a component of the regulated rates and generally do not have a long-term effect on net income. For more information regarding pension and postretirement benefits, see Note 2 to the financial statements.

Prices for electricity provided by the Company to retail customers are set by the Alabama PSC under cost-based regulatory principles. Rates for the Company can be adjusted periodically within certain limitations based on earned retail rate of return compared with an allowed return range. Increases in retail rates of 2 percent were effective in both April 2002 and October 2001 in accordance with the Rate Stabilization Equalization plan.

The rates also provide for adjustments to recognize the placing of new generating facilities into retail service and the recovery of retail costs associated with certificated purchased power agreements (PPAs) under Rate CNP (Certificated New Plant). Effective July 2001, the Company's retail rates were adjusted by 0.6 percent under Rate CNP to recover costs for Plant Barry Unit 7, which was placed into commercial operation on May 1, 2001. Effective July 2003, the Company's retail rates were adjusted by approximately 2.6% under Rate CNP as a result of two new certificated PPAs that began in June 2003. See Note 3 to the financial statements under "Retail Rate Adjustment Procedures" for additional information.

On December 8, 2003, President Bush signed into law the Medicare Prescription Drug, Improvement and Modernization Act of 2003 (Medicare Act). The Medicare Act introduces a prescription drug benefit for Medicare-eligible retirees starting in 2006, as well as a federal subsidy to plan sponsors like the Company that provide prescription drug benefits. In accordance with FASB Staff Position No. 106-1, the Company has elected to defer recognizing the effects of the Medicare Act for its postretirement plans under FASB Statement No. 106, Employers' Accounting for Postretirement Benefits Other than Pension until authoritative guidance on accounting for the federal subsidy is issued or until a significant event occurs that would require remeasurement of the plans' assets and obligations. The Company anticipates that the benefits it pays after 2006 will be lower as a result of the Medicare Act; however, the retiree medical obligations and costs reported in Note 2 to the financial statements do not reflect these changes. The final accounting guidance could require changes to previously reported information.

Nuclear security legislation was recently introduced and considered in Congress both as a free-standing bill in the Senate and as a part of comprehensive energy legislation in a House-Senate Conference Report. Neither of the proposals has been enacted. The Nuclear Regulatory Commission (NRC) also ordered additional security measures for licensees in 2003. The Company is in the process of implementation and must be in full compliance with these orders by October 29, 2004. The requirements of the latest orders will have an impact on the Company's Plant Farley and will result in increased operation and maintenance expenses as well as additional capital expenditures. The precise impact of the new requirements will depend upon the details of the implementation of the new requirements, which have not been finalized.

The Company filed an application with the NRC in September 2003 to extend the operating license for Plant Farley for an additional 20 years. If approved by the NRC, the Company's depreciation and amortization expense could be reduced pending approval by the Alabama PSC.

The Company is involved in various matters being litigated and regulatory matters that could affect future earnings. See Note 3 to the financial statements for information regarding material issues.

## ACCOUNTING POLICIES

### Application of Critical Accounting Policies and Estimates

The Company prepares its financial statements in accordance with accounting principles generally accepted in the United States. Significant accounting policies are described in Note 1 to the financial statements. In the application of these policies, certain estimates are made that may have a material impact on the Company's results of operations and related disclosures. Different assumptions and measurements could produce estimates that are significantly different from those recorded in the financial statements. Senior management has discussed the development and selection of the critical accounting policies and estimates described below with the Controls and Compliance Committee of the Company's Board of Directors and the Audit Committee of Southern Company's Board of Directors.

#### *Electric Utility Regulation*

The Company is subject to retail regulation by the Alabama PSC and wholesale regulation by the FERC. These regulatory agencies set the rates the Company is permitted to charge customers based on allowable costs. As a result, the Company applies FASB Statement No. 71, Accounting for the Effects of Certain Types of Regulation. Through the ratemaking process, the regulators may require the inclusion of costs or revenues in periods different than when they would be recognized by a non-regulated company. This treatment may result in the deferral of expenses and the recording of related regulatory assets based on anticipated future recovery through rates or the deferral of gains or creation of liabilities and the recording of related regulatory liabilities. The application of Statement No. 71 has a further effect on the Company's financial statements as a result of the estimates of allowable costs used in the ratemaking process. These estimates may differ from those actually incurred by the Company; therefore, the accounting estimates inherent in specific costs such as depreciation, nuclear decommissioning, and pension and post-retirement benefits have less of a direct impact on the Company's results of operations than they would on a non-regulated company.

As reflected in Note 1 to the financial statements under "Regulatory Assets and Liabilities," significant regulatory assets and liabilities have been recorded. Management reviews the ultimate recoverability of

these regulatory assets and liabilities based on applicable regulatory guidelines. However, adverse legislation and judicial or regulatory actions could materially impact the amounts of such regulatory assets and liabilities and could adversely impact the Company's financial statements.

*Contingent Obligations*

The Company is subject to a number of federal and state laws and regulations, as well as other factors and conditions that potentially subject it to environmental, litigation, income tax, and other risks. See "Future Earnings Potential" and Note 3 to the financial statements for more information regarding certain of these contingencies. The Company periodically evaluates its exposure to such risks and records reserves for those matters where a loss is considered probable and reasonably estimable in accordance with generally accepted accounting principles. The adequacy of reserves can be significantly affected by external events or conditions that can be unpredictable; thus, the ultimate outcome of such matters could materially affect the Company's financial statements. These events or conditions include the following:

- Changes in existing state or federal regulation by governmental authorities having jurisdiction over air quality, water quality, control of toxic substances, hazardous and solid wastes, and other environmental matters.
- Changes in existing income tax regulations or changes in Internal Revenue Service interpretations of existing regulations.
- Identification of sites that require environmental remediation or the filing of other complaints in which the Company may be asserted to be a potentially responsible party.
- Identification and evaluation of other potential lawsuits or complaints in which the Company may be named as a defendant.
- Resolution or progression of existing matters through the legislative process, the court systems, or the EPA.

**New Accounting Standards**

Prior to January 2003, the Company accrued for the ultimate cost of retiring most long-lived assets over the life of the related asset through depreciation expense. FASB Statement No. 143, Accounting for Asset Retirement Obligations established new accounting and reporting standards for legal obligations associated with the ultimate cost of retiring long-lived assets. The present value of the ultimate costs of an asset's future retirement is recorded in the period in which the liability is incurred. The costs are capitalized as part of the related long-lived asset and depreciated over the asset's useful life. Additionally, non-regulated companies are no longer permitted to continue accruing future retirement costs for long-lived assets that they do not have a legal obligation to retire. For more information regarding the impact of adopting this standard effective January 1, 2003, see Note 1 to the financial statements under "Asset Retirement Obligations and Other Costs of Removal."

FASB Statement No. 149, Amendment of Statement 133 on Derivative Instruments and Hedging Activities, which further amends and clarifies the accounting and reporting for derivative instruments, became effective generally for financial instruments entered into or modified after June 30, 2003. Current interpretations of Statement No. 149 indicate that certain electricity forward transactions subject to unplanned netting -- including those typically referred to as "book outs" -- may only qualify as cash flow hedges if an entity can demonstrate that physical delivery or receipt of power occurred. The Company's forward electricity contracts continue to be exempt from fair value accounting requirements or to qualify as cash flow hedges, with the related gains and losses deferred in other comprehensive income. The implementation of Statement No. 149 did not have a material effect on the Company's financial statements.

In July 2003, the Emerging Issues Task Force (EITF) of FASB issued EITF No. 03-11, which became effective on October 1, 2003. The standard addresses the reporting of realized gains and losses on derivative instruments and is being interpreted to require book outs to be recorded on a net basis in operating revenues. Adoption of this standard did not have a material impact on the Company's financial statements.

FASB Interpretation No. 46, Consolidation of Variable Interest Entities, which was originally issued in January 2003, requires the primary beneficiary of a variable interest entity to consolidate the related assets and liabilities. In December 2003, the FASB revised Interpretation No. 46 and deferred the effective date until March 31, 2004 for interests held in variable interest entities other than special purpose entities.

Current analysis indicates that the trusts established by the Company to issue preferred securities are variable interest entities under Interpretation No. 46, and that the

Company is not the primary beneficiary of these trusts. If this conclusion is finalized, effective March 31, 2004, the trust assets and liabilities -- including the preferred securities issued by the trusts -- will be deconsolidated. The investments in the trusts and the loans from the trusts to the Company will be reflected as equity method investments and as long-term notes payable to affiliates, respectively, on the Balance Sheets. Based on December 31, 2003 values, this treatment would result in an increase of approximately $9 million to both total assets and total liabilities. See Note 6 to the financial statements under "Mandatorily Redeemable Preferred Securities" for additional information.

In May 2003, the FASB issued Statement No. 150, Accounting for Certain Financial Instruments with Characteristics of Both Liabilities and Equity, which requires classification of certain financial instruments within its scope, including shares that are mandatorily redeemable, as liabilities. Statement No. 150 was effective for financial instruments entered into or modified after May 31, 2003, and otherwise on July 1, 2003. In accordance with Statement No. 150, mandatorily redeemable preferred securities are reflected in the Balance Sheets as liabilities. The adoption of Statement No. 150 had no impact on the Statements of Income and Cash Flows.

## FINANCIAL CONDITION AND LIQUIDITY

### Overview

Over the last several years, the Company's financial condition has remained stable with emphasis on cost control measures combined with significantly lower cost of capital, achieved through the refinancing and/or redemption of higher-cost long-term debt and preferred stock. The Company operated at high levels of reliability while achieving industry-leading customer satisfaction levels and continuing to have retail prices below the national average.

The Company had gross property additions of $649 million in 2003. The majority of funds needed for gross property additions for the last several years have been provided from operating activities. The Statements of Cash Flows provide additional details.

The Company's ratio of common equity to total capitalization -- including short-term debt -- was 43.3 percent in 2003, 42.6 percent in 2002, and 42.8 percent in 2001. See Note 6 to the financial statements for additional information.

### Sources of Capital

The Company plans to obtain the funds required for construction and other purposes from sources similar to those used in the past, which were primarily from operating cash flows. However, the type and timing of any financings -- if needed -- will depend on market conditions and regulatory approval. In recent years, financings primarily have utilized unsecured debt and preferred securities.

The Company obtains financing separately without credit support from any affiliate. The Southern Company system does not maintain a centralized cash or money pool. Therefore, funds of the Company are not commingled with funds of any other company. In accordance with the Public Utility Holding Company Act, most loans between affiliated companies must be approved in advance by the Securities and Exchange Commission (SEC).

The Company's current liabilities exceed current assets because of securities due within one year. The Company intends to refinance debt that comes due during 2004.

To meet short-term cash needs and contingencies, the Company has various internal and external sources of liquidity. At the beginning of 2004, the Company had approximately $43 million of cash and cash equivalents and $865 million of unused credit arrangements with banks, as shown in the following table. In addition, the Company has substantial cash flow from operating activities and access to the capital markets, including commercial paper programs, to meet liquidity needs. Cash flows from operating activities were $1,118 million in 2003, $973 million in 2002, and $843 million in 2001.

At the beginning of 2004, bank credit arrangements are as follows:

| | | Expires | |
|---|---|---|---|
| Total | Unused | 2004 | 2005 & Beyond |
| | | (in millions) | |
| $865 | $865 | $865 | - |

Approximately $450 million of the credit facilities expiring in 2004 allow for the execution of term loans for an additional two-year period and $245 million allow for the execution for a one-year period. See Note 6 to the

financial statements under "Bank Credit Arrangements" for additional information.

The Company may also meet short-term cash needs through a Southern Company subsidiary organized to issue and sell commercial paper and extendible commercial notes at the request and for the benefit of the Company and the other Southern Company retail operating companies. Proceeds from such issuances for the benefit of the Company are loaned directly to the Company and are not commingled with proceeds from such issuances for the benefit of any other operating company. The obligations of each company under these arrangements are several; there is no cross affiliate credit support. At December 31, 2003, the Company had no commercial paper outstanding.

**Financing Activities**

In 2003, the Company's financing costs decreased due to lower interest rates despite the issuance of an increased amount of senior securities during the year. New issues during 2001 through 2003 totaled $3.3 billion and retirement or repayment of higher-cost securities totaled $2.8 billion.

Composite financing rates for long-term debt, preferred stock, and preferred securities for the years 2001 through 2003, as of year-end, were as follows:

| | **2003** | 2002 | 2001 |
|---|---|---|---|
| Long-term debt interest rate | **4.42%** | 5.05% | 5.72% |
| Preferred securities distribution rate | **5.25** | 5.25 | 6.96 |
| Preferred stock dividend rate | **5.10** | 5.17 | 4.79 |

Subsequent to December 31, 2003, the Company has entered into interest rate hedging transactions related to the anticipated refinancing of $470 million of securities due within one year. Also, an additional $300 million of securities have been issued for other general corporate purposes including repayment of outstanding short-term indebtedness and the funding of the Company's continuous construction program.

**Credit Rating Risk**

The Company does not have any credit agreements that would require material changes in payment schedules or terminations as a result of a credit rating downgrade. There are contracts that could require collateral -- but not accelerated payment -- in the event of a credit rating change to below investment grade. These contracts are primarily for physical electricity purchases and sales, fixed-price physical gas purchases, and agreements covering interest rate swaps. At December 31, 2003, the maximum potential collateral requirements under the electricity purchase and sale contracts were approximately $26.7 million. Generally, collateral may be provided for by a Company guaranty, a letter of credit, or cash. At December 31, 2003, there were no material collateral requirements for the gas purchase contracts or other financial instrument agreements.

**Market Price Risk**

Due to cost-based rate regulations, the Company has limited exposure to market volatility in interest rates, commodity fuel prices, and prices of electricity. To manage the volatility attributable to these exposures, the Company nets the exposures to take advantage of natural offsets and enters into various derivative transactions for the remaining exposures pursuant to the Company's policies in areas such as counterparty exposure and hedging practices. Company policy is that derivatives are to be used primarily for hedging purposes. Derivative positions are monitored using techniques that include market valuation and sensitivity analysis.

To mitigate exposure to interest rates, the Company has entered into interest rate swaps that have been designated as hedges. The weighted average interest rate on outstanding variable long-term debt, that has not been hedged at December 31, 2003 was 1.38 percent. If the Company sustained a 100 basis point change in interest rates for all unhedged variable rate long-term debt, the change would affect annualized interest expense by approximately $0.5 million at December 31, 2003. The Company is not aware of any facts or circumstances that would significantly affect such exposures in the near term. For further information, see Notes 1 and 6 to the financial statements under "Financial Instruments."

To mitigate residual risks relative to movements in electricity prices, the Company enters into fixed price contracts for the purchase and sale of electricity through the wholesale electricity market, and, to a lesser extent, into similar contracts for gas purchases.

In addition, in October 2001, the Alabama PSC approved a revision to the Company's Rate ECR (Energy Cost Recovery) allowing the recovery of specific costs associated with the sales of natural gas that become necessary due to operating considerations at its electric

generating facilities. This revision also includes the cost of financial instruments used for hedging market price risk up to 75 percent of the budgeted annual amount of natural gas purchases. The Company may not engage in natural gas hedging activities that extend beyond a rolling 42-month window. Also, the premiums paid for natural gas financial options may not exceed 5 percent of the Company's natural gas budget for that year.

At December 31, 2003, exposure from these activities was not material to the Company's financial position, results of operations, or cash flows. The changes in fair value of derivative energy contracts and year-end valuations were as follows:

| | Changes in Fair Value | |
|---|---|---|
| | **2003** | 2002 |
| | (in thousands) | |
| Contracts beginning of year | **$ 21,402** | $ 214 |
| Contracts realized or settled | **(38,809)** | (21,088) |
| New contracts at inception | **-** | - |
| Changes in valuation techniques | **-** | - |
| Current period changes | **23,820** | 42,276 |
| Contracts end of year | **$ 6,413** | $ 21,402 |

| | Source of 2003 Year-End Valuation Prices | | |
|---|---|---|---|
| | Total | Maturity | |
| | Fair Value | 2004 | 2005-2006 |
| | (in thousands) | | |
| Actively quoted | **$6,413** | **$7,803** | **$(1,390)** |
| External sources | **-** | **-** | **-** |
| Models and other methods | **-** | **-** | **-** |
| Contracts end of Year | **$6,413** | **$7,803** | **$(1,390)** |

Unrealized gains and losses from mark to market adjustments on derivative contracts related to the Company's fuel hedging programs are recorded as regulatory assets and liabilities. Realized gains and losses from these programs are included in fuel expense and are recovered through the Company's fuel cost recovery clause. Gains and losses on derivative contracts that are not designated as hedges are recognized in the income statement as incurred. At December 31, 2003, the fair value of derivative energy contracts was reflected in the financial statements as follows:

| | Amounts |
|---|---|
| | (in thousands) |
| Regulatory liabilities, net | **$6,402** |
| Net income | **11** |
| Total fair value | **$6,413** |

Unrealized pre-tax gains (losses) on energy contracts of $(0.1) million, $(2.0) million, and $2.0 million were recognized in income in 2003, 2002, and 2001, respectively. The Company is exposed to market price risk in the event of nonperformance by counterparties to the derivative energy contracts. The Company's policy is to enter into agreements with counterparties that have investment grade credit ratings by Moody's and Standard & Poor's or with counterparties who have posted collateral to cover potential credit exposure. Therefore, the Company does not anticipate market risk exposure from nonperformance by the counterparties. For additional information, see Notes 1 and 6 to the financial statements under "Financial Instruments."

**Capital Requirements and Contractual Obligations**

The construction program of the Company is currently estimated to be $791 million for 2004, $863 million for 2005, and $884 million for 2006. Over the next three years, the Company estimates spending $713 million on environmental related additions (including $358 million on Selective Catalytic Reduction facilities), $267 million on Plant Farley (including $155 million for nuclear fuel, $29 million on cooling towers and $26 million on replacing reactor vessel heads), $701 million on distribution facilities, and $402 million on transmission additions. See Note 7 to the financial statements under "Construction Program" for additional details.

Actual construction costs may vary from this estimate because of changes in such factors as: business conditions; environmental regulations; nuclear plant regulations; FERC rules and transmission regulations; load projections; the cost and efficiency of construction labor, equipment, and materials; and the cost of capital. In addition, there can be no assurance that costs related to capital expenditures will be fully recovered.

In addition to the funds required for the Company's construction program, approximately $1.5 billion will be required by the end of 2006 for maturities of long-term debt. The Company plans to continue, when economically feasible, to retire higher cost debt, preferred securities, and preferred stock and replace these obligations with lower-cost capital if market conditions permit.

As a result of requirements by the NRC, the Company has established external trust funds for the purpose of funding nuclear decommissioning costs. Annual provisions for nuclear decommissioning are based on an

annuity method as approved by the Alabama PSC. The amount expensed in 2003 was $18 million. For additional information, see Note 1 to the financial statements under "Nuclear Decommissioning." Additionally, as discussed in Note 1 to the financial statements under "Revenues and Fuel Costs," in 1993, the DOE implemented a special assessment over a 15-year period on utilities with nuclear plants to be used for the decontamination and decommissioning of its nuclear fuel enrichment facilities.

In 1994, the Company also established an external trust fund for postretirement benefits as ordered by the Alabama PSC. The cumulative effect of funding these items over a long period will diminish internally funded capital and may require capital from other sources. For additional information, see Note 2 to the financial statements under "Postretirement Benefits."

The capital requirements, lease obligations, purchase commitments, and trust requirements – discussed above and in the financial statements – are summarized as follows: (See Notes 1, 6, and 7 to the financial statements for additional information.)

| | 2004 | 2005-2006 | 2007-2008 | After 2008 | Total |
|---|---|---|---|---|---|
| | | | (in millions) | | |
| Long-term debt and preferred securities[(a)] -- | | | | | |
| Principal | $ 526.0 | $ 940.5 | $ 610.0 | $2,135.1 | $ 4,211.6 |
| Interest and distributions | 188.8 | 302.5 | 241.9 | 2,048.0 | 2,781.2 |
| Preferred stock dividends[(b)] | 19.0 | 38.0 | 38.0 | - | 95.0 |
| Operating leases | 29.7 | 42.7 | 13.5 | 35.2 | 121.1 |
| Purchase commitments[(c)] -- | | | | | |
| Capital[(d)] | 778.0 | 1,729.1 | - | - | 2,507.1 |
| Coal and nuclear fuel | 750.4 | 951.0 | 582.7 | - | 2,284.1 |
| Natural gas[(e)] | 318.3 | 338.5 | 133.1 | 107.7 | 897.6 |
| Purchased power | 85.0 | 175.0 | 178.0 | 129.0 | 567.0 |
| Long-term service agreements | 18.3 | 17.8 | 57.6 | 119.2 | 212.9 |
| Trusts -- | | | | | |
| Nuclear decommissioning | 20.3 | 40.6 | 40.6 | 222.5 | 324.0 |
| Postretirement benefits[(f)] | 4.2 | 48.5 | - | - | 52.7 |
| DOE assessments | 4.4 | 8.7 | - | - | 13.1 |
| Total | $2,742.4 | $4,632.9 | $1,895.4 | $4,796.7 | $14,067.4 |

(a) All amounts are reflected based on final maturity dates. The Company will continue to retire higher-cost securities and replace these obligations with lower-cost capital if market conditions permit. Variable rate interest obligations are estimated based on rates as of January 1, 2004, as reflected in the Statements of Capitalization.

(b) Preferred stock does not mature; therefore, amounts are provided for the next five years only.

(c) The Company generally does not enter into non-cancelable commitments for other operation and maintenance expenditures. Total other operation and maintenance expenses for the last three years were $921 million, $854 million, and $784 million, respectively.

(d) The Company forecasts capital expenditures over a three-year period. Amounts represent current estimates of total expenditures excluding those amounts related to contractual purchase commitments for uranium and nuclear fuel conversion, enrichment, and fabrication services. At December 31, 2003, significant purchase commitments were outstanding in connection with the construction program.

(e) Natural gas purchase commitments are based on various indices at the time of delivery. Amounts reflected have been estimated based on the New York Mercantile future prices at December 31, 2003.

(f) The Company forecasts post-retirement trust contributions over a three-year period. No contributions related to the Company's pension trust are currently expected during this period. See Note 2 to the financial statements for additional information related to the pension plan.

## Cautionary Statement Regarding Forward-Looking Information

The Company's 2003 Annual Report includes forward-looking statements in addition to historical information. Forward-looking information includes, among other things, statements concerning the Company's estimated construction and other expenditures, and the Company's projections for energy sales and its goals for future generating capacity and earnings growth. In some cases, forward-looking statements can be identified by terminology such as "may," "will," "could," "should," "expects," "plans," "anticipates," "believes," "estimates," "projects," "predicts," "potential," or "continue" or the negative of these terms or other comparable terminology. The Company cautions that there are various important factors that could cause actual results to differ materially from those indicated in the forward-looking statements; accordingly, there can be no assurance that such indicated results will be realized. These factors include:

- the impact of recent and future federal and state regulatory change, including legislative and regulatory initiatives regarding deregulation and restructuring of the electric utility industry and also changes in environmental, tax, and other laws and regulations to which the Company is subject, as well as changes in application of existing laws and regulations;
- current and future litigation, regulatory investigations, proceedings or inquiries, including the pending EPA civil action against the Company;
- the effects, extent, and timing of the entry of additional competition in the markets in which the Company operates;
- the impact of fluctuations in commodity prices, interest rates, and customer demand;
- available sources and costs of fuels;
- ability to control costs;
- investment performance of the Company's employee benefit plans;
- advances in technology;
- state and federal rate regulations and pending and future rate cases and negotiations;
- effects of and changes in political, legal, and economic conditions and developments in the United States, including the current soft economy;
- internal restructuring or other restructuring options that may be pursued;
- potential business strategies, including acquisitions or dispositions of assets, which cannot be assured to be completed or beneficial to the Company;
- the ability of counterparties of the Company to make payments as and when due;
- the ability to obtain new short- and long-term contracts with neighboring utilities;
- the direct or indirect effects on the Company's business resulting from the terrorist incidents on September 11, 2001, or any similar incidents or responses to such incidents;
- financial market conditions and the results of financing efforts, including the Company's credit ratings;
- the ability of the Company to obtain additional generating capacity at competitive prices;
- weather and other natural phenomena;
- the direct or indirect effects on the Company's business resulting from the August 2003 power outage in the Northeast, or any similar incidents;
- the effect of accounting pronouncements issued periodically by standard-setting bodies; and
- other factors discussed elsewhere herein and in other reports (including the Form 10-K) filed from time to time by the Company with the SEC.

The accompanying notes are an integral part of these financial statements.

## 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

### General

Alabama Power Company (the Company) is a wholly owned subsidiary of Southern Company, which is the parent company of five retail operating companies, Southern Power Company (Southern Power), Southern Company Services (SCS), Southern Communications Services (Southern LINC), Southern Company Gas (Southern Company GAS), Southern Company Holdings (Southern Holdings), Southern Nuclear Operating Company (Southern Nuclear), Southern Telecom, and other direct and indirect subsidiaries. The retail operating companies -- the Company, Georgia Power Company, Gulf Power Company, Mississippi Power Company, and Savannah Electric and Power Company -- provide electric service in four Southeastern states. The Company operates as a vertically integrated utility providing electricity to retail customers within its traditional service area located within the State of Alabama and to wholesale customers in the Southeast. Southern Power constructs, owns, and manages Southern Company's competitive generation assets and sells electricity at market-based rates in the wholesale market. Contracts among the retail operating companies and Southern Power -- related to jointly-owned generating facilities, interconnecting transmission lines, or the exchange of electric power -- are regulated by the Federal Energy Regulatory Commission (FERC) and/or the Securities and Exchange Commission (SEC). SCS -- the system service company -- provides, at cost, specialized services to Southern Company and its subsidiary companies. Southern LINC provides digital wireless communications services to the retail operating companies and also markets these services to the public within the Southeast. Southern Telecom provides fiber cable services within the Southeast. Southern Company GAS is a competitive retail natural gas marketer serving customers in Georgia. Southern Holdings is an intermediate holding subsidiary for Southern Company's investments in synthetic fuels and leveraged leases and an energy services business. Southern Nuclear operates and provides services to Southern Company's nuclear power plants, including the Company's Plant Farley.

Southern Company is registered as a holding company under the Public Utility Holding Company Act of 1935 (PUHCA). Both Southern Company and its subsidiaries are subject to the regulatory provisions of the PUHCA. The Company is also subject to regulation by the FERC and the Alabama Public Service Commission (Alabama PSC). The Company follows accounting principles generally accepted in the United States and complies with the accounting policies and practices prescribed by its regulatory commissions. The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires the use of estimates, and the actual results may differ from those estimates.

Certain prior years' data presented in the financial statements have been reclassified to conform with current year presentation.

### Affiliate Transactions

The Company has an agreement with SCS under which the following services are rendered to the Company at direct or allocated cost: general and design engineering, purchasing, accounting and statistical analysis, finance and treasury, tax, information resources, marketing, auditing, insurance and pension administration, human resources, systems and procedures, and other services with respect to business and operations and power pool transactions. Costs for these services amounted to $218 million, $218 million, and $183 million during 2003, 2002, and 2001, respectively. Cost allocation methodologies used by SCS are approved by the SEC and management believes they are reasonable.

The Company has an agreement with Southern Nuclear to operate Plant Farley and provide the following nuclear-related services at cost: general executive and advisory services, general operations, management and technical services, administrative services including procurement, accounting, statistical analysis, employee relations, and other services with respect to business and operations. Costs for these services amounted to $153 million, $154 million, and $160 million during 2003, 2002, and 2001, respectively.

The Company has an agreement with Mississippi Power under which Mississippi Power owns a portion of Plant Greene County. The Company operates Plant Greene County, and Mississippi Power reimburses the Company for its proportionate share of expenses which were $6.7 million in 2003, $6.4 million in 2002, and $5.5 million in 2001. See Note 4 for additional information.

Southern Company holds a 30 percent ownership interest in Alabama Fuel Products, LLC (AFP), which produces synthetic fuel. The Company has an agreement with an indirect subsidiary of Southern Company that provides services for AFP. Under this agreement, the Company provides certain accounting functions, including

processing and paying fuel transportation invoices, and the Company is reimbursed for its expenses. Amounts billed under this agreement totaled approximately $27.5 million and $34.5 million in 2003 and 2002, respectively. In addition, the Company purchases synthetic fuel from AFP for use at several of the Company's plants. Fuel purchases for 2003 and 2002 totaled $209.2 million and $211.0 million, respectively.

In 2001, the Company had under construction a 1,230 megawatt combined cycle facility in Autaugaville, Alabama (Plant Harris). In June 2001, the Company sold this project to Southern Power. Upon the plant becoming operational in June 2003, the Company entered into an agreement with Southern Power to operate and maintain Plant Harris at cost and provide fuel at cost. In 2003, the Company billed Southern Power $0.8 million for operation and maintenance. Purchased power costs from Plant Harris in 2003 totaled $75.6 million. Additionally, the Company recorded $8.3 million of prepaid capacity expenses included in Other Deferred Charges and Other Assets on the Balance Sheets at December 31, 2003. See Note 3 under "Retail Rate Adjustment Procedures" and Note 7 under "Purchased Power Commitments" for additional information.

Also, see Note 4 for information regarding the Company's ownership in and purchased power agreement with Southern Electric Generating Company (SEGCO).

The retail operating companies, including the Company, Southern Power, and Southern Company GAS, jointly enter into various types of wholesale energy, natural gas, and certain other contracts, either directly or through SCS as agent. Each participating company may be jointly and severally liable for the obligations incurred under these agreements.

**Revenues and Fuel Costs**

Capacity revenues are generally recognized on a levelized basis over the appropriate contract periods. Energy and other revenues are recognized as services are provided. Unbilled revenues are accrued at the end of each fiscal period. Fuel costs are expensed as the fuel is used. Electric rates for the Company include provisions to adjust billings for fluctuations in fuel costs, fuel hedging, the energy component of purchased power costs, and certain other costs. Revenues are adjusted for differences between recoverable fuel costs and amounts actually recovered in current regulated rates.

The Company has a diversified base of customers. No single customer or industry comprises 10 percent or more of revenues. For all periods presented, uncollectible accounts continued to average less than 1 percent of revenues.

Fuel expense includes the amortization of the cost of nuclear fuel and a charge based on nuclear generation for the permanent disposal of spent nuclear fuel. Total charges for nuclear fuel included in fuel expense amounted to $64 million in 2003, $63 million in 2002, and $58 million in 2001. The Company has a contract with the U.S. Department of Energy (DOE) that provides for the permanent disposal of spent nuclear fuel. The DOE failed to begin disposing of spent fuel in January 1998 as required by the contract, and the Company is pursuing legal remedies against the government for breach of contract. Sufficient pool storage capacity for spent fuel is available at Plant Farley to maintain full-core discharge capability until the refueling outage scheduled in 2006 for Plant Farley Unit 1 and the refueling outage scheduled in 2008 for Plant Farley Unit 2. Procurement of on-site dry spent fuel storage capacity at Plant Farley is in progress and scheduled for operation in 2005. See Note 7 under "Construction Program" for additional information.

Also, the Energy Policy Act of 1992 required the establishment of a Uranium Enrichment Decontamination and Decommissioning Fund, which is funded in part by a special assessment on utilities with nuclear plants. This assessment is being paid over a 15-year period, which began in 1993. This fund will be used by the DOE for the decontamination and decommissioning of its nuclear fuel enrichment facilities. The law provides that utilities will recover these payments in the same manner as any other fuel expense. The Company estimates its remaining liability under this law to be approximately $13 million at December 31, 2003.

**Income Taxes**

The Company uses the liability method of accounting for deferred income taxes and provides deferred income taxes for all significant income tax temporary differences. Investment tax credits utilized are deferred and amortized to income over the average lives of the related property.

**Regulatory Assets and Liabilities**

The Company is subject to the provisions of Financial Accounting Standards Board (FASB) Statement No. 71, Accounting for the Effects of Certain Types of Regulation. Regulatory assets represent probable future

revenues associated with certain costs that are expected to be recovered from customers through the ratemaking process. Regulatory liabilities represent probable future reductions in revenues associated with amounts that are expected to be credited to customers through the ratemaking process.

Regulatory assets and (liabilities) reflected in the Balance Sheets at December 31 relate to:

| | 2003 | 2002 | Note |
|---|---|---|---|
| | (in millions) | | |
| Deferred income tax charges | $ 321 | $ 327 | (a) |
| Loss on reacquired debt | 111 | 104 | (b) |
| DOE assessments | 13 | 17 | (c) |
| Vacation pay | 36 | 34 | (d) |
| Rate CNP under recovery | 17 | - | (e) |
| Other assets | 13 | 17 | (e) |
| Asset retirement obligations | (127) | - | (a) |
| Other cost of removal obligations | (574) | (885) | (a) |
| Deferred income tax credits | (162) | (177) | (a) |
| Natural disaster reserve | (13) | (12) | (e) |
| Nuclear outage | (14) | (10) | (e) |
| Deferred purchased power | (15) | - | (e) |
| Other liabilities | (5) | (2) | (e) |
| Fuel-hedging liabilities | (6) | (21) | (f) |
| Mine reclamation & remediation | (33) | (35) | (g) |
| Total | $(438) | $(643) | |

Note: The recovery and amortization periods for these regulatory assets and (liabilities) are as follows:

(a) Asset retirement and removal liabilities are recorded, deferred income tax assets are recovered, and deferred tax liabilities are amortized over the related property lives, which may range up to 50 years. Asset retirement and removal liabilities will be settled and trued up following completion of the related activities.

(b) Recovered over the remaining life of the original issue which may range up to 40 years.

(c) Assessments for the decontamination and decommissioning of the DOE nuclear fuel enrichment facilities are recorded annually from 1993 through 2008.

(d) Recorded as earned by employees and recovered as paid, generally within one year.

(e) Recorded and recovered or amortized as approved by the Alabama PSC.

(f) Fuel-hedging assets and liabilities are recorded over the life of the underlying hedged purchase contracts, which generally do not exceed two years. Upon final settlement, actual costs incurred are recovered through the fuel cost recovery clauses.

(g) Recovered from customers to settle future costs.

In the event that a portion of the Company's operations is no longer subject to the provisions of FASB Statement No. 71, the Company would be required to write off related regulatory assets and liabilities that are not specifically recoverable through regulated rates. In addition, the Company would be required to determine if any impairment to other assets exists, including plant, and write down the assets, if impaired, to their fair values. All regulatory assets and liabilities are reflected in rates.

**Depreciation and Amortization**

Depreciation of the original cost of depreciable utility plant in service is provided primarily by using composite straight-line rates, which approximated 3.1 percent in 2003 and 3.2 percent in each of 2002 and 2001. When property subject to depreciation is retired or otherwise disposed of in the normal course of business, its original cost -- together with the cost of removal, less salvage -- is charged to accumulated depreciation. Minor items of property included in the original cost of the plant are retired when the related property unit is retired.

**Asset Retirement Obligations and Other Costs of Removal**

In accordance with regulatory requirements, prior to January 2003, the Company followed the industry practice of accruing for the ultimate costs of retiring most long-lived assets over the life of the related asset as part of the annual depreciation expense provision. In accordance with SEC requirements, such amounts are reflected on the Balance Sheet as regulatory liabilities. Effective January 1, 2003, the Company adopted FASB Statement No. 143, Accounting for Asset Retirement Obligations. Statement No. 143 establishes new accounting and reporting standards for legal obligations associated with the ultimate costs of retiring long-lived assets. The present value of the ultimate costs of an asset's future retirement must be recorded in the period in which the liability is incurred. The costs must be capitalized as part of the related long-lived asset and depreciated over the asset's useful life. Additionally, Statement No. 143 does not permit the continued accrual of future retirement costs for long-lived assets that the Company does not have a legal obligation to retire. However, the Company has received guidance regarding accounting for the financial statement impacts of Statement No. 143 from the Alabama PSC and will continue to recognize the accumulated removal costs for other obligations as a regulatory liability. Therefore, the Company had no cumulative effect to net income resulting from the adoption of Statement No. 143.

The liability recognized to retire long-lived assets primarily relates to the Company's nuclear facility, Plant Farley. The fair value of assets legally restricted for settling retirement obligations related to nuclear facilities as of December 31, 2003 was $385 million. In addition, the Company has retirement obligations

related to various landfill sites and underground storage tanks. The Company has also identified retirement obligations related to certain transmission and distribution facilities, co-generation facilities, certain wireless communication towers, and certain structures authorized by the United States Army Corps of Engineers. However, a liability for the removal of these assets will not be recorded because no reasonable estimate can be made regarding the timing of any related retirements. The Company will continue to recognize in the income statement allowed removal costs in accordance with its regulatory treatment. Any difference between costs recognized under Statement No. 143 and those reflected in rates are recognized as either a regulatory asset or liability, as ordered by the Alabama PSC, and are reflected in the Balance Sheets. The Company also revised the estimated cost to retire Plant Farley as a result of a new site-specific decommissioning study. The effect of the revision is an increase of $35 million included in asset retirement obligations, with a corresponding increase in property, plant, and equipment. See "Nuclear Decommissioning" for further information on amounts included in rates.

Details of the asset retirement obligations included in the Balance Sheets are as follows:

| | 2003 |
|---|---|
| | (in millions) |
| Balance beginning of year | $ - |
| Liabilities incurred | 301 |
| Liabilities settled | - |
| Accretion | 23 |
| Cash flow revisions | 35 |
| Balance end of year | $ 359 |

If Statement No. 143 had been adopted on January 1, 2002, the pro-forma asset retirement obligations would have been $281 million.

**Nuclear Decommissioning**

The Nuclear Regulatory Commission (NRC) requires all licensees operating commercial nuclear power reactors to establish a plan for providing with reasonable assurance funds for decommissioning. The Company has established external trust funds to comply with the NRC's regulations. The funds set aside for decommissioning are managed and invested in accordance with applicable requirements of various regulatory bodies, including the NRC, the FERC, and the Alabama PSC, as well as the Internal Revenue Service (IRS). Funds are invested in a tax efficient manner in a diversified mix of equity and fixed income securities. Equity securities typically range from 50 to 75 percent of the funds and fixed income securities from 25 to 50 percent. Amounts previously recorded in internal reserves are being transferred into the external trust funds over periods approved by the Alabama PSC. The NRC's minimum external funding requirements are based on a generic estimate of the cost to decommission the radioactive portions of a nuclear unit based on the size and type of reactor. The Company has filed plans with the NRC to ensure that -- over time -- the deposits and earnings of the external trust funds will provide the minimum funding amounts prescribed by the NRC.

Site study cost is the estimate to decommission the facility as of the site study year. The estimated costs of decommissioning, based on the most current study as of December 31, 2003, for Plant Farley were as follows:

| | |
|---|---|
| Site study year | 2003 |
| Decommissioning periods: | |
| Beginning year | 2017 |
| Completion year | 2046 |
| | (in millions) |
| Site study costs: | |
| Radiated structures | $892 |
| Non-radiated structures | 63 |
| Total | $955 |
| Significant assumptions: | |
| Inflation rate | 4.5% |
| Trust earning rate | 7.0 |

The decommissioning cost estimates are based on prompt dismantlement and removal of the plant from service. The actual decommissioning costs may vary from the above estimates because of changes in the assumed date of decommissioning, changes in NRC requirements, or changes in the assumptions used in making estimates.

Annual provisions for nuclear decommissioning are based on an annuity method as approved by the Alabama PSC. The amount expensed in 2003 and fund balances were as follows:

| | (in millions) |
|---|---|
| **Amount expensed in 2003** | **$ 18** |
| Accumulated provisions: | |
| External trust funds, at fair value | $385 |
| Internal reserves | 31 |
| Total | $416 |

All of the Company's decommissioning costs for ratemaking are based on the site study. The Company expects the Alabama PSC to periodically review and

adjust, if necessary, the amounts collected in rates for the anticipated cost of decommissioning.

The Company filed an application with the NRC in September 2003 to extend the operating license for Plant Farley for an additional 20 years.

**Allowance for Funds Used During Construction (AFUDC) and Interest Capitalized**

In accordance with regulatory treatment, the Company records AFUDC. AFUDC represents the estimated debt and equity costs of capital funds that are necessary to finance the construction of new regulated facilities. While cash is not realized currently from such allowance, it increases the revenue requirement over the service life of the plant through a higher rate base and higher depreciation expense. Interest related to the construction of new facilities not included in the Company's regulated rates is capitalized in accordance with standard interest capitalization requirements. All current construction costs should be included in retail rates. The composite rate used to determine the amount of AFUDC was 9.0 percent in 2003, 8.2 percent in 2002, and 7.7 percent in 2001. AFUDC and interest capitalized, net of income tax, as a percent of net income after dividends on preferred stock was 3.5 percent in 2003 and 3.3 percent in each of 2002 and 2001.

**Property, Plant, and Equipment**

Property, plant, and equipment is stated at original cost less regulatory disallowances and impairments. Original cost includes: materials; labor; minor items of property; appropriate administrative and general costs; payroll-related costs such as taxes, pensions, and other benefits; and the interest capitalized and/or cost of funds used during construction.

The cost of replacements of property -- exclusive of minor items of property -- is capitalized. The cost of maintenance, repairs and replacement of minor items of property is charged to maintenance expense as incurred or performed with the exception of nuclear refueling costs, which are recorded in accordance with specific Alabama PSC orders. The Company accrues estimated refueling costs in advance of the unit's next refueling outage. The refueling cycle is 18 months for each unit. During 2003, the Company accrued $28.5 million to the nuclear refueling outage reserve and at December 31, 2003 the reserve balance was $14.0 million.

**Impairment of Long-Lived Assets and Intangibles**

The Company evaluates long-lived assets for impairment when events or changes in circumstances indicate that the carrying value of such assets may not be recoverable. The determination of whether an impairment has occurred is based on either a specific regulatory disallowance or an estimate of undiscounted future cash flows attributable to the assets, as compared with the carrying value of the assets. If an impairment has occurred, the amount of the impairment recognized is determined either by the amount of the regulatory disallowance or by estimating the fair value of the assets and recording a provision for loss if the carrying value is greater than the fair value. For assets identified as held for sale, the carrying value is compared to the estimated fair value less the cost to sell in order to determine if an impairment provision is required. Until the assets are disposed of, their estimated fair value is re-evaluated when circumstances or events change.

**Cash and Cash Equivalents**

For purposes of the financial statements, temporary cash investments are considered cash equivalents. Temporary cash investments are securities with original maturities of 90 days or less.

**Materials and Supplies**

Generally, materials and supplies include the cost of transmission, distribution, and generating plant materials. Materials are charged to inventory when purchased and then expensed or capitalized to plant, as appropriate, when installed.

**Natural Disaster Reserve**

In accordance with an Alabama PSC order, the Company has established a Natural Disaster Reserve. The Company is allowed to accrue $250 thousand per month until the maximum accumulated provision of $32 million is attained. Higher accruals to restore the reserve to its authorized level are allowed whenever the balance in the reserve declines below $22.4 million. During 2003, the Company accrued $3 million to the reserve and at December 31, 2003, the reserve balance was $12.6 million.

**Stock Options**

Southern Company provides non-qualified stock options to a large segment of the Company's employees ranging from line management to executives. The Company accounts for its stock-based compensation plans in accordance with Accounting Principles Board Opinion No. 25.

Accordingly, no compensation expense has been recognized because the exercise price of all options granted equaled the fair-market value on the date of grant. When options are exercised, the Company receives a capital contribution from Southern Company equivalent to the related income tax benefit.

**Financial Instruments**

The Company uses derivative financial instruments to limit exposure to fluctuations in interest rates, the prices of certain fuel purchases, and electricity purchases and sales. All derivative financial instruments are recognized as either assets or liabilities and are measured at fair value. Substantially all of the Company's bulk energy purchases and sales contracts that meet the definition of a derivative are exempt from fair value accounting requirements and are accounted for under the accrual method. Other derivative contracts qualify as cash flow hedges of anticipated transactions. This results in the deferral of related gains and losses in other comprehensive income or regulatory assets or liabilities as appropriate until the hedged transactions occur. Any ineffectiveness is recognized currently in net income. Other derivative contracts are marked to market through current period income and are recorded on a net basis in the Statements of Income.

The Company is exposed to losses related to financial instruments in the event of counterparties' nonperformance. The Company has established controls to determine and monitor the creditworthiness of counterparties in order to mitigate the Company's exposure to counterparty credit risk.

The Company's other financial instruments for which the carrying amount did not equal fair value at December 31 were as follows:

| | Carrying Amount | Fair Value |
|---|---|---|
| | (in millions) | |
| Long-term debt: | | |
| **At December 31, 2003** | **$3,903** | **$3,958** |
| At December 31, 2002 | 3,991 | 4,065 |
| Preferred Securities: | | |
| **At December 31, 2003** | **300** | **305** |
| At December 31, 2002 | 300 | 303 |

The fair value for long-term debt and preferred securities was based on either closing market prices or closing prices of comparable instruments.

**Comprehensive Income**

The objective of comprehensive income is to report a measure of all changes in common stock equity of an enterprise that result from transactions and other economic events of the period other than transactions with owners. Comprehensive income consists of net income and changes in the fair value of qualifying cash flow hedges and changes in additional minimum pension liabilities, less income taxes and reclassifications for amounts included in net income.

## 2. RETIREMENT BENEFITS

The Company has a defined benefit, trusteed, pension plan covering substantially all employees. The plan is funded in accordance with Employee Retirement Income Security Act (ERISA) requirements. The Company also provides certain non-qualified benefit plans for a selected group of management and highly-compensated employees. Benefits under these non-qualified plans are funded on a cash basis. In addition, the Company provides certain medical care and life insurance benefits for retired employees. The Company funds trusts to the extent required by the Alabama PSC. For the year ended December 31, 2004, postretirement benefit contributions are expected to total approximately $4.2 million.

The measurement date for plan assets and obligations is September 30 for each year. In 2002, the Company adopted several plan changes that had the effect of increasing benefits to both current and future retirees.

**Pension Plans**

The accumulated benefit obligation for the pension plans was $1.20 billion in 2003 and $1.09 billion in 2002. Changes during the year in the projected benefit obligations, accumulated benefit obligations, and fair value of plan assets were as follows:

| | Projected Benefit Obligations | |
|---|---|---|
| | **2003** | 2002 |
| | (in millions) | |
| Balance at beginning of year | **$1,088** | $1,011 |
| Service cost | **27** | 26 |
| Interest cost | **68** | 74 |
| Benefits paid | **(61)** | (61) |
| Plan amendments | **3** | 22 |
| Actuarial (gain) loss | **75** | 16 |
| Balance at end of year | **$1,200** | $1,088 |

| | Plan Assets | |
|---|---|---|
| | **2003** | 2002 |
| | (in millions) | |
| Balance at beginning of year | **$1,419** | $1,584 |
| Actual return on plan assets | **226** | (106) |
| Benefits paid | **(62)** | (59) |
| Balance at end of year | **$1,583** | $1,419 |

Pension plan assets are managed and invested in accordance with all applicable requirements, including ERISA and the IRS revenue code. The Company's investment policy covers a diversified mix of assets, including equity and fixed income securities, real estate, and private equity, as described in the table below. Derivative instruments are used primarily as hedging tools but may also be used to gain efficient exposure to the various asset classes. The Company primarily minimizes the risk of large losses through diversification but also monitors and manages other aspects of risk.

| | | Plan Assets | |
|---|---|---|---|
| | Target | **2003** | 2002 |
| Domestic equity | 37% | **37%** | 35% |
| International equity | 20 | **20** | 18 |
| Global fixed income | 26 | **24** | 25 |
| Real estate | 10 | **11** | 12 |
| Private equity | 7 | **8** | 10 |
| Total | 100% | **100%** | 100% |

The accrued pension costs recognized in the Balance Sheets were as follows:

| | **2003** | 2002 |
|---|---|---|
| | (in millions) | |
| Funded status | **$383** | $331 |
| Unrecognized transition amount | **(5)** | (10) |
| Unrecognized prior service cost | **87** | 93 |
| Unrecognized net (gain) loss | **(37)** | (40) |
| Prepaid pension asset, net | **428** | 374 |
| Portion included in benefit obligations | **18** | 16 |
| Total prepaid assets recognized in the Balance Sheets | **$446** | $390 |

In 2003 and 2002, amounts recognized in the Balance Sheets for accumulated other comprehensive income and intangible assets to record the minimum pension liability related to the non-qualified plans were $12.8 million and $6.7 million and $6.7 and $4.8 million, respectively.

Components of the pension plans' net periodic cost were as follows:

| | **2003** | 2002 | 2001 |
|---|---|---|---|
| | (in millions) | | |
| Service cost | **$ 27** | $ 26 | $ 25 |
| Interest cost | **68** | 74 | 70 |
| Expected return on plan assets | **(138)** | (138) | (131) |
| Recognized net gain | **(12)** | (20) | (22) |
| Net amortization | **3** | 2 | 1 |
| Net pension cost (income) | **$ (52)** | $ (56) | $ (57) |

**Postretirement Benefits**

Changes during the year in the accumulated benefit obligations and in the fair value of plan assets were as follows:

| | Accumulated Benefit Obligations | |
|---|---|---|
| | **2003** | 2002 |
| | (in millions) | |
| Balance at beginning of year | **$405** | $348 |
| Service cost | **6** | 5 |
| Interest cost | **26** | 26 |
| Benefits paid | **(20)** | (20) |
| Actuarial (gain) loss | **24** | 46 |
| Balance at end of year | **$441** | $405 |

| | Plan Assets | |
|---|---|---|
| | **2003** | 2002 |
| | (in millions) | |
| Balance at beginning of year | **$158** | $169 |
| Actual return on plan assets | **25** | (12) |
| Employer contributions | **23** | 21 |
| Benefits paid | **(20)** | (20) |
| Balance at end of year | **$186** | $158 |

Postretirement benefits plan assets are managed and invested in accordance with all applicable requirements, including ERISA and the IRS revenue code. The Company's investment policy covers a diversified mix of assets, including equity and fixed income securities, real estate, and private equity, as described in the table below. Derivative instruments are used primarily as hedging tools but may also be used to gain efficient exposure to the various asset classes. The Company primarily minimizes the risk of large losses through diversification but also monitors and manages other aspects of risk.

| | | Plan Assets | |
|---|---|---|---|
| | Target | **2003** | 2002 |
| Domestic equity | 46% | **50%** | 42% |
| International equity | 13 | **14** | 9 |
| Global fixed income | 34 | **28** | 40 |
| Real estate | 4 | **5** | 5 |
| Private equity | 3 | **3** | 4 |
| Total | 100% | **100%** | 100% |

The accrued postretirement costs recognized in the Balance Sheets were as follows:

| | **2003** | 2002 |
|---|---|---|
| | (in millions) | |
| Funded status | **$(255)** | $(247) |
| Unrecognized transition obligation | **37** | 41 |
| Unrecognized prior service cost | **73** | 77 |
| Unrecognized net loss (gain) | **82** | 66 |
| Fourth quarter contributions | **6** | 8 |
| Accrued liability recognized in the Balance Sheets | **$ (57)** | $ (55) |

Components of the postretirement plan's net periodic cost were as follows:

| | **2003** | 2002 | 2001 |
|---|---|---|---|
| | (in millions) | | |
| Service cost | **$ 6** | $ 5 | $ 5 |
| Interest cost | **25** | 25 | 24 |
| Expected return on plan assets | **(17)** | (16) | (15) |
| Net amortization | **9** | 9 | 7 |
| Net postretirement cost | **$ 23** | $ 23 | $ 21 |

The weighted average rates assumed in the actuarial calculations used to determine both the benefit obligations and the net periodic costs for the pension and postretirement benefit plans were as follows:

| | **2003** | 2002 | 2001 |
|---|---|---|---|
| Discount | **6.00%** | 6.50% | 7.50% |
| Annual salary increase | **3.75** | 4.00 | 5.00 |
| Long-term return on plan assets | **8.50** | 8.50 | 8.50 |

The Company determined the long-term rate of return on historical asset class returns and current market conditions, taking into account the diversification benefits of investing in multiple asset classes.

An additional assumption used in measuring the accumulated postretirement benefit obligations was a weighted average medical care cost trend rate of 8.25 percent for 2003, decreasing gradually to 5.25 percent through the year 2010, and remaining at that level thereafter. An annual increase or decrease in the assumed medical care cost trend rate of 1 percent would affect the accumulated benefit obligation and the service and interest cost components at December 31, 2003 as follows:

| | 1 Percent Increase | 1 Percent Decrease |
|---|---|---|
| | (in millions) | |
| Benefit obligation | **$34** | **$30** |
| Service and interest costs | **2** | **2** |

**Employee Savings Plan**

The Company also sponsors a 401(k) defined contribution plan covering substantially all employees. The Company provides a 75 percent matching contribution up to 6 percent of an employee's base salary. Total matching contributions made to the plan were $12 million for each of the years 2003, 2002, and 2001.

## 3. CONTINGENCIES AND REGULATORY MATTERS

**General Litigation Matters**

The Company is subject to certain claims and legal actions arising in the ordinary course of business. In addition, the Company's business activities are subject to extensive governmental regulation related to public health and the environment. Litigation over environmental issues and claims of various types, including property damage, personal injury, and citizen enforcement of environmental requirements, has increased generally throughout the United States. In particular, personal injury claims for damages caused by alleged exposure to hazardous materials have become more frequent. The ultimate outcome of such litigation against the Company cannot be predicted at this time; however, management does not anticipate that the liabilities, if any, arising from such current proceedings would have a material adverse effect on the Company's financial statements.

**New Source Review Actions**

In November 1999, the Environmental Protection Agency (EPA) brought a civil action in the U.S. District Court for the Northern District of Georgia against the Company. The complaint alleged violations of the New Source Review (NSR) provisions of the Clean Air Act and violations of related state laws with respect to coal-fired generating facilities at the Company's Plants Miller, Barry, and Gorgas. The civil action requested penalties and injunctive relief, including an order requiring the installation of the best available control technology at the affected units. The EPA concurrently issued to the Company a notice of violation relating to these specific facilities, as well as Plants Greene County and Gaston. In early 2000, the EPA filed a motion to amend its complaint to add the violations alleged in its notice of violation.

In August 2000, the U.S. District Court in Georgia granted the Company's motion to dismiss for lack of jurisdiction in Georgia. The EPA refiled its claim against the Company in the U.S. District Court for the Northern

District of Alabama. The EPA brought similar NSR enforcement actions against several other electric utility companies across the country including Georgia Power and Savannah Electric. In each case, the EPA alleged that the utilities failed to comply with the NSR permitting requirements when performing maintenance and construction activities at coal-burning plants, which activities the utilities considered to be routine or otherwise not subject to NSR.

The action against the Company was stayed in the spring of 2001 during the appeal of a very similar NSR enforcement action against the Tennessee Valley Authority (TVA) before the U.S. Court of Appeals for the Eleventh Circuit. The TVA appeal involves many of the same legal issues raised by the actions against the Company. Because the final resolution of the TVA appeal could have a significant impact on the Company, it has been involved in that appeal. On June 24, 2003, the court of appeals issued its ruling in the TVA case. It found unconstitutional the statutory scheme set forth in the Clean Air Act that allowed the EPA to impose penalties for failing to comply with an administrative compliance order, like the one issued to TVA, without the EPA having to prove the underlying violation. Thus, the court of appeals held that the compliance order was of no legal consequence, and TVA was free to ignore it. The court did not, however, rule directly on the substantive legal issues about the proper interpretation and application of certain NSR provisions that had been raised in the TVA appeal. On September 16, 2003, the court of appeals denied the EPA's request for a rehearing of the decision. On February 13, 2004, the EPA petitioned the U.S. Supreme Court to review the decision of the court of appeals. The EPA also filed a motion to lift the stay in the action against the Company.

Since the inception of the NSR proceedings against the Company, the EPA has also been proceeding with similar NSR enforcement actions against other utilities, involving many of the same legal issues. In each case, the EPA alleged that the utilities failed to comply with the NSR permitting requirements when performing maintenance and construction activities at coal-burning plants, which activities the utilities considered to be routine or otherwise not subject to NSR. In 2003, district courts addressing these cases have issued opinions that reached conflicting conclusions.

In October 2003, the EPA issued final revisions to its NSR regulations under the Clean Air Act clarifying the scope of the existing Routine Maintenance, Repair, and Replacement exclusion. On December 24, 2003, the U.S. Court of Appeals for the District of Columbia Circuit stayed the effectiveness of these revisions pending resolution of related litigation over those revisions. In January 2004, the Bush Administration announced that it would continue to enforce the existing rules.

The Company believes that it complied with applicable laws and the EPA's regulations and interpretations in effect at the time the work in question took place. The Clean Air Act authorizes civil penalties of up to $27,500 per day, per violation at each generating unit. Prior to January 30, 1997, the penalty was $25,000 per day. An adverse outcome in this matter could require substantial capital expenditures that cannot be determined at this time and could possibly require payment of substantial penalties. This could affect future results of operations, cash flows, and possibly financial condition if such costs are not recovered through regulated rates.

**Open Access Transmission Tariff**

In October 2003, the FERC approved a new Open Access Transmission Tariff for the Company of $1.73 per kilowatt-month based on an 11.25 percent return on equity. The Company had requested a rate increase effective April 2002 based on a 13 percent return on equity. In September 2002, pending FERC approval, the Company began collecting from customers based on the 13 percent rate, but recorded revenue subject to refund for amounts above the previously approved rate of $1.37 per kilowatt-month. As a result of the final settlement, a total of approximately $2.4 million was refunded to the Company's transmission customers in October 2003 and $7.6 million was recorded as revenue.

**Retail Rate Adjustment Procedures**

The Alabama PSC has adopted rates that provide for periodic adjustments based upon the Company's earned return on end-of-period retail common equity. Increases in retail rates of 2 percent were effective in April 2002 and in October 2001 in accordance with the Rate Stabilization Equalization Plan, amounting to an annual increase of $55 million and $58 million, respectively. In March 2002, the Alabama PSC approved a revision to the rate adjustment procedures that provides for an annual, rather than quarterly, adjustment and imposes a 3 percent limit on changes in rates in any calendar year. The return on common equity range of 13.0 percent to 14.5 percent remained unchanged.

The rates also provide for adjustments to recognize the placing of new generating facilities into retail service and

the recovery of retail costs associated with certificated purchased power agreements (PPAs) under Rate CNP (Certificated New Plant). Effective July 2001, the Company's retail rates were adjusted by 0.6 percent ($17 million annually) under Rate CNP to recover costs for Plant Barry Unit 7, which was placed into commercial operation on May 1, 2001.

In November 2000, the Alabama PSC certificated a seven-year, 615 megawatt, PPA with Southern Power beginning in June 2003. In addition, the Alabama PSC certificated a seven-year PPA with a third party for approximately 630 megawatts; one half of the capacity became available in 2003 while the remaining half is scheduled to become available in 2004. As a result, the Company's retail rates were adjusted beginning July 2003 by approximately 2.6 percent ($79 million annually) under Rate CNP. One month after the contracted capacity delivery begins, which is scheduled for June 2004, Rate CNP will adjust retail rates by approximately 0.8 percent ($25 million annually) to recover costs associated with the scheduled 2004 PPA capacity.

In October 2001, the Alabama PSC approved a revision to the Company's Rate ECR (Energy Cost Recovery) allowing the recovery of specific costs associated with the sales of natural gas that become necessary due to operating considerations at its electric generating facilities. This revision also includes the cost of financial tools used for hedging market price risk up to 75 percent of the budgeted annual amount of natural gas purchases. The Company may not engage in natural gas hedging activities that extend beyond a rolling 42-month window. Also, the premiums paid for natural gas financial options may not exceed 5 percent of the Company's natural gas budget for that year.

The Company's ratemaking procedures will remain in effect until the Alabama PSC votes to modify or discontinue them.

### FERC Matters

The Company has obtained FERC approval to sell power to nonaffiliates at market-based prices under specific contracts. Through SCS, as agent, the Company also has FERC authority to make short-term opportunity sales at market rates. Specific FERC approval must be obtained with respect to a market-based contract with an affiliate. In November 2001, the FERC modified the test it uses to consider utilities' applications to charge market-based rates and adopted a new test called the Supply Margin Assessment (SMA). The FERC applied the SMA to several utilities, including Southern Company's retail operating companies, and found them to be "pivotal suppliers" in their service areas and ordered the implementation of several mitigation measures. SCS, on behalf of the retail operating companies, sought rehearing of the FERC order, and the FERC delayed the implementation of certain mitigation measures. SCS, on behalf of the retail operating companies, submitted comments to the FERC in 2002 regarding these issues. In December 2003, the FERC issued a staff paper discussing alternatives and held a technical conference in January 2004. The Company anticipates that the FERC will address the requests for rehearing in the near future. Regardless of the outcome of the SMA proposal, the FERC retains the ability to modify or withdraw the authorization for any seller to sell at market-based rates, if it determines that the underlying conditions for having such authority are no longer applicable. The final outcome of this matter will depend on the form in which the SMA test and mitigation measures rules may be ultimately adopted and cannot be determined at this time.

## 4. JOINT OWNERSHIP AGREEMENTS

The Company and Georgia Power own equally all of the outstanding capital stock of SEGCO, which owns electric generating units with a total rated capacity of 1,020 megawatts, together with associated transmission facilities. The capacity of these units is sold equally to the Company and Georgia Power under a contract which, in substance, requires payments sufficient to provide for the operating expenses, taxes, interest expense and a return on equity, whether or not SEGCO has any capacity and energy available. The term of the contract extends automatically for two-year periods, subject to either party's right to cancel upon two year's notice. The Company's share of purchased power totaled $87 million in 2003, $84 million in 2002, and $80 million in 2001 and is included in "Purchased power from affiliates" in the Statements ~~of~~ Income.

In addition the Company has guaranteed unconditionally the obligation of SEGCO under an installment sale agreement for the purchase of certain pollution control facilities at SEGCO's generating units, pursuant to which $24.5 million principal amount of pollution control revenue bonds are outstanding. Georgia Power has agreed to reimburse the Company for the pro rata portion of such obligation corresponding to its then proportionate ownership of stock of SEGCO if the Company is called upon to make such payment under its guaranty.

At December 31, 2003, the capitalization of SEGCO consisted of $63 million of equity and $94 million of debt on which the annual interest requirement is $3.4 million. SEGCO paid dividends totaling $2.3 million in 2003, $5.8 million in 2002, and $0.7 million in 2001, of which one-half of each was paid to the Company. In addition, the Company recognizes 50 percent of SEGCO's net income.

In addition to the Company's ownership of SEGCO, the Company's percentage ownership and investment in jointly-owned generating plants at December 31, 2003 is as follows:

| Facility (Type) | Total Megawatt Capacity | Company Ownership | |
|---|---|---|---|
| Greene County (coal) | **500** | **60.00%** | **(1)** |
| Plant Miller Units 1 and 2 (coal) | **1,320** | **91.84%** | **(2)** |

(1) Jointly owned with an affiliate, Mississippi Power.
(2) Jointly owned with Alabama Electric Cooperative, Inc.

| Facility | Company Investment | Accumulated Depreciation |
|---|---|---|
| | (in millions) | |
| Greene County | **$110** | **$ 54** |
| Plant Miller Units 1 and 2 | **767** | **355** |

The Company has contracted to operate and maintain the jointly owned facilities as agent for their co-owners. The Company's proportionate share of its plant operating expenses is included in the operating expenses in the Statements of Income.

## 5. INCOME TAXES

Southern Company files a consolidated federal income tax return. Under a joint consolidated income tax agreement, each subsidiary's current and deferred tax expense is computed on a stand-alone basis. In accordance with IRS regulations, each company is jointly and severally liable for the tax liability.

At December 31, 2003, the Company's tax-related regulatory assets and liabilities were $321 million and $162 million, respectively. These assets are attributable to tax benefits flowed through to customers in prior years and to taxes applicable to capitalized interest. These liabilities are attributable to deferred taxes previously recognized at rates higher than the current enacted tax law and to unamortized investment tax credits.

Details of the income tax provisions are as follows:

| | **2003** | 2002 | 2001 |
|---|---|---|---|
| | | (in millions) | |
| Total provision for income taxes: | | | |
| Federal -- | | | |
| Current | **$111** | $209 | $234 |
| Deferred | **137** | 41 | (20) |
| | **248** | 250 | 214 |
| State -- | | | |
| Current | **26** | 35 | 37 |
| Deferred | **16** | 7 | (2) |
| | **42** | 42 | 35 |
| Total | **$290** | $292 | $249 |

The tax effects of temporary differences between the carrying amounts of assets and liabilities in the financial statements and their respective tax bases, which give rise to deferred tax assets and liabilities, are as follows:

| | **2003** | 2002 |
|---|---|---|
| | (in millions) | |
| Deferred tax liabilities: | | |
| Accelerated depreciation | **$1,204** | $1,081 |
| Property basis differences | **401** | 381 |
| Premium on reacquired debt | **42** | 39 |
| Pensions | **117** | 103 |
| Other | **29** | 38 |
| Total | **1,793** | 1,642 |
| Deferred tax assets: | | |
| Capacity prepayments | **8** | 11 |
| Other deferred costs | **13** | 13 |
| Postretirement benefits | **14** | 18 |
| Unbilled revenue | **21** | 20 |
| Other | **86** | 87 |
| Total | **142** | 149 |
| Total deferred tax liabilities, net | **1,651** | 1,493 |
| Portion included in current liabilities, net | **(80)** | (56) |
| Accumulated deferred income taxes in the Balance Sheets | **$1,571** | $1,437 |

In accordance with regulatory requirements, deferred investment tax credits are amortized over the lives of the related property with such amortization normally applied as a credit to reduce depreciation in the Statements of Income. Credits amortized in this manner amounted to $11 million in each of 2003, 2002, and 2001. At December 31, 2003, all investment tax credits available to reduce federal income taxes payable had been utilized.

A reconciliation of the federal statutory income tax rate to the effective income tax rate is as follows:

| | 2003 | 2002 | 2001 |
|---|---|---|---|
| Federal statutory rate | **35.0%** | 35.0% | 35.0% |
| State income tax, net of federal deduction | **3.5** | 3.5 | 3.5 |
| Non-deductible book depreciation | **1.2** | 1.3 | 1.5 |
| Differences in prior years' deferred and current tax rates | **(0.9)** | (1.2) | (1.3) |
| Other | **(1.6)** | (0.5) | (0.5) |
| Effective income tax rate | **37.2%** | 38.1% | 38.2% |

## 6. FINANCING

### Mandatorily Redeemable Preferred Securities

The Company has formed certain wholly owned trust subsidiaries for the purpose of issuing preferred securities. The proceeds of the related equity investments and preferred security sales were loaned back to the Company through the issuance of junior subordinated notes totaling $309 million, which constitute substantially all assets of these trusts. The Company considers that the mechanisms and obligations relating to the preferred securities issued for its benefit, taken together, constitute a full and unconditional guarantee by it of the respective trusts' payment obligations with respect to these securities. At December 31, 2003, preferred securities of $300 million were outstanding and recognized as liabilities in the Balance Sheets. For additional information, see the Statements of Capitalization.

### First Mortgage Bonds

In October 1991, the Company entered into a firm power sales contract with the Alabama Municipal Electric Authority (AMEA) entitling AMEA to scheduled amounts of capacity (up to a maximum 80 megawatts) for a period of 15 years. Under the terms of the contract, the Company received payments from AMEA representing the net present value of the revenues associated with the capacity entitlement, discounted at an effective annual rate of 11.19 percent. These payments are being recognized as operating revenues and the discount is amortized to other interest expense as scheduled capacity is made available over the terms of the contract.

To secure AMEA's advance payments and the Company's performance obligation under the contracts, the Company issued and delivered to an escrow agent first mortgage bonds representing the maximum amount of liquidated damages payable by the Company in the event of a default under the contracts. No principal or interest is payable on such bonds unless and until a default by the Company occurs. As the liquidated damages decline, a portion of the bond equal to the decrease is returned to the Company. At December 31, 2003, $26.7 million of these bonds were held by the escrow agent under the contract.

### Pollution Control Bonds

Pollution control obligations represent installment purchases of pollution control facilities financed by funds derived from sales by public authorities of revenue bonds. The Company is required to make payments sufficient for the authorities to meet principal and interest requirements of such bonds. With respect to $114.2 million of such pollution control obligations, the Company has authenticated and delivered to the trustees a like principal amount of first mortgage bonds as security for its obligations under the installment purchase agreements. No principal or interest on these first mortgage bonds is payable unless and until a default occurs on the installment purchase agreements.

### Senior Notes

The Company issued a total of $1.4 billion of unsecured senior notes in 2003. The proceeds of these issues were used to redeem higher cost debt and for other general corporate purposes.

At December 31, 2003 and 2002, the Company had $3.4 billion of senior notes outstanding. These senior notes are subordinate to all secured debt of the Company which amounted to approximately $295 million at December 31, 2003.

### Long-Term Debt Due Within One Year

A summary of the improvement fund requirements and scheduled maturities and redemptions of long-term debt due within one year at December 31 is as follows:

| | 2003 | 2002 |
|---|---|---|
| | (in millions) | |
| Capitalized leases | **$ 1** | $ 1 |
| Senior notes | **525** | 1,117 |
| Total | **$526** | $1,118 |

Debt redemptions and/or serial maturities through 2008 applicable to total long-term debt are as follows: $526 million in 2004; $225 million in 2005; $715 million in 2006; $200 million in 2007; and $410 million in 2008.

### Assets Subject to Lien

The Company's mortgage, as amended and supplemented, securing the first mortgage bonds issued by the Company, constitutes a direct lien on substantially all of the Company's fixed property and franchises.

### Bank Credit Arrangements

The Company maintains committed lines of credit in the amount of $865 million (including $504 million of such lines which are dedicated to funding purchase obligations relating to variable rate pollution control bonds), all of which expire at various times during 2004. Approximately $450 million of the credit facilities expiring in 2004 allow for the execution of term loans for an additional two-year period, and $245 million allow for the execution of one-year term loans. All of the credit arrangements require payment of a commitment fee based on the unused portion of the commitment or the maintenance of compensating balances with the banks. Commitment fees are less than 1/4 of 1 percent for the Company. Because the arrangements are based on an average balance, the Company does not consider any of its cash balances to be restricted as of any specific date. For syndicated credit arrangements, a fee is also paid to the agent bank.

Most of the Company's credit arrangements with banks have covenants that limit the Company's debt to 65 percent of total capitalization, as defined in the agreements. Exceeding this debt level would result in a default under the credit arrangements. At December 31, 2003, the Company was in compliance with the debt limit covenants. In addition, the credit arrangements typically contain cross default provisions that would be triggered if the Company defaulted on other indebtedness (including guarantee obligations) above a specified threshold. None of the arrangements contain material adverse change clauses at the time of borrowings.

The Company borrows through commercial paper programs that have the liquidity support of committed bank credit arrangements. In addition, the Company borrows from time to time through extendible commercial note programs. As of December 31, 2003, the Company had no extendible commercial notes and no commercial paper outstanding. The amount of commercial paper outstanding at December 31, 2002 was $37 million. During 2003, the peak amount outstanding for commercial paper was $255 million and the average amount outstanding was $30 million. The average annual interest rate on commercial paper in 2003 was 1.29 percent. Commercial paper and extendible commercial notes are included in notes payable on the Balance Sheets.

At December 31, 2003, the Company had regulatory approval to have outstanding up to $1 billion of short-term borrowings.

### Financial Instruments

The Company enters into energy-related derivatives to hedge exposures to electricity, gas, and other fuel price changes. However, due to cost-based rate regulations, the Company has limited exposure to market volatility in commodity fuel prices and prices of electricity. The Company has implemented fuel-hedging programs at the instruction of the Alabama PSC. The Company also enters into hedges of forward electricity sales.

At December 31, 2003, the fair value of derivative energy contracts was reflected in the financial statements as follows:

| | Amounts (in thousands) |
|---|---|
| Regulatory liabilities, net | $6,402 |
| Net income | 11 |
| Total fair value | $6,413 |

The fair value gain or loss for cash flow hedges that are recoverable through the regulatory fuel clauses are recorded in the regulatory assets and liabilities and are recognized in earnings at the same time the hedged items affect earnings.

The Company also enters into derivatives to hedge exposure of interest rate changes. Interest derivatives related to variable rate securities or forecasted transactions are accounted for as cash flow hedges. The interest derivatives are generally structured to match the critical terms of the hedged debt instruments; therefore, no material ineffectiveness has been recorded in earnings.

At December 31, 2003, the Company had $1.2 billion notional amount of interest rate swaps outstanding with net deferred gains of $5.7 million as follows:

Cash Flow Hedges

| Maturity | Weighted Average Fixed Rate Paid | Notional Amount (in millions) | Fair Value Gain/ (Loss) |
|---|---|---|---|
| 2004 | 1.63* | $486 | $(0.2) |
| 2006 | 1.89 | 195 | 1.5 |
| 2007 | 1.99* | 486 | 4.4 |

*Hedged using the Bond Market Association Municipal Swap Index

The fair value gain or loss for cash flow hedges is recorded in other comprehensive income and is reclassified into earnings at the same time the hedged items affect earnings. In 2003 and 2002, the Company recognized losses of $8 million and $13 million, respectively, upon termination of certain interest derivatives at the same time it issued debt. These losses have been deferred in other comprehensive income and will be amortized to interest expense over the life of the related debt. For 2003, approximately $11.3 million of pre-tax losses were reclassified from other comprehensive income to interest expense. For 2004, pre-tax losses of approximately $5.8 million are expected to be reclassified from other comprehensive income to interest expense.

## 7. COMMITMENTS

### Construction Program

The Company is engaged in continuous construction programs, currently estimated to total $791 million in 2004, $863 million in 2005, and $884 million in 2006. These amounts include $12.5 million, $11.3 million, and $6.6 million in 2004, 2005, and 2006, respectively, for construction expenditures related to contractual purchase commitments for uranium and nuclear fuel conversion, enrichment, and fabrication services included in this note under "Fuel Commitments." The construction programs are subject to periodic review and revision, and actual construction costs may vary from the above estimates because of numerous factors. These factors include: changes in business conditions; revised load growth estimates; changes in environmental regulations; changes in existing nuclear plants to meet new regulatory requirements; changes in FERC rules and transmission regulations; increasing costs of labor, equipment, and materials; and cost of capital. At December 31, 2003, significant purchase commitments were outstanding in connection with the construction program. The Company has no generating plants under construction. Construction of new transmission and distribution facilities and capital improvements, including those needed to meet environmental standards for existing generation transmission, and distribution facilities, will continue.

Southern Company has guaranteed Southern Power's obligations to the Company for transmission interconnection facilities of $6.8 million related to Plant Harris units 1 & 2. The obligations were guaranteed at December 31, 2003, but, upon completion of construction, were released in February 2004.

### Long-Term Service Agreements

The Company has entered into several Long-Term Service Agreements (LTSAs) with General Electric (GE) for the purpose of securing maintenance support for its combined cycle and combustion turbine generating facilities. The LTSAs stipulate that GE will perform all planned maintenance on the covered equipment, which includes the cost of all labor and materials. GE is also obligated to cover the costs of unplanned maintenance on the covered equipment subject to a limit specified in each contract.

In general, these LTSAs are in effect through two major inspection cycles per unit. Scheduled payments to GE are made at various intervals based on actual operating hours of the respective units. Total payments to GE under these agreements are currently estimated at $253 million over the life of the agreements, which are approximately 12 to 14 years per unit. At December 31, 2003, the remaining balance was approximately $213 million. However, the LTSAs contain various cancellation provisions at the option of the Company.

Payments made to GE prior to the performance of any planned maintenance are recorded as a prepayment in the Balance Sheets. Inspection costs are capitalized or charged to expense based on the nature of the work performed.

### Purchased Power Commitments

The Company has entered into various long-term commitments for the purchase of electricity. Total estimated minimum long-term obligations at December 31, 2003 were as follows:

| | Commitments | | |
|---|---|---|---|
| Year | Affiliated | Non-Affiliated | Total |
| | (in millions) | | |
| 2004 | $ 49 | $ 36 | $ 85 |
| 2005 | 49 | 38 | 87 |
| 2006 | 49 | 39 | 88 |
| 2007 | 49 | 40 | 89 |
| 2008 | 49 | 40 | 89 |
| 2009 and thereafter | 62 | 67 | 129 |
| Total commitments | $307 | $260 | $567 |

### Fuel Commitments

To supply a portion of the fuel requirements of its generating plants, the Company has entered into various long-term commitments for the procurement of fossil and nuclear fuel. In most cases, these contracts contain provisions for price escalations, minimum purchase levels, and other financial commitments. Natural gas purchase commitments contain fixed volumes with prices based on various indices at the time of delivery. Amounts included in the chart below represent estimates based on New York Mercantile future prices at December 31, 2003. Total estimated minimum long-term commitments at December 31, 2003 were as follows:

| Year | Natural Gas | Coal & Nuclear Fuel |
|---|---|---|
| | (in millions) | |
| 2004 | $318 | $ 750 |
| 2005 | 181 | 514 |
| 2006 | 158 | 437 |
| 2007 | 107 | 429 |
| 2008 | 26 | 154 |
| 2009 and thereafter | 108 | - |
| Total commitments | $898 | $2,284 |

Additional commitments for fuel will be required to supply the Company's future needs.

SCS may enter into various types of wholesale energy and natural gas contracts acting as an agent for the Company and all of the other Southern Company retail operating companies, Southern Power, and Southern Company GAS. Under these agreements, each of the retail operating companies, Southern Power, and Southern Company GAS may be jointly and severally liable. The creditworthiness of Southern Power and Southern Company GAS is currently inferior to the creditworthiness of the retail operating companies. Accordingly, Southern Company has entered into keep-well agreements with the Company and each of the other retail operating companies to insure the Company will not subsidize or be responsible for any costs, losses, liabilities, or damages resulting from the inclusion of Southern Power or Southern Company GAS as a contracting party under these agreements.

### Operating Leases

The Company has entered into rental agreements for coal rail cars, vehicles, and other equipment with various terms and expiration dates. These expenses totaled $29.5 million in 2003, $29.6 million in 2002, and $27.9 million in 2001. Of these amounts, $19.4 million, $19.1 million, and $21.1 million for 2003, 2002, and 2001, respectively, relates to the rail car leases and are recoverable through the Company's energy cost recovery clause. At December 31, 2003, estimated minimum rental commitments for noncancellable operating leases were as follows:

| Year | Rail Cars | Vehicles & Other | Total |
|---|---|---|---|
| | | (in millions) | |
| 2004 | $19.1 | $10.6 | $ 29.7 |
| 2005 | 16.3 | 8.9 | 25.2 |
| 2006 | 11.3 | 6.2 | 17.5 |
| 2007 | 4.1 | 3.6 | 7.7 |
| 2008 | 3.8 | 2.0 | 5.8 |
| 2009 and thereafter | 30.7 | 4.5 | 35.2 |
| Total minimum payments | $85.3 | $35.8 | $121.1 |

In addition to the rental commitments above, the Company has potential obligations upon expiration of certain leases with respect to the residual value of the leased property. These leases expire in 2004 and 2006, and the Company's maximum obligations are $25.7 million and $66.0 million, respectively. At the termination of the leases, at the Company's option, the Company may negotiate an extension, exercise its purchase option, or the property can be sold to a third party. The Company expects that the fair market value of the leased property would substantially reduce or eliminate the Company's payments under the residual value obligations.

### Guarantees

At December 31, 2003, the Company had outstanding guarantees related to SEGCO's purchase of certain pollution control facilities, as discussed in Note 4, and to certain residual values of leased assets. See "Operating Leases" above.

## 8. NUCLEAR INSURANCE

Under the Price-Anderson Amendments Act of 1988 (Act), the Company maintains agreements of indemnity with the NRC that, together with private insurance, cover third-party liability arising from any nuclear incident occurring at Plant Farley. The Act provides funds up to $10.9 billion for public liability claims that could arise from a single nuclear incident. Plant Farley is insured against this liability to a maximum of $300 million by American Nuclear Insurers (ANI), with the remaining coverage provided by a mandatory program of deferred premiums that could be assessed, after a nuclear incident, against all owners of nuclear reactors. The Company

could be assessed up to $100.5 million per incident for each licensed reactor it operates but not more than an aggregate of $10 million per incident to be paid in a calendar year for each reactor. Such maximum assessment, excluding any applicable state premium taxes, for the Company is $201 million per incident but not more than an aggregate of $20 million to be paid for each incident in any one year. The Price-Anderson Amendments Act expired in August 2002; however, the indemnity provisions of the act remain in place for commercial nuclear reactors.

The Company is a member of Nuclear Electric Insurance Limited (NEIL), a mutual insurer established to provide property damage insurance in an amount up to $500 million for members' nuclear generating facilities.

Additionally, the Company has policies that currently provide decontamination, excess property insurance, and premature decommissioning coverage up to $2.25 billion for losses in excess of the $500 million primary coverage. This excess insurance is also provided by NEIL.

NEIL also covers the additional costs that would be incurred in obtaining replacement power during a prolonged accidental outage at a member's nuclear plant. Members can purchase this coverage, subject to a deductible waiting period of up to 26 weeks, with a maximum per occurrence per unit limit of $490 million. After this deductible period, weekly indemnity payments would be received until either the unit is operational or until the limit is exhausted in approximately three years. The Company purchases the maximum limit allowed by NEIL and has elected a 12 week waiting period.

Under each of the NEIL policies, members are subject to assessments if losses each year exceed the accumulated funds available to the insurer under that policy. The current maximum annual assessments for the Company under the NEIL policies would be $36 million.

Following the terrorist attacks of September 2001, both ANI and NEIL confirmed that terrorist acts against commercial nuclear power plants would be covered under their insurance. However, both companies revised their policy terms on a prospective basis to include an industry aggregate for all "non-certified" terrorist acts, i.e., acts that are not certified acts of terrorism pursuant to the Terrorism Risk Insurance Act of 2002 (TRIA). The NEIL aggregate -- applies to all non-certified claims stemming from terrorism within a 12 month duration -- is $3.24 billion plus any amounts available through reinsurance or indemnity from an outside source. The non-certified ANI cap is a $300 million shared industry aggregate. Any act of terrorism that is certified pursuant to the TRIA will not be subject to the foregoing NEIL and ANI limitations but will be subject to the TRIA annual aggregate limitation of $100 billion of insured losses arising from certified acts of terrorism. The TRIA will expire on December 31, 2005.

For all on-site property damage insurance policies for commercial nuclear power plants, the NRC requires that the proceeds of such policies shall be dedicated first for the sole purpose of placing the reactor in a safe and stable condition after an accident. Any remaining proceeds are to be applied next toward the costs of decontamination and debris removal operations ordered by the NRC, and any further remaining proceeds are to be paid either to the Company or to its bond trustees as may be appropriate under the policies and applicable trust indentures.

All retrospective assessments, whether generated for liability, property, or replacement power, may be subject to applicable state premium taxes.

## 9. QUARTERLY FINANCIAL INFORMATION (UNAUDITED)

Summarized quarterly financial information for 2003 and 2002 are as follows:

| Quarter Ended | Operating Revenues | Operating Income | Net Income After Dividends on Preferred Stock |
|---|---|---|---|
| | | (in millions) | |
| **March 2003** | **$ 890** | **$211** | **$ 92** |
| **June 2003** | **950** | **227** | **107** |
| **September 2003** | **1,216** | **414** | **217** |
| **December 2003** | **904** | **163** | **57** |
| March 2002 | $ 802 | $191 | $ 72 |
| June 2002 | 924 | 256 | 116 |
| September 2002 | 1,119 | 393 | 201 |
| December 2002 | 865 | 182 | 72 |

The Company's business is influenced by seasonal weather conditions.

GEORGIA POWER COMPANY

FINANCIAL SECTION

## MANAGEMENT'S REPORT
**Georgia Power Company 2003 Annual Report**

The management of Georgia Power Company has prepared -- and is responsible for -- the financial statements and related information included in this report. These statements were prepared in accordance with accounting principles generally accepted in the United States and necessarily include amounts that are based on the best estimates and judgments of management. Financial information throughout this annual report is consistent with the financial statements.

The Company maintains a system of internal accounting controls to provide reasonable assurance that assets are safeguarded and that the accounting records reflect only authorized transactions of the Company. Limitations exist in any system of internal controls, however, based upon recognition that the cost of the system should not exceed its benefits. The Company believes its system of internal accounting controls maintains an appropriate cost/benefit relationship.

The Company's internal accounting controls are evaluated on an ongoing basis by the Company's internal audit staff. The Company's independent public accountants also consider certain elements of the internal control system in order to determine their auditing procedures for the purpose of expressing an opinion on the financial statements.

David M. Ratcliffe
Chief Executive Officer

Michael D. Garrett
President

Southern Company's audit committee of its board of directors, composed of four independent directors, provides a broad overview of management's financial reporting and control functions. Additionally, the Controls and Compliance Committee of the Company's board of directors, composed of a minimum of three outside directors, meets periodically with management, the internal auditors, and the independent public accountants to discuss auditing, internal controls, and compliance matters. The internal auditors and independent public accountants have access to the members of these committees at any time.

Management believes that its policies and procedures provide reasonable assurance that the Company's operations are conducted with a high standard of business ethics.

In management's opinion, the financial statements present fairly, in all material respects, the financial position, results of operations and cash flows of Georgia Power Company in conformity with accounting principles generally accepted in the United States.

C. B. Harreld
Executive Vice President, Treasurer,
and Chief Financial Officer
March 1, 2004

## INDEPENDENT AUDITORS' REPORT

**Georgia Power Company:**

We have audited the accompanying balance sheets and statements of capitalization of Georgia Power Company (a wholly owned subsidiary of Southern Company) as of December 31, 2003 and 2002, and the related statements of income, comprehensive income, common stockholder's equity, and cash flows of the years then ended. These financial statements are the responsibility of Georgia Power Company's management. Our responsibility is to express an opinion on these financial statements based on our audits. The financial statements of Georgia Power Company for the year ended December 31, 2001 were audited by other auditors who have ceased operations. Those auditors expressed an unqualified opinion on those financial statements and included an explanatory paragraph that described a change in the method of accounting for derivative instruments and hedging activities in their report dated February 13, 2002.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements (pages II-128 to II-154) present fairly, in all material respects, the financial position of Georgia Power Company at December 31, 2003 and 2002, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note 1 to the financial statements, in 2003 Georgia Power Company changed its method of accounting for asset retirement obligations.

Deloitte & Touche LLP

Atlanta, Georgia
March 1, 2004

**THE FOLLOWING REPORT OF INDEPENDENT PUBLIC ACCOUNTANTS IS A COPY OF THE REPORT PREVIOUSLY ISSUED IN CONNECTION WITH THE COMPANY'S 2001 ANNUAL REPORT AND HAS NOT BEEN REISSUED BY ARTHUR ANDERSEN LLP. SEE EXHIBIT 23(c)2 FOR ADDITIONAL INFORMATION.**

**To Georgia Power Company:**

We have audited the accompanying balance sheets and statements of capitalization of Georgia Power Company (a Georgia corporation and a wholly owned subsidiary of Southern Company) as of December 31, 2001 and 2000, and the related statements of income, comprehensive income, common stockholder's equity, and cash flows for each of the three years in the period ended December 31, 2001. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements (pages II-93 to II-113) referred to above present fairly, in all material respects, the financial position of Georgia Power Company as of December 31, 2001 and 2000, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2001, in conformity with accounting principles generally accepted in the United States.

As explained in Note 1 to the financial statements, effective January 1, 2001, Georgia Power Company changed its method of accounting for derivative instruments and hedging activities.

Arthur Andersen LLP

Atlanta, Georgia
February 13, 2002

## OVERVIEW OF EARNINGS AND BUSINESS ACTIVITIES

### *Earnings*

Georgia Power Company's 2003 earnings totaled $631 million, representing a $13 million (2.1 percent) increase over 2002. Operating income increased in 2003 despite lower base retail revenues resulting from the extremely mild summer weather. Higher wholesale revenues and lower non-fuel operating expenses contributed to the increase. The Company's 2002 earnings totaled $618 million, representing an $8 million (1.2 percent) increase over 2001. Operating income declined slightly in 2002. Lower retail and wholesale revenues, higher other operating and maintenance expenses and increased purchased power capacity expenses were significantly offset by lower depreciation and amortization expense as a result of a Georgia Public Service Commission (GPSC) retail rate order effective January 2002. The increase in net income for 2002 resulted from lower financing costs and a lower effective tax rate due to the realization of certain state tax credits. The Company's 2001 earnings totaled $610 million, representing a $51 million (9.1 percent) increase over 2000. Operating income was lower in 2001 compared to 2000 due to the impact of mild weather on retail revenues; however, overall net income improved due to lower financing costs and non-operating expenses and a lower effective tax rate resulting from various factors including property donations and positive resolution of outstanding tax issues.

### *Business Activities*

The Company operates as a vertically integrated utility providing electricity to retail customers within its traditional service area located within the State of Georgia and to wholesale customers in the Southeast.

Several factors affect the opportunities, challenges and risk of the Company's primary business of selling electricity. These factors include the ability to maintain a stable regulatory environment, to achieve energy sales growth while containing costs, and to recover costs related to growing demand and increasingly strict environmental standards. Future earnings for the electricity business in the near term will depend, in part, upon growth in energy sales, which is subject to a number of factors. These factors include weather, competition, new energy contracts with neighboring utilities, energy conservation practiced by customers, the price of electricity, the price elasticity of demand, and the rate of economic growth in the service area.

## RESULTS OF OPERATIONS

A condensed income statement for the Company is as follows:

| | Amount | Increase (Decrease) From Prior Year | | |
|---|---|---|---|---|
| | **2003** | **2003** | 2002 | 2001 |
| | | (in millions) | | |
| Operating revenues | **$4,914** | **$ 92** | $(144) | $ 95 |
| Fuel | **1,104** | **101** | 64 | (79) |
| Purchased power | **776** | **92** | (87) | 175 |
| Other operation and maintenance | **1,247** | **(78)** | 85 | 41 |
| Depreciation and amortization | **350** | **(54)** | (197) | (19) |
| Taxes other than income taxes | **213** | **11** | (1) | (1) |
| Total operating expenses | **3,690** | **72** | (136) | 117 |
| Operating income | **1,224** | **20** | (8) | (22) |
| Other income and (expense) | **(227)** | **2** | 9 | 76 |
| Less - Income taxes | **366** | **9** | (7) | 3 |
| Net income | **$ 631** | **$ 13** | $ 8 | $ 51 |

*Revenues*

Operating revenues in 2003, 2002, and 2001 and the percent of change from the prior year are as follows:

| | Amount | | |
|---|---|---|---|
| | **2003** | 2002 | 2001 |
| | | (in millions) | |
| Retail – prior year | **$4,288** | $4,349 | $4,317 |
| Change in - | | | |
| Base rates | **-** | (118) | - |
| Sales growth and other | **30** | 2 | 90 |
| Weather | **(66)** | 82 | (107) |
| Fuel cost recovery and other | **58** | (27) | 49 |
| Retail – current year | **4,310** | 4,288 | 4,349 |
| Sales for resale - | | | |
| Non-affiliates | **260** | 271 | 366 |
| Affiliates | **175** | 98 | 100 |
| Total sales for resale | **435** | 369 | 466 |
| Other operating revenues | **169** | 165 | 151 |
| Total operating revenues | **$4,914** | $4,822 | $4,966 |
| Percent change | **1.9%** | (2.9)% | 2.0% |

Retail base revenues of $3.0 billion in 2003 decreased by $36 million (1.2 percent) from 2002 primarily due to extremely mild summer temperatures in 2003 and the sluggish economy. Residential kilowatt-hour (KWH) sales decreased by 1.7 percent. Retail base revenues of $3.1 billion in 2002 decreased by $34 million (1.1 percent) from 2001 primarily due to a base rate reduction effective January 2002 under the GPSC retail rate order and generally lower prices to large business customers. This decrease was partially offset by a 10.1 percent increase in residential KWH sales due to warmer weather. Retail base revenues of $3.1 billion in 2001 decreased $17 million (0.5 percent) from 2000, primarily due to a 2.5 percent decrease in retail KWH sales from the prior year. Milder-than-normal weather and a slowdown in the economy contributed to the decline in such sales.

Electric rates include provisions to adjust billings for fluctuations in fuel costs, the energy component of purchased power costs, and certain other costs. Under these fuel cost recovery provisions, fuel revenues generally equal fuel expenses -- including the fuel component of purchased energy -- and do not affect net income. As of December 31, 2003, the Company had $151 million in under-recovered fuel costs. On August 19, 2003, the GPSC issued an order allowing the Company to increase customer fuel rates to recover existing under-recovered deferred fuel costs. See Note 3 to the financial statements under "Fuel Cost Recovery" for further information regarding this order.

Wholesale revenues from sales to non-affiliated utilities were:

| | **2003** | 2002 | 2001 |
|---|---|---|---|
| | | (in millions) | |
| Unit power sales -- | | | |
| Capacity | **$ 34** | $ 34 | $ 26 |
| Energy | **31** | 34 | 35 |
| Other power sales -- | | | |
| Capacity | **38** | 41 | 72 |
| Energy | **157** | 162 | 233 |
| Total | **$260** | $271 | $366 |

Revenues from unit power contracts decreased slightly in 2003 due to decreased energy sales. Approximately 103 megawatts of capacity is scheduled to be sold annually through 2010. Revenues from other non-affiliated sales decreased $8 million (3.9 percent) in 2003, decreased $102 million (33.4 percent) in 2002 and increased $62 million in 2001 primarily due to fluctuations in off-system sale transactions that were generally offset by corresponding purchase transactions. These transactions had no significant effect on income. In 2002, revenues also decreased $37 million as a result of transferring Plant Dahlberg to Southern Power Company (Southern Power) in July 2001.

Revenues from sales to affiliated companies within the Southern Company electric system, as well as purchases of energy, will vary from year to year depending on demand and the availability and cost of generating resources at each company. In 2003, energy sales to affiliates increased 47.5 percent due to the combination of increased demand by Southern Power to meet contractual obligations and the availability of power due to milder-than-normal weather in the Company's service territory. These transactions do not have a significant impact on earnings since this energy is generally sold at marginal cost.

Other operating revenues increased $4 million (2.4 percent) in 2003 primarily due to an increase in the open access transmission tariff rate, which increased revenues $7 million, and higher revenues from increased customer demand for outdoor lighting services of $4 million, partially offset by lower revenue from the rental of electric property of $4 million. See Note 3 to the financial statements under "Open Access Transmission

Tariff' for further information regarding the increase in the open access transmission tariff rate. Other operating revenues in 2002 increased $14 million (9.5 percent) primarily due to the collection of new late payment fees approved under the retail rate order effective January 2002 of $7 million and higher revenues from increased customer demand for outdoor lighting services of $5 million and the transmission of electricity of $3 million. Other operating revenues in 2001 decreased $9 million (5.3 percent) primarily due to lower gains on the sale of generating plant emission allowances, partially offset by increased revenues from the transmission of electricity and from the rental of electric equipment and property.

***Energy Sales***

KWH sales for 2003 and the percent change by year were as follows:

| | KWH | Percent Change | | |
|---|---|---|---|---|
| | **2003** | **2003** | 2002 | 2001 |
| | **(in billions)** | | | |
| Residential | **21.8** | **(1.7)%** | 10.1% | (2.8)% |
| Commercial | **26.9** | **(0.1)** | 1.7 | 3.4 |
| Industrial | **25.7** | **(0.1)** | 1.5 | (8.0) |
| Other | **0.6** | **0.4** | 1.7 | 2.5 |
| Total retail | **75.0** | **(0.5)** | 4.0 | (2.5) |
| Sales for resale - | | | | |
| Non-affiliates | **8.9** | **9.5** | (0.5) | 25.5 |
| Affiliates | **5.8** | **47.5** | 26.5 | 28.7 |
| Total sales for resale | **14.7** | **22.0** | 7.0 | 26.3 |
| Total sales | **89.7** | **2.6** | 4.4 | 0.5 |

Residential KWH sales decreased 1.7 percent in 2003 due to the effect of the milder summer weather despite the 2 percent increase in residential customers. Commercial KWH sales declined slightly due to the milder summer weather, while industrial KWH sales declined slightly due to the sluggish economy. Residential KWH sales increased 10.1 percent in 2002 due to the effect of the warmer weather. Commercial and industrial KWH sales increased 1.7 percent and 1.5 percent, respectively, due to corresponding increases of 2.6 percent and 2.4 percent, respectively, in customers. Residential KWH sales decreased 2.8 percent in 2001 due to milder-than-normal weather. Commercial KWH sales increased 3.4 percent due to an increase in customers, while industrial KWH sales decreased 8.0 percent due to an economic slowdown. Retail sales growth assuming normal weather is expected to be 1.6 percent on average from 2004 to 2013.

***Expenses***

Fuel costs constitute the single largest expense for the Company. The mix of fuel sources for generation of electricity is determined primarily by system load, the unit cost of fuel consumed, and the availability of hydro and nuclear generating units. The amount and sources of generation and the average cost of fuel per net kilowatt-hour generated were as follows:

| | **2003** | 2002 | 2001 |
|---|---|---|---|
| Total generation (billions of KWH) | **73.1** | 70.4 | 68.9 |
| Sources of generation (percent) -- | | | |
| Coal | **75.4** | 77.4 | 74.9 |
| Nuclear | **21.6** | 21.1 | 23.2 |
| Hydro | **2.7** | 1.2 | 1.4 |
| Oil and gas | **0.3** | 0.3 | 0.5 |
| Average cost of fuel per net KWH generated (cents) -- | **1.46** | 1.42 | 1.38 |
| Average cost of purchased power per net KWH (cents) -- | **4.03** | 3.29 | 3.79 |

Fuel expense increased 10.1 percent in 2003 due to an increase in generation of 3.9 percent because of higher wholesale energy demands and a 2.8 percent higher average cost of fuel due to the higher prices of coal and natural gas in 2003. Fuel expense increased 6.8 percent in 2002 due to a 2.2 percent increase in generation because of higher energy demands and a 2.9 percent higher average cost of fuel due to the higher cost of coal. In 2001, fuel expense decreased 7.7 percent due to a decrease in generation because of lower energy demands and a slightly lower average cost of fuel.

Purchased power expense increased $91 million (13.3 percent) in 2003 primarily due to $75 million of additional capacity expense associated with new purchased power contracts that went into effect in 2003 and 2002. Purchased power expense decreased $87 million (11.2 percent) in 2002 and increased $175 million (29.4 percent) in 2001 primarily due to fluctuations in off-system energy purchases used to meet off-system sales commitments. The 2002 decrease in energy purchases was partially offset by a $43 million increase in capacity expense associated with new purchased power contracts.

In 2003, other operation and maintenance expenses decreased $78 million (5.9 percent) due to the timing of generating plant maintenance of $46 million and transmission and distribution maintenance of $8 million and lower severance costs of $8 million. In 2002, other operation and maintenance expenses increased $85 million (6.8 percent) due to the timing of generating plant maintenance of $44 million and transmission maintenance of $17 million, and increased property insurance expense of $5 million. In 2001, other operation and maintenance expenses increased $41 million (3.4 percent) due to additional severance costs, increased scheduled generating plant maintenance, and higher uncollectible account expense.

Depreciation and amortization decreased $54 million in 2003 primarily as a result of lower regulatory charges related to the inclusion of new certified purchased power costs in retail rates on a levelized basis as ordered by the GPSC. Depreciation and amortization decreased $197 million in 2002 primarily as a result of discontinuing accelerated depreciation, beginning amortization of the regulatory liability for accelerated cost recovery, and lowering the composite depreciation rates in January 2002 all in accordance with the retail rate order. Depreciation and amortization decreased $19 million in 2001 primarily due to lower accelerated amortization under the third year of a prior GPSC retail rate order. See Note 3 to the financial statements under "Retail Rate Orders" for additional information.

Taxes other than income taxes increased $11 million (5.4 percent) in 2003 due mainly to a favorable true-up of state property tax valuations in 2002. Taxes other than income taxes remained relatively constant in 2002.

Interest income increased $12 million in 2003 when compared to the prior year due to interest on a favorable income tax settlement of $14.5 million. Interest income remained relatively constant in 2002.

Interest expense increased in 2003 primarily related to an increase in senior notes outstanding that was partially offset by a reduction in short-term debt outstanding. Interest expense decreased in 2002 and 2001 primarily due to lower interest rates that offset new financing costs. The Company refinanced or retired $665 million, $929 million, and $775 million of securities in 2003, 2002, and 2001, respectively. Interest capitalized decreased in 2003 and 2002 due to the transfer of three new generation projects to Southern Power in 2002 and 2001. Interest capitalized increased in 2001 during the construction phase of these new projects. See Note 7 to the financial statements under "Construction Program" for additional information regarding the construction and subsequent transfer of these generation assets. Distributions on mandatorily redeemable preferred securities decreased in 2003 due to the redemption of securities in the second half of 2002 and increased in 2002 due to the issuance of additional securities while remaining unchanged in 2001.

**Effects of Inflation**

The Company is subject to rate regulation that is based on the recovery of historical costs. In addition, the income tax laws are also based on historical costs. Therefore, inflation creates an economic loss because the Company is recovering its costs of investments in dollars that have less purchasing power. While the inflation rate has been relatively low in recent years, it continues to have an adverse effect on the Company because of the large investment in utility plant with long economic lives. Conventional accounting for historical cost does not recognize this economic loss nor the partially offsetting gain that arises through financing facilities with fixed-money obligations such as long-term debt and preferred securities. Any recognition of inflation by regulatory authorities is reflected in the rate of return allowed in the Company's approved electric rates.

**Future Earnings Potential**

***General***

The results of operations for the past three years are not necessarily indicative of future earnings. The level of future earnings depends on numerous factors including the Company's ability to maintain a stable regulatory environment, to achieve energy sales growth while containing costs, and to recover costs related to growing demand and increasingly strict environmental standards.

Growth in energy sales is subject to a number of factors which include weather, competition, new energy contracts with neighboring utilities, energy conservation practiced by customers, the price of electricity, the price elasticity of demand, and the rate of economic growth in the service area.

***Industry Restructuring***

The Company operates as a vertically integrated utility providing electricity to retail customers within its

traditional service area located in the State of Georgia and to wholesale customers in the Southeast. Prices for electricity provided by the Company to retail customers are set by the GPSC under cost-based regulatory principles.

The electric utility industry in the United States is continuing to evolve as a result of regulatory and competitive factors. Among the early primary agents of change was the Energy Policy Act of 1992 (Energy Act). The Energy Act allowed independent power producers to access a utility's transmission network and sell electricity to other utilities.

Although the Energy Act does not provide for retail customer access, it was a major catalyst for restructuring and consolidations that took place within the utility industry. Numerous federal and state initiatives that promote wholesale and retail competition are in varying stages. Among other things, these initiatives allow retail customers in some states to choose their electricity provider. Some states have approved initiatives that result in a separation of the ownership and/or operation of generating facilities from the ownership and/or operation of transmission and distribution facilities. While various restructuring and competition initiatives have been discussed in Georgia, none have been enacted. Enactment could require numerous issues to be resolved, including significant ones relating to recovery of any stranded investments, full cost recovery of energy produced, and other issues related to the energy crisis that occurred in California, as well as the August 2003 power outage in the Northeast. The Company does compete with other electric suppliers within the state. In Georgia, most new retail customers with at least 900 kilowatts of connected load may choose their electricity supplier.

Since 2001, merchant energy companies and traditional electric utilities with significant energy marketing and trading activities have come under severe financial pressures. Many of these companies have completely exited or drastically reduced all energy marketing and trading activities and sold foreign and domestic electric infrastructure assets. The Company has not experienced any material financial impact regarding its limited energy trading operations through Southern Company Services (SCS).

Continuing to be a low-cost producer could provide opportunities to increase the size and profitability in markets that evolve with changing regulation and competition. Conversely, future regulatory changes could adversely affect the Company's growth, and if the Company does not remain a low-cost producer and provide quality service, then energy sales growth could be limited, and this could significantly erode earnings.

***Environmental Matters***

*New Source Review Actions*

In November 1999, the Environmental Protection Agency (EPA) brought a civil action against the Company alleging the Company had violated the New Source Review (NSR) provisions of the Clean Air Act with respect to coal-fired generating facilities at the Company's Bowen and Scherer plants. The civil action requests penalties and injunctive relief, including an order requiring the installation of the best available control technology at the affected units. The action against the Company has been stayed since the spring of 2001 during the appeal of a very similar NSR action against the Tennessee Valley Authority before the U.S. Court of Appeals for the Eleventh Circuit. The Eleventh Circuit appeal was decided on September 16, 2003, and, on February 13, 2004, the EPA petitioned the U.S. Supreme Court to review the Eleventh Circuit's decision. At this time, no party to the Company's action, which was administratively closed two years ago, has asked the court to reopen that case. See Note 3 to the financial statements under "New Source Review Actions" for additional information.

In December 2002 and October 2003, the EPA issued final revisions to its NSR regulations under the Clean Air Act. The December 2002 revisions included changes to the regulatory exclusions and the methods of calculating emissions increases. The October 2003 regulations clarified the scope of the existing Routine Maintenance Repair and Replacement exclusion. A coalition of states and environmental organizations filed petitions for review of these revisions with the U.S. Court of Appeals for the District of Columbia Circuit. On December 24, 2003, the Court of Appeals granted a stay of the October 2003 revisions pending its review of the rules, and ordered that its review would be conducted on an expedited basis. In January 2004, the Bush Administration announced that it would continue to enforce the existing rules until the courts resolve legal challenges to the EPA's revised NSR regulations. In any event, the final regulations must be adopted by the State of Georgia in order to apply to the Company's facilities.

The effect of these final regulations and the related legal challenges cannot be determined at this time.

The Company believes that it complied with applicable laws and the EPA's regulations and interpretations in effect at the time the work in question took place. The Clean Air Act authorizes civil penalties of up to $27,500 per day, per violation at each generating unit. Prior to January 30, 1997, the penalty was $25,000 per day. An adverse outcome in this matter could require substantial capital expenditures and additional operation and maintenance expenses that cannot be determined at this time and could possibly require payment of substantial penalties. This could affect future results of operations, cash flows, and possibly financial condition if such costs are not recovered through regulated rates.

*Plant Wansley Environmental Litigation*

On December 30, 2002, the Sierra Club, Physicians for Social Responsibility, Georgia ForestWatch, and one individual filed a civil suit in the U.S. District Court in Georgia against the Company for alleged violations of the Clean Air Act at four of the units at Plant Wansley. The civil action requests injunctive and declaratory relief, civil penalties, a supplemental environmental project, and attorneys' fees. The Clean Air Act authorizes civil penalties of up to $27,500 per day, per violation at each generating unit. This case is currently scheduled for trial during the summer of 2004. See Note 3 to the financial statements under "Plant Wansley Environmental Litigation" for additional information.

While the Company believes that it has complied with applicable laws and regulations, an adverse outcome could require payment of substantial penalties. The final outcome of this matter cannot now be determined.

*Environmental Statutes and Regulations*

The Company's operations are subject to extensive regulation by state and federal environmental agencies under a variety of statutes and regulations governing environmental media, including air, water, and land resources. Compliance with these environmental requirements will involve significant capital and operating costs, a major portion of which is expected to be recovered through existing ratemaking provisions. Environmental costs that are known and estimable at this time are included in capital expenditures under "Capital Requirements and Contractual Obligations." There is no assurance, however, that all such costs will, in fact, be recovered.

Compliance with the federal Clean Air Act and resulting regulations has been, and will continue to be, a significant focus for the Company. The Title IV acid rain provisions of the Clean Air Act, for example, required significant reductions in sulfur dioxide and nitrogen oxide emissions. Title IV compliance was effective in 2000 and associated construction expenditures totaled approximately $206 million. Some of these expenditures also assisted the Company in complying with nitrogen oxide emission reduction requirements under Title I of the Clean Air Act, which were designed to address one-hour ozone nonattainment problems in Atlanta, Georgia. The State of Georgia adopted regulations that required additional nitrogen oxide emission reductions from May through September of each year at plants in and/or near those nonattainment areas. Seven generating plants in the Atlanta area are currently subject to those requirements, the most recent of which went into effect in 2003. Construction expenditures for compliance with the nitrogen oxide emission reduction requirements are estimated to be $698 million, of which $17 million remains to be spent.

On September 26, 2003, the EPA published a final rule effective January 1, 2004 reclassifying the Atlanta area from a "serious" to a "severe" nonattainment area for the one-hour ozone air quality standard under Title I of the Clean Air Act. The attainment deadline is to be as expeditious as practicable but not later than November 15, 2005. If the Atlanta area fails to comply with the one-hour ozone standard by the deadline, all major sources of nitrogen oxides and volatile organic compounds located in the nonattainment area, including the Company's plants McDonough and Yates, could be subject to payment of annual emissions fees for nitrogen oxides emitted above 80 percent of the baseline period. The baseline period is expected to be the calendar year 2005. Based on average emissions at these units over the past three years, such fees could reach $23 million annually. The final outcome of this matter will depend on the baseline period selected and the development, approval, and implementation of applicable regulations including new regulations for the eight-hour ozone air quality standard.

To help ozone nonattainment areas attain the one-hour ozone standard, the EPA issued regional nitrogen oxide reduction rules in 1998. Those rules required 21

states, including Georgia, to reduce and cap nitrogen oxide emissions from power plants and other large industrial sources. As a result of litigation challenging the rule, the courts required the EPA to complete a separate rulemaking before the requirements can be applied in Georgia. The final EPA rules have not been issued in Georgia. The impact of this rule on the Company will depend on the form in which it is finalized and cannot be determined at this time.

In July 1997, the EPA revised the national ambient air quality standards for ozone and particulate matter. These revisions made the standards significantly more stringent. In the subsequent litigation of these standards, the U.S. Supreme Court found the EPA's implementation program for the new eight-hour ozone standard unlawful and remanded it to the EPA for further rulemaking. During 2003, the EPA proposed implementation rules designed to address the court's concerns. The EPA plans to designate areas as attainment or nonattainment with the new eight-hour ozone standard in April 2004 and with the new fine particulate matter standard by the end of 2004. These designations will be based on air quality data for 2001 through 2003. Several areas within the Company's service area are likely to be designated nonattainment under these standards. State implementation plans (SIPs), including new emission control regulations necessary to bring those areas into attainment, could be required as early as 2007. Those SIPs could require reductions in sulfur dioxide emissions and could require further reductions in nitrogen oxide emissions from power plants. If so, reductions could be required sometime after 2007. The impact of any new standards will depend on the development and implementation of applicable regulations and cannot be determined at this time.

In January 2004, the EPA issued a proposed Interstate Air Quality Rule to address interstate transport of ozone and fine particles. This proposed rule would require additional year-round sulfur dioxide and nitrogen oxide emission reductions from power plants in the eastern United States in two phases – in 2010 and 2015. The EPA currently plans to finalize this rule by 2005. If finalized, the rule could modify or supplant other SIP requirements for attainment of the fine particulate matter standard and the eight-hour ozone standard. The impact of this rule on the Company will depend upon the specific requirements of the final rule and cannot be determined at this time.

Further reductions in sulfur dioxide and nitrogen oxides could also be required under the EPA's Regional Haze rules. The Regional Haze rules require states to establish Best Available Retrofit Technology (BART) standards for certain sources that contribute to regional haze. The Company has a number of plants that could be subject to these rules. The EPA's regional haze program calls for states to submit SIPs in 2007. The SIPs must contain emission reduction strategies for implementing BART and achieving progress toward the Clean Air Act's visibility improvement goal. In 2002, however, the U.S. Court of Appeals for the District of Columbia Circuit vacated and remanded the BART provisions of the federal Regional Haze rules to the EPA for further rulemaking. The EPA has entered into an agreement that requires proposed revised rules in April 2004 and final rules in 2005. Because new BART rules have not been developed and state visibility assessments for progress are only beginning, it is not possible to determine the effect of these rules on the Company at this time.

The EPA's Compliance Assurance Monitoring (CAM) regulations under Title V of the Clean Air Act require that monitoring be performed to ensure compliance with emissions limitations on an ongoing basis. In 2004 and 2005, a number of the Company's plants will likely be subject to CAM requirements for at least one pollutant, in most cases, particulate matter. The Company is in the process of developing CAM plans. Because the plans are still under development, the Company cannot determine the costs associated with implementation of the CAM regulations. Actual ongoing monitoring costs are expensed as incurred and are not material for any year presented.

In January 2004, the EPA issued proposed rules regulating mercury emissions from electric utility boilers. The proposal solicits comments on two possible approaches for the new regulations – a Maximum Achievable Control Technology approach and a cap-and-trade approach. Either approach would require significant reductions in mercury emissions from Company facilities. The regulations are scheduled to be finalized by the end of 2004, and compliance could be required as early as 2007. Because the regulations have not been finalized, the impact on the Company cannot be determined at this time.

Several major bills to amend the Clean Air Act to impose more stringent emissions limitations on power plants have been proposed by Congress. Three of these,

the Bush Administration's Clear Skies Act, the Clean Power Act of 2003, and the Clean Air Planning Act of 2003, propose to further limit power plant emissions of sulfur dioxide, nitrogen oxides, and mercury. The latter two bills also propose to limit emissions of carbon dioxide. The cost impacts of such legislation would depend upon the specific requirements enacted and cannot be determined at this time.

Domestic efforts to limit greenhouse gas emissions have been spurred by international discussions surrounding the Framework Convention on Climate Change and specifically the Kyoto Protocol, which proposes international constraints on the emissions of greenhouse gases. The Bush Administration does not support U.S. ratification of the Kyoto Protocol or other mandatory carbon dioxide reduction legislation and has instead announced a new voluntary climate initiative, known as Climate VISION, which seeks an 18 percent reduction by 2012 in the rate of greenhouse gas emissions relative to the dollar value of the U.S. economy. Through Southern Company, the Company is involved in a voluntary electric utility industry sector climate change initiative in partnership with the government. The electric utility sector has pledged to reduce its greenhouse gas intensity 3 to 5 percent over the next decade, and is in the process of developing a memorandum of understanding with the Department of Energy (DOE) to cover this voluntary program.

The Company must comply with other environmental laws and regulations that cover the handling and disposal of waste and releases of hazardous substances. Under these various laws and regulations, the Company could incur substantial costs to clean up properties. The Company conducts studies to determine the extent of any required cleanup and has recognized in its financial statements the costs to clean up and monitor known sites. Amounts expensed for cleanup and ongoing monitoring costs were not material for any year presented. The Company may be liable for a portion or all required cleanup costs for additional sites that may require environmental remediation. Under GPSC ratemaking provisions, $21 million has been deferred in a regulatory liability account for use in meeting future environmental remediation costs. See Note 3 to the financial statements under "Potentially Responsible Party Status" for information regarding the Company's potentially responsible party status at sites in Georgia.

Under the Clean Water Act, the EPA has been developing new rules aimed at reducing impingement and entrainment of fish and fish larvae at power plants' cooling water intake structures. On February 16, 2004, the EPA finalized these rules. These rules will require numerous biological studies, and, perhaps, retrofits to some intake structures at existing power plants. The impact of these new rules will depend on the results of studies and analyses performed as part of the rules' implementation.

The Company is also planning to install cooling towers at some of its facilities to cool water prior to discharge under the Clean Water Act. Cooling towers for two plants near Atlanta are scheduled for completion in 2004 and 2008 at an estimated total of $160 million, of which $90 million remains to be spent. Also, the Company is conducting a study of the aquatic environment at another facility to determine if additional controls are necessary.

In addition, under the Clean Water Act, the EPA and the State of Georgia Environmental Protection Division (EPD) are developing total maximum daily loads (TMDLs) for certain impaired waters. Establishment of maximum loads by the EPA or EPD may result in lowering permit limits for various pollutants and a requirement to take additional measures to control non-point source pollution (e.g., storm water runoff) at facilities that discharge into waters for which TMDLs are established. Because the effect on the Company will depend on the actual TMDLs and permit limitations established by the implementing agency, it is not possible to determine the effect on the Company at this time.

Several major pieces of environmental legislation are periodically considered for reauthorization or amendment by Congress. These include: the Clean Air Act; the Clean Water Act; the Comprehensive Environmental Response, Compensation, and Liability Act; the Resource Conservation and Recovery Act; the Toxic Substances Control Act; the Emergency Planning & Community Right-to-Know Act; and the Endangered Species Act.

Compliance with possible additional federal or state legislation or regulations related to global climate change, electromagnetic fields, or other environmental and health concerns could also significantly affect the Company. The impact of any new legislation, changes to existing legislation, or environmental regulations could affect many areas of the Company's operations.

The full impact of any such changes cannot, however, be determined at this time.

*FERC Matters*

*Transmission*

In December 1999, the Federal Energy Regulatory Commission (FERC) issued its final rule (Order 2000) on Regional Transmission Organizations (RTOs). Order 2000 encouraged utilities owning transmission systems to form RTOs on a voluntary basis. Through Southern Company, the Company worked with a number of utilities in the Southeast to develop a for-profit RTO known as SeTrans. In 2002, the sponsors of SeTrans established a Stakeholder Advisory Committee to provide input into the development of the RTO from other sectors of the electric industry, as well as consumers. During the development of SeTrans, state regulatory authorities expressed concern over certain aspects of the FERC's policies regarding RTOs. In December 2003, the SeTrans sponsors announced that they would suspend work on SeTrans because the regulated utility participants, including the Company, had determined that it was highly unlikely to obtain support of both federal and state regulatory authorities. Any impact of the FERC's rule on the Company will depend on the regulatory reaction to the suspension of SeTrans and future developments, which cannot now be determined.

In July 2002, the FERC issued a notice of proposed rulemaking regarding open access transmission service and standard electricity market design. The proposal, if adopted, would among other things: (1) require transmission assets of jurisdictional utilities to be operated by an independent entity; (2) establish a standard market design; (3) establish a single type of transmission service that applies to all customers; (4) assert jurisdiction over the transmission component of bundled retail service; (5) establish a generation reserve margin; (6) establish bid caps for day ahead and spot energy markets; and (7) revise the FERC policy on the pricing of transmission expansions. Comments on the proposal were submitted by many interested parties, including Southern Company, and the FERC has indicated that it has revised certain aspects of the proposal in response to public comments. Proposed energy legislation would prohibit the FERC from issuing the final rule before October 31, 2006, and from making any final rule effective before December 31, 2006. That legislation has been approved by the House of Representatives but remains pending before the Senate. Passage of the legislation now appears in doubt. It is uncertain whether in the absence of legislation the FERC will move forward with any part or all of the proposed rule. Any impact of this proposal on the Company will depend on the form in which the final rule may be ultimately adopted. However, the Company's financial statements could be adversely affected by changes in the transmission regulatory structure in its regional power market.

*Market-Based Rate Authority*

The Company has obtained FERC approval to sell power to non-affiliates at market-based prices under specific contracts. Through SCS, as agent, the Company also has FERC authority to make short-term opportunity sales at market rates. Specific FERC approval must be obtained with respect to a market-based contract with an affiliate. In November 2001, the FERC modified the test it uses to consider utilities' applications to charge market-based rates and adopted a new test called the Supply Margin Assessment (SMA). The FERC applied the SMA to several utilities, including Southern Company's retail operating companies, and found them to be "pivotal suppliers" in their control area market and ordered the implementation of several mitigation measures. SCS, on behalf of the Company and the other retail operating companies, sought rehearing of the FERC order and the FERC delayed implementation of certain mitigation measures. SCS, on behalf of the Company and the other retail operating companies, submitted comments to the FERC in 2002 regarding these issues. In December 2003, the FERC issued a staff paper discussing alternatives and held a technical conference in January 2004. The Company anticipates that the FERC will address the requests for rehearing in the near future. Regardless of the outcome of the SMA proposal, the FERC retains the ability to modify or withdraw the authorization for any seller to sell at market-based rates, if it determines that the underlying conditions for having such authority are no longer applicable. The final outcome of this matter will depend on the form in which the SMA test and mitigation measures rules may be ultimately adopted and cannot be determined at this time.

Purchased power agreements (PPAs) by the Company and Savannah Electric for Southern Power's Plant McIntosh capacity were certified by the GPSC in December 2002 after a competitive bidding process. In April 2003, Southern Power applied for FERC approval

of the PPAs. Interveners have made filings in opposition of the FERC's acceptance of the PPAs, alleging that the PPAs do not meet the applicable standards for market-based rates between alliliates. In July 2003, the FERC accepted the PPAs to become effective as scheduled on June 1, 2005, subject to refund, and ordered that hearings be held. For additional information, see Note 3 to the financial statements under "FERC Matters."

*Other Matters*

The Company is currently operating under a GPSC approved three-year retail rate order ending December 31, 2004. Under the terms of the order, earnings are evaluated annually against a retail return on common equity range of 10 percent to 12.95 percent. Two-thirds of any earnings above the 12.95 percent return are applied to rate refunds with the remaining one-third retained by the Company. The Company is required to file a general rate case on July 1, 2004, in response to which the GPSC would be expected to determine whether the rate order should be continued, modified, or discontinued. See Note 3 to the financial statements under "Retail Rate Orders" for additional information.

The Company has entered into various long-term PPAs which will result in higher capacity and operating and maintenance payments in future years. These agreements have been certified by the GPSC under Georgia's Integrated Resource Plan statute. Once certified, these costs are recoverable in rates under the statute. See Notes 3 and 7 to the financial statements under "Retail Rate Orders" and "Fuel and Purchased Power Commitments," respectively, for additional information.

On December 24, 2002, the GPSC approved an order allowing the Company to implement a natural gas and oil procurement and hedging program effective January 1, 2003. This order allows the Company to use financial instruments to hedge price and commodity risk associated with these fuels. The order limits the program in terms of time, volume, dollars, and physical amounts hedged. The costs of the program, including any net losses, are recovered as a fuel cost through the fuel cost recovery mechanism. Annual net financial gains from the hedging program will be shared with the retail customers receiving 75 percent and the Company retaining 25 percent of the net gains. There were no net gains in 2003.

In accordance with Financial Accounting Standards Board (FASB) Statement No. 87, Employers' Accounting for Pensions, the Company recorded non-cash pension income, before tax, of approximately $54 million, $59 million, and $60 million in 2003, 2002, and 2001, respectively. Future pension income is dependent on several factors including trust earnings and changes to the plan. The decline in pension income is expected to continue and to become an expense by as early as 2007. Postretirement benefit costs for the Company were $41 million, $43 million and $43 million in 2003, 2002, and 2001, respectively, and are expected to trend upward. A portion of pension and postretirement benefit costs is capitalized based on construction-related labor charges. For the Company, pension income and postretirement benefit costs are a component of the regulated rates and generally do not have a significant long-term effect on net income. For additional information, see Note 2 to the financial statements.

On December 8, 2003, President Bush signed into law the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (Medicare Act). The Medicare Act introduces a prescription drug benefit for Medicare-eligible retirees starting in 2006, as well as a federal subsidy to plan sponsors like the Company that provide prescription drug benefits. In accordance with FASB Staff Position No. 106-1, the Company has elected to defer recognizing the effects of the Medicare Act for its postretirement plans under FASB Statement No. 106, Employers' Accounting for Postretirement Benefits Other than Pension until authoritative guidance on accounting for the federal subsidy is issued or until a significant event occurs that would require remeasurement of the plans' assets and obligations. The Company anticipates that the benefits it pays after 2006 will be lower as a result of the Medicare Act; however, the retiree medical obligations and costs reported in Note 2 to the financial statements do not reflect these changes. The final accounting guidance could require changes to previously reported information.

Nuclear security legislation was recently introduced and considered in Congress both as a free-standing bill in the Senate and as a part of comprehensive energy legislation in a House-Senate Conference Report. Neither of the proposals has been enacted. The Nuclear Regulatory Commission (NRC) also has ordered additional security measures for licensees in 2003. The Company is in the process of implementation and must be in full compliance with these orders by October 29, 2004. The requirements of the latest orders will have an

impact on the Company's nuclear power plants and result in increased operation and maintenance expenses as well as additional capital expenditures. The precise impact of the new requirements will depend upon the details of the implementation of the new requirements, which have not been finalized.

The Georgia General Assembly has recently adopted legislation that changes the law concerning condemnation of land for electric transmission lines. The legislation requires that a utility planning to construct or expand a transmission line hold public meetings in each county where the line would be located and that the utility attempt to negotiate a settlement with each affected property owner. The legislation also provides for the reconveyance of property interests that are condemned for a transmission line but are not used for that purpose within a specified number of years. The legislation, unless vetoed by Governor Perdue, will become effective on July 1, 2004.

The Company is involved in various matters being litigated, regulatory matters, and related issues that could affect future earnings. See Note 3 to the financial statements for information regarding material issues.

## ACCOUNTING POLICIES

### Application of Critical Accounting Policies and Estimates

The Company prepares its financial statements in accordance with accounting principles generally accepted in the United States. Significant accounting policies are described in Note 1 to the financial statements. In the application of these policies, certain estimates are made that may have a material impact on the Company's results of operations and related disclosures. Different assumptions and measurements could produce estimates that are significantly different from those recorded in the financial statements. Senior management has discussed the development and selection of the critical accounting policies and estimates described below with the Controls and Compliance Committee of the Company's Board of Directors and the Audit Committee of Southern Company's Board of Directors.

#### *Electric Utility Regulation*

The Company is subject to retail regulation by the GPSC and wholesale regulation by the FERC. These regulatory agencies set the rates the Company is permitted to charge customers based on allowable costs. As a result, the Company applies FASB Statement No. 71, Accounting for the Effects of Certain Types of Regulation. Through the ratemaking process, the regulators may require the inclusion of costs or revenues in periods different than when they would be recognized by a non-regulated company. This treatment may result in the deferral of expenses and the recording of related regulatory assets based on anticipated future recovery through rates or the deferral of gains or creation of liabilities and the recording of related regulatory liabilities. The application of Statement No. 71 has a further effect on the Company's financial statements as a result of the estimates of allowable costs used in the ratemaking process. These estimates may differ from those actually incurred by the Company; therefore, the accounting estimates inherent in specific costs such as depreciation, nuclear decommissioning, and pension and postretirement benefits have less of a direct impact on the Company's results of operations than they would on a non-regulated company.

As reflected in Note 1 to the financial statements under "Regulatory Assets and Liabilities," significant regulatory assets and liabilities have been recorded. Management reviews the ultimate recoverability of these regulatory assets and liabilities based on applicable regulatory guidelines. However, adverse legislation and judicial or regulatory actions could materially impact the amounts of such regulatory assets and liabilities and could adversely impact the Company's financial statements.

#### *Contingent Obligations*

The Company is subject to a number of federal and state laws and regulations, as well as other factors and conditions that potentially subject it to environmental, litigation, income tax, and other risks. See "Future Earnings Potential" and Note 3 to the financial statements for more information regarding certain of these contingencies. The Company periodically evaluates its exposure to such risks and records reserves for those matters where a loss is considered probable and reasonably estimable in accordance with generally accepted accounting principles. The adequacy of reserves can be significantly affected by external events or conditions that can be unpredictable; thus, the ultimate outcome of such matters could materially affect the Company's financial statements. These events or conditions include the following:

- Changes in existing state or federal regulation by governmental authorities having jurisdiction over air quality, water quality, control of toxic substances, hazardous and solid wastes, and other environmental matters.
- Changes in existing income tax regulations or changes in Internal Revenue Service interpretations of existing regulations.
- Identification of additional sites that require environmental remediation or the filing of other complaints in which the Company may be asserted to be a potentially responsible party.
- Identification and evaluation of other potential lawsuits or complaints in which the Company may be named as a defendant.
- Resolution or progression of existing matters through the legislative process, the court systems, the EPA, or the EPD.

**New Accounting Standards**

Prior to January 2003, the Company accrued for the ultimate cost of retiring most long-lived assets over the life of the related asset through depreciation expense. FASB Statement No. 143, Accounting for Asset Retirement Obligations, established new accounting and reporting standards for legal obligations associated with the ultimate cost of retiring long-lived assets. The present value of the ultimate costs for an asset's future retirement is recorded in the period in which the liability is incurred. The costs are capitalized as part of the related long-lived asset and depreciated over the asset's useful life. Additionally, non-regulated companies are no longer permitted to continue accruing future retirement costs for long-lived assets that they do not have a legal obligation to retire. For additional information regarding the impact of adopting this standard effective January 1, 2003, see Note 1 to the financial statements under "Asset Retirement Obligations and Other Costs of Removal."

FASB Statement No. 149, Amendment of Statement 133 on Derivative Instruments and Hedging Activities, which further amends and clarifies the accounting and reporting for derivative instruments, became effective generally for financial instruments entered into or modified after June 30, 2003. Current interpretations of Statement No. 149 indicate that certain electricity forward transactions subject to unplanned netting -- including those typically referred to as "book outs" -- may only qualify as cash flow hedges if an entity can demonstrate that physical delivery or receipt of power occurred. The Company's forward electricity contracts continue to be exempt from fair value accounting requirements or to qualify as cash flow hedges, with the related gains and losses deferred in other comprehensive income. The implementation of Statement No. 149 did not have a material effect on the Company's financial statements.

In July 2003, the Emerging Issues Task Force (EITF) of the FASB issued EITF No. 03-11, which became effective on October 1, 2003. The standard addresses the reporting of realized gains and losses on derivative instruments and is being interpreted to require book outs to be recorded on a net basis in operating revenues. Adoption of this standard did not have a material impact on the Company's financial statements.

FASB Interpretation No. 46, Consolidation of Variable Interest Entities, which was originally issued in January 2003, requires the primary beneficiary of a variable interest entity to consolidate the related assets and liabilities. In December 2003, the FASB revised Interpretation No. 46 and deferred the effective date until March 31, 2004 for interests held in variable interest entities other than special purpose entities.

Current analysis indicates that the trusts established by the Company to issue preferred securities are variable interest entities under Interpretation No. 46, and that the Company is not the primary beneficiary of the trusts. If this conclusion is finalized, effective March 31, 2004, the trust assets and liabilities -- including the preferred securities issued by the trusts -- will be deconsolidated. The investments in the trusts and the loans from the trusts to the Company will be reflected as equity method investments and as long-term notes payable to affiliates, respectively, on the Balance Sheets. Based on December 31, 2003 values, this treatment would result in an increase of approximately $29 million to both total assets and liabilities. See Note 6 to the financial statements under "Mandatorily Redeemable Preferred Securities" for additional information.

In May 2003, the FASB issued Statement No. 150, Accounting for Certain Financial Instruments with Characteristics of Both Liabilities and Equity, which requires classification of certain financial instruments within its scope, including shares that are mandatorily redeemable, as liabilities. Statement No. 150 was effective for financial instruments entered into or modified after May 31, 2003, and otherwise on July 1, 2003. In accordance with Statement No. 150, the Company's mandatorily redeemable preferred securities

are reflected as liabilities on the Balance Sheets. The adoption of Statement No. 150 had no impact on the Statements of Income and Cash Flows.

## FINANCIAL CONDITION AND LIQUIDITY

### Overview

Over the last several years, the Company's financial condition has remained stable with emphasis on cost control measures combined with significantly lower cost of capital, achieved through the refinancing and/or redemption of higher-cost long-term debt, preferred stock and preferred securities. The Company operated at high levels of reliability while achieving industry-leading customer satisfaction levels and continuing to have retail prices below the national average.

In 2003, gross utility plant additions were $743 million. These additions were primarily related to transmission and distribution facilities and the purchase of nuclear fuel and equipment to comply with environmental standards. The majority of funds needed for gross property additions for the last several years have been provided from operating activities. The Statements of Cash Flows provide additional details.

The Company's ratio of common equity to total capitalization -- including short-term debt -- was 48.3 percent in 2003, 48.3 percent in 2002, and 47.7 percent in 2001. See Note 6 to the financial statements for additional information.

### Sources of Capital

The Company expects to meet future capital requirements primarily using funds generated from operating activities and equity funds from Southern Company and by the issuance of new debt securities, term loans, and short-term borrowings. The Company had $137 million of GPSC approved financing authority as of December 31, 2003. The Company used this remaining authority in February 2004. The type and timing of future financings will depend on market conditions and regulatory approval of additional financing authority. Recently, the Company has relied on the issuance of unsecured debt and preferred securities, in addition to unsecured pollution control bonds issued for its benefit by public authorities, to meet its long-term external financing requirements.

In February 2002, the Company defeased its first mortgage bond indenture and all related liens or encumbrances on the Company's property were discharged. As a result, the Company cannot issue any securities pursuant to this indenture. See "First Mortgage Bond Indenture" under Note 6 to the financial statements for additional information.

The Company obtains financing separately without credit support from any affiliate. The Southern Company system does not maintain a centralized cash or money pool. Therefore, funds of the Company are not commingled with funds of any other company. In accordance with the Public Utility Holding Company Act, most loans between affiliated companies must be approved in advance by the Securities and Exchange Commission (SEC).

The Company's current liabilities frequently exceed current assets because of the continued use of short-term debt as a funding source to meet cash needs which can fluctuate significantly due to the seasonality of the business.

To meet short-term cash needs and contingencies, the Company had approximately $725 million of unused credit arrangements with banks at the beginning of 2004. See Note 6 to the financial statements under "Bank Credit Arrangements" for additional information.

The Company may also meet short-term cash needs through a Southern Company subsidiary organized to issue and sell commercial paper and extendible commercial notes at the request and for the benefit of the Company and the other Southern Company operating companies. Proceeds from such issuances for the benefit of the Company are loaned directly to the Company and are not commingled with proceeds from issuances for the benefits of any other operating company. The obligations of each company under these arrangements are several; there is no cross affiliate credit support. At December 31, 2003, the Company had outstanding $137 million of commercial paper and no extendible commercial notes.

At the beginning of 2004, the Company had not used any of its available credit arrangements. Bank credit arrangements are as follows:

| | | Expires |
|---|---|---|
| Total | Unused | 2004 |
| | (in millions) | |
| $725 | $725 | $725 |

All of these credit arrangements allow for the execution of term loans for an additional two year period.

### Financing Activities

In 2003, the Company's financing costs increased due to the issuance of new debt during the year. New issues during 2001 through 2003 totaled $3.2 billion and retirement or repayment of higher-cost securities totaled $2.4 billion.

Composite financing rates for long-term debt, preferred stock, and preferred securities for the years 2001 through 2003, as of year-end, were as follows:

| | **2003** | 2002 | 2001 |
|---|---|---|---|
| Composite interest rate on long-term debt | **4.01%** | 4.47% | 4.26% |
| Composite preferred stock dividend rate | **4.60** | 4.60 | 4.60 |
| Composite preferred securities distribution rate | **6.35** | 6.35 | 7.49 |

Subsequent to December 31, 2003, the Company has issued $550 million of new securities with the proceeds used primarily to retire higher coupon long-term debt and for construction and general corporate purposes.

### Credit Rating Risk

The Company does not have any credit agreements that would require material changes in payment schedules or terminations as a result of a credit rating downgrade. There are contracts that could require collateral -- but not accelerated payment -- in the event of a credit rating change to below investment grade. These contracts are primarily for physical electricity purchases and sales, fixed-price physical gas purchases, and agreements covering interest rate swaps. At December 31, 2003, the maximum potential collateral requirements were approximately $227 million. At December 31, 2003, there were no material collateral requirements for the gas purchase contracts or other financial instrument agreements.

### Market Price Risk

Due to cost-based regulations the Company has limited exposure to market volatility in interest rates, commodity fuel prices and prices of electricity. To manage the volatility attributable to these exposures, the Company nets the exposures to take advantage of natural offsets and enters into various derivative transactions for the remaining exposures pursuant to the Company's policies in areas such as counterparty exposure and hedging practices. Company policy is that derivatives are to be used primarily for hedging purposes. Derivative positions are monitored using techniques that include market valuation and sensitivity analysis.

To mitigate the Company's exposure to interest rates, the Company has entered into interest rate swaps that were designed as cash flow hedges of variable rate debt or anticipated debt issuances. At December 31, 2003 the Company had no variable long-term debt outstanding that had not been hedged. Therefore, there would be no effect on annualized interest expense if the Company sustained a 100 basis point change in interest rates for all variable rate long-term debt. The Company is not aware of any facts or circumstances that would significantly affect such exposures in 2004. See Notes 1 and 6 to the financial statements under "Financial Instruments" for additional information.

To mitigate residual risks relative to movements in electricity prices, the Company enters into fixed price contracts for the purchase and sale of electricity through the wholesale electricity market and, to a lesser extent, into similar contracts for gas purchases. Fair value of changes in derivative energy contracts and year-end valuations were as follows:

| | Changes in Fair Value | |
|---|---|---|
| | **2003** | 2002 |
| | (in millions) | |
| Contracts beginning of year | **$0.1** | $0.4 |
| Contracts realized or settled | **(0.4)** | ~~0.9~~ |
| New contracts at inception | **-** | - |
| Changes in valuation techniques | **-** | - |
| Current period changes | **3.5** | (1.2) |
| Contracts end of year | **$3.2** | $0.1 |

| | Source of 2003 Year-End Valuation Prices | | |
|---|---|---|---|
| | Total | Maturity | |
| | Fair Value | Year 1 | 1-3 Years |
| | | (in millions) | |
| Actively quoted | **$3.2** | $2.8 | $0.4 |
| External sources | **-** | - | - |
| Models and other methods | **-** | - | - |
| Contracts end of year | **$3.2** | $2.8 | $0.4 |

Unrealized gains and losses from mark to market adjustments on derivative contracts related to the Company's fuel hedging programs are recorded as regulatory assets and liabilities. Realized gains and losses from these programs are included in fuel expense and are recovered through the Company's fuel cost recovery mechanism. Gains and losses on derivative contracts that are not designated as hedges are recognized in the income statement as incurred. At December 31, 2003, the fair value of derivative energy contracts reflected in the financial statements was as follows:

| | Amounts (in millions) |
|---|---|
| Regulatory liabilities, net | $3.2 |
| Other comprehensive income | - |
| Net income | - |
| Total fair value | $3.2 |

Gains (losses) recognized in income in 2003, 2002, and 2001 were not material. The Company is exposed to market price risk in the event of nonperformance by counterparties to the derivative energy contracts. The Company's policy is to enter into agreements with counterparties that have investment grade credit ratings by Moody's and Standard & Poor's or with counterparties who have posted collateral to cover potential credit exposure. Therefore, the Company does not anticipate market risk exposure from nonperformance by the counterparties. For additional information, see Notes 1 and 6 to the financial statements under "Financial Instruments."

**Capital Requirements and Contractual Obligations**

The construction program of the Company is currently estimated to be $747 million for 2004, $812 million for 2005, and $1,043 million for 2006. Environmental expenditures included in these amounts are $91 million, $113 million, and $316 million for 2004, 2005, and 2006, respectively. Actual construction costs may vary from this estimate because of changes in such factors as: business conditions; environmental regulations; nuclear plant regulations; FERC rules and transmission regulations; load projections; the cost and efficiency of construction labor, equipment, and materials; and the cost of capital. In addition, there can be no assurance that costs related to capital expenditures will be fully recovered.

The Company has no generating plants under construction. However, construction related to new transmission and distribution facilities and capital improvements to existing generation, transmission and distribution facilities, including those needed to meet the environmental standards previously discussed, are ongoing.

As a result of requirements by the NRC, the Company has established external trust funds for nuclear decommissioning costs. For additional information, see Note 1 to the financial statements under "Nuclear Decommissioning." Also as discussed in Note 1 to the financial statements under "Revenues and Fuel Costs," in 1993 the DOE implemented a special assessment over a 15-year period on utilities with nuclear plants to be used for the decontamination and decommissioning of its nuclear fuel enrichment facilities.

In addition, as discussed in Note 2 to the financial statements, the Company provides postretirement benefits to substantially all employees and funds trusts to the extent required by the GPSC and the FERC.

Other funding requirements related to obligations associated with scheduled maturities of long-term debt and preferred securities, as well as the related interest and distributions, preferred stock dividends, leases, and other purchase commitments are as follows. See Notes 1, 6, and 7 to the financial statements for additional information.

| | 2004 | 2005-2006 | 2007-2008 | After 2008 | Total |
|---|---|---|---|---|---|
| | | | (in millions) | | |
| Long-term debt and preferred securities[a] -- | | | | | |
| Principal | $ 2 | $ 605 | $ 306 | $3,792 | $ 4,705 |
| Interest and distributions | 211 | 409 | 363 | 3,885 | 4,868 |
| Preferred stock dividends[b] | 1 | 1 | 1 | - | 3 |
| Operating leases | 34 | 56 | 44 | 72 | 206 |
| Purchase commitments[c] -- | | | | | |
| Capital [d] | 718 | 1,815 | 2,286 | - | 4,819 |
| Coal and nuclear fuel | 1,321 | 1,940 | 975 | 183 | 4,419 |
| Natural gas[e] | 156 | 297 | 280 | 1,625 | 2,358 |
| Purchased power | 293 | 828 | 852 | 2,573 | 4,546 |
| Trusts[f] -- | | | | | |
| Nuclear decommissioning | 9 | 17 | 17 | 95 | 138 |
| Postretirement benefits | 9 | 21 | - | - | 30 |
| DOE assessments | 3 | 7 | - | - | 10 |
| Total | $2,757 | $5,996 | $5,124 | $12,225 | $26,102 |

(a) All amounts are reflected based on final maturity dates. The Company will continue to retire higher-cost securities and replace these obligations with lower-cost capital if market conditions permit. Variable rate interest obligations are estimated based on rates as of January 1, 2004, as reflected in the Statements of Capitalization.

(b) Preferred stock does not mature; therefore, amounts are provided for the next five years only.

(c) The Company generally does not enter into non-cancelable commitments for other operation and maintenance expenditures. Total other operation and maintenance expenses for the last three years were $1.2 billion, $1.3 billion, and $1.2 billion, respectively.

(d) The Company forecasts capital expenditures over a five-year period. Amounts represent current estimates of total expenditures, excluding those amounts related to contractual purchase commitments for uranium and nuclear fuel conversion, enrichment, and fabrication services. At December 31, 2003, significant purchase commitments were outstanding in connection with the construction program.

(e) Natural gas purchase commitments are based on various indices at the time of delivery. Amounts reflected have been estimated based on New York Mercantile future prices at December 31, 2003.

(f) Projections of nuclear decommissioning trust contributions are based on the current GPSC order which will be reevaluated in the Company's upcoming rate case and is subject to change. The Company forecasts postretirement trust contributions over a three-year period. No contributions related to the Company's pension trust are currently expected during this period. See Note 2 to the financial statements for additional information related to the pension plans.

## Cautionary Statement Regarding Forward-Looking Information

The Company's 2003 Annual Report includes forward-looking statements in addition to historical information. Forward-looking information includes, among other things, statements concerning the estimated construction and other expenditures and the Company's projections for energy sales and its goals for future generating capacity and earnings growth. In some cases, forward-looking statements can be identified by terminology such as "may," "will," "could," "should," "expects," "plans," "anticipates," "believes," "estimates," "projects," "predicts," "potential," or "continue" or the negative of these terms or other comparable terminology. The Company cautions that there are various important factors that could cause actual results to differ materially from those indicated in the forward-looking statements; accordingly, there can be no assurance that such indicated results will be realized. These factors include:

- the impact of recent and future federal and state regulatory change, including legislative and regulatory initiatives regarding deregulation and restructuring of the electric utility industry and also changes in environmental, tax and other laws and regulations to which the Company is subject, as well as changes in application of existing laws and regulations;
- current and future litigation, regulatory investigations, proceedings or inquiries, including the pending EPA civil action against the Company;
- the effects, extent, and timing of the entry of additional competition in the markets in which the Company operates;
- the impact of fluctuations in commodity prices, interest rates, and customer demand;
- available sources and costs of fuels;
- ability to control costs;
- investment performance of the Company's employee benefit plans;
- advances in technology;
- state and federal rate regulations and pending and future rate cases and negotiations;
- effects of and changes in political, legal, and economic conditions and developments in the United States, including the current soft economy;
- internal restructuring or other restructuring options that may be pursued;
- potential business strategies, including acquisitions or dispositions of assets, which cannot be assured to be completed or beneficial to the Company;
- the ability of counterparties of the Company to make payments as and when due;
- the ability to obtain new short- and long-term contracts with neighboring utilities;
- the direct or indirect effects on the Company's business resulting from the terrorist incidents on September 11, 2001, or any similar incidents or responses to such incidents;
- financial market conditions and the results of financing efforts, including the Company's credit ratings;
- the ability of the Company to obtain additional generating capacity at competitive prices;
- weather and other natural phenomena;
- the direct or indirect effects on the Company's business resulting from the August 2003 power outage in the Northeast, or any similar incidents;
- the effect of accounting pronouncements issued periodically by standard-setting bodies; and
- other factors discussed elsewhere herein and in other reports (including the Form 10-K) filed from time to time by the Company with the SEC.

## STATEMENTS OF COMPREHENSIVE INCOME

**For the Years Ended December 31, 2003, 2002, and 2001**
**Georgia Power Company 2003 Annual Report**

| | 2003 | 2002 | 2001 |
|---|---|---|---|
| | | *(in thousands)* | |
| **Net income after dividends on preferred stock** | **$630,577** | $617,629 | $610,335 |
| Other comprehensive income (loss): | | | |
| Change in additional minimum pension liability, net of tax of $(5,133) and $(4,853), respectively | **(8,138)** | (7,693) | - |
| Cumulative effect of accounting change for qualifying hedges, net of tax of $180 | - | - | 286 |
| Changes in fair value of qualifying hedges, net of tax of $(3,241), $(2,502) and $(277), respectively | **(5,550)** | (3,555) | (439) |
| Less: Reclassification adjustment for amounts included in net income, net of tax of $1,208 and $0, respectively | **2,217** | (2) | - |
| Total other comprehensive income (loss) | **(11,471)** | (11,250) | (153) |
| **Comprehensive Income** | **$619,106** | $606,379 | $610,182 |

The accompanying notes are an integral part of these financial statements.

## 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

### General

The Company is a wholly owned subsidiary of Southern Company, which is the parent company of five retail operating companies, Southern Power Company (Southern Power), Southern Company Services (SCS), Southern Communications Services (Southern LINC), Southern Company Gas (Southern Company GAS), Southern Company Holdings (Southern Holdings), Southern Nuclear Operating Company (Southern Nuclear), Southern Telecom, and other direct and indirect subsidiaries. The retail operating companies -- Alabama Power, the Company, Gulf Power, Mississippi Power, and Savannah Electric -- provide electric service in four Southeastern states. The Company operates as a vertically integrated utility providing electricity to retail customers within its traditional service area located within the State of Georgia and to wholesale customers in the Southeast. Southern Power constructs, owns, and manages Southern Company's competitive generation assets and sells electricity at market-based rates in the wholesale market. Contracts among the retail operating companies and Southern Power -- related to jointly owned generating facilities, interconnecting transmission lines, or the exchange of electric power -- are regulated by the Federal Energy Regulatory Commission (FERC) and/or the Securities and Exchange Commission (SEC). SCS, the system service company, provides, at cost, specialized services to Southern Company and subsidiary companies. Southern LINC provides digital wireless communications services to the retail operating companies and also markets these services to the public within the Southeast. Southern Telecom provides fiber cable services within the Southeast. Southern Company GAS is a competitive retail natural gas marketer serving customers in Georgia. Southern Holdings is an intermediate holding subsidiary for Southern Company's investments in synthetic fuels and leveraged leases and an energy services business. Southern Nuclear operates and provides services to Southern Company's nuclear power plants.

Southern Company is registered as a holding company under the Public Utility Holding Company Act of 1935 (PUHCA). Both Southern Company and its subsidiaries are subject to the regulatory provisions of the PUHCA. The Company is also subject to regulation by the FERC and the Georgia Public Service Commission (GPSC). The Company follows accounting principles generally accepted in the United States and complies with the accounting policies and practices prescribed by its regulatory commissions. The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires the use of estimates and the actual results may differ from these estimates.

Certain prior years' data presented in the financial statements have been reclassified to conform with current year presentation.

### Affiliate Transactions

The Company has an agreement with SCS under which the following services are rendered to the Company at direct or allocated cost: general and design engineering, purchasing, accounting and statistical analysis, finance and treasury, tax, information resources, marketing, auditing, insurance and pension administration, human resources, systems and procedures, and other services with respect to business and operations and power pool operations. Costs for these services amounted to $303 million in 2003, $318 million in 2002, and $286 million in 2001. Cost allocation methodologies used by SCS are approved by the SEC and management believes they are reasonable.

The Company has an agreement with Southern Nuclear under which the following nuclear-related services are rendered to the Company at cost: general executive and advisory services; general operations, management and technical services; administrative services including procurement, accounting, employee relations, and systems and procedures services; strategic planning and budgeting services; and other services with respect to business and operations. Costs for these services amounted to $289 million in 2003, $301 million in 2002, and $281 million in 2001.

The Company has an agreement with Southern Power under which the Company operates and maintains Southern Power owned plants Dahlberg, Franklin, and Wansley at cost. Reimbursements under these agreements with Southern Power amounted to $5.3 million in 2003, $5.3 million in 2002 and $1.0 million in 2001. These agreements arose from the transfer of certain generation facilities to Southern Power in 2001 and 2002. See Note 7 under "Construction Program" for additional information.

Southern Company holds a 30 percent ownership in Alabama Fuel Products, LLC (AFP), which produces synthetic fuel. The Company has an agreement with an indirect subsidiary of Southern Company that provides services for AFP. Under this agreement, the Company provides certain accounting functions, including processing and paying fuel transportation invoices, and the Company is reimbursed for its expenses. Amounts billed under this agreement totaled approximately $38 million in 2003. In addition, the Company purchases synthetic fuel from AFP for use at Plant Branch. Fuel purchases totaled $91 million in 2003.

Effective June 2002, the Company entered into purchased power agreements (PPAs) with Southern Power for capacity and energy. Purchased power costs in 2003 and 2002 amounted to $203 million and $128 million, respectively. Additionally, the Company recorded $7 million and $12 million of prepaid capacity expenses included in Other Deferred Charges and Other Assets on the Balance Sheets at December 31, 2003 and 2002, respectively. See Note 7 under "Fuel and Purchased Power Commitments" for additional information.

The Company has an agreement with Gulf Power under which Gulf Power jointly owns a portion of Plant Scherer. Under this agreement, the Company operates Plant Scherer and Gulf Power reimburses the Company for its proportionate share of the related expenses which were $5.6 million in 2003 and $4.5 million in 2002. The Company has an agreement with Savannah Electric under which the Company jointly owns a portion of Plant McIntosh. Under this agreement, Savannah Electric operates Plant McIntosh and the Company reimburses Savannah Electric for its proportionate share of the related expenses which were $3.6 million in 2003 and $1.8 million in 2002. See Note 4 for additional information.

Also see Note 4 for information regarding the Company's ownership in and purchased power agreement with Southern Electric Generating Company.

The retail operating companies, including the Company, Southern Power, and Southern Company GAS may jointly enter into various types of wholesale energy, natural gas and certain other contracts, either directly or through SCS as agent. Each participating company may be jointly and severally liable for the obligations incurred under these agreements. See Note 7 under "Fuel and Purchased Power Commitments" for additional information.

**Revenues and Fuel Costs**

Energy and other revenues are recognized as services are provided. Unbilled revenues are accrued at the end of each fiscal period. Fuel costs are expensed as the fuel is used. Electric rates for the Company include provisions to adjust billings for fluctuations in fuel costs, fuel hedging, the energy component of purchased power costs, and certain other costs. Revenues are adjusted for differences between recoverable fuel costs and amounts actually recovered in current rates.

The Company has a diversified base of customers. No single customer or industry comprises 10 percent or more of revenues. For all periods presented, uncollectible accounts averaged less than 1 percent of revenues despite an increase in customer bankruptcies.

Fuel expense includes the amortization of the cost of nuclear fuel and a charge, based on nuclear generation, for the permanent disposal of spent nuclear fuel. Total charges for nuclear fuel included in fuel expense amounted to $74 million in 2003, $71 million in 2002, and $75 million in 2001. The Company has contracts with the U.S. Department of Energy (DOE) that provide for the permanent disposal of spent nuclear fuel. The DOE failed to begin disposing of spent nuclear fuel in January 1998 as required by the contracts, and the Company is pursuing legal remedies against the government for breach of contract. Sufficient pool storage capacity for spent fuel is available at Plant Vogtle to maintain full-core discharge capability for both units into the year 2015. At Plant Hatch, an on-site dry storage facility became operational in 2000 and can be expanded to accommodate spent fuel through the life of the plant. Construction of an on-site dry storage facility at Plant Vogtle will begin in sufficient time to maintain pool full-core discharge capability.

Also, the Energy Policy Act of 1992 required the establishment of a Uranium Enrichment Decontamination and Decommissioning Fund, which is funded in part by a special assessment on utilities with nuclear plants. The assessment is being paid over a 15-year period, which began in 1993. This fund will be used by the DOE for the decontamination and decommissioning of its nuclear fuel enrichment facilities. The law provides that utilities will recover

these payments in the same manner as any other fuel expense. The Company -- based on its ownership interest -- estimates its remaining liability at December 31, 2003 under this law to be approximately $10 million.

### Income Taxes

The Company uses the liability method of accounting for deferred income taxes and provides deferred income taxes for all significant income tax temporary differences. Investment tax credits utilized are deferred and amortized to income over the average lives of the related property.

### Regulatory Assets and Liabilities

The Company is subject to the provisions of Financial Accounting Standards Board (FASB) Statement No. 71, Accounting for the Effects of Certain Types of Regulation. Regulatory assets represent probable future revenues associated with certain costs that are expected to be recovered from customers through the ratemaking process. Regulatory liabilities represent probable future reductions in revenues associated with amounts that are expected to be credited to customers through the ratemaking process. See Note 3 under "Retail Rate Orders" for additional information regarding the disposition of the regulatory liability for the accelerated cost recovery recorded under the retail rate order that ended December 31, 2001. Regulatory assets and (liabilities) reflected in the Company's Balance Sheets at December 31 relate to the following:

| | 2003 | 2002 | Note |
|---|---|---|---|
| | (in millions) | | |
| Deferred income tax charges | $ 510 | $ 525 | (a) |
| Loss on reacquired debt | 178 | 179 | (b) |
| Corporate building lease | 54 | 54 | (f) |
| Vacation pay | 50 | 54 | (d) |
| Postretirement benefits | 23 | 25 | (f) |
| DOE assessments | 13 | 16 | (c) |
| Generating plant outage costs | 49 | 48 | (f) |
| Other regulatory assets | 1 | 7 | (f) |
| Asset retirement obligation | (16) | - | (a) |
| Other cost of removal obligations | (412) | (800) | (a) |
| Accelerated cost recovery | (111) | (222) | (e) |
| Deferred income tax credits | (187) | (208) | (a) |
| Environmental remediation reserve | (21) | (21) | (f) |
| Purchased power | (77) | (63) | (f) |
| Other regulatory liabilities | (3) | (1) | (f) |
| Total | $ 51 | $ (26) | |

Note: The recovery and amortization periods for these regulatory assets and (liabilities) are as follows:

(a) Asset retirement and removal liabilities are recorded, deferred income taxes are recovered, and deferred tax liabilities are amortized over the related property lives, which may range up to 50 years. Asset retirement and removal liabilities will be settled and trued up following completion of the related activities.

(b) Recovered over either the remaining life of the original issue or, if refinanced, over the life of the new issue which may range up to 50 years.

(c) Assessments for the decontamination and decommissioning of the DOE's nuclear fuel enrichment facilities are recorded annually from 1993 through 2008.

(d) Recorded as earned by employees and recovered as paid, generally within one year.

(e) Amortized over a three-year period ending in 2004. See Note 3 under "Retail Rate Orders".

(f) Recorded and recovered or amortized as approved by the GPSC.

In the event that a portion of the Company's operations is no longer subject to the provisions of Statement No. 71, the Company would be required to write off related regulatory assets and liabilities that are not specifically recoverable through regulated rates. In addition, the Company would be required to determine if any impairment to other assets, including plant, exists and if impaired, write down the assets to their fair value. All regulatory assets and liabilities are to be reflected in rates.

### Depreciation and Amortization

Depreciation of the original cost of plant in service is provided primarily by using composite straight-line rates, which approximated 2.7 percent in 2003, 2.9 percent in 2002 and 3.3 percent in 2001. The composite depreciation rate was reduced because the lives of depreciable assets were extended effective January 2002 under the retail rate order. When property subject to depreciation is retired or otherwise disposed of in the normal course of business, its original cost -- together with the cost of removal, less salvage -- is charged to accumulated depreciation. Minor items of property included in the original cost of the plant are retired when the related property unit is retired.

The Company recorded accelerated depreciation and amortization amounting to $91 million in 2001. Effective January 2002, the Company discontinued recording accelerated depreciation and amortization in accordance with a new retail rate order. Also, the Company was ordered to amortize $333 million -- the cumulative balance previously expensed -- equally over three years as a credit to amortization expense beginning January 2002. Additionally, effective January 2002 the Company was ordered to recognize new GPSC certified purchased power costs in rates evenly over the three years covered by the current retail rate order. As a result of the purchased power regulatory adjustment, the Company recorded amortization expenses of $14 million and $63 million in 2003 and 2002, respectively. The Company will record a credit to amortization expense of $77 million in 2004. See Note 3 under "Retail Rate Orders" for additional information.

### Asset Retirement Obligations and Other Costs of Removal

In accordance with regulatory requirements, prior to January 2003, the Company followed the industry practice of accruing for the ultimate cost of retiring most long-lived assets over the life of the related asset as part of the annual depreciation expense provision. In accordance with SEC requirements such amounts are reflected on the Balance Sheet as regulatory liabilities. Effective January 1, 2003, the Company adopted FASB Statement No. 143, Accounting for Asset Retirement Obligations. Statement No. 143 established new accounting and reporting standards for legal obligations associated with the ultimate cost of retiring long-lived assets. The present value of the ultimate costs for an asset's future retirement must be recorded in the period in which the liability is incurred. The costs must be capitalized as part of the related long-lived asset and depreciated over the asset's useful life. Additionally, Statement No. 143 does not permit the continued accrual of future retirement costs for long-lived assets that the Company does not have a legal obligation to retire. However, the Company has received guidance regarding accounting for the financial statement impacts of Statement No. 143 from the GPSC and will continue to recognize the accumulated removal costs for other obligations as a regulatory liability. Therefore, the Company had no cumulative effect to net income resulting from the adoption of Statement No. 143.

The liability recognized to retire long-lived assets primarily relates to the Company's nuclear facilities, which include the Company's ownership interests in plants Hatch and Vogtle. The fair value of assets legally restricted for settling retirement obligations related to nuclear facilities as of December 31, 2003 was $423 million. In addition, the Company has retirement obligations related to various landfill sites, ash ponds, and underground storage tanks. The Company has also identified retirement obligations related to certain transmission and distribution facilities, leasehold improvements, equipment on customer property, and property associated with the Company's rail lines. However, a liability for the removal of these facilities will not be recorded because no reasonable estimate can be made regarding the timing of any related retirements. The Company will continue to recognize in the Statements of Income the ultimate removal costs in accordance with its regulatory treatment. Any difference between costs recognized under Statement No. 143 and those reflected in rates will be recognized as either a regulatory asset or liability in the Balance Sheets. The Company also revised the estimated cost to retire plants Hatch and Vogtle as a result of a new site-specific decommissioning study. The effect of the revision is a decrease of $24 million for the Statement No. 143 liability included in "Asset Retirement Obligations" with a corresponding decrease in property, plant and equipment. See "Nuclear Decommissioning" for further information on amounts included in rates.

Details of the asset retirement obligations included in the Balance Sheets are as follows:

| | 2003 |
|---|---|
| | (in millions) |
| Balance beginning of year | $469 |
| Liabilities incurred | - |
| Liabilities settled | - |
| Accretion | 31 |
| Cash flow revisions | (24) |
| Balance end of year | $476 |

If Statement No. 143 had been adopted on January 1, 2002, the pro-forma asset retirement obligations would have been $440 million.

**Nuclear Decommissioning**

The Nuclear Regulatory Commission (NRC) requires all licensees operating commercial nuclear power reactors to establish a plan for providing, with reasonable assurance, funds for decommissioning. The Company has established external trust funds to comply with the NRC's regulations. The funds set aside for decommissioning are managed and invested in accordance with applicable requirements of various regulatory bodies, including the NRC, the FERC and the GPSC as well as the Internal Revenue Service (IRS). Funds are invested in a tax efficient manner in a diversified mix of equity and fixed income securities. Equity securities typically range from 50 to 75 percent of the funds and fixed income securities from 25 to 50 percent. Amounts previously recorded in internal reserves are being transferred into the external trust funds over periods approved by the GPSC. The NRC's minimum external funding requirements are based on a generic estimate of the cost to decommission the radioactive portions of a nuclear unit based on the size and type of reactor. The Company has filed plans with the NRC to ensure that -- over time -- the deposits and earnings of the external trust funds will provide the minimum funding amounts prescribed by the NRC.

Site study cost is the estimate to decommission a specific facility as of the site study year. The estimated costs of decommissioning are based on the most current study as of December 31, 2003 and the Company's ownership interests in plants Hatch and Vogtle were as follows:

| | Plant Hatch | Plant Vogtle |
|---|---|---|
| Site study year | 2003 | 2003 |
| Decommissioning periods: | | |
| Beginning year | 2034 | 2027 |
| Completion year | 2065 | 2048 |
| | (in millions) | |
| Site study costs: | | |
| Radiated structures | $497 | $452 |
| Non-radiated structures | 49 | 58 |
| Total | $546 | $510 |

The decommissioning cost estimates are based on prompt dismantlement and removal of the plant from service. The actual decommissioning costs may vary from the above estimates because of changes in the assumed date of decommissioning, changes in NRC requirements, or changes in the assumptions used in making the estimates.

Annual provisions for nuclear decommissioning are based on an annuity method as approved by the GPSC. The amounts expensed in 2003 and fund balances were as follows:

| | Plant Hatch | Plant Vogtle |
|---|---|---|
| | (in millions) | |
| **Amount expensed in 2003** | $ 7 | $ 2 |
| Accumulated provisions: | | |
| External trust funds, at fair value | $269 | $154 |
| Internal reserves | 7 | 4 |
| Total | $276 | $158 |

Effective January 1, 2002, the GPSC decreased the annual decommissioning costs for ratemaking to $9 million. This amount is based on the NRC generic estimate to decommission the radioactive portion of the facilities as of 2000. The estimates are $383 million and $282 million for plants Hatch and Vogtle, respectively. Significant assumptions used to determine the costs for ratemaking include an estimated inflation rate of 4.7 percent and an estimated trust earnings rate of 6.5 percent. The Company expects the GPSC to periodically review and adjust, if necessary, the amounts

collected in rates for the anticipated cost of decommissioning.

In January 2002, the NRC granted the Company a 20-year extension of the licenses for both units at Plant Hatch which permits the operation of units 1 and 2 until 2034 and 2038, respectively. The site study decommissioning costs reflect the license extension; however, the updated costs will not be reflected in rates until the GPSC issues a new rate order, which is not expected until December 2004.

**Allowance for Funds Used During Construction (AFUDC) and Interest Capitalized**

In accordance with regulatory treatment, the Company records AFUDC. AFUDC represents the estimated debt and equity costs of capital funds that are necessary to finance the construction of new regulated facilities. While cash is not realized currently from such allowance, it increases the revenue requirement over the service life of the plant through a higher rate base and higher depreciation expense. Interest related to the construction of new facilities not included in the Company's retail rates is capitalized in accordance with standard interest capitalization requirements. All current construction costs should be included in retail rates. For the years 2003, 2002, and 2001, the average AFUDC rates were 5.51 percent, 3.79 percent, and 6.33 percent, respectively. AFUDC and interest capitalized, net of taxes, was less than 3.0 percent of net income after dividends on preferred stock for 2003, 2002, and 2001.

**Property, Plant, and Equipment**

Property, plant, and equipment is stated at original cost, less regulatory disallowances and impairments. Original cost includes: materials; labor; minor items of property; appropriate administrative and general costs; payroll-related costs such as taxes, pensions, and other benefits; and the interest capitalized and/or cost of funds used during construction.

The cost of replacements of property -- exclusive of minor items of property -- is capitalized. The cost of maintenance, repairs, and replacement of minor items of property is charged to maintenance expense as incurred or performed with the exception of certain generating plant maintenance costs. In accordance with a GPSC order, the Company defers and amortizes nuclear refueling costs over the unit's operating cycle before the next refueling. The refueling cycles range from 18 to 24 months for each unit. In accordance with the 2001 retail rate order, the Company defers the costs of certain significant inspection costs for the combustion turbines at Plant McIntosh and amortizes such costs over 10 years, which approximates the expected maintenance cycle.

**Impairment of Long-Lived Assets and Intangibles**

The Company evaluates long-lived assets for impairment when events or changes in circumstances indicate that the carrying value of such assets may not be recoverable. The determination of whether an impairment has occurred is based on either a specific regulatory disallowance or an estimate of undiscounted future cash flows attributable to the assets that exceeds the carrying value of the assets. If an impairment has occurred, the amount of the impairment recognized is determined by either the amount of regulatory disallowance or by estimating the fair value of the assets and recording a loss if the carrying value is greater than the fair value. For assets identified as held for sale, the carrying value is compared to the estimated fair value less the cost to sell in order to determine if an impairment loss is required. Until the assets are disposed of, their estimated fair value is re-evaluated when circumstances or events change.

**Cash and Cash Equivalents**

For purposes of the financial statements, temporary cash investments are considered cash equivalents. Temporary cash investments are securities with original maturities of 90 days or less.

**Materials and Supplies**

Generally, materials and supplies include the average cost of transmission, distribution, and generating plant materials. Materials are charged to inventory when purchased and then expensed or capitalized to plant, as appropriate, when installed.

**Stock Options**

Southern Company provides non-qualified stock options to a large segment of the Company's employees ranging from line management to executives. The Company accounts for its stock-based compensation plans in accordance with Accounting Principles Board Opinion No. 25. Accordingly, no compensation expense has

been recognized because the exercise price of all options granted equaled the fair market value on the date of grant. When options are exercised, the Company receives a capital contribution from Southern Company equivalent to the related income tax benefit.

**Financial Instruments**

The Company uses derivative financial instruments to limit exposures to fluctuations in interest rates, the prices of certain fuel purchases and electricity purchases and sales. All derivative financial instruments are recognized as either assets or liabilities and are measured at fair value.

The Company and its affiliates, through SCS acting as their agent, enter into commodity related forward and option contracts to limit exposure to changing prices on certain fuel purchases and electricity purchases and sales. Substantially all of the Company's bulk energy purchases and sales contracts that meet the definition of a derivative are exempt from fair value accounting requirements and are accounted for under the accrual method. Other derivative contracts qualify as cash flow hedges of anticipated transactions. This results in the deferral of related gains and losses in other comprehensive income or regulatory assets or liabilities as appropriate until the hedged transactions occur. Any ineffectiveness is recognized currently in net income. Other derivative contracts are marked to market through current period income and are recorded on a net basis in the Statements of Income.

The Company is exposed to losses related to financial instruments in the event of counterparties' nonperformance. The Company has established controls to determine and monitor the creditworthiness of counterparties in order to mitigate the Company's exposure to counterparty credit risk.

The Company's financial instruments for which the carrying amounts did not equal fair value at December 31 were as follows:

| | Carrying Amount | Fair Value |
|---|---|---|
| | (in millions) | |
| Long-term debt: | | |
| **At December 31, 2003** | **$3,685** | **$3,739** |
| At December 31, 2002 | $3,350 | $3,417 |
| Preferred securities: | | |
| **At December 31, 2003** | **$940** | **$976** |
| At December 31, 2002 | $940 | $961 |

The fair values for securities were based on either closing market prices or closing prices of comparable instruments.

**Comprehensive Income**

The objective of comprehensive income is to report a measure of all changes in common stock equity of an enterprise that result from transactions and other economic events of the period other than transactions with owners. Comprehensive income consists of net income, changes in the fair values of marketable securities and qualifying cash flow hedges, and changes in additional minimum pension liabilities, net of income taxes less reclassifications for amounts included in net income.

## 2. RETIREMENT BENEFITS

The Company has a defined benefit, trusteed pension plan covering substantially all employees. The plan is funded in accordance with Employee Retirement Income Security Act (ERISA) requirements. No contributions to the plan are expected for the year ending December 31, 2004. The Company also provides certain non-qualified benefit plans for a selected group of management and highly compensated employees. Benefits under these non-qualified plans are funded on a cash basis. In addition, the Company provides certain medical care and life insurance benefits for retired employees. The Company funds related trusts to the extent required by the GPSC and the FERC. For the year ended December 31, 2004, such contributions are expected to total approximately $8.9 million.

The measurement date for plan assets and obligations is September 30 for each year. In 2002, the Company adopted several plan changes that had the

effect of increasing benefits to both current and future retirees.

### Pension Plans

The accumulated benefit obligation for the pension plan was $1.6 billion and $1.4 billion for 2003 and 2002, respectively. Changes during the year in the projected benefit obligations and in the fair value of plan assets were as follows:

| | Projected Benefit Obligation | |
|---|---|---|
| | **2003** | 2002 |
| | (in millions) | |
| Balance at beginning of year | **$1,564** | $1,448 |
| Service cost | **38** | 36 |
| Interest cost | **100** | 107 |
| Benefits paid | **(83)** | (74) |
| Amendments | **6** | 33 |
| Actuarial loss | **102** | 14 |
| Balance at end of year | **$1,727** | $1,564 |

| | Plan Assets | |
|---|---|---|
| | **2003** | 2002 |
| | (in millions) | |
| Balance at beginning of year | **$1,838** | $2,044 |
| Actual return on plan assets | **294** | (137) |
| Benefits paid | **(77)** | (69) |
| Balance at end of year | **$2,055** | $1,838 |

Pension plan assets are managed and invested in accordance with all applicable requirements including ERISA and the IRS revenue code. The Company's investment policy covers a diversified mix of assets, including equity and fixed income securities, real estate, and private equity, as described in the table below. Derivative instruments are used primarily as hedging tools but may also be used to gain efficient exposure to the various asset classes. The Company primarily minimizes the risk of large losses through diversification but also monitors and manages other aspects of risk.

| | | Plan Assets | |
|---|---|---|---|
| | Target | **2003** | 2002 |
| Domestic equity | 37% | **37%** | 35% |
| International equity | 20 | **20** | 18 |
| Global fixed income | 26 | **24** | 25 |
| Real estate | 10 | **11** | 12 |
| Private equity | 7 | **8** | 10 |
| Total | 100% | **100%** | 100% |

The accrued pension costs recognized in the Balance Sheets were as follows:

| | **2003** | 2002 |
|---|---|---|
| | (in millions) | |
| Funded status | **$328** | $274 |
| Unrecognized transition amount | **(13)** | (17) |
| Unrecognized prior service cost | **118** | 123 |
| Unrecognized net actuarial gain (loss) | **(66)** | (78) |
| Prepaid pension asset, net | **367** | 302 |
| Portion included in employee benefit obligations | **38** | 40 |
| Total prepaid pension recognized in the Balance Sheets | **$405** | $342 |

In 2003 and 2002, amounts recognized in the Balance Sheets for accumulated other comprehensive income and intangible assets to record the minimum pension liability related to the nonqualified plans were $26 million and $15 million and $13 and $10 million, respectively.

Components of the plans' net periodic cost were as follows:

| | **2003** | 2002 | 2001 |
|---|---|---|---|
| | | (in millions) | |
| Service cost | **$ 38** | $ 36 | $ 35 |
| Interest cost | **100** | 107 | 101 |
| Expected return on plan assets | **(179)** | (179) | (168) |
| Recognized net gain | **(19)** | (27) | (31) |
| Net amortization | **6** | 4 | 3 |
| Net pension (income) | **$ (54)** | $ (59) | $ (60) |

### Postretirement Benefits

Changes during the year in the accumulated benefit obligations and in the fair value of plan assets were as follows:

| | Accumulated Benefit Obligation | |
|---|---|---|
| | **2003** | 2002 |
| | (in millions) | |
| Balance at beginning of year | **$627** | $542 |
| Service cost | **9** | 8 |
| Interest cost | **40** | 40 |
| Benefits paid | **(29)** | (27) |
| Actuarial loss | **76** | 64 |
| Balance at end of year | **$723** | $627 |

| | Plan Assets | |
|---|---|---|
| | **2003** | 2002 |
| | (in millions) | |
| Balance at beginning of year | **$199** | $195 |
| Actual return on plan assets | **36** | (18) |
| Employer contributions | **59** | 49 |
| Benefits paid | **(29)** | (27) |
| Balance at end of year | **$265** | $199 |

Postretirement benefits plan assets are managed and invested in accordance with all applicable requirements, including ERISA and the IRS revenue code. The Company's investment policy covers a diversified mix of assets, including equity and fixed income securities, real estate, and private equity, as described in the table below. Derivative instruments are used primarily as hedging tools but may also be used to gain efficient exposure to the various asset classes. The Company minimizes the risk of large losses through the primary tool of diversification but also monitors and manages other aspects of risk.

| | | Plan Assets | |
|---|---|---|---|
| | Target | **2003** | 2002 |
| Domestic equity | 43% | **42%** | 38% |
| International equity | 20 | **21** | 21 |
| Global fixed income | 33 | **32** | 35 |
| Real estate | 2 | **3** | 3 |
| Private equity | 2 | **2** | 3 |
| Total | 100% | **100%** | 100% |

The accrued postretirement costs recognized in the Balance Sheets were as follows:

| | **2003** | 2002 |
|---|---|---|
| | (in millions) | |
| Funded status | **$(458)** | $(427) |
| Unrecognized transition obligation | **87** | 96 |
| Unrecognized prior service cost | **91** | 98 |
| Unrecognized net loss | **171** | 106 |
| Fourth quarter contributions | **9** | 37 |
| Employee benefit obligations recognized in the Balance Sheets | **$(100)** | $(90) |

Components of the plans' net periodic cost were as follows:

| | **2003** | 2002 | 2001 |
|---|---|---|---|
| | (in millions) | | |
| Service cost | **$ 9** | $ 8 | $ 9 |
| Interest cost | **40** | 40 | 39 |
| Expected return on plan assets | **(24)** | (20) | (19) |
| Net amortization | **16** | 15 | 14 |
| Net postretirement cost | **$ 41** | $ 43 | $ 43 |

The weighted average rates assumed in the actuarial calculations used to determine both the benefit obligations and net periodic costs for the pension and postretirement benefit plans were:

| | **2003** | 2002 | 2001 |
|---|---|---|---|
| Discount | **6.0%** | 6.5% | 7.5% |
| Annual salary increase | **3.8** | 4.0 | 5.0 |
| Long-term return on plan assets | **8.5** | 8.5 | 8.5 |

The Company determined the long-term rate of return based on historical asset class returns and current market conditions, taking into account the diversification benefits of investing in multiple asset classes.

An additional assumption used in measuring the accumulated postretirement benefit obligations was a weighted average medical care cost trend rate of 8.25 percent for 2003, decreasing gradually to 5.25 percent through the year 2010 and remaining at that level thereafter. An annual increase or decrease in the assumed medical care cost trend rate of 1 percent would affect the accumulated benefit obligation and the service

and interest cost components at December 31, 2003 as follows:

| | 1 Percent Increase | 1 Percent Decrease |
|---|---|---|
| | (in millions) | |
| Benefit obligation | $70 | $61 |
| Service and interest costs | 5 | 4 |

**Employee Savings Plan**

The Company sponsors a 401(k) defined contribution plan covering substantially all employees. The Company provides a 75 percent matching contribution up to 6 percent of an employee's base salary. Total matching contributions made to the plan for the years 2003, 2002, and 2001 were $18 million, $17 million, and $16 million, respectively.

## 3. CONTINGENCIES AND REGULATORY MATTERS

**General Litigation Matters**

The Company is subject to certain claims and legal actions arising in the ordinary course of business. In addition, the Company's business activities are subject to extensive governmental regulation related to public health and the environment. Litigation over environmental issues and claims of various types, including property damage, personal injury, and citizen enforcement of environmental requirements, has increased generally throughout the United States. In particular, personal injury claims for damages caused by alleged exposure to hazardous materials have become more frequent. The ultimate outcome of such litigation against the Company cannot be predicted at this time; however, management does not anticipate that the liabilities, if any, arising from such current proceedings would have a material adverse effect on the Company's financial statements.

**Retail Rate Orders**

In December 2001, the GPSC approved a three-year retail rate order for the Company ending December 31, 2004. Retail rates were decreased by $118 million effective January 1, 2002. Under the terms of the order, earnings are evaluated against a retail return on common equity range of 10 percent to 12.95 percent. Two-thirds of any earnings above the 12.95 percent return are applied to rate refunds, with the remaining one-third retained by the Company. The Company's earnings in 2003 and 2002 were within the common equity range.

Under a previous three-year order ending December 2001, the Company's earnings were evaluated against a retail return on common equity range of 10 percent to 12.5 percent. The order further provided for $85 million in each year, plus up to $50 million of any earnings above the 12.5 percent return during the second and third years, to be applied to accelerated amortization or depreciation of assets. Two-thirds of any additional earnings above the 12.5 percent return were applied to rate refunds, with the remaining one-third retained by the Company. Pursuant to the order, the Company recorded $333 million of accelerated amortization and interest thereon, which has been credited to a regulatory liability account as mandated by the GPSC.

Under the 2001 rate order, the Company discontinued recording accelerated depreciation and amortization and began amortizing the accumulated balance equally over three years as a credit to expense beginning in 2002. Also, the rate order required the Company to recognize capacity and operating and maintenance costs related to new GPSC certified purchased power contracts evenly in rates over a three - year period ending December 31, 2004.

The Company is required to file a general rate case on July 1, 2004, in response to which the GPSC would be expected to determine whether the rate order should be continued, modified, or discontinued.

Under GPSC ratemaking provisions, $21 million has been deferred in a regulatory liability account for use in meeting future environmental remediation costs.

**Retail Fuel Hedging Program**

On December 24, 2002, the GPSC approved an order, effective in January 2003, allowing the Company to implement a natural gas and oil procurement and hedging program. This order allows the Company to use financial instruments to hedge price and commodity risk associated with these fuels. The order limits the program in terms of time, volume, dollars, and physical amounts hedged. The costs of the program, including any net losses, are recovered as a fuel cost through the fuel cost recovery clause. Annual net financial gains from the hedging program will be shared with the retail

customers receiving 75 percent and the Company retaining 25 percent of the net gains.

**Fuel Cost Recovery**

In May 2003, the Company filed for a fuel cost recovery rate increase. On August 19, 2003, the GPSC issued an order approving a stipulation reached by the Company, the Consumers' Utility Counsel Division, Georgia Textile Manufacturers Association, Georgia Industrial Group and the staff of the GPSC. The stipulation allows the Company to increase fuel rates to recover existing under-recovered deferred fuel costs over the period of October 1, 2003 through March 31, 2005, as well as future projected fuel costs. The new fuel rate represents an average annual increase in rates paid by customers of approximately 1.6 percent.

**Nuclear Performance Standards**

The GPSC has adopted a nuclear performance standard for the Company's nuclear generating units under which the performance of plants Hatch and Vogtle is evaluated every three years. The performance standard is based on each unit's capacity factor as compared to the average of all comparable U.S. nuclear units operating at a capacity factor of 50 percent or higher during the three-year period of evaluation. Depending on the performance of the units, the Company could receive a monetary award or penalty under the performance standards criteria.

For the period 1999-2001, the Company's performance fell within the criteria prescribed by the GPSC. The Company will therefore not receive an award or penalty for the 1999-2001 performance periods.

**Open Access Transmission Tariff**

In October 2003, the FERC approved a new Open Access Transmission Tariff for the Company of $1.73 per kilowatt-month based on an 11.25 percent return on equity. The Company had requested a rate increase effective January 2002 based on a 13 percent return on equity. Pending FERC approval, the Company collected from customers based on the 13 percent return on equity, but recorded revenue subject to refund for amounts above the previously approved rate of $1.37 per kilowatt-month. As a result of the final settlement, a total of approximately $2.3 million was refunded to the Company's transmission customers in October 2003 and $7.2 million was recorded as revenue.

**New Source Review Actions**

In November 1999, the Environmental Protection Agency (EPA) brought a civil action against the Company alleging the Company had violated the New Source Review (NSR) provisions of the Clean Air Act with respect to coal-fired generating facilities at the Company's Bowen and Scherer plants and violations of related state laws. The civil action requests penalties and injunctive relief, including an order requiring the installation of the best available control technology at the affected units. The EPA concurrently issued to the Company a notice of violation related to the two plants mentioned previously. In early 2000, the EPA filed a motion to amend its complaint to add the violations alleged in its notice of violation.

The action against the Company was stayed in the spring of 2001 during the appeal of a very similar NSR enforcement action against the Tennessee Valley Authority (TVA) before the U.S. Court of Appeals for the Eleventh Circuit. The TVA appeal involves many of the same legal issues raised by the actions against the Company. Because the final resolution of the TVA appeal could have a significant impact on the Company, the Company has been involved in that appeal. On June 24, 2003, the court of appeals issued its ruling in the TVA case. It found unconstitutional the statutory scheme set forth in the Clean Air Act that allowed the EPA to impose penalties for failing to comply with an administrative compliance order, like the one issued to TVA, without the EPA having to prove the underlying violation. Thus, the court of appeals held that the compliance order was of no legal consequence, and TVA was free to ignore it. The court did not, however, rule directly on the substantive legal issues about the proper interpretation and application of certain NSR provisions that had been raised in the TVA appeal. On September 16, 2003, the court of appeals denied the EPA's request for a rehearing of the decision and on February 13, 2004, the EPA petitioned the U.S. Supreme Court to review the Eleventh Circuit's decision. At this time, no party to the Company's action, which was administratively closed two years ago, has asked the court to reopen that case.

Since the inception of the NSR proceedings against the Company, the EPA has also been proceeding with

similar NSR enforcement actions against other utilities, involving many of the same legal issues. In each case, the EPA alleged that the utilities failed to comply with the NSR permitting requirements when performing maintenance and construction activities at coal-burning plants, which activities the Company considers to be routine or otherwise not subject to NSR. In 2003, district courts addressing these cases issued opinions that reached conflicting conclusions.

In October 2003, the EPA issued final revisions to its NSR regulations under the Clean Air Act clarifying the scope of the existing Routine Maintenance, Repair, and Replacement exclusion. On December 24, 2003, the U.S. Court of Appeals for the District of Columbia Circuit stayed the effectiveness of these revisions pending resolution of related litigation. In January 2004, the Bush Administration announced that it would continue to enforce the existing rules.

The Company believes that it complied with applicable laws and the EPA's regulations and interpretations in effect at the time the work in question took place. The Clean Air Act authorizes civil penalties of up to $27,500 per day, per violation at each generating unit. Prior to January 30, 1997, the penalty was $25,000 per day. An adverse outcome in this case could require substantial capital expenditures that cannot be determined at this time and could possibly require payment of substantial penalties. This could affect future results of operations, cash flows, and financial condition if such costs are not recovered through regulated rates.

**Plant Wansley Environmental Litigation**

On December 30, 2002, the Sierra Club, Physicians for Social Responsibility, Georgia ForestWatch, and one individual filed a civil suit in the U.S. District Court in Georgia against the Company for alleged violations of the Clean Air Act at four of the generating units at Plant Wansley. The complaint alleges Clean Air Act violations at both the existing coal-fired units and the new combined cycle units. Specifically, the plaintiffs allege (1) opacity violations at the coal-fired units, (2) violations of a permit provision that requires the combined cycle units to operate above certain levels, (3) violation of the nitrogen oxide emission offset requirements, and (4) violation of the hazardous air pollutant requirements. The civil action requests injunctive and declaratory relief, civil penalties, a supplemental environmental project, and attorneys' fees. The Clean Air Act authorizes civil penalties of up to $27,500 per day, per violation at each generating unit.

On June 19, 2003, the court granted the Company motion to dismiss the allegations regarding hazardous air pollutants and denied the Company's motion to dismiss the allegations regarding emission offsets. On August 29, 2003, the Company filed a motion for partial summary judgment regarding emission offsets. On January 20, 2004, the Company filed a motion for summary judgment on the remaining three counts, and the plaintiffs have filed motions for partial summary judgment. The case is currently scheduled for trial during the summer of 2004. While the Company believes that it has complied with applicable laws and regulations, an adverse outcome could require payment of substantial penalties. The final outcome of this matter cannot now be determined.

**Potentially Responsible Party Status**

The Company has been designated as a potentially responsible party at sites governed by the Georgia Hazardous Site Response Act and/or by the federal Comprehensive Environmental Response, Compensation and Liability Act. The Company has recognized $34 million in cumulative expenses through December 31, 2003 for the assessment and anticipated cleanup of sites on the Georgia Hazardous Sites Inventory. In addition, in 1995 the EPA designated the Company and four other unrelated entities as potentially responsible parties at a site in Brunswick, Georgia that is listed on the federal National Priorities List. The Company has contributed to the removal and remedial investigation and feasibility study costs for the site. Additional claims for recovery of natural resource damages at the site are anticipated. As of December 31, 2003, the Company had recorded approximately $6 million in cumulative expenses associated with the Company's agreed-upon share of the removal and remedial investigation and feasibility study costs for the Brunswick site.

The final outcome of these matters cannot now be determined. However, based on the currently known conditions at these sites and the nature and extent of the Company's activities relating to these sites, management does not believe that the Company's additional liability, if any, at these sites would be material to the financial statements.

### Race Discrimination Litigation

In July 2000, a lawsuit alleging race discrimination was filed by three Georgia Power employees against the Company, Southern Company, and SCS in the Superior Court of Fulton County, Georgia. Shortly, thereafter, the lawsuit was removed to the U.S. District Court for the Northern District of Georgia. The lawsuit also raised claims on behalf of a purported class. The plaintiffs seek compensatory and punitive damages in an unspecified amount, as well as injunctive relief. In August 2000, the lawsuit was amended to add four more plaintiffs. Also, Southern Company Energy Solutions, a subsidiary of Southern Company, was named a defendant.

In October 2001, the district court denied the plaintiffs' motion for class certification. The plaintiffs filed a motion to reconsider the order denying class certification, and the court denied the plaintiffs' motion to reconsider. In December 2001, the plaintiffs filed a petition in the U. S. Court of Appeals for the Eleventh Circuit seeking permission to file an appeal of the October 2001 decision, and this petition was denied. After discovery was completed on the claims raised by the seven named plaintiffs, the defendants filed motions for summary judgment on all of the named plantiffs' claims. On March 31, 2003, the U.S. District Court for the Northern District of Georgia granted summary judgment in favor of the defendants on all claims raised by all seven plaintiffs. On April 23, 2003 plaintiffs filed an appeal to the U.S. Court of Appeals for the Eleventh Circuit challenging these adverse summary judgment rulings, as well as the District Court's October 2001 ruling denying class certification. Oral arguments occurred January 27, 2004, and the parties await the court's decision. The final outcome of this matter cannot now be determined.

### Right of Way Litigation

Southern Company and certain of its subsidiaries including the Company, Gulf Power, Mississippi Power, and Southern Telecom (collectively defendants) have been named as defendants in numerous lawsuits brought by landowners since 2001 regarding the installation and use of fiber optic cable over defendants' rights of way located on the landowners' property. The plaintiffs' lawsuits claim that defendants may not use or sublease to third parties some or all of the fiber optic communications lines on the rights of way that cross the plaintiffs' properties and that such actions by defendants exceed the easements or other property rights held by defendants. The plaintiffs assert claims for, among other things, trespass and unjust enrichment. The plaintiffs seek compensatory and punitive damages and injunctive relief. Management believes that the Company has complied with applicable laws and the plaintiffs' claims are without merit. An adverse outcome in these matters could result in substantial judgments; however, the final outcome of these matters cannot now be determined.

In addition, in late 2001, certain subsidiaries of Southern Company, including Alabama Power, the Company, Gulf Power, Mississippi Power, Savannah Electric and Southern Telecom (collectively, defendants) were named as defendants in a lawsuit brought by a telecommunications company that uses certain of the defendants' rights of way. This lawsuit alleges, among other things, that the defendants are contractually obligated to indemnify, defend, and hold harmless the telecommunications company from any liability that may be assessed against the telecommunications company in pending and future right of way litigation. The Company believes that the plaintiff's claims are without merit. An adverse outcome in this matter, combined with an adverse outcome against the telecommunications company in one or more of the right of way lawsuits, could result in substantial judgments; however, the final outcome of these matters cannot now be determined.

### FERC Matters

The Company has obtained FERC approval to sell power to non-affiliates at market-based prices under specific contracts. The Company also has FERC authority to make short-term opportunity sales at market rates. Specific FERC approval must be obtained with respect to a market-based contract with an affiliate. In November 2001, the FERC modified the test it uses to consider utilities' applications to charge market-based rates and adopted a new test called the Supply Margin Assessment (SMA). The FERC applied the SMA to several utilities, including Southern Company's retail operating companies, and found them to be "pivotal suppliers" in their control area market and ordered the implementation of certain mitigation measures. SCS, on behalf of the Company and the other retail operating companies, sought rehearing of the FERC order and the FERC delayed implementation of certain mitigation measures. SCS, on behalf of the Company and the other

retail operating companies, submitted comments to the FERC in 2002 regarding these issues. In December 2003, the FERC issued a staff paper discussing alternatives and held a technical conference in January 2004. The Company anticipates that the FERC will address the requests for rehearing in the near future. Regardless of the outcome of the SMA proposal, the FERC retains the ability to modify or withdraw the authorization for any seller to sell at market-based rates, if it determines that the underlying conditions for having such authority are no longer applicable. The final outcome of this matter will depend on the form in which the SMA test and mitigation measures rules may be ultimately adopted and cannot be determined at this time.

PPAs by the Company for Southern Power's Plant McIntosh capacity were certified by the GPSC in December 2002 after a competitive bidding process. In April 2003, Southern Power applied for FERC approval of these PPAs. Interveners have made filings in opposition of the FERC's acceptance of the PPAs, alleging that the PPAs do not meet the applicable standards for market-based rates between affiliates. In July 2003, the FERC accepted the PPAs to become effective June 1, 2005, subject to refund, and ordered that hearings be held to determine: (a) whether, in the design and implementation of the GPSC competitive bidding process, the Company unduly preferred Southern Power; (b) whether the analysis of the competitive bids unduly favored Southern Power, particularly with respect to evaluation of non-price factors; (c) whether the Company selected its affiliate, Southern Power, based upon a reasonable combination of price and non-price factors; (d) whether Southern Power received an undue preference or competitive advantage in the competitive bidding process as a result of access to its affiliate's transmission system; (e) whether and to what extent the PPAs impact wholesale competition; and (f) whether the PPAs are just and reasonable and not unduly discriminatory. Hearings are scheduled to begin in March 2004. Management believes that the PPAs should be approved by the FERC; however, the ultimate outcome of this matter cannot now be determined.

## 4. JOINT OWNERSHIP AGREEMENTS

The Company and an affiliate, Alabama Power, own equally all of the outstanding capital stock of Southern Electric Generating Company (SEGCO), which owns electric generating units with a total rated capacity of 1,020 megawatts, as well as associated transmission facilities. The capacity of the units has been sold equally to the Company and Alabama Power under a contract which, in substance, requires payments sufficient to provide for the operating expenses, taxes, debt service, and return on investment, whether or not SEGCO has any capacity and energy available. The term of the contract extends automatically for two-year periods, subject to either party's right to cancel upon two year's notice. The Company's share of expenses included in purchased power from affiliates in the Statements of Income is as follows:

| | **2003** | 2002 | 2001 |
|---|---|---|---|
| | | (in millions) | |
| Energy | **$55** | $53 | $52 |
| Capacity | **34** | 32 | 30 |
| Total | **$89** | $85 | $82 |

The Company owns undivided interests in plants Vogtle, Hatch, Scherer, and Wansley in varying amounts jointly with Oglethorpe Power Corporation (OPC), the Municipal Electric Authority of Georgia (MEAG), the city of Dalton, Georgia, Florida Power & Light Company, Jacksonville Electric Authority, and Gulf Power. Under these agreements, the Company is jointly and severally liable for third party claims related to these plants. In addition, the Company jointly owns the Rocky Mountain pumped storage hydroelectric plant with OPC who is the operator of the plant. The Company also jointly owns Plant McIntosh with Savannah Electric who operates the plant. The Company and Florida Power Corporation (FPC) jointly own a combustion turbine unit (Intercession City) operated by FPC.

At December 31, 2003, the Company's percentage ownership and investment (exclusive of nuclear fuel) in jointly owned facilities in commercial operation were as follows:

| Facility (Type) | Company Ownership | Investment | Accumulated Depreciation |
|---|---|---|---|
| | | (in millions) | |
| Plant Vogtle (nuclear) | 45.7% | $3,307 | $1,706 |
| Plant Hatch (nuclear) | 50.1 | 908 | 469 |
| Plant Wansley (coal) | 53.5 | 390 | 160 |
| Plant Scherer (coal) | | | |
| Units 1 and 2 | 8.4 | 115 | 52 |
| Unit 3 | 75.0 | 560 | 247 |
| Plant McIntosh | | | |
| Common Facilities (combustion-turbine) | 75.0 | 24 | 3 |
| Rocky Mountain (pumped storage) | 25.4 | 169 | 85 |
| Intercession City (combustion-turbine) | 33.3 | 12 | 1 |

The Company has contracted to operate and maintain the jointly owned facilities as agent for their co-owners, except as noted above. The Company's proportionate share of its plant operating expenses is included in the corresponding operating expenses in the Statements of Income.

## 5. INCOME TAXES

Southern Company and its subsidiaries file a consolidated federal income tax return. As a result of new State of Georgia Department of Revenue regulations applicable to tax years beginning on or after January 1, 2002, Southern Company and its subsidiaries were granted permission by the State of Georgia Department of Revenue Commissioner to file a combined State of Georgia income tax return. Under a joint consolidated income tax agreement, each subsidiary's current and deferred tax expense is computed on a stand-alone basis. In accordance with both IRS and State of Georgia Department of Revenue regulations, each company is jointly and severally liable for the tax liability.

At December 31, 2003, tax-related regulatory assets were $510 million and tax-related regulatory liabilities were $187 million. The assets are attributable to tax benefits flowed through to customers in prior years and to taxes applicable to capitalized interest. The liabilities are attributable to deferred taxes previously recognized at rates higher than current enacted tax law and to unamortized investment tax credits.

Details of the federal and state income tax provisions are as follows:

| | **2003** | 2002 | 2001 |
|---|---|---|---|
| Total provision for income taxes: | | (in millions) | |
| Federal: | | | |
| Current | **$143** | $261 | $352 |
| Deferred | **181** | 60 | (46) |
| | **324** | 321 | 306 |
| State: | | | |
| Current | **24** | 31 | 61 |
| Deferred | **16** | 5 | (8) |
| Deferred investment tax credits | **2** | - | 5 |
| Total | **$366** | $357 | $364 |

The tax effects of temporary differences between the carrying amounts of assets and liabilities in the financial statements and their respective tax bases, which give rise to deferred tax assets and liabilities, are as follows:

| | **2003** | 2002 |
|---|---|---|
| | | (in millions) |
| Deferred tax liabilities: | | |
| Accelerated depreciation | **$1,966** | $1,779 |
| Property basis differences | **563** | 623 |
| Other | **329** | 309 |
| Total | **2,858** | 2,711 |
| Deferred tax assets: | | |
| Federal effect of state deferred taxes | **96** | 90 |
| Other property basis differences | **156** | 170 |
| Other deferred costs | **160** | 214 |
| Other | **75** | 64 |
| Total | **487** | 538 |
| Net deferred tax liabilities | **2,371** | 2,173 |
| Portion included in prepaid expenses | **-** | 3 |
| Accumulated deferred income taxes in the Balance Sheets | **$2,371** | $2,176 |

In accordance with regulatory requirements, deferred investment tax credits are amortized over the life of the related property with such amortization normally applied as a credit to reduce depreciation in the Statements of Income. Credits amortized in this manner amounted to $15 million in 2003, $12 million in 2002 and $15 million in 2001. At December 31, 2003, all investment

tax credits available to reduce federal income taxes payable had been utilized.

A reconciliation of the federal statutory tax rate to the effective income tax rate is as follows:

| | 2003 | 2002 | 2001 |
|---|---|---|---|
| Federal statutory rate | 35% | 35% | 35% |
| State income tax, net of federal deduction | 3 | 2 | 4 |
| Non-deductible book depreciation | 1 | 1 | 2 |
| Other | (2) | (1) | (4) |
| Effective income tax rate | 37% | 37% | 37% |

## 6. CAPITALIZATION

### Mandatorily Redeemable Preferred Securities

The Company has formed certain wholly-owned trust subsidiaries for the purpose of issuing preferred securities. The proceeds of the related equity investments and security sales were loaned back to the Company through the issuance of junior subordinated notes totaling $969 million, which constitute substantially all of the assets of the trusts. The Company considers that the mechanisms and obligations relating to the preferred securities issued for its benefit, taken together, constitute a full and unconditional guarantee by it of the respective trusts' payment obligations with respect to these preferred securities. At December 31, 2003, preferred securities of $940 million were outstanding and recognized as liabilities in the Balance Sheets.

### Long-Term Debt Due Within One Year

A summary of the improvement fund requirements and scheduled maturities and redemptions of securities due within one year at December 31 is as follows:

| | 2003 | 2002 |
|---|---|---|
| | (in millions) | |
| Capital lease | $2 | $ 2 |
| Senior notes | - | 320 |
| Total | $2 | $322 |

Serial maturities through 2008 applicable to total long-term debt are as follows: $2 million in 2004; $453 million in 2005; $153 million in 2006; $303 million in 2007; and $3 million in 2008.

### First Mortgage Bond Indenture

In 2002, the first mortgage bond indenture of the Company was defeased by paying to JPMorgan Chase Bank, the trustee, an amount representing the last outstanding obligations on the Company's first mortgage bonds. As a result of the defeasance, there are no longer any first mortgage bond liens on the Company's property and the Company no longer has to comply with the covenants and restrictions of the first mortgage bond indenture.

### Pollution Control Bonds

The Company has incurred obligations in connection with the sale by public authorities of tax-exempt pollution control revenue bonds. The amount of tax-exempt pollution control revenue bonds outstanding at December 31, 2003 was $1.7 billion.

### Capital Leases

Assets acquired under capital leases are recorded in the Balance Sheets as utility plant in service, and the related obligations are classified as long-term debt. At December 31, 2003 and 2002, the Company had a capitalized lease obligation for its corporate headquarters building of $79 million and $81 million, respectively, with an interest rate of 8.1 percent. For ratemaking purposes, the GPSC has treated the lease as an operating lease and has allowed only the lease payments in cost of service. The difference between the accrued expense and the lease payments allowed for ratemaking purposes has been deferred and is being amortized to expense as ordered by the GPSC. At both December 31, 2003 and 2002, the interest and lease amortization deferred on the Balance Sheets was $54 million.

### Bank Credit Arrangements

At the beginning of 2004, the Company had an unused credit arrangement with banks totaling $725 million expiring at June 11, 2004. Upon expiration, the $725 million agreement provides the option of converting borrowings into a two-year term loan. The agreement contains stated borrowing rates but also allows for competitive bid loans. In addition, the agreement requires payment of commitment fees based on the unused portion of the commitments or the maintenance of compensating balances with the banks. Commitment fees are less than 1/8 of 1 percent for the Company.

Compensating balances are not legally restricted from withdrawal. A fee is also paid to the agent bank.

The credit arrangements contain covenants that limit the level of indebtedness to capitalization to 65 percent, as defined in the agreement. Exceeding these limits would result in an event of default under the credit arrangement. In addition, the credit arrangements contain cross default provisions that would trigger an event of default if the Company defaulted on other indebtedness above a specified threshold. The Company is currently in compliance with all such covenants.

This $725 million in unused credit arrangements provides liquidity support to the Company's variable rate pollution control bonds. The amount of variable rate pollution control bonds outstanding requiring liquidity support as of December 31, 2003 was $106 million. In addition, the Company borrows under a commercial paper program and an extendible commercial note program. The amount of commercial paper outstanding at December 31, 2003 was $137 million. There were no outstanding extendible commercial notes at December 31, 2003. The amount of commercial paper outstanding at December 31, 2002 was $358 million, which included $19 million of extendible commercial notes. During 2003, the peak amount of commercial paper outstanding was $531 million and the average amount outstanding was $229 million. The average annual interest rate on commercial paper in 2003 was 1.23 percent. Commercial paper is included in notes payable on the Balance Sheets.

**Financial Instruments**

The Company enters into energy-related derivatives to hedge exposures to electricity, gas, and other fuel price changes. However, due to cost-based rate regulations, the Company has limited exposure to market volatility in commodity fuel prices and prices of electricity. The Company has implemented fuel-hedging programs at the instruction of the GPSC. The Company also enters into hedges of forward electricity sales.

At December 31, 2003, the fair value of derivative energy contracts was reflected in the financial statements as follows:

| | Amounts |
|---|---|
| | (in millions) |
| Regulatory liabilities, net | $3.2 |
| Other comprehensive income | - |
| Net income | - |
| Total fair value | $3.2 |

The Company enters into derivatives to hedge exposure to interest rate changes. Derivatives related to variable rate securities or forecasted transactions are accounted for as cash flow hedges. The derivatives are generally structured to mirror the critical terms of the hedged debt instruments; therefore, no material ineffectiveness has been recorded in earnings.

At December 31, 2003, the Company had interest rate swaps outstanding with net deferred losses as follows:

Cash Flow Hedges

| Maturity | Weighted Average Fixed Rate Paid | Notional Amount | Fair Value (Loss) |
|---|---|---|---|
| | | (in millions) | |
| 2004 | 1.39% | $873 | $(0.8) |
| 2005 | 1.56 | 50 | 0 |
| 2005 | 1.96 | 250 | (1.1) |

The fair value gain or loss for cash flow hedges is recorded in other comprehensive income and is reclassified into earnings at the same time the hedged items affect earnings. In 2003, the Company recognized losses totaling $11.3 million upon termination of certain interest derivatives at the same time it issued debt. These losses have been deferred in other comprehensive income and will be amortized to interest expense over the life of the related debt. For 2003, approximately $3.4 million of pre-tax losses were reclassified from other comprehensive income to interest expense. For 2004, pre-tax losses of approximately $3.2 million are expected to be reclassified from other comprehensive income to interest expense.

## 7. COMMITMENTS

### Construction Program

The Company currently estimates property additions to be approximately $747 million, $812 million, and $1,043 million in 2004, 2005, and 2006, respectively. These amounts include $28.9 million, $19.7 million and $20.0 million in 2004, 2005, and 2006, respectively, for construction expenditures related to contractual purchase commitments for uranium and nuclear fuel conversion, enrichment, and fabrication services included under "Fuel and Purchased Power Commitments." The construction program is subject to periodic review and revision, and actual construction costs may vary from estimates because of numerous factors, including, but not limited to, changes in business conditions, changes in FERC rules and transmission regulations, revised load growth estimates, changes in environmental regulations, changes in existing nuclear plants to meet new regulatory requirements, increasing costs of labor, equipment, and materials, and cost of capital. At December 31, 2003, significant purchase commitments were outstanding in connection with the construction program.

The Company has no generating plants under construction. However, construction related to new transmission and distribution facilities and capital improvements to existing generation, transmission and distribution facilities, including those needed to meet the environmental standards previously discussed, are ongoing.

The Company had three generation projects under construction during 2001. They included two units at Plant Dahlberg, a ten-unit, 800 megawatt combustion turbine facility; two combined cycle units totaling 1,132 megawatts at Plant Wansley; and Plant Franklin, a two-unit, 1,181 megawatt combined cycle facility. All three of these projects have been transferred to Southern Power. The ten Dahlberg units and two Franklin units were transferred in 2001 and the transfer of the two Wansley units was completed in January 2002.

Southern Company has guaranteed Southern Power obligations totaling $10.7 million for the Company's construction of transmission interconnection facilities to these plants.

### Fuel and Purchased Power Commitments

To supply a portion of the fuel requirements of its generating plants, the Company has entered into various long-term commitments for the procurement of fossil and nuclear fuel. In most cases, these contracts contain provisions for price escalations, minimum purchase levels, and other financial commitments. Natural gas purchase commitments contain fixed volumes with prices based on various indices at the time of delivery. Amounts included in the chart below represent estimates based on New York Mercantile future prices at December 31, 2003. Also the Company has entered into various long-term commitments for the purchase of electricity. Total estimated minimum long-term obligations at December 31, 2003 were as follows:

| Year | Natural Gas | Coal and Nuclear Fuel |
|---|---|---|
| | (in millions) | |
| 2004 | $ 156 | $1,321 |
| 2005 | 149 | 1,045 |
| 2006 | 148 | 895 |
| 2007 | 108 | 603 |
| 2008 | 172 | 372 |
| 2009 and thereafter | 1,625 | 183 |
| Total commitments | $2,358 | $4,419 |

Additional commitments for coal and for nuclear fuel will be required to supply the Company's future needs.

SCS may enter into various types of wholesale energy and natural gas contracts acting as an agent for the Company and all of the other Southern Company retail operating companies, Southern Power, and Southern Company GAS. Under these agreements, each of the retail operating companies, Southern Power, and Southern Company Gas may be jointly and severally liable. The creditworthiness of Southern Power and Southern Company GAS is currently inferior to the creditworthiness of the retail operating companies. Accordingly, Southern Company has entered into keep-well agreements with the Company and each of the retail operating companies to insure they will not subsidize or be responsible for any costs, losses, liabilities, or damages resulting from the inclusion of Southern Power or Southern Company GAS as a contracting party under these agreements.

The Company has commitments regarding a portion of a 5 percent interest in Plant Vogtle owned by MEAG that are in effect until the latter of the retirement of the plant or the latest stated maturity date of MEAG's bonds issued to finance such ownership interest. The payments for capacity are required whether or not any capacity is available. The energy cost is a function of each unit's variable operating costs. Except as noted below, the cost of such capacity and energy is included in purchased power from non-affiliates in the Company's Statements of Income. Capacity payments totaled $57 million, $57 million, and $59 million in 2003, 2002, and 2001, respectively. The current projected Plant Vogtle capacity payments are:

| Year | Capacity Payments (in millions) |
|---|---|
| 2004 | $ 57 |
| 2005 | 56 |
| 2006 | 54 |
| 2007 | 54 |
| 2008 | 54 |
| 2009 and thereafter | 369 |
| Total | $644 |

Portions of the payments noted above relate to costs in excess of Plant Vogtle's allowed investment for ratemaking purposes. The present value of these portions at the time of the disallowance was written off.

The Company has entered into other various long-term commitments for the purchase of electricity. Estimated total long-term obligations at December 31, 2003 were as follows:

| Year | Affiliated | Non-Affiliated |
|---|---|---|
| | (in millions) | |
| 2004 | $ 191 | $ 45 |
| 2005 | 268 | 79 |
| 2006 | 283 | 88 |
| 2007 | 283 | 89 |
| 2008 | 282 | 90 |
| 2009 and thereafter | 1,722 | 482 |
| Total | $3,029 | $873 |

**Operating Leases**

The Company has entered into various operating leases with various terms and expiration dates. Rental expenses related to these operating leases totaled $36 million for 2003, $35 million for 2002, and $14 million for 2001. At December 31, 2003, estimated minimum rental commitments for these noncancelable operating leases were as follows:

| Year | Minimum Obligations | | |
|---|---|---|---|
| | Rail Cars | Other | Total |
| | (in millions) | | |
| 2004 | $ 12 | $22 | $ 34 |
| 2005 | 12 | 18 | 30 |
| 2006 | 12 | 14 | 26 |
| 2007 | 10 | 12 | 22 |
| 2008 | 11 | 11 | 22 |
| 2009 and thereafter | 56 | 16 | 72 |
| Total | $113 | $93 | $206 |

In addition to the rental commitments above, the Company has obligations upon expiration of certain rail car leases with respect to the residual value of the leased property. These leases expire in 2004 and 2010, and the Company's maximum obligations are $13 million and $40 million, respectively. At the termination of the leases, at the Company's option, the Company may either exercise its purchase option or the property can be sold to a third party. The Company expects that the fair market value of the leased property would substantially reduce or eliminate the Company's payments under the residual value obligation. A portion of the rail car lease obligations is shared with the joint owners of plants Scherer and Wansley. Rental expenses related to the rail car leases are fully recoverable through the fuel cost recovery clause as ordered by the GPSC.

**Guarantees**

Prior to 1999, a subsidiary of Southern Company originated loans to residential customers of the Company for heat pump purchases. These loans were sold to Fannie Mae with recourse for any loan with payments outstanding over 120 days. The Company is responsible for the repurchase of customers' delinquent loans. As of December 31, 2003, the outstanding loans guaranteed by the Company were $8.7 million and loan loss reserves of $1.8 million have been recorded.

Alabama Power has guaranteed unconditionally the obligation of SEGCO under an installment sale agreement for the purchase of certain pollution control facilities at SEGCO's generating units, pursuant to

which $24.5 million principal amount of pollution control revenue bonds are outstanding. The Company has agreed to reimburse Alabama Power for the pro rata portion of such obligation corresponding to the Company's then proportionate ownership of stock of SEGCO if Alabama Power is called upon to make such payment under its guaranty. In May 2003, SEGCO issued an additional $50 million in senior notes. Alabama Power guaranteed the debt obligation and in October 2003, the Company agreed to reimburse Alabama Power for the pro rata portion of such obligation corresponding to its then proportionate ownership of stock of SEGCO if Alabama Power is called upon to make such payment under its guaranty.

As discussed earlier in this note under "Operating Leases," the Company has entered into certain residual value guarantees related to rail car leases.

## 8. NUCLEAR INSURANCE

Under the Price-Anderson Amendments Act of 1988, the Company maintains agreements of indemnity with the NRC that, together with private insurance, cover third-party liability arising from any nuclear incident occurring at the Company's nuclear power plants. The Act provides funds up to $10.9 billion for public liability claims that could arise from a single nuclear incident. Each nuclear plant is insured against this liability to a maximum of $300 million by American Nuclear Insurers (ANI), with the remaining coverage provided by a mandatory program of deferred premiums that could be assessed, after a nuclear incident, against all owners of nuclear reactors. The Company could be assessed up to $101 million per incident for each licensed reactor it operates but not more than an aggregate of $10 million per incident to be paid in a calendar year for each reactor. Such maximum assessment for the Company, excluding any applicable state premium taxes -- based on its ownership and buyback interests -- is $203 million per incident but not more than an aggregate of $20 million to be paid for each incident in any one year. The Price-Anderson Amendments Act expired in August 2002; however, the indemnity provisions of the Act remain in place for commercial nuclear reactors.

The Company is a member of Nuclear Electric Insurance Limited (NEIL), a mutual insurer established to provide property damage insurance in an amount up to $500 million for members' nuclear generating facilities.

Additionally, the Company has policies that currently provide decontamination, excess property insurance, and premature decommissioning coverage up to $2.25 billion for losses in excess of the $500 million primary coverage. This excess insurance is also provided by NEIL.

NEIL also covers additional costs that would be incurred in obtaining replacement power during a prolonged accidental outage at a member's nuclear plant. Members can purchase this coverage, subject to a deductible waiting period of up to 26 weeks, with a maximum per occurrence per unit limit of $490 million. After this deductible period, weekly indemnity payments would be received until either the unit is operational or until the limit is exhausted in approximately three years. The Company purchases the maximum limit allowed by NEIL subject to ownership limitations and has elected a 12 week waiting period.

Under each of the NEIL policies, members are subject to assessments if losses each year exceed the accumulated funds available to the insurer under that policy. The current maximum annual assessments for the Company under the NEIL policies would be $40 million.

Following the terrorist attacks of September 2001, both ANI and NEIL confirmed that terrorist acts against commercial nuclear power stations would be covered under their insurance. Both companies, however, revised their policy terms on a prospective basis to include an industry aggregate for all "non-certified" terrorist acts (i.e., acts that are not certified acts of terrorism pursuant to the Terrorism Risk Insurance Act of 2002 (TRIA). The NEIL aggregate -- applies to non-certified claims stemming from terrorism within a 12-month duration -- is $3.24 billion plus any amounts available through reinsurance or indemnity from an outside source. The non-certified ANI cap is a $300 million shared industry aggregate. Any act of terrorism that is certified pursuant to the TRIA will not be subject to the foregoing NEIL and ANI limitations but will be subject to the TRIA annual aggregate limitation of $100 billion of insured losses arising from certified acts of terrorism. The TRIA will expire on December 31, 2005.

For all on-site property damage insurance policies for commercial nuclear power plants, the NRC requires that the proceeds of such policies shall be dedicated first for the sole purpose of placing the reactor in a safe and

stable condition after an accident. Any remaining proceeds are to be applied next toward the costs of decontamination and debris removal operations ordered by the NRC, and any further remaining proceeds are to be paid either to the Company or to its bond trustees as may be appropriate under the policies and applicable trust indentures.

All retrospective assessments, whether generated for liability, property, or replacement power, may be subject to applicable state premium taxes.

## 9. QUARTERLY FINANCIAL INFORMATION (UNAUDITED)

Summarized quarterly financial information for 2003 and 2002 is as follows:

| Quarter Ended | Operating Revenues | Operating Income | Net Income After Dividends on Preferred Stock |
|---|---|---|---|
| | | (in millions) | |
| **March 2003** | **$1,126** | **$262** | **$133** |
| **June 2003** | **1,190** | **293** | **159** |
| **September 2003** | **1,487** | **490** | **265** |
| **December 2003** | **1,111** | **179** | **74** |
| March 2002 | $1,007 | $260 | $127 |
| June 2002 | 1,204 | 320 | 171 |
| September 2002 | 1,517 | 498 | 271 |
| December 2002 | 1,095 | 126 | 49 |

The Company's business is influenced by seasonal weather conditions.

# GULF POWER COMPANY

# FINANCIAL SECTION

## MANAGEMENT'S REPORT

**Gulf Power Company 2003 Annual Report**

The management of Gulf Power Company has prepared -- and is responsible for -- the financial statements and related information included in this report. These statements were prepared in accordance with accounting principles generally accepted in the United States and necessarily include amounts that are based on the best estimates and judgments of management. Financial information throughout this annual report is consistent with the financial statements.

The Company maintains a system of internal accounting controls to provide reasonable assurance that assets are safeguarded and that the accounting records reflect only authorized transactions of the Company. Limitations exist in any system of internal controls, however, based on a recognition that the cost of the system should not exceed its benefits. The Company believes its system of internal accounting controls maintains an appropriate cost/benefit relationship.

The Company's internal accounting controls are evaluated on an ongoing basis by the Company's internal audit staff. The Company's independent public accountants also consider certain elements of the internal control system in order to determine their auditing procedures for the purpose of expressing an opinion on the financial statements.

The audit committee of Southern Company's board of directors, composed of four independent directors, provides a broad overview of management's financial reporting and control functions. Additionally, the Company's Controls and Compliance Committee, comprised of five outside directors, meets periodically with management, the internal auditors, and the independent public accountants to discuss auditing, internal controls, and compliance matters. The internal auditors and independent public accountants have access to the members of these committees at any time.

Management believes that its policies and procedures provide reasonable assurance that the Company's operations are conducted according to a high standard of business ethics.

In management's opinion, the financial statements present fairly, in all material respects, the financial position, results of operations, and cash flows of Gulf Power Company in conformity with accounting principles generally accepted in the United States.

Susan N. Story

## INDEPENDENT AUDITORS' REPORT

**Gulf Power Company:**

We have audited the accompanying balance sheets and statements of capitalization of Gulf Power Company (a wholly owned subsidiary of Southern Company) as of December 31, 2003 and 2002, and the related statements of income, comprehensive income, common stockholder's equity, and cash flows for the years then ended. These financial statements are the responsibility of Gulf Power Company's management. Our responsibility is to express an opinion on these financial statements based on our audits. The financial statements of Gulf Power Company for the year ended December 31, 2001 were audited by other auditors who have ceased operations. Those auditors expressed an unqualified opinion on those financial statements and included an explanatory paragraph that described a change in the method of accounting for derivative instruments and hedging activities in their report dated February 13, 2002.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements (pages II-175 to II-195) present fairly, in all material respects, the financial position of Gulf Power Company at December 31, 2003 and 2002, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note 1 to the financial statements, in 2003 Gulf Power Company changed its method of accounting for asset retirement obligations.

Deloitte & Touche LLP

Atlanta, Georgia
March 1, 2004

**THE FOLLOWING REPORT OF INDEPENDENT PUBLIC ACCOUNTANTS IS A COPY OF THE REPORT PREVIOUSLY ISSUED IN CONNECTION WITH THE COMPANY'S 2001 ANNUAL REPORT ON FORM 10-K AND HAS NOT BEEN REISSUED BY ARTHUR ANDERSEN LLP. SEE EXHIBIT 23(d)2 FOR ADDITIONAL INFORMATION.**

**To Gulf Power Company:**

We have audited the accompanying balance sheets and statements of capitalization of Gulf Power Company (a Maine corporation and a wholly owned subsidiary of Southern Company) as of December 31, 2001 and 2000, and the related statements of income, common stockholder's equity, and cash flows for each of the three years in the period ended December 31, 2001. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements (pages II-129 to II-144) referred to above present fairly, in all material respects, the financial position of Gulf Power Company as of December 31, 2001 and 2000, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2001, in conformity with accounting principles generally accepted in the United States.

As explained in Note 1 to the financial statements, effective January 1, 2001, Gulf Power Company changed its method of accounting for derivative instruments and hedging activities.

Arthur Andersen LLP

## OVERVIEW OF EARNINGS AND BUSINESS ACTIVITIES

### *Earnings*

Gulf Power Company's 2003 net income after dividends on preferred stock was $69.0 million, an increase of $2.0 million from the previous year. In 2002, earnings were $67.0 million, an increase of $8.7 million from the previous year. In 2001, earnings were $58.3 million, up $6.5 million when compared to the prior year. The improvement in earnings in 2003 is due primarily to higher operating revenues related to an increase in base rates effective in May 2002, offset somewhat by higher operating expenses and increases in depreciation expense primarily related to the commercial operation of Plant Smith Unit 3 beginning in April 2002. The improvement in earnings in 2002 is due primarily to higher operating revenues related to the increase in base rates, offset somewhat by higher operating expenses and higher financing costs primarily related to the commercial operation of the new unit. The increase in 2001 earnings was primarily a result of an increase in Allowance for Funds Used During Construction (AFUDC) and lower interest expense during construction of the unit.

### *Business Activities*

The Company operates as a vertically integrated utility providing electricity to customers within its traditional service area located in northwest Florida and to wholesale customers in the Southeast. Prices for electricity provided by the Company to retail customers are set by the Florida Public Service Commission (FPSC).

Several factors affect the opportunities, challenges, and risks of selling electricity. These factors include the Company's ability to maintain a stable regulatory environment, to achieve energy sales growth while containing costs, and to recover costs related to growing demand and increasingly stricter environmental standards. Future earnings in the near term will depend, in part, upon growth in energy sales, which is subject to a number of factors. These factors include weather, competition, new energy contracts with neighboring utilities, energy conservation practiced by customers, the price of electricity, the price elasticity of demand, and the rate of economic growth in the Company's service area.

## RESULTS OF OPERATIONS

A condensed income statement follows:

| | Amount | Increase (Decrease) From Prior Year | | |
|---|---|---|---|---|
| | **2003** | **2003** | 2002 | 2001 |
| | | (in millions) | | |
| Operating revenues | **$878** | **$ 58** | $ 95 | $ 11 |
| Fuel | **317** | **42** | 73 | (15) |
| Purchased power | **50** | **(12)** | (44) | 24 |
| Other operation and maintenance | **211** | **11** | 23 | 5 |
| Depreciation and amortization | **82** | **5** | 9 | 1 |
| Taxes other than income taxes | **66** | **5** | 6 | (1) |
| Total operating expenses | **726** | **51** | 67 | 14 |
| Operating income | **152** | **7** | 28 | (3) |
| Interest Expenses and other, net | **(42)** | **(1)** | (13) | 10 |
| Income taxes | **(41)** | **(4)** | (6) | - |
| Net income | **$ 69** | **$ 2** | $ 9 | $ 7 |

### *Revenues*

Operating revenues increased in 2003 when compared to 2002 and 2001. The following table summarizes the changes in operating revenues for the past three years:

| | **2003** | 2002 | 2001 |
|---|---|---|---|
| | | (in thousands) | |
| Retail – Prior Year | **$665,836** | $584,591 | $548,640 |
| Change in - | | | |
| Base Revenues | **22,000** | 31,200 | - |
| Sales Growth | **7,040** | 16,557 | 10,254 |
| Weather | **(6,757)** | 9,497 | (5,699) |
| Fuel and other cost recovery | **11,055** | 23,991 | 31,396 |
| Retail—Current Year | **699,174** | 665,836 | 584,591 |
| Sales for resale-- | | | |
| Non-affiliates | **76,767** | 77,171 | 82,252 |
| Affiliates | **63,268** | 40,391 | 27,256 |
| Total sales for resale | **140,035** | 117,562 | 109,508 |
| Other operating revenues | **38,488** | 37,069 | 31,104 |
| Total operating revenues | **$877,697** | $820,467 | $725,203 |
| Percent change | **7.0%** | 13.1% | 1.5% |

Retail revenues increased $33.3 million, or 5.0 percent in 2003, $81.2 million, or 13.9 percent, in 2002, and $36.0 million, or 6.6 percent, in 2001. The significant factors driving these changes are shown in the table above. See Note 3 to the financial statements under "Retail Revenue Sharing Plan" for further information.

"Fuel and other cost recovery" includes: recovery provisions for fuel expenses and the energy component of purchased power costs; energy conservation costs, purchased power capacity costs, and environmental compliance costs. Annually, the Company seeks recovery of projected costs including any true-up amount from prior periods. Approved rates are implemented each January. Therefore, the recovery provisions generally equal the related expenses and have no material effect on net income. See Notes 1 and 3 to the financial statements under "Revenues and Regulatory Cost Recovery Clauses" and "Environmental Cost Recovery," respectively, for further information.

Sales for resale were $140.0 million in 2003, an increase of $22.5 million, or 19.1 percent, primarily due to increased energy sales for resale to affiliates reflecting greater availability of generation when compared to 2002. Sales for resale were $117.6 million in 2002, an increase of $8.1 million, or 7.4 percent, due to increased energy sales for resale to affiliates reflecting the commercial operation of Plant Smith Unit 3. Sales for resale were $109.5 million in 2001, a decrease of $24.4 million, or 18.2 percent, from 2000. These changes were primarily weather related. Sales to affiliated companies vary from year to year depending on demand and the availability and cost of generating resources at each company. These energy sales do not have a significant impact on earnings, since they are generally sold at marginal cost.

Revenues from sales to utilities outside the service area under long-term contracts consist of capacity and energy components. Capacity revenues reflect the recovery of fixed costs and a return on investment under the contracts. Energy is generally sold at variable cost. The capacity and energy components under these long-term contracts were as follows:

| | **2003** | 2002 | 2001 |
|---|---|---|---|
| | | (in thousands) | |
| Unit Power -- | | | |
| Capacity | **$18,598** | $19,898 | $19,472 |
| Energy | **30,894** | 28,565 | 27,579 |
| Total | **$49,492** | $48,463 | $47,051 |

Capacity revenues remained relatively unchanged during 2003, 2002, and 2001. Unit power from specific generating plants is currently being sold to Progress Energy FL, Florida Power & Light Company, and Jacksonville Electric Authority. Under these agreements, 211 megawatts of net dependable capacity were sold by the Company during 2003. No significant declines in the amount of capacity are scheduled until the termination of the contracts in 2010.

Other operating revenues for 2003 increased $1.4 million due primarily to an increase in franchise fees. Other operating revenues for 2002 increased $6.0 million primarily due to a $3.3 million increase in franchise fees, a $1.7 million settlement related to a purchased power agreement, and a $0.9 million increase in revenues from the transmission of electricity to others.

***Energy Sales***

Kilowatt-hour (KWH) sales for 2003 and the percent changes by year were as follows:

| | **KWH** | Percent Change | | |
|---|---|---|---|---|
| | **2003** | **2003** | 2002 | 2001 |
| | **(millions)** | | | |
| Residential | **5,101** | **(0.8)%** | 9.1% | (1.5)% |
| Commercial | **3,614** | **1.7** | 4.0 | 1.2 |
| Industrial | **2,147** | **4.5** | 1.8 | 4.8 |
| Other | **23** | **4.7** | - | 10.5 |
| Total retail | **10,885** | **1.0** | 5.9 | 0.6 |
| Sales for resale | | | | |
| Non-affiliates | **2,504** | **16.1** | 3.1 | 22.8 |
| Affiliates | **2,439** | **41.8** | 78.4 | (49.8) |
| Total | **15,828** | **8.0** | 10.7 | (3.7) |

Residential sales decreased 0.8 percent in 2003 primarily due to milder summer weather, when compared to 2002. In 2002, residential sales increased 9.1 percent over 2001 primarily due to more extreme summer and winter weather combined with increased summer sales along the coastal regions. Residential sales decreased 1.5 percent in 2001 primarily due to milder summer and winter weather, when compared to 2000. Residential sales are expected to increase just under 1 percent annually over the next five years, given normal weather conditions.

Commercial sales increased 1.7 percent in 2003, when compared to 2002, primarily due to increased sales along the coastal regions, in spite of milder summer weather. In 2002, commercial sales increased 4.0 percent primarily due to more extreme weather when compared to 2001.

Commercial sales increased 1.2 percent in 2001, when compared to 2000, primarily due to increased sales along the coastal regions, in spite of milder summer weather. Commercial sales are expected to increase just under 1 percent annually over the next five years, given normal weather conditions.

Industrial sales increased 4.5 percent in 2003, when compared to 2002, primarily due to additional sales resulting from high natural gas prices. In 2002, industrial sales increased 1.8 percent, when compared to 2001, primarily due to normal customer growth. Industrial sales increased 4.8 percent in 2001, when compared to 2000, primarily due to increased sales to Real Time Pricing customers. Industrial sales are expected to increase approximately 1 percent annually over the next five years.

An increase in energy sales for resale to non-affiliates of 16.1 percent in 2003, 3.1 percent in 2002 and 22.8 percent in 2001 is primarily related to unit power sales under long-term contracts to other Florida utilities and bulk power sales under short-term contracts to other non-affiliated utilities. Fluctuations in oil and natural gas prices, which are the primary fuel sources for the unit power sales customers, influence changes in sales. However, these fluctuations in energy sales under long-term contracts have minimal effects on earnings because the energy is generally sold at variable cost. Energy sales to affiliated companies vary from year to year depending on demand and availability and cost of generating resources at each company.

*Expenses*

Total operating expenses in 2003 increased $51.4 million, or 7.6 percent, over the amount recorded in 2002 due primarily to higher fuel and operating costs. In 2002 total operating expenses increased $67.0 million, or 11 percent, compared to 2001 due primarily to higher fuel and maintenance costs. In 2001, total operating expenses increased $13.5 million, or 2.3 percent, from the prior year due primarily to higher purchased power expenses and maintenance expenses.

In 2003, other operation and maintenance expense increased $11 million, or 5.3 percent, primarily due to an increase of $1.6 million of customer accounts expense and an increase of $7.1 million in the accumulated provision for property damage. See Note 1 to the financial statements under "Provision for Property Damage" for additional information. In 2002, other operation and maintenance expense increased $23 million, or 12.7 percent, mainly due to scheduled generating plant maintenance. In 2001, other operation and maintenance increased by $5 million, or 2.4 percent, primarily due to increased scheduled maintenance for generating plant and transmission and distribution facilities.

Fuel costs constitute the single largest expense for the Company. The mix of fuel sources for generation of electricity is determined primarily by demand, the unit cost of fuel consumed, and the availability of generation resources.

In 2003, fuel expense increased $42.6 million, or 15.6 percent, when compared to 2002 due primarily to increased generation to meet the demand for energy and higher average cost of fuel. Fuel expense in 2002, when compared to 2001, increased $73.2 million, or 36.5 percent, due primarily to the commercial operation of Plant Smith Unit 3 beginning in April 2002. In 2001, fuel expenses decreased $15.1 million, or 7.0 percent, when compared to 2000 as a result of decreased generation.

The amount and sources of generation, the average cost of fuel per net kilowatt-hour generated, and the average costs of purchased power were as follows:

| | **2003** | 2002 | 2001 |
|---|---|---|---|
| Total generation (millions of kilowatt-hours) | **14,988** | 13,142 | 11,423 |
| Sources of generation (percent) | | | |
| Coal | **86.9** | 81.8 | 99.0 |
| Gas | **13.1** | 18.2 | 1.0 |
| Average cost of fuel per net kilowatt-hour generated (cents)-- | **2.11** | 2.08 | 1.76 |
| Average cost of purchase power per net kilowatt-hour | **3.07** | 2.71 | 4.29 |

Purchased power expense decreased in 2003 $12.3 million, or 19.5 percent, primarily due to a decrease in the volume of energy needed to meet the Company's load requirements. Purchased power expense decreased in 2002 by $43.2 million, or 40.7 percent, due primarily to the additional generating capacity from the Company's Plant Smith Unit 3. Purchased power expense for 2001 increased by $23.8 million, or 28.8 percent, due primarily to an increase in purchased power from affiliate companies.

Fuel costs and purchases of energy will vary from year to year depending on demand and the availability and cost of generating resources. These costs do not have a significant impact on earnings, since they are generally offset by revenues through the Company's fuel cost recovery mechanism.

Depreciation and amortization expense increased $5.3 million, or 6.9 percent, in 2003 primarily due to the commercial operation of Plant Smith Unit 3 beginning in April 2002 and the amortization of a regulatory asset. Depreciation and amortization expense increased $8.8 million, or 12.9 percent, in 2002 primarily due to the commercial operation of Plant Smith Unit 3 beginning in April 2002. Depreciation and amortization expense increased $1.3 million, or 2.0 percent, in 2001 due to an increase in depreciable property and the amortization of a regulatory asset.

Allowance for equity funds used during construction decreased $2.3 million, or 76.1 percent, in 2003 and $2.4 million, or 44.5 percent, in 2002 primarily due to the completion of Plant Smith Unit 3 beginning in April 2002. See Note 1 to the financial statements under "Allowance for Funds Used During Construction and Interest Capitalized" for further information.

Interest expense decreased $0.4 million, or 1.2 percent, in 2003 due primarily to the refinancing of $173 million of senior notes and pollution control bonds at more favorable interest rates. Interest expense increased $6.4 million, or 25.6 percent, in 2002 due primarily to the issuance of $180 million of senior notes in 2001 and 2002 that were primarily used to finance the construction of Plant Smith Unit 3. In 2001, interest expense decreased $3.1 million, or 10.9 percent, due primarily to higher allowance for debt funds used during construction related to the Company's Plant Smith Unit 3, as well as lower interest rates on notes payable and variable rate pollution control bonds.

## Effects of Inflation

The Company is subject to rate regulation based on the recovery of historical costs. In addition, the income tax laws are also based on historical costs. Therefore, inflation creates an economic loss because the Company is recovering its cost of investments in dollars that have less purchasing power. While the inflation rate has been relatively low in recent years, it continues to have an adverse effect on the Company because of the large investment in utility plant with long economic lives. Conventional accounting for historical cost does not recognize this economic loss nor the partially offsetting gain that arises through financing facilities with fixed-money obligations, such as long-term debt and preferred securities. Any recognition of inflation by regulatory authorities is reflected in the rate of return allowed in the Company's approved electric rates.

## Future Earnings Potential

### *General*

The results of operations for the past three years are not necessarily indicative of future earnings potential. The level of the Company's future earnings depends on numerous factors. These factors include the ability of the Company to maintain a stable regulatory environment, to achieve energy sales growth while containing costs, and to recover costs related to growing demand and increasingly stricter environmental standards. Future earnings in the near term will depend, in part, upon growth in energy sales, which is subject to a number of factors. These factors include weather, competition, new energy contracts with neighboring utilities, energy conservation practiced by customers, the price of electricity, the price elasticity of demand, and the rate of economic growth in the Company's service area.

### *Industry Restructuring*

The Company operates as a vertically integrated utility providing electricity to customers within its traditional service area located in northwest Florida and to wholesale customers in the Southeast. Prices for electricity provided by the Company to retail customers are set by the FPSC under cost–based regulatory principles. Retail rates and earnings are reviewed and adjusted periodically within certain limitations based on earned return on equity.

The electric utility industry in the United States is continuing to evolve as a result of regulatory and competitive factors. Among the early primary agents of change was the Energy Policy Act of 1992 (Energy Act). The Energy Act allowed independent power producers to access a utility's transmission network and sell electricity to other utilities.

Although the Energy Act does not provide for retail customer access, it was a major catalyst for restructuring and consolidations that took place within the utility industry. Numerous federal and state initiatives

that promote wholesale and retail competition are in varying stages. Among other things, these initiatives allow retail customers in some states to choose their electricity provider. Some states have approved initiatives that result in a separation of the ownership and/or operation of generating facilities from the ownership and/or operation of transmission and distribution facilities. While various restructuring and competition initiatives have been discussed in Florida, none have been enacted. Enactment could require numerous issues to be resolved, including significant ones relating to recovery of any stranded investments, full cost recovery of energy produced, and other issues related to the energy crisis that occurred in California, as well as the August 2003 power outage in the Northeast.

In 2000, Florida's Governor appointed a study commission to look at the state's electric industry, studying issues including current and future reliability of electric and natural gas supply, retail and wholesale competition, environmental impacts of energy supply, conservation, and tax issues. The study commission's final report, entitled "Florida...Energy Wise," was presented in December 2001 to the Governor and the Legislature. The five key areas addressed by the report were Energy Efficiency, Adequate and Reliable Supply of Energy, Improvement of Energy Infrastructure, Preservation of the Environment, and Utilization of New Technologies and Renewable Resources. Changes were recommended within the wholesale energy market only. For changes to occur, legislation will have to be drafted and voted into law by the Florida Legislature. No legislation of this type has been voted on to date. The effects of any proposed changes cannot presently be determined but could have a material effect on the Company's financial condition and results of operations.

Since 2001, merchant energy companies and traditional electric utilities with significant energy marketing and trading activities have come under severe financial pressures. Many of these companies have completely exited or drastically reduced all energy marketing and trading activities and sold foreign and domestic electric infrastructure assets. The Company has not experienced any material adverse financial impact regarding its limited energy trading operations through Southern Company Services (SCS) and its recent generating capacity additions.

Continuing to be a low-cost producer could provide opportunities to increase the size and profitability of the electricity sales business in markets that evolve with changing regulation and competition. Conversely, future regulatory changes could adversely affect the Company's growth, and if the Company does not remain a low-cost producer and provide quality service, then energy sales growth could be limited, and this could significantly erode earnings.

### *Environmental Matters*

*New Source Review Actions*

In November 1999, the Environmental Protection Agency (EPA) brought a civil action in the U.S. District Court in Georgia against Alabama Power, Georgia Power, and SCS. The complaint alleged violations of the New Source Review (NSR) provisions of the Clean Air Act with respect to five coal-fired generating facilities in Alabama and Georgia. The civil action requested penalties and injunctive relief, including an order requiring the installation of the best available control technology at the affected units. The EPA concurrently issued to the retail operating companies notices of violation relating to ten generating facilities, which included the five facilities mentioned previously and the Company's Plants Crist and Scherer. In early 2000, the EPA filed a motion to amend its complaint to add the violations alleged in its notices of violation and to add the Company, Mississippi Power, and Savannah Electric as defendants. However, in March 2001, the court denied the motion with respect to the Company and Mississippi Power based on lack of jurisdiction, and the EPA has not refiled. See Note 3 to the financial statements under "New Source Review Actions" for additional information.

In December 2002 and October 2003, the EPA issued final revisions to its NSR regulations under the Clean Air Act. The December 2002 revisions included changes to the regulatory exclusions and the methods of calculating emissions increases. The October 2003 regulations clarified the scope of the existing Routine Maintenance, Repair, and Replacement exclusion. A coalition of states and environmental organizations filed petitions for review of these revisions with the U.S. Court of Appeals for the District of Columbia Circuit. On December 24, 2003, the Court of Appeals granted a stay of the October 2003 revisions pending its review of the rules and ordered that its review be conducted on an expedited basis. In January 2004, the Bush Administration announced that it would continue to enforce the existing rules until the courts resolve

legal challenges to the EPA's revised NSR regulations. In any event, the final regulations must be adopted by the state of Florida in order to apply to the Company's facilities. The effect of these final regulations and the related legal challenges cannot be determined at this time.

The Company believes that it has complied with applicable laws and the EPA's regulations and interpretations in effect at the time the work in question took place. The Clean Air Act authorizes civil penalties of up to $27,500 per day, per violation at each generating unit. Prior to January 30, 1997, the penalty was $25,000 per day. An adverse outcome of this matter could require substantial capital expenditures that cannot be determined at this time and could possibly require payment of substantial penalties. This could affect future results of operations, cash flows, and possibly financial condition if such costs are not recovered through regulated rates.

*Environmental Statutes and Regulations*

The Company's operations are subject to extensive regulation by state and federal environmental agencies under a variety of statutes and regulations governing environmental media, including air, water, and land resources. Compliance with these environmental requirements will involve significant costs -- both capital and operating -- a major portion of which is expected to be recovered through existing ratemaking provisions. Environmental costs that are known and estimable at this time are included in capital expenditures discussed under "Capital Requirements and Contractual Obligations." The Florida Legislature has adopted legislation that allows a utility to petition the FPSC for specific recovery of prudent environmental compliance costs that are not being recovered through base rates or any other recovery mechanism. The legislation is discussed in Note 3 to the financial statements under "Environmental Cost Recovery." Substantially all of the costs for the Clean Air Act and other new environmental legislation discussed below are expected to be recovered through the Environmental Cost Recovery Clause. There is no assurance however, that all such costs will, in fact, be recovered.

Compliance with the federal Clean Air Act and resulting regulations has been and will continue to be a significant focus for the Company. The Title IV acid rain provisions of the Clean Air Act, for example, required significant reductions in sulfur dioxide and nitrogen oxide emissions. Title IV compliance was effective in 2000 and associated construction expenditures totaled approximately $42 million for the Company.

In July 1997, the EPA revised the national ambient air quality standards for ozone and particulate matter. These revisions made the standards significantly more stringent. In the subsequent litigation of these standards, the U.S. Supreme Court found the EPA's implementation program for the new eight-hour ozone standard unlawful and remanded it to the EPA for further rulemaking. During 2003, the EPA proposed implementation rules designed to address the court's concerns.

Based on recommendations from the State, the EPA is expected to designate areas of Florida as attainment or nonattainment with the new eight-hour ozone and particulate standards in April 2004 and with the new fine particulate matter standard by the end of 2004. In August 2002, the Company entered into an agreement with the Florida Department of Environmental Protection (FDEP) calling for nitrogen oxide (NOx) emission reductions at Plant Crist to help ensure attainment of the new standards in the Pensacola area. Under the agreement, the Company will install Selective Catalytic Reduction controls and a new precipitator on Plant Crist Unit 7 by 2005. In addition, the Company agreed to retire Plant Crist Unit 1 in 2003 and Units 2 and 3 by 2006. The conditions of the agreement will be fully implemented by 2006 at a cost of approximately $133 million, of which $99 million remains to be spent. Costs for implementation of the agreement have been approved for recovery through the Environmental Cost Recovery Clause.

In January 2004, the EPA issued a proposed Interstate Air Quality Rule to address interstate transport of ozone and fine particles. This proposed rule would require additional year-round sulfur dioxide and nitrogen oxide emission reductions from power plants in the eastern United States in two phases – in 2010 and 2015. The EPA currently plans to finalize this rule by 2005. If finalized, the rule could modify or supplant other State Implementation Plan (SIP) requirements for attainment of the fine particulate matter standard and the eight-hour ozone standard. The impact of this rule on the Company will depend upon the specific requirements of the final rule and cannot be determined at this time.

Further reductions in sulfur dioxide and nitrogen oxides could also be required under the EPA's Regional Haze rules. The Regional Haze rules require states to establish Best Available Retrofit Technology (BART) standards for certain sources that contribute to regional haze. The Company has a number of plants that could be

subject to these rules. The EPA's Regional Haze program calls for states to submit SIPs in 2007. The SIPs must contain emission reduction strategies for implementing BART and achieving progress toward the Clean Air Act's visibility improvement goal. In 2002, however, the U.S. Court of Appeals for the District of Columbia Circuit vacated and remanded the BART provisions of the federal Regional Haze rules to the EPA for further rulemaking. The EPA has entered into an agreement that requires proposed revised rules in April 2004 and final rules in 2005. Because new BART rules have not been developed and state visibility assessments for progress are only beginning, it is not possible to determine the effect of these rules on the Company at this time.

The EPA's Compliance Assurance Monitoring (CAM) regulations under Title V of the Clean Air Act require that monitoring be performed to ensure compliance with emissions limitations on an ongoing basis. In 2004 and 2005, a number of the Company's plants will likely become subject to CAM requirements for at least one pollutant, in most cases, particulate matter. The Company is in the process of developing CAM plans. Because the plans are still under development, the Company cannot determine the costs associated with implementation of the CAM regulations at this time. Actual ongoing monitoring costs are expensed as incurred and are not material for any year presented.

In January 2004, the EPA issued proposed rules regulating mercury emissions from electric utility boilers. The proposal solicits comments on two possible approaches for the new regulations – a Maximum Achievable Control Technology approach and a cap-and-trade approach. Either approach would require significant reductions in mercury emissions from company facilities. The regulations are scheduled to be finalized by the end of 2004, and compliance could be required as early as 2007. Because the regulations have not been finalized, the impact on the Company cannot be determined at this time.

Several major bills to amend the Clean Air Act to impose more stringent emissions limitations on power plants have been proposed by Congress. Three of these, the Bush Administration's Clear Skies Act, the Clean Power Act of 2003, and the Clean Air Planning Act of 2003, propose to further limit power plant emissions of sulfur dioxide, nitrogen oxides, and mercury. The latter two bills also propose to limit emissions of carbon dioxide. The cost impacts of such legislation would depend upon the specific requirements enacted and cannot be determined at this time.

Domestic efforts to limit greenhouse gas emissions have been spurred by international discussions surrounding the Framework Convention on Climate Change and specifically the Kyoto Protocol, which proposes international constraints on the emissions of greenhouse gases. The Bush Administration does not support U.S. ratification of the Kyoto Protocol or other mandatory carbon dioxide reduction legislation and has instead announced a new voluntary climate initiative, known as Climate VISION, which seeks an 18 percent reduction by 2012 in the rate of greenhouse gas emissions relative to the dollar value of the U.S. economy. Through Southern Company, the Company is involved in a voluntary electric utility industry sector climate change initiative in partnership with the government. The electric utility sector has pledged to reduce its greenhouse gas intensity 3 to 5 percent over the next decade and is in the process of developing a memorandum of understanding with the Department of Energy (DOE) to cover this voluntary program.

The Company must comply with other environmental laws and regulations that cover the handling and disposal of waste and releases of hazardous substances. Under these various laws and regulations, the Company could incur substantial costs to clean up properties. The Company conducts studies to determine the extent of any required cleanup and has recognized in its financial statements the costs for clean up and ongoing monitoring of known sites. Amounts for clean up and ongoing monitoring costs were not material for any year presented. The Company may be liable for some or all required cleanup costs for additional sites that may require environmental remediation.

Under the Clean Water Act, the EPA has been developing new rules aimed at reducing impingement and entrainment of fish and fish larvae at power plants cooling water intake structures. On February 16, 2004, the EPA finalized these rules. These rules will require biological studies and, perhaps, retrofits to some intake structures at existing power plants. The impact of these new rules will depend on the results of studies and analyses performed as part of the rules' implementation.

In addition, under the Clean Water Act, the EPA and the FDEP are developing total maximum daily loads (TMDLs) for certain impaired waters. Establishment of maximum loads by the EPA or the FDEP may result in lowering permit limits for various pollutants and a requirement to take additional measures to control non-point source pollution (e.g. storm water runoff) at facilities that discharge into

waters for which TMDLs are established. Because the effect on the Company will depend on the actual TMDLs and permit limitations established by the implementing agency, it is not possible to determine the effect on the Company at this time.

Several major pieces of environmental legislation are periodically considered for reauthorization or amendment by Congress. These include: the Clean Air Act; the Clean Water Act; the Comprehensive Environmental Response, Compensation, and Liability Act; the Resource Conservation and Recovery Act; the Toxic Substances Control Act; the Emergency Planning & Community Right-to-Know Act; and the Endangered Species Act.

Compliance with possible additional federal or state legislation or regulations related to global climate change, electromagnetic fields or other environmental and health concerns could also significantly affect the Company. The impact of any new legislation, changes to existing legislation, or environmental regulations could affect many areas of the Company's operations. The full impact of any such changes cannot, however, be determined at this time.

***FERC Matters***

*Transmission*

In December 1999, the Federal Energy Regulatory Commission (FERC) issued its final rule (Order 2000) on Regional Transmission Organizations (RTOs). Order 2000 encouraged utilities owning transmission systems to form RTOs on a voluntary basis. Southern Company and its retail operating companies, including the Company, worked with a number of utilities in the Southeast to develop a for-profit RTO known as SeTrans. In 2002, the sponsors of SeTrans established a Stakeholder Advisory Committee to provide input into the development of the RTO from other sectors of the electric industry, as well as consumers. During the development of SeTrans, state regulatory authorities expressed concern over certain aspects of the FERC's policies regarding RTOs. In December 2003, the SeTrans sponsors announced that they would suspend work on SeTrans because the regulated utility participants, including the Company, had determined that they were highly unlikely to obtain support of both federal and state regulatory authorities. Any impact of the FERC's rule on the Company will depend on the regulatory reaction to the suspension of SeTrans and future developments, which cannot now be determined.

In July 2002, the FERC issued a notice of proposed rulemaking regarding open access transmission service and standard electricity market design. The proposal, if adopted, would among other things: (1) require transmission assets of jurisdictional utilities to be operated by an independent entity; (2) establish a standard market design; (3) establish a single type of transmission service that applies to all customers; (4) assert jurisdiction over the transmission component of bundled retail service; (5) establish a generation reserve margin; (6) establish bid caps for day ahead and spot energy markets; and (7) revise the FERC policy on the pricing of transmission expansions. Comments on the proposal were submitted by many interested parties, including Southern Company, and the FERC has indicated that it has revised certain aspects of the proposal in response to public comments. Proposed energy legislation would prohibit the FERC from issuing the final rule before October 31, 2006, and from making any final rule effective before December 31, 2006. That legislation has been approved by the House of Representatives but remains pending before the Senate. Passage of the legislation now appears in doubt. It is uncertain whether in the absence of legislation the FERC will move forward with any part or all of the proposed rule. Any impact of this proposal on the Company will depend on the form in which the final rule may be ultimately adopted. However, the Company's financial statements could be adversely affected by changes in the transmission regulatory structure in its regional power market.

*Market-Based Rate Authority*

The Company has obtained FERC approval to sell power to nonaffiliates at market-based prices under specific contracts. Through SCS, as agent, the Company also has the FERC authority to make short-term opportunity sales at market rates. Specific FERC approval must be obtained with respect to a market-based contract with an affiliate. In November 2001, the FERC modified the test it uses to consider utilities' applications to charge market-based rates and adopted a new test called the Supply Margin Assessment (SMA). The FERC applied the SMA to several utilities, including Southern Company's retail operating companies, and found them to be "pivotal suppliers" in their service areas. SCS, on behalf of the Company and the other retail operating companies, sought rehearing of the FERC order, and the FERC delayed the

implementation of certain mitigation measures. SCS, on behalf of the Company and the other retail operating companies, submitted comments to the FERC in 2002 regarding these issues. In December 2003, the FERC issued a staff paper discussing alternatives and held a technical conference in January 2004. The Company anticipates that the FERC will address the requests for rehearing in the near future. Regardless of the outcome of the SMA proposal, the FERC retains the ability to modify or withdraw the authorization for any seller to sell at market-based rates if it determines that the underlying conditions for having such authority are no longer applicable. The final outcome of this matter will depend on the form in which the SMA test and mitigation measures rules may be ultimately adopted and cannot be determined at this time.

### *Other Matters*

In accordance with Financial Accounting Standards Board (FASB) Statement No. 87, Employers' Accounting for Pensions, the Company recorded non-cash pension income, before tax, of approximately $4.9 million, $5.6 million, and $5.9 million in 2003, 2002, and 2001, respectively. Future pension income is dependent on several factors including trust earnings and changes to the plan. The decline in pension income is expected to continue and become an expense as early as 2006. Postretirement benefit costs for the Company were $4.9 million, $4.5 million, and $4.5 million in 2003, 2002, and 2001, respectively, and are expected to continue to trend upward. A portion of pension income and postretirement benefit costs is capitalized based on construction-related labor charges. Pension income or expense and postretirement benefit costs are components of the regulated rates and generally do not have a long-term effect on net income. For more information regarding pension and postretirement benefits, see Note 2 to the financial statements.

On December 8, 2003, President Bush signed into law the Medicare Prescription Drug, Improvement and Modernization Act of 2003 (Medicare Act). The Medicare Act introduces a prescription drug benefit for Medicare-eligible retirees starting in 2006, as well as a federal subsidy to plan sponsors like the Company that provide prescription drug benefits. In accordance with FASB Staff Position No. 106-1, the Company has elected to defer recognizing the effects of the Medicare Act for its postretirement plans under FASB Statement No. 106, Employers' Accounting for Postretirement Benefits Other than Pension until authoritative guidance on accounting for the federal subsidy is issued or until a significant event occurs that would require remeasurement of the plans' assets and obligations. The Company anticipates that the benefits it pays after 2006 will be lower as a result of the Medicare Act; however, the retiree medical obligations and costs reported in Note 2 to the financial statements do not reflect these changes. The final accounting guidance could require changes to previously reported information.

In May 2002, the FPSC approved a retail base rate increase of $53.2 million effective June 7, 2002, the majority of which was related to Plant Smith Unit 3, which was placed in service beginning in April 2002. See Note 3 to the financial statements for additional information about these and other regulatory matters.

The FPSC has approved a revised rule for investor-owned utilities engaging in power plant construction subject to the Florida Electrical Power Plant Siting Act (PPSA) to govern the process for selecting such generation projects. This new rule is aimed at creating a more transparent process accessible to a greater number of bidders. The revisions require a utility that intends to build a project subject to the PPSA to first issue a request for proposals (RFP) that meets the requirements of the revised rule, including a more detailed description of the methodology and criteria that will be used to evaluate the response. Also, respondents that have not been eliminated from further consideration must be given an opportunity to revise their proposals if the utility intends to revise its cost estimates on which the RFP was based. The revised rule also provides a mechanism for expedited dispute resolution and places restrictions on the level of costs a utility may recover if, at the conclusion of the RFP process, the FPSC certifies the utility's own self-build option as the most cost effective generation alternative identified through the process. The new rule was made effective June 17, 2003.

The FPSC, in collaboration with the FDEP, was directed by the Florida Legislature to prepare a report on renewable energy. A final report was prepared by the FPSC and the FDEP in January 2003. This report describes various renewable and green energy options. The report provided the FPSC, the FDEP, and the Florida Legislature with information on current and potential technologies, costs, feasibility, and status of current renewable technologies within the State of Florida. The report does not provide any formal policy recommendations with respect to renewable energy but is intended to provide the Legislature and policymakers a sound starting point if they consider new legislation in this

area. While the Company is actively pursuing a renewable energy portfolio that may be incorporated into its offering to its customers, the pursuit of a mandatory renewable portfolio standard or a benefits charge that could not be passed on to customers by the state could add additional costs to the Company's operations and affect the Company's competitive position.

The Company is involved in various matters being litigated and regulatory matters that could affect future earnings. See Note 3 to the financial statements for information regarding material issues.

## ACCOUNTING POLICIES

### Application of Critical Accounting Policies and Estimates

The Company prepares its financial statements in accordance with accounting principles generally accepted in the United States. Significant accounting policies are described in Note 1 to the financial statements. In the application of these policies, certain estimates are made that may have a material impact on the Company's results of operations and related disclosures. Different assumptions and measurements could produce estimates that are significantly different from those recorded in the financial statements. Senior management has discussed the development and selection of the critical accounting policies and estimates described below with the Controls and Compliance Committee of the Company's Board of Directors and the Audit Committee of Southern Company's Board of Directors.

#### *Electric Utility Regulation*

The Company is subject to retail regulation by the FPSC and wholesale regulation by the FERC. These regulatory agencies set the rates the Company is permitted to charge customers based on allowable costs. As a result, the Company applies FASB Statement No. 71, Accounting for the Effects of Certain Types of Regulation. Through the ratemaking process, the regulators may require the inclusion of costs or revenues in periods different than when they would be recognized by a non-regulated company. This treatment may result in the deferral of expenses and the recording of related regulatory assets based on anticipated future recovery through rates or the deferral of gains or creation of liabilities and the recording of related regulatory liabilities. The application of Statement No. 71 has a further effect on the Company's financial statements as a result of the estimates of allowable costs used in the ratemaking process. These estimates may differ from those actually incurred by the Company; therefore, the accounting estimates inherent in specific costs such as depreciation and pension and post-retirement benefits have less of a direct impact on the Company's results of operations than they would on a non-regulated company.

As reflected in Note 1 to the financial statements, significant regulatory assets and liabilities have been recorded. Management reviews the ultimate recoverability of these regulatory assets and liabilities based on applicable regulatory guidelines. However, adverse legislation and judicial or regulatory actions could materially impact the amounts of such regulatory assets and liabilities and could adversely impact the Company's financial statements.

#### *Contingent Obligations*

The Company is subject to a number of federal and state laws and regulations, as well as other factors and conditions that potentially subject it to environmental, litigation, income tax, and other risks. See "Future Earnings Potential" and Note 3 to the financial statements for more information regarding certain of these contingencies. The Company periodically evaluates its exposure to such risks and records reserves for those matters where a loss is considered probable and reasonably estimable in accordance with generally accepted accounting principles. The adequacy of reserves can be significantly affected by external events or conditions that can be unpredictable; thus, the ultimate outcome of such matters could materially affect the Company's financial statements. These events or conditions include the following:

- Changes in existing state or federal regulation by governmental authorities having jurisdiction over air quality, water quality, control of toxic substances, hazardous and solid wastes, and other environmental matters.
- Changes in existing income tax regulations or changes in Internal Revenue Service interpretations of existing regulations.
- Identification of additional sites that require environmental remediation or the filing of other complaints in which the Company may be asserted to be a potentially responsible party.
- Identification and evaluation of other potential lawsuits or complaints in which the Company may be named as a defendant.

- Resolution or progression of existing matters through the legislative process, the court systems, or the EPA.

### New Accounting Standards

Prior to January 2003, the Company accrued for the ultimate cost of retiring most long-lived assets over the life of the related asset through depreciation expense. FASB Statement No. 143, Accounting for Asset Retirement Obligations, established new accounting and reporting standards for legal obligations associated with the ultimate cost of retiring long-lived assets. The present value of the ultimate costs for an asset's future retirement is recorded in the period in which the liability is incurred. The cost is capitalized as part of the related long-lived asset and depreciated over the asset's useful life. For more information regarding the impact of adopting this standard effective January 1, 2003, see Note 1 to the financial statements under "Asset Retirement Obligations and Other Costs of Removal."

FASB Statement No. 149, Amendment of Statement 133 on Derivative Instruments and Hedging Activities, which further amends and clarifies the accounting and reporting for derivative instruments, became effective generally for financial instruments entered into or modified after June 30, 2003. Current interpretations of Statement No. 149 indicate that certain electricity forward transactions subject to unplanned netting -- including those typically referred to as "book outs" -- may only qualify as cash flow hedges if an entity can demonstrate that physical delivery or receipt of power occurred. The Company's forward electricity contracts continue to be exempt from fair value accounting requirements or to qualify as cash flow hedges. The implementation of Statement No. 149 did not have a material effect on the Company's financial statements.

In July 2003, the Emerging Issues Task Force (EITF) of FASB issued EITF No. 03-11, which became effective on October 1, 2003. The standard addresses the reporting of realized gains and losses on derivative instruments and is being interpreted to require book outs to be recorded on a net basis in operating revenues. Adoption of this standard did not have a material impact on the Company's financial statements.

FASB Interpretation No. 46, Consolidation of Variable Interest Entities, which was originally issued in January 2003, requires the primary beneficiary of a variable interest entity to consolidate the related assets and liabilities. In December 2003, the FASB revised Interpretation No. 46 and deferred the effective date until March 31, 2004 for interests held in variable interest entities other than special purpose entities.

Current analysis indicates that the trusts established by the Company to issue preferred securities are variable interest entities under Interpretation No. 46, and that the Company is not the primary beneficiary of these trusts. If this conclusion is finalized, effective March 31, 2004, the trust assets and liabilities--including the preferred securities issued by the trusts--will be deconsolidated. The investments in the trusts and the loans from the trusts to the Company will be reflected as equity method investments and as long-term notes payable to affiliates, respectively, on the Balance Sheets. Based on December 31, 2003 values, this treatment would result in an increase of approximately $2.2 million to both total assets and total liabilities. See Note 6 to the financial statements under "Mandatorily Redeemable Preferred Securities" for additional information.

In May 2003, the FASB issued Statement No. 150, Accounting for Certain Financial Instruments with Characteristics of Both Liabilities and Equity, which requires classification of certain financial instruments within its scope, including shares that are mandatorily redeemable, as liabilities. Statement No. 150 was effective for financial instruments entered into or modified after May 31, 2003, and otherwise on July 1, 2003. In accordance with Statement No. 150, mandatorily redeemable preferred securities are reflected on the Balance Sheets as liabilities. The adoption of Statement No. 150 had no impact on the Statements of Income and Cash Flows.

## FINANCIAL CONDITION AND LIQUIDITY

### Overview

The Company's financial condition continues to be strong. The Company operated at high levels of reliability while achieving industry-leading customer satisfaction levels and continuing to have retail prices below the national average.

The Company's ratio of common equity to total capitalization -- including short-term debt -- was 45.3 percent in 2003, 44.0 percent in 2002, and 42.8 percent in 2001. See Note 6 to the financial statements for additional information.

During 2003, gross property additions were $99 million. Funds for the Company's property additions were provided by operating activities, capital contributions, and other financing activities. See the Statements of Cash Flows for additional information.

**Sources of Capital**

The Company plans to obtain the funds required for construction and other purposes, including compliance with environmental regulations, from sources similar to those used in the past. These sources include operating cash flow, the issuance of unsecured debt and preferred securities, in addition to pollution control revenue bonds issued for the Company's benefit by public authorities. However, the type and timing of any future financings—if needed—will depend on market conditions and regulatory approval.

The Company has no restrictions on the amounts of unsecured indebtedness it may incur. However, the Company is required to meet certain coverage requirements specified in its mortgage indenture and corporate charter to issue new first mortgage bonds and preferred stock. The Company's coverage ratios are high enough to permit, at present interest rate levels, any foreseeable security sales. The amount of securities which the Company will be permitted to issue in the future will depend upon market conditions and other factors prevailing at that time.

The Company obtains financing separately without credit support from any affiliate. The Southern Company system does not maintain a centralized cash or money pool. Therefore, funds of the Company are not commingled with funds of any other company. In accordance with the Public Utility Holding Company Act, most loans between affiliated companies must be approved in advance by the Securities and Exchange Commission (SEC).

To meet short-term cash needs and contingencies, the Company has various internal and external sources of liquidity. At the beginning of 2004, the Company had approximately $2.5 million of cash and cash equivalents, along with $56.0 million of unused committed lines of credit with banks to meet its short-term cash needs. In addition, the Company has substantial cash flow from operating activities.

At the beginning of 2004, the Company had used none of its available credit arrangements. Bank credit arrangements are as follows:

| | | Expires | |
|---|---|---|---|
| Total | Unused | 2004 | 2005 & beyond |
| | (in millions) | | |
| **$56.0** | **$56.0** | **$56.0** | **$-** |

See Note 6 to the financial statements under "Bank Credit Arrangements" for additional information.

The Company may also meet short-term cash needs through a Southern Company subsidiary organized to issue and sell commercial paper and extendible commercial notes at the request and for the benefit of the Company and the other Southern Company retail operating companies. Proceeds from such issuances for the benefit of the Company are loaned directly to the Company and are not commingled with proceeds from such issuances for the benefit of any other operating company. There is no cross affiliate credit support. At December 31, 2003, the Company had outstanding $37.7 million of commercial paper.

**Financing Activities**

During 2003, the Company issued $286.6 million of long-term debt. The issuances were used to refund $173.3 million of long-term debt and $45 million of mandatorily redeemable preferred securities and to pay at maturity $60 million of senior notes due August 1, 2003. The remainder was used to reduce short-term debt.

**Credit Rating Risk**

The Company does not have any credit agreements that would require material changes in payment schedules or terminations as a result of a credit rating downgrade.

**Market Price Risk**

Due to cost-based rate regulation, the Company has limited exposure to market volatility in interest rates, commodity fuel prices, and prices of electricity. To manage the volatility attributable to these exposures, the Company nets the exposures to take advantage of natural offsets and enters into various derivative transactions for the remaining exposures pursuant to the Company's policies in areas such as counterparty exposure and hedging practices. Company policy is that derivatives are to be used primarily for hedging purposes. Derivative positions are monitored using techniques that include market valuation and sensitivity analysis.

To mitigate exposure to interest rates, the Company has entered into an interest rate swap that was designated as a hedge. The weighted average interest rate on $145 million variable long-term debt that has not been hedged outstanding at December 31, 2003 was 1.2 percent. If the Company sustained a 100 basis point change in interest rates for all unhedged variable rate long-term debt, the change would affect annualized interest expense by approximately $1.4 million at December 31, 2003. The Company is not aware of any facts or circumstances that would significantly affect such exposures in the near term. For further information, see Notes 1 and 6 to the financial statements under "Financial Instruments."

The fair value of changes in energy-related derivative contracts and year-end valuations were as follows at December 31:

| | Changes in Fair Value | |
|---|---|---|
| | **2003** | 2002 |
| | (in thousands) | |
| Contracts beginning of year | **$ 2,326** | $(110) |
| Contracts realized or settled | **(5,098)** | 150 |
| New contracts at inception | **-** | - |
| Changes in valuation techniques | **-** | - |
| Current period changes | **5,265** | 2,296 |
| Contracts end of year | **$2,493** | $2,336 |

| Source of 2003 Year-End Valuation Prices | | | |
|---|---|---|---|
| | Total Fair Value | Maturity 2004 | 2005-2006 |
| | | (in thousands) | |
| Actively quoted | **$2,503** | **$2,671** | **$(168)** |
| External source | - | - | - |
| Models and other methods | - | - | - |
| Contracts end of year | **$2,503** | **$2,671** | **$(168)** |

Unrealized gains and losses from mark to market adjustments on derivative contracts related to the Company's fuel hedging programs are recorded as regulatory assets and liabilities. Realized gains and losses from these programs are included in fuel expense and are recovered through the Company's fuel cost recovery clause. Gains and losses on derivative contracts that are not designated as hedges are recognized in the Income Statement as incurred. For the years ended December 31, 2003, 2002, and 2001, these amounts were not material. At December 31, 2003, the fair value of derivative energy contracts was reflected in the financial statements as follows:

| | Amounts |
|---|---|
| | (in thousands) |
| Regulatory liabilities, net | **$2,501** |
| Other comprehensive income | **-** |
| Net income | **2** |
| Total fair value | **$2,503** |

Unrealized gains (losses) recognized in income in 2003 and 2002 were not material. The Company is exposed to market price risk in the event of nonperformance by counterparties to the derivative energy contracts. The Company's policy is to enter into agreements with counterparties that have investment grade credit ratings by Moody's and Standard & Poor's or with counterparties who have posted collateral to cover potential credit exposure. Therefore, the Company does not anticipate market risk exposure from nonperformance by the counterparties. For additional information, see Notes 1 and 6 to the financial statements under "Financial Instruments."

## Capital Requirements and Contractual Obligations

The construction program of the Company is currently estimated to be $166 million in 2004, $149 million in 2005, and $108 million in 2006. These amounts include $64 million, $31 million, and $4 million in 2004, 2005, and 2006, respectively, for capital expenditures related to environmental controls at Plant Crist as part of an agreement with the FDEP to reduce NOx emissions. The FPSC authorized the Company to recover the costs related to these environmental projects through the Environmental Cost Recovery Clause. Actual construction costs may vary from this estimate because of changes in such factors as the following: business conditions; environmental regulations; FERC rules and transmission regulations; load projections; the cost and efficiency of construction labor, equipment, and materials; and the cost of capital. In addition, there can be no assurance that costs related to capital expenditures will be fully recovered.

The Company does not have any new generating capacity scheduled to be placed in service through 2006. Construction of new transmission and distribution facilities and capital improvements, including those needed to meet environmental standards for the Company's existing generation, transmission and distribution facilities are ongoing.

As discussed in Note 2 to the financial statements, the Company provides post retirement benefits to

substantially all employees and funds trusts to the extent required by the FERC.

Other funding requirements related to obligations associated with scheduled maturities of long-term debt and preferred securities, as well as the related interest and distributions, preferred stock dividends, leases, and other purchase commitments are as follows. See Notes 1, 6, and 7 to the financial statements for additional information.

| | 2004 | 2005-2006 | 2007-2008 | After 2008 | Total |
|---|---|---|---|---|---|
| | | | (in thousands) | | |
| Long-term debt and preferred securities[a] -- | | | | | |
| Principal | $ 50,000 | $37,075 | $ - | $ 557,555 | $ 644,630 |
| Interest and distributions | 30,903 | 54,756 | 50,238 | 508,841 | 644,738 |
| Preferred stock dividends[b] | 217 | 434 | 434 | - | 1,085 |
| Operating leases | 1,995 | 4,142 | 4,075 | 8,153 | 18,365 |
| Purchase commitments[c] -- | | | | | |
| Capital[d] | 166,020 | 257,173 | 256,391 | 947,638 | 1,627,222 |
| Coal | 132,117 | 155,224 | 96,433 | - | 383,774 |
| Natural gas[e] | 103,952 | 124,185 | 64,240 | 259,155 | 551,532 |
| Purchased power | 744 | 310 | - | - | 1,054 |
| Long-term service agreements | 7,031 | 14,834 | 15,789 | 46,538 | 84,192 |
| Postretirement benefit trusts[f] | 80 | 160 | - | - | 240 |
| Total | $493,059 | $648,293 | $487,600 | $2,327,880 | $3,956,832 |

(a) All amounts are reflected based on final maturity dates. The Company will continue to retire higher-cost securities and replace these obligations with lower-cost capital if market conditions permit. Variable rate interest obligations are estimated based on rates as of January 1, 2004, as reflected in the Statements of Capitalization.

(b) Preferred stock does not mature; therefore, amounts are provided for the next five years only.

(c) The Company generally does not enter into non-cancelable commitments for other operation and maintenance expenditures. Total other operation and maintenance expenses for the last three years were $211 million, $200 million, and $177 million, respectively.

(d) The Company forecasts capital expenditures over a three-year period. Amounts represent current estimates of total expenditures. At December 31, 2003, significant purchase commitments were outstanding in connection with the construction program.

(e) Natural gas purchase commitments are based on various indices at the time of delivery. Amounts reflected have been estimated based on New York Mercantile future prices at December 31, 2003.

(f) The Company forecasts trust postretirement contributions over a three-year period. No contributions related to the Company's pension trust are currently expected during this period. See Note 2 to the financial statements for additional information related to the pension plans.

## Cautionary Statement Regarding Forward-Looking Information

The Company's 2003 Annual Report includes forward-looking statements in addition to historical information. Forward-looking information includes, among other things, statements concerning the estimated construction and other expenditures and the Company's projections for energy sales. In some cases, forward-looking statements can be identified by terminology such as "may," "will," "could," "should," "expects," "plans," "anticipates," "believes," "estimates," "projects," "predicts," "potential," or "continue" or the negative of these terms or other comparable terminology. The Company cautions that there are various important factors that could cause actual results to differ materially from those indicated in the forward-looking statements; accordingly, there can be no assurance that such indicated results will be realized. These factors include:

- the impact of recent and future federal and state regulatory change, including legislative and regulatory initiatives regarding deregulation and restructuring of the electric utility industry and also changes in environmental, tax, and other laws and regulations to which the Company are subject, as well as changes in application of existing laws and regulations;
- current and future litigation, regulatory investigations, proceedings, or inquiries, including current IRS audits;
- the effects, extent, and timing of the entry of additional competition in the markets in which the Company operates;
- the impact of fluctuations in commodity prices, interest rates, and customer demand;
- available sources and costs of fuels;
- ability to control costs;
- investment performance of the Company's employee benefit plans;
- advances in technology;
- state and federal rate regulations and pending and future rate cases and negotiations;
- effects of and changes in political, legal, and economic conditions and developments in the United States, including the current soft economy;
- potential business strategies, including acquisitions or dispositions of assets, which cannot be assured to be completed or beneficial to the Company;
- the ability of counterparties of the Company to make payments as and when due;
- the ability to obtain new short- and long-term contracts with neighboring utilities:
- the direct or indirect effects on the Company's business resulting from the terrorist incidents on September 11, 2001, or any similar incidents or responses to such incidents;
- financial market conditions and the results of financing efforts, including the Company's credit ratings;
- the ability of the Company to obtain additional generating capacity at competitive prices;
- weather and other natural phenomena;
- the direct or indirect effects on the Company's business resulting from the August 2003 power outage in the Northeast, or any similar incidents;
- the effect of accounting pronouncements issued periodically by standard-setting bodies; and
- other factors discussed elsewhere herein and in other reports (including the Form 10-K) filed from time to time by the Company with the SEC.

| **Comprehensive Income** | **$66,970** | $66,302 | $58,307 |

The accompanying notes are an integral part of these financial statements.

## 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

### General

Gulf Power Company (the Company) is a wholly owned subsidiary of Southern Company, which is the parent company of five retail operating companies, Southern Power Company (Southern Power), Southern Company Services (SCS), Southern Communications Services (Southern LINC), Southern Company Gas (Southern Company GAS), Southern Company Holdings (Southern Holdings), Southern Nuclear Operating Company (Southern Nuclear), Southern Telecom, and other direct and indirect subsidiaries. The retail operating companies - Alabama Power, Georgia Power, the Company, Mississippi Power, and Savannah Electric - provide electric service in four Southeastern states. The Company operates as a vertically integrated utility providing service to customers in northwest Florida and to wholesale customers in the Southeast. Southern Power constructs, owns, and manages Southern Company's competitive generation assets and sells electricity at market-based rates in the wholesale market. Contracts among the retail operating companies and Southern Power - related to jointly owned generating facilities, interconnecting transmission lines, or the exchange of electric power - are regulated by the Federal Energy Regulatory Commission (FERC) and/or the Securities and Exchange Commission (SEC). SCS, the system service company, provides, at cost, specialized services to Southern Company and subsidiary companies. Southern LINC provides digital wireless communications services to the retail operating companies and also markets these services to the public within the Southeast. Southern Telecom provides fiber cable services within the Southeast. Southern Company GAS is a competitive retail natural gas marketer serving customers in Georgia. Southern Holdings is an intermediate holding subsidiary for Southern Company's investments in synthetic fuels and leveraged leases, and an energy services business. Southern Nuclear operates and provides services to Southern Company's nuclear power plants.

Southern Company is registered as a holding company under the Public Utility Holding Company Act of 1935 (PUHCA). Both Southern Company and its subsidiaries, including the Company, are subject to the regulatory provisions of the PUHCA. The Company is also subject to regulation by the FERC and the Florida Public Service Commission (FPSC). The Company follows accounting principles generally accepted in the United States and complies with the accounting policies and practices prescribed by its regulatory commissions. The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires the use of estimates, and the actual results may differ from those estimates.

Certain prior years' data presented in the financial statements have been reclassified to conform with current year presentation.

### Affiliate Transactions

The Company has an agreement with SCS under which the following services are rendered to the Company at direct or allocated cost: general and design engineering, purchasing, accounting and statistical analysis, finance and treasury, tax, information resources, marketing, auditing, insurance and pension administration, human resources, systems and procedures, and other services with respect to business and operations and power pool transactions. Costs for these services amounted to $56 million, $49 million, and $45 million during 2003, 2002, and 2001, respectively. Cost allocation methodologies used by SCS are approved by the SEC and management believes they are reasonable.

The Company has agreements with Georgia Power and Mississippi Power under which the Company owns a portion of Plant Scherer and Plant Daniel. Georgia Power operates Plant Scherer and Mississippi Power operates Plant Daniel. The Company reimbursed Georgia Power $5.6 million and $4.5 million and Mississippi Power $17.7 million and $16.6 million in 2003 and 2002, respectively, for its proportionate share of related expenses. See Note 7 under "Operating Leases" for additional information.

The retail operating companies (including the Company), Southern Power, and Southern Company GAS may jointly enter into various types of wholesale energy, natural gas and certain other contracts, either directly or through SCS, as agent. Each participating company may be jointly and severally liable for the obligations incurred under these agreements.

### Revenues and Regulatory Cost Recovery Clauses

Revenues are recognized as services are rendered. Unbilled revenues are accrued at the end of each fiscal period. Fuel costs are expensed as the fuel is used. The Company's retail electric rates include provisions to annually adjust billings for fluctuations in fuel costs, the energy component of purchased power costs, and certain other costs. The Company has similar retail cost recovery clauses for energy conservation costs, purchased power capacity costs, and environmental compliance costs. Revenues are adjusted monthly for differences between recoverable costs and amounts actually reflected in current rates.

The Company has a diversified base of customers and no single customer or industry comprises 10 percent or more of revenues. For all periods presented, uncollectible accounts averaged significantly less than 1 percent of revenues.

### Income Taxes

The Company uses the liability method of accounting for deferred income taxes and provides deferred income taxes for all significant income tax temporary differences. Investment tax credits utilized are deferred and amortized to income over the average lives of the related property.

### Regulatory Assets and Liabilities

The Company is subject to the provisions of Financial Accounting Standards Board (FASB) Statement No. 71, Accounting for the Effects of Certain Types of Regulation. Regulatory assets represent probable future revenues associated with certain costs that are expected to be recovered from customers through the ratemaking process. Regulatory liabilities represent probable future reductions in revenues associated with amounts that are expected to be credited to customers through the ratemaking process. Regulatory assets and (liabilities) reflected in the Balance Sheets at December 31 relate to:

| | 2003 | 2002 | Note |
|---|---|---|---|
| | (in thousands) | | |
| Asset retirement obligations | $ 1,019 | $ - | (a) |
| Other cost of removal obligations | (151,229) | (143,060) | (a) |
| Deferred income tax charges | 18,263 | 18,798 | (a) |
| Loss on reacquired debt | 19,389 | 14,052 | (b) |
| Vacation pay | 5,254 | 5,044 | (c) |
| Deferred income tax credits | (26,545) | (29,692) | (a) |
| Accumulated provision for property damage | (26,244) | (15,418) | (d) |
| Environmental remediation | 12,878 | 14,429 | (f) |
| Fuel-hedging liabilities | (2,501) | (2,322) | (e) |
| Other assets | 8,198 | 2,859 | (d) |
| Other liabilities | (3,177) | (3,351) | (d) |
| Total | $(144,695) | $(138,661) | |

Note:The recovery and amortization periods for these regulatory assets and (liabilities) are as follows:

(a) Asset retirement and removal liabilities are recorded, deferred income tax assets are recovered, and deferred tax liabilities are amortized over the related property lives, which may range up to 50 years. Asset retirement and removal liabilities will be settled and trued up following completion of the related activities.

(b) Recovered over the remaining life of the original issue, which may range up to 50 years.

(c) Recorded as earned by employees and recovered as paid, generally within one year.

(d) Recorded and recovered or amortized as approved by the FPSC.

(e) Fuel-hedging liabilities are recorded over the life of the underlying hedged purchase contracts, which generally do not exceed two years. Upon final settlement, costs are recovered through the fuel cost recovery clause.

(f) Recovered through the Environmental Cost Recovery Clause (ECRC) when the expense is incurred. The estimated completion date for this project is currently 2012.

In the event that a portion of the Company's operations is no longer subject to the provisions of FASB Statement No. 71, the Company would be required to write off related regulatory assets and liabilities that are not specifically recoverable through regulated rates. In addition, the Company would be required to determine if any impairment to other assets, including plant, exists and write down the assets, if impaired, to their fair value. All regulatory assets and liabilities are reflected in rates.

### Depreciation and Amortization

Depreciation of the original cost of plant in service is provided primarily by using composite straight-line rates, which approximated 3.8 percent in 2003, 3.9 percent in 2002, and 3.7 percent in 2001. When property subject to depreciation is retired or otherwise disposed of in the normal course of business, its cost - together with the cost of removal, less salvage - is charged to the accumulated provision for depreciation.

Minor items of property included in the original cost of the plant are retired when the related property unit is retired.

**Asset Retirement Obligations and Other Costs of Removal**

In accordance with regulatory requirements, prior to January 2003, the Company followed the industry practice of accruing for the ultimate cost of retiring most long-lived assets over the life of the related asset as part of the annual depreciation expense provision. In accordance with SEC requirements, such amounts are reflected on the balance sheet as regulatory liabilities.

Effective January 1, 2003, the Company adopted FASB Statement No. 143, Accounting for Asset Retirement Obligations. Statement No. 143 establishes new accounting and reporting standards for legal obligations associated with the ultimate cost of retiring long-lived assets. The ultimate cost for an asset's future retirement must be recorded in the period in which the liability is incurred. The cost must be capitalized as part of the related long-lived asset and depreciated over the asset's useful life. Additionally, Statement No. 143 does not permit the continued accrual of future retirement costs for long-lived assets that the Company does not have a legal obligation to retire. At the time of adoption, the Company had received guidance regarding accounting for the financial statement impacts of Statement No. 143 from the FPSC and in accordance with that guidance had no cumulative effect to net income resulting from the adoption of Statement No. 143. The Company will continue to recognize the accumulated removal costs for other obligations as a regulatory liability.

The liability recognized under Statement No. 143 to retire long-lived assets primarily relates to the Company's combustion turbines at its Pea Ridge facility, various landfill sites, ash ponds, and a barge unloading dock. The Company has also identified retirement obligations related to certain transmission and distribution facilities. However, liabilities for the removal of these transmission and distribution assets have not been recorded because no reasonable estimate can be made regarding the timing of the obligations. The Company will continue to recognize in the Income Statement allowed removal costs in accordance with its regulatory treatment. Any difference between costs recognized under Statement No. 143 and those reflected in rates are recognized as either a regulatory asset or liability and are reflected in the Balance Sheets.

Details of the asset retirement obligations included in the Balance Sheets are as follows:

| | 2003 |
|---|---|
| | (in millions) |
| Balance beginning of year | $ - |
| Liabilities incurred | 4.0 |
| Liabilities settled | - |
| Accretion | 0.3 |
| Cash flow revisions | - |
| Balance end of year | $4.3 |

If Statement No. 143 had been adopted on January 1, 2002, the pro-forma asset retirement obligations would have been $3.7 million.

**Allowance for Funds Used During Construction (AFUDC) and Interest Capitalized**

In accordance with regulatory treatment, the Company records AFUDC on construction projects. AFUDC represents the estimated debt and equity costs of capital funds that are necessary to finance the construction of new regulated facilities. While cash is not realized currently from such allowance, it increases the revenue requirement over the service life of the plant through a higher rate base and higher depreciation expense. For the years, 2003, 2002, and 2001 the average AFUDC rates were 7.48 percent, 7.35 percent, and 7.35 percent, respectively. AFUDC, net of taxes, as a percentage of net income after dividends on preferred stock was 1.31 percent, 5.72 percent, and 11.86 percent, respectively for, 2003, 2002, and 2001.

**Property, Plant, and Equipment**

Property, plant, and equipment is stated at original cost less regulatory disallowances and impairments. Original cost includes: materials; labor; minor items of property; appropriate administrative and general costs; payroll-related costs such as taxes, pensions, and other benefits; and the interest capitalized and/or estimated cost of funds used during construction. The cost of maintenance, repairs, and replacement of minor items of property is charged to maintenance expense. The cost of replacements of property (exclusive of minor items of property) is charged to utility plant.

### Impairment of Long-Lived Assets and Intangibles

The Company evaluates long-lived assets for impairment when events or changes in circumstances indicate that the carrying value of such assets may not be recoverable. The determination of whether an impairment has occurred is based on either a specific regulatory disallowance or an estimate of undiscounted future cash flows attributable to the assets, as compared to the carrying value of the assets. If an impairment has occurred, the amount of the impairment recognized is determined by either the amount of regulatory disallowance or by estimating the fair value of the assets and recording a provision for loss if the carrying value is greater than the fair value. For assets identified as held for sale, the carrying value is compared with the estimated fair value less the cost to sell in order to determine if an impairment provision is required. Until the assets are disposed of, their estimated fair value is re-evaluated when circumstances or events change.

### Cash and Cash Equivalents

For purposes of the financial statements temporary cash investments are considered cash equivalents. Temporary cash investments are securities with original maturities of 90 days or less.

### Materials and Supplies

Generally, materials and supplies include the cost of transmission, distribution, and generating plant materials. Materials are charged to inventory when purchased and then expensed or capitalized to plant, as appropriate, when installed.

### Stock Options

Southern Company provides non-qualified stock options to a large segment of the Company's employees ranging from line management to executives. The Company accounts for its stock-based compensation plans in accordance with Accounting Principles Board Opinion No. 25. Accordingly, no compensation expense has been recognized because the exercise price of all options granted equaled the fair-market value on the date of grant. When options are exercised, the Company receives a capital contribution from Southern Company equivalent to the related income tax benefit.

### Financial Instruments

The Company uses derivative financial instruments to limit exposure to fluctuations in interest rates, the prices of certain fuel purchases, and electricity purchases and sales. All derivative financial instruments are recognized as either assets or liabilities and are measured at fair value. Substantially all of the Company's bulk energy purchases and sales contracts that meet the definition of a derivative are exempt from fair value accounting requirements and are accounted for under the accrual method. Other derivative contracts qualify as cash flow hedges of anticipated transactions. This results in the deferral of related gains and losses in other comprehensive income or regulatory assets or liabilities as appropriate until the hedged transactions occur. Any ineffectiveness is recognized currently in net income. Other derivative contracts are marked to market through current period income and are recorded on a net basis in the Statements of Income.

The Company is exposed to losses related to financial instruments in the event of counterparties' nonperformance. The Company has established controls to determine and monitor the creditworthiness of counterparties in order to mitigate the Company's exposure to counterparty credit risk.

Other financial instruments for which the carrying amount does not equal fair value at December 31 were as follows:

| | Carrying Amount | Fair Value |
|---|---|---|
| | (in thousands) | |
| Long-term debt: | | |
| **At December 31, 2003** | **$565,827** | **$572,899** |
| At December 31, 2002 | 512,040 | 531,133 |
| Preferred Securities | | |
| **At December 31, 2003** | **$ 70,000** | **$ 73,376** |
| At December 31, 2002 | 155,000 | 156,853 |

The fair values were based on either closing market price or closing price of comparable instruments.

### Comprehensive Income

The objective of comprehensive income is to report a measure of all changes in common stock equity of an enterprise that result from transactions and other economic events of the period other than transactions with owners. Comprehensive income consists of net income and changes in the fair value of qualifying cash flow hedges and changes in additional minimum pension liability, less income taxes and reclassifications for amounts included in net income.

### Provision for Injuries and Damages

The Company is subject to claims and suits arising in the ordinary course of business. As permitted by regulatory authorities, the Company provides for the uninsured costs of injuries and damages by charges to income amounting to $1.2 million annually. The cost of settling claims is charged to a provision account. The accumulated provision of $0.1 million and $0.7 million at December 31, 2003 and 2002, respectively, is included in other current liabilities in the accompanying Balance Sheets. For further information, see Note 3 under "Personal Injury Litigation." In addition to the provision, at December 31, 2003, the Company recorded a liability with a corresponding regulatory asset of $6.9 million for estimated liabilities related to outstanding claims and suits.

### Provision for Property Damage

The Company provides for the cost of repairing damages from major storms and other uninsured property damages. This includes the cost of major storms and other damages to its transmission and distribution lines and the cost of uninsured damages to its generation facilities and other property. The expense of such damages is charged to the provision account. At December 31, 2003 and 2002, the accumulated provision for property damage was $26.2 million and $15.5 million, respectively, and is included in miscellaneous regulatory liabilities in the accompanying Balance Sheets. The FPSC approved annual accrual to the accumulated provision for property damage is $3.5 million, with a target level for the accumulated provision account between $25.1 million and $36.0 million. The FPSC had also given the Company the flexibility to increase its annual accrual amount above $3.5 million at the Company's discretion. The Company accrued $10.6 million in 2003, $3.5 million in 2002, and $4.5 million in 2001 to the accumulated provision for property damage.

## 2. RETIREMENT BENEFITS

The Company has a defined benefit, trusteed, pension plan covering substantially all employees. The plan is funded in accordance with Employee Retirement Income Security Act (ERISA) requirements. No contributions to the plan are expected for the year ending December 31, 2004. The Company also provides certain non-qualified benefit plans for a selected group of management and highly compensated employees. Benefits under these non-qualified plans are funded on a cash basis. The Company provides certain medical care and life insurance benefits for retired employees. In addition, trusts are funded to the extent required by the FPSC and the FERC. For the year ended December 31, 2004, postretirement benefit contributions are expected to total approximately $80 thousand.

The measurement date for plan assets and obligations is September 30 of each year. In 2002, the Company adopted plan changes that had the effect of increasing benefits to both current and future retirees.

### Pension Plans

The accumulated benefit obligation for the pension plans was $186 million in 2003 and $162 million in 2002. Changes during the year in the projected benefit obligations, accumulated benefit obligations, and fair value of plan assets were as follows:

| | Projected Benefit Obligations | |
|---|---|---|
| | **2003** | 2002 |
| | (in thousands) | |
| Balance at beginning of year | **$184,987** | $169,251 |
| Service cost | **5,225** | 4,910 |
| Interest cost | **11,733** | 12,394 |
| Benefits paid | **(8,785)** | (8,395) |
| Actuarial (gain)/loss and employee transfers, net | **13,326** | 2,672 |
| Other | **-** | 4,155 |
| Balance at end of year | **$206,486** | $184,987 |

| | Plan Assets | |
|---|---|---|
| | **2003** | 2002 |
| | (in thousands) | |
| Balance at beginning of year | **$211,166** | $233,706 |
| Actual return on plan assets | **33,672** | (15,694) |
| Benefits paid | **(8,293)** | (7,934) |
| Employee transfers | **(199)** | 1,088 |
| Balance at end of year | **$236,346** | $211,166 |

Pension plan assets are managed and invested in accordance with all applicable requirements, including ERISA and the Internal Revenue Service (IRS) revenue code. The Company's investment policy covers a diversified mix of assets, including equity and fixed income securities, real estate, and private equity, as described in the table below. Derivative instruments are used primarily as hedging tools but may also be used to gain efficient exposure to the various asset classes. The Company primarily minimizes the risk of large losses through diversification but also monitors and manages other aspects of risk.

| | | Plan Assets | |
|---|---|---|---|
| | Target | **2003** | 2002 |
| Domestic equity | 37% | **37%** | 35% |
| International equity | 20 | **20** | 18 |
| Global fixed income | 26 | **24** | 25 |
| Real estate | 10 | **11** | 12 |
| Private equity | 7 | **8** | 10 |
| Total | 100% | **100%** | 100% |

The accrued pension costs recognized in the Balance Sheets were as follows:

| | Accrued Pension Costs | |
|---|---|---|
| | **2003** | 2002 |
| | (in thousands) | |
| Funded status | **$29,859** | $26,179 |
| Unrecognized transition obligation | **(1,440)** | (2,161) |
| Unrecognized prior service cost | **13,471** | 14,874 |
| Unrecognized net gain | **(4,155)** | (6,589) |
| 4th quarter cash flow adjustment | **169** | 85 |
| Prepaid pension asset, net | **37,904** | 32,388 |
| Portion included in benefit obligations | **4,110** | 3,910 |
| Total Prepaid asset recognized in the Balance Sheets | **$42,014** | $36,298 |

In 2003 and 2002, amounts recognized in the Balance Sheets for accumulated other comprehensive income and intangible assets to record the minimum pension liability related to the non-qualified plans were $1.4 million and $0.7 million and $1.2 million and $0.9 million, respectively.

Components of the pension plans' net periodic cost were as follows:

| | **2003** | 2002 | 2001 |
|---|---|---|---|
| | | (in thousands) | |
| Service cost | **$ 5,225** | $ 4,910 | $ 4,703 |
| Interest cost | **11,733** | 12,394 | 11,644 |
| Expected return on plan assets | **(20,564)** | (20,431) | (19,312) |
| Recognized net gain | **(1,819)** | (2,746) | (3,072) |
| Net amortization | **486** | 298 | 165 |
| Net pension income | **$ (4,939)** | $ (5,575) | $ (5,872) |

**Postretirement Benefits**

Changes during the year in the accumulated benefit obligations and in the fair value of plan assets were as follows:

| | Accumulated Benefit Obligations | |
|---|---|---|
| | **2003** | 2002 |
| | (in thousands) | |
| Balance at beginning of year | **$63,675** | $54,337 |
| Service cost | **1,128** | 948 |
| Interest cost | **4,059** | 3,992 |
| Benefits paid | **(2,332)** | (1,984) |
| Actuarial (gain)/loss | **6,373** | 6,382 |
| Balance at end of year | **$72,903** | $63,675 |

| | Plan Assets | |
|---|---|---|
| | **2003** | 2002 |
| | (in thousands) | |
| Balance at beginning of year | **$10,893** | $11,632 |
| Actual return on plan assets | **1,616** | (793) |
| Employer contributions | **2,465** | 2,038 |
| Benefits paid | **(2,332)** | (1,984) |
| Balance at end of year | **$12,642** | $10,893 |

Postretirement benefits plan assets are managed and invested in accordance with all applicable requirements, including ERISA and the IRS revenue code. The Company's investment policy covers a diversified mix of assets, including equity and fixed income securities, real estate, and private equity, as described in the table below. Derivative instruments are used primarily as hedging tools but may also be used to gain efficient exposure to the various asset classes. The Company primarily minimizes the risk of large losses through diversification but also monitors and manages other aspects of risk.

| | Plan Assets | | |
|---|---|---|---|
| | Target | **2003** | 2002 |
| Domestic equity | 35% | **35%** | 32% |
| International equity | 19 | **19** | 18 |
| Global fixed income | 31 | **29** | 30 |
| Real estate | 9 | **10** | 11 |
| Private equity | 6 | **7** | 9 |
| Total | 100% | **100%** | 100% |

The accrued postretirement costs recognized in the Balance Sheets were as follows:

| | **2003** | 2002 |
|---|---|---|
| | (in thousands) | |
| Funded status | **$(60,261)** | $(52,782) |
| Unrecognized transition obligation | **3,301** | 3,656 |
| Unrecognized prior service cost | **5,003** | 5,349 |
| Unrecognized net loss | **15,313** | 9,530 |
| Fourth quarter contributions | **195** | 581 |
| Accrued liability recognized in the Balance Sheets | **$(36,449)** | $(33,666) |

Components of the postretirement plan's net periodic cost were as follows:

| | **2003** | 2002 | 2001 |
|---|---|---|---|
| Service cost | **$ 1,128** | $ 948 | $ 983 |
| Interest cost | **4,058** | 3,991 | 3,886 |
| Expected return on plan assets | **(1,139)** | (1,100) | (1,037) |
| Transition obligation | **356** | 356 | 356 |
| Prior service cost | **346** | 346 | 299 |
| Recognized net (gain)/loss | **113** | (19) | (18) |
| Net post-retirement cost | **$ 4,862** | $ 4,522 | $ 4,469 |

The weighted average rates assumed in the actuarial calculations used to determine both the benefit obligations and the net period costs for the pension and postretirement benefit plans were as folows:

| | **2003** | 2002 | 2001 |
|---|---|---|---|
| Discount | **6.00%** | 6.50% | 7.50% |
| Annual salary increase | **3.75%** | 4.00% | 5.00% |
| Long-term return on plan assets | **8.50%** | 8.50% | 8.50% |

The Company determined the long-term rate of return based on historical asset class returns and current market conditions, taking into account the diversification benefits of investing in multiple asset classes.

An additional assumption used in measuring the accumulated postretirement benefit obligation was a weighted average medical care cost trend rate of 8.25 percent for 2003, decreasing gradually to 5.25 percent through the year 2010 and remaining at that level thereafter. An annual increase or decrease in the assumed medical care cost trend rate of 1 percent would affect the accumulated benefit obligation and the service and interest cost components at December 31, 2003 as follows:

| | 1 Percent | |
|---|---|---|
| | Increase | Decrease |
| | (in thousands) | |
| Benefit obligation | $5,601 | $4,949 |
| Service and interest costs | $ 364 | $ 320 |

### Employee Savings Plan

The Company also sponsors a 401(k) defined contribution plan covering substantially all employees. The Company provides a 75 percent matching contribution up to 6 percent of an employee's base salary. Total matching contributions made to the plan for the years 2003, 2002, and 2001, were $2.6 million, $2.5 million, and $2.3 million, respectively.

## 3. CONTINGENCIES AND REGULATORY MATTERS

### General Litigation Matters

The Company is subject to certain claims and legal actions arising in the ordinary course of business. In addition, the

Company's business activities are subject to extensive governmental regulation related to public health and the environment. Litigation over environmental issues and claims of various types, including property damage, personal injury, and citizen enforcement of environmental requirements, has increased generally throughout the United States. In particular, personal injury claims for damages caused by alleged exposure to hazardous materials have become more frequent. The ultimate outcome of such litigation against the Company cannot be predicted at this time; however, management does not anticipate that the liabilities, if any, arising from such current proceedings would have a material adverse effect on the Company's financial statements.

**Environmental Cost Recovery**

In 1993, the Florida Legislature adopted legislation for an Environmental Cost Recovery Clause (ECRC), which allows an electric utility to petition the FPSC for recovery of prudent environmental compliance costs that are not being recovered through base rates or any other recovery mechanism. Such environmental costs include operation and maintenance expense, emission allowance expense, depreciation, and a return on invested capital.

This legislation was amended in 2002 to allow recovery of costs incurred as a result of an agreement between the Company and the Florida Department of Environmental Protection (FDEP) for the purpose of ensuring compliance with ozone ambient air quality standards adopted by the Environmental Protection Agency (EPA). During 2003, 2002, and 2001, the Company recorded ECRC revenues of $10.7 million, $10.8 million, and $10.0 million, respectively.

At December 31, 2003, the Company's liability for the estimated costs of environmental remediation projects for known sites was $12.9 million. These estimated costs are expected to be expended from 2004 through 2012. These projects have been approved by the FPSC for recovery through the ECRC discussed above. Therefore, the Company recorded $1.3 million in current assets and current liabilities and $11.6 million in deferred assets and deferred liabilities representing the future recoverability of these costs.

**New Source Review Actions**

In November 1999, the EPA brought a civil action in the U.S. District Court for the Northern District of Georgia against Alabama Power, Georgia Power, and SCS. The complaint alleged violations of the New Source Review (NSR) provisions of the Clean Air Act with respect to five coal-fired generating facilities in Alabama and Georgia and violations of related state laws. The civil action requested penalties and injunctive relief, including an order requiring the installation of the best available control technology at the affected units. The EPA concurrently issued to the retail operating companies notices of violation relating to 10 generating facilities, which included the five facilities mentioned previously and the Company's Plants Crist and Scherer. See Note 4 for information on the Company's ownership interest in Plant Scherer Unit 3. In early 2000, the EPA filed a motion to amend its complaint to add the violations alleged in its notices of violation and to add the Company, Mississippi Power, and Savannah Electric as defendants.

In August 2000, the U.S. District Court in Georgia granted Alabama Power's motion to dismiss for lack of jurisdiction in Georgia and granted SCS's motion to dismiss on the grounds that it neither owned nor operated the generating units involved in the proceedings. In March 2001, the court granted the EPA's motion to add Savannah Electric as a defendant, but it denied the motion to add the Company and Mississippi Power based on lack of jurisdiction in Georgia over those companies. As directed by the court, the EPA refiled its amended complaint limiting claims to those brought against Georgia Power and Savannah Electric. In addition, the EPA refiled its claims against Alabama Power in the U.S. District Court for the Northern District of Alabama. These complaints allege violations with respect to eight coal-fired generating facilities in Alabama and Georgia, and they request the same kinds of relief as was requested in the original complaint, i.e. penalties and injunctive relief, including installation of the best available control technology. The EPA has not refiled against the Company, Mississippi Power, or SCS.

The actions against Alabama Power, Georgia Power, and Savannah Electric were stayed in the spring of 2001 during the appeal of a very similar NSR enforcement action against the Tennessee Valley Authority (TVA) before the U.S. Court of Appeals for the Eleventh Circuit. The TVA appeal involves many of the same legal issues raised by the actions against Alabama Power, Georgia Power, and Savannah Electric. Because the final resolution of the TVA

appeal could have a significant impact on Alabama Power and Georgia Power, both companies have been involved in that appeal. On June 24, 2003, the Court of Appeals issued its ruling in the TVA case. It found unconstitutional the statutory scheme set forth in the Clean Air Act that allowed the EPA to impose penalties for failing to comply with an administrative compliance order, like the one issued to TVA, without the EPA having to prove the underlying violation. Thus, the Court of Appeals held that the compliance order was of no legal consequence, and TVA was free to ignore it. The court did not however, rule directly on the substantive legal issues about the proper interpretation and application of certain NSR provisions that had been raised in the TVA appeal. On September 16, 2003, the Court of Appeals denied the EPA's request for a rehearing of the decision and on February 13, 2004, the EPA petitioned the U.S. Supreme Court to review the Eleventh Circuit's decision. The actions against Alabama Power, Georgia Power, and Savannah Electric could remain stayed pending this appeal. The EPA also filed a motion to lift the stay in the action against Alabama Power. At this time, no party to the Georgia Power and Savannah Electric action, which was administratively closed two years ago, has asked the court to reopen that case.

Since the inception of the NSR proceedings against Georgia Power, Alabama Power, and Savannah Electric, the EPA has also been proceeding with similar NSR enforcement actions against other utilities, involving many of the same legal issues. In each case, the EPA alleged that the utilities failed to comply with the NSR permitting requirements when performing maintenance and construction activities at coal-burning plants, which activities the utilities considered to be routine or otherwise not subject to NSR. In 2003, district courts addressing these cases issued opinions that reached conflicting conclusions.

In October 2003, the EPA issued final revisions to its NSR regulations under the Clean Air Act clarifying the scope of the existing Routine Maintenance, Repair, and Replacement exclusion. On December 24, 2003, the U.S. Court of Appeals for the District of Columbia Circuit stayed the effectiveness of these revisions pending resolution of related litigation. In January 2004, the Bush Administration announced that it would continue to enforce the existing rules.

The Company believes that it complied with applicable laws and the EPA's regulations and interpretations in effect at the time the work in question took place. The Clean Air Act authorizes civil penalties of up to $27,500 per day, per violation at each generating unit. Prior to January 30, 1997, the penalty was $25,000 per day. An adverse outcome in this matter could require substantial capital expenditures that cannot be determined at this time and could possibly require payment of substantial penalties. This could affect future results of operations, cash flows, and possibly the Company's financial condition if such costs are not recovered through regulated rates.

**Personal Injury Litigation**

On January 28, 2003, a jury in Escambia County, Florida returned a verdict of $3 million against the Company arising out of an alleged electrical injury sustained by the plaintiff in January 1999 while inside his apartment. This matter is on appeal to Florida's First District Court of Appeal. If this verdict is upheld, there is insurance coverage available to offset a substantial portion of this amount. The ultimate outcome of this matter cannot now be determined, but is not expected to have a material impact on the Company's financial statements.

**Right of Way Litigation**

Southern Company and certain of its subsidiaries, including the Company, Georgia Power, Mississippi Power, and Southern Telecom (collectively, defendants), have been named as defendants in numerous lawsuits brought by landowners since 2001 regarding the installation and use of fiber optic cable over defendants' rights of way located on the landowners' property. The plaintiffs' lawsuits claim that defendants may not use or sublease to third parties some or all of the fiber optic communications lines on the rights of way that cross the plaintiffs' properties, and that such actions by defendants exceed the easements or other property rights held by defendants. The plaintiffs assert claims for, among other things, trespass and unjust enrichment. The plaintiffs seek compensatory and punitive damages and injunctive relief. With respect to one such lawsuit brought by landowners regarding the installation and use of fiber optic cable over Company rights of way located on the landowners' property, on November 7, 2003, the Second Circuit Court in Gadsden County, Florida, ruled in favor of the plaintiffs on their motion for partial summary judgment concerning liability. The question of damages, if any, will be decided at a future trial. In

the event of an adverse verdict on damages, the Company could appeal the verdicts on both liability and damages. The Company believes that it has complied with applicable laws and that the plaintiffs' claims are without merit. An adverse outcome in these matters could result in substantial judgments; however, the final outcome of these matters cannot now be determined.

In addition, in late 2001, certain subsidiaries of Southern Company, including the Company, Alabama Power, Georgia Power, Mississippi Power, Savannah Electric, and Southern Telecom (collectively, defendants), were named as defendants in a lawsuit brought by a telecommunications company that uses certain of the defendants' rights of way. This lawsuit alleges, among other things, that the defendants are contractually obligated to indemnify, defend, and hold harmless the telecommunications company from any liability that may be assessed against the telecommunications company in pending and future right of way litigation. The Company believes that the plaintiff's claims are without merit. An adverse outcome in this matter, combined with an adverse outcome against the telecommunications company in one or more of the right of way lawsuits, could result in substantial judgments; however, the final outcome of these matters cannot now be determined.

**Retail Rate Matters**

In October 1999, the Office of Public Counsel, the Coalition for Equitable Rates, the Florida Industrial Power Users Group, and the Company jointly filed a petition with the FPSC that included a reduction to retail base rates of $10 million annually and provided for revenues to be shared within set ranges for 1999 through 2002. The Company recorded revenues subject to refund (with interest) of $1.5 million in 2001. No refund was required in 2002. The sharing plan expired on April 21, 2002.

In May 2002, the FPSC approved a retail base rate increase of $53.2 million effective June 7, 2002 primarily related to the commercial operation of Plant Smith Unit 3.

**FERC Matters**

The Company has obtained FERC approval to sell power to nonaffiliates at market-based prices under specific contracts. Through SCS, as agent, the Company also has FERC authority to make short-term opportunity sales at market rates. Specific FERC approval must be obtained with respect to a market-based contract with an affiliate. In November 2001, the FERC modified the test it uses to consider utilities' applications to charge market-based rates and adopted a new test called the Supply Margin Assessment (SMA). The FERC applied the SMA to several utilities, including Southern Company's retail operating companies, and found them to be "pivotal suppliers" in their service areas and ordered the implementation of several mitigation measures. SCS, on behalf of the Company and the other retail operating companies, sought rehearing of the FERC order, and the FERC delayed the implementation of certain mitigation measures. SCS, on behalf of the Company and the other retail operating companies, submitted comments to the FERC in 2002 regarding these issues. In December 2003, the FERC issued a staff paper discussing alternatives and held a technical conference in January 2004. The Company anticipates that the FERC will address the requests for rehearing in the near future. Regardless of the outcome of the SMA proposal, the FERC retains the ability to modify or withdraw the authorization for any seller to sell at market-based rates, if it determines that the underlying conditions for having such authority are no longer applicable. The final outcome of this matter will depend on the form in which the SMA test and mitigation measures rules may be ultimately adopted and cannot be determined at this time.

**4. JOINT OWNERSHIP AGREEMENTS**

The Company and Mississippi Power jointly own Plant Daniel Unit No. 1 and Unit No. 2, which together represent capacity of 1,000 MW. Plant Daniel is a generating plant located in Jackson County, Mississippi. In accordance with the operating agreement, Mississippi Power acts as the Company's agent with respect to the construction, operation, and maintenance of these units.

The Company and Georgia Power jointly own the 818 MW capacity Plant Scherer Unit No. 3. Plant Scherer is a generating plant located near Forsyth, Georgia. In accordance with the operating agreement, Georgia Power acts as the Company's agent with respect to the construction, operation, and maintenance of the unit.

The Company's pro rata share of expenses related to both plants is included in the corresponding operating expense accounts in the Statements of Income.

At December 31, 2003, the Company's percentage ownership and its investment in these jointly owned facilities were as follows:

| | Plant Scherer Unit No. 3 (coal) | Plant Daniel Unit Nos. 1 & 2 (coal) |
|---|---|---|
| | (in thousands) | |
| Plant In Service | **$189,502**[1] | **$234,914** |
| Accumulated Depreciation | **$ 80,631** | **$122,904** |
| Construction Work in Progress | **$ 91** | **$ 815** |
| Ownership | **25%** | **50%** |

(1) Includes net plant acquisition adjustment.

## 5. INCOME TAXES

The Company and the other subsidiaries of Southern Company file a consolidated federal income tax return. In 2002, Southern Company began filing a combined State of Georgia income tax return. Under a joint consolidated income tax agreement, each subsidiary's current and deferred tax expense is computed on a stand-alone basis. In accordance with IRS regulations, each company is jointly and severally liable for the tax liability.

At December 31, 2003, the tax-related regulatory assets to be recovered from customers were $18.3 million. These assets are attributable to tax benefits flowed through to customers in prior years and to taxes applicable to capitalized allowance for funds used during construction. At December 31, 2003, the tax-related regulatory liabilities to be credited to customers were $26.5 million. These liabilities are attributable to deferred taxes previously recognized at rates higher than current enacted tax law and to unamortized investment tax credits.

Details of income tax provisions are as follows:

| | **2003** | 2002 | 2001 |
|---|---|---|---|
| | | (in thousands) | |
| Total provision for income taxes: | | | |
| Federal-- | | | |
| Current | **$33,085** | $24,474 | $24,207 |
| Deferred | **2,488** | 7,936 | 2,568 |
| | **35,573** | 32,410 | 26,775 |
| State-- | | | |
| Current | **4,585** | 3,051 | 3,701 |
| Deferred | **719** | 1,683 | 826 |
| | **5,304** | 4,734 | 4,527 |
| Total | **$40,877** | $37,144 | $31,302 |

Net cash payments for income taxes related to continuing operations in 2003, 2002, and 2001 were $23.8 million, $34.0 million, and $36.8 million, respectively.

The tax effects of temporary differences between the carrying amounts of assets and liabilities in the financial statements and their respective tax bases, which give rise to deferred tax assets and liabilities, are as follows:

| | **2003** | 2002 |
|---|---|---|
| | (in thousands) | |
| Deferred tax liabilities: | | |
| Accelerated depreciation | **$200,129** | $188,879 |
| Other | **27,669** | 28,377 |
| Total | **227,798** | 217,256 |
| Deferred tax assets: | | |
| Federal effect of state deferred taxes | **9,568** | 9,421 |
| Postretirement benefits | **11,793** | 10,826 |
| Other | **24,347** | 18,396 |
| Total | **45,708** | 38,643 |
| Net deferred tax liabilities | **182,090** | 178,613 |
| Less prepaid expense (accrued income taxes), net | **(6,405)** | (10,924) |
| Accumulated deferred income taxes in the Balance Sheets | **$175,685** | $167,689 |

Deferred investment tax credits are amortized over the lives of the related property with such amortization normally applied as a credit to reduce depreciation and amortization in the Statements of Income. Credits amortized in this manner amounted to $1.8 million in 2003, $1.8 million in 2002, and $1.7 million in 2001. At

December 31, 2003, all investment tax credits available to reduce federal income taxes payable had been utilized.

A reconciliation of the federal statutory income tax rate to the effective income tax rate is as follows:

| | **2003** | 2002 | 2001 |
|---|---|---|---|
| Federal statutory rate | **35%** | 35% | 35% |
| State income tax, net of federal deduction | **3** | 3 | 4 |
| Non-deductible book depreciation | **1** | 1 | 1 |
| Difference in prior years' deferred and current tax rate | **(1)** | (2) | (2) |
| Other, net | **(1)** | (1) | (3) |
| Effective income tax rate | **37%** | 36% | 35% |

## 6. FINANCING

### Mandatorily Redeemable Preferred Securities

The Company has formed certain wholly owned trust subsidiaries for the purpose of issuing preferred securities. The proceeds of the related equity investments and preferred security sales were loaned back to the Company through the issuance of junior subordinated notes totaling $72.2 million, which constitute substantially all of the assets of these trusts. The Company considers that the mechanisms and obligations relating to the preferred securities issued for its benefit, taken together, constitute a full and unconditional guarantee by it of the respective trusts' payment obligations with respect to these securities. At December 31, 2003, preferred securities of $70 million were outstanding and recognized as liabilities in the Balance Sheets.

### Long-Term Debt Due Within One Year

At December 31, 2003, the Company had an improvement fund requirement of $550,000. The first mortgage bond improvement fund requirement amounts to 1 percent of each outstanding series of bonds authenticated under the mortgage indenture prior to January 1 of each year, other than those issued to collateralize pollution control revenue bond obligations. The requirement may be satisfied by depositing cash, reacquiring bonds, or by pledging additional property equal to 1 and 2/3 times the requirement.

The sinking fund requirements of first mortgage bonds were satisfied by certifying property additions in 2003 and 2002. It is anticipated that the 2004 requirement will be satisfied by certifying property additions. Sinking fund requirements and/or maturities through 2008 applicable to long-term debt are as follows: $50.6 million in 2004; $0.6 million in 2005; $37.6 million in 2006; $0.3 million in 2007; and $0.3 million in 2008.

### Dividend Restrictions

The Company's first mortgage bond indenture contains various common stock dividend restrictions, which remain in effect as long as the bonds are outstanding. At December 31, 2003, retained earnings of $127 million were restricted against the payment of cash dividends on common stock under the terms of the mortgage indenture.

In accordance with the PUHCA, the Company is also restricted from paying common dividends to the Southern Company from paid-in capital without SEC approval.

### Assets Subject to Lien

The Company's mortgage indenture dated as of September 1, 1941, as amended and supplemented, which secures the first mortgage bonds issued by the Company, constitutes a direct first lien on substantially all of the Company's fixed property and franchises.

There are no agreements or other arrangements among the affiliated companies under which the assets of one company have been pledged or otherwise made available to satify obligations of Southern Company or any of its subsidiaries.

### Bank Credit Arrangements

At the beginning of 2004, the Company had $56 million of lines of credit with banks subject to renewal each year, all of which remained unused. The $56 million in committed lines of credit provide liquidity support for the Company's commercial paper program and for $4 million of daily variable rate pollution control bonds. In connection with these credit lines, the Company has agreed to pay commitment fees and/or to maintain compensating balances with the banks. The compensating balances, which represent substantially all of the cash of the Company except for daily working funds and like items, are not legally restricted from withdrawal.

Certain credit arrangements contain covenants that limit the level of indebtedness to capitalization to 65 percent, as defined in the agreements. Not meeting these limits would result in an event of default under the credit arrangements. In addition, certain credit arrangements contain cross default provisions to other indebtedness that would trigger an event of default if the borrower defaulted on indebtedness over a specified threshold. The cross default provisions are restricted only to indebtedness of the Company. The Company is currently in compliance with all such covenants. Borrowings under unused credit arrangements totaling $20 million would be prohibited if the Company experiences a material adverse change (as defined in such arrangements).

The Company borrows through a commercial paper program that has the liquidity support of committed bank credit arrangements and through an extendible commercial note program. The amount of commercial paper outstanding at December 31, 2003 was $37.7 million. During 2003, the peak amount outstanding for commercial paper was $39.1 million and the average amount outstanding was $12.8 million. The average annual interest rate on commercial paper was 1.2%.

In addition, the Company has bid-loan facilities with five major money center banks that total $50 million, with none committed at December 31, 2003.

### Financial Instruments

The Company enters into energy-related derivatives to hedge exposures to electricity, gas, and other fuel price changes. However, due to cost-based rate regulations, the Company has limited exposure to market volatility in commodity fuel prices and prices of electricity. The Company has implemented fuel-hedging programs with the approval of the FPSC. The Company enters into hedges of forward electricity sales.

At December 31, 2003, the fair value of derivative energy contracts was reflected in the financial statements as follows:

| | Amounts |
|---|---|
| | (in thousands) |
| Regulatory liabilities, net | **$2,501** |
| Other comprehensive income | **-** |
| Net income | **2** |
| Total fair value | **$2,503** |

The fair value gains or losses for cash flow hedges that are recoverable through the regulatory fuel clauses are recorded as regulatory assets and liabilities and are recognized in earnings at the same time the hedged items affect earnings.

The Company also enters into derivatives to hedge exposure to interest rate changes. Derivatives related to fixed rate securities are accounted for as fair value hedges. The derivatives are generally structured to match the critical terms of the hedged debt instruments; therefore, no material ineffectiveness has been recorded in earnings.

During 2003, the Company settled interest derivatives at the same time it issued debt and recognized losses totaling $3.3 million. These losses have been deferred in other comprehensive income and will be reclassified to interest expense over the life of the related debt. The fair value gain or loss for cash flow hedges is recorded in other comprehensive income and is reclassified into earnings at the same time the hedged items affect earnings. For the year 2003, approximately $0.2 million of pre-tax losses were reclassified from other comprehensive income to interest expense. For the year 2004, pre-tax losses of approximately $0.3 million are expected to be reclassified from other comprehensive income to interest expense.

## 7. COMMITMENTS

### Construction Program

The Company is engaged in a continuous construction program, the cost of which is currently estimated to total $166 million in 2004, $149 million in 2005, and $108 million in 2006. The construction program is subject to periodic review and revision, and actual construction costs may vary from the above estimates because of numerous factors. These factors include changes in business conditions; revised load growth estimates; changes in environmental regulations; changes in FERC rules and transmission regulations; increasing costs of labor, equipment, and materials; and cost of capital. At December 31, 2003, significant purchase commitments were outstanding in connection with the construction program.

Included in the amounts above, the Company has budgeted $64 million, $31 million, and $4 million in 2004,

2005, and 2006, respectively, for capital expenditures related to environmental controls at Plant Crist as part of an agreement with the FDEP to reduce nitrogen oxide emissions. The FPSC authorized the Company to recover the costs related to these environmental projects through the ECRC. Construction of new transmission and distribution facilities and capital improvements, including those needed to meet environmental standards for the Company's existing generation, transmission and distribution facilities are ongoing.

**Long-Term Service Agreements**

The Company has entered into a Long-Term Service Agreement (LTSA) with General Electric (GE) for the purpose of securing maintenance support for combined cycle and combustion turbine generating facilities. In summary, the LTSA stipulates that GE will perform all planned inspections on the covered equipment, which includes the cost of all labor and materials. GE is also obligated to cover the costs of unplanned maintenance on the covered equipment subject to a limit specified in the contract.

In general, the LTSA is in effect through two major inspection cycles of the unit. Scheduled payments to GE are made at various intervals based on actual operating hours of the unit. Total payment to GE under this agreement for facilities owned is currently estimated at $84.2 million over approximately 11 years. However, the LTSA contains various cancellation provisions at the option of the Company.

Payments made to GE prior to the performance of any planned inspections are recorded as a prepayments. These amounts are included in prepaid expenses and other assets in the Balance Sheets. Inspection costs are capitalized or charged to expense based on the nature of the work performed.

**Fuel and Purchased Power Commitments**

To supply a portion of the fuel requirements of the generating plants, the Company has entered into various long-term commitments for the procurement of fossil fuel. In most cases, these contracts contain provisions for price escalations, minimum purchase levels, and other financial commitments. Natural gas purchase commitments contain given volumes with prices based on various indices at the time of delivery. Amounts included in the chart below represent estimates based on New York Mercantile future prices at December 31, 2003. Also, the Company has a long-term commitment for the purchase of electricity. Total estimated minimum long-term obligations at December 31, 2003 were as follows:

| Year | Natural Gas | Fuel | Purchased Power |
|---|---|---|---|
| | | (in millions) | |
| 2004 | $104 | $132 | $1 |
| 2005 | 65 | 77 | - |
| 2006 | 59 | 78 | - |
| 2007 | 45 | 78 | - |
| 2008 | 19 | 18 | - |
| 2009 and thereafter | 259 | - | - |
| Total commitments | $551 | $383 | $1 |

Additional commitments for fuel will be required to supply the Company's future needs.

SCS may enter into various types of wholesale energy and natural gas contracts acting as an agent for the Company, the other retail operating companies, Southern Power, and Southern Company GAS. Under these agreements, each of the retail operating companies, Southern Power, and Southern Company GAS may be jointly and severally liable. The creditworthiness of Southern Power and Southern Company GAS is currently inferior to the creditworthiness of the retail operating companies. Accordingly, Southern Company has entered into keep-well agreements with the Company and each of the other retail operating companies to insure they will not subsidize or be responsible for any costs, losses, liabilities, or damages resulting from the inclusion of Southern Power or Southern Company GAS as a contracting party under these agreements.

**Operating Leases**

The Company has operating lease agreements with various terms and expiration dates. Total operating lease expenses were $2.2 million, $2.1 million, and $1.9 million for 2003, 2002, and 2001, respectively.

At December 31, 2003, estimated minimum rental commitments for noncancelable operating leases were as follows:

| Year | Amounts |
|---|---|
| | (in thousands) |
| 2004 | $1,995 |
| 2005 | 2,100 |
| 2006 | 2,042 |
| 2007 | 2,038 |
| 2008 | 2,037 |
| 2009 and thereafter | 8,153 |
| Total commitments | $18,365 |

In 1989, the Company and Mississippi Power jointly entered into a twenty-two year operating lease agreement for the use of 495 aluminum railcars. In 1994, a second lease agreement for the use of 250 additional aluminum railcars were entered into for twenty-two years. Both of these leases are for the transportation of coal to Plant Daniel. The Company has the option to purchase the 745 railcars at the greater of lease termination value or fair market value, or to renew the leases at the end of each lease term.

The Company, as a joint owner of Plant Daniel Units 1 and 2, is responsible for one-half of the lease costs. The lease commitments above include the railcar lease amounts. The lease costs are charged to fuel inventory and are allocated to fuel expense as the fuel is used.

These expenses are then recovered through the Company's fuel cost recovery clause. The Company's share of the lease costs charged to fuel inventories was $1.9 million in 2003, $1.9 million in 2002, and $1.9 million in 2001. The annual amounts for 2004 through 2008 are expected to be $1.9 million, $2.0 million, $2.0 million, $2.0 million, and $2.0 million, respectively, and after 2008 are expected to total $8.2 million.

## 8. QUARTERLY FINANCIAL INFORMATION (UNAUDITED)

Summarized quarterly financial data for 2003 and 2002 are as follows:

| Quarter Ended | Operating Revenues | Operating Income | Net Income After Dividends on Preferred Stock |
|---|---|---|---|
| | | (in thousands) | |
| **March 2003** | **$197,838** | **$32,797** | **$13,972** |
| **June 2003** | **215,209** | **40,668** | **18,785** |
| **September 2003** | **252,889** | **61,545** | **32,798** |
| **December 2003** | **211,761** | **16,890** | **3,455** |
| March 2002 | $160,933 | $24,493 | $11,717 |
| June 2002 | 209,987 | 31,174 | 13,487 |
| September 2002 | 245,601 | 65,661 | 33,979 |
| December 2002 | 203,946 | 24,159 | 7,853 |

The Company's business is influenced by seasonal weather conditions and the timing of rate changes, among other factors.

## SELECTED FINANCIAL AND OPERATING DATA 1999-2003

**Gulf Power Company 2003 Annual Report**

| | **2003** | 2002 | 2001 | 2000 | 199 |
|---|---|---|---|---|---|
| **Operating Revenues** (in thousands) | **$877,697** | $820,467 | $725,203 | $714,319 | $674,09 |
| **Net Income after Dividends on Preferred Stock** (in thousands) | **$69,010** | $67,036 | $58,307 | $51,843 | $53,66 |
| **Cash Dividends on Common Stock** (in thousands) | **$70,200** | $65,500 | $53,275 | $59,000 | $61,30 |

MISSISSIPPI POWER COMPANY

FINANCIAL SECTION

## MANAGEMENT'S REPORT

Mississippi Power Company 2003 Annual Report

The management of Mississippi Power Company (the Company) has prepared -- and is responsible for -- the financial statements and related information included in this report. These statements were prepared in accordance with accounting principles generally accepted in the United States and necessarily include amounts that are based on the best estimates and judgments of management. Financial information throughout this annual report is consistent with the financial statements.

The Company maintains a system of internal accounting controls to provide reasonable assurance that assets are safeguarded and that the accounting records reflect only authorized transactions of the Company. Limitations exist in any system of internal controls, however, based on recognition that the cost of the system should not exceed its benefits. The Company believes its system of internal accounting controls maintains an appropriate cost/benefit relationship.

The Company's internal accounting controls are evaluated on an ongoing basis by the Company's internal audit staff. The Company's independent public accountants also consider certain elements of the internal control system in order to determine their auditing procedures for the purpose of expressing an opinion on the financial statements.

Anthony J. Topazi
President and Chief Executive Officer

Southern Company's audit committee of its board of directors, composed of four independent directors, provides a broad overview of management's financial reporting and control functions. Additionally, a committee of the Company's board of directors, composed of four outside directors, meets periodically with management, the internal auditors, and the independent public accountants to discuss auditing, internal controls, and compliance matters. The internal auditors and independent public accountants have access to the members of these committees at any time.

Management believes that its policies and procedures provide reasonable assurance that the Company's operations are conducted according to a high standard of business ethics.

In management's opinion, the financial statements present fairly, in all material respects, the financial position, results of operations, and cash flows of the Company in conformity with accounting principles generally accepted in the United States.

Michael W. Southern
Vice President, Treasurer and,
Chief Financial Officer

March 1, 2004

## INDEPENDENT AUDITORS' REPORT

**Mississippi Power Company:**

We have audited the accompanying balance sheets and statements of capitalization of Mississippi Power Company (a wholly owned subsidiary of Southern Company) as of December 31, 2003 and 2002, and the related statements of income, comprehensive income, common stockholder's equity, and cash flows for the years then ended. These financial statements are the responsibility of Mississippi Power Company's management. Our responsibility is to express an opinion on these financial statements based on our audits. The financial statements of Mississippi Power Company for the year ended December 31, 2001 were audited by other auditors who have ceased operations. Those auditors expressed an unqualified opinion on those financial statements and included an explanatory paragraph that described a change in the method of accounting for derivative instruments and hedging activities in their report dated February 13, 2002.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements (pages II-218 to II-239) present fairly, in all material respects, the financial position of Mississippi Power Company at December 31, 2003 and 2002, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note 1 to the financial statements, in 2003 Mississippi Power Company changed its method of accounting for asset retirement obligations.

Deloitte & Touche LLP

Atlanta, Georgia
March 1, 2004

**THE FOLLOWING REPORT OF INDEPENDENT PUBLIC ACCOUNTANTS IS A COPY OF THE REPORT PREVIOUSLY ISSUED IN CONNECTION WITH THE COMPANY'S 2001 ANNUAL REPORT ON FORM 10-K AND HAS NOT BEEN REISSUED BY ARTHUR ANDERSEN LLP. SEE EXHIBIT 23(e)2 FOR ADDITIONAL INFORMATION.**

**To Mississippi Power Company:**

We have audited the accompanying balance sheets and statements of capitalization of Mississippi Power Company (a Mississippi corporation and a wholly owned subsidiary of Southern Company) as of December 31, 2001 and 2000, and the related statements of income, common stockholder's equity, and cash flows for each of the three years in the period ended December 31, 2001. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements (pages II-160 through II-176) referred to above present fairly, in all material respects, the financial position of Mississippi Power Company as of December 31, 2001 and 2000, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2001, in conformity with accounting principles generally accepted in the United States.

As explained in Note 1 to the financial statements, effective January 1, 2001, Mississippi Power Company changed its method of accounting for derivative instruments and hedging activities.

Arthur Andersen LLP

Atlanta, Georgia

## OVERVIEW OF EARNINGS AND BUSINESS ACTIVITIES

### *Earnings*

Mississippi Power Company's net income after dividends on preferred stock of $73.5 million in 2003 remained relatively flat from $73.0 million in 2002. However, operating revenues and expenses recorded by the Company in 2003 were unusually high as compared to 2002. An increase of $62 million in other electric revenues resulted from the termination of a contract with a subsidiary of Dynegy, Inc. (Dynegy), the income effect of which was offset by the recording of a $60 million expense related to the establishment of a regulatory liability in connection with an interim accounting order issued by the Mississippi Public Service Commission (MPSC) related to the Plant Daniel capacity expense. See Note 3 to the financial statements under "Contract Termination" and "Retail Regulatory Filing" for additional information. Excluding these two items, operating revenues and operating expense were lower in 2003 than in 2002 primarily due to decreased fuel revenues and lower fuel and purchased power costs. Also, milder weather in 2003 caused kilowatt-hour sales to be slightly lower than in 2002. The 2002 increase of $9.1 million in net income as compared to the prior year was primarily attributable to the retail and wholesale rate increases in late 2001 and early 2002, respectively, and lower interest expense. The increase in net income of $8.9 million for 2001 was due primarily to the commercial operation of Plant Daniel Units 3 and 4 and lower interest costs.

### *Business Activities*

The Company currently operates as a vertically integrated utility providing electricity to retail customers within its traditional service area located within the state of Mississippi and to wholesale customers in the Southeast.

Several factors affect the opportunities, challenges, and risk of selling electricity. These factors include the Company's ability to maintain a stable regulatory environment, to achieve energy sales growth while containing costs, and to recover costs related to growing demand and increasingly stricter environmental standards. Future earnings in the near term will depend, in part, upon growth in energy sales, which is subject to a number of factors. These factors include weather, competition, new energy contracts with neighboring utilities, energy conservation practiced by customers, the price of electricity, the price elasticity of demand, and the rate of economic growth in the service area.

## RESULTS OF OPERATIONS

A condensed income statement is as follows:

| | Amount | Increase (Decrease) From Prior Year | | |
|---|---|---|---|---|
| | **2003** | **2003** | 2002 | 2001 |
| | | (in thousands) | | |
| Operating revenues | **$869,924** | **$45,759** | $28,100 | $108,463 |
| Fuel | **229,251** | **(53,142)** | 4,447 | 86,819 |
| Purchased power | **93,197** | **41,864** | (43,911) | (11,895) |
| Other operation and maintenance | **300,118** | **68,105** | 41,015 | 23,193 |
| Depreciation and amortization | **55,700** | **(1,938)** | 3,561 | 3,802 |
| Taxes other than income taxes | **53,991** | **(1,527)** | 10,552 | (3,720) |
| Total operating expenses | **732,257** | **53,362** | 15,664 | 98,199 |
| Operating income | **137,667** | **(7,603)** | 12,436 | 10,264 |
| Other income (expense), net | **(18,853)** | **7,525** | 2,036 | 4,828 |
| Less -- Income taxes | **45,315** | **(564)** | 5,346 | 6,177 |
| Net Income | **$ 73,499** | **$ 486** | $ 9,126 | $ 8,915 |

### *Revenues*

Details of the Company's operating revenues in 2003 and the prior two years are as follows:

| | Amount | | |
|---|---|---|---|
| | **2003** | 2002 | 2001 |
| | | (in thousands) | |
| Retail -- prior year | **$ 536,827** | $ 489,153 | $498,551 |
| Change in -- | | | |
| Base rates | **-** | 38,143 | - |
| Sales growth | **1,175** | 566 | (1,048) |
| Weather | **(1,542)** | 3,533 | (1,953) |
| Fuel cost recovery and other | **(20,159)** | 5,432 | (6,397) |
| Retail -- current year | **516,301** | 536,827 | 489,153 |
| Sales for resale -- | | | |
| Non-affiliates | **249,986** | 224,275 | 204,623 |
| Affiliates | **26,723** | 46,314 | 85,652 |
| Total sales for resale | **276,709** | 270,589 | 290,275 |
| Contract termination | **62,111** | - | - |
| Other electric operating revenues | **14,803** | 16,749 | 16,637 |
| Total electric operating revenues | **$869,924** | $824,165 | $796,065 |
| Percent change | **5.6%** | 3.5% | 15.8% |

Total retail revenues for 2003 decreased approximately 3.8 percent when compared to 2002 as a result of decreased fuel revenues and to the lesser extent decreases in kilowatt-hour energy sales due to milder than normal weather in the Company's service area and the sluggish economy. Retail revenues for 2002 increased approximately 9.7 percent when compared to 2001, primarily due to a retail rate increase which took effect in January 2002 and, to a lesser extent, higher kilowatt-hour energy sales resulting from colder winter weather. See Note 3 to the financial statements under "2001 Retail Rate Case" for additional information. Retail revenues for 2001 reflected a 1.9 percent decrease from 2000 due to lower energy sales to residential, commercial, and industrial customers as a result of mild weather and a slowdown in manufacturing activity in the Company's service territory.

Fuel revenues generally represent the direct recovery of fuel expense including purchased power. Therefore, changes in recoverable fuel expenses are offset with corresponding changes in fuel revenues and have no effect on net income. During 2003, the fuel cost recovery and other revenues decreased $20 million compared to 2002 due to a reduction in rates that became effective in 2003.

Sales for resale to non-affiliates are influenced by the non-affiliate utilities' own customer demand, plant availability, and cost of predominant fuels. Included in sales for resale to non-affiliates are revenues from rural electric cooperative associations and municipalities located in southeastern Mississippi. Sales to these utilities remained relatively flat in 2003 compared to 2002, increased 8.0 percent in 2002, and decreased 3.7 percent in 2001, with the related revenues increasing 1.6 percent, increasing 19.8 percent, and decreasing 2.4 percent, respectively. The customer demand experienced by these utilities is determined by factors very similar to those of the Company. Total revenues from sales for resale to non-affiliates increased in 2003 as a result of increases in average sales price per kilowatt-hour and increased kilowatt-hour sales to wholesale non-affiliate customers. Revenues from sales for resale to non-affiliates increased in 2002 and 2001, primarily as the result of a new power sales contract that began in June 2001, as well as colder winter months during 2002.

In May 2003, the Company entered into an agreement with Dynegy that resolved and terminated in 2003 all outstanding matters related to capacity sales contracts with subsidiaries of Dynegy. The termination payment from Dynegy resulted in an increase in other electric revenues of $62 million for the year 2003. See Note 3 to the financial statements under "Contract Termination" for additional information.

### *Energy Sales*

Energy sales to affiliated companies within the Southern Company electric system vary from year to year depending on demand and the availability and cost of generating resources at each company. These sales do not have a significant impact on earnings since the energy is generally sold at marginal cost.

Kilowatt-hour (KWH) sales for 2003 and percent change by year were as follows:

| | KWH | Percent Change | | |
|---|---|---|---|---|
| | 2003 | 2003 | 2002 | 2001 |
| | (in millions) | | | |
| Residential | **2,256** | **(1.9)%** | 6.3% | (5.4)% |
| Commercial | **2,914** | **0.4** | 2.1 | (1.5) |
| Industrial | **4,111** | **(1.2)** | (2.7) | (2.3) |
| Other | **40** | **-** | - | (0.3) |
| Total retail | **9,321** | **(0.9)** | 0.1 | (2.8) |
| Sales for Resale | | | | |
| Non-Affiliated | **5,875** | **9.2** | 7.4 | 36.4 |
| Affiliated | **709** | **(55.3)** | (46.3) | 552.3 |
| Total | **15,905** | **(2.8)** | (5.3) | 26.0 |

Total retail kilowatt-hour sales decreased in 2003 as the result of milder weather in 2003 when compared to 2002. Total retail kilowatt-hour sales increased slightly in 2002 due to colder than average winter weather, which primarily affected residential sales. In addition, commercial sales increased 2.1 percent in 2001 due primarily to growth in the health, education, and retail sales areas. Industrial sales fell 2.7 percent in 2002 due to an economic downturn in the Company's service area. In 2001, residential sales decreased 5.4 percent due to unusually mild weather in the Company's service area. The commercial sales and industrial sales in 2001 decreased 1.5 percent and 2.3 percent, respectively, due to an economic slowdown in the Company's service area. Kilowatt-hour sales for non-affiliated sales for resale increased in 2002 and 2001 due to the increased demand from these customers and the commercial operation of Plant Daniel Units 3 and 4 in May 2001.

The Company anticipates relatively slow growth over the next five years due to a slow recovery from the national and area economic downturn and a maturing of the gaming and tourism industry. Retail sales are expected to grow at an annual average rate of approximately 1% through 2008, with increases expected in the local, state, and federal government sectors, as well as increases in shipbuilding, education, and health care.

### *Expenses*

Total operating expenses were $732 million in 2003, which reflects an increase of 7.9 percent over 2002. The increase in 2003 is due primarily to $60 million in Plant Daniel capacity expense recorded in connection with an interim accounting order from the MPSC. See Note 3 to the financial statements under "Retail Regulatory Filing" for further information. In 2002, total operating expenses were $679 million, reflecting an increase of 2.4 percent over the prior year. The increase was due primarily to increases in maintenance expense due to planned outages at Plant Watson and Plant Daniel and a full year of rental expense for Plant Daniel Units 3 and 4, as well as a slight increase in fuel expense. In 2001, total operating expenses increased by 17.4 percent over the prior year due primarily to the commercial operation and related lease of Plant Daniel Units 3 and 4 beginning in May 2001. See Note 7 to the financial statements under "Operating Leases -- Plant Daniel Combined Cycle Generating Units" for additional information.

Fuel costs are the single largest expense for the Company. The mix of fuel sources for generation of electricity is determined primarily by demand, the unit cost of fuel consumed, and the availability of fossil generating units. The amount and sources of generation and the average cost of fuel per net kilowatt-hour generated and the average cost of purchased power were as follows:

| | 2003 | 2002 | 2001 |
|---|---|---|---|
| Total generation (millions of kilowatt hours) | **12,850** | 15,079 | 15,770 |
| Sources of generation (percent) -- | | | |
| Coal | **74** | 57 | 59 |
| Gas | **26** | 43 | 41 |
| Average cost of fuel per net kilowatt-hour generated (cents) -- | **1.95** | 2.03 | 1.89 |
| Average cost of purchased power per kilowatt-hour (cents) -- | **2.55** | 2.61 | 4.27 |

Fuel expense for 2003 decreased 18.8 percent due to decreased generation and lower average cost of fuel. Fuel expense for 2002 and 2001 increased 1.6 percent and 45.4 percent, respectively. The increase for 2002 was due to a fuel hedging loss, which is approved for recovery through the Energy Cost Management Plan (ECM), authorized by the MPSC. The 2001 increase was due to increased generation in conjunction with the

initial operation of Plant Daniel Units 3 and 4 and a higher average cost of fuel.

In 2003, purchased power expense increased $41.9 million or 81.6 percent. The increase is primarily due to an increase in purchased power expense from affiliate companies. Those purchases were more economical than self generation due to the increase in the cost of natural gas in 2003. Energy purchases vary from year to year depending on demand and the availability and cost of generating resources at the Company. These expenses do not have a significant impact on earnings since the energy purchases are generally offset by energy revenues through the Company's retail and wholesale fuel cost recovery clauses. In 2002, purchased power expense decreased 46.1 percent when compared to 2001. This decrease resulted from both lower prices and lower purchase requirements, primarily due to the commercial operation of Plant Daniel Units 3 and 4 beginning in May 2001. In 2001, purchased power expense decreased 11.1 percent primarily due to the commercial operation of Plant Daniel Units 3 and 4 and the expiration of non-affiliated purchase power contracts in 2000.

Other operation expense increased $71.7 million or 45.3 percent in 2003, primarily due to approximately $11 million incurred to restructure the lease agreement for the combined cycle generating units at Plant Daniel and $60 million in expense recorded in connection with the recognition of a regulatory liability following an interim accounting order from the MPSC related to Plant Daniel capacity expense. See Notes 3 and 7 to the financial statements under "Retail Regulatory Filing" for further information regarding the Plant Daniel capacity. Also, see "Financial Condition and Liquidity -- Off-Balance Sheet Financing Arrangements" herein and Note 7 to the financial statements under "Operating Leases -- Plant Daniel Combined Cycle Generating Units" for further information regarding the Plant Daniel lease. In 2002, other operation expense increased 17.4 percent primarily due to lease payments associated with the commercial operation of Plant Daniel Units 3 and 4 and higher labor related expenses. In 2001, other operation expense increased 17.2 percent primarily due to an increase in other production expenses resulting from the commercial operation of Plant Daniel Units 3 and 4.

Maintenance expense decreased 4.9 percent in 2003 primarily due to a decrease in the long term service agreement expense of $5 million. The decrease was attributable to the decrease in fired operating hours at Plant Daniel Units 3 and 4 of approximately 50 percent. In 2002, maintenance expense increased 31.2 percent primarily due to scheduled maintenance performed at Plant Watson and Plant Daniel, while maintenance expense in 2001 increased 6.5 percent as a result of the commercial operation of Plant Daniel Units 3 and 4.

In 2003, depreciation and amortization expense decreased $1.9 million compared to 2002 primarily due to a reduction in the amortization of environmental expenses based on the Company's Environmental Compliance Overview Plan (ECO Plan) filing with the MPSC. In 2002 and 2001, depreciation and amortization expense increased 6.6 percent and 7.6 percent, respectively, due to a growth in plant investment and amortization of the Company's regulatory asset related to the recovery of environmental compliance costs. See Note 3 to the financial statements under "Environmental Compliance Overview Plan" for further information.

Taxes other than income taxes decreased 2.8 percent in 2003 primarily due to lower property taxes in 2003. Taxes other than income taxes increased 23.5 percent in 2002 due to additional property taxes related to Plant Daniel Units 3 and 4 and higher municipal franchise taxes. These taxes decreased 7.6 percent in 2001 due to reductions in certain ad valorem tax rates. The decrease in total other income and expense is due to interest on long-term debt decreasing in 2003, 2002, and 2001 as a result of lower interest rates on debt outstanding and lower principal amount of debt outstanding.

**Effects of Inflation**

The Company is subject to rate regulation that is based on the recovery of historical costs. In addition, the income tax laws are also based on historical costs. Therefore, inflation creates an economic loss because the Company is recovering its costs of investments in dollars that have less purchasing power. While the inflation rate has been relatively low in recent years, it continues to have an adverse effect on the Company because of the large investment in utility plant with long economic lives. Conventional accounting for historical cost does not recognize this economic loss nor the

partially offsetting gain that arises through financing facilities with fixed-money obligations, such as long-term debt and preferred securities. Any recognition of inflation by regulatory authorities is reflected in the rate of return allowed in the Company's approved electric rates.

## Future Earnings Potential

### *General*

The results of operations for the past three years are not necessarily indicative of future earnings potential. The level of the Company's future earnings depends on numerous factors. These factors affect the opportunities, challenges, and risk of the Company's business of selling electricity. These factors include the Company's ability to maintain a stable regulatory environment, to achieve energy sales growth while containing costs, and to recover costs related to growing demand and increasingly stricter environmental standards. Future earnings for the electricity business in the near term will depend, in part, upon growth in energy sales, which is subject to a number of factors. These factors include weather, competition, new energy contracts with neighboring utilities, energy conservation practiced by customers, the price of electricity, the price elasticity of demand, and the rate of economic growth in the service area.

### *Industry Restructuring*

The Company operates as a vertically integrated utility providing electricity to retail customers within its traditional service area located in southeastern Mississippi and wholesale customers in the Southeast. Prices for electricity provided by the Company to retail customers are set by the MPSC under cost-based regulatory principles. The Federal Energy Regulatory Commission (FERC) regulates the Company's wholesale rate schedules, wholesale power sales contracts, and wholesale transmission services.

The electric utility industry in the United States is continuing to evolve as a result of regulatory and competitive factors. Among the early primary agents of change was the Energy Policy Act of 1992 (Energy Act). The Energy Act allowed independent power producers to access a utility's transmission network and sell electricity to other utilities.

Although the Energy Act does not provide for retail customer access, it was a major catalyst for the restructuring and consolidation that took place within the utility industry. Numerous federal and state initiatives that promote wholesale and retail competition are in varying stages. Among other things, these initiatives allow retail customers in some states to choose their electricity provider. Some states have approved initiatives that result in a separation of the ownership and/or operation of generating facilities from the ownership and/or operation of transmission and distribution facilities. While various restructuring and competition initiatives have been discussed in Mississippi, none have been enacted.

In May 2000, the MPSC ordered that its docket reviewing restructuring of the electric industry in the State of Mississippi be suspended. The MPSC found that retail competition may not be in the public interest at this time and ordered that no further formal hearings would be held on the subject. It also found that the current regulatory structure produced reliable low cost power and "should not be changed without clear and convincing demonstration that change would be in the public interest." The MPSC will continue to monitor retail and wholesale restructuring activities throughout the United States and reserves its right to order further formal hearings on the matter should new evidence demonstrate that retail competition would be in the public interest and all customers could receive a reduction in the total cost of their electric service. If the MPSC decides to hold future restructuring hearings on this matter, enactment could require numerous issues to be resolved, including recovery of any stranded investments, full cost recovery of energy produced and other issues related to the energy crisis that occurred in California, as well as the August 2003 power outage in the Northeast.

Since 2001, merchant energy companies and traditional electric utilities with significant energy marketing and trading activities have come under severe financial pressures. Many of these companies have completely exited or drastically reduced all energy marketing and trading activities and sold foreign and domestic electric infrastructure assets. The Company has not experienced any material adverse financial impact regarding its limited energy trading operations through Southern Company Services (SCS).

Continuing to be a low-cost producer could provide significant opportunities to increase the size and profitability in markets that evolve with changing regulation and competition. Conversely, future regulatory changes could adversely affect the Company's growth, and if the Company does not remain a low-cost producer and provide quality service, then the Company's energy sales growth could be limited, and this could significantly erode earnings.

***Environmental Matters***

*New Source Review Actions*

In November 1999, the Environmental Protection Agency (EPA) brought a civil action against Alabama Power, Georgia Power, and SCS. The complaint alleged violations of the New Source Review (NSR) provisions of the Clean Air Act with respect to five coal-fired generating facilities in Alabama and Georgia. The civil action requested penalties and injunctive relief, including an order requiring the installation of the best available control technology at the affected units. The EPA concurrently issued to the retail operating companies notices of violation relating to 10 generating facilities, which include the five facilities mentioned previously and the Company's Plants Watson and Greene County. In early 2000, the EPA filed a motion to amend its complaint to add the violations alleged in its notices of violation and to add Gulf Power, the Company, and Savannah Electric as defendants. However, in March 2001, the court denied the motion with respect to the Company and Gulf Power based on lack of jurisdiction and the EPA has not refiled. See Note 3 to the financial statements under "New Source Review Actions" for additional information.

In December 2002 and October 2003, the EPA issued final revisions to its NSR regulations under the Clean Air Act. The December 2002 revisions included changes to the regulatory exclusions and the methods of calculating emissions increases. The October 2003 regulations clarified the scope of the existing Routine Maintenance, Repair, and Replacement exclusion. A coalition of states and environmental organizations filed petitions for review of these revisions with the U.S. Court of Appeals for the District of Columbia Circuit. On December 24, 2003, the court of appeals granted a stay of the October 2003 revisions pending its review of the rules and ordered that its review be conducted on an expedited basis. In January 2004, the Bush Administration announced that it would continue to enforce the existing rules until the courts resolve legal challenges to the EPA's revised NSR regulations. In any event, the final regulations must be adopted by the State of Mississippi in order to apply to the Company's facilities. The effect of these final regulations and the related legal challenges cannot be determined at this time.

The Company believes that it complied with applicable laws and the EPA's regulations and interpretations in effect at the time the work in question took place. The Clean Air Act authorizes civil penalties of up to $27,500 per day, per violation at each generating unit. An adverse outcome of this matter could require substantial capital expenditures that cannot be determined at this time and could possibly require payment of substantial penalties. This could affect future results of operations, cash flows, and possibly financial condition if such costs are not recovered through regulated rates.

*Environmental Statutes and Regulations*

The Company's operations are subject to extensive regulation by state and federal environmental agencies under a variety of statutes and regulations governing environmental media, including air, water, and land resources. Compliance with these environmental requirements will involve significant costs -- both capital and operating -- a major portion of which is expected to be recovered through existing ratemaking provisions, including the Company's ECO Plan. The ECO Plan is designed to allow recovery of costs of compliance with the Clean Air Act, as well as other environmental statutes and regulations. The MPSC reviews environmental projects and the Company's environmental policy through the ECO Plan. Under the ECO Plan, any increase in the annual revenue requirement is limited to two percent of retail revenues. The Company's management believes that the ECO Plan provides for recovery of the Clean Air Act costs; however, there can be no assurance that all Clean Air Act costs will be recovered. See Note 3 to the financial statements under "Environmental Compliance Overview Plan" for additional information. Environmental costs that are known and estimable at this time are included in

pital expenditures discussed under "Capital equirements and Contractual Obligations."

Compliance with the federal Clean Air Act and ulting regulations has been, and will continue to be a ficant focus for the Company. The Title IV acid provisions of the Clean Air Act, for example, red significant reductions in sulfur dioxide and n oxide emissions. Title IV compliance was ve in 2000 and associated construction expenditures totaled approximately $65 million.

In September 1998, the EPA issued regional nitrogen oxide reduction rules to the states for implementation. The final rules require compliance by May 31, 2003 for 19 states, not including Mississippi. However, the Company is affected by this rule through its forty percent ownership interest in Greene County Steam Plant in Alabama.

In July 1997, the EPA revised the national ambient air quality standards for ozone and particulate matter. These revisions made the standards significantly more stringent. In the subsequent litigation of these standards, the U.S. Supreme Court found the EPA's implementation program for the new eight-hour ozone standard unlawful and remanded it to the EPA for further rulemaking. During 2003, the EPA proposed implementation rules designed to address the court's concerns. The EPA plans to designate areas as attainment or nonattainment with the new eight-hour ozone standard in April 2004 and with the new fine particulate matter standard by the end of 2004. These designations will be based on air quality data for 2001 through 2003. Based on the most recent air monitoring data, it is anticipated that all counties in the Company's service area will initially be in attainment with both of these standards. However, the impact of any new standards will depend on the development and implementation of applicable regulations and cannot be determined at this time.

In January 2004, the EPA issued a proposed Interstate Air Quality Rule to address interstate transport of ozone and fine particles. This proposed rule would require additional year-round sulfur dioxide and nitrogen oxide emission reductions from power plants in the eastern United States in two phases – in 2010 and 2015. The EPA currently plans to finalize this rule by 2005. If finalized, the rule could modify or supplant other state implementation plan (SIP) requirements for attainment of the fine particulate matter standard and the eight-hour ozone standard. The impact of this rule on the Company will depend upon the specific requirements of the final rule and cannot be determined at this time.

Further reductions in sulfur dioxide and nitrogen oxides could also be required under the EPA's Regional Haze rules. The Regional Haze rules require states to establish Best Available Retrofit Technology (BART) standards for certain sources that contribute to regional haze. The Company has two plants that could be subject to these rules. The EPA Regional Haze program calls for the State of Mississippi to submit SIPs that contain emission reduction strategies for achieving progress toward the visibility improvement goal. The State of Mississippi is on schedule to accomplish this by December 2007. The SIPs must contain emission reduction strategies for implementing BART and achieving progress toward the Clean Air Act's visibility improvement goal. In 2002, however, the U.S. Court of Appeals for the District of Columbia Circuit vacated and remanded the BART provisions of the federal Regional Haze rules to the EPA for further rulemaking. The EPA has entered into an agreement that requires proposed revised rules in April 2004 and final rules in 2005. Because new BART rules have not been developed and state visibility assessments for progress are only beginning, it is not possible to determine the effect of these rules on the Company at this time.

The EPA's Compliance Assurance Monitoring (CAM) regulations under Title V of the Clean Air Act require that monitoring be performed to ensure compliance with emissions limitations on an ongoing basis. In 2004 and 2005, the Plant Watson and Plant Daniel coal fired units will likely become subject to CAM requirements. The Company is in the process of developing CAM plans for Plant Daniel. The Company's CAM plans for Plant Watson are awaiting approval by the Mississippi Department of Environmental Quality (MDEQ). Due to the CAM plans not yet being approved, the Company cannot determine the ultimate costs associated with implementation of the CAM regulations. Actual ongoing monitoring costs are expensed as incurred and are not material for any year presented.

In January 2004, the EPA issued proposed rules regulating mercury emissions from electric utility boilers. The proposal solicits comments on two possible approaches for the new regulations – a Maximum Achievable Control Technology approach and a cap-and-trade approach. Either approach would require significant reductions in mercury emissions from company facilities. The regulations are scheduled to be finalized by the end of 2004, and compliance could be required as early as 2007. Because the regulations have not been finalized, the impact on the Company cannot be determined at this time.

Several major bills to amend the Clean Air Act to impose more stringent emissions limitations on power plants have been proposed by Congress. Three of these, the Bush Administration's Clear Skies Act, the Clean Power Act of 2003, and the Clean Air Planning Act of 2003, propose to further limit power plant emissions of sulfur dioxide, nitrogen oxides, and mercury. The latter two bills also propose to limit emissions of carbon dioxide. The cost impacts of such legislation would depend upon the specific requirements enacted and cannot be determined at this time.

Domestic efforts to limit greenhouse gas emissions have been spurred by international discussions surrounding the Framework Convention on Climate Change and specifically the Kyoto Protocol, which proposes international constraints on the emissions of greenhouse gases. The Bush Administration does not support U.S. ratification of the Kyoto Protocol or other mandatory carbon dioxide reduction legislation and has instead announced a new voluntary climate initiative, known as Climate VISION, which seeks an 18 percent reduction by 2012 in the rate of greenhouse gas emissions relative to the dollar value of the U.S. economy. The Company is involved in a voluntary electric utility industry sector climate change initiative in partnership with the government. The electric utility sector has pledged to reduce its greenhouse gas intensity 3 percent to 5 percent over the next decade and is in the process of developing a memorandum of understanding with the Department of Energy (DOE) to cover this voluntary program.

The Company must comply with other environmental laws and regulations that cover the handling and disposal of waste and releases of hazardous substances. Under these various laws and regulations, the Company could incur costs to clean up properties. However, such c are expected to be recovered through the ECO Plan. Company conducts studies to determine the extent of required clean up and has recognized in the financial statements the costs for clean up of known sites. Shou remediation be determined to be probable, reasonable estimates of costs to clean up such sites are developed a recognized in the financial statements.

Under the Clean Water Act, the EPA has been developing new rules aimed at reducing impi and entrainment of fish and fish larvae at power plant's cooling water intake structures. On February 16, 2004, the EPA finalized these rules. These rules will require biological studies, and perhaps, retrofits to some intake structures at existing power plants. The impact of these new rules will depend on the results of studies and analyses performed as part of the rules' implementation.

In addition, under the Clean Water Act, the EPA and the MDEQ are developing total maximum daily loads (TMDLs) for certain impaired waters. Establishment of maximum loads by the EPA or state agencies may result in lowering permit limits for various pollutants and a requirement to take additional measures to control non-point source pollution (e.g., storm water runoff) at facilities discharging into waters for which TMDLs are established. Because the effect on the Company will depend on the actual TMDLs and permit limitations established by the implementing agency, it is not possible to determine the effect on the Company at this time.

Several major pieces of environmental legislation are periodically considered for reauthorization or amendment by Congress. These include: the Clean Air Act; the Clean Water Act; the Comprehensive Environmental Response, Compensation, and Liability Act; the Resource Conservation and Recovery Act; the Toxic Substances Control Act; the Emergency Planning & Community Right-to-Know Act; and the Endangered Species Act.

Compliance with possible additional federal or state legislation or regulations related to global climate change, electromagnetic fields, or other environmental and health concerns could also significantly affect the Company. The impact of any new legislation, changes to existing legislation, or environmental regulations could affect many areas of the Company's operations.

he full impact of any such changes, however, cannot be etermined at this time.

*FERC Matters*

*Transmission*

In December 1999, the FERC issued its final rule (Order 2000) on Regional Transmission Organizations (RTOs). Order 2000 encouraged utilities owning transmission systems to form RTOs on a voluntary basis. Southern Company and its retail operating companies, including the Company, worked with a number of utilities in the Southeast to develop a for-profit RTO known as SeTrans. In 2002, the sponsors of SeTrans established a Stakeholder Advisory Committee to provide input into the development of the RTO from other sectors of the electric industry, as well as consumers. During the development of SeTrans, state regulatory authorities expressed concern over certain aspects of the FERC's policies regarding RTOs. In December 2003, the SeTrans sponsors announced that they would suspend work on SeTrans because the regulated utility participants, including Southern Company's retail operating companies, had determined that it was highly unlikely to obtain support of both federal and state regulatory authorities. Any impact of the FERC's rule on the Company will depend on the regulatory reaction to the suspension of SeTrans and future developments, which cannot now be determined.

In July 2002, the FERC issued a notice of proposed rulemaking regarding open access transmission service and standard electricity market design. The proposal, if adopted, would among other things: (1) require transmission assets of jurisdictional utilities to be operated by an independent entity; (2) establish a standard market design; (3) establish a single type of transmission service that applies to all customers; (4) assert jurisdiction over the transmission component of bundled retail service; (5) establish a generation reserve margin; (6) establish bid caps for day ahead and spot energy markets; and (7) revise the FERC policy on the pricing of transmission expansions. Comments on the proposal were submitted by many interested parties, including Southern Company, and the FERC has indicated that it has revised certain aspects of the proposal in response to public comments. Proposed energy legislation would prohibit the FERC from issuing the final rule before October 31, 2006, and from making any final rule effective before December 31, 2006. That legislation has been approved by the House of Representatives but remains pending before the Senate. Passage of the legislation now appears in doubt. It is uncertain whether in the absence of legislation the FERC will move forward with any part or all of the proposed rule. Any impact of this proposal on the Company will depend on the form in which the final rule may be ultimately adopted. However, the Company's financial statements could be adversely affected by changes in the transmission regulatory structure in its regional power market.

*Market-Based Rate Authority*

The Company has obtained FERC approval to sell power to nonaffiliates at market-based prices under specific contracts. Through SCS, as agent, the Company also has FERC authority to make short-term opportunity sales at market rates. Specific FERC approval must be obtained with respect to a market-based contract with an affiliate. In November 2001, the FERC modified the test it uses to consider utilities' applications to charge market-based rates and adopted a new test called the Supply Margin Assessment (SMA). The FERC applied the SMA to several utilities, including Southern Company's retail operating companies, and found them and others to be "pivotal suppliers" in their service areas and ordered the implementation of several mitigation measures. SCS, on behalf of the Company and the other retail operating companies, sought rehearing of the FERC order, and the FERC delayed the implementation of certain mitigation measures. SCS, on behalf of the Company and the other retail operating companies, submitted comments to the FERC in 2002 regarding these issues. In December 2003, the FERC issued a staff paper discussing alternatives and held a technical conference in January 2004. The Company anticipates that the FERC will address the requests for rehearing in the near future. Regardless of the outcome of the SMA proposal, the FERC retains the ability to modify or withdraw the authorization for any seller to sell at market-based rates if it determines that the underlying conditions for having such authority are no longer applicable. The final outcome of this matter will depend on the form in which the SMA test and mitigation measures rules may be ultimately adopted and cannot be determined at this time.

*Wholesale Customer Settlement Agreement*

In February 2002, the Company reached a settlement agreement with certain of its wholesale customers to

increase its wholesale tariff rates effective June 1, 2002. The FERC accepted the settlement agreement and placed the new tariff rates in effect without modification. The settlement agreement resulted in an annual increase in revenues of approximately $10.5 million, the adoption of an ECM provision, and the cost allocation of Plant Daniel Units 3 and 4, similar to the plans approved by the Company's retail jurisdiction.

***Other Matters***

In accordance with Financial Accounting Standards Board (FASB) Statement No. 87, Employers' Accounting for Pensions, the Company recorded non-cash pension income, before tax, of approximately $1.7 million, $2.5 million, and $3.2 million in 2003, 2002, and 2001, respectively. Future pension income is dependent on several factors including trust earnings and changes to the plan. The decline in pension income is expected to continue and become an expense as early as 2006. Postretirement benefit costs for the Company were $4 million, $3.7 million, and $3.3 million in 2003, 2002, and 2001, respectively and are expected to continue to trend upward. A portion of pension income and postretirement benefit costs is capitalized based on construction-related labor charges. Pension income or expense and postretirement benefit costs are a component of regulated rates and generally do not have a long-term effect on net income. For more information regarding pension and postretirement benefits, see Note 2 to the financial statements.

On December 8, 2003, President Bush signed into law the Medicare Prescription Drug, Improvement and Modernization Act of 2003 (Medicare Act). The Medicare Act introduces a prescription drug benefit for Medicare-eligible retirees starting in 2006, as well as a federal subsidy to plan sponsors like the Company that provide prescription drug benefits. In accordance with FASB Staff Position No. 106-1, the Company has elected to defer recognizing the effects of the Medicare Act for its postretirement plans under FASB Statement No. 106, Employers' Accounting for Postretirement Benefits Other than Pension, until authoritative guidance on accounting for the federal subsidy is issued or until a significant event occurs that would require remeasurement of the plans' assets and obligations. The Company anticipates that the benefits it pays after 2006 will be lower as a result of the Medicare Act; however, the retiree medical obligations and costs reported in Note 2 to the financial statements do not reflect these changes. The final accounting guidance could requi changes to previously reported information.

On May 21, 2003, the Company entered into an agreement with Dynegy that resolved and terminated in 2003 all outstanding matters related to a capacity sales contract with a subsidiary of Dynegy. The termination payments from Dynegy resulted in a one-time gain to the Company of approximately $38 million after tax.

On December 5, 2003, the Company filed a request with the MPSC to include 266 megawatts of Plant Daniel Units 3 and 4 generating capacity in jurisdictional cost of service. In addition, the Company proposed to modify certain provisions of its Performance Evaluation Plan (PEP), the mechanism used for evaluating the Company's retail rate levels. The proposed changes include (1) the use of a forward-looking, rather than a historical, test year, (2) adjustments to the performance indicator mechanism, and, (3) an annual, rather than semi-annual, evaluation period. The Company expects the MPSC to make a decision on its proposal during the second quarter of 2004. See Note 3 to the financial statements under "Retail Regulatory Filing" and "2001 Retail Rate Case" for additional information.

In December 2001, the MPSC approved an increase in the Company's annual retail rate revenues of approximately $39 million, effective January 2002. Additionally, the MPSC ordered the Company to reactivate semi-annual evaluations under the PEP, beginning with the 12-month period ending December 31, 2002. In May 2002, the MPSC issued an order adopting new return on equity models to be used in the PEP process. The new models are very similar to those that established the rate increase authorized in December 2001 and were incorporated into the PEP evaluation filing for the period ending December 31, 2002. See Note 3 to the financial statements under "Retail Regulatory Filing" for additional information.

The Company is involved in various matters being litigated and regulatory matters that could affect future earnings. See Note 3 to the financial statements for information regarding material issues.

## ACCOUNTING POLICIES

### Application of Critical Accounting Policies and Estimates

The Company prepares its financial statements in accordance with accounting principles generally accepted in the United States. Significant accounting policies are described in Note 1 to the financial statements. In the application of these policies, certain estimates are made that may have a material impact on the Company's results of operations and related disclosures. Different assumptions and measurements could produce estimates that are significantly different from those recorded in the financial statements. Senior management has discussed the development and selection of the critical accounting policies and estimates described below with the Controls and Compliance Committee of the Company's Board of Directors and the Audit Committee of Southern Company's Board of Directors.

#### *Electric Utility Regulation*

The Company is subject to retail regulation by the MSPC and wholesale regulation by the FERC. These regulatory agencies set the rates the Company is permitted to charge customers based on allowable costs. As a result, the Company applies FASB Statement No. 71, Accounting for the Effects of Certain Types of Regulation. Through the ratemaking process, the regulators may require the inclusion of costs or revenues in periods different than when they would be recognized by a non-regulated company. This treatment may result in the deferral of expenses and the recording of related regulatory assets based on anticipated future recovery through rates or the deferral of gains or creation of liabilities and the recording of related regulatory liabilities. The application of Statement No. 71 has a further effect on the Company's financial statements as a result of the estimates of allowable costs used in the ratemaking process. These estimates may differ from those actually incurred by the Company; therefore, the accounting estimates inherent in specific costs such as depreciation and pension and post-retirement benefits have less of a direct impact on the Company's results of operations than they would on a non-regulated company.

As reflected in Note 1 to the financial statements, significant regulatory assets and liabilities have been recorded. Management reviews the ultimate recoverability of these regulatory assets and liabilities based on applicable regulatory guidelines. However, adverse legislation and judicial or regulatory actions could materially impact the amounts of such regulatory assets and liabilities and could adversely impact the Company's financial statements.

#### *Contingent Obligations*

The Company is subject to a number of federal and state laws and regulations, as well as other factors and conditions that potentially subject it to environmental, litigation, income tax, and other risks. See "Future Earnings Potential" and Note 3 to the financial statements for more information regarding certain of these contingencies. The Company periodically evaluates its exposure to such risks and records reserves for those matters where a loss is considered probable and reasonably estimable in accordance with generally accepted accounting principles. The adequacy of reserves can be significantly affected by external events or conditions that can be unpredictable; thus, the ultimate outcome of such matters could materially affect the Company's financial statements. These events or conditions include the following:

- Changes in existing state or federal regulation by governmental authorities having jurisdiction over air quality, water quality, control of toxic substances, hazardous and solid wastes, and other environmental matters.
- Changes in existing income tax regulations or changes in Internal Revenue Service interpretations of existing regulations.
- Identification of additional sites that require environmental remediation or the filing of other complaints in which the Company may be asserted to be a potentially responsible party.
- Identification and evaluation of other potential lawsuits or complaints in which the Company may be named as a defendant.
- Resolution or progression of existing matters through the legislative process, through the court systems, or through the EPA.

#### *Plant Daniel Capacity*

As discussed in Note 3 to the financial statements under "Retail Regulatory Filing," the Company requested and

received an interim accounting order from the MPSC on December 16, 2003. The order directed the Company to expense and record in 2003 a regulatory liability of $60.3 million pending the conclusion of the MPSC's evaluation of the Company's request to include an additional 266 megawatts of Plant Daniel Units 3 and 4 generating capacity in jurisdictional cost of service. The MPSC is not expected to complete its evaluation and issue a final order until the second quarter of 2004. Management believes that the interim accounting order represents a probable liability and that recognition of the expense in 2003 is appropriate. However, if the MPSC ultimately refuses the Company's request, the regulatory liability will be required to be reversed.

***Plant Daniel Operating Lease***

As discussed in Note 7 to the financial statements under "Operating Leases," the Company entered into a lease for a 1,064 megawatt natural gas combined cycle facility at Plant Daniel (Facility) with Juniper Capital L.P. (Juniper). For both accounting and rate recovery purposes, this transaction is treated as an operating lease, which means that the related obligations under this agreement are not reflected on the Company's Balance Sheets. See "Financial Condition and Liquidity – Off-Balance Sheet Financing Arrangements" herein for further information. The operating lease determination was based on assumptions and estimates related to the following:

- Fair market value of the Facility at lease inception.
- The Company's incremental borrowing rate.
- Timing of debt payments and the related amortization of the initial acquisition cost during the initial lease term.
- Residual value of the Facility at the end of the lease term.
- Estimated economic life of the Facility.
- Juniper's status as a voting interest entity.

The determination of operating lease treatment is made at the inception of the lease agreement and is not subject to change unless subsequent changes are made to the agreement. However, in accordance with FASB Interpretation No. 46, Consolidation of Variable Interest Entities, the Company also is required to monitor Juniper's ongoing status as a voting interest entity. Changes in that status could require the Company to consolidate the Facility's assets and the related debt and to record interest and depreciation expense of approximately $34 million annually, rather than annual lease expense of approximately $26 million.

**New Accounting Standards**

***Asset Retirement Obligations***

Prior to January 2003, the Company accrued for the ultimate cost of retiring most long-lived assets over the life of the related asset through depreciation expense. FASB Statement No. 143, Accounting for Asset Retirement Obligations, established new accounting and reporting standards for legal obligations associated with the ultimate cost of retiring long-lived assets. The present value of the ultimate costs for an asset's future retirement is recorded in the period in which the liability is incurred. The costs are capitalized as part of the related long-lived asset and depreciated over the asset's useful life. Additionally, non-regulated companies are no longer permitted to continue accruing future retirement costs for long-lived assets that they do not have a legal obligation to retire. For more information regarding the impact of adopting this standard effective January 1, 2003, see Note 1 to the financial statements under "Asset Retirement Obligations and Other Costs of Removal."

***Derivative Instruments***

FASB Statement No. 149, Amendment of Statement 133 on Derivative Instruments and Hedging Activities, which further amends and clarifies the accounting and reporting for derivative instruments, became effective generally for financial instruments entered into or modified after June 30, 2003. Current interpretations of Statement No. 149 indicate that certain electricity forward transactions subject to unplanned netting -- including those typically referred to as "book outs" -- may only qualify as cash flow hedges if an entity can demonstrate that physical delivery or receipt of power occurred. The Company's forward electricity contracts continue to be exempt from fair value accounting requirements or to qualify as cash flow hedges, with the related gains and losses deferred in other comprehensive income. The implementation of Statement No. 149 did not have a material effect on the Company's financial statements.

In July 2003, the Emerging Issues Task Force (EITF) of FASB issued EITF No. 03-11, which became

effective on October 1, 2003. The standard addresses the reporting of realized gains and losses on derivative instruments and is being interpreted to require book outs to be recorded on a net basis in operating revenues. Adoption of this standard did not have a material impact on the Company's financial statements.

*Variable Interest Entities*

FASB Interpretation No. 46, Consolidation of Variable Interest Entities, which was originally issued in January 2003, requires the primary beneficiary of a variable interest entity to consolidate the related assets and liabilities. The Company's previous interest in a variable interest entity related to the lease arrangement for certain facilities at Plant Daniel was restructured prior to the original effective date of July 1, 2003, and is no longer subject to Interpretation No. 46. See Note 7 to the financial statements under "Operating Leases -- Plant Daniel Combined Cycle Generating Units" for additional information. In December 2003, the FASB revised Interpretation No. 46 and deferred the effective date until March 31, 2004, for interests held in variable interest entities other than special purpose entities.

Current analysis indicates that the trust established by the Company to issue preferred securities is a variable interest entity under Interpretation No. 46, and that the Company is not the primary beneficiary of this trust. If this conclusion is finalized, effective March 31, 2004, the trust assets and liabilities -- including the preferred securities issued by the trust -- will be deconsolidated. The investments in the trust and the loans from the trust to the Company will be reflected as equity method investments and as long-term notes payable to affiliates, respectively, on the Balance Sheets. Based on December 31, 2003 values, this treatment would result in an increase of approximately $1 million to both total assets and total liabilities. See Note 6 to the financial statements under "Mandatorily Redeemable Preferred Securities" for additional information.

*Liabilities and Equity*

In May 2003, the FASB issued Statement No. 150, Accounting for Certain Financial Instruments with Characteristics of Both Liabilities and Equity, which requires classification of certain financial instruments within its scope, including shares that are mandatorily redeemable, as liabilities. Statement No. 150 was effective for financial instruments entered into or modified after May 31, 2003, and otherwise on July 1, 2003. In accordance with Statement No. 150, mandatorily redeemable preferred securities are reflected on the Balance Sheets as liabilities. The adoption of Statement No. 150 had no impact on the Statements of Income and Cash Flows.

## FINANCIAL CONDITION AND LIQUIDITY

### Overview

During 2003, the Company operated at high levels of reliability while achieving industry-leading customer satisfaction levels and continuing to have retail prices below the national average.

The Company's ratio of common equity to total capitalization, excluding long-term debt due within one year, increased from 62.5 percent in 2002 to 66.4 percent at December 31, 2003.

The principal changes in the Company's financial condition during 2003 were the addition of approximately $69.3 million to utility plant and the reduction of long-term debt. See the Statements of Cash Flows for additional information.

### Sources of Capital

The Company plans to obtain the funds required for construction and other purposes, including compliance with environmental regulations, from sources similar to those used in the past. These sources were primarily the issuance of unsecured debt and preferred securities, in addition to pollution control revenue bonds issued for the Company's benefit by public authorities. However, the type and timing of any future financings--if needed--will depend on market conditions and regulatory approval.

The Company has no restrictions on the amounts of unsecured indebtedness it may incur. However, the Company is required to meet certain coverage requirements specified in its mortgage indenture and corporate charter to issue new first mortgage bonds and preferred stock. The Company's coverage ratios are high enough to permit, at present interest rate levels, any foreseeable security sales. The amount of securities

which the Company will be permitted to issue in the future will depend upon market conditions and other factors prevailing at that time.

The Company obtains financing separately without credit support from any affiliate. The Southern Company system does not maintain a centralized cash or money pool. Therefore, funds of the Company are not commingled with funds of any other company. In accordance with the Public Utility Holding Company Act, most loans between affiliated companies must be approved in advance by the Securities and Exchange Commission (SEC).

At December 31, 2003, the Company's current liabilities exceed current assets because of the scheduled maturity of $80 million of adjustable rate long-term notes payable in 2004.

To meet short-term cash needs and contingencies, the Company has various internal and external sources of liquidity. At the beginning of 2004, the Company had approximately $69 million of cash and cash equivalents and $100 million of unused credit arrangements with banks, as shown in the following table. The Company may also meet short-term cash needs through a Southern Company subsidiary organized to issue and sell commercial paper and extendible commercial notes at the request and for the benefit of the Company and the other Southern Company retail operating companies. Proceeds from such issuances for the benefit of the Company are loaned directly to the Company and are not commingled with proceeds from such issuances for the benefit of any other operating company. The obligations of each company under these arrangements are several; there is no cross affiliate credit support. At December 31, 2003, the Company had no outstanding commercial paper or extendible commercial notes.

At the beginning of 2004, the bank credit arrangements are as follows:

| | | Expires | |
|---|---|---|---|
| Total | Unused | 2004 | 2005 & Beyond |
| | | (in millions) | |
| $100 | $100 | $100 | - |

See the Statement of Cash Flows and Note 6 to the financial statements under "Bank Credit Arrangements" for additional information.

**Financing Activities**

During 2003, the Company continued a program to retire higher-cost debt and replace these securities with lower-cost capital. See the Statements of Cash Flows for further details. As a result, composite financing rates have decreased as follows:

| | 2003 | 2002 | 2001 |
|---|---|---|---|
| Composite interest rate on long-term debt | **3.26%** | 4.10% | 4.60% |
| Composite preferred stock dividend rate | **6.33%** | 6.33% | 6.33% |
| Composite distribution rate on preferred securities | **7.20%** | 7.20% | 7.75% |

In February 2003, the Company redeemed $33 million of 7.45% first mortgage bonds, originally due in 2023, and $850,000 of 5.8% pollution control revenue bonds, originally due in 2007.

In April 2003, the Company issued $90 million of Series E 5-5/8% Senior Notes due May 1, 2033. The proceeds from this sale were used to repay at maturity $35 million of the Company's Series B 6.05% Senior Notes due May 1, 2003, to redeem the $51.6 million outstanding principal amount of the Company's Series A 6.75% Senior Insured Quarterly Notes due June 30, 2038, and to repay a portion of the Company's outstanding short-term indebtedness.

**Off-Balance Sheet Financing Arrangements**

In June 2003 the Company entered into a restructured lease agreement for the Facility with Juniper, as discussed in Note 7 to the financial statements under "Operating Leases." Juniper has also entered into leases with other parties unrelated to the Company. The assets leased by the Company comprise less than 50 percent of Juniper's assets. In accordance with FASB Interpretation No. 46, the Company does not consolidate the leased assets and related liabilities, and the lease with Juniper is considered an operating lease under FASB Statement No. 13. Accordingly, the lease is not reflected on the Company's Balance Sheets.

The initial lease term ends in 2011, and the lease

includes a purchase and renewal option based on the cost of the Facility at the inception of the lease, which was $369 million. The Company is required to amortize approximately four percent of the initial acquisition cost over the initial lease term. Eighteen months prior to the end of the initial lease, the Company may elect to renew for 10 years. If the lease is renewed, the agreement calls for the Company to amortize an additional 17 percent of the initial completion cost over the renewal period. Upon termination of the lease, at the Company's option, it may either exercise its purchase option or the Facility can be sold to a third party.

The lease also provides for a residual value guarantee -- approximately 73 percent of the acquisition cost -- by the Company that is due upon termination of the lease in the event that the Company does not renew the lease or purchase the Facility and that the fair market value is less than the unamortized cost of the Facility.

**Credit Rating Risk**

The Company does not have any credit agreements that would require material changes in payment schedules or terminations as a result of a credit rating downgrade. There are certain fixed-price physical gas purchase contracts that could require collateral -- but not accelerated payment -- in the event of a credit rating change to below investment grade; however, at December 31, 2003, this exposure was immaterial.

**Market Price Risk**

Due to cost-based rate regulations, the Company has limited exposure to market volatility in interest rates, commodity fuel prices, and prices of electricity. To manage the volatility attributable to these exposures, the Company nets the exposures to take advantage of natural offsets and enters into various derivative transactions for the remaining exposures pursuant to the Company's policies in areas such as counterparty exposure and hedging practices. Company policy is that derivatives are to be used primarily for hedging purposes. Derivative positions are monitored using techniques that include market valuation and sensitivity analysis.

The weighted average interest rate on variable long-term debt outstanding at December 31, 2003 was 1.3 percent. Based on the Company's overall variable rate long-term debt exposure at December 31, 2003, a near-term 100 basis point change in interest rates would affect annualized interest expense by approximately $1.6 million. The Company is not aware of any facts or circumstances that would significantly affect such exposures in the near term.

To mitigate residual risks relative to movements in electricity prices, the Company enters into fixed price contracts for the purchase and sale of electricity through the wholesale electricity market. At December 31, 2003, exposure from these activities was not material to the Company's financial statements.

In addition, at the instruction of the MPSC, the Company has implemented a fuel-hedging program. At December 31, 2003, exposure from these activities was not material to the Company's financial statements.

Fair value of changes in energy contracts and year-end valuations are as follows:

| | Change in Fair Value | |
|---|---|---|
| | **2003** | 2002 |
| | (in thousands) | |
| Contracts beginning of year | **$ 12,864** | $ (3,830) |
| Contracts realized or settled | **(17,210)** | (1,562) |
| Current period changes | **6,816** | 18,256 |
| Contracts end of year | **$ 2,470** | $ 12,864 |

At December 31, 2003, all of these contracts are actively quoted and mature within one year. These contracts are related to fuel hedging programs under which unrealized gains and losses from mark to market adjustments are recorded as regulatory assets and liabilities. Realized gains and losses from these programs are included in fuel expense and are recovered through the Company's fuel cost recovery clause. Gains and losses on contracts that do not represent hedges are recognized in the Statements of Income as incurred. For the years ended December 31, 2003, 2002, and 2001, these amounts were not material.

At December 31, 2003, the fair value of derivative energy contracts was reflected in the financial statements as follows:

| | Amounts |
|---|---|
| | (in thousands) |
| Regulatory liabilities, net | **$2,468** |
| Net income | **2** |
| Total fair value | **$2,470** |

The Company is exposed to market price risk in the event of nonperformance by counterparties to the derivative energy contracts. The Company's policy is to enter into agreements with counterparties that have investment grade credit ratings by Moody's and Standard & Poor's or with counterparties who have posted collateral to cover potential credit exposure. Therefore, the Company does not anticipate market risk exposure from nonperformance by the counterparties. For further information see Notes 1 and 6 to the financial statements under "Financial Instruments."

**Capital Requirements and Contractual Obligations**

The construction program of the Company is currently estimated to be $80 million for 2004, $70 million for 2005, and $98 million for 2006. Environmental expenditures included in these amounts are $2.7 million, $5.3 million, and $12.6 million for 2004, 2005, and 2006, respectively. Actual construction costs may vary from this estimate because of changes in such factors as: business conditions; environmental regulations; FERC rules and transmission regulations; load projections; the cost and efficiency of construction labor, equipment, and materials; and the cost of capital. In addition, there can be no assurance that costs related to capital expenditures will be fully recovered.

Other funding requirements relate to obligations associated with scheduled maturities of long-term debt and preferred securities, as well as the related interest and distributions, preferred stock dividends, leases, and other purchase commitments are as follows. See Notes 1, 6, and, 7 to the financial statements for additional information.

| | 2004 | 2005-2006 | 2007-2008 | After 2008 | Total |
|---|---|---|---|---|---|
| | | | (in thousands) | | |
| Long-term debt and preferred securities [a] -- | | | | | |
| Principal | $ 80,000 | $ - | $ - | $ 237,695 | $ 317,695 |
| Interest and distributions | 11,750 | 21,468 | 21,468 | 265,263 | 319,949 |
| Preferred stock dividends [b] | 2,013 | 4,026 | 4,026 | - | 10,065 |
| Operating leases | 30,982 | 61,839 | 61,407 | 93,355 | 247,583 |
| Purchase commitments [c] | | | | | |
| Capital [d] | 80,166 | 167,525 | - | - | 247,691 |
| Coal | 173,794 | 151,117 | 20,721 | - | 345,632 |
| Natural Gas [e] | 140,328 | 150,270 | 50,743 | 53,845 | 395,186 |
| Long-term service agreements | 10,913 | 22,627 | 19,453 | 128,141 | 181,134 |
| Post retirement benefit trust [f] | 330 | 660 | - | - | 990 |
| Total | $ 530,276 | $ 579,532 | $ 177,818 | $ 778,299 | $2,065,925 |

(a) All amounts are reflected based on final maturity dates. The Company will continue to retire higher-cost securities and replace these obligations with lower-cost capital if market conditions permit. Variable rate interest obligations are estimated based on rates as of January 1, 2004, as reflected in the Statements of Capitalization.

(b) Preferred stock does not mature; therefore, amounts are provided for the next five years only.

(c) The Company generally does not enter into non-cancelable commitments for other operation and maintenance expenditures. Total other operation and maintenance expenses for the last three years were $300 million, $232 million, and $191 million, respectively.

(d) The Company forecasts capital expenditures over a three-year period. Amounts represent current estimates of total expenditures. At December 31, 2003, significant purchase commitments were outstanding in connection with the construction program.

(e) Natural gas purchase commitments are based on various indices at the time of delivery. Amounts reflected have been estimated based on the New York Mercantile future prices at December 31, 2003.

(f) The Company forecasts postretirement trust contributions over a three-year period. No contributions related to the Company's pension trust are currently expected during this period. See Note 2 to the financial statements for additional information related to the pension plans.

## Cautionary Statement Regarding Forward-Looking Information

The Company's 2003 Annual Report includes forward-looking statements in addition to historical information. Forward-looking information includes, among other things, statements concerning the estimated construction and other expenditures, projections for energy sales, and earnings growth. In some cases, forward-looking statements can be identified by terminology such as "may," "will," "could," "should," "expects," "plans," "anticipates," "believes," "estimates," "projects," "predicts," "potential," or "continue" or the negative of these terms or other comparable terminology. The Company cautions that there are various important factors that could cause actual results to differ materially from those indicated in the forward-looking statements; accordingly, there can be no assurance that such indicated results will be realized. These factors include:

- the impact of recent and future federal and state regulatory change, including legislative and regulatory initiatives regarding deregulation and restructuring of the electric utility industry and also changes in environmental, tax and other laws and regulations to which the Company is subject, as well as changes in application of existing laws and regulations;
- current and future litigation, regulatory investigations, proceedings or inquiries, including the pending EPA civil action against the Company;
- the effects, extent, and timing of the entry of additional competition in the markets in which the Company operates;
- the impact of fluctuations in commodity prices, interest rates, and customer demand;
- available sources and costs of fuels;
- ability to control costs;
- investment performance of the Company's employee benefit plans;
- advances in technology;
- state and federal rate regulations and pending and future rate cases and negotiations;
- effects of and changes in political, legal, and economic conditions and developments in the United States, including the current soft economy;
- internal restructuring or other restructuring options that may be pursued;
- potential business strategies, including acquisitions or dispositions of assets, which can not be assumed to be completed or beneficial to the Company;
- the ability of counterparties of the Company to make payments as and when due;
- the ability to obtain new short- and long-term contracts with neighboring utilities;
- the direct or indirect effects on the Company's business resulting from the terrorist incidents on September 11, 2001, or any similar incidents or responses to such incidents;
- financial market conditions and the results of financing efforts, including the Company's credit ratings;
- the ability of the Company to obtain additional generating capacity at competitive prices;
- weather and other natural phenomena;
- the direct or indirect effects on the Company's business resulting from the August 2003 power outage in the Northeast, or any similar incidents;
- the effect of accounting pronouncements issued periodically by standard-setting bodies; and
- other factors discussed elsewhere herein and in other reports (including the Form 10-K) filed from time to time by the Company with the SEC.

## 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

### General

Mississippi Power Company (the Company) is a wholly owned subsidiary of Southern Company, which is the parent company of five retail operating companies, Southern Power Company (Southern Power), Southern Company Services (SCS), Southern Communications Services (Southern LINC), Southern Company Gas (Southern Company GAS), Southern Company Holdings (Southern Holdings), Southern Nuclear Operating Company (Southern Nuclear), Southern Telecom, and other direct and indirect subsidiaries. The retail operating companies - Alabama Power Company, Georgia Power Company, Gulf Power Company, the Company, and Savannah Electric and Power Company - provide electric service in four Southeastern states. The Company operates as a vertically integrated utility providing electricity to retail customers within its traditional service area located within the state of Mississippi and to wholesale customers in the Southeast. Southern Power constructs, owns, and manages Southern Company's competitive generation assets and sells electricity at market-based rates in the wholesale market. Contracts among the retail operating companies and Southern Power - related to jointly owned generating facilities, interconnecting transmission lines, or the exchange of electric power - are regulated by the Federal Energy Regulatory Commission (FERC) and/or the Securities and Exchange Commission (SEC). SCS--the system service company -- provides, at cost, specialized services to Southern Company and subsidiary companies. Southern LINC provides digital wireless communications services to the retail operating companies and also markets these services to the public within the Southeast. Southern Telecom provides fiber cable services within the Southeast. Southern Company GAS is a competitive retail natural gas marketer serving customers in Georgia. Southern Holdings is an intermediate holding subsidiary for Southern Company's investments in synthetic fuels and leveraged leases and an energy services business. Southern Nuclear operates and provides services to Southern Company's nuclear power plants.

Southern Company is registered as a holding company under the Public Utility Holding Company Act of 1935 (PUHCA). Both Southern Company and its subsidiaries, including the Company, are subject to the regulatory provisions of PUHCA. In addition, the Company is subject to regulation by the FERC and the Mississippi Public Service Commission (MPSC). The Company follows accounting principles generally accepted in the United States and complies with the accounting policies and practices prescribed by its regulatory commissions. The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires the use of estimates, and the actual results may differ from those estimates.

Certain prior years' data presented in the financial statements have been reclassified to conform with the current year presentation.

### Affiliate Transactions

The Company has an agreement with SCS under which the following services are rendered to the Company at cost: general and design engineering, purchasing, accounting and statistical analysis, finance and treasury, tax, information resources, marketing, auditing, insurance and pension administration, human resources, systems and procedures, and other services with respect to business and operations and power pool operations. Costs for these services amounted to $46.2 million, $43.6 million, and $44.1 million during 2003, 2002 and 2001, respectively. Cost allocation methodologies used by SCS are approved by the SEC, and management believes they are reasonable.

The Company has an agreement with Alabama Power under which the Company owns a portion of Greene County Steam Plant. Alabama Power operates Greene County Steam Plant, and the Company reimburses Alabama Power for its proportionate share of all associated expenditures and costs. The Company reimbursed Alabama Power for the Company's proportionate share of related expenses which totaled $6.6 million, $6.4 million and, $5.5 million in 2003, 2002, and 2001, respectively. The Company also has an agreement with Gulf Power under which Gulf Power owns a portion of Plant Daniel. The Company operates Plant Daniel, and Gulf Power reimburses the Company for its proportionate share of all associated expenditures and costs. Gulf Power reimbursed the Company for Gulf Power's proportionate share of related expenses which

totaled $17.7 million, $16.6 million, and $13.1 million in 2003, 2002 and, 2001. See Note 4 for additional information.

The retail operating companies (including the Company), Southern Power, and Southern Company GAS may jointly enter into various types of wholesale energy, natural gas, and certain other contracts, either directly or through SCS as an agent. Each participating company may be jointly and severally liable for the obligations incurred under these agreements.

**Revenues and Fuel Costs**

Energy and other revenues are recognized as services are rendered. Capacity revenues from long-term contracts are recognized at the lesser of the levelized amount or the amount billable under the contract over the respective contract period. Unbilled revenues are accrued at the end of each fiscal period. The Company's retail and wholesale rates include provisions to adjust billings for fluctuations in fuel costs, fuel hedging, the energy component of purchased power costs, and certain other costs. Retail rates also include provisions to adjust billings for fluctuations in costs for ad valorem taxes and certain qualifying environmental costs. Revenues are adjusted for differences between actual allowable amounts and the amounts included in rates.

The Company has a diversified base of customers. For the year ended December 31, 2003, Dynegy, Inc. (Dynegy) accounted for approximately 14.8 percent of revenues as a result of non-recurring contract termination revenues. See Note 3 under "Contract Termination" for additional information. No other single customer or industry accounted for 10 percent or more of revenues in 2003. For the years ended December 31, 2002 and 2001, no single customer or industry accounted for 10 percent or more of revenues. For all periods presented, uncollectible accounts continued to average less than 1/2 percent of revenues.

**Income Taxes**

The Company uses the liability method of accounting for deferred income taxes and provides deferred income taxes for all significant income tax temporary differences. Investment tax credits utilized are deferred and amortized to income over the average lives of the related property.

**Regulatory Assets and Liabilities**

The Company is subject to the provisions of Financial Accounting Standards Board (FASB) Statement No. 71, Accounting for the Effects of Certain Types of Regulation. Regulatory assets represent probable future revenues associated with certain costs that are expected to be recovered from customers through the ratemaking process. Regulatory liabilities represent probable future reductions in revenues associated with amounts that are expected to be credited to customers through the ratemaking process.

Regulatory assets and (liabilities) reflected in the Balance Sheets at December 31 relate to:

| | 2003 | 2002 | Note |
|---|---|---|---|
| | (in thousands) | | |
| Deferred income tax charges | $ 12,125 | $ 12,617 | (a) |
| Vacation pay | 5,766 | 5,782 | (b) |
| Loss on reacquired debt | 10,201 | 7,776 | (c) |
| Fuel hedging asset | 2,397 | 14,558 | (d) |
| Asset retirement obligations | 689 | - | (a) |
| Other assets | - | 49 | (e) |
| Property damage reserve | (6,796) | (5,077) | (e) |
| Deferred income tax credits | (23,279) | (20,798) | (a) |
| Other cost of removal obligations | (80,588) | (69,873) | (a) |
| Plant Daniel capacity | (60,300) | - | (f) |
| Fuel-hedging liabilities | (3,870) | (14,990) | (d) |
| Other liabilities | (1,756) | (2,450) | (e) |
| Total | $(145,411) | $ (72,406) | |

Note: The recovery and amortization periods for these regulatory assets and (liabilities) are as follows:

(a) Asset retirement and removal liabilities are recorded, deferred income tax assets are recovered and deferred tax liabilities are amortized over the related property lives, which may range up to 50 years. Asset retirement and removal liabilities will be settled and trued up following completion of the related activities.

(b) Recorded as earned by employees and recovered as paid, generally within one year.

(c) Recovered over either the remaining life of the original issue or, if refinanced, over the life of the new issue, which may range up to 50 years.

(d) Fuel-hedging assets and liabilities are recorded over the life of the underlying hedged purchase contracts, which generally do not exceed two years. Upon final settlement, costs are recovered through the fuel cost recovery clause.

(e) Recorded and recovered or amortized as approved by the MPSC.

(f) See Note 3 under "Retail Regulatory Filing."

In the event that a portion of the Company's operations is no longer subject to the provisions of FASB Statement No. 71, the Company would be required to write off related regulatory assets and liabilities that are not specifically recoverable through regulated rates. In addition, the Company would be required to determine if any impairment to other assets, including plant, exists and write down the assets, if impaired, to their fair value. All regulatory assets and liabilities are to be reflected in rates.

**Depreciation and Amortization**

Depreciation of the original cost of plant in service is provided primarily by using composite straight-line rates, which approximated 3.4 percent in 2003, 3.4 percent in 2002, and 3.5 percent in 2001. When property subject to depreciation is retired or otherwise disposed of in the normal course of business, its original cost - together with the cost of removal, less salvage - is charged to accumulated depreciation. Minor items of property included in the original cost of the plant are retired when the related property unit is retired. Depreciation expense includes an amount for the expected cost of removal of facilities.

**Asset Retirement Obligations and Other Costs of Removal**

In accordance with regulatory requirements, prior to January 2003, the Company followed the industry practice of accruing for the ultimate cost of retiring most long-lived assets over the life of the related asset as part of the annual depreciation expense provision. In accordance with SEC requirements, such amounts are reflected on the balance sheet as regulatory liabilities. Effective January 1, 2003, the Company adopted FASB Statement No.143, Accounting for Asset Retirement Obligations. Statement No. 143 establishes new accounting and reporting standards for legal obligations associated with the ultimate costs of retiring long-lived assets. The present value of the ultimate costs for an asset's future retirement must be recorded in the period in which the liability is incurred. The costs must be capitalized as part of the related long-lived asset and depreciated over the asset's useful life. Additionally, Statement No. 143 does not permit the continued accrual of future retirement costs for long-lived assets that the Company does not have a legal obligation to retire. However, the Company has received guidance regarding accounting for the financial statement impacts of Statement No. 143 from the MPSC and will continue to recognize the accumulated removal costs for other obligations as a regulatory liability. Therefore, the Company has no cumulative effect to net income resulting from the adoption of Statement No. 143.

The Company has retirement obligations related to various landfill sites, ash ponds, and underground storage tanks. The Company has also identified retirement obligations related to certain transmission and

distribution facilities. However, liabilities for the removal of these transmission and distribution assets have not been recorded because no reasonable estimate can be made regarding the timing of the obligations. The Company will continue to recognize in the income statement allowed removal costs in accordance with its regulatory treatment. Any difference between costs recognized under Statement No. 143 and those reflected in rates are recognized as either a regulatory asset or liability and are reflected in the Balance Sheets.

Details of the asset retirement obligations included in the Balance Sheets are as follows:

| | 2003 |
|---|---|
| | (in millions) |
| Balance, beginning of year | $ - |
| Liabilities incurred | 2.4 |
| Liabilities settled | - |
| Accretion | 0.1 |
| Cash flow revisions | - |
| Balance, end of year | $2.5 |

If Statement No. 143 had been adopted on January 1, 2002, the pro-forma asset retirement obligations would have been $1 million.

**Property, Plant, and Equipment**

Property, plant, and equipment is stated at original cost less regulatory disallowances and impairments. Original cost includes: materials; labor; minor items of property; appropriate administrative and general costs; payroll-related costs such as taxes, pensions, and other benefits; and the cost of funds used during construction, if applicable. The cost of replacements of property - exclusive of minor items of property - is capitalized. The cost of maintenance, repairs, and replacement of minor items of property is charged to maintenance expense except for the cost of maintenance of coal cars and a portion of the railway track maintenance costs, which are charged to fuel stock and recovered through the Company's fuel clause.

**Impairment of Long-Lived Assets and Intangibles**

The Company evaluates long-lived assets for impairment when events or changes in circumstances indicate that the carrying value of such assets may not be recoverable. The determination of whether an impairment has occurred is based on either a specific regulatory disallowance or an estimate of undiscounted future cash flows attributable to the assets, as compared with the carrying value of the assets. If an impairment has occurred, the amount of the impairment recognized is determined either by the amount of regulatory disallowance or by estimating the fair value of the asset and recording a loss for the amount of the carrying value that is greater than the fair value. For assets identified as held for sale, the carrying value is compared to the estimated fair value less the cost to sell in order to determine if an impairment provision is required. Until the assets are disposed of, their estimated fair value is re-evaluated when circumstances or events change.

**Cash and Cash Equivalents**

For purposes of the financial statements, temporary cash investments are considered cash equivalents. Temporary cash investments are securities with original maturities of 90 days or less.

**Materials and Supplies**

Generally, materials and supplies include the cost of transmission, distribution, and generating plant materials. Materials are charged to inventory when purchased and then expensed or capitalized to plant, as appropriate, when used or installed.

**Stock Options**

Southern Company provides non-qualified stock options to a large segment of the Company's employees ranging from line management to executives. The Company accounts for its stock-based compensation plans in accordance with Accounting Principles Board Opinion No. 25. Accordingly, no compensation expense has been recognized because the exercise price of all options granted equaled the fair-market value on the date of grant. When options are exercised, the Company receives a capital contribution from Southern Company equivalent to the related income tax benefit.

**Financial Instruments**

The Company uses derivative financial instruments to limit exposure to fluctuations in interest rates, the prices of certain fuel purchases, and electricity purchases and sales. All derivative financial instruments are

recognized as either assets or liabilities and are measured at fair value. Substantially all of the Company's bulk energy purchases and sales contracts that meet the definition of a derivative are exempt from fair value accounting requirements and are accounted for under the accrual method. Other derivative contracts qualify as cash flow hedges of anticipated transactions. This results in the deferral of related gains and losses in other comprehensive income or regulatory assets or liabilities as appropriate until the hedged transactions occur. Any ineffectiveness is recognized currently in net income. Other derivative contracts are marked to market through current period income and are recorded on a net basis in the Statements of Income.

In June 2001, the MPSC approved the Company's request to implement an Energy Cost Management Clause (ECM). ECM, among other things, allows the Company to utilize financial instruments to hedge its fuel commitments. Changes in the fair value of these financial instruments are recorded as regulatory assets or liabilities. Amounts paid or received as a result of financial settlement of these instruments are classified as fuel expense and are included in the ECM factor applied to customer billings. The Company's jurisdictional wholesale customers have a similar ECM mechanism which was approved by the FERC in 2002.

The Company is exposed to losses related to financial instruments in the event of counterparties' nonperformance. The Company has established controls to determine and monitor the creditworthiness of counterparties in order to mitigate the Company's exposure to counterparty credit risk.

The Company's other financial instruments for which the carrying amount did not equal the fair value at December 31 were as follows:

| | Carrying Amount | Fair Value |
|---|---|---|
| | (in millions) | |
| Long-term debt: | | |
| **At December 31, 2003** | **$282** | **$286** |
| At December 31, 2002 | $313 | $313 |
| Preferred securities: | | |
| **At December 31, 2003** | **$35** | **$37** |
| At December 31, 2002 | $35 | $36 |

The fair values were based on either closing market price or closing price of comparable instruments.

**Provision for Property Damage**

The Company carries insurance for the cost of certain types of damage to generation plants and general property. However, the Company is self-insured for the cost of storm, fire, and other uninsured casualty damage to its property, including transmission and distribution facilities. As permitted by regulatory authorities, the Company accrues for the cost of such damage by charging expense and crediting an accumulated provision. The cost of repairing damage resulting from such events that individually exceed $50,000 is charged to the accumulated provision as ordered by the MPSC. The annual accruals may range from $1.5 million to $4.6 million with a maximum reserve totaling $23 million. The Company accrued $2.5 million in 2003, $1.8 million in 2002, and $2.5 million in 2001. As of December 31, 2003, the accumulated provision amounted to $6.8 million.

**Comprehensive Income**

The objective of comprehensive income is to report a measure of all changes in common stock equity of an enterprise that result from transactions and other economic events of the period other than transactions with owners. Comprehensive income consists of net income and changes in additional minimum pension liability, less income taxes and reclassifications for amounts included in net income.

## 2. RETIREMENT BENEFITS

The Company has a defined benefit, trusteed, pension plan that covers substantially all employees. The Company also provides certain non-qualified benefit plans for a selected group of management and highly compensated employees. The plan is funded in accordance with Employee Retirement Income Security Act (ERISA) requirements. No contributions to the plan are expected for the year ending December 31, 2004. The Company provides certain medical care and life insurance benefits for retired employees. Benefits under these non-qualified plans are funded on a cash basis. The Company funds trusts to the extent deductible under federal income tax regulations or the extent required by the MPSC and the FERC. For the year ended December

31, 2004, postretirement benefit contributions are expected to total approximately $330,000.

The measurement date for plan assets and obligations is September 30 for each year. In 2002, the Company adopted several pension and postretirement benefit plan changes that had the effect of increasing benefits to both current and future retirees.

**Pension Plans**

The accumulated benefit obligation for the pension plans was $188 million and $161 million for 2003 and 2002, respectively. Changes during the year in the projected benefit obligations, accumulated benefit obligations, and fair value of plan assets were as follows:

| | Projected Benefit Obligations | |
|---|---|---|
| | **2003** | 2002 |
| | (in thousands) | |
| Balance at beginning of year | **$186,443** | $172,167 |
| Service cost | **5,607** | 5,259 |
| Interest cost | **11,964** | 12,674 |
| Benefits paid | **(9,317)** | (8,386) |
| Actuarial loss and employee transfers | **12,992** | 528 |
| Amendments | **-** | 4,200 |
| Balance at end of year | **$207,689** | $186,442 |

| | Plan Assets | |
|---|---|---|
| | **2003** | 2002 |
| | (in thousands) | |
| Balance at beginning of year | **$188,839** | $211,546 |
| Actual return on plan assets | **30,024** | (14,089) |
| Benefits paid | **(8,512)** | (7,875) |
| Employee transfers | **(66)** | (743) |
| Balance at end of year | **$210,285** | $188,839 |

The plan assets are managed and invested in accordance with all applicable requirements, including ERISA and the Internal Revenue Service (IRS) revenue code. The Company's investment policy covers a diversified mix of assets, including equity and fixed income securities, real estate, and private equity, as described in the table below. Derivative instruments are used primarily as hedging tools but may also be used to gain efficient exposure to the various asset classes. The Company primarily minimizes the risk of large losses through diversification but also monitors and manages other aspects of risk.

| | | Plan Assets | |
|---|---|---|---|
| | Target | **2003** | 2002 |
| Domestic equity | 37% | **37%** | 35% |
| International equity | 20 | **20** | 18 |
| Global fixed income | 26 | **24** | 25 |
| Real estate | 10 | **11** | 12 |
| Private equity | 7 | **8** | 10 |
| Total | 100% | **100%** | 100% |

The accrued pension costs recognized in the Balance Sheets were as follows:

| | **2003** | 2002 |
|---|---|---|
| | (in thousands) | |
| Funded status | **$ 2,596** | $ 2,396 |
| Unrecognized transition obligation | **(1,635)** | (2,180) |
| Unrecognized prior service cost | **15,004** | 16,669 |
| Unrecognized net gain | **(5,507)** | (9,087) |
| Prepaid pension asset, net | **10,458** | 7,798 |
| Portion included in benefit obligations | **7,709** | 7,195 |
| Total prepaid assets recognized in the Balance Sheets | **$18,167** | $14,993 |

In 2003 and 2002, amounts recognized in the Balance Sheets for accumulated other comprehensive income were $2.3 million and $2.0 million, respectively. Intangible assets recognized were $1.4 million in 2003 and $1.7 million in 2002.

Components of the pension plans' net periodic cost were as follows:

| | **2003** | 2002 | 2001 |
|---|---|---|---|
| | | (in thousands) | |
| Service cost | **$ 5,607** | $ 5,259 | $ 4,797 |
| Interest cost | **11,965** | 12,674 | 11,818 |
| Expected return on plan assets | **(18,329)** | (18,380) | (17,328) |
| Recognized net gain | **(1,847)** | (2,654) | (3,012) |
| Net amortization | **862** | 650 | 511 |
| Net pension income | **$ (1,742)** | $ (2,451) | $ (3,214) |

## Postretirement Benefits

Changes during the year in the accumulated benefit obligations and in the fair value of plan assets were as follows:

| | Accumulated Benefit Obligations | |
|---|---|---|
| | **2003** | 2002 |
| | (in thousands) | |
| Balance at beginning of year | **$61,168** | $51,523 |
| Service cost | **1,149** | 959 |
| Interest cost | **3,897** | 3,781 |
| Benefits paid | **(2,813)** | (3,320) |
| Actuarial loss and employee transfers | **8,785** | 8,225 |
| Balance at end of year | **$72,186** | $61,168 |

| | Plan Assets | |
|---|---|---|
| | **2003** | 2002 |
| | (in thousands) | |
| Balance at beginning of year | **$16,078** | $16,269 |
| Actual return on plan assets | **1,979** | (516) |
| Employer contributions | **2,941** | 3,645 |
| Benefits paid | **(2,813)** | (3,320) |
| Balance at end of year | **$18,185** | $16,078 |

Postretirement benefits plan assets are managed and invested in accordance with all applicable requirements, including ERISA and the IRS revenue code. The Company's investment policy covers a diversified mix of assets, including equity and fixed income securities, real estate, and private equity, as described in the table below. Derivative instruments are used primarily as hedging tools but may also be used to gain efficient exposure to the various asset classes. The Company primarily minimizes the risk of large losses through diversification but also monitors and manages other aspects of risk.

| | | Plan Assets | |
|---|---|---|---|
| | Target | **2003** | 2002 |
| Domestic equity | 27% | **27%** | 24% |
| International equity | 14 | **14** | 13 |
| Global fixed income | 47 | **45** | 47 |
| Real estate | 7 | **8** | 9 |
| Private equity | 5 | **6** | 7 |
| Total | 100% | **100%** | 100% |

The accrued postretirement costs recognized in the Balance Sheets were as follows:

| | Accrued Costs | |
|---|---|---|
| | **2003** | 2002 |
| | (in thousands) | |
| Funded status | **$(54,001)** | $(45,090) |
| Unrecognized transition obligation | **3,235** | 3,582 |
| Unrecognized prior service cost | **1,610** | 1,715 |
| Unrecognized net gain | **18,503** | 10,216 |
| Fourth quarter contributions | **926** | 1,029 |
| Accrued liability recognized in the Balance Sheets | **$(29,727)** | $(28,548) |

Components of the postretirement plans' net periodic cost were as follows:

| | Net Periodic Costs | | |
|---|---|---|---|
| | **2003** | 2002 | 2001 |
| | (in thousands) | | |
| Service cost | **$ 1,149** | $ 959 | $ 922 |
| Interest cost | **3,898** | 3,781 | 3,411 |
| Expected return on plan assets | **(1,598)** | (1,514) | (1,409) |
| Transition obligation | **346** | 346 | 346 |
| Prior service cost | **106** | 106 | 80 |
| Recognized net loss | **116** | - | (38) |
| Net postretirement cost | **$ 4,017** | $ 3,678 | $ 3,312 |

The weighted average rates assumed in the actuarial calculations for both the pension plan and postretirement benefits plans were as follows:

| | **2003** | 2002 | 2001 |
|---|---|---|---|
| Discount | **6.00%** | 6.50% | 7.50% |
| Annual salary increase | **3.75** | 4.00 | 5.00 |
| Long-term return on plan assets | **8.50** | 8.50 | 8.50 |

The Company determined the long-term rate of return on based historical asset class returns and current market conditions, taking into account the diversification benefits of investing in multiple asset classes.

An additional assumption used in measuring the accumulated postretirement benefit obligation was a weighted average medical care cost trend rate of 8.25 percent for 2003, decreasing gradually to 5.25 percent through the year 2010 and remaining at that level thereafter. An annual increase or decrease in the assumed

medical care cost trend rate of 1 percent would affect the accumulated benefit obligation and the service and interest cost components at December 31, 2003 as follows:

| | 1 Percent Increase | 1 Percent Decrease |
|---|---|---|
| | (in thousands) | |
| Benefit obligation | **$5,499** | **$4,863** |
| Service and interest costs | **329** | **290** |

**Employee Savings Plan**

The Company also sponsors a 401(k) defined contribution plan covering substantially all employees. The Company provides a 75 percent matching contribution up to 6 percent of an employee's base salary. Total matching contributions made to the plan for the years 2003, 2002, and 2001 were $2.7 million, $2.6 million, and $2.5 million, respectively.

## 3. CONTINGENCIES AND REGULATORY MATTERS

**General Litigation Matters**

The Company is subject to certain claims and legal actions arising in the ordinary course of business. In addition, the Company's business activities are subject to extensive governmental regulation related to public health and the environment. Litigation over environmental issues and claims of various types, including property damage, personal injury, and citizen enforcement of environmental requirements, has increased generally throughout the United States. In particular, personal injury claims for damages caused by alleged exposure to hazardous materials have become more frequent. The ultimate outcome of such litigation against the Company cannot be predicted at this time; however, management does not anticipate that the liabilities, if any, arising from such current proceedings would have a material adverse effect on the Company's financial statements.

**New Source Review Actions**

In November 1999, the Environmental Protection Agency (EPA) brought a civil action in the U.S. District Court for the Northern District of Georgia against Alabama Power, Georgia Power, and SCS. The complaint alleged violations of the New Source Review (NSR) provisions of the Clean Air Act with respect to five coal-fired generating facilities in Alabama and Georgia and violations of related state laws. The civil action requested penalties and injunctive relief, including an order requiring the installation of the best available control technology at the affected units. The EPA concurrently issued to the retail operating companies notices of violation relating to 10 generating facilities, which include the five facilities mentioned previously and the Company's Plants Watson and Greene County. In early 2000, the EPA filed a motion to amend its complaint to add the violations alleged in its notices of violation and to add Gulf Power, the Company, and Savannah Electric as defendants.

In August 2000, the U.S. District Court in Georgia granted Alabama Power's motion to dismiss for lack of jurisdiction in Georgia and granted SCS' motion to dismiss on the grounds that it neither owned nor operated the generating units involved in the proceedings. In March 2001, the court granted the EPA's motion to add Savannah Electric as a defendant, but it denied the motion to add Gulf Power and the Company based on lack of jurisdiction in Georgia over those companies. As directed by the court, the EPA refiled its amended complaint limiting claims to those brought against Georgia Power and Savannah Electric. In addition, the EPA refiled its claims against Alabama Power in the U.S. District Court for the Northern District of Alabama. These complaints allege violations with respect to eight coal-fired generating facilities in Alabama and Georgia, and they request the same kinds of relief as was requested in the original complaint, i.e. penalties and injunctive relief, including installation of the best available control technology. The EPA has not refiled against Gulf Power, the Company, or SCS.

The actions against Alabama Power, Georgia Power, and Savannah Electric were stayed in the spring of 2001 during the appeal of a very similar NSR enforcement action against the Tennessee Valley Authority (TVA) before the U.S. Court of Appeals for the Eleventh Circuit. The TVA appeal involves many of the same legal issues raised by the actions against Alabama Power, Georgia Power, and Savannah Electric. Because the final resolution of the TVA appeal could have a significant impact on Alabama Power and Georgia Power, both companies have been involved in that appeal. On June 24, 2003, the court of appeals issued its

ruling in the TVA case. It found unconstitutional the statutory scheme set forth in the Clean Air Act that allowed the EPA to impose penalties for failing to comply with an administrative compliance order, like the one issued to TVA, without the EPA having to prove the underlying violation. Thus, the court of appeals held that the compliance order was of no legal consequence, and TVA was free to ignore it. The court did not, however, rule directly on the substantive legal issues about the proper interpretation and application of certain NSR provisions that had been raised in the TVA appeal. On September 16, 2003, the court of appeals denied the EPA's request for a rehearing of the decision. On February 13, 2004, the EPA petitioned the U.S. Supreme Court to review the decision of the court of appeals. The EPA also filed a motion to lift the stay in the action against Alabama Power. At this time, no party to the Georgia Power and Savannah Electric action, which was administratively closed two years ago, has asked the court to reopen that case.

Since the inception of the NSR proceedings against Georgia Power, Alabama Power, and Savannah Electric, the EPA has also been proceeding with similar NSR enforcement actions against other utilities, involving many of the same legal issues. In each case, the EPA alleged that the utilities failed to comply with the NSR permitting requirements when performing maintenance and construction activities at coal-burning plants, which activities the utilities considered to be routine or otherwise not subject to NSR. In 2003, district courts addressing these cases issued opinions that reached conflicting conclusions.

In October 2003, the EPA issued final revisions to its NSR regulations under the Clean Air Act clarifying the scope of the existing Routine Maintenance, Repair, and Replacement exclusion. On December 24, 2003, the U.S. Court of Appeals for the District of Columbia Circuit stayed the effectiveness of these revisions pending resolution of related litigation. In January 2004, the Bush Administration announced that it would continue to enforce the existing rules.

The Company believes that it complied with applicable laws and the EPA's regulations and interpretations in effect at the time the work in question took place. The Clean Air Act authorizes civil penalties of up to $27,500 per day, per violation at each generating unit. An adverse outcome in any one of these cases could require substantial capital expenditures that cannot be determined at this time and could possibly require payment of substantial penalties. This could affect future results of operations, cash flows, and possibly financial condition if such costs are not recovered through regulated rates.

**Right of Way Litigation**

Southern Company and certain of its subsidiaries, including the Company, Georgia Power, Gulf Power, and Southern Telecom (collectively, defendants), have been named as defendants in numerous lawsuits brought by landowners since 2001 regarding the installation and use of fiber optic cable over defendants' rights of way located on the landowners' property. The plaintiffs' lawsuits claim that defendants may not use or sublease to third parties some or all of the fiber optic communications lines on the rights of way that cross the plaintiffs' properties, and that such actions by defendants exceed the easements or other property rights held by defendants. The plaintiffs assert claims for, among other things, trespass and unjust enrichment. The plaintiffs seek compensatory and punitive damages and injunctive relief. The Company believes that the Company has complied with the applicable laws and that the plaintiffs' claims are without merit. An adverse outcome in these matters could result in substantial judgments; however, the final outcome of these matters cannot now be determined.

In addition, in late 2001, certain subsidiaries of Southern Company, including Alabama Power, Georgia Power, Gulf Power, the Company, Savannah Electric, and Southern Telecom (collectively, defendants), were named as defendants in a lawsuit brought by a telecommunications company that uses certain of the defendants' rights of way. This lawsuit alleges, among other things, that the defendants are contractually obligated to indemnify, defend, and hold harmless the telecommunications company from any liability that may be assessed against the telecommunications company in pending and future right of way litigation. The Company believes that the plaintiff's claims are without merit. An adverse outcome in this matter, combined with an adverse outcome against the telecommunications company in one or more of the right of way lawsuits, could result in substantial judgments; however, the final outcome of these matters cannot now be determined.

### Contract Termination

On May 21, 2003, the Company entered into an agreement with Dynegy to resolve all outstanding matters related to a capacity sales contract with a subsidiary of Dynegy. Under the terms of the agreement, Dynegy made a cash payment of $75 million to the Company. The contract between the Company and Dynegy was terminated effective October 31, 2003. The termination payment from Dynegy resulted in the Company recognizing a gain of $38 million after tax.

### Retail Regulatory Filing

The Company's retail base rates are set under Performance Evaluation Plan (PEP), a rate plan originally approved in 1986 and modified from time to time since its inception. See "2001 Retail Rate Case" for further information on the 2002 modification. PEP was designed with the objective that PEP would reduce the impact of rate changes on the customer and provide incentives for the Company to keep customer prices low and customer satisfaction and reliability high. PEP is a mechanism for rate adjustments based on three indicators: the Company's ability to maintain low rates for customers, and the Company's performance as measured by two additional indicators that emphasize customer satisfaction and providing reliable service to the customer. PEP provides for semiannual evaluations of the Company's performance-based return on investment. Any change in rates is limited to two percent of retail revenues per evaluation period. PEP will remain in effect until the MPSC modifies, suspends, or terminates the plan.

On December 5, 2003, the Company filed a request with the MPSC to include 266 megawatts of Plant Daniel Units 3 and 4 generating capacity not currently included in jurisdictional cost of service. See "2001 Retail Rate Case" for further information on the current cost allocation for this capacity. In addition, the Company proposed to modify certain provisions of PEP. The proposed changes include (1) the use of a forward-looking, rather than a historical, test year, (2) adjustments to the performance indicator mechanism, and (3) an annual, rather than semi-annual, evaluation period.

As part of the Company's proposal to include the additional Plant Daniel capacity in retail rates, the MPSC issued an interim accounting order in December 2003 directing the Company to expense and record in 2003 a regulatory liability in the amount of approximately $60 million while the MPSC fully considers the entire request. However, if the MPSC ultimately denies the Company's request, the regulatory liability will be required to be reversed.

The Company expects the MPSC to render a final order in the second quarter of 2004 on the inclusion of the additional Plant Daniel capacity in rates, the amortization period for the regulatory liability, and the requested changes to PEP.

### Environmental Compliance Overview Plan

The MPSC approved the Company's Environmental Compliance Overview Plan (ECO Plan) in 1992. The ECO Plan establishes procedures to facilitate the MPSC's overview of the Company's environmental strategy and provides for recovery of costs (including costs of capital) associated with environmental projects approved by the MPSC. Under the ECO Plan, any increase in the annual revenue requirement is limited to two percent of retail revenues. However, the ECO Plan also provides for carryover of any amount over the two percent limit into the next year's revenue requirement. The Company conducts studies, when possible, to determine the extent of any required environmental remediation. Should such remediation be determined to be probable, reasonable estimates of costs to clean up such sites are developed and recognized in the financial statements. The Company recovers such costs under the ECO Plan as they are incurred, as provided for in the Company's 1995 ECO Plan Order. The Company filed its 2004 ECO Plan in January 2004, which, if approved as filed, will result in a slight decrease in customer prices.

### 2001 Retail Rate Case

In December 2001, the MPSC approved an annual retail rate increase of approximately $39 million, which took effect in January 2002. In October 2000, the MPSC approved a cost allocation that allocated a pro-rata share of the Plant Daniel Units 3 and 4 leased capacity, along with the Company's existing generation, to the retail jurisdiction. The MPSC's December 2001 order approved these cost allocations.

Additionally, the MPSC ordered the Company to reactivate semi-annual evaluations under PEP, beginning with the 12-month period ending December 31, 2002. In May 2002, the MPSC issued an order adopting new return on equity models to be used in the PEP process that are very similar to those that established the $39 million rate increase.

**Potentially Responsible Party Status**

In 2003, the Texas Commission on Environmental Quality (TCEQ) designated the Company as a potentially responsible party in connection with the cleanup of a site in Texas owned by a company that performed rebuilds and scrapping on electric transformers for the Company and many other utilities. The site owner is now in bankruptcy and the State of Texas has entered into an agreement with the Company and several other utilities to perform off-site removal of polychlorinated biphenyl (PCB) contaminated soil. Amounts expensed during 2003 related to this work were not material. Hundreds of entities have received notices from the TCEQ requesting their participation in the anticipated site remediation. The final outcome of this matter to the Company will depend upon further environmental assessment and the ultimate number of potentially responsible parties and cannot now be determined.

**FERC Matters**

*Market-Based Rate Authority*

The Company has obtained FERC approval to sell power to nonaffiliates at market-based prices under specific contracts. Through SCS, as agent, the Company also has FERC authority to make short-term opportunity sales at market rates. Specific FERC approval must be obtained with respect to a market-based contract with an affiliate. In November 2001, the FERC modified the test it uses to consider utilities' applications to charge market-based rates and adopted a new test called the Supply Margin Assessment (SMA). The FERC applied the SMA to several utilities, including Southern Company's retail operating companies, and found them and others to be "pivotal suppliers" in their service areas and ordered the implementation of several mitigation measures. SCS, on behalf of the Company and the other retail operating companies sought rehearing of the FERC order, and the FERC delayed the implementation of certain mitigation measures. SCS, on behalf of the Company and the other retail operating companies, submitted comments to the FERC in 2002 regarding these issues. In December 2003, the FERC issued a staff paper discussing alternatives and held a technical conference in January 2004. The Company anticipates that the FERC will address the requests for rehearing in the near future. The final outcome of this matter will depend on the form in which the SMA test and mitigation measures rules may be ultimately adopted and cannot be determined at this time.

*Wholesale Customer Settlement Agreement*

In February 2002, the Company reached an agreement with certain of its wholesale customers to increase its wholesale tariff rates effective June 1, 2002. The FERC accepted the settlement agreement and placed the new tariff rates in effect without modification. The settlement agreement results in an annual increase of approximately $10.5 million, the adoption of ECM and the cost allocation of Plant Daniel Units 3 and 4, similar to the plans approved by the Company's retail jurisdiction.

*Transmission Facilities Agreement*

In January 2002, the FERC began conducting an investigation to determine whether the cost of debt and the cost of preferred stock reflected in the amount charged under the Transmission Facilities Agreement between Entergy Corp. and the Company, when considered in light of other aspects of the contract, yields an overall just and reasonable rate. In July 2003, the FERC approved a settlement between the Company and the FERC staff. The impact of the settlement provides for no refund of prior revenues collected and a minimal change in revenues effective in 2004.

**4. JOINT OWNERSHIP AGREEMENTS**

The Company and Alabama Power own as tenants in common Units 1 and 2 at Greene County Steam Plant, which is located in Alabama and operated by Alabama Power. Additionally, the Company and Gulf Power own as tenants in common Units 1 and 2 at Plant Daniel, which is located in Mississippi and operated by the Company.

At December 31, 2003, the Company's percentage ownership and investment in these jointly owned facilities were as follows:

| Generating Plant | Total Capacity | Percent Ownership | Company's Gross Investment | Accumulated Depreciation |
|---|---|---|---|---|
| | (Megawatts) | | (in thousands) | |
| Greene County Units 1 and 2 | 500 | 40% | $ 68,504 | $ 36,733 |
| Daniel Units 1 and 2 | 1,000 | 50% | $240,032 | $116,815 |

The Company's proportionate share of plant operating expenses is included in the Statements of Income.

## 5. INCOME TAXES

Southern Company and its subsidiaries file a consolidated federal income tax return. Under a joint consolidated income tax agreement, each subsidiary's current and deferred tax expense is computed on a stand-alone basis. In accordance with IRS regulations, each company is jointly and severally liable for the tax liability.

At December 31, 2003, the tax-related regulatory assets and liabilities were $12 million and $23 million, respectively. These assets are attributable to tax benefits flowed through to customers in prior years and to taxes applicable to capitalized interest. These liabilities are attributable to deferred taxes previously recognized at rates higher than the current enacted tax law and to unamortized investment tax credits.

Details of the federal and state income tax provisions are shown below:

| | **2003** | 2002 | 2001 |
|---|---|---|---|
| | | (in thousands) | |
| Total provision for income taxes: | | | |
| Federal -- | | | |
| Current | **$46,116** | $42,603 | $43,596 |
| Deferred | **(6,166)** | (3,122) | (8,661) |
| | **39,950** | 39,481 | 34,935 |
| State -- | | | |
| Current | **7,761** | 6,680 | 6,698 |
| Deferred | **(2,396)** | (282) | (1,057) |
| | **5,365** | 6,398 | 5,641 |
| Total | **$45,315** | $45,879 | $40,576 |

The tax effects of temporary differences between the carrying amounts of assets and liabilities in the financial statements and their respective tax bases, which give rise to deferred tax assets and liabilities, are as follows:

| | **2003** | 2002 |
|---|---|---|
| | | (in thousands) |
| Deferred tax liabilities: | | |
| Accelerated depreciation | **$168,373** | $157,087 |
| Basis differences | **7,487** | 7,791 |
| Other | **46,689** | 38,005 |
| Total | **222,549** | 202,883 |
| Deferred tax assets: | | |
| Other property basis differences | **15,067** | 14,501 |
| Pension and other benefits | **10,722** | 9,546 |
| Property insurance | **2,599** | 1,942 |
| Unbilled fuel | **5,593** | 6,048 |
| Other | **68,257** | 42,891 |
| Total | **102,238** | 74,928 |
| Total deferred tax liabilities, net | **120,311** | 127,955 |
| Portion included in prepaid expenses (accrued income taxes), net | **21,777** | 18,675 |
| Accumulated deferred income taxes in the Balance Sheets | **$142,088** | $146,630 |

Deferred investment tax credits are amortized over the lives of the related property with such amortization normally applied as a credit to reduce depreciation in the Statements of Income. Credits amortized in this manner amounted to $1.2 million in each of 2003, 2002, and 2001. At December 31, 2003, all investment tax credits

available to reduce federal income taxes payable had been utilized.

The provision for income taxes differs from the amount of income taxes determined by applying the applicable U.S. federal statutory rate to earnings before income taxes and preferred dividends, as a result of the following:

| | **2003** | 2002 | 2001 |
|---|---|---|---|
| Federal statutory rate | **35.0%** | 35.0% | 35.0% |
| State income tax, net of federal deduction | **2.9** | 3.4 | 3.4 |
| Non-deductible book Depreciation | **.4** | 0.5 | 0.5 |
| Other | **(0.8)** | (1.0) | (0.8) |
| Effective income tax rate | **37.5%** | 37.9% | 38.1% |

## 6. CAPITALIZATION

### Mandatorily Redeemable Preferred Securities

The Company has formed a certain wholly owned trust subsidiary for the purpose of issuing preferred securities. The proceeds of the related equity investment and preferred security sale were loaned back to the Company through the issuance of junior subordinated notes totaling $36 million, which constitute substantially all assets of the trust. The Company considers that the mechanisms and obligations relating to the preferred securities issued for its benefit, taken together, constitute a full and unconditional guarantee by it of the trust's payment obligations with respect to these securities. At December 31, 2003, preferred securities of $35 million were outstanding and recognized as liabilities in the Balance Sheets.

### Pollution Control Bonds

The Company has incurred obligations in connection with the sale by public authorities of tax-exempt pollution control revenue bonds. The amount of tax-exempt pollution control revenue bonds outstanding at December 31, 2003 was $82.7 million.

### Long-Term Debt Due Within One Year

A summary of the improvement fund requirements and scheduled maturities and redemptions of long-term debt due within one year at December 31 is as follows:

| | **2003** | 2002 |
|---|---|---|
| | (in thousands) | |
| Bond improvement fund requirement | **$ 300** | $ 634 |
| Less: Portion to be satisfied by certifying property additions | **300** | 634 |
| Cash sinking fund requirement | **-** | - |
| Current portion of other long-term debt | **80,000** | 68,350 |
| Pollution control bond cash sinking fund requirements | **-** | 850 |
| Total | **$80,000** | $69,200 |

The first mortgage bond improvement fund requirement is one percent of each outstanding series authenticated under the indenture of the Company prior to January 1 of each year, other than first mortgage bonds issued as collateral security for certain pollution control obligations. The requirement must be satisfied by June 1 of each year by depositing cash or reacquiring bonds, or by pledging additional property equal to 1 and 2/3 times such requirement.

In February 2003, the Company redeemed $33 million of 7.45% first mortgage bonds, originally due in 2023, and $850,000 of 5.8% pollution control revenue bonds, originally due in 2007.

### Assets Subject to Lien

The Company's mortgage indenture dated as of September 1, 1941, as amended and supplemented, which secures the first mortgage bonds issued by the Company, constitutes a direct first lien on substantially all of the Company's fixed property and franchises.

### Bank Credit Arrangements

At the beginning of 2004, the Company had total committed credit agreements with banks for approximately $100 million, all of which was unused. These credit agreements expire in 2004. Some of these agreements allow short-term borrowings to be converted into term loans, payable in eight equal quarterly installments, with the first installment due at the end of the first calendar quarter after the applicable termination date or at an earlier date at the Company's option.

In connection with these credit arrangements, the Company agrees to pay commitment fees based on the unused portions of the commitments or to maintain compensating balances with the banks. Commitment fees are less than 1/8 of 1 percent for the Company. Compensating balances are not legally restricted from withdrawal.

This $100 million in unused credit arrangements provides required liquidity support to the Company's borrowings through a commercial paper program. The Company has $60 million available to support its commercial paper program. At December 31, 2003, the Company had no outstanding commercial paper or extendible commercial notes. During 2003, the peak amount outstanding for commercial paper was $33 million and the average amount outstanding was $4.2 million. The average annual interest rate on commercial paper was 1.3 percent in 2003. The credit arrangements also provide support to the Company's variable daily rate pollution control bonds.

### Financial Instruments

The Company enters into energy-related derivatives to hedge exposures to electricity, natural gas, and other fuel price changes. However, due to cost-based rate regulations, the Company has limited exposure to market volatility in commodity fuel prices and prices of electricity. The Company has implemented fuel-hedging programs at the instruction of the MPSC. The Company enters into hedges of forward electricity sales.

At December 31, 2003, the fair value of derivative energy contracts was reflected in the financial statements as follows:

| | Amounts |
|---|---|
| | (in thousands) |
| Regulatory liabilities, net | $ 2,468 |
| Net income | 2 |
| Total fair value | $ 2,470 |

The fair value gains or losses for cash flow hedges that are recoverable through the regulatory fuel clauses are recorded as regulatory assets and liabilities and are recognized in earnings at the same time the hedged items affect earnings.

### Dividend Restrictions

The Company's first mortgage bond indenture and the corporate charter contain various common stock dividend restrictions. At December 31, 2003, approximately $118 million of retained earnings was restricted against the payment of cash dividends on common stock under the most restrictive terms of the mortgage indenture or corporate charter.

In accordance with the PUHCA, the Company is also restricted from paying common dividends from paid-in capital without SEC approval.

## 7. COMMITMENTS

### Construction Program

The Company is engaged in continuous construction programs, currently estimated to total $80 million in 2004, $70 million in 2005, and $98 million in 2006. The construction program is subject to periodic review and revision, and actual construction costs may vary from the above estimates because of numerous factors. These factors include changes in business conditions; revised load growth estimates; changes in environmental regulations; changes in FERC rules and transmission regulations; increasing costs of labor, equipment and materials; and cost of capital. At December 31, 2003, significant purchase commitments were outstanding in connection with the construction program. The Company has no generating plants under construction. Capital improvements to generating, transmission and distribution facilities -- including those to meet environmental standards -- will continue.

### Long-Term Service Agreements

The Company has entered into a Long-Term Service Agreement (LTSA) with General Electric (GE) for the purpose of securing maintenance support for the lease combined cycle units at Plant Daniel. In summary, the LTSA stipulates that GE will perform all planned inspections on the covered equipment, which includes the cost of all labor and materials. GE is also obligated to cover the costs of unplanned maintenance on the covered equipment subject to a limit specified in the contract.

In general, the LTSA is in effect through two major inspection cycles of the units. Scheduled payments to GE are made monthly based on estimated operating hours of the units and are recognized as expense based on actual hours of operation. The Company has recognized $6 and $11 million for 2003 and 2002, respectively, which is included in maintenance expense on the Statements of Income. Remaining payments to GE under this agreement are currently estimated to total $174 million over the next 17 years. However, the LTSA contains various cancellation provisions at the option of the Company.

The Company also has entered into a LTSA with ABB Power Generation Inc. (ABB) for the purpose of securing maintenance support for its Chevron Unit 5 combustion turbine plant. In summary, the LTSA stipulates that ABB will perform all planned maintenance on the covered equipment, which includes the cost of all labor and materials. ABB is also obligated to cover the costs of unplanned maintenance on the covered equipment subject to a limit specified in the contract.

In general, this LTSA is in effect through two major inspection cycles. Scheduled payments to ABB are made at various intervals based on actual operating hours of the unit. Payments to ABB under this agreement are currently estimated to total $6.8 million over the remaining life of the agreement, which is approximately 4 years. However, the LTSA contains various cancellation provisions at the option of the Company. Payments made to ABB prior to the performance of any planned maintenance are recorded as a prepayment in the Balance Sheets. Inspection costs are capitalized or charged to expense based on the nature of the work performed.

**Fuel and Purchased Power Commitments**

To supply a portion of the fuel requirements of the generating plants, the Company has entered into various long-term commitments for the procurement of fuel. In most cases, these contracts contain provisions for price escalations, minimum purchase levels, and other financial commitments. Natural gas purchase commitments contain given volumes with prices based on various indices at the time of delivery. Amounts included in the chart below represent estimates based on New York Mercantile future prices at December 31, 2003. Total estimated minimum long-term obligations at December 31, 2003 were as follows:

| Year | Natural Gas | Coal |
|---|---|---|
| | (in millions) | |
| 2004 | $140 | $174 |
| 2005 | 83 | 86 |
| 2006 | 67 | 65 |
| 2007 | 45 | 21 |
| 2008 | 6 | - |
| 2009 and there after | 54 | - |
| Total commitments | $395 | $346 |

Additional commitments for fuel will be required to supply the Company's future needs.

SCS may enter into various types of wholesale energy and natural gas contracts acting as an agent for the Company and all of the other Southern Company retail operating companies, Southern Power, and Southern Company GAS. Under these agreements, each of the retail operating companies, Southern Power, and Southern Company GAS may be jointly and severally liable. The creditworthiness of Southern Power and Southern Company GAS is currently inferior to the creditworthiness of the retail operating companies. Accordingly, Southern Company has entered into keep-well agreements with the Company and each of the other operating companies to insure they will not subsidize or be responsible for any costs, losses, liabilities, or damages resulting from the inclusion of Southern Power or Southern Company GAS as a contracting party under these agreements.

**Operating Leases**

*Railcar Leases*

In 1989, the Company and Gulf Power jointly entered into a twenty-two year operating lease agreement for the use of 495 aluminum railcars. In 1994, a second lease agreement for the use of 250 additional aluminum railcars was also entered into for twenty-two years. The Company has the option to purchase the 745 railcars at the greater of lease termination value or fair market value, or to renew the leases at the end of the lease term. Both of these leases are for the transport of coal to Plant Daniel.

Gulf Power, as joint owner of Plant Daniel Units 1 and 2, is responsible for one half of the lease costs. The Company's share (50%) of the leases, charged to fuel stock and recovered through the fuel cost recovery clause, was $1.9 million in 2003, $1.9 million in 2002, and $1.9 million in 2001. The Company's annual lease payments for 2004 through 2008 will average approximately $2 million and after 2008, lease payments total in aggregate approximately $8 million.

*Plant Daniel Combined Cycle Generating Units*

In May 2001, the Company began the initial 10-year term of the lease agreement signed in 1999 for a 1,064 megawatt natural gas combined cycle generating facility built at Plant Daniel (Facility). The Company entered into this transaction during a period when retail access was under review by the MPSC. The lease arrangement provided a lower cost alternative to its cost based rate regulated customers than a traditional rate base asset. See Note 3 under "Retail Regulatory Filing" for a description of the Company's PEP formula rate plan.

In 2003, the Facility was acquired by Juniper Capital L.P. (Juniper), whose partners are unaffiliated with the Company. Simultaneously, Juniper entered into a restructured lease agreement with the Company. Juniper has also entered into leases with other parties unrelated to the Company. The assets leased by the Company comprise less than 50 percent of Juniper's assets. In accordance with FASB Interpretation No. 46, the Company is not required to consolidate the leased assets and related liabilities, and the lease with Juniper is considered an operating lease under FASB Statement No. 13. The lease agreement is treated as an operating lease for accounting purposes, as well as for both retail and wholesale rate recovery purposes. For income tax purposes, the Company retains tax ownership. The initial lease term ends in 2011 and the lease includes a purchase and renewal option based on the cost of the Facility at the inception of the lease, which was $369 million. The Company is required to amortize approximately four percent of the initial acquisition cost over the initial lease term. Eighteen months prior to the end of the initial lease, the Company may elect to renew for 10 years. If the lease is renewed, the agreement calls for the Company to amortize an additional 17 percent of the initial completion cost over the renewal period. Upon termination of the lease, at the Company's option, it may either exercise its purchase option or the Facility can be sold to a third party.

The lease provides for a residual value guarantee -- approximately 73 percent of the acquisition cost -- by the Company that is due upon termination of the lease in the event that the Company does not renew the lease or purchase the Facility and that the fair market value is less than the unamortized cost of the Facility. The Company has recognized in the Balance Sheets a liability of approximately $15 million for the fair market value of this residual value guarantee. In 2003, approximately $11 million in lease termination costs and $26 million in lease expense were included in other operation expense. The amount of future minimum operating lease payments will be approximately $29 million annually during the initial term.

The Company estimates that its annual amount of future minimum operating lease payments under this arrangement, exclusive of any payment related to the residual value guarantee, as of December 31, 2003, are as follows:

| Year | Lease Payments |
|---|---|
| | (in millions) |
| 2004 | $29 |
| 2005 | 29 |
| 2006 | 29 |
| 2007 | 29 |
| 2008 | 28 |
| 2009 and thereafter | 85 |
| Total commitments | $229 |

## 8. QUARTERLY FINANCIAL INFORMATION (UNAUDITED)

Summarized quarterly financial data for 2003 and 2002 are as follows:

| Quarter Ended | Operating Revenues | Operating Income | Net Income After Dividends On Preferred Stock |
|---|---|---|---|
| | | (in thousands) | |
| **March 2003** | **$193,886** | **$39,750** | **$21,396** |
| **June 2003** | **264,360** | **90,386** | **53,059** |
| **September 2003** | **227,814** | **58,317** | **34,387** |
| **December 2003** | **183,864** | **(50,786)** | **(35,343)** |
| March 2002 | $183,058 | $28,873 | $13,982 |
| June 2002 | 205,378 | 38,457 | 20,788 |
| September 2002 | 243,077 | 60,010 | 33,384 |
| December 2002 | 192,652 | 17,930 | 4,859 |

The Company's business is influenced by seasonal weather conditions and the timing of rate changes.

SAVANNAH ELECTRIC AND POWER COMPANY

FINANCIAL SECTION

## MANAGEMENT'S REPORT

**Savannah Electric and Power Company 2003 Annual Report**

The management of Savannah Electric and Power Company has prepared--and is responsible for--the financial statements and related information included in this report. These statements were prepared in accordance with accounting principles generally accepted in the United States and necessarily include amounts that are based on the best estimates and judgments of management. Financial information throughout this annual report is consistent with the financial statements.

The Company maintains a system of internal accounting controls to provide reasonable assurance that assets are safeguarded and that the accounting records reflect only authorized transactions of the Company. Limitations exist in any system of internal controls, however, based on a recognition that the cost of the system should not exceed its benefits. The Company believes its system of internal accounting controls maintains an appropriate cost/benefit relationship.

The Company's internal accounting controls are evaluated on an ongoing basis by the Company's internal audit staff. The Company's independent public accountants also consider certain elements of the internal control system in order to determine their auditing procedures for the purpose of expressing an opinion on the financial statements.

Southern Company's audit committee of its board of directors, composed of four independent directors, provides a broad overview of management's financial reporting and control functions. Additionally, the Controls and Compliance Committee of Savannah Electric and Power Company's board of directors, composed of five outside directors, meets periodically with management, the internal auditors, and the independent public accountants to discuss auditing, internal controls, and compliance matters. The internal auditors and the independent public accountants have access to the members of these committees at any time.

Management believes that its policies and procedures provide reasonable assurance that the Company's operations are conducted according to a high standard of business ethics.

In management's opinion, the financial statements present fairly, in all material respects, the financial position, results of operations, and cash flows of Savannah Electric and Power Company in conformity with accounting principles generally accepted in the United States.

Anthony R. James

## INDEPENDENT AUDITORS' REPORT

**Savannah Electric and Power Company:**

We have audited the accompanying balance sheets and statements of capitalization of Savannah Electric and Power Company (a wholly owned subsidiary of Southern Company) as of December 31, 2003 and 2002, and the related statements of income, comprehensive income, common stockholder's equity, and cash flows for the years then ended. These financial statements are the responsibility of Savannah Electric and Power Company's management. Our responsibility is to express an opinion on these financial statements based on our audits. The financial statements of Savannah Electric and Power Company for the year ended December 31, 2001 were audited by other auditors who have ceased operations. Those auditors expressed an unqualified opinion on those financial statements and included an explanatory paragraph that described a change in the method of accounting for derivative instruments and hedging activities in their report dated February 13, 2002.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements (pages II-261 to II-281) present fairly, in all material respects, the financial position of Savannah Electric and Power Company at December 31, 2003 and 2002, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note 1 to the financial statements, in 2003 Savannah Electric and Power Company changed its method of accounting for asset retirement obligations.

Deloitte & Touche LLP

Atlanta, Georgia

**THE FOLLOWING REPORT OF INDEPENDENT PUBLIC ACCOUNTANTS IS A COPY OF THE REPORT PREVIOUSLY ISSUED IN CONNECTION WITH THE COMPANY'S 2001 ANNUAL REPORT ON FORM 10-K AND HAS NOT BEEN REISSUED BY ARTHUR ANDERSEN LLP. SEE EXHIBIT 23(f)2 FOR ADDITIONAL INFORMATION.**

**To Savannah Electric and Power Company:**

We have audited the accompanying balance sheets and statements of capitalization of Savannah Electric and Power Company (a Georgia corporation and a wholly owned subsidiary of Southern Company) as of December 31, 2001 and 2000, and the related statements of income, common stockholder's equity, and cash flows for each of the three years in the period ended December 31, 2001. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements (pages II-192 through II-206) referred to above present fairly, in all material respects, the financial position of Savannah Electric and Power Company as of December 31, 2001 and 2000, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2001, in conformity with accounting principles generally accepted in the United States.

As explained in Note 1 to the financial statements, effective January 1, 2001, Savannah Electric and Power Company changed its method of accounting for derivative instruments and hedging activities.

Arthur Andersen LLP

Atlanta, Georgia
February 13, 2002

## OVERVIEW OF EARNINGS AND BUSINESS ACTIVITIES

### *Earnings*

Savannah Electric and Power Company's net income for 2003 totaled $22.8 million, remaining stable from the prior year. Higher operating expenses and income taxes were generally offset by higher operating revenues, lower depreciation and amortization expenses, and lower interest expenses.

Earnings were $22.9 million in 2002, representing an increase of $0.8 million or 3.7 percent from the prior year. Earnings were up in 2002 primarily due to higher retail revenues, somewhat offset by higher operating expenses. In 2001, earnings were $22.1 million, representing a decrease of $0.9 million or 3.9 percent from the prior year. Earnings in 2001 were down primarily due to lower retail revenues.

### *Business Activities*

The Company operates as a vertically integrated utility providing electricity to retail customers within its traditional service area of southeastern Georgia.

Several factors affect the opportunities, challenges, and risk of selling electricity. These factors include the Company's ability to maintain a stable regulatory environment, to achieve energy sales growth while containing costs, and to recover costs related to growing demand and increasingly stricter environmental standards. Future earnings in the near term will depend, in part, upon growth in energy sales, which is subject to a number of factors. These factors include weather, competition, energy conservation practiced by customers, the price of electricity, the price elasticity of demand, and the rate of economic growth in the Company's service area.

## RESULTS OF OPERATIONS

A condensed income statement is as follows:

| | Amount | Increase (Decrease) From Prior Year | | |
|---|---|---|---|---|
| | **2003** | **2003** | 2002 | 2001 |
| | | (in thousands) | | |
| Operating revenues | **$314,055** | **$14,503** | $15,700 | $(11,866) |
| Fuel | **55,308** | **353** | 4,159 | (6,381) |
| Purchased power | **89,505** | **13,901** | 2,518 | (2,254) |
| Other operation and maintenance | **83,621** | **2,603** | 10,525 | (1,927) |
| Depreciation and amortization | **20,499** | **(2,205)** | (3,247) | 711 |
| Taxes other than income taxes | **14,665** | **208** | 473 | 868 |
| Total operating Expenses | **263,598** | **14,860** | 14,428 | (8,983) |
| Operating income | **50,457** | **(357)** | 1,272 | (2,883) |
| Other income (expense), net | **(12,542)** | **2,959** | 247 | 134 |
| Less -- Income taxes | **15,108** | **2,675** | 702 | (1,843) |
| Net Income | **$ 22,807** | **$. (73)** | $ 817 | $ (906) |

### *Revenues*

Total operating revenues for 2003 were $314.1 million, reflecting a 4.8 percent increase when compared to 2002. The following table summarizes the factors affecting operating revenues for the past three years:

| | Amount | | |
|---|---|---|---|
| | **2003** | 2002 | 2001 |
| | | (in thousands) | |
| Retail - prior year | **$285,771** | $269,172 | $282,622 |
| Change in -- | | | |
| Base rates | **2,799** | 5,101 | - |
| Sales growth | **(1,524)** | 8,729 | (1,541) |
| Weather | **(263)** | 2,397 | (427) |
| Fuel cost recovery and other | **10,962** | 372 | (11,482) |
| Retail – current year | **297,745** | 285,771 | 269,172 |
| Sales for resale -- | | | |
| Non-affiliates | **5,653** | 6,354 | 8,884 |
| Affiliates | **6,499** | 4,075 | 3,205 |
| Total sales for resale | **12,152** | 10,429 | 12,089 |
| Other operating revenues | **4,158** | 3,352 | 2,591 |
| Total operating revenues | **$314,055** | $299,552 | $283,852 |
| Percent change | **4.8%** | 5.5% | (4.0)% |

Retail revenues increased 4.2 percent or $12.0 million in 2003, increased $16.6 million in 2002, and declined $13.5 million in 2001. The significant factors driving these changes are shown in the table above. Retail base rates increased reflecting the Georgia Public Service Commission (GPSC) decision effective June 2002. See Note 3 to the financial statements under "Retail Regulatory Matters" for additional information on the Company's 2002 rate order.

Electric rates include provisions to adjust billings for fluctuations in fuel costs, the energy component of purchased power costs, and certain other costs. Under the fuel recovery provisions, fuel revenues generally equal fuel expenses--including the fuel component of purchased energy--and do not affect net income. In May 2001, the Company implemented a Fuel Cost Recovery (FCR) rate increase under a GPSC rate order. At the time, the GPSC-approved FCR anticipated a three year recovery of the under-recovered fuel balance. However, due to decreasing fuel costs in late 2001 and early 2002, the Company fully recovered the balance by March 2002 and, in May 2002, the GPSC approved a FCR decrease which more than offset the Company's base rate increase. See Note 3 to the financial statements under "Retail Regulatory Matters" for additional information on the Company's 2002 rate order.

Revenues from sales to non-affiliated utilities are primarily energy related. These sales do not have a significant impact on net income since the energy is generally sold at variable cost.

Sales to affiliated companies vary from year to year depending on demand and the availability and cost of generating resources at each company. These energy sales do not have a significant impact on earnings since the energy is generally sold at variable cost.

***Energy Sales***

Changes in revenues are influenced heavily by the amount of energy sold each year. Kilowatt-hour (KWH) sales for 2003 and the percent change by year were as follows:

| | KWH | Percent Change | | |
|---|---|---|---|---|
| | **2003** | **2003** | 2002 | 2001 |
| | (in millions) | | | |
| Residential | **1,738** | **(3.1)%** | 8.1% | (0.7)% |
| Commercial | **1,451** | **(1.8)** | 6.4 | 1.4 |
| Industrial | **860** | **8.5** | 0.7 | (1.6) |
| Other | **138** | **(2.6)** | 4.4 | (1.4) |
| Total retail | **4,187** | **(0.4)** | 5.9 | (0.2) |
| Sales for resale -- | | | | |
| Non-affiliates | **162** | **7.7** | 35.7 | 43.4 |
| Affiliates | **185** | **47.1** | 43.4 | (1.0) |
| Total | **4,534** | **1.2%** | 7.5% | 0.6% |

In 2003, residential and commercial energy sales decreased from the prior year primarily due to weather-related demand. Industrial sales were higher because of an increase in usage by several industrial customers, reflecting the beginning of an economic recovery from the previous two year slowdown. All three categories benefited from a continued increase in the number of customers served.

In 2002, residential and commercial energy sales increased from the prior year reflecting the positive impact of weather and continued growth in customers. Industrial sales increased slightly, reflecting customer growth, and were offset by a general economic slowdown. In 2001, total retail energy sales were down slightly from the prior year, reflecting a decrease in energy sales of 1.6 percent to industrial customers due to a slowing of the economy. Residential energy sales also decreased reflecting weather-related demand, somewhat offset by customer growth.

Energy sales to retail customers are projected to increase at a compound average growth rate of 2.1 percent during the period 2004 through 2014.

***Expenses***

Fuel and purchased power costs constitute the single largest expense for the Company. The mix of energy supply is determined primarily by demand, the unit cost of fuel consumed, and the availability and cost of generating units.

The amount and sources of generation, the average cost of fuel per net KWH generated, and the amount and average cost of purchased power were as follows:

| | **2003** | 2002 | 2001 |
|---|---|---|---|
| Total generation (millions of KWHs) | **2,325** | 2,249 | 2,350 |
| Sources of generation (percent) -- | | | |
| Coal | **94** | 91 | 93 |
| Oil | **2** | 1 | 1 |
| Gas | **4** | 8 | 6 |
| Average cost of fuel per net KWH generated (cents) | **2.38** | 2.44 | 2.16 |
| Total purchased power (millions of KWHs) | **2,581** | 2,379 | 1,960 |
| Average cost of purchased power per net KWH (cents) | **3.47** | 3.18 | 3.73 |

Fuel expense increased 0.6 percent due to a slight increase in generation offset somewhat by a lower cost of coal in 2003. In 2002, fuel expense increased 8.2 percent due to increased gas usage and a higher cost of coal. In 2001, fuel expense decreased 11.2 percent due to a decrease in generation and a slightly lower average cost of fuel.

Purchased power expense increased $13.9 million or 18.4 percent in 2003 due to increased energy demands and a purchased power agreement between the Company and Southern Power for energy and capacity from Plant Wansley Units 6 and 7 which began in June 2002. Purchased power from non-affiliates decreased 72.5 percent and from affiliates increased 38.6 percent in 2002 due principally to the Plant Wansley purchased power agreement discussed above. Purchased power expense decreased 3.0 percent in 2001 from the prior year primarily due to lower fuel prices. Purchased power from affiliates also included energy purchases which will vary depending on demand and cost of generation resources at each company. These energy costs are recovered through the fuel cost recovery clause and have no significant impact on earnings.

In 2003, other operation and maintenance expenses increased 3.2 percent. Administrative and general expenses increased by $1.0 million primarily due to increases in accounting and auditing services, insurance reserves, and employee benefits expense, somewhat offset by the annual true-up in billings to Georgia Power for charges associated with the jointly owned combustion turbines at the Company's Plant McIntosh. Maintenance expense increased $1.5 million primarily due to a scheduled turbine maintenance outage at Plant Kraft and higher transmission and distribution maintenance expenses.

In 2002, other operation and maintenance expenses increased 14.9 percent. Other operation expense was higher reflecting increased distribution expenses of $0.6 million, increased administrative and general costs of $3.7 million, and $0.5 million associated with new marketing programs. Distribution costs increased to support improved customer reliability. Administrative and general costs were higher primarily due to increases in security, legal, accounting and auditing services, regulatory activities, and employee benefits expenses. Administrative and general expenses were also higher reflecting the annual true-up in billings to Georgia Power for charges associated with the jointly owned combustion turbines at the Company's Plant McIntosh. Maintenance expense in 2002 increased over 2001 primarily as a result of scheduled maintenance outages at Plant Kraft and amortization of expenses for a major maintenance project on the combustion turbines at Plant McIntosh. See Note 3 to the financial statements under "Retail Regulatory Matters" for additional information.

In 2001, other operation expense decreased 4.7 percent reflecting the discontinuation of a marketing program and a decrease in administrative and general expenses. Administrative and general expenses decreased primarily due to the annual true-up in billings to Georgia Power for charges associated with the jointly owned combustion turbines at the Company's Plant McIntosh and lower insurance expenses.

Depreciation and amortization decreased 9.7 percent in 2003 and 12.5 percent in 2002 primarily as a result of discontinuing accelerated depreciation and beginning amortization of the related regulatory liability in June 2002, in accordance with the 2002 GPSC rate order. Depreciation and amortization increased over the prior year by 2.8 percent in 2001 primarily due to additional depreciation charges under a 1998 GPSC accounting order. See Note 3 to the financial statements under "Retail Regulatory Matters" for additional information.

Interest expense decreased in 2003 primarily as a result of a lower principal amount of debt outstanding during the year. Lower interest rates in 2003, 2002, and 2001 also contributed to lower expenses in those years.

## Effects of Inflation

The Company is subject to rate regulation that is based on the recovery of historical costs. In addition, the income tax laws are also based on historical costs. Therefore, inflation creates an economic loss because the Company is recovering its costs of investments in dollars that have less purchasing power. While the inflation rate has been relatively low in recent years, it continues to have an adverse effect on the Company because of the large investment in utility plant with long economic lives. Conventional accounting for historical cost does not recognize this economic loss nor the partially offsetting gain that arises through financing facilities with fixed-money obligations such as long-term debt and preferred securities. Any recognition of inflation by regulatory authorities is reflected in the rate of return allowed in the Company's approved electric rates.

## Future Earnings Potential

### *General*

The results of operations for the past three years are not necessarily indicative of future earnings potential. The level of future earnings depends on numerous factors. These factors affect the opportunities, challenges, and risk of electricity. These factors include the Company's ability to maintain a stable regulatory environment, to achieve energy sales growth while containing costs, and to recover costs related to growing demand and increasingly stricter environmental standards. Future earnings in the near term will depend, in part, upon growth in energy sales, which is subject to a number of factors. These factors include weather, competition, energy conservation practiced by customers, the price of electricity, the price elasticity of demand, and the rate of economic growth in the Company's service area.

### *Industry Restructuring*

The Company operates as a vertically integrated utility providing electricity to retail customers within the traditional service area of southeastern Georgia. Prices for electricity provided by the Company to retail customers are set by the GPSC under cost-based regulatory principles. Prices for electricity relating to jointly owned generating facilities, interconnecting transmission lines, and the exchange of electric power are set by the Federal Energy Regulatory Commission (FERC). Retail rates and earnings are reviewed and adjusted periodically within certain limitations based on earned return on equity. See Note 3 to the financial statements for additional information about these and other regulatory matters.

The electric utility industry in the United States is continuing to evolve as a result of regulatory and competitive factors. Among the early primary agents of change was the Energy Policy Act of 1992 (Energy Act). The Energy Act allowed independent power producers to access a utility's transmission network and sell electricity to other utilities.

Although the Energy Act does not provide for retail customer access, it was a major catalyst for restructuring and consolidations that took place within the utility industry. Numerous federal and state initiatives that promote wholesale and retail competition are in varying stages. Among other things, these initiatives allow retail customers in some states to choose their electricity provider. Some states have approved initiatives that result in a separation of the ownership and/or operation of generating facilities from the ownership and/or operation of transmission and distribution facilities. While various restructuring and competition initiatives have been discussed in Georgia, none have been enacted. Enactment could require numerous issues to be resolved, including significant ones relating to recovery of any stranded investments, full cost recovery of energy produced, and other issues related to the energy crisis that occurred in California, as well as the August 2003 power outage in the Northeast. The Company does compete with other electric suppliers within the state. In Georgia, most new retail customers with at least 900 kilowatts of connected load may choose their electricity supplier.

Since 2001, merchant energy companies and traditional electric utilities with significant energy marketing and trading activities have come under severe financial pressures. Many of these companies have completely exited or drastically reduced all energy marketing and trading activities and sold foreign and domestic electric infrastructure assets. The Company has not experienced any material adverse financial impact regarding its limited energy trading operations through Southern Company Services (SCS).

Continuing to be a low-cost producer could provide opportunities to increase the size and profitability of the

electricity sales business in markets that evolve with changing regulation and competition. Conversely, future regulatory changes could adversely affect the Company's growth, and if the Company does not remain a low-cost producer and provide quality service, then energy sales growth could be limited, and this could significantly erode earnings.

***Environmental Matters***

*New Source Review Actions*

In November 1999, the Environmental Protection Agency (EPA) brought a civil action against Alabama Power, Georgia Power, and SCS. The EPA later amended its complaints to add the Company as a defendant alleging violations of the New Source Review (NSR) provisions of the Clean Air Act with respect to eight coal-fired generating facilities in Alabama and Georgia, including the Company's Plant Kraft. The civil actions request penalties and injunctive relief, including an order requiring the installation of the best available control technology at the affected units. The actions against Alabama Power, Georgia Power, and the Company have been stayed since the spring of 2001 during the appeal of a very similar NSR action against the Tennessee Valley Authority before the U.S. Court of Appeals for the Eleventh Circuit. The Eleventh Circuit appeal was decided on September 16, 2003 and, on February 13, 2004, the EPA petitioned the U.S. Supreme Court to review the Eleventh Circuit's decision. The EPA also filed a motion to lift the stay in the action against Alabama Power. At this time, no party to the Georgia Power and Savannah Electric action, which was administratively closed two years ago, has asked the court to reopen that case. See Note 3 to the financial statements under "New Source Review Actions" for additional information.

In December 2002 and October 2003, the EPA issued final revisions to its NSR regulations under the Clean Air Act. The December 2002 revisions included changes to the regulatory exclusions and the methods of calculating emissions increases. The October 2003 regulations clarified the scope of the existing Routine Maintenance, Repair, and Replacement exclusion. A coalition of states and environmental organizations filed petitions for review of these revisions with the U.S. Court of Appeals for the District of Columbia Circuit. On December 24, 2003, the court of appeals granted a stay of the October 2003 revisions pending its review of the rules and ordered that its review be conducted on an expedited basis. In January 2004, the Bush Administration announced that it would continue to enforce the existing rules until the courts resolve legal challenges to the EPA's revised NSR regulations. In any event, the final regulations must be adopted by the State of Georgia in order to apply to the Company's facilities. The effect of these final regulations and the related legal challenges cannot be determined at this time.

The Company believes that it complied with applicable laws and the EPA's regulations and interpretations in effect at the time the work in question took place. The Clean Air Act authorizes civil penalties of up to $27,500 per day, per violation at each generating unit. Prior to January 30, 1997, the penalty was $25,000 per day. An adverse outcome in this matter could require substantial capital expenditures that cannot be determined at this time and could possibly require payment of substantial penalties. This could affect future results of operations, cash flows, and possibly financial condition if such costs are not recovered through regulated rates.

*Environmental Statutes and Regulations*

The Company's operations are subject to extensive regulation by state and federal environmental agencies under a variety of statutes and regulations governing environmental media, including air, water, and land resources. Compliance with these environmental requirements will involve significant costs -- both capital and operating -- a major portion of which is expected to be recovered through existing ratemaking provisions. Environmental costs that are known and estimable at this time are included in capital expenditures discussed under "Capital Requirements and Contractual Obligations." There is no assurance, however, that all such costs will, in fact, be recovered.

Compliance with the federal Clean Air Act and resulting regulations has been and will continue to be a significant focus for the Company. The Title IV acid rain provisions of the Clean Air Act, for example, required significant reductions in sulfur dioxide and nitrogen oxide emissions. Title IV compliance was effective in 2000 and associated construction expenditures totaled approximately $2 million.

To help ozone nonattainment areas attain the one-hour ozone standard, in 1998 the EPA issued regional

nitrogen oxide reduction rules. Those rules required 21 states, including Georgia, to reduce and cap nitrogen oxide emissions from power plants and other large industrial sources. As a result of litigation challenging the rule, the courts required the EPA to complete a separate rulemaking before the requirements can be applied in Georgia. The final EPA rules have not been issued in Georgia. The impact of this rule on the Company will depend on the form in which it is finalized and cannot be determined at this time.

In July 1997, the EPA revised the national ambient air quality standards for ozone and particulate matter. These revisions made the standards significantly more stringent. In the subsequent litigation of these standards, the U.S. Supreme Court found the EPA's implementation program for the new eight-hour ozone standard unlawful and remanded it to the EPA for further rulemaking. During 2003, the EPA proposed implementation rules designed to address the court's concerns. The EPA plans to designate areas as attainment or nonattainment with the new eight-hour ozone standard in April 2004 and with the new fine particulate matter standard by the end of 2004. These designations will be based on air quality data for 2001 through 2003. Although not expected, part or all of the Company's service area may be designated nonattainment under these standards. State implementation plans (SIPs), including new emission control regulations necessary to bring those areas into attainment, could be required as early as 2007. These SIPs could require reductions in sulfur dioxide emissions and could require further reductions in nitrogen oxide emissions from power plants. If so, reductions could be required sometime after 2007. The impact of any new standards will depend on the development and implementation of applicable regulations and cannot be determined at this time.

In January 2004, the EPA issued a proposed Interstate Air Quality Rule to address interstate transport of ozone and fine particles. This proposed rule would require additional year-round sulfur dioxide and nitrogen oxide emission reductions from power plants in the eastern United States in two phases – in 2010 and 2015. The EPA currently plans to finalize this rule by 2005. If finalized, the rule could modify or supplant other SIP requirements for attainment of the fine particulate matter standard and the eight-hour ozone standard. The impact of this rule on the Company will depend upon the specific requirements of the final rule and cannot be determined at this time.

Further reductions in sulfur dioxide and nitrogen oxides could also be required under the EPA's Regional Haze rules. The Regional Haze rules require states to establish Best Available Retrofit Technology (BART) standards for certain sources that contribute to regional haze. The Company has two plants that could be subject to these rules. The EPA's Regional Haze program calls for states to submit SIPs in 2007. The SIPs must contain emission reduction strategies for implementing BART and achieving progress toward the Clean Air Act's visibility improvement goal. In 2002, however, the U.S. Court of Appeals for the District of Columbia Circuit vacated and remanded the BART provisions of the federal Regional Haze rules to the EPA for further rulemaking. The EPA has entered into an agreement that requires proposed revised rules in April 2004 and final rules in 2005. Because new BART rules have not been developed and state visibility assessments for progress are only beginning, it is not possible to determine the effect of these rules on the Company at this time.

The EPA's Compliance Assurance Monitoring (CAM) regulations under Title V of the Clean Air Act require that monitoring be performed to ensure compliance with emissions limitations on an ongoing basis. The regulations require certain facilities with Title V operating permits to develop and submit a CAM plan to the appropriate permitting authority upon applying for renewal of the facility's Title V operating permit. The Company will apply for renewal of certain Title V operating permits in 2004, and some units will likely become subject to CAM requirements, at least for particulate matter. The Company is in the process of developing CAM plans. Because the plans are still under development, the Company cannot determine the costs associated with implementation of the CAM regulations. Actual ongoing monitoring costs are expensed as incurred and are not material for any year presented.

In January 2004, the EPA issued proposed rules regulating mercury emissions from electric utility boilers. The proposal solicits comments on two possible approaches for the new regulations – a Maximum Achievable Control Technology approach and a cap-and-trade approach. Either approach would require significant reductions in mercury emissions from company facilities. The regulations are scheduled to be

finalized by the end of 2004, and compliance could be required as early as 2007. Because the regulations have not been finalized, the impact on the Company cannot be determined at this time.

Several major bills to amend the Clean Air Act to impose more stringent emissions limitations on power plants have been proposed by Congress. Three of these, the Bush Administration's Clear Skies Act, the Clean Power Act of 2003, and the Clean Air Planning Act of 2003, propose to further limit power plant emissions of sulfur dioxide, nitrogen oxides, and mercury. The latter two bills also propose to limit emissions of carbon dioxide. The cost impacts of such legislation would depend upon the specific requirements enacted and cannot be determined at this time.

Domestic efforts to limit greenhouse gas emissions have been spurred by international discussions surrounding the Framework Convention on Climate Change and specifically the Kyoto Protocol, which proposes international constraints on the emissions of greenhouse gases. The Bush Administration does not support U.S. ratification of the Kyoto Protocol or other mandatory carbon dioxide reduction legislation and has instead announced a new voluntary climate initiative, known as Climate VISION, which seeks an 18 percent reduction by 2012 in the rate of greenhouse gas emissions relative to the dollar value of the U.S. economy. Through Southern Company, the Company is involved in a voluntary electric utility industry sector climate change initiative in partnership with the government. The electric utility sector has pledged to reduce its greenhouse gas intensity 3 percent to 5 percent over the next decade and is in the process of developing a memorandum of understanding with the Department of Energy (DOE) to cover this voluntary program.

The Company must comply with other environmental laws and regulations that cover the handling and disposal of waste and releases of hazardous substances. Under these various laws and regulations, the Company could incur substantial costs to clean up properties. The Company conducts studies to determine the extent of any required cleanup and has recognized in its financial statements the costs to clean up known sites. Amounts for cleanup and ongoing monitoring costs were not material for any year presented. The Company may be liable for some or all required cleanup costs for additional sites that may require environmental remediation. The Company has not incurred any significant cleanup costs to date.

Under the Clean Water Act, the EPA has been developing new rules aimed at reducing impingement and entrainment of fish and fish larvae at power plants' cooling water intake structures. On February 16, 2004, the EPA finalized these rules. These rules will require biological studies and, perhaps, retrofits to some intake structures at existing power plants. The impact of these new rules will depend on the results of studies and analyses performed as part of the rules' implementation.

In addition, under the Clean Water Act, the EPA and the Georgia Environmental Protection Division (EPD) are developing total maximum daily loads (TMDLs) for certain impaired waters. Establishment of maximum loads by the EPA or the Georgia EPD may result in lowering permit limits for various pollutants and a requirement to take additional measures to control non-point source pollution (e.g., storm water runoff) at facilities that discharge into waters for which TMDLs are established. Because the effect on the Company will depend on the actual TMDLs and permit limitations established by the implementing agency, it is not possible to determine the effect on the Company at this time.

Several major pieces of environmental legislation are periodically considered for reauthorization or amendment by Congress. These include: the Clean Air Act; the Clean Water Act; the Comprehensive Environmental Response, Compensation, and Liability Act; the Resource Conservation and Recovery Act; the Toxic Substances Control Act; the Emergency Planning & Community Right-to-Know Act; and the Endangered Species Act.

Compliance with possible additional federal or state legislation or regulations related to global climate change, electromagnetic fields, or other environmental and health concerns could also significantly affect the Company. The impact of any new legislation, changes to existing legislation, or environmental regulations could affect many areas of the Company's operations. The full impact of any such changes cannot, however, be determined at this time.

*FERC Matters*

*Transmission*

In December 1999, the FERC issued its final rule (Order 2000) on Regional Transmission Organizations (RTOs). Order 2000 encouraged utilities owning transmission systems to form RTOs on a voluntary basis. Southern Company and its retail operating companies, including the Company, worked with a number of utilities in the Southeast to develop a for-profit RTO known as SeTrans. In 2002, the sponsors of SeTrans established a Stakeholder Advisory Committee to provide input into the development of the RTO from other sectors of the electric industry, as well as consumers. During the development of SeTrans, state regulatory authorities expressed concern over certain aspects of the FERC's policies regarding RTOs. In December 2003, the SeTrans sponsors announced that they would suspend work on SeTrans because the regulated utility participants, including the Company, had determined that it is highly unlikely to obtain support of both federal and state regulatory authorities. Any impact of the FERC's rule on the Company will depend on the regulatory reaction to the suspension of SeTrans and future developments, which cannot now be determined.

In July 2002, the FERC issued a notice of proposed rulemaking regarding open access transmission service and standard electricity market design. The proposal, if adopted, would among other things: (1) require transmission assets of jurisdictional utilities to be operated by an independent entity; (2) establish a standard market design; (3) establish a single type of transmission service that applies to all customers; (4) assert jurisdiction over the transmission component of bundled retail service; (5) establish a generation reserve margin; (6) establish bid caps for day ahead and spot energy markets; and (7) revise the FERC policy on the pricing of transmission expansions. Comments on the proposal were submitted by many interested parties, including Southern Company, and the FERC has indicated that it has revised certain aspects of the proposal in response to public comments. Proposed energy legislation would prohibit the FERC from issuing the final rule before October 31, 2006, and from making any final rule effective before December 31, 2006. That legislation has been approved by the House of Representatives but remains pending before the Senate. Passage of the legislation now appears in doubt. It is uncertain whether in the absence of legislation the FERC will move forward with any part or all of the proposed rule. Any impact of this proposal on Southern Company and its subsidiaries, including the Company, will depend on the form in which the final rule may be ultimately adopted. The Company's financial statements could be adversely affected by changes in the transmission regulatory structure in its regional power market.

*Market-Based Rate Authority*

The Company has obtained FERC approval to sell power to nonaffiliates at market-based prices under specific contracts. Through SCS as agent, the Company also has FERC authority to make short-term opportunity sales at market rates. Specific FERC approval must be obtained with respect to a market-based contract with an affiliate. In November 2001, the FERC modified the test it uses to consider utilities' applications to charge market-based rates and adopted a new test called the Supply Margin Assessment (SMA). The FERC applied the SMA to several utilities, including Southern Company's retail operating companies, and found them to be "pivotal suppliers" in their control area market and ordered the implementation of several mitigation measures. SCS, on behalf of the retail operating companies, sought rehearing of the FERC order, and the FERC delayed the implementation of certain mitigation measures. SCS, on behalf of the retail operating companies, submitted comments to the FERC in 2002 regarding these issues. In December 2003, the FERC issued a staff paper discussing alternatives and held a technical conference in January 2004. The Company anticipates that the FERC will address the requests for rehearing in the near future. Regardless of the outcome of the SMA proposal, the FERC retains the ability to modify or withdraw the authorization for any seller to sell at market-based rates, if it determines that the underlying conditions for having such authority are no longer applicable. The final outcome of this matter will depend on the form in which the SMA test and mitigation measures rules may be ultimately adopted and cannot be determined at this time.

*Southern Power PPA*

The Company plans to retire a 102 megawatt peaking facility in May 2005. In June 2002, the Company entered into a fifteen-year purchased power agreement with Southern Power for 200 megawatts of capacity beginning in June 2005 from the planned combined-cycle plant at

Plant McIntosh being built and owned by Southern Power. The annual capacity cost is expected to be approximately $15.0 million.

Purchased power agreements (PPAs) by Georgia Power and the Company for Southern Power's Plant McIntosh capacity were certified by the GPSC in December 2002 after a competitive bidding process. In April 2003, Southern Power applied for FERC approval of these PPAs. Interveners opposed the FERC's acceptance of the PPAs, alleging that the PPAs do not meet the applicable standards for market-based rates between affiliates. In July 2003, the FERC accepted the PPAs to become effective as scheduled on June 1, 2005, subject to refund, and ordered that hearings be held. For additional information, see Note 3 to the financial statements under "FERC Matters."

*Other Matters*

In accordance with Financial Accounting Standards Board (FASB) Statement No. 87, Employers' Accounting for Pensions, the Company recorded non-cash pension costs of approximately $4.3 million, $4.4 million, and $4.0 million pre-tax in 2003, 2002, and 2001, respectively. Future pension costs are dependent on several factors including trust earnings and changes to the plan. Postretirement benefit costs for the Company were approximately $2.7 million in 2003 and $2.6 million in 2002 and 2001 and are expected to continue to trend upward. A portion of pension and postretirement benefit costs is capitalized based on construction-related labor charges. For more information regarding pension and postretirement benefits, see Note 2 to the financial statements.

On December 8, 2003, President Bush signed into law the Medicare Prescription Drug, Improvement and Modernization Act of 2003 (Medicare Act). The Medicare Act introduces a prescription drug benefit for Medicare-eligible retirees starting in 2006, as well as a federal subsidy to plan sponsors like the Company that provide prescription drug benefits. In accordance with FASB Staff Position No. 106-1, the Company has elected to defer recognizing the effects of the Medicare Act for its postretirement plans under FASB Statement No. 106, Employers' Accounting for Postretirement Benefits Other than Pension until authoritative guidance on accounting for the federal subsidy is issued or until a significant event occurs that would require remeasurement of the plans' assets and obligations. The Company anticipates that the benefits it pays after 2006 will be lower as a result of the Medicare Act; however, the retiree medical obligations and costs reported in Note 2 to the financial statements do not reflect these changes. The final accounting guidance could require changes to previously reported information.

In May 2002, the GPSC approved a $7.8 million base rate increase to recover expenses related to a new purchased power agreement and other operation and maintenance expenses and approved an authorized return on equity of 12.0 percent. At the same time, the GPSC also approved a $44.3 million fuel cost recovery reduction. All customers saw a net rate decrease effective June 2002. In 2002, the Company filed a request and received an accounting order to defer until May 2005 approximately $3.8 million annually in Plant Wansley purchased power costs, which the GPSC had ruled to be outside of the test period in the Company's base rate order. Under the terms of the order, two-thirds of any earnings of the Company in a calendar year above a 12 percent return on common equity will be used to amortize the deferred amounts to expense. The remaining one-third of any such earnings can be retained by the Company. The accounting order provides the Company with discretionary authority to amortize up to an additional $1.5 million annually. In January 2003, the Company began deferring the costs under the terms of the accounting order. Through December 2003, the Company has amortized $3.7 million of the $3.8 million deferred. The deferred costs are included in other deferred debits in the Balance Sheets. The Company anticipates filing a base rate case in late 2004.

Prior to the 2002 base rate case order, the Company had been operating under a four-year accounting order approved by the GPSC. See Note 3 to the financial statements under "Retail Regulatory Matters" for additional information.

The Company is involved in various matters being litigated and regulatory matters that could affect future earnings. See Note 3 to the financial statements for information regarding material issues.

## ACCOUNTING POLICIES

### Application of Critical Accounting Policies and Estimates

The Company prepares its financial statements in accordance with accounting principles generally accepted in the United States. Significant accounting policies are described in Note 1 to the financial statements. In the application of these policies, certain estimates are made that may have a material impact on the Company's results of operations and related disclosures. Different assumptions and measurements could produce estimates that are significantly different from those recorded in the financial statements. Senior management has discussed the development and selection of the critical accounting policies and estimates described below with the Control and Compliance Committee of the Company's Board of Directors and the Audit Committee of Southern Company's Board of Directors.

*Electric Utility Regulation*

The Company is subject to retail regulation by the GPSC and wholesale regulation by the FERC. These regulatory agencies set the rates the Company is permitted to charge customers based on allowable costs. As a result, the Company applies FASB Statement No. 71, Accounting for the Effects of Certain Types of Regulation. Through the ratemaking process, the regulators may require the inclusion of costs or revenues in periods different than when they would be recognized by a non-regulated company. This treatment may result in the deferral of expenses and the recording of related regulatory assets based on anticipated future recovery through rates or the deferral of gains or creation of liabilities and the recording of related regulatory liabilities. The application of Statement No. 71 has a further effect on the Company's financial statements as a result of the estimates of allowable costs used in the ratemaking process. These estimates may differ from those actually incurred by the Company; therefore, the accounting estimates inherent in specific costs such as depreciation and pension and post-retirement benefits have less of a direct impact on the Company's results of operations than they would on a non-regulated company.

As reflected in Note 1 to the financial statements, significant regulatory assets and liabilities have been recorded. Management reviews the ultimate recoverability of these regulatory assets and liabilities based on applicable regulatory guidelines. However, adverse legislation and judicial or regulatory actions could materially impact the amounts of such regulatory assets and liabilities and could adversely impact the Company's financial statements.

*Contingent Obligations*

The Company is subject to a number of federal and state laws and regulations, as well as other factors and conditions that potentially subject it to environmental, litigation, income tax, and other risks. See "Future Earnings Potential" and Note 3 to the financial statements for more information regarding certain of these contingencies. The Company periodically evaluates its exposure to such risks and records reserves for those matters where a loss is considered probable and reasonably estimable in accordance with generally accepted accounting principles. The adequacy of reserves can be significantly affected by external events or conditions that can be unpredictable; thus, the ultimate outcome of such matters could materially affect the Company's financial statements. These events or conditions include the following:

- Changes in existing state or federal regulation by governmental authorities having jurisdiction over air quality, water quality, control of toxic substances, hazardous and solid wastes, and other environmental matters.
- Changes in existing income tax regulations or changes in Internal Revenue Service interpretations of existing regulations.
- Identification of additional sites that require environmental remediation or the filing of other complaints in which the Company may be asserted to be a potentially responsible party.
- Identification and evaluation of other potential lawsuits or complaints in which the Company may be named as a defendant.
- Resolution or progression of existing matters through the legislative process, the court systems, or the EPA.

### New Accounting Standards

Prior to January 2003, the Company accrued for the ultimate cost of retiring most long-lived assets over the life of the related asset through depreciation expense. FASB Statement No. 143, Accounting for Asset

Retirement Obligations, established new accounting and reporting standards for legal obligations associated with the ultimate cost of retiring long-lived assets. The present value of the ultimate costs for an asset's future retirement is recorded in the period in which the liability is incurred. The costs are capitalized as part of the related long-lived asset and depreciated over the asset's useful life. Additionally, non-regulated companies are no longer permitted to continue accruing future retirement costs for long-lived assets that they do not have a legal obligation to retire. For more information regarding the impact of adopting this standard effective January 1, 2003, see Note 1 to the financial statements under "Asset Retirement Obligations and Other Costs of Removal."

FASB Statement No. 149, Amendment of Statement 133 on Derivative Instruments and Hedging Activities, which further amends and clarifies the accounting and reporting for derivative instruments, became effective generally for financial instruments entered into or modified after June 30, 2003. Current interpretations of Statement No. 149 indicate that certain electricity forward transactions subject to unplanned netting -- including those typically referred to as "book outs" -- may only qualify as cash flow hedges if an entity can demonstrate that physical delivery or receipt of power occurred. The Company's forward electricity contracts continue to be exempt from fair value accounting requirements or to qualify as cash flow hedges, with the related gains and losses deferred in other comprehensive income. The implementation of Statement No. 149 did not have a material effect on the Company's financial statements.

In July 2003, the Emerging Issues Task Force (EITF) of FASB issued EITF No. 03-11, which became effective on October 1, 2003. The standard addresses the reporting of realized gains and losses on derivative instruments and is being interpreted to require book outs to be recorded on a net basis in operating revenues. Adoption of this standard did not have a material impact on the Company's financial statements.

FASB Interpretation No. 46, Consolidation of Variable Interest Entities, which was originally issued in January 2003, requires the primary beneficiary of a variable interest entity to consolidate the related assets and liabilities. In December 2003, the FASB revised Interpretation No. 46 and deferred the effective date until March 31, 2004, for interests held in variable interest entities or potential variable interest entities other than special purpose entities.

Current analysis indicates that any trust established by the Company to issue preferred securities is a variable interest entity under Interpretation No. 46, and that the Company is not the primary beneficiary of such a trust. If this conclusion is finalized, effective March 31, 2004, the investments in such trusts and loans from such trusts to the Company would be reflected as equity method investments and as long-term notes payable to affiliates, respectively, on the Balance Sheets. In January 2004, the Company redeemed all $40 million of its outstanding mandatorily redeemable preferred securities; thus the adoption of Interpretation No. 46 is not expected to have any impact on the Company's financial statements.

In May 2003, the FASB issued Statement No. 150, Accounting for Certain Financial Instruments with Characteristics of Both Liabilities and Equity, which requires classification of certain financial instruments within its scope, including shares that are mandatorily redeemable, as liabilities. Statement No. 150 was effective for financial instruments entered into or modified after May 31, 2003, and otherwise on July 1, 2003. In accordance with Statement No. 150, mandatorily redeemable preferred securities are reflected as liabilities on the Balance Sheets. The adoption of Statement No. 150 had no impact on the Statements of Income and Cash Flows.

## FINANCIAL CONDITION AND LIQUIDITY

### Overview

As of December 31, 2003, the Company's capital structure consisted of 45.6 percent common stockholder's equity and 54.4 percent long-term debt, excluding amounts due within one year.

The principal change in the Company's financial condition in 2003 was the addition of $40.2 million to utility plant. The funds needed for gross property additions are currently provided from operating activities. See Statements of Cash Flows for additional information.

### Sources of Capital

It is anticipated that the funds required for construction and other purposes, including compliance with environmental regulations, will be derived from sources

similar to those used in the past including both internal and external funds. Historically, the external funding came from the issuance of debt and mandatorily redeemable preferred securities. Recently, the Company's debt financings have consisted of unsecured debt. The Company is required to meet certain earnings coverage requirements specified in its mortgage indenture and corporate charter to issue new first mortgage bonds and preferred stock. The Company's coverage ratios are sufficiently high to permit, at present interest rate levels, any foreseeable security sales. There are no restrictions on the amount of unsecured indebtedness allowed. The amount of securities which the Company will be permitted to issue in the future will depend upon market conditions and other factors prevailing at that time. Authorization for long-term financings is required by the GPSC. Currently, the Company has $75 million available under GPSC long-term financing authority expiring December 31, 2005.

As shown in the chart below, at the beginning of 2004, the Company had $60 million of unused short-term and revolving credit arrangements with banks to meet its short-term cash needs and to provide additional interim funding for the Company's construction program. The Company also has adequate cash flow from operating activities and access to the capital markets to meet liquidity needs.

At the beginning of 2004, bank credit arrangements are as follows:

| | | Expires | |
|---|---|---|---|
| | | | 2005 & |
| Total | Unused | 2004 | Beyond |
| | (in millions) | | |
| $80 | $60 | $40 | $20 |

For additional information, see Note 6 to the financial statements under "Bank Credit Arrangements."

The Company may also meet short-term cash needs through a Southern Company subsidiary organized to issue and sell commercial paper and extendible commercial notes at the request and for the benefit of the Company and the other Southern Company retail operating companies. Proceeds from such issuances for the benefit of the Company are loaned directly to the Company and are not commingled with proceeds from such issuances for the benefit of any other operating company. The obligations of each company under these arrangements are several; there is no cross affiliate credit support. At December 31, 2003, the Company had no commercial paper and no outstanding extendible commercial notes.

The Company's committed credit arrangements provide liquidity support to the Company's variable rate obligations and to its commercial paper program. At December 31, 2003, the amount of variable rate obligations outstanding requiring liquidity support was $7.7 million.

The Company obtains financing separately without credit support from any affiliate. The Southern Company system does not maintain a centralized cash or money pool. Therefore, funds of the Company are not commingled with funds of any other company. In accordance with the Public Utility Holding Company Act, most loans between affiliated companies must be approved in advance by the Securities and Exchange Commission (SEC).

**Financing Activities**

Maturities and retirements of long-term debt were $39.4 million in 2003, $53.6 million in 2002, and $50.7 million in 2001.

In May 2003, the Company retired its $20 million Series B 5.12% Senior Notes due in 2003. In December 2003, the Company issued $25 million of Series E 4.90% Senior Notes maturing in 2013 and $35 million of Series F 5.50% Senior Notes maturing in 2028. The Company used the proceeds from these two sales to repay in December 2003 $5 million under a $30 million variable rate revolving credit agreement of which the Company had borrowed $25 million, to redeem in January 2004 $40 million of Savannah Electric Capital Trust I 6.85% Trust Preferred Securities, to repay a portion of its outstanding short-term indebtedness, and for other general corporate purposes.

In February 2003, the Company refinanced $13.9 million in pollution control bonds from a daily variable interest rate to an auction rate mode.

**Credit Rating Risk**

The Company does not have any credit agreements that would require material changes in payment schedules or terminations as a result of a credit rating downgrade.

## Market Price Risk

Due to cost-based rate regulations, the Company has limited exposure to market volatility in interest rates, commodity fuel prices, and prices of electricity. To manage the volatility attributable to these exposures, the Company nets the exposures to take advantage of natural offsets and enters into various derivative transactions for the remaining exposures pursuant to the Company's policies in areas such as counterparty exposure and hedging practices. Company policy is that derivatives are to be used primarily for hedging purposes. Derivative positions are monitored using techniques that include market valuation and sensitivity analysis.

To mitigate exposure to interest rates, the Company has entered into interest rate swaps that have been designated as cash flow hedges. The weighted average rate on variable rate long-term debt outstanding that has not been hedged at December 31, 2003 was 1.1 percent. If the Company sustained a 100 basis point change in interest rates for all unhedged variable rate long-term debt, the change would affect annualized interest expense by approximately $0.2 million at December 31, 2003. The Company is not aware of any facts or circumstances that would significantly affect such exposures in the near term. See Notes 1 and 6 to the financial statements under "Financial Instruments" for additional information.

To mitigate residual risks relative to movements in electricity prices, the Company enters into fixed price contracts for the purchase and sale of electricity through the wholesale electricity market. In addition, the Company has implemented a natural gas/oil hedging program ordered by the GPSC. The program has negative financial hedge limits. In terms of dollar amounts, negative financial hedging positions, recoverable through the fuel clause, are limited to an above market cap equal to 10 percent of the Company's annual natural gas/oil budget. These hedging position limits were $1.5 million for 2001, $2.4 million for 2002, and $1.1 million for 2003 and will be $2.7 million for 2004. The program has operated within the defined hedging position limits set for each year.

The fair value of changes in energy related derivative contracts and year-end valuations were as follows at December 31:

| | Changes in Fair Value | |
|---|---|---|
| | **2003** | 2002 |
| | (in thousands) | |
| Contracts beginning of year | **$ 626** | $(1,053) |
| Contracts realized or settled | **(1,798)** | 269 |
| New contracts at inception | **-** | - |
| Changes in valuation techniques | **-** | - |
| Current period changes | **1,635** | 1,410 |
| Contracts end of year | **$ 463** | $ 626 |

| | Source of 2003 Year-End Valuation Prices | | |
|---|---|---|---|
| | Total | Maturity | |
| | Fair Value | Year 1 | 2-3 Years |
| | (in thousands) | | |
| Actively quoted | **$463** | **$529** | **$(66)** |
| External sources | **-** | **-** | **-** |
| Models and other methods | **-** | **-** | **-** |
| Contracts end of year | **$463** | **$529** | **$(66)** |

Unrealized gains and losses from mark to market adjustments on derivative contracts related to the Company's fuel hedging program are recorded as regulatory assets and liabilities. Realized gains and losses from this program are included in fuel expense and recovered through the Company's FCR clause. Of the net gains, the Company is allowed to retain 25 percent in earnings. Gains and losses on derivative contracts that are not designated as hedges are recognized in the Statements of Income as incurred. For the years ended December 31, 2003, 2002, and 2001, these amounts were not material. At December 31, 2003, the fair value of derivative energy contracts was reflected in the financial statements as follows:

| | Amounts |
|---|---|
| | (in thousands) |
| Regulatory liabilities, net | **$462** |
| Other comprehensive income | **-** |
| Net income | **1** |
| Total fair value | **$463** |

The Company is exposed to market price risk in the event of nonperformance by counterparties to the derivative energy contracts. The Company's policy is to enter into agreements with counterparties that have investment grade credit ratings by Moody's and Standard & Poor's or with counterparties who have posted collateral to cover potential credit exposure. Therefore, the Company does not anticipate market risk exposure from nonperformance by the counterparties. For additional information, see Notes 1 and 6 to the financial statements under "Financial Instruments."

## Capital Requirements and Contractual Obligations

The Company's construction program is currently estimated to be $51.8 million in 2004, $42.6 million in 2005, and $41.3 million in 2006. Environmental expenditures included in these amounts are $3.3 million, $1.4 million, and $3.0 million for 2004, 2005, and 2006, respectively. Actual construction costs may vary from this estimate because of changes in such factors as: business conditions; environmental regulations; FERC rules and transmission regulations; load projections; the cost and efficiency of construction labor, equipment, and materials; and the cost of capital. In addition, there can be no assurance that costs related to capital expenditures will be fully recovered. Construction of new transmission and distribution facilities and capital improvements for generation, transmission, and distribution facilities, including those needed to meet the environmental standards previously discussed, will be ongoing.

As discussed in Note 2 to the financial statements, the company provides postretirement benefits to substantially all employees and funds trusts to the extent required by the GPSC.

Other funding requirements related to obligations associated with scheduled maturities of long-term debt and preferred securities, as well as the related interest and distributions, leases, and other purchase commitments are as follows: See notes 1, 6, and 7 to the financial statements for additional information.

| | 2004 | 2005-2006 | 2007-2008 | After 2008 | Total |
|---|---|---|---|---|---|
| | | | (in thousands) | | |
| Long-term debt and preferred securities[a] -- | | | | | |
| Principal | $ 40,910 | $ 41,642 | $ 46,565 | $134,286 | $ 263,403 |
| Interest and distributions | 13,926 | 21,976 | 18,804 | 76,730 | 131,436 |
| Operating leases | 844 | 1,557 | 1,491 | 4,255 | 8,147 |
| Purchase commitments[b] -- | | | | | |
| Capital[c] | 51,750 | 83,902 | - | - | 135,652 |
| Coal | 31,439 | - | - | - | 31,439 |
| Natural gas[d] | 867 | 19,142 | 35,260 | 284,097 | 339,366 |
| Purchased power | 13,221 | 51,790 | 54,720 | 171,262 | 290,993 |
| Postretirement benefit trusts[e] -- | 1,940 | 4,120 | - | - | 6,060 |
| Total | $154,897 | $224,129 | $156,840 | $670,630 | $1,206,496 |

(a) All amounts are reflected based on final maturity dates. The Company will continue to retire higher-cost securities and replace these obligations with lower-cost capital if market conditions permit. Variable rate interest obligations are estimated based on rates as of January 1, 2004, as reflected in the Statements of Capitalization.

(b) The Company generally does not enter into non-cancelable commitments for other operation and maintenance expenditures. Total other operation and maintenance expenses for the last three years were $83.6 million, $81.0 million, and $70.5 million, respectively.

(c) The Company forecasts capital expenditures over a three-year period. Amounts represent current estimates of total expenditures. At December 31, 2003, significant purchase commitments were outstanding in connection with the construction program.

(d) Natural gas purchase commitments contain fixed volumes with prices based on various indices at the time of delivery. Amounts reflected have been estimated based on the New York Mercantile future prices at December 31, 2003.

(e) The Company forecasts postretirement trust contributions over a three-year period. No contributions related to the Company's pension trust are currently expected during this period. See Note 2 to the financial statements for additional information related to the pension plans.

## Cautionary Statement Regarding Forward-Looking Information

The Company's 2003 Annual Report includes forward-looking statements in addition to historical information. Forward-looking information includes, among other things, statements concerning the estimated construction and other expenditures and the Company's projections for energy sales and postretirement benefit trust contributions. In some cases, forward-looking statements can be identified by terminology such as "may," "will," "could," "should," "expects," "plans," "anticipates," "believes," "estimates," "projects," "predicts," "potential," or "continue" or the negative of these terms or other comparable terminology. The Company cautions that there are various important factors that could cause actual results to differ materially from those indicated in the forward-looking statements; accordingly, there can be no assurance that such indicated results will be realized. These factors include:

- the impact of recent and future federal and state regulatory change, including legislative and regulatory initiatives regarding deregulation and restructuring of the electric utility industry and also changes in environmental, tax, and other laws and regulations to which the Company is subject, as well as changes in application of existing laws and regulations;
- current and future litigation, regulatory investigations, proceedings or inquiries, including the pending EPA civil action against the Company;
- the effects, extent, and timing of the entry of additional competition in the markets in which the Company operates;
- the impact of fluctuations in commodity prices, interest rates, and customer demand;
- available sources and costs of fuels;
- ability to control costs;
- investment performance of the Company's employee benefit plans;
- advances in technology;
- state and federal rate regulations and pending and future rate cases and negotiations;
- effects of and changes in political, legal, and economic conditions and developments in the United States, including the current soft economy;
- internal restructuring or other restructuring options that may be pursued;
- potential business strategies, including acquisitions or dispositions of assets, which cannot be assured to be completed or beneficial to the Company;
- the ability of counterparties of the Company to make payments as and when due;
- the ability to obtain new short- and long-term contracts with neighboring utilities;
- the direct or indirect effects on the Company's business resulting from the terrorist incidents on September 11, 2001, or any similar incidents or responses to such incidents;
- financial market conditions and the results of financing efforts, including the Company's credit ratings;
- the ability of the Company to obtain additional generating capacity at competitive prices;
- weather and other natural phenomena;
- the direct or indirect effects on the Company's business resulting from the August 2003 power outage in the Northeast, or any similar incidents;
- the effect of accounting pronouncements issued periodically by standard-setting bodies; and
- other factors discussed elsewhere herein and in other reports (including the Form 10-K) filed from time to time by the Company with the SEC.

## 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

### General

Savannah Electric and Power Company (the Company) is a wholly owned subsidiary of Southern Company, which is the parent company of five retail operating companies, Southern Power Company (Southern Power), Southern Company Services (SCS), Southern Communications Services (Southern LINC), Southern Company Gas (Southern Company GAS), Southern Company Holdings (Southern Holdings), Southern Nuclear Operating Company (Southern Nuclear), Southern Telecom, and other direct and indirect subsidiaries. The retail operating companies -- Alabama Power, Georgia Power, Gulf Power, Mississippi Power, and the Company -- provide electric service in four Southeastern states. The Company operates as a vertically integrated utility providing electricity to retail customers within its traditional service area of southeastern Georgia. Southern Power constructs, owns, and manages Southern Company's competitive generation assets and sells electricity at market-based rates in the wholesale market. Contracts among the retail operating companies and Southern Power--related to jointly owned generating facilities, interconnecting transmission lines, or the exchange of electric power--are regulated by the Federal Energy Regulatory Commission (FERC) and/or the Securities and Exchange Commission (SEC). SCS, the system service company, provides, at cost, specialized services to Southern Company and subsidiary companies. Southern LINC provides digital wireless communications services to the retail operating companies and also markets these services to the public within the Southeast. Southern Telecom provides fiber cable services within the Southeast. Southern Company GAS is a competitive retail natural gas marketer serving customers in Georgia. Southern Holdings is an intermediate holding subsidiary for Southern Company's investments in synthetic fuels and leveraged leases and an energy services business. Southern Nuclear operates and provides services to Southern Company's nuclear power plants.

Southern Company is registered as a holding company under the Public Utility Holding Company Act of 1935 (PUHCA). Both Southern Company and its subsidiaries, including the Company, are subject to the regulatory provisions of the PUHCA. The Company also is subject to regulation by the FERC and the Georgia Public Service Commission (GPSC). The Company follows accounting principles generally accepted in the United States and complies with the accounting policies and practices prescribed by the GPSC. The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires the use of estimates, and the actual results may differ from those estimates.

Certain prior years' data presented in the financial statements has been reclassified to conform with the current year presentation.

### Affiliate Transactions

The Company has an agreement with SCS under which the following services are rendered to the Company at direct or allocated cost: general and design engineering, purchasing, accounting and statistical analysis, finance and treasury, tax, information resources, marketing, auditing, insurance and employee benefits, human resources, systems and procedures, and other administrative services with respect to business and operations and power pool operations. Costs for these services amounted to $16.3 million, $15.6 million, and $15.0 million during 2003, 2002, and 2001, respectively. Cost allocation methodologies used by SCS are approved by the SEC and management believes they are reasonable.

The Company has entered into a purchased power agreement with Southern Power for 200 megawatts of capacity from Plant Wansley Units 6 and 7 which began operation in June 2002. Purchased power capacity and energy costs in 2003 amounted to $30.1 million. At December 31, 2003, approximately $1.5 million in prepaid capacity expense related to this agreement was recorded in other deferred debits in the Balance Sheets.

In June 2002, the Company entered into another purchased power agreement with Southern Power for 200 megawatts of capacity from a planned combined-cycle plant at Plant McIntosh to be built and owned by Southern Power. This agreement will be effective in June 2005 and the annual capacity cost is expected to be approximately $15.0 million through June 2020. See Note 3 under "FERC Hearings" and Note 7 under "Purchased Power Commitments" for additional information.

In March 2003, the Company transferred to Southern Power 58 acres of land to facilitate construction at Plant McIntosh. The transfer was made at the Company's book value of approximately $16,500 in accordance with PUHCA and the related SEC order (Release No. 35-27322) dated December 27, 2000, which authorized the formation of Southern Power and the transfer of assets thereto. On July 17, 2003, the GPSC issued an order requiring that the Company record the transfer of this land at the higher of net book value or fair market value based on an appraisal by an appraiser selected by the GPSC staff. Based on the appraisal completed in September 2003, the fair market value of the land was established at $320,000.

The Company operates an eight-unit combustion turbine site at its Plant McIntosh. Two of the units are owned by the Company, and six of the units are owned by Georgia Power. Georgia Power reimburses the Company for its proportionate share of the related expenses, which were $3.6 million in 2003 and $1.8 million in 2002. See Note 4 under "Joint Ownership Agreements" for additional information.

The retail operating companies, including the Company, Southern Power, and Southern Company GAS may jointly enter into various types of wholesale energy, natural gas, and certain other contracts, either directly or through SCS as agent. Each participating company may be jointly and severally liable for the obligations incurred under these agreements. See Note 7 under "Fuel Commitments" and "Purchased Power Commitments" for additional information.

**Revenues and Fuel Costs**

Revenues are recognized as services are rendered. Unbilled revenues are accrued at the end of each fiscal period. Fuel costs are expensed as the fuel is used. Electric rates for the Company include provisions to adjust billings for fluctuations in fuel costs, fuel hedging, the energy component of purchased power costs, and certain other costs. Revenues are adjusted for differences between recoverable fuel costs and amounts actually recovered in current regulated rates.

The Company has a diversified base of customers. No single customer or industry comprises 10 percent or more of revenues. For all periods presented, uncollectible accounts averaged less than 1 percent of revenues.

**Income Taxes**

The Company uses the liability method of accounting for deferred income taxes and provides deferred income taxes for all significant income tax temporary differences. Federal investment tax credits utilized are deferred and amortized to income over the average lives of the related property.

**Regulatory Assets and Liabilities**

The Company is subject to the provisions of Financial Accounting Standards Board (FASB) Statement No. 71, Accounting for the Effects of Certain Types of Regulation. Regulatory assets represent probable future revenues to the Company associated with certain costs that are expected to be recovered from customers through the ratemaking process. Regulatory liabilities represent probable future reductions in revenues associated with amounts that are expected to be credited to customers through the ratemaking process.

Regulatory assets and (liabilities) reflected in the Balance Sheets at December 31 and the amortization periods are discussed below as follows:

| | 2003 | 2002 | Note |
|---|---|---|---|
| | (in thousands) | | |
| Asset retirement obligations | **$ 3,265** | $ - | (a) |
| Deferred income tax charges | **9,611** | 11,692 | (a) |
| Loss on reacquired debt | **7,488** | 8,103 | (b) |
| Deferred McIntosh maintenance costs | **9,818** | 5,790 | (c) |
| Wansley accounting order | **162** | - | (d) |
| Other cost of removal obligations | **(36,843)** | (31,884) | (a) |
| Fuel-hedging liabilities | **(462)** | (621) | (e) |
| Deferred income tax credits | **(9,804)** | (12,445) | (a) |
| Storm damage reserves | **(7,103)** | (5,603) | (d) |
| Accelerated cost recovery | **(4,269)** | (7,282) | (f) |
| Property damages reserves | **(1,098)** | (750) | (g) |
| Injuries and damages reserves | **(91)** | (250) | (g) |
| Total | **$(29,326)** | $(33,250) | |

Note: The recovery and amortization periods for these regulatory assets and (liabilities) are as follows:

(a) Asset retirement and removal liabilities are recorded, deferred income tax assets are recovered, and deferred tax liabilities are amortized over the related property lives, which may range up to 50 years. Asset retirement and removal liabilities will be settled and trued up following completion of the related activities.

(b) Recovered over either the remaining life of the original issue or, if refinanced, over the life of the new issue, which may range up to 35 years.

(c) Amortized over 10 years ending in 2011.

(d) Recorded and recovered or amortized as approved by the GPSC.

(e) Fuel-hedging assets and liabilities are recorded over the life of the underlying hedged purchase contracts, which generally do not exceed two years. Upon final settlement, costs are recovered through the fuel cost recovery clauses.

(f) Amortized over three-year period ending in May 2005.

(g) Recorded and relieved upon the occurrence of a loss.

In the event that a portion of the Company's operations is no longer subject to the provisions of FASB Statement No. 71, the Company would be required to write off related regulatory assets and liabilities that are not specifically recoverable through regulated rates. In addition, the Company would be required to determine if any impairment to other assets exists, including plant, and write down the assets, if impaired, to their fair value. All regulatory assets and liabilities are to be reflected in rates.

**Depreciation and Amortization**

Depreciation of the original cost of plant in service is provided primarily by using composite straight-line rates, which approximated 2.9 percent in 2003, 2.9 percent in 2002, and 3.0 percent in 2001. When property subject to depreciation is retired or otherwise disposed of in the normal course of business, its cost--together with the cost of removal, less salvage--is charged to accumulated depreciation. Minor items of property included in the original cost of the plant are retired when the related property unit is retired. Depreciation expense includes an amount for the expected cost of removal of certain facilities. In 2002 and 2001, the Company recorded accelerated depreciation of $1.0 million and $2.5 million, respectively, in accordance with the GPSC's 1998 accounting order. In the 2002 base rate order, the GPSC ordered the Company to amortize the balance of accelerated cost recovery as a credit to depreciation expense over a three year period beginning June 2002. Accordingly, in 2003 and 2002, the Company amortized $3.0 million and $1.8 million, respectively. See Note 3 under "Retail Regulatory Matters" for additional information.

**Asset Retirement Obligations and Other Costs of Removal**

In accordance with regulatory requirements, prior to January 2003, the Company followed the industry practice of accruing for the ultimate cost of retiring most long-lived assets over the life of the related asset as part of the annual depreciation expense provision. In accordance with SEC requirements, such amounts are reflected on the Balance Sheet as regulatory liabilities. Effective January 1, 2003, the Company adopted FASB Statement No. 143, Accounting for Asset Retirement Obligations. Statement No. 143 establishes new accounting and reporting standards for legal obligations associated with the ultimate costs of retiring long-lived assets. The present value of the ultimate costs for an asset's future retirement must be recorded in the period in which the liability is incurred. The costs must be capitalized as part of the related long-lived asset and depreciated over the asset's useful life. Additionally, Statement No. 143 does not permit the continued accrual of future retirement costs for long-lived assets that the Company does not have a legal obligation to retire. However, the Company has received guidance regarding accounting for the financial statement impacts of Statement No. 143 from the GPSC and will continue to recognize the accumulated removal costs for other obligations as a regulatory liability included in accumulated depreciation. Therefore, the Company had

no cumulative effect to net income resulting from the adoption of Statement No. 143.

The Company has retirement obligations related to various landfill sites, ash ponds, a rail line, and underground storage tanks. The Company has also identified retirement obligations related to certain transmission and distribution facilities. However, liabilities for the removal of these transmission and distribution assets have not been recorded because no reasonable estimate can be made regarding the timing of the obligations. The Company will continue to recognize in the income statement allowed removal costs in accordance with its regulatory treatment. Any difference between costs recognized under Statement No. 143 and those reflected in rates are recognized as either a regulatory asset or liability and are reflected in the Balance Sheets.

Details of the asset retirement obligations included in the Balance Sheets are as follows:

| | 2003 |
|---|---|
| | (in thousands) |
| Balance beginning of year | $ - |
| Liabilities incurred | 4,020 |
| Liabilities settled | (11) |
| Accretion | 211 |
| Cash flow revisions | - |
| Balance end of year | $4,220 |

If Statement No. 143 had been adopted on January 1, 2002, the pro-forma asset retirement obligations would have been $2.7 million.

**Allowance for Funds Used During Construction (AFUDC)**

In accordance with regulatory treatment, the Company records AFUDC. AFUDC represents the estimated debt and equity costs of capital funds that are necessary to finance the construction of new facilities. While cash is not realized currently from such allowance, it increases the revenue requirement over the service life of the plant through a higher rate base and higher depreciation expense. The composite rates used by the Company to calculate AFUDC were 4.22 percent in 2003, 2.82 percent in 2002, and 5.13 percent in 2001. AFUDC as a percent of net income was 1.4 percent in 2003, 0.4 percent in 2002, and 0.8 percent in 2001.

**Property, Plant, and Equipment**

Property, plant, and equipment is stated at original cost less regulatory disallowances and impairments. Original cost includes: materials; labor; minor items of property; appropriate administrative and general costs; payroll-related costs such as taxes, pensions, and other benefits, and AFUDC. The cost of replacements of property exclusive of minor items of property is capitalized. The cost of maintenance, repairs, and replacement of minor items of property is charged to maintenance expense. In accordance with the 2002 base rate order, the Company is deferring the costs of certain significant maintenance costs for the combustion turbines at Plant McIntosh and amortizing such costs over 10 years, which approximates the expected maintenance cycle.

**Impairment of Long-Lived Assets and Intangibles**

The Company evaluates long-lived assets for impairment when events or changes in circumstances indicate that the carrying value of such assets may not be recoverable. The determination of whether an impairment has occurred is based on either a specific regulatory disallowance or an estimate of undiscounted future cash flows attributable to the assets, as compared with the carrying value of the assets. If an impairment has occurred, the amount of the impairment recognized is determined by either the amount of regulatory disallowance or by estimating the fair value of the assets and recording a provision for loss if the carrying value is greater than the fair value. For assets identified as held for sale, the carrying value is compared to the estimated fair value less the cost to sell in order to determine if an impairment provision is required. Until the assets are disposed of, their estimated fair value is re-evaluated when circumstances or events change.

**Cash and Cash Equivalents**

For purposes of the financial statements, temporary cash investments are considered cash equivalents. Temporary cash investments are securities with original maturities of 90 days or less.

**Materials and Supplies**

Generally, materials and supplies include the average cost of transmission, distribution, and generating plant materials. Materials are charged to inventory when purchased and then expensed or capitalized to plant, as appropriate, when installed.

### Stock Options

Southern Company provides non-qualified stock options to a large segment of the Company's employees ranging from line management to executives. The Company accounts for its stock-based compensation plans in accordance with Accounting Principles Board Opinion No. 25. Accordingly, no compensation expense has been recognized because the exercise price of all options granted equaled the fair-market value on the date of grant. When options are exercised the Company receives a capital contribution from Southern Company equivalent to the related income tax benefit.

### Financial Instruments

The Company uses derivative financial instruments to limit exposure to fluctuations in interest rates, the prices of certain fuel purchases, and electricity purchases and sales. All derivative financial instruments are recognized as either assets or liabilities and are measured at fair value. Substantially all of the Company's bulk energy purchases and sales contracts that meet the definition of a derivative are exempt from fair value accounting requirements and are accounted for under the accrual method. Other derivative contracts qualify as cash flow hedges of anticipated transactions. This results in the deferral of related gains and losses in other comprehensive income or regulatory assets or liabilities as appropriate until the hedged transactions occur. Any ineffectiveness is recognized currently in net income. Other derivative contracts are marked to market through current period income and are recorded on a net basis in the Statements of Income.

The Company is exposed to losses related to financial instruments in the event of counterparties' nonperformance. The Company has established controls to determine and monitor the creditworthiness of counterparties in order to mitigate the Company's exposure to counterparty credit risk.

The Company has implemented a natural gas/oil hedging program as ordered by the GPSC. The program has negative financial hedge limits. In terms of dollar amounts, negative financial hedging positions, recoverable through the fuel clause, are limited to an above market cap equal to 10 percent of the Company's annual natural gas/oil budget. These hedging position limits were $1.5 million for 2001, $2.4 million for 2002, and $1.1 million for 2003 and will be $2.7 million for 2004. The program has operated within the defined hedging position limits set for each year.

The Company's other financial instruments for which the carrying amount does not equal fair value at December 31 were as follows:

| | Carrying Amount | Fair Value |
|---|---|---|
| | (in millions) | |
| Long-term debt: | | |
| **At December 31, 2003** | **$218** | **$220** |
| At December 31, 2002 | $183 | $187 |

The fair values for long-term debt were based on either closing market prices or closing prices of comparable instruments.

### Comprehensive Income

The objective of comprehensive income is to report a measure of all changes in common stock equity of an enterprise that result from transactions and other economic events of the period other than transactions with owners. Comprehensive income consists of net income and changes in the fair value of qualifying cash flow hedges and changes in additional minimum pension liability, net of income taxes.

## 2. RETIREMENT BENEFITS

The Company has a defined benefit, trusteed, non-contributory pension plan that covers substantially all employees. The plan is funded in accordance with Employee Retirement Income Security Act (ERISA) requirements. The Company also provides certain non-qualified benefit plans for a selected group of management and highly compensated employees and directors. Benefits under these non-qualified plans are funded on a cash basis. In addition, the Company has a supplemental retirement plan for certain executive employees. The plan is unfunded and payable from the general funds of the Company. The Company has purchased life insurance on participating executives and plans to use these policies to satisfy this obligation. Also, the Company provides certain medical care and life insurance benefits for retired employees. The Company funds trusts to the extent required by the GPSC and the FERC. For the year ended December 31, 2004,

postretirement benefit contributions are expected to total approximately $1.9 million.

The measurement date for plan assets and obligations is September 30 for each year. In 2002, the Company adopted several plan changes that had the effect of increasing benefits to both current and future retirees.

**Pension Plans**

The accumulated benefit obligation for the pension plans was $87.2 million in 2003 and $76.6 million in 2002. Changes during the year in the projected benefit obligations, accumulated benefit obligations, and fair value of plan assets were as follows:

| | Projected Benefit Obligations | |
|---|---|---|
| | **2003** | 2002 |
| | (in thousands) | |
| Balance at beginning of year | **$85,262** | $79,550 |
| Service cost | **2,175** | 2,204 |
| Interest cost | **5,409** | 5,811 |
| Benefits paid | **(4,425)** | (4,213) |
| Actuarial loss and employee transfers | **6,137** | 1,793 |
| Amendments | **231** | 117 |
| Balance at end of year | **$94,789** | $85,262 |

| | Plan Assets | |
|---|---|---|
| | **2003** | 2002 |
| | (in thousands) | |
| Balance at beginning of year | **$44,092** | $50,858 |
| Actual return on plan assets | **6,829** | (2,720) |
| Benefits paid | **(3,909)** | (3,734) |
| Employee transfers | **478** | (312) |
| Balance at end of year | **$47,490** | $44,092 |

Pension plan assets are managed and invested in accordance with all applicable requirements, including ERISA and the Internal Revenue Service (IRS) revenue code. The Company's investment policy covers a diversified mix of assets, including equity and fixed income securities, real estate, and private equity, as described in the table below. Derivative instruments are used primarily as hedging tools but may also be used to gain efficient exposure to the various asset classes. The Company primarily minimizes the risk of large losses through diversification but also monitors and manages other aspects of risk.

Plan assets were invested as follows:

| | Plan Assets | | |
|---|---|---|---|
| | Target | **2003** | 2002 |
| Domestic equity | 37% | **37%** | 35% |
| International equity | 20 | **20** | 18 |
| Global fixed income | 26 | **24** | 25 |
| Real estate | 10 | **11** | 12 |
| Private equity | 7 | **8** | 10 |
| Total | 100% | **100%** | 100% |

The accrued pension costs recognized in the Balance Sheets were as follows:

| | **2003** | 2002 |
|---|---|---|
| | (in thousands) | |
| Funded status | **$(47,299)** | $(41,170) |
| Unrecognized prior service cost | **7,258** | 6,847 |
| Unrecognized net loss | **23,379** | 21,432 |
| Accrued liability recognized in the Balance Sheets | **$(16,662)** | $(12,891) |

In 2003 and 2002, amounts recognized in the Balance Sheets for accumulated other comprehensive income and intangible assets to record the minimum pension liability related to the non-qualified plans were $2.9 million and $1.5 million and $2.0 million and $1.5 million, respectively.

Components of the pension plans' net periodic cost were as follows:

| | **2003** | 2002 | 2001 |
|---|---|---|---|
| | | (in thousands) | |
| Service cost | **$2,175** | $2,204 | $2,074 |
| Interest cost | **5,409** | 5,811 | 5,426 |
| Expected return on plan assets | **(4,186)** | (4,311) | (4,215) |
| Recognized net loss | **152** | 54 | 16 |
| Net amortization | **740** | 672 | 700 |
| Net pension cost | **$4,290** | $4,430 | $4,001 |

**Postretirement Benefits**

Changes during the year in the accumulated benefit obligations and in the fair value of plan assets were as follows:

| | Accumulated Benefit Obligations | |
|---|---|---|
| | **2003** | 2002 |
| | (in thousands) | |
| Balance at beginning of year | **$32,702** | $28,121 |
| Service cost | **493** | 431 |
| Interest cost | **2,082** | 2,065 |
| Benefits paid | **(1,319)** | (1,160) |
| Actuarial loss (gain) and employee transfers | **3,291** | 3,245 |
| Balance at end of year | **$37,249** | $32,702 |

| | Plan Assets | |
|---|---|---|
| | **2003** | 2002 |
| | (in thousands) | |
| Balance at beginning of year | **$7,994** | $7,401 |
| Actual return on plan assets | **1,481** | (732) |
| Employer contributions | **3,119** | 2,485 |
| Benefits paid | **(1,319)** | (1,160) |
| Balance at end of year | **$11,275** | $7,994 |

Postretirement benefits plan assets are managed and invested in accordance with all applicable requirements, including ERISA and the IRS revenue code. The Company's investment policy covers a diversified mix of assets, including equity and fixed income securities, real estate, and private equity, as described in the table below. Derivative instruments are used primarily as hedging tools but may also be used to gain efficient exposure to the various asset classes. The Company primarily minimizes the risk of large losses through diversification but also monitors and manages other aspects of risk.

Plan assets were invested as follows:

| | | Plan Assets | |
|---|---|---|---|
| | Target | **2003** | 2002 |
| Domestic equity | 52% | **51%** | 44% |
| International equity | 11 | **14** | 15 |
| Global fixed income | 33 | **30** | 34 |
| Real estate | 2 | **3** | 4 |
| Private equity | 2 | **2** | 3 |
| Total | 100% | **100%** | 100% |

The accrued postretirement costs recognized in the Balance Sheets were as follows:

| | **2003** | 2002 |
|---|---|---|
| | (in thousands) | |
| Funded status | **$(25,974)** | $(24,708) |
| Unrecognized transition obligation | **4,444** | 4,938 |
| Unamortized prior service cost | **4,167** | 4,429 |
| Unrecognized net loss | **8,886** | 6,435 |
| Fourth quarter contributions | **1,063** | 2,104 |
| Accrued liability recognized in the Balance Sheets | **$ (7,414)** | $ (6,802) |

Components of the postretirement plan's net periodic cost were as follows:

| | **2003** | 2002 | 2001 |
|---|---|---|---|
| | (in thousands) | | |
| Service cost | **$ 493** | $ 431 | $ 433 |
| Interest cost | **2,082** | 2,065 | 2,022 |
| Expected return on plan assets | **(732)** | (627) | (555) |
| Recognized net loss | **91** | - | - |
| Net amortization | **756** | 756 | 731 |
| Net postretirement cost | **$2,690** | $2,625 | $2,631 |

The weighted average rates assumed in the actuarial calculations used to determine both the benefit obligations and the net periodic costs for the pension and postretirement benefit plans were as follows:

| | **2003** | 2002 | 2001 |
|---|---|---|---|
| Discount | **6.00%** | 6.50% | 7.50% |
| Annual salary increase | **3.75** | 4.00 | 5.00 |
| Long-term return on plan assets | **8.50** | 8.50 | 8.50 |

The Company determined the long-term rate of return based on historical asset class returns and current market conditions, taking into account the diversification benefits of investing in multiple asset classes.

An additional assumption used in measuring the accumulated postretirement benefit obligation was a weighted average medical care cost trend rate of 8.25 percent for 2003, decreasing gradually to 5.25 percent through the year 2010 and remaining at that level thereafter. An annual increase or decrease in the assumed medical care cost trend rate of 1 percent would affect the accumulated benefit obligation and the service and

interest cost components at December 31, 2003 as follows:

| | 1 Percent Increase | 1 Percent Decrease |
|---|---|---|
| | (in thousands) | |
| Benefit obligation | **$2,437** | **$2,209** |
| Service and interest costs | **158** | **142** |

**Employee Savings Plan**

The Company also sponsors a 401(k) defined contribution plan covering substantially all employees. The Company provides a 75 percent matching contribution up to 6 percent of an employee's base salary. Total matching contributions made to the plan for the years 2003, 2002, and 2001 were $1.1 million, $1.0 million, and $1.0 million, respectively.

## 3. CONTINGENCIES AND REGULATORY MATTERS

**General Litigation Matters**

The Company is subject to certain claims and legal actions arising in the ordinary course of business. In addition, the Company's business activities are subject to extensive governmental regulation related to public health and the environment. Litigation over environmental issues and claims of various types, including property damage, personal injury, and citizen enforcement of environmental requirements, has increased generally throughout the United States. In particular, personal injury claims for damages caused by alleged exposure to hazardous materials have become more frequent. The ultimate outcome of such litigation against the Company cannot be predicted at this time; however, management does not anticipate that the liabilities, if any, arising from such current proceedings would have a material adverse effect on the Company's financial statements.

**New Source Review Actions**

In November 1999, the Environmental Protection Agency (EPA) brought a civil action in the U.S. District Court for the Northern District of Georgia against Alabama Power, Georgia Power, and SCS. The complaint alleged violations of the New Source Review (NSR) provisions of the Clean Air Act with respect to five coal-fired generating facilities in Alabama and Georgia and violations of related state laws. The civil action requested penalties and injunctive relief, including an order requiring the installation of the best available control technology at the affected units. The EPA concurrently issued to the retail operating companies, notices of violation relating to 10 generating facilities, which include the five facilities mentioned previously and the Company's Plant Kraft. In early 2000, the EPA filed a motion to amend its complaint to add the violations alleged in its notices of violation and to add Gulf Power, Mississippi Power, and the Company as defendants.

In August 2000, the U.S. District Court in Georgia granted Alabama Power's motion to dismiss for lack of jurisdiction in Georgia and granted SCS' motion to dismiss on the grounds that it neither owned nor operated the generating units involved in the proceedings. In March 2001, the court granted the EPA's motion to add the Company as a defendant, but it denied the motion to add Gulf Power and Mississippi Power based on lack of jurisdiction in Georgia over those companies. As directed by the court, the EPA refiled its amended complaint limiting claims to those brought against Georgia Power and the Company. In addition, the EPA refiled its claims against Alabama Power in the U.S. District Court for the Northern District of Alabama. These complaints allege violations with respect to eight coal-fired generating facilities in Alabama and Georgia, and they request the same kinds of relief as was requested in the original complaint, i.e. penalties and injunctive relief, including installation of the best available control technology. The EPA has not refiled against Gulf Power, Mississippi Power, or SCS.

The actions against Alabama Power, Georgia Power, and the Company were stayed in the spring of 2001 during the appeal of a very similar NSR enforcement action against the Tennessee Valley Authority (TVA) before the U.S. Court of Appeals for the Eleventh Circuit. The TVA appeal involves many of the same legal issues raised by the actions against Alabama Power, Georgia Power, and the Company. Because the final resolution of the TVA appeal could have a significant impact on Alabama Power and Georgia Power, both companies have been involved in that appeal. On June 24, 2003, the court of appeals issued its ruling in the TVA case. It found unconstitutional the statutory scheme set forth in the Clean Air Act that allowed the EPA to impose penalties for failing to comply with an administrative compliance order, like the one issued to TVA, without the EPA having to prove the underlying violation. Thus, the

court of appeals held that the compliance order was of no legal consequence, and TVA was free to ignore it. The court did not, however, rule directly on the substantive legal issues about the proper interpretation and application of certain NSR provisions that had been raised in the TVA appeal. On September 16, 2003, the court of appeals denied the EPA's request for a rehearing of the decision. On February 13, 2004, the EPA petitioned the U.S. Supreme Court to review the decision of the court of appeals. The EPA also filed a motion to lift the stay in the action against Alabama Power. At this time, no party to the Georgia Power and Savannah Electric action, which was administratively closed two years ago, has asked the court to reopen that case.

Since the inception of the NSR proceedings against Georgia Power, Alabama Power, and the Company, the EPA has also been proceeding with similar NSR enforcement actions against other utilities, involving many of the same legal issues. In each case, the EPA alleged that the utilities failed to comply with the NSR permitting requirements when performing maintenance and construction activities at coal-burning plants, which activities the utilities considered to be routine or otherwise not subject to NSR. In 2003, district courts addressing these cases issued opinions that reached conflicting conclusions.

In October 2003, the EPA issued final revisions to its NSR regulations under the Clean Air Act clarifying the scope of the existing Routine Maintenance, Repair, and Replacement exclusion. On December 24, 2003, the U.S. Court of Appeals for the District of Columbia Circuit stayed the effectiveness of these revisions pending resolution of related litigation. In January 2004, the Bush Administration announced that it would continue to enforce the existing rules.

The Company believes that it complied with applicable laws and the EPA's regulations and interpretations in effect at the time the work in question took place. The Clean Air Act authorizes civil penalties of up to $27,500 per day, per violation at each generating unit. Prior to January 30, 1997, the penalty was $25,000 per day. An adverse outcome in this matter could require substantial capital expenditures that cannot be determined at this time and could possibly require payment of substantial penalties. This could affect future results of operations, cash flows, and possibly financial condition if such costs are not recovered through regulated rates.

**Right of Way Litigation**

In late 2001, certain subsidiaries of Southern Company, including Alabama Power, Georgia Power, Gulf Power, Mississippi Power, the Company, and Southern Telecom (collectively, defendants), were named as defendants in a lawsuit brought by a telecommunications company that uses certain of the defendants' rights of way. This lawsuit alleges, among other things, that the defendants are contractually obligated to indemnify, defend, and hold harmless the telecommunications company from any liability that may be assessed against the telecommunications company in pending and future right of way litigation. The Company believes that the plaintiff's claims are without merit. An adverse outcome in this matter, combined with an adverse outcome against the telecommunications company in one or more of the right of way lawsuits, could result in substantial judgments; however, the final outcome of these matters cannot now be determined.

**Retail Regulatory Matters**

The Company filed a base rate case in November 2001 to recover significant new expenses related to the 200 megawatt Plant Wansley purchased power agreement which began in June 2002, as well as other operation and maintenance expense changes. In early 2002, the Company filed for a fuel cost recovery decrease. In May 2002, the GPSC approved a $7.8 million base rate increase and an authorized return on equity of 12.0 percent. At the same time, the GPSC also approved a $44.3 million fuel cost recovery reduction. As a result of these two rate changes, all customers saw a net rate decrease effective June 2002. In December 2002, at the Company's request, the GPSC issued an accounting order authorizing the Company to defer until May 2005 approximately $3.8 million annually in Plant Wansley purchased power costs that the GPSC had ruled to be outside the test period for the base rate order. Under the terms of the order, two-thirds of any earnings of the Company in a calendar year above a 12 percent return on common equity will be used to amortize the deferred amounts to purchase power expense. The remaining one-third of any such earnings can be retained by the Company. The Company has the discretionary authority to amortize up to an additional $1.5 million annually. In January 2003, the Company began deferring the costs under the terms of the accounting order. Through December 2003, the Company amortized $3.7 million of

the $3.8 million deferred. The Company anticipates filing a base rate case in late 2004.

Prior to the 2002 base rate order, the Company had been operating under a four-year accounting order approved by the GPSC. Under this order, the Company reduced the electric rates of its small business customers by approximately $11 million over four years. The Company also expensed an additional $1.95 million in storm damage accruals and accrued an additional $8 million in depreciation on generating assets over the term of the order. The additional depreciation accumulated in a regulatory liability account. Under the 2002 rate order, the accumulated accelerated depreciation is being amortized equally over three years as a credit to expense beginning June 1, 2002. At this time, the Company also discontinued recording accelerated depreciation. In addition, the Company had discretionary authority to provide up to an additional $0.3 million per year in storm damage accruals and up to an additional $4.0 million in depreciation expense over the four years. Total storm damages accrued under the order were $0.5 million in 2002 and $1.5 million in 2001. Under the 2002 rate order, the Company's annual storm damage accrual level was set at $1.5 million. The Company accrued $1.5 million in 2003 and $0.9 million in 2002 to the accumulated provision for storm damage.

**FERC Matters**

The Company has obtained FERC approval to sell power to nonaffiliates at market-based prices under specific contracts. Through SCS as agent, the Company also has FERC authority to make short-term opportunity sales at market rates. Specific FERC approval must be obtained with respect to a market-based contract with an affiliate. In November 2001, the FERC modified the test it uses to consider utilities' applications to charge market-based rates and adopted a new test called the Supply Margin Assessment (SMA). The FERC applied the SMA to several utilities, including Southern Company's retail operating companies, and found them to be "pivotal suppliers" in their control area market and ordered the implementation of several mitigation measures. SCS, on behalf of the retail operating companies, sought rehearing of the FERC order, and the FERC delayed the implementation of certain mitigation measures. SCS, on behalf of the retail operating companies, submitted comments to the FERC in 2002 regarding these issues. In December 2003, the FERC issued a staff paper discussing alternatives and held a technical conference in January 2004. The Company anticipates that the FERC will address the requests for rehearing in the near future. Regardless of the outcome of the SMA proposal, the FERC retains the ability to modify or withdraw the authorization for any seller to sell at market-based rates, if it determines that the underlying conditions for having such authority are no longer applicable. The final outcome of this matter will depend on the form in which the SMA test and mitigation measures rules may be ultimately adopted and cannot be determined at this time.

Purchased power agreements (PPAs) by Georgia Power and the Company for Southern Power's Plant McIntosh capacity were certified by the GPSC in December 2002 after a competitive bidding process. In April 2003, Southern Power applied for FERC approval of these PPAs. Interveners opposed the FERC's acceptance of the PPAs, alleging that the PPAs do not meet the applicable standards for market-based rates between affiliates. In July 2003, the FERC accepted the PPAs to become effective as scheduled on June 1, 2005, subject to refund, and ordered that hearings be held to determine: (a) whether, in the design and implementation of the GPSC competitive bidding process, Georgia Power and the Company unduly preferred Southern Power; (b) whether the analysis of the competitive bids unduly favored Southern Power, particularly with respect to evaluation of non-price factors; (c) whether Georgia Power and the Company selected their affiliate, Southern Power, based upon a reasonable combination of price and non-price factors; (d) whether Southern Power received an undue preference or competitive advantage in the competitive bidding process as a result of access to its affiliate's transmission system; (e) whether and to what extent the PPAs impact wholesale competition; and (f) whether the PPAs are just and reasonable and not unduly discriminatory. Hearings are scheduled to begin in March 2004. Management believes that the PPAs should be approved by the FERC; however, the ultimate outcome of this matter cannot now be determined.

## 4. JOINT OWNERSHIP AGREEMENTS

The Company operates and jointly owns its Plant McIntosh combustion turbines with Georgia Power. Two of the eight units are owned by the Company, and six units are owned by Georgia Power. The Company's amount of investment in Plant McIntosh combustion turbines and related accumulated depreciation at

December 31, 2003 were $53 million and $13 million, respectively. The Company's proportionate share of its combustion turbine plant operating expenses is included in the corresponding operating expenses in the Statements of Income.

## 5. INCOME TAXES

Southern Company files a consolidated federal income tax return. In 2002, Southern Company began filing a combined State of Georgia income tax return. Under a joint consolidated income tax agreement, each subsidiary's current and deferred tax expense is computed on a stand-alone basis. In accordance with IRS regulations, each company is jointly and severally liable for the tax liability.

At December 31, 2003, tax-related regulatory assets and liabilities were $9.6 million and $9.8 million, respectively. These assets are attributable to tax benefits flowed through to customers in prior years and to taxes applicable to capitalized interest. These liabilities are attributable to deferred taxes previously recognized at rates higher than the current enacted tax law and to unamortized investment tax credits.

Details of income tax provisions are as follows:

| | **2003** | 2002 | 2001 |
|---|---|---|---|
| | (in thousands) | | |
| Total provision for income taxes | | | |
| Federal -- | | | |
| Currently payable | **$11,725** | $17,089 | $27,991 |
| Deferred | **1,299** | (5,660) | (17,951) |
| | **13,024** | 11,429 | 10,040 |
| State -- | | | |
| Currently payable | **2,730** | 1,572 | 4,282 |
| Deferred | **(646)** | (568) | (2,577) |
| | **2,084** | 1,004 | 1,705 |
| Total | **$15,108** | $12,433 | $11,745 |

The tax effects of temporary differences between the carrying amounts of assets and liabilities in the financial statements and their respective tax bases, which give rise to deferred tax assets and liabilities, are as follows:

| | **2003** | 2002 |
|---|---|---|
| | (in thousands) | |
| Deferred tax liabilities: | | |
| Accelerated depreciation | **$88,332** | $83,092 |
| Property basis differences | **(1,640)** | (1,250) |
| Other | **2,696** | 3,630 |
| Total | **89,388** | 85,472 |
| Deferred tax assets: | | |
| Pension and other benefits | **15,671** | 12,792 |
| Other | **14,284** | 14,132 |
| Total | **29,955** | 26,924 |
| Total deferred tax liabilities, net | **59,433** | 58,548 |
| Portion included in current assets, net | **24,419** | 20,422 |
| Accumulated deferred income taxes in the Balance Sheets | **$83,852** | $78,970 |

In accordance with regulatory requirements, deferred investment tax credits are amortized over the lives of the related property with such amortization normally applied as a credit to reduce depreciation in the Statements of Income. Credits amortized in this manner amounted to $0.7 million per year in 2003, 2002, and 2001. At December 31, 2003, all investment tax credits available to reduce federal income taxes payable had been utilized.

A reconciliation of the federal statutory income tax rate to the effective income tax rate is as follows:

| | **2003** | 2002 | 2001 |
|---|---|---|---|
| Federal statutory tax rate | **35%** | 35% | 35% |
| State income tax, net of Federal income tax benefit | **4** | 2 | 3 |
| Other | **1** | (2) | (3) |
| Effective income tax rate | **40%** | 35% | 35% |

## 6. FINANCING

### Mandatorily Redeemable Preferred Securities

The Company formed a wholly owned trust subsidiary for the purpose of issuing $40 million preferred securities. The proceeds of the related equity investment and preferred security sale were loaned back to the Company through the issuance of junior subordinated notes totaling $41.2 million, which constitute substantially all of the assets of the trust. The Company considers that the mechanisms and obligations relating to the preferred securities issued for its benefit, taken together, constitute a full and unconditional guarantee by it of the trust's payment obligations with respect to these securities.

In January 2004, all preferred securities issued by the trust were redeemed at par; therefore at December 31, 2003, they were included on the Balance Sheets in Securities Due Within One Year.

**Long-Term Debt and Capital Leases**

The Company's Indenture related to its First Mortgage Bonds is unlimited as to the authorized amount of bonds which may be issued, provided that required property additions, earnings, and other provisions of such Indenture are met.

Assets acquired under capital leases are recorded as utility plant in service, and the related obligation is classified as other long-term debt. Leases are capitalized at the net present value of the future lease payments. However, for ratemaking purposes, these obligations are treated as operating leases and, as such, lease payments are charged to expense as incurred.

**Long-Term Debt Due Within One Year**

A summary of the sinking fund requirements and scheduled maturities and redemptions of long-term debt due within one year at December 31 is as follows:

| | 2003 | 2002 |
|---|---|---|
| | (in thousands) | |
| Bond sinking fund requirement | $ 200 | $ 200 |
| Less: | | |
| Portion to be satisfied by certifying property additions | 200 | 200 |
| Cash sinking fund requirement | - | - |
| Mandatorily redeemable preferred securities | 40,000 | - |
| Other long-term debt maturities | 910 | 20,892 |
| Total | $40,910 | $20,892 |

The first mortgage bond improvement (sinking) fund requirements amount to 1 percent of each outstanding series of bonds authenticated under the first mortgage bond indenture prior to January 1 of each year, other than those issued to collateralize pollution control and other obligations. The requirements may be satisfied by depositing cash or reacquiring bonds, or by pledging additional property equal to 1 2/3 times the requirements.

The sinking fund requirements of first mortgage bonds were satisfied by cash redemption in 2002 and by certifying property additions in 2003. The 2004 requirement will be satisfied by certifying property additions. Sinking fund requirements and/or maturities through 2008 applicable to long-term debt are as follows: $40.9 million in 2004; $20.8 million in 2005; $20.8 million in 2006; $0.7 million in 2007; and $45.8 million in 2008.

**Assets Subject to Lien**

As amended and supplemented, the Company's first mortgage bond indenture, which secures the first mortgage bonds issued by the Company, constitutes a direct first lien on substantially all of the Company's fixed property and franchises.

**Bank Credit Arrangements**

At the beginning of 2004, credit arrangements with banks totaled $80 million and expire at various times during 2004, 2005, and 2006. In September 2002, the Company borrowed $25 million under a $30 million variable rate revolving credit agreement that terminates in 2005. Of this amount, $5 million was repaid in December 2003.

In connection with these credit arrangements, the Company agrees to pay commitment fees based on the unused portions of the commitments. Commitment fees are less than 1/8 of 1 percent for the Company.

The credit arrangements contain covenants that limit the level of indebtedness to capitalization to 65 percent, as defined in the agreements. Exceeding these debt levels would result in a default under the credit arrangements. In addition, the credit arrangements contain cross default provisions that would be triggered if the Company defaulted on indebtedness over a specified threshold. The cross default provisions are restricted only to indebtedness of the Company. The Company is currently in compliance with all such covenants. Borrowings under unused credit arrangements totaling $10 million would be prohibited if the Company experiences a material adverse change (as defined in such arrangements).

The Company may also meet short-term cash needs through a Southern Company subsidiary organized to issue and sell commercial paper and extendible commercial notes at the request and for the benefit of the Company and the other Southern Company retail operating companies. Proceeds from such issuances for the benefit of the Company are loaned directly to the

Company and are not commingled with proceeds from such issuances for the benefit of any other retail operating company. The obligations of each company under these arrangements are several; there is no cross affiliate credit support. At December 31, 2003, the Company had no commercial paper and no extendible commercial notes outstanding. During 2003, the peak amount of commercial paper outstanding was $32.8 million and the average amount outstanding was $9.1 million. The average annual interest rate on commercial paper was 1.13 percent.

The Company's committed credit arrangements provide liquidity support to the Company's variable rate obligations and to its commercial paper program. At December 31, 2003, the amount of variable rate obligations outstanding requiring liquidity support was $7.7 million.

**Financial Instruments**

The Company enters into energy related derivatives to hedge exposures to electricity, gas, and other fuel price changes. However, due to cost-based rate regulations, the Company has limited exposure to market volatility in commodity fuel prices and prices of electricity. The Company has implemented fuel-hedging programs at the instruction of the GPSC. The Company also enters into hedges of forward electricity sales.

At December 31, 2003, the fair value of derivative energy contracts was reflected in the financial statements as follows:

| | Amounts |
|---|---|
| | (in thousands) |
| Regulatory liabilities, net | **$462** |
| Other comprehensive income | - |
| Net income | **1** |
| Total fair value | **$463** |

The fair value gains or losses for cash flow hedges that are recoverable through the regulatory fuel clauses are recorded as regulatory assets and liabilities and are recognized in earnings at the same time the hedged items affect earnings.

The Company enters into derivatives to hedge exposure to interest rate changes. Derivatives related to variable rate securities or forecasted transactions are accounted for as cash flow hedges. The derivatives are generally structured to match the critical terms of the hedged debt instruments; therefore, no material ineffectiveness has been recorded in earnings.

At December 31, 2003, the Company had $20 million notional amount of interest rate swaps outstanding with net fair value losses of $0.1 million as follows:

Cash Flow Hedges

| Maturity | Weighted Average Fixed Rate Paid | Notional Amount | Fair Value Gain/ (Loss) |
|---|---|---|---|
| | | (in millions) | |
| 2004 | 2.06% | $20 | $(0.1) |

The fair value gain or loss for cash flow hedges is recorded in other comprehensive income and is reclassified into earnings at the same time the hedged items affect earnings. For 2004, pre-tax losses of approximately $0.1 million are expected to be reclassified from other comprehensive income to interest expense.

**Common Stock Dividend Restrictions**

The Company's first mortgage bond indenture contains certain limitations on the payment of cash dividends on common stock. At December 31, 2003, approximately $68 million of retained earnings was restricted against the payment of cash dividends on common stock under the terms of the Indenture.

In accordance with the PUHCA, the Company is restricted from paying common dividends from paid-in capital without SEC approval

## 7. COMMITMENTS

**Construction Program**

The Company is engaged in a continuous construction program, currently estimated to total $51.8 million in 2004, $42.6 million in 2005, and $41.3 million in 2006. The construction program is subject to periodic review and revision, and actual construction costs may vary from the above estimates because of numerous factors. These factors include: changes in business conditions; acquisition of additional generating assets; revised load

growth estimates; changes in environmental regulations; changes in FERC rules and transmission regulations; increasing costs of labor, equipment, and materials; and cost of capital. The Company does not have any generating plants under construction. However, construction related to new transmission and distribution facilities and capital improvements to existing generation, transmission, and distribution facilities, including those necessary to meet environmental standards, will continue. At December 31, 2003, significant purchase commitments were outstanding in connection with the construction program.

**Fuel Commitments**

To supply a portion of the fuel requirements of its generating plants, the Company has entered into long-term commitments for the procurement of fuel. In most cases, these contracts contain provisions for price escalations, minimum purchase levels, and other financial commitments. In addition, SCS acts as agent for the Company, the other retail operating companies, Southern Power, and Southern Company GAS with regard to natural gas purchases. Natural gas purchase commitments contain given volumes with prices based on various indices at the actual time of delivery. Amounts included in the chart below represent estimates based on New York Mercantile future prices at December 31, 2003. Total estimated minimum long-term obligations at December 31, 2003 were as follows:

| Year | Natural Gas | Coal |
|---|---|---|
| | (in thousands) | |
| 2004 | $ 867 | $31,439 |
| 2005 | 8,651 | - |
| 2006 | 10,491 | - |
| 2007 | 7,620 | - |
| 2008 | 27,640 | - |
| 2009 and thereafter | 284,097 | - |
| Total commitments | $339,366 | $31,439 |

Additional commitments for fuel will be required to supply the Company's future needs.

SCS may enter into various types of wholesale energy and natural gas contracts acting as an agent for the Company and all of the other Southern Company retail operating companies, Southern Power, and Southern Company GAS. Under these agreements, each of the retail operating companies, Southern Power, and Southern Company GAS may be jointly and severally liable. The creditworthiness of Southern Power and Southern Company GAS is currently inferior to the creditworthiness of the retail operating companies. Accordingly, Southern Company has entered into keep-well agreements with the Company and each of the retail operating companies to insure they will not subsidize or be responsible for any costs, losses, liabilities, or damages resulting from the inclusion of Southern Power or Southern Company GAS as a contracting party under these agreements.

**Purchased Power Commitments**

The Company has entered into long-term commitments for the purchase of electricity from Southern Power. Estimated total long-term obligations at December 31, 2003 were as follows:

| Year | Commitments |
|---|---|
| | (in thousands) |
| 2004 | $ 13,221 |
| 2005 | 24,447 |
| 2006 | 27,343 |
| 2007 | 27,354 |
| 2008 | 27,366 |
| 2009 and thereafter | 171,262 |
| Total commitments | $290,993 |

**Operating Leases**

The Company has rental agreements with various terms and expiration dates. Rental expenses totaled $0.9 million for 2003, $0.6 million for 2002, and $0.5 million for 2001. Of these amounts, $0.8 million in 2003, $0.5 million in 2002, and $0.4 million in 2001 related to railcar leases and coal dozers and were recoverable through the Company's fuel cost recovery clause.

At December 31, 2003, estimated future minimum lease payments for noncancelable operating leases were as follows:

| Year | Railcars | Other | Total |
|---|---|---|---|
| | (in thousands) | | |
| 2004 | $ 429 | $ 415 | $ 844 |
| 2005 | 429 | 368 | 797 |
| 2006 | 429 | 331 | 760 |
| 2007 | 429 | 327 | 756 |
| 2008 | 429 | 306 | 735 |
| 2009 and thereafter | 4,035 | 220 | 4,255 |
| Total minimum payments | $6,180 | $1,967 | $8,147 |

## 8. QUARTERLY FINANCIAL INFORMATION (UNAUDITED)

Summarized quarterly financial data for 2003 and 2002 are as follows (in thousands):

| Quarter Ended | Operating Revenues | Operating Income | Net Income |
|---|---|---|---|
| **March 2003** | **$68,875** | **$ 9,015** | **$ 3,509** |
| **June 2003** | **78,242** | **13,535** | **6,296** |
| **September 2003** | **99,115** | **25,584** | **14,378** |
| **December 2003** | **67,823** | **2,323** | **(1,376)** |
| March 2002 | $57,378 | $ 6,865 | $ 1,802 |
| June 2002 | 78,360 | 14,594 | 7,035 |
| September 2002 | 96,971 | 24,654 | 13,148 |
| December 2002 | 66,843 | 4,701 | 895 |

The Company's business is influenced by seasonal weather conditions and a seasonal rate structure, among other factors.

SOUTHERN POWER COMPANY

FINANCIAL SECTION

## MANAGEMENT'S REPORT

**Southern Power Company 2003 Annual Report**

The management of Southern Power Company has prepared – and is responsible for – the financial statements and related information included in this report. These statements were prepared in accordance with accounting principles generally accepted in the United States and necessarily include amounts that are based on the best estimates and judgments of management. Financial information throughout this annual report is consistent with the financial statements.

The Company maintains a system of internal accounting controls to provide reasonable assurance that assets are safeguarded and that the accounting records reflect only authorized transactions of the Company. Limitations exist in any system of internal controls, however, based on a recognition that the cost of the system should not exceed its benefits. The Company believes its system of internal accounting controls maintains an appropriate cost/benefit relationship.

The Company's internal accounting controls are evaluated on an ongoing basis by the Company's internal audit staff. The Company's independent public accountants also consider certain elements of the internal control system in order to determine their auditing procedures for the purpose of expressing an opinion on the financial statements.

Southern Company's audit committee of its board of directors, composed of four independent directors, provides a broad overview of management's financial reporting and control functions. Periodically, this committee meets with management, the internal auditors and the independent public accountants to ensure that these groups are fulfilling their obligations and to discuss auditing, internal controls, and financial reporting matters. The internal auditors and independent public accountants have access to the members of the audit committee at any time.

Management believes that its policies and procedures provide reasonable assurance that the Company's operations are conducted according to a high standard of business ethics.

In management's opinion, the financial statements present fairly, in all material respects, the financial position, results of operations and cash flows of the Company in conformity with accounting principles generally accepted in the United States.

William P. Bowers
President and Chief Executive Officer

Cliff S. Thrasher
Senior Vice President, Comptroller
and Chief Financial Officer

## INDEPENDENT AUDITORS' REPORT

**Southern Power Company:**

We have audited the accompanying balance sheets of Southern Power Company (a wholly owned subsidiary of Southern Company) as of December 31, 2003 and 2002, and the related statements of income, comprehensive income, common stockholder's equity, and cash flows for the years then ended, and for the period from January 8, 2001 (inception) to December 31, 2001. These financial statements are the responsibility of Southern Power Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such financial statements (pages II-299 through II-312) present fairly, in all material respects, the financial position of Southern Power Company at December 31, 2003 and 2002, and the results of its operations and its cash flows for the years then ended, and for the period from January 8, 2001 (inception) to December 31, 2001 in conformity with accounting principles generally accepted in the United States of America.

Deloitte & Touche LLP

Atlanta, Georgia
March 1, 2004

## OVERVIEW OF EARNINGS AND BUSINESS ACTIVITIES

In January 2001, Southern Power Company was formed as a wholly-owned subsidiary of Southern Company and began commercial operations in August 2001.

### *Earnings*

The Company's 2003 earnings totaled $155 million, representing a $101 million increase over 2002. The 2003 increase is attributed to increased sales of wholesale capacity and energy from units placed in service during 2003 (Plant Franklin Unit 2, Plant Harris Units 1 and 2 and Plant Stanton A) and to a one-time gain of $50 million recognized in May 2003 upon the termination of Dynegy, Inc.'s (Dynegy) obligations under Power Purchase Agreements (PPAs). The increased sales came from new PPAs with Alabama Power and Georgia Power as well as the marketing of uncontracted capacity. As future PPAs become effective, the amount of uncontracted capacity available for external sales will decline significantly. Additional factors contributing to the increased earnings were non-recurring energy sales transactions related to test period generation for units placed in service in June 2003, as well as manufacturer's tax credits from the State of Georgia related to construction of Plants Dahlberg and Wansley. As of December 31, 2003, the Company had approximately 4,775 megawatts in commercial operation compared to approximately 2,400 in commercial operation at December 31, 2002.

The Company's 2002 earnings totaled $54.3 million, representing a $46.1 million increase over 2001. The 2002 increase was the result of increased sales of wholesale capacity and energy to affiliated and non-affiliated companies. The increased sales resulted primarily from the initiation of PPAs with Georgia Power and Savannah Electric and requirements agreements with 11 electric municipal cooperatives (EMCs) that went into effect in June 2002. Earnings for 2002 also reflected commercial operation of Plant Wansley Units 6 and 7 and Plant Franklin Unit 1 that began in June 2002 and a full year of Plant Dahlberg operations.

The Company began significant operations in July 2001 when Plant Dahlberg was transferred from Georgia Power, another wholly-owned subsidiary of Southern Company. The Company's 2001 earnings totaled $8.2 million and were derived primarily from the sales of wholesale capacity and energy to affiliated and non-affiliated companies.

### *Business Activities*

The Company constructs, owns, and manages Southern Company's competitive generating assets and sells electricity at market-based rates in the wholesale market.

Several factors affect the opportunities, challenges, and risks of the Company's competitive wholesale energy business. These factors include the ability to achieve energy sales growth while containing costs. Another major factor is federal regulatory policy, which may impact the Company's level of participation in this market. Future earnings for the business in the near term will depend, in part, upon completion of construction on new generating facilities, regulatory matters, including those related to affiliate contracts, energy sales, creditworthiness of customers, total generating capacity available in the Southeast, and the successful remarketing of capacity as current contracts expire.

## RESULTS OF OPERATIONS

A condensed income statement is as follows:

| | Amount | Increase (Decrease) From Prior Year | |
|---|---|---|---|
| | 2003 | 2003 | 2002 |
| | | *(in thousands)* | |
| Operating revenues | $681,780 | $383,012 | $269,467 |
| Fuel | 115,256 | 17,291 | 94,186 |
| Purchased power | 185,301 | 131,638 | 48,937 |
| Other operation and maintenance | 62,241 | 33,890 | 21,726 |
| Depreciation and amortization | 39,012 | 20,693 | 15,028 |
| Taxes other than income taxes | 6,665 | 2,390 | 3,882 |
| Total operating expenses | 408,475 | 205,902 | 183,759 |
| Operating income | 273,305 | 177,110 | 85,708 |
| Other income, net | (2,029) | 2,841 | (5,450) |
| Less -- | | | |
| Interest expense and other, net | 31,273 | 22,675 | 8,249 |
| Income taxes | 85,221 | 56,764 | 25,946 |
| Cumulative effect of accounting change | 367 | 367 | - |
| Net Income | $155,149 | $100,879 | $46,063 |

***Revenues***

Operating revenues in 2003 were $682 million, reflecting a $383 million increase from 2002. Operating revenues were positively impacted by a full year of energy and capacity sales through PPAs with Georgia Power and Savannah Electric that began in June 2002. New PPAs with Alabama Power and Georgia Power that commenced in June 2003 also contributed to the increase. Additionally, $80 million of contract termination revenues were recorded, as a result of the May 2003 termination of Dynegy's PPAs related to Plants Dahlberg and Franklin. See "Future Earnings Potential – Other Matters" and Note 3 to the financial statements under "Uncontracted Generating Capacity" for additional information. The remaining increases in operating revenues are a result of wholesale energy sales to non-affiliated companies under PPAs and through the Southern Company system power pool (Southern Pool). These sales were possible due to capacity made available from the commercial operation of Plant Franklin Unit 1 in June 2002, which was not fully obligated under a long-term PPA until June 2003 and test period energy sales transactions for Plant Franklin Unit 2 and Plant Harris Units 1 and 2 which were placed into commercial operation in June 2003. Capacity for Plant Harris Unit 2 is not obligated until June 2004. The Company also placed Plant Stanton A into commercial operation in October 2003. Other operating revenue increased by $9.9 million primarily due to transmission revenues, which were offset by additional transmission expense.

Operating revenues in 2002 were $298.8 million, reflecting a $269.5 million increase from 2001. In 2002, operating revenues were positively impacted by commercial operation of Plant Wansley Units 6 and 7 and Plant Franklin Unit 1 beginning in June 2002, and the initiation of PPAs with Georgia Power and Savannah Electric and requirements agreements with 11 EMCs in June 2002, as well as a full year of revenue from PPAs at Plant Dahlberg.

In 2001, operating revenues of $29.3 million were solely attributed to operations at Plant Dahlberg. The majority of the revenues, $26.4 million, were from capacity and energy sales to non-affiliated companies under PPAs. The remainder, $2.9 million, was from sales to affiliated companies through the Southern Pool.

Capacity revenues for 2003 were $201.6 million, or 33.4% of total revenues, excluding $80 million related to termination of contracts with Dynegy. Capacity revenues for 2002 were $123.9 million, or 41.5% of total revenues. Capacity revenues for 2001 were $18.6 million, or 63.5% of total revenues. These revenues are an integral component of the PPAs with both affiliate and non-affiliate customers.

Revenues from sales to affiliated companies through the Southern Pool that are not covered by PPAs will vary depending on demand and the availability and cost of generating resources at each company within the Southern Pool. These transactions do not have a significant impact on earnings since the energy is generally sold at cost.

***Expenses***

Natural gas fuel costs constitute a significant expense for the Company. The increase in fuel expense in 2003 is primarily due to the operation of Plant Wansley Units 6 and 7 and Plant Franklin Unit 1 for a full year, as well as new units at Plant Franklin and Plant Harris Units 1 and 2 which began operations in June 2003. In addition, the average cost of natural gas per decatherm increased 24% from 2002 to 2003. The increase in fuel expense in 2002 was primarily due to the commercial operation of Plant Wansley Units 6 and 7 and Plant Franklin Unit 1 beginning in June 2002, and a full year of operation for Plant Dahlberg. In addition, the average cost of natural gas per decatherm increased 33% from 2001 to 2002. The Company's PPAs generally provide that the purchasers are responsible for substantially all of the cost of fuel relating to energy delivered under such PPAs; therefore, these fuel cost increases do not have a significant impact on net income.

Purchased power from non-affiliates and affiliates increased by $27 million and $105 million, respectively, in 2003, and by $33.3 million and $15.6 million, respectively, in 2002, in all cases to meet the demands of the Company's contractual sales commitments.

Expenses from purchased power transactions will vary depending on demand and the availability and cost of generating resources accessible throughout the Southern Pool. Load requirements are submitted to the Southern Pool on an hourly basis and are fulfilled with the lowest cost alternative, whether that is Southern Power-owned generation, affiliate-owned generation or external purchases. During 2003, purchased power from affiliates increased as a result of the availability of lower cost generating capacity primarily due to the mild summer weather in Southern Company's retail service territory.

In 2003, other operation and maintenance expense increased by $33.9 million mainly due to increased administrative and general expenses of $12.7 million and other production expenses of $21.2 million. These increases are primarily attributed to a full year of operation at Plant Wansley Units 6 and 7 and Plant Franklin Unit 1, as well as the commercial operation of Plant Franklin Unit 2 and Plant Harris Units 1 and 2 beginning in June 2003.

In 2002, other operation and maintenance expense increased by $21.7 million mainly due to increased administrative and general expenses of $12.3 million and other production expenses of $9.4 million. These increases are primarily attributed to the June 2002 commercial operation of Plant Wansley Units 6 and 7 and Plant Franklin Unit 1.

Other operation expense in 2001 included administrative and general expenses of $5.6 million and other production expenses of $0.6 million related to the startup of the Company and the transfer of Plant Dahlberg in July 2001.

In 2003 and 2002, depreciation and amortization increased as a direct result of the commercial operation of Plant Wansley Units 6 and 7 and Plant Franklin Unit 1 in June 2002 and Plant Franklin Unit 2 and Plant Harris Units 1 and 2 in June 2003. The 2002 increase also reflects a full year of depreciation related to Plant Dahlberg, which was placed into service in July 2001.

In 2003 and 2002, the increases in taxes other than income taxes relate to property taxes for the commercial operation of Plant Wansley Units 6 and 7 and Plant Franklin Unit 1 in June 2002 and Plant Franklin Unit 2 and Plant Harris Units 1 and 2 in June 2003. The 2002 increase also reflects a full year of Plant Dahlberg's property taxes.

Interest expense in 2003 increased by $22.7 million from the amount recorded in 2002. This increase is primarily attributed to a lower percentage of interest costs being capitalized as projects have reached completion and an increase in the amount of long-term debt outstanding. Interest expense in 2002 increased by $8.2 million from the amount recorded in 2001. This increase in 2002 is primarily attributed to increased debt associated with the Company's ongoing construction program.

Changes in other income, net in 2003 and 2002 resulted primarily from unrealized gains and losses on derivative energy contracts. See "Financial Condition and Liquidity – Market Price Risk" herein and Notes 1 and 6 to the financial statements under "Financial Instruments."

**Effects of Inflation**

The Company is subject to long-term contracts and income tax laws that are based on the recovery of historical costs. While the inflation rate has been relatively low in recent years, it continues to have an adverse effect on the Company because of the large investment in generating facilities with long economic lives. Conventional accounting for historical cost does not recognize this economic loss nor the partially offsetting gain that arises through financing facilities with fixed-money obligations such as long-term debt.

**Future Earnings Potential**

***General***

The results of operations for the past three years are not necessarily indicative of future earnings potential. Several factors affect the opportunities, challenges, and risks of the Company's competitive wholesale energy business. These factors include the ability to achieve energy sales growth while containing costs. Another major factor is federal regulatory policy, which may impact the Company's level of participation in this market. The level of future earnings depends on numerous factors including completion of construction on new generating facilities, regulatory matters, including those related to affiliate contracts, energy sales, creditworthiness of customers, total generating capacity available in the Southeast, and the successful remarketing of capacity as current contracts expire.

The Company is working to maintain and expand its share of wholesale energy sales in the Southeastern power markets. By the end of 2005, the Company plans to have approximately 6,000 megawatts of available generating capacity in commercial operation. At December 31, 2003, 4,775 megawatts were in commercial operation.

Although under some of the Company's PPAs energy will be sold to Southern Company's five retail operating companies, the Company's generating facilities will not be in the retail operating companies' regulated rate bases, and

the Company will not be able to seek recovery from the affiliated companies' ratepayers for construction, repair, environmental or maintenance costs. It is expected that the capacity payments in the PPAs will produce sufficient cash flow to meet these costs, pay debt service and provide an equity return. However, the Company's overall profit will depend on numerous factors, including efficient operation of its generating facilities.

As a general matter, existing PPAs provide that the purchasers are responsible for substantially all of the cost of fuel relating to the energy delivered under such PPAs. To the extent a particular generating facility does not meet the operational requirements contemplated in most PPAs, the Company may be responsible for excess fuel costs. With respect to fuel transportation risk, most of the Company's PPAs provide that the purchasers are responsible for procuring and transporting the fuel to the particular generating facility.

The Company's PPAs with non-affiliated counterparties have provisions that require the posting of collateral or an acceptable substitute guarantee in the event that (a) Standard & Poor's or Moody's downgrades the credit ratings of such counterparty to below investment grade, or, (b) the counterparty is not rated or fails to maintain a minimum coverage ratio. The PPAs are expected to provide the Company with a stable source of revenue during their respective terms.

Fixed and variable operation and maintenance (O&M) costs will be covered either through capacity charges or other charges based on dollars per kilowatt year or dollars per megawatt hour. The Company has also entered into long-term service contracts with General Electric (GE) to reduce its exposure to certain O&M costs relating to GE equipment.

***FERC Matters***

*Market-Based Rate Authority*

The Company currently has general authorization from the Federal Energy Regulatory Commission (FERC) to sell power to nonaffiliates at market-based prices. In addition, each of the retail operating companies has obtained FERC approval to sell power to nonaffiliates at market-based prices under specific contracts. Southern Power and the retail operating companies also have FERC authority to make short-term opportunity sales at market rates. Specific FERC approval must be obtained with respect to a market-based contract with an affiliate. In November 2001, the FERC modified the test it uses to consider utilities' applications to charge market-based rates and adopted a new test called the Supply Margin Assessment (SMA). The FERC applied the SMA to several utilities, including Southern Company's retail operating companies, and found them to be "pivotal suppliers" in their service areas and ordered the implementation of several mitigation measures. SCS, on behalf of the retail operating companies and others sought rehearing of the FERC order, and the FERC delayed the implementation of certain mitigation measures. SCS, on behalf of the retail operating companies and others submitted comments to the FERC in 2002 regarding these issues. In December 2003, the FERC issued a staff paper discussing alternatives and held a technical conference in January 2004. Southern Company anticipates that the FERC will address the requests for rehearing in the near future. Regardless of the outcome of the SMA proposal, the FERC retains the ability to modify or withdraw the authorization for any seller to sell at market-based rates, if it determines that the underlying conditions for having such authority are no longer applicable. In that event, the Company would be required to obtain FERC approval of rates based on cost of service, which may be lower than those in negotiated market-based rates. The final outcome of this matter will depend on the form in which the SMA test and mitigation measures rules may be ultimately adopted and cannot be determined at this time.

PPAs by Georgia Power and Savannah Electric for the Company's Plant McIntosh capacity were certified by the Georgia Public Service Commission (GPSC) in December 2002 after a competitive bidding process. In April 2003, the Company applied for FERC approval of these PPAs. Interveners opposed the FERC's acceptance of the PPAs, alleging that the PPAs do not meet the applicable standards for market-based rates between affiliates. In July 2003, the FERC accepted the PPAs to become effective as scheduled on June 1, 2005, subject to refund, and ordered that hearings be held to determine: (a) whether, in the design and implementation of the GPSC competitive bidding process, Georgia Power and Savannah Electric unduly preferred the Company; (b) whether the analysis of the competitive bids unduly favored the Company, particularly with respect to evaluation of non-price factors; (c) whether Georgia Power and Savannah Electric selected their affiliate, the Company, based upon a reasonable combination of price and non-price factors; (d) whether the Company received an undue preference or competitive advantage in the competitive bidding process as a result of access to its affiliate's transmission system; (e) whether and to what extent the PPAs impact wholesale competition; and (f) whether the PPAs are just and reasonable and not unduly

discriminatory. Hearings are scheduled to begin in March 2004. Management believes that the PPAs should be approved by the FERC; however, the ultimate outcome of this matter cannot now be determined.

***Industry Restructuring***

The electric utility industry in the United States is continuing to evolve as a result of regulatory and competitive factors. Among the early primary agents of change was the Energy Policy Act of 1992 (Energy Act). The Energy Act allowed independent power producers to access a utility's transmission network in order to sell electricity to other utilities.

Since 2001, merchant energy companies and traditional electric utilities with significant energy marketing and trading activities have come under severe financial pressures. Many of these companies have completely exited or drastically reduced all energy marketing and trading activities and sold foreign and domestic electric infrastructure assets. The Company has not experienced any material adverse financial impact regarding its limited energy trading operations and recent generating capacity additions. In general, the Company only constructs new generating capacity after entering into long-term capacity contracts for the new facilities, which is optimized by limited energy trading activities.

***Power Sales Agreements***

In June 2003, the Company placed Plant Franklin Unit 2 and Plant Harris Units 1 and 2 into commercial operation. In October 2003, the Company placed Plant Stanton A into commercial operation. In June 2004, the Company's PPA with Georgia Power will begin for Plant Harris Unit 2. PPAs for the other units became effective upon commercial operation. The Company also has Plant McIntosh Units 10 and 11 under construction. Most of the Company's generating capacity in operation, under construction, or planned has been sold under PPAs.

In June 2002, PPAs with Georgia Power and Savannah Electric and requirements agreements with 11 EMCs went into effect upon the commercial operation of Plant Wansley Units 6 and 7 and Plant Franklin Unit 1.

Also, effective in January 2003, the Company entered into contracts with North Carolina Municipal Power Authority 1 (NCMPA) and the City of Dalton (Dalton). Under the NCMPA contract, the Company is responsible for supplying NCMPA's capacity and energy needs in excess of its existing resources and disposing of its surplus energy through December 31, 2004. Under the Dalton contract, the Company is responsible for supplying Dalton's requirements for capacity and energy in excess of Dalton's existing resources for the next 15 years, with a customer option to convert to a fixed capacity purchase at the end of year 10.

In July 2003, the Company entered into a requirements service agreement with Piedmont Municipal Power Agency (PMPA). PMPA is a full requirements provider to 10 South Carolina cities. Under this agreement, the Company will be responsible for supplying PMPA's capacity and energy needs in excess of PMPA's existing resources and will purchase PMPA's surplus energy. The initial contract term is for 5 years beginning in 2006 with mutual renewal options through 2015.

The Company has entered into long-term power sales agreements for portions of its generating unit capacity as follows:

| Project | Capacity (megawatts)* | Contract Term |
|---|---|---|
| **Affiliated** | | |
| Franklin Unit 1 | 571 ** | 6/02-5/10 |
| Franklin Unit 2 | 615 *** | 6/03-5/11 |
| Wansley Units 6 & 7 | 1,134 | 6/02-12/09 |
| Harris Unit 1 | 618 | 6/03-5/10 |
| Harris Unit 2 | 618 **** | 6/04-5/19 |
| McIntosh | 1,240 | 6/05-5/20 |
| Total Affiliated | 4,796 | |
| **Non-Affiliated** | | |
| Dahlberg Units 1-7 | 578 | 6/00-12/04 |
| Stanton A | 396 | 11/03-11/13 |
| Total Non-affiliated | 974 | |

* According to the original contract terms
** 370 megawatts during the first year
*** 400 megawatts during the first year
****Contract does not begin until second year of operation of Plant Harris Unit 2.

Capacity revenues from these long-term power sales agreements amounted to $201.6 million, $123.9 million, and $18.6 million for the periods ended December 31, 2003, 2002, and 2001, respectively. Forecasted future capacity revenues under existing PPAs are expected to total $3.3 billion for affiliated contracts and $1.1 billion

for non-affiliated contracts. These capacity revenues will continue to represent approximately 40% of total annual revenues through 2007. At that point, as certain existing contracts reach termination, assuming no new contracts, capacity revenues are expected to decline to approximately 25% of total annual revenues. Consistent with the Company's strategy to sell energy under long-term contracts, capacity payments will continue to be an integral part of future contract negotiations. As such, capacity revenues will continue to be a significant portion of annual revenues.

***Environmental Matters***

The Company's operations are subject to extensive regulation by state and federal environmental agencies under a variety of statutes and regulations governing environmental media, including air, water and land resources. Compliance with these environmental requirements may involve significant costs. Such environmental, natural resource and land use concerns, including the applicability of air quality limitations, the availability of water withdrawal rights, uncertainties regarding aesthetic impacts such as increased light or noise, and concerns about potential adverse health impacts, can also increase the cost of siting and operating any type of future electric generating facility.

Federal and state environmental regulatory agencies are actively considering and developing additional control strategies for emission of air pollution from industrial sources, including electric generating facilities. Among the various air quality matters being planned or considered for regulation by the federal Environmental Protection Agency and/or relevant state agencies are: designation of new target areas as non-attainment for ozone and particulate matter under applicable federal air quality standards; the reduction of nitrogen oxide and particulate matter emissions to reduce regional haze and visibility impairment in sensitive areas; proposed reductions in sulfur dioxide and nitrogen oxide emissions to reduce interstate transport of such pollutants; regulations addressing the construction or modification of sources of regulated pollutants; the development of appropriate control standards and technologies for emissions of mercury; and the reduction of so-called "greenhouse gases" (such as carbon dioxide) to address concerns over global climate change. Development and implementation of final federal and state rules on these issues could require further substantial reductions in all air emissions associated with electricity generation.

Federal and state environmental regulatory agencies are also reviewing and evaluating various other matters, including hazardous waste disposal requirements, requirements for cooling water intake structures and establishment of total pollutant loads for certain impaired waters. The impact of any new standards or requirements will depend on the development and implementation of applicable regulations.

Several major pieces of environmental legislation are periodically considered for reauthorization or amendment by Congress. These include: the Clean Air Act; the Clean Water Act; the Comprehensive Environmental Response, Compensation, and Liability Act; the Resource Conservation and Recovery Act; the Toxic Substances Control Act; the Emergency Planning & Community Right-to-Know Act; and the Endangered Species Act. In 2003, several major bills to amend the Clean Air Act to impose more stringent emissions limitations were proposed to further limit power plant emissions of sulfur dioxide, nitrogen oxides, mercury, and, in some cases, carbon dioxide. The cost impacts of such legislation would depend upon the specific requirements enacted and cannot be determined at this time.

Compliance with possible additional federal or state legislation or regulations related to global climate change or other environmental and health concerns could also significantly affect the Company. The impact of any new legislation, changes to existing legislation, or environmental regulations could affect many areas of the Company's operations. While all of the Company's PPAs generally contain provisions that permit charging the purchaser with some of the new costs incurred as a result of changes in environmental laws and regulations, the full impact of any such regulatory or legislative changes cannot be determined at this time.

Litigation over environmental issues and claims of various types, including property damage, personal injury and citizen enforcement of environmental requirements, has increased generally throughout the United States. In particular, personal injury claims for damages caused by alleged exposure to hazardous materials have become more frequent. The ultimate outcome of such litigation against the Company cannot be predicted at this time; however, management does not anticipate that the liabilities, if any, arising from such current proceedings would have a material adverse effect on the Company's financial statements.

*Other Matters*

On May 21, 2003, the Company entered into an agreement with Dynegy that resolved and terminated in 2003 all outstanding matters related to capacity sales contracts with subsidiaries of Dynegy. The termination payments from Dynegy resulted in a one-time gain to the Company of approximately $50 million. As a result of the Dynegy capacity contract terminations, the Company is completing limited construction activities on Plant Franklin Unit 3 to preserve the long-term viability of the project but has deferred final completion until the 2008-2011 period. The length of the deferral period will depend on forecasted capacity needs and other wholesale market opportunities. The Company is continuing to explore alternatives for its existing uncontracted capacity. See Note 3 to the financial statements under "Uncontracted Generating Capacity" for additional information.

The Company is involved in various matters being litigated and regulatory matters that could affect future earnings. See Note 3 to the financial statements for information regarding material issues.

## ACCOUNTING POLICIES

### Application of Critical Accounting Policies and Estimates

The Company prepares its consolidated financial statements in accordance with accounting principles generally accepted in the United States. Significant accounting policies are described in Note 1 to the financial statements. In the application of these policies, certain estimates are made that may have a material impact on the Company's results of operations and related disclosures. Different assumptions and measurements could produce estimates that are significantly different from those recorded in the financial statements. Senior management has discussed the development and selection of the critical accounting policies and estimates described below with the Audit Committee of Southern Company's Board of Directors.

*Revenue Recognition*

The Company's revenue recognition depends on appropriate classification and documentation of transactions in accordance with Financial Accounting Standards Board (FASB) Statement No. 133, Accounting for Derivative Instruments and Hedging Activities, as amended and interpreted. In general, the Company's power sale transactions can be classified in one of four categories: non-derivatives, normal sales, cash flow hedges, and mark to market. For more information on derivative transactions, see "Financial Condition and Liquidity – Market Price Risk" and Notes 1 and 6 to the financial statements under "Financial Instruments." The Company's revenues are dependent upon significant judgments used to determine the appropriate transaction classification, which must be documented upon the inception of each contract. Factors that must be considered in making these determinations include:

- Assessing whether a sales contract meets the definition of a lease
- Assessing whether a sales contract meets the definition of a derivative
- Assessing whether a sales contract meets the definition of a capacity contract
- Assessing the probability at inception and throughout the term of the individual contract that the contract will result in physical delivery
- Ensuring that the contract quantities do not exceed available generating capacity
- Identifying the hedging instrument, the hedged transaction, and the nature of the risk being hedged
- Assessing hedge effectiveness at inception and throughout the contract term.

Normal Sale and Non-Derivative Transactions

The Company considers derivative contracts, including capacity contracts, that provide for the sale of electricity to be physically delivered in quantities less than the Company's available generating capacity to be normal sales. In accordance with Statement No. 133, such transactions are accounted for as executory contracts and are not subject to mark to market accounting. Therefore, the related revenue is recognized, in accordance with Emerging Issues Task Force (EITF) No. 91-6, Revenue Recognition of Long-Term Power Sales Contracts, on an accrual basis in amounts equal to the lesser of the levelized amount or the amount billable under the contract, over the respective contract periods. Revenues from transactions that do not meet the definition of a derivative are also recorded in this manner. Contracts recorded on the accrual basis represented the majority of the Company's operating revenues for the year ended December 31, 2003.

Cash Flow Hedge Transactions

The Company has designated other derivative contracts for sales of electricity as cash flow hedges of anticipated sale transactions. These contracts are marked to market

through Other Comprehensive Income over the life of the contract. Realized gains and losses are then recognized in revenues as incurred. At December 31, 2003, approximately $1 million in unrealized gains (losses) were deferred in Other Comprehensive Income.

Mark to Market Transactions
Contracts for sales of electricity that are not normal sales and are not designated as cash flow hedges are marked to market and recorded directly through net income. Net unrealized losses on such contracts totaled approximately $1.9 million for the year ended December 31, 2003.

*Asset Impairments*

The Company's investments in long-lived assets are primarily generation assets, whether in service or under construction. The Company evaluates the carrying value of these assets under FASB Statement No. 144, Accounting for the Impairment or Disposal of Long-lived Assets, whenever indicators of potential impairment exist. Examples of impairment indicators could include significant changes in construction schedules, current period losses combined with a history of losses, or a projection of continuing losses or a significant decrease in market prices. If an indicator exists, the asset is tested for recoverability by comparing the asset carrying value to the sum of the undiscounted expected future cash flows directly attributable to the asset. A high degree of judgment is required in developing estimates related to these evaluations, which are based on projections of various factors, including the following:

- Future demand for electricity based on projections of economic growth and estimates of available generating capacity
- Future power and natural gas prices, which have been quite volatile in recent years
- Future operating costs.

To date, the Company's evaluations of its assets have not required any impairment to be recorded. See Note 3 to the financial statements under "Uncontracted Generating Capacity" for additional information.

**New Accounting Standards**

Prior to January 2003, the Company accrued for the ultimate cost of retiring most long-lived assets over the life of the related asset through depreciation expense. FASB Statement No. 143, Accounting for Asset Retirement Obligations established new accounting and reporting standards for legal obligations associated with the ultimate cost of retiring long-lived assets. The present value of the ultimate costs for an asset's future retirement is recorded in the period in which the liability is incurred. The costs are capitalized as part of the related long-lived asset and depreciated over the asset's useful life. Additionally, non-regulated companies are no longer permitted to continue accruing future retirement costs for long-lived assets that they do not have a legal obligation to retire.

The Company has no liability for asset retirement obligations. In January 2003, the Company recorded a reduction to the accumulated reserve for depreciation and a cumulative effect of change in accounting principle of $0.6 million ($0.4 million after-tax). This represents removal costs accrued prior to the implementation of Statement No. 143.

FASB Statement No. 149, Amendment of Statement 133 on Derivative Instruments and Hedging Activities, which further amends and clarifies the accounting and reporting for derivative instruments, became effective generally for financial instruments entered into or modified after June 30, 2003. Current interpretations of Statement No. 149 indicate that certain electricity forward transactions subject to unplanned netting -- including those typically referred to as "book outs" -- may only qualify as cash flow hedges if an entity can demonstrate that physical delivery or receipt of power occurred. The Company's forward electricity contracts continue to be exempt from fair value accounting requirements or to qualify as cash flow hedges, with the related gains and losses deferred in other comprehensive income. The implementation of Statement No. 149 did not have a material effect on the Company's financial statements.

In July 2003, the EITF of FASB issued EITF No. 03-11, which became effective on October 1, 2003. The standard addresses the reporting of realized gains and losses on derivative instruments and is being interpreted to require book outs to be recorded on a net basis in operating revenues. Adoption of this standard did not have a material impact on the Company's financial statements.

## FINANCIAL CONDITION AND LIQUIDITY

**Overview**

The major change in the Company's financial condition during 2003 was the addition of approximately $344.4 million to utility plant related to on-going construction of combined-cycle units. The funds for these additions were provided by the Company's credit facility, the issuance of

senior notes in July 2003, commercial paper, capital contributions and subordinated loans from Southern Company, and internally generated cash from operations. The Statements of Cash Flows provide additional information.

**Sources of Capital**

The Company will use external funds, equity capital from Southern Company and internally generated cash from operations to finance its construction program. External funds will be from the issuance of unsecured senior debt and commercial paper or utilization of existing credit arrangements from banks.

Currently, Southern Company provides limited credit support to the Company. See Note 6 to the financial statements under "Bank Credit Arrangements" for additional information. The Southern Company system does not maintain a centralized cash or money pool. Therefore, funds of each company are not commingled with funds of any other company. In accordance with the Public Utility Holding Company Act, most loans between affiliated companies must be approved in advance by the Securities and Exchange Commission (SEC).

The Company's current liabilities frequently exceed current assets because of the continued use of short-term debt as an interim funding source for the Company's ongoing construction program and the seasonality of the electricity business.

At December 31, 2003, the Company had approximately $2.8 million of cash and cash equivalents to meet short-term cash needs and contingencies. To meet liquidity and capital resource requirements, the Company had at December 31, 2003, $650 million of unused committed credit arrangements with banks as shown in the following table.

At the beginning of 2004, bank arrangements are as follows:

| | | Expires | |
|---|---|---|---|
| Total | Unused | 2004 | 2005 & beyond |
| | | (in millions) | |
| $650 | $650 | $-- | $650 |

The $650 million of unused credit arrangements is committed to provide liquidity support to the Company's commercial paper program. The commercial paper program is used to finance acquisition and construction costs related to gas-fired electric generating facilities and for general corporate purposes, subject to borrowing limitations for each generating facility. The credit arrangements permit the Company to fund construction of future generating facilities upon meeting certain requirements. At December 31, 2003, the Company had $114.3 million in outstanding commercial paper. See Note 6 to the financial statements for additional information.

**Financing Activities**

During 2003, the Company repaid subordinated loans from Southern Company of approximately $20 million, net of additional borrowings. In March 2003, $190 million of notes payable to Southern Company were converted to a capital contribution from Southern Company. In September 2003, the SEC approved the Company's payment of dividends in an amount up to $190 million to Southern Company from capital surplus. The first such dividend of $77 million, recorded as a reduction of paid-in capital, was made in October 2003. Equity contributions and subordinated loans from Southern Company totaled $850 million at the end of 2003.

In July 2003, the Company issued $575 million of senior notes. The proceeds from the sale were used to repay a substantial portion of existing short-term indebtedness, to settle interest rate hedges associated with such senior notes and for general corporate purposes. See Note 6 to the financial statements under "Long-Term Debt" and "Financial Instruments" for further information. The interest rate swap agreements that the Company entered into in anticipation of this issuance were settled at a $93.3 million loss. This amount has been deferred in other comprehensive income and will be amortized to interest expense over the life of the senior notes.

**Credit Rating Risk**

The Company does not have any credit agreements that would require material changes in payment schedules or terminations as a result of a credit rating downgrade. There are contracts that could require collateral -- but not accelerated payment -- in the event of a credit rating change to below investment grade. These contracts are primarily for physical electricity purchases and sales, fixed-price physical gas purchases and agreements covering interest rate swaps. At December 31, 2003,

the maximum potential collateral requirements under the electricity sales contracts were approximately $161 million. Generally, collateral may be provided for by a Southern Company guaranty, a letter of credit, or cash. At December 31, 2003, there were no material collateral requirements for the gas purchase contracts.

**Market Price Risk**

The Company is exposed to market risks, including changes in interest rates, certain energy-related commodity prices, and, occasionally, currency exchange rates. To manage the volatility attributable to these exposures, the Company nets the exposures to take advantage of natural offsets and enters into various derivative transactions for the remaining exposures pursuant to the Company's policies in areas such as counterparty exposure and hedging practices. Company policy is that derivatives are to be used primarily for hedging purposes. Derivative positions are monitored using techniques that include market valuation and sensitivity analysis.

Because energy from the Company's facilities is primarily sold under long-term PPAs with tolling agreements and provisions shifting substantially all of the responsibility for fuel cost to the purchasers, the Company's exposure to market volatility in commodity fuel prices and prices of electricity is limited. To mitigate residual risks in those areas, the Company enters into fixed-price contracts for the sale of electricity. In connection with the transfers of Plant Franklin in 2001 and Plant Wansley in 2002 to the Company, Georgia Power transferred approximately $5.6 million and $1.6 million, respectively, in derivative assets relating to electric and gas forward contracts in effect at the applicable date of the transfers. These contracts were recorded at fair value on the applicable date of the transfer, which was equal to Georgia Power's carrying amount. Following the transfer, these contracts were marked to market through income until realized and settled in August 2003.

In prior years, to reduce its exposure to fluctuations in the exchange rate for Euros, the Company entered into forward Euro purchase contracts designated as fair value hedges of certain firm equipment purchase commitments that required payment in Euros. As of May 2003, all Euro payments have been made and the resulting gains associated with the hedges effectively reduced the purchase price of the equipment, which is included in plant-in-service or construction work in progress.

The fair value of changes in derivative energy contracts and year-end valuations were as follows at December 31:

| | Changes in Fair Value | |
|---|---|---|
| | 2003 | 2002 |
| | *(in thousands)* | |
| Contracts beginning of year | $3,864 | $5,496 |
| Contracts realized or settled | (4,416) | (4,336) |
| New contracts at inception | - | 1,576 |
| Current period changes | 1,217 | 1,128 |
| Contracts end of year | $665 | $3,864 |

At December 31, 2003, all of these contracts are actively quoted and mature within one year.

Unrealized pre-tax gains and losses on electric and gas contracts used to hedge anticipated purchases and sales are deferred in other comprehensive income. Gains and losses on contracts that do not represent hedges are recognized in the income statement as incurred. At December 31, 2003, the fair value of derivative energy contracts was as follows:

| | Amounts |
|---|---|
| | (in thousands) |
| Other comprehensive income | $950 |
| Net income | (285) |
| Total fair value | $665 |

Approximately $(1.9) million, $(4.9) million and $0.6 million of unrealized pre-tax gains (losses) were recognized in income in 2003, 2002, and 2001, respectively. The Company is exposed to market price risk in the event of nonperformance by counterparties to the derivative energy contracts. The Company's policy is to enter into agreements with counterparties that have investment grade credit ratings by Moody's and Standard & Poor's, or with counterparties who have posted collateral to cover potential credit exposure. Therefore, the Company does not anticipate market risk exposure from nonperformance by the counterparties. For additional information, see Notes 1 and 6 to the financial statements under "Financial Instruments."

At December 31, 2003, the Company had no variable long-term debt outstanding. Therefore, there would be no effect on annualized interest expense related to long-term debt if the Company sustained a 100 basis point change in interest rates. The Company is not aware of any facts or circumstances that would significantly affect such exposures in the near term. See "Financing Activities" herein and Notes 1 and 6 to the financial statements under the heading "Financial Instruments" for additional information.

**Capital Requirements and Contractual Obligations**

The construction program of the Company is currently estimated to be $259 million for 2004, $254 million for 2005, and $355 million for 2006. Actual construction costs may vary from these estimates because of changes in factors such as: business conditions; environmental regulations; FERC rules and transmission regulations; load projections; the cost and efficiency of construction labor, equipment, and materials; and the cost of capital. The Company has approximately 1,240 megawatts of new generating capacity scheduled to be placed in service by 2005.

Other funding requirements related to obligations associated with scheduled maturities of long-term debt, as well as the related interest, leases, and other purchase commitments are as follows. See Notes 1, 6, and 7 to the financial statements for additional information.

| | 2004 | 2005-2006 | 2007-2008 | After 2008 | Total |
|---|---|---|---|---|---|
| | | | (in millions) | | |
| Long-term debt[a] -- | | | | | |
| Principal | $0.2 | $0.4 | $1.3 | $1,150.0 | $1,151.9 |
| Interest | 64.1 | 128.1 | 128.0 | 340.0 | 660.2 |
| Operating leases | 0.3 | 0.7 | 0.7 | 9.7 | 11.4 |
| Purchase commitments[b] -- | | | | | |
| Capital[c] | 259.4 | 609.4 | - | - | 868.8 |
| Natural gas[d] | 95.2 | 101.0 | 56.0 | 430.8 | 683.0 |
| Long-term service agreements | 17.5 | 42.7 | 75.8 | 694.7 | 830.7 |
| Total | $436.7 | $882.3 | $261.8 | $2,625.2 | $4,206.0 |

(a) All amounts are reflected based on final maturity dates. The Company will continue to retire higher-cost securities and replace these obligations with lower-cost capital if market conditions permit.

(b) The Company generally does not enter into non-cancelable commitments for other operation and maintenance expenditures. Total other operation and maintenance expenses for the last three years were $62.2 million, $28.4 million, and $6.6 million, respectively.

(c) The Company forecasts capital expenditures over a three-year period. Amounts represent current estimates of total expenditures. At December 31, 2003, significant purchase commitments were outstanding in connection with the construction program.

(d) Natural gas purchase commitments are based on various indices at the time of delivery. Amounts reflected have been estimated based on New York Mercantile future prices at December 31, 2003.

## Cautionary Statement Regarding Forward-Looking Information

The Company's 2003 Annual Report includes forward-looking statements in addition to historical information. Forward-looking information includes, among other things, statements concerning the strategic goals for the Company, estimated construction and other expenditures, and the Company's projections for energy sales and its goals for future generating capacity, and earnings growth. In some cases, forward-looking statements can be identified by terminology such as "may," "will," "could," "should," "expects," "plans," "anticipates," "believes," "estimates," "projects," "predicts," "potential," or "continue" or the negative of these terms or other comparable terminology. The Company cautions that there are various important factors that could cause actual results to differ materially from those indicated in the forward-looking statements; accordingly, there can be no assurance that such indicated results will be realized. These factors include:

- the impact of recent and future federal and state regulatory change, including legislative and regulatory initiatives regarding deregulation and restructuring of the electric utility industry and also changes in environmental, tax and other laws and regulations to which the Company is subject, as well as changes in application of existing laws and regulations;
- current and future litigation, regulatory investigations, proceedings or inquiries;
- the effects, extent, and timing of the entry of additional competition in the markets in which the Company operates;
- the impact of fluctuations in commodity prices, interest rates, and customer demand;
- available sources and costs of fuels;
- ability to control costs;
- advances in technology;
- state and federal rate regulations;
- effects of and changes in political, legal, and economic conditions and developments in the United States, including the current soft economy;
- internal restructuring or other restructuring options that may be pursued;
- potential business strategies, including acquisitions or dispositions of assets, which cannot be assured to be completed or beneficial to the Company;
- the ability of counterparties of the Company to make payments as and when due;
- the ability to obtain new short- and long-term contracts with neighboring utilities;
- the direct or indirect effects on the Company's business resulting from the terrorist incidents on September 11, 2001, or any similar such incidents or responses to such incidents;
- financial market conditions and the results of financing efforts, including the Company's credit ratings;
- the ability of the Company to obtain additional generating capacity at competitive prices;
- weather and other natural phenomena;
- the direct or indirect effects on the Company's business resulting from the August 2003 power outage in the Northeast, or any similar such incidents;
- the effect of accounting pronouncements issued periodically by standard-setting bodies; and
- other factors discussed elsewhere herein and in other reports (including the Form 10-K) filed from time to time by the Company with the SEC.

## STATEMENTS OF COMPREHENSIVE INCOME

**For the Years Ended December 31, 2003 and 2002 and**
**for the Period from January 8, 2001 (Inception) to December 31, 2001**
**Southern Power Company 2003 Annual Report**

| | 2003 | 2002 | 2001 |
|---|---|---|---|
| | | *(in thousands)* | |
| **Net income** | **$155,149** | $54,270 | $ 8,207 |
| Other comprehensive income (loss): | | | |
| Changes in fair value of qualifying hedges, net of tax of $(7,872), $(34,030), and $4,219, respectively | **(12,788)** | (54,360) | 6,689 |
| Less: Reclassification adjustment for amounts included in net income, net of tax of $1,868 and $355, respectively | **3,429** | 568 | - |
| Total other comprehensive income (loss) | **(9,359)** | (53,792) | 6,689 |
| **Comprehensive Income** | **$145,790** | $478 | $14,896 |

The accompanying notes are an integral part of these financial statements.

## 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

### General

Southern Power Company (the Company) is a wholly owned subsidiary of Southern Company, which is also the parent company of five retail operating companies, Southern Company Services (SCS), Southern Communication Services (Southern LINC), Southern Company Gas (Southern Company GAS), Southern Company Holdings (Southern Holdings), Southern Nuclear Operating Company (Southern Nuclear), Southern Telecom, and other direct and indirect subsidiaries. The retail operating companies -- Alabama Power Company, Georgia Power Company, Gulf Power Company, Mississippi Power Company, and Savannah Electric and Power Company -- provide electric service in four Southeastern states. The Company constructs, owns and manages Southern Company's competitive generation assets and sells electricity at market-based rates in the wholesale market. Contracts among the retail operating companies and the Company -- related to jointly owned generating facilities, interconnecting transmission lines or the exchange of electric power -- are regulated by the Federal Energy Regulatory Commission (FERC) and/or the Securities and Exchange Commission (SEC). SCS, the system service company, provides, at cost, specialized services to Southern Company and subsidiary companies. Southern LINC provides digital wireless communications services to the retail operating companies and also markets these services to the public within the Southeast. Southern Telecom provides fiber cable services within the Southeast. Southern Company GAS is a competitive retail natural gas marketer serving customers in Georgia. Southern Holdings is an intermediate holding subsidiary for Southern Company's investments in synthetic fuels and leveraged leases and an energy services business. Southern Nuclear operates and provides services to Southern Company's nuclear power plants.

Southern Company is registered as a holding company under the Public Utility Holding Company Act of 1935 (PUHCA). Both Southern Company and its subsidiaries are subject to the regulatory provisions of the PUHCA. In addition, the retail operating companies and the Company are subject to regulation by the FERC. The Company follows accounting principles generally accepted in the United States. The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires the use of estimates, and the actual results may differ from those estimates.

The Company was formed on January 8, 2001 and began commercial operations in August 2001 after Georgia Power transferred its interest in Plant Dahlberg Units 1 through 10. See Note 2 for further information regarding asset transfers from affiliates. The financial statements include the accounts of the Company and its wholly-owned subsidiary, Southern Company - Florida LLC (SCF) which was established to own, operate and maintain Plant Stanton Unit A. See Note 4 for further information. All intercompany accounts and transactions have been eliminated in consolidation.

Certain prior years' data presented in the financial statements have been reclassified to conform with current year presentation.

### Affiliate Transactions

The Company has an agreement with SCS under which the following services are rendered to the Company at direct or allocated cost: general and design engineering, purchasing, accounting and statistical analysis, finance and treasury, tax, information resources, marketing, auditing, insurance and pension administration, human resources, systems and procedures and other services with respect to business and operations and power pool transactions. SCS also enters into fuel purchase and transportation arrangements and contracts, financial instruments for purposes of hedging and wholesale energy purchase and sale transactions for the benefit of the Company. Because the Company has no employees, all employee related charges are rendered at cost under agreements with SCS or the retail operating companies. Costs for these services from SCS amounted to approximately $47.7 million in 2003, $29.5 million in 2002, and $12 million during 2001. Approximately $32.8 million in 2003, $16.2 million in 2002, and $4.7 million in 2001 were general, administrative, operation and maintenance expenses; the remainder was capitalized to construction work in progress. Cost allocation methodologies used by SCS are approved by the SEC and management believes they are reasonable.

The Company has agreements with Georgia Power and Alabama Power to provide operation and maintenance services for Plants Dahlberg, Wansley, Franklin, and Harris. These services are billed at cost on a monthly basis and are recorded as operations and maintenance

expense in the accompanying statements of income. For the periods ended December 31, 2003, 2002, and 2001, these services totaled approximately $6.3 million, $5.3 million, and $1.0 million, respectively.

Additionally, the Company has agreements with Alabama Power and Georgia Power to provide procurement, payables and other functions related to the construction at Plants Harris and Franklin in Alabama and Plant Wansley in Georgia. Costs for these services are billed monthly and are capitalized.

Effective June 2003, the Company entered into Power Purchase Agreements (PPAs) with Alabama Power and Georgia Power for the sale of capacity and energy from Plants Harris and Franklin. Billings under these agreements totaled $67.2 million, including $13.4 million of affiliated deferred capacity revenues included in deferred capacity revenues on the Balance Sheets at December 31, 2003.

Effective June 2002, the Company entered into PPAs with Georgia Power and Savannah Electric for the sale of capacity and energy from Plants Wansley and Franklin. For 2003, billings under these agreements totaled $215 million, including $15 million of affiliated deferred capacity revenues. For 2002, billings under these agreements totaled $164 million, including $13 million of affiliated deferred capacity revenues. These deferred capacity revenues are included on the Balance Sheets at December 31, 2003 and 2002, respectively.

The retail operating companies, Southern Power, and Southern Company GAS may jointly enter into various types of wholesale energy, natural gas and certain other contracts, either directly or through SCS as agent. Each participating company may be jointly and severally liable for the obligations incurred under these agreements.

The Company and its affiliates generally settle amounts related to the above transactions on a monthly basis in the month following the performance of such services or the purchase or sale of electricity.

Also see Notes 3 and 6 for information related to various types of financing support provided by Southern Company.

**Revenues and Fuel Costs**

Capacity is sold at rates specified under contractual terms and is recognized at the lesser of the levelized amount or the amount billable under the contract over the respective contract periods. Energy is generally sold at market-based rates and the associated revenue is recognized as the energy is delivered. See "Financial Instruments" herein for additional information.

Significant portions of the Company's revenues have been derived from certain customers. For the year ended December 31, 2003, Georgia Power accounted for approximately 33.7% of revenues, excluding $80 million related to termination of contracts with Dynegy, Inc. (Dynegy). For the year ended December 31, 2002, Georgia Power, Savannah Electric, and LG&E Energy Marketing, Inc. accounted for approximately 33.5%, 17.2% and 15.8% of revenues, respectively. For the period ended December 31, 2001, LG&E Energy Marketing, Inc. and Dynegy Power Marketing Inc. accounted for approximately 66% and 21% of revenues, respectively.

Fuel costs are expensed as the fuel is consumed. The Company relies mainly on natural gas to fuel its generating units. See Note 7 herein under "Fuel Commitments" for further details on future commitments.

**Income Taxes**

The Company uses the liability method of accounting for deferred income taxes and provides deferred income taxes for all significant income tax temporary differences.

**Manufacturer's Tax Credits**

The State of Georgia provides a tax credit for qualified investment property to manufacturing companies that construct new facilities. The credit ranges from 1% to 5% of construction expenditures depending upon the county in which the new facility is located. The Company's policy is to recognize these credits when management believes they are more likely than not to be allowed by the Georgia Department of Revenue.

**Depreciation**

Depreciation of the original cost of assets is computed under the straight-line method based on the assets' estimated useful lives determined by the Company. The

primary assets in property, plant and equipment are power plants all of which have an estimated useful life of 35 years, except Plant Dahlberg which has an estimated useful life of 40 years.

**Asset Retirement Obligations And Other Costs of Removal**

Prior to January 2003, the Company followed the industry practice of accruing for the ultimate costs of retiring most long-lived assets over the life of the related asset as part of the annual depreciation expense provision. Effective January 1, 2003, the Company adopted Financial Accounting Standards Board (FASB) Statement No. 143, Accounting for Asset Retirement Obligations. Statement No. 143 establishes new accounting and reporting standards for legal obligations associated with the ultimate costs of retiring long-lived assets. The present value of the ultimate costs for an asset's future retirement must be recorded in the period in which the liability is incurred. The costs must be capitalized as part of the related long-lived asset and depreciated over the asset's useful life. Additionally, Statement No. 143 does not permit the continued accrual of future retirement costs for long-lived assets that the company does not have a legal obligation to retire.

The Company has no liability for asset retirement obligations. In January 2003, the Company recorded a reduction to the accumulated reserve for depreciation and a cumulative effect of change in accounting principle of $0.6 million ($0.4 million after-tax). This represents removal costs accrued prior to the implementation of Statement No. 143.

**Property, Plant, and Equipment**

Property, plant, and equipment is stated at original cost. Original cost includes materials, direct labor incurred by affiliated companies, minor items of property, and interest capitalized. Interest is capitalized on qualifying projects during the development and construction period. Interest of approximately $36.7 million in 2003, $35.3 million in 2002, and $2.9 million in 2001, was capitalized in connection with the development and construction of power plants. The cost of maintenance, repairs and replacement of minor items of property is charged to maintenance expense as incurred. The cost of replacements of property that extend the useful life of the plant, exclusive of minor items of property, is capitalized.

**Impairment of Long-Lived Assets and Intangibles**

The Company evaluates long-lived assets for impairment when events or changes in circumstances indicate that the carrying value of such assets may not be recoverable. The determination of whether an impairment has occurred is based on an estimate of undiscounted future cash flows attributable to the assets, as compared with the carrying value of the assets. If an impairment has occurred, the amount of the impairment loss recognized is determined by estimating the fair value of the assets and recording a loss for the amount of the carrying value that is greater than the fair value. For assets identified as held for sale, the carrying value is compared to the estimated fair value less the cost to sell in order to determine if an impairment loss is required. Until the assets are disposed of, their estimated fair value is re-evaluated when circumstances or events change.

**Deferred Project Development Costs**

The Company capitalizes project development costs once it is determined that it is probable that a specific site will be acquired and a power plant constructed. These costs include professional services, permits and other costs directly related to the construction of a new project. These costs are generally transferred to construction work in progress upon commencement of construction. The total deferred project development costs were $2.2 million at December 31, 2003 and $3.6 million at December 31, 2002.

**Cash and Cash Equivalents**

For purposes of the financial statements, temporary cash investments are considered cash equivalents. Temporary cash investments are securities with original maturities of 90 days or less.

**Materials and Supplies**

Generally, materials and supplies include transmission, distribution, and generating plant materials. Materials are charged to inventory when purchased and then expensed or capitalized to plant, as appropriate, when installed. Materials and supplies are recorded at average cost.

**Financial Instruments**

The Company uses derivative financial instruments to limit exposure to fluctuations in interest rates, the prices of

certain fuel purchases and electricity purchases and sales. All derivative financial instruments are recognized as either assets or liabilities and are measured at fair value. Substantially all of the Company's bulk energy purchases and sales contracts that meet the definition of a derivative are exempt from fair value accounting requirements and are accounted for under the accrual method. Other derivative contracts qualify as cash flow hedges of anticipated transactions. This results in the deferral of related gains and losses in other comprehensive income until the hedged transactions occur. Any ineffectiveness is recognized currently in net income. Other derivative contracts are marked to market through current period income and are recorded on a net basis in the Statements of Income.

The Company is exposed to losses related to financial instruments in the event of counterparties' nonperformance. The Company has established controls to determine and monitor the creditworthiness of counterparties in order to mitigate the Company's exposure to counterparty credit risk.

The Company's financial instruments for which the carrying amounts did not equal fair value at December 31, 2003 were as follows:

| | Carrying Amount | Fair Value |
|---|---|---|
| Long-term debt: | (in millions) | |
| **At December 31, 2003** | **$1,149** | **$1,172** |
| At December 31, 2002 | $956 | $990 |

The fair values for securities were based on either closing market prices or closing prices of comparable instruments.

**Comprehensive Income**

The objective of comprehensive income is to report a measure of all changes in common stock equity of an enterprise that result from transactions and other economic events of the period other than transactions with owners. Comprehensive income consists of net income and changes in the fair value of qualifying cash flow hedges, less income taxes and reclassifications of amounts included in net income.

## 2. ASSET TRANSFERS

On July 31, 2001, Georgia Power transferred its interests in Plant Dahlberg Units 1 through 10 and related working capital to the Company. In accordance with the affiliate transaction rules of PUHCA, these assets were transferred at Georgia Power's net carrying costs of $260.1 million. The transferred assets consist primarily of 10 combustion turbine units (810 MW) in operation, all located in Jackson County, Georgia. In connection with the asset transfer, Georgia Power also assigned to the Company its interest in three PPAs related to Plant Dahlberg. The results of operations of Plant Dahlberg were included in the financial statements from August 1, 2001.

The following projects, which were under construction, were transferred from Alabama Power and Georgia Power to the Company and recorded in construction work in progress at the respective affiliate's book value:

| Plant | Transferred From | Date | Amount (in millions) |
|---|---|---|---|
| Harris Units 1 & 2 | Alabama Power | 06/2001 | $ 91.4 |
| Franklin Units 1 & 2 | Alabama Power and Georgia Power | 11/2001 | 267.9 |
| Wansley Units 6 & 7 | Georgia Power | 01/2002 | 389.9 |

In conjunction with these transfers, Alabama Power and Georgia Power assigned PPAs to the Company related to these plants. Georgia Power required that certain counterparties to the Dahlberg PPAs make prepayments for operational rights to the units. These prepayments were recorded as liabilities by Georgia Power and were transferred to the Company in connection with the Plant Dahlberg transfer. At December 31, 2003, and 2002, the unamortized balance of these amounts totaled $1.4 million and $2.8 million, respectively, and is being amortized into income over the life of the agreements.

## 3. CONTINGENCIES AND REGULATORY MATTERS

**General Litigation Matters**

The Company is subject to certain claims and legal actions arising in the ordinary course of business. In addition, the Company's business activities are subject to extensive governmental regulation related to public health and the environment. Litigation over environmental issues and claims of various types, including property damage, personal injury and citizen enforcement of environmental requirements, has increased generally throughout the

United States. In particular, personal injury claims for damages caused by alleged exposure to hazardous materials have become more frequent. The ultimate outcome of such litigation against the Company cannot be predicted at this time; however, management does not anticipate that the liabilities, if any, arising from such current proceedings would have a material adverse effect on the Company's financial statements.

**Uncontracted Generating Capacity**

In May 2003, the Company entered into an agreement with Dynegy to resolve all outstanding matters related to capacity sales contracts with subsidiaries of Dynegy. Under the terms of the agreement, Dynegy made a cash termination payment of $80 million to the Company. The termination payments from Dynegy resulted in a one-time gain to the Company of approximately $50 million.

As a result of the contract termination, the Company is completing limited construction activities on Plant Franklin Unit 3 to preserve the long-term viability of the project but has deferred final completion until the 2008-2011 period. The length of the deferral period will depend on forecasted capacity needs and other wholesale market opportunities. As of December 31, 2003, the Company's investment in Unit 3 of Plant Franklin was $156 million. The Company is also continuing to explore alternatives for its existing uncontracted capacity. The final outcome of these matters cannot now be determined.

**FERC Matters**

*Market-Based Rate Authority*

The Company currently has general authorization from the FERC to sell power to nonaffiliates at market-based prices. In addition, each of the retail operating companies has obtained FERC approval to sell power to nonaffiliates at market-based prices under specific contracts. Southern Power and the retail operating companies also have FERC authority to make short-term opportunity sales at market rates. Specific FERC approval must be obtained with respect to a market-based contract with an affiliate. In November 2001, the FERC modified the test it uses to consider utilities' applications to charge market-based rates and adopted a new test called the Supply Margin Assessment (SMA). The FERC applied the SMA to several utilities, including Southern Company, and found Southern Company and others to be "pivotal suppliers" in their service areas and ordered the implementation of several mitigation measures. SCS, on behalf of the retail operating companies and others sought rehearing of the FERC order, and the FERC delayed the implementation of certain mitigation measures. SCS, on behalf of the retail operating companies and others submitted comments to the FERC in 2002 regarding these issues. In December 2003, the FERC issued a staff paper discussing alternatives and held a technical conference in January 2004. Southern Company anticipates that the FERC will address the requests for rehearing in the near future. The final outcome of this matter will depend on the form in which the SMA test and mitigation measures rules may be ultimately adopted and cannot be determined at this time.

PPAs by Georgia Power and Savannah Electric for the Company's Plant McIntosh capacity were certified by the Georgia Public Service Commission (GPSC) in December 2002 after a competitive bidding process. In April 2003, the Company applied for FERC approval of these PPAs. Interveners opposed the FERC's acceptance of the PPAs, alleging that the PPAs do not meet the applicable standards for market based rates between affiliates. In July 2003, the FERC accepted the PPAs to become effective as scheduled on June 1, 2005, subject to refund, and ordered that hearings be held to determine: (a) whether, in the design and implementation of the GPSC competitive bidding process, Georgia Power and Savannah Electric unduly preferred the Company; (b) whether the analysis of the competitive bids unduly favored the Company, particularly with respect to evaluation of non-price factors; (c) whether Georgia Power and Savannah Electric selected their affiliate, the Company, based upon a reasonable combination of price and non-price factors; (d) whether the Company received an undue preference or competitive advantage in the competitive bidding process as a result of access to its affiliate's transmission system; (e) whether and to what extent the PPAs impact wholesale competition; and (f) whether the PPAs are just and reasonable and not unduly discriminatory. Hearings are scheduled to begin in March 2004. Management believes that the PPAs should be approved by the FERC; however, the ultimate outcome of this matter cannot now be determined.

**4. JOINT OWNERSHIP AGREEMENTS**

Southern Power, through its wholly owned subsidiary SCF, is a 65% owner of Plant Stanton Unit A (Stanton A), a combined-cycle project with 660 megawatts. The unit is co-owned by Orlando Utilities Commission (28%), Florida Municipal Power Agency (3.5%), and Kissimmee Utility Authority (3.5%). The Company has a services agreement with SCS where SCS is responsible for the operation and maintenance of Stanton A and was responsible for the overall construction project

management. Construction on Stanton A began in October 2001 and the unit was placed in service on October 1, 2003. As of December 31, 2003 $155.3 million is recorded in plant in service with associated accumulated depreciation of $1.1 million. The Company's proportionate share of the plant's operating expense is included in the corresponding operating expenses in the Statements of Income. At December 31, 2002, the Company's share of the construction costs for Stanton A was $128.3 million, and was recorded in construction work in progress in the Balance Sheets.

The Company has guaranteed the performance of its subsidiary, SCF, for SCF's payment obligations under the ownership agreement, PPAs and alternative power supply agreements associated with the Stanton A project. The Company's current exposure is $32.5 million under the PPAs and the ownership agreement and $3.4 million under alternative power supply agreements.

## 5. INCOME TAXES

Southern Company and its subsidiaries file a consolidated federal income tax return. In 2002, Southern Company began filing a combined State of Georgia income tax return. Under a joint consolidated income tax agreement, each subsidiary's current and deferred tax expense is computed on a stand-alone basis. In accordance with Internal Revenue Service regulations, each company is jointly and severally liable for the tax liability.

Details of the income tax provisions are as follows:

| | **2003** | 2002 | 2001 |
|---|---|---|---|
| | | (in thousands) | |
| Total provision for income taxes: | | | |
| Federal: | | | |
| Current | **$64,090** | $26,900 | $1,402 |
| Deferred | **19,354** | 2,338 | 3,017 |
| | **83,444** | 29,238 | 4,419 |
| State: | | | |
| Current | **10,459** | 4,622 | 240 |
| Deferred | **3,318** | 401 | 517 |
| State manufacturer's Tax credits | **(11,769)** | (5,804) | (2,665) |
| | **2,008** | (781) | (1,908) |
| Total | **$85,452** | $28,457 | $2,511 |

The Company recorded a reduction in 2003, 2002, and 2001 tax expense of approximately $11.8 million, $5.8 million, and $2.7 million, respectively, under the flow-through method of accounting for the State of Georgia manufacturer's tax credits.

The tax effects of temporary differences between the carrying amounts of assets and liabilities in the financial statements and their respective tax bases, which give rise to deferred tax assets and liabilities, are as follows:

| | **2003** | 2002 |
|---|---|---|
| | | (in thousands) |
| Deferred tax liabilities: | | |
| Accelerated depreciation | **$(44,602)** | $(17,401) |
| Other | **-** | (729) |
| Total | **(44,602)** | (18,130) |
| Deferred tax assets: | | |
| Book/tax basis difference on asset transfer | **15,061** | 15,644 |
| Levelized capacity revenues | **11,052** | 8,003 |
| Other comprehensive loss on interest rate swaps | **40,003** | 30,745 |
| Other | **397** | 2,329 |
| Total | **66,513** | 56,721 |
| Accumulated deferred income taxes in the Balance Sheets | **$21,911** | $38,591 |

Deferred tax liabilities were primarily the result of property related timing differences and derivative hedging instruments. Deferred tax assets were primarily the result of a deferred tax gain related to the transfer of Plant Dahlberg from Georgia Power. The Company has recognized a payable to Georgia Power for Georgia Power's deferred tax liability resulting from this gain of approximately $15.1 million at December 31, 2003 and $15.6 million at December 31, 2002, which is recorded in other affiliated deferred credits on the Balance Sheets.

A reconciliation of the federal statutory tax rate to the effective income tax rate is as follows:

| | **2003** | 2002 | 2001 |
|---|---|---|---|
| Federal statutory rate | **35.0** | 35.0 | 35.0 |
| State income tax, net of federal deduction | **3.7** | 3.9 | 4.6 |
| State manufacturer's tax credits, net of federal effect | **(3.2)** | (4.5) | (16.2) |
| Effective income tax rate | **35.5** | 34.4 | 23.4 |

## 6. CAPITALIZATION

### Parent Company Transactions

Southern Company is currently authorized by the SEC under the PUHCA to fund the development of Southern Power up to an aggregate amount not to exceed $1.7 billion, which may take the form of purchases or contributions of equity interests, loans and guarantees issued in support of the Company's securities or obligations. At December 31, 2003, equity contributions and subordinated loans from Southern Company totaled $850 million.

Southern Company has committed to fund at least 35% of the Company's construction project financing and to pay for construction cost overruns to the extent that the Company's own cash flow is insufficient. Also, Southern Company will prepay any portion of revolving credit arrangements used for the Company's construction projects not completed within two years of the proposed completion date. Currently, there are no borrowings related to the construction of Plant Franklin Unit 3 outstanding under these credit arrangements.

In 2001, Southern Power entered into an intercompany note payable to Southern Company, which was payable on demand. At December 31, 2002, $210.5 million was outstanding with an interest rate of 5.04%. In March 2003, $190 million of notes payable to Southern Company were converted to a capital contribution from Southern Company. At December 31, 2003, there were no amounts outstanding under this agreement.

### Bank Credit Arrangements

In 2003, the Company amended and restated its $850 million unsecured syndicated revolving credit facility (Facility) expiring in April 2006, reducing the Facility to $650 million. The purpose of the Facility is to finance the acquisition and construction costs related to gas-fired electric generating facilities and general corporate expenditures (subject to a $50 million limit), and to pay or support commercial paper used to fund construction of facilities. At December 31, 2003, the Company had no outstanding borrowings under the Facility. Borrowings under the Facility bear interest at the Company's option equal to either the Eurodollar rate plus a specified margin ranging from 1.25% to 3.0%, depending on the Company's credit rating and the amount drawn down under the Facility, or a base rate plus a specified margin. The interest rate and average interest rate on the Facility were 2.73% and 3.15% at December 31, 2002, and 3.44% and 3.61% at December 31, 2001, and during the periods then ended. The Company is required to pay a commitment fee on the unused balance of the Facility. The commitment fee ranges from 0.325% to 0.75%, depending on the Company's credit rating. For the periods ended December 31, 2003, 2002 and 2001, the Company paid approximately $2.0 million, $1.1 million, and $0.1 million in commitment fees, respectively.

The Facility contains certain financial covenants relating to the Company's debt capitalization which require that additional debt incurred by the Company must generally be unsecured and the Company must have its ratings reaffirmed at investment grade including the new debt. The Facility also contains restrictions related to the assumption of additional debt, which require a maximum 65% debt ratio, as defined in the Facility, excluding intercompany loans. The Company was in compliance with such covenants at December 31, 2003. Initial borrowings under the Facility for new projects would be prohibited if the Company or Southern Company experiences a material adverse change (as defined in the Facility). The Facility contains a cross default to Southern Company's indebtedness, which if triggered would require prepayment of debt related to projects financed under the Facility that are not complete.

### Long-Term Debt

In July 2003, the Company issued $575 million of 4.875% senior notes, due July 15, 2015. In June 2002, the Company issued $575 million of 6.25% senior notes, due July 15, 2012.

### Commercial Paper

In February 2003, the Company initiated a commercial paper program to fund a portion of the construction costs of new plants. The Company's strategy is to refinance such short-term borrowings with long-term securities following plant completion. During 2003, the peak amount outstanding for commercial paper was $493 million and the average amount outstanding was $239 million. The average annual interest rate on commercial paper was 1.41% in 2003. Commercial paper is included in notes payable on the Balance Sheets.

The Company's commercial paper program is supported by the Facility. The Facility was structured to

accommodate commercial paper, and the conditions that the Company must meet to reserve against the Facility for a project-specific commercial paper issue are the same as those for a regular draw on the Facility. The Company is not likely to be restricted from making draws on the Facility to repay any commercial paper coming due, as those conditions include representations and warranties that do not contain any material adverse effect clauses or creditworthiness measures.

**Financial Instruments**

The Company enters into energy related derivatives to limit exposures to electricity, gas, and other fuel price changes. The Company's exposure to market volatility in commodity fuel prices and prices of electricity is limited because its long-term sales contracts shift substantially all fuel cost responsibility to the purchaser. The Company may enter into interest rate swaps to limit exposure to interest rate changes. Swaps related to variable rate securities or forecasted transactions are accounted for as cash flow hedges. These swaps are generally structured to mirror the terms of the hedged debt instruments; therefore, no material ineffectiveness has been recorded in earnings. At December 31, 2003, the Company had no interest derivatives outstanding.

In July 2003, the Company terminated $500 million notional amount of interest rates swaps for losses of $93.3 million at the same time it issued senior notes. In June 2002, the Company settled interest rates swaps for losses of $16.9 million associated with senior notes issued in 2002. These losses have been deferred in other comprehensive income and will be amortized to interest expense over the life of the senior notes.

During 2003, approximately $5.5 million of pre-tax losses were reclassified from other comprehensive income to interest expense. During 2004, approximately $10.4 million of pre-tax losses are expected to be reclassified from other comprehensive income to interest expense.

At December 31, 2003, the fair value of derivative energy contracts was reflected in the financial statements as follows:

| | Amounts |
|---|---|
| | (in thousands) |
| Other comprehensive income | $1.0 |
| Net income | (0.3) |
| Total fair value | $0.7 |

For the Company, the fair value gains or losses for cash flow hedges are recorded in other comprehensive income and are reclassified into earnings at the same time the hedged items affect earnings. For 2003, approximately $0.2 million of pre-tax gains were reclassified from other comprehensive income to depreciation and amortization. For 2004, approximately $1.4 million of pre-tax gains are expected to be reclassified from other comprehensive income to earnings.

## 7. COMMITMENTS

**Construction Program**

The Company currently estimates property additions to be $259 million, $254 million and $355 million in 2004, 2005 and 2006, respectively. The Company has approximately 1,240 megawatts of additional generating capacity scheduled to be placed in service by 2005.

Significant purchase commitments are outstanding in connection with the construction program.

The Company has obligations related to the construction, by Alabama Power and Georgia Power, of transmission interconnection facilities to these plants, which are guaranteed by Southern Company. At December 31, 2003 these guarantees totaled $17.5 million.

**Long-Term Service Agreements**

The Company has entered into several Long-Term Service Agreements (LTSAs) with General Electric (GE) for the purpose of securing maintenance support for its combined cycle and combustion turbine generating facilities. In summary, the LTSAs stipulate that GE will perform all planned inspections on the covered equipment, which includes the cost of all labor and materials. GE is also obligated to cover the costs of unplanned maintenance on the covered equipment subject to a limit specified in each contract.

In general, except for Plant Dahlberg, these LTSAs are in effect through two major inspection cycles per unit. The Dahlberg agreement is in effect through the first major inspection of each unit. Scheduled payments to GE are made at various intervals based on actual operating hours of the respective units. Total payments to GE under these agreements are $831 million over the remaining life of the agreements, which may range up to 30 years per

unit. However, the LTSAs contain various cancellation provisions at the Company's option.

Payments made to GE prior to the performance of any planned inspections are recorded as a long term prepayment in the Deferred Charges and Other Assets section of the Balance Sheets. Inspection costs are capitalized or charged to expense based on the nature of the work performed.

**Fuel Commitments**

SCS, as agent for the retail operating companies, and Southern Power, has entered into various fuel transportation and procurement agreements to supply a portion of the fuel (primarily natural gas) requirements for the operating facilities. In most cases, these contracts contain provisions for firm transportation costs, storage costs, minimum purchase levels and other financial commitments.

Natural gas purchase commitments contain given volumes with prices based on various indices at the actual time of delivery. Amounts included in the chart below represent estimates based on New York Mercantile future prices at December 31, 2003.

| Year | Fuel Purchases (in thousands) |
|---|---|
| 2004 | $95,194 |
| 2005 | 53,138 |
| 2006 | 47,831 |
| 2007 | 37,426 |
| 2008 | 18,589 |
| 2009 and beyond | 430,818 |
| Total | $682,996 |

Purchases of natural gas were approximately $139.1 million, $133.5 million, and $4.4 million for the periods ended December 31, 2003, 2002, and 2001, respectively. Additional commitments for fuel will be required to supply the Company's future needs.

Acting as an agent for all of Southern Company's retail operating companies, Southern Power and Southern Company GAS, SCS may enter into various types of wholesale energy and natural gas contracts. Under these agreements, each of the retail operating companies, Southern Power and Southern Company GAS may be jointly and severally liable. The creditworthiness of Southern Power and Southern Company GAS is currently inferior to the creditworthiness of the retail operating companies; therefore, Southern Company has entered into keep-well agreements with each of the retail operating companies to insure they will not subsidize nor be responsible for any costs, losses, liabilities or damages resulting from the inclusion of Southern Power as a contracting party under these agreements.

## 8. QUARTERLY FINANCIAL INFORMATION (UNAUDITED)

Summarized quarterly financial information for 2003 and 2002 is as follows:

| Quarter Ended | Operating Revenues | Operating Income | Net Income |
|---|---|---|---|
| | | (in millions) | |
| **March 2003** | **$107,439** | **$ 38,217** | **$ 23,125** |
| **June 2003** | **238,281** | **132,421** | **79,290** |
| **September 2003** | **208,624** | **68,005** | **40,139** |
| **December 2003** | **127,436** | **34,662** | **12,595** |
| March 2002 | $ 19,299 | $ 7,862 | $ 4,455 |
| June 2002 | 57,777 | 16,271 | 8,858 |
| September 2002 | 136,195 | 45,298 | 27,329 |
| December 2002 | 85,497 | 26,764 | 13,628 |

The Company's business is influenced by seasonal weather conditions. The Company had approximately 2,400 megawatts of generating capacity in service through May 2002; approximately 2,400 megawatts through May 2003; approximately 4,350 megawatts through September 2003; and 4,775 megawatts through December 2003. During the second quarter of 2003, the Company recorded $80 million of contract termination revenues, as a result of the termination of Dynegy's PPAs related to Plants Dahlberg and Franklin, which resulted in a one-time gain of $50 million. See Note 3 to the financial statements under "Uncontracted Generating Capacity" for additional information.

## SELECTED FINANCIAL AND OPERATING DATA 2001-2003

**Southern Power Company 2003 Annual Report**

# PART III

Items 10, 11, 12, 13 and 14 for Southern Company are incorporated by reference in Southern Company's definitive Proxy Statement relating to the 2004 Annual Meeting of Stockholders. Specifically, reference is made to "Nominees for Election as Directors" for Item 10, "Executive Compensation" for Item 11, "Stock Ownership Table" for Item 12, "Certain Relationships and Related Transactions" for Item 13 and "Principal Public Accounting Firm Fees" for Item 14.

Additionally, Items 10, 11, 12, 13 and 14 for Alabama Power, Georgia Power, Gulf Power and Mississippi Power are incorporated by reference to the Information Statements of Alabama Power, Georgia Power, Gulf Power and Mississippi Power relating to each of their respective 2004 Annual Meetings of Shareholders. Specifically, reference is made to "Nominees for Election as Directors" for Item 10, "Executive Compensation Information" for Item 11, "Stock Ownership Table" for Item 12, "Certain Relationships and Related Transactions" for Item 13 and "Principal Public Accounting Firm Fees" for Item 14.

## Item 10. DIRECTORS AND EXECUTIVE OFFICERS OF THE REGISTRANTS

The ages of directors and executive officers set forth below are as of December 31, 2003.

### SAVANNAH ELECTRIC

***Identification of directors of Savannah Electric.***

**Anthony R. James**
President and Chief Executive Officer
Age 53
Served as Director since 5-3-01

**Gus H. Bell, III** (1)
Age 66
Served as Director since 7-20-99

**Archie H. Davis** (1)
Age 62
Served as Director since 2-18-97

**Walter D. Gnann** (1)
Age 68
Served as Director since 5-17-83

**Robert B. Miller, III** (1)
Age 58
Served as Director since 5-17-83

**Arnold M. Tenenbaum** (1)
Age 67
Served as Director since 5-17-77

(1) *No position other than Director.*

Each of the above is currently a director of Savannah Electric, serving a term running from the last annual meeting of Savannah Electric's stockholder (May 2, 2003) for one year until the next annual meeting or until a successor is elected and qualified.

There are no arrangements or understandings between any of the individuals listed above and any other person pursuant to which he was or is to be selected as a director or nominee, other than any arrangements or understandings with directors or officers of Savannah Electric acting solely in their capacities as such.

***Identification of executive officers of Savannah Electric.***

**Anthony R. James**
President, Chief Executive Officer and Director
Age 53
Served as Executive Officer since 7-27-00

**W. Miles Greer**
Vice President
Age 60
Served as Executive Officer since 11-20-85

**Sandra R. Miller**
Vice President
Age 51
Served as Executive Officer since 7-26-01

**Kirby R. Willis**
Vice President, Treasurer and
Chief Financial Officer
Age 52
Served as Executive Officer since 1-1-94

Each of the above is currently an executive officer of Savannah Electric, serving a term running from the meeting of the directors held on July 24, 2003 for the ensuing year.

There are no arrangements or understandings between any of the individuals listed above and any other person pursuant to which he or she was or is to

be selected as an officer, other than any arrangements or understandings with officers of Savannah Electric acting solely in their capacities as such.

***Identification of certain significant employees.***
*None.*

***Family relationships.***
*None.*

***Business experience.***

**Anthony R. James** – President and Chief Executive Officer since 2001. Previously served as Vice President of Power Generation and Senior Production Officer from 2000 to 2001; Central Cluster Manager at Georgia Power's Plant Scherer from 2000 to 2001; and Plant Manager at Georgia Power's Plant Scherer from 1996 to 2000. He is a director of SunTrust Bank of Savannah.

**Gus H. Bell, III** – President and Chief Executive Officer of Hussey, Gay, Bell and DeYoung, Inc., (specializing in environmental, industrial, structural, architectural and civil engineering), Savannah, Georgia since 1986. He is a director of SunTrust Bank of Savannah.

**Sandra R. Miller** – Vice President of Power Generation since 2001. Previously served as Manager of Technical Training at SCS from 1998 to 2001.

**Kirby R. Willis** – Vice President, Treasurer and Chief Financial Officer since 1994 and Assistant Corporate Secretary since 1998.

***Involvement in certain legal proceedings.***
None.

***Section 16(a) Beneficial Ownership Reporting Compliance.***

No reporting person of Savannah Electric failed to file, on a timely basis, the reports required by Section 16(a).

## SOUTHERN POWER

*Identification of directors of Southern Power.*

**W. Paul Bowers**
President and Chief Executive Officer
Age 47
Served as Director since 5-1-01

**H. Allen Franklin** (1) (2)
Age 59
Served as Director since 1-8-01

**Thomas A. Fanning** (1)
Age 46
Served as Director since 4-11-03

**Charles D. McCrary** (1)
Age 52
Served as Director since 2-11-02 and also served as Director from 1-8-01 to 4-16-01

**David M. Ratcliffe** (1) (2)
Age 55
Served as Director since 1-8-01

(1) *Each of the above is employed within the Southern Company system; however, each holds no position at Southern Power other than Director.*

(2) *Mr. Franklin will retire in July 2004. Mr. Ratcliffe will become Chief Executive Officer of Southern Company in July 2004.*

Each of the above is currently a director of Southern Power, serving a term running from the last annual meeting of Southern Power's stockholder (April 11, 2003) for one year until the next annual meeting or until a successor is elected and qualified.

There are no arrangements or understandings between any of the individuals listed above and any other person pursuant to which he was or is to be selected as a director or nominee, other than any arrangements or understandings with directors or officers of Southern Power acting solely in their capacities as such.

***Identification of executive officers of Southern Power.***

**W. Paul Bowers**
President and Chief Executive Officer
Age 47
Served as Executive Officer since 5-1-01

**Robert G. Moore**
Senior Vice President
Age 54
Served as Executive Officer since 1-4-02

**Edward Day**
Senior Vice President
Age 43
Served as Executive Officer since 5-7-03

**Douglas E. Jones**
Senior Vice President
Age 45
Served as Executive Officer since 1-1-04

**Anthony J. Topazi** (1)
Senior Vice President
Age 53
Served as Executive Officer since 3-1-01

**Cliff S. Thrasher**
Senior Vice President, Comptroller and Chief Financial Officer
Age 53
Served as Executive Officer since 6-10-02

(1) *Mr. Topazi was elected President, Chief Executive Officer and Director of Mississippi Power effective January 1, 2004 and resigned as Senior Vice President of Southern Power effective January 1, 2004.*

Except for Mr. Topazi, each of the above is currently an executive officer of Southern Power, serving a term running from the meeting of the directors held on May 7, 2003 for one year until the next annual meeting or until their successors are elected and have qualified, except for Mr. Jones whose election was effective on the date indicated.

There are no arrangements or understandings between any of the individuals listed above and any other person pursuant to which he was or is to be selected as an officer, other than any arrangements or understandings with officers of Southern Power acting solely in their capacities as such.

***Identification of certain significant employees.***
None.

***Family relationships.***
None.

*Business experience.*

**W. Paul Bowers** – President, Chief Executive Officer and Director since May 2001; Executive Vice President of SCS since May 2001. Previously served as Senior Vice President of SCS and Chief Marketing Officer of Southern Company from March 2000 to May 2001; President and Chief Executive Officer of Western Power Distribution, a subsidiary of Mirant located in Bristol, England from December 1998 to 2000.

**Edward Day** – Senior Vice President since May 2003. Previously served as Vice President of Business Development, Southern Company Generation and Energy Marketing from 1998 to 2003.

**Thomas A. Fanning** - Executive Vice President, Chief Financial Officer and Treasurer of Southern Company since April 11, 2003. Previously served as President, Chief Executive Officer and Director of Gulf Power from May 2002 to April 2003; Executive Vice President, Treasurer and Chief Financial Officer of Georgia Power from 1999 to 2002.

**H. Allen Franklin** – Chairman, President and Chief Executive Officer of Southern Company since April 2001. Previously served as President and Chief Executive Officer from March 2001 to April 2001; President and Chief Operating Officer of Southern Company from June 1999 to March 2001; and Executive Vice President of Southern Company and President and Chief Executive Officer of Georgia Power from January 1994 to June 1999. He is a director of SouthTrust Corporation, Vulcan Materials Company, and Southern Company system companies – Southern Company, Alabama Power, Georgia Power and Gulf Power.

**Douglas E. Jones** – Senior Vice President since January 2004. Previously served as Senior Vice President, Southern Company Energy Marketing from December 2001 to January 2004; and Vice President, Southern Company Wholesale Energy from December 1998 to 2001.

**Charles D. McCrary** – Executive Vice President of Southern Company since February 2002 and President and Chief Executive Officer of Alabama Power since October 2001. Previously served as President and Chief Operating Officer of Alabama Power from April 2001 to October 2001; Vice President of Southern Company from February 1998 to April 2001; and Executive Vice President of Alabama Power from April 1994 to February 1998. He is a director of Alabama Power and AmSouth Bancorporation.

**Robert G. Moore** – Senior Vice President since January 2002 and Vice President of SCS since August 1997. Previously served as Vice President of Gulf Power from July 1997 to May 2002.

**David M. Ratcliffe** – Current Chief Executive Officer of Georgia Power and to become Chief Executive Officer of Southern Company in July 2004. Executive Vice President of Southern Company since 1999 and President and Chief Executive Officer of Georgia Power since June 1999. Previously served as Executive Vice President, Treasurer and Chief Financial Officer of Georgia Power from March 1998 to June 1999. He is a director of Georgia Power; Mississippi Chemical Company; Federal Reserve Bank of Atlanta and CSX Corporation.

**Cliff S. Thrasher** – Senior Vice President, Comptroller and Chief Financial Officer of Southern Power since November 2002 and Vice President of SCS since June 2002. Previously served as Vice President, Comptroller and Chief Financial Officer of Southern Power from June 2002 to November 2002 and Vice President, Comptroller and Chief Accounting Officer of Georgia Power from September 1995 to June 2002.

**Anthony J. Topazi** – President and Chief Executive Officer of Mississippi Power since January 2004. Previously served as Senior Vice President of Southern Power from November 2002 to December 2003 and Vice President of SCS from December 1999 to December 2003; Vice President of Southern Power from March 2001 until November 2002 and Vice President of Alabama Power from March 1991 to December 1999.

***Section 16(a) Beneficial Ownership Reporting Compliance.***

Not applicable.

## Item 11. EXECUTIVE COMPENSATION

**Summary Compensation Table.** The following table sets forth information concerning any Chief Executive Officer and the three most highly compensated executive officers of **Savannah Electric** serving during 2003.

| | | ANNUAL COMPENSATION | | | LONG-TERM COMPENSATION | | | |
|---|---|---|---|---|---|---|---|---|
| Name and Principal Position | Year | Salary($) | Bonus($) | Other Annual Compensation ($)[1] | Restricted Stock Award ($) | Number of Securities Underlying Stock Options (Shares) | Long-Term Incentive Payouts ($)[2] | All Other Compensation ($)[3] |
| **Anthony R. James**[4] | | | | | | | | |
| President, Chief | 2003 | 248,342 | 183,462 | 3,168 | - | 32,015 | 164,732 | 11,956 |
| Executive Officer, | 2002 | 235,748 | 189,044 | 13,109 | - | 35,354 | 136,462 | 12,235 |
| Director | 2001 | 210,856 | 177,858 | 1,328 | - | 31,363 | 87,577 | 30,195 |
| **W. Miles Greer** | 2003 | 198,238 | 97,376 | 1,716 | - | 12,744 | 111,890 | 24,702 |
| Vice President | 2002 | 191,400 | 101,796 | 107 | - | 14,278 | 115,884 | 20,261 |
| | 2001 | 184,066 | 104,286 | 666 | - | 32,505 | 105,924 | 8,567 |
| **Kirby R. Willis** | | | | | | | | |
| Vice President, | 2003 | 182,109 | 89,491 | 2,207 | - | 11,712 | 68,470 | 14,634 |
| Chief Financial | 2002 | 175,476 | 93,329 | 891 | - | 13,090 | 61,913 | 13,283 |
| Officer, Treasurer | 2001 | 168,747 | 100,480 | 490 | - | 29,993 | 89,814 | 8,495 |
| **Sandra R. Miller**[5] | 2003 | 146,072 | 108,696 | 5,135 | - | 9,432 | 32,304 | 12,424 |
| Vice President | 2002 | 138,074 | 104,769 | 1,720 | - | 10,317 | 18,824 | 7,016 |
| | 2001 | 112,802 | 83,015 | 8,123 | - | 1,896 | 4,791 | 20,749 |

1 Tax reimbursement on certain personal benefits.

2 Payout of performance dividend equivalents on stock options granted after 1996 that were held by the executive at the end of the performance periods under the Omnibus Incentive Compensation Plan for the four-year performance periods ended December 31, 2001, 2002 and 2003, respectively. Dividend equivalents can range from 25 percent of the common stock dividend paid during the last year of the performance period if total shareholder return over the four-year period, compared to a group of other large utility companies, is at the 30th percentile to 100 percent of the dividend paid if it reaches the 90th percentile. For eligible stock options held on December 31, 2001, 2002 and 2003, all named executives received a payout of $1.34, $1.355 and $1.385 per option, respectively.

3 Contributions in 2003 to the Employee Savings Plan (ESP), Employee Stock Ownership Plan (ESOP) and Supplemental Benefit Plan (SBP) or Above-Market Earnings on deferred compensation (AME) are as follows:

| Name | ESP | ESOP | SBP or AME |
|---|---|---|---|
| Anthony R. James | $7,967 | $744 | $3,245 |
| W. Miles Greer | 8,921 | 744 | 12,037 |
| Kirby R. Willis | 6,719 | 636 | 7,279 |
| Sandra R. Miller | 5,403 | 744 | 1,277 |

In 2003, these amounts included additional incentive compensation of $5,000 and $3,000 for Ms. Miller and Mr. Greer, respectively.

4 Mr. James became President and Chief Executive Officer effective in May 2001.

5 Ms. Miller became an executive officer of Savannah Electric in July 2001.

**Summary Compensation Table.** The following table sets forth information concerning any Chief Executive Officer and the four most highly compensated executive officers of **Southern Power** serving during 2003.

| | | ANNUAL COMPENSATION | | | LONG-TERM COMPENSATION | | | |
|---|---|---|---|---|---|---|---|---|
| **Name and Principal Position** | **Year** | **Salary($)** | **Bonus($)** | **Other Annual Compensation ($)[6]** | **Restricted Stock Award ($)** | **Number of Securities Underlying Stock Options (Shares)** | **Long-Term Incentive Payouts ($)[7]** | **All Other Compensation ($)[8]** |
| **W. Paul Bowers** | | | | | | | | |
| President, Chief | 2003 | 356,994 | 431,675 | 6,257 | - | 46,181 | 234,253 | 18,063 |
| Executive Officer, | 2002 | 329,570 | 403,433 | 12,337 | - | 50,046 | 214,133 | 16,802 |
| Director | 2001 | 273,758 | 273,630 | 3,072 | - | 51,740 | 160,515 | 39,542 |
| **Anthony J. Topazi** | 2003 | 272,240 | 272,895 | 25,856 | - | 27,526 | 188,241 | 54,595 |

6 Tax reimbursement on certain personal benefits.

7 Payout of performance dividend equivalents on stock options granted after 1996 that were held by the executive at the end of the performance periods under the Omnibus Incentive Compensation Plan for the four-year performance periods ended December 31, 2001, 2002 and 2003, respectively. Dividend equivalents can range from 25 percent of the common stock dividend paid during the last year of the performance period if total shareholder return over the four-year period, compared to a group of other large utility companies, is at the 30th percentile to 100 percent of the dividend paid if it reaches the 90th percentile. For eligible stock options held on December 31, 2001, 2002 and 2003, all named executives received a payout of $1.34, $1.355 and $1.385 per option, respectively.

8 Contributions in 2003 to the Employee Savings Plan (ESP), Employee Stock Ownership Plan (ESOP), Supplemental Benefit Plan (SBP) and tax sharing benefits paid to participants who elected receipt of dividends on Southern Company's common stock held in the ESP are as follows:

| Name | ESP | ESOP | SBP | ESP Tax Sharing Benefits |
|---|---|---|---|---|
| W. Paul Bowers | $7,934 | $744 | $9,385 | $ - |
| Anthony J. Topazi | 9,000 | 744 | 4,851 | - |
| Robert G. Moore | 7,934 | 744 | 2,519 | 788 |
| Cliff S. Thrasher | 9,000 | 744 | 885 | - |
| Edward Day | 8,215 | 744 | 543 | - |

In 2003, these amounts include additional incentive compensation of $40,000, $7,000 and $20,000 for Messrs. Topazi, Moore and Day, respectively. In 2002, these amounts include additional incentive compensation of $50,000 each for Mr. Topazi and Mr. Thrasher. In 2001, these amounts included additional incentive compensation for Messrs. Bowers and Topazi of $24,380 and $200,000 respectively.

9 Mr. Moore became an executive officer of Southern Power in January 2002 and Mr. Thrasher became an executive officer of Southern Power in June 2002.

10 Mr. Day became an executive officer of Southern Power in May 2003.

## STOCK OPTION GRANTS IN 2003

**Stock Option Grants.** The following table sets forth all stock option grants to the named executive officers of Savannah Electric and Southern Power during the year ending December 31, 2003.

| | Individual Grants | | | | Grant Date Value |
|---|---|---|---|---|---|
| Name | # of Securities Underlying Options Granted [11] | % of Total Options Granted to Employee in Fiscal Year [12] | Exercise or Base Price ($/Sh) [11] | Expiration Date [11] | Grant Date Present Value[13] |
| **Savannah Electric** | | | | | |
| Anthony R. James | **32,015** | **25.5** | **$27.975** | **2/14/2013** | **$114,934** |
| W. Miles Greer | **12,744** | **10.2** | **$27.975** | **2/14/2013** | **45,751** |
| Kirby R. Willis | **11,712** | **9.3** | **$27.975** | **2/14/2013** | **42,046** |
| Sandra R. Miller | **9,432** | **7.5** | **$27.975** | **2/14/2013** | **33,861** |
| **Southern Power** | | | | | |
| W. Paul Bowers | **46,181** | **1.6** | **$27.975** | **2/14/2013** | **165,790** |
| Anthony J. Topazi | **27,526** | **0.9** | **$27.975** | **2/14/2013** | **98,818** |
| Robert G. Moore | **18,687** | **0.6** | **$27.975** | **2/14/2013** | **67,086** |
| Cliff S. Thrasher | **16,742** | **0.6** | **$27.975** | **2/14/2013** | **60,104** |
| Edward Day | **10,843** | **0.4** | **$27.975** | **2/14/2013** | **38,926** |

11 Under the terms of the Omnibus Incentive Compensation Plan, stock option grants were made on February 14, 2003 and vest annually at a rate of one-third on the anniversary date of the grant. Grants fully vest upon termination as a result of death, total disability or retirement and expire five years after retirement, three years after death or total disability or their normal expiration date if earlier. The exercise price is the average of the high and low price of Southern Company's common stock on the date granted. Options may be transferred to a revocable trust and for Mr. Bowers also may be transferred to certain family members, family trusts and family limited partnerships.

12 A total of 125,397 and 2,885,181 stock options were granted in 2003 to Savannah Electric and SCS, respectively. Southern Power has no employees; therefore, SCS employees perform work on behalf of Southern Power that is billed, at cost, to Southern Power.

13 Value was calculated using the Black-Scholes option valuation model. The actual value, if any, ultimately realized depends on the market value of Southern Company's common stock at a future date. Significant assumptions are shown below:

| Volatility | Risk-free rate of return | Dividend Yield | Expected Term |
|---|---|---|---|
| 23.59% | 2.72% | 4.90% | 4.28 years |

## AGGREGATED STOCK OPTION EXERCISES IN 2003 AND YEAR-END OPTION VALUES

**Aggregated Stock Option Exercises.** The following table sets forth information concerning options exercised during the year ending December 31, 2003 by the named executive officers and the value of unexercised options held by them as of December 31, 2003.

| Name | Shares Acquired on Exercise (#) | Value Realized ($)[15] | Number of Securities Underlying Unexercised Options at Fiscal Year-End (#) | | Value of Unexercised In-the-Money Options At Year-End ($)[14] | |
|---|---|---|---|---|---|---|
| | | | Exercisable | Unexercisable | Exercisable | Unexercisable |
| **Savannah Electric** | | | | | | |
| Anthony R. James | 13,785 | 201,626 | 52,902 | 66,038 | 576,957 | 292,108 |
| W. Miles Greer | 17,480 | 253,385 | 47,690 | 33,097 | 562,488 | 180,256 |
| Kirby R. Willis | 7,967 | 117,180 | 19,001 | 30,436 | 189,691 | 165,826 |
| Sandra R. Miller | - | - | 6,382 | 16,942 | 56,191 | 62,218 |
| **Southern Power** | | | | | | |
| W. Paul Bowers | 35,077 | 541,068 | 72,345 | 96,791 | 692,848 | 435,030 |
| Anthony J. Topazi | 20,000 | 336,570 | 72,302 | 63,612 | 775,745 | 317,744 |
| Robert G. Moore | 29,647 | 486,094 | 28,004 | 43,107 | 236,590 | 212,797 |
| Cliff S. Thrasher | 12,485 | 178,001 | 26,258 | 36,592 | 228,219 | 185,732 |
| Edward Day | 8,951 | 102,716 | 6,681 | 23,133 | 41,149 | 108,833 |

[14] This column represents the excess of the fair market value of Southern Company's common stock of $30.25 per share, as of December 31, 2003, above the exercise price of the options. The Exercisable column reports the "value" of options that are vested and therefore could be exercised. The Unexercisable column reports the "value" of options that are not vested and therefore could not be exercised as of December 31, 2003.

[15] The "Value Realized" is ordinary income, before taxes, and represents the amount equal to the excess of the fair market value of the shares at the time of exercise above the exercise price.

## DEFINED BENEFIT OR ACTUARIAL PLAN DISCLOSURE

**Pension Plan Table.** The following table sets forth the estimated annual pension benefits payable at normal retirement age under Southern's qualified Pension Plan, as well as non-qualified supplemental benefits, based on the stated compensation and years of service with the Southern Company system for all named executive officers of Savannah Electric and Southern Power, except for Messrs. Greer and Willis. Compensation for pension purposes is limited to the average of the highest three of the final 10 years' compensation. Compensation is base salary plus the excess of annual incentive compensation over 15 percent of base salary. These compensation components are reported under columns titled "Salary" and "Bonus" in the Summary Compensation Tables on pages III-6 and III-7.

| | Years of Accredited Service | | | | | |
|---|---|---|---|---|---|---|
| **Remuneration** | **15** | **20** | **25** | **30** | **35** | **40** |
| $ 100,000 | $ 25,500 | $ 34,000 | $ 42,500 | $ 51,000 | $ 59,500 | $ 68,000 |
| 300,000 | 76,500 | 102,000 | 127,500 | 153,000 | 178,500 | 204,000 |
| 500,000 | 127,500 | 170,000 | 212,500 | 255,000 | 297,500 | 340,000 |
| 700,000 | 178,500 | 238,000 | 297,500 | 357,000 | 416,500 | 476,000 |
| 900,000 | 229,500 | 306,000 | 382,500 | 459,000 | 535,500 | 612,000 |
| 1,100,000 | 280,500 | 374,000 | 467,500 | 561,000 | 654,500 | 748,000 |
| 1,300,000 | 331,500 | 442,000 | 552,500 | 663,000 | 773,500 | 884,000 |

As of December 31, 2003, the applicable compensation levels and years of accredited service are presented in the following tables:

**Savannah Electric**

| Name | Compensation Level | Accredited Years of Service |
|---|---|---|
| Anthony R. James | $382,476 | 24 |
| W. Miles Greer[16] | 263,274 | 27 |
| Kirby R. Willis[17] | 243,194 | 29 |
| Sandra R. Miller | 218,099 | 23 |

**Southern Power**

| Name | Compensation Level | Accredited Years of Service |
|---|---|---|
| W. Paul Bowers | $650,994 | 23 |
| Anthony J. Topazi | 460,397 | 33 |
| Robert G. Moore | 388,047 | 29 |
| Cliff S. Thrasher | 324,619 | 32 |
| Edward Day | 279,250 | 19 |

16 The number of accredited years of service includes 7 years and 6 months credited to Mr. Greer pursuant to a supplemental pension agreement.

17 The number of accredited years of service includes 5 years and 5 months granted to Mr. Willis for time served at a non-affiliated electric utility.

The amounts shown in the table were calculated according to the final average pay formula and are based on a single life annuity without reduction for joint and survivor annuities or computation of Social Security offset that would apply in most cases.

In 1998, Savannah Electric merged its pension plan into the Southern Company Pension Plan. Savannah Electric also has in effect a supplemental executive retirement plan for certain of its executive employees. The plan is designed to provide participants with a supplemental retirement benefit, which, in conjunction with Social Security and benefits under Southern Company's qualified pension plan, will equal 70 percent of the highest three of the final 10 years' average annual earnings (excluding incentive compensation).

The following table sets forth the estimated combined annual pension benefits under Southern Company's pension and Savannah Electric's supplemental executive retirement plans in effect during 2003 which are payable to Messrs. Greer and Willis, upon retirement at the normal retirement age after designated periods of accredited service and at a specified compensation level.

| | Years of Accredited Service | | |
|---|---|---|---|
| **Remuneration** | **15** | **25** | **35** |
| $150,000 | $105,000 | $105,000 | $105,000 |
| 180,000 | 126,000 | 126,000 | 126,000 |
| 210,000 | 147,000 | 147,000 | 147,000 |
| 260,000 | 182,000 | 182,000 | 182,000 |
| 280,000 | 196,000 | 196,000 | 196,000 |
| 300,000 | 210,000 | 210,000 | 210,000 |
| 350,000 | 245,000 | 245,000 | 245,000 |
| 400,000 | 280,000 | 280,000 | 280,000 |
| 430,000 | 301,000 | 301,000 | 301,000 |
| 460,000 | 322,000 | 322,000 | 322,000 |

**Compensation of Directors.**

Standard Arrangements. The following table presents compensation paid to Savannah Electric's directors during 2003 for service as a member of the board of directors and any board committee(s), except that employee directors received no fees or compensation for service as a member of the board of directors or any board committee. At the election of the director, all or a portion of the cash retainer may be payable in Southern Company's common stock, and all or a portion of the total fees may be deferred under the Deferred Compensation Plan until membership on the board is terminated.

| | |
|---|---|
| **Cash Retainer Fee** | $10,000 |
| **Stock Retainer Fee** | 85 shares per quarter |
| **Meeting Fee** | $750 for each Board or Committee meeting attended |

Southern Power's directors are all employed within the Southern Company system and receive no fees or compensation for service as a member of Southern Power's board of directors.

Other Arrangements. No director received other compensation for services as a director during the year ending December 31, 2003 in addition to or in lieu of that specified by the standard arrangements specified above.

**Employment Contracts and Termination of Employment and Change in Control Arrangements.**

Southern Power's executive officers are employees of SCS. Savannah Electric and SCS have adopted Southern Company's Change in Control Plan, which is applicable to certain of its officers, and has entered into individual change in control agreements with its most highly compensated executive officers. If an executive is involuntarily terminated, other than for cause, within two years following a change in control of Savannah Electric, SCS or Southern Company, the agreements provide for:

- lump sum payment of two or three times annual compensation,
- up to five years' coverage under group health and life insurance plans,
- immediate vesting of all stock options, stock appreciation rights and restricted stock previously granted,
- payment of any accrued long-term and short-term bonuses and dividend equivalents and
- payment of any excise tax liability incurred as a result of payments made under any individual agreements.

A change in control is defined under the agreements as:

- acquisition of at least 20 percent of the Southern Company's stock,
- a change in the majority of the members of the Southern Company's board of directors,
- a merger or other business combination that results in Southern Company's shareholders immediately before the merger owning less than 65 percent of the voting power after the merger or
- a sale of substantially all the assets of Southern Company.

A change in control of Savannah Electric is defined under the agreements as:

- acquisition of at least 50 percent of Savannah Electric's stock,
- a merger or other business combination unless Southern Company controls the surviving entity or
- a sale of substantially all the assets of Savannah Electric.

Southern Company also has amended its short- and long-term incentive plans to provide for pro-rata payments at not less than target-level performance if a change in control occurs and the plans are not continued or replaced with comparable plans.

Mr. W. Miles Greer and Savannah Electric entered into agreements that provide for a monthly payment to Mr. Greer after his retirement equal to the difference between the amount he will receive under the Southern Company Pension Plan and Savannah Electric Supplemental Executive Retirement Plan and the amount he would receive under those Plans had he been employed by Savannah Electric an additional seven years and six months under the Pension Plan and an additional eight years under the Supplemental Executive Retirement Plan.

**Report on Repricing of Options.**

None.

**Compensation Committee Interlocks and Insider Participation.**

None.

## Item 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

*Security Ownership of Certain Beneficial Owners.* Southern Company is the beneficial owner of 100% of the outstanding common stock of Savannah Electric and Southern Power.

| Title of Class | Name and Address of Beneficial Owner | Amount and Nature of Beneficial Ownership | Percent of Class |
|---|---|---|---|
| Common Stock | The Southern Company<br>270 Peachtree Street, N.W.<br>Atlanta, Georgia 30303 | | 100% |
| | **Registrants:** | | |
| | Savannah Electric | 10,844,635 | |
| | Southern Power | 1,000 | |

*Security Ownership of Management.* The following table shows the number of shares of Southern Company Common stock owned by the directors, nominees and executive officers as of December 31, 2003. It is based on information furnished by the directors, nominees and executive officers. The shares owned by all directors, nominees and executive officers as a group constitute less than one percent of the total number of shares outstanding on December 31, 2003.

| **Name of Directors, Nominees and Executive Officers** | **Title of Class** | **Shares Beneficially Owned (1)** | **Shares Beneficially Owned Include: Shares Individuals Have Rights to Acquire Within 60 days (2)** |
|---|---|---|---|
| **Savannah Electric** | | | |
| Gus H. Bell, III | Southern Company Common | 636 | - |
| Archie H. Davis | Southern Company Common | 1,065 | - |
| Walter D. Gnann | Southern Company Common | 3,312 | - |
| Robert B. Miller, III | Southern Company Common | 2,775 | - |
| Arnold M. Tenenbaum | Southern Company Common | 1,599 | - |
| W. Miles Greer | Southern Company Common | 67,958 | 62,366 |
| Anthony R. James | Southern Company Common | 96,553 | 81,289 |
| Sandra R. Miller | Southern Company Common | 14,770 | 13,411 |
| Kirby R. Willis | Southern Company Common | 37,798 | 32,465 |
| The directors, nominees and executive officers as a group | Southern Company Common | 226,466 | 189,531 |

| Name of Directors, Nominees and Executive Officers | Title of Class | Shares Beneficially Owned (1) | Shares Beneficially Owned Include: Shares Individuals Have Rights to Acquire Within 60 days (2) |
|---|---|---|---|
| **Southern Power** | | | |
| W. Paul Bowers | Southern Company Common | 120,220 | 112,941 |
| Thomas A. Fanning | Southern Company Common | 85,420 | 83,657 |
| H. Allen Franklin | Southern Company Common | 1,249,368 | 1,207,841 |
| Charles D. McCrary | Southern Company Common | 259,492 | 256,031 |
| David M. Ratcliffe | Southern Company Common | 227,807 | 214,558 |
| Edward Day | Southern Company Common | 19,659 | 17,283 |
| Robert G. Moore | Southern Company Common | 60,232 | 46,725 |
| Cliff S. Thrasher | Southern Company Common | 36,274 | 31,026 |
| Anthony J. Topazi | Southern Company Common | 111,232 | 99,580 |
| The directors, nominees and executive officers as a group | Southern Company Common | 2,169,704 | 2,069,642 |

(1) As used in the tables, "beneficial ownership" means the sole or shared power to vote, or to direct the voting of, a security and/or investment power with respect to a security (i.e., the power to dispose of, or to direct the disposition of, a security).

(2) Indicates shares of Southern Company common stock that directors and executive officers have the right to acquire within 60 days.

**Changes in control.** Southern Company, Savannah Electric and Southern Power know of no arrangements which may at a subsequent date result in any change in control.

## ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

### SAVANNAH ELECTRIC

***Transactions with management and others.***

Mr. Archie Davis is currently President, Chief Executive Officer and a Director of Savannah Bancorp, Inc. and Vice Chairman and Director of The Savannah Bank, N.A., Savannah, Georgia and was also President and Chief Executive Officer prior to January 2003. Messrs. James and Bell are directors of SunTrust Bank of Savannah. Mr. Tenenbaum is Chairman of the Board of Directors for the holding company of First Chatham Bank. During 2003, these banks furnished a number of regular banking services in the ordinary course of business to Savannah Electric. Savannah Electric intends to maintain normal banking relations with the aforesaid banks in the future.

## ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

The following represents the fees billed to Savannah Electric and Southern Power for the last two fiscal years by Deloitte & Touche LLP, each company's principal public accountant for 2003 and 2002:

| | 2003 | 2002 |
|---|---|---|
| **Savannah Electric** | *(in thousands)* | |
| Audit Fees (1) | $250 | $170 |
| Audit-Related Fees (2) | 101 | 2 |
| Tax Fees | - | - |
| All Other Fees | - | - |
| | $351 | $172 |
| **Southern Power** | | |
| Audit Fees (3) | $535 | $1,580 |
| Audit-Related Fees (2) | 290 | 1 |
| Tax Fees | - | - |
| All Other Fees | - | - |
| | $825 | $1,581 |

(1) Includes services performed in connection with financing transactions.
(2) Includes internal control review services and accounting consultations.
(3) 2002 amount includes a re-audit of the 2001 financial statements and other services performed in connection with Southern Power's initial public debt offering. 2003 amount includes services performed in connection with additional financing transactions.

The Southern Company Audit Committee (on behalf of Southern Company and all its subsidiaries) adopted a Policy of Engagement of the Independent Auditor for Audit and Non-Audit Services that includes requirements for such Audit Committee to pre-approve audit and non-audit services provided by Deloitte & Touche LLP. All of the audit services provided by Deloitte & Touche LLP in the fiscal year 2003 (described in the footnotes to the table above) and related fees were approved in advance by the Southern Company Audit Committee.

**INDEPENDENT AUDITORS' REPORT**

To the Board of Directors and Stockholders of
Southern Company:

We have audited the consolidated financial statements of Southern Company and Subsidiary Companies as of December 31, 2003 and 2002, and for the years then ended, and have issued our report thereon dated March 1, 2004 (which report expresses an unqualified opinion and includes an explanatory paragraph relating to the change in the method of accounting for asset retirement obligations); such consolidated financial statements and report are included elsewhere in this Form 10-K. Our audit also included the 2003 and 2002 consolidated financial statement schedules of Southern Company and Subsidiary Companies (page S-2) listed in the accompanying index at Item 15. These financial statement schedules are the responsibility of Southern Company's management. Our responsibility is to express an opinion based on our audits. The 2001 consolidated financial statement schedule was audited by other auditors who have ceased operations. Those auditors expressed an opinion, in their report dated February 13, 2002, that such 2001 consolidated financial statement schedule, when considered in relation to the 2001 basic consolidated financial statements taken as a whole, presented fairly, in all material respects, the information set forth therein. In our opinion, the 2003 and 2002 consolidated financial statement schedules, when considered in relation to the 2003 and 2002 basic consolidated financial statements taken as a whole, present fairly, in all material respects, the information set forth therein.

## REPORT OF INDEPENDENT PUBLIC ACCOUNTANTS AS TO SCHEDULE

To The Southern Company:

We have audited in accordance with auditing standards generally accepted in the United States, the consolidated financial statements of The Southern Company and its subsidiaries included in this Form 10-K, and have issued our report thereon dated February 13, 2002. Our audits were made for the purpose of forming an opinion on those statements taken as a whole. The schedule listed under Item 14(a)(2) herein as it relates to The Southern Company and its subsidiaries (page S-2) is the responsibility of The Southern Company's management and is presented for purposes of complying with the Securities and Exchange Commission's rules and is not part of the basic consolidated financial statements. This schedule has been subjected to the auditing procedures applied in the audits of the basic consolidated financial statements and, in our opinion, fairly states in all material respects the financial data required to be set forth therein in relation to the basic consolidated financial statements taken as a whole.

**INDEPENDENT AUDITORS' REPORT**

Alabama Power Company:

We have audited the financial statements of Alabama Power Company as of December 31, 2003 and 2002, and for the years then ended, and have issued our report thereon dated March 1, 2004 (which report expresses an unqualified opinion an includes and explanatory paragraph relating to the change in the method of accounting for asset retirement obligations); such financial statements and report are included elsewhere in this Form 10-K. Our audits also included the 2003 and 2002 financial statement schedules of Alabama Power Company (page S-3) listed in the accompanying index at Item 15. These financial statement schedules are the responsibility of Alabama Power Company's management. Our responsibility is to express an opinion based on our audits. The 2001 financial statement schedule was audited by other auditors who have ceased operations. Those auditors expressed an opinion, in their report dated February 13, 2002, that such 2001 financial statement schedule, when considered in relation to the 2001 basic financial statements taken as a whole, presented fairly, in all material respects, the information set forth therein. In our opinion, the 2003 and 2002 financial statement schedules, when considered in relation to the 2003 and 2002 basic financial statements taken as a whole, present fairly, in all material respects, the information set forth therein.

## EXHIBIT INDEX

The following exhibits indicated by an asterisk (*) preceding the exhibit number are filed herewith. The balance of the exhibits have heretofore been filed with the SEC as the exhibits and in the file numbers indicated and are incorporated herein by reference. The exhibits marked with a pound sign (#) are management contracts or compensatory plans or arrangements required to be identified as such by Item 15 of Form 10-K.

**(3) Articles of Incorporation and By-Laws**

**Southern Company**

(a) 1 - Composite Certificate of Incorporation of Southern Company, reflecting all amendments thereto through January 5, 1994. (Designated in Registration No. 33-3546 as Exhibit 4(a), in Certificate of Notification, File No. 70-7341, as Exhibit A and in Certificate of Notification, File No. 70-8181, as Exhibit A.)

(a) 2 - By-laws of Southern Company as amended effective February 17, 2003, and as presently in effect. (Designated in Southern Company's Form 10-Q for the quarter ended June 30, 2003, File No. 1-3526, as Exhibit 3(a)1.)

**Alabama Power**

(b) 1 - Charter of Alabama Power and amendments thereto through February 17, 2004. (Designated in Registration Nos. 2-59634 as Exhibit 2(b), 2-60209 as Exhibit 2(c), 2-60484 as Exhibit 2(b), 2-70838 as Exhibit 4(a)-2, 2-85987 as Exhibit 4(a)-2, 33-25539 as Exhibit 4(a)-2, 33-43917 as Exhibit 4(a)-2, in Form 8-K dated February 5, 1992, File No. 1-3164, as Exhibit 4(b)-3, in Form 8-K dated July 8, 1992, File No. 1-3164, as Exhibit 4(b)-3, in Form 8-K dated October 27, 1993, File No. 1-3164, as Exhibits 4(a) and 4(b), in Form 8-K dated November 16, 1993, File No. 1-3164, as Exhibit 4(a), in Certificate of Notification, File No. 70-8191, as Exhibit A, in Alabama Power's Form 10-K for the year ended December 31, 1997, File No. 1-3164, as Exhibit 3(b)2, in Form 8-K dated August 10, 1998, File No. 1-3164, as Exhibit 4.4, in Alabama Power's Form 10-K for the year ended December 31, 2000, File No. 1-3164, as Exhibit 3(b)2, in Alabama Power's Form 10-K for the year ended December 31, 2001, File No. 1-3164, as Exhibit 3(b)2, in Form 8-K dated February 5, 2003, File No. 1-3164, as Exhibit 4.4, in Alabama Power's Form 10-Q for the quarter ended March 31, 2003, File No 1-3164, as Exhibit 3(b)1 and in Form 8-K dated February 5, 2004, File No. 1-3164 as Exhibit 4.4.)

(b) 2 - By-laws of Alabama Power as amended effective April 25, 2003, and as presently in effect. (Designated in Alabama Power's Form 10-Q for the quarter ended March 31, 2003, File No 1-3164, as Exhibit 3(b)2.)

**Georgia Power**

(c) 1 - Charter of Georgia Power and amendments thereto through January 16, 2001. (Designated in Registration Nos. 2-63392 as Exhibit 2(a)-2, 2-78913 as Exhibits 4(a)-(2) and 4(a)-(3), 2-93039 as Exhibit 4(a)-(2), 2-96810 as Exhibit 4(a)-2, 33-141 as Exhibit 4(a)-(2), 33-1359 as Exhibit 4(a)(2), 33-5405 as Exhibit 4(b)(2), 33-14367 as Exhibits 4(b)-(2) and 4(b)-(3), 33-22504 as Exhibits 4(b)-(2), 4(b)-(3) and 4(b)-(4), in Georgia Power's Form 10-K for the year ended December 31, 1991, File No. 1-6468, as Exhibits 4(a)(2) and 4(a)(3), in Registration No. 33-48895 as Exhibits 4(b)-(2) and 4(b)-(3), in Form 8-K dated December 10, 1992, File No. 1-6468 as Exhibit 4(b), in Form 8-K dated June 17, 1993, File No. 1-6468, as Exhibit 4(b), in Form 8-K dated October 20, 1993, File No. 1-6468, as Exhibit 4(b), in Georgia Power's Form 10-K for the year ended December 31, 1997, File No. 1-6468, as Exhibit 3(c)2 and in Georgia Power's Form 10-K for the year ended December 31, 2000, File No. 1-6468, as Exhibit 3(c)2.)

(c) 2 - By-laws of Georgia Power as amended effective February 19, 2003, and as presently in effect. (Designated in Georgia Power's Form 10-K for the year ended December 31, 2002, File No 1-6468, as Exhibit 3(c)2.)

**Gulf Power**

(d) 1 - Restated Articles of Incorporation of Gulf Power and amendments thereto through February 9, 2001. (Designated in Registration No. 33-43739 as Exhibit 4(b)-1, in Form 8-K dated January 15, 1992, File No. 0-2429, as Exhibit 1(b), in Form 8-K dated August 18, 1992, File No. 0-2429, as Exhibit 4(b)-2, in Form 8-K dated September 22, 1993, File No. 0-2429, as Exhibit 4, in Form 8-K dated November 3, 1993, File No. 0-2429, as Exhibit 4, in Gulf Power's Form 10-K for the year ended December 31, 1997, File No. 0-2429, as Exhibit 3(d)2 and in Gulf Power's Form 10-K for the year ended December 31, 2000, File No. 0-2429, as Exhibit 3(d)2.)

(d) 2 - By-laws of Gulf Power as amended effective July 26, 2002, and as presently in effect. (Designated in Gulf Power's Form 10-K for the year ended December 31, 2002, File No 0-2429, as Exhibit 3(d)2.)

**Mississippi Power**

(e) 1 - Articles of Incorporation of Mississippi Power, articles of merger of Mississippi Power Company (a Maine corporation) into Mississippi Power and articles of amendment to the articles of incorporation of Mississippi Power through March 8, 2001. (Designated in Registration No. 2-71540 as Exhibit 4(a)-1, in Form U5S for 1987, File No. 30-222-2, as Exhibit B-10, in Registration No. 33-49320 as Exhibit 4(b)-(1), in Form 8-K dated August 5, 1992, File No. 0-6849, as Exhibits 4(b)-2 and 4(b)-3, in Form 8-K dated August 4, 1993, File No. 0-6849, as Exhibit 4(b)-3, in Form 8-K dated August 18, 1993, File No. 0-6849, as Exhibit 4(b)-3, in Mississippi Power's Form 10-K for the year ended December 31, 1997, File No. 0-6849, as Exhibit 3(e)2 and in Mississippi Power's Form 10-K for the year ended December 31, 2000, File No. 0-6849, as Exhibit 3(e)2.)

(e) 2 - By-laws of Mississippi Power as amended effective February 28, 2001, and as presently in effect. (Designated in Mississippi Power's Form 10-K for the year ended December 31, 2001, File No. 0-6849, as Exhibit 3(e)2.)

**Savannah Electric**

(f) 1 - Charter of Savannah Electric and amendments thereto through December 2, 1998. (Designated in Registration Nos. 33-25183 as Exhibit 4(b)-(1), 33-45757 as Exhibit 4(b)-(2), in Form 8-K dated November 9, 1993, File No. 1-5072, as Exhibit 4(b) and in Savannah Electric's Form 10-K for the year ended December 31, 1998, as Exhibit 3(f)2.)

(f) 2 - By-laws of Savannah Electric as amended effective May 17, 2000, and as presently in effect. (Designated in Savannah Electric's Form 10-K for the year ended December 31, 2000, File No. 1-5072, as Exhibit 3(f)2.)

**Southern Power**

(g) 1 - Certificate of Incorporation of Southern Power dated January 8, 2001. (Designated in Registration No. 333-98553 as Exhibit 3.1.)

(g) 2 - Bylaws of Southern Power effective January 8, 2001. (Designated in Registration No. 333-98553 as Exhibit 3.2.)

**(4) Instruments Describing Rights of Security Holders, Including Indentures**

**Southern Company**

(a) 1 - Subordinated Note Indenture dated as of February 1, 1997, among Southern Company, Southern Company Capital Funding, Inc. and Deutsche Bank Trust Company Americas (formerly known as Bankers Trust Company), as Trustee, and indentures supplemental thereto dated as of February 4, 1997. (Designated in Registration Nos. 333-28349 as Exhibits 4.1 and 4.2 and 333-28355 as Exhibit 4.2.)

(b) 6 - Amended and Restated Trust Agreement of Alabama Power Capital Trust IV dated as of September 1, 2002. (Designated in Form 8-K dated September 26, 2002, File No. 1-3164, as Exhibit 4.12-A.)

(b) 7 - Amended and Restated Trust Agreement of Alabama Power Capital Trust V dated as of September 1, 2002. (Designated in Form 8-K dated September 26, 2002, File No. 1-3164, as Exhibit 4.12-B.)

(b) 8 - Guarantee Agreement relating to Alabama Power Capital Trust IV dated as of September 1, 2002. (Designated in Form 8-K dated September 26, 2002, File No. 1-3164, as Exhibit 4.16-A.)

(b) 9 - Guarantee Agreement relating to Alabama Power Capital Trust V dated as of September 1, 2002. (Designated in Form 8-K dated September 26, 2002, File No. 1-3164, as Exhibit 4.16-B.)

**Georgia Power**

(c) 1 - Subordinated Note Indenture dated as of August 1, 1996, between Georgia Power and JPMorgan Chase Bank (formerly The Chase Manhattan Bank), as Trustee, and indentures supplemental thereto through January 1, 1997. (Designated in Form 8-K dated August 21, 1996, File No. 1-6468, as Exhibits 4.1 and 4.2 and in Form 8-K dated January 9, 1997, File No. 1-6468, as Exhibit 4.2.)

(c) 2 - Subordinated Note Indenture dated as of June 1, 1997, between Georgia Power and JPMorgan Chase Bank (formerly The Chase Manhattan Bank), as Trustee, and indentures supplemental thereto through January 23, 2004. (Designated in Certificate of Notification, File No. 70-8461, as Exhibits D and E, in Form 8-K dated February 17, 1999, File No. 1-6468, as Exhibit 4.4, in Form 8-K dated June 13, 2002, File No. 1-6468, as Exhibit 4.4, in Form 8-K dated October 30, 2002, File No. 1-6468, as Exhibit 4.4 and in Form 8-K dated January 15, 2004, File No. 1-6468, as Exhibit 4.4.)

(c) 3 - Senior Note Indenture dated as of January 1, 1998, between Georgia Power and JPMorgan Chase Bank (formerly The Chase Manhattan Bank), as Trustee, and indentures supplemental thereto through February 17, 2004. (Designated in Form 8-K dated January 21, 1998, File No. 1-6468, as Exhibits 4.1 and 4.2, in Forms 8-K each dated November 19, 1998, File No. 1-6468, as Exhibit 4.2, in Form 8-K dated March 3, 1999, File No. 1-6469 as Exhibit 4.2, in Form 8-K dated February 15, 2000, File No. 1-6469 as Exhibit 4.2, in Form 8-K dated January 26, 2001, File No. 1-6469 as Exhibits 4.2(a) and 4.2(b), in Form 8-K dated February 16, 2001, File No. 1-6469 as Exhibit 4.2, in Form 8-K dated May 1, 2001, File No. 1-6468, as Exhibit 4.2, in Form 8-K dated June 27, 2002, File No. 1-6468, as Exhibit 4.2, in Form 8-K dated November 15, 2002, File No. 1-6468, as Exhibit 4.2, in Form 8-K dated February 13, 2003, File No. 1-6468, as Exhibit 4.2, in Form 8-K dated February 21, 2003, File No. 1-6468, as Exhibit 4.2, in Form 8-K dated April 10, 2003, File No. 1-6468, as Exhibits 4.1, 4.2 and 4.3, in Form 8-K dated September 8, 2003, File No. 1-6468, as Exhibit 4.1, in Form 8-K dated September 23, 2003, File No. 1-6468, as Exhibit 4.1, in Form 8-K dated January 12, 2004, File No. 1-6468, as Exhibits 4.1 and 4.2 and in Form 8-K dated February 12, 2004, File No. 1-6468, as Exhibit 4.1.)

(c) 4 - Amended and Restated Trust Agreement of Georgia Power Capital Trust IV dated as of February 1, 1999. (Designated in Form 8-K dated February 17, 1999, as Exhibit 4.7-A)

(c) 5 - Amended and Restated Trust Agreement of Georgia Power Capital Trust V dated as of June 1, 2002. (Designated in Form 8-K dated June 13, 2002, as Exhibit 4.7-A.)

(c) 6 - Amended and Restated Trust Agreement of Georgia Power Capital Trust VI dated as of November 1, 2002. (Designated in Form 8-K dated October 30, 2002, as Exhibit 4.7-A.)

(c) 7 - Amended and Restated Trust Agreement of Georgia Power Capital Trust VII dated as of January 1, 2004. (Designated in Form 8-K dated January 15, 2004, as Exhibit 4.7-A.)

(c) 8 - Guarantee Agreement relating to Georgia Power Capital Trust IV dated as of February 1, 1999. (Designated in Form 8-K dated February 17, 1999, as Exhibit 4.11-A.)

(c) 9 - Guarantee Agreement relating to Georgia Power Capital Trust V dated as of June 1, 2002. (Designated in Form 8-K dated June 13, 2002, as Exhibit 4.11-A.)

(c) 10 - Guarantee Agreement relating to Georgia Power Capital Trust VI dated as of November 1, 2002. (Designated in Form 8-K dated October 30, 2002, as Exhibit 4.11-A.)

(c) 11 - Guarantee Agreement relating to Georgia Power Capital Trust VII dated as of January 1, 2004. (Designated in Form 8-K dated January 15, 2004, as Exhibit 4.11-A.)

**Gulf Power**

(d) 1 - Indenture dated as of September 1, 1941, between Gulf Power and JPMorgan Chase Bank (formerly The Chase Manhattan Bank), as Trustee, and indentures supplemental thereto through November 1, 1996. (Designated in Registration Nos. 2-4833 as Exhibit B-3, 2-62319 as Exhibit 2(a)-3, 2-63765 as Exhibit 2(a)-3, 2-66260 as Exhibit 2(a)-3, 33-2809 as Exhibit 4(a)-2, 33-43739 as Exhibit 4(a)-2, in Gulf Power's Form 10-K for the year ended December 31, 1991, File No. 0-2429, as Exhibit 4(b), in Form 8-K dated August 18, 1992, File No. 0-2429, as Exhibit 4(a)-3, in Registration No. 33-50165 as Exhibit 4(a)-2, in Form 8-K dated July 12, 1993, File No. 0-2429, as Exhibit 4, in Certificate of Notification, File No. 70-8229, as Exhibit A, in Certificate of Notification, File No. 70-8229, as Exhibits E and F, in Form 8-K dated January 17, 1996, File No. 0-2429, as Exhibit 4, in Certificate of Notification, File No. 70-8229, as Exhibit A, in Certificate of Notification, File No. 70-8229, as Exhibit A and in Form 8-K dated November 6, 1996, File No. 0-2429, as Exhibit 4.)

(d) 2 - Subordinated Note Indenture dated as of January 1, 1997, between Gulf Power and JPMorgan Chase Bank (formerly The Chase Manhattan Bank), as Trustee, and indentures supplemental thereto through December 13, 2002. (Designated in Form 8-K dated January 27, 1997, File No. 0-2429, as Exhibits 4.1 and 4.2, in Form 8-K dated July 28, 1997, File No. 0-2429, as Exhibit 4.2, in Form 8-K dated January 13, 1998, File No. 0-2429, as Exhibit 4.2, in Form 8-K dated November 8, 2001, File No. 0-2429, as Exhibit 4.2 and in Form 8-K dated December 5, 2002, File No. 0-2429, as Exhibit 4.2.)

(d) 3 - Senior Note Indenture dated as of January 1, 1998, between Gulf Power and JPMorgan Chase Bank (formerly The Chase Manhattan Bank), as Trustee, and indentures supplemental thereto through September 16, 2003. (Designated in Form 8-K dated June 17, 1998, File No. 0-2429, as Exhibits 4.1 and 4.2, in Form 8-K dated August 17, 1999, File No. 0-2429, as Exhibit 4.2, in Form 8-K dated July 31, 2001, File No. 0-2429, as Exhibit 4.2, in Form 8-K dated October 5, 2001, File No. 0-2429, as Exhibit 4.2, in Form 8-K dated January 18, 2002, File No. 0-2429, as Exhibit 4.2, in Form 8-K dated March 21, 2003, File No. 0-2429, as Exhibit 4.2, in Form 8-K dated July 10, 2003, File No. 0-2429, as Exhibits 4.1 and 4.2 and in Form 8-K dated September 5, 2003, File No. 0-2429, as Exhibit 4.1.)

(d) 4 - Amended and Restated Trust Agreement of Gulf Power Capital Trust III dated as of November 1, 2001. (Designated in Form 8-K dated November 8, 2001, File No. 0-2429, as Exhibit 4.5.)

(d) 5 - Amended and Restated Trust Agreement of Gulf Power Capital Trust IV dated as of December 1, 2002. (Designated in Form 8-K dated December 5, 2002, File No. 0-2429, as Exhibit 4.5.)

(d) 6 - Guarantee Agreement relating to Gulf Power Capital Trust III dated as of November 1, 2001. (Designated in Form 8-K dated November 8, 1998, File No. 0-2429, as Exhibit 4.8.)

(d) 7 - Guarantee Agreement relating to Gulf Power Capital Trust IV dated as of December 1, 2002. (Designated in Form 8-K dated December 5, 2002, File No. 0-2429, as Exhibit 4.8.)

**Mississippi Power**

(e) 1 - Indenture dated as of September 1, 1941, between Mississippi Power and Deutsche Bank Trust Company Americas (formerly known as Bankers Trust Company), as Successor Trustee, and indentures supplemental thereto through December 1, 1995. (Designated in Registration Nos. 2-4834 as Exhibit B-3, 2-62965 as Exhibit 2(b)-2, 2-66845 as Exhibit 2(b)-2, 2-71537 as Exhibit 4(a)-(2), 33-5414 as Exhibit 4(a)-(2), 33-39833 as Exhibit 4(a)-2, in Mississippi Power's Form 10-K for the year ended December 31, 1991, File No. 0-6849, as Exhibit 4(b), in Form 8-K dated August 5, 1992, File No. 0-6849, as Exhibit 4(a)-2, in Second Certificate of Notification, File No. 70-7941, as Exhibit I, in Mississippi Power's Form 8-K dated February 26, 1993, File No. 0-6849, as Exhibit 4(a)-2, in Certificate of Notification, File No. 70-8127, as Exhibit A, in Form 8-K dated June 22, 1993, File No. 0-6849, as Exhibit 1, in Certificate of Notification, File No. 70-8127, as

Exhibit A, in Form 8-K dated March 8, 1994, File No. 0-6849, as Exhibit 4, in Certificate of Notification, File No. 70-8127, as Exhibit C and in Form 8-K dated December 5, 1995, File No. 0-6849, as Exhibit 4.)

(e) 2 - Senior Note Indenture dated as of May 1, 1998 between Mississippi Power and Deutsche Bank Trust Company Americas (formerly known as Bankers Trust Company), as Trustee and indentures supplemental thereto through April 29, 2003. (Designated in Form 8-K dated May 14, 1998, File No. 0-6849, as Exhibits 4.1, 4.2(a) and 4.2(b), in Form 8-K dated March 22, 2000, File No. 0-6849, as Exhibit 4.2, in Form 8-K dated March 12, 2002, File No. 0-6849, as Exhibit 4.2 and in Form 8-K dated April 24, 2003, File No. 001-11229, as Exhibit 4.2.)

(e) 3 - Subordinated Note Indenture dated as of February 1, 1997, between Mississippi Power and Deutsche Bank Trust Company Americas (formerly known as Bankers Trust Company), as Trustee, and indenture supplemental thereto dated as of March 22, 2002. (Designated in Form 8-K dated February 20, 1997, File No. 0-6849, as Exhibits 4.1 and 4.2 and in Form 8-K dated March 15, 2002, File No. 0-6849, as Exhibit 4.5.)

(e) 4 - Amended and Restated Trust Agreement of Mississippi Power Capital Trust II dated as of March 1, 2002. (Designated in Form 8-K dated March 15, 2002, File No. 0-6849, as Exhibit 4.5.)

(e) 5 - Guarantee Agreement relating to Mississippi Power Capital Trust II dated as of March 1, 2002. (Designated in Form 8-K dated March 15, 2002, File No. 0-6849, as Exhibit 4.8.)

**Savannah Electric**

(f) 1 - Indenture dated as of March 1, 1945, between Savannah Electric and The Bank of New York, as Trustee, and indentures supplemental thereto through May 1, 1996. (Designated in Registration Nos. 33-25183 as Exhibit 4(a)-(1), 33-41496 as Exhibit 4(a)-(2), 33-45757 as Exhibit 4(a)-(2), in Savannah Electric's Form 10-K for the year ended December 31, 1991, File No. 1-5072, as Exhibit 4(b), in Form 8-K dated July 8, 1992, File No. 1-5072, as Exhibit 4(a)-3, in Registration No. 33-50587 as Exhibit 4(a)-(2), in Form 8-K dated July 22, 1993, File No. 1-5072, as Exhibit 4, in Form 8-K dated May 18, 1995, File No. 1-5072, as Exhibit 4 and in Form 8-K dated May 23, 1996, File No. 1-5072, as Exhibit 4.)

(f) 2 - Senior Note Indenture dated as of March 1, 1998 between Savannah Electric and The Bank of New York, as Trustee and indentures supplemental thereto through December 17, 2003. (Designated in Form 8-K dated March 9, 1998, File No. 1-5072, as Exhibits 4.1 and 4.2, in Form 8-K dated May 8, 2001, File No. 1-5072, as Exhibits 4.2(a) and 4.2(b), in Form 8-K dated March 4, 2002, File No. 1-5072, as Exhibit 4.2, in Form 8-K dated November 4, 2002, File No. 1-5072, as Exhibit 4.2 and in Form 8-K dated December 10, 2003, File No. 1-5072, as Exhibits 4.1 and 4.2.)

(f) 3 - Subordinated Note Indenture dated as of December 1, 1998, between Savannah Electric and The Bank of New York, as Trustee, and indenture supplemental thereto dated as of December 9, 1998. (Designated in Form 8-K dated December 3, 1998, File No. 1-5072, as Exhibit 4.3 and 4.4.)

(f) 4 - Amended and Restated Trust Agreement of Savannah Electric Capital Trust I dated as of December 1, 1998. (Designated in Form 8-K dated December 3, 1998, File No. 1-5072, as Exhibit 4.7.)

(f) 5 - Guarantee Agreement relating to Savannah Electric Capital Trust I dated as of December 1, 1998. (Designated in Form 8-K dated December 3, 1998, File No. 1-5072, as Exhibit 4.11.)

**Southern Power**

(g) 1 - Indenture dated as of June 1, 2002, between Southern Power and The Bank of New York, as Trustee, and indentures supplemental thereto through July 8, 2003. (Designated in Registration No. 333-98553 as Exhibits 4.1 and 4.2 and in Southern Power's Form 10-Q for the quarter ended June 30, 2003, File No. 333-98553, as Exhibit 4(g)1.)

**(10) Material Contracts**

**Southern Company**

(a) 1 - Service contracts dated as of January 1, 1984, between SCS and Alabama Power, Georgia Power, Gulf Power, Mississippi Power, SEGCO and Southern Company and Amendment No. 1 dated as of September 6, 1985 between SCS and Southern Company. (Designated in Southern Company's Form 10-K for the year ended December 31, 1984, File No. 1-3526, as Exhibit 10(a) and in Southern Company's Form 10-K for the year ended December 31, 1985, File No. 1-3526, as Exhibit 10(a)(3).)

(a) 2 - Service contract dated as of January 1, 2001, between SCS and Southern Power. (Designated in Southern Company's Form 10-K for the year ended December 31, 2001, File No. 1-3526, as Exhibit 10(a)(2).)

(a) 3 - Service contract dated as of March 3, 1988, between SCS and Savannah Electric. (Designated in Savannah Electric's Form 10-K for the year ended December 31, 1987, File No. 1-5072, as Exhibit 10-p.)

(a) 4 - Service contract dated as of January 15, 1991, between SCS and Southern Nuclear. (Designated in Southern Company's Form 10-K for the year ended December 31, 1991, File No. 1-3526, as Exhibit 10(a)(4).)

(a) 5 - Service contract dated as of December 12, 1994, between SCS and Mobile Energy Services Company, Inc. (Designated in Southern Company's Form 10-K for the year ended December 31, 1994, File No. 1-3526, as Exhibit 10(a)58.)

(a) 6 - Interchange contract dated February 17, 2000, between Alabama Power, Georgia Power, Gulf Power, Mississippi Power, Savannah Electric, Southern Power and SCS. (Designated in Southern Company's Form 10-K for the year ended December 31, 2000, File No. 1-3526, as Exhibit 10(a)6.)

(a) 7 - Agreement dated as of January 27, 1959, Amendment No. 1 dated as of October 27, 1982 and Amendment No. 2 dated November 4, 1993 and effective June 1, 1994, among SEGCO, Alabama Power and Georgia Power. (Designated in Registration No. 2-59634 as Exhibit 5(c), in Georgia Power's Form 10-K for the year ended December 31, 1982, File No. 1-6468, as Exhibit 10(d)(2) and in Alabama Power's Form 10-K for the year ended December 31, 1994, File No. 1-3164, as Exhibit 10(b)18.)

(a) 8 - Joint Committee Agreement dated as of August 27, 1976, among Georgia Power, OPC, MEAG and Dalton. (Designated in Registration No. 2-61116 as Exhibit 5(d).)

(a) 9 - Edwin I. Hatch Nuclear Plant Purchase and Ownership Participation Agreement dated as of January 6, 1975, between Georgia Power and OPC. (Designated in Form 8-K for January, 1975, File No. 1-6468, as Exhibit (b)(1).)

(a) 10 - Edwin I. Hatch Nuclear Plant Operating Agreement dated as of January 6, 1975, between Georgia Power and OPC. (Designated in Form 8-K for January, 1975, File No. 1-6468, as Exhibit (b)(3).)

(a) 11 - Revised and Restated Integrated Transmission System Agreement dated as of November 12, 1990, between Georgia Power and OPC. (Designated in Georgia Power's Form 10-K for the year ended December 31, 1990, File No. 1-6468, as Exhibit 10(g).)

(a) 12 - Plant Hal Wansley Purchase and Ownership Participation Agreement dated as of March 26, 1976, between Georgia Power and OPC. (Designated in Certificate of Notification, File No. 70-5592, as Exhibit A.)

(a) 13 - Plant Hal Wansley Operating Agreement dated as of March 26, 1976, between Georgia Power and OPC. (Designated in Certificate of Notification, File No. 70-5592, as Exhibit B.)

(a) 14 - Edwin I. Hatch Nuclear Plant Purchase and Ownership Participation Agreement dated as of August 27, 1976, between Georgia Power, MEAG and Dalton. (Designated in Form 8-K dated as of June 13, 1977, File No. 1-6468, as Exhibit (b)(1).)

(a) 15 - Edwin I. Hatch Nuclear Plant Operating Agreement dated as of August 27, 1976, between Georgia Power, MEAG and Dalton. (Designated in Form 8-K for February 1977, File No. 1-6468, as Exhibit (b)(2).)

(a) 16 - Alvin W. Vogtle Nuclear Units Number One and Two Purchase and Ownership Participation Agreement dated as of August 27, 1976 and Amendment No. 1 dated as of January 18, 1977, among Georgia Power, OPC, MEAG and Dalton. (Designated in Form U-1, File No. 70-5792, as Exhibit B-1 and in Form 8-K for January 1977, File No. 1-6468, as Exhibit (B)(3).)

(a) 17 - Alvin W. Vogtle Nuclear Units Number One and Two Operating Agreement dated as of August 27, 1976, among Georgia Power, OPC, MEAG and Dalton. (Designated in Form U-1, File No. 70-5792, as Exhibit B-2.)

(a) 18 - Alvin W. Vogtle Nuclear Units Number One and Two Purchase, Amendment, Assignment and Assumption Agreement dated as of November 16, 1983, between Georgia Power and MEAG. (Designated in Georgia Power's Form 10-K for the year ended December 31, 1983, File No. 1-6468, as Exhibit 10(k)(4).)

(a) 19 - Plant Hal Wansley Purchase and Ownership Participation Agreement dated as of August 27, 1976, between Georgia Power and MEAG. (Designated in Form 8-K dated as of July 5, 1977, File No. 1-6468, as Exhibit (b)(2).)

(a) 20 - Plant Hal Wansley Operating Agreement dated as of August 27, 1976, between Georgia Power and MEAG. (Designated in Form 8-K dated as of July 5, 1977, File No. 1-6468, as Exhibit (b)(4).)

(a) 21 - Nuclear Operating Agreement between Southern Nuclear and Georgia Power dated as of July 1, 1993. (Designated in Southern Company's Form 10-K for the year ended December 31, 1997, File No. 1-3526, as Exhibit 10(a)21.)

(a) 22 - Pseudo Scheduling and Services Agreement between Georgia Power and MEAG dated as of April 8, 1997. (Designated in Southern Company's Form 10-K for the year ended December 31, 1997, File No. 1-3526, as Exhibit 10(a)22.)

(a) 23 - Plant Hal Wansley Purchase and Ownership Participation Agreement dated as of April 19, 1977, between Georgia Power and Dalton. (Designated in Form 8-K dated as of June 13, 1977, File No. 1-6468, as Exhibit (b)(3).)

(a) 24 - Plant Hal Wansley Operating Agreement dated as of April 19, 1977, between Georgia Power and Dalton. (Designated in Form 8-K dated as of June 13, 1977, File No. 1-6468, as Exhibit (b)(7).)

(a) 25 - Plant Robert W. Scherer Units Number One and Two Purchase and Ownership Participation Agreement dated as of May 15, 1980, Amendment No. 1 dated as of December 30, 1985, Amendment No. 2 dated as of July 1, 1986, Amendment No. 3 dated as of August 1, 1988 and Amendment No. 4 dated as of December 31, 1990, among Georgia Power, OPC, MEAG and Dalton. (Designated in Form U-1, File No. 70-6481, as Exhibit B-3, in Southern Company's Form 10-K for the year ended December 31, 1987, File No. 1-3526, as Exhibit 10(o)(2), in Southern Company's Form 10-K for the year ended December 31, 1989, File No. 1-3526, as Exhibit 10(n)(2) and in Southern Company's Form 10-K for the year ended December 31, 1993, File No. 1-3526, as Exhibit 10(a)54.)

(a) 26 - Plant Robert W. Scherer Units Number One and Two Operating Agreement dated as of May 15, 1980, Amendment No. 1 dated as of December 3, 1985 and Amendment No. 2 dated as of December 31, 1990, among Georgia Power, OPC, MEAG and Dalton. (Designated in Form U-1, File No. 70-6481, as Exhibit B-4, in Southern Company's Form 10-K for the year ended December 31, 1987, File No. 1-3526, as Exhibit 10(o)(4) and in Southern Company's Form 10-K for the year ended December 31, 1993, File No. 1-3526, as Exhibit 10(a)55.)

(a) 27 - Plant Robert W. Scherer Purchase, Sale and Option Agreement dated as of May 15, 1980, between Georgia Power and MEAG. (Designated in Form U-1, File No. 70-6481, as Exhibit B-1.)

(a) 28 - Plant Robert W. Scherer Purchase and Sale Agreement dated as of May 16, 1980, between Georgia Power and Dalton. (Designated in Form U-1, File No. 70-6481, as Exhibit B-2.)

(a) 29 - Plant Robert W. Scherer Unit Number Three Purchase and Ownership Participation Agreement dated as of March 1, 1984, Amendment No. 1 dated as of July 1, 1986 and Amendment No. 2 dated as of August 1, 1988, between Georgia Power and Gulf Power. (Designated in Form U-1, File No. 70-6573, as Exhibit B-4, in Southern Company's Form 10-K for the year ended December 31, 1987, as Exhibit 10(o)(2) and in Southern Company's Form 10-K for the year ended December 31, 1989, as Exhibit 10(n)(2).)

(a) 30 - Plant Robert W. Scherer Unit Number Three Operating Agreement dated as of March 1, 1984, between Georgia Power and Gulf Power. (Designated in Form U-1, File No. 70-6573, as Exhibit B-5.)

(a) 31 - Plant Robert W. Scherer Unit No. Four Amended and Restated Purchase and Ownership Participation Agreement by and among Georgia Power, FP&L and JEA, dated as of December 31, 1990 and Amendment No. 1 dated as of June 15, 1994. (Designated in Form U-1, File No. 70-7843, as Exhibit B-1 and in Southern Company's Form 10-K for the year ended December 31, 1994, File No. 1-3526, as Exhibit 10(a)60.)

(a) 32 - Plant Robert W. Scherer Unit No. Four Operating Agreement by and among Georgia Power, FP&L and JEA, dated as of December 31, 1990 and Amendment No. 1 dated as of June 15, 1994. (Designated in Form U-1, File No. 70-7843, as Exhibit B-2 and in Southern Company's Form 10-K for the year ended December 31, 1994, File No. 1-3526, as Exhibit 10(a)61.)

(a) 33 - Unit Power Sales Agreement dated July 19, 1988, between FPC and Alabama Power, Georgia Power, Gulf Power, Mississippi Power, Savannah Electric and SCS. (Designated in Savannah Electric's Form 10-K for the year ended December 31, 1988, File No. 1-5072, as Exhibit 10(d).)

(a) 34 - Amended Unit Power Sales Agreement dated July 20, 1988, between FP&L and Alabama Power, Georgia Power, Gulf Power, Mississippi Power, Savannah Electric and SCS. (Designated in Savannah Electric's Form 10-K for the year ended December 31, 1988, File No. 1-5072, as Exhibit 10(e).)

(a) 35 - Amended Unit Power Sales Agreement dated August 17, 1988, between JEA and Alabama Power, Georgia Power, Gulf Power, Mississippi Power, Savannah Electric and SCS. (Designated in Savannah Electric's Form 10-K for the year ended December 31, 1988, File No. 1-5072, as Exhibit 10(f).)

(a) 36 - Rocky Mountain Pumped Storage Hydroelectric Project Ownership Participation Agreement dated November 18, 1988, between OPC and Georgia Power. (Designated in Georgia Power's Form 10-K for the year ended December 31, 1988, File No. 1-6468, as Exhibit 10(x).)

(a) 37 - Rocky Mountain Pumped Storage Hydroelectric Project Operating Agreement dated November 18, 1988, between OPC and Georgia Power. (Designated in Georgia Power's Form 10-K for the year ended December 31, 1988, File No. 1-6468, as Exhibit 10(y).)

(a) 38 - Purchase and Ownership Agreement for Joint Ownership Interest in the James H. Miller, Jr. Steam Electric Generating Plant Units One and Two dated November 18, 1988, between Alabama Power and AEC. (Designated in Form U-1, File No. 70-7609, as Exhibit B-1.)

(a) 39 - Operating Agreement for Joint Ownership Interest in the James H. Miller, Jr. Steam Electric Generating Plant Units One and Two dated November 18, 1988, between Alabama Power and AEC. (Designated in Form U-1, File No. 70-7609, as Exhibit B-2.)

(a) 40 - Transmission Facilities Agreement dated February 25, 1982, Amendment No. 1 dated May 12, 1982 and Amendment No. 2 dated December 6, 1983, between Entergy Corporation (formerly Gulf States) and Mississippi Power. (Designated in Mississippi Power's Form 10-K for the year ended December 31, 1981, File No. 0-6849, as Exhibit 10(f), in Mississippi Power's Form 10-K for the year ended December 31, 1982, File No. 0-6849, as Exhibit 10(f)(2) and in Mississippi Power's Form 10-K for the year ended December 31, 1983, File No. 0-6849, as Exhibit 10(f)(3).)

(a) 41 - Long Term Transaction Service Agreement between Georgia Power and OPC dated as of February 26, 1999. (Designated in Southern Company's Form 10-K for the year ended December 31, 1999, File No. 1-3526, as Exhibit 10(a)46.)

(a) 42 - Revised and Restated Coordination Services Agreement between and among Georgia Power, OPC and Georgia Systems Operations Corporation dated as of September 10, 1997. (Designated in Southern Company's Form 10-K for the year ended December 31, 1997, File No. 1-3526, as Exhibit 10(a)48.)

(a) 43 - Amended and Restated Nuclear Managing Board Agreement for Plant Hatch and Plant Vogtle among Georgia Power, OPC, MEAG and Dalton dated as of July 1, 1993. (Designated in Southern Company's Form 10-K for the year ended December 31, 1993, File No. 1-3526, as Exhibit 10(a)49.)

(a) 44 - Integrated Transmission System Agreement, Power Sale and Coordination Umbrella Agreement between Georgia Power and OPC dated as of November 12, 1990. (Designated in Georgia Power's Form 10-K for the year ended December 31, 1990, File No. 1-6468, as Exhibit 10(ff).)

(a) 45 - Revised and Restated Integrated Transmission System Agreement between Georgia Power and Dalton dated as of December 7, 1990. (Designated in Georgia Power's Form 10-K for the year ended December 31, 1990, File No. 1-6468, as Exhibit 10(gg).)

(a) 46 - Revised and Restated Integrated Transmission System Agreement between Georgia Power and MEAG dated as of December 7, 1990. (Designated in Georgia Power's Form 10-K for the year ended December 31, 1990, File No. 1-6468, as Exhibit 10(hh).)

(a) 47 - Long Term Transmission Service Agreement between Entergy Power, Inc. and Alabama Power, Mississippi Power and SCS. (Designated in Southern Company's Form 10-K for the year ended December 31, 1992, File No. 1-3526, as Exhibit 10(a)53.)

(a) 48 - Plant Scherer Managing Board Agreement dated as of December 31, 1990 among Georgia Power, OPC, MEAG, Dalton, Gulf Power, FP&L and JEA. (Designated in Southern Company's Form 10-K for the year ended December 31, 1993, File No. 1-3526, as Exhibit 10(a)56.)

(a) 49 - Plant McIntosh Combustion Turbine Purchase and Ownership Participation Agreement between Georgia Power and Savannah Electric dated as of December 15, 1992. (Designated in Southern Company's Form 10-K for the year ended December 31, 1993, File No. 1-3526, as Exhibit 10(a)57.)

(a) 50 - Plant McIntosh Combustion Turbine Operating Agreement between Georgia Power and Savannah Electric dated as of December 15, 1992. (Designated in Southern Company's Form 10-K for the year ended December 31, 1993, File No. 1-3526, as Exhibit 10(a)58.)

(a) 51 - Operating Agreement for the Joseph M. Farley Nuclear Plant between Alabama Power and Southern Nuclear dated as of December 23, 1991. (Designated in Form U-1, File No. 70-7530, as Exhibit B-7.)

(a) 52 - Amended and Restated Credit Agreement among Southern Power, Citibank N.A., as the administrative agent, and the lenders listed therein dated as of April 17, 2003. (Designated in Southern Company's Form 10-Q for the quarter ended March 31, 2003, File No. 1-3526, as Exhibit 10(a)1.)

(a) 53 - Completion Guarantee among Southern Company, Southern Power and Citibank, N.A., in its capacity as agent for the Lenders under the Credit Facility dated as of November 15, 2001. (Designated in Registration No. 333-98553 as Exhibit 10.2(a).)

(a) 54 - Completion Guarantee Supplement by Southern Company and Southern Power dated as of April 22, 2002. (Designated in Registration No. 333-98553 as Exhibit 10.2(b).)

(a) 55 - Letter Amendment No. 1 to Completion Guarantee among Southern Company, Southern Power and Citibank, N.A. in its capacity as agent for the Lenders under the Credit Facility dated as of April 17, 2003. (Designated in Southern Company's Form 10-Q for the quarter ended March 31, 2003, File No. 1-3526, as Exhibit 10(a)2.)

(a) 56 - Equity Contribution Agreement among Southern Company and Citibank, N.A. in its capacity as agent for the Lenders under the Credit Facility dated as of November 15, 2001. (Designated in Registration No. 333-98553 as Exhibit 10.3(a).)

(a) 57 - Letter Amendment No. 1 to Equity Contribution Agreement among Southern Company, Southern Power and Citibank, N.A. in its capacity as agent for the Lenders under the Credit Facility dated as of April 17, 2003. (Designated in Southern Company's Form 10-Q for the quarter ended March 31, 2003, File No. 1-3526, as Exhibit 10(a)3.)

(a) 58 - Equity Contribution Agreement Supplement by Southern Company and Southern Power dated as of April 22, 2002. (Designated in Registration No. 333-98553 as Exhibit 10.3(b).)

* (a) 59 - Amended and Restated Operating Agreement between Southern Power and Alabama Power effective December 1, 2002.

* (a) 60 - Amended and Restated Operating Agreement between Southern Power and Georgia Power effective December 1, 2002.

* (a) 61 - Operating Agreement between Southern Power and Savannah Electric effective January 1, 2003.

(a) 62 - Interconnection Agreement by and between Southern Power and Georgia Power for Plant Dahlberg dated as of July 31, 2001. (Designated in Registration No. 333-98553 as Exhibit 10.8.)

(a) 63 - Interconnection Agreement by and between Southern Power and Georgia Power for Wansley CC Units 6 and 7 dated as of May 10, 2001. (Designated in Registration No. 333-98553 as Exhibit 10.9.)

(a) 64 - Interconnection Agreement by and between Southern Power and Georgia Power for Goat Rock CC Unit 1 dated as of May 10, 2001. (Designated in Registration No. 333-98553 as Exhibit 10.10.)

(a) 65 - Revised and Restated Interconnection Agreement by and between Southern Power and Georgia Power for Goat Rock CC Unit 2 dated as of October 18, 2001. (Designated in Registration No. 333-98553 as Exhibit 10.11.)

(a) 66 - Interconnection Agreement by and between Southern Power and Alabama Power for Autaugaville Combined Cycle Unit 1 dated as of June 25, 2001. (Designated in Registration No. 333-98553 as Exhibit 10.12.)

(a) 67 - Interconnection Agreement by and between Southern Power and Alabama Power for Autaugaville Combined Cycle Unit 2 dated as of June 25, 2001. (Designated in Registration No. 333-98553 as Exhibit 10.13.)

(a) 68 - Purchased Power Agreement between Georgia Power and LG&E Energy Marketing Inc. dated as of November 24, 1998. (Designated in Registration No. 333-98553 as Exhibit 10.15.)

(a) 69 - Purchased Power Agreement between Georgia Power and LG&E Energy Marketing Inc. dated as of October 6, 1999. (Designated in Registration No. 333-98553 as Exhibit 10.16.)

(a) 70 - Assignment and Assumption Agreement by and between Georgia Power and Southern Power dated as of July 31, 2001. (Designated in Registration No. 333-98553 as Exhibit 10.17.)

(a) 71 - Power Purchase Agreement between Southern Power and Alabama Power dated as of June 1, 2001. (Designated in Registration No. 333-98553 as Exhibit 10.18.)

(a) 72 - Amended and Restated Power Purchase Agreement between Southern Power and Georgia Power at Plant Autaugaville dated as of August 6, 2001. (Designated in Registration No. 333-98553 as Exhibit 10.19.)

(a) 73 - Contract for the Purchase of Firm Capacity and Energy between Southern Power and Savannah Electric dated as of July 26, 2001. (Designated in Registration No. 333-98553 as Exhibit 10.20.)

(a) 74 - Contract for the Purchase of Firm Capacity and Energy between Southern Power and Georgia Power dated as of July 26, 2001. (Designated in Registration No. 333-98553 as Exhibit 10.21.)

(a) 75 - Power Purchase Agreement between Southern Power and Georgia Power at Plant Goat Rock dated as of March 30, 2001. (Designated in Registration No. 333-98553 as Exhibit 10.22.)

(a) 76 - Power Purchase Agreement between Southern Company - Florida LLC and Kissimmee Utility Authority dated as of March 19, 2001. (Designated in Registration No. 333-98553 as Exhibit 10.23.)

(a) 77 - Power Purchase Agreement between Southern Company – Florida LLC and Florida Municipal Power Agency dated as of March 19, 2001. (Designated in Registration No. 333-98553 as Exhibit 10.24.)

(a) 78 - Power Purchase Agreement between Southern Company - Florida LLC and Orlando Utilities Commission dated as of March 19, 2001. (Designated in Registration No. 333-98553 as Exhibit 10.25.)

(a) 79 - The Southern Company Employee Savings Plan, Amended and Restated effective January 1, 2002 and Amendments one through five thereto. (Designated in Southern Company's Form 10-K for the year ended December 31, 2001, File No. 1-3526, as Exhibit 10(a)52, in Registration No. 333-96883, as Exhibit 10.29 and in Southern Company's Form 10-Q for the quarter ended September 30, 2003, File No.1-3526, as Exhibit 10(a)1.)

(a) 80 - The Southern Company Employee Stock Ownership Plan, Amended and Restated effective January 1, 2002 and Amendments one through five thereto. (Designated in Southern Company's Form 10-K for the year ended December 31, 2001, File No. 1-3526, as Exhibit 10(a)53, in Southern Company's Form 10-K for the year ended December 31, 2002, File No. 1-3526, as Exhibit 10(a)81 and in Southern Company's Form 10-Q for the quarter ended September 30, 2003, File No. 1-3526, as Exhibit 10(a)2.)

# (a) 81 - Southern Company Omnibus Incentive Compensation Plan, Amended and Restated effective May 23, 2001. (Designated in Form S-8, File No. 333-73462, as Exhibit 4(c).)

# (a) 82 - The Deferred Compensation Plan for the Directors of The Southern Company, Amended and Restated effective February 19, 2001. (Designated in Southern Company's Form 10-K for the year ended December 31, 2000, File No. 1-3526, as Exhibit 10(a)59.)

# (a) 83 - The Southern Company Outside Directors Pension Plan. (Designated in Southern Company's Form 10-K for the year ended December 31, 1994, File No. 1-3526, as Exhibit 10(a)77.)

# (a) 84 - The Southern Company Deferred Compensation Plan, Amended and Restated effective February 23, 2001 and First Amendment thereto. (Designated in Southern Company's Form 10-K for the year ended December 31, 2000, File No. 1-3526, as Exhibit 10(a)61 and in Southern Company's Form 10-Q for the quarter ended September 30, 2003, File No. 1-3526, as Exhibit 10(a)4.)

# (a) 85 - The Southern Company Outside Directors Stock Plan and First Amendment thereto. (Designated in Registration No. 33-54415 as Exhibit 4(c) and in Southern Company's Form 10-K for the year ended December 31, 1995, File No. 1-3526, as Exhibit 10(a)79.)

# (a) 86 - Outside Directors Stock Plan for Subsidiaries of The Southern Company, Amended and Restated effective January 1, 2000. (Designated in Southern Company's Form 10-K for the year ended December 31, 2000, File No. 1-3526, as Exhibit 10(a)63.)

(a) 87 - The Southern Company Pension Plan, Amended and Restated effective January 1, 2002 and First Amendment thereto. (Designated in Southern Company's Form 10-K for the year ended December 31, 2002, File No. 1-3526, as Exhibit 10(a)88 and in Southern Company's Form 10-Q for the quarter ended June 30, 2003, File No. 1-3526, as Exhibit 10(a)4.)

# (a) 88 - The Southern Company Supplemental Executive Retirement Plan, Amended and Restated effective May 1, 2000. (Designated in Southern Company's Form 10-K for the year ended December 31, 2001, File No. 1-3526, as Exhibit 10(a)62.)

# (a) 89 - The Southern Company Supplemental Benefit Plan, Amended and Restated effective May 1, 2000 and First Amendment thereto. (Designated in Southern Company's Form 10-K for the year ended December 31, 2000, File No. 1-3526, as Exhibit 10(a)64 and in Southern Company's Form 10-Q for the quarter ended September 30, 2003, File No. 1-3526, as Exhibit 10(a)3.)

(a) 90 - Southern Company Change in Control Severance Plan, Amended and Restated effective May 1, 2003. (Designated in Southern Company's Form 10-Q for the quarter ended June 30, 2003, File No. 1-3526, as Exhibit 10(a)1.)

# (a) 91 - Southern Company Executive Change in Control Severance Plan, Amended and Restated effective May 1, 2003. (Designated in Southern Company's Form 10-Q for the quarter ended June 30, 2003, File No. 1-3526, as Exhibit 10(a)2.)

# (a) 92 - Deferred Compensation Agreement between Southern Company, Southern Nuclear and William G. Hairston III. (Designated in Southern Company's Form 10-K for the year ended December 31, 1998, File No. 1-3526 as Exhibit 10(a)81.)

# (a) 93 - Amended and Restated Change in Control Agreement between Southern Company, Mississippi Power and Dwight H. Evans. (Designated in Southern Company's Form 10-K for the year ended December 31, 2000, File No. 1-3526, as Exhibit 10(a)81.)

# (a) 94 - Amended and Restated Change in Control Agreement between Southern Company, SCS and Henry Allen Franklin. (Designated in Southern Company's Form 10-K for the year ended December 31, 2000, File No. 1-3526, as Exhibit 10(a)83.)

# (a) 95 - Amended and Restated Change in Control Agreement between Southern Company, Southern Nuclear and William G. Hairston, III. (Designated in Southern Company's Form 10-K for the year ended December 31, 2000, File No. 1-3526, as Exhibit 10(a)84.)

# (a) 96 - Amended and Restated Change in Control Agreement between Southern Company, Savannah Electric and G. Edison Holland, Jr. (Designated in Southern Company's Form 10-K for the year ended December 31, 2000, File No. 1-3526, as Exhibit 10(a)86.)

# (a) 97 - Amended and Restated Change in Control Agreement between Southern Company, SCS and C. Alan Martin. (Designated in Southern Company's Form 10-K for the year ended December 31, 2000, File No. 1-3526, as Exhibit 10(a)87.)

# (a) 98 - Amended and Restated Change in Control Agreement between Southern Company, SCS and Charles Douglas McCrary. (Designated in Southern Company's Form 10-K for the year ended December 31, 2000, File No. 1-3526, as Exhibit 10(a)88.)

# (a) 99 - Amended and Restated Change in Control Agreement between Southern Company, Georgia Power and David M. Ratcliffe. (Designated in Southern Company's Form 10-K for the year ended December 31, 2000, File No. 1-3526, as Exhibit 10(a)89.)

# (a) 100- Amended and Restated Change in Control Agreement between Southern Company, SCS and Stephen A. Wakefield. (Designated in Southern Company's Form 10-K for the year ended December 31, 2000, File No. 1-3526, as Exhibit 10(a)90.)

# (a) 101- Southern Company Amended and Restated Change in Control Benefit Plan Determination Policy, effective May 9, 2002. (Designated in Southern Company's Form 10-K for the year ended December 31, 2002, File No. 1-3526, as Exhibit 10(a)105.)

# (a) 102- Master Separation and Distribution Agreement dated as of September 1, 2000 between Southern Company and Mirant. (Designated in Southern Company's Form 10-K for the year ended December 31, 2000, File No. 1-3526, as Exhibit 10(a)100.)

# (a) 103- Indemnification and Insurance Matters Agreement dated as of September 1, 2000 between Southern Company and Mirant. (Designated in Southern Company's Form 10-K for the year ended December 31, 2000, File No. 1-3526, as Exhibit 10(a)101.)

# (a) 104- Tax Indemnification Agreement dated as of September 1, 2000 among Southern Company and its affiliated companies and Mirant and its affiliated companies. (Designated in Southern Company's Form 10-K for the year ended December 31, 2000, File No. 1-3526, as Exhibit 10(a)102.)

# (a) 105- Southern Company Deferred Compensation Trust Agreement as amended and restated effective January 1, 2001 between Wachovia Bank, N.A., Southern Company, SCS, Alabama Power, Georgia Power, Gulf Power, Mississippi Power, Savannah Electric, Southern Communications, Energy Solutions and Southern Nuclear. (Designated in Southern Company's Form 10-K for the year ended December 31, 2000, File No. 1-3526, as Exhibit 10(a)103.)

# (a) 106- Deferred Stock Trust Agreement for Directors of Southern Company and its subsidiaries, dated as of January 1, 2000, between Reliance Trust Company, Southern Company, Alabama Power, Georgia Power, Gulf Power, Mississippi Power and Savannah Electric. (Designated in Southern Company's Form 10-K for the year ended December 31, 2000, File No. 1-3526, as Exhibit 10(a)104.)

# (a) 107- Amended and Restated Deferred Cash Compensation Trust Agreement for Directors of Southern Company and its subsidiaries, effective September 1, 2001, between Wachovia Bank, N.A., Southern Company, Alabama Power, Georgia Power, Gulf Power, Mississippi Power and Savannah Electric. (Designated in Southern Company's Form 10-K for the year ended December 31, 2001, File No. 1-3526, as Exhibit 10(a)92.)

# (a) 108- Change in Control Agreement between Southern Company, Mississippi Power and Michael D. Garrett. (Designated in Southern Company's Form 10-K for the year ended December 31, 2002, File No. 1-3526, as Exhibit 10(a)112.)

# (a) 109- Change in Control Agreement between Southern Company, Savannah Electric and Anthony R. James. (Designated in Southern Company's Form 10-K for the year ended December 31, 2002, File No. 1-3526, as Exhibit 10(a)113.)

# (a) 110- Change in Control Agreement between Southern Company, SCS and W. Paul Bowers. (Designated in Southern Company's Form 10-K for the year ended December 31, 2002, File No. 1-3526, as Exhibit 10(a)114.)

# (a) 111- Change in Control Agreement between Southern Company, Gulf Power and Thomas A. Fanning. (Designated in Southern Company's Form 10-K for the year ended December 31, 2002, File No. 1-3526, as Exhibit 10(a)115.)

# (a) 112- Deferred Compensation Agreement between Southern Company, SCS and Christopher C. Womack dated May 31, 2002. (Designated in Southern Company's Form 10-K for the year ended December 31, 2002, File No. 1-3526, as Exhibit 10(a)118.)

# (a) 113- Supplemental Pension Agreement between Savannah Electric, Gulf Power, SCS and G. Edison Holland, Jr. effective February 22, 2002. (Designated in Southern Company's Form 10-K for the year ended December 31, 2002, File No. 1-3526, as Exhibit 10(a)119.)

# (a) 114- Amended and Restated Supplemental Pension Agreement between Georgia Power, Southern Company, SCS and C. B. Harreld dated September 17, 2003. (Designated in Southern Company's Form 10-Q for the quarter ended September 30, 2003, File No. 1-3526, as Exhibit 10(a)5.)

# (a) 115- Southern Company Senior Executive Change in Control Severance Plan effective May 1, 2003. (Designated in Southern Company's Form 10-Q for the quarter ended June 30, 2003, File No. 1-3526, as Exhibit 10(a)3.)

**Alabama Power**

(b) 1 - Service contracts dated as of January 1, 1984, between SCS and Alabama Power, Georgia Power, Gulf Power, Mississippi Power, SEGCO and Southern Company and Amendment No. 1 dated as of September 6, 1985 between SCS and Southern Company. See Exhibit 10(a)1 herein.

(b) 2 - Interchange contract dated February 17, 2000, between Alabama Power, Georgia Power, Gulf Power, Mississippi Power, Savannah Electric, Southern Power and SCS. See Exhibit 10(a)6 herein.

(b) 3 - Agreement dated as of January 27, 1959, Amendment No. 1 dated as of October 27, 1982 and Amendment No. 2 dated November 4, 1993 and effective June 1, 1994, among SEGCO, Alabama Power and Georgia Power. See Exhibit 10(a)7 herein.

(b) 4 - Unit Power Sales Agreement dated July 19, 1988, between FPC and Alabama Power, Georgia Power, Gulf Power, Mississippi Power, Savannah Electric and SCS. See Exhibit 10(a)33 herein.

(b) 5 - Amended Unit Power Sales Agreement dated July 20, 1988, between FP&L and Alabama Power, Georgia Power, Gulf Power, Mississippi Power, Savannah Electric and SCS. See Exhibit 10(a)34 herein.

(b) 6 - Amended Unit Power Sales Agreement dated August 17, 1988, between JEA and Alabama Power, Georgia Power, Gulf Power, Mississippi Power, Savannah Electric and SCS. See Exhibit 10(a)35 herein.

(b) 7 - 1991 Firm Power Purchase Contract between Alabama Power and AMEA. (Designated in Form U-1, File No. 70-7873, as Exhibit B-1.)

(b) 8 - Purchase and Ownership Agreement for Joint Ownership Interest in the James H. Miller, Jr. Steam Electric Generating Plant Units One and Two dated November 18, 1988, between Alabama Power and AEC. See Exhibit 10(a)38 herein.

(b) 9 - Operating Agreement for Joint Ownership Interest in the James H. Miller, Jr. Steam Electric Generating Plant Units One and Two dated November 18, 1988, between Alabama Power and AEC. See Exhibit 10(a)39 herein.

(b) 10 - Long Term Transmission Service Agreement between Entergy Power, Inc. and Alabama Power, Mississippi Power and SCS. See Exhibit 10(a)47 herein.

(b) 11 - Operating Agreement for the Joseph M. Farley Nuclear Plant between Alabama Power and Southern Nuclear dated as of December 23, 1991. See Exhibit 10(a)51 herein.

* (b) 12 - Amended and Restated Operating Agreement between Southern Power and Alabama Power effective December 1, 2002. See Exhibit 10(a)59 herein.

(b) 13 - Interconnection Agreement by and between Southern Power and Alabama Power for Autaugaville Combined Cycle Unit 1 dated as of June 25, 2001. See Exhibit 10(a)66 herein.

(b) 14 - Interconnection Agreement by and between Southern Power and Alabama Power for Autaugaville Combined Cycle Unit 2 dated as of June 25, 2001. See Exhibit 10(a)67 herein.

(b) 15 - Power Purchase Agreement between Southern Power and Alabama Power dated as of June 1, 2001. See Exhibit 10(a)71 herein.

(b) 16 - The Southern Company Employee Savings Plan, Amended and Restated effective January 1, 2002 and Amendments one through five thereto. See Exhibit 10(a)79 herein.

(b) 17 - The Southern Company Employee Stock Ownership Plan, Amended and Restated effective January 1, 2002 and Amendments one through five thereto. See Exhibit 10(a)80 herein.

# (b) 18 - Southern Company Omnibus Incentive Compensation Plan, Amended and Restated effective May 23, 2001. See Exhibit 10(a)81 herein.

# (b) 19 - The Southern Company Deferred Compensation Plan, Amended and Restated effective February 23, 2001 and First Amendment thereto. See Exhibit 10(a)84 herein.

# (b) 20 - The Southern Company Outside Directors Pension Plan. See Exhibit 10(a)83 herein.

# (b) 21 - Outside Directors Stock Plan for Subsidiaries of The Southern Company, Amended and Restated effective January 1, 2000. See Exhibit 10(a)86 herein.

(b) 22 - The Southern Company Pension Plan, Amended and Restated effective January 1, 2002 and First Amendment thereto. See Exhibit 10(a)87 herein.

# (b) 23 - The Southern Company Supplemental Executive Retirement Plan, Amended and Restated effective May 1, 2000. See Exhibit 10(a)88 herein.

# (b) 24 - The Southern Company Supplemental Benefit Plan, Amended and Restated effective May 1, 2000 and First Amendment thereto. See Exhibit 10(a)89 herein.

(b) 25 - Southern Company Change in Control Severance Plan, Amended and Restated effective May 1, 2003. See Exhibit 10(a)90 herein.

# (b) 26 - Southern Company Executive Change in Control Severance Plan, Amended and Restated effective May 1, 2003. See Exhibit 10(a)91 herein.

# (b) 27 - Deferred Compensation Plan for Directors of Alabama Power Company, Amended and Restated effective January 1, 2001. (Designated in Alabama Power's Form 10-K for the year ended December 31, 2001, File No. 1-3164, as Exhibit 10(b)28.)

# (b) 28 - Southern Company Amended and Restated Change in Control Benefit Plan Determination Policy, effective May 9, 2002. See Exhibit 10(a)101 herein.

# (b) 29 - Southern Company Deferred Compensation Trust Agreement as amended and restated effective January 1, 2001 between Wachovia Bank, N.A., Southern Company, SCS, Alabama Power, Georgia Power, Gulf Power, Mississippi Power, Savannah Electric, Southern Communications, Energy Solutions and Southern Nuclear. See Exhibit 10(a)105 herein.

# (b) 30 - Deferred Stock Trust Agreement for Directors of Southern Company and its subsidiaries, dated as of January 1, 2000, between Reliance Trust Company, Southern Company, Alabama Power, Georgia Power, Gulf Power, Mississippi Power and Savannah Electric. See Exhibit 10(a)106 herein.

# (b) 31 - Amended and Restated Deferred Cash Compensation Trust Agreement for Directors of Southern Company and its subsidiaries, effective September 1, 2001, between Wachovia Bank, N.A., Southern Company, Alabama Power, Georgia Power, Gulf Power, Mississippi Power and Savannah Electric. See Exhibit 10(a)107 herein.

# (b) 32 - Deferred Compensation Agreement between Alabama Power and William B. Hutchins, III dated April 11, 2003. (Designated in Alabama Power's Form 10-Q for the quarter ended March 31, 2003, File No. 1-3164, as Exhibit 10(b)1.)

# (b) 33 - Amended and Restated Supplemental Pension Agreement among SCS, Southern Nuclear, Alabama Power and James H. Miller, III. (Designated in Alabama Power's Form 10-Q for the quarter ended June 30, 2003, File No. 1-3164, as Exhibit 10(b)1.)

# (b) 34 - Southern Company Senior Executive Change in Control Severance Plan effective May 1, 2003. See Exhibit 10(a)115 herein.

**Georgia Power**

(c) 1 - Service contracts dated as of January 1, 1984, between SCS and Alabama Power, Georgia Power, Gulf Power, Mississippi Power, SEGCO and Southern Company and Amendment No. 1 dated as of September 6, 1985, between SCS and Southern Company. See Exhibit 10(a)1 herein.

(c) 2 - Interchange contract dated February 17, 2000, between Alabama Power, Georgia Power, Gulf Power, Mississippi Power, Savannah Electric, Southern Power and SCS. See Exhibit 10(a)6 herein.

(c) 3 - Agreement dated as of January 27, 1959, Amendment No. 1 dated as of October 27, 1982 and Amendment No. 2 dated November 4, 1993 and effective June 1, 1994, among SEGCO, Alabama Power and Georgia Power. See Exhibit 10(a)7 herein.

(c) 4 - Joint Committee Agreement dated as of August 27, 1976, among Georgia Power, OPC, MEAG and Dalton. See Exhibit 10(a)8 herein.

(c) 5 - Edwin I. Hatch Nuclear Plant Purchase and Ownership Participation Agreement dated as of January 6, 1975, between Georgia Power and OPC. See Exhibit 10(a)9 herein.

(c) 6 - Edwin I. Hatch Nuclear Plant Operating Agreement dated as of January 6, 1975, between Georgia Power and OPC. See Exhibit 10(a)10 herein.

(c) 7 - Revised and Restated Integrated Transmission System Agreement dated as of November 12, 1990, between Georgia Power and OPC. See Exhibit 10(a)11 herein.

(c) 8 - Plant Hal Wansley Purchase and Ownership Participation Agreement dated as of March 26, 1976, between Georgia Power and OPC. See Exhibit 10(a)12 herein.

(c) 9 - Plant Hal Wansley Operating Agreement dated as of March 26, 1976, between Georgia Power and OPC. See Exhibit 10(a)13 herein.

(c) 10 - Edwin I. Hatch Nuclear Plant Purchase and Ownership Participation Agreement dated as of August 27, 1976, between Georgia Power, MEAG and Dalton. See Exhibit 10(a)14 herein.

(c) 11 - Edwin I. Hatch Nuclear Plant Operating Agreement dated as of August 27, 1976, between Georgia Power, MEAG and Dalton. See Exhibit 10(a)15 herein.

(c) 12 - Alvin W. Vogtle Nuclear Units Number One and Two Purchase and Ownership Participation Agreement dated as of August 27, 1976 and Amendment No. 1 dated as of January 18, 1977, among Georgia Power, OPC, MEAG and Dalton. See Exhibit 10(a)16 herein.

(c) 13 - Alvin W. Vogtle Nuclear Units Number One and Two Operating Agreement dated as of August 27, 1976, among Georgia Power, OPC, MEAG and Dalton. See Exhibit 10(a)17 herein.

(c) 14 - Alvin W. Vogtle Nuclear Units Number One and Two Purchase, Amendment, Assignment and Assumption Agreement dated as of November 16, 1983, between Georgia Power and MEAG. See Exhibit 10(a)18 herein.

(c) 15 - Plant Hal Wansley Purchase and Ownership Participation Agreement dated as of August 27, 1976, between Georgia Power and MEAG. See Exhibit 10(a)19 herein.

(c) 16 - Plant Hal Wansley Operating Agreement dated as of August 27, 1976, between Georgia Power and MEAG. See Exhibit 10(a)20 herein.

(c) 17 - Nuclear Operating Agreement between Southern Nuclear and Georgia Power dated as of July 1, 1993. See Exhibit 10(a)21 herein.

(c) 18 - Pseudo Scheduling and Services Agreement between Georgia Power and MEAG dated as of April 8, 1997. See Exhibit 10(a)22 herein.

(c) 19 - Plant Hal Wansley Purchase and Ownership Participation Agreement dated as of April 19, 1977, between Georgia Power and Dalton. See Exhibit 10(a)23 herein.

(c) 20 - Plant Hal Wansley Operating Agreement dated as of April 19, 1977, between Georgia Power and Dalton. See Exhibit 10(a)24 herein.

(c) 21 - Plant Robert W. Scherer Units Number One and Two Purchase and Ownership Participation Agreement dated as of May 15, 1980, Amendment No. 1 dated as of December 30, 1985, Amendment No. 2 dated as of July 1, 1986, Amendment No. 3 dated as of August 1, 1988 and Amendment No. 4 dated as of December 31, 1990, among Georgia Power, OPC, MEAG and Dalton. See Exhibit 10(a)25 herein.

(c) 22 - Plant Robert W. Scherer Units Number One and Two Operating Agreement dated as of May 15, 1980, Amendment No. 1 dated as of December 3, 1985 and Amendment No. 2 dated as of December 31, 1990, among Georgia Power, OPC, MEAG and Dalton. See Exhibit 10(a)26 herein.

(c) 23 - Plant Robert W. Scherer Purchase, Sale and Option Agreement dated as of May 15, 1980, between Georgia Power and MEAG. See Exhibit 10(a)27 herein.

(c) 24 - Plant Robert W. Scherer Purchase and Sale Agreement dated as of May 16, 1980, between Georgia Power and Dalton. See Exhibit 10(a)28 herein.

(c) 25 - Plant Robert W. Scherer Unit Number Three Purchase and Ownership Participation Agreement dated as of March 1, 1984, Amendment No. 1 dated as of July 1, 1986 and Amendment No. 2 dated as of August 1, 1988, between Georgia Power and Gulf Power. See Exhibit 10(a)29 herein.

(c) 26 - Plant Robert W. Scherer Unit Number Three Operating Agreement dated as of March 1, 1984, between Georgia Power and Gulf Power. See Exhibit 10(a)30 herein.

(c) 27 - Plant Robert W. Scherer Unit No. Four Amended and Restated Purchase and Ownership Participation Agreement by and among Georgia Power, FP&L and JEA dated as of December 31, 1990 and Amendment No. 1 dated as of June 15, 1994. See Exhibit 10(a)31 herein.

(c) 28 - Plant Robert W. Scherer Unit No. Four Operating Agreement by and among Georgia Power, FP&L and JEA dated as of December 31, 1990 and Amendment No. 1 dated as of June 15, 1994. See Exhibit 10(a)32 herein.

(c) 29 - Unit Power Sales Agreement dated July 19, 1988, between FPC and Alabama Power, Georgia Power, Gulf Power, Mississippi Power, Savannah Electric and SCS. See Exhibit 10(a)33 herein.

(c) 30 - Amended Unit Power Sales Agreement dated July 20, 1988, between FP&L and Alabama Power, Georgia Power, Gulf Power, Mississippi Power, Savannah Electric and SCS. See Exhibit 10(a)34 herein.

(c) 31 - Amended Unit Power Sales Agreement dated August 17, 1988, between JEA and Alabama Power, Georgia Power, Gulf Power, Mississippi Power, Savannah Electric and SCS. See Exhibit 10(a)35 herein.

(c) 32 - Rocky Mountain Pumped Storage Hydroelectric Project Ownership Participation Agreement dated November 18, 1988, between OPC and Georgia Power. See Exhibit 10(a)36 herein.

(c) 33 - Rocky Mountain Pumped Storage Hydroelectric Project Operating Agreement dated November 18, 1988, between OPC and Georgia Power. See Exhibit 10(a)37 herein.

(c) 34 - Long Term Transaction Service Agreement between Georgia Power and OPC dated as of February 26, 1999. See Exhibit 10(a)41 herein.

(c) 35 - Revised and Restated Coordination Services Agreement between and among Georgia Power, OPC and Georgia Systems Operations Corporation dated as of September 10, 1997. See Exhibit 10(a)42 herein.

(c) 36 - Amended and Restated Nuclear Managing Board Agreement for Plant Hatch and Plant Vogtle among Georgia Power, OPC, MEAG and Dalton dated as of July 1, 1993. See Exhibit 10(a)43 herein.

(c) 37 - Integrated Transmission System Agreement, Power Sale and Coordination Umbrella Agreement between Georgia Power and OPC dated as of November 12, 1990. See Exhibit 10(a)44 herein.

(c) 38 - Revised and Restated Integrated Transmission System Agreement between Georgia Power and Dalton dated as of December 7, 1990. See Exhibit 10(a)45 herein.

(c) 39 - Revised and Restated Integrated Transmission System Agreement between Georgia Power and MEAG dated as of December 7, 1990. See Exhibit 10(a)46 herein.

(c) 40 - Plant Scherer Managing Board Agreement dated as of December 31, 1990 among Georgia Power, OPC, MEAG, Dalton, Gulf Power, FP&L and JEA. See Exhibit 10(a)48 herein.

(c) 41 - Plant McIntosh Combustion Turbine Purchase and Ownership Participation Agreement between Georgia Power and Savannah Electric dated as of December 15, 1992. See Exhibit 10(a)49 herein.

(c) 42 - Plant McIntosh Combustion Turbine Operating Agreement between Georgia Power and Savannah Electric dated as of December 15, 1992. See Exhibit 10(a)50 herein.

* (c) 43 - Amended and Restated Operating Agreement between Southern Power and Georgia Power dated effective December 1, 2002. See Exhibit 10(a)60 herein.

(c) 44 - Interconnection Agreement by and between Southern Power and Georgia Power for Plant Dahlberg dated as of July 31, 2001. See Exhibit 10(a)62 herein.

(c) 45 - Interconnection Agreement by and between Southern Power and Georgia Power for Wansley CC Units 6 and 7 dated as of May 10, 2001. See Exhibit 10(a)63 herein.

(c) 46 - Interconnection Agreement by and between Southern Power and Georgia Power for Goat Rock CC Unit 1 dated as of May 10, 2001. See Exhibit 10(a)64 herein.

(c) 47 - Revised and Restated Interconnection Agreement by and between Southern Power and Georgia Power for Goat Rock CC Unit 2 dated as of October 18, 2001. See Exhibit 10(a)65 herein.

(c) 48 - Purchased Power Agreement between Georgia Power and LG&E Energy Marketing Inc. dated as of November 24, 1998. See Exhibit 10(a)68 herein.

(c) 49 - Purchased Power Agreement between Georgia Power and LG&E Energy Marketing Inc. dated as of October 6, 1999. See Exhibit 10(a)69 herein.

(c) 50 - Assignment and Assumption Agreement by and between Georgia Power and Southern Power dated as of July 31, 2001. See Exhibit 10(a)70 herein.

(c) 51 - Amended and Restated Power Purchase Agreement between Southern Power and Georgia Power at Plant Autaugaville dated as of August 6, 2001. See Exhibit 10(a)72 herein.

(c) 52 - Contract for the Purchase of Firm Capacity and Energy between Southern Power and Georgia Power dated as of July 26, 2001. See Exhibit 10(a)74 herein.

(c) 53 - Power Purchase Agreement between Southern Power and Georgia Power at Plant Goat Rock dated as of March 30, 2001. See Exhibit 10(a)75 herein.

(c) 54 - The Southern Company Employee Savings Plan, Amended and Restated effective January 1, 2002 and Amendments one through five thereto. See Exhibit 10(a)79 herein.

(c) 55 - The Southern Company Employee Stock Ownership Plan, Amended and Restated effective January 1, 2002 and Amendments one through five thereto. See Exhibit 10(a)80 herein.

# (c) 56 - Southern Company Omnibus Incentive Compensation Plan, Amended and Restated effective May 23, 2001. See Exhibit 10(a)81 herein.

# (c) 57 - The Southern Company Deferred Compensation Plan, Amended and Restated effective February 23, 2001 and First Amendment thereto. See Exhibit 10(a)84 herein.

# (c) 58 - The Southern Company Outside Directors Pension Plan. See Exhibit 10(a)83 herein.

# (c) 59 - Outside Directors Stock Plan for Subsidiaries of The Southern Company, Amended and Restated effective January 1, 2000. See Exhibit 10(a)86 herein.

(c) 60 - The Southern Company Pension Plan, Amended and Restated effective January 1, 2002 and First Amendment thereto. See Exhibit 10(a)87 herein.

# (c) 61 - The Southern Company Supplemental Executive Retirement Plan, Amended and Restated effective May 1, 2000. See Exhibit 10(a)88 herein.

# (c) 62 - The Southern Company Supplemental Benefit Plan, Amended and Restated effective May 1, 2000 and First Amendment thereto. See Exhibit 10(a)89 herein.

(c) 63 - Southern Company Change in Control Severance Plan, Amended and Restated effective May 1, 2003. See Exhibit 10(a)90 herein.

# (c) 64 - Southern Company Executive Change in Control Severance Plan, Amended and Restated effective May 1, 2003. See Exhibit 10(a)91 herein.

# (c) 65 - Amended and Restated Change in Control Agreement between Southern Company, Georgia Power and David M. Ratcliffe. See Exhibit 10(a)99 herein.

# (c) 66 - Deferred Compensation Plan For Directors of Georgia Power Company, Amended and Restated Effective January 13, 2003. (Designated in Georgia Power's Form 10-K for the year ended December 31, 2002, File No. 1.6468, as Exhibit 10(c)68.)

# (c) 67 - Southern Company Amended and Restated Change in Control Benefit Plan Determination Policy, effective May 9, 2002. See Exhibit 10(a)101 herein.

# (c) 68 - Southern Company Deferred Compensation Trust Agreement as amended and restated effective January 1, 2001 between Wachovia Bank, N.A., Southern Company, SCS, Alabama Power, Georgia Power, Gulf Power, Mississippi Power, Savannah Electric, Southern Communications, Energy Solutions and Southern Nuclear. See Exhibit 10(a)105 herein.

# (c) 69 - Deferred Stock Trust Agreement for Directors of Southern Company and its subsidiaries, dated as of January 1, 2000, between Reliance Trust Company, Southern Company, Alabama Power, Georgia Power, Gulf Power, Mississippi Power and Savannah Electric. See Exhibit 10(a)106 herein.

# (c) 70 - Amended and Restated Deferred Cash Compensation Trust Agreement for Directors of Southern Company and its subsidiaries, effective September 1, 2001, between Wachovia Bank, N.A., Southern Company, Alabama Power, Georgia Power, Gulf Power, Mississippi Power and Savannah Electric. See Exhibit 10(a)107 herein.

# (c) 71 - Southern Company Senior Executive Change in Control Severance Plan effective May 1, 2003. See Exhibit 10(a)115 herein.

**Gulf Power**

(d) 1 - Service contracts dated as of January 1, 1984, between SCS and Alabama Power, Georgia Power, Gulf Power, Mississippi Power, SEGCO and Southern Company and Amendment No. 1 dated as of September 6, 1985, between SCS and Southern Company. See Exhibit 10(a)1 herein.

(d) 2 - Interchange contract dated February 17, 2000, between Alabama Power, Georgia Power, Gulf Power, Mississippi Power, Savannah Electric, Southern Power and SCS. See Exhibit 10(a)6 herein.

(d) 3 - Plant Robert W. Scherer Unit Number Three Purchase and Ownership Participation Agreement dated as of March 1, 1984, Amendment No. 1 dated as of July 1, 1986 and Amendment No. 2 dated as of August 1, 1988, between Georgia Power and Gulf Power. See Exhibit 10(a)29 herein.

(d) 4 - Plant Robert W. Scherer Unit Number Three Operating Agreement dated as of March 1, 1984, between Georgia Power and Gulf Power. See Exhibit 10(a)30 herein.

(d) 5 - Plant Scherer Managing Board Agreement dated as of December 31, 1990 among Georgia Power, OPC, MEAG, Dalton, Gulf Power, FP&L and JEA. See Exhibit 10(a)48 herein.

(d) 6 - Unit Power Sales Agreement dated July 19, 1988, between FPC and Alabama Power, Georgia Power, Gulf Power, Mississippi Power, Savannah Electric and SCS. See Exhibit 10(a)33 herein.

(d) 7 - Amended Unit Power Sales Agreement dated July 20, 1988, between FP&L and Alabama Power, Georgia Power, Gulf Power, Mississippi Power, Savannah Electric and SCS. See Exhibit 10(a)34 herein.

(d) 8 - Amended Unit Power Sales Agreement dated August 17, 1988, between JEA and Alabama Power, Georgia Power, Gulf Power, Mississippi Power, Savannah Electric and SCS. See Exhibit 10(a)35 herein.

(d) 9 - Agreement between Gulf Power and AEC, effective August 1, 1985. (Designated in Gulf Power's Form 10-K for the year ended December 31, 1985, File No. 0-2429, as Exhibit 10(g).)

(d) 10 - The Southern Company Employee Savings Plan, Amended and Restated effective January 1, 2002 and Amendments one through five thereto. See Exhibit 10(a)79 herein.

(d) 11 - The Southern Company Employee Stock Ownership Plan, Amended and Restated effective January 1, 2002 and Amendments one through five thereto. See Exhibit 10(a)80 herein.

# (d) 12 - Southern Company Omnibus Incentive Compensation Plan, Amended and Restated effective May 23, 2001. See Exhibit 10(a)81 herein.

# (d) 13 - The Southern Company Deferred Compensation Plan, Amended and Restated effective February 23, 2001 and First Amendment thereto. See Exhibit 10(a)84 herein.

# (d) 14 - The Southern Company Outside Directors Pension Plan. See Exhibit 10(a)83 herein.

# (d) 15 - Outside Directors Stock Plan for Subsidiaries of The Southern Company, Amended and Restated effective January 1, 2000. See Exhibit 10(a)86 herein.

(d) 16 - The Southern Company Pension Plan, Amended and Restated effective January 1, 2002 and First Amendment thereto. See Exhibit 10(a)87 herein.

# (d) 17 - The Southern Company Supplemental Benefit Plan, Amended and Restated effective May 1, 2000 and First Amendment thereto. See Exhibit 10(a)89 herein.

(d) 18 - Southern Company Change in Control Severance Plan, Amended and Restated effective May 1, 2003. See Exhibit 10(a)90 herein.

# (d) 19 - Southern Company Executive Change in Control Severance Plan, Amended and Restated effective May 1, 2003. See Exhibit 10(a)91 herein.

# (d) 20 - The Southern Company Supplemental Executive Retirement Plan, Amended and Restated effective May 1, 2000. See Exhibit 10(a)88 herein.

# (d) 21 - Supplemental Pension Agreement between Savannah Electric, Gulf Power, SCS and G. Edison Holland, Jr. effective February 22, 2002. See Exhibit 10(a)113 herein.

# (d) 22 - Deferred Compensation Plan For Directors of Gulf Power Company, Amended and Restated Effective January 1, 2000 and First Amendment thereto. (Designated in Gulf Power's Form 10-K for the year ended December 31, 2000, File No. 0-2429 as Exhibit 10(d)33.)

# (d) 23 - Southern Company Amended and Restated Change in Control Benefit Plan Determination Policy, effective May 9, 2002. See Exhibit 10(a)101 herein.

# (d) 24 - Southern Company Deferred Compensation Trust Agreement as amended and restated effective January 1, 2001 between Wachovia Bank, N.A., Southern Company, SCS, Alabama Power, Georgia Power, Gulf Power, Mississippi Power, Savannah Electric, Southern Communications, Energy Solutions and Southern Nuclear. See Exhibit 10(a)105 herein.

# (d) 25 - Deferred Stock Trust Agreement for Directors of Southern Company and its subsidiaries, dated as of January 1, 2000, between Reliance Trust Company, Southern Company, Alabama Power, Georgia Power, Gulf Power, Mississippi Power and Savannah Electric. See Exhibit 10(a)106 herein.

# (d) 26 - Amended and Restated Deferred Cash Compensation Trust Agreement for Directors of Southern Company and its subsidiaries, effective September 1, 2001, between Wachovia Bank, N.A., Southern Company, Alabama Power, Georgia Power, Gulf Power, Mississippi Power and Savannah Electric. See Exhibit 10(a)107 herein.

# (d) 27 - Change in Control Agreement between Southern Company, Gulf Power and Thomas A. Fanning. See Exhibit 10(a)111 herein.

# (d) 28 - Southern Company Senior Executive Change in Control Severance Plan effective May 1, 2003. See Exhibit 10(a)115 herein.

**Mississippi Power**

(e) 1 - Service contracts dated as of January 1, 1984, between SCS and Alabama Power, Georgia Power, Gulf Power, Mississippi Power, SEGCO and Southern Company and Amendment No. 1 dated as of September 6, 1985, between SCS and Southern Company. See Exhibit 10(a)1 herein.

(e) 2 - Interchange contract dated February 17, 2000, between Alabama Power, Georgia Power, Gulf Power, Mississippi Power, Savannah Electric, Southern Power and SCS. See Exhibit 10(a)6 herein.

(e) 3 - Unit Power Sales Agreement dated July 19, 1988, between FPC and Alabama Power, Georgia Power, Gulf Power, Mississippi Power, Savannah Electric and SCS. See Exhibit 10(a)33 herein.

(e) 4 - Amended Unit Power Sales Agreement dated July 20, 1988, between FP&L and Alabama Power, Georgia Power, Gulf Power, Mississippi Power, Savannah Electric and SCS. See Exhibit 10(a)34 herein.

(e) 5 - Amended Unit Power Sales Agreement dated August 17, 1988, between JEA and Alabama Power, Georgia Power, Gulf Power, Mississippi Power, Savannah Electric and SCS. See Exhibit 10(a)35 herein.

(e) 6 - Transmission Facilities Agreement dated February 25, 1982, Amendment No. 1 dated May 12, 1982 and Amendment No. 2 dated December 6, 1983, between Entergy Corporation (formerly Gulf States) and Mississippi Power. See Exhibit 10(a)40 herein.

(e) 7 - Long Term Transmission Service Agreement between Entergy Power, Inc. and Alabama Power, Mississippi Power and SCS. See Exhibit 10(a)47 herein.

(e) 8 - The Southern Company Employee Savings Plan, Amended and Restated effective January 1, 2002 and Amendments one through five thereto. See Exhibit 10(a)79 herein.

(e) 9 - The Southern Company Employee Stock Ownership Plan, Amended and Restated effective January 1, 2002 and Amendments one through five thereto. See Exhibit 10(a)80 herein.
