PROCEEDINGS:	HEARING
BEFORE:	CHAIRMAN MATTHEW M. CARTER, II COMMISSIONER LISA POLAK EDGAR COMMISSIONER KATRINA J. McMURRIAN COMMISSIONER NANCY ARGENZIANO COMMISSIONER NATHAN A. SKOP
DATE:	Tuesday, November 4, 2008
TIME:	Commenced at 9:30 a.m.
PLACE:	Betty Easley Conference Center Room 148 4075 Esplanade Way Tallahassee, Florida
REPORTED BY:	JANE FAUROT, RPR Official FPSC Reporter (850) 413-6732

DOCUMENT NUMBER-DATE
10625 NOV 14 08
FPSC-COMMISSION CLERK

APPEARANCES:

LEE L. WILLIS, ESQUIRE and JAMES D. BEASLEY, ESQUIRE, Ausley Law Firm, Post Office Box 391, Tallahassee, 32302, appearing on behalf of Tampa Electric Company.

JEFFREY STONE, ESQUIRE, RUSSELL BADDERS, ESQUIRE, and STEVEN GRIFFIN, ESQUIRE, Beggs & Lane Law Firm, Post Office Box 12950, Pensacola, Florida 32591-2950, appearing on behalf of Gulf Power Company.

JOHN W. MCWHIRTER, JR., ESQUIRE, c/o McWhirter Law Firm, Post Office Box 3350, Tampa, Florida 33601-3350, appearing on behalf of Florida Industrial Power Users Group.

JOHN T. BUTLER, ESQUIRE, and WADE LITCHFIELD, ESQUIRE, Florida Power & Light Company, 700 Universe Boulevard, Juno Beach, Florida 33408-0420, appearing on behalf of Florida Power & Light Company.

GARY V. PERKO, ESQUIRE, Hopping Law Firm, Post Office Box 6526, Tallahassee, Florida 32314, appearing on behalf of Progress Energy Florida, Inc.

PATRICIA CHRISTENSEN, ESQUIRE, and STEPHEN BURGESS, ESQUIRE, and JOE MCGLOTHLIN, ESQUIRE, Office of Public Counsel, c/o The Florida Legislature, 111 W. Madison St., #812, Tallahassee, Florida 32399-1400, appearing on behalf of the Citizens of Florida.

APPEARANCES (continued):

JOHN T. BURNETT, Progress Energy Service Co., LLC, Post Office Box 14042, St. Petersburg, Florida 33733-4042, appearing on behalf of Progress Energy Florida, Inc.

KAREN S. WHITE, ESQUIRE, and CAPTAIN SHAYLA L. McNEILL, ESQUIRE, AFCESA/ULT, 139 Barnes Drive, Suite 1, Tyndall Air Force Base, Florida 32403, appearing on behalf of the Federal Executive Agencies.

MARTHA BROWN, ESQUIRE, and ERIK L. SAYLER, ESQUIRE, FPSC General Counsel's Office, 2540 Shumard Oak Boulevard, Tallahassee, Florida 32399-0850, appearing on behalf of the Commission Staff.

P R O C E E D I N G S

CHAIRMAN CARTER: I will give one second now for staff to make a little adjustment here.

Next, Commissioners, we will be on Docket Number 080007-EI. Docket Number 080007-EI.

Staff, you're recognized.

MS. BROWN: Mr. Chairman, there are proposed stipulations on all issues in this docket and all witnesses have been excused. Parties do not intend to make any opening statements. We ask that the prefiled testimony of all witnesses identified in Section VI of the prehearing order be inserted into the record as though read. Cross examination has been waived.

CHAIRMAN CARTER: The prefiled testimony of the witnesses will be entered into the record as though read.

MS. BROWN: Staff has prepared a Comprehensive Exhibit List, and we ask that you mark and move the stipulated exhibit list into the record as numbered 1 through 27 on the list.

CHAIRMAN CARTER: Any objections? Without objection, show it done.

(Exhibit Numbers 1 through 27 marked for identification and admitted into the record.)

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

FLORIDA POWER & LIGHT COMPANY

TESTIMONY OF KOREL M. DUBIN

DOCKET NO. 080007-EI

APRIL 2, 2008

Q. Please state your name and address.

A. My name is Korel M. Dubin and my business address is 9250 West Flagler Street, Miami, Florida, 33174.

Q. By whom are you employed and in what capacity?

A. I am employed by Florida Power & Light Company (FPL) as the Senior Manager of Cost Recovery Clauses in the Regulatory Affairs Department.

Q. Have you previously testified in the predecessors to this docket?

A. Yes, I have.

Q. What is the purpose of your testimony?

A. The purpose of my testimony is to present for Commission review and approval the Environmental Cost Recovery (ECR) Clause true-up costs associated with FPL Environmental Compliance activities for the period January through December 2007.

Q. Have you prepared or caused to be prepared under your direction, supervision or control an exhibit in this proceeding?

A. Yes, I have. My Exhibit KMD-1 consists of eight forms.

- Form 42-1A reflects the final true-up for the period January through December 2007.
- Form 42-2A consists of the final true-up calculation for the period.
- Form 42-3A consists of the calculation of the interest provision for the period.
- Form 42-4A reflects the calculation of variances between actual and estimated/actual costs for O&M Activities.
- Form 42-5A presents a summary of actual monthly costs for the period for O&M Activities.
- Form 42-6A reflects the calculation of variances between actual and estimated/actual costs for Capital Investment Projects.
- Form 42-7A presents a summary of actual monthly costs for the period for Capital Investment Projects.
- Form 42-8A consists of the calculation of depreciation expense and return on capital investment. Form 42-8A, Pages 41 through 43 provide the beginning of period and end of period depreciable base by production plant name, unit or plant account and applicable depreciation rate or amortization period for each Capital Investment Project.

Q. What is the source of the actuals data which you will present by way of testimony or exhibits in this proceeding?

A. Unless otherwise indicated, the actuals data are taken from the books and records of FPL. The books and records are kept in the regular course of our business in accordance with generally accepted accounting principles and practices, and with the provisions of the Uniform System of Accounts as prescribed by this Commission.

Q. Please explain the calculation of the Net True-up Amount.

A. Form 42-1A, entitled "Calculation of the Final True-up" shows the calculation of the Net True-Up for the period January 2007 through December 2007, an over-recovery of $3,174,379, which I am requesting to be included in the calculation of the ECR factors for the January through December 2009 period.

The actual End-of-Period over-recovery for the period January through December 2007 of $2,588,553 (shown on Form 42-1A, line 3) adjusted for the estimated/actual End-of-Period under-recovery for the same period of $585,826 (shown on Form 42-1A, line 6) results in the Net True-Up over-recovery for the period January through December 2007 (shown on Form 42-1A, line 7) of $3,174,379.

Q. Have you provided a schedule showing the calculation of the End-of-Period true-up?

A. Yes. Form 42-2A, entitled "Calculation of Final True-up Amount", shows the calculation of the Environmental End of Period true-up for the period January through December 2007. The End of Period true-up shown on page 2 of 2, Lines 5 plus 6 is an over-recovery of $2,588,553. Additionally, Form 42-3A shows the calculation of the Interest Provision of $638,465 which is applicable to end of period true-up over-recovery of $2,588,553.

Q. Is the true-up calculation consistent with the true-up methodology used for the other cost recovery clauses?

A. Yes, it is. The calculation of the true-up amount follows the procedures established by the Commission as set forth on Commission Schedule A-2 "Calculation of the True-Up and Interest Provisions" for the Fuel Cost Recovery Clause.

Q. Are all costs listed in Forms 42-4A through 42-8A attributable to Environmental Compliance Projects approved by the Commission?

A. Yes, they are.

Q. How did actual expenditures for January through December 2007 compare with FPL's estimated/actual projections as presented in previous testimony and exhibits?

A. Form 42-4A shows that total O&M project costs were $2,899,662, or 16.0% lower than projected and Form 42-6A shows that total capital investment project costs were $410,405 or 1.7% lower than projected. Following are explanations for those O&M Projects and Capital Investment Projects with significant variances. Individual project variances are provided on Forms 42-4A and 42-6A. Return on Capital Investment, Depreciation and Taxes for each project for the actual period January through December 2007 are provided on Form 42-8A.

Q. Please explain the reasons for these variances.

A. The variances in FPL's 2007 O&M expenses and capital expenditures for primarily relate to the following projects:

1. Maintenance of Stationary Above Ground Fuel Storage Tanks - O & M (Project 5a)

Project expenditures were $336,834, or 15.0% higher than anticipated. The variance is primarily due to work on the Turkey Point Unit 2 metering tank. During the disposal of water in the tank, mercury was discovered and required offsite disposal. Additionally, bids received for the painting work on the Martin tank were higher than the original estimates.

2. Disposal of Non-containerized Liquid Waste – O & M (Project 17a)

Project expenditures were $33,813, or 11.6% lower than anticipated. Use of the ash press at Turkey Point that was scheduled for late 2007 was pushed back to the first quarter 2008 due a Resource Conservation and Recovery Act (RCRA) Facility Evaluation that occurred in November 2007. Additionally, Manatee and Martin plant ash basins had decreased levels of ash due to the lower burn of fuel oil, and therefore the basins did not require ash pressing.

3. Substation Pollutant Discharge Prevention & Removal – Distribution - O&M (Project 19a)

Project expenditures were $177,313, or 15.4% lower than anticipated. Planned project encapsulation related work activities were reduced due to equipment replacement and/or removal. In addition, a portion of the distribution encapsulation work activity was deferred to 2008 due to difficulties in acquiring clearances. Finally, a portion of planned soil and groundwater remediation work activities were deferred to 2008 pending agency approval.

4. Substation Pollutant Discharge Prevention & Removal - Transmission - O&M (Project 19b)

Project expenditures were $71,337, or 38.3% lower than anticipated. Planned work was postponed due to an internal review of transformer

isolation and testing procedures.

5. Pipeline Integrity Management (PIM) – O&M (Project 22)

Project expenditures were $284,981, or 65.0% higher than anticipated. The variance is primarily due to an increase in the quality of materials specified for the Manatee Terminal pipe coating job. This higher specification will extend the life of the paint used to coat the pipe, resulting in less maintenance and repair cost.

6. Spill Prevention, Control & Countermeasures - SPCC – O&M (Project 23)

Project expenditures were $79,171, or 25.2% lower than anticipated. On May 10, 2007 the United States Environmental Protection Agency (EPA) extended the compliance date for amending SPCC plans and implementing modifications to July 1, 2009. Planned physical modifications were put on hold due to management review of regulatory requirements in relation to current situations with facilities in the field.

7. Manatee Reburn – O&M (Project 24)

Project expenditures were $64,319, or 14.0% lower than anticipated. Reburn burner maintenance inspections at the Manatee plant revealed less damage than anticipated. Reburn equipment is relatively new, and failure rates remain lower than expected.

8. Port Everglades Electrostatic Precipitator (ESP) – O & M (Project 25)

Project expenditures were $169,615, or 13.8% lower than anticipated. Due to the relative cost to FPL of oil and gas, less oil and more gas was burned than originally expected at the plant and, as a result, less O&M activities were needed for the ESPs. This decreased usage of oil also contributed to less ash being produced. Finally, the failure rates of ESP equipment have proven to be lower than originally expected (more reliable), thus requiring less maintenance.

9. Lowest Quality Water Source (LQWS) – O&M (Project 27)

Project expenditures were $114,980, or 31.2% lower than anticipated. Based upon the results of an internal feasibility study and pilot project to assess the feasibility of using reclaimed water at the Cape Canaveral plant, and due to several issues including reclaimed water quality, water treatment system costs and current operations conditions, a determination was made that the use of reclaimed water at the this facility was not economically, environmentally or technologically feasible. Additionally, the Pre-Treatment System at the Sanford plant was not utilized due to maintenance issues. During this time, 100% ground water was used, which requires no treatment.

10. Clean Air Interstate Rule (CAIR) Compliance – O & M (Project 31)

Project expenditures were $351,334, or 93.4% higher than expected. The variance is primarily due to the accelerated completion of test ports and probe supports for the CAIR Continuous Emissions Monitoring Systems (CEMS) project at Lauderdale and Ft Myers plants, which included fabrication and installation. Due to the requirement that 12 months of CEMS data be available by January 2009, the installation of equipment was necessary before 2008.

11. Best Available Retrofit Technology (BART) – O & M (Project 32)

Project expenditures were $13,440, or 395.6% higher than expected. The original estimate did not include $13,440 for contractor hours supporting the development of inputs and methodology for the BART evaluation, which was required as a result of a request from the Department of Environmental Protection (DEP) for modeling at the Turkey Point plant that was received after FPL filed its projections.

12. St. Lucie Cooling Water System Inspection & Maintenance – O&M (Project 34)

Project expenditures were $3,152,666, or 39.0% lower than expected primarily due to extensive weather condition delays. The project is scheduled to continue in 2008.

13. Clean Air Interstate Rule (CAIR) Compliance – Capital (Project 31)

Project depreciation and return on investment were $143,538, or 9.3% lower than anticipated. This under-run is associated with the re-forecasting of engineering activities associated with the installation of Selective Catalytic Reduction Systems (SCRs) and Flue Gas Desulfurization Scrubbers (FGDs) at Plant Scherer Unit 4 with scheduled in service dates of 2012.

14. Clean Air Mercury Rule (CAMR) Compliance – Capital (Project 33)

Project depreciation and return on investment were $128,903, or 37.9% lower than anticipated. This under-run is associated with the re-forecasting of engineering and procurement activities associated with the installation of the baghouse on Scherer 4 scheduled for completion in 2010.

Q. Does this conclude your testimony?

A. Yes, it does.

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

FLORIDA POWER & LIGHT COMPANY

TESTIMONY OF KOREL M. DUBIN

DOCKET NO. 080007-EI

August 4, 2008

Q. Please state your name and address.

A. My name is Korel M. Dubin and my business address is 9250 West Flagler Street, Miami, Florida, 33174.

Q. By whom are you employed and in what capacity?

A. I am employed by Florida Power & Light Company (FPL) as Senior Manager of Purchased Power in the Resource Assessment and Planning Department.

Q. Have you previously testified in this docket?

A. Yes, I have.

Q. What is the purpose of your testimony in this proceeding?

A. The purpose of my testimony is to present for Commission review and approval the Estimated/Actual True-up associated with FPL Environmental Compliance activities for the period January 2008 through December 2008.

Q. Have you prepared or caused to be prepared under your direction, supervision or control an exhibit in this proceeding?

A. Yes, I have. My exhibit KMD-2 consists of eight forms, PSC Forms 42-1E through 42-8E, included in Appendix I. Form 42-1E provides a summary of the Estimated/Actual True-up amount for the period January 2008 through December 2008. Forms 42-2E and 42-3E reflect the calculation of the Estimated/Actual True-up amount for the period. Forms 42-4E and 42-6E reflect the Estimated/Actual O&M and Capital cost variances as compared to original projections for the period. Forms 42-5E and 42-7E reflect jurisdictional recoverable O&M and Capital project costs for the period. Form 42-8E (pages 1 through 53) reflects return on capital investments, depreciation, and taxes by project.

Q. Please explain the calculation of the ECRC Estimated/Actual True-up amount you are requesting this Commission to approve.

A. Forms 42-2E and 42-3E show the calculation of the ECRC Estimated/Actual True-up amount. The calculation for the Estimated/Actual True-up amount for the period January 2008 through December 2008 is an under-recovery, including interest, of $5,728,576 (Appendix I, Page 4, line 5 plus line 6). This Estimated/Actual True-up under-recovery of $5,728,576 consists of January through June 2008 actuals and revised estimates for July through December 2008, compared to original projections for the same period.

Q. Are all costs listed in Forms 42-1E through 42-8E attributable to Environmental Compliance projects previously approved by the Commission?

A. Yes, with the exception of FPL's three Next Generation Solar Energy Projects, which are discussed and supported in the testimony of Eric Silagy.

Q. Have you included the 2008 costs associated with FPL's Next Generation Solar Energy Projects in the calculation of FPL's 2008 Estimated/Actual True-Up amount?

A. Yes. As described in the testimony of Eric Silagy, we have included the costs associated with FPL's three Solar Projects in the calculation of the 2008 Estimated/Actual True-Up amount. Specifically, these costs are included in KMD-2 and detailed on the following capital schedules:

- Solar – DeSoto (Project No. 37), Form 42-8E, pages 43-44 of 53.
- Solar – Space Coast (Project No. 38), Form 42-8E, pages 45-46 of 53.
- Solar – Martin (Project No. 39), Form 42-8E, pages 47-48 of 53.

FPL has included the 2008 return on construction work in progress related to these projects in the calculation of the 2008 Estimated/Actual True-Up amount.

Q. How do the Estimated/Actual project expenditures for January 2008 through December 2008 period compare with original projections?

A. Form 42-4E (Appendix I, Page 7) shows that total O&M project costs were $4,049,318 (32.8%) higher than projected and Form 42-6E (Appendix I, Page 10) shows that total capital investment project costs were $801,650 (2.4%) lower than projected. Below are variance explanations for those O&M Projects and Capital Investment Projects with significant variances. Individual project variances are provided on Forms 42-4E and 42-6E. Return on Capital Investment, Depreciation and Taxes for each project for the Estimated/Actual period are provided as Form 42-8E (Appendix I, Pages 13 through 65).

O&M Project Variances

1. Air Operating Permit Fees (Project No. 1) - O&M

Project expenditures are estimated to be $324,282 (16.5%) lower than originally projected. This variance is primarily due to higher usage of natural gas as a fuel across the FPL fleet due to the higher costs of residual oil. Permit fees are based on emissions, which are proportionate to the type of fuel used at each Florida facility. Utilizing natural gas in lieu of residual oil significantly reduces SO2, Particulate Matter (PM) and NOx emissions.

2. Continuous Emissions Monitoring Systems (Project No. 3a) - O&M

Project expenditures are estimated to be $205,903 (27.4%) higher than originally projected. The increased estimate was due largely to the additional cost of the CEMS software upgrade. This upgrade was needed to meet the EPA's mandate of reporting in XML format starting 1/1/2009. Additionally the higher cost of replacement parts for the new model analyzers installed at the end of 2007 and in the first half of 2008 is reflected.

3. Maintenance of Stationary Above Ground Fuel Storage Tanks (Project No. 5a) - O&M

Project expenditures are estimated to be $836,100 (123.5%) higher than originally projected. The following project activities were identified after the filing of the original estimates for 2008:

1) Turkey Point Unit 1 Metering Tank Roof Replacement and Bottom Plate Projection Repairs project. The cross-tie valve between the two units' metering tanks was not functional and replacement and repairs took longer than expected to complete.

2) External coating of Port Everglades Terminal above grade piping. The scope of this activity was increased due to additional piping and the move from epoxy coating to silicon coating which has a longer life.

3) Performing API 570 inspections on bulk light oil piping at Ft. Lauderdale and Port Everglades power plants.

4) Martin Plant Units 1 &2 Metering Tanks painting.

5) Port Everglades Terminal Tank 805 API out-of- service inspection.

6) Painting of Fort Myers Plant Units 1&2 Tanks. The initial plan was to paint entire roof of tank No.1 and touchup the roof of Tank No. 2. The entire roofs of both tanks were painted.

7) Fort Myers Plant Tank No. 2 visual and settlement survey. Due to a leak discovered on one of the leak detection ports, a visual and settlement survey was implemented on the tank.

4. RCRA Corrective Action (Project No. 13) - O&M

Project expenditures are estimated to be $57,022 (46.7%) lower than originally projected. Estimates were included in 2008 for further action that might be required by FDEP at Turkey Point or Manatee Plant after 2007. However, FPL completed all work associated with RCRA at the Manatee and Turkey Point Fossil sites in 2007. The FDEP has granted final "No Further Action" for the Manatee Plant. The FDEP is finalizing the draft report approved by FPL for the Turkey Point Plant. This draft report recommended No Further Action for the site.

5. NPDES Permit Fees (Project No. 14) - O&M

Project expenditures are estimated to be $30,505 (19.7%) lower than originally projected. This reflects inadvertently budgeting the permit renewal application fees as ECRC expenditures. Permit renewal application fees are not classified as ECRC recoverable and thus have been removed from the ECRC true-up calculation.

6. Disposal of Noncontainerized Liquid Waste (Project No. 17a) - O&M

Project expenditures are estimated to be $32,803 (11.0%) higher than originally projected. The variance is primarily due to greater than anticipated ash accumulation in the storage basins at the Turkey Point site. As a result of the increase in ash material to be handled for removal, the site incurred extra expenses due to the use of additional moving equipment to support the job. Also, the time associated with the contractor completing the job contributed to the increases in manpower hours.

7. Substation Pollutant Discharge Prevention & Removal – Distribution (Project No. 19a) - O&M

Project expenditures are estimated to be $665,806 (68.8%) higher than originally projected. Three vendors are being used to conduct equipment leak repairs, as opposed to the previous use of only one vendor; therefore, significantly more repairs are expected to be completed this year.

8. St. Lucie Turtle Net (Project No. 21) – O&M

Project expenditures are estimated to be $0, compared to a projection of $10,000. The original estimate was related to the cost to re-coat the net once removed. When the net was being removed, a significant amount of sea grass was found to be tangled in the net which needed to be removed and required the net to be cut. The cost to repair the net as well as re-

coat it is greater than the cost to purchase a new net; therefore a new net will be purchased. The cost of the new net is considered a capital expenditure, whereas the re-coating would have been an O&M expense.

9. Pipeline Integrity Management – Distribution (Project No. 22) - O&M

Project expenditures are estimated to be $154,465 (59.4%) higher than originally projected. The following additional project activities were identified after the original 2008 projections were filed:

1) An area with insufficient cover was identified along the Martin Terminal 30" pipeline with the length of 270 feet, which needs to be addressed to stay in compliance with DOT regulations.

2) One dig was performed on January 31, 2008 on the Martin Terminal 30" pipeline and another dig is scheduled for later this year after the peak season.

3) Corroded pipe-shoes on the Martin Terminal 30" above grade DOT piping were replaced. Thirty pipe-shoes were ordered to install, saddle and replace bad pipe-shoes.

4) The 2" supply and return lines to the Martin Terminal boilers were corroded badly and multiple holes were identified. Since the boilers are running with mineral oil and not with bunker C, a decision was made to remove the lines instead of replacing / repairing them.

10. Spill Prevention, Control, and Countermeasures - SPCC

(Project No. 23) - O&M

Project expenditures are estimated to be $367,325 (94.9%) higher than originally projected, primarily due to expenditures for additional required facility upgrades that were identified during development of the SPCC plans. The additional upgrades include nitrogen blanketing systems for corrosion protection of double wall piping at Cape Canaveral, Putnam and Lauderdale Plants. These upgrades were not anticipated at the time FPL filed its original projections for 2008. In addition, work for new secondary containment for a transformer at Port Everglades was switched from Capital to O&M.

11. Port Everglades Electrostatic Precipitator – ESP (Project No. 25) - O&M

Project expenditures are estimated to be $360,685 (15.3%) lower than originally projected. Fuel economics to date have dictated that the units at the Port Everglades Plant be run on gas due to fuel oil's rising costs. Consequently, fuel oil chemical additives usage has decreased and the ESPs have not had to be operated as much as was originally projected for 2008, which reduced the equipment deterioration and generated significantly less ash for disposal.

12. Lowest Quality Water Source - LQWS (Project No. 27) – O&M

Project expenditures are estimated to be $54,797 (18.2%) lower than projected. Unplanned maintenance and repairs were performed, which

required having the system out of service.

13. CWA 316(b) Phase II Rule (Project No. 28) – O&M

Project expenditures are estimated to be $1,048,591 (73.1%) lower than projected. This variance is primarily due to economies of scale achieved through developing the database and report formats for one plant and using them across all plants. Additional economies of scale were achieved by combining meetings. The remanding of the 316(b) Phase II Rule by the Second Circuit Court also resulted in the development of more streamlined reports and significantly reduced the meeting requirements projected in 2008. Finally, per Order No. PSC-04-0987-PAA-EI issued on October 11, 2004, $129,000 of 2007 expenses were credited to the 316(b) project for the netting of environmentally-related study costs assumed to be in base rates. This amount could not be determined until actual expenses for 2007 were available in early 2008.

14. Selective Catalytic Reduction (SCR) Consumables (Project No. 29) – O&M

Project expenditures are estimated to be $493,270 (57.7%) lower than projected. Estimates related to ammonia consumption by the SCRs at SJRPP related to CAIR compliance were inadvertently included in the original estimates for this project.

15. Hydrobiological Monitoring Plan (HBMP) (Project No. 30) –

O&M

Project expenditures are estimated to be $20,401 (50.5%) lower than projected. The variance is primarily due to lower than projected costs for monitoring and reporting requirements.

16. CAIR Compliance Project (Project No. 31) – O&M

Project expenditures are estimated to be $552,892 (30.8%) lower than projected. Installation of the Boiler and Main Steam Drains at the Martin and Manatee Plants associated with the 800 MW Unit Cycling Project was listed as an O&M expense in the original projections and was subsequently re-classified as a Capital expenditure.

17. Best Available Retrofit Technology (BART) Project (Project No. 32) – O&M

Project expenditures are estimated to be $1,355, whereas FPL did not anticipate any 2008 expenditures for this project originally. During negotiations with the Florida DEP regarding FPL's proposed compliance plan for BART at the Turkey Point Fossil plant in the first quarter of 2008, the Department requested additional information and analyses. To provide the requested information FPL needed to engage an air modeling consultant to analyze the visibility improvements related to FPL's plan.

18. St. Lucie Cooling Water System Inspection & Maintenance Project (Project No. 33) – O&M

Project expenditures are estimated to be $4,554,865, or 1030.5% higher than originally projected. This variance is primarily due to weather delays, whereby some scope of work has been carried over into 2008 instead of substantially completed in 2007 as originally projected. In addition, the level of effort required to remove concrete debris was greater than anticipated.

19. Martin Plant Drinking Water System Inspection & Maintenance Project (Project No. 35) – O&M

Project expenditures are estimated to be $17,000 or 100.0% lower than projected. The Florida DEP requested a meeting to discuss the proposed design and implementation plan, which has delayed the work schedule. Preliminary approval was given based on the proposed concept of treatment. Construction applications and fees have been submitted to the FDEP. Permit issuance is expected in July 2008.

20. Low Level Radioactive Waste Project (Project No. 36) – O&M

Project expenditures are estimated to be $120,271, whereas FPL did not anticipate any 2008 expenditures for this project originally. The original estimate assumed all costs were capital. The $120,271 represents estimated costs for compressing waste to smaller volume.

Capital Project Variances

21. SO2 Allowances – Negative Return on Investment – Capital

The variance of $74,235, or 36.2% higher than projected is due to higher than anticipated gains on sales of emission allowances. The higher balance in the "Other Regulatory Liability" produces a higher return on investment.

22. Pipeline Integrity Management (Project No. 22) - Capital

The variance in depreciation and return is estimated to be $14,717, or 100% lower than projected. The installation of leak detection devices at the Martin 30" pipeline has been postponed. Further analysis is being conducted on other technology options.

23. Clean Air Interstate Rule (CAIR) Compliance (Project No. 31) - Capital

The variance in the return on CWIP is estimated to be $2,200,113 or 37.3% higher than projected. The variance is primarily due to higher than projected material costs for structural steel and higher than projected labor costs for the SCR installation on Units 1 and 2 at SJRPP.

24. Clean Air Mercury Rule (CAMR) Compliance (Project No. 33) - Capital

The variance in the return on CWIP is estimated to be $2,524,933 or 61.7% lower than projected. The variance is primarily a result of changes in project schedule for the baghouse and sorbent injection installation on Scherer Unit 4, which delayed equipment procurement and certain

construction activities to future years.

25. Martin Plant Drinking Water System Inspection & Maintenance Project (Project No. 35) - Capital

The variance in depreciation and return is $4,574 or 31.5% lower than projected. The Florida DEP requested a meeting to discuss the proposed design and implementation plan, which has delayed the work schedule. Preliminary approval was given based on the proposed concept of treatment. Construction applications and fees have been submitted to the FDEP. Permit issuance is expected in July 2008.

Q. Does this conclude your testimony?

A. Yes, it does.

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

FLORIDA POWER & LIGHT COMPANY

TESTIMONY OF KOREL M. DUBIN

DOCKET NO. 080007-EI

AUGUST 29, 2008

Q. Please state your name and address.

A. My name is Korel M. Dubin and my business address is 9250 West Flagler Street, Miami, Florida, 33174.

Q. By whom are you employed and in what capacity?

A. I am employed by Florida Power & Light Company (FPL) as Senior Manager of Purchased Power in the Resource Assessment and Planning Department.

Q. Have you previously testified in this docket?

A. Yes, I have.

Q. What is the purpose of your testimony in this proceeding?

A. The purpose of my testimony is to present for Commission review FPL's Environmental Cost Recovery Clause (ECRC) projections for the January 2009 through December 2009 period.

Q. Is this filing by FPL in compliance with Order No. PSC-93-1580-FOF-EI, issued in Docket No. 930661-EI?

A. Yes. The costs being submitted for the projected period are consistent with that order.

Q. Have you prepared or caused to be prepared under your direction, supervision or control an exhibit in this proceeding?

A. Yes. KMD-3 consists of seven documents, PSC Forms 42-1P through 42-7P provided in Appendix I. Form 42-1P summarizes the costs being presented at this time. Form 42-2P reflects the total jurisdictional costs for O&M activities. Form 42-3P reflects the total jurisdictional costs for capital investment projects. Form 42-4P consists of the calculation of depreciation expense and return on capital investment for each project. Form 42-5P gives the description and progress of environmental compliance activities and projects for the projected period. Form 42-6P reflects the calculation of the energy and demand allocation percentages by rate class. Form 42-7P reflects the calculation of the ECRC factors.

Q. Please describe Form 42-1P.

A. Form 42-1P (Appendix I, Page 2) provides a summary of projected environmental costs being presented for the period January 2009 through December 2009. Total environmental costs, adjusted for revenue taxes, amount to $93,698,955 (Appendix I, Page 2, Line 5) and include $91,077,343 of environmental project costs (Appendix I, Page 2, Line 1c) increased by the revised estimated/actual true-up under-recovery of $5,728,576 for the January 2008 - December 2008 period (Appendix I,

Page 2, Line 2), and decreased by the final true-up over-recovery of $3,174,379 for the January 2007 – December 2007 period (Appendix I, Page 2, Line 3).

Q. Please describe Forms 42-2P and 42-3P.

A. Form 42-2P (Appendix I, Pages 3 and 4) presents the environmental project O&M costs for the projected period along with the calculation of total jurisdictional costs for these projects, classified by energy and demand. Form 42-3P (Appendix I, Pages 5 and 6) presents the environmental project capital investment costs for the projected period. Form 42-3P also provides the calculation of total jurisdictional costs for these projects, classified by energy and demand.

The method of classifying costs presented in Forms 42-2P and 42-3P is consistent with Order No. PSC-94-0393-FOF-EI for all projects.

Q. Please describe Form 42-4P.

A. Form 42-4P (Appendix I, Pages 7 through 60) presents the calculation of depreciation expense and return on capital investment for each project for the projected period.

Q. Please describe Form 42-5P.

A. Form 42-5P (Appendix I, Pages 61 through 107) provides the description and progress of environmental projects included in the projected period.

Q. Please describe Form 42-6P.

A. Form 42-6P (Appendix I, Page 108) calculates the allocation factors for

demand and energy at generation. The demand allocation factors are calculated by determining the percentage each rate class contributes to the monthly system peaks. The energy allocators are calculated by determining the percentage each rate contributes to total kWh sales, as adjusted for losses, for each rate class.

Q. Please describe Form 42-7P.

A. Form 42-7P (Appendix I, Page 109) presents the calculation of the proposed ECRC factors by rate class.

Q. Are all costs listed in Forms 42-1P through 42-7P attributable to Environmental Compliance projects previously approved by the Commission?

A. Yes, with the exception of the Electric Utility Greenhouse Gas Reduction Program, which is discussed and supported in the testimony of Randall R. LaBauve.

Q. Does this conclude your testimony?

A. Yes, it does.

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

FLORIDA POWER & LIGHT COMPANY

TESTIMONY OF RANDALL R. LABAUVE

DOCKET NO. 080007-EI

August 4, 2008

Q. Please state your name and address.

A. My name is Randall R. LaBauve and my business address is 700 Universe Boulevard, Juno Beach, Florida 33408.

Q. By whom are you employed and in what capacity?

A. I am employed by Florida Power & Light Company (FPL) as Vice President of Environmental Services.

Q. Have you previously testified in predecessors to this docket?

A. Yes, I have.

Q. What is the purpose of your testimony in this proceeding?

A. The purpose of my testimony is to provide an update on FPL's approved Clean Air Interstate Rule (CAIR) Compliance, Clean Air Mercury Rule (CAMR) Compliance and BART (CAVR) Projects, and to discuss the impact of the Court's decision to vacate CAIR on these projects. I also describe an additional activity that will be required under FPL's approved St. Lucie Cooling Water System Inspection and Maintenance Project.

Q. Have you prepared, or caused to be prepared under your direction, supervision, or control any exhibits in this proceeding?

A. Yes, I am sponsoring Exhibit RRL-1, which contains FPL's Supplemental

CAIR/CAMR/CAVR Filing, filed with the Commission on April 2, 2008. Exhibit RRL-1 is included in Appendix II.

Q. Please provide a brief summary of the Court's decision to vacate CAIR.

A. Various legal challenges to CAIR, including FPL's, were presented in oral argument before the DC Circuit Court of Appeals on March 25, 2008. On July 11, 2008 the Court issued a *per curiam opinion* vacating CAIR in its entirety and remanding it to the Environmental Protection Agency (EPA) to promulgate a rule that is consistent with the court's opinion. Parties to the appeal may seek rehearing before the same three-justice panel or rehearing *en banc* by filing a petition with the Court within 45 days – August 25, 2008. Parties may also petition the US Supreme Court for a writ of certiorari within 90 days after the opinion was issued or within 90 days after the Court resolves any petition(s) for rehearing. This deadline would be October 9, 2008 if no one seeks rehearing.

The Court's opinion agreed with some of FPL's challenges to CAIR, including EPA's inappropriate use of fuel factors for the allocation of NOx allowances. However, the Court rejected the arguments advanced by FPL and the Florida Association of Electric Utilities that all or part of Florida should have been excluded from the CAIR region, deferring to EPA's technical expertise.

If the Court's decision becomes final, the Florida Department of

Environmental Protection (DEP) will be obligated to initiate rulemaking to remove those sections of its rules that adopted the CAIR program. Affected sources within Florida would return to the existing Acid Rain SO2 allowance program and would no longer be subject to annual or Ozone Season NOx allowance programs.

Q. What is the current status of FPL's CAIR Compliance Project?

A. FPL's CAIR Compliance Project currently consists of the installation of Selective Catalytic Reduction (SCR) controls and Flue Gas Desulfurization (FGD) on Plant Scherer Unit 4, SCR controls on St. John's River Power Park (SJRPP) Units 1 and 2, the 800 MW Cycling Project for the Manatee and Martin 800 MW units, and the installation of Continuous Emission Monitor Systems (CEMS) at FPL's Gas Turbine Peaking Units.

Scherer SCR and FGD - Construction has begun on the common plant components for the Scherer CAIR Projects. Current total capital cost estimates for FPL's ownership share of the installation of Wet FGD Scrubber and SCRs with Ammonia Injection System on Scherer Unit 4 remains at $392.6 million (76.36% ownership of Unit 4). Georgia Power Company has provided preliminary O&M estimates for the SCR and FGD operation with an annual total fixed and variable O&M of $4.5 million for FPL's share beginning in 2012. O&M activities for the SCR include incremental operating staff, ammonia consumption, maintenance of the SCR ammonia injection skid and SCR auxiliary equipment. O&M activities for the FGD include limestone consumption, limestone and by-product

handling operation, FGD operations, FGD tower and auxiliary equipment maintenance. Completion of the Scherer Unit 4 controls is scheduled for first quarter of 2012.

SJRPP SCR and Ammonia Injection Systems - The SCR CAIR Project at SJRPP is approximately 80 % complete and is scheduled to be completed in the first quarter of 2009. FPL's share of the projected total cost for installation of SCRs and Ammonia Injection Systems on SJRPP Units 1 and 2 remains $45.5 million. Estimated annual O&M expenses beginning 2012 are $1.2 million (FPL 20% ownership).

800 MW Unit Cycling Project - The Martin and Manatee projects are underway and are scheduled to be complete with the last unit, Martin Unit 2, in December of 2010. FPL plans to complete the project work at the Manatee and Martin plants in 2010 with an estimated total project cost of $104.8 million in Capital costs and $5.3 million in O&M expenses.

CEMS Plan for GTs - The peaking GT CEMS installations are planned to be completed in 2008.

Q. How does FPL plan to address the vacature of CAIR as it relates to its CAIR Compliance Project?

A. In view of the tight deadlines under CAIR, FPL believes that it is prudent and necessary to continue towards completion of its CAIR Compliance Project unless and until the DC Circuit's opinion vacating CAIR becomes

final.

If and when the DC Circuit opinion becomes final, FPL will re-evaluate the impact of the vacature on its air emission control obligations taking into account the various other environmental compliance requirements to which FPL's generating facilities are subject as well as available information on EPA's plans to respond to the Court's direction that it initiate new rulemaking consistent with the opinion. In the short run, vacature would have a clear-cut impact on compliance costs, because FPL would not be required to purchase NOx allowances for compliance with CAIR. However, FPL would not be relieved of its obligation to comply with environmental compliance requirements other than CAIR, and those other requirements could dictate the installation and operation of the same emissions controls that FPL would use to comply with CAIR.

For example, the controls being installed on Scherer Unit 4 to comply with CAIR are also mandated under the Georgia Multi-Pollutant Rule. Thus, installation of the FGD and SCR controls at Plant Scherer will remain cost effective and must be completed to allow FPL to continue operation of Unit 4, regardless of CAIR's fate. Similarly, the installation of the SCR at SJRPP Units 1 and 2 has been completed on one unit with significant work having been completed on the remaining unit. FPL has reviewed the status of the revised 8-Hour Ozone National Ambient Air Quality Standard for Duval County and believes that reductions in NOx emissions being

provided by the installation of SCR on the SJRPP units are likely to be required under a State Implementation Plan addressing the county attainment status. FPL has also reviewed the 800 MW Cycling Project and has determined that, if the CAIR vacature becomes final, the substantial reduction in NOx emissions at these plants would still be useful for addressing local ozone non-attainment issues that are likely to arise under the revised Ozone Standard. By allowing FPL to cycle less efficient units off-line when they are not needed, the project would also provide substantial fuel savings to our customers that exceed the project's revenue requirements.

Q. What is the current status of FPL's CAMR Compliance Project?

A. FPL's CAMR Compliance Project includes the installation of Baghouse and Sorbent Injection system with Mercury CEMS on Plant Scherer Unit 4, and the installation of Mercury CEMS at Units 1 and 2 of SJRPP. Installation of the Scherer Mercury controls has begun and is scheduled to be in-service January 2010. FPL's projected capital cost for its share of the Mercury control and CEMS installation at Plant Scherer remains at $99.6 Million. The installation of the Mercury CEMS at SJRPP Units 1 and 2 has been completed.

As discussed in FPL's April 2, 2008 Supplemental CAIR/CAMR/CAVR filing (my Exhibit RRL-1), on February 8, 2008 the US District Court of Appeals ruled that EPA's Delisting rule for Mercury emissions from coal-fired Electric Generating Units (EGUs) utility boilers and the Clean Air

Mercury Rule were unlawful, and the Court vacated both rules. EPA did not seek further review of the Court's decision, and is now required by the Clean Air Act to promulgate a new rule for reduction of Mercury emissions consistent with the decision of the Court.

With the Court's vacature of the Delisting rule, EPA is now likely to proceed with evaluation and implementation of the existing rule requiring Maximum Available Control Technology (MACT) for Mercury emissions from coal-fired EGUs. Prior to the implementation of the Delisting and CAMR rules the MACT analyses had determined that the use of Sorbant Injection systems were effective in the removal of Mercury and established the CAMR Phase I and II Mercury budgets based on the implementation of the technology on coal-fired EGUs by 2018. The Georgia Multi-Pollutant Rule requires that each of the four units at Plant Scherer implement a Sorbant Injection system with a baghouse collection device for removal of Mercury. Therefore, installation of the Mercury controls that would have been needed to comply with the CAMR requirements remains necessary to comply with the requirements of the Georgia Multi-Pollutant Rule, so the vacature of CAMR does not change the compliance obligations at Plant Scherer, including FPL's share of Unit 4. Installation of the Mercury Continuous Emissions Monitoring System (HgCEMS) that was planned to comply with CAMR likewise will be needed to comply with the monitoring and reporting requirements of the Multi-Pollutant Rule and ultimately to demonstrate compliance with

monitoring of the final MACT rule.

For the SJRPP units FPL, and majority owner JEA, had planned to comply with Phase I of the CAMR through the co-benefits removal of Mercury by the SCR and Scrubber for units burning bituminous coals. The planned addition of the SCR on both SJRPP units to comply with CAIR would achieve the co-benefit reductions as both units were constructed with Scrubbers installed. As I discussed earlier in my testimony, CAIR has recently been vacated as well, although that decision is still open to review on rehearing and/or by petition for certiorari to the U.S. Supreme Court. In any event, FPL believes that the reductions in NOx emissions resulting from the installation of SCR on the SJRPP units is likely to be required under a State Implementation Plan addressing attainment of the revised 8-Hour Ozone National Ambient Air Quality Standard for Duval County.

The Supplemental CAIR/CAMR/CAVR filing indicated that FPL intends to revise its CAMR Compliance Project to reflect the different environmental compliance requirements that now dictate the emission controls that are being undertaken pursuant to the Project. This remains FPL's intent, but due to the current flux in the status of CAIR as well as the relevant state-level environmental compliance requirements, FPL has concluded that it would be more productive to defer its revision filing until there is greater clarity on those issues. FPL presently expects to file for revision of the

CAMR Compliance Project by the end of 2008.

Q. What is the current status of FPL's Clean Air Visibility Rule (CAVR) / Best Available Retrofit Technology (BART) Project?

A. Following the vacature of CAIR, the Florida DEP has begun evaluating the impacts on implementation of CAVR/BART within Florida. However, FPL does not yet have enough information on to assess how the Florida DEP's changes to its CAVR/BART requirements will affect FPL's compliance obligations under this project.

St. Lucie Cooling Water System Inspection and Maintenance Project Update

Q. Please briefly describe FPL's currently approved St. Lucie Cooling Water System Inspection and Maintenance Project.

A. The purpose of the St. Lucie Plant Cooling Water System Inspection and Maintenance Project (the "Project") is to inspect and, as necessary, maintain the cooling water system at FPL's St. Lucie nuclear plant (the "Cooling System") such that it minimizes injuries and/or deaths of endangered species as required for FPL to remain in compliance with the federal Endangered Species Act, 16 U.S.C. Section 1531, et seq. (the "ESA") Compliance with the ESA is a condition to the operation of the St. Lucie Plant. In accordance with ESA Section 7 requirements, consultations and resulting Biological Opinion currently in draft and expected by the end of August 2008, corrective actions have been

identified that minimize injuries to protected species. These corrective actions are based on trends in sea turtles injuries, and detailed inspections of the Cooling System.

Q. What activities have been undertaken related to the Project?

A. Because of an upward trend in sea turtle injuries exceeding FPL's allowable "take" of sea turtles in 2006, during April/May of 2007 the St. Lucie Plant completed preparations and inspections of the two 12 ft and one 16 ft diameter ocean intake pipes to identify potential causes of sea turtle injuries. Based on these inspections, cleaning of the pipes was started in October of 2007 to remove concrete debris and Marine growth contributing to turtle injuries. The installation of devices to block off a dead end section of the piping was completed in November of 2007. Because of weather delays some of the scope of work is now being performed in 2008.

Q. What activities related to the Project are currently in progress?

A. The following activities are currently in progress:

- Cleaning of intake pipes to remove protruding structural impediment or biofouling and debris accumulation that extends into the flow path.
- Submittal of monthly reports of causal injuries. Biological Opinion to require implementation of corrective actions as required based on increasing turtle injuries documented by monthly reports.
- Removal of vegetation on the canal banks so that turtle crawls would be more visible.

- Flow sensors to facilitate accurate calculation of flow rates for extended windows for cleaning of the pipes and identification of potential buildup of debris that may cause blockage of the pipes and injury to marine life.

Q. Has FPL identified additional work that it must undertake pursuant to the Project?

A. Yes. In my affidavit filed with the Commission on January 8, 2007 in support of FPL's request to recover costs through the ECRC associated with the Project, I stated that additional work may have to be performed on the Cooling System in the future in order to satisfy "take" limitations imposed under the ESA and/or to address plant operational impacts resulting from work done to satisfy those limitations.

As part of the Section 7 Consultations, and resulting Biological Opinion (which is currently in draft and is expected in final form by the end of August 2008), FPL will be required to install exclusion devices at the velocity caps to prevent large marine organisms, such as adult sea turtles and smalltooth sawfish, from entering the intake pipes. The exclusion devices consist of a support structure installed in the opening of the velocity caps, which will support panels containing a mesh with a 20" opening installed at approximately 45 degrees. The structure design minimizes the potential of trapping marine life yet has only a negligible impact on the cooling water flow into the velocity cap. A conceptual design has been submitted to the NRC for review.

Q. When does FPL expect to incur costs for the exclusion devices required for the Project?

A. FPL currently expects to begin incurring costs associated with design and project planning in the last quarter of 2008, with installation costs incurred in 2009.

Q. What is FPL's estimated cost for the design, project planning and installation of the exclusion devices?

A. FPL currently estimates that the total cost for the exclusion devices will be approximately $3.75 million.

Q. Does this conclude your testimony?

A. Yes, it does.

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

FLORIDA POWER & LIGHT COMPANY

TESTIMONY OF RANDALL R. LABAUVE

DOCKET NO. 080007-EI

AUGUST 29, 2008

Q. Please state your name and address.

A. My name is Randall R. LaBauve and my business address is 700 Universe Boulevard, Juno Beach, Florida 33408.

Q. By whom are you employed and in what capacity?

A. I am employed by Florida Power & Light Company (FPL) as Vice President of Environmental Services.

Q. Have you previously testified in this docket?

A. Yes, I have.

Q. What is the purpose of your testimony in this proceeding?

A. The purpose of my testimony is to present for Commission review and approval a new environmental project - the Greenhouse Gas (GHG) Reduction Program. Additionally, my testimony discusses the current status of FPL's approved CAIR/CAMR/CAVR projects resulting in light of the vacatur of the United States Environmental Protection Agency's (EPA's) CAIR and CAMR rules.

Q. Have you prepared, or caused to be prepared under your direction, supervision, or control, any exhibits in this proceeding?

A. Yes, I am sponsoring Exhibit RRL-2 – Executive Order 07-127 and Exhibit RRL-3 – HB 7135: The Florida Climate Protection Act.

GHG REDUCTION PROGRAM

Q. Please describe the law or regulation requiring the Greenhouse Gas Reduction Program.

A. On July 13, 2007 Florida Governor Charlie Crist signed Executive Order 07-127 establishing immediate actions to reduce GHG emissions within Florida. The Governor's order requires the Florida Department of Environmental Protection (FDEP) to establish maximum allowable GHG emissions for electric utilities within the state. HB 7135 provides for a regulatory and legislative process to implement the Governor's Executive Order 07-127. The FDEP has begun rulemaking under Chapter 403 of the Florida Statutes, as amended by HB 7135, to implement the reductions in GHG emissions from electric utilities needed to achieve those GHG limits. EPA has also received appropriations to begin rulemaking for the mandatory reporting of GHG emissions from sources. A proposed rule is anticipated from EPA by September of 2008 with a final rule promulgated by June of 2009.

Q. Does HB 7135 have any other impacts on FPL?

A. Yes. HB 7135 requires major emitters, including electric utilities, to report GHG emissions to the nonprofit partnership "The Climate Registry"

providing historical and current GHG emission data to establish the baseline emissions and targets for the required compliance reductions to meet the 2017, 2025 and 2050 goals established in Executive Order 07-127. Reporting GHG emissions to the registry requires an annual membership fee, use of specific reporting protocols for the calculation and reporting of GHG emissions in an electronic reporting system, and third party verification of reported emissions to provide accreditation for the reporting entity's emissions.

As I mentioned earlier, HB 7135 also requires that FDEP initiate rulemaking to establish a Florida GHG cap-and-trade program no earlier than January 1, 2010 and submit the rule to the legislature for ratification. Details of that program have not yet been established and it is unknown at this time whether allowances will be allocated to sources in whole or in part, or will be available only at auction. Regardless of whether the allowances are allocated or auctioned, however, the need for CO2 allowances will become part of the fossil generation costs. FPL has included CO2 emission allowance market price projections in its evaluation of proposed generation expansion projects including its proposed Nuclear Uprate projects, Turkey Point Nuclear Unit 6 & 7 expansion, West County Energy Center Unit 3 and the proposed Conversion Projects at Riviera and Cape Canaveral Plants. Future CO2 allowance and program management costs would be included in FPL's Greenhouse Gas Reduction Program.

Q. Please describe the activities FPL will initiate as a result of this project.

A. FPL plans to comply with Florida reporting requirements for its GHG emissions through participation in The Climate Registry reporting program. FPL will begin GHG reporting activities in 2009 during its initial implementation of the FPL Greenhouse Gas Reduction Program. FPL is proposing to recover the costs associated with joining the registry, the preparation of the initial GHG report, and the electronic data reporting required by the registry.

Q. What are the compliance dates for this project?

A. The FDEP has indicated that it will complete its rulemaking by June of 2009 requiring mandatory GHG reporting to The Climate Registry by all electric utilities within the state. FPL anticipates that FDEP will complete additional rulemaking to adopt a GHG cap-and-trade program within Florida by January 2010 to address those requirements of HB 7135 for the electric utility sector.

Q. Has FPL estimated the cost of its Greenhouse Gas Reduction Program?

A. The ultimate cost of the Project will depend on the rules developed by the FDEP to implement Executive Order 07-127 and HB 7135. To comply with the reporting requirements FPL will initiate required activities in 2009 to join The Climate Registry and report baseline data. Subsequent to the data reporting in 2009, FPL is required to engage the services of a Registry-approved Third Party Verification consultant. Costs for

verification of reported GHG emissions are dependant on the protocol used in reporting data and the complexity of the GHG emissions reported. FPL has not included a projection of these costs at this time and anticipates verification to occur in 2010. FPL will provide estimates of these costs once the appropriate reporting protocol has been identified for FPL.

FPL's nuclear, renewable and conversion generation projects along with our energy efficiency program will further reduce greenhouse GHG, which will help to achieve compliance with the Cap and Trade rule being developed by FDEP. To achieve the future reduction goals established by Executive Order 07-127, which will be included in FDEP's Cap and Trade rule, FPL anticipates that additional reductions in its GHG emissions will be required beyond the currently planned projects. The additional reductions will likely require a combination of the implementation of carbon sequestration and storage technology, further implementation of cost-effective zero and low GHG emitting renewable generation, expansion of Demand Side Management (DSM) and Energy Efficiency (EE) programs, and the use of verified carbon offset projects. Costs associated with the implementation of controls and storage technologies for GHG emission reductions, and prudently incurred costs for required offsets for mitigation of GHG emissions to comply with regulations would also be included in FPL's Greenhouse Gas Reduction Program. Costs associated with the expansion of DSM and EE programs would not be

recovered as an FPL ECRC project, although FPL likely will seek recovery of those costs through the Energy Conservation Cost Recovery (ECCR) Clause.

FPL believes that it is premature to identify specific reduction strategies beyond the Non-GHG emitting and Low-GHG emitting generation expansion projects needed to meet future capacity needs that will provide substantial reductions in FPL System GHG emissions. GHG emission controls for fossil fuel fired Electric Generating Units (EGUs) are not yet commercially available nor have they yet been demonstrated as cost-effective technology. Similarly Carbon Capture and Storage is still under development and has not yet been demonstrated as commercially available for fossil fuel-fired EGUs nor has risks associated with the transportation and storage of CO2 been mitigated. FPL does anticipate that further advances in these technologies are likely to occur over the coming years prior to the 2025 and 2050 deadlines established in the Governor's order.

Q. Has FPL estimated how much will be spent on the Project in 2009?

A. Yes, FPL expects to begin incurring such costs following publication of registry guidance and rulemaking by the FDEP, which is anticipated to occur prior to the June 2009 date for the final federal mandatory GHG emissions reporting rule. FPL's preliminary estimate of $50,000 in 2009 O&M expenses for the project includes the projected registration and consultant fees for the first year of Climate Registry participation.

Specifically, FPL anticipates the following required activities in 2009 for The Climate Registry:

1. Annual Membership Fee for joining The Climate Registry: $15,000 (annual fee is $10,000 and includes additional one-time fee of $5,000 for reporting prior year baseline emissions)
2. Preparation of GHG Baseline Emission Inventory for FPL: $20,000 (includes contractor labor costs for identification of emission source data, selection and application of registry approved methods, and quantification of baseline GHG emission data)
3. Preparation, formatting, and data entry of FPL emissions data for submittal to the Climate Registry Information System (CRIS): $15,000 (includes contractor labor costs associated with data entry for: a) creation of corporate/entity profile inputs; b) creation of facility accounts with location specific information; c) populating entities with baseline GHG emission inventory data into on-line reporting system).

Q. How will FPL ensure that the costs incurred are prudent and reasonable?

A. Consistent with our standard practice for all contractor services procurements, FPL will competitively bid the contractor selection for the GHG reporting activities. FPL has a working knowledge of the appropriate costs that should be incurred for this task. We will ensure that the contractor utilizes practices adopted by The Climate Registry for completing the inventory and reporting activities of the project and

provides a reasonable cost estimate before initiating the project.

Q. **Is FPL recovering through any other mechanism the costs for the Greenhouse Gas Reduction Program for which it is seeking ECRC recovery?**

A. No.

CAIR/CAMR/CAVR STATUS UPDATE

Q. **What is the current status of CAIR?**

A. The CAIR vacatur is not yet final. EPA has received a 30 day extension of the deadline for seeking rehearing of the vacatur order before the D.C. Circuit, with the deadline now being September 24, 2008. Until rehearing is complete and there either is resolution of further appeals to the US Supreme Court or the time for such appeals has expired, there is no way of knowing whether CAIR ultimately will be vacated, or will remain in effect either in its current or modified form. Furthermore, assuming the Court's order vacating CAIR is ultimately finalized, that order directed EPA to adopt a replacement rule consistent with the Court's decision. While the Court agreed with some of the arguments FPL made in its challenge to CAIR, it rejected the argument by FPL and other Florida utilities that Florida should be excluded from the CAIR region. And the Court also criticized EPA for spreading out the CAIR emission reductions over two phases (2009/2010 and 2015), holding that EPA needed to impose the full requirements by 2010. Therefore, if CAIR is vacated, EPA will be under pressure to devise alternative emission reduction rules in a very short

time period to address the Ozone and PM2.5 National Ambient Air Quality Standards (NAAQS) impacts of upwind sources on downwind non-attainment areas. It is reasonable to expect that those rules will apply to utilities in Florida.

Q. Should FPL continue its CAIR Compliance Projects?

A. Yes. FPL believes that continuing with construction of its CAIR Compliance projects that are currently underway is clearly in the best interests of our customers. FPL has considered several factors in support of the decision to continue with the projects at this time, including the following:

1. Until the vacatur of CAIR has been finalized through court action by the D.C. Circuit and/or the Supreme Court, we must continue to comply with CAIR.
2. Should CAIR be vacated, the EPA will have to act quickly, consistent with the Court's ruling, to ensure that non-attainment areas for ozone and PM2.5 are addressed in further rulemaking by 2010.
3. States with non-attainment areas retain the ability under Section 126 of the Clean Air Act to require EPA to consider contributions from upwind sources (which had been identified in part through CAIR modeling that resulted in Florida being included in CAIR for Ozone and PM2.5 impacts).
4. The Scherer CAIR Project controls must be installed and operated in order to comply with the Georgia Multi-Pollutant Rule.
5. The SCR controls at SJRPP are nearing completion, with the SCR

construction having been completed for Unit 2 and approximately 60% complete for Unit 1. If CAIR is vacated, FPL fully expects that SCRs will be required at SJRPP in the near future in order to comply with EPA's and/or FDEP's replacement for CAIR, in response to Clean Air Act Section 126 petitions objecting to SJRPP's contribution to downwind non-attainment (its location in extreme north Florida makes it vulnerable to such petitions), or to comply with other environmental requirements. For example, while SJRPP is upwind of existing Ozone and PM2.5 designated non-attainment areas in Florida, the SJRPP Units are likely to be required to reduce emissions of NOx to address designation of Duval County as non-attainment of the 2007 revised Ozone NAAQS which was set to 75 ppb.

SJRPP has estimated significant capital costs associated with delay of construction of one year or longer through demobilization and remobilization of equipment and labor, and through materials cost increases in addition to anticipated delays in catalyst availability through forfeiture of contract. If construction of the Unit 1 SCR were delayed, by even one year, it would result in a cost increase of $7.6 million to complete construction and would impose an 18 month delay in completion of the SCR because we would lose our spot in the queue for acquiring the catalyst necessary to operate the SCR. FPL's share of the additional cost for the delay by only one year

would be in excess of $1.5 million. FPL does not believe it would be consistent with the best interests of its customers to put those SJRPP SCR project on hold with the high likelihood that the SCRs will be required in the near future even without CAIR and the substantial additional costs that would result if the project were put on hold.

6. The 800 MW Cycling project for Manatee Units 1 and 2, and Martin Units 1 and 2 ,in addition to providing annual and ozone season reductions in NOx emissions, also provide substantial fuel savings by allowing these large units to cycle off-line more frequently when not needed for system load. Projected fuel savings associated with the 800 MW Cycling Project are $2.9 billion over the life of the project.

Q. Should FPL continue to recover Capital and O&M costs associated with its CAIR Compliance Projects?

A. Yes. FPL must continue with the construction of these projects to meet CAIR requirements that remain in effect until there is a final decision, in the case of the Scherer project, in order to meet the requirements of the Georgia Multi-Pollutant rule. Moreover, as discussed above, it would not be in the economic interests of our customers to defer or discontinue either the SJRPP SCR project or the 800 MW Cycling Project FPL also plans to recover O&M costs associated with the operation of the controls required for CAIR compliance, or compliance with other requirements including the Georgia Multi-Pollutant rule. Should regulatory requirements

change and operation of the controls not be required on an annual or seasonal basis, FPL will make appropriate adjustments through the ECRC True-Up process to ensure savings are returned to customers.

I would like to point out that increases in steel costs and labor during 2008 have increased the project cost for the SJRPP SCRs from the original projection of $227 million to a revised total cost of $239 million for the total project with FPL's share of the total cost now at $47.8 million.

Q. What is the status of FPL's CAMR Compliance Project in light of the vacatur of CAMR?

A. The CAMR was vacated by the US Court of Appeals on February 8, 2008 and remanded back to the EPA for reconsideration with the court immediately issuing its mandate finalizing the fate of CAMR. I should point out that the vacatur of CAMR was coupled with rejection of EPA's delisting of coal fired EGUs from the list of emission sources that are subject to regulation under section 112 of the Clean Air Act. Therefore, EPA must begin rulemaking to define Maximum Available Control Technology (MACT) for control of mercury (Hg) emission on coal fired EGUs. In 2005, prior to CAMR, EPA had established several MACT categories for coal fired EGUs requiring specific Hg emission standards.

FPL's installation of Hg Controls on Unit 4 at Plant Scherer must continue as planned, in spite of the vacatur of CAMR, in order to comply with the Georgia Multi-Pollutant rule. FPL also believes that the Hg controls being

installed at Plant Scherer represent Maximum Available Control Technology for Hg emissions and will meet any subsequent MACT standard developed by EPA to address coal fired EGU Hg emissions. FPL and JEA intended to comply with CAMR by achieving co-benefits from the operation of the SCRs that are being installed to comply with CAIR, so there are no separate Hg controls at SJRPP that would be affected by the CAMR vacatur. CAMR did impose distinct monitoring requirements, however, and FPL has planned to comply with those monitoring requirements at SJRPP by installing Hg Continuous Emission Monitoring System (HgCEMS). The system had already been procured and was being installed prior to the vacatur of CAMR. Installation of monitors has already been completed on SJRPP Units 1 and 2. The remand of the Hg monitoring rules under CAMR temporarily removes the requirement for the HgCEMS to complete certification requirements and begin continuous operation. Until required by regulation or rule, FPL does not intend to operate the HgCEMS and has not included HgCEMS O&M in the ECRC for the CAMR Project.

Q. What is the status of FPL's BART Project as it relates to the vacatur of CAIR?

A. Should the vacatur of CAIR become final, the "BART equals CAIR" exemption adopted by the Clean Air Visibility Rule (CAVR) would also be nullified, thus requiring the FDEP to address BART at all applicable units within the state. FPL had begun negotiations with FDEP concerning Turkey Point Fossil Units 1 & 2 having made substantial progress until the

vacatur of CAIR. While FDEP was seeking guidance from EPA regarding the affect of the CAIR vacatur on BART and CAVR, until the fate of CAIR is known FPL believes that the CAIR exemption remains.

Q. Does this conclude your testimony?

A. Yes, it does.

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

FLORIDA POWER & LIGHT COMPANY

TESTIMONY OF ERIC SILAGY

DOCKET NO. 080007-EI

August 4, 2008

Q. Please state your name and business address.

A. My name is Eric Silagy. My business address is Florida Power & Light Company, 700 Universe Boulevard, Juno Beach, Florida, 33408.

Q. By who are you employed and what position do you hold?

A. I am employed by Florida Power & Light Company ("FPL" or the "Company") as Vice President and Chief Development Officer.

Q. Please describe your duties and responsibilities in that position.

A. I lead FPL's efforts to develop new electric generation, including the development of clean, zero greenhouse gas emitting renewable electric generation.

Q. Please describe your professional experience and education.

A. Prior to being appointed Chief Development Officer for FPL, I was employed by FPL Energy as Vice President/General Manager for the Texas region. In this capacity, I was responsible for managing all business activities related to FPL Energy's generation assets in the region, including 1,600 megawatts ("MW") of wind power. Prior to undertaking those duties in Texas, I served as Vice President, Business Development with responsibility for managing and

supporting FPL Energy and FPL Group merger and acquisition activities, including all nuclear power plant acquisitions.

Prior to joining FPL Energy, from 1999 to 2003, I served as Vice President, Mergers, Acquisitions & Divestitures at Entergy Wholesale Operations. In that position, I led the successful sale and purchase of numerous energy related assets and companies in the U.S. and overseas. Prior to joining Entergy, I held the position of Vice President, Development, Southeast Asia for The Wing Group, a subsidiary of Western Resources. In this capacity, I was responsible for managing power generation development activities and offices in Thailand, Indonesia, the Philippines and Singapore.

From 1987 to 1996, I served on the staff of United States Senator J. Bennett Johnston. During this time, my work included service in a variety of roles including Professional Staff member of the U.S. Senate Energy and Natural Resources Committee, Legislative Assistant and Chief of Staff. I hold a B.A. in Economics from the University of Texas at Austin and a J.D. from the Georgetown University Law Center.

PURPOSE AND SUMMARY

Q. What is the purpose of your testimony in this proceeding?

A. The purpose of my testimony is to present for Commission review and

approval under the Environmental Cost Recovery Clause ("ECRC"), the recoverable costs for three new projects: Martin Next Generation Solar Energy Center ("Martin Solar"), DeSoto Next Generation Solar Energy Center ("DeSoto Solar") and the Space Coast Next Generation Solar Energy Center ("Space Coast Solar").

Q. Are you sponsoring any exhibits in this case?

A. Yes. I am sponsoring Exhibits ES-1 through ES-3, which are included in Appendix III.

ES-1 Martin Solar Project Milestones

ES-2 DeSoto Solar Project Milestones

ES-3 Space Coast Solar Project Milestones

Q. Would you please summarize your testimony?

A. In Docket Number 080281-EI, the Commission found at the July 15, 2008 Agenda Conference that the Martin Solar, DeSoto Solar and Space Coast Solar projects are eligible for recovery through the ECRC pursuant to House Bill 7135, hereafter referred to as the 2008 Energy Bill ("Energy Bill"). The actual and estimated 2008 costs for these three projects are reasonable in amount and have been spent appropriately. Therefore, such costs should be recovered through the ECRC.

BACKGROUND

Q. Would you please provide an overview of the recently passed 2008 Energy Bill?

A. Florida's Legislature recently passed the Energy Bill, which facilitates the development of clean, zero greenhouse gas emitting renewable generation in Florida. Governor Crist signed this legislation into law on June 25, 2008 at the 2008 Serve to Preserve Florida Summit on Global Climate Change. The law became effective July 1, 2008. Consistent with the Energy Bill's emphasis on demonstrating the feasibility and viability of clean, zero greenhouse gas emitting energy systems in Florida, FPL plans to construct and operate three separate solar energy projects totaling 110 MW with different characteristics, at diverse locations. These projects will not only generate clean, renewable energy, but will also provide significant information and experience regarding key aspects of siting, constructing and operating different solar technologies at various locations in Florida.

Q. Please describe the portions of the 2008 Energy Bill that apply to zero greenhouse gas emitting renewable generation in Florida.

A. Section 366.92, Florida Statutes, expresses the Florida Legislature's support for renewable energy. Part of the Energy Bill extends this support by amending Section 366.92 to promote development of up to 110 MW of zero greenhouse gas emitting renewable generation, by permitting full cost recovery for qualifying projects through the ECRC.

Q. Please quote the specific portion of the 2008 Energy Bill to which you are referring.

A. The Energy Bill provides in relevant part that:

> In order to demonstrate the feasibility and viability of clean energy systems, the commission shall provide for full cost recovery under the environmental cost-recovery clause of all reasonable and prudent costs incurred by a provider for renewable energy projects that are zero greenhouse gas emitting at the point of generation, up to a total of 110 megawatts statewide, and for which the provider has secured necessary land, zoning permits, and transmission rights within the state. Such costs shall be deemed reasonable and prudent for purposes of cost recovery so long as the provider has used reasonable and customary industry practices in the design, procurement, and construction of the project in a cost-effective manner appropriate to the location of the facility. The provider shall report to the commission as part of the cost-recovery proceedings the construction costs, in-service costs, operating and maintenance costs, hourly energy production of the renewable energy project and any other information deemed relevant by the commission. Any provider constructing a clean energy facility pursuant to this section shall file for cost

recovery no later than July 1, 2009.

Q. How does the 2008 Energy Bill facilitate the development of new renewable energy resources in Florida?

A. The Energy Bill promotes the development of new renewable resources in Florida by giving the Commission specific authority to approve for cost recovery new renewable energy resources that are "zero greenhouse gas emitting at the point of generation."

The Energy Bill facilitates new renewable development by investor owned electric utilities by providing for full cost recovery under the ECRC of all reasonable and prudent costs incurred for renewable energy projects that are zero greenhouse gas emitting at the point of generation, up to a total of 110 MW statewide, and for which the provider has secured necessary land, zoning permits and transmission rights within the state.

In Docket Number 080281-EI, the Commission found at the July 15, 2008 Agenda Conference that FPL's three proposed solar energy center projects are eligible for recovery through the ECRC pursuant to the Energy Bill.

FPL'S PROPOSED MARTIN NEXT GENERATION SOLAR ENERGY CENTER ("MARTIN SOLAR")

Q. Please provide an overview of FPL's proposed Martin Solar project.

A. FPL proposes to construct an approximately 75 MW solar thermal steam generating facility which will be integrated into an existing combined cycle power plant at the existing Martin Power Plant site in Martin County, Florida, thereby creating the world's first hybrid energy center. Martin Solar will be the second largest solar generating facility in the world. This generation plant will be constructed on an approximately 600-acre site (comprised of 500 acres for the solar field and 100 acres for related construction, operation and maintenance activities), which is fully contained within FPL's existing 11,300-acre Martin Plant site and will be the first of its kind to integrate solar technology with a combined cycle natural gas plant.

Q. Please describe the solar energy technology that will be used for the project.

A. The Martin Solar project will involve the installation of solar thermal technology that will be integrated into the existing steam cycle for the Martin Power Plant Unit 8 natural gas-fired combined cycle plant. The steam to be supplied by Martin Solar will be used to supplement the steam currently generated by the heat recovery steam generators. The project will involve the installation of parabolic trough solar

collectors that concentrate solar radiation. The collectors will track the sun to maintain the optimum angle to collect solar radiation. The collectors will concentrate the sun's energy on heat collection elements located in the focal line of the parabolic reflectors. These heat collection elements contain a heat transfer fluid which is heated by the concentrated solar radiation to approximately 750 degrees Fahrenheit. The heat transfer fluid is then circulated to heat exchangers that will produce the steam that will be routed to the existing natural gas-fired combined cycle Unit 8 heat recovery steam generators.

Q. What are the major project milestones for Martin Solar?

A. The major project milestones for Martin Solar are included in Exhibit ES-1. In order to achieve the currently targeted final in-service date by the end of 2010, numerous engineering, permitting and procurement activities are underway in 2008.

The permitting process commenced with the initial submittal of an Application for Site Certification Modification to the Florida Department of Environmental Protection ("FDEP") on May 1, 2008. The application was deemed complete on June 2, 2008. On July 7, 2008 the FDEP issued a Notice of Intent to Modify Conditions of Certification. The final modification order, along with the issuance of an Army Corp of Engineers ("ACOE") Fill Permit Modification, is expected in September, 2008. With the necessary permits,

construction is expected to commence by early 2009.

Initial engineering commenced during July 2008 in order to support the specification and procurement of major equipment such as mirrors, heat collection elements, solar collection assemblies and heat exchangers. The selection and procurement of mirror and heat collection element suppliers is expected to be complete by the end of the November, 2008. The selection and procurement of the solar collection assemblies and heat exchanger suppliers is expected to be complete by the end of 2008. Contracts for the construction of both the solar fields and the tie-in into the existing Martin Unit 8 plant are expected to be complete by the end of 2008 to support the start of construction.

Q. What costs for the Martin Solar project do you expect to incur in 2008 for which you are requesting recovery for under ECRC?

A. The expected costs for 2008 are $17,710,000.

Q. What costs have been incurred to date?

A. The costs incurred through the end of June, 2008 for the Martin Solar project are $766,731. Included in this amount is approximately $68,300 which was incurred in late 2007 as part of the initial site zoning amendment effort.

Q. Please describe the activities for which costs have been incurred to date.

A. The majority of costs incurred to date consisted of payroll and

contracted services for the initial development of the project's site certification modification, zoning amendment and the associated conceptual engineering to support the development of these applications.

Q. What costs are projected for the remainder of 2008?

A. The current projected costs for July, 2008 to the end of December, 2008 are $16,943,269.

Q. Please describe the activities for which costs are projected during the remainder of 2008.

A. A majority of the projected costs, about $10.6 million, are for initially securing the necessary mirrors and heat collection elements for the project. These orders are expected to be placed by the end of November, 2008 in order to support the current project schedule. Costs for engineering, procurement of solar collection assemblies and heat exchangers, and development of the construction packages during the remainder of 2008 make up the balance of these costs.

Q. What is the current projected total capital cost for the Martin Solar project?

A. The current projected total capital cost for the Martin Solar Project is $476.3 million.

Q. What steps is FPL taking to ensure that the costs for this project are prudent and reasonable?

A. FPL is using trained and qualified employees with extensive experience in designing, procuring, and constructing utility facilities in

Florida to develop the Martin Solar project. Through the leveraging of shared resources, FPL is also calling on the experience and expertise of its sister company, FPL Energy, which owns and operates the world's largest solar thermal facility, the 310 MW Solar Electric Generating System ("SEGS") in California that has produced reliable renewable solar power for about 20 years. FPL Energy has performed a global assessment of solar equipment providers for upgrade work performed at SEGS and for ongoing development efforts for other large solar thermal plants in California and internationally. These assessments have revealed that globally there are a limited number of solar equipment suppliers and all have manufacturing capacity constraints. Additionally, there are a limited number of companies with recent experience in the engineering and construction, including on-site assembly and erection, of solar thermal fields. As a result competitive bidding of all aspects for the Martin project may not be feasible or necessary, however, FPL expects to achieve design, procurement, and construction efficiencies for the benefit of its customers by having its own highly qualified employees leverage the expertise, international relationships and experience gained by its sister company FPL Energy.

FPL'S PROPOSED DESOTO NEXT GENERATION SOLAR ENERGY CENTER ("DESOTO SOLAR")

Q. Please provide an overview of FPL's proposed DeSoto Solar project.

A. The DeSoto Solar project will be built utilizing solar photovoltaic ("PV") technology. The project is planned to be 25 MW of capacity and is projected to produce an average of 51,000 MWh of electricity annually. Construction of the plant is planned to begin during the first quarter of 2009 with an in-service date during the fourth quarter of 2009.

Q. Please describe the solar energy technology that will be used for the DeSoto Solar project.

A. DeSoto Solar will utilize solar PV technology that converts sunlight directly into electric power. The facility will utilize a tracking array that is designed to follow the sun as it traverses through the sky. In addition to the tracking array this facility will utilize cutting edge solar panel technology.

Q. What are the major project milestones for DeSoto Solar?

A. The major project milestones for DeSoto Solar are included in Exhibit ES-2. In order to achieve the currently targeted final in-service date of the end of 2009, numerous engineering, permitting and procurement activities are underway in 2008. Such activities include layout and design of the solar fields, procurement of the PV solar panels and associated electrical equipment, and interaction with the FDEP for the

Environmental Resource Permit.

Q. What costs for the DeSoto Solar project do you expect to incur in 2008 for which you are requesting recovery for under ECRC?

A. The expected costs for 2008 are $6,296,363.

Q. What costs have been incurred to date?

A. The costs incurred through the end of June, 2008 for the DeSoto Solar project are $257,539.

Q. Please describe the activities for which costs have been incurred to date.

A. The majority of costs incurred to date consisted of payroll and contracted services for the development of the project's local land use approvals, environmental studies, and conceptual engineering to support the preparation of the storm water management system design. Additionally, engineering effort was expended for the preparation of specifications used in the competitive bid packages for solicitation of qualified Engineering Procurement Construction ("EPC") contractors.

Q. What costs are projected for the remainder of 2008?

A. The current projected costs for July 2008 to the end of December 2008 are $6,038,824.

Q. Please describe the activities for which costs are projected during the remainder of 2008.

A. A majority of the projected costs, about $4 million, for the remainder of 2008 are for progress payments to the turnkey EPC contractor. Costs

for administration of the contract, permitting and internal engineering, legal and project management make up the balance of the costs.

Q. What is the current projected total capital cost for the DeSoto Solar project?

A. The current projected total capital cost for the DeSoto Solar project is $173.5 million.

Q. What steps is FPL taking to ensure that these costs are prudent and reasonable?

A. FPL has entered into a turnkey EPC contract with a qualified supplier and contractor experienced in utility-scale projects. As part of the process, FPL followed a well-defined request for information ("RFI") process which was initially conducted in 2007 with responses from approximately 26 international and domestic companies involved in the development, manufacturing, and construction of utility-scale PV systems and projects. In February of 2008 a request for proposal ("RFP") was issued which resulted in responses from 8 companies of which 4 provided conforming proposals to the RFP. The 4 responses were short listed down to 2 proposals after obtaining bid clarifications and conducting an initial screening evaluation. A detailed bid evaluation along with initial negotiations with the 2 companies was conducted which resulted in a final selection.

The contract for the engineering, procurement and construction of the DeSoto Solar project is with SunPower of San Jose, California. In

addition to other large scale PV projects, SunPower built the largest-operating solar PV power plant in North America, a 14-megawatt installation located at Nellis Air Force Base in Nevada.

FPL'S PROPOSED SPACE COAST NEXT GENERATION SOLAR ENERGY CENTER ("SPACE COAST SOLAR")

Q. Please provide an overview of FPL's Space Coast Solar project.

A. Space Coast Solar will utilize solar PV technology and will be located at NASA's Kennedy Space Center, Florida. The project is planned for 10 MW of installed capacity that is projected to produce approximately 17,000 MWh of electricity annually. Construction of the project is expected to begin as early as the third quarter of 2009 with an in-service date during the third quarter of 2010.

Q. Please describe the solar energy technology that will be used for the Space Coast Solar project.

A. Space Coast Solar project uses the solar PV, which I previously described with respect to the DeSoto Solar project. However, the Space Coast Solar project will deploy this technology differently in that we will utilize a fixed array oriented to capture the maximum amount of electricity from the sun over the entire year.

Q. What are the major project milestones for Space Coast Solar?

A. The major project milestones for Space Coast Solar are included in Exhibit ES-3. In order to achieve the currently targeted final in-service

date during the third quarter of 2010, numerous engineering, permitting and procurement activities are underway in 2008. Such activities include layout and design of the PV solar fields and obtaining the Environmental Resource Permit from FDEP.

Q. What costs for the Space Coast Solar project do you expect to incur in 2008 for which you are requesting recovery for under ECRC?

A. The expected costs for 2008 are $1,012,286.

Q. What costs have been incurred to date?

A. The costs incurred through the end of June 2008 for the Space Coast Solar project are $269,960. Included in this amount was approximately $37,000 which was incurred in late 2007 which included the initial development efforts for acquiring the site.

Q. Please describe the activities for which costs have been incurred to date.

A. The majority of costs incurred to date consisted of payroll and contracted services for the initial development of the project's site long term land lease, conceptual engineering to support the preparation of boundary and topographic surveys, conceptual surface water management system design, and completion of an environmental assessment. Additionally, engineering effort was expended for the preparation of specifications used in the competitive bid packages for solicitation of qualified EPC contractors.

Q. What costs are projected for the remainder of 2008?

A. The current projected costs for July 2008 to the end of December 2008 are $742,326.

Q. Please describe those activities for which costs are projected during the remainder of 2008.

A. The projected costs for the remainder of 2008 are for administration of the contract, permitting and internal engineering, legal and project management.

Q. What is the current projected total capital cost for the Space Coast Solar project?

A. The current projected total capital cost for the Space Coast Solar project is $80 million, which includes the net present value of the land lease for the property.

Q. What steps is FPL taking to ensure that these costs are prudent and reasonable?

A. FPL has entered into a turnkey EPC contract with a qualified supplier and contractor experienced in utility-scale projects. As part of the process, FPL followed a well-defined request for information ("RFI") process which was initially conducted in 2007 with responses from approximately 26 international and domestic companies involved in the development, manufacturing, and construction of utility-scale PV systems and projects. In February of 2008 a request for proposal ("RFP") was issued which resulted in responses from 8 companies of which 4 provided conforming proposals to the RFP. The 4 responses

were short listed down to 2 proposals after obtaining bid clarifications and conducting an initial screening evaluation. A detailed bid evaluation along with initial negotiations with the 2 companies was conducted which resulted in a final selection.

The contract for the engineering, procurement and construction of the Space Coast Solar project is with SunPower of San Jose, California. As previously mentioned, in addition to other large scale PV facilities, SunPower built the largest-operating solar PV power plant in North America, a 14-megawatt installation located at Nellis Air Force Base in Nevada.

MANAGEMENT OF PROJECT COSTS

Q. Will FPL report to the Commission as part of ongoing ECRC cost-recovery proceedings the construction costs, in-service costs, operating and maintenance costs, hourly energy production and any other information required by the Commission?

A. Yes. This information will be provided as part of FPL's ongoing ECRC filings.

Q. Is FPL recovering through any other mechanism the costs for the Martin Solar, DeSoto Solar or Space Coast Solar projects for which it is petitioning for ECRC recovery?

A. No. FPL will apply ECRC incremental cost principles to its cost

recovery requests for the solar projects. This will ensure that only the correct incremental costs of the solar projects are included for ECRC recovery.

Q. How much in total does FPL project these projects to cost?

A. Based upon the information available at the time of this filing, FPL estimates that the total capital cost of the projects is about $729.8 million, not including interest during construction. This is within the range of costs described in FPL's petition and my testimony in Docket Number 080281-EI, where the Commission approved these projects as eligible for ECRC recovery. However, the projected annual average output for the two PV projects has increased from approximately 58,000 MWh to 68,000 MWh which is a result of the specific technology and supplier selected. Therefore, the levelized installed cost on a dollar per megawatt hour ($/MWh) basis is in line with estimates previously provided in my testimony.

Q. Are there uncertainties with respect to the costs of the projects, and what is FPL doing to mitigate those uncertainties?

A. There are unavoidable uncertainties associated with these projects. FPL is providing the best available information with respect to the costs of the projects at this stage of development. However, all the projects are subject to pricing changes, to the benefit or otherwise, due to the global volatility of key commodities such as steel, copper, concrete and silicone. Additionally, fluctuations in the value of the U.S. dollar could impact, either positively or negatively, final project

pricing since many key components are currently manufactured overseas.

With respect to DeSoto Solar and Space Coast Solar, final agreements have been negotiated and executed for solar PV panels and their installation. Cost uncertainties associated with these two projects have been greatly reduced.

Martin Solar does not yet have completed procurement and installation contracts. In addition, important aspects of the Martin Solar project are novel in the industry. Designing and implementing new technology is less certain than designing and implementing well-established technology, such as gas-fired combined cycle plants.

FPL is taking advantage of solar thermal lessons learned from FPL Energy's SEGS plant and its current efforts on a 250 MW project in California. FPL also intends to fully leverage its buying power due to the large economies of scale of these projects to reduce costs. Access to such existing expertise and buying power with respect to solar steam generation is invaluable. However, the integration proposed for Martin Solar -- namely, to provide the solar generated steam into an existing combined cycle plant as a substitute for steam generated from combusting natural gas -- has not previously been done. This gives rise to cost and technical uncertainties that have not

been resolved at this stage of the project. FPL will use thorough due diligence, careful contract negotiation and other appropriate measures to manage such risks.

Q. Are there any additional project cost exposures in the event that the projects not proceed for any reason?

A. Yes, we are estimating an additional $3.3 million in termination fees with various suppliers in the event the projects are terminated in 2008.

Q. Does this conclude your testimony?

A. Yes.

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

FLORIDA POWER & LIGHT COMPANY

TESTIMONY OF ERIC SILAGY

DOCKET NO. 080007-EI

August 29, 2008

Q. Please state your name and business address.

A. My name is Eric Silagy. My business address is Florida Power & Light Company, 700 Universe Boulevard, Juno Beach, Florida, 33408.

Q. By who are you employed and what position do you hold?

A. I am employed by Florida Power & Light Company ("FPL" or the "Company") as Vice President and Chief Development Officer.

Q. Please describe your duties and responsibilities in that position.

A. I lead FPL's efforts to develop new electric generation, including the development of clean, zero greenhouse gas emitting renewable electric generation.

Q. Have you previously testified in this proceeding?

A. Yes I have.

PURPOSE AND SUMMARY

Q. What is the purpose of this testimony?

A. The purpose of my testimony is to present for Commission review and approval under the projected 2009 Environmental Cost Recovery

Clause ("ECRC") recoverable costs for the Martin Next Generation Solar Energy Center ("Martin Solar"), DeSoto Next Generation Solar Energy Center ("DeSoto Solar") and the Space Coast Next Generation Solar Energy Center ("Space Coast Solar").

Q. Would you please summarize your testimony?

A. In Order Number PSC-08-0491-PAA-EI, issued in Docket Number 080281-EI on August 4, 2008, the Commission found that the Martin Solar, DeSoto Solar and Space Coast Solar projects are eligible for recovery through the ECRC pursuant to House Bill 7135 (the "Energy Bill"). On August 4, 2008, I filed testimony in this proceeding that provided overviews of the Energy Bill and each of these three projects, as well as presenting the reasonable actual and estimated costs for each project through the end of 2008. In this testimony, I discuss the activities planned for each project in 2009 and present FPL's projection of the reasonable costs to be incurred in 2009. Those costs should be recovered through the ECRC.

MARTIN SOLAR PROJECT

Q. What are the 2009 major project milestones for Martin Solar?

A. The major project milestone in 2009 for Martin Solar is the commencement of construction in the first quarter of 2009, with the possible commissioning of a portion of the solar field in December 2009. The Martin Solar project is currently in the process of design

and optimization of the layout and configuration. Once completed later this year, then an estimate of the amount of generation that could be placed into service by the end of 2009 can be established.

Q. What costs for the Martin Solar project do you expect to incur in 2009 for which you are requesting recovery under ECRC?

A. FPL expects to incur capital costs for 2009 of $210,005,000.

Q. Please describe the activities for which these costs are projected to be incurred in 2009.

A. The projected 2009 costs are primarily split between material and equipment costs of approximately $90 million and construction costs of approximately $120 million. Included in the equipment and material category are costs related to solar mirrors, heat collection tubes, support structures, heat transfer fluid, and the solar field heat exchanger/steam generator. Included in the construction category are costs related to site clearing and grading, stormwater system installation, transmission line relocation, solar field construction, balance of plant construction, and owner project management costs.

Q. What is the current projected total capital cost for the Martin Solar project?

A. The current projected total capital cost for the Martin Solar Project is $476.3 million.

Q. What steps is FPL taking to ensure that the 2009 costs for this project are prudent and reasonable?

A. As discussed in the testimony I filed on August 4, 2008, FPL is using trained and qualified employees with extensive experience in designing, procuring, and constructing utility facilities in Florida to develop the Martin Solar project. Through the leveraging of shared resources, FPL is also calling on the experience and expertise of its sister company, FPL Energy, which owns and operates the world's largest solar thermal facility, the 310 MW Solar Electric Generating System ("SEGS") in California that has produced reliable renewable solar power for about 20 years. FPL Energy has performed a global assessment of solar equipment providers for upgrade work performed at SEGS and for ongoing development efforts for other large solar thermal plants in California and internationally. These assessments have revealed that globally there are a limited number of solar equipment suppliers and all have manufacturing capacity constraints. Additionally, there are a limited number of companies with recent experience in the engineering and construction, including on-site assembly and erection, of solar thermal fields. As a result, competitive bidding of all aspects for the Martin project may not be feasible or necessary, however, FPL expects to achieve design, procurement, and construction efficiencies for the benefit of its customers by having its own highly qualified employees leverage the expertise, international

relationships and experience gained by its sister company FPL Energy.

DESOTO SOLAR PROJECT

Q. What are the major 2009 project milestones for DeSoto Solar?

A. The major project milestones in 2009 for DeSoto Solar are the commencement of construction in the first quarter of 2009, with project completion expected in December. The solar field is expected to be commissioned in 5 MW stages beginning in July and continuing until the end of December, at which time FPL expects the entire 25 MW to be in service.

Q. What costs for the DeSoto Solar project do you expect to incur in 2009 for which you are requesting recovery under ECRC?

A. The expected costs for 2009 are $166,429,700. Of this total, $467,475 is for operation and maintenance ("O&M") expenses with the remainder being capital costs.

Q. Please describe the activities for which these costs are projected to be incurred in 2009.

A. The capital costs will be associated with site grading and preparation, civil, mechanical and electrical construction of the PV solar field and equipment, testing, start-up and commissioning, and electrical interconnection, all of which FPL expects will be completed in 2009. In parallel, FPL will incur O&M expenses as phased turnover and

commissioning of sections of the PV solar field commence, beginning in the third quarter of the year.

Q. What is the current projected total capital cost for the DeSoto Solar project?

A. The current projected total capital cost for the DeSoto Solar project is $173.5 million.

Q. What steps is FPL taking to ensure that these costs are prudent and reasonable?

A. As discussed in the testimony I filed on August 4, 2008, FPL has entered into a turnkey EPC contract with a highly qualified supplier and contractor experienced in utility-scale projects. As part of the process, FPL followed a well-defined request for information ("RFI") process which was initially conducted in 2007 with responses from 26 international and domestic companies involved in the development, manufacturing, and construction of utility-scale PV systems and projects. In February of 2008 a request for proposal ("RFP") was issued which resulted in responses from eight companies of which four provided conforming proposals to the RFP. The four responses were short listed down to two proposals after obtaining bid clarifications and conducting an initial screening evaluation. A detailed bid evaluation along with initial negotiations with the two companies was conducted which resulted in a final selection.

The contract for the engineering, procurement and construction of the

DeSoto Solar project is with SunPower of San Jose California. In addition to other large scale PV projects, SunPower built the largest-operating solar PV power plant in North America, a 14 MW installation located at Nellis Air Force Base in Nevada.

SPACE COAST SOLAR PROJECT

Q. What are the major 2009 project milestones for Space Coast Solar?

A. The major project milestones in 2009 for Space Coast Solar are the receipt of all necessary permits and approvals during the first quarter of 2009 in order to support the commencement of construction in September, 2009. The solar field is expected to be commissioned in 2 MW stages beginning in May, 2010 and continuing until the end of July, 2010, at which time FPL expects the entire 10 MW to be in service.

Q. What costs for the Space Coast Solar project do you expect to incur in 2009 for which you are requesting recovery under ECRC?

A. The expected costs for 2009 are $27,030,686. Of this total $20,000 is for O&M expenses associated with the property lease from the federal government.

Q. Please describe the activities for which these costs are projected to incur in 2009.

A. Costs for 2009 will be inclusive of site engineering, design,

procurement of key components, extensive ground preparation and site work, civil construction activities and transmission interconnect work. Additionally there will be O&M costs associated with the property lease from the federal government.

Q. What is the current projected total capital cost for the Space Coast Solar project?

A. The current projected total capital cost for the Space Coast Solar project is $78.9 million, which includes the net present value of the land lease for the property. This projected total capital cost has been reduced by $1.1 million from the cost provided in the testimony I filed on August 4, 2008. The reduction is a result of cost savings recently identified due to more defined scope.

Q. What steps is FPL taking to ensure that these costs are prudent and reasonable?

A. The Space Coast Solar project is being handled as a turnkey EPC contract with SunPower, in the same manner as the DeSoto Solar project. My previous comments on the steps FPL is taking to ensure that the costs for the DeSoto Solar project are reasonable and prudent apply equally here.

TOTAL PROJECT COSTS

Q. Is FPL recovering through any other mechanism the 2009 projected costs for the Martin Solar, DeSoto Solar or Space Coast

Solar projects for which it is seeking ECRC recovery?

A. No. FPL will apply ECRC incremental cost principles to its cost recovery requests for the solar projects. This will ensure that only the correct incremental costs of the solar projects are included for ECRC recovery.

Q. In your August 4, 2008 testimony, you stated that FPL estimates the total costs of the three projects to be about $729.8 million. Has FPL's estimate of the total project costs changed?

A. Yes, for reason discussed in my testimony for the Space Coast Solar project, the total costs of the three projects have been reduced to $728.7 million.

Q. Your August 4, 2008 testimony discussed the uncertainties with respect to project costs and what FPL is doing to mitigate those uncertainties. Has your assessment of the uncertainties or FPL's response to the uncertainties changed?

A. No.

Q. Does this conclude your testimony?

A. Yes.

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

DIRECT TESTIMONY OF

WILL GARRETT

ON BEHALF OF

PROGRESS ENERGY FLORIDA

DOCKET NO. 080007-EI

April 2, 2008

Q. Please state your name and business address.

A. My name is Will Garrett. My business address is 299 First Avenue North, St. Petersburg, FL 33701.

Q. By whom are you employed and in what capacity?

A. I am employed by Progress Energy Service Company, LLC as Controller of Progress Energy Florida.

Q. What are your responsibilities in that position?

A. As legal entity Controller for Progress Energy Florida (PEF), I am responsible for all accounting matters that impact the reported financial results of this Progress Energy Corporation entity. I have direct management and oversight of the employees involved in PEF Regulatory Accounting, Property Plant and Materials Accounting, and PEF Financial Reporting and General Accounting.

Q. Please describe your educational background and professional experience.

A. I joined the company as Controller of PEF on November 7, 2005. My direct relevant experience includes 2 ½ years as the Corporate Controller for DPL, Inc. and its major subsidiary, Dayton Power and Light, headquartered in Dayton, Ohio. Prior to this position, I held a number of finance and accounting positions for 8 years at Niagara Mohawk Power Corporation, Inc. (NMPC) in Syracuse, New York, including Executive Director of Financial Operations, Director of Finance and Assistant Controller. As the Director of Finance and Assistant Controller, my responsibilities included regulatory proceedings, rates, and financial planning, providing testimony on a variety of matters before the New York Public Service Commission. Prior to joining NMPC, I was a Senior Audit Manager at Price Waterhouse (PW) in upstate New York, with 10 years of direct experience with investor owned utilities and publicly traded companies. I am a graduate of the State University of New York in Binghamton, with a Bachelor of Science in Accounting and I am a Certified Public Accountant in the State of New York.

Q. Have you previously filed testimony before this Commission in connection with Progress Energy Florida's Environmental Cost Recovery Clause (ECRC)?

A. Yes.

Q. What is the purpose of your testimony?

A. The purpose of my testimony is to present for Commission review and approval, Progress Energy Florida's Actual True-up costs associated with Environmental Compliance activities for the period January 2007 through December 2007.

Q. Are you sponsoring any exhibits in support of your testimony?

A. Yes. I am sponsoring Exhibit No. WG-1, which consists of eight forms and Exhibit No. WG-2, which provides details of four capital projects by site.

Exhibit No. WG-1 consists of the following:

- Form 42-1A reflects the final true-up for the period January 2007 through December 2007.
- Form 42-2A reflects the final true-up calculation for the period.
- Form 42-3A reflects the calculation of the Interest Provision for the period.
- Form 42-4A reflects the calculation of variances between actual and estimated/actual costs for O&M activities.
- Form 42-5A presents a summary of actual monthly costs for the period of O&M activities.
- Form 42-6A reflects the calculation of variances between actual and estimated/actual costs for Capital Investment Projects.
- Form 42-7A presents a summary of actual monthly costs for the period for Capital Investment Projects.

- Form 42-8A, pages 1 through 13, consist of the calculation of depreciation expense, property tax expense, and return on capital investment for each project that is being recovered through the ECRC.

Exhibit No. WG-2 consists of detailed support for the following capital projects:

- Above Ground Storage Tank Secondary Containment (CPD, pages 2 through 6)
- CAIR/CAMR (CPD, pages 7 through 8)
- CAIR CTs (CPD, pages 9 through 12)
- Underground Storage Tanks (CPD, page 13).

Q. What is the source of the data that you will present by way of testimony or exhibits in this proceeding?

A. The actual data is taken from the books and records of PEF. The books and records are kept in the regular course of our business in accordance with generally accepted accounting principles and practices, and provisions of the Uniform System of Accounts as prescribed by Federal Energy Regulatory Commission (FERC) and any accounting rules and orders established by this Commission.

Q. What is the final true-up amount for which PEF is requesting for the period January 2007 through December 2007?

A. PEF is requesting approval of an over-recovery amount of $2,219,585 for the calendar period ending December 31, 2007. This amount is shown on Form 42-1A, Line 1.

Q. What is the net true-up amount PEF is requesting for the January 2007 through December 2007 period which is to be applied in the calculation of the environmental cost recovery factors to be refunded/recovered in the next projection period?

A. PEF has calculated and is requesting approval of an over-recovery amount of $5,553,115 reflected on Line 3 of Form 42-1A, as the adjusted net true-up amount for the January 2007 through December 2007 period. This amount is the difference between the actual over-recovery amount of $2,219,585 and the actual/estimated under-recovery of $3,333,530, as approved in Order PSC-07-0922-FOF-EI, for the period of January 2007 through December 2007.

Q. Are all costs listed in Forms 42-1A through 42-8A attributable to environmental compliance projects approved by the Commission?

A. Yes, they are.

Q. How did actual O&M expenditures for January 2007 through December 2007 compare with PEF's estimated/actual projections as presented in previous testimony and exhibits?

A. Form 42-4A shows that total O&M project costs were $6,212,976 or 16.6% lower than projected. Following are variance explanations for those O&M projects with significant variances. Individual project variances are provided on Form 42-4A.

O&M Project Variances

1. **Distribution System Environmental Investigation, Remediation, and Pollution Prevention (Project No. 2)**: Project expenditures were $934,169 or 5.5% lower than projected. This variance is primarily attributable to the inability to complete the number of remediations projected for the last quarter of 2007. This project is further discussed in Donald R. Ennis's testimony.

2. **Pipeline Integrity Management Program (Project No. 3a)**: The Pipeline Integrity Management (PIM) O&M project expenditures were $338,637 or 43.0% lower than projected. The majority of the variance is being driven by delays on several projects due to design modifications and unavailability of contractors. This project is further discussed in Patricia Q. West's testimony.

3. **SO2 Emissions Allowances Program (Project No. 5)**: The SO2 Emissions Allowances O&M project expenditures were $4,804,794 or 53.1% lower than projected. The majority of the variance is being driven by an adjustment of $4,885,084 related to the SO2 Allowance Auction Proceeds liability. Since

2000, the liability was adjusted downward based on information that the allowances were vintage years of seven years in the future. During the third quarter of 2007, a detailed investigation into allowance auctions determined that these proceeds related to allowances that had current year vintages and seven year vintages. Thus, an adjustment was needed to reduce the liability for allowances with vintage years that had already passed and to properly accelerate the benefit to the ratepayers through a reduction in expenses. In the Estimated/Actual filing, the liability was reduced, but the corresponding offset to SO2 expenses was not recorded due to oversight. Upon the approval of the Estimated/Actual filing by the Commission, an adjustment was recorded in December 2007 to flow the benefits through recoverable ECRC expenses. The recognition of the adjustment at the end of the year benefited ratepayers through a decreased return on capital.

4. **Sea Turtle – Coastal Street Lighting (Project No. 9)**: Project expenditures were $97,400 or 79.5% lower than expected. This variance is attributable to delays with the lighting research that was planned and not fully completing compliance activities in certain areas. This project is further discussed in Donald R. Ennis's testimony.

Q. How did actual Capital recoverable expenditures for January 2007 through December 2007 compare with PEF's estimated/actual projections as presented in previous testimony and exhibits?

A. Form 42-6A shows that total Capital Investment project recoverable costs were $377,653 or 17.8% higher than projected. Actual costs and variance by individual project are provided on Form 42-6A. Return on Capital Investment, Depreciation, and Taxes for each project for the period are provided on Form 42-8A, pages 1 through 13. The variance explanations for those Capital projects with significant variances are as follows:

Capital Investment Project Variances:

1. **SO2/NOX Emissions Allowances (Project No. 5):** Recoverable costs were $359,084 or 54.7% higher than projected. At the time of the Estimated/Actual filing, prices for NOX allowances were highly volatile and unpredictable because the market for these allowances was a new compliance market. As a result, there was a high degree of uncertainty related to the timing and amount of NOX allowance purchases in the future. PEF applied a conservative approach for projected NOX allowance purchases, where by rates would only include a return on capital for purchases certain to occur during the second half of 2007. NOX allowance purchases were only projected in inventory balances if there was an executed contract with a transaction that was expected to settle during the year. The variance is primarily attributable to the return on incremental NOX allowances purchases that did not have executed contracts at the time of the Estimated/Actual filing and transactions that settled in 2007 that were projected to settle in 2008.

Q. How did actual Crystal River CAIR/CAMR - Base (Project No. 7.4) capital expenditures for January 2007 through December 2007 compare with PEF's estimated/actual projections as presented in previous testimony and exhibits?

A. These capital expenditures qualify for AFUDC and therefore will not be included in the capital recoverable costs until the associated pollution controls are placed in service. PEF projected total capital expenditures to be $281,068,748 in 2007 as part of the Estimated/Actual filing. Actual expenditures in 2007 were $15,345,702 or 5.5% higher than projected. The variance is primarily attributable to having only an estimated cash flow of expenses for the main contractor at the time of the Estimated/Actual filing. This project is further discussed in Patricia Q. West's testimony.

Q. Does this conclude your testimony?

A. Yes, it does.

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

DIRECT TESTIMONY OF

DONALD R. ENNIS

ON BEHALF OF

PROGRESS ENERGY FLORIDA

DOCKET NO. 080007-EI

April 2, 2008

Q. Please state your name and business address,

A. My name is Donald R. Ennis. My business address is 299 First Avenue North, St. Petersburg, Florida 33701.

Q. By whom are you employed and in what capacity?

A. I am employed by Progress Energy Carolina as Manager, Environmental Permitting & Compliance.

Q. What is the scope of your duties?

A. Currently, my responsibilities include managing environmental permitting and compliance activities for the Energy Delivery Florida and Energy Delivery Carolinas organizations.

Q. Please describe your educational background and professional experience.

A. I received a Bachelors of Science degree in Biology from Campbell University. In addition, I am a Registered Environmental Manager with the National

Registry of Environmental Professionals. Currently I hold the position of Manager, Environmental Permitting & Compliance. Prior to my current assignment, I held several environmental management positions with Progress Energy Carolina and Progress Energy Service Company, LLC.

Q. What is the purpose of your testimony?

A. My testimony provides Progress Energy Florida's Actual True-Up costs associated with the following environmental compliance activities for the period January 2007 through December 2007: Distribution System Environmental Investigation, Remediation, and Pollution Prevention (Project No.2) and Sea Turtle – Coastal Street Lighting (Project No.9).

Q. How did actual O&M expenditures for January 2007 through December 2007 compare with PEF's estimated / actual projections as presented in previous testimony and exhibits?

A. Details regarding each of the identified projects are provided below:

O&M Project Variances:

1. **Distribution System Environmental Investigation, Remediation, and Pollution Prevention (Project No.2):** Actual O&M expenditures were $934,169 or 5.5% less than projected. This variance is primarily due to a lower number of sites being remediated than re-projected for the 2007 work plan caused by resource and scheduling issues during the fourth quarter. Remediation work planned, but not completed in 2007, is included in the

2008 work plan. Progress Energy Florida implemented further changes to our work process to better optimize resource planning and scheduling.

2. **Sea Turtle – Coastal Street Lighting (Project No.9):** Actual O&M expenditures were $97,400 or 79.5% lower than projected. This variance is attributable to a delay in conducting lighting research that was planned and not fully completing street light fixture modifications in the Mexico Beach area. Progress Energy Florida has partnered with the University of Florida to conduct research on identifying lighting characteristics that are not adverse to sea turtle hatchlings. This research is intended to be used to develop new lighting technology that will add to the limited compliance options that currently exist. The research was delayed until 2008 to allow time to better develop the research components. Progress Energy Florida and the University of Florida finalized the research plan in late 2007 and research activities began in early 2008. Progress Energy Florida modified 123 street light fixtures at Mexico Beach in 2007. Additional street light fixture modifications were planned for Mexico Beach but were not completed because of resource and scheduling issues. These modifications are expected to occur in 2008.

Q. Does this conclude your testimony?

A. Yes.

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

DIRECT TESTIMONY OF

DONALD R. ENNIS

ON BEHALF OF

PROGRESS ENERGY FLORIDA

DOCKET NO. 080007-EI

AUGUST 4, 2008

Q. Please state your name and business address.

A. My name is Donald R. Ennis. My business address is 299 First Avenue North, St. Petersburg, Florida 33701.

Q. By whom are you employed and in what capacity?

A. I am employed by Progress Energy Carolinas as Manager, Environmental Permitting & Compliance.

Q. What are your responsibilities in that position?

A. Currently, my responsibilities include managing environmental permitting and compliance activities for the Energy Delivery Florida and Energy Delivery Carolinas organizations.

Q. Please describe your educational background and professional experience.

A. I received a Bachelors of Science degree in Biology from Campbell University. In addition, I am a Registered Environmental Manager with the National

Registry of Environmental Professionals. Currently I hold the position of Manager, Environmental Permitting & Compliance. Prior to my current assignment, I held several environmental management positions with Progress Energy Carolina and Progress Energy Service Company, LLC.

Q. What is the purpose of your testimony?

A. The purpose of my testimony is to explain material variances between the Estimated/Actual project expenditures versus the original cost projections for environmental compliance costs associated with Progress Energy Florida (PEF)'s Substation Environmental Investigation, Remediation, and Pollution Prevention Program, Distribution System Environmental Investigation, Remediation, and Pollution Prevention Program, and the Sea Turtle Coastal Street Lighting Program for the period January 2008 through December 2008.

Q. Please explain the variance between the Estimated/Actual project expenditures and the original projections for the Substation System Program for the period January 2008 to December 2008.

A. O&M project expenditures for the Substation System Program are estimated to be $2,736,930 or 125% higher than originally projected. This increase is primarily attributable to higher amounts of subsurface contamination encountered during remediation of substations that was not evident during the original visual environmental inspections.

Q. Please explain the variance between the Estimated/Actual project expenditures and the original projections for the Distribution System Program for the period January 2008 to December 2008.

A. O&M project expenditures for the Distribution System Program are estimated to be $427,507 or 3% higher than originally projected. The increase is driven by a higher unit cost than forecasted and the carryover of uncompleted work from the 2007 work plan. The higher unit costs are associated with remediation sites that took longer than one day (as originally projected) to complete because of soil conditions or extent of the contamination.

Q. Please explain the variance between the Estimated/Actual project expenditures and the original projections for the Sea Turtle Program for the period January 2008 to December 2008.

A. O&M project expenditures for the Sea Turtle Program are estimated to be $173,289 or 162% lower than originally projected. This decrease is attributable to lower than anticipated costs of the study to be conducted jointly with the University of Florida as part of the compliance program. The study is designed to further our understanding of the light spectrum which will be used to identify new and/or emerging lighting technologies that provide additional options for ensuring compliance with applicable sea turtle ordinances and criteria.

Q. Does this conclude your testimony?

A. Yes.

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

DIRECT TESTIMONY OF

DONALD R. ENNIS

ON BEHALF OF

PROGRESS ENERGY FLORIDA

DOCKET NO. 080007-EI

AUGUST 29, 2008

Q. Please state your name and business address.

A. My name is Donald R. Ennis. My business address is 299 First Avenue North, St. Petersburg, Florida 33701.

Q. By whom are you employed and in what capacity?

A. I am employed by Progress Energy Carolinas as Manager, Environmental Permitting and Compliance.

Q. Have you previously filed testimony before this Commission in connection with Progress Energy Florida's Environmental Cost Recovery Clause?

A. Yes, I have.

Q. Have your duties and responsibilities remained the same since you last filed testimony in this proceeding?

A. Yes.

Q. What is the purpose of your testimony?

A. The purpose of my testimony is to provide estimates of the costs that will be incurred in the year 2009 for Progress Energy Florida's ("PEF's" or "Company's") Substation Environmental Investigation, Remediation, and Pollution Prevention Program (Project #1), which was previously approved in PSC Order No. PSC-02-1735-FOF-EI, Distribution System Environmental Investigation, Remediation, and Pollution Prevention Program (Project #2), which was previously approved in PSC Order No. PSC-02-1735-FOF-EI, and the Sea Turtle Coastal Street Lighting Program (Project #9), which was previously approved in PSC Order No. PSC-05-1251-FOF-EI.

Q. What costs do you expect to incur in 2009 in connection with the Substation System Investigation, Remediation and Pollution Prevention Program (Project #1)?

A. For 2009, we estimate PEF will incur total O&M expenditures of approximately $6.8 million in remediation costs for the Substation System Investigation, Remediation and Pollution Prevention Program. This amount includes estimated costs for remediation activities at 41 substation sites that have already been identified as requiring remediation.

Q. What steps is the Company taking to ensure that the level of expenditures for the Substation System Program is reasonable and prudent?

A. PEF works annually with the Florida Department of Environmental Protection ("FDEP") to determine the specific substation sites to be remediated to ensure compliance with FDEP criteria. The Company also provides quarterly reports to FDEP on progress made in remediating substation sites. To ensure the level of expenditures is reasonable and prudent, the Company selected contractors through a competitive bidding process and reviews invoices for accuracy.

Q. What costs do you expect to incur in 2009 in connection with the Distribution System Investigation, Remediation and Pollution Prevention Program (Project #2)?

A. For 2009 we estimate total O&M expenditures of approximately $8.3 million for the Distribution System Investigation, Remediation and Pollution Prevention Program to perform remediation activities at approximately 870 sites. This estimate assumes approximately 150 3-phase transformer sites at an average cost of $14,500 per site, approximately 730 single-phase transformer sites at an average cost of $8,500 per site as well as program management costs.

Q. What steps is the Company taking to ensure that the level of expenditures for the Distribution System program is reasonable and prudent?

A. To ensure the level of expenditures is reasonable and prudent, the Company closely monitors remediation work, performs sample testing of inspection results, and provides quarterly reports to the FDEP on progress made in remediating distribution sites.

Q. What costs do you expect to incur in 2009 in connection with the Sea Turtle/Street Lighting Program (Project #9)?

A. For 2009, the projected expenses for the Sea Turtle/Street Lighting Program are $25,000. This amount includes $5,000 in O&M costs and $20,000 in capital expenditures to satisfy to ensure compliance with sea turtle ordinances in Franklin and Gulf Counties and the City of Mexico Beach. The capital expenditures will be spent on modifications and/or replacement of applicable lighting fixtures. The estimated O&M projections include research costs associated with street light technology studies.

Q. What steps is the Company taking to ensure that the level of expenditures for the Sea Turtle/Street Lighting Program is reasonable and prudent?

A. PEF is cooperating with local governments and appropriate regulatory agencies to develop compliance plans that allow flexibility to make only those modifications necessary to achieve compliance. PEF will ensure that evaluation of each streetlight requiring modification occurs so that only those activities necessary to achieve compliance are performed in a reasonable and prudent manner. In addition, PEF will evaluate emerging technologies and incorporate their use where reasonable and prudent.

Q. Does this conclude your testimony?

A. Yes, it does.

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

DIRECT TESTIMONY OF

PATRICIA Q. WEST

ON BEHALF OF

PROGRESS ENERGY FLORIDA

DOCKET NO. 080007-EI

April 2, 2008

Q. Please state your name and business address.

A. My name is Patricia Q. West. My business address is 299 First Avenue North, St. Petersburg, Florida 33701.

Q. By whom are you employed and in what capacity?

A. I am employed by the Environmental, Health and Safety Services Section of Progress Energy Florida ("Progress Energy" or "Company") as Manager of Environmental Services / Power Operations Group. In that position, I have responsibility to provide regulatory support and obtain necessary environmental permits for the implementation of compliance strategies pertaining to environmental requirements for power generation facilities in Florida.

Q. Please describe your background and experience in the environmental field.

A. I obtained my B.S. degree in Biology from New College of the University of South Florida in 1983. I was employed by the Polk County Health Department from 1983-1986 and by the Florida Department of Environmental Protection

("DEP") from 1986-1990. At DEP, I was involved in compliance and enforcement efforts associated with petroleum storage facilities. In 1990, I joined Florida Power Corporation as an Environmental Project Manager and then held progressively responsible positions in the company's environmental services department, including the position of team leader for the integration of the environmental functions of Florida Power and Carolina Power and Light. I previously served as Manager of Water Programs in the Environmental Services Section of PEF's Technical Services Department and as Manager of Environmental Programs and Strategy. In 2005, I assumed my present position as Manager of Environmental Services / Power Operations Group.

Q. Have you previously filed testimony before this Commission in connection with Progress Energy Florida's Environmental Cost Recovery Clause?

A. Yes, I have.

Q. What is the purpose of your testimony?

A. This testimony provides Progress Energy Florida's Actual True-Up costs associated with the following environmental compliance activities for the period January 2007 through December 2007: the Pipeline Integrity Management Program (Project No. 3a); and Crystal River CAIR/CAMR - Base (Project No. 7.4).

In addition, I am sponsoring Exhibit No. __ (PQW-1), which is PEF's review of the efficacy of its Integrated Clean Air Compliance Plan and of retrofit options in relation to expected environmental regulations.

Q. How did actual O&M expenditures for January 2007 through December 2007 compare with PEF's estimated / actual projections as presented in previous testimony and exhibits?

A. Details regarding the identified project are provided below:

O&M Project Variance:

The Pipeline Integrity Management Program (Project No. 3a): The Pipeline Integrity Management (PIM) O&M project expenditures were $338,637 or 43.0% lower than projected. The majority of the variance was due to not completing the Main Line Valve (MLV) Telemetry project as planned in 2007; this delay is attributed to the need for design and installation modifications as well as the unavailability of contractors when work was scheduled. The installation of four MLV guardrails adjacent to Hwy. 19, that were intended to reduce the risk associated with potential traffic accidents along the roadway, was delayed to avoid conflicts with ongoing work on the MLV telemetry project. The majority of this work is included in the 2008 workplan. One guardrail will be postponed until FDOT completes their work along a portion of the highway, and is expected to be completed in 2010. In addition to these changes to the original project schedule, the Integrity Management Coordinator was temporarily assigned to other duties within Progress Energy between March and August 2007, and subsequently left the Company in November 2007.

Q. How did actual Crystal River CAIR/CAMR - Base (Project No. 7.4) capital expenditures for January 2007 through December 2007 compare with PEF's estimated/actual projections as presented in previous testimony and exhibits?

A. These capital expenditures for engineering, design, and construction of emission control facilities at Crystal River qualify for AFUDC and therefore will not be included in the recoverable costs until the associated pollution controls are placed in service. Progress Energy projected total capital expenditures to be $281,068,748 in 2007. Actual expenditures were $15,345,702 or approximately 5.5% more than expected because the primary contract for engineering, procurement, construction, and project management ("EPC contract") was not finalized until the fourth quarter of 2007. Therefore, at the time of the Estimated/Actual filing, expenses were projected based on an estimated cash flow. A definitive monthly cash flow of expenses was not available until the contract was signed.

Q. In Order No. PSC-07-0922-FOF-EI issued in Docket 070007-EI on November 16, 2007, the Commission directed PEF to file as part of its ECRC true-up testimony "a yearly review of the efficacy of its Plan D and the cost-effectiveness of PEF's retrofit options for each generating unit in relation to expected changes in environmental regulations." Has PEF conducted such a review?

A. Yes. PEF's review is presented in Exhibit No. __ (PQW-1) to my testimony.

Q. Please summarize the conclusions of PEF's review.

A. With regard to Plan D's efficacy, PEF remains confident that Plan D will have the desired effect of achieving timely compliance with the applicable regulations in a cost-effective manner. PEF has achieved significant project milestones, including execution of all major contracts and commencement of construction activities, including installation of steel support for the Crystal River Unit 4 and 5 control projects. As discussed in Exhibit No. __ (PQW-1), there are uncertainties associated with all major construction projects including the Crystal River pollution control projects. At this time, however, the Crystal River projects are on-schedule to achieve compliance with the applicable regulations as contemplated in PEF's 2007 ECRC filings.

No new or revised environmental regulations have been adopted that have a direct bearing on PEF's compliance plan. Although discussion of potential regulation of carbon dioxide (CO_2) emissions continues, no legislation or regulations have been adopted to date. In any event, there currently are no demonstrated retrofit options to reduce CO_2 emissions from fossil fuel-fired electric generating units such as Crystal River Units 4 and 5, which are the primary focus of PEF's compliance plan. Likewise, replacement of coal-fired generation from Crystal River Units 4 and 5 with natural-gas fired generation is not a feasible or cost-effective option because it cannot be implemented in time to meet the CAIR regulatory deadlines and it would put PEF in the vulnerable position of relying solely on allowance purchases to achieve compliance during

the five to six year interim period. Furthermore, replacing coal-fired generation with gas-fired generation would decrease PEF's fuel diversity and potentially increase fuel price volatility.

As a result of a recent federal appeals court decision vacating the federal CAMR regulations, the U.S. Environmental Protection Agency (EPA) may be required to adopt new standards for utility mercury emissions. This development does not immediately impact PEF's implementation of Plan D because the plan does not contemplate installation of mercury-specific controls until 2017. Thus, Plan D provides PEF flexibility to respond if and when EPA adopts any new mercury standards. PEF does plan to continue ongoing design of Continuous Mercury Monitors (CMMS) for Crystal River Units 1 and 2 because significant work has already been started and CMMS will likely be required in any rule the EPA adopts in response to the federal court's vacature of CAMR.

Q. Does this conclude your testimony?

A. Yes it does.

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

DIRECT TESTIMONY OF

PATRICIA Q. WEST

ON BEHALF OF

PROGRESS ENERGY FLORIDA

DOCKET NO. 080007-EI

AUGUST 4, 2008

Q. Please state your name and business address.

A. My name is Patricia Q. West. My business address is 299 First Avenue North, St. Petersburg, FL 33701.

Q. By whom are you employed and in what capacity?

A. I am employed by the Environmental Health and Safety Services Section of Progress Energy Florida ("Progress Energy" or "Company") as Manager of Environmental Services / Power Generation Florida.

Q. What are your responsibilities in that position?

A. I am responsible for ensuring that environmental technical and regulatory support is provided to the implementation of compliance strategies associated with the environmental requirements for power generation facilities in Florida.

Q. Have you previously filed testimony before this Commission in connection with the Company's Environmental Cost Recovery Clause (ECRC)?

A. Yes, I have.

Q. Have your duties and responsibilities remained the same since you last filed testimony in this proceeding?

A. Yes.

Q. What is the purpose of your testimony?

A. The purpose of my testimony is to explain material variances between the Estimated/Actual project expenditures and the original cost projections for environmental compliance costs associated with PEF's Pipeline Integrity Management Program, Aboveground Storage Tank Secondary Containment Program, Phase II Cooling Water Intake Program, Arsenic Groundwater Standard Project, Clean Air Mercury Rule, and the components of Integrated Clean Air Compliance Program associated with the Anclote plant and combustion turbines for the period January 2008 through December 2008. I also will describe a new Greenhouse Gas Inventory and Reporting Program for which PEF is seeking recovery in this docket.

Q. Please explain the variance between the Estimated/Actual project expenditures and the original projections for the Pipeline Integrity Management Program for the period January 2008 to December 2008.

A. PEF is projecting O&M expenditures to be $146,057 or 43% higher than previously projected, primarily because of an increase in the scope of work and the need to complete some activities in 2008 that were not completed in 2007.

This work primarily includes GIS database development, the installation of guardrails along US Highway 19 to protect valve mechanisms along the road right-of-way, installation of a pipeline telemetry system that allows remote monitoring of valves designed to isolate sections of the pipeline in the event of a leak, and leak detection software update.

PEF is projecting capital expenditures to be $332,707 or 51% higher for this program than originally projected. These costs will include higher than expected costs for the installation of the Pipeline Controls upgrade project, primarily due to additional scope items that had not been identified in the conceptual design for the project. Final design of the project has now been completed, material costs have been obtained, and bids for the installation work are being evaluated.

Q. Please explain the variance between the Estimated/Actual O&M expenditures and the original projections for the Above Ground Tank Secondary Containment Program for the period January 2008 to December 2008.

A. PEF is projecting O&M expenditures to be $368,303 higher than originally projected. This variance is due to costs for additional work necessary to bring Turner Tank 8 into compliance with the secondary containment requirements for Rule 62-761.510(3)(d), F.A.C. For Turner Tank 8, PEF originally selected EnviroMat secondary containment technology, which was selected off of the vendor approved list provided by the Florida Department of Environmental

Protection (FDEP). Field work to install the secondary containment began in September 2003. Acceptance testing was conducted in November 2003, but the EnviroMat system failed the 2 psi pressure leakage test. PEF terminated the fieldwork after repeatedly requesting the vendor to provide recommended corrective actions, but receiving no satisfactory responses. The vendor subsequently suggested remedial measures, but all attempts to resolve the problem failed. During the first quarter 2008, PEF concluded that all attempts at corrective action have been exhausted and that the technology cannot be corrected. Therefore, the costs associated with the failed technology approximately $368,303, has been deemed impaired and recorded to O&M. Rule 62-761.510(3), F.A.C., requires installation of secondary containment on Turner Tank 8 by 2010. To achieve compliance, the original technology will be removed and replaced with FDEP approved steel double-bottom technology as part of the 2008 remediation schedule.

Q. Please explain the variance between the Estimated/Actual capital expenditures and the original projections for the Above Ground Tank Secondary Containment Program for the period January 2008 to December 2008.

A. PEF is projecting capital expenditures to be $1,809,738 or 65% higher for this program than originally projected. This variance is primarily attributable to costs associated with completing the upgrades of two tanks at the Turner combustion turbine facility. The addition of the Turner tanks to the 2008 plan was based on the decision to proceed with final retrofits of Turner tank 8

(discussed above) as well as the decision to not retire Turner tank 7 in order to enhance fuel storage and flexibility within the PEF combustion turbine fleet. This work was scheduled in consideration of the DeBary work in order to minimize mobilization costs of contractors since the two plants are in close proximity to each other.

Q. Please explain the variance between the Estimated/Actual project expenditures and the original projections for the Phase II Cooling Water Intake Project for the period January 2008 to December 2008.

A. PEF is projecting O&M expenditures to be $38,128 or 26% lower than previously projected for this program. The variance is primarily attributable to lower than expected costs to complete reports summarizing the results of the completed biological studies. Work has been suspended on the project pending completion of additional rulemaking by the U.S. Environmental Protection Agency (EPA) in response to the Second U.S. Circuit Court of Appeals' vacatur of the Phase II cooling water intake rules in *Riverkeeper, Inc. v. EPA*, 475 F.3d 83 (2nd Cir. 2007) .

Q. Please explain the variance between the Estimated/Actual project expenditures and the original projections for the Arsenic Groundwater Standard Project for the period January 2008 to December 2008.

A. PEF is projecting O&M expenditures to be $77,669 or 100% lower for this program than originally projected. PEF continues working with the FDEP to establish a compliance plan and schedule to address groundwater matters as well

as the management of solid waste / coal combustion product, in accordance with the FDEP Industrial Waste Water Permit that was issued on January 9, 2007 and the Conditions of Site Certification issued on November 29, 2007. Some of this work will continue into 2009 as PEF implements the management plan that must be submitted to the agency by December 31, 2008.

Q. Please explain the variance between the Estimated/Actual project expenditures and the original projections for the Clean Air Mercury Rule for the period January 2008 to December 2008.

A. PEF is projecting capital expenditures to be $1,572,669 or 58% lower for this program than originally projected. As reported in the April 2, 2008 review of the Integrated Clean Air Compliance Plant, on February 8, 2008 the federal CAMR regulations were vacated. This action resulted in the removal of requirements to install emissions monitoring equipment by January 1, 2009. The variance is primarily due to a PEF's actions in response to the court decision. In early 2008 PEF continued with ongoing design of the monitors for Crystal River Units 1 and 2 because significant work was already begun and CMMS will likely be required in any rule the EPA adopts in the future. PEF is also in negotiations with the provider of the monitoring equipment to avoid or minimize cost implications for equipment ordered prior to the rule vacatur.

Q. Please explain the variance between the Estimated/Actual project expenditures and the original projections for the components of PEF's Integrated Clean Air Compliance Plan related to the Combustion Turbine

(CT) facilities and the Anclote plant for the period January 2008 to December 2008?

A. PEF is projecting capital expenditures for the Combustion Turbine (CT) projects to be $100,266 or 100% higher than projected primarily attributable to the need to complete certification testing of several emissions units early in 2008. The work was originally expected to be completed in late 2007, but extended into early 2008 due to unexpected outages during the time original testing was supposed to have commenced. The O&M costs for this project are expected to be $48,500 less than originally projected due to software support rates not being incurred during 2008.

PEF is projecting capital expenditures for the Anclote clean air compliance project to be lower than the original capital expenditure projection by $299,993 primarily attributable to the status of PEF's overall air compliance plan strategy assessment. Preliminary assessments for appropriate control technology will be undertaken during the latter part of 2008, with work expected to begin in early 2009.

Q. Have there been any recent developments concerning CAIR?

A. Yes. On July 11, 2008, the U.S. Circuit Court of Appeals for the District of Columbia issued a decision vacating CAIR in its entirety. The Court also remanded the rule back to the EPA to address the flaws identified by the Court. At this date, the decision is not final because Court has not issued a mandate. The Petitioners and EPA have 45 days, or until August 25, 2008, to petition for

rehearing of the Court's decision. The Court will then issue its mandate unless a petition for rehearing is granted. The Petitioners and EPA also can seek review by the U.S. Supreme Court within 90 days after the later of the Court's decision or completion of proceedings on a petition for rehearing.

At this time it is too early to determine the full impact of the Court's decision, even assuming it stands as originally issued. PEF is continuing to implement its Commission-approved Integrated Clean Air Compliance Plan as the Company assesses the potential implications of the Court's decision. We are working with state and federal agencies, as well as conducting internal analyses, to determine the appropriate course of action once the D.C. Circuit's decision becomes final and its full implications are known. We will update the Commission on the status of the CAIR decision and PEF's implementation of its clean air compliance plan in future testimony.

Q. Is PEF requesting recovery of 2008 costs for any new environmental programs?

A. Yes. PEF is requesting recovery of costs associated with a new Greenhouse Gas (GHG) Inventory and Reporting Program that is being implemented in response to Chapter 2008-277, Florida Laws, which established the Florida Climate Protection Act, to be codified at section 403.44, Florida Statutes. Among other things, this new legislation authorizes FDEP to establish a cap and trade program to GHG emissions from electric utilities. Utilities subject to the program, including PEF, will be required to use The Climate Registry for

purposes of GHG emission registration and reporting. Activities to be conducted in 2008 include training and inventory development. Project expenditures are projected to be $7,440 for the remainder of 2008.

Q. Do the costs for the new program qualify for recovery through the ECRC?

A. Yes. Chapter 2008-277, Florida Laws, establishes a new subsection 366.8255(1)(d)8, Florida Statutes, which provides for ECRC recovery of "[c]osts or expenses prudently incurred for the quantification, reporting, and third-party verification as required for participation in greenhouse gas emission registries for greenhouse gases as defined in s. 403.44." In addition, costs for the new program meet the requirements for ECRC recovery previously established by the Commission. Specifically, the expenditures are being prudently incurred after April 13, 1993; the activities are legally required to comply with a governmentally imposed environmental requirement which was created, or whose effect was triggered, after the minimum filing requirements (MFRs) were submitted in PEF's last rate case (Docket No. 050078-EI); and none of the costs of the new program are being recovered through base rates or any other cost recovery mechanism.

Q. Does this conclude your testimony?

A. Yes it does.

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

DIRECT TESTIMONY OF

PATRICIA Q. WEST

ON BEHALF OF

PROGRESS ENERGY FLORIDA

DOCKET NO. 080007-EI

August 29, 2008

Q. Please state your name and business address.

A. My name is Patricia Q. West. My business address is 299 1st Avenue North, St. Petersburg, Florida, 33701.

Q. By whom are you employed and in what capacity?

A. I am employed by the Environmental Health and Safety Services Section of Progress Energy Florida ("PEF" or "Company") as Manager of Environmental Services / Energy Supply Florida.

Q. Have you previously filed testimony before this Commission in connection with PEF's Environmental Cost Recovery Clause?

A. Yes, I have.

Q. Have your duties and responsibilities remained the same since you last filed testimony in this proceeding?

A. Yes.

Q. What is the purpose of your testimony?

A. This testimony provides estimates of the costs that will be incurred in the year 2009 for environmental programs that fall within the scope of my responsibilities to support PEF's power generation group. These programs include the Pipeline Integrity Management Program (Project 3), the Aboveground Storage Tanks Secondary Containment Program (Project 4), the Phase II Cooling Water Intake 316(b) Program (Project 6), the Integrated Air Compliance Program associated with Anclote plant and combustion turbines, the Clean Air Mercury Rule, the Arsenic Groundwater Standard Program (Project 8), the Underground Storage Tank Program (Project 10), the Modular Cooling Tower Program (Project 11), and the Green House Gas Inventory and Reporting Program.

Q. What costs does the Company expect to incur in 2009 in connection with the Pipeline Integrity Management Program (Project 3)?

A. For 2009, we project that PEF will incur a total of $1,101,000 in operation and maintenance ("O&M") expenses and $60,000 in capital expenditures to comply with the Pipeline Integrity Management ("PIM") regulations (49 CFR Part 195).

PEF is projecting to spend $279,000 in O&M on PIM Program Implementation which includes general program management and oversight by PEF employees and contractors who assist with regulatory review, auditing and procedures management, document updates, High Consequence Area ("HCA") reviews, spill analyses, integrity assessment planning, pipeline mapping, data integration,

risk analyses, monitoring of program effectiveness, evaluation of preventive and mitigative measures to protect HCAs, and coordination of remedial actions to address integrity issues. An additional $732,000 in O&M will be required to run the internal inspection tools that detect, locate, and quantify corrosion and deformation anomalies along the pipeline; these inspections are required at intervals not to exceed five years and the baseline assessment was completed in 2004. The project will involve project planning and management, equipment specification, contract development, pipeline cleaning, a caliper tool run, placement of above ground markers for each tool run, a geometry tool run, an ultrasonic tool run, an inertial measurement unit run, interpretation of tool data, validation of results, rerunning any tools that do not provide complete and accurate results, third party review of results, completion of any emergency repairs, data integration, developing a reassessment interval, and planning long term repairs. PEF is projecting to spend $90,000 of O&M for risk reduction modifications to the pipeline.

PEF is projecting to spend $60,000 of capital in 2009 to complete the Supervisory Control and Data Acquisition ("SCADA") system replacement that began in 2007.

Q. What steps is the Company taking to ensure that the level of expenditures for the Pipeline Integrity Management Program is reasonable and prudent?

A. As additional work is identified to comply with the PIM regulations, PEF will identify qualified suppliers of the necessary services through a competitive bidding process where reasonable and appropriate.

Q. What costs do you expect to incur in 2009 in connection with the Aboveground Storage Tank Secondary Containment Program (Project 4)?

A. PEF is projecting to spend $1.337 million in capital expenditures in 2009. These costs are for the tank upgrade work at Higgins and Bartow which includes: cleaning the tank, performing required inspections, installing and testing new steel double bottom, preparing and coating new bottom and pipe modifications.

Q. What steps is the Company taking to ensure that the level of expenditures for the Aboveground Storage Tank Secondary Containment Program is reasonable and prudent?

A. As additional work is identified to comply with the Aboveground Storage Tank regulations, PEF will identify qualified suppliers of the necessary services through a competitive bidding process where reasonable and appropriate.

Q. What costs do you expect to incur in 2009 in connection with the Phase II Cooling Water Intake Program (Project 6)?

A. PEF is not anticipating any costs to be incurred in 2009.

Q. What costs do you expect to incur in 2009 in connection with the CAIR / CAMR Program (Project 7)?

A. As discussed in the testimony of PEF witness Michael Kennedy, PEF is moving forward with its Integrated Clean Air Compliance Plan to ensure that the Company can meet Clean Air Interstate Rule's ("CAIR's") imminent compliance deadlines in the event the U.S. Court of Appeals for the District of Columbia revisits its recent decision vacating CAIR. PEF witness Dale Wilterdink discusses the status of the Crystal River emission control components of the compliance plan. In addition, PEF will incur $67,700 in O&M expenditures for the new emission monitoring systems at the combustion turbine sites. PEF estimates that O&M costs for ongoing software vendor support of these new systems will be $43,700 in 2009 and $24,000 in air emissions testing costs in the event that emissions totals or maintenance activities require such testing.

Q. In your pre-filed testimony submitted on August 4, 2008, you stated that PEF is in negotiations with the provider of Continuous Mercury Monitoring System ("CMMS") equipment to avoid or minimize cost implications for equipment ordered prior to the vacatur of CAIR. What is the status of those negotiations?

A. The negotiations are still pending. Until these negotiations are finalized, PEF will not incur any further costs. As stated in Michael Kennedy's testimony, the Florida Department of Environmental Protection ("FDEP") is currently in the process of gathering data in an effort to adopt new rules establishing mercury

emission standards for various industrial sources, including coal-fired power plants. Due to the uncertainty around this program, PEF has assumed that payment will have to be made for the equipment at this time, but has not made any assumptions as to when it will be installed. To the extent actual costs are different than current projections, PEF will reflect this in future filings and these amounts will be subject to true-up.

Q. What costs do you expect to incur in 2009 in connection with the Arsenic Groundwater Standard Program (Project 8)?

A. PEF is currently working with FDEP to comply with the terms of the renewed industrial wastewater permit for the Crystal River Energy Complex (issued January 9, 2007) and the modified Conditions of Certification (issued November 29, 2007). Based upon discussions with the FDEP, PEF is projecting O&M expenditures of approximately $78,000. These costs are being deferred from 2008 because of delays in obtaining the renewed permit and will include groundwater study costs, results assessment, and possible remediation to address potential exceedances of the new standard.

Q. What steps is the Company taking to ensure that the level of expenditures for the Arsenic Groundwater Standard Program is reasonable and prudent?

A. As additional work is identified to comply with the new arsenic standard, PEF will identify qualified suppliers of the necessary services through a competitive bidding process where reasonable and appropriate.

Q. What costs do you expect to incur in 2009 in connection with the Underground Storage Tanks Program (Project 10)?

A. PEF is not anticipating any expenditures for this program during 2009.

Q. What costs do you expect to incur in 2009 in connection with the Modular Cooling Tower Program (Project 11)?

A. PEF is projecting to spend approximately $3.4 million in O&M expenditures in 2009 for rental fees associated with the five-year lease agreement that began in 2006. These costs are necessary to ensure compliance with the thermal discharge limit in the FDEP industrial wastewater permit for PEF's Crystal River plant while minimizing de-rates of PEF's Crystal River Units 1 and 2. *See* Order NO. PSC-07-0722-FOF-EI issued in Docket No. 060162-EI (Sep. 5, 2007). As discussed in the pre-filed testimony of PEF witness Daniel Roderick, PEF is implementing a new Thermal Discharge Compliance Project to provide a more permanent solution to the thermal discharge compliance issue.

Q. What costs do you expect to incur in 2009 in connection with the Green House Gas Inventory and Reporting Program?

A. PEF is projecting to spend approximately $56,680 in O&M in 2009. These costs are for annual Climate Registry fee as well as consulting fees and third-party verification of the inventory.

Q. What steps is the Company taking to ensure that the level of the expenditure for the Green House Gas Inventory and Reporting Program is reasonable and prudent?

A. In 2007 PEF issued a request for proposal to several consultants with expertise in this area. Bids were received and reviewed. A contract was established in November 2007 and the work through 2009 will be performed under this contract.

Q. Does this conclude your testimony?

A. Yes it does.

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

DIRECT TESTIMONY OF

DALE WILTERDINK

ON BEHALF OF

PROGRESS ENERGY FLORIDA

DOCKET NO. 080007-EI

AUGUST 4, 2008

Q. Please state your name and business address.

A. My name is Dale W. Wilterdink. My business address is 15760 West Power Line Street, Crystal River, Florida 34428.

Q. By whom are you employed and in what capacity?

A. I am employed by Progress Energy Florida ("PEF") as Manager of Plant Construction Projects.

Q. What are your responsibilities as Manager of Plant Construction Projects?

A. I serve as Project Manager for the Crystal River Units 4 and 5 air quality control system project ("Crystal River Project") included in PEF's Integrated Clean Air Compliance Plan, which the Commission approved in Docket No. 070007-EI. As Project Manager, I have primary overall responsibility and accountability for the Crystal River Project. I provide direct management of all aspects of the project, including the installation of Flue Gas Desulfurization ("FGD" or "scrubber"), Low

NOx Burners (LNBs), Selective Catalytic Reduction ("SCR") and other related activities, such as installation of a new stack, common limestone preparation/dewatering system, coal pile liners, ponding, and the water supply system. I also work with members of my project team to ensure that key stakeholders throughout the Company, including senior management, remain informed about the status of the Crystal River Project.

Q. Please describe your educational and background.

A. I received a B.S. degree in Chemistry and a Masters in Business Administration from Grand Valley State University. I have over twenty six years experience in the power industry, including direct project management for large, multi-unit air pollution control projects. Prior to joining Progress Energy, I worked air quality control system projects for URS Corporation, Advatech (a joint venture between URS and Mitsubishi Heavy Industries), Marsulex (formerly General Electric Environmental Services), and Grand Haven Board of Light and Power.

Q. Are you sponsoring any exhibits with your testimony?

A. Yes. I am sponsoring Exhibit No. __ (DW-1), which is an organization chart showing the organizational structure the Company has established for management and oversight of internal company personnel and contractors involved in the Crystal River Project.

Q. What is the purpose of your testimony?

A. The purpose of my testimony is to summarize the status of PEF's implementation of Crystal River Project, including Estimated/Actual project expenditures for 2008. I also will describe some of the measures PEF has taken to ensure that the costs incurred for the Crystal River Project are reasonable and prudent.

Q. What is the current status of the Crystal River Project?

A. The Crystal River Project is on schedule to meet the in-service dates set forth in the Integrated Clean Air Compliance Plan approved by the Commission in Docket No. 070007-EI. Over the past year, we have achieved several significant project milestones including:

- Completion of the access road in May, 2008;
- Completion of the vehicle barrier system in May, 2008;
- Completion of the flue gas chimney shell in June, 2008; and
- Completion of the Unit 5 FGD absorber tower in July, 2008.

As discussed in the annual review of PEF's compliance plan previously submitted in this docket, there are uncertainties associated with all major construction projects including the Crystal River Project. At this time, however, the Crystal River Project is on-schedule to achieve in-service dates set forth in PEF's Commission-approved Integrated Clean Air Compliance Plan.

Q. How do the Estimated/Actual project expenditures for the Crystal River Project compare with the original projections for the period January 2008 to December 2008?

A. We project that the total expenditures for the Crystal River Project in 2008 will be approximately $527 million, which is approximately $42 million less than projected in last year's docket. Of this difference, approximately $12 million is attributable to the fact that last year's projections were based on contract prices that were not finalized until PEF executed the Engineering Procurement and Construction (EPC) contract for the Project after the projects were submitted. The remaining variance is attributable to work on particulate controls for which PEF is no longer requesting ECRC recovery.

Q. What measures has the Company taken to minimize the risk of costs increases for the Crystal River Project?

A. Since the inception of the Crystal River Project, PEF has sought to minimize the risk of future cost increases to PEF and its customers and to allocate risk where it can be best managed. We implemented a contracting strategy that enabled PEF to negotiate contracts that mitigate the risk of price increases without jeopardizing construction time-frames necessary to ensure compliance with the applicable regulatory requirements. For the Engineering, Procurement and Construction (EPC) contract, which represents the majority of costs for the Crystal River Project, this strategy included an aggressive "open book" scoping assessment which enabled the Company to identify the costs for project components in detail to provide greater cost certainty. As part of the detail review process, Progress Energy personnel and outside engineers carefully reviewed the reasonableness of the scope and associated quantities of commodities, equipment, subcontracts, labor

and other project indirect components submitted by EPC contractor (Environmental Partners Crystal River or "EPCR"), as well as the prices quoted by EPCR.

We negotiated a portfolio of fixed price, lump sum contracts including the EPC contract, as well as contracts with the primary FGD and SCR design and procurement contractor (Babcock & Wilcox or "B&W"), and the vendors of major equipment such as scrubber towers (Stebbins Engineering and Manufacturing Company), flue gas chimney (Commonwealth Dynamics, Inc.), and SCR catalyst (CERAM Environmental, Inc.). These contracts, which PEF submitted for the Commission's review in last year's docket (Docket No. 070007-EI), also incorporate a payment milestone structure with associated liquidated damages to ensure timely performance. This contracting strategy has enabled PEF to mitigate cost and performance risks during a time period in which prices for material, equipment, and labor have increased substantially for major utility construction projects of this nature.

Q. Please describe the management structure being used to oversee implementation of the Crystal River Project?

A. PEF has established an organizational structure to ensure prudent decision-making and project oversight as implementation of the Integrated Clean Air Compliance Plan proceeds. The specific team for the Crystal River Project is as shown in Exhibit No.__(DW-1). The Company has assigned me to be the dedicated Project

Manager with primary overall responsibility and accountability for the Crystal River Project. I oversee all of the internal team members as well as all of the external contractors working on the project. My project management team, which also includes a dedicated Project Engineer and Project Controls personnel, regularly works with Company personnel from other departments, including Environmental Services, Corporate Services, Fossil Generation, Legal, Regulatory Planning, and Health and Services as needed. The Company also has appointed a designated Project Assurance Advisor to support and advise the project management team.

To promote efficient integration of the new equipment with current operations, the Company also has established a Plant Integration Team (PIT) that will be involved through the startup and commissioning process. The PIT was established early in the life of the Project to allow for plant operational input into the technical and functional requirements incorporated in the Project design, the operational design features, the anticipated operation of the new systems and the performance guarantees. During the construction phase, the PIT provides interface between me and plant operations and has the primary responsibility for developing operational maintenance procedures for the new equipment. The PIT also will participate in startup integration for commercial operation.

Q. Has the Company implemented policies and procedures to ensure proper management of the Crystal River Project and to control project costs?

A. Yes. The project is being implemented in accordance with the Generation and Transmission Construction Department's policies and procedures, which prescribe specific requirements for project management, quality assurance/quality control (QA/QC), schedule management, cost accounting and reporting, and other aspects of the project implementation. These policies and procedures reflect the collective experience and knowledge of the Company. They have been tested on other capital projects of this nature and reflect lessons learned from those projects. They also are consistent with best practices for capital project management in the industry.

Q. Are employees involved in the Crystal River Project trained in the Company's project management and cost control policies and procedures?

A. Yes, they are. The project management team for the Crystal River Project has been trained in these policies and procedures.

Q. Does the Company verify that the project management and cost control policies and procedures are followed?

A. Yes, it does. PEF uses internal audits to verify that its program management and oversight control are in place and being implemented.

Q. Has the Company implemented other mechanisms to ensure proper oversight and review of the Crystal River Project?

A. Yes. We have implemented several mechanisms to ensure proper oversight and review of the Crystal River Project. My project management team and I work closely with the Project Assurance Advisor to identify key project decisions and milestones to ensure that adequate documentation is prepared and maintained. Among other things, the project management team regularly prepares Project Cost Reports to track project expenditures against the detailed project scopes to ensure that PEF receives what it contracted for and that any scope changes are properly evaluated and documented.

We also conduct a wide variety of meetings to maintain supervision of the project and to ensure that Company management remains fully informed. We conduct regularly scheduled, monthly meetings with the EPC contractor (EPCR) and primary FGD and SCR design and procurement contractor (B&W) to review construction progress and the remaining scope of work. Following those meetings, we hold regular monthly meetings with executive management to review the status of the project and its costs, as well as the administration of the various contracts. Executives from EPCR and B&W participate in these meeting to ensure that management expectations are communicated to the outside vendors as well as the project team.

The Company also reviews the feasibility of the Crystal River Project with senior management through the Company's Integrated Project Plan ("IPP") process, which has been established for gaining management approval for expenditures of

significant funds. The original IPP for the Crystal River Project was prepared in October 2007 in conjunction with the execution of the final EPC contract. Among other things, the IPP outlined the scope of the project, project costs, the Company's risk management strategy, and the economic evaluation discussed in the Integrated Clean Air Compliance Plan submitted to and approved by the Commission in last year's docket.

Q. Have there been any recent developments concerning the Clean Air Interstate Rule (CAIR)?

A. Yes. As discussed in the pre-filed testimony of Patricia Q. West, the U.S. Circuit Court of Appeals for the District of Columbia recently issued a decision vacating CAIR. At this date, the decision is not final and it is too early to determine the full impact of the Court's decision. PEF is continuing to implement its Commission-approved Integrated Clean Air Compliance Plan as the Company assesses the potential implications of the Court's decision. As Ms. West indicated, we will update the Commission on the status of the CAIR decision and PEF's implementation of its clean air compliance plan in future testimony.

Q. Does this conclude your testimony?

A. Yes, it does.

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

DIRECT TESTIMONY OF

DALE WILTERDINK

ON BEHALF OF

PROGRESS ENERGY FLORIDA

DOCKET NO. 080007-EI

AUGUST 29, 2008

Q. Please state your name and business address.

A. My name is Dale W. Wilterdink. My business address is 15760 West Power Line Street, Crystal River, Florida, 34428.

Q. By whom are you employed and in what capacity?

A. I am employed by Progress Energy Florida ("PEF") as Manager of Plant Construction Projects.

Q. Have you previously submitted testimony in this proceeding?

A. Yes. I previously submitted pre-filed direct testimony in this proceeding on August 4, 2008.

Q. Have your responsibilities changed since you previously submitted testimony in this proceeding?

A. No. They have not.

Q. What is the purpose of your testimony?

A. The purpose of my testimony is to update the Commission on the Crystal River Units 4 and 5 air quality control system project ("Crystal River Project") included in PEF's Integrated Clean Air Compliance Plan. I also will present PEF's current estimates of the costs that will be incurred in the 2009 for the Crystal River Project.

Q. Have PEF's plans for the Crystal River Project changed in light of the recent federal court decision vacating the Clean Air Interstate Rule (CAIR)?

A. Not at this time. As discussed in the pre-filed testimony of PEF witness Michael Kennedy, the decision vacating CAIR is not final because U.S. Circuit Court of Appeals for the District of Columbia ("D.C. Circuit") has not yet issued a mandate. Until that happens, CAIR is still in effect. For that reason, we are continuing forward with the Crystal River Project to ensure that PEF can meet CAIR's compliance deadlines in the event the Court revisits its vacatur. In addition, as further discussed in Mr. Kennedy's testimony, PEF is continuing to work with the Florida Department of Environmental Protection ("FDEP") in developing an overall plan to ensure compliance with other existing and foreseeable environmental requirements assuming the vacatur of CAIR becomes final.

Q. How far along is PEF in implementing the Crystal River Project?

A. The Crystal River Project remains on schedule to meet the in-service dates set forth in the Integrated Clean Air Compliance Plan approved by the Commission in

2007. Through August 2008, we have incurred or have committed to incur capital costs of approximately $838.8 million on the Project. This represents approximately 66.7 percent of the total projected costs of the Project, as presented in the Integrated Clean Air Compliance Plan approved by the Commission in Docket No. 070007-EI.

Q. What project milestones to you expect to achieve in 2009?

A. We currently expect to achieve several significant project milestones in 2009. In [redacted], we expect to place the Crystal River Unit 5 low NOx burners ("LNB") and selective catalytic ("SCR") system and the urea to ammonia hydrolyzer into service. Additionally, in [redacted], we expect to place the Unit 5 SCR and Flue Gas Desulfurization ("FGD" or "scrubber") system and chimney into service. In her pre-filed testimony, Ms. Cross explains the impact of placing these controls and associated equipment in-service on PEF's ECRC factors.

Q. What are PEF's projected 2009 expenditures for the Crystal River Project (Project 7.4)?

A. As shown in Form 42-4P in Exhibit No. __ (LC-3) to the testimony of Lori Cross, PEF currently is projecting to spend approximately $215.9 million in capital expenditures on the Crystal River Project in 2009. In addition to the finalization of the Unit 5 LNB/SCR and FGD projects, the scope of work for 2009 includes continued work on the Unit 4 FGD system, as well as associated equipment, such as limestone handling, dewatering, gypsum removal, coal pond liners, settling

ponds, make-up water system, storage tanks, piping, and electrical and control system.

Q. What measures is PEF implementing to ensure that the level of expenditures for the Crystal River Project is reasonable and prudent?

A. PEF will continue to implement the measures discussed in my prior testimony to ensure that costs incurred are reasonable and prudent. Among other things, we will continue to regularly track project expenditures against the detailed project scopes to ensure that PEF receives what it contracted for and that any scope changes are properly evaluated and documented. We also will continue to conduct regularly scheduled meetings with the primary contractors and senior management to maintain supervision of the project, to ensure that management remains fully informed, and to ensure that management expectations are communicated to the outside vendors and the project team.

Q. Does this conclude your testimony?

A. Yes, it does.

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

DIRECT TESTIMONY OF

J. MICHAEL KENNEDY

ON BEHALF OF

PROGRESS ENERGY FLORIDA

DOCKET NO. 080007-EI

AUGUST 29, 2008

Q. Please state your name and business address.

A. My name is J. Michael Kennedy. My business address is Post Office Box 14042, St. Petersburg, Florida 33733.

Q. By whom are you employed and in what capacity?

A. I am employed by Progress Energy Service Company, LLC, as a Principal Environmental Specialist.

Q. What are your job responsibilities?

A. I am responsible for analyzing and assessing emerging environmental regulatory and legislative issues for Progress Energy Florida ("PEF" or the "Company") and Progress Energy Carolinas. Prior to assuming my current position in August, 2005, I managed the environmental permitting and compliance activities in support of Florida Power Corporation's and then PEF's generating fleet. This included air construction permitting and "Title V" air operational permitting issues.

Q. Please summarize your educational background and professional experience.

A. I earned a B.S. degree in meteorology from Purdue University in 1978. Since obtaining my degree, I have had over 30 years experience in the air regulatory field. Before coming to work at Florida Power Corporation (now PEF), from January 1990 to June 1992, I was Senior Environmental Scientist at Indianapolis Power & Light Company, where my responsibilities included support of generating plants in the area of are permitting and compliance. From August 1986 to December 1989, I was the Permitting and Planning Manager for the Indianapolis Air Pollution Control Division. I managed the areas of air operating and construction permits, air quality modeling and planning, and regulatory development for Indianapolis/Marion County, Indiana. From June 1978 until July 1986, I worked as an Air Quality Planner for the Indianapolis Air Pollution Control Division. During that time, I helped develop the State Implementation Plan for compliance with the Clean Air Act Amendments of 1977.

Q. What is the purpose of your testimony?

A. The purpose of my testimony is to provide a brief summary of the recent federal appellate court decision concerning the federal Clean Air Interstate Rule ("CAIR"). I also will summarize other existing and foreseeable air regulatory requirements that have or could have a bearing on PEF's Commission-approved Integrated Clean Air Compliance Plan.

Q. Were you involved in the development of PEF's Integrated Clean Air Compliance Plan?

A. Yes. I became involved in the development of PEF's compliance strategy even before CAIR was adopted in final form. I reviewed the draft, proposed, and final regulations to help the Company determine how many allowances it would be allocated so that the cost-effective control strategies could be developed. I also analyzed the Clean Air Mercury Rule ("CAMR") and the Clean Air Visibility Rule ("CAVR") as part of PEF's development of its integrated plan to achieve compliance with those rules as well as CAIR. In 2006 and 2007, I assisted in the preparation of the Integrated Clean Air Compliance Plan reports that PEF submitted to the Commission in Dockets 060007-EI and 070007-EI. Among other things, I prepared the discussion of CAIR and related air regulatory requirements, including CAMR, CAVR and Prevention of Significant Deterioration ("PSD") pre-construction permitting.

Q. Please summarize the recent decision concerning CAIR issued by the U.S. Circuit Court of Appeals for the District of Columbia ("D.C Circuit").

A. By way of background, the U.S. Environmental Protection Agency ("EPA") originally adopted CAIR to require 28 states and the District of Columbia to substantially reduce sulfur dioxide ("SO_2") and nitrogen oxides ("NOx") emissions from power plants to prevent them from contributing to nonattainment of national ambient air quality standards in downwind states. Among other things, CAIR established a new "cap-and trade" program designed to achieve a 73 percent

reduction in SO_2 emissions and a 61 percent reduction in NOx emissions when fully implemented. In accordance with the federal rule, FDEP adopted its own rule to implement the CAIR cap-and-trade program and submitted the rule to EPA for approval as an amendment to Florida's State Implementation Plan ("SIP") under the federal Clean Air Act.

On July 11, 2008, the D.C. Circuit issued its decision in response to challenges to CAIR brought by several parties. *See, North Carolina v. EPA*, ___ F.3d ___, 2008 WL 2698180 (D.C. Cir. July 11, 2008). The D.C. Circuit's opinion addressed numerous issues, but the court's key point was that that each state must eliminate its significant contribution to non-attainment in another state. Based on that premise, the court invalidated the CAIR cap-and-trade program because, the court concluded, EPA had failed to demonstrate that they would avoid "significant contribution" to nonattainment of air quality in downwind states or otherwise avoid "interference with maintenance" of the standards. The court also found other flaws in the rule and, therefore, vacated the entire rule and remanded it back to EPA. The court did, however, uphold EPA's inclusion of the state of Florida within the scope of the CAIR. Thus, Florida likely will be included in any rule developed by EPA in response to the D.C. Circuit's decision.

Q. What is the current status of CAIR in light of the D.C. Circuit's decision?

A. The D.C. Circuit's vacatur of CAIR is not final because the court has not yet issued a mandate. The Petitioners and EPA originally had 45 days, or until August

25, 2008, to petition for rehearing of the decision. However, EPA requested and the D.C. Circuit has granted an extension of that deadline through September 24, 2008. Assuming one or more of the parties petitions for rehearing, the court will issue its mandate upon completion of any proceedings on the petition(s). The Petitioners and EPA also can seek review by the U.S. Supreme Court within 90 days after the later of the D.C. Circuit's decision or completion of proceedings on a petition for rehearing.

Q. What air regulatory requirements other than CAIR have a bearing on PEF's implementation of its Integrated Clean Air Compliance Program?

A. Notwithstanding the vacatur of CAIR, PEF must comply with the regulatory requirements established in CAVR. As implemented in FDEP's rules, CAVR has two primary components. First, certain industrial facilities that began operating between August 1962 and August 1977, including PEF's Crystal River Units 1 and 2 and Anclote Units 1 and 2, are required to install Best Available Retrofit Technology ("BART") no later than December 31, 2013, unless exempt based on the level of modeled visibility impairment. Second, if DEP determines implementation of BART has not achieved reasonable progress toward improving visibility in "Class I" areas, it may require emission units constructed before 1999 to install Reasonable Progress Control Technology ("RPCT") by December 31, 2017. This RPCT requirement could apply to Crystal River Units 4 and 5, as well as PEF's "BART-eligible" units. BART requirements potentially apply for NOx, SO_2 and particulate matter; whereas RPCT applies for SO_2.

Q. Could the vacatur of CAIR impact the CAVR component of PEF's Integrated Clean Air Compliance Plan?

A. Yes, it could. Under the current FDEP Rule 62-296.340(3)(a)2.b., Florida Administrative Code, BART-eligible sources that are subject to CAIR are not required to install BART for SO_2 or NOx. Based on this provision, PEF does not plan to install SO_2 or NOx controls on Crystal River Units 1 and 2 as part of its Integrated Clean Air Compliance Plan. Instead, PEF's plan focuses on Crystal River Units 4 and 5 because, as PEF's largest and newest coal-fired units, they provided the most cost-effective means of reducing SO_2 and NOx emissions.

If the vacatur of CAIR stands, the "CAIR satisfies BART" provision in FDEP's rule will no longer apply. For that reason, it is conceivable that Crystal River Units 1 and 2 could be subject to BART for SO_2 or NOx. For coal-fired units such as Crystal River Units 1 and 2, the rules include presumptive BART limits based on use of FGD for SO_2 and use of SCR for NOx. However, assuming the vacatur of CAIR stands, PEF believes that it would make more sense to go forward with the Crystal River Unit 4 and 5 SCR and FGD projects, rather than installing controls on Units 1 and 2. Our analyses indicate that this strategy of "grouping" Units 1 and 2 with Units 4 and 5 would provide at least as much, if not more, visibility benefits than installing controls on Units 1 and 2.

Q. What is the status of PEF's CAVR permitting efforts for the Crystal River units?

A. PEF submitted a BART permit application for Crystal River Units 1 and 2 in January 2007. In light of the CAIR vacatur, we are preparing a revised permit application to implement the "grouping" strategy I previously mentioned to take advantage of the near-complete Crystal River 4 and 5 controls. In preliminary discussions, FDEP officials have indicated that this strategy would be an acceptable means of complying with the BART and related requirements of DEP's rules. The FDEP officials also indicated that a final permit will likely be issued by the end of this year.

Q. Would the vacatur of CAIR impact PEF's plans for Anclote Units 1 and 2?

A. Anclote Units 1 and 2 also would potentially be subject to BART for SO_2 and NOx if the CAIR vacatur stands. The presumptive BART limits for these oil-fired units are based on the firing of one percent sulfur oil for SO_2 and installation of low NOx burners ("LNBs") for NOx. However, installation of LNBs would increase particulate matter ("PM") emissions such that additional PM controls could be required. For that reason, our revised permitting strategy will propose an alternative NOx control strategy that would not require additional PM controls.

Q. Are there any other, foreseeable air quality regulations or regulatory initiatives that could impact PEF's generating units in the future?

A. Yes. There are at least three foreseeable regulatory initiatives that could impact PEF's generating units in the relatively near future.

First, in March 2008, EPA adopted a new, more stringent national ambient air quality standard for ozone. *See* 73 Federal Register 16435 (March 12, 2008). Current monitoring data suggest that several areas in Florida, including Tampa Bay, Orlando and Jacksonville, may be designated "nonattainment" under the new standard. In accordance with EPA's rules, FDEP must submit its recommendation of nonattainment areas to EPA by March 2009. EPA then has one year, by March 2010, to issue final nonattainment areas designations. FDEP then has up to three years, by March 2013, to submit a SIP revision to the EPA showing how it would bring these areas into compliance. In developing the SIP revision, FDEP will evaluate the adequacy of currents regulations and programs, and determine if any new regulations or programs are necessary. Because NOx is an ozone precursor, FDEP could require installation and operation of NOx emission controls to ensure attainment of the new standard.

Second, as Ms. West noted in her pre-filed testimony and Exhibit No. __ (PQW-1) submitted on April 1, 2008, the D.C. Circuit recently vacated the federal CAMR regulation in *New Jersey v. EPA,* 517 F.3d 574 (D.C. Cir. 2008). As a result of the D.C. Circuit's decision, EPA may promulgate new Maximum Achievable Control Technology ("MACT") requirements for power plants. Although the EPA has not released a schedule for such rulemaking, FDEP has stated that it independently intends to adopt new rules establishing mercury emission standards for various industrial sources, including coal-fired power plants. FDEP is currently in the process of gathering data to support the rulemaking effort and FDEP officials have

stated that they intend to propose a rule for final adoption in the spring of 2009. As explained in the Integrated Clean Air Compliance Plan reports that PEF previously submitted to the Commission, the synergistic effect of SCR and FGD control systems results in substantial reductions in mercury emissions. Thus, depending on the final rules adopted by FDEP or EPA, the Crystal River 4 and 5 SCR and FGD systems could be a key component of PEF's mercury compliance strategy.

Finally, if the D.C. Circuit's vacatur of CAIR stands, EPA or the U.S. Congress will likely establish new rules or legislation to prevent upwind SO_2 and NOx emissions from contributing to nonattainment of air quality standards in down-wind states. Given the uncertainty surrounding CAIR, however, the timing of any such rules or legislation cannot be predicted at this time.

Q. What is the status of PEF's Integrated Clean Air Compliance Plan in light of the D.C. Circuit's CAIR decision?

A. Because the D.C. Circuit's decision vacating CAIR is not final, PEF is continuing forward with installation of the emission control components of its Integrated Clean Air Compliance Plan to ensure that the Company can meet CAIR's imminent compliance deadlines in the event the D.C. Circuit revisits the vacatur. Given our state of knowledge at this time, we believe this is a reasonable and prudent course of action. As I discussed previously, PEF also is continuing to work with FDEP in developing a cost-effective plan to meet CAVR and other

existing and foreseeable air regulatory requirements by taking advantage of the near-complete Crystal River 4 and 5 controls, rather than installing expensive controls on Units 1 and 2 or other PEF generating units, and implementing alternative NOx controls for Anclote Units 1 and 2. If this strategy is not approved, PEF will need to re-evaluate its current plans, assuming the D.C. Circuit's vacatur becomes final.

Q. Does this conclude your testimony?

A. Yes, it does.

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

DIRECT TESTIMONY OF

JOSEPH MCCALISTER

ON BEHALF OF

PROGRESS ENERGY FLORIDA

DOCKET NO. 080007-EI

AUGUST 4, 2008

Q. Please state your name and business address.

A. My name is Joseph McCallister. My business address is 410 South Wilmington Street, Raleigh, North Carolina 27601.

Q. By whom are you employed and in what capacity?

A. I am employed by Progress Energy Carolinas (PEC) in the capacity of Director, Gas & Oil Trading.

Q. What are your responsibilities in that position?

A. I am responsible for the procurement of natural gas, fuel oil and emission allowances on behalf of PEC and Progress Energy Florida (PEF).

Q. Have you previously provided testimony before this Commission in connection with PEF's Environmental Cost Recovery Clause?

A. Yes. In last year's docket (No. 070007-EI), I presented testimony outlining PEF's overall approach to procuring emission allowances as part of its

Integrated Clean Air Compliance Plan and preparation for the compliance requirements of the Clean Air Interstate Rule (CAIR).

Q. What is the purpose of your testimony?

A. The purpose of my testimony is to summarize PEF's actions to date related to its emission allowance procurement strategy as part of its Integrated Clean Air Compliance Strategy in preparation for the requirements under the CAIR.

Q. How does PEF determine how many emission allowances it needs to purchase?

A. As part of the fuel and generation forecasts, emission projections are generated. The forecasts are generated periodically and are based on input assumptions such as generation availability and capacity, planned generation outage schedules, purchased power contracts, fuel and emission price forecasts, planned environmental equipment installations and load projections. To determine if the Company needs to purchase emission allowances for compliance requirements in the current or in future time periods, PEF compares the forecasts of the emissions that will be generated to the number of emission allowances that PEF owns through allocations, purchases and accumulated inventory. In aggregate, the tons of emissions that PEF expected to generate based on the forecasts is greater than the number of allowances that PEF owns for the respective periods. As such, PEF projected the need to purchase allowances from the market in order to comply with the regulations.

Q. How did CAIR impact PEF's procurement activities for emission allowances?

A. The CAIR established an updated cap-and-trade system for sulfur dioxide (SO_2) and nitrogen oxides (NOx) and covered 28 eastern states and the District of Columbia. CAIR established modified SO_2 annual compliance requirements under Title IV of the Clean Air Act by requiring two (2.0) SO_2 allowances to be submitted per ton of SO_2 emissions beginning with 2010 annual compliance filings and 2.86 SO_2 allowances to be submitted per ton of SO_2 emissions starting with 2015 annual compliance filings. In addition, CAIR established new seasonal and annual emission compliance requirements for NOx. Beginning in 2009, CAIR required affected sources to complete a seasonal NOx emission allowance compliance submittal for the May 1 through September 30 time period and an annual NOx emission allowance compliance submittal for the January 1 through December 31 time period each year.

Q. What strategy has PEF pursued for procuring emission allowances to ensure compliance with CAIR?

A. PEF's overall procurement strategy for meeting emission allowance requirements is to buy allowances over time based on forecasted needs to comply with existing and future compliance requirements. PEF believes a procurement strategy of buying emission allowances over time is a reasonable and prudent approach to ensure compliance requirements are met and reduce price risk and volatility for customers. With the adoption of CAIR, this procurement approach was particularly prudent given PEF's forecasted needs,

market liquidity and the market price volatility associated with the new annual NOx allowances.

As part of its Integrated Clean Air Compliance Plan, PEF forecasted the need to purchase both seasonal and annual NOx emission allowances in order to comply with CAIR beginning with 2009 operations. For that reason, and consistent with its strategy, PEF has been purchasing seasonal and annual NOx allowances over time to gradually increase inventories to the levels necessary to achieve compliance. As of June 30, 2008 PEF had approximately $59.2 million in annual NOx emission allowance purchases in inventory, approximately $6.3 million in seasonal NOx emission allowance purchases in inventory and approximately $18 million in SO_2 emission allowance inventory.

Q. How do the Estimated/Actual purchases of emission allowances for the period January 2008 through December 2008 compare with PEF's original projections?

A. The revenue requirements on the inventory of SO_2 and NOx emission allowances are estimated to be $4,454,498 or 86% higher than originally projected. At the time of the last year's projection filing, prices for NOx allowances were highly volatile and unpredictable because the market for these allowances was for a new compliance obligation, trading was just beginning, and the allowance allocations to the applicable states and company accounts had not been made. As a result, there was a high degree of uncertainty related to the exact timing of NOx allowance purchases in the future. PEF applied an

approach for NOx allowance purchases, whereby inventory and rates included only purchases that had already been agreed to at the time of filing. NOx allowance purchases were projected in inventory balances only if there was an executed contract with a transaction that was expected to settle during the year. Subsequent to the filing, market activity increased and the EPA began making allocations of emission allowances. As PEF forecasted significant needs for annual NOx allowances and consistent with its strategy, PEF began making additional purchases of annual NOx allowances. As such, the variance is primarily attributable to the subsequent NOx allowances purchases that did not have executed contracts at the time of the previous projection filing.

Q. How does the average price that PEF paid for NOx allowances compare to market indicators?

A. The average price PEF paid for vintage 2009 NOx allowances that are included in inventory was approximately [redacted], which was lower than market indications at the time of my testimony last year, as well as recent market prices as of July 10, 2008. As I testified last year, as of July 27, 2007, vintage 2009 NOx emission allowances were being bid around $5,200/ton (what buyers were willing to pay) and offered at $6,200/ton (the price sellers wished to receive). At that same time, actual, observed published market trades ranged between $4,750/ton and $5,100/ton. As of June 30, 2008, vintage 2009 NOx allowances were trading at approximately $5,000/ton.

Q. Have there been any recent developments concerning CAIR?

A. Yes. As discussed in the pre-filed testimony of Patricia Q. West, the U.S. Circuit Court of Appeals for the District of Columbia recently issued a decision vacating CAIR. Although the decision is not final, PEF has stopped purchasing CAIR emission allowances in light of the market uncertainty created by the Court's decision.

Q. Does this conclude your testimony?

A. Yes it does.

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

DIRECT TESTIMONY OF

DANIEL L. RODERICK

ON BEHALF OF

PROGRESS ENERGY FLORIDA

DOCKET NO. 080007-EI

AUGUST 29, 2008

Q. Please state your name and business address.

A. My name is Daniel L. Roderick. My business address is Crystal River Energy Complex, Site Administration 2C, 15760 West Power Line Street, Crystal River, Florida 34428.

Q. By whom are you employed and in what capacity?

A. I am employed by Progress Energy Florida ("PEF" or the "Company") in the capacity of Vice President – Nuclear Projects & Construction. As Vice President – Nuclear Projects & Construction, I am responsible for the management and oversight of all large, capital nuclear projects for the Company. These include the Crystal River Unit 3 ("CR3") power uprate project, the CR3 steam generator replacement project scheduled for 2009, and the development, siting, engineering, and construction of two new nuclear generating facilities at the Company's Levy County site. Prior to assuming my current position, I served as the CR3 Director of Site Operations. In that capacity, I was responsible for the safe, efficient, and

reliable generation of electricity from the Company's CR3 nuclear plant. All plant functions, including the Plant General Manager, Engineering Manager, Training Manager, and Licensing, reported to me and were under my supervision.

Q. Please summarize your educational background and work experience.

A. I have a Bachelor of Science and Master of Science degree in Industrial Engineering from the University of Arkansas and have completed the Nuclear Regulatory Commission (NRC) program for a Senior Reactor Operator License. I have been at CR3 since 1996, serving in my current position as Vice President Nuclear Projects and Construction and, prior to that position, Director of Site Operations, Plant General Manager, Engineering Manager, and Outage Manager, respectively. Prior to my employment with the Company, I was employed for twelve years with Entergy Corporation at its Arkansas Nuclear One plant in Russellville, Arkansas with responsibilities in Plant Operations and Engineering.

Q. What is the purpose of your testimony?

A. The purpose of my testimony is to support PEF's request to recover, through the Environmental Cost Recovery Clause ("ECRC"), prudently incurred costs for its Crystal River Units 1 and 2 ("CR1&2") Thermal Discharge Compliance Project. The permanent solution associated with the CR1&2 thermal discharge limit is being undertaken in coordination with the CR3 Uprate project POD impacts as it makes more sense to consider the project as a whole from an engineering

perspective. I am responsible for the successful management of the Uprate project and, as such, this project falls under my umbrella of responsibility as well.

Q. Please describe PEF's CR1&2 Thermal Discharge Compliance Project.

A. In Docket No. 060162-EI, the Commission approved recovery of costs associated with installation and operation of leased Modular Cooling Towers to maintain compliance with the thermal discharge limit in the Florida Department of Environmental Protection ("FDEP") industrial wastewater discharge permit for Crystal River Units 1&2. See Order No. PSC-07-0722-FOF-EI (Sep. 5, 2007). Consistent with PEF's petition and the final order in Docket No. 060162, PEF has continued to evaluate the long term nature and extent of the issue associated with increased inlet water temperatures that triggered the need for additional cooling capacity to maintain compliance with the FDEP permit while minimizing derates of CR1&2.

Based on the on-going avoided derates experienced in 2006 (approximately 62,360 MWhs) and 2007 (approximately 180,500 MWhs), PEF believes the thermal discharge problem is a long-term issue that must be addressed. With this in mind, PEF asked Sargent & Lundy to study the issue and make a recommendation for what the optimal solution is for both the on-going environmental issue as well as the additional cooling that will be required as part of the CR3 Uprate project. The Project's study phase recommendation is to install a 12 cell circular cooling tower and expand the number of Helper Cooling

Tower ("HCT") cells. PEF is continuing to refine the exact final permanent solution based on on-going engineering analysis. The 2009 projection of costs are based on the most up-to-date estimate available at this time consistent with Sargent & Lundy's estimates.

Q. Please explain the basis for the Company's decision to install the new cooling capacity rather than continue with the Modular Cooling Towers.

A. The Sargent & Lundy Phase 1 report looked at what was more cost effective, continued operation of the Modular Cooling Towers, or some other more permanent kind of cooling solution. Based on the results of the Sargent & Lundy Phase 1 study based on the facts and circumstances known at the time of the Study it appears a permanent cooling solution makes more sense from both a technical and financial perspective. PEF is continuing to look at what the best solution is taking all variables into account.

Q. What activities does PEF anticipate undertaking for the CR1&2 Thermal Discharge Compliance Program in 2009?

A. The activities to be conducted in 2009 primarily include engineering, design and procurement of equipment (e.g., lift pumps, fabricated steel, dual flow screens, cooling towers, piping, valves, switchgear and storage facility). PEF also expects to incur project and construction management costs. This work will be done in conjunction with the installation of additional cooling capacity needed to

accommodate the CR3 uprate project. However, PEF only seeks ECRC recovery of the costs attributable to replacement of the Modular Cooling Towers.

Q. What environmental laws or regulations require implementation of the CR1&2 Thermal Discharge Compliance Project?

A. As recognized in Order No. PSC-07-0722-FOF-EI issued in Docket No. 060162-EI, the additional cooling capacity is required to maintain compliance with the thermal discharge limit in the CR1&2 industrial wastewater discharge permit whose effect was triggered by the unanticipated high inlet water temperatures, which were not fully analyzed until after PEF's last ratemaking proceeding in Docket No. 050078-EI.

Q. Has the Company projected the costs that it will incur for the CR1&2 Thermal Discharge Compliance Project?

A. Yes. PEF's preliminary cost estimates for the entire cooling project in 2009 is approximately $20 million. Of this $20 million, PEF preliminarily estimates approximately 58% ($11.6 million) is attributable to replacement of the leased Modular Cooling Towers. The remainder of the 2009 project costs will be attributable to the CR3 uprate project. The total cost of the project inclusive of costs attributable to the CR3 uprate project is approximately $103 million. PEF's preliminary estimate of the total cost associated with the long term solution to the CR1&2 thermal discharge compliance issue is approximately $60 million.

Q. What measures will PEF be implementing to ensure that costs incurred for the CR1&2 Thermal Discharge Compliance Project are reasonable and prudent?

A. The majority of the 2009 work will be contracted using the PEF competitive bid process. The competitive bid process obtains proposals from several potential contractors. The proposals are then evaluated and awarded based on technical merit and cost effectiveness.

Q. Does this conclude your testimony?

A. Yes, it does.

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

DIRECT TESTIMONY OF

LORI CROSS

ON BEHALF OF

PROGRESS ENERGY FLORIDA

DOCKET NO. 080007-EI

AUGUST 4, 2008

Q. Please state your name and business address.

A. My name is Lori Cross. My business address is 299 First Avenue North, St. Petersburg, FL 33701.

Q. By whom are you employed and in what capacity?

A. I am employed by Progress Energy Service Company, LLC, as Manager of Regulatory Planning Florida.

Q. What are your responsibilities in that position?

A. I am responsible for regulatory planning, cost recovery and pricing functions for Progress Energy Florida, Inc. ("PEF"). These responsibilities include: cost of service analysis; regulatory financial reports; rate and tariff development and administration; analysis of state, federal and local regulations and their impact on PEF; planning, coordination and execution of general rate case proceedings as necessary. In this capacity, I am also responsible for the Environmental Cost

Recovery Clause (ECRC) Actual/Estimated filing, made as part of Docket No. 080007-EI.

Q. Please describe your educational background and professional experience.

A. I received a Bachelors of Science degree in Accounting from the University of South Florida. I began my employment with PEF (previously Florida Power Corporation) in 1983. During my 25 years with Florida Power Corporation and now Progress Energy Service Co. LLC., I have held a number of financial and accounting positions. In 2004, I became Manager, Regulatory Services for PEF.

Q. What is the purpose of your testimony?

A. The purpose of my testimony is to present, for Commission review and approval, Progress Energy Florida's Estimated/Actual True-up costs associated with Environmental Compliance activities for the period January 2008 through December 2008.

Q. Have you prepared or caused to be prepared under your direction, supervision or control any exhibits in this proceeding?

A. Yes. I am sponsoring the following exhibits:

1. Exhibit No. __ (LC-1), which consists of PSC Forms 42-1E through 42-8E, pages1 through 13; and
2. Exhibit No. __ (LC-2), which provides details of four capital projects by site.

These forms provide a summary and detail of the Estimated/Actual True-up O&M and Capital Environmental costs and revenue requirements for the period January 2008 through December 2008.

Q. What is the Estimated/Actual True-up amount for which PEF is requesting recovery for the period of January 2008 through December 2008?

A. The Estimated/Actual True-up amount for 2008 is an under-recovery, including interest, of $9,872,429 as shown in Exhibit No. __ (LC-1), Form 42-1E, Line 4. This amount will be added to the final true-up over-recovery of $5,562,717 for 2007 shown on Form 42-2E, Line 7-a., resulting in a net under-recovery of $4,309,712 as shown on Form 42-2E, Line 11. The detailed calculations supporting the estimated true-up for 2008 are contained in Forms 42-1E through 42-8E.

Q. Are any of the costs listed in Forms 42-1E through 42-8E attributable to Environmental Compliance projects that have not previously been approved by the Commission?

A. No, with the exception of the Greenhouse Gas Inventory and Reporting project, which is discussed and supported in the testimony of Ms. Patricia Q. West.

Q. How do the Estimated/Actual O&M expenditures for January 2008 through December 2008 compare with original projections?

A. Form 42-4E shows that total O&M project costs are projected to be $1,699,095 or 4% higher than originally projected. Following are variance explanations for

those O&M projects with significant variances. Individual project variances are provided on Form 42-4E.

O&M Project Variances:

1. **Transmission and Distribution Substation Environmental Investigation, Remediation, and Pollution Prevention (Project #1) - O&M**

   Project revenue requirements are estimated to be $2,736,930 or 125% higher than previously projected. As discussed in the testimony of Donald R. Ennis, this variance is primarily attributable to an increase in the amount of subsurface contamination encountered during remediation of substations that was not evident during the original visual environmental inspections.

2. **Distribution System Environmental Investigation, Remediation, and Pollution Prevention (Project #2) - O&M**

   Project revenue requirements are estimated to be $427,507 or 3% higher than previously projected. As discussed in Mr. Ennis' testimony, this variance is primarily attributable to higher unit costs and the carryover of work from the 2007 work plan.

3. **Pipeline Integrity Management Program (Project #3) – O&M**

   Project revenue requirements are estimated to be $146,057 or 43% higher than previously projected. This variance is primarily attributable to work that was not completed from the 2007 workplan being carried over into 2008. This project is further discussed in Ms. West's testimony.

4. Above Ground Storage Tank Containment (Project #4.x) – O&M

Project revenue requirements are $368,303 higher than projected. This variance is primarily attributable to the rework performed at Turner Tank 8. This project is further discussed in Ms. West's testimony.

5. Emissions Allowances (Project #5) – O&M

Expenses for sulfur dioxide (SO_2) emission allowances are estimated to be $1,649,557 or 10% lower than originally projected. This variance is primarily being driven by lower projected tons of emissions. The decrease in tons is attributable to lower SO_2 content in fuel, as well as lower energy requirements than projected.

6. Phase II Cooling Water Intake (Project #6) – O&M

Project revenue requirements are estimated to be $38,128 or 26% lower than originally forecasted. This variance is primarily attributable to lower study and reporting costs. This project is further discussed in Ms. West's testimony.

7. CAIR/CAMR (Project #7.2) – O&M

Project revenue requirements are estimated to be $48,500 or 100% lower than originally projected due to software support costs not being incurred during 2008. This project is further discussed in Ms. West's testimony.

8. Arsenic Groundwater Standard (Project #8) – O&M

Project revenue requirements are estimated to be $77,669 or 100% lower than originally forecasted. This variance is due to the work being postponed until finalization of a compliance plan and schedule with FDEP. This project is further discussed in Ms. West's testimony.

9. Sea Turtle – Coastal Street Lighting (Project #9) – O&M

Project revenue requirements are estimated to be $173,289 or 62% lower than originally forecasted. This variance is primarily attributable to lower than anticipated costs of a lighting study to be conducted jointly with the University of Florida. This project is further discussed in Mr. Ennis' testimony.

10. Greenhouse Gas Inventory and Reporting (Project #12) – O&M

Project revenue requirements are estimated to be $7,440. These costs consist of fees paid to an outside consultant to develop an emissions quantification template in order to facilitate reporting to the Climate Registry.

Q. How do the Estimated/Actual Capital recoverable expenditures for January 2008 through December 2008 compare with PEF's original projections?

A. Total recoverable capital investments itemized on Form 42-6E, are projected to be $6,070,323 or 84% higher than originally projected. Below are variance explanations for those approved Capital Investment Projects with significant variances. Individual project variances are provided on Form 42-6E. Return on

Capital Investment, Depreciation and Taxes for each project for the Estimated/Actual period are provided on Form 42-8E, pages 1 through 13.

Capital Investment Project Variances:

1. **Pipeline Integrity Management Program (Project #3.1) – Capital**

   Project revenue requirements are $65,608 or 14% higher than projected primarily due to the correction of the depreciation rate in May, resulting in an increase in jurisdictionalized depreciation expense of $63,462. This project is further discussed in Ms. West's testimony.

2. **Above Ground Storage Tank Containment (Project #4.x) – Capital**

   Project revenue requirements are $111,421 or 12% lower than projected due to the rework performed at Turner Tank 8. As a result of this rework, PEF has written-off approximately $368,303 in capital expenditures to O&M and is refunding to customers the associated $189,785 of previously recovered interest and return on investment. Excluding this one-time event, the project's revenue requirements are approximately $301,206 higher due to the increase in capital expenditures from the projection filing as upgrade work is being performed at two tanks at Turner that was not included in the projection. This project is further discussed in Ms. West's testimony.

3. **Emissions Allowances (Project #5) – Capital**

   The revenue requirements on the inventory of SO_2 and nitrogen oxide (NOx) emission allowances are estimated to be $4,454,498 or 86% higher than

originally projected. At the time of the projection filing, there was a high degree of uncertainty related to the timing and amount of NOx allowance purchases in the future. For that reason, PEF's projection filing only included a return on capital for purchases certain to occur during 2008 (i.e., if there was an executed contract with a transaction that was expected to settle during the year). The variance is primarily attributable to the return on incremental NOx allowances purchases that did not have executed contracts at the time of the projection filing. This project is discussed further in the testimony of Joseph McCallister.

4. CAIR/CAMR (Project #7.x) – Capital

Project revenue requirements are estimated to be $1,657,146 or 379% higher than originally projected. This variance is primarily attributable to two assets going into service during 2008 that were not included in the 2008 Projection. The first, the Access Road and Vehicle Barrier System (Project 7.4a) went into service in May 2008 and the second, the Low NOx Burner at Crystal River 4 (Project 7.4b) will be placed into service in December 2008.

Q. Does this conclude your testimony?

A. Yes, it does.

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

DIRECT TESTIMONY OF

LORI CROSS

ON BEHALF OF

PROGRESS ENERGY FLORIDA

DOCKET NO. 080007-EI

AUGUST 29, 2009

Q. Please state your name and business address.

A. My name is Lori Cross. My business address is 299 First Avenue North, St. Petersburg, FL 33701.

Q. By whom are you employed and in what capacity?

A. I am employed by Progress Energy Service Company, LLC, as Manager of Regulatory Planning Florida.

Q. Have you previously filed testimony before this Commission in connection with PEF's Environmental Cost Recovery Clause (ECRC)?

A. Yes, I have.

Q. Have your duties and responsibilities remained the same since you last filed testimony in this proceeding?

A. Yes.

Q. What is the purpose of your testimony?

A. The purpose of my testimony is to present, for Commission review and approval, Progress Energy Florida's ("PEF's") calculation of the revenue requirements and its ECRC factors for application on customer billings during the period January 2009 through December 2009. My testimony addresses the capital and operating and maintenance ("O&M") expenses associated with PEF's environmental compliance activities for the year 2009 and actions to date related to its emission allowance procurement strategy as part of its Integrated Clean Air Compliance Strategy in preparation for the requirements of the Clean Air Interstate Rule ("CAIR").

Q. Have you prepared or caused to be prepared under your direction, supervision or control any exhibits in this proceeding?

A. Yes. I am sponsoring the following exhibits:

1. Exhibit No. __ (LC-3), which consists of PSC Forms 42-1P through 42-7P; and
2. Exhibit No. __ (LC-4), which provides details of four capital projects by site.

Q. What is the total recoverable revenue requirement relating to the projection period January 2009 through December 2009?

A. The total recoverable revenue requirement including true-up amounts and revenue taxes is $137,323,719 as shown on Form 42-1P, Line 5 of Exhibit No. __ (LC-3).

Q. What is the total true-up to be applied in the period January 2009 through December 2009?

A. The total true-up applicable for this period is an under-recovery of $4,316,060. This consists of the final true-up of over-recovery of $5,556,369 for the period from January 2007 through December 2007 and an estimated true-up under-recovery of $9,872,429 for the current period of January 2008 through December 2008. The detailed calculation supporting the estimated true-up was provided on Forms 42-1E through 42-8E of Exhibit No. __ (LC-1) filed with the Commission on August 4, 2008.

Q. Are all the costs listed in Forms 42-1P through 42-7P attributable to Environmental Compliance projects previously approved by the Commission?

A. Yes, with the exception of the Crystal River 1&2 Thermal Discharge Compliance Project discussed below and the Greenhouse Gas Inventory and Reporting Project discussed in the pre-filed testimony of Patricia Q. West submitted on August 4, 2008. PEF's 2009 ECRC projections include the following projects that have been previously approved by the Commission:

The CAIR and the Clean Air Mercury Rule ("CAMR") Program (No. 7) was previously approved as an ECRC recoverable project in Order No. PSC-05-1251-FOF-EI. The Commission approved PEF's Integrated Clean Air Compliance Plan for complying with CAIR, CAMR, the Clean Air Visibility Rule ("CAVR") and related regulatory requirements in Order No. PSC-07-0922-FOF-EI.

The Substation and Distribution System O&M programs (Nos. 1 and 2) were previously approved by the Commission in Order No. PSC-02-1735-FOF-EI.

The Pipeline Integrity Management Program (No. 3) and the Above Ground Tank Secondary Containment Program (No. 4) were previously approved in Order No. PSC-03-1348-FOF-EI.

The recovery of SO_2 Emission Allowances (No. 5) was previously approved in Order No. PSC-95-0450-FOF-EI; however, the costs were moved to the ECRC Docket from the Fuel Docket beginning January 1, 2004 at the request of Staff to be consistent with the other Florida IOUs.

The Phase II Cooling Water Intake 316(b) Program (No. 6) was previously approved in Order No. PSC-04-0990-PAA-EI.

The Sea Turtle Lighting Program (No. 9), the Arsenic Groundwater Standard Program (No. 8), and the Underground Storage Tanks Program (No. 10) were previously approved in Order No. PSC-05-1251-FOF-EI.

The Modular Cooling Tower Program (No. 11) was previously approved by Commission in Order No. PSC-07-0722-FOF-EI.

Q. Please describe the CR1&2 Thermal Discharge Compliance Project.

A. In Order No. PSC-07-0722-FOF-EI, the Commission approved recovery of costs associated with installation and operation of leased Modular Cooling Towers ("MCTs") to maintain compliance with thermal discharge limit in the Florida Department of Environmental Protection ("FDEP") industrial wastewater discharge permit for Crystal River Units 1 and 2 ("CR1&2"). Consistent with PEF's petition and the final order approving the MCT Project, PEF has continued to evaluate the long term nature and extent of the issue associated with increased inlet water temperatures that triggered the need for additional cooling capacity to maintain compliance with the FDEP permit while minimizing derates of CR1&2. Through the CR1&2 Thermal Discharge Compliance Project, PEF will replace the MCTs with a more permanent compliance solution. Further detail regarding the compliance project is provided in the testimony of PEF witness Daniel Roderick.

Q. Are you familiar with the requirements that environmental costs must meet to be eligible for recovery through the ECRC?

A. Yes. The general requirements are follows:

- All expenditures must have been prudently incurred after April 13, 1993;
- All activities must be legally required to comply with a governmentally imposed environmental requirement which was created, or whose effect was triggered, after the company's last test year on which rates are based; and
- None of the expenditures are being recovered through some other cost recovery mechanism or through base rates.

Q. Does the CR1&2 Thermal Discharge Compliance Project qualify for cost recovery under these criteria?

A. Yes. The project is being implemented in response to the environmental requirements which whose effect was triggered after the minimum filing requirements ("MFRs") were submitted in PEF's most recent ratemaking proceeding (Docket No. 050078-EI). As the Commission found in Order PSC-07-0722-FOF-EI issued in Docket No. 060162-EI, no costs for the additional cooling capacity needed to maintain compliance with the FDEP thermal discharge permit limits were included in the MFRs that PEF filed in its most recent ratemaking proceeding. Therefore, the costs are not recovered in base rates. Likewise, none of the costs of this program are being recovered through any other cost recovery mechanism.

Q. Have there been any recent developments concerning CAIR?

A. Yes. As discussed in the testimony of other PEF witnesses, the U.S. Circuit Court of Appeals for the District of Columbia recently issued a decision vacating CAIR. As explained by PEF witness Michael Kennedy, the Court's decision is not yet final, but PEF is working with state and federal agencies, as well as conducting internal analyses, to determine the appropriate course of action once the D.C. Circuit's decision becomes final and its full implications are known. As Mr. Kennedy and PEF witness Dale Wilterdink explain, PEF is continuing to implement the Crystal River emission control components of its Commission-approved Integrated Clean Air Compliance Plan as PEF assesses the potential implications of the Court's decision. PEF is continuing with plans to place in service the following plant assets in 2009: the Selective Catalytic Reduction system at Crystal River Unit 5 ("CR5"), the Urea to Amonia system, the Flue Gas Desulfurization at CR5, and Common Items. The revenue requirement of placing these items into service, including depreciation and property tax expense, is approximately $35 million, as reflected on Form 42-4P, page 9, of Exhibit No. __ (LC-3).

Q. Has the D.C. Circuit's decision vacating CAIR affected PEF's projected emission allowance costs?

A. Yes. As discussed in the pre-filed testimony of Joseph McCallister submitted on August 4, 2008, PEF has suspended further purchases of annual and seasonal nitrogen oxide ("NOx") allowances in light of the D.C. Circuit's decision. Until

the Court's decision is final, however, CAIR remains in effect. For that reason, we are assuming that PEF will need to use NOx allowances out of inventory in order to comply with CAIR in 2009. Additionally, PEF has assumed purchases to cover its short position in 2009 using the cost of annual NOx allowances on the day before the vacatur decision was issued. The costs of those NOx allowances are included in the projections provided in Form 42-4P, page 5, of Exhibit No. __ (LC-3).

Regardless of the CAIR vacatur, PEF will still be subject to the sulfur dioxide ("SO_2") allowance program under Title IV of the Clean Air Act. Thus, the projections provided in Form 42-4P, page 5, of Exhibit No. __ (LC-3) include SO_2 allowance costs.

Q. Have you prepared schedules showing the calculation of the recoverable O&M project costs for 2009?

A. Yes. Form 42-2P contained in Exhibit No. __ (LC-3) summarizes the recoverable O&M cost estimates for these projects in the amount of $90,880,829.

Q. Have you prepared schedules showing the calculation of the recoverable capital project costs for 2009?

A. Yes. Form 42-3P contained in Exhibit No. __(LC-3), summarizes the cost estimates projected for these projects. Form 42-4P, pages 1 through 14, shows

the calculations of these costs that result in recoverable jurisdictional capital costs of $42,028,028.

Q. Have you prepared schedules providing the description and progress reports for all environmental compliance activities and projects?

A. Yes. Form 42-5P, pages 1 through 11, contained in Exhibit No. __ (LC-3) provides each project description and progress, as well as the projected recoverable cost estimates.

Q. What is the total projected jurisdictional costs for environmental compliance activities in the year 2009?

A. The total jurisdictional capital and O&M costs of $137,323,719 to be recovered through the ECRC, are calculated on Form 42-1P, contained in Exhibit No. __ (LC-3).

Q. Please describe how the proposed ECRC factors were developed.

A. The ECRC factors were calculated as shown on Forms 42-6P and 42-7P contained in Exhibit No. __ (LC-3). The demand allocation factors were calculated by determining the percentage each rate class contributes to the monthly system peaks and then adjusted for losses for each rate class. The energy allocation factors were calculated by determining the percentage each rate class contributes to total kilowatt-hour sales and then adjusted for losses for each rate class. This

information was obtained from PEF's July 2007 load research study. Form 42-7P presents the calculation of the proposed ECRC billing factors by rate class.

Q. What are PEF's proposed 2009 ECRC billing factors by the various rate classes and delivery voltages?

A. The computation of PEF's proposed ECRC factors for customer billings in 2009 is shown on Form 42-7P, contained in Exhibit No. __(LC-3). In summary, these factors are as follows:

RATE CLASS	ECRC FACTORS
Residential	0.368 cents/kWh
General Service Non-Demand	
@ Secondary Voltage	0.343 cents/kWh
@ Primary Voltage	0.340cents/kWh
@ Transmission Voltage	0.336 cents/kWh
General Service 100% Load Factor	0.291cents/kWh
General Service Demand	
@ Secondary Voltage	0.307cents/kWh
@ Primary Voltage	0.304 cents/kWh
@ Transmission Voltage	0.301 cents/kWh
Curtailable	
@ Secondary Voltage	0.287 cents/kWh
@ Primary Voltage	0.284 cents/kWh
@ Transmission Voltage	0.281 cents/kWh

Interruptible	
@ Secondary Voltage	0.296 cents/kWh
@ Primary Voltage	0.293 cents/kWh
@ Transmission Voltage	0.290 cents/kWh
Lighting	0.252 cents/kWh

Q. When is PEF requesting that the proposed ECRC billing factors be made effective?

A. PEF is requesting that its proposed ECRC billing factors be made effective with the first bill group for January 2009 and continue through the last bill group for December 2009.

Q. Please summarize your testimony.

A. My testimony supports the approval of an average environmental billing factor of 0.338 cents per kWh which includes projected capital and O&M revenue requirements of $137,224,917 associated with a total of 12 environmental projects and a true-up under-recovery provision of $4,316,060. My testimony also demonstrates that the projected environmental expenditures for 2009 are appropriate for recovery through the ECRC.

Q. Does this conclude your testimony?

A. Yes, it does.

TAMPA ELECTRIC COMPANY
DOCKET NO. 080007-EI
FILED: 04/02/08

BEFORE THE PUBLIC SERVICE COMMISSION

PREPARED DIRECT TESTIMONY

OF

HOWARD T. BRYANT

Q. Please state your name, address, occupation and employer.

A. My name is Howard T. Bryant. My business address is 702 North Franklin Street, Tampa, Florida 33602. I am employed by Tampa Electric Company ("Tampa Electric" or "Company") in the position of Manager, Rates in the Regulatory Affairs Department.

Q. Please provide a brief outline of your educational background and business experience.

A. I graduated from the University of Florida in June 1973 with a Bachelor of Science degree in Business Administration. I have been employed at Tampa Electric since 1981. My work has included various positions in Customer Service, Energy Conservation Services, Demand Side Management ("DSM") Planning, Energy Management and Forecasting, and Regulatory Affairs. In my current position, I am responsible for the company's Energy Conservation Cost Recovery ("ECCR") clause, the

Environmental Cost Recovery Clause ("ECRC"), and retail rate design.

Q. Have you previously testified before the Florida Public Service Commission ("Commission")?

A. Yes. I have testified before this Commission on ECRC activities since 2001 as well as conservation and load management activities, DSM goals setting, DSM plan approval dockets and other ECCR dockets since 1993.

Q. What is the purpose of your testimony in this proceeding?

A. The purpose of my testimony is to present, for Commission review and approval, the actual true-up amount for the ECRC and the calculations associated with the environmental compliance activities for the January 2007 through December 2007 period.

Q. Did you prepare any exhibits in support of your testimony?

A. Yes. Exhibit No. _____ (HTB-1) consists of eight forms prepared under my direction and supervision.

- Form 42-1A, Document No. 1, Final true-up for the January 2007 through December 2007 period;
- Form 42-2A, Document No. 2, provides the detailed calculation of the actual true-up for the period;
- Form 42-3A, Document No. 3, provides details to the calculation of the interest provision for the period;
- Form 42-4A, Document No. 4, reflects the calculation of variances between actual and actual/estimated costs for O&M activities;
- Form 42-5A, Document No. 5, provides a summary of actual monthly O&M activity costs for the period;
- Form 42-6A, Document No. 6, provides details of the calculation of variances between actual and actual/estimated costs for capital investment projects;
- Form 42-7A, Document No. 7, presents a summary of actual monthly costs for capital investment projects for the period;
- Form 42-8A, Document No. 8, pages 1 through 26, consist of the calculation of depreciation expenses and return on capital investment for each project that is being recovered through the ECRC, and page 26 calculates the net expenses associated with maintaining an SO_2 allowance inventory.

Q. What is the source of the data presented by way of your testimony or exhibits in this process?

A. Unless otherwise indicated, the actual data is taken from the books and records of Tampa Electric. The books and records are kept in the regular course of business in accordance with generally accepted accounting principles and practices, and provisions of the Uniform System of Accounts as prescribed by this Commission.

Q. What is the actual true-up amount Tampa Electric is requesting for the January 2007 through December 2007 period?

A. Tampa Electric has calculated and is requesting approval of an over-recovery of $22,089,826 as the actual true-up amount for the January 2007 through December 2007 period.

Q. What is the adjusted net true-up amount Tampa Electric is requesting for the January 2007 through December 2007 period which is to be applied in the calculation of the environmental cost recovery factors to be refunded/(recovered) in the 2009 projection period?

A. Tampa Electric has calculated an over-recovery of

$12,465,653 reflected on Form 42-1A, as the adjusted net true-up amount for the January 2007 through December 2007 period. This adjusted net true-up amount is the difference between the actual over-recovery and the actual/estimated over-recovery for the January 2007 through December 2007 period as depicted on Form 42-1A. The actual true-up amount for the January 2007 through December 2007 period is an over-recovery of $22,089,826 as compared to the $9,624,173 actual/estimated over-recovery amount approved in Commission Order No. PSC-07-0922-FOF-EI issued November 16, 2007.

Q. Are all costs listed in Forms 42-4A through 42-8A attributable to environmental compliance projects approved by the Commission?

A. All costs listed in Forms 42-4A through 42-8A for which Tampa Electric is seeking recovery are attributable to environmental compliance projects approved by the Commission. However, Form 42-8A, pages 20 - 22, provides expenditures associated with Big Bend Units 1-3 Selective Catalytic Reduction ("SCR") projects and are only included at this time for identification and tracking purposes. Recovery of these expenditures is not included in the 2007 ECRC True-Up. Consistent with the

Commission's decisions in Docket Nos. 980693-EI, 040007-EI, 040750-EI and 041376-EI, the company will not seek recovery of the SCR project costs associated with these Commission approved environmental compliance projects until each project is placed in-service. Big Bend Unit 4 SCR was approved in Docket No. 040750-EI, Order No. PSC-04-0986-PAA-EI and went in-service May 2007. Big Bend Units 1-3 SCRs were approved in Docket No. 041376-EI, Order No. PSC-05-0502-PAA-EI and are projected to be in-service in May 2010, May 2009 and April 2008, respectively.

Q. Did Tampa Electric include costs in its 2007 final ECRC true-up filing for any environmental projects that were not anticipated and included in its 2007 factors?

A. No.

Q. How did actual expenditures for the January 2007 through December 2007 period compare with Tampa Electric's actual/estimated projections as presented in previous testimony and exhibits?

A. As shown on Form 42-4A, total O&M activities costs were $12,133,973 or 18.1 percent lower than actual/estimated

projections. Form 42-6A shows the total capital investment costs were $44,759 or 0.2 percent lower than actual/estimated projections. O&M and capital investment projects with material variances from the 2007 Actual/Estimated True-Up filing are explained below.

O&M Project Variances

- **SO_2 Emissions Allowances:** The SO_2 Emission Allowances project variance was $11,360,650 or 14.3 percent less than projected. The variance was due to higher market prices for allowances sold than projected as well as more allowances sold than originally projected.
- **Big Bend Units 1&2 FGD:** The Big Bend Units 1&2 FGD project variance was $525,704 or 9.6 percent less than projected due to the coordination of maintenance with scheduled outages creating a delay in expenditures as well as lower moisture penalties due to improved gypsum quality.
- **Big Bend PM Minimization and Monitoring:** The Big Bend PM Minimization and Monitoring project variance was $33,977 or 11.0 percent greater than projected due to the unanticipated coal pipe maintenance on Big Bend Unit 1.
- **Big Bend NO_x Emissions Reduction:** The Big Bend NO_x Emissions Reduction project variance was $49,840 or 10.2 percent less than projected as a result of lower overall

activity due to planned outages.

- **Gannon Thermal Discharge Study:** The Gannon Thermal Discharge Study project variance was $18,533 or 71.0 percent higher than projected due to the effort of the contractor to complete the study report earlier than the original delivery date.
- **Polk NO_x Emissions Reduction:** The Polk NO_x Emissions Reduction project variance was $12,693 or 21.3 percent greater than originally projected due to increased demineralized water costs due to the failure of the decarbonator in the water treatment system. A replacement decarbonator has been received and will be installed during the planned outage in April 2008.
- **Bayside SCR Consumables:** The Bayside SCR Consumables project variance was $4,946 or 7.1 percent greater than originally projected due to the unanticipated increase in ammonia consumption.
- **Big Bend Unit 4 SOFA:** The Big Bend Unit 4 SOFA project variance was $42,586 or 19.4 percent greater than projected due to higher than anticipated testing and tuning costs.
- **Big Bend Unit 1 Pre-SCR:** The Big Bend Unit 1 Pre-SCR project incurred $4,586 in expenses that was not originally projected due to minor repairs made to the secondary air damper drive as well as several coal pipes.

- **Big Bend Unit 2 Pre-SCR:** The Big Bend Unit 2 Pre-SCR project variance was $8,365 or 55.8 percent less than projected due to the timing of equipment procurement and outages causing a delay of the in-service date.
- **Big Bend Unit 3 Pre-SCR:** The Big Bend Unit 3 Pre-SCR project incurred $23,995 in expenses that was not originally projected due to the inspection and repair of the classifier vanes.
- **Clean Water Act Section 316(b) Phase II Study:** The Clean Water Act Section 316(b) Phase II Study was $55,344 or 13.9 percent less than projected due to the rule remand, necessitating a new strategy.
- **Arsenic Groundwater Standard Program:** The Arsenic Groundwater Standard program variance was $42,270 or 80.5 percent less than projected due to FDEP's late approval of the studies, thereby reducing the number of samples projected for 2007.
- **Big Bend Unit 4 SCR:** The Big Bend Unit 4 SCR project variance was $165,505 or 21.8 percent less than projected due to the lower than anticipated consumption of ammonia.

Capital Investment Project Variances

- **Big Bend Unit 3 Pre-SCR:** The Big Bend Unit 3 Pre-SCR project variance was $8,528 or 6.4 percent less than projected due to timing of equipment procurement and

outages causing a delay of the in-service date.

Q. Does this conclude your testimony?

A. Yes, it does.

BEFORE THE PUBLIC SERVICE COMMISSION

PREPARED DIRECT TESTIMONY

OF

HOWARD T. BRYANT

Q. Please state your name, address, occupation and employer.

A. My name is Howard T. Bryant. My business address is 702 North Franklin Street, Tampa, Florida 33602. I am employed by Tampa Electric Company ("Tampa Electric" or "Company") in the position of Manager, Rates in the Regulatory Affairs Department.

Q. Please provide a brief outline of your educational background and business experience.

A. I graduated from the University of Florida in June 1973 with a Bachelor of Science degree in Business Administration. I have been employed at Tampa Electric since 1981. My work has included various positions in Customer Service, Energy Conservation Services, Demand Side Management ("DSM") Planning, Energy Management and Forecasting, and Regulatory Affairs. In my current position I am responsible for the company's Energy Conservation Cost Recovery ("ECCR") clause, the

Environmental Cost Recovery Clause ("ECRC"), and retail rate design.

Q. Have you previously testified before the Florida Public Service Commission ("Commission")?

A. Yes. I have testified before this Commission on conservation and load management activities, DSM goals setting and DSM plan approval dockets, and other ECCR dockets since 1993, and ECRC activities since 2001.

Q. What is the purpose of your testimony in this proceeding?

A. The purpose of my testimony is to present, for Commission review and approval, the calculation of the January 2008 through December 2008 estimated true-up amount to be refunded or recovered through the ECRC during January 2009 through December 2009. My testimony addresses the recovery of capital and operations and maintenance ("O&M") costs associated with environmental compliance activities for 2008, based on six months of actual data and six months of estimated data. This information will be used to determine the environmental cost recovery factors for January 2009 through December 2009.

Q. Have you prepared an exhibit that shows the determination of the recoverable environmental costs for the period January 2008 through December 2008?

A. Yes. Exhibit No. _____ (HTB-2), containing eight documents, was prepared under my direction and supervision. It includes Forms 42-1E through 42-8E which show the current period estimated true-up amount to be used in calculating the cost recovery factors for January 2009 through December 2009.

Q. What has Tampa Electric calculated as the estimated true-up for the current period to be applied to the January 2009 through December 2009 ECRC factors?

A. The estimated true-up applicable for the current period, January 2008 through December 2008, is an under-recovery of $7,747,093. A detailed calculation supporting the estimated true-up is shown on Forms 42-1E through 42-8E of my exhibit.

Q. Is Tampa Electric including costs in this estimated true-up filing for any environmental projects that were not anticipated and included in its 2008 factors?

A. No.

Q. What depreciation rates were utilized for the capital projects contained in the 2008 Actual/Estimated True-Up?

A. Tampa Electric utilized the depreciation rates approved in Order No. PSC-08-0014-PAA-EI issued on January 4, 2008 in Docket No. 070284-EI.

Q. How did the actual/estimated project expenditures for January 2008 through December 2008 period compare with the company's original projection?

A. As shown on Form 42-4E, total O&M activities were $8,741,693 more than projected costs. Total capital expenditures itemized on Form 42-6E, were $1,320,210 lower than originally projected. O&M and capital investment projects with material variances are explained below.

O&M Project Variances

- **Big Bend Unit 3 Flue Gas Desulfurization Integration:** The Big Bend Unit 3 Flue Gas Desulfurization Integration project variance is estimated to be $401,216 or 10.9 percent lower than originally projected due to a lower

cost of consumables for gypsum production as well as a decrease in maintenance costs.

- **SO_2 Emission Allowances:** The SO_2 Emission Allowances project variance is estimated to be $10,647,829 or 36.2 percent higher than projected. The variance is due to the increase in the number of allowances sold in 2007 that were originally projected to be sold in 2008.
- **Big Bend Units 1 and 2 Flue Gas Desulfurization:** The Big Bend Unit 1 and 2 Flue Gas Desulfurization project variance is estimated to be $905,845 or 12.5 percent less than originally projected due to the re-allocation of 2008 maintenance activities with the scheduled outages for 2009.
- **Big Bend NO_x Emissions Reduction:** The Big Bend NO_x Emissions Reduction project variance is estimated to be $162,435 or 46.4 percent greater than originally projected due to unanticipated inspections for boiler tube degradation stemming from NO_x abatement measures, as well as burner modifications.
- **Polk NO_x Emissions Reduction:** The Polk NO_x Emissions Reduction project variance is estimated to be $18,333 or 28.2 percent lower than originally projected due to a unit outage during the second quarter of 2008.
- **Gannon Thermal Discharge Study:** The Gannon Thermal Discharge Study project variance is estimated to be

$26,005 or 52.0 percent higher than originally projected. The variance is due to the need for additional data collection than originally planned.

- **Bayside SCR Consumables:** The Bayside SCR Consumables project variance is estimated to be $38,068 or 54.4 percent higher than originally projected due to the increase in price and consumption of ammonia.
- **Big Bend Unit 4 SOFA:** The Big Bend Unit 4 SOFA project variance is estimated to be $17,024 or 34.0 percent lower than originally projected due to less maintenance activity than anticipated.
- **Big Bend Unit 1 Pre-SCR:** The Big Bend Unit 1 Pre-SCR project variance is estimated to be $45,000 or 60.0 percent less than originally projected due to the delay of the in-service date for the Pre-SCR capital project.
- **Big Bend Unit 2 Pre-SCR:** The Big Bend Unit 2 Pre-SCR project variance is estimated to be $63,812 or 85.1 percent less than originally projected due to the delay of the in-service date for the Pre-SCR capital project.
- **Clean Water Act Section 316(b) Phase II Study:** The Clean Water Act Section 316(b) Phase II Study project variance is estimated to be $25,605 or 17.1 percent less than projected. The variance is due to the decrease in contractor costs to complete the impingement study reports.

- **Arsenic Groundwater Standard Program:** The Arsenic Groundwater Standard Program variance is estimated to be $41,651 or 73.1 percent more than projected. The Florida Department of Environmental Protection requested to extend the data collection period, therefore requiring additional testing.
- **Big Bend Unit 4 SCR:** The Big Bend Unit 4 SCR project variance is estimated to be $278,964 or 17.3 percent less than originally projected due to a decrease in the usage of ammonia.
- **Big Bend Unit 3 SCR:** The Big Bend Unit 3 SCR project variance is estimated to be $406,900 or 25.3 percent less than originally projected due to the delay of commercial operation.

Capital Investment Project Variances

- **Big Bend NO_x Emissions Reduction:** The Big Bend NO_x Emissions Reduction project variance is estimated to be $73,909 or 8.5 percent less than the original projection due to the delay of the neural network portion of the project.
- **Big Bend Unit 3 Pre-SCR:** The Big Bend Unit 3 Pre-SCR project variance is estimated to be $81,480 or 18.6 percent less than the original projection due to the deferment of 2008 projected activities and associated

costs to 2009. The deferment resulted from a later completion of the unit outage than originally planned.

- **Big Bend Unit 3 SCR:** The Big Bend Unit 3 SCR project variance is estimated to be $3,346,470 or 38.1 percent less than the original projection due to turbine rotor repair that caused the delay in commercial operation.
- **Big Bend Unit 4 SCR:** The Big Bend Unit 4 SCR project variance is estimated to be $2,282,312 or 37.3 percent more than originally projected due to an inadvertent calculation error found in the formula for the amount of average return on investment for the months of January through May 2008 in the 2008 Projection Filing.
- **Clean Air Mercury Rule:** The Clean Air Mercury Rule project variance is estimated to be $48,934 or 41.0 percent less than originally projected due to the decrease in scope of the project stemming from the February 8, 2008 Circuit Court decision to vacate the Clean Air Mercury Rule. As a result, EPA is evaluating the court's decision and its impacts.
- **SO_2 Emission Allowances:** The SO_2 Emission Allowances project variance is estimated to be $3,422 or 37.3 percent more than originally projected. The variance is due to the sale of allowances in 2007 than were originally projected for 2008.

Q. Does this conclude your testimony?

A. Yes, it does.

TAMPA ELECTRIC COMPANY
DOCKET NO. 080007-EI
FILED: AUGUST 29, 2008

BEFORE THE PUBLIC SERVICE COMMISSION

PREPARED DIRECT TESTIMONY

OF

HOWARD T. BRYANT

Q. Please state your name, address, occupation and employer.

A. My name is Howard T. Bryant. My business address is 702 North Franklin Street, Tampa, Florida 33602. I am employed by Tampa Electric Company ("Tampa Electric" or "company") as Manager, Rates in the Regulatory Affairs Department.

Q. Please provide a brief outline of your educational background and business experience.

A. I graduated from the University of Florida in June 1973 with a Bachelor of Science degree in Business Administration. I have been employed at Tampa Electric since 1981. My work has included various positions in Customer Service, Energy Conservation Services, Demand Side Management ("DSM") Planning, Energy Management and Forecasting, and Regulatory Affairs. In my current position I am responsible for the company's Energy Conservation Cost Recovery ("ECCR") clause, the

Environmental Cost Recovery Clause ("ECRC"), and retail rate design.

Q. Have you previously testified before the Florida Public Service Commission ("Commission")?

A. Yes. I have testified before this Commission on conservation and load management activities, DSM goals setting and DSM plan approval dockets, and other ECCR dockets since 1993, and ECRC activities since 2001.

Q. What is the purpose of your testimony in this proceeding?

A. The purpose of my testimony is to present, for Commission review and approval, both the calculation of the revenue requirements and the projected ECRC factors for the period of January 2009 through December 2009. In support of the projected ECRC factors, my testimony identifies the capital and operating and maintenance ("O&M") costs associated with environmental compliance activities for the year 2009. Finally, my testimony addresses the projected ECRC factors that would become effective in May 2009 based on the company's rate design modification proposed in Docket No. 080317-EI.

Q. Have you prepared an exhibit that shows the determination of recoverable environmental costs for the period of January 2009 through December 2009?

A. Yes. Exhibit No. ___ (HTB-3), containing eight documents, was prepared under my direction and supervision. Document Nos. 1 through 7 contain Forms 42-1P through 42-7P, which show the calculation and summary of O&M and capital expenditures that support the development of the environmental cost recovery factors for 2009. Document No. 8, consisting of two pages, supports the proposed ECRC factors allocated on a 12 Coincident Peak ("CP") and 25 percent Average Demand ("AD") basis. The proposed methodology is described in the direct testimony of William R. Ashburn submitted in Docket No. 080317-EI.

Q. Are you requesting Commission approval of the projected environmental cost recovery factors for the company's various rate schedules?

A. Yes. The ECRC factors, prepared under my direction and supervision, are provided in Exhibit No. ____ (HTB-3), Document No. 7, on Form 42-7P. These annualized factors are expected to apply for the period January through

April 2009. The revised factors provided in Document No. 9 are based on Tampa Electric's proposed rate design modifications found in Docket No 080317-EI. The company is requesting an effective date of May 2009 for these revised factors, coincident with the effective date of base rate modifications proposed in the above referenced docket.

Q. How will the proposed ECRC factors be impacted if the implementation date of the base rate adjustment is different from May 1, 2009?

A. The proposed ECRC factors starting January 1, 2009 are annualized factors. Therefore, those factors would remain in effect until the Commission approves the proposed changes submitted as part of Docket No. 080317-EI.

Q. What has Tampa Electric calculated as the net true-up to be applied in the period January 2009 through December 2009?

A. The net true-up applicable for this period is an over-recovery of $4,718,560. This consists of the final true-up over-recovery of $12,465,653 for the period of January

2007 through December 2007 and an estimated true-up under-recovery of $7,747,093 for the current period of January 2008 through December 2008. The detailed calculation supporting the estimated net true-up was provided on Forms 42-1E through 42-8E of Exhibit No. ___ (HTB-2) filed with the Commission on August 4, 2008.

Q. What is the major contributing factor that has created the net over-recovery to be applied to the company's ECRC rates for the period January 2009 through December 2009?

A. The major contributing factor that has created the net over-recovery was the sale of surplus SO_2 emission allowances that were originally projected to occur in 2008 but instead occurred during 2007.

Q. Does Tampa Electric anticipate the sale of surplus SO_2 allowances during 2009?

A. Yes. The company anticipates the sale of approximately $13 million of surplus SO_2 allowances during 2009. The revenues from the allowance sales have an immediate, direct benefit to Tampa Electric customers since they offset environmental expenses. Additional details associated with the 2009 sales are provided by Tampa

Electric Witness, Paul L. Carpinone.

Q. Will Tampa Electric propose any new environmental compliance projects for ECRC cost recovery for the period from January 2009 through December 2009?

A. Tampa Electric anticipates proposing a Greenhouse Gas ("GHG") Reduction program to initiate data collection and reporting of GHG emissions as part of The Climate Registry as required by House Bill 7135. Presently, the Florida Department of Environmental Protection is reviewing the bill. Once the review is completed, it is anticipated rulemaking will begin and an eventual start date determined. At that time, Tampa Electric will file for recovery of the GHG program and outline more definitive program details and costs to comply with the new rule.

Q. What are the existing capital projects included in the calculation of the ECRC factors for 2009?

A. Tampa Electric proposes to include for ECRC recovery the 25 previously approved capital projects and their projected costs in the calculation of the ECRC factors for 2009. These projects are:

1) Big Bend Unit 3 Flue Gas Desulfurization ("FGD") Integration
2) Big Bend Units 1 and 2 Flue Gas Conditioning
3) Big Bend Unit 4 Continuous Emissions Monitors
4) Big Bend Fuel Oil Tank 1 Upgrade
5) Big Bend Fuel Oil Tank 2 Upgrade
6) Phillips Tank No. 1 Upgrade
7) Phillips Tank No. 4 Upgrade
8) Big Bend Unit 1 Classifier Replacement
9) Big Bend Unit 2 Classifier Replacement
10) Big Bend Section 114 Mercury Testing Platform
11) Big Bend Units 1 and 2 FGD
12) Big Bend FGD Optimization and Utilization
13) Big Bend NO_x Emissions Reduction
14) Big Bend Particulate Matter ("PM") Minimization and Monitoring
15) Polk NO_x Emissions Reduction
16) Big Bend Unit 4 SOFA
17) Big Bend Unit 1 Pre-SCR
18) Big Bend Unit 2 Pre-SCR
19) Big Bend Unit 3 Pre-SCR
20) Big Bend Unit 2 SCR
21) Big Bend Unit 3 SCR
22) Big Bend Unit 4 SCR
23) Big Bend FGD Reliability

24) Clean Air Mercury Rule

25) SO_2 Emission Allowances

Some of these projects will be described in more detail by Tampa Electric Witness, Paul L. Carpinone.

Q. Have you prepared schedules showing the calculation of the recoverable capital project costs for 2009?

A. Yes. Form 42-3P contained in Exhibit No. ___ (HTB-3) summarizes the cost estimates projected for these projects. Form 42-4P, pages 1 through 26, provides the calculations of the costs, which result in recoverable jurisdictional capital costs of $44,275,332.

Q. What are the existing O&M projects included in the calculation of the ECRC factors for 2009?

A. Tampa Electric proposes to include for ECRC recovery the 19 previously approved O&M projects and their projected costs in the calculation of the ECRC factors for 2009. These projects are:

1) Big Bend Unit 3 FGD Integration

2) Big Bend Units 1 and 2 Flue Gas Conditioning

3) SO_2 Emissions Allowances

4) Big Bend Units 1 and 2 FGD

5) Big Bend PM Minimization and Monitoring

6) Big Bend NO_x Emissions Reduction

7) NPDES Annual Surveillance Fees

8) Gannon Thermal Discharge Study

9) Polk NO_x Emissions Reduction

10) Bayside SCR and Ammonia

11) Big Bend Unit 4 SOFA

12) Big Bend Unit 1 Pre-SCR

13) Big Bend Unit 2 Pre-SCR

14) Big Bend Unit 3 Pre-SCR

15) Clean Water Act Section 316(b) Phase II Study

16) Arsenic Groundwater Standard Program

17) Big Bend Unit 4 SCR

18) Big Bend Unit 3 SCR

19) Big Bend Unit 2 SCR

Some of these projects will be described in more detail by Tampa Electric Witness, Paul L. Carpinone.

Q. Have you prepared schedules showing the calculation of the recoverable O&M project costs for 2009?

A. Yes. Form 42-2P contained in Exhibit No. ___ (HTB-3)

summarizes the recoverable jurisdictional O&M costs for these projects which total $5,593,806 for 2009.

Q. Do you have a schedule providing the description and progress reports for all environmental compliance activities and projects?

A. Yes. Project descriptions and progress reports, as well as the projected recoverable cost estimates, are provided in Form 42-5P, pages 1 through 31.

Q. What are the total projected jurisdictional costs for environmental compliance in the year 2009?

A. The total jurisdictional O&M and capital expenditures to be recovered through the ECRC are calculated on Form 42-1P. These expenditures total $49,869,138.

Q. How were environmental cost recovery factors calculated?

A. The environmental cost recovery factors were calculated as shown on Schedules 42-6P and 42-7P. The demand allocation factors were calculated by determining the percentage each rate class contributes to the monthly system peaks and then adjusted for losses for each rate

class. The energy allocation factors were determined by calculating the percentage that each rate class contributes to total MWh sales and then adjusted for losses for each rate class. This information was based on applying historical rate class load research to the 2009 projected forecast of system demand and energy. Form 42-7P presents the calculation of the proposed ECRC factors by rate class.

Q. What are the ECRC billing factors by rate class for the period of January through December 2009 which Tampa Electric is seeking approval?

A. The computation of the billing factors by metering voltage level is shown in Exhibit No. ___ (HTB-3) Document No. 7, Form 42-7P. In summary, the January through April 2009 proposed ECRC billing factors are as follows:

Rate Class	**Factor at Secondary Voltage (¢/kWh)**
RS, RST Secondary	0.227
GS, GST, TS Secondary	0.227
GSD, GSDT Secondary	0.226

Primary	0.224
Transmission	0.222
GSLD, GSLDT, SBF	
Secondary	0.225
Primary	0.222
Transmission	0.220
IS1, IST1, SBI1, IS3, IST3, SBI3	
Secondary	0.222
Primary	0.219
Transmission	0.217
SL, OL Secondary	0.224
Average Factor	0.226

Q. Please describe the changes to the 2009 ECRC factors related to Tampa Electric's proposed rate design submitted in Docket No. 080317-EI.

A. As described in the direct testimony of William R. Ashburn filed in Docket No. 080317-EI on August 11, 2008, Tampa Electric proposes to combine all present demand rate schedules, which consist of General Service - Demand ("GSD"), General Service - Large Demand ("GSLD"), and Interruptible Service ("IS") into one new proposed GSD rate schedule. Additionally, the allocation of production demand costs according to the 12 CP and 1/13th

AD methodology, where 1/13th or approximately eight percent of the demand costs is allocated on an energy basis, has been modified to 12 CP and 25 percent AD to better reflect cost causation, as shown in the company's 2009 Cost of Service Study. The proposed rate class allocations and ECRC factors for these changes are shown in Document No. 8 of Exhibit No. ___ (HTB-3). In summary, the May through December 2009 proposed ECRC billing factors are as follows:

Rate Class		Factor at Secondary Voltage (¢/kWh)
RS		0.223
GS, TS		0.225
GSD, SBF		
	Secondary	0.229
	Primary	0.227
	Transmission	0.224
LS1		0.238
Average Factor		0.226

Q. When does Tampa Electric propose to begin applying these environmental cost recovery credits?

A. The environmental cost recovery credits will be effective

concurrent with the first billing cycle for January 2009.

Q. Are the costs Tampa Electric is requesting for recovery through the ECRC for the period January 2009 through December 2009 consistent with criteria established for ECRC recovery in Order No. PSC-94-0044-FOF-EI?

A. Yes. The costs for which ECRC treatment is requested meet the following criteria:

1. Such costs were prudently incurred after April 13, 1993;
2. The activities are legally required to comply with a governmentally imposed environmental regulation enacted, became effective or whose effect was triggered after the company's last test year upon which rates are based; and
3. Such costs are not recovered through some other cost recovery mechanism or through base rates.

Q. Please summarize your testimony.

A. My testimony supports the approval of a final average environmental billing factor credit of 0.226 cents per kWh which includes projected capital and O&M revenue requirements of $49,869,138 associated with a total of

31 environmental projects and a true-up over-recovery provision of $4,718,560 primarily driven by the timing of SO_2 allowance sales. My testimony also explains that the projected environmental expenditures for 2009 are appropriate for recovery through the ECRC.

Q. Does this conclude your testimony?

A. Yes, it does.

TAMPA ELECTRIC COMPANY
DOCKET NO. 080007
FILED: 8/29/2008

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

PREPARED DIRECT TESTIMONY

OF

PAUL L. CARPINONE

Q. Please state your name, address, occupation and employer.

A. My name is Paul L. Carpinone. My business address is 702 North Franklin Street, Tampa, Florida 33602. I am employed by Tampa Electric Company ("Tampa Electric" or "company") as Director, Environmental Health & Safety in the Environmental Health and Safety Department.

Q. Please provide a brief outline of your educational background and business experience.

A. I received a Bachelor of Science degree in Water Resources Engineering Technology from the Pennsylvania State University in 1978. I have been a Registered Professional Engineer in the State of Florida and Pennsylvania since 1984. Prior to joining Tampa Electric I worked for Seminole Electric Cooperative as a Civil Engineer in various positions and in environmental consulting. In February 1988, I joined Tampa Electric as a Principal Engineer, and I have primarily worked in the

area of Environmental Health and Safety. In 2006, I became Director, Environmental Health and Safety. My responsibilities include the development and administration of the company's environmental, health and safety policies and goals. I am also responsible for ensuring resources, procedures and programs meet or exceed compliance with applicable environmental, health and safety requirements, and that rules and policies are in place and functioning appropriately and consistently throughout the company.

Q. What is the purpose of your testimony in this proceeding?

A. The purpose of my testimony is to demonstrate that the activities for which Tampa Electric seeks cost recovery through the Environmental Cost Recovery Clause ("ECRC") for the January 2009 through December 2009 projection period are activities necessary for the company to comply with various environmental requirements. Specifically, I will describe the ongoing activities that are associated with the Consent Final Judgment ("CFJ") entered into with the Florida Department of Environmental Protection ("FDEP") and the Consent Decree ("CD") lodged with the U.S. Environmental Protection Agency ("EPA") and the Department of Justice. I will also discuss other

programs previously approved by the Commission for recovery through the ECRC as well as the suspension of the Clean Water Act Section 316(b) Phase II Study. Finally, I will discuss the sulfur dioxide ("SO_2") emission allowance sales for 2009 and the company's position for future allowance needs.

Q. Please provide an overview of the ongoing environmental compliance requirements that are the result of the CFJ and the CD ("the Orders").

A. The general ongoing requirements of the Orders provide for further reductions for SO_2, particulate matter ("PM") and nitrous oxides ("NO_x") emissions at Big Bend Station.

Q. What do the Orders require for SO_2 emission reductions?

A. The Orders require Tampa Electric to create a plan for optimizing the availability and removal efficiency of the flue gas desulfurization systems ("FGD" or "scrubbers"). The plan was submitted to the EPA in two phases, and both were approved.

Phase I required Tampa Electric to work scrubber outages around the clock and to utilize contract labor, when

necessary, to speed the return of a malfunctioning scrubber to service. In addition, Phase I required Tampa Electric to review all critical scrubber spare parts and increase the number and availability of spare parts to ensure a speedy return to service of a malfunctioning scrubber.

Phase II outlined capital projects Tampa Electric was to perform to upgrade each scrubber at Big Bend Station. It also addressed the use of environmental dispatching in the event of a scrubber outage. All of the preliminary SO_2 emissions reduction projects have been completed. However, additional work will occur in 2009 associated with the Big Bend Units 1 and 2 FGD and Big Bend FGD System Reliability programs to comply with the elimination of the allowed scrubber outage days for 2010 and 2013.

Q. What do the Orders require for PM emission reductions?

A. The Orders require Tampa Electric to develop and implement a best operational practices ("BOP") study to minimize PM emissions from each electrostatic precipitator ("ESP") and complete and implement a best available control technology ("BACT") analysis of the

ESPs at Big Bend Station. The Orders also require the company to demonstrate the operation of a PM continuous emissions monitoring system ("CEM") on Big Bend Units 3 and 4 and demonstrate the operation of a second PM CEM on another Big Bend unit. Pursuant to the Orders, the installation of the second PM CEM was required on or before May 1, 2007, if the first PM CEM has been shown to be feasible and remains in operation and if Tampa Electric advises the EPA that it has elected to continue to combust coal in Big Bend Units 1, 2 and 3. The first PM CEM was installed in February 2002. The installation of the second PM CEM will be completed within 18 months of approval of the pending second amendment to the CD. The amendment has not been opposed by any of the involved parties and is currently in the final administrative stages of approval.

Q. Please describe the Big Bend PM Minimization and Monitoring program activities and provide the estimated capital and O&M expenditures for the period of January 2009 through December 2009.

A. The Big Bend PM Minimization and Monitoring program was approved by the Commission in Docket No. 001186-EI, Order No. PSC-00-2104-PAA-EI, issued November 6, 2000. In the

Order, the Commission found that the program met the requirements for recovery through the ECRC. Tampa Electric had previously identified various projects to improve precipitator performance and reduce PM emissions as required by the Orders. In 2009, there will be capital expenditures associated with the installation of a second PM CEM, O&M expenses associated with existing and recently installed BOP and BACT equipment and continued implementation of the BOP procedures. Moving forward with the project will improve generation availability by providing real time PM emissions data. These activities are expected to result in approximately $492,900 of capital and $455,000 of O&M expenses.

Q. What do the Orders require for NO_x reductions?

A. The Orders require Tampa Electric to perform NO_x emissions reduction projects on Big Bend Units 1, 2 and 3 and pursuant to an amendment, for Big Bend Unit 4 projects to be substituted for Big Bend Unit 3 projects. The NO_x emissions reductions use the 1998 NO_x emissions as the baseline year for determining the level of reduction achieved. Tampa Electric was also required by the Orders to demonstrate innovative technologies or provide additional NO_x technologies beyond those required by the

early NO_x emissions reduction activities.

Q. Please describe the Big Bend NO_x Emissions Reduction program activities and provide the estimated capital and O&M expenses for the period of January 2009 through December 2009.

A. The Big Bend NO_x Emissions Reduction program was approved by the Commission in Docket No. 001186-EI, Order No. PSC-00-2104-PAA-EI, issued November 6, 2000. In the Order, the Commission found that the program met the requirements for recovery through the ECRC. In 2009, Tampa Electric will perform maintenance on the previously approved and installed NO_x abatement equipment. This activity is expected to result in approximately $358,000 of O&M expenses.

Q. Please describe long-term NO_x requirements associated with the Orders and Tampa Electric's efforts to comply with the requirements.

A. The Orders require Big Bend Unit 4 to begin operating with a Selective Catalytic Reduction ("SCR") system or other NO_x control technology, be repowered, or be shut down and scheduled for dismantlement by June 1, 2007. Big Bend

Units 3, 2 and/or 1 must either begin operating with an SCR system or other NO_x control technology, be repowered, or be shut down and scheduled for dismantlement one unit per year by May 1, 2008, May 1, 2009 and May 1, 2010, respectively.

In order to meet the NO_x emission rates and timing requirements of the Orders, Tampa Electric engaged an experienced consulting firm, Sargent and Lundy, to assist with the performance of a comprehensive study designed to identify the long-range plans for the generating units at Big Bend Station. The results of the study clearly indicated that the option to remain coal-fired at Big Bend Station and install the necessary NO_x reduction technologies is the most cost-effective alternative to satisfy the NO_x emissions reductions required by the Orders. This decision was communicated to the EPA and FDEP in August 2004. Tampa Electric also apprised the Commission of this decision in its filing made in Docket No. 040750-EI in August 2004.

Q. Please describe the Big Bend Units 1 through 3 Pre-SCR and the Big Bend Units 1 through 4 SCR projects and provide estimated capital and O&M expenditures for the period of January 2009 through December 2009.

A. In Docket No. 040750-EI, Order No. PSC-04-0986-PAA-EI, issued October 11, 2004, the Commission approved cost recovery of the Big Bend Units 1 through 3 Pre-SCR and the Big Bend Unit 4 SCR projects. The Big Bend Units 1 through 3 SCR projects were approved by the Commission in Docket No. 041376-EI, Order No. PSC-05-0502-PAA-EI, issued May 9, 2005. The purpose of the Pre-SCR technologies is to reduce inlet NO_x concentrations to the SCR systems, thereby mitigating overall SCR capital and O&M costs. These Pre-SCR technologies include neural networks, windbox modifications, secondary air controls and coal/air flow controls. The SCR projects at Big Bend Units 1 through 4 encompass the design, procurement, installation and annual O&M expenses associated with an SCR system for each unit.

The projected costs for the period of January 2009 through December 2009 for which Tampa Electric is seeking ECRC recovery are for the Big Bend Units 1 through 3 Pre-SCR and Big Bend Units 2, 3 and 4 SCR capital and O&M expenditures associated with the engineering, procurement, construction, start-up, tuning, operation and ongoing maintenance for the projects. No capital expenditures are anticipated for Big Bend Units 2 or 3 Pre-SCR for 2009 however, $77,000 is projected for O&M expenses for Unit 2

Pre-SCR but there are no O&M expenses for Unit 3 Pre-SCR. The projected capital expenditure for Big Bend Unit 1 Pre-SCR is $255,800 with $77,000 O&M expenses expected for the year. Big Bend Unit 3 SCR was placed in-service July 2008. Therefore, there are no anticipated capital expenditures for 2009, however the O&M expenditures for the project are anticipated to be $2,204,900. Big Bend Unit 4 SCR was placed in-service May 2007, therefore there are no anticipated capital expenditures for 2009. The O&M expenses for this project are anticipated to be $1,252,800. Big Bend Unit 2 SCR is expected to be in-service April 2009 and will have anticipated capital and O&M costs of $19,750,200 and $1,807,700, respectively.

The projected capital expenditures for Big Bend Unit 1 is $34,218,913. However, as stated in Tampa Electric Witness Howard T. Bryant's Prepared Direct Testimony in this docket, the company will not seek recovery of capital expenditures until the in-service date for the project has occurred.

Q. Please identify and describe the other Commission approved programs you will discuss.

A. The programs previously approved by the Commission that I

will discuss include:

1) Big Bend Unit 3 FGD Integration

2) Big Bend Units 1 and 2 FGD

3) Gannon Thermal Discharge Study

4) Bayside SCR Consumables

5) Big Bend Unit 4 Separated Over-fired Air ("SOFA")

6) Clean Water Act Section 316(b) Phase II Study

7) Big Bend FGD Reliability

8) Arsenic Groundwater Standard

9) Clean Air Mercury Rule ("CAMR")

Q. Please describe the Big Bend Unit 3 FGD Integration and the Big Bend Units 1 and 2 FGD activities and provide the estimated capital and O&M expenditures for the period of January 2009 through December 2009.

A. The Big Bend Unit 3 FGD Integration program was approved by the Commission in Docket No. 960688-EI, Order No. PSC-96-1048-FOF-EI, issued August 14, 1996. The Big Bend Units 1 and 2 FGD program was approved by the Commission in Docket No. 980693-EI, Order No. PSC-99-0075-FOF-EI, issued January 11, 1999. In those Orders, the Commission found that the programs met the requirements for recovery through the ECRC. The programs were implemented to meet the SO_2 emissions requirements of the Phase I and II Clean

Air Act Amendments ("CAAA") of 1990.

The projected January 2009 through December 2009, O&M expenses for the Big Bend Unit 3 FGD Integration project are $3,658,000. No capital expenditures are anticipated for this project. The projected January 2009 through December 2009, capital and O&M expenditures for the Big Bend Units 1 and 2 FGD project are $2,111,200 and $7,482,800, respectively. The major components of the capital expenditures are projected to be for the electric isolation, mist eliminator upgrades, redundant gypsum bleed line and controls redundancy.

Q. Please describe the Gannon Thermal Discharge Study program activities and provide the estimated capital and O&M expenditures for the period of January 2009 through December 2009.

A. The Gannon Thermal Discharge Study program was approved by the Commission in Docket No. 010593-EI, Order No. PSC-01-1847-PAA-EI, issued September 14, 2001. In that Order, the Commission found that the program met the requirements for recovery through the ECRC. For the period of January 2009 through December 2009, there will be no capital expenditures for this program. Tampa Electric anticipates O&M expenses will be approximately $50,000 for the period.

Q. Please describe the Bayside SCR Consumables program activities and provide the estimated capital and O&M expenditures for the period of January 2009 through December 2009.

A. The Bayside SCR Consumables program was approved by the Commission in Docket No. 021255-EI, Order No. PSC-03-0469-PAA-EI, issued April 4, 2003. For the period of January 2009 through December 2009, there will be no capital expenditures for this program. Tampa Electric anticipates O&M expenses associated with the consumable goods (primarily anhydrous ammonia) will be approximately $82,000 for the period.

Q. Please describe the Big Bend Unit 4 SOFA program activities and provide the capital and O&M expenditures for the period of January 2009 through December 2009.

A. The Big Bend Unit 4 SOFA program was approved by Commission for ECRC recovery in Docket No. 030226-EI, Order No. PSC-03-0684-PAA-EI, issued June 6, 2003. In that Order, the Commission found that the program met the requirements for recovery through the ECRC contingent upon Big Bend Unit 4 remaining coal fired. On August 19, 2004, Tampa Electric submitted a letter to the EPA

declaring the intent for Big Bend Units 1 through 4 to remain coal fired and, as such, complied with the applicable provisions of the CD associated with the decision. The SOFA project was completed in 2004. For the period of January 2009 through December 2009, there will be no capital expenditures for this program. Tampa Electric anticipates O&M expenses will be approximately $50,000 for the period.

Q. Please describe the Clean Water Act Section 316(b) Phase II Study program activities and provide the estimated capital and O&M expenditures for the period of January 2009 through December 2009.

A. The Clean Water Act Section 316(b) Phase II Study program was approved by the Commission in Docket No. 041300-EI, Order No. PSC-05-0164-PAA-EI, issued February 10, 2005. For the period of January 2009 through December 2009, there will be no capital expenditures for this program. EPA announced on March 20, 2007, that the rule adopted pursuant to Section 316(b) be considered suspended. The suspension of the final rule was made on July 9, 2007. Tampa Electric believes that the work will continue to be useful for purposes related to the Phase II Rule and does not intend to suspend the work because it would not be

cost-effective or appropriate to do so. Therefore, Tampa Electric anticipates O&M expenses associated with the sampling activities will be approximately $150,000 for the period.

Q. Please describe the Big Bend FGD System Reliability program activities and provide the estimated capital and O&M expenses for the period of January 2009 through December 2009.

A. Tampa Electric's Big Bend FGD System Reliability program was approved by the Commission in Docket No. 050598-EI, Order No. PSC-06-0602-PAA-EI, issued July 10, 2006. The Commission granted cost recovery approval for prudent costs associated with this project. The Big Bend FGD System Reliability project will run concurrently with the installation of SCR systems on the generating units.

For the period of January 2009 through December 2009, there are no capital or O&M expenditures anticipated for this project.

Q. Please describe the Arsenic Groundwater Standard program activities and provide the estimated capital and O&M expenditures for the period of January 2009 through

December 2009.

A. The Arsenic Groundwater Standard program was approved by the Commission in Docket No. 050683-EI, Order No. PSC-06-0138-PAA-EI, issued February 23, 2006. In that Order, the Commission found that the program met the requirements for recovery through the ECRC and granted Tampa Electric cost recovery approval for prudently incurred costs. The new groundwater standard applies to Tampa Electric's H.L. Culbreath Bayside, Big Bend and Polk Power Stations.

For the period of January 2009 through December 2009, there will be no capital expenditures for this program; however, Tampa Electric anticipates O&M expenses associated with the sampling activities will be approximately $114,000.

Q. Please describe the CAMR program activities and provide the estimated capital and O&M expenditures for the period of January 2009 through December 2009.

A. The CAMR program was approved by the Commission in Docket No. 060583-EI, Order No. PSC-06-0926-PAA-EI, issued November 6, 2006. In that Order, the Commission found that the program met the requirements for recovery through

the ECRC and granted Tampa Electric cost recovery approval for prudently incurred costs.

On February 8, 2008, the Washington D.C. Circuit Court vacated EPA's rule removing power plants from the Clean Air Act list of sources of hazardous air pollutants. At the same time, the Court vacated the Clean Air Mercury Rule. EPA is reviewing the Court's decisions and evaluating its impacts. Currently, the FDEP has informally announced their intention to begin mercury rulemaking in fall 2008 that will likely have monitoring requirements comparable to CAMR.

Given the vacatur, capital spending for this program is anticipated to be complete in 2008 and monitoring to commence in 2009 using company resources. Therefore, for the period of January 2009 through December 2009, there will be no capital or O&M expenditures for this program.

Q. Please describe how Tampa Electric reached the decision to sell SO_2 emission allowances in 2009 and discuss the company's allowance needs for 2009 and beyond.

A. After the completion of the repowering project at Bayside Power Station, Tampa Electric performed a thorough

evaluation of SO_2 emission allowance needs based on current system conditions and those projected to occur over the next 20 years. Current system conditions included the reduction in coal usage due to repowering and the impacts of the CD and CFJ on SO_2 emission allowances. Future conditions took into account generation expansion and the impact of new federal environmental regulations on SO_2 emission allowances. At the conclusion of the evaluation, it became evident that the company had a surplus of allowances that could be sold in the allowance marketplace. Furthermore, there will be an adequate remaining allowance inventory that will meet the company's needs for the next 20 years.

In balancing the appropriate quantity to sell with the company's expected future needs, Tampa Electric will continue to evaluate potential sales opportunities of future quantities of surplus allowances.

Q. What is the impact of the recent vacatur of the CAIR and CAMR rules on Tampa Electric's ECRC projects?

A. The vacatur of CAIR should have minimal impact on Tampa Electric's ECRC projects associated with NO_x and SO_2 abatement. These projects were initiated as a result of

the CD signed between EPA and Tampa Electric therefore, the company anticipates continuing its efforts to complete and maintain the projects.

The vacatur of CAMR occurred after Tampa Electric had begun the procurement of equipment necessary to meet the intent of the original rule; however, the company was able to stop a significant portion of the total equipment purchase.

Tampa Electric anticipates a replacement to the CAMR rule to become effective in the near future therefore, during this time of review, the company plans to utilize the resources already secured to establish a baseline of mercury emissions.

Q. Please summarize your testimony.

A. Tampa Electric's settlement agreements with FDEP and EPA require significant reductions in emissions from Tampa Electric's Big Bend and Gannon Stations. The Orders established definite requirements and time frames in which air quality improvements must be made and result in reasonable and fair outcomes for Tampa Electric, its community and customers, and the environmental agencies.

My testimony identified projects which are legally required by these Orders. I described the progress Tampa Electric has made to achieve the more stringent environmental standards. I have identified estimated costs, by project, which the company expects to incur in 2009. Additionally, my testimony identified other projects that are required for Tampa Electric to meet the environmental requirements and I provided the associated 2009 activities and projected expenditures. Finally, I addressed the prudent sales of SO_2 emissions allowances that are anticipated to occur in 2009 and demonstrated that Tampa Electric's approach toward the allowance quantity contained in the sales will not jeopardize the company's long-term future allowance needs.

Q. Does this conclude your testimony?

A. Yes it does.

GULF POWER COMPANY

Before the Florida Public Service Commission
Prepared Direct Testimony and Exhibit of
James O. Vick
Docket No. 080007-EI
April 2, 2008

Q. Please state your name and business address.

A. My name is James O. Vick and my business address is One Energy Place, Pensacola, Florida, 32520.

Q. By whom are you employed and in what capacity?

A. I am employed by Gulf Power Company as the Director of Environmental Affairs.

Q. Mr. Vick, will you please describe your education and experience?

A. I graduated from Florida State University, Tallahassee, Florida, in 1975 with a Bachelor of Science Degree in Marine Biology. I also hold a Bachelor's Degree in Civil Engineering from the University of South Florida in Tampa, Florida. In addition, I have a Masters of Science Degree in Management from Troy State University, Pensacola, Florida. In August 1978, I joined Gulf Power Company as an Associate Engineer and have since held various engineering positions with increasing responsibilities such as Air Quality Engineer, Senior Environmental Licensing Engineer, and Manager of Environmental Affairs. In 2003, I assumed my present position as Director of Environmental Affairs.

Q. What are your responsibilities with Gulf Power Company?

A. As Director of Environmental Affairs, my primary responsibility is overseeing the activities of the Environmental Affairs area to ensure the Company is, and remains, in compliance with environmental laws and regulations, i.e. both existing laws and such laws and regulations that may be enacted or amended in the future. In performing this function, I am responsible for numerous environmental activities.

Q. Are you the same James O. Vick who has previously testified before this Commission on various environmental matters?

A. Yes.

Q. Mr. Vick, what is the purpose of your testimony?

A. The purpose of my testimony is to support Gulf Power Company's Environmental Cost Recovery Clause (ECRC) final true-up for the period January through December 2007.

Q. Have you prepared an exhibit that contains information to which you will refer in your testimony?

A. Yes, I have. My exhibit includes the following document:

- Letter of Clarification from the Florida Department of Environmental Protection (FDEP) on Department Policy after Environmental Protection Agency (EPA) Suspension of 316(b) Phase II Existing Facilities Rule

Counsel: We ask that Mr. Vick's exhibit consisting of one document be marked as Exhibit No. _____(JOV-1).

Q. Mr. Vick, please compare Gulf's recoverable environmental capital costs included in the final true-up calculation for the period January 2007 through December 2007 with the approved estimated true-up amounts.

A. As reflected in Ms. Martin's Schedule 6A, the actual recoverable capital costs were $33,735,639 as compared to the estimated true-up total of $33,857,505. This results in a variance of $121,866 or 0.4% below the estimated true-up. I will address two projects that contribute to this variance: Precipitator Upgrades for CAM Compliance and SO_2 Allowances.

Q. Please explain the capital project variance of (5.2%) or ($109,704) in Precipitator Upgrades for CAM Compliance (Line Item 1.22).

A. At the time of the 2007 ECRC estimated/actual true-up filing, Gulf expected the Crist Unit 5 precipitator upgrade to be completed by December 2007; however, the project was not placed in service until March of 2008 due to changes in the unit outage schedule. This change in the timing of the Crist Unit 5 upgrade was reflected in the 2008 projection filing.

Q. Please explain the capital variance of 36.0% or $22,079 in SO_2 Allowances (Line Item 1.28).

A. This variance resulted from the fact that the sulfur content of the coal actually burned during the period was lower than anticipated. This lower sulfur

content allowed Gulf to surrender fewer SO_2 allowances from inventory, meaning that Gulf's inventory balance and working capital was higher than anticipated.

Q. How do the actual O&M expenses for the period January 2007 to December 2007 compare to the amounts included in the estimated true-up filing?

A. Ms. Martin's Schedule 4A reflects that Gulf's recoverable environmental O&M expenses for the current period were $16,904,925, as compared to the estimated true-up of $17,849,512. This results in a net variance of $944,587 or 5.3% below the estimated true-up. I will address eight O&M projects and programs that contribute to this variance -- Title V, Emission Monitoring, General Water Quality, State NPDES Administration, General Solid and Hazardous Waste, Above Ground Storage Tanks, FDEP NO_X Reduction Agreement, and SO_2 Allowances.

Q. Please explain the (13.6%) variance of ($10,905) in Title V (Line Item 1.3).

A. Title V expenses are associated with the implementation of Gulf's Title V permits. There were no significant modifications to the Plants Smith and Scholz Title V permits during 2007. Therefore, the expenses associated with these permits were less than previously projected.

Q. Please explain the variance of (10.2%) or ($49,060) in the category Emission Monitoring (Line Item 1.5).

A. The Emission Monitoring variance resulted primarily from the Daniel continuous emission monitoring (CEM) expenses recoverable through the

ECRC being less than originally projected. The CEM maintenance expenses at Plant Daniel were also lower than expected due to the installation of new flow monitors in October of 2007.

Q. Please explain the variance of 12.5% or $42,989 in the category General Water Quality (Line Item 1.6).

A. The General Water Quality variance resulted primarily from re-initiating portions of the Cooling Water Intake Program biological sampling and data collection plan. The scope of Gulf's 2007 Cooling Water Intake Program biological sampling plan was reduced in March of 2007, as reflected in the estimated/actual true-up filing, after EPA announced that the rule it adopted pursuant to Section 316(b) of the Clean Water Act should be considered suspended. After the estimated/actual true-up filing, Gulf decided to move forward with these plans after receiving guidance from FDEP regarding implementation of Section 316(b) of the Clean Water Act. A copy of the letter from FDEP is included in my exhibit.

Q. Please explain the 99.3% variance of $34,500 in the category State NPDES Administration (Line Item 1.8).

A. This variance resulted from the timing of payment of the 2008 annual state National Pollution Discharge Elimination System (NPDES) industrial wastewater permit fees. The fees were paid during December 2007, but had been projected for January 2008.

Q. Please explain the 23.3% variance of $128,982 in Line Item 1.11, General Solid and Hazardous Waste.

A. This line item includes expenses for proper identification, handling, storage, transportation and disposal of solid and hazardous wastes as required by federal and state regulations. The program includes expenses for Gulf's generating and power delivery facilities. The 2007 variance resulted primarily from inadvertently omitting waste removal and disposal costs for Gulf's power delivery facilities from the estimated/actual true-up filing; however, these expenses were appropriately included in Gulf's original 2007 projection.

Q. Please explain the variance of (40.8%) or ($41,195) in the category entitled Above Ground Storage Tanks (Line Item 1.12).

A. Plant Crist originally planned to recoat several above ground storage tank concrete secondary containment areas during 2007. After further evaluation, Plant Crist determined that this work could be postponed.

Q. Please explain the (6.2%) variance of ($185,238) in Line Item 1.19, FDEP NO_X Reduction Agreement.

A. This O&M line item includes the cost of anhydrous ammonia, urea, air monitoring, and general operation and maintenance expenses related to the activities undertaken in connection with the FDEP NO_X Reduction Agreement. The project variance resulted primarily from delaying maintenance expenses associated with the Crist Unit 5 Selective Non-Catalytic Reduction (SNCR) urea injection system from 2007 to 2008 due to a change in the outage schedule. This under run was partially offset by an increase in the Crist Unit

7 Selective Catalytic Reduction (SCR) and Crist Units 4 – 6 SNCR maintenance expenses.

Q. Please explain the variance of (7.5%) or ($814,773) in SO_2 Allowances (Line Item 1.20).

A. This variance resulted from the fact that the sulfur content of the coal actually burned during the period was lower than anticipated. This lower sulfur content allowed Gulf to surrender fewer SO_2 allowances.

Q. Mr. Vick, does this conclude your testimony?

A. Yes.

GULF POWER COMPANY

Before the Florida Public Service Commission
Prepared Direct Testimony of
James O. Vick
Docket No. 080007-EI
August 4, 2008

Q. Please state your name and business address.

A. My name is James O. Vick and my business address is One Energy Place, Pensacola, Florida, 32520.

Q. By whom are you employed and in what capacity?

A. I am employed by Gulf Power Company as the Director of Environmental Affairs.

Q. Mr. Vick, will you please describe your education and experience?

A. I graduated from Florida State University, Tallahassee, Florida, in 1975 with a Bachelor of Science Degree in Marine Biology. I also hold a Bachelor's Degree in Civil Engineering from the University of South Florida in Tampa, Florida. In addition, I have a Masters of Science Degree in Management from Troy State University, Pensacola, Florida. I joined Gulf Power Company in August 1978 as an Associate Engineer. I have since held various engineering positions with increasing responsibilities such as Air Quality Engineer and Senior Environmental Licensing Engineer. In 2003, I assumed

my present position as Director of Environmental Affairs.

Q. What are your responsibilities with Gulf Power Company?

A. As Director of Environmental Affairs, my primary responsibility is overseeing the activities of the Environmental Affairs section to ensure the Company is, and remains, in compliance with environmental laws and regulations, i.e., both existing laws and such laws and regulations that may be enacted or amended in the future. In performing this function, I am responsible for numerous environmental activities.

Q. Are you the same James O. Vick who has previously testified before this Commission on various environmental matters?

A. Yes.

Q. Mr. Vick, what is the purpose of your testimony?

A. The purpose of my testimony is to support Gulf Power Company's estimated true-up for the period from January 1, 2008 through December 31, 2008. This true-up is based on six months of actual data and six months of estimated data.

Q. Mr. Vick, please compare Gulf's recoverable environmental capital costs included in the estimated true-up calculation for the period January 1, 2008 through December 31, 2008 with approved projected amounts.

A. As reflected in Ms. Ritenour's Schedule 6E, the recoverable capital costs approved in the original projection total $37,497,220, as compared

to the estimated true-up amount of $38,990,615. This results in a projected variance of $1,493,395. There are two capital projects and programs that contributed to the majority of this variance: the CAIR/CAMR/CAVR Compliance Program and SO_2 allowances. The variances for these projects are discussed below.

Q. Please explain the $1,376,116 variance in the CAIR/CAMR/CAVR Compliance Program (Line Item 1.26).

A. The majority of this variance is a result of clearings to plant for portions of the Plant Crist scrubber project being inadvertently omitted from the original 2008 projection. The Units 4 and 5 boiler controls and ductwork modifications were placed in-service during the April-May 2008 timeframe and the substation/transmission upgrades are scheduled to be placed in-service during December of 2008. Expenditures for these upgrades were included in the 2008 budget projection; however, the expected plant clearings associated with the upgrades were not included in the projection filing.

It was necessary for Plant Crist to upgrade the Units 4 and 5 boiler controls in order for the units to tie into a common scrubber vessel and draft system with Crist Units 6 and 7. The original boiler controls did not meet the speed and reliability requirements necessary for proper draft control and boiler implosion protection that will be required for a combined discharge into the common scrubber stack. The substation/transmission upgrades were necessary to provide additional station service needs necessary to operate the Crist Units 4 through 7 scrubber. The Plant Crist scrubber variance was partially offset by the cancellation of the Daniel Activated Carbon Injection (ACI) project after

vacatur of the Clean Air Mercury Rule (CAMR) rule earlier this year.

Q. Please discuss the CAMR vacatur and its affect on Gulf's CAIR/CAMR/CAVR Compliance Program (Line Item 1.26).

A. On February 8, 2008, the U.S. Court of Appeals for the District of Columbia Circuit issued an opinion vacating EPA's CAMR. The vacatur became effective with the issuance of the court's mandate on March 14, 2008, nullifying CAMR mercury emission control obligations and monitoring requirements. With CAMR voided, electric generating facilities are no longer required to install mercury controls to meet the CAMR emission limits and are not required to install mercury monitoring equipment to meet the January 2009 monitoring deadline. In response to the CAMR vacatur Gulf has canceled the Plant Daniel ACI and mercury monitoring projects and moved further mercury monitoring capital costs out to at least 2010.

EPA can be expected to initiate a rulemaking proceeding to develop maximum achievable control technology (MACT) standards for power plants; however, this process could take up to three years to complete. The CAMR court decision does not impact state mercury rules that may continue to be developed in Florida.

Q. Please explain the $87,381 variance in SO_2 Allowances in Line Item 1.31.

A. As explained in the 2007 Final True-Up filing, Gulf's 2007 SO_2 allowance inventory balance and net working capital balance was higher than anticipated because the sulfur content of the coal burned during 2007 was lower than Gulf projected. As a result, the 2008 projected variance is due to

higher revenue requirements on this higher balance.

Q. How do the estimated/actual O&M expenses compare to the original projection?

A. Ms. Ritenour's Schedule 4E reflects that Gulf's recoverable environmental O&M expenses for the current period are now estimated to be $15,216,886 as compared to the original projection of $14,148,879. This will result in a year-end variance of $1,068,007. There are four O&M projects and programs that contributed to the majority of this variance which I will discuss: Groundwater Contamination Investigation; General Solid and Hazardous Waste; FDEP NOx Reduction Agreement; and the CAIR/CAMR/CAVR Compliance Program.

Q. Please explain the variance of $107,961 in Groundwater Contamination Investigation (Line Item 1.7) and the $42,306 variance in General Solid and Hazardous Waste (Line Item 1.11).

A. These variances are due to an error in the calculation of total labor costs included in the projection filing.

Q. Please explain the variance of $652,104 in Line Item 1.19, FDEP NOx Reduction Agreement.

A. The FDEP NOx Reduction Agreement includes the cost of anhydrous ammonia, urea, air monitoring, and general operation and maintenance expenses related to the activities undertaken in connection with the Plant Crist FDEP Agreement for Ozone Attainment. The project variance primarily

resulted from additional maintenance expenses associated with the Crist Units 4 and 5 Selective Non-Catalytic Reduction (SNCR) urea injection systems. As mentioned in Gulf's ECRC 2007 Final True-Up filing, the Unit 5 maintenance activities were postponed from 2007 to 2008 due to a change in the outage schedule. In addition, the Unit 4 maintenance expenses were not included in the Plant Crist budget projection.

Q. Please explain the variance of $197,866 in CAIR/CAMR/CAVR Compliance Program (Line Item 1.20).

A. During 2007, capital expenditures for ACI systems at Plant Daniel were added to Gulf's Compliance Plan for mercury control as part of the obligation to meet CAMR requirements beginning in 2010. Based on the vacatur of CAMR earlier this year, the Plant Daniel ACI projects have been removed from the compliance schedule and budget projections. The Daniel mercury monitors that were scheduled to be placed in-service during 2008 were also removed from the compliance schedule and the budget. Capital expenditures that Gulf incurred for these projects prior to the CAMR vacatur were expensed to Line Item 1.20 when the projects were canceled.

Q. Mr. Vick, are there any other O&M project variances that you would like to explain?

A. Yes, the Emission Monitoring line item, Line Item 1.5, had a ($132,937) variance. This variance is primarily related to Compliance Assurance Monitoring (CAM) certification testing associated with Gulf's Title V permit renewals. The testing originally planned for this permit renewal cycle has not

yet occurred and FDEP may not require this testing. Relative accuracy test audit (RATA) expenses were also less than originally projected. Fewer RATA tests have been required than originally expected.

Q. Does this conclude your testimony?

A. Yes.

GULF POWER COMPANY

Before the Florida Public Service Commission

Prepared Direct Testimony and Exhibit of

James O. Vick

Docket No. 080007-EI

August 29, 2008

Q. Please state your name and business address.

A. My name is James O. Vick, and my business address is One Energy Place, Pensacola, Florida, 32520.

Q. By whom are you employed and in what capacity?

A. I am employed by Gulf Power Company as the Director of Environmental Affairs.

Q. Mr. Vick, will you please describe your education and experience?

A. I graduated from Florida State University, Tallahassee, Florida, in 1975 with a Bachelor of Science Degree in Marine Biology. I also hold a Bachelor's Degree in Civil Engineering from the University of South Florida in Tampa, Florida. In addition, I have a Masters of Science Degree in Management from Troy State University, Pensacola, Florida. I joined Gulf Power Company in August 1978 as an Associate Engineer. I have since held various engineering positions with increasing responsibilities such as Air Quality Engineer, Senior Environmental Licensing Engineer, and Manager of Environmental Affairs. In 2003,

I assumed my present position as Director of Environmental Affairs.

Q. What are your responsibilities with Gulf Power Company?

A. As Director of Environmental Affairs, my primary responsibility is overseeing the activities of the Environmental Affairs section to ensure the Company is, and remains, in compliance with environmental laws and regulations, i.e., both existing laws and such laws and regulations that may be enacted or amended in the future. In performing this function, I have the responsibility for numerous environmental activities.

Q. Are you the same James O. Vick who has previously testified before this Commission on various environmental matters?

A. Yes.

Q. Mr. Vick, what is the purpose of your testimony?

A. The purpose of my testimony is to support Gulf Power Company's projection of environmental compliance costs recoverable through the Environmental Cost Recovery Clause (ECRC) for the period from January 2009 through December 2009.

Q. Have you prepared an exhibit that contains information to which you will refer in your testimony?

A. Yes, I have. My exhibit includes the following documents:

- Plant Crist Consumptive Use Permit
- Northwest Florida Water Management District (NWFWMD)

correspondence regarding the proposed Crist Water Conservation project.

Counsel: We ask that Mr. Vick's' Exhibit consisting of two documents be marked as Exhibit No. _(JOV-2).

Q. Mr. Vick, please identify the capital projects included in Gulf's ECRC projection filing.

A. The environmental capital projects for which Gulf seeks recovery through the ECRC are described in Schedules 3P, 4P, and 5P attached to the Company's petition in this docket. The exhibits attached to the petition have been incorporated into hearing exhibits that are being sponsored in this proceeding by Ms. Ritenour. I am supporting the expenditures, clearings, retirements, salvage and cost of removal currently projected for each of these projects and the monthly costs for emission allowances. Ms. Ritenour compiled these schedules and has calculated the associated revenue requirements for Gulf's requested recovery.

Q. Have all of the capital projects shown on Ms. Ritenour's schedules been approved by the Commission?

A. No. In addition to previously approved projects, Gulf's 2009 ECRC capital projection includes both new projects and expansions of existing, previously approved projects.

Q. Mr. Vick, please identify the expansions of existing, previously approved projects.

A. There are four previously approved projects with expanded activities that have projected capital expenditures during 2009. Three of the projects are related to Gulf's existing Air Quality programs: Continuous Emission Monitoring (CEMs) replacements, Plant Crist FDEP Agreement for Ozone Attainment, and the CAIR/CAMR/CAVR Compliance Program. The Crist Water Conservation Project is also projected to have additional capital expenditures during 2009.

Q. Mr. Vick, please describe the projects included in the 2009 projection for (Line 1.5) Continuous Emission Monitoring (CEM).

A. During the 2009 recovery period, the CEMs project includes the replacement of opacity monitors at Plant Crist on Units 4 and 5 and the installation of CEMs equipment for the new Plant Crist scrubber stack. Opacity monitors are needed to maintain compliance with the Clean Air Act Amendment (CAAA) requirements. The existing monitors are approaching the end of their useful lives and will be retired upon replacement. CEMs equipment will be installed in the scrubber stack to monitor SO_2, NOx, CO_2 and flow pursuant to the CAAA. The 2009 scrubber CEMs expenditures include a new CEMs shelter as well as the monitoring equipment. The 2009 expenditures are expected to be $439,830.

Q. Please describe the expenditures included in the 2009 projection for the Crist FDEP Agreement for Ozone Attainment (Line 1.19).

A. For the 2009 projection, Gulf has included additional capital costs to meet the terms of the August 28, 2002, agreement with the Florida Department of Environmental Protection (FDEP). Gulf will be installing a new layer of catalyst in the Crist Unit 7 Selective Catalytic Reduction (SCR) during 2009 that was originally projected to be installed during 2008. This new layer of catalyst is part of the on-going periodic catalyst maintenance and management activity. The projected 2009 capital expenditures for the Crist FDEP Agreement project are $720,000.

Q. Mr. Vick, please describe the capital projects included in Gulf's CAIR/CAMR/CAVR Compliance Program (Line Item 1.26) that will impact the 2009 projected ECRC revenue requirements.

A. For the purpose of the 2009 projection of ECRC revenue requirements in Ms. Ritenour's testimony, expenditures totaling $521.9 million are projected to be cleared to plant-in-service for the CAIR/CAMR/CAVR Compliance Program. This placed-in-service amount includes expenditures made during 2009 as well as previous years. The capital projects included in the Compliance Program that will impact the 2009 ECRC revenue requirements are the Crist Units 4 through 7 scrubber project ($517.5 million), Low NOx burners at Plant Daniel on Unit 2 ($167,276), and Selective Non-Catalytic Reduction (SNCR) technologies at Plant Smith on Unit 1 ($3.9 million) and Unit 2 ($371,502).

Q. Please describe the Crist Units 4 through 7 scrubber project.

A. The Commission approved the Crist Units 4 through 7 scrubber project for ECRC recovery in Order No. PSC-07-0721-S-EI in September 2007. As noted in its original CAIR/CAMR/CAVR Compliance Plan, Gulf proposed the Crist Scrubber project to assure compliance with Clean Air Interstate Rule (CAIR), Clean Air Mercury Rule (CAMR) and Clean Air Visibility Rule (CAVR) and address the significant local concerns in the Pensacola area. A scrubber was the only SO_2 compliance option for Crist Units 6 and 7, and because of their size and emissions, these units were the best, most cost-effective candidates for SO_2 scrubbing and mercury removal. Installing additional ductwork and boiler controls to include Crist Units 4 and 5 was also cost-effective and increased incremental SO_2 and mercury emission reductions. Construction was scheduled to take place between 2007 and 2009 at an estimated cost of $528 million.

The total budget for the Plant Crist scrubber project is now approximately $576 million for the time period from 2007 to 2012. Most of the cost increase is due to the decision to install turbine upgrades to offset increased station losses due to the scrubber installation ($12 million for HP/IP turbine upgrades and $26 million for LP turbine upgrades) and the purchase of rather than the lease of gypsum barges ($8.5 million). The extended project timeframe is also due to adding the LP turbine upgrade to the project. A phased approach for the turbine upgrades has been adopted due to the availability of LP parts and the outage schedule.

The Plant Crist scrubber project is well underway, and numerous supporting facilities will be placed in-service during 2009. Other than the

LP turbine upgrades scheduled for 2012, most of the scrubber project is scheduled to be completed during 2009 including the Crist HP/IP turbine upgrade, gypsum tractor garage and barges, and substation and transmission upgrades.

At present, the work force for the project has been mobilized. Site preparation activities for the future gypsum dewatering and handling facilities, fuel handling relocations, limestone handling and storage, as well as the deep well location and project laydown infrastructure have been performed. The foundation and concrete column of the new 490 foot stack has also been completed. The stack liner sections have been fabricated and are ready for installation. Numerous foundations are complete, with the largest being the Jet Bubbling Reactor (JBR) foundation. Fabrication of the fiberglass JBR shell has begun which, when completed, will be 119 feet in diameter and 55 feet tall. Several other foundations are currently being constructed, most of which have included deep foundation work (auger cast piles, pipe piles, etc.). The foundations include ductwork support steel foundations, draft fan foundations, power transformer foundations, and temporary foundations for on-site fabrication.

By year end 2008 the Plant Crist scrubber project is estimated to be 55% complete. Projected capital expenditures for 2009 for the scrubber project are $243 million.

Q. Please address the projected capital expenditures in 2009 for the Daniel Low NOx burners.

A. Gulf is a co-owner of Daniel Units 1 and 2 with Mississippi Power Company. A number of retrofit projects for the Daniel units were set forth in Gulf's CAIR/CAMR/CAVR Compliance Plan, and all those projects other than SCRs for Units 1 and 2 were approved by the Commission in Order No. PSC-07-0721-S-EI (Mercury Monitoring, SNCRs and Low NOx Burners, and the Scrubber). In light of the CAIR and CAMR developments, many of the approved Plant Daniel projects have been canceled or deferred. The Daniel Unit 2 Low NOx burner remains the only part of the Compliance Plan that has projected capital expenditures for Plant Daniel during 2009. The Daniel Unit 2 Low NOx burners were ordered prior to the CAIR vacatur and are scheduled to be placed in-service during December of 2008. $167,276 of additional capital expenditures related to this project are forecast to be cleared to service in 2009.

Q. Please address Smith Units 1 and 2 SNCR capital expenditures forecasted for 2009.

A. SNCR installations for Smith Units 1 and 2 were approved by the Commission in Order No. PSC-07-0721-S-EI as part of Gulf's CAIR/CAMR/CAVR Compliance Plan. In addition to meeting CAIR requirements, the SNCRs will be needed to maintain local compliance with the more stringent 8-hour ozone standard. The Smith Unit 2 SNCR will be placed in service in the fall of 2008, but additional capital

expenditures of $371,502 are forecast for 2009. The Smith Unit 1 SNCR will be placed in-service during March of 2009. The 2009 projected clearings to plant for the Smith Unit 1 SNCR are approximately $ 3.9 million.

Q. Have there been any developments regarding Gulf's CAIR/CAMR/CAVR Compliance Program that have an impact on capital projects projected for recovery during 2009?

A. Yes. Since the Commission's approval of Gulf's Compliance Program, there have been a number of developments and two significant court decisions that will impact Gulf's Compliance Program. In February 2008 the District of Columbia Court of Appeals vacated the CAMR. In July 2008 the District of Columbia Court of Appeals also vacated the CAIR rule.

On February 8, 2008, the U.S. Court of Appeals for the District of Columbia Circuit issued an opinion vacating EPA's CAMR. The vacatur became effective with the issuance of the court's mandate on March 14, 2008, nullifying CAMR mercury emission control obligations and monitoring requirements. With CAMR voided, electric generating facilities are no longer required to install mercury controls to meet the CAMR emission limits and are not required to install mercury monitoring equipment to meet the January 2009 monitoring deadline. In response to the CAMR vacatur, the Plant Daniel Activated Carbon Injection (ACI) and mercury monitoring projects have been canceled. The Plants Crist and Smith mercury monitoring capital expenditures have been deferred to

2010.

EPA can be expected to initiate a rulemaking proceeding to develop maximum achievable control technology (MACT) standards for power plants; however, this process could take multiple years to complete. The CAMR court decision does not impact state mercury rules that may continue to be developed in Florida.

On July 11, 2008, in response to petitions brought by certain states and regulated industries challenging particular aspects of the CAIR, the Circuit Court of Appeals for the District of Columbia issued a decision vacating CAIR in its entirety, and remanding it to EPA for further action consistent with its opinion. However, CAIR will remain in effect until the court issues its mandate in the case. Recently, the court extended until late September EPA's time for requesting reconsideration of the court's decision, and no mandate from the court is expected before that time. Therefore, the CAIR remains in effect and technically requires compliance. In addition, FDEP rules requiring CAIR implementation also remain in effect as of the time of the submission of this testimony.

Gulf Power's overall compliance strategy has been developed in response to numerous federal and state regulatory requirements, many of which remain unaffected by the court's ruling; however, the court's decision has the potential to impact future decisionmaking regarding capital expenditures, the installation and operation of pollution control equipment, the purchase of emissions allowances, and the carrying cost of the existing emissions allowances. The ultimate impact of this decision, if any, cannot be determined at this time and may depend on subsequent

legal action, including issuance of the court's mandate, and future EPA and FDEP rulemaking.

Q. How have these developments affected Gulf's Crist scrubber project?

A. In terms of timing, the Crist scrubber is needed for Phase I CAIR compliance in 2010. If the vacatur of the CAIR becomes final, Gulf anticipates that the Crist Scrubber project would still be needed for Crist Units 6 and 7 to comply with the CAVR by 2013. Given that the Crist Scrubber project is still needed for CAVR compliance, regardless of the resolution of CAIR, the issue Gulf faced was whether or not to defer the Crist Scrubber project for several years. Gulf determined that the Crist Scrubber project should proceed for a variety of reasons. First, over $175 million of equipment has already been ordered. Second, significant construction has already occurred, and the construction workforce has been fully mobilized; deferral would significantly increase the total project costs. As noted earlier, the project will be approximately 55% complete by the end of 2008. Demobilization would mean the potential loss of personnel already on site. Deferral for three years until 2012 to meet 2013 CAVR requirements would increase the construction cost of the project by approximately $53 million. The associated increase in AFUDC, which Gulf would seek for recovery, would be at least $45 million. Thus, deferral would cost around $100 million. Third, if the CAIR rule eventually is vacated, it is also reasonable to anticipate that EPA and/or FDEP will act again to address the same issues. If they do, the scrubber project would continue to be the best, most cost-effective means of limiting SO_2

and mercury emissions, with Gulf potentially facing increased costs in order to meet accelerated in service dates.

Q. How have these developments regarding CAIR and CAMR affected other aspects of Gulf's CAIR/CAMR/CAVR Compliance Plan?

A. That is best addressed on a plant by plant basis.

The Crist Unit 6 SCR was approved as part of Gulf's CAIR/CAMR/CAVR Compliance Plan in Order No. PSC-07-0721-S-EI. As noted in the Compliance Plan and the Commission's order, the Crist Unit 6 SCR is needed to meet NOx reductions. Additional NOx reductions are needed at Plant Crist, and only SCR technology will provide the additional increment needed. The SCR on Unit 6 is important to ensure that Pensacola maintains attainment with the newly announced 8-hour ozone standard and addresses significant local pressures to continue NOx reductions from the plant. Finally, the Crist Unit 6 SCR was also needed for CAIR and CAMR compliance. While CAMR compliance is no longer required, CAIR requirements still remain applicable. Even if CAIR is ultimately vacated, the Crist Unit 6 SCR will still be needed to satisfy FDEP requirements, the new 8-hour ozone standard and local pressure to reduce NOx emissions. Gulf has deferred the in-service date for the Crist Unit 6 SCR from 2010 to 2012, and is forecasting capital expenditures of almost $5 million in 2009.

As I previously discussed, the Plant Crist mercury monitoring projects have been deferred until 2010, but the CEM system for the scrubber stack is continuing with expenditures forecast for 2009. The

scrubber CEM system is included in Line Item 1.5.

The only approved activity at Plant Scholz was for mercury monitoring. The Scholz monitor was installed in 2008. There are no forecasted capital expenditures for 2009.

At Plant Smith the approved SNCRs for Units 1 and 2 are still needed for ozone non-attainment and local pressure regarding NOx emissions. Thus, they are scheduled for completion in 2008 and 2009. I have previously addressed the amounts forecasted to be placed in-service during 2009 for each project. The Plant Smith mercury monitoring projects have been deferred until 2010.

Plant Daniel Units 1 and 2 were previously scheduled to receive SNCR retrofits in 2011 and 2012, respectively. Expenditures for these projects were projected to begin in 2009. Plant Daniel planned to operate the SNCRs until the SCRs were placed in-service. The SNCR projects have since been removed from the compliance schedule, and the SCR installation has been accelerated by two years. Gulf anticipates that the Daniel SCR installations will be important to ensure that Plant Daniel maintains attainment with the newly announced 8-hour ozone standard. The Daniel SCRs were also needed for CAIR and CAMR compliance. While CAMR compliance is no longer required, CAIR requirements still remain applicable. Even if CAIR is ultimately vacated, the Daniel SCRs will likely be needed to comply with the new 8-hour ozone standard. There are no projected 2009 expenditures for the Daniel SCR projects.

The Daniel Unit 1 and 2 Low NOx burners were planned for Phase I CAIR annual and seasonal NOx cap and trade allowance programs.

Gulf determined that the Daniel Unit 2 Low NOx burner installation, which is scheduled for completion in 2008, should proceed based on the project schedule. The Daniel Unit 1 Low NOx burner project has been canceled. Similarly, the previously approved mercury monitoring for Plant Daniel has been canceled.

The Daniel scrubber project, which was previously approved by the Commission as part of Gulf's CAIR/CAMR/CAVR Compliance Plan, continues to be an effective means of reducing SO_2 and mercury emissions. It is still anticipated that this scrubber project may be required for CAVR compliance, even if it is not required for CAMR and CAIR compliance. However, there are no projected capital expenditures in 2009 for which Gulf seeks recovery in the ECRC factor.

Q. Please provide an update on the new 8-hour ozone standard implementation.

A. In March 2008, the EPA finalized its revisions to the eight-hour ozone standard, increasing its stringency. The EPA plans to designate nonattainment areas based on the new standard by 2010, and new nonattainment areas are expected. State Implementation Plans (SIPs) will be developed for these areas by 2013. These SIPs will prescribe emission control measures designed to bring areas into attainment. Although designation of a number of new nonattainment areas is anticipated, specific designations and any subsequent SIP control measures will be based in part on air quality measurements that will be made in the future. The ultimate outcome of this matter cannot be

determined at this time and will depend on subsequent legal action and/or future nonattainment designations and regulatory plans.

Q. Mr. Vick, please describe the project included in the 2009 projection entitled Crist Water Conservation (Line Item 1.24) for which Gulf is seeking cost recovery through the ECRC.

A. The Crist Water Conservation Program included in Line Item 1.24 is part of Gulf's water conservation and consumptive use efficiency program required by the Company's consumptive water use permit. Plant Crist's consumptive use permit, issued by the Northwest Florida Water Management District (NWFWMD), requires the plant to implement measures to increase water conservation and efficiency at the facility. Gulf Power has entered into negotiations with Emerald Coast Utilities Authority (ECUA) to utilize reclaimed water from its proposed wastewater treatment plant. The reclaimed water will be used as makeup water for the Plant Crist scrubber project and the Plant Crist Units 6 and 7 cooling towers. Plant Crist will also return some reclaimed water, up to 6 million gallons per day (MGD), in the form of cooling tower blowdown to ECUA as industrial wastewater for land application. The NWFWMD has agreed that this is a valid project to pursue for continued implementation of the water conservation effort. The total projected capital expenditures for this project are $17.4 million. The Plant Crist Consumptive Use Permit and correspondence from the NWFWMD regarding the Crist Water Conservation Project is included in my Exhibit, JOV-2.

For the purpose of the 2009 projection of ECRC revenue

requirements, expenditures totaling $1.3 million are projected to be incurred for portions of the Plant Crist water conservation project that will be placed in-service during 2009. These capital projects include an electrical building and piping from the storage tank to the booster pump.

Q. Mr. Vick please describe the capital projects shown on Ms. Ritenour's schedules that have not been previously approved by the Commission.

A. The Spill Prevention Control and Countermeasures (SPCC) Compliance project is needed to help ensure compliance with the revisions to the SPCC regulation, 40 CFR Part 112. These revisions resulted in oil storage containers having a capacity greater than or equal to 55 gallons being classified as bulk storage containers that are subject to the secondary containment requirements in 40 CFR Part 112.8(c). During 2009, Plant Smith plans to install secondary containment for a small fuel tank and a padmount transformer. The total projected capital expenditures for this project are $25,000.

These expenditures are included in Line Item 1.20, which has been renamed SPCC Compliance. As shown on Ms. Ritenour's schedules, this line item previously titled "Crist Stormwater Collection" has been renamed "SPCC Compliance" to better reflect the full scope of this activity. The "Crist Stormwater Collection" project was Gulf's first capital project required to help ensure compliance with the revised SPCC regulation.

Q. Mr. Vick, are you including the purchase of allowances in your 2009 projection filing?

A. Yes. We currently have plans to purchase annual and seasonal NOx allowances as well as SO_2 allowances during 2009. Gulf's compliance strategy continues to include forward contracts, swaps, and spot market purchases of allowances depending on market prices.

Q. Please compare the Environmental Operation and Maintenance (O&M) activities listed on Schedule 2P of Ms. Ritenour's Exhibit to the O&M activities approved for cost recovery in past ECRC proceedings.

A. All of the O&M activities listed on Schedule 2P have been approved for recovery through the ECRC in past proceedings, except for three new activities. The Annual Climate Change Registry Fees are being included in the CAIR/CAMR/CAVR Compliance Program for the first time. SPCC Compliance expenses are being included in the Solid and Hazardous Waste line item, and expenses for the Impaired Waters Rule are being included in the General Water Category line item.

Q. Mr. Vick, please describe the regulations requiring the Annual Climate Change Registry Fees that are being included in the CAIR/CAMR/CAVR Compliance Program (Line Item 1.20).

A. At the June 2008 "Serve to Preserve Florida Summit on Global Climate Change," Governor Crist signed legislation (HB 7135) creating Florida Statute 403.44, the "Florida Climate Protection Act." This Act was created to establish a market-based program to reduce greenhouse gas

emissions from electric utilities. The Act authorizes the FDEP to establish methodologies, reporting periods, and reporting systems that will be used when utilities report to the Climate Registry. Gulf Power expects to begin incurring annual costs associated with joining the Climate Registry during 2009. Gulf also anticipates incurring expenses for monitoring and reporting greenhouse gas emissions. The 2009 projected expenses for this line item are $43,000.

Q. Mr. Vick, please describe the regulation requiring the SPCC Compliance activities that are included in the Solid and Hazardous Waste (Line Item 1.11).

A. As I previously discussed for the Plant Smith SPCC Compliance capital project, this project is needed to help assure compliance with the revisions to the SPCC regulation, 40 CFR Part 112. These revisions resulted in oil storage containers having a capacity greater than or equal to 55 gallons being classified as bulk storage containers that are subject to the secondary containment requirements in 40 CFR Part 112.8(c). During 2009, Plant Smith plans to modify the drum storage secondary containment area to comply with the SPCC regulation. The estimated 2009 expenses for this project are $5,000.

Q. Mr. Vick, please describe the regulation requiring the Impaired Waters Rule (IWR) expenses that are included in the General Water Quality item (Line Item 1.6).

A. The IWR rule evaluates whether waters meet their designated uses based

on the following criteria: aquatic life use support, primary contact, recreation, fish and shellfish consumption, drinking water, and protection of human health. The FDEP has proposed listing waters in watersheds surrounding Gulf's generating facilities for nutrient and mercury impairments. The proposed IWR project will enable Gulf Power to conduct necessary modeling and evaluations to determine if Gulf's industrial wastewater discharges will contribute to any water body listings. This project will also determine whether additional wastewater reductions are required to meet new total daily maximum load requirements. The 2009 projected expenses for this project are $100,000.

Q. Please describe the O&M activities included in the air quality category that have projected expenses during 2009.

A. There are five O&M activities included in the air quality category that have projected expenses in 2009. On Schedule 2P, Air Emission Fees (Line Item 1.2), represents the expenses projected for the annual fees required by the CAAA that are payable to the FDEP and Mississippi Department of Environmental Quality. The expenses projected for the recovery period total $964,374.

Included in the air quality category, Title V (Line Item 1.3) represents projected expenses associated with the implementation of theTitle V permits. The total estimated expenses for the Title V Program during 2009 are $129,352.

On Schedule 2P, Asbestos Fees (Line Item 1.4) consists of the fees required to be paid to the FDEP for asbestos abatement projects.

The expenses projected for the recovery period total $2,500.

Emission Monitoring (Line Item 1.5) on Schedule 2P reflects an ongoing O&M expense associated with the Continuous Emission Monitoring equipment as required by the CAAA. These expenses are incurred in response to EPA's requirements that the Company perform Quality Assurance/Quality Control (QA/QC) testing for the CEMs, including Relative Accuracy Test Audits (RATAs) and Linearity Tests. Other activities within this category include the testing, development, and implementation of new compliance assurance monitoring requirements associated with the CAAA. The expenses expected to be incurred during the 2009 recovery period for these activities total $656,209.

The FDEP NOx Reduction Agreement (Line Item 1.19) includes O&M costs associated with the Plant Crist Unit 7 SCR and Crist Units 4 through 6 SNCR projects that were included as part of the 2002 agreement with FDEP. This line item includes the cost of anhydrous ammonia, urea, air monitoring, and general operation and maintenance expenses related to the activities undertaken in connection with the agreement. The Crist Unit 7 SCR catalyst regeneration expenses are also included in this line item. Gulf was granted approval for recovery of the costs incurred to complete these activities in FPSC Order No. PSC-02-1396-PAA-EI in Docket No. 020943-EI. The projected expenses for the 2009 recovery period total $4,168,665.

Q. What O&M activities are included in water quality category?

A. The first activity, General Water Quality (Line Item 1.6), identified in Schedule 2P, includes Soil Contamination Studies, Dechlorination, Groundwater Monitoring Plan Revisions, Surface Water Studies, the Cooling Water Intake Program, and the Impaired Waters Rule. The expenses expected to be incurred during the projection period for this line item total $556,074. This includes the projected expenses for the previously discussed Impaired Waters Rule of $100,000.

The second activity listed in the water quality category, Groundwater Contamination Investigation (Line Item 1.7), was previously approved for environmental cost recovery in Docket No. 930613-EI. This line item includes expenses related to substation investigation and remediation activities. Expenses expected to be incurred during the projection period for this line item total $1,631,176.

Line Item 1.8, State NPDES Administration, was previously approved for recovery in the ECRC and reflects expenses associated with NPDES annual and permit renewal fees for Gulf's three generating facilities in Florida. These expenses are expected to be $42,000 during the projected recovery period.

Finally, Line Item 1.9, Lead and Copper Rule, was also previously approved for ECRC recovery and reflects sampling, analytical and chemical costs related to the lead and copper drinking water quality standards. These expenses are expected to total $20,400 during the 2009 projection period.

Q. What activities are included in the environmental affairs administration Category?

A. Only one O&M activity is included in this category on Schedule 2P (Line Item 1.10) of Ms. Ritenour's exhibit. This line item refers to the Company's Environmental Audit/Assessment function. This program is an on-going compliance activity previously approved for ECRC recovery. Expenses totaling $7,300 are expected during the 2009 recovery period.

Q. What O&M activities are included in the general solid and hazardous waste category?

A. Only one program, General Solid and Hazardous Waste (Line Item 1.11) is included in the solid and hazardous waste category on Schedule 2P. This activity involves the proper identification, handling, storage, transportation and disposal of solid and hazardous wastes as required by federal and state regulations. The program includes expenses for Gulf's generating and power delivery facilities. This program is a previously approved program that is projected to incur incremental expenses totaling $417,471 in 2009. This line item includes $5,000 of expenses for the previously discussed SPCC compliance projects.

Q. In addition to the four major O&M categories listed above, are there any other O&M activities which have been approved for recovery that have projected expenses?

A. Yes. There are five other O&M activities that have been approved in past proceedings which have projected expenses during 2009. They are the

Above Ground Storage Tanks program, the Ash Pond Diversion Curtains, the Sodium Injection System, the CAIR/CAMR/CAVR Compliance Program, and Emission Allowances.

Q. What O&M activities are included in the Above Ground Storage Tanks line item?

A. Above Ground Storage Tanks (Line Item 1.12) includes integrity testing and maintenance activities required by Florida's above ground storage tank regulation, Chapter 62 Part 762, F.A.C. Expenses totaling $90,100 are projected to be incurred during 2009.

Q. What O&M activities are included in the Ash Pond Diversion Curtains line item?

A. The Ash Pond Diversion Curtains (Line Item 1.14) were originally approved for inclusion in the ECRC in Order No. PSC-98-1764-FOF-EI. Installation of additional flow diversion curtains in the Plant Crist ash pond were required to effectively increase water retention time in the ash pond. Diversion curtains allow for the sedimentation/precipitation treatment process to be more effective in reducing levels of suspended particulate from the Plant Crist ash pond outfall. To increase retention time in the ash pond, Plant Crist plans to replace the existing ash curtains and dredge the pond during 2009. The 2009 projected expenses for this activity are $800,000.

Q. What activity is included in the Sodium Injection line item?

A. The Sodium Injection System (Line Item 1.16) was originally approved for inclusion in the ECRC in Order No. PSC-99-1954-PAA-EI. The activities in this line item involve sodium injection to the coal supply that enhances precipitator efficiencies when burning certain low sulfur coals at Plant Crist and Plant Smith. The expenses projected for the 2009 recovery period total $313,000.

Q. What activities are included in the CAIR/CAMR/CAVR Compliance Program (Line Item 1.20) activity?

A. The CAIR/CAMR/CAVR Compliance Program (Line Item 1.20) currently includes O&M expenses associated with the Crist Units 4 through 7 scrubber, the Smith Units 1 and 2 SNCRs, and the Scholz mercury monitoring project. All of these projects were included as part of the CAIR/CAMR/CAVR Compliance Program approved by the Commission on September 5, 2007. More specifically, this line item includes the cost of urea, limestone, and general operation and maintenance activities included in Gulf's CAIR/CAMR/CAVR Compliance Program. The projected expenses for the 2009 recovery period total $5,972,528.

Q. Please describe the emission allowances line items 1.29 through 1.31.

A. These line items include projected allowance expenses for Gulf's generating plants. Line Items 1.29 and 1.30 include projected expenses for annual and seasonal NOx allowances. Annual and seasonal NOx allowance expenses have been included in Gulf's 2009 projection filing

because CAIR will remain in effect unless and until the court issues a mandate in the case. The 2009 projection expenses for annual and seasonal NOx allowances are $18.6 million and $2.2 million, respectively. This projection will be updated if the CAIR is ultimately vacated. Line Item 1.31 includes $5.9 million of projected expenses for SO_2 allowances expected to be incurred during 2009 for both CAIR and Acid Rain compliance. The SO_2 expenses are offset by the amortization of gains from the sale of SO_2 allowances.

Q. Do each of the capital projects and O&M activities that have projected costs in 2009 meet the ECRC statutory guidelines?

A. Yes. The projects included in Gulf's 2009 ECRC projection filing meet the requirements of the ECRC statute and are consistent with the Commission's precedents regarding environmental cost recovery. Each of the capital projects and O&M activities set forth on Ms. Ritenour's schedules include only prudent costs incurred after April 13, 1993 that are not recovered through some other cost recovery mechanism or base rates. The projected environmental costs are necessary to achieve and/or maintain compliance with environmental laws, rules, and regulations.

Q. Mr. Vick, does this conclude your testimony?

A. Yes.

GULF POWER COMPANY
Before the Florida Public Service Commission
Direct Testimony and Exhibit of
Rhonda J. Martin
Docket No. 080007-EI
Date of Filing: April 2, 2008

Q. Please state your name, business address and occupation.

A. My name is Rhonda J. Martin. My business address is One Energy Place, Pensacola, Florida 32520-0780. I am the Supervisor of Rates and Regulatory Matters at Gulf Power Company.

Q. Please briefly describe your educational background and business experience.

A. I graduated from the University of West Florida in Pensacola, Florida in 1994 with a Bachelor of Arts Degree in Accounting. I am also a licensed Certified Public Accountant and a member of the Florida Institute of Certified Public Accountants. I joined Gulf Power in 1994 as an Accountant. Prior to assuming my current position, I have held various positions of increasing responsibility with Gulf as an accountant in the Accounting Services, Financial Reporting, and Corporate Accounting Departments and as Supervisor of Financial Planning. In April 2006, I joined the Rates and Regulatory Matters area.

My responsibilities include supervision of: tariff administration, cost of service activities, calculation of cost recovery factors, and the regulatory filing function of the Rates and Regulatory Matters Department.

Q. Are you the same Rhonda J. Martin who has previously testified before this Commission in this on-going docket?

A. Yes.

Q. What is the purpose of your testimony?

A. The purpose of my testimony is to present the final true-up amount for the period January 2007 through December 2007 for the Environmental Cost Recovery Clause (ECRC).

Q. Have you prepared an exhibit that contains information to which you will refer in your testimony?

A. Yes, I have.

Counsel: We ask that Ms. Martin's exhibit consisting of eight schedules be marked as Exhibit No. _____(RJM-1).

Q. Are you familiar with the ECRC true-up calculation for the period January through December 2007 set forth in your exhibit?

A. Yes. These documents were prepared under my supervision.

Q. Have you verified that to the best of your knowledge and belief the information contained in these documents is correct?

A. Yes.

Q. What is the amount to be refunded or collected in the recovery period beginning January 2009?

A. An amount to be refunded of $1,470,471 was calculated, which is reflected on line 3 of Schedule 1A of my exhibit.

Q. How was this amount calculated?

A. The $1,470,471 to be refunded was calculated by taking the difference between the estimated January 2007 through December 2007 under-recovery of $2,117,926 as approved in FPSC Order No. PSC-07-0922-FOF-EI, dated November 16, 2007, and the actual under-recovery of $647,455, which is the sum of lines 5, 6, and 9 on Schedule 2A of my exhibit.

Q. Please describe Schedules 2A and 3A of your exhibit.

A. Schedule 2A shows the calculation of the actual under-recovery of environmental costs for the period January 2007 through December 2007. Schedule 3A of my exhibit is the calculation of the interest provision on the average true-up balance. This is the same method of calculating interest that is used in the Fuel Cost Recovery and Purchased Power Capacity Cost Recovery clauses.

Q. Please describe Schedules 4A and 5A of your exhibit.

A. Schedule 4A compares the actual O&M expenses for the period January 2007 through December 2007 with the estimated/actual O&M expenses approved in conjunction with the November 2007 hearing. Schedule 5A shows the monthly O&M expenses by activity, along with the calculation of

jurisdictional O&M expenses for the recovery period. Emission allowance expenses and the amortization of gains on emission allowances are included with O&M expenses. Mr. Vick describes the main reasons for the variances in O&M expenses in his final true-up testimony.

Q. Please describe Schedules 6A and 7A of your exhibit.

A. Schedule 6A for the period January 2007 through December 2007 compares the actual recoverable costs related to investment with the estimated/actual amount approved in conjunction with the November 2007 hearing. The recoverable costs include the return on investment, depreciation and amortization expense, dismantlement accrual, and property taxes associated with each environmental capital project for the recovery period. Recoverable costs also include a return on working capital associated with emission allowances. Schedule 7A provides the monthly recoverable costs associated with each project, along with the calculation of the jurisdictional recoverable costs. Mr. Vick describes any major variances in recoverable costs related to environmental investment for this period in his final true-up testimony.

Q. Please describe Schedule 8A of your exhibit.

A. Schedule 8A includes 28 pages that provide the monthly calculations of the recoverable costs associated with each approved capital project for the recovery period. As I stated earlier, these costs include return on investment, depreciation and amortization expense, dismantlement accrual, property taxes, and the cost of emission allowances. Pages 1 through 27 of Schedule 8A show the investment and associated costs related to capital

projects, while page 28 shows the investment and costs related to emission allowances.

Q. Ms. Martin, does this conclude your testimony?

A. Yes.

GULF POWER COMPANY

Before the Florida Public Service Commission
Direct Testimony and Exhibit of
Susan D. Ritenour
Docket No. 080007-EI
Date of Filing: August 4, 2008

Q. Please state your name, business address and occupation.

A. My name is Susan D. Ritenour. My business address is One Energy Place, Pensacola, Florida 32520-0780. I hold the position of Secretary and Treasurer and Regulatory Manager for Gulf Power Company.

Q. Please briefly describe your educational background and business experience.

A. I graduated from Wake Forest University in Winston-Salem, North Carolina in 1981 with a Bachelor of Science Degree in Business and from the University of West Florida in 1982 with a Bachelor of Arts Degree in Accounting. I am also a Certified Public Accountant licensed in the State of Florida. I joined Gulf Power Company in 1983 as a Financial Analyst. Prior to assuming my current position, I have held various positions with Gulf including Computer Modeling Analyst, Senior Financial Analyst, Supervisor of Rate Services, and Assistant Secretary & Assistant Treasurer

My responsibilities include supervision of: tariff administration, cost of service activities, calculation of cost recovery factors, the regulatory filing function of the Regulatory Matters Department, and various treasury and corporate secretary activities.

Q. Have you previously filed testimony before the Commission in the connection with Gulf's Environmental Cost Recovery Clause (ECRC)?

A. Yes, I have.

Q. Have you prepared an exhibit that contains information to which you will refer in your testimony?

A. Yes, I have. My exhibit consists of 8 schedules, each of which was prepared under my direction, supervision, or review.

Counsel: We ask that Ms. Ritenour's Exhibit consisting of 8 schedules be marked as Exhibit No. _____(SDR-2).

Q. Have you verified that to the best of your knowledge and belief the information contained in these documents is correct?

A. Yes, I have.

Q. What has Gulf calculated as the estimated true-up for the January 2008 through December 2008 period to be refunded or collected in the period January 2009 through December 2009?

A. The estimated true-up for the current period is an under-recovery of $2,810,290 as shown on Schedule 1E. This is based on six months of actual data and six months of estimated data. This amount will be netted against the 2007 final true-up over-recovery amount of $1,470,471 (see Schedule 1A to Gulf's testimony filed April 2, 2008). The sum of $1,339,819 will be collected from customers during the January 2009

through December 2009 period. The detailed calculations supporting the estimated true-up for 2008 are contained in Schedules 2E through 8E.

Q. Please describe Schedules 2E and 3E of your exhibit.

A. Schedule 2E shows the calculation of the estimated under-recovery of environmental costs for the period January 2008 through December 2008. Schedule 3E of my exhibit is the calculation of the interest provision on the average true-up balance. This is the same method of calculating interest that is used in the Fuel Cost Recovery and Purchased Power Capacity Cost Recovery clauses.

Q. Please describe Schedules 4E and 5E of your exhibit.

A. Schedule 4E compares the estimated/actual O & M expenses for the period January 2008 through December 2008 with the projected O & M expenses approved by the Commission in conjunction with the November 2007 hearing. Schedule 5E shows the monthly O & M expenses by activity, along with the calculation of jurisdictional O & M expenses for the current recovery period. Per the Staff's request, emission allowance expenses and the amortization of gains on emission allowances are included with O & M expenses. Mr. Vick describes the main reasons for the expected variances in O & M expenses in his true-up testimony.

Q. Please describe Schedules 6E and 7E of your exhibit.

A. Schedule 6E for the period January 2008 through December 2008 compares the estimated/actual recoverable costs related to investment

with the projected amount approved in conjunction with the November 2007 hearing. The recoverable costs include the return on investment, depreciation and amortization expense, dismantlement accrual, and property taxes associated with each environmental capital project for the current recovery period. Recoverable costs also include a return on working capital associated with emission allowances. Schedule 7E provides the monthly recoverable revenue requirements associated with each project, along with the calculation of the jurisdictional recoverable revenue requirements. Mr. Vick describes the major variances in recoverable costs related to environmental investment for this estimated true-up period in his testimony.

Q. Please describe Schedule 8E of your exhibit.

A. Schedule 8E includes 31 pages that provide the monthly calculations of recoverable costs associated with each approved capital investment for the current recovery period. As I stated earlier, these costs include return on investment, depreciation and amortization expense, dismantlement accrual, property taxes, and the return on working capital associated with emission allowances. Pages 1 through 27 of Schedule 8E show the investment and associated costs related to capital projects, while pages 28 through 31 show the investment and return related to emission allowances.

Q. What capital structure and return on equity were used to develop the rate of return used to calculate the revenue requirements?

A. Consistent with Commission policy, the capital structure used in calculating the rate of return for recovery clause purposes is based on the capital structure approved in Gulf's last completed rate case. The rate of return for the ECRC is based on the capital structure approved in Docket No. 010949-EI, FPSC Order No. PSC-02-0787-FOF-EI dated June 10, 2002. The rate of return used to calculate ECRC revenue requirements includes a return on equity of 12.0% for the period January 1, 2008 through December 31, 2008.

Q. Ms. Ritenour, does this conclude your testimony?

A. Yes.

GULF POWER COMPANY

Before the Florida Public Service Commission
Direct Testimony and Exhibit of
Susan D. Ritenour
Docket No. 080007-EI
Date of Filing: August 29, 2008

Q. Please state your name, business address and occupation.

A. My name is Susan D. Ritenour. My business address is One Energy Place, Pensacola, Florida 32520-0780. I hold the position of Secretary and Treasurer and Regulatory Manager for Gulf Power Company.

Q. Please briefly describe your educational background and business experience.

A. I graduated from Wake Forest University in Winston-Salem, North Carolina in 1981 with a Bachelor of Science Degree in Business and from the University of West Florida in 1982 with a Bachelor of Arts Degree in Accounting. I am also a Certified Public Accountant licensed in the State of Florida. I joined Gulf Power Company in 1983 as a Financial Analyst. Prior to assuming my current position, I have held various positions with Gulf including Computer Modeling Analyst, Senior Financial Analyst, Supervisor of Rate Services, and Assistant Secretary & Assistant Treasurer.

My responsibilities include supervision of: tariff administration, cost of service activities, calculation of cost recovery factors, the regulatory filing function of the Regulatory Matters Department, and various treasury and corporate secretary activities.

Q. Have you previously filed testimony before the Commission in the connection with Gulf's Environmental Cost Recovery Clause (ECRC)?

A. Yes, I have.

Q. What is the purpose of your testimony?

A. The purpose of my testimony is to present both the calculation of the revenue requirements and the development of the environmental cost recovery factors for the period of January 2009 through December 2009.

Q. Have you prepared an exhibit that contains information to which you will refer in your testimony?

A. Yes, I have. My exhibit consists of 7 schedules, each of which was prepared under my direction, supervision, or review.

Counsel: We ask that Ms. Ritenour's exhibit consisting of 7 schedules be marked as Exhibit No. _____ (SDR-3).

Q. What environmental costs is Gulf requesting for recovery through the Environmental Cost Recovery Clause?

A. As discussed in the testimony of J. O. Vick, Gulf is requesting recovery for certain environmental compliance operating expenses and capital costs that are consistent with both the decision of the Commission in Order No. PSC-94-0044-FOF-EI in Docket No. 930613-EI and with past proceedings in this ongoing recovery docket. The costs we have identified for recovery through the ECRC are not currently being recovered through base rates or any other cost recovery mechanism.

Q. How was the amount of projected O&M expenses to be recovered through the ECRC calculated?

A. Mr. Vick has provided me with projected recoverable O&M expenses for January 2009 through December 2009. Schedule 2P of my exhibit shows the calculation of the recoverable O&M expenses broken down between demand-related and energy-related expenses. Also, Schedule 2P provides the appropriate jurisdictional factors and amounts related to these expenses. All O&M expenses associated with compliance with the Clean Air Act Amendments of 1990 (CAAA) were considered to be energy-related, consistent with Commission Order No. PSC-94-0044-FOF-EI. O&M expenses associated with Gulf's Clean Air Interstate Rule (CAIR), Clean Air Mercury Rule (CAMR), and Clean Air Visibility Rule (CAVR) Compliance Program were considered to be energy-related pursuant to FPSC Order No. PSC-06-0972-FOF-EI issued November 22, 2006. The remaining expenses were broken down between demand and energy consistent with Gulf's last approved cost-of-service methodology in Docket No. 010949-EI.

Q. Please describe Schedules 3P and 4P of your exhibit.

A. Schedule 3P summarizes the monthly recoverable revenue requirements associated with each capital investment project for the recovery period. Schedule 4P shows the detailed calculation of the revenue requirements associated with each investment project. These schedules also include the calculation of the jurisdictional amount of recoverable revenue requirements. Mr. Vick has provided me with the expenditures,

clearings, retirements, salvage, and cost of removal related to each capital project and the monthly costs for emission allowances. From that information, I calculated plant-in-service and construction work in progress (non interest bearing). Depreciation, amortization and dismantlement expense and the associated accumulated depreciation balances were calculated based on Gulf's approved depreciation rates, amortization periods, and dismantlement accruals. The capital projects identified for recovery through the ECRC are those environmental projects which were not included in the approved June 2002 through May 2003 test year on which present base rates were set.

Q. How was the amount of property taxes to be recovered through the ECRC derived?

A. Property taxes were calculated by applying the applicable tax rate to taxable investment. In Florida, pollution control facilities are taxed based only on their salvage value. For the recoverable environmental investment located in Florida, the amount of property taxes is estimated to be $0. In Mississippi, there is no such reduction in property taxes for pollution control facilities. Therefore, property taxes related to recoverable environmental investment at Plant Daniel are calculated by applying the applicable millage rate to the assessed value of the property.

Q. What capital structure and return on equity were used to develop the rate of return used to calculate the revenue requirements?

A. The rate of return used is based on Gulf's capital structure approved in Gulf's last rate case, Docket No. 010949-EI, Order No. PSC-02-0787-FOF-EI, dated June 10, 2002. This rate of return incorporates a return on equity of 12.0 percent.

Q. How was the breakdown between demand-related and energy-related investment costs determined?

A. The investment costs associated with compliance with the CAAA were considered to be energy-related consistent with Commission Order No. PSC-94-0044-FOF-EI, dated January 12, 1994, in Docket No. 930613-EI. The investment costs associated with Gulf's CAIR, CAMR, and CAVR Compliance Program were considered to be energy-related pursuant to FPSC Order No. PSC-06-0972-FOF-EI issued November 22, 2006. The remaining investment costs of environmental compliance were allocated 12/13th based on demand and 1/13th based on energy, consistent with Gulf's last cost-of-service study. The calculation of this breakdown is shown on Schedule 4P and summarized on Schedule 3P.

Q. What is the total amount of projected recoverable costs related to the period January 2009 through December 2009?

A. The total projected jurisdictional recoverable costs for the period January 2009 through December 2009 is $84,761,585 as shown on line 1c of Schedule 1P. This includes costs related to O&M activities of

$41,015,461 and costs related to capital projects of $43,746,124 as shown on lines 1a and 1b of Schedule 1P.

Q. What is the total recoverable revenue requirement to be recovered in the projection period January 2009 through December 2009 and how was it allocated to each rate class?

A. The total recoverable revenue requirement including revenue taxes is $86,163,397 for the period January 2009 through December 2009 as shown on line 5 of Schedule 1P. This amount includes the recoverable costs related to the projection period and the total true-up cost of $1,339,819 to be collected. Schedule 1P also summarizes the energy and demand components of the requested revenue requirement. I allocated these amounts by rate class using the appropriate energy and demand allocators as shown on Schedules 6P and 7P.

Q. How were the allocation factors calculated for use in the Environmental Cost Recovery Clause?

A. The demand allocation factors used in the ECRC were calculated using the 2006 load data filed with the Commission in accordance with FPSC Rule 25-6.0437. The energy allocation factors were calculated based on projected KWH sales for the period adjusted for losses. The calculation of the allocation factors for the period is shown in columns 1 through 9 on Schedule 6P.

Q. How were these factors applied to allocate the requested recovery amount properly to the rate classes?

A. As I described earlier in my testimony, Schedule 1P summarizes the energy and demand portions of the total requested revenue requirement. The energy-related recoverable revenue requirement of $80,165,625 for the period January 2009 through December 2009 was allocated using the energy allocator, as shown in column 3 on Schedule 7P. The demand-related recoverable revenue requirement of $5,997,772 for the period January 2009 through December 2009 was allocated using the demand allocator, as shown in column 4 on Schedule 7P. The energy-related and demand-related recoverable revenue requirements are added together to derive the total amount assigned to each rate class, as shown in column 5.

Q. What is the monthly amount related to environmental costs recovered through this factor that will be included on a residential customer's bill for 1,000 kwh?

A. The environmental costs recovered through the clause from the residential customer who uses 1,000 kwh will be $7.35 monthly for the period January 2009 through December 2009.

Q. When does Gulf propose to collect its environmental cost recovery charges?

A. The factors will be effective beginning with Cycle 1 billings in January 2009 and will continue through the last billing cycle of December 2009.

Q. Ms. Ritenour, does this conclude your testimony?

A. Yes.

MS. BROWN: Mr. Chairman, this would be a time if the Commission have any questions before we move to consider the stipulations.

CHAIRMAN CARTER: Okay. Let's take a second before we do that and get this handout passed out, and at that point in time we will recognize Commissioner Skop.

Commissioner, you're recognized.

COMMISSIONER SKOP: Thank you, Mr. Chairman.

I apologize to my colleagues that we had to take the time to move forward with this. I had a legitimate question. And apparently in the haste to stipulate, the question that I had did not get resolved. And I am dealing with computer difficulties which makes my job a little bit more difficult, because I have it on my computer, but I have a blank screen right now. So not a perfect day.

But, anyway, the handout that Bill had just provided each of you, and hopefully Mr. Butler has a copy, I just want to come out and say I am in full support of the three solar projects that the Commission and my colleagues have approved and the cost-recovery pursuant to statute.

I do have one question with respect to a warranty provision. Again, I think that as FPL moves to mitigate their risk, equally the consumers should be protected. And if we look at the Appendix K, which is the module warranty -- and I want to commend FPL in their turnkey contract. This is a very

good one. They have gotten a very good warranty. It spans 25 years for a limited power warranty. And just briefly summarizing the warranty, it is ten-year limited product warranty where -- you know, the panels -- it is kind of like a car, they are covered completely. And then they have a limited power warranty which at year twelve, Sun Power has represented that the arrays, the solar PV arrays at the Spacecoast and DeSoto facility will meet 90 percent of the rated minimum peak power after 12 years. So that's a warranty provision that is very good.

And then the second provision in 2B, Sun Power additionally warrants that if within the first 25 years that the array will also meet 80 percent of its minimum peak power. Now, that's a very good warranty. Where I think that it has a little bit of weakness, though, is in Appendix E, and this is the credit trigger event.

And, again, I would have hoped that staff could have helped resolve this, but they didn't, so I'm having to take the time to do it here, because I believe it is a very legitimate question.

But if we would look at Appendix E and the credit trigger event, particularly Paragraph 3, and in the chart on the bottom right column. Basically, to put it in a nutshell, the warranty is only as good as Sun Power being a going concern, and this warranty spans 25 years. And I think if

history has taught us anything recently, you know, companies may be here one day and gone the next. I would cite Lehman. I would also cite the Kenotech (phonetic) bankruptcy, which I think Mr. Butler would be familiar with.

But the issue I see is that if Sun Power's tangible net worth declines, they are required to post various letters of credit as a protection pursuant to the negotiated agreement. And if you look at, again, Paragraph 3, the far right column, it lists the required stated amount after the tenth anniversary of the final acceptance date until the end of all warranty periods.

And my concern is that certainly this warranty is a very good one, but it is reasonably foreseeable that the amounts of warranty claims in the out-year period, i.e., year 12 or year 25, because of the need to meet the limited power warranty, if the solar panels degrade prematurely it would -- the expense of the warranty claim in the out-years could be that or greater than the warranty claim amounts in the near-years. So the zeros in terms of the letter of credit in the de minimis amounts, that concerned me.

Now, again, I think that the costs are prudent, but I think that it is also important to adequately protect the ratepayer so that they get the full benefit of the warranty that FPL has negotiated. So I would ask -- and I hate to put you on the spot like this, Mr. Butler. Again, I had hoped that

we would be able to resolve this, but everyone seems content on stipulating instead of answering legitimate questions. So if you might be able to comment, or is that something that given the amount of business that FPL, along with the options, has contracted with Sun Power, that they might be able to amend that to more reasonable amounts in the out-year to the extent that, you know, prior to the tenth anniversary the letter of credit amounts are significantly higher than those in the out-years.

And I would hate to get in a situation where, you know, year 20 we have a degrading array, Sun Power is financially on the ropes, and the ratepayer, you know, would be obligated to replace an array that is theoretically covered by warranty but has no effect.

So if you could briefly respond to that. I apologize, and I also apologize to my colleagues for having to take the time to resolve something that hopefully could have been resolved before we got to hearing.

MR. BUTLER: I would be happy to address your question, Commissioner Skop.

One thing I will observe, and I will be somewhat vague in the responses because much of this information is confidential and I don't want to end up making it more public than necessary.

COMMISSIONER SKOP: Okay. Let me stop you there,

because, again, the document that I have -- and, again, I see two different versions floating around, but the document I have is not stamped confidential. And hopefully I didn't disclose any confidential information. I think I referred to it generically. But, if I have, I apologize, and that is due to the document that was provided to me.

MR. BUTLER: I think we are fine, but I just wanted to preface it so that you would understand why my responses may be not as specific as they would otherwise. FPL has negotiated and worked diligently with Sun Power to get the warranty protections and the backup, the financial backup to those warranty protections that are here. It is substantially beyond what -- as I understand it, what Sun Power would ordinarily be providing. And, you know, FPL has deliberately chosen Sun Power in large measure because it is, you know, one of the largest, most experienced, and best capitalized companies in the solar business. It really stands out significantly from a lot of the other sort of newer and more start-up entities that are in this business.

The protection -- the warranty structure, to try to answer your question directly, you know, it divides into two basic pieces. There is a piece that is in place for the first period of time you mentioned for ten years that is directed at warranting, essentially, the entire operation of the project, and then that changes after ten years to a warranty that is

particularly on what is referred to as the modules, and it is referring to the individual solar panels.

You know, two things that FPL has seen. First of all, the experience in the industry has been that if the panels fail, you know, they are mechanically operating components, it is basically a large silicone wafer, that is something that very significantly or substantially occurs in the early years of operation, not later once they have been in service for an extended period of time. And so the real expectation, if we have problems with the panels, is that they would be in the earliest years when the warranty protection and the sort of financial integrity assurances are the greatest.

In the later years, you are right that the protection isn't as substantial. That is based on FPL's evaluation, working with Sun Power, observing the industry experience that is now over 20 years old with the operation of these silicone wafer photovoltaic modules that they are a very low probability of failing. If one fails, what you do is you replace that one. There are for the DeSoto project something like 90,000 of the panels. I think it is something like 35,000 for the Spacecoast project. They only cost to remove and replace about $4,000 each. So you could end up having quite a few panels failing. You would simply go in -- or degrading -- you would simply go in and replace the ones that are there and go about the business.

It is fundamentally different, I think, from something like say, you know, turbine blades failing in a gas turbine where you can't use the unit until you have everything back in order, and that probably if you have a failure are likely to be dealing with a very large expensive piece of equipment.

So, fundamentally, the response is that the warranties were structured to provide the greatest protection in the earlier years when the perception was that the potential of system problems was the greatest, to have the financial integrity track that greatest period of warranty liability. It is not as great at the back end because that's what FPL was able to negotiate.

The letters of credit are expensive. And, obviously, if we negotiate more protection from letters of credit, particularly out so far in time, we would expect to have to be compensating the vendor accordingly. This was the compromise FPL reached that seemed to provide the best protection at the fairest price.

COMMISSIONER SKOP: Thank you, Mr. Butler.

And, again, I appreciate that explanation. But, you know, the concern I have -- again, I agree with you wholeheartedly that if you are going to have a failure, just as any piece of electronic component, a failure of the system, you should see that early on. But Florida has harsh environmental

conditions. A concern that has been widely expressed by many people that I have spoken to has been the long-term degradation of the efficiency of each individual module, and that could be a realistic problem in the out-years.

I'm not saying that it is or isn't. Again, we'll have to wait 25 years to see that. But at the end of the day, again, making sure the consumer is adequately protected, because they are the ones, pursuant to the legislative direction, that have been required to pay for this, and you guys have full cost recovery -- and, again, I commend FPL on the warranty. It is one of the best I have seen. But, again, it loses some of its teeth in the out-years. And to put that into perspective, you mentioned the number of modules that were in each of the respective arrays. That $500,000 letter of credit would only buy 125 modules.

So, again, you know, it's a concern in passing, but I think it is a valid concern. I mean, each of these arrays are -- the number is probably confidential. I'm not sure whether it is or not, but they are very expensive pieces of equipment. And, again, if they were to fail or degrade sufficiently, which we don't know, I mean, Sun Power has been in business for 20 years. I have read their company history. But, you know, should the consumer bear that additional risk, because I don't think that if 15 years, 25 years down the line if Sun Power is not in business, and we come to FPL and we say

are you going to step into the shoes? I don't think you guys would be willing to do that.

So, again, my concern. I recognize letter of credits are very important, but I just think that for what -- for the excellent job that they did on negotiating the warranty, if the numbers in that far right column would be a little bit different I would feel a little bit more comfortable.

MR. BUTLER: I understand, I think we all would. The challenge is that letters of credit are excellent protection, they are also quite expensive, and this was FPL's judgment as the best compromise. That if we had insisted on a larger volume and longer lasting letters of credit, it would have come at a price. FPL's assessment of the experience in the industry is that there isn't a traditionary history of kind of common failure mode problems degrading these modules. So the sense was that we were looking at protection against the sort of odd module failing as opposed to -- or degrading -- as opposed to something that was a blanket issue.

If it turns out that is not right, that there is some widespread problem, and it has to be coupled with Sun Power being an extremely well capitalized, large, substantial firm with a lot of history getting into severe financial difficulty, then obviously we could find ourselves in a position where we wished we had had more in the way of letters of credit.

But, by the same token, if that doesn't happen and we

paid much, much more money for that protection and it never ended up being used, then we would wish we hadn't put so much money into letters of credit. And this is what FPL saw as being the best balance between what are admittedly competing considerations in trying to decide what the right level of contract protection is.

COMMISSIONER SKOP: Okay. And, like I say, I respect that. Again, I think I would feel a little bit more comfortable if the out-year numbers were a little bit more substantial. I guess the issue before the Commission is obviously cost-recovery, not necessarily review of the warranty, but the way that this is all come before us this is the first time that the Commission has actually had the opportunity to review, you know, the underlying contracts, the warranty, and the land purchase -- I mean, the land lease and all those other things.

So, again, that was just one point in passing that, you know, I wanted to raise to FPL. It is a legitimate question. It is remote and attenuated that we would ever find ourselves in that position, but if all those -- if we go down that path and certain things happen, you know, Sun Power goes out the business, you know, obviously we don't have full protection to otherwise enforce a warranty or mitigate the impact to the ratepayer as a result of not having, you know, standing letters of credit if the company were to decline in

their net worth substantially. So, thank you.

CHAIRMAN CARTER: Thank you, Commissioner.

Commissioners, let's do this. Let's take about -- I'm looking at the clock to my right. We will come back at 25 after. We'll take a brief recess.

(Recess.)

CHAIRMAN CARTER: We are back on the record.

And we took a break as we were going through a question.

Commissioner Skop, sir, you're recognized.

COMMISSIONER SKOP: Thank you, Mr. Chairman.

And I just want to clarify a previous remark that I made. I know that our hard-working staff is really busy and has been working very had on all these dockets. But, you know, as a Commissioner, you know, I asked a legitimate question and it did not get answered prior to coming today.

So, again, my comments are not directed in any way towards the bench. But, again, as a Commissioner, again, I feel that this is a very legitimate question. You know, we have an excellent warranty, but all I was merely trying to articulate was that now that I have my computer in front of me halfway working, that the warranty is a very good one, but what I see is that the protection breaks down with a contracting weakness in Appendix E. So --

CHAIRMAN CARTER: Thank you.

Commissioner Argenziano.

COMMISSIONER ARGENZIANO: You know, as an individual Commissioner, what I detect from Commissioner Skop is he feels he needs to apologize for asking a question, and I'm here to tell you, just as a colleague of yours, you never have to apologize for asking a question. That's what we are all here for. So if you have a legitimate question -- and knowing staff, we are swamped here at the PSC, so things are going to happen. We are going to ask things the wrong way. They are swamped with all kinds of things that they need to take care of. It's going to happen. So I don't think you need to apologize for any question you have to ask.

CHAIRMAN CARTER: Thank you, Commissioners.

Anything further from the bench?

Staff, you're recognized.

MS. BROWN: Mr. Chairman, since the parties are proposing stipulations on all the issues, I would note that OPC has taken no position. We suggest that the Commission could make a bench decision in the case.

CHAIRMAN CARTER: Commissioners, we have had a proposed stipulation for the testimony. We did enter the testimony, did we not?

MS. BROWN: Yes.

CHAIRMAN CARTER: And the exhibits, we did enter the exhibits?

MS. BROWN: Yes.

CHAIRMAN CARTER: And at this point in time the staff is recommending that we accept the stipulation. Commissioners, if there is any further discussion on anything to be heard on prior to moving forward?

Hearing none. The chair is now open for a motion.

Commissioner Edgar, you're recognized.

COMMISSIONER EDGAR: Thank you, Mr. Chairman.

I would make a motion that we adopt the stipulations in the 07 environmental cost-recovery docket.

COMMISSIONER SKOP: Second.

CHAIRMAN CARTER: Moved and properly seconded.

Commissioners, any questions, any concerns, any debate?

Hearing none. All those in favor, let it be known by the sign of aye.

(Simultaneous aye.)

CHAIRMAN CARTER: All those opposed, like sign. Show it done.

Commissioners, as we get prepared for your next --

MS. BROWN: Mr. Chairman, if I just might mention --

CHAIRMAN CARTER: You're recognized.

MS. BROWN: -- since the Commission has made a bench decision, the final order in the case will be issued by November 24th.

CHAIRMAN CARTER: And that's on Docket Number 080007-EI.

FPL's Response to Staff's Second Request for Production of Documents (No. 3)

HEARING EXHIBIT - 00000001

Q.

Referring to the testimony of K.M. Dubin dated April 2, 2008, please provide a schedule that shows the capital structure, components, and cost rates relied upon for calculating the revenue requirement rate of return. Please include in this schedule the derivation of debt and equity components used in the Return on Average Net Investment, lines 7 (a) and (b), on Form 42-8A attached to the testimony. Please cite all sources and include the rationale for using the particular capital structure and cost rates.

A.

The "Equity Component" and "Debt Component" that make up the Return on Average Net Investment (Form 42-8A, Lines 7a and 7b) are derived as follows: Attachment I shows an annual "total equity" component of 5.6640% and annual "total debt" component of 1.8767% These annual return components are divided by 12 to get monthly return components. These monthly return components are then multiplied times the "Average Net Investment" amount shown on line 6 of Form 42-8A for each month. In the case of the "Equity Component," the resulting amount is then also divided by the "gross-up for taxes" factor of 0.61452 stated in Note D to Form 42-8A

Attachment I is provided as Bates No. ECRC 08-109

TURNKEY ENGINEERING, PROCUREMENT AND CONSTRUCTION AGREEMENT FOR SOLAR PHOTOVOLTAIC GENERATING FACILITY

THIS TURNKEY ENGINEERING, PROCUREMENT AND CONSTRUCTION AGREEMENT FOR SOLAR PHOTOVOLTAIC GENERATING FACILITY (this "Agreement"), dated as of July 3, 2008, is by and between FLORIDA POWER & LIGHT COMPANY, a Florida corporation (hereinafter called "FPL") and SunPower Corporation, Systems, a Delaware corporation (hereinafter called "Contractor").

WITNESSETH:

WHEREAS, FPL wishes to construct and operate a solar photovoltaic generation facility with a minimum nominal capacity of 25 MW (net), and all services and utilities related thereto, all to be built on the Property Site (as hereinafter defined) located in DeSoto County, Florida;

WHEREAS, Contractor has represented that it is experienced and qualified in providing technical assistance, licensing, engineering, procurement, supply, construction management, construction, commissioning, start-up and testing services, and that it possesses the requisite expertise and resources to complete the Work (as hereinafter defined);

WHEREAS, Contractor has agreed to provide, through itself or through Subcontractors and Vendors (as such terms are hereinafter defined), such Work on a "turn-key" basis for the Contract Price (as hereinafter defined); and

WHEREAS, Contractor has agreed to guarantee the timely and proper completion of the Work in strict accordance with the terms and conditions hereinafter set forth.

NOW, THEREFORE, in consideration of the foregoing premises, the mutual promises and covenants herein contained, and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, FPL and Contractor hereby agree as follows:

ARTICLE I.
GENERAL MATTERS

1.1 DEFINED TERMS

As used in this Agreement, including the appendices, exhibits and other attachments hereto, each of the following terms shall have the meaning assigned to such term as set forth below:

1.1.1 "Affiliate" means, in relation to any Person, any other Person:

(a) Which directly or indirectly controls, or is controlled by, or is under common control with, such Person; or

(b) Which directly or indirectly beneficially owns or holds fifty percent (50%) or more of any class of voting stock or other equity interests of such Person; or

(c) Which has fifty percent (50%) or more of any class of voting stock or other equity interests that is directly or indirectly beneficially owned or held by such Person, or

(d) Who either holds a general partnership interest in such Person or such Person holds a general partnership interest in the other Person.

For purposes of this definition, the word "controls" means possession, directly or indirectly of the power to direct or cause the direction of the management or policies of a Person, whether through the ownership of voting securities or otherwise.

ECRC-08-2842 HEARING EXHIBIT - 00000020

1.1.2 "After-Tax Basis" means, with respect to any indemnity payment to be received by any Person, the amount of such payment (the base payment) supplemented by a further payment (the additional payment) to that Person so that the sum of the base payment plus the additional payment shall, after deduction of the amount of all Federal, state, and local income Taxes required to be paid by such Person in respect of the receipt or accrual of the base payment and the additional payment (taking into account any reduction in such income Taxes resulting from Tax benefits realized by the recipient as a result of the payment or the event giving rise to the payment), be equal to the amount required to be received. Such calculations shall be made on the basis of the highest generally applicable Federal, state, and local income tax rates applicable to the corporation for whom the calculation is being made for all relevant periods, and shall take into account the deductibility of state and local income taxes for Federal income tax purposes. The foregoing calculations shall be made by the recipient Person's third party tax advisors.

1.1.3 "Agreement" has the meaning set forth in the first paragraph hereof, as same may be amended, supplemented or modified from time to time in accordance with the terms hereof.

1.1.4 "Applicable Laws" means any act, statute, law, regulation, permit, license, ordinance, rule, judgment, order, decree, directive, guideline or policy (to the extent mandatory) or any similar form of decision or determination by, or any interpretation or administration of, any of the foregoing by any Government Authority with jurisdiction over the Plant, the Job Site, the performance of the Work or other services to be performed under the Contract Documents.

1.1.5 "Applicable Permits" means any and all permits, clearances, licenses, authorizations, consents, filings, exemptions, rulings or approvals from or required by any Government Authority that are necessary for the performance of the Work or ownership or use of the Work.

1.1.6 "Applicable Standards" means those sound and prudent practices, acts, methods, specifications, codes and standards of design, engineering, assembly, erection, installation, construction, performance, safety and workmanship prudently and generally engaged in or observed by the majority of the professional engineering and construction contractors performing engineering and construction services for major, grid-connected solar electric generating facilities in the United States that, in the exercise of good judgment, would have been expected to accomplish the desired result in a manner consistent with Applicable Laws, Applicable Permits, reliability, safety, environmental protection, local conditions, economy and efficiency. Notwithstanding the foregoing, the Work or any portion thereof shall meet specifications that are at least as stringent as those set forth in Appendix A, Scope of Work, and any other specifications set forth in this Agreement.

1.1.7 "Builder's Risk Policy" has the meaning set forth in Section 9.9.4, All Risk Installation and Builder's Risk Insurance, of Article IX, INSURANCE.

1.1.8 "Business Day" means any day other than a Saturday, Sunday or a legal holiday in Florida, United States.

1.1.9 "Capability Verification Test" means the test further described in Appendix HH, Performance Testing.

1.1.10 "Change In Law" means the (A) enactment, adoption, promulgation, modification, or repeal (in each case, after the date of this Agreement but before the date of Provisional Acceptance) of any Applicable Law of any Government Authority of (i) the State of Florida (or any city, county or municipality therein) or (ii) the Federal Government of the United States to the extent such federal law, directly affects the Work performed at the Property Site or (B) the modification after the date of this Agreement of any FPL Permit, and as to both (A) and (B) that establishes requirements that materially and adversely affect Contractor's costs or schedule for performing the Work; provided, however, a change in (x) any federal, state or local Tax law or any other law imposing a Tax, duty, levy, impost, fee, royalty, or charge for which Contractor is responsible hereunder, or (y) any Applicable Law affecting the cost of Contractor's or any Subcontractor's or Vendor's Labor, including increases in worker's compensation rates, shall not be a Change In Law pursuant to this Agreement.

1.1.11 "Change Order" has the meaning set forth in Section 6.1, CHANGE ORDER AT FPL'S REQUEST, of Article VI, CHANGE ORDERS.

ECRC-08-2843 HEARING EXHIBIT - 00000021

1.1.12 "Changes" has the meaning set forth in Section 6.1, CHANGE ORDER AT FPL'S REQUEST, of Article VI, CHANGE ORDERS.

1.1.13 "Commencement Date" means the date Contractor anticipates it will construct improvements at, or deliver materials to, the Job Site that may be insured pursuant to a builder's risk policy, as set forth in a written Notice delivered by Contractor to FPL pursuant to Section 5.1.1.

1.1.14 "Confidential Information" has the meaning set forth in Section 18.3, CONFIDENTIALITY, of Article XVIII, MISCELLANEOUS.

1.1.15 "Construction and Milestone Payment Schedule" means the schedule of construction/milestone completion installment payments of the Contract Price attached hereto as Appendix D.

1.1.16 "Contract Documents" means this Agreement and all appendices, exhibits incorporated into the Agreement (as set forth in Section 1.3, APPENDICES), as same may be amended, supplemented or modified from time to time in accordance with the terms hereof.

1.1.17 "Contract Price" means the total sum payable by FPL as stated in Section 7.1, Contract Price, for all labor, all materials, and all equipment, which sum shall be due in accordance with the terms of the Contract Documents as consideration for the timely performance of the Scope of Work to be performed by or through Contractor on a "turn-key" basis in order to complete the Project, all in strict accordance with the terms of the Contract Documents, which sum shall only be subject to adjustment in accordance with the Contract Documents, including but not limited to the adjustments contemplated in Appendix J, Option Pricing.

1.1.18 "Contractor" means SunPower Corporation, Systems, a Delaware corporation (as referenced in the opening paragraph hereof), and includes its legal successors and permitted assignees as may be accepted by FPL, in writing, pursuant to the terms of the Contract Documents.

1.1.19 "Contractor Deliverables" means each of the design criteria, system descriptions, manuals, Drawings, Final Plans, design calculations, quality assurance reports and all other material documents relating to the Project to be delivered to FPL in accordance with the requirements of the Contract Documents.

1.1.20 "Contractor Equipment" means all of the equipment, materials, apparatus, structures, tools, supplies and other goods provided and used by Contractor and its Subcontractors and Vendors for performance of the Work but which is not intended to be incorporated into the Plant.

1.1.21 "Contractor Event of Default" has the meaning set forth in Section 15.1, CONTRACTOR EVENTS OF DEFAULT, of Article XV, TERMINATION.

1.1.22 "Contractor Insurance Policies" has the meaning set forth in Section 9.1, CONTRACTOR INSURANCE POLICIES, of Article IX, INSURANCE.

1.1.23 "Contractor Parent Company" has the meaning set forth in Section 11.8, PARENT GUARANTY, of Article XI, CONTRACTOR GUARANTEES AND LIQUIDATED DAMAGES.

1.1.24 "Contractor Parent Guaranty" has the meaning set forth in Section 11.8, PARENT GUARANTY, of Article XI, CONTRACTOR GUARANTEES AND LIQUIDATED DAMAGES.

1.1.25 "Contractor Permits" means the Applicable Permits, other than FPL Permits, to be obtained by Contractor as described in Appendix A, Scope of Work, or otherwise required pursuant to the Contract Documents.

1.1.26 "Contractor Project Engineering Manager" means the person designated by Contractor as having the responsibility, authority and supervisory power of Contractor for the engineering and design of the Plant.

1.1.27 "Contractor Project Manager" means the person designated by Contractor as having the centralized responsibility, authority and supervisory power of Contractor for design, procurement, construction, testing and start-up of the Plant, as well as all matters relating to the administration of the provisions of the Contract Documents.

ECRC-08-2844 HEARING EXHIBIT - 00000022

1.1.28 "Contractor Site Manager" means an employee of Contractor, working under the supervision of the Contractor Project Manager, located at the Property Site on a daily basis.

1.1.29 "Contractor Taxes" has the meaning set forth in Section 3.24, CONTRACTOR TAXES, of Article III, CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR.

1.1.30 "Contractor's Representative" has the meaning given in Section 3.12, PROJECT MANAGEMENT AND CONTRACTOR'S REPRESENTATIVE, of Article III, CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR.

1.1.31 "Credit Trigger Event" shall be deemed to occur if, at the end of the most recently ended fiscal quarter of Contractor, Contractor fails to maintain a Tangible Net Worth of greater than $550,000,000.

1.1.32 "Credit Event of Default" shall be deemed to occur if, at the end of the most recently ended fiscal quarter of Contractor, Contractor fails to maintain a Tangible Net Worth of greater than $100,000,000.

1.1.33 "Credit Rating" means, on the date such rating is determined, the LC Issuing Bank's latest: (i) unsecured debt rating; (ii) corporate credit rating; or (iii) issuer rating.

1.1.34 "Critical Milestones" means the Milestones set forth in Appendix C, Critical Milestones and Milestones.

1.1.35 "Critical Parameters" has the meaning set forth in Section 3.19.7, Quality Assurance Program, of Article III, CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR.

1.1.36 "Critical Path" means a determination of the Project Schedule specifically illustrating those unique activities and durations that must be completed in sequence to complete the Work, which sequence shall be determined using critical path method precedence networking techniques applied by Contractor.

1.1.37 "Damages" has the meaning set forth in Section 16.1, CONTRACTOR INDEMNIFICATION, of Article XVI, INDEMNIFICATION.

1.1.38 "Day" or "day" means a period of twenty-four (24) consecutive hours from 12:00 midnight (Eastern time), and shall include Saturdays, Sundays and all holidays except that in the event a time period set forth in the Contract Documents expires on a Day that is not a Business Day, such period shall be deemed to expire on the next Business Day thereafter.

1.1.39 "Defect" means, any designs, engineering, software, drawings, components, tools, Equipment, installation, construction, workmanship or Work that, in FPL's reasonable judgment:

(a) Do not conform to the terms or requirements of the Contract Documents;

(b) Are not of uniform good quality, free from defects or deficiencies in design, application, manufacture or workmanship, or that contain improper or inferior workmanship; or

(c) Would adversely affect the:

(i) Performance of the Plant under anticipated operating conditions;

(ii) Continuous safe operation of the Plant during the Plant's design life;

(iii) Structural integrity of the Plant;

(iv) Economic value of FPL's investment in the Plant, all as determined by reference to Prudent Utility Practices.

Anything to the contrary notwithstanding, the Parties agree that Work shall be considered to be defective if it does not conform to Applicable Standards.

1.1.40 "Dispute" has the meaning set forth in Section 17.1, FRIENDLY CONSULTATION, of Article XVII, DISPUTE RESOLUTION.

1.1.41 "Drawings" means all:

(a) Specifications, calculations, designs, plans, drawings, engineering and analyses, and other documents which determine, establish, define or otherwise describe the scope, quantity, and relationship of the components of the Plant, including the structure and foundation thereof; and

(b) Technical drawings, operating drawings, specifications, shop drawings, diagrams, illustrations, schedules and performance charts, calculations, samples, patterns, models, operation and maintenance manuals, piping and instrumentation diagrams, underground structure drawings, conduit and grounding drawings, lighting drawings, conduit and cable drawings, electric one-line's, electric schematics, connection diagrams and technical information of a like nature,

prepared or modified by Contractor or any of its Subcontractors or Vendors all of which are required to be delivered by Contractor, or any Subcontractor or Vendor, from time to time under the Contract Documents or at FPL's request which illustrates any of the Equipment or any other portion of the Work, either in components or as completed.

1.1.42 "Energy Yield Test" has the meaning set forth in Section 11.4.

1.1.43 "Environmental Control Program" means the environmental control program provided by FPL to Contractor.

1.1.44 "Environmental Plan" has the meaning set forth in Section 3.19.4, Health Plan, Safety Plan, and Environmental Plan, of Article III, CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR.

1.1.45 "Environmental Resource Plan" means the environmental resource plan prepared by FPL, which has been provided to Contractor prior to the date of the Agreement.

1.1.46 "Equipment" means all of the equipment, materials, apparatus, structures, tools, supplies, goods and other items provided by Contractor and its Subcontractors and Vendors that are installed or incorporated into the Plant or otherwise form or are intended to form part of the Work or the Plant (other than Contractor Equipment).

1.1.47 "Exempt Equipment" has the meaning set forth in Section 3.24.2, Exempt Equipment, of Article III, CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR.

1.1.48 "Expected Energy Output" has the meaning set forth in Section 2.1.2 of Appendix HH.

1.1.49 "Final Acceptance" means that all of the following have occurred as of the most recent applicable Tests:

(a) Provisional Acceptance has been achieved;

(b) The Tests, mechanical calibrations, electrical continuity and ground fault tests have been successfully completed and any Defects found have been corrected;

(c) Either the:

(i) Final Acceptance Performance Level specified in Section 11.3, FINAL ACCEPTANCE PERFORMANCE LEVEL; GUARANTEED PERFORMANCE LEVEL, of Article XI, CONTRACTOR GUARANTEES AND LIQUIDATED DAMAGES, has been met or exceeded as determined pursuant to Section 11.6, DETERMINATION OF PERFORMANCE, of Article XI, CONTRACTOR GUARANTEES AND LIQUIDATED DAMAGES; or

(ii) Plant has achieved at a minimum the Minimum Performance Level as determined pursuant to Section 11.6, DETERMINATION OF PERFORMANCE, of Article XI, CONTRACTOR GUARANTEES AND LIQUIDATED DAMAGES, and (A) the Contract Price has been reduced in accordance with Section 10.5 for the percentage of the Final Acceptance Performance Level that has not been achieved and (B) Contractor has performed all Remediation Work requested by FPL related to any Work not associated with the percentage of the Final Acceptance Performance Level that has been achieved;

(d) The Plant has been constructed in accordance with the Contract Documents and the Drawings;

(e) The Final Plans accurately reflect the Plant as constructed;

(f) The Plant is capable of being operated in a safe, normal, reliable and continuous manner in accordance with Applicable Laws and Applicable Permits (excluding for this purpose all variances or waivers of any Applicable Permits) and the Contract Documents at all operating conditions and modes specified in the Scope of Work;

(g) Contractor shall have delivered to FPL all operation and maintenance manuals and Final Plans in accordance with the Scope of Work;

(h) No defective or incomplete portions of the Work exist;

(i) Either:

(i) All items on the Punch List have been completed; or

(ii) The Parties have reached an agreement pursuant to Section 10.6, PUNCH LIST, of Article X, SYNCHRONIZATION, TESTS, MECHANICAL COMPLETION, PROVISIONAL ACCEPTANCE AND FINAL ACCEPTANCE, and Contractor has paid all amounts due to FPL pursuant thereto;

(j) All of Contractor's cleanup and related obligations have been completed;

(k) Any and all Liens in respect to the Plant, the Contract Documents, the Equipment, the Job Site or any fixtures, personal property or Equipment included in the Work created by, through or under, or as a result of any act or omission of, Contractor or any Subcontractor, Vendor or other Person providing labor or materials in connection with the Work shall have been released or bonded in form reasonably satisfactory to FPL;

(l) Contractor has delivered to FPL a Contractor's Lien Waiver and Release, in substantially the form of Appendix R, Form of Contractor Certificate for Final Waiver of Liens, from Contractor and Subcontractor's Certificate for Final Waiver of Liens in the form of Appendix R-1, Form of Subcontractor Certificate for Final Waiver of Liens, from each Substantial Subcontractor and Substantial Vendor;

(m) Contractor shall have paid all Schedule Liquidated Damages due under the Contract Documents, if any;

(n) All other outstanding obligations of Contractor hereunder that FPL has notified Contractor of shall have been satisfied; and

(o) FPL has approved of and signed the Final Acceptance Certificate pursuant to Section 10.8.

1.1.50 "Final Acceptance Certificate" means the certificate issued by FPL indicating that Final Acceptance has been achieved by Contractor.

1.1.51 "Final Acceptance Date" means the date of achievement of Final Acceptance as indicated in the Final Acceptance Certificate pursuant to Section 10.8, FINAL ACCEPTANCE OF THE PLANT, of Article X, SYNCHRONIZATION, TESTS, MECHANICAL COMPLETION, PROVISIONAL ACCEPTANCE AND FINAL ACCEPTANCE.

1.1.52 "Final Acceptance Performance Level" means that, at a minimum, the Actual Energy Output is equal to or greater than ninety-five percent (95%) of the Net Energy Output Guarantee when corrected to Guarantee Design Conditions, calculated as follows:

$$\text{Actual Energy Output} \geq (0.95) * \text{Net Energy Output Guarantee}$$

Where "Actual Energy Output" has the meaning given in Section 2.1.2 of Appendix HH.

1.1.53 "Final Acceptance Performance Level Date" has the meaning set forth in Section 11.4.1.

1.1.54 "Final Plans" means final Drawings and final specifications, as revised to reflect the changes during construction, and shall include as-built drawings, piping and instrumentation diagrams, underground structure drawings (including buried piping, all utilities, and critical hidden items), electric one-lines, electric schematics and connection diagrams.

1.1.55 "Financial Closing" means that all of the following events shall have occurred (which events may occur over a period of time) with respect to the Plant: (i) the Financing Documents have been fully executed (which documents may be executed over a period of time) which together provide for financing for the Plant in an amount and on the terms acceptable to FPL; (ii) all conditions precedent to the initial availability of funds under the Financing Documents referred to in the preceding clause (i) have been fulfilled or waived and the first draw thereunder has been made by FPL; and (iii) FPL has received commitments for such equity as is required by FPL and satisfies the requirements of the Financing Parties.

1.1.56 "Financing Documents" means all the loan agreements, notes, indentures, securities, debt instruments, bonds, security agreements, swap agreements, letters of credit and other documents or agreements with a Financing Party or relating to a financing (including refinancing) by a Financing Party.

1.1.57 "Financing Parties" means the lenders, security holders, investors, export credit agencies, multilateral institutions, equity providers and others providing debt or equity financing or refinancing to or on behalf of FPL or any Affiliate of FPL or for the Project or any portion thereof, or any trustee or agent acting on behalf of any of the foregoing.

1.1.58 "Force Majeure Event" has the meaning set forth in Section 14.1, DEFINITION OF FORCE MAJEURE EVENT, of Article XIV, FORCE MAJEURE AND FPL CAUSED DELAY.

1.1.59 "FPL" means Florida Power & Light Company, a Florida corporation (as referenced in the opening paragraph hereof) and it includes its legal successors and those assignees as may be designated by FPL, in writing, pursuant to the terms of this Agreement.

1.1.60 "FPL Caused Delay" means a material delay in Contractor's performance of any Critical Milestone, to the extent Contractor demonstrates that such delay was actually and demonstrably caused by FPL's failure to perform any covenant of FPL hereunder (other than by exercise of rights under this Agreement, including the exercise by FPL of the right to have defective or nonconforming Work corrected or re-executed), including, without limitation, FPL's failure to timely obtain any FPL Permit, and which actually, demonstrably and adversely affects the Critical Path. Contractor expressly acknowledges and agrees that any delay, to the extent caused by Contractor's action or inaction (other than by exercise of rights under this Agreement), is not an FPL Caused Delay.

1.1.61 "FPL Event of Default" has the meaning set forth in Section 15.6, FPL EVENTS OF DEFAULT, of Article XV, TERMINATION

1.1.62 "FPL Interconnection Facilities" shall have the meaning ascribed thereto in Section 2.3 of Appendix A, Scope of Work.

1.1.63 "FPL Permits" means the Applicable Permits to be obtained by FPL as set forth in Appendix A, Scope of Work.

1.1.64 "FPL Taxes" has the meaning set forth in Section 4.9, FPL TAXES, of Article IV, CERTAIN OBLIGATIONS OF FPL.

1.1.65 "GAAP" shall mean generally accepted accounting principles in the United States of America, consistently applied throughout the specified period.

1.1.66 "Government Authority" means any and all foreign, national, federal, state, county, city, municipal, local or regional (or equivalent) authorities, departments, bodies, commissions, corporations, branches, directorates, agencies, ministries, courts, tribunals, judicial authorities, legislative bodies, administrative bodies,

ECRC-08-2848 HEARING EXHIBIT - 00000026

regulatory bodies, autonomous or quasi-autonomous entities or taxing authorities or any department, municipality or other political subdivision thereof.

1.1.67 "Grid" means the interconnected high voltage transmission facilities being a part of the FPL transmission system.

1.1.68 "Guarantee Design Conditions" means Standard Test Conditions as such term is defined in the Scope of Work and Appendix HH.

1.1.69 "Guaranteed Performance Level" means the Net Energy Output Guarantee, as guaranteed by Contractor pursuant to Section 11.3, FINAL ACCEPTANCE PERFORMANCE LEVEL; GUARANTEED PERFORMANCE LEVEL, of Article XI, CONTRACTOR GUARANTEES AND LIQUIDATED DAMAGES.

1.1.70 "Guaranteed Performance Test" means the test performed by Contractor in order to determine the Net Energy Output of the Plant, as more particularly described in Section 2.0 of Appendix HH, Acceptance Testing.

1.1.71 "Guaranteed Provisional Acceptance Date" means December 31, 2009, the date which Contractor guarantees that the Project shall achieve Provisional Acceptance, as such date may be extended in accordance with the terms hereof.

1.1.72 "Hazardous Material" means any hazardous or toxic chemicals, hazardous materials, hazardous waste, hazardous constituents, hazardous or toxic or radioactive substances or petroleum products (including crude oil or any fraction thereof) defined or regulated as such under any Applicable Laws.

1.1.73 "Health Plan" has the meaning set forth in Section 3.19.4, Health Plan, Safety Plan, and Environmental Plan, of Article III, CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR.

1.1.74 "Indemnified Person" has the meaning set forth in Section 16.3, CONDITIONS OF INDEMNIFICATION, of Article XVI, INDEMNIFICATION.

1.1.75 "Indemnifying Party" has the meaning set forth in Section 16.3, CONDITIONS OF INDEMNIFICATION, of Article XVI, INDEMNIFICATION.

1.1.76 "Independent Engineer" means the Person appointed by the Financing Parties and approved by FPL to ensure that the Work is completed in accordance with the Contract Documents.

1.1.77 "Initial LC Amount Expiration Date" has the meaning set forth in Section 7.5.1.

1.1.78 "Initial Site Mobilization" means the first instance when any of Contractor or its Subcontractors' or Vendors' Labor or other representatives is present on the Property Site after the date of this Agreement.

1.1.79 "Intangible Asset" means any asset that is treated as an intangible asset according to GAAP, including:

(a) goodwill, including any amounts (however designated on the balance sheet) representing the cost of acquisitions of subsidiaries in excess of underlying tangible assets;

(b) patents, trademarks and copyrights;

(c) leasehold improvements not recoverable at the expiration of a lease; and

(d) deferred charges (including, but not limited to, unamortized debt discount and expense, organization expenses and experimental and development expenses, but excluding prepaid expenses).

1.1.80 "Intellectual Property Rights" has the meaning set forth in Section 3.32, INTELLECTUAL PROPERTY RIGHTS, of Article III, CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR.

1.1.81 "Job Site" means the Property Site (other than the area designated as Protected Areas, if any, and not constituting a part of the Job Site on the survey provided by FPL pursuant to Section 4.7, DESCRIPTION OF PROPERTY SITE, of Article IV, CERTAIN OBLIGATIONS OF FPL) and any other areas where Contractor

ECRC-08-2849 HEARING EXHIBIT - 00000027

may temporarily obtain care, custody and control, use, easement or license for purposes directly, indirectly or incidentally related to performance of, or as an accommodation to, the Work.

1.1.82 "Labor" means the workforce of the relevant Person, including its staff and employee and non-employee and skilled and unskilled workers.

1.1.83 "Latest Limited Notice to Proceed Date" has the meaning set forth in Section 5.2.2.

1.1.84 "Latest Notice to Proceed Date" has the meaning set forth in Section 5.2.4.

1.1.85 "LC Issuing Bank" means the domestic financial institution, acceptable to FPL and the Financing Parties and satisfying the requirements set forth in Section 7.5.3, LC Issuing Bank, of Article VII, CONTRACT PRICE; PAYMENTS TO CONTRACTOR, which institution will issue the Letter of Credit on behalf of Contractor in connection with the Project, as more particularly described in Section 7.5, LETTERS OF CREDIT, of Article VII, CONTRACT PRICE; PAYMENTS TO CONTRACTOR.

1.1.86 "Letter of Credit" has the meaning set forth in Section 7.5, LETTERS OF CREDIT, of Article VII, CONTRACT PRICE; PAYMENTS TO CONTRACTOR.

1.1.87 "Lien" means any lien, security interest, mortgage, hypothecation, encumbrance or other restriction on title or property interest.

1.1.88 "Lift Stay Order" has the meaning set forth in Section 18.20, ACCEPTANCE OR REJECTION IN BANKRUPTCY, of Article XVIII, MISCELLANEOUS.

1.1.89 "Limited Notice to Proceed" means each notice given by FPL to Contractor directing Contractor to commence a limited portion of the Work.

1.1.90 "Major Equipment" means any item or component, or set of items of components, of the Project with a value in excess of $250,000, the proper or efficient function of which materially affects the Plant's output or reliability.

1.1.91 "Major Manufacturers" means the manufacturers of the Major Equipment.

1.1.92 "Mechanical Completion" means that:

(a) The Equipment for the Project has been installed, including with the required connections and controls to produce electrical power;

(b) All Equipment related to the solar tracking system, if any, has been installed and checked for alignment, lubrication and rotation;

(c) All remaining electrical systems have been checked out and are ready for operation;

(d) All electrical continuity and ground fault tests and all mechanical tests and calibrations have been completed; and

(e) All instrumentation is operational and has been calibrated in accordance with manufacturers' standards and guidelines and, where possible, loop checked.

1.1.93 "Milestones" means the activities, events and targets, or combination thereof, set forth in Appendix C, Critical Milestones and Milestones, attached hereto.

1.1.94 "Minimum Performance Level" means that, at a minimum and as determined in Section 11.6, DETERMINATION OF PERFORMANCE, of Article XI, CONTRACTOR GUARANTEES AND LIQUIDATED DAMAGES, the Net Energy Output is equal to or greater than fifty percent (50%) of the Net Energy Output Guarantee when corrected to Guarantee Design Conditions.

1.1.95 "Module Warranty Period" has the meaning set forth in Section 12.1.4(c).

1.1.96 "Moody's" means Moody's Investor Services, Inc.

ECRC-08-2850 HEARING EXHIBIT - 00000028

1.1.97 "Net Energy Output" means electrical energy of the Plant, in kWh, measured at the revenue quality meters at the FPL Interconnection Facilities.

1.1.98 "Net Energy Output Guarantee" has the meaning set forth in Section 11.3, GUARANTEED PERFORMANCE LEVEL, of Article XI, CONTRACTOR GUARANTEES AND LIQUIDATED DAMAGES.

1.1.99 "Noise Guarantee" means that the Project will function at a noise level that is equal to or less than the lower of the noise limitations set forth in Appendix A, Scope of Work, or the noise limitations contained in the Applicable Permits and Applicable Laws (as demonstrated by the Noise Test and excluding for purposes of determining compliance with the Applicable Permits and Applicable Laws all variances and waivers that may be applicable thereto).

1.1.100 "Noise Test" means the tests more particularly described in Appendix A, Scope of Work, which shall be performed simultaneously with the testing of the Minimum Performance Level and the Guaranteed Performance Level in order to evidence satisfaction of the Noise Guarantee for the Plant.

1.1.101 "Notice to Proceed" means the written notice given from FPL to Contractor directing Contractor to commence performance of the entire Work.

1.1.102 "Notice to Proceed Date" has the meaning set forth in Section 5.2.4.

1.1.103 "O&M Contractor" means the Person selected by FPL for the operation and maintenance of the Plant.

1.1.104 "O&M Personnel" has the meaning set forth in Section 3.22, TRAINING OF O&M PERSONNEL, of Article III, CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR

1.1.105 "Operating Guidelines" means the guidelines or requirements specified in the Utility interconnection agreement applicable to the Project.

1.1.106 "Operating Mode Test" means the test further described in Appendix A, Scope of Work.

1.1.107 "Parties" means collectively, FPL and Contractor.

1.1.108 "Party" means individually, FPL or Contractor.

1.1.109 "Payment Output Percentage" means the percentage determined in accordance with the following formula:

Payment Output Percentage = (1.2 x Output Percentage) - 20

Where:

Output Percentage = the percentage of the Guaranteed Performance Level achieved up to 95% (for purposes of Section 10.5.1) and 97% (for purposes of Section 11.4.3).

1.1.110 "Person" means an individual, partnership, corporation, limited liability company, company, business trust, joint stock company, trust, unincorporated association, joint venture, Government Authority or other entity of whatever nature.

1.1.111 "Plant" means the nominal 25 MW (net) solar photovoltaic, electrical generating facility, to be located on the Property Site, including the solar photovoltaic panels, the solar tracking system, if any, and all structures, facilities, appliances, lines, conductors, instruments, apparatus, components, roads and other equipment comprising and integrating the entire facility as more particularly described in Appendix A, SCOPE OF WORK.

1.1.112 "Plant Warranty Period" has the meaning set forth in Section 12.1.4(b).

1.1.113 "Pre-Existing Hazardous Material" means Hazardous Material that existed on or in the Property Site prior to Initial Site Mobilization by Contractor.

ECRC-08-2851 HEARING EXHIBIT - 00000029

1.1.114 "Procedures Manual" has the meaning set forth in Section 3.19.3, Procedures Manual, of Article III, CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR.

1.1.115 "Project" means the Plant and all equipment, services and utilities related thereto which must be designed, constructed, assembled, erected, commissioned, started, tested and otherwise completed by, or through, Contractor as part of the Scope of Work and in strict accordance with the provisions of the Contract Documents.

1.1.116 "Project Loss Manual" means the project loss manual prepared by FPL which has been provided to Contractor prior to the date of this Agreement.

1.1.117 "Project Schedule" means the schedule for completion of the Work attached hereto as Appendix B, Project Schedule.

1.1.118 "Property Site" means that certain piece of property located in DeSoto County, Florida, as more particularly described in Appendix P, Legal Description of Property Site.

1.1.119 "Protected Areas" has the meaning set forth in Section 3.16.4, *Protected Areas*, of Article III, CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR.

1.1.120 "Provisional Acceptance" means that all of the following have occurred for the Project:

(a) Mechanical Completion has been achieved;

(b) The Plant has been synchronized with the Grid in accordance with the Scope of Work and the Utility's interconnection requirements;

(c) The Plant is capable of being operated safely, normally, reliably and continuously in accordance with the requirements of all Applicable Laws, Applicable Permits and the Contract Documents at all operating conditions and modes specified in the Scope of Work;

(d) The Project has achieved at a minimum the Minimum Performance Level as determined pursuant to Section 11.6, DETERMINATION OF PERFORMANCE, of Article XI, CONTRACTOR GUARANTEES AND LIQUIDATED DAMAGES;

(e) The Project has achieved the Noise Guarantee simultaneously with the Minimum Performance Level;

(f) The Operating Mode Tests and the Capability Verification Tests have been successfully completed and all criteria for passing such tests have achieved;

(g) Contractor has provided FPL with copies of all Contractor Permits;

(h) The training of O&M Personnel has been completed;

(i) All spare parts required under the Contract Documents have been delivered by Contractor to the Property Site in accordance with Section 3.26, SPARE PARTS AVAILABILITY, of Article III, CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR;

(j) All Work has been completed in accordance with the requirements of the Contract Documents (other than items on the Punch List); and

(k) Contractor shall have paid all Schedule Liquidated Damages due under the Contract Documents, if any.

For the avoidance of doubt, it is expressly acknowledged and agreed that the commencement or completion of any stormwater system to be built in connection with the Project shall not be a condition to achieving Provisional Acceptance.

1.1.121 "Provisional Acceptance Date" means the actual date of achieving Provisional Acceptance as determined pursuant to Section 10.7, PROVISIONAL ACCEPTANCE, of Article X, SYNCHRONIZATION, TESTS, MECHANICAL COMPLETION, PROVISIONAL ACCEPTANCE AND FINAL ACCEPTANCE.

ECRC-08-2852 HEARING EXHIBIT - 00000030

1.1.122 "Prudent Utility Practices" means those sound and prudent practices, acts, methods, specifications, codes and standards generally followed by the United States electric utility industry with respect to design, construction, operation, and maintenance of first class, major electric generating, transmission, and distribution facilities (including but not limited to, the engineering, operating and safety practices generally followed by the electric utility industry) that, in the exercise of good judgment, would have been expected to accomplish the desired result in a manner consistent with Applicable Laws, Applicable Permits, reliability, safety, environmental protection, local conditions, economy and efficiency.

1.1.123 "Punch List" has the meaning set forth in Section 10.6, PUNCH LIST, of Article X, SYNCHRONIZATION, TESTS, MECHANICAL COMPLETION, PROVISIONAL ACCEPTANCE AND FINAL ACCEPTANCE.

1.1.124 "Qualified Insurer" has the meaning set forth in Section 9.3, QUALIFIED INSURERS, of Article IX, INSURANCE.

1.1.125 "Quality Assurance Program" has the meaning set forth in Section 3.19.7, Quality Assurance Program, of Article III, CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR.

1.1.126 "Quality Control Manual" has the meaning set forth in Section 3.19.7, Quality Assurance Program, of Article III, CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR.

1.1.127 "Remediation Work" means work required by FPL to remove all Work and Contractor Equipment from the Property Site and restore the Property Site to the condition of the Property Site immediately prior to Initial Site Mobilization.

1.1.128 "Remedial Plan" means a plan of corrective action, submitted by Contractor pursuant to Section 10.5, PERFORMANCE SHORTFALLS, of Article X, SYNCHRONIZATION, TESTS, MECHANICAL COMPLETION, PROVISIONAL ACCEPTANCE AND FINAL ACCEPTANCE, that specifies in reasonable detail the actions Contractor proposes to undertake to cause the Project to satisfy the Final Acceptance Performance Level, and the period of time in which Contractor proposes to complete the corrective action; provided that such corrective action is reasonably likely to cause the Project to satisfy the Final Acceptance Performance Level as determined by root cause analysis of the deficiencies identified by previous testing.

1.1.129 "Request for Payment" means the written requests from Contractor to FPL for payment hereunder, which requests shall be in substantially the form of Appendix F, Form of Request for Payment.

1.1.130 "S&P" means Standard and Poor's Ratings Group (a division of McGraw Hill Companies).

1.1.131 "Safe and Secure Workplace Policy" means the safe and secure workplace policy of FPL which is attached hereto as Appendix Z-1, Safe and Secure Workplace Policy, as same may be amended or modified by FPL from time to time.

1.1.132 "Safety Plan" has the meaning set forth in Section 3.19.4, Health Plan, Safety Plan and Environmental Plan, of Article III, CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR.

1.1.133 "Schedule Liquidated Damages" has the meaning set forth in Section 11.2, SCHEDULE LIQUIDATED DAMAGES, of Article XI, CONTRACTOR GUARANTEES AND LIQUIDATED DAMAGES.

1.1.134 "Scheduled Synchronization Date(s)" means the date identified by Contractor in a notice received by FPL at least one hundred forty (140) days prior to such date as being the date on which Contractor will first attempt to cause the generating equipment of the Project to be electrically synchronized and connected to the Grid.

1.1.135 "Scope of Work" means the services and work to be provided, or caused to be provided, by or through Contractor under the Contract Documents for the Contract Price, as more particularly described in Appendix A, Scope of Work, as the same may be amended from time to time in accordance with the terms hereof, and which Scope of Work includes, without limitation, all licenses, Contractor Permits, technical assistance, engineering, assembly, construction management, construction, services, labor, materials,

equipment, Contractor Equipment, operations and management that are indicated on, inferable from, or incidental to, the Contract Documents or the Drawings prepared in connection with the Contract Documents or that are likely to be required in accordance with Applicable Law, or that are properly and customarily included within the general scope and magnitude of the work incorporated into similar projects having similar output and performance requirements, all in order to produce a Project that complies with the requirements of the Contract Documents.

1.1.136 "Subcontractor" means any contractor, constructor or material man who performs any portion of the Scope of Work other than Contractor.

1.1.137 "Substantial Subcontractor" means a Subcontractor whose contract or contracts (in the aggregate) with Contractor require payments by Contractor totaling at least Two Hundred Fifty Thousand Dollars ($250,000.00).

1.1.138 "Substantial Vendor" means a Vendor whose contract or purchase orders (in the aggregate) with Contractor require payments by Contractor of at least Two Hundred Fifty Thousand Dollars ($250,000.00).

1.1.139 "Switchyard Facilities" means the area adjacent to the Plant designated by FPL for the 23 kV voltage equipment and apparatus used for connecting the Plant to the FPL Interconnection Facilities, all as more particularly described in Appendix A, Scope of Work.

1.1.140 "Tangible Net Worth" with respect to any Person means such Person's total stockholder's equity minus its Intangible Assets, each as would be reflected on a balance sheet prepared in accordance with GAAP.

1.1.141 "Tax" or "Taxes" means all fees, taxes, including sales taxes, use taxes, stamp taxes, value-added taxes, ad valorem taxes and property taxes (personal and real, tangible and intangible), customs, duties, tariffs, levies, assessments, withholdings and other charges and impositions of any nature, plus all related interest, penalties, fines and additions to tax, now or hereafter imposed by any Applicable Law or Government Authority (including penalties or other amounts payable pursuant to subtitle B of Title I of ERISA).

1.1.142 "Termination Payment" has the meaning set forth in Section 15.3.2, Termination Payment, of Article XV, TERMINATION.

1.1.143 "Termination Payment Schedule" means Appendix N hereto.

1.1.144 "Test Notice" has the meaning set forth in Section 10.1.2, Test Notice, of Article X, SYNCHRONIZATION, TESTS, MECHANICAL COMPLETION, PROVISIONAL ACCEPTANCE AND FINAL ACCEPTANCE

1.1.145 "Tests" means the Operating Mode Test, the Capability Verification Test, the Guaranteed Performance Test and the Noise Test.

1.1.146 "Utility" means FPL.

1.1.147 "Vendor" means any supplier, manufacturer or vendor of Equipment to Contractor or any Subcontractor.

1.1.148 "Warranty Period" and "Warranty Periods" have the meanings set forth in Section 12.1.4, Warranty Period, of Article XII, CONTRACTOR'S WARRANTIES.

1.1.149 "Work" has the meaning set forth in Section 3.1, SCOPE OF WORK; APPLICABLE STANDARDS, of Article III, CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR, and includes the Plant, the Equipment, the Contractor Deliverables and any other product or result of the Work, but excludes any storm water system at or related to the Project Site.

1.2 INTERPRETATION

Unless the context of the Contract Documents otherwise requires:

1.2.1 The headings contained in this Agreement are used solely for convenience and do not constitute a part of this Agreement between the Parties, nor should they be used to aid in any manner to construe or interpret this Agreement;

ECRC-08-2854 HEARING EXHIBIT - 00000032

1.2.2 The gender of all words used herein shall include the masculine, feminine and neuter and the number of all words shall include the singular and plural words;

1.2.3 The terms "hereof", "herein" "hereto" and similar words refer to this entire Agreement and not to any particular Article, Section, Appendix or any other subdivision of this Agreement;

1.2.4 References to "Article," "Section" or "Exhibit" are to this Agreement unless specified otherwise;

1.2.5 Reference to "this Agreement" (including any Appendix hereto) or any other agreement, Exhibit, permit or document shall be construed as a reference to such agreement or document as the same may be amended, modified, supplemented or restated, and shall include a reference to any document which amends, modifies, supplements or restates, or is entered into, made or given pursuant to or in accordance with its terms;

1.2.6 References to any law, statute, rule, regulation, notification or statutory provision (including Applicable Laws, Applicable Permits and the Operating Guidelines) shall be construed as a reference to the same as it may have been, or may from time to time be, amended, modified or re-enacted;

1.2.7 References to any Person shall be construed as a reference to such Person's successors and permitted assigns; and

1.2.8 References to "includes," "including" and similar phrases means "including, without limitation."

1.3 APPENDICES

The following Appendices are attached to and incorporated into and made a part of this Agreement:

1.3.1 Appendix A ..... Scope of Work

1.3.2 Appendix B..... Project Controls Requirements

1.3.3 Appendix C..... Critical Milestones and Milestones

1.3.4 Appendix D ..... Construction and Milestone Payment Schedule

1.3.5 Appendix E..... Credit Trigger Event

1.3.6 Appendix F..... Form of Request for Payment

1.3.7 Appendix G ..... Form of Final Acceptance Certificate

1.3.8 Appendix H ..... Form of Contractor Certificate for Partial Waiver of Liens

1.3.9 Appendix H-1 ..... Form of Subcontractor Certificate for Partial Waiver of Liens

1.3.10 Appendix I..... Form of Contractor Parent Guaranty

1.3.11 Appendix J..... Option Pricing

1.3.12 Appendix K ..... Module Warranty

1.3.13 Appendix L..... Operating and Maintenance Manuals

1.3.14 Appendix M..... FPL Permits

1.3.15 Appendix N ..... Termination Payment Schedule

1.3.16 Appendix O ..... Project Management Team

1.3.17 Appendix P..... Legal Description of Property Site

1.3.18 Appendix Q ..... Intentionally Deleted

1.3.19 Appendix R..... Form of Contractor Certificate for Final Waiver of Liens

1.3.20 Appendix R-I..... Form of Subcontractor Certificate for Final Waiver of Liens

1.3.21 Appendix S ..... Form of Request for Change Order

1.3.22 Appendix T ..... Intentionally Deleted

1.3.23 Appendix U ..... Form of Letter of Credit

1.3.24 Appendix V ..... Contractor's Exclusions

1.3.25 Appendix W ..... Intentionally Deleted

1.3.26 Appendix X ..... Intentionally Deleted

1.3.27 Appendix Y ..... Form of Quality Assurance Programs

1.3.28 Appendix Z ..... Form of Safety Plan

1.3.29 Appendix Z-1 ..... Safe and Secure Workplace Policy

1.3.30 Appendix HH ..... Acceptance Testing

1.3.31 Appendix II ..... Performance Degradation Testing

1.4 ORDER OF PRECEDENCE

1.4.1 In the event of conflicts among the terms of the Contract Documents, interpretations shall be based upon the following Contract Documents which are set forth in ranked order of precedence:

(a) Amendments, addenda or other modifications to the Contract Documents (including Change Orders) duly signed and issued after the signing of this Agreement and effected in accordance with the terms hereof, with those of a later date having precedence over those of an earlier date;

(b) The Agreement; and

(c) The Appendices to the Agreement.

In the event of a conflict among, or within, any other Contract Document(s) within any one of the levels set forth in the foregoing order of precedence, or between the Contract Documents and Applicable Laws or Applicable Permits, or among Applicable Laws or Applicable Permits themselves, the more stringent or higher quality requirements shall control. All obligations imposed on Contractor and each Subcontractor under the Agreement or under Applicable Laws, Applicable Permits or Applicable Standards and not expressly imposed or addressed in the Contract Documents shall be in addition to and supplement the obligations imposed on Contractor under the Contract Documents, and shall not be construed to create an "irreconcilable conflict."

1.5 LANGUAGE

1.5.1 The Contract Documents and all documentation to be supplied hereunder (including, without limitation, all Contractor Deliverables and all warranties provided hereunder) shall be in the English language.

ARTICLE II.
RETENTION OF CONTRACTOR

2.1 RETENTION OF CONTRACTOR

FPL hereby engages Contractor, and Contractor hereby agrees to be engaged by FPL to perform the Work in accordance with the terms and conditions set forth herein.

2.2 STATUS OF CONTRACTOR; NO PARTNERSHIP

Contractor shall be an independent contractor with respect to any and all Work performed and to be performed under the Contract Documents. The Contract Documents shall not be interpreted or construed to create an association, joint venture or partnership relationship among or between the Parties or any similar relationship, obligations or liabilities. Neither Party shall have any right, power or authority to enter into any agreement or undertaking for, act on behalf of, or to act as or be an agent or representative of, or to otherwise bind or obligate the other Party.

ECRC-08-2856 HEARING EXHIBIT - 00000034

2.3 SUBCONTRACTORS AND VENDORS.

2.3.1 Subject to the terms hereof, Contractor shall have the right to have any portion of the Work performed by a Subcontractor or Vendor qualified to perform such Work pursuant to written subcontracts or written purchase orders; provided that Contractor shall not be relieved from any liability or obligation under the Contract Documents. Except as otherwise expressly provided in the Contract Documents, Contractor shall be solely responsible for engaging, managing, supervising and paying all such Subcontractors and Vendors. Contractor shall require that all Work performed, and all Equipment provided by Subcontractors and Vendors are received, inspected and otherwise furnished in accordance with the Contract Documents, and Contractor shall be solely liable for all acts, omissions, liabilities and Work (including Defects therein) of such Subcontractors and Vendors. FPL shall not have any obligation or liability to any Subcontractor or Vendor. Nothing in any contract, subcontract or purchase order with any Subcontractor or Vendor shall in any way diminish or relieve Contractor from any duties and obligations under the Contract Documents; and each such contract, subcontract and purchase order must provide that the rights thereunder are assignable to FPL and the Financing Parties or their designees at any time without the prior consent of the applicable Subcontractor or Vendor. No Subcontractor or Vendor is intended to be or shall be deemed a third-party beneficiary of the Contract Documents.

2.3.2 FPL shall have the right to approve, in advance in writing, each Substantial Subcontractor and Substantial Vendor in accordance with the terms hereof. Prior to retaining any Substantial Subcontractors or Substantial Vendors, Contractor shall notify FPL in writing and provide it with such information as necessary to enable FPL to evaluate each such proposed Substantial Subcontractor or Substantial Vendor for the portion of the Work proposed to be performed by it. Within fifteen (15) days after receipt of such information, FPL shall advise Contractor if any proposed Substantial Subcontractor or Substantial Vendor is unacceptable. If FPL fails to object to any proposed Substantial Subcontractor or Substantial Vendor within such fifteen (15) day period, Contractor may retain such Substantial Subcontractor or Substantial Vendor for the portion of the Work proposed. If FPL objects in writing (stating with reasonable detail the basis for such objection) within such fifteen (15) day period to such proposed Substantial Subcontractor or Substantial Vendor, Contractor shall not retain such proposed Substantial Subcontractor or Substantial Vendor. Approval of any Substantial Subcontractor or Substantial Vendor under this paragraph shall only be for the portion of the Work so approved. Contractor hereby acknowledges and agrees that the review and/or acceptance of any subcontract by FPL and the acceptance of the approved Substantial Subcontractors and Substantial Vendors shall not: (i) modify, in any way, the obligations of Contractor pursuant to the Contract Documents; or (ii) be raised as a claim or as a defense or counterclaim to any claim in connection with the Contract Documents.

2.3.3 Contractor shall submit to FPL a copy of each purchase order or agreement entered into with a Substantial Subcontractor or Substantial Vendor for Major Equipment. Each purchase order or agreement shall show, where applicable, the Vendor's or Subcontractor's name, manufacturer's name, materials type, model number, size, quantity and lists of the Major Equipment ordered, and shall be submitted to FPL when issued for purchase. For purposes of clarity, it is understood and agreed that no document required to be submitted to FPL pursuant to this Section 2.3.3 shall be required to contain any economic terms, all of which economic terms may be redacted prior to submission to FPL.

2.3.4 Each subcontract and purchase order shall require such Subcontractor and Vendor to assume toward Contractor those terms and conditions of contracting which Contractor customarily includes in its subcontracts. At a minimum, all subcontracts shall require the Subcontractors to comply with Applicable Laws and Applicable Permits, shall provide that FPL has the right of inspection as provided hereunder and require such Subcontractors and Vendors to:

(a) Be subject to the labor obligations hereunder as well as the safety and security provisions of the Contract Documents;

(b) Provide guarantees and warranties with respect to its portion of the Work and the Equipment,

(c) Provide certificates of insurance as set forth herein;

(d) Be subject to the dispute resolution procedures as required herein; and

(e) Have such terms and conditions as are reasonably and customarily obtained.

All subcontracts shall preserve and protect the rights of FPL, shall not prejudice such rights and shall require each Subcontractor to enter into similar agreements with other Subcontractors.

2.3.5 In addition to the requirements set forth in Section 2.3.4, above, Contractor shall include in each subcontract and purchase order the following language to make FPL an express third-party beneficiary of such subcontract or purchase order:

> "The parties hereto agree and acknowledge that the services/work/equipment to be provided hereunder by [subcontractor] will be incorporated into the power station being developed by [FPL]. As such, the parties expressly agree that FPL is a third party beneficiary of this [Agreement] entitled, in its own name or in the name of [Contractor], to enforce this [Agreement] against [subcontractor]."

ARTICLE III.
CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR

3.1 SCOPE OF WORK; APPLICABLE STANDARDS.

3.1.1 Contractor shall, at its own cost and expense:

(a) Design, engineer, procure, construct, start up, and carry out the Tests for the Plant, and perform its other obligations hereunder, including completion of the Scope of Work and any warranty work hereunder; and

(b) Manage, supervise, inspect and furnish all Labor, Equipment, Contractor Equipment, temporary structures, temporary utilities, products and services for the foregoing,

all on a turnkey basis, in accordance with the Contract Documents, including, without limitation, the Project Schedule and the Scope of Work, as the same may be modified from time to time in accordance with the terms hereof by a Change Order or other amendment hereto (all of the foregoing being collectively referred to in this Agreement as the "Work").

3.1.2 Subject to the remedies provided for herein, Contractor shall perform the Work and turn the Plant over to FPL in a manner that is:

(a) Sufficient, complete and adequate in all respects necessary for the Project to successfully achieve Provisional Acceptance by the Guaranteed Provisional Acceptance Date;

(b) In conformance with professional standards and skill, expertise and diligence of design and construction professionals regularly involved in first class, major grid-connected solar power projects in the United States;

(c) In compliance with the terms of the Contract Documents, the Operating Guidelines, the Utility's interconnection requirements, all Applicable Laws, Applicable Standards and Applicable Permits; and

(d) Approved as to form, use and content by all Government Authorities and private entities authorized to administer or enforce any building or construction code or standard whose approval of the final design of the Plant, or any portion thereof, is necessary for the construction, operation or interconnection of the Plant.

3.1.3 *Contractor's Exclusions*. In light of the foregoing, Contractor has included within the Contract Price the cost to complete the entire Scope of Work. Items need not be specifically listed in the Contract Documents or in Appendix A, Scope of Work, in order to be deemed to be items within the Scope of Work. It is understood that Contractor is better qualified to list exclusions than FPL is to list inclusions. Therefore,

any item indicated on the Contract Documents, inferable therefrom, incidental thereto or required in accordance with any Applicable Law, Applicable Standards, Applicable Permits or Prudent Utility Practices, that is not specifically excluded from the Scope of Work in Contractor's exclusions set forth on Appendix V, Contractor's Exclusions, is to be considered as part of the Scope of Work. In addition, the Scope of Work includes all that should be properly included and all that would be customarily included within the general scope and magnitude of the Work in order to achieve the Guaranteed Performance Level applicable to the Project. As a result, except for Contractor's exclusions set forth on Appendix V, Contractor's Exclusions, Contractor hereby waives any and all claims for an increase in the Contract Price or an extension of the Guaranteed Provisional Acceptance Date based, in whole or in part, upon an assertion that any certain license, technical assistance, engineering, assembly, construction, service, labor, material, equipment, operation or management is beyond the Scope of Work when such license, technical assistance, engineering, assembly, construction, service, labor, material, equipment, operation or management is indicated in the Contract Documents, the Drawings or other instruments of service prepared in connection with the Contract Documents, inferable therefrom, incidental thereto, required in accordance with any Applicable Law, Applicable Standards, Applicable Permits, Prudent Utility Practices or otherwise necessary in order to complete a Project in accordance with and subject to the requirements of the Contract Documents.

3.1.4 Contractor shall perform the Work in conformance with professional standards and skill, expertise and diligence of design and construction professionals regularly involved in first class, major, grid-connected solar power projects for public utilities in the United States. Without limiting the generality of the foregoing, Contractor shall:

(a) Comply with, and shall cause the Work and all components thereof to comply with, the Operating Guidelines, Applicable Laws, Applicable Standards, Applicable Permits, Prudent Utility Practices, the requirements of the Contract Documents and the generally accepted standard of care, skill and diligence as would be provided by, in the case of engineering services, a prudent engineering firm, and in the case of construction or procurement services, by a prudent construction firm, in each case experienced in supplying such services in the United States to power-producing entities for first class, major power projects;

(b) Cause the Work to be performed with Contractor's best skill and judgment, in a safe, expeditious, good and workmanlike manner in accordance with the preceding paragraph (a);

(c) Cause the Work to be approved as to form, use and content by all Government Authorities and private entities authorized to administer or enforce any building or construction code or standard whose approval of the final design of the Project, or any portion thereof, is necessary for the construction or operation of the Project;

(d) Cause the Plant to be designed to operate, and shall cause the Plant to be capable of being operated, at all levels and operating modes in accordance with the Operating Guidelines, Applicable Laws, Applicable Standards, Applicable Permits, Prudent Utility Practices and the requirements of the Contract Documents; and

(e) Cause the Plant and all items of Equipment and improvements comprising the Plant to be designed, manufactured, installed, calibrated and tested where applicable in accordance with the published standards (as of the dates specified) of the organizations listed in the Scope of Work and Contractor shall notify FPL of any standards of such organizations that are inconsistent with each other and advise FPL of the manner in which it intends to resolve such inconsistency in accordance with the published standard.

Contractor shall inspect or cause to be inspected all items to be incorporated into or used in the performance of the Work and shall reject those items determined not to be in compliance with the requirements of the Contract Documents. Except as otherwise expressly provided in this Agreement, the standard of performance set forth in this Section 3.1.4, shall apply to all aspects of the Work, and this Section 3.1.4, shall be deemed to be incorporated by reference into each provision of the Contract Documents describing the Work, Contractor's obligations hereunder, or referring to the "requirements of

ECRC-08-2859 HEARING EXHIBIT - 00000037

the Contract Documents", "in accordance with the Contract Documents" or words of similar effect. In no event will references in any provision of Contract Documents to one or more of the standards, guidelines, practices, regulations, laws, or permits contained in this Section 3.1.4, be interpreted to limit in the applicability of all such standards, guidelines, practices, regulations, laws, and permits to such provision. Additionally, as a condition to meeting Provisional Acceptance and Final Acceptance, the Work for such milestone must be completed in accordance with all of the standards, guidelines, practices, regulations, laws, and permits contained in this Section 3.1.4.

3.1.5 Contractor acknowledges that this Agreement constitutes, subject to the terms hereof, a fixed price obligation to:

(a) Engineer, design, procure, construct, test and start up through Provisional Acceptance a turnkey Project, complete in every detail, within the time and for the purpose designated herein;

(b) Achieve Final Acceptance within the time designated herein;

(c) Comply with all of the warranty obligations set forth in this Agreement; and

(d) Perform Contractor's other obligations hereunder.

References to the obligations of Contractor under this Agreement as being "turnkey" and performing the Work on a "turnkey basis" means that Contractor is obligated to supply all of the Equipment and design services, install all of the Equipment and supply all labor and to supply and perform all of the Work, in each case as may reasonably be required, necessary, incidental, or appropriate (whether or not specifically set forth in this Agreement) to complete the Work such that the Project satisfies the applicable terms, conditions, and Contractor's obligations concerning the Guaranteed Performance Level and other guarantees and requirements set forth in this Contract Documents, all for the Contract Price.

3.2 CONTROL AND METHOD OF THE WORK.

3.2.1 Subject to the terms hereof, Contractor shall be solely responsible for performing or causing to be performed the Work in accordance with the terms of the Contract Documents, and for all means, methods, techniques, sequences, procedures, and safety and security programs in connection with such performance. Contractor shall inform FPL in advance concerning its plans for carrying out the Work.

3.2.2 Whenever the words "as ordered," "as directed," "as required," "as permitted," "as allowed," "approved," "reasonable," "suitable," "acceptable," "properly," "satisfactory," or words or phrases of similar effect and import are used, it shall be understood that none of such terms shall imply that FPL has any authority over, right to control or responsibility for supervision of Contractor or its Subcontractors or Vendors, such supervision (including sole control over and responsibility therefor) being strictly reserved for Contractor. Any method of Work suggested by FPL that is used by Contractor will be used at the risk and responsibility of Contractor, and FPL will assume no responsibility therefor.

3.3 COMPLIANCE WITH LAW

Contractor shall comply, and shall cause all of its Subcontractors, Vendors and Persons that it has a right to direct who are engaged in the performance of any of the Work to comply with, all Applicable Laws and Applicable Permits. Contractor shall perform the Work in a manner designed to protect the environment on and off the Job Site and minimize damage or nuisance to Persons and property of the public or others, including damage or nuisance resulting from pollution, noise or other causes arising as a consequence of methods of construction or operation of the Plant. The foregoing shall not be construed as to limit Contractor's obligations and liabilities under Section 3.15, PROTECTION AND SAFETY, below.

3.4 CERTAIN MATTERS PERTAINING TO JOB SITE.

3.4.1 *Project Inspection.* Contractor acknowledges that, prior to the date of this Agreement, Contractor:

(a) Has made a complete and careful examination of the Job Site and the surrounding areas, drawings and specifications and other information set forth in the Contract Documents;

ECRC-08-2860 HEARING EXHIBIT - 00000038

(b) Has made a complete and careful examination to determine the difficulties and hazards incident to the performance of the Work, including:

(i) The location of the Project;

(ii) The proximity of the Project to adjacent facilities and structures;

(iii) The conditions of the roads and waterways in the vicinity of the Job Site, including the conditions affecting shipping and transportation, access, disposal, handling and storage of materials;

(iv) The nature and character of the soil, terrain, surface and subsurface conditions of the Job Site;

(v) The labor conditions in the region of the Job Site;

(vi) Applicable Laws and Applicable Permits;

(vii) Rights of FPL regarding the Job Site as set forth herein;

(viii) The local weather conditions based upon previous weather data;

(ix) The qualifications of all Subcontractors and Vendors;

(x) The Safe and Secure Workplace Policy, the Project Loss Manual and Environmental Control Program; and

(xi) All other known matters and other matters that Contractor should know under Applicable Standards that might affect Contractor's performance under this Agreement or the design, engineering, procurement, construction, start-up, demonstration and testing of the Plant; and

(c) Has determined to Contractor's satisfaction the nature and extent of such difficulties and hazards.

3.4.2 *Responsibility for Interpreting Sub-Surface Data*. Notwithstanding the above, where FPL has made investigations of subsurface conditions in areas where Work is to be performed under this Agreement, such investigations are made by FPL for the purpose of study and design. To the extent the records of such investigation are included in this Agreement, the interpretation of such records shall be the sole responsibility of Contractor. FPL assumes no responsibility whatsoever with respect to the sufficiency or accuracy of such investigations, the records thereof, or of the interpretations set forth and there is no warranty or guarantee, either express or implied, that the conditions indicated by such investigations or records thereof are representative of those existing throughout such areas, or any part thereof, or that unforeseen developments may not occur, or that materials other than or in proportions different from those indicated may not be encountered.

3.4.3 In light of the foregoing and subject to Section 3.4.4, Differing Condition, Contractor accepts the Job Site in its existing condition and waives any right to additional compensation beyond the Contract Price or an extension of the Guaranteed Provisional Acceptance Date, and any other claims that may arise due, in whole or in part, to errors or omissions in, or inconsistencies among, the Contract Documents and any information provided in connection with the Project. Contractor shall be solely responsible for performing any preliminary Work on the Job Site necessary for the commencement of construction to occur, including removal of all physical impediments to performing Work on the Job Site, above and below ground.

3.4.4 *Differing Condition*. Notwithstanding the acknowledgments set forth in Section 3.4.1, no less than sixty (60) days prior to commencement of Contractor's mobilization on the Job Site (the "Geotechnical Investigation Completion Date"), Contractor may conduct a geotechnical investigation in the location of the Job Site or any portion thereof as Contractor reasonably deems necessary to confirm the site conditions referred to in Sections 3.4.1, and 3.4.2, above. If as a result of the geotechnical investigation, Contractor:

ECRC-08-2861 HEARING EXHIBIT - 00000039

(a) Encounters any concealed subsurface conditions which a reasonable, experienced Contractor would not foresee existing at the Job Site and which vary materially from the conditions shown in the Contract Documents; and

(b) Any such condition causes a material increase or decrease in the Contract Price or time required for performance of the Work or otherwise materially affects any provision of this Agreement,

then Contractor shall notify FPL thereof and FPL may either:

(i) Issue a Change Order to address such condition; or

(ii) Terminate this Agreement pursuant to Section 15.3.

Contractor specifically waives the right to make any such claims after the Geotechnical Investigation Completion Date. Except as set forth in this Section 3.4.4, Contractor assumes the risk of surface and subsurface conditions at the Job Site and shall not be entitled to an extension of the Project Schedule or an increase in the Contract Price.

3.5 FPL ACCESS TO JOB SITE

Subject to Contractor's reasonable safety policies, FPL shall have the right to have representatives on the Job Site full time. In addition, Contractor shall provide reasonable access to the Job Site and the Work at all times to FPL, FPL's other contractors, the Independent Engineer and the Financing Parties and their respective employees, representatives, agents and consultants, subject to Contractor's reasonable safety policies.

3.6 INSPECTION AND TESTING OF WORK IN PROGRESS.

3.6.1 Each item of Equipment to be supplied by Contractor shall be subject to inspection and testing during and upon completion of its fabrication and installation in accordance with the provisions of the Scope of Work. Without limiting the foregoing, Contractor shall be responsible for inspection and testing of the Equipment in accordance with Applicable Standards.

3.6.2 Contractor shall perform inspection, expediting, quality surveillance and traffic services as are required for performance of the Scope of Work. Contractor shall perform such detailed inspection of Work in progress at intervals appropriate to the stage of construction or fabrication of the Project as is necessary to ensure that such Work is proceeding in accordance with this Agreement and the Contract Documents and to protect FPL against Defects and deficiencies in such Work. At least fifteen (15) Business Days prior to the time Contractor or its representative intends to inspect any item of Major Equipment, Contractor shall notify FPL in writing of such inspection which notice shall state the date, time and place where such inspection is to be conducted (provided that, if the inspection will occur at a location outside of the United States of America, Contractor shall provide such notice as soon as possible but in no event less than fifteen (15) Business Days prior to such inspection). FPL and/or its designated agent may, at FPL's option, accompany Contractor to the inspection by notifying Contractor in writing within five (5) Business Days of receipt of notice of the inspection. FPL's failure to notify Contractor within the permitted time period shall be deemed to be a decision by FPL not to attend the inspection. Contractor shall arrange for access to the manufacturer's facilities to permit any such inspection to be conducted smoothly. Contractor shall reimburse FPL for any costs necessarily and reasonably incurred by FPL due to Contractor's failure to prepare any portion of the Work for inspection or testing after having provided notice to FPL of any such inspection or test. With respect to any inspection that FPL chooses not to attend, Contractor shall:

(a) Keep FPL informed in all material respects of the progress and quality of all work;

(b) Advise FPL of any deficiencies revealed through such inspections and of the measures proposed by Contractor to remedy such deficiencies in order to avoid any delay in the completion of the Work and Contractor's performance of the Work; provided that, any such notice provided pursuant to this Section 3.6.2, shall not constitute a request for adjustment, extension or modification of the Project Schedule or FPL's consent to any of the same; and

ECRC-08-2862 HEARING EXHIBIT - 00000040

(c) Upon FPL's request, provide FPL with a reasonable opportunity to review Contractor's records with respect to such inspections. Contractor shall include the right to inspection by FPL or its representative in all subcontracts and purchase orders.

3.6.3 Contractor shall permit FPL and, as authorized by FPL, any Person designated by FPL, and the Financing Parties to inspect, test and observe the Work from time to time; provided, however, that none of such Persons shall have any authority or responsibility for such Work. Contractor shall provide FPL each month during performance of the Work with a schedule of all testing proposed for the following three (3) month period in compliance with the requirements of the Scope of Work.

3.7 NO WAIVER OF RESPONSIBILITY

No inspection made, acceptance of Work, payment of money or approval given by FPL, the Financing Parties or the Independent Engineer shall relieve Contractor of its obligations for the proper performance of the Work in accordance with the terms hereof. Subject to the limitations of Article XII, Contractor's Warranties, FPL may reject any Work with Defects or which is not in accordance with the requirements of the Contract Documents, regardless of the stage of completion, the time or place of discovery of error, and whether FPL previously accepted any or all of such Work through oversight or otherwise. Except with respect to the achievement of Provisional Acceptance and Final Acceptance, no approval given by FPL, in and of itself, shall be considered as an assumption of risk or liability by any such Person. Any such approval shall mean that the Person giving the approval has no objection to the adoption or use by Contractor of the matter approved at Contractor's own risk and responsibility. Contractor shall have no claim relating to any such matter approved, including any claims relating to the failure or inefficiency of any method approved.

3.8 DEFECTIVE WORK

3.8.1 Prior to Provisional Acceptance, Contractor shall at its own cost and expense correct or replace any Work that contains a Defect, or is not otherwise in accordance with the Contract Documents. Equipment that has been replaced, if situated on the Job Site, shall be removed by Contractor from the Job Site at Contractor's own cost and expense.

3.8.2 If Contractor or any Subcontractor defaults or neglects to carry out the Scope of Work in accordance with the Contract Documents and Contractor fails within a reasonable period of time (as reasonably determined by FPL) after it knows or should have known of such default or neglects to commence and continue correction of such default or neglect with diligence and promptness, FPL may, without prejudice to other remedies FPL may have under this Agreement, correct such deficiencies. In such event, an appropriate Change Order shall be issued deducting from payments then or thereafter due to Contractor the reasonable cost of correcting such deficiencies, including reasonable compensation for the costs to enforce this provision (including reasonable attorneys' fees) and any consultant's additional services and reasonable expenses made necessary by such default, neglect or failure. If payments then or thereafter due to Contractor are not sufficient to cover such amounts, Contractor shall pay the difference to FPL within three (3) days from FPL's request therefor.

3.8.3 Contractor shall correct any and all deficiencies as required by the Contract Documents notwithstanding any actual or possible legal obligation or duty of a Subcontractor concerning same and nothing contained in this Section shall modify Contractor's obligation to achieve Final Acceptance in accordance with the Contract Documents.

3.9 CLEAN-UP.

3.9.1 Without limiting the provisions of Section 3.16, ENVIRONMENTAL MATTERS, Contractor shall at all times keep the Job Site reasonably free from waste, rubbish and Hazardous Material, other than Pre-Existing Hazardous Material, relating to its Work. Contractor shall maintain the Job Site in a neat and orderly condition throughout the performance of the Work. Contractor shall employ sufficient personnel to clean its office and FPL's office at the Job Site and work areas each working day and shall cooperate with the other Persons working at the Job Site to keep the Job Site clean.

ECRC-08-2863 HEARING EXHIBIT - 00000041

3.9.2 Prior to the Final Acceptance Date or as soon as practicable after the termination of this Agreement by FPL in accordance with the provisions of Article XV, TERMINATION, Contractor shall:

(a) Remove all Contractor Equipment from the Job Site (other than equipment, supplies and materials necessary or useful to the operation or maintenance of the Plant and Equipment and equipment, supplies and materials directed by FPL to remain at the Job Site until completion of the Plant);

(b) Clean out all pits, pipes, chambers and conduits;

(c) Tear down and remove all temporary structures on the Job Site built by it or its Subcontractors and restore such areas to a condition consistent with that of a newly constructed photovoltaic solar power plant, except as required by Applicable Law, Section 3.16.4, Protected Areas, or any other provision of this Agreement; and

(d) Remove all waste, rubbish and Hazardous Material from and around the Job Site, except that Contractor shall not be required to excavate, remove, transport or otherwise dispose of:

(i) Pre-Existing Hazardous Material on the Job Site, other than as set forth in Section 3.16.1(d); and

(ii) Any waste, rubbish or Hazardous Material caused by FPL or its representatives.

3.10 OBTAINING, MAINTAINING AND IDENTIFYING PERMITS

3.10.1 Contractor shall, and shall cause its Subcontractors to comply with, all Applicable Permits, including FPL Permits and Contractor Permits. Contractor shall timely obtain and maintain all Contractor Permits. In addition, Contractor shall timely prepare and submit to the applicable Government Authority all engineering and construction related submittals, reports and other items (including those set forth in Appendix A, Scope of Work) required to maintain and comply with any FPL Permit and provide all assistance reasonably requested by FPL in connection with FPL's efforts to obtain the FPL Permits, including, without limitation, witnesses testimony, depositions, preparation and submission of exhibits, reports or submittals, technical calculations and attending meetings; provided that FPL shall provide Contractor, at no cost to FPL, with all information, documentation and assistance reasonably requested by Contractor to permit Contractor to comply with the provisions of this Section 3.10.1. In the event that any Applicable Permit is required for the Plant or to perform the Work that is not identified in the Contract Documents, Contractor or FPL, as applicable, shall promptly, after it becomes aware of the need for such Applicable Permit, notify the other Party that such Applicable Permit is required. If such permit is of a nature typically obtained by contractors in power projects, Contractor shall, at its sole cost and expense, be obligated to obtain and maintain such Applicable Permit on behalf of FPL. Otherwise, FPL shall obtain and maintain such Applicable Permit.

3.10.2 All Applicable Permits (other than any building permits (but excluding any applicable occupancy certificates) or other Applicable Permits designated as either "To be issued in the name of Contractor" or "To be issued in the name of FPL and Contractor" on Appendix A, Scope of Work, or Appendix M, FPL Permits) shall be issued in the name of FPL unless otherwise required by Applicable Law or such Applicable Permit. If any Contractor Permit (or application therefor) is in the name of FPL or otherwise requires action by FPL, FPL shall, upon the request of Contractor, sign such application or take such action as reasonably appropriate.

3.10.3 FPL reserves the right to review any such application of Contractor; provided, however, that FPL's exercise of such right shall not under any circumstances be considered an approval of the necessity, effect or contents of such application or related permit. Contractor shall deliver to FPL true and complete copies of all Applicable Permits obtained by Contractor upon its receipt thereof. Contractor shall use best efforts to identify in writing to FPL all Applicable Permits and other government requirements for performance of the Work not identified in the Contract Documents, or shall confirm in writing that, to the best of Contractor's knowledge, there are no such Applicable Permits or other government requirements other than as identified in the Contract Documents prior to the date of this Agreement.

ECRC-08-2864 HEARING EXHIBIT - 00000042

3.11 LABOR.

3.11.1 *General.* Contractor shall be responsible for retaining all Labor necessary for it to perform its obligations hereunder and comply with the provisions hereof, all in accordance with Applicable Laws. Contractor shall be responsible for all costs incurred in complying with this Section 3.11, or otherwise associated with its Labor, including, without limitation, costs incurred by any member of its Labor, whether by direct contract or subcontract, for medical treatment, transport and accommodation as a result of injuries or illness arising from engagement or employment in the execution of the Work.

3.11.2 *Engagement of Labor.* Contractor shall make its own arrangements for the engagement of all Labor in connection with the Contract Documents and the performance of the Work. Contractor shall employ in the performance of the Work only Labor, whether supervisors, skilled workers or laborers, who are competent to perform their assigned duties in a safe and secure manner and shall use all reasonable efforts to cause its Subcontractors and Vendors to adhere to the same standard with respect to their Labor. Contractor agrees, where required by Applicable Law, to employ only licensed personnel in good standing with their respective trades and licensing authorities to perform engineering, design, architectural and other professional services in the performance of the Work. All such professional services shall be performed with the degree of care, safety, skill and responsibility customary among such licensed personnel. All Labor shall have received formal documented training, to the extent required by Applicable Standards, in their area of expertise and, if applicable, certification.

3.11.3 *Identification.* Contractor shall identify each member of its and its Subcontractor's and Vendor's Labor in accordance with the standards and procedures that are mutually acceptable to the Parties.

3.11.4 *Supply of Services for Labor.* Contractor shall provide and maintain at the Job Site, in accordance with Applicable Laws and Applicable Permits, such accommodations, services and amenities as necessary for all Labor employed for the purpose of or in connection with the Contract Documents, including all water supply (both for drinking and other purposes), electricity supply, sanitation, safety, security, fire prevention and fire-fighting equipment, refuse disposal systems and other requirements in connection with such accommodations or amenities.

3.11.5 *Alcohol and Drugs.* Contractor shall not possess, consume, import, sell, give, barter or otherwise dispose of any alcoholic beverages or drugs (excluding drugs for proper medical purposes and then only in accordance with Applicable Law) at the Job Site, or permit or suffer any such possession, consumption, importation, sale, gift, barter or disposal by its Subcontractors, agents or Labor and shall at all times assure that the Job Site is kept free of all such substances. Contractor shall immediately identify and remove from its or its Subcontractors' employment at the Job Site any person (whether in the charge of Contractor or any Subcontractor) who is in possession of or under the influence of any dangerous or controlled drug, alcohol or other such substance at any time during such person's performance of any portion of the Work, excluding any person using a prescription drug under supervision and approval from a medical doctor, or any other person who does or whose actions may create any unsafe condition or other situation that may cause damage or harm to any person or property.

3.11.6 *Arms and Ammunition.* Except as required for Job Site security, Contractor shall not possess, give, barter or otherwise dispose of, to any person or persons, any arms or ammunition of any kind at the Job Site, or permit or suffer the same as aforesaid and shall at all times assure that the Job Site is kept free from arms and ammunition.

3.11.7 *Disorderly Conduct.* Contractor shall be responsible for the conduct and deeds of its Labor and its Subcontractors' Labor relating to the Contract Documents and the consequences thereof. Contractor shall at all times take all reasonable precautions to prevent any unlawful, riotous or disorderly conduct by or among such Labor and for the preservation of peace, protection and safety of Persons and property in the area of the Job Site against the same. Contractor shall not interfere with any members of any authorized police, military or security force in the execution of their duties.

3.11.8 *General Management of Employees.* Subject to FPL's rights as set forth in Section 3.11.11, Replacement at FPL's Request, Contractor shall preserve its rights to exercise and shall exercise its management rights in

performing the Work. Such management rights shall include the rights to hire, discharge, promote and transfer employees; to select and remove foremen or other persons at other levels of supervision; to establish and enforce reasonable standards of production; to introduce, to the extent feasible, labor saving equipment and materials; to determine the number of craftsmen necessary to perform a task, job or project; and to establish, maintain and enforce rules and regulations conducive to efficient and productive operations.

3.11.9 *Labor Disputes*. Contractor shall use reasonable efforts to minimize the risk of labor-related delays or disruption of the progress of the Work. Contractor shall promptly take any and all reasonable steps that may be available in connection with the resolution of violations of collective bargaining agreements or labor jurisdictional disputes, including the filing of appropriate processes with any court or administrative agency having jurisdiction to settle, enjoin or award damages resulting from violations of collective bargaining agreements or labor jurisdictional disputes. Contractor shall advise FPL promptly, in writing, of any actual or threatened labor dispute of which Contractor has knowledge that might materially affect the performance of the Work by Contractor or by any of its Subcontractors or Vendors. Notwithstanding the foregoing, the settlement of strikes, walkouts, lockouts or other labor disputes shall be at the discretion of the Party having the difficulty, except as expressly provided for in Section 14.1, Definition of Force Majeure Event.

3.11.10 *Personnel Documents*. Contractor shall ensure that all its personnel and personnel of any Subcontractors or Vendors performing the Work are, and at all times shall be, in possession of all such documents (including, without limitation, visas, driver's licenses and work permits) as may be required by any and all Applicable Laws.

3.11.11 *Replacement at FPL's Request*. Within one (1) day after request by FPL, Contractor shall remove from the Job Site and performance of the Work, and shall cause any Subcontractor or Vendor to remove from the Job Site and performance of the Work, any Person performing the Work whom FPL determines, in its sole discretion, to be creating a safety hazard or a material risk of either: (i) non-achievement of Mechanical Completion or Provisional Acceptance; or (ii) material non-performance by Contractor in accordance with this Agreement. In addition, Contractor shall include in each subcontract a provision that requires each Subcontractor and Vendor to remove any employee or independent contractor of such Subcontractor or Vendor used in the Work or in such Subcontractor's and Vendor's warranty obligations within one (1) day after receiving notice from FPL to remove such employee or independent contractor.

3.12 PROJECT MANAGEMENT AND CONTRACTOR'S REPRESENTATIVE.

3.12.1 *Project Management*. Contractor has designated a management team as set forth on Appendix O, Project Management Team, and any future members of the management team must be approved by FPL in writing prior to his/her designation, which approval shall not be unreasonably withheld. During the performance of the Work from the Initial Site Mobilization and thereafter, Contractor shall maintain continuously at the Job Site adequate management, supervisory, administrative, security and technical personnel, including the Contractor Site Manager, to ensure expeditious and competent handling of all matters related to the Work, according to its determination of the staffing required for this purpose. Contractor will not re-assign, remove or replace the Contractor Project Manager, Contractor Project Engineering Manager or Contractor Site Manager without FPL's prior written consent, which consent shall not be unreasonably withheld. Contractor shall promptly replace its Contractor Project Manager, Contractor Project Engineering Manager or Contractor Site Manager, upon written request of FPL, if such individual is disorderly or if in FPL's opinion, such individual is otherwise incompetent for his position and responsibilities.

3.12.2 *Contractor's Representative*. Contractor shall appoint one individual (the "Contractor's Representative"), with the prior written consent of FPL, which shall not be unreasonably withheld, who shall be authorized to act on behalf of Contractor and with whom FPL may consult at all reasonable times, and whose instructions, requests and decisions in writing will be binding upon Contractor. Contractor shall not remove or replace such representative without prior written notice to FPL.

ECRC-08-2866 HEARING EXHIBIT - 00000044

3.13 TEMPORARY OFFICE QUARTERS.

3.13.1 During the performance of the Work from the Initial Site Mobilization and thereafter, Contractor shall maintain, at a reasonable location designated by FPL, a suitable office at the Property Site at or near the site of the Work which shall be the headquarters of Contractor's Representative designated pursuant to Section 3.12, Project Management and Contractor's Representative, above.

3.13.2 Contractor shall provide FPL's representatives with office space, including all utilities, heating, ventilation and air conditioning, contemporaneously with the existence of Contractor's site office specified in paragraph (a) above, which office space shall be subject to the approval of FPL and be in compliance with the requirements therefore in Appendix A, SCOPE OF WORK. Contractor shall properly maintain such offices and shall employ sufficient personnel to clean such office each working day that such offices are used. Contractor shall be responsible for paying all utility deposits and charges, other than long distance telephone charges related to calls made by FPL and its representatives, related to such offices for FPL.

3.14 COOPERATION WITH OTHER CONTRACTORS/COMMUNITY.

3.14.1 Contractor acknowledges that work may be performed by others at the Job Site during the execution of Work under this Agreement. Contractor further acknowledges that FPL, through itself or through its employees, subcontractors or agents, will continue to work and perform activities in connection therewith at and around the Job Site during the execution of the Work under this Agreement. Contractor shall cooperate and cause its Subcontractors and Vendors to cooperate with FPL and other unrelated contractors who may be working at or near the Job Site in order to assure that neither Contractor, nor any of its Subcontractors or Vendors unreasonably hinders or increases, or makes more difficult than necessary the work being done by FPL and other unrelated contractors. Contractor agrees to perform the Work in full cooperation with such others and to permit, without charge, reasonable access to, and use of, the Job Site and the Work, by said others or by FPL, whether such Work is partially or entirely complete, when, in the judgment of FPL, such access or use is necessary for the performance and completion of the work of others. All material and labor shall be furnished, and the Work performed, at such time or times as shall be for the best interest of all contractors concerned, to the end that all Work, and the work of any separate contractor, will be properly coordinated and completed in accordance with the applicable schedules and the times of completion required by the Contract Documents.

3.14.2 In addition to complying with all Applicable Laws and Applicable Permits, Contractor shall use reasonable efforts, and cause its Subcontractors and Vendors to use their reasonable efforts, to assist FPL in creating, assessing and carrying out programs which shall, during all phases of the Work, minimize the impacts upon the host community caused by the construction of the Project. Such programs shall include: (i) sequencing of the Work so as to minimize the impacts of noise and dust at and around the Job Site; and (ii) using local labor and other resources whenever possible and cost effective.

3.15 PROTECTION AND SAFETY.

3.15.1 Prior to the Provisional Acceptance Date, Contractor shall be responsible for the security, protection and safety of all Persons (including members of the public and the employees, agents, contractors, consultants and representatives of FPL, the Financing Parties, Contractor and its Subcontractors and Vendors, and other contractors and subcontractors) and all public and private property (including structures, sewers and service facilities above and below ground, along, beneath, above, across or near the Job Site) that are at or near the Job Site or that are in any manner affected by the performance of the Work. As of the Provisional Acceptance Date, FPL shall have operational control over the Project. Notwithstanding the foregoing, Contractor shall remain responsible for the security, protection and safety of all Persons performing any portion of the Work at the direction of Contractor as well as any damage to property caused directly or indirectly by Contractor's negligent acts or omissions and/or failure to comply with the provisions of the Contract Documents while on the Job Site.

3.15.2 Contractor shall initiate and maintain reasonable safety precautions and accident prevention programs for the Job Site and in the performance of the Work, which shall be in compliance with all Applicable Laws and Applicable Permits, to prevent injury to persons or damage to property on, about or adjacent to the Job

ECRC-08-2867 HEARING EXHIBIT - 00000045

Site and in the performance of the Work. Without limiting the generality of the foregoing, Contractor shall furnish and maintain all necessary safety equipment such as barriers, signs, warning lights and guards as required to provide adequate protection to persons and property. In addition, Contractor shall give reasonable notice to owners of public and private property and utilities when such property is susceptible to injury or damage through the performance of the Work and shall make all necessary arrangements with such owners relative to the removal and replacement of protection of such property or utilities.

3.15.3 Contractor shall provide FPL, within five (5) Days following its occurrence, with written:

(a) Notification of all Occupational Safety and Health Act recordable events;

(b) Notifications and copies of all citations by Government Authorities concerning accidents or safety violations at the Job Site;

(c) Reports of near misses at the Job Site; and

(d) Copies of written accident reports for lost time accidents.

Contractor shall promptly deliver to FPL any written communication with any Government Authority or insurance company (including any notices) with respect to accidents that occur at the Job Site.

3.16 ENVIRONMENTAL MATTERS.

3.16.1 *Hazardous Material.* Contractor shall, and shall cause its Subcontractors and Vendors to, comply with all Applicable Laws relating to Hazardous Material and all Applicable Permits. Without limiting the generality of the foregoing:

(a) Contractor shall, and shall cause its Subcontractors and Vendors to, apply for, obtain, maintain and renew all Contractor Permits, and comply with all Applicable Permits, in any case, as required by Applicable Laws regarding Hazardous Material that are necessary, customary or advisable for the performance of the Work. Contractor shall, and shall cause its Subcontractors and Vendors to, have an independent Environmental Protection Agency identification number for disposal of Hazardous Material under the Contract Documents if and as required under Applicable Laws or Applicable Permits.

(b) Contractor shall conduct its activities under the Contract Documents, and shall cause each of its Subcontractors to conduct its activities, in a manner designed to prevent pollution of the environment or any other release of any Hazardous Material by Contractor and its Subcontractors and Vendors in a manner or at a level requiring remediation pursuant to any Applicable Law.

(c) Contractor shall not cause or allow the release or disposal of Hazardous Material at the Job Site, bring Hazardous Material to the Job Site, or transport Hazardous Material from the Job Site, except in accordance with Applicable Law and Applicable Permits. Contractor shall be responsible for the management of and proper disposal of all Hazardous Material brought onto or generated at the Job Site by it or its Subcontractors or Vendors, if any. Contractor shall cause all such Hazardous Material brought onto or generated at the Job Site by it or its Subcontractors or Vendors, if any, to be:

(i) Transported only by carriers maintaining valid permits and operating in compliance with such permits and laws regarding Hazardous Material pursuant to manifest and shipping documents identifying only Contractor as the generator of waste or person who arranged for waste disposal; and

(ii) Treated and disposed of only at treatment, storage and disposal facilities maintaining valid permits operating in compliance with such permits and laws regarding Hazardous Material, from which, to the best of Contractor's knowledge, there has been and will be no release of Hazardous Material.

(iii) Contractor shall submit to FPL a list of all Hazardous Material to be brought onto or generated at the Job Site prior to bringing or generating such Hazardous Material onto

ECRC-08-2868 HEARING EXHIBIT - 00000046

or at the Job Site. Contractor shall keep FPL informed as to the status of all Hazardous Material on the Job Site and disposal of all Hazardous Material from the Job Site.

(d) If Contractor or any of its Subcontractors or Vendors releases any Hazardous Material on, at, or from the Job Site, or becomes aware of any Person who has stored, released or disposed of Hazardous Material on, at, or from the Job Site during the Work, Contractor shall immediately notify FPL in writing. If Contractor's Work involved the area where such release occurred, Contractor shall immediately stop any Work affecting the area. Contractor shall, at its sole cost and expense, diligently proceed to take all necessary or desirable remedial action to clean up fully the contamination caused by any:

(i) Release by Contractor or any of its Subcontractors or Vendors of any Pre-Existing Hazardous Material; and

(ii) Hazardous Material that was brought onto or generated at the Job Site by Contractor or any of its Subcontractors or Vendors, whether on or off the Job Site.

(e) If Contractor discovers any Pre-Existing Hazardous Material that has been stored, released or disposed of at the Property Site, Contractor shall immediately notify FPL in writing. If Contractor's Work involves the area where such a discovery was made, Contractor shall immediately stop any Work affecting the area and FPL shall determine a reasonable course of action. Contractor shall not, and shall cause its Subcontractors and Vendors to not, take any action that may exacerbate any such contamination.

(f) Contractor shall be solely responsible for remedial action to clean up fully the contamination referenced in Section 3.16.1(d). If so requested by FPL, Contractor shall cooperate with and assist FPL in making the Job Site available for taking necessary remedial steps to clean up any such contamination at FPL's expense as determined in accordance with Section 6.3, CHANGES TO CONTRACT PRICE; DISPUTES, of Article VI, CHANGE ORDERS. Contractor shall promptly deliver to FPL any notice or violation, letter of non-compliance or similar communication from any Government Authority.

3.16.2 *Waste Treatment and Disposal*. Without limiting the foregoing:

(a) *Toxic Waste and Industrial Hazards:* Contractor shall be responsible for the proper management and disposal of all toxic waste and industrial hazards brought onto or generated at the Job Site by it or its Subcontractors or Vendors, if any. Contractor shall, and shall cause its Subcontractors and Vendors to, comply with all Applicable Laws, Applicable Permits and applicable safety standards related to the treatment, storage, disposal, transportation and handling of toxic wastes and industrial hazards. Contractor shall not store or dispose of toxic wastes and industrial hazards near groundwater, surface water or drainage systems. Liquid wastes shall not be dumped onto the ground or in any groundwater, surface water or drainage systems. All waste oil and grease resulting from construction activities shall be collected and disposed of in a manner that prevents contamination to soil, ground water, and surface water, and incinerated if possible. Vehicle maintenance shall be conducted in safe areas away from watercourses and oil or fluid runoff shall be collected in grease traps. Toxic waste and industrial hazard storage containers shall be well-labeled.

(b) *Sanitary and Solid Waste:* Contractor shall take appropriate measures in accordance with the Applicable Law and Applicable Permits for the treatment and disposal of sanitary and solid waste, and in particular, Contractor shall perform the Work in such a manner so as to protect environmentally sensitive areas and water supplies. Run-off from disposal sites shall be curtailed.

3.16.3 *Fuel Storage*. The location, facilities, safety measures and environmental and pollution control in connection with storage of fuel or like substances shall comply with all Applicable Laws and Applicable Permits.

ECRC-08-2869 HEARING EXHIBIT - 00000047

3.16.4 *Protected Areas*. Contractor acknowledges that portions of the Property Site may be wetlands or other protected areas ("Protected Areas") as indicated on the survey to be provided by FPL pursuant to Section 4.7, DESCRIPTION OF PROPERTY SITE, of Article IV, CERTAIN OBLIGATIONS OF FPL. Certain of these Protected Areas, if designated on such survey, do not constitute a part of the Job Site. Contractor shall erect a temporary barrier or other blockade to isolate Protected Areas and protect such areas from impact by any Work. Contractor shall not allow any Work to be conducted in or otherwise interfere with or impact such Protected Areas. Contractor shall, and shall cause its Subcontractors and Vendors to, comply with the Environmental Resource Plan and all permits, rules, regulations and all other Applicable Laws and Applicable Permits in connection with the Protected Areas on or adjacent to the Property Site.

3.17 FIRE PREVENTION.

3.17.1 Contractor shall be responsible for providing adequate fire prevention and protection at the Job Site and shall take all reasonable precautions to minimize the risk of fire at the Job Site. Contractor shall provide instruction to the Labor in fire prevention control and shall provide appropriate fire-fighting and fire protection equipment and systems at the Job Site.

3.17.2 Contractor shall promptly collect and remove combustible debris and waste material from the Job Site in accordance with Applicable Laws and Applicable Permits, and shall not permit such debris and material to accumulate. Contractor shall control the usage of fires for any purpose in the vicinity of the Work and shall agree upon the appropriateness of any such fires with FPL. Any areas of vegetation damaged by fire which are reasonably determined by FPL to have been initiated by Contractor's or Subcontractors' Labor shall be recultivated and otherwise rehabilitated by Contractor, at Contractor's expense.

3.17.3 Contractor will complete all systems, procedures and Equipment constituting the Plant fire protection system as necessary during construction to protect Work in progress, in particular with regard to fuel and other flammable materials.

3.18 RELIGIOUS AND ARCHAEOLOGICAL RESOURCES

In the event any archaeological or religious sites, places, monuments or areas are discovered or identified by Contractor during the performance of Work under the Contract Documents, Contractor shall leave such sites untouched and protected by fencing and shall immediately stop any Work affecting the area. Contractor shall notify FPL of any such discovery as soon as practicable, and Contractor shall carry out FPL's instructions for dealing with the same. All fossils, coins, articles of value or antiquity and structures and other remains or things of geological, archaeological, historical, religious, cultural or similar interest discovered on the Job Site shall, as between FPL and Contractor, be deemed to be the absolute property of FPL. Contractor shall prevent its and its Subcontractors' and Vendors' Labor and any other Persons from removing or damaging any such article or thing.

3.19 REPORTS, PLANS AND MANUALS.

3.19.1 *Status Reports*. Within ten (10) days after the beginning of each month, commencing with the month following the date of this Agreement, Contractor shall prepare and submit to FPL written progress reports, in accordance with the requirements of Appendix B, Project Schedule and Reporting Requirements, which include a description of the progress and status of the Work compared to the Project Schedule, the status of Equipment and other scheduled deliveries, the Subcontractors' activities and engineering, procurement and construction progress. In addition, each such progress report will provide cost information regarding backcharges and a summary of any Changes executed by the Parties as of the date of such report. A reasonable number of photographs shall also be included reasonably documenting the construction progress. Each photograph shall show the date, Contractor's name and description of the view taken. In accordance with Section 5.3, PROJECT SCHEDULE, of Article V, PROJECT SCHEDULE, Contractor shall also report any events which may affect the Project Schedule, including any Force Majeure Events, liens on the Property Site or the Project, or any asserted violations of Applicable Laws.

3.19.2 *Reporting of Accidents*. Contractor shall report in writing to FPL (and, to the extent required by any Applicable Law or Applicable Permit, the appropriate Government Authority) details of any significant safety event or accident required to be reported under U.S. Department of Labor Occupational Safety &

ECRC-08-2870 HEARING EXHIBIT - 00000048

Health Administration standards that is on or about the Job Site as soon as possible after its occurrence, but in any event not later than forty-eight (48) hours after such accident occurs. In the case of any fatality or serious injury or accident, Contractor shall, in addition, notify FPL (and, to the extent required by any Applicable Law or Applicable Permit, the appropriate Government Authority) immediately.

3.19.3 *Procedures Manual.* No later than forty-five (45) days following the date hereof, Contractor shall prepare and submit to FPL a procedures manual that describes the administrative procedures to be used by Contractor and FPL for interfacing during the performance of the Work (the "Procedures Manual"). Contractor shall either promptly make changes to the Procedures Manual suggested by FPL or negotiate and resolve in good faith with FPL such changes. Upon approval of the Procedures Manual by the Parties, the Parties shall comply with the provisions thereof. The Procedures Manual may be changed from time to time with the approval of the Parties. Contractor shall provide six (6) copies, as well as an electronic copy, of the Procedures Manual to FPL.

3.19.4 *Health Plan, Safety Plan and Environmental Plan.* No later than thirty (30) days prior to Initial Site Mobilization, Contractor shall prepare and submit to FPL:

(a) A health plan that includes health, first aid facility/area with qualified attendant and emergency procedures to be used at the Job Site (the "Health Plan");

(b) An environmental plan (the "Environmental Plan" as more particularly described in Appendix A, Scope of Work) that includes:

(i) A Hazardous Material, waste and industrial hazards management and disposal program which details the controlled usage and treatment of all Hazardous Material, toxic wastes, industrial hazards, sanitary waste, solid waste and other waste brought onto, used or produced at the Job Site or in relation to the Work and outlines a management structure for carrying out the specific provisions of such program;

(ii) An environmental protection and management program, including, without limitation, a sediment and erosion control program

(iii) A revegetation program, with a Change Order related thereto; and

(iv) The description, location and drawings of construction facilities and temporary works; and

(c) A safety plan substantially in the form of Appendix Z, Form of Safety Plan, which shall include an acknowledgement by Contractor that Contractor shall at all times remain in compliance with all federal, state and local safety codes (the "Safety Plan").

Each of the Health Plan, Environmental Plan and Safety Plan shall be consistent with all Applicable Laws and Applicable Permits and shall be submitted to FPL for review and comment. Contractor shall either promptly make changes to such Health Plan, Environmental Plan or Safety Plan incorporating the comments of FPL or negotiate and resolve in good faith with FPL any such changes. Contractor shall comply and ensure that its Subcontractors comply with the Health Plan, Environmental Plan, Safety Plan, the Safe and Secure Workplace Policy, the Project Loss Manual and the Environmental Control Program.

3.19.5 *Meetings.* During the performance of the Scope of Work, Contractor and FPL shall, at a minimum, conduct meetings each month at a mutually convenient time and date for the purpose of reviewing the progress of the Scope of Work, the latest progress reports, the Health Plan, the Environmental Plan, the Safety Plan, Quality Assurance Program, Contractor's and Subcontractors' adherence to the Scope of Work and the Project Schedule as well as the status of any claims on the Project and claims submitted pursuant to the terms of the Contract Documents. Contractor shall prepare detailed minutes of each such meeting, in form and content acceptable to FPL, and shall distribute same to FPL within five (5) days after such meeting.

3.19.6 *Contractor Not Relieved of Duties or Responsibilities.* Neither the submission to or approval by FPL of progress and other reports, plans and manuals, nor the provision of general descriptions shall relieve Contractor of any of its duties or responsibilities under the Contract Documents.

3.19.7 *Quality Assurance Program.*

(a) Contractor shall use effective quality assurance programs (collectively, the "Quality Assurance Program"), which such programs:

(i) Propose the manner in which Contractor intends to achieve the highest standards in the performance of the entire Scope of Work;

(ii) Shall be acceptable to FPL; and

(iii) Shall be consistent with the requirements of Appendix Y, Form of Quality Assurance Programs, and Appendix A, Scope of Work, in performing the Work.

(b) Within thirty (30) days after the date of this Agreement, Contractor shall provide to FPL a description of the Quality Assurance Program, which shall be substantially in the form of Appendix Y, Form of Quality Assurance Programs, (the "Quality Control Manual"), to be used by Contractor in the performance of the Work. The Quality Control Manual shall also include all proposed types of Critical Parameters that Contractor shall define as the Scope of Work progresses. "Critical Parameters" are defined as construction critical dimensions, commissioning critical set-points, critical alignments and process critical set-ups for Equipment, sub-systems, systems and the Plant, as mutually agreed to by the Parties.

(c) As soon as the Critical Parameters have been finalized, Contractor shall include the same in the Project Schedule. Contractor shall provide FPL with tentative dates for the performance of Critical Parameters, which dates shall be updated monthly, and shall also provide FPL with twenty-four (24) hour written notice prior to performance of any Critical Parameters. FPL will review and provide comments to such programs in writing within thirty (30) days after submission by Contractor.

(d) If FPL's comments are reasonable changes to the quality assurance programs submitted by Contractor, Contractor will effect such changes at no additional cost to FPL and resubmit such programs to FPL within ten (10) days after Contractor receives FPL's comments. FPL will have ten (10) days after such resubmission to review and provide comments to such programs resubmitted by Contractor. Such procedure shall continue with the same ten (10) day time periods until FPL accepts such programs. If FPL fails to respond within any of the applicable periods specified above, FPL shall be deemed to have agreed to the last such programs submitted by Contractor. If applicable, Contractor shall also submit verification of ISO 9001 qualification.

(e) Contractor's program shall address how improvement actions will be applied on the Project's processes, products and services. Contractor shall also have in place a formal system of collecting, reviewing and evaluating corrective and preventive actions from a lessons learned process that will ensure desirable changes regarding engineering, procurement, construction, start-up, turnover or operation feedback from recently completed (or in process projects) are incorporated.

(f) A post award (pre-production) meeting shall be held at Contractor's facility to demonstrate Contractor's understanding of the quality and quality assurance requirements, and present their methods of complying with these requirements.

3.20 DRAWINGS, ENGINEERING DATA AND OTHER MATERIALS.

3.20.1 All Drawings, Final Plans, reports and other information (except financial, accounting and payroll records) furnished to Contractor, or prepared by it, its Subcontractors or others in connection with the performance of the Work, whenever provided, shall be kept by Contractor in an orderly and catalogued fashion for reference by FPL during the performance by Contractor of the Work. Contractor shall maintain at the Property Site at least one (1) copy of all Drawings, Final Plans, Change Orders and other modifications in good order and marked to record all changes made during performance of the Work, including, without limitation, all field deviations from the construction drawings. As a condition precedent to Final

ECRC-08-2872 HEARING EXHIBIT - 00000050

Acceptance, or upon the earlier termination of this Agreement, Contractor shall transfer the Final Plans to FPL and they shall become the sole property of FPL.

3.20.2 Final Plans (in both hard copy and magnetic media at no extra charge to FPL), if not furnished earlier, shall be furnished to FPL upon Contractor's request for a Final Acceptance Certificate or upon the earlier termination of this Agreement. Contractor and any of its Subcontractors, as applicable, may retain copies all such documents for their records, subject to the confidentiality provisions of this Agreement.

3.20.3 Within ninety (90) days after the date of this Agreement, Contractor shall furnish FPL (in electronic format whenever available) with conceptual engineering drawings and the specifications pertaining to the electric generators and step-up transformers of the Plant, including demonstrations that the:

(a) Requirements for reactive supply facilities at the Plant will be met; and

(b) Plant will meet the guidelines and performance standards set forth in the Contract Documents and the Operating Guidelines.

3.20.4 Contractor shall submit all Drawings in electronic format to FPL in accordance with Appendix A, Scope of Work, for review and comment as provided in the Scope of Work. Based upon FPL's comments, if any, Contractor shall resolve FPL's comments. Contractor shall revise such Drawings from time to time, as required to reflect any changes, in the actual installation of any individual Equipment or system or the Plant as a whole. Notwithstanding anything contained herein to the contrary, FPL's review and/or acceptance of the Drawings, or any portion thereof, shall not in any way relieve Contractor of any of its obligations or warranties set forth herein, including, but not limited to, its full responsibility for the accuracy of the dimensions, details, integrity and quality of the Drawings.

3.21 OPERATING AND MAINTENANCE MANUALS

Contractor shall supply FPL with manuals and/or handbooks (in electronic format) which provide, either in a single manual or handbook or collectively, complete operating and maintenance instructions (including inventories of spare parts and tools and parts lists with ordering instructions) for each major piece of Equipment and system of the Plant. Each such manual and handbook shall comply with the requirements of the Scope of Work and the guidelines contained in Appendix L, including with respect to matters such as quantity, content and the time when such manuals are to be supplied to FPL, and shall be substantially complete and delivered to FPL prior to Mechanical Completion in order to support training of personnel and start-up and testing of the Plant.

3.22 TRAINING OF O&M PERSONNEL.

3.22.1 During the construction of the Plant, and at least ninety (90) days prior to the Provisional Acceptance Date, Contractor shall provide, at its own expense, a training program in Plant operation and maintenance for FPL's Plant personnel and the O&M Contractor's Plant personnel (collectively, "O&M Personnel"). The training program provided by Contractor shall be subject to FPL's prior written approval and shall:

(a) Include classroom and field training;

(b) Include all manuals, drawings, and other educational materials necessary or desirable for the adequate training of O&M Personnel; and

(c) Establish quality controls so that O&M Personnel are suitably trained and capable of operating and maintaining the Plant after Provisional Acceptance.

Representatives of manufacturers of Equipment shall be utilized to provide specialized training for such Equipment where deemed necessary by the Parties. All training programs conducted in accordance with this Section 3.22, shall be videotaped and made available to FPL in electronic format.

3.22.2 Contractor shall make every reasonable effort to use the O&M Personnel during Plant start-up and initial operation; however, neither FPL nor O&M Contractor shall be obligated to:

(a) Supply personnel for the construction of the Plant; nor

ECRC-08-2873 HEARING EXHIBIT - 00000051

(b) Provide during Plant start-up and initial operation more O&M Personnel than the number of O&M Personnel FPL and O&M Contractor would use during normal Plant operation as determined by FPL. Contractor shall have complete responsibility for directing, coordinating, monitoring and supervising O&M Personnel during Plant start-up and initial Plant operations.

3.22.3 In addition, Contractor shall:

(a) Remain solely responsible for performing the Work in accordance with this Agreement, including Contractor's obligation to achieve Mechanical Completion, achieve Provisional Acceptance by the Guaranteed Provisional Acceptance Date and achieve Final Acceptance, regardless of any act, omission, failure, non-achievement, or non-performance of the O&M Personnel;

(b) Remain fully responsible for all acts and omissions of the O&M Personnel in connection with the commissioning and operation of the Plant until the Provisional Acceptance Date as fully as if Contractor had independently engaged such O&M Personnel; and

(c) Be responsible for all acts and omissions of the O&M Personnel after the Provisional Acceptance Date if such acts or omissions are taken at the direction of Contractor.

3.22.4 The cost of the O&M Personnel's travel, lodging, food and other living expenses shall be borne by FPL. Contractor shall have the right to require FPL to remove O&M Personnel from the Job Site if Contractor reasonably believes that any such O&M Personnel is unable to properly perform its obligations in connection with the commissioning and operation of the Plant and Contractor provides FPL a written explanation of its reasons for exercising the removal rights granted to it hereunder; provided that the failure of such O&M Personnel to perform their obligations or the removal of any O&M Personnel pursuant to this Section 3.22, shall not relieve Contractor of any of its obligations hereunder.

3.23 ACCOUNTING INFORMATION; FINANCIAL REPORTING REQUIREMENTS

3.23.1 During the term of this Agreement and continuing for five (5) years after the Final Acceptance Date, Contractor will provide FPL with any reasonably necessary assistance, including providing all documents, cost information and other information that FPL believes necessary, in a form reasonably acceptable to FPL, for FPL's federal, state or local tax filings, exemptions or positions advocated by FPL, including, without limitation, sales, use and property taxes; provided, however, that such access to cost information not otherwise made available to FPL pursuant to the terms hereof shall be disclosed to an independent auditor of FPL's choice that agrees to keep secret from FPL, Contractor's cost and other competitively sensitive information.

3.23.2 Unless otherwise publicly available, Contractor shall as soon as available, but in any event within sixty (60) days after each of the first three (3) quarters of each calendar year, deliver to FPL a copy of the complete unaudited balance sheet for such quarter for the Contractor Parent Company prepared in accordance with generally accepted accounting principles and certified by the Chief Financial Officer of Contractor Parent Company. Unless otherwise publicly available, Contractor shall as soon as available, but in any event within ninety (90) days after December 31 of each year, deliver to FPL a copy of the complete audited financial statements for such year with an unqualified opinion for the Contractor Parent Company prepared in accordance with generally accepted accounting principles.

3.24 CONTRACTOR TAXES.

3.24.1 Except for FPL Taxes, Contractor shall, as required by applicable law, pay and administer any and all Taxes and duties incurred or payable in connection with the Work, including, without limitation, taxes based on or related to the income, receipts, capital or net worth of Contractor, Contractor's or its Subcontractors' or Vendors' Labor or income, except for FPL Taxes (collectively, "Contractor Taxes"); provided, however, that if Contractor is responsible for payment of FPL Taxes under Applicable Law, unless otherwise instructed by FPL or FPL is contesting such FPL Taxes, Contractor shall pay such FPL Taxes and any penalties and interest due thereon, and FPL shall reimburse Contractor for such FPL Taxes and any penalties and interest due thereon resulting from instructions provided by FPL upon submission of evidence of payment. Contractor shall promptly provide FPL with reports or other evidence reasonably

ECRC-08-2874 HEARING EXHIBIT - 00000052

acceptable to FPL showing the payment of Contractor Taxes by Contractor and any FPL Taxes required to be paid by Contractor pursuant to this Section 3.24. Contractor shall use commercially reasonable efforts to cooperate with FPL to endeavor to minimize any FPL Taxes. Notwithstanding the foregoing, Contractor agrees to purchase for resale to FPL any machinery or equipment in connection with the Work that would be the type of property that would qualify as manufacturing machinery and equipment entitled to the exemption from the Florida sales and use tax provided under Applicable Laws and, at the direction of FPL, Contractor agrees to take such action as may be reasonably required to allow such property, to the extent possible to qualify for any sales or use tax exemption. If required in connection with the purchase of any such property from its Vendors, to the extent permitted by applicable law, Contractor agrees to provide its Vendors a resale certificate or applicable affidavit as approved by the State of Florida reflecting the fact that Contractor is purchasing such property for resale to FPL. Contractor agrees to take any other action reasonably necessary to ensure that the purchase of qualifying machinery with respect to the Work is exempt from sales and use tax under Florida (or other applicable) law. To the extent Contractor is required by Applicable Law to collect sales tax from FPL, Contractor shall collect sales tax from FPL on all materials physically incorporated in the Plant that are not subject to exemption unless FPL has elected to provide Contractor with a direct pay certificate issued to FPL by the State of Florida, in which case, FPL shall pay such sales tax directly to the State of Florida. In the event that an assessment for sales and/or use or excise taxes are levied against Contractor, any Subcontractor or Vendor, Contractor shall promptly notify FPL and furnish to FPL a copy of such assessment. In the event that FPL determines that the assessment should be contested and so notifies Contractor in writing, FPL may, at FPL's sole cost and expense, file such documents as are necessary to contest such assessment. FPL shall exclusively control any contest, assessment or other action regarding any such taxes or assessments, or any penalties or interest in respect thereof. In addition to Contractor's other obligations as set forth herein, Contractor shall cooperate with and assist FPL, at FPL's expense, in any contest or proceeding relating to Taxes payable by FPL hereunder.

3.24.2 Exempt Equipment. Some of the machinery, equipment, parts or other items of tangible personal property to be incorporated into the Plant may be exempt from certain taxes (such exempt items, the "Exempt Equipment"). FPL and Contractor will work together to determine which purchases constitute purchases of Exempt Equipment, and Contractor and FPL will take reasonably necessary actions to ensure that such Exempt Equipment qualifies for applicable tax exemptions.

3.25 CLAIMS AND LIENS FOR LABOR AND MATERIALS

If FPL is paying when due all undisputed amounts in accordance with the Contract Documents, Contractor shall, at Contractor's sole expense, discharge and cause to be released, whether by payment or posting of an appropriate surety bond in accordance with Applicable Law, within ten (10) days after receipt of a written demand from FPL, any Lien in respect to the Plant, the Contract Documents, the Equipment, the Job Site or any fixtures or personal property included in the Work (whether or not any such Lien is valid or enforceable) created by, through or under, or as a result of any act or omission (or alleged act or omission) of, Contractor or any Subcontractor, Vendor or other Person providing labor or materials within the scope of Contractor's Work. Notwithstanding the foregoing provision, as long as FPL, in its sole discretion, determines that the Job Site and the improvements thereon will not be subject to any liability, penalty or forfeiture, upon the written request of Contractor, FPL may permit Contractor to contest the validity, enforceability or applicability of any such Lien, in which event FPL shall provide, at no cost to FPL, such cooperation as Contractor may reasonably request in connection therewith.

3.26 SPARE PARTS AVAILABILITY.

3.26.1 *Start-up Spare Parts*. Prior to Mechanical Completion, Contractor shall obtain all spare parts required for Plant start-up and testing. All spare parts not used during Plant start-up and testing shall become the property of FPL, it being understood and agreed that additional photovoltaic panels held by Contractor at the Project Site but not incorporated into the Project shall not be deemed to be spare parts.

3.26.2 *Operating Spare Parts*. At least ten (10) days prior to the Provisional Acceptance Date, Contractor shall provide FPL with each manufacturer's recommended spare parts list for the Equipment, which list shall

ECRC-08-2875 HEARING EXHIBIT - 00000053

include part numbers, recommended quantities, price, mean times to failure, mean times to repair and a description of lead times necessary for orders of such spare parts, in each case to the extent reasonably available to Contractor. Contractor agrees to:

(a) Obtain from each Major Manufacturer an assignable guaranty that such Major Manufacturer will have available for purchase by FPL for a period of five (5) years after the Provisional Acceptance Date, all spare parts for the Major Equipment supplied by such Major Manufacturer required to keep the Plant in good operating condition, it being understood that some of such parts are not "shelf items" and will have to be manufactured by the Major Manufacturer after it receives an order for them;

(b) Make spare parts (other than spare parts for the Major Equipment) available for purchase by FPL for a period of five (5) years after the Provisional Acceptance Date to the extent that Contractor is able to obtain them from the manufacturer who supplied them for the Plant as originally built;

(c) Find another source that can supply such spare parts if Contractor is unable to obtain such spare parts from such manufacturer; and

(d) Obtain a firm price for such spare parts reasonably acceptable to FPL for a period of five (5) years after the Provisional Acceptance Date.

3.26.3 With regard to the spare parts described in paragraph (b) above, upon written notice from FPL at any time prior to the Provisional Acceptance Date, Contractor shall, at FPL's expense but without mark-up or multiplier, purchase and have delivered to the Job Site as soon as possible permanent plant spares. Contractor will pay for and replace such spares if used during start-up and commissioning of the Plant.

3.27 CONTRACTOR'S OBLIGATION TO NOTIFY

Contractor shall keep FPL advised as to the status of the Equipment and Work and shall promptly inform FPL in writing upon the occurrence of any of the following, any:

3.27.1 Occurrence or event that may be expected to impact the schedule for delivery and/or installation of Equipment;

3.27.2 Technical problem not anticipated at the start of the Work or of significant magnitude that may impact the Plant or any component thereof or the Project Schedule;

3.27.3 Defect; and

3.27.4 Material changes to previously submitted information. FPL shall have the right to verify the information provided by Contractor. In connection therewith, Contractor shall identify those items provided to FPL that would enable FPL to verify such information in an expedient manner.

3.28 CONSTRUCTION UTILITIES

Contractor shall be responsible for the cost, supply and availability of electric power and distribution requirements for the performance of the Work at the Job Site for the construction and up to Provisional Acceptance; provided, however, Contractor shall be responsible for the cost of any such items to the extent required in order to reperform any Tests. Contractor shall provide its own telephone, facsimile, radio and other communication facilities at the Job Site as necessary for the performance of the Work. If FPL determines that any Test performed or to be performed by Contractor will result in financial harm to FPL, Contractor will accommodate FPL's reasonable requests to mitigate or alleviate such harm to FPL. In addition, Contractor shall provide, at its sole cost and expense, all chemicals for commissioning, start-up and testing and its own temporary lighting, water and sewer facilities at the Job Site.

3.29 LINES AND GRADES

Contractor shall provide for the proper laying out of the construction Work, for making measurements and for establishing temporary or permanent reference marks in connection with the construction Work and Plant. Contractor shall ensure that all improvements constructed in connection with the Work are constructed within the boundaries of the Property Site as delineated in Appendix P, Legal Description of Property Site,

ECRC-08-2876 HEARING EXHIBIT - 00000054

and do not encroach on any easements, rights of way or other improvements existing on the Property Site as delineated in Appendix P, Legal Description of Property Site. FPL may at its sole discretion and cost, check the reference marks, lines, grades and measurements so established. Contractor shall carefully preserve all monuments, bench marks and reference points. In case of its destruction thereof, Contractor will be responsible for all damages, costs and expenses related to their replacement and for any mistake or loss of time that may result therefrom. Permanent monuments or bench marks which must be removed or disturbed shall be protected until they can be properly referenced for relocation. Contractor shall furnish materials and assistance for the proper replacement of such monuments or bench marks.

3.30 TEMPORARY STRUCTURES

Temporary structures for offices, quarters, storage and other uses for Contractor, its Subcontractors and Vendors and FPL shall be constructed only in locations approved by FPL. Contractor shall erect temporary walls, bulkheads or fences where required to isolate the construction area from adjacent property in order to increase safety and security and to minimize noise, dust and dirt from affecting the property surrounding the Job Site.

3.31 WEATHERPROOF COVERINGS

Contractor shall provide adequate and sufficient weatherproof and flame resistant coverings for outdoor storage at the Job Site. The cover or sheeting shall be tied down to prevent moisture from damaging the Equipment.

3.32 INTELLECTUAL PROPERTY RIGHTS.

3.32.1 Contractor agrees to grant and hereby grants to FPL an irrevocable, permanent, non-exclusive, royalty-free license to utilize all of Contractor's trade secrets, patents, copyrights, trademarks, proprietary rights or information, licenses and other intellectual property rights (collectively, the "Intellectual Property Rights") and the Intellectual Property Rights of third parties (to the extent of Contractor's rights thereto which can be transferred without violation of obligations owed to such third parties), to the extent now existing or developed primarily for the Project, related to the Work, to the extent reasonably necessary for completion, design, construction, installation, operation, maintenance, repair, or replacement of the Project, or Contractor's expansion, modification, or alteration of the Project (or any subsystem or component thereof designed, specified, or constructed by Contractor under this Agreement).

3.32.2 FPL shall have the right to assign the benefit of such license to any Financing Party in connection with granting a security interest in the Project or any portion thereof, to a purchaser in connection with a transfer of the Project, or to any subsequent purchaser or assignee of same. Any such purchaser or assignee shall acquire such license subject to the same terms and restrictions as stated in this Section 3.32.

3.32.3 Contractor shall, prior to directing any Subcontractor to produce any design or engineering work in connection with the Project, obtain a valid written assignment of all applicable Intellectual Property Rights from such Subcontractor in terms identical to those that obligate Contractor to FPL as expressed in this Section 3.32, which Intellectual Property Rights Contractor hereby assigns to FPL.

3.32.4 Should Contractor or any employee or agent of Contractor make any invention or discovery in connection with performing the Work, such invention or discovery shall be deemed to be the sole and exclusive property of Contractor. To the extent FPL has any right or title thereto or interest therein, FPL hereby assigns (and shall cause the assignment of) all such right and title to, and interest in, any such invention or discovery to Contractor. FPL shall, at Contractor's expense and request, cooperate in pursuing and effecting the transfer to Contractor of all of FPL's right and title to and interest in any such invention or discovery, including, without limitation, executing or causing the execution of assignments and applications, and assign with prosecution and enforcement of rights with respect to any such invention or discovery, including, without limitation, executing patent applications and powers of attorney with respect thereto. Notwithstanding the above, in the event FPL contributes to the joint invention of any invention or discovery in connection with the Project ("FPL Assisted Discoveries"), Contractor hereby grants (and shall grant) to FPL a non-exclusive, royalty-free license to use such FPL Assisted Discoveries for any purpose at any location in the State of Florida.

ECRC-08-2877 HEARING EXHIBIT - 00000055

3.32.5 This Section 3.32, shall survive the expiration or termination of this Agreement.

3.33 EMERGENCIES

In the event of any emergency that endangers or could endanger life or property, Contractor shall take such action as may be reasonable and necessary to prevent, avoid or mitigate injury, damage or loss and shall, as soon as possible, report any such incidents, including Contractor's response and actions with respect thereto, to FPL.

3.34 [INTENTIONALLY DELETED]

3.35 WASTEWATER, POTABLE WATER

Contractor shall supply at its expense all raw, potable and other water at the Job Site as necessary in connection with the installation, start-up and testing of the Plant. Contractor shall dispose of all wastewater in conformance with Applicable Law and Applicable Permits.

3.36 [INTENTIONALLY DELETED]

3.37 START UP PROCESS

Contractor shall perform the Plant start-up in accordance with the process set forth in Appendix A, Scope of Work. Whenever FPL's staffing situation permits, FPL and Contractor shall mutually agree upon and utilize qualified FPL seconded personnel for start-up leadership positions, including the technical start-up manager and key start-up supervision positions; provided, however, Contractor shall remain fully responsible for all acts and omissions of such personnel in connection with the commissioning and operation of the Plant until the Provisional Acceptance Date as if Contractor had independently engaged such personnel, and be responsible for all acts and omissions of such personnel after the Provisional Acceptance Date if such acts or omissions are taken at the direction of Contractor.

3.38 ACCOMMODATIONS REGARDING TESTING

Contractor shall (excluding any action which will affect Contractor's ability to complete the Work within the time required pursuant to this Agreement or increase Contractor's cost to complete the Work) coordinate with FPL the scheduling of any Test, which efforts may include modification of Contractor's planned test program to maximize the value of energy sold. Contractor shall coordinate such Test with the dispatch schedule for the Plant, so as not to interfere with FPL's or its Affiliates' obligations with respect thereto.

3.39 ACCESS

Contractor shall use only the entrance(s) to the Job Site specified by FPL for ingress and egress of all personnel, equipment, vehicles, and materials. Contractor shall perform the Work consistent and in accordance with FPL's ownership, license and easement rights in and to the Job Site.

3.40 NATURE OF OBLIGATIONS

Except as expressly stated to the contrary herein, the Contract Price includes the cost of completion of all the foregoing obligations. Contractor hereby agrees that it shall be ultimately responsible for the performance of all activities, which may be necessary and desirable for the full performance of the Scope of Work, all in accordance with the Contract Documents.

ARTICLE IV.
CERTAIN OBLIGATIONS OF FPL

4.1 PERMITS

FPL shall, with Contractor's reasonable assistance (to be provided at no cost to FPL), timely obtain and maintain, at its own cost and expense, all FPL Permits. In addition, FPL shall execute such applications as Contractor may reasonably request in connection with obtaining any of the Contractor Permits; provided, that FPL shall provide Contractor with such information and documentation, at no cost to FPL, as Contractor shall reasonably request in order to execute such applications. FPL shall deliver to Contractor evidence that the FPL Permits necessary to begin construction of the Plant have been received by FPL or, if any such

ECRC-08-2878 HEARING EXHIBIT - 00000056

required FPL Permit has not actually been issued, that it has been approved for issuance, or in the opinion of FPL, will be approved for issuance.

4.2 INTERCONNECTION FACILITIES

At least thirty (30) days prior to the Provisional Acceptance Date, FPL shall give Contractor reasonable access to the FPL Interconnection Facilities.

4.3 FPL OBLIGATIONS IN SCOPE OF WORK

FPL shall comply with each and every obligation and duty assigned to FPL in the Scope of Work.

4.4 [INTENTIONALLY DELETED]

4.5 ACCESS TO PROPERTY SITE

Subject to Section 3.37, START UP PROCESS, of Article III, CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR, and consistent with the terms of the Applicable Permits and FPL's ownership, license, and easement rights in and to the Job Site, FPL shall make the Job Site reasonably available to Contractor and its Subcontractors and Vendors and assure reasonable rights of ingress and egress to and from the Job Site for Contractor and its Subcontractors and Vendors for performance of the Work; provided, however, that Contractor shall coordinate with FPL regarding: (i) initial entry onto the Job Site or any part thereof; and (ii) contact with the Persons who own property on or near, or have granted license or easement rights in and to, the Job Site. During the period commencing on the Final Acceptance Date and ending at the expiration of the Warranty Period provided in Section 12.1.4(c), FPL shall make the Job Site reasonably available to Contractor for the sole purpose of monitoring FPL's compliance with operation and maintenance manuals and manufacturers' guidelines applicable to the Equipment in connection with Contractor's satisfaction of its warranty obligations under Article 12, Contractor's Warranties.

4.6 [INTENTIONALLY DELETED]

4.7 DESCRIPTION OF PROPERTY SITE

On or before thirty (30) days after the date of the Agreement, FPL shall deliver to Contractor a boundary survey of the Property Site. Contractor may rely on such boundary survey for the sole purpose of establishing the boundaries of the Property Site.

4.8 NOTICE OF FINANCIAL CLOSING

FPL shall give Contractor prompt written notice of the scheduled and actual date of Financial Closing.

4.9 FPL TAXES

FPL shall pay all real property taxes assessed against the Property Site and any permanent use charges (but excluding charges and taxes for utilities and fuel to be supplied by Contractor as required hereunder, which shall be Contractor's responsibility), and, subject to Section 3.24, CONTRACTOR TAXES, of Article III, CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR FPL, shall be responsible for the payment of, or reimbursement to Contractor of, state or local sales and/or use taxes assessed by the State of Florida (or any city, county or municipality therein) in connection with the purchase of all Equipment, except for such taxes FPL contests in good faith, in each case including any such taxes resulting from a Change In Law (collectively, "FPL Taxes"). In the event that FPL is required to pay additional Taxes, penalties or interest because Contractor failed to follow written instructions of FPL appropriately or to comply with its obligations under Section 3.24, CONTRACTOR TAXES, of Article III, CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR FPL, Contractor shall be responsible for the cost of such additional Taxes, penalties or interest within thirty (30) days of FPL's request therefor.

4.10 FPL'S COOPERATION

At no additional cost to FPL, FPL shall make reasonable efforts to supply to Contractor, in a timely manner, either directly or indirectly, material information and data that is available to FPL and that is required for the performance of the Work; provided, however, FPL does not warrant the correctness of the information and

ECRC-08-2879 HEARING EXHIBIT - 00000057

documentation provided hereunder. Although FPL may provide or may have provided Contractor with copies of certain studies, reports or other information (including oral statements), Contractor acknowledges and agrees that:

4.10.1 All such documents or information have been or will be provided as background information and as an accommodation to Contractor;

4.10.2 FPL makes no representations or warranties with respect to the accuracy of such documents or the information (including oral statements) or opinions therein contained or expressed; and

4.10.3 It is not relying on FPL for any information, data, inferences, conclusions, or other information with respect to the Job Site (other than the boundary survey referred to in Section 4.7, DESCRIPTION OF PROPERTY SITE), including the surface and subsurface conditions of the Job Site and the surrounding areas.

4.11 FPL'S REPRESENTATIVE

No later than the date of this Agreement, FPL shall designate in writing one or more representatives at the Property Site (at least one of whom shall be at the Job Site during normal business hours) who shall act as the point of contact for both Contractor and the Independent Engineer with respect to the prosecution of the Work, administration of the Contract Documents on behalf of FPL, approval of Contractor's submissions hereunder and inspection of the Work, as reasonably necessary for Contractor's performance of the Work; provided that such representative(s) shall not be authorized to execute or make any amendments to, authorize Change Orders in respect of, or provide waivers under, this Agreement. FPL shall provide Contractor with prior written notice in the event that it designates any additional representatives or removes any existing representatives.

4.12 [INTENTIONALLY DELETED]

4.13 OPERATION AND MAINTENANCE

Subject to Contractor's removal rights set forth in Section 3.22, TRAINING OF O&M PERSONNEL, of Article III, CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR, FPL shall, commencing fifteen (15) days prior to the anticipated Provisional Acceptance Date (as determined by FPL based on the circumstances existing at the time of determination), provide O&M Personnel with skills and training appropriate for the operation of a photovoltaic solar power plant reasonably required for training by Contractor as provided in accordance with Section 3.22, TRAINING OF O&M PERSONNEL, of Article III, CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR, and for testing, start-up, operation, commissioning, and maintenance of the Project; provided, however, that Contractor shall remain solely responsible for performing the Work in accordance with this Agreement, including Contractor's obligation to achieve Mechanical Completion and Provisional Acceptance on or before the Guaranteed Provisional Acceptance Date, regardless of any act, omission, failure, non-achievement, negligence or non-performance of such O&M Personnel.

ARTICLE V.
PROJECT SCHEDULE

5.1 COMMENCEMENT OF WORK

Prior to the issuance of the Notice to Proceed, Contractor shall commence and diligently pursue completion of the Work only to the extent provided in a Limited Notice to Proceed issued pursuant to Section 5.2.2.

5.2 NOTICE TO PROCEED

5.2.1 *Commencement Date.* Between two to eight (2-8) weeks before Contractor will construct improvements at, or deliver materials to, the Job Site that may be insured pursuant to a Builder's Risk Policy, Contractor shall deliver in writing to FPL a notice setting forth the Commencement Date.

5.2.2 *Limited Notice to Proceed.* Prior to the issuance of the Notice to Proceed, FPL may issue one or more Limited Notices to Proceed; provided, however, if the Limited Notice to Proceed has not been issued by FPL pursuant to Section 5.2.3 below, on or before August 1, 2008 (the "Latest Limited Notice to Proceed Date"), Contractor shall be entitled to a day-for-day extension of the Guaranteed Provisional Acceptance

ECRC-08-2880 HEARING EXHIBIT - 00000058

Date and all Critical Milestone Dates related thereto for each day after August 1, 2008, that FPL has failed to issue a Limited Notice to Proceed, in each case extension shall be Contractor's sole and exclusive remedy for such failure and Contractor shall not be entitled to claim an FPL Caused Delay with respect to such failure. The date on which FPL provides Contractor with a Limited Notice to Proceed, if at all, pursuant to Section 5.2.3 below, shall be the "Limited Notice to Proceed Date". Any Work described in a Limited Notice to Proceed shall be subject to the terms of this Agreement and Contractor shall commence such portion of the Work after the Limited Notice to Proceed Date set forth therein and thereafter diligently pursue that portion of such Work. Any payment by FPL with respect to such portions of the Work shall be determined and applied to the Contract Price in accordance with Article VII hereof.

5.2.3 *Limitation on Work Prior to Notice to Proceed.* A Limited Notice to Proceed, issued pursuant to this Section 5.2.3, if any, shall authorize Contractor to commence performance of the Work; provided, however, Contractor may not perform any construction activities at the Job Site; and further provided, Contractor shall not enter into any contract, agreement or purchase order (or any obligation or commitment with respect thereto) with a Subcontractor or Vendor without the prior written consent of FPL (which consent may be granted or withheld in FPL's sole discretion).

5.2.4 *Notice to Proceed.* The Business Day after which FPL provides Contractor with the Notice to Proceed shall be the "Notice to Proceed Date"; provided, however, that the Notice to Proceed Date shall not be later than January 1, 2009 (the "Latest Notice to Proceed Date"). On the Notice to Proceed Date, Contractor shall commence and shall thereafter diligently pursue all of the Work assigning to it a priority that should reasonably permit the attainment of Provisional Acceptance on or before the Guaranteed Provisional Acceptance Date. Contractor shall proceed with the performance of the Work in accordance with the Project Schedule.

5.2.5 *Delay in Notice to Proceed.* If a Notice to Proceed has not been issued by the Latest Notice to Proceed Date, and such failure causes an increase in the Contract Price or time required for performance of the Work, then Contractor shall promptly notify FPL thereof in writing and FPL may either (i) issue a Change Order to address such failure in which event the Latest Notice to Proceed Date shall be extended for thirty (30) days and the procedure set forth herein shall be repeated upon the expiration of each additional thirty (30) day period; or (ii) terminate this Agreement pursuant to Section 15.3,and FPL shall only be obligated to pay Contractor an amount equal to any applicable Termination Payment. If this Agreement is terminated pursuant to this Section 5.2.5, then except as set forth in Section 15.3, neither Party shall have any further rights or obligations hereunder (other than such rights and obligations that by the express terms of this Agreement survive the expiration or earlier termination of this Agreement or as otherwise set forth in a Limited Notice to Proceed).

5.3 PROJECT SCHEDULE.

5.3.1 Contractor shall perform the Work in compliance with the Project Schedule, including completing the Work required by the Guaranteed Provisional Acceptance Date and the Final Acceptance Date. Contractor hereby covenants and warrants to FPL that in undertaking to complete the Work in accordance with the terms hereof, Contractor has taken into consideration and made reasonable allowances for hindrances and delays incident to such Work not caused by FPL. Contractor shall provide the reports as required herein, and provide any further information required by FPL as FPL, the Financing Parties or the Independent Engineer may reasonably request to verify actual progress and forecast future progress of the Work. Contractor shall promptly notify FPL in writing of any occurrence that Contractor has reason to believe will adversely affect the completion of the Work by the Guaranteed Provisional Acceptance Date or materially adversely affect completion of the Work in accordance with the Project Schedule. Contractor will specify in said notice the corrective action planned by Contractor to overcome the effect of the delay or potential delay.

5.3.2 Without limiting the obligations of Contractor under Section 5.3.1, above, Contractor shall provide, together with its monthly status reports required hereunder, a project schedule and any updates thereto that provide for the orderly, practicable and expeditious completion of the Work in accordance with the requirements of the Contract Documents. The project schedule and any update shall be presented

ECRC-08-2881 HEARING EXHIBIT - 00000059

electronically on a monthly basis and in such reasonable detail as FPL and the Independent Engineer may require and shall address all material elements of the Work. Additionally, the updated project schedule shall be made available to FPL monthly, and as otherwise reasonably requested by FPL, in MS Project format on a computer located at the Property Site. Contractor shall consult with FPL in connection with each update provided under this paragraph. Notwithstanding anything contained herein to the contrary, in the absence of a Change Order, no update to the project schedule shall in any way amend, alter or otherwise change the Project Schedule or the Guaranteed Provisional Acceptance Date.

5.3.3 *Adequate Assurance.* In the event FPL reasonably believes Contractor's completion of any Critical Milestone set forth in Appendix C, Critical Milestones and Milestones, will not be completed by the date required therein, FPL shall notify Contractor in writing, and Contractor shall, within seven (7) days of receipt of FPL's notice, provide to FPL a written plan detailing the activities or sequence of events Contractor will implement to assure completion of the Critical Milestone by the date required in Appendix C, Critical Milestones and Milestones, and Contractor shall promptly implement such activities and sequence of events. In the event Contractor fails to complete any of the Critical Milestones by the date required in Appendix C, Critical Milestones and Milestones, Contractor shall provide to FPL a written recovery plan that will demonstrate achievement of the Critical Milestone at the earliest possible date to minimize delay of the Project Schedule and Contractor shall promptly implement any such recovery plan. Such recovery plan shall include, without limitation, reasonable evidence of increases in Contractor's work force, increases in the number of shifts, overtime operations, additional days of Work per week, and such other evidence (including Critical Path schedule analysis) as necessary for the timely completion of the Work in accordance with the Contract Documents. Approval by FPL and the Independent Engineer of such plan shall not:

(a) Be deemed in any way to have relieved Contractor of its obligations under this Agreement relating to the failure to achieve Mechanical Completion or Provisional Acceptance by the Guaranteed Provisional Acceptance Date;

(b) Be a basis for an increase in the Contract Price; or

(c) Limit the rights of FPL under Section 11.2, SCHEDULE LIQUIDATED DAMAGES, of Article XI, CONTRACTOR GUARANTEES AND LIQUIDATED DAMAGES.

Further, Contractor acknowledges that the implementation of any such recovery plan may result in material additional costs and expenditures for Contractor (including by way of overtime, additional crews and/or additional shifts). Contractor agrees that it shall not be entitled to a Change Order or any other compensation or increase in the Contract Price in connection with the implementation of any such recovery plan.

5.3.4 No later than fifteen (15) days following the date hereof, Contractor shall prepare and submit to FPL for review and comment a preliminary draft of the Critical Path, in form and content acceptable to FPL. Upon receipt of comment from FPL, Contractor shall either promptly make changes to the Critical Path as suggested by FPL or negotiate and resolve in good faith with FPL such changes. Upon approval of the Critical Path by the Parties, Contractor shall comply with the provisions thereof. Contractor shall provide five (5) copies, as well as an electronic copy, of the Critical Path to FPL. Contractor shall not revise or modify the Critical Path, except pursuant to a Scope Change Order mutually agreed by the Parties.

5.3.5 In no event will Contractor's failure to complete one or more Milestones by the date required for such Milestone change, delay or otherwise affect the required completion date for any other Milestone.

5.4 ACCELERATION OF WORK

In addition to the provisions of Sections 5.3.3, above, relating to delays in the Work, in the event of delay, including any event which causes the prosecution of the Work to fail to conform to the Project Schedule, FPL may, by notice to Contractor, direct that the Work be accelerated by means of overtime, additional crews or additional shifts or resequencing of the Work. If:

(a) Such delay arises from any FPL Caused Delay or Force Majeure Event; or

ECRC-08-2882 HEARING EXHIBIT - 00000060

(b) Contractor provides reasonable evidence to FPL that such delay results from a suspension pursuant to Section 15.4, SUSPENSION BY FPL FOR CONVENIENCE, of Article XV, TERMINATION.

then Contractor shall be entitled to reimbursement of increased cost as a result of such acceleration (i.e., premium portion of overtime pay, additional crew, shift or Equipment cost and such other items of incremental cost requested in advance by Contractor and approved by FPL which approval will not be unreasonably withheld) less savings or costs not incurred due to such acceleration, but expressly waives any other compensation therefor. CONTRACTOR SHALL RECEIVE NO SUCH REIMBURSEMENT FOR COSTS ARISING OUT OF, AND CONTRACTOR SHALL BE SOLELY RESPONSIBLE FOR ANY COSTS INCURRED BY CONTRACTOR AS A RESULT OF, ACCELERATION RELATED TO ANY EVENT OTHER THAN THE EVENTS SPECIFICALLY DESCRIBED IN THIS SECTION 5.4, PARAGRAPHS (a) AND (b), ABOVE. Contractor shall cause prosecution of the Work to conform to the Project Schedule within thirty (30) days after receiving written notice from FPL to accelerate the Work.

5.5 LIQUIDATED DAMAGES

Nothing contained in this Article shall relieve Contractor of its obligation to pay Schedule Liquidated Damages in the event that Provisional Acceptance is not achieved by the Guaranteed Provisional Acceptance Date.

ARTICLE VI.
CHANGE ORDERS

6.1 CHANGE ORDER AT FPL'S REQUEST.

6.1.1 FPL may at any time, by written notice to Contractor, request an addition to or deletion from or other changes in the Work or schedule therefor (together with any necessary or requested amendments to this Agreement with respect thereto) (hereinafter "Change" or "Changes") by submitting a Request for Change Order in the form attached hereto as Appendix S, Form of Request for Change Order. Contractor shall review and consider such requested Change and shall make a written response thereto within ten (10) days after receiving such request. If Contractor believes that giving effect to any Change requested by FPL will increase or decrease its cost of performing the Work, shorten or lengthen the time needed for completion of the Work, require modification of its warranties in Article XII, CONTRACTOR'S WARRANTIES, or require a modification of any other provisions of the Contract Documents, its response to the Change request shall set forth such changes (including any amendments to the Contract Documents) that Contractor deems necessary as a result of the requested Change and its justification therefor. If Contractor accepts the Changes requested by FPL (together with any amendments to the Contract Documents specified therein) or if the Parties agree upon a modification of such requested Changes, the Parties shall set forth the agreed upon Change in the Work and agreed upon amendments to the Contract Documents, if any, in a written change order signed by all Parties (a "Change Order"). Each Change Order shall constitute a final settlement of all items covered therein, including any compensation for impact on, or delay or acceleration in, performing the Work. If the Parties do not agree upon all terms of the Change Order, Contractor shall proceed with such Work and the dispute shall be resolved in accordance with Article XVII, DISPUTE RESOLUTION; provided that if the Parties are unable to reach agreement on the cost of a requested Change, Contractor shall perform the requested Change in accordance with Section 6.3, CHANGES TO CONTRACT PRICE, below.

6.1.2 FPL may at any time, by written notice to Contractor, propose Changes in the Work or the Project Schedule due to a Force Majeure Event or an FPL Caused Delay. If there is a material impact that will actually, demonstrably, adversely and materially affect Contractor's ability to complete one or more Critical Milestones by the required date as a result of such Force Majeure Event or an FPL Caused Delay, then the Parties agree to bargain reasonably and in good-faith for the execution of a mutually acceptable Change Order. Force Majeure Events will only entitle Contractor to extensions of the Project Schedule.

ECRC-08-2883 HEARING EXHIBIT - 00000061

6.2 CHANGE ORDERS REQUESTED BY CONTRACTOR.

6.2.1 It is the intent of FPL and Contractor that the Scope of Work attached hereto as Appendix A, Scope of Work, includes all items necessary for the proper execution and completion of the Work. As more particularly described in Section 3.1.3, Contractor's Exclusions, of Article III, CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR work not described in the Scope of Work attached hereto as Appendix A, Scope of Work, shall not require a Change Order if such work is consistent with and reasonably inferable from the Scope of Work, so that an engineering, procurement and construction contractor of Contractor's experience and expertise should have anticipated that the work would have been required.

6.2.2 Subject to Section 6.2.3, below, Contractor may at any time, by written notice to FPL, request a Change in the Work (together with any necessary or requested amendments to the Contract Documents) and FPL may accept or reject such request in its sole discretion. If Contractor believes that such requested Change will increase or decrease its cost of performing the Work, lengthen or shorten the time needed for completion of the Work, require modification of its warranties in Article XII, CONTRACTOR'S WARRANTIES, or require a modification of any other provisions of the Contract Documents, it shall notify FPL of such, setting forth its justification for and effect of such changes, within ten (10) days after making a request for a Change. If FPL accepts the Changes requested by Contractor (together with amendments to the Contract Documents specified therein, if any), or if the Parties agree upon a modification of such requested Changes, the Parties shall set forth the agreed upon Change in the Work and agreed upon amendments to the Contract Documents, if any, in a written Change Order signed by all Parties. For the avoidance of doubt, the Parties agree that FPL's representative referred to in Section 4.11 shall not have authority to approve Change Orders. The Parties acknowledge and agree that one or more of the documents and agreements, including agreements with Subcontractors, may not be amended orally or through course of conduct. The Parties hereby express their intention that this Agreement will not be modified orally, through course of conduct or otherwise (regardless of whether any other agreements or documents relating to this Project have been so amended or modified).

6.2.3 Contractor may at any time, by written notice to FPL, propose Changes in the Work or the Critical Milestones due to:

(a) A Force Majeure Event, provided that such Force Majeure Event has an impact that will actually, demonstrably, adversely and materially affect Contractor's ability to complete one or more Critical Milestones by the required dates and further provided that Contractor complies with requirements provided in Article XIV, FORCE MAJEURE EVENT AND FPL CAUSED DELAY, and Section 6.2.2, above;

(b) An FPL Caused Delay, provided that such FPL Caused Delay has a demonstrable material cost increase to Contractor and/or schedule impact that will actually, demonstrably, adversely and materially affect Contractor's ability to complete one or more Critical Milestones by the required dates and further provided that Contractor complies with the requirements set forth in Article XIV, FORCE MAJEURE EVENT AND FPL CAUSED DELAY;

(c) A Change In Law, provided that such Change In Law prevents Contractor from performing all or a portion of the Work, has a demonstrable material cost increase to Contractor and/or has a schedule impact that will actually, demonstrably, adversely and materially affect Contractor's ability to complete one or more Critical Milestones by the required dates, and further provided that Contractor shall diligently make adjustments to minimize the effect of such Change In Law on the Project; or

(d) Certain unforeseeable subsurface conditions but only to the extent provided in Section 3.4.4, Differing Condition, of Article III, CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR.

ECRC-08-2884 HEARING EXHIBIT - 00000062

Unless the foregoing conditions are met, Contractor may not request a Change in the Work or Critical Milestones due to a Force Majeure Event, FPL Caused Delay, Change In Law or unforeseeable subsurface conditions.

6.2.4 If FPL agrees that Contractor has met all of the applicable conditions precedent for a requested Change, then the Parties agree to bargain reasonably and in good faith for the execution of a mutually acceptable Change Order. Force Majeure Events will only entitle Contractor to extensions of the Project Schedule. If in such event the Parties are unable to agree on a mutually acceptable Change Order, then the dispute shall be resolved in accordance with Article XVII, DISPUTE RESOLUTION. Any extension permitted under this Section shall be of an equitable duration designed to reflect the delay actually caused by the relevant event despite Contractor's reasonable efforts to mitigate the same.

6.2.5 Intentionally Deleted.

6.2.6 If Contractor knows of circumstances or events that do or may require a Change in the Work or Project Schedule, and Contractor does not provide written notification to FPL of such within fifteen (15) days after the date Contractor knows or should have known (in the exercise of due diligence) of such circumstances or events, then Contractor shall not have any right to request or require any additional consideration or other changes as to cost, schedule, warranty obligations or other provisions hereof, and Contractor shall have waived any claims or offsets against FPL, with respect to any Change Order or any necessary Change in the Work or Project Schedule arising out of such circumstances or events.

6.3 CHANGES TO CONTRACT PRICE; DISPUTES

A Change Order initiated by either Party may have the effect of either increasing or decreasing the Contract Price. Any Contractor response to a Change Order under Section 6.1, CHANGE ORDER AT FPL'S REQUEST, above, and any Contractor request for Changes under Section 6.2, CHANGE ORDERS REQUESTED BY CONTRACTOR, above, shall be accompanied by a proposed all inclusive final lump sum cost (separating materials and labor) to FPL. In the event that the Parties are unable to reach an agreement on an all-inclusive final lump sum cost to FPL or a not-to-exceed cost as a result of a requested Change, then Contractor agrees to perform the requested Change and the Contract Price shall be adjusted by the amount of such additional cost and expense as is not in dispute pending resolution of the dispute pursuant to Article XVII, DISPUTE RESOLUTION. In addition, in the event that FPL and Contractor are unable to reach agreement on a Change Order for a Change requested by either FPL or Contractor, at the direction of FPL (and only at the direction of FPL), FPL's proposed Changes shall become effective as a Change Order and Contractor shall continue to perform the Work in accordance with such Change Order and the proposed Changes shall be performed by Contractor at its sole cost and expense pending resolution of the dispute pursuant to Article XVII, DISPUTE RESOLUTION.

6.4 INFORMATION REQUESTS

FPL may request that Contractor provide written information (prior to the issuance of a request for Changes) regarding the effect of a contemplated Change on pricing, scheduling, warranty obligations or on other terms of the Contract Documents. The purpose of such a request will be to determine whether or not a Change will be implemented. Contractor shall provide the requested information within fourteen (14) days after the receipt of said request. Contractor will be allowed to reasonably delay its response to such request to the extent that fulfilling such request would significantly delay progress on the Work, unless FPL agrees to extend the required completion date for the affected Milestone. Such an information request is not a Change Order and does not authorize Contractor to commence performance of the contemplated change in Scope of Work.

6.5 MINOR CHANGES

FPL shall have the direct authority to issue clarifications and order minor changes in the Work, effected by written order, which do not involve any adjustment to the Contract Price or the Guaranteed Provisional Acceptance Date and do not require Contractor to incur any additional material cost or expense; provided that such clarifications and changes are consistent with the intent of the Contract Documents. Such clarifications and changes shall be binding on FPL and Contractor. Contractor shall carry out such written

ECRC-08-2885 HEARING EXHIBIT - 00000063

(a) Schedule Liquidated Damages payable by Contractor;

(b) Amounts withheld pursuant to:

(i) Section 7.3.3, Protect FPL From Loss;

(ii) Section 7.6.1, Satisfaction of Liens, below; and

(c) Reasonable costs incurred by FPL in enforcing:

(i) Section 6.2.2, of Article VI, CHANGE ORDERS;

(ii) Section 14.5, NOTICE OF FPL CAUSED DELAY, of Article XIV, FORCE MAJEURE AND FPL CAUSED DELAY; or

(iii) Any other provision hereof (including attorneys' and other consultants' fees) regardless of whether such provisions expressly provide for withholding or set-off.

7.3 GENERAL PROVISIONS FOR PAYMENTS.

7.3.1 If applicable, any payment by FPL shall be accompanied by a notice to Contractor specifying the amount of each deduction and setting forth the reason(s) why the deduction is justified; provided that FPL's failure to provide any such notice shall not result in a breach hereof or be deemed a waiver of any right to deduct any amount hereunder. NOTWITHSTANDING ANY PROVISION OF THIS AGREEMENT TO THE CONTRARY, FAILURE BY FPL TO PAY ANY AMOUNT DISPUTED IN GOOD FAITH UNTIL RESOLUTION OF SUCH DISPUTE IN ACCORDANCE WITH THIS AGREEMENT SHALL NOT ALLEVIATE, DIMINISH, OR MODIFY IN ANY RESPECT CONTRACTOR'S OBLIGATIONS TO PERFORM HEREUNDER, INCLUDING CONTRACTOR'S OBLIGATION TO MEET THE GUARANTEED PROVISIONAL ACCEPTANCE DATE.

7.3.2 Failure or forbearance on the part of FPL in withholding any amounts due under a Request for Payment or invoice shall not be construed as accepting or acquiescing to any disputed claims. In addition, the making of any payment by FPL shall not constitute an admission by it that the Work covered by such payment (or any Work previously performed) is satisfactory or timely performed, and FPL shall have the same right to challenge the satisfactoriness and timeliness of such Work as if it had not made such payment. If, after any such payment has been made, it is subsequently determined by FPL, acting reasonably, that Contractor was not entitled to all or a portion of any such payment, Contractor shall promptly refund all or a portion of such payment to FPL.

7.3.3 *Protect FPL From Loss*. Notwithstanding any other provision to the contrary contained herein, FPL, in addition to its rights set forth in Section 7.5, LETTERS OF CREDIT, shall have no obligation to make payments to Contractor hereunder and FPL may decide not to certify payment or may nullify the whole or a part of a certification for payment made pursuant to a previous Request for Payment to such extent as may be necessary in FPL's opinion to protect FPL from loss because of:

(a) Defective Work not remedied;

(b) Third party claims filed (including Liens), or reasonable evidence indicating probable filing of such claims;

(c) Failure of Contractor to make payments when due to Subcontractors or Vendors;

(d) Damage to FPL or another contractor, including damage to the property of FPL or any of its Affiliates but only to the extent Contractor may be liable for such damage pursuant to this Agreement;

(e) Contractor's, or any Subcontractor's or Vendor's failure to carry out the Scope of Work in accordance with the Contract Documents;

(f) The occurrence of a Contractor Event of Default;

ECRC-08-2887 HEARING EXHIBIT - 00000064

(g) A good faith determination by FPL that Contractor cannot, with prompt and reasonable acceleration of the Work, achieve Provisional Acceptance before the Guaranteed Provisional Acceptance Date; provided, however, the amount withheld or retained on account of this paragraph, shall not exceed the amount of Schedule Liquidated Damages which would be payable under Section 11.2, SCHEDULE LIQUIDATED DAMAGES, of Article XI, CONTRACTOR GUARANTEES AND LIQUIDATED DAMAGES, on account of the then estimated delay in Provisional Acceptance;

(h) Contractor's failure to deliver a recovery plan acceptable to FPL as set forth in:

(i) Section 5.3.3, Adequate Assurance, of Article V, PROJECT SCHEDULE, or

(ii) the failure of Contractor to cause the prosecution of the Work to conform to any such recovery plan accepted by FPL;

(i) Contractor's failure to deliver any Contractor Deliverable to FPL on or before the date such item is scheduled to be delivered; or

(j) Contractor's failure to remove and replace, or cause any Subcontractor or Vendor to remove and replace, within ten (10) days after receiving notice pursuant to Section 3.11.11, Replacement at FPL's Request, of Article III, CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR, any employee of Contractor or such Subcontractor or Vendor who is employed in the Work or the warranty obligations of Contractor or such Subcontractor or Vendor.

Notwithstanding the provisions of Section 15.7, TERMINATION BY CONTRACTOR DUE TO FPL DEFAULT, of Article XV, TERMINATION, and 17.3, CONTINUING OBLIGATIONS AND RIGHTS, of Article XVII, DISPUTE RESOLUTION, Contractor shall not have any rights of termination or suspension under such Sections as a result of FPL's exercise or attempted exercise of its rights under this Section 7.3. FPL shall release payments withheld pursuant to this Section 7.3.3 within thirty (30) days from the date when Contractor cures all such breaches to the satisfaction of FPL.

7.3.4 Each payment made pursuant to this Article shall be paid directly to Contractor. Such payment shall be wire-transferred to an account or accounts designated by Contractor in its Request for Payment.

7.4 INTENTIONALLY DELETED.

7.5 LETTERS OF CREDIT

Simultaneously with the execution of this Agreement, Contractor shall, at its own expense, cause the LC Issuing Bank to issue and maintain, by renewal or replacement, for the periods specified herein, an irrevocable, unconditional, transferable, standby, revolving letter of credit in favor of FPL meeting the requirements of this Section 7.5, and in form and substance as set forth on Appendix U, Form of Letter of Credit, (the "Letter of Credit") and such Letter of Credit must provide for draws in the United States. The Letter of Credit shall constitute security for Contractor's obligations hereunder. All fees and charges, including, without limitation, issuing, commitment and operation fees and charges, relating to the Letter of Credit shall be borne by Contractor. The Letter of Credit shall comply with and be subject to the following terms and conditions:

7.5.1 Upon issuance, the Letter of Credit shall have a face amount equal to Six Million Nine Hundred Thousand and 00/100 Dollars ($6,900,000.00). On the date (the "Initial LC Amount Expiration Date") sixty (60) days after either Contractor satisfies the Energy Yield Test or the Contract Price is reduced, in each case, in accordance with Section 11.4.3,, and thereafter so long as the Letter of Credit is required to be provided hereunder, the face amount shall automatically be reduced to (or the LC Issuing Bank may issue a replacement Letter of Credit with a face amount equal to) Three Million Four Hundred and Fifty Thousand and 00/100 Dollars ($3,450,000.00); provided, if Contractor elects to cause the LC Issuing Bank to issue a replacement Letter of Credit to FPL, upon receipt of such replacement Letter of Credit by FPL, FPL shall, as promptly as practicable thereafter, mark the replaced Letter of Credit "canceled" and return it to the LC Issuing Bank for cancellation. Within seven (7) Days of FPL's notice to Contractor of the occurrence of a Credit Trigger Event, either (a) the face amount of the Letter of Credit shall be adjusted in accordance with

HEARING EXHIBIT - 00000065
FCRC-08-2888

person relating to or affecting this Agreement, except claims for which Contractor has delivered a dispute notice to FPL. No payment by FPL shall be deemed a waiver by FPL of any obligation of Contractor under this Agreement.

ARTICLE VIII.
TITLE, RISK OF LOSS AND POSSESSION

8.1 CLEAR TITLE

8.1.1 Contractor warrants and guarantees that legal title to and the ownership of the Work (including, without limitation, all Equipment, patents, licenses, Contractor Deliverables, operation and maintenance manuals and any spare parts purchased by Contractor on behalf of FPL at FPL's request in connection with the construction, operation and maintenance of the Plant) shall pass to FPL, free and clear of any and all Liens, upon Provisional Acceptance.

8.1.2 Notwithstanding anything to the contrary, the costs of unloading and transporting to the Job Site are included in the Contract Price.

8.2 RISK OF LOSS

8.2.1 From the date hereof until the Provisional Acceptance Date, Contractor hereby assumes the risk of loss for the Project and the Work, including:

(a) Any Equipment whether on or off the Job Site;

(b) All other Work completed on or off the Job Site; and

(c) All Work in progress.

8.2.2 All Equipment not yet incorporated into the Plant shall be stored in secured areas. Contractor shall bear the responsibility of preserving, safeguarding, and maintaining such Equipment and any other completed Work and Work in progress (including spare parts provided by FPL). If any loss, damage, theft or destruction occurs to the Work, on or off the Job Site, for which Contractor has so assumed the risk of loss, Contractor shall, at FPL's option and at Contractor's cost, promptly repair or replace the property affected thereby. If FPL elects not to repair or replace the affected property, Contractor shall pay to FPL any proceeds received from the insurance required to be maintained by Contractor pursuant to Section 9.1.8 or 9.1.9 due to such loss, damage, theft or destruction. Risk of loss for the Project and the Work shall pass to FPL (excluding Contractor Equipment and other items to be removed by Contractor, which shall remain the responsibility of Contractor) on the Provisional Acceptance Date. Subject to the foregoing, from and after the date of the transfer of risk of loss, FPL shall assume all risk of physical loss or damage thereto; provided, however, Contractor shall, subject to the provisions of Article XII, Contractor's Warranties, continue to be responsible after Provisional Acceptance Date for claims, physical loss or damage to the Work to the extent resulting from (a) the acts or omissions of Contractor or any Affiliate thereof, any Subcontractor or Vendor, or anyone directly or indirectly employed by any of them, or anyone for whose acts such Person may be liable and/or (b) any failure to comply with the requirements of the Contract Documents.

ARTICLE IX.
INSURANCE

9.1 CONTRACTOR INSURANCE POLICIES

Upon execution of the Agreement and continuing through the Final Acceptance Date, Contractor shall, at its sole cost and expense, obtain and maintain and cause its Subcontractors to obtain and maintain in force insurance policies satisfying the requirements of this Article, providing the following coverages of the types and in the amounts as follows (the "Contractor Insurance Policies"):

ECRC-08-2890 HEARING EXHIBIT - 00000066

9.1.1 *Workers' Compensation Insurance*. Workers' Compensation that complies with the laws of the State of Florida and such other jurisdictions as may be applicable to its operations and includes an alternate employer endorsement. The amount of coverage of the insurance policy shall be the statutory amount required by the laws of the State of Florida. Where applicable, coverage shall include protection under the U.S. Longshoreman's and Harbor Worker's Act, Outer Continental Shelf Lands Act and Maritime Law, including the Jones Act and Death on the High Seas Act. Contractor expressly agrees to comply with all provisions of the Workers' Compensation Laws or similar employee benefit laws of the United States, or wherein said Work is to be performed, or of the countries from which its personnel are employed, where required, if applicable.

9.1.2 *Employers' Liability Insurance*. Employers' Liability Insurance including Occupational Disease in the amount of One Million Dollars ($1,000,000).

9.1.3 *Comprehensive or Commercial General Liability Insurance*. Comprehensive or Commercial General Liability insurance shall be on a broad form occurrence basis which shall be in the amount of One Million Dollars ($1,000,000) per occurrence and Two Million Dollars ($2,000,000) in the aggregate for this Project including, but not limited to coverage for the following:

(a) Premises and Construction Operations;

(b) Independent Contractors;

(c) Products and Completed Operations, maintained for a period of two (2) years from the Final Acceptance Date;

(d) Explosion, Collapse and Underground Hazards;

(e) Broad Form Contractual Liability Coverage, applicable to damages and indemnities set forth in this Agreement;

(f) Personal Injury Coverage;

(g) Non-Owned Watercraft, if applicable;

(h) Broad Form Property Damage;

(i) Cross Liability coverage or Severability of Interest clause;

(j) Broad Form Named Insured Endorsement; and

(k) Action over coverage.

9.1.4 *Automobile Liability Insurance*. Automobile Liability Insurance, on an occurrence basis including coverage for all owned, leased, hired or non-owned automotive equipment (and containing appropriate no fault insurance provisions or other endorsements as are required under jurisdictional law or requirements), in the amount of One Million Dollars ($1,000,000) per occurrence or the amount required by Applicable Law, whichever is greater.

9.1.5 *Umbrella Excess Liability Insurance*. Umbrella Excess Liability to be provided on a following form basis with coverage as broad as the primary policies in the amount of Twenty Million Dollars ($20,000,000) each occurrence and in the aggregate.

9.1.6 *All Risk Equipment Insurance*. All Risk Equipment Insurance covering all risk of physical damage to equipment owned by Contractor and/or provided for use at the Job Site by Contractor.

9.1.7 *Professional Liability Insurance*. Professional Liability Insurance on a claims made basis with limits of $1,000,000 each occurrence and, at execution of this Agreement, $2,000,000, and upon the Commencement Date, $3,000,000, aggregate for liability arising out of any negligent act, error, mistake or omission resulting from Contractor's engineering, procurement, construction, design, commissioning, start-up and testing services, such coverage to remain in effect for not less than four (4) years following Provisional Acceptance.

ECRC-08-2891 HEARING EXHIBIT - 00000067

9.1.8 *Inland and Marine Cargo Insurance.* Inland and Marine Cargo Insurance, if applicable - replacement value, which coverage may be included as part of the Builder's Risk Policy.

9.2 FORM OF CONTRACTOR INSURANCE POLICIES.

9.2.1 Each Contractor Insurance Policy shall be written on an occurrence basis. Subject to the limits and coverages specified in Section 9.1, CONTRACTOR INSURANCE POLICIES, and except for Workers' Compensation, Contractor shall name FPL, designated Affiliates of FPL, the Utility, the Financing Parties and any other Person designated by FPL (including their respective officers, directors and employees) as additional insureds on Contractor's liability policies as required to be carried by Contractor by the provisions of Section 9.1, CONTRACTOR INSURANCE POLICIES, for liabilities of Contractor under the Contract Documents. Each Contractor Insurance Policy shall provide, either in its printed text or by endorsement, that:

(a) It shall be primary with respect to the interest of FPL, designated Affiliates of FPL and the Financing Parties (including their respective officers, directors and employees); and

(b) Any other insurance maintained by FPL, designated Affiliates of FPL or the Financing Parties is in excess and not contributory to Contractor Insurance Policies in all instances regardless of any like insurance coverage that FPL, designated Affiliates of FPL and the Financing Parties may have.

9.2.2 Contractor shall require the issuers of the coverages specified in 9.1, CONTRACTOR INSURANCE POLICIES, to amend such Contractor Insurance Policies to:

(a) Include a waiver of all rights of subrogation against the Financing Parties, FPL and designated Affiliates of FPL and any other Person designated by FPL and their respective directors, officers and employees;

(b) Contain a severability of interest provision;

(c) Provide that none of the Financing Parties, FPL or designated Affiliates of FPL or their respective directors, officers or employees shall be liable for the payment of premiums under such policy;

(d) Provide that complete copies of all inspection or other reports required or performed for the insurer shall be provided to both FPL and the Financing Parties within thirty (30) days of delivery to Contractor;

(e) Provide that FPL and the Financing Parties must be given at least sixty (60) days' prior written notice of any change in, non-renewal or cancellation of such coverages that are initiated by insurer, except ten (10) days for non-payment of premium, and

(f) Provide that FPL and the Financing Parties must be given at least sixty (60) days' prior written notice of any change in, non-renewal or cancellation of such coverages that are initiated by Contractor, except ten (10) days for non-payment of premium.

9.2.3 Contractor shall be responsible for additional costs associated with modifying inadequate coverage, terms and conditions to meet the requirements of this Agreement. Contractor shall comply with all the conditions stipulated in each of the insurance policies. Contractor shall make no material alteration to the terms of any insurance required herein without the prior written approval of FPL. If an insurer makes (or purports to make) any such alteration, Contractor shall notify FPL immediately. If any such notice is sent from an office outside the United States, it will be sent by international courier. Contractor shall be responsible to insure against risk of loss or damage to any Contractor Equipment and other equipment and tools that will not be incorporated into or become part of the Project.

9.3 QUALIFIED INSURERS

All Contractor Insurance Policies shall be written by insurers reasonably acceptable to FPL and the Financing Parties and that are rated "A-" or higher by A.M. Best's Key Rating Guide, or as may be approved in writing

HEARING EXHIBIT - 00000068
FCPC 08-0892

by FPL and the Financing Parties from time to time (a "Qualified Insurer"). In addition, if required by the Financing Parties, the Qualified Insurer must be able to provide a non-vitiation endorsement.

9.4 CERTIFICATES OF INSURANCE

Contractor shall require all insurers under Contractor Insurance Policies to provide the Financing Parties, FPL and such other interested Persons as may be designated by FPL with certificates of insurance, in form and substance acceptable to the Financing Parties and FPL, evidencing and describing the insurance policies and endorsements maintained hereunder prior to commencement of the Work, or upon issuance of such policies, if earlier, and on each issuance anniversary while such insurance is in effect. The certificates of insurance shall evidence and describe the insurance policies and endorsements, including, without limitation, the requirements for the additional insured and waiver of subrogation as described in Section 9.2, FORM OF CONTRACTOR INSURANCE POLICIES. Notwithstanding anything to the contrary contained herein, evidence of such coverage shall be provided to FPL as a condition precedent to Initial Site Mobilization.

9.5 INSPECTION OF CONTRACTOR INSURANCE POLICIES

In respect of all Contractor Insurance Policies, Contractor shall, when so requested by FPL, produce Contractor's policies of insurance and confirmation of premium payment for such policies. If policies have not been secured on a project specific basis, Contractor may delete proprietary information not relevant to Contractor/FPL project prior to transmission.

9.6 SUBCONTRACTORS' INSURANCE

Before permitting any of its Subcontractors to perform any Work at the Job Site, Contractor shall obtain a certificate of insurance from each such Subcontractor evidencing that such Subcontractor has obtained the insurance required of Subcontractors by Contractor and in the case of Substantial Subcontractors, as required by FPL. All policies of Substantial Subcontractors shall include, and Contractor shall use reasonable efforts to require all other Subcontractors to include, a waiver of any right of subrogation of the insurers thereunder against FPL, the Financing Parties and Contractor, and any right of the insurers to set-off or counterclaim, offset or any other deduction, whether by attachment or otherwise, in respect of any liability or any such Person insured under such policy. Policies provided by Substantial Subcontractors and Substantial Vendors shall be in amounts and upon conditions as are customarily and normally provided in the major, grid-connected solar power generation industry.

9.7 REMEDY ON FAILURE TO INSURE

If Contractor shall fail to obtain and keep in force Contractor Insurance Policies, FPL may, without limiting any other remedy it may have, obtain and keep in force any such insurance and pay such premium or premiums as may be necessary for that purpose and recover from Contractor whether by way of deduction, offset or otherwise the cost of obtaining and maintaining such insurance.

9.8 MANAGEMENT OF INSURANCE POLICIES

Except as directed by FPL, Contractor shall be responsible for managing and administering all Contractor Insurance Policies, including the payment of all deductibles and self-insured retention amounts, the filing of all claims and the taking of all necessary and proper steps to collect any proceeds on behalf of the relevant insured Person. Contractor shall at all times keep FPL informed of the filing and progress of any claim. If Contractor shall fail to perform these responsibilities, FPL may take such action as it determines appropriate under the circumstances. In the event Contractor collects proceeds on behalf of other Persons, it shall ensure that these are paid directly from the insurers to the relevant Person and, in the event that it receives any such proceeds, it shall, unless otherwise directed by FPL, pay such proceed to such Party forthwith and prior thereto, hold the same in trust for the recipient.

9.9 FPL INSURANCE POLICIES

Subject to Section 9.9.3, prior to the Initial Site Mobilization by Contractor and continuing through the Final Acceptance Date, FPL shall obtain and maintain in force with responsible and reputable insurance carriers, subject to usual and customary terms, exclusions and limitations and deductible provisions the following insurance of the types set forth below:

ECRC-08-2893 HEARING EXHIBIT - 00000069

9.9.1 *Workers' Compensation Insurance*. Workers' Compensation covering all of FPL's employees - statutory limit;

9.9.2 *Employers' Liability Insurance*. Employers' Liability covering all of FPL's employees;

9.9.3 *Property Insurance*. After Provisional Acceptance and through the end of all of the Warranty Periods, FPL shall provide property insurance for the Plant and the Property Site in an amount and on terms that FPL deems reasonable.

9.9.4 *All Risk Installation and Builder's Risk Insurance*. No later than the Commencement Date, FPL shall obtain and maintain in force an All Risk Installation and Builder's Risk Insurance Policy (the "Builder's Risk Policy"). The Builder's Risk Policy shall be in an amount at least equal to the maximum foreseeable loss that could reasonably be sustained with respect to the Project or, if such amount is unavailable, such lower amount as may be commercially available at the time FPL procures such policy. A certificate of insurance evidencing the Builder's Risk Policy shall be furnished to the Contractor within thirty days after Contractor notifies FPL in writing that it will construct improvements at, or deliver materials to, the Job Site that may be insured pursuant to a builder's risk policy. Contractor shall be named as an additional insured on any Project-specific Builder's Risk Policy. The Builder's Risk Policy may contain separate sub-limits and deductibles subject to insurance company underwriting guidelines, provided the per occurrence deductible shall not exceed the amounts which are available to FPL on a commercially reasonable basis, as determined by FPL in its sole discretion. The Builder's Risk Policy will be maintained in accordance with terms reasonably available in the insurance market for the construction of major solar electric generating facilities and shall cover physical loss to property at the Job Site which results from a Defect but will not cover the Defect, including the cost to remedy the Defect. FPL shall cause the underwriter of the Builder's Risk Policy to waive all rights of subrogation against Contractor and its Subcontractors for damages covered by the Builder's Risk Policy. If a loss is insured under the Builder's Risk Policy, FPL will prepare and submit to the insurer any claim and proof of loss in accordance with the terms of the Builder's Risk Policy, and Contractor shall provide FPL with such documentation as FPL may reasonably require in connection with the preparation of such claim and proof of loss. FPL shall use commercially reasonable efforts for the benefit of the Parties in pursuing any claim under the Builder's Risk Policy, including, if permitted by the Builder's Risk Policy, pursuit of partial payment for partial proof of loss and payment of undisputed amounts due under the Builder's Risk Policy, provided Contractor acknowledges and agrees that the Builder's Risk Policy may not require such partial payments. FPL shall keep the Contractor reasonably informed of the status of claims negotiations between FPL and the insurer under the Builder's Risk Policy and if Contractor is not satisfied with the progress of such negotiations, it shall have the right to address such dissatisfaction with FPL's management and FPL shall use reasonable efforts to address Contractor's concerns. Notwithstanding the foregoing and subject to FPL's obligation to use commercially reasonable efforts in pursuing claims under the Builder's Risk Policy, any decisions made in the settlement or negotiation of any claim under the Builder's Risk Policy shall be in FPL's sole discretion. Upon availability and reasonable prior notice, Contractor's authorized representative shall be entitled to receive a copy of the Builder's Risk Policy. Contractor is responsible for the deductible under the Builder's Risk Policy; provided, however, Contractor's responsibility therefor shall in no event exceed $500,000 per occurrence.

9.10 FORM OF FPL'S POLICIES

9.10.1 FPL shall provide Contractor with a certificate of insurance evidencing those policies set forth in Section 9.9, FPL INSURANCE POLICIES. As it applies to this Agreement, FPL shall provide that the insurance required pursuant to Section 9.9, FPL INSURANCE POLICIES, shall, except for Workers' Compensation, name Contractor and its Subcontractors as additional insureds thereunder only as their respective interests may appear but only with respect to Work performed pursuant to the Agreement.

9.10.2 Contractor shall be responsible for the payment of all deductibles for such claims caused, directly or indirectly, through the acts or omissions of Contractor, any Affiliate thereof, any Subcontractor or Vendor, or anyone directly or indirectly employed by any of them, or anyone for whose acts such Person may be liable.

HEARING EXHIBIT - 00000070
FCRC-08-2894

9.11 CONTRACTOR'S ASSISTANCE

In the event a loss is sustained under any of FPL's policies, such loss will be adjusted by FPL and/or the Financing Parties with the insurance companies. Contractor will assist FPL and the Financing Parties in the adjustment of losses. In the event a loss is sustained under the Builder's Risk Policy, such loss will be adjusted by Contractor and FPL with the insurance companies. FPL and Contractor agree to waive all rights of recovery against each other, and shall cause their respective underwriters to waive all rights of subrogation, for damages caused by fire and/or other perils to the extent covered and paid for by the Cargo Insurance. Contractor shall cooperate with FPL in obtaining and maintaining the insurance policies of FPL and shall provide all Drawings, Final Plans, certificates and other information that FPL or its insurers may reasonably require. Upon FPL's reasonable request, Contractor shall with all due diligence comply with the conditions of FPL's insurance polices and all reasonable requirements of the insurers in connection with the settlement of claims, the recovery of losses and the prevention of accidents and shall bear at its own cost the consequences of any failure to do so.

9.12 RESPONSIBILITY FOR SAFE DELIVERY OF MATERIALS OF CONTRACTOR

In addition to Section 8.2., RISK OF LOSS, of Article VIII, RISK OF LOSS AND POSSESSION, Contractor shall comply with all warranty requirements or other requirements set forth in all policies, including transport or marine/inland marine cargo insurance policies.

9.13 NO LIMITATION ON LIABILITY

Nothing in this Article shall be deemed to limit Contractor's liability under the Contract Documents regardless of the insurance coverages required by this Article. Except for the coverage limits of liability for insurance companies set forth in Section 9.1, CONTRACTOR INSURANCE POLICIES, no limitation of liability provided to Contractor under the Contract Documents is intended nor shall run to the benefit of any insurance company or in any way prejudice, alter, diminish, abridge or reduce, in any respect, the amount of proceeds of insurance otherwise payable to FPL or the Financing Parties under coverage required to be carried by Contractor under the Contract Documents, it being the intent of the Parties that the full amount of insurance coverage bargained for be actually available notwithstanding any limitation of liability contained in the Contract Documents, if any. FPL assumes no responsibility for the solvency of any insurer or the failure of any insurer to settle any claim.

9.14 FPL CONTROLLED INSURANCE PROGRAM

FPL and Contractor agree that FPL may substitute its own Owner's Controlled Insurance Program ("OCIP") for the purpose of providing during the term of the Agreement Worker's Compensation insurance, Commercial General Liability insurance and other insurance requested by FPL that is typically covered by OCIPs. In such event, FPL shall procure and pay the costs for certain insurance coverages on behalf of Contractor and Subcontractors.

ARTICLE X.
SYNCHRONIZATION, TESTS, MECHANICAL COMPLETION, PROVISIONAL ACCEPTANCE AND FINAL ACCEPTANCE

10.1 GENERAL.

10.1.1 All start-up, synchronization, operation and testing conducted by Contractor shall be in accordance with the Contract Documents, applicable manufacturers' instructions and warranty requirements, Applicable Laws, Applicable Standards, Applicable Permits, Prudent Utility Practices and any and all applicable rules as agreed to by FPL and Contractor. Contractor shall provide FPL with at least thirty (30) days' advance written notice of the first Test that involves delivering energy to the Grid. In addition, no Test of the Plant that delivers electrical output shall be conducted unless Contractor gives prior written notice thereof as provided in Section 10.1.2, Test Notice. FPL, Financing Parties, the Utility, the Independent Engineer, all relevant Government Authorities and their respective authorized representatives shall have the right to inspect the Work and to be present during the start-up, synchronization, operation and testing of the Project pursuant to this Article.

ECRC-08-2895 HEARING EXHIBIT - 00000071

10.1.2 Test Notice.

(a) Prior to performing any Test, Contractor shall deliver to FPL a written notice thereof (a "Test Notice") specifying a date for commencement of any or all of the Tests. Contractor shall coordinate with FPL the scheduling of any Test and FPL shall coordinate such Test with the dispatch schedule for the Plant, so as not to interfere with FPL's or its Affiliates' obligations with respect thereto. Contractor shall deliver a Test Notice at least ten (10) Business Days prior to the commencement of any Test. FPL shall, within five (5) Business Days after its receipt of such Test Notice, deliver to Contractor a written notice:

(i) Accepting such Test Notice; or

(ii) Denying that the prerequisites for performing such Test have been completed and stating the facts upon which such reasonable denial is based.

(b) Upon receipt of notice denying that the prerequisites for performing such Test have been completed, Contractor shall take such action as is appropriate to remedy the conditions described in such notice from FPL. Following any such remedial action, Contractor shall deliver to FPL a new Test Notice conforming to the requirements of this Section 10.1.2, and the provisions of this Section 10.1.2, shall apply with respect to such new Test Notice in the same manner as they applied with respect to the original Test Notice.

(c) The foregoing procedure shall be repeated as often as necessary until FPL no longer rejects the Test Notice; provided, however, if Contractor is required to notify following receipt of FPL's written notice in which FPL denies that the prerequisites for performing a task have been completed, such renotification may be given within five (5) Business Days of such notice by FPL, and FPL shall have three (3) Business Days following the receipt of such resubmitted notice to file written objections as described above. Contractor shall reschedule Tests as requested by FPL to reasonably accommodate the schedules of Persons whom FPL deems necessary to attend the Tests. Contractor shall promptly notify FPL of any proposed change in the schedule of Tests and may not conduct any such test under such proposed changed schedule unless FPL receives reasonable advance notice of the actual date of commencement of such rescheduled test. FPL shall be responsible for notifying the Utility, the Financing Parties and the Independent Engineer for witnessing Tests. Contractor shall reimburse FPL for all additional direct costs reasonably and necessarily incurred by FPL due to Contractor's failure to provide written notice in accordance with this Section 10.2, or due to Contractor's failure to prepare any portion of the Work for inspections or testing after having provided notice to FPL of any such inspection or test.

10.2 SYNCHRONIZATION

Together with the notice of the Scheduled Synchronization Date, Contractor shall provide FPL a start-up and test schedule for the Project and copies of all manufacturers' specifications, schedules of protection schemes, and protection relay settings. Contractor shall promptly give FPL notice of any expected change in the Scheduled Synchronization Date or other information provided with the notice as described above (or any modifications thereto); provided that Contractor shall provide at least ten (10) days prior written notice of the actual synchronization date. Contractor shall perform the synchronization procedures in accordance with the Scope of Work and FPL's direction regarding Utility's requirements. Utility and its authorized representatives shall have the right to be present during the synchronization.

10.3 MECHANICAL COMPLETION

Upon satisfaction of all requirements for Mechanical Completion, Contractor shall provide FPL with a notice of Mechanical Completion. Within three (3) Business Days of receipt of such notice, FPL shall notify Contractor in writing whether or not Contractor has fulfilled the requirements of Mechanical Completion. If Contractor has not fulfilled such requirements for Mechanical Completion, FPL shall specify in such notice to Contractor in reasonable detail the reasons that the requirements for Mechanical Completion have not been met. Contractor shall promptly act to correct such deficiencies so as to achieve Mechanical Completion as soon as possible (and no later than by the applicable date set forth in Appendix C, Critical Milestones and

ECRC-08-2896 HEARING EXHIBIT - 00000072

Milestones, if such date has not already passed). Following any such remedial action, Contractor shall deliver to FPL a new notice of Mechanical Completion and the provisions of this Section 10.3, shall apply with respect to such new Mechanical Completion notice in the same manner as they applied to the original Mechanical Completion notice so long as, if the Guaranteed Provisional Acceptance Date shall have passed, Contractor is paying Schedule Liquidated Damages when due in accordance with Article XI, CONTRACTOR GUARANTEES AND LIQUIDATED DAMAGES.

10.4 PERFORMANCE TESTS

10.4.1 Contractor is responsible for conducting the Tests and any required re-tests for the purposes of determining achievement of the Minimum Performance Level and the Final Acceptance Performance Level. Only after the Project:

(a) Has achieved Mechanical Completion;

(b) Has been synchronized with the Grid in accordance with the Scope of Work and Utility's requirements;

(c) Is capable of being operated safely, normally, reliably and continuously in accordance with the requirements of the Contract Documents at all operating conditions and modes specified in the Scope of Work (although minor portions of the Project not essential to its safe, continuous and reliable operation may remain to be completed); and

(d) Is ready for the Tests to be performed in accordance with the Contract Documents,

shall Contractor conduct the Tests.

10.4.2 Each Test shall be conducted in accordance with the terms of the Contract Documents, including the Scope of Work and Appendix HH, after complying with the notice provisions of Section 10.1.2, Test Notice. If the Project achieves the Minimum Performance Level, Contractor shall, upon satisfaction of the other requirements to Provisional Acceptance, submit a notice of Provisional Acceptance in accordance with Section 10.7, PROVISIONAL ACCEPTANCE. If the Project fails all or any part of the Tests, including, without limitation, the failure to achieve the Minimum Performance Level, Contractor shall take appropriate corrective action and the Tests shall be performed again. If the Project fails all or any part of the retest, Contractor shall take appropriate corrective action and the Tests shall be repeated. If Contractor fails to achieve the Minimum Performance Level and satisfy all of the other requirements of Provisional Acceptance on or prior to the Guaranteed Provisional Acceptance Date, Contractor shall pay Schedule Liquidated Damages in accordance with Section 11.2, SCHEDULE LIQUIDATED DAMAGES, of Article XI, CONTRACTOR GUARANTEES AND LIQUIDATED DAMAGES. In addition, Contractor shall repeat the Tests in accordance with Section 11.6.1 during the applicable time periods set forth in Section 11.1, COMPLETION GUARANTEE, of Article XI, CONTRACTOR GUARANTEES AND LIQUIDATED DAMAGES. Contractor shall provide a written report of the results of each Test to FPL.

10.5 PERFORMANCE SHORTFALLS.

10.5.1 Prior to the Guaranteed Provisional Acceptance Date, if the Project has achieved the Minimum Performance Level necessary for Provisional Acceptance, as determined pursuant to Section 11.6, DETERMINATION OF PERFORMANCE, of Article XI, CONTRACTOR GUARANTEES AND LIQUIDATED DAMAGES (but not the Final Acceptance Performance Level), and the Project is capable of being operated safely, normally and continuously in accordance with the requirements of the Contract Documents at all operating levels specified in the Scope of Work (although minor portions of the Project not essential to its safe, continuous and reliable operation may remain to be completed), and after complying with the notice provisions of Section 10.1.2, Test Notice, Contractor may conduct the Tests again in accordance with the terms of the Contract Documents, including the Scope of Work, in order to attempt to achieve the Final Acceptance Performance Level. If the Project fails to achieve all or any part of the Final Acceptance Performance Level after the Guaranteed Provisional Acceptance Date, Contractor shall, subject to Contractor's rights set forth in the following sentence, submit a Remedial Plan reasonably acceptable to FPL and take appropriate corrective action and repeat the Tests. If the Project fails all or any part of the

ECRC-08-2897 HEARING EXHIBIT - 00000073

Final Acceptance Performance Level after the Guaranteed Provisional Acceptance Date but all other requirements for Final Acceptance have been met, including the achievement of the Minimum Performance Level, Contractor shall have the option of:

(a) Submitting a Remedial Plan reasonably acceptable to FPL and take appropriate corrective action and repeat the Tests; or

(b) Giving notice to FPL of its declaration of Final Acceptance and reducing the Contract Price based on the results of the last Guaranteed Performance Test performed (and during which the Noise Guarantee was simultaneously satisfied) prior to the issuance of such notice.

If Contractor selects option (b), above, (i) the Contract Price will be reduced to an amount equal to the Contract Price multiplied by the Payment Output Percentage and (ii) Contractor shall perform all Remediation Work requested by FPL related to Work not associated with the percentage of the Final Acceptance Performance Level that has been achieved. For example, if 75% of the Final Acceptance Performance Level is achieved, to the extent requested by FPL, Work not associated with achieving such 75% of the Final Acceptance Performance Level (such Work being referred to as the "Non-Accepted Work") shall be removed from the Property Site and the Property Site on which such Non-Accepted Work is located or performed shall be restored to the condition of the Property Site immediately prior to Initial Site Mobilization to the extent requested by FPL.

10.5.2 Notwithstanding the foregoing and subject to the terms and conditions contained herein, Contractor may repeat the Tests until the earliest of the:

(a) Date that is one hundred and eighty (180) days after the Guaranteed Provisional Acceptance Date;

(b) Achievement by Contractor of the Final Acceptance Performance Level; or

(c) Delivery by Contractor to FPL of Contractor's notice of declaration of Final Acceptance and reduction of the Contract Price in accordance with Section 10.5.1.

Contractor shall provide a written report of the results of each Test to FPL. The Minimum Performance Level, the Final Acceptance Performance Level and any other Net Energy Output used to calculate any reduction of Contract Price shall be achieved only while the Plant is operating in compliance with the Noise Guarantee (excluding for this purpose all waivers and variances permitted under Applicable Permits).

10.5.3 If the Final Acceptance Performance Level is not achieved within one hundred and eighty (180) days after the Guaranteed Provisional Acceptance Date and Contractor has not selected option (b) of Section 10.5.1, then the Contract Price will be automatically reduced to an amount equal to the Contract Price multiplied by the Payment Output Percentage, which Payment Output Percentage shall be based on the results of the last Guaranteed Performance Test performed (and during which the Noise Guarantee was simultaneously satisfied) prior to one hundred and eighty (180) days after the Guaranteed Provisional Acceptance Date.

10.5.4 At no time between the Provisional Acceptance Date and Final Acceptance shall the performance of the Project fall below the Minimum Performance Level, for reasons not due to FPL's operation of the Project or a Force Majeure Event.

10.6 PUNCH LIST.

10.6.1 At all times during performance of the Work, Contractor shall maintain a list setting forth parts of the Work which remain to be performed in order to confirm that the Work fully complies with the terms of the Contract Documents. Contractor shall promptly provide a copy of such list to FPL upon request. Contractor shall make such revisions to such list as and when requested by FPL from time to time.

10.6.2 No later than thirty (30) days before the Provisional Acceptance Date, Contractor shall prepare and submit to FPL a comprehensive list (the "Punch List") of items to be completed for the Project to reach Final Acceptance. The Punch List shall not include any item that affects the safety, reliability or operability of the Equipment, the Plant or any portion thereof or requires a shut-down or reduced operation of the

ECRC-08-2898 HEARING EXHIBIT - 00000074

Equipment, the Project or any portion thereof to be completed. Contractor shall make such revisions to the Punch List as and when reasonably requested by FPL from time to time.

10.6.3 The Parties agree that with respect to Punch List items that remain uncompleted and which are preventing Final Acceptance, it may be more expedient for FPL to complete such Punch List items, at its election and option. If the Parties are able to agree upon the commercial value of all items on the Punch List, and FPL so elects, at its sole discretion, FPL may, in lieu of requiring Contractor to complete any item on the Punch List, require Contractor to pay to FPL an amount equal to one hundred fifty percent (150%) of the commercial value of such Punch List item as reasonably determined by FPL. FPL shall have the right to offset such amount owed by Contractor against any amounts owed by FPL to Contractor at Final Acceptance, or otherwise under the Contract Documents.

10.7 PROVISIONAL ACCEPTANCE.

10.7.1 After completing the Tests in accordance with Section 10.4, TESTS, and Contractor determines that all of the requirements for Provisional Acceptance have been completed, Contractor shall provide written notice thereof to FPL.

10.7.2 Within three (3) Business Days following receipt by FPL of such notice of Provisional Acceptance, FPL shall notify Contractor in writing whether or not Contractor has fulfilled the requirements of Provisional Acceptance. If Contractor has fulfilled the requirements of Provisional Acceptance, FPL shall notify Contractor that it has achieved Provisional Acceptance. If Contractor has not fulfilled such requirements for Provisional Acceptance, FPL shall specify in such notice to Contractor in reasonable detail the reasons for determining that the requirements for Provisional Acceptance have not been met. Contractor shall promptly act to correct such deficiencies so as to achieve Provisional Acceptance as soon as possible (and no later than by the Guaranteed Provisional Acceptance Date if such date has not already passed). Following any such remedial action, Contractor shall deliver to FPL a new notice of Provisional Acceptance and the provisions of this Section 10.7.2, shall apply with respect to such new Provisional Acceptance notice in the same manner as they applied to the original Provisional Acceptance notice. The foregoing procedure shall be repeated as often as necessary, so long as Contractor is paying when due Schedule Liquidated Damages (if applicable), until acceptance by FPL of Contractor's Provisional Acceptance notice and delivery by FPL of its own notice to Contractor that Provisional Acceptance has been achieved. The date on which Provisional Acceptance is achieved by Contractor shall be the "Provisional Acceptance Date."

10.8 FINAL ACCEPTANCE OF THE PLANT

After achieving Provisional Acceptance in accordance with Section 10.7, PROVISIONAL ACCEPTANCE, when Contractor determines that all of the requirements for Final Acceptance have been completed (other than execution of the Final Acceptance Certificate by FPL), or when Contractor has elected to or is required to declare Final Acceptance pursuant to Section 10.5, PERFORMANCE SHORTFALLS, Contractor shall submit a proposed Final Acceptance Certificate, in substantially the form attached hereto as Appendix G, Form of Final Acceptance Certificate, to FPL. As soon thereafter as reasonably practicable, a team consisting of representatives of FPL, the Financing Parties, the Independent Engineer and Contractor shall make a final inspection of the Plant. Within ten (10) Business Days following such final inspection, FPL, with the consent of the Financing Parties, if applicable, shall notify Contractor in writing whether Contractor has fulfilled the requirements of the Contract Documents to reach Final Acceptance (other than execution of the Final Acceptance Certificate by FPL). If such requirements have been fulfilled, FPL will execute the proposed Final Acceptance Certificate. If the requirements for Final Acceptance have not been fulfilled, then FPL shall deliver a written notice to such effect to Contractor describing in reasonable detail the deficiencies noted and corrective action recommended, including projected target dates for the completion of such incomplete or remedial Work. Contractor shall promptly act to correct any such deficiencies. The procedure set forth in this Section 10.8, shall be repeated as necessary, until the earlier of: (i) the date on which Contractor has fulfilled the requirements for the issuance of the Final Acceptance Certificate and FPL executes such certificate; or (ii) termination of this Agreement.

HEARING EXHIBIT - 00000075
ECRC-08-0899

benefit of Contractor, in such order as FPL may elect in its sole discretion. In addition, FPL, in its sole discretion, may collect Schedule Liquidated Damages by drawing on the Letter of Credit if not timely paid by Contractor.

11.6 DETERMINATION OF PERFORMANCE.

11.6.1 Contractor's compliance with the Minimum Performance Level for purposes of achieving Provisional Acceptance shall be determined on the basis of the Tests conducted in accordance with Article X, SYNCHRONIZATION, TESTS, MECHANICAL COMPLETION, PROVISIONAL ACCEPTANCE AND FINAL ACCEPTANCE, and Appendix HH, and the results of such Tests shall be conclusive for such purpose. The Net Energy Output of the Plant shall be determined pursuant to the Guaranteed Performance Test and shall be measured while the Plant is operating in compliance with the Noise Guarantee (excluding for this purpose all waivers and variances permitted under Applicable Permits).

11.6.2 Contractor's compliance with the Minimum Performance Level and the Guaranteed Performance Level, or the extent of its failure to comply therewith, for purposes of achieving Final Acceptance shall be determined on the basis of the Tests conducted in accordance with Article X, SYNCHRONIZATION, TESTS, MECHANICAL COMPLETION, PROVISIONAL ACCEPTANCE AND FINAL ACCEPTANCE, and Appendix HH, and the results of such tests shall be conclusive for such purpose. The Net Energy Output of the Plant shall be determined pursuant to the Guaranteed Performance Test and shall be measured while the Plant is operating in compliance with the Noise Guarantee (excluding for this purpose all waivers and variances permitted under Applicable Permits).

11.7 ABSOLUTE OBLIGATIONS

The Parties understand and agree that Contractor's obligation to achieve the Minimum Performance Level simultaneously with achievement of the Noise Guarantee, is an absolute obligation, which must be achieved. Notwithstanding anything contained herein to the contrary, after the Project has achieved Provisional Acceptance and during the time period prior to Final Acceptance, the Project shall be capable of being operated in accordance with all of the Plant's operating procedures and all Applicable Laws, Applicable Permits and the other requirements of the Contract Documents, and all operating conditions specified in the Scope of Work, excluding for this purpose all waivers and variances permitted under Applicable Permits. The obligations set forth in this Section 11.7 are absolute obligations of Contractor regardless of the amounts and expenses required to be incurred by Contractor to satisfy such obligation, and notwithstanding that such amounts may exceed the Contract Price.

11.8 PARENT GUARANTY

Contractor's ultimate corporate parent is SunPower Corporation (the "Contractor Parent Company"). Concurrently with the execution of this Agreement, Contractor shall provide to FPL an irrevocable, unconditional guarantee in the form of Appendix I, Form of Contractor Parent Guaranty, duly executed by Contractor Parent Company for the benefit of FPL and the Financing Parties under terms and conditions acceptable to FPL and the Financing Parties ("Contractor Parent Guaranty"). In order to provide FPL and the Financing Parties with evidence of Contractor's and Contractor Parent Company's financial ability to complete the Project, Contractor agrees to comply with reasonable requests for financial information. After the Letter of Credit Termination Date, upon the occurrence of a Credit Trigger Event, at FPL's request, Contractor shall provide a Letter of Credit with a stated amount (or post other collateral, including cash in an amount) determined pursuant to paragraph 3 of Appendix E attached hereto in addition to the Contractor Parent Guaranty.

ARTICLE XII.
CONTRACTOR'S WARRANTIES

12.1 WARRANTIES.

12.1.1 Contractor warrants to FPL that all Equipment shall:

(a) Be new and of good quality;

HEARING EXHIBIT - 00000076
FCRC-08-2903

12.2.2 If Contractor fails to commence to complete the correction of any Defect or cure of any breach of warranty as required herein within five (5) days after receipt of notice from FPL to perform such obligations or thereafter fails to diligently continue to complete such corrections or cure, then FPL may correct (or cause to be corrected) such Defect or cure (or cause to be cured) such breach of warranty and Contractor shall be liable for all reasonable costs, charges, and expenses incurred by FPL in connection therewith (including attorneys' and other consultants' fees), and Contractor shall, within fifteen (15) days after request therefor, pay to FPL an amount equal to such costs, charges, and expenses. Any such request by FPL shall be accompanied by proper documentation evidencing such costs, charges and expenses. Such correction of a Defect or cure of a breach of warranty by FPL (or caused by FPL) shall be deemed performed by Contractor and the Warranty Period applicable thereto for such corrected or cured Work shall be extended in accordance with Section 12.1.4.

12.2.3 If, during the a given Warranty Period, Contractor shall change, repair or replace any Major Equipment item or component, FPL, in its reasonable discretion, may require Contractor to conduct and satisfactorily complete any test required by FPL with respect to the affected Equipment; provided, however, in connection with any performance of a test pursuant to this Section 12.2.3, appropriate allowance with respect to the performance of such Equipment shall be made for the fact that such Equipment may have operated prior thereto. If after running such test pursuant to this Section, the results indicate a degradation in the performance of the Project (as measured against the test results used to satisfy the requirements of Section 12.1.3) or the Project fails to satisfy any other Test, then Contractor shall repair, correct or replace such affected Equipment and re-run such test until the Project performs at a level consistent with the performance of the Project immediately prior to the change, repair or replacement of such Equipment.

12.3 PROPRIETARY RIGHTS

Without limiting any of the provisions of this Agreement, if FPL or Contractor is prevented from completing the Plant, the Work or any part thereof, or from the use, operation, or enjoyment of the Plant, the Work or any part thereof as a result of a claim, action or proceeding by any Person for unauthorized disclosure, use, infringement or misappropriation of any Intellectual Property Right arising from Contractor's performance (or that of its Subcontractors or Vendors) under the Contract Documents, including, without limitation, the Work, Equipment, the Contractor Deliverables or other items and services provided by Contractor or any Subcontractor or Vendor hereunder, Contractor shall promptly, but in no event later than thirty (30) days from the date of any action or proceeding, take all actions necessary to remove such impediment, including:

12.3.1 Secure termination of the injunction and procure for FPL or its Affiliates or assigns, as applicable, the right to use such materials, Equipment or Contractor Deliverables in connection with the operation and maintenance of the Project, without obligation or liability; or

12.3.2 Replace such materials, Equipment or Contractor Deliverables, with a non-infringing equivalent, or modify same to become non-infringing,

All at Contractor's sole expense, but subject to all the requirements of the Contract Documents.

12.4 REPAIRS AND TESTING BY FPL.

12.4.1 During the Warranty Period, without prior notice to Contractor and without affecting the warranties of Contractor hereunder, FPL shall be permitted to:

(a) Make repairs or replacements on Equipment so long as the repair or replacement involves the correct installation of spare parts and is otherwise conducted in accordance with the operation and maintenance manuals, the manufacturer specifications and the Procedures Manual; and

(b) Adjust or test Equipment as outlined in the instruction manuals provided by Contractor or any Subcontractor or Vendor.

12.4.2 In the event of an emergency and if, in the reasonable judgment of FPL, the delay that would result from giving notice to Contractor could cause serious loss or damage which could be prevented by immediate action, any action (including correction of Defects) may be taken by FPL or a third party chosen by FPL, without giving prior notice to Contractor, and in the case of a Defect, the reasonable cost of correction shall

ECRC-08-2907 HEARING EXHIBIT - 00000077

be paid by Contractor. In the event such action is taken by FPL, Contractor shall be promptly notified within five (5) Business Days after correction efforts are implemented, and shall assist whenever and wherever possible in making the necessary corrections.

12.5 VENDORS AND SUBCONTRACTORS

Contractor shall, for the protection of Contractor and FPL, obtain from the Vendors and Subcontractors such guarantees and warranties with respect to Work performed and Equipment supplied, used and installed hereunder as are reasonably obtainable, which guarantees and warranties shall equal or exceed those set forth in Section 12.1, WARRANTIES, and shall be made available and assignable to FPL and the Financing Parties to the full extent of the terms thereof upon the expiration of Contractor's warranty hereunder. FPL shall be an express third party beneficiary of all such guarantees and warranties. All such warranties obtained shall be in addition to, and shall not alter the warranties of, Contractor. Upon FPL's request, Contractor shall use all reasonable efforts to force Subcontractors to honor warranties including, but not limited to, filing suit to enforce same. To the extent available, FPL shall have the right to require Contractor to secure additional warranty or extended guarantee protection pursuant to a Change Order issued in accordance with the provisions of Article VI, CHANGE ORDERS. Upon the earlier of the Provisional Acceptance Date or termination of this Agreement, Contractor shall deliver to FPL copies of all relevant contracts providing for such guarantees and warranties.

12.6 ASSIGNMENT OF WARRANTIES

Upon the expiration of all of the Warranty Periods or termination of this Agreement, Contractor shall assign to FPL all warranties received by it from Subcontractors and Vendors or otherwise obtained under Section 12.5, VENDORS AND SUBCONTRACTORS (or the Plant or Work in the event of termination of this Agreement). Such assignment of warranties to FPL must also allow FPL to further assign such warranties. However, in the event that FPL makes any warranty claim against Contractor with respect to Equipment or services supplied in whole or in part by any Subcontractor or Vendor, and Contractor fulfills its obligations with respect to such claim by FPL, Contractor shall be entitled to enforce for its own benefit any warranty given by such Subcontractor or Vendor with respect to such Equipment and services.

12.7 SURVIVAL OF WARRANTIES

The provisions of this Article shall survive the expiration or termination of this Agreement.

ARTICLE XIII.
REPRESENTATIONS

13.1 REPRESENTATIONS AND WARRANTIES.

13.1.1 Contractor represents and warrants to FPL that:

(a) Contractor is a corporation, duly organized, validly existing, and in good standing under the laws of the State of Delaware and is duly authorized and qualified to conduct business in the State of Florida;

(b) Contractor has all requisite power and authority to conduct its business, own its properties and execute and deliver this Agreement and perform its obligations hereunder in accordance with the terms hereof;

(c) The execution, delivery, and performance of the Contract Documents have been duly authorized by all requisite corporate action and this Agreement constitutes the legal, valid and binding obligation of Contractor, enforceable against Contractor in accordance with its terms;

(d) Neither the execution, delivery or performance of the Contract Documents conflicts with, or results in a violation or breach of the terms, conditions or provisions of, or constitutes a default under, the organizational documents of Contractor or any agreement, contract, indenture or other instrument under which Contractor or its assets are bound, nor violates or conflicts with any Applicable Law or any judgment, decree, order, writ, injunction or award applicable to Contractor;

ECRC-08-2908 HEARING EXHIBIT - 00000078

(e) Contractor is not in violation of any Applicable Law or Applicable Permit, which violations, individually or in the aggregate, would affect its performance of its obligations under the Contract Documents;

(f) Except as described in Section 18.21, Contractor's License, Contractor is the holder of all governmental consents, licenses, permissions and other authorizations and Applicable Permits required to operate and conduct its business now and as contemplated by the Contract Documents, other than Contractor Permits and FPL Permits which will be obtained in accordance with the terms of the Contract Documents;

(g) There is no pending controversy, legal action, arbitration proceeding, administrative proceeding or investigation instituted, or to the best of Contractor's knowledge threatened, against or affecting, or that could affect, the legality, validity and enforceability of the Contract Documents or the performance by Contractor of its obligations under the Contract Documents, nor does Contractor know of any basis for any such controversy, action, proceeding or investigation;

(h) Contractor has examined this Agreement, including all Appendices attached hereto, thoroughly and become familiar with all its terms and provisions;

(i) Contractor, by itself and through its Subcontractors and Vendors, has the full experience and proper qualifications to design and perform the Work and to construct the Plant in accordance with the terms of the Contract Documents;

(j) Contractor has visited and examined the Property Site and is fully familiar with such Property Site and surrounding area and based on such visit and examination has no reason to believe that Contractor will be unable to complete the Work in accordance with the Contract Documents;

(k) To the best of its knowledge, Contractor has reviewed all other documents and information necessary and available to Contractor in order to ascertain the nature, location and scope of the Work, the character and accessibility of the Property Site, the existence of obstacles to construction of the Plant and performance of the Work, the availability of facilities and utilities, and the location and character of existing or adjacent work or structures;

(l) Contractor owns or has the right to use all patents, trademarks, service marks, tradenames, copyrights, licenses, franchises, permits and intellectual property rights necessary to perform the Work without conflict with the rights of others;

(m) Each of Contractor and the Contractor Parent Company is financially solvent, able to pay its debts as they mature, and possessed of sufficient working capital to complete its obligations under this Agreement;

(n) FPL may provide or may have provided Contractor with copies of certain studies, reports or other information (including oral statements) and Contractor represents and acknowledges that:

  (i) All such documents or information have been or will be provided as background information and as an accommodation to Contractor;

  (ii) FPL makes no representations or warranties with respect to the accuracy of such documents or the information (including oral statements) or opinions therein contained or expressed; and

  (iii) It is not relying on FPL for any information, data, inferences, conclusions, or other information with respect to the Job Site (other than the boundary survey referred to in Section 4.7, DESCRIPTION OF PROPERTY SITE), including the surface conditions of the Job Site and the surrounding areas;

(o) All Persons who will perform any portion of the Work have and will have all business and professional certifications required by Applicable Law to perform their respective services under this Agreement;

ECRC-08-2909 HEARING EXHIBIT - 00000079

(p) The access rights granted to or obtained by Contractor to the Job Site are adequate for the performance of the Work and operation of the Plant; and

(q) The Plant will be designed and constructed to achieve or exceed the Net Energy Output Guarantee.

13.1.2 FPL represents and warrants to Contractor that:

(a) FPL is a corporation, duly organized, validly existing, and in good standing under the laws of Florida and is duly authorized and qualified to conduct business in the State of Florida;

(b) FPL has all requisite power and authority to conduct its business, own its properties and execute and deliver the Contract Documents and perform its obligations hereunder in accordance with the terms hereof;

(c) The execution, delivery, and performance of the Contract Documents have been duly authorized by all requisite corporation action and this Agreement constitutes the legal, valid and binding obligation of FPL, enforceable against FPL in accordance with its terms;

(d) Neither the execution, delivery or performance of the Contract Documents conflicts with, or results in a violation or breach of the terms, conditions or provisions of, or constitutes a default under, the organizational documents of FPL or any agreement, contract, indenture or other instrument under which FPL or its assets are bound, nor violates or conflicts with any Applicable Law or any judgment, decree, order, writ, injunction or award applicable to FPL;

(e) FPL is not in violation of any Applicable Law or Applicable Permit, which violations, individually or in the aggregate, would affect its performance of its obligations under the Contract Documents; and

(f) FPL is the holder of all governmental consents, licenses, permissions and other authorizations and Applicable Permits required to operate and conduct its business now and as contemplated by the Contract Documents, other than FPL Permits which will be obtained in accordance with the terms of the Contract Documents.

13.2 SURVIVAL OF REPRESENTATIONS AND WARRANTIES

The representations and warranties of the Parties herein shall survive execution and termination of this Agreement.

ARTICLE XIV.
FORCE MAJEURE AND FPL CAUSED DELAY

14.1 DEFINITION OF FORCE MAJEURE EVENT

14.1.1 As used herein, the term "Force Majeure Event" shall mean any event or circumstance, or combination of events or circumstances, that arises after the date hereof, is beyond the reasonable control of the Party claiming the Force Majeure Event, is unavoidable or could not be prevented or overcome by the reasonable efforts and due diligence of the Party claiming the Force Majeure Event and has an impact which will actually, demonstrably, adversely and materially affect such Party's ability to perform its obligations in accordance with the terms of the Contract Documents or has an impact which will actually, demonstrably, adversely and materially affect the Critical Path of the Work and performance of its obligations in accordance with the terms of the Contract Documents. Without limiting the generality of the foregoing, events that may give rise to a Force Majeure Event include, without limitation:

(a) Acts of God;

(b) Natural disasters;

(c) Fires;

(d) Earthquakes;

(e) Lightning;

ECRC-08-2910 HEARING EXHIBIT - 00000080

(f) Floods;

(g) Storms;

(h) Civil disturbances;

(i) Terrorism;

(j) Riots;

(k) War; and

(l) The action of or failure to act on the part of any Government Authority having or asserting jurisdiction that is binding upon the Parties and has been opposed by all reasonable means,

In each case, that meet the definition of Force Majeure Event as set forth above.

14.1.2 Notwithstanding the foregoing, the term "Force Majeure Event" does not include, without limitation:

(a) Strikes, work stoppages (or deteriorations), slowdowns or other labor actions, unless such strike, work stoppage or other labor action is a result of strike, work stoppage or other labor action originated by employees of the Party not claiming the Force Majeure Event;

(b) Any labor or manpower shortages;

(c) Unavailability, late delivery, failure, breakage or malfunction of equipment or materials or events that affect the cost of equipment or materials;

(d) Economic hardship (including lack of money);

(e) Perils of sea;

(f) Delays in transportation (including delays in clearing customs) other than delays in transportation resulting from accidents or closure of roads or other transportation route by Government Authorities;

(g) Changes in Applicable Laws;

(h) Weather conditions normally experienced in the geographic area of the Project, it being the intent of the Parties that only when the number of days lost as a result of adverse weather (as reported by the National Weather Service or a similar agency) exceeds the number usually encountered in the geographic area of the Project for any given month based on a ten (10) year average (as reported by the National Weather Service or a similar agency) will Contractor be allowed to claim a Force Majeure Event, subject however to the other requirements for an event or occurrence to be Force Majeure Event and the other requirements set forth in this Article;

(i) Actions of a Government Authority with respect to Contractor's compliance with Applicable Laws or Applicable Permits;

(j) Any failure by Contractor to obtain and/or maintain any Applicable Permit it is required to obtain and/or maintain hereunder;

(k) Any other act, omission, delay, default or failure (financial or otherwise) of a Subcontractor or Vendor; or

(l) Any surface or subsurface conditions at the Property Site (subject to Contractor's rights as provided in Section 3.4.4, Differing Condition, of Article III, CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR).

14.1.3 Notwithstanding the foregoing and solely for the purpose of conducting the acceptance testing provided for in Section 2 of Appendix HH – Acceptance Testing, the term "Force Majeure Event" includes solar conditions that do not meet the express criteria set forth in in Section 2 of Appendix HH – Acceptance

FCRC-08-2911 HEARING EXHIBIT - 00000081

Testing, subject however to the other requirements for an event or occurrence to be Force Majeure Event and the other requirements set forth in this Article.

14.2 NOTICE OF FORCE MAJEURE EVENT

The Party claiming a Force Majeure Event shall within five (5) Business Days after it knows or should have known of the occurrence of the Force Majeure Event (or in any event, no later than twenty (20) days after the commencement of the Force Majeure Event), give the other Party written notice describing the details of the cause and nature of the Force Majeure Event, the anticipated length of delay due to the Force Majeure Event and any other affect on the Party's performance of its obligations hereunder; provided that if the Force Majeure Event results in a breakdown of communications rendering it not reasonably practicable to give notice within the applicable time limit specified herein, then the Party claiming a Force Majeure Event shall give such notice as soon as reasonably practicable after the reinstatement of communications, but no later than five (5) Business Days after such reinstatement. Within fifteen (15) days after initial notification, such Party shall provide sufficient proof of the occurrence and duration of such Force Majeure Event to the other Party and shall thereafter provide the other Party with periodic supplemental updates to reflect any change in information given to the other Party as often as requested by the other Party. The Party claiming the Force Majeure Event shall give notice to the other Party of: (i) the cessation of the relevant Force Majeure Event; and (ii) the cessation of the effects of such Force Majeure Event on the performance by it of its obligations under the Contract Documents as soon as practicable after becoming aware thereof. No Force Majeure Event shall relieve any Party from performing those of its obligations that are not affected by the Force Majeure Event.

14.3 DELAY FROM FORCE MAJEURE EVENT

14.3.1 So long as the conditions set forth in this Section 14.3 are satisfied, and subject to Section 14.7, PERFORMANCE NOT EXCUSED, neither Party shall be responsible or liable for, or deemed in breach of this Agreement because of, any failure or delay in complying with its obligations under or pursuant to the Contract Documents to the extent that such failure has been caused, or contributed to, by one or more Force Majeure Events or its effects or by any combination thereof, and in such event:

(a) Except as otherwise provided herein, the performance by the Party claiming the Force Majeure Event of its obligations hereunder shall be suspended, and in the event that such Party is required to start or complete an action during a specific period of time, such start date or period for completion shall be extended, on the condition that:

(i) Such suspension of performance and extension of time shall be of no greater scope and of no longer duration than is required by the effects of the Force Majeure Event;

(ii) The Party claiming the Force Majeure Event complies with Section 14.2, NOTICE OF FORCE MAJEURE EVENT; and

(iii) The Party claiming the Force Majeure Event continually uses commercially reasonable efforts to alleviate and mitigate the cause and effect of the Force Majeure Event and remedy its inability to perform; and

(b) In the event Contractor desires to claim a Force Majeure Event, it must submit a request for Changes pursuant to Section 6.2, CHANGE ORDERS REQUESTED BY CONTRACTOR, of Article VI, CHANGE ORDERS.

14.3.2 Solely with respect to a Force Majeure Event described in Section 14.1.3, if such Force Majeure Event continues for sixty (60) consecutive days from the commencement of acceptance testing, then, solely for purposes of Section 11.2, FPL shall deem Contractor to have satisfied the Minimum Performance Level and Schedule Liquidated Damages shall not be payable. In such event, Contractor shall not be deemed to have achieved Provisional Acceptance until solar conditions exist that meet the express criteria set forth in in Section 2 of Appendix HH – Acceptance Testing and the Minimum Performance Level is achieved in accordance with Section 11.6.

ECRC-08-2912 HEARING EXHIBIT - 00000082

14.3.3 Contractor's failure to comply with this Section 14.3, shall constitute a waiver of any claims as a result of a Force Majeure Event.

14.4 REMOVAL OF FORCE MAJEURE

If, within a reasonable time after a Force Majeure Event that has caused Contractor to suspend or delay performance of the Work, action to be undertaken at the expense of FPL has been identified and recommended to Contractor, and Contractor has failed within five (5) days after receipt of notice thereof from FPL to take such action as Contractor could lawfully and reasonably initiate to remove or relieve either the Force Majeure Event or its direct or indirect effects, FPL may, in its sole discretion and after notice to Contractor, initiate such reasonable measures as will be designed to remove or relieve such Force Majeure Event or its direct or indirect effects and thereafter require Contractor to resume full or partial performance of the Work. To the extent Contractor's failure to take such measures results in expense in addition to what FPL would have paid to Contractor (whether as part of the original Contract Price or as additional compensation to the extent the requested measures constituted a Change Order altering the scope of the Work) had Contractor taken such measures, such additional expense shall be for Contractor's account.

14.5 NOTICE OF FPL CAUSED DELAY

14.5.1 In the event Contractor desires to claim an FPL Caused Delay, Contractor shall within five (5) Business Days after it knows or should have known of the occurrence of the FPL Caused Delay, give FPL written notice describing the details of the FPL Caused Delay, the anticipated length of such delay and any other affect on Contractor's performance of its obligations hereunder. Within fifteen (15) days after initial notification, Contractor shall:

(a) Provide to FPL demonstrable proof of the occurrence and duration of such FPL Caused Delay and, if requested by FPL, such proof shall be provided, and in any event verified, by an independent third party reasonably acceptable to FPL and Contractor at the sole cost and expense of Contractor; and

(b) Thereafter provide FPL with periodic supplemental updates to reflect any change in information given to FPL as often as requested by FPL.

14.5.2 In the event that Contractor claims an FPL Caused Delay in violation of this provision, FPL shall be entitled to set-off against any payments due to Contractor or draw upon any security provided by Contractor (including the Letter of Credit) to compensate FPL for all costs (including reasonable attorneys' and other consultants' fees) incurred in enforcing this Section 14.5.

14.6 DELAY FROM FPL CAUSED DELAY

14.6.1 So long as the conditions set forth in this Section 14.6, are satisfied and subject to Section 14.7, PERFORMANCE NOT EXCUSED, Contractor shall not be responsible or liable for, or deemed in breach of the Contract Documents because of, any failure or delay in completing the Work in accordance with the Project Schedule or achieving Provisional Acceptance by the Guaranteed Provisional Acceptance Date to the extent that such failure has been caused by one or more FPL Caused Delays, and in such event, except as otherwise provided herein, the start date or period for completion of any portion of the Work shall be extended, on the condition that:

(a) Such suspension of performance and extension of time shall be of no greater scope and of no longer duration than is required by the effects of the FPL Caused Delay;

(b) Contractor complies with Section 14.5, NOTICE OF FPL CAUSED DELAY; and

(c) Contractor provides all assistance reasonably requested by FPL for the elimination or mitigation of the FPL Caused Delay.

14.6.2 In the event Contractor desires to claim an FPL Caused Delay, it must submit a request for Changes pursuant to Section 6.2, CHANGE ORDERS REQUESTED BY CONTRACTOR, of Article VI, CHANGE ORDERS, and Contractor shall be entitled to suspension of performance or extension of time (including an extension of the Guaranteed Provisional Acceptance Date) together with demonstrated, justified and

HEARING EXHIBIT - 00000083
FCRC-08-2913

reasonable additional costs incurred by reason of such delay to the extent agreed upon by both Parties pursuant to a Change Order in accordance with Section 6.2, CHANGE ORDERS REQUESTED BY CONTRACTOR, of Article VI, CHANGE ORDERS. Failure to comply with the terms of this Section 14.6, shall constitute a waiver of any claims for an increase in the Project Schedule or the Contract Price as a result of an FPL Caused Delay.

14.7 PERFORMANCE NOT EXCUSED

The payment of money owed shall not be excused because of a Force Majeure Event or FPL Caused Delay. In addition, a Party shall not be excused under this Article from timely performance of its obligations hereunder to the extent that the claimed Force Majeure Event or FPL Caused Delay was caused by any negligent or intentional acts, errors, or omissions, or for any breach or default of the Contract Documents by such Party. Furthermore, no suspension of performance or extension of time shall relieve the Party benefiting therefrom from any liability for any breach of the obligations that were suspended or failure to comply with the time period that was extended to the extent such breach or failure occurred prior to the occurrence of the applicable Force Majeure Event or FPL Caused Delay. Notwithstanding anything contained herein to the contrary, Contractor shall not withdraw Contractor's Equipment and personnel from the Job Site or otherwise demobilize without the prior authorization of FPL. Contractor shall not be entitled to receive reimbursement for its costs of demobilization and/or remobilization as a result of any Force Majeure Event.

ARTICLE XV.
TERMINATION

15.1 CONTRACTOR EVENTS OF DEFAULT

The occurrence of any of the following events shall constitute an event of default by Contractor (each a "Contractor Event of Default"):

15.1.1 The failure of Contractor, subject to the grace period provided in Section 11.1, COMPLETION GUARANTEE, of Article XI, CONTRACTOR GUARANTEES AND LIQUIDATED DAMAGES, to achieve Provisional Acceptance by the Guaranteed Provisional Acceptance Date;

15.1.2 Intentionally Deleted.

15.1.3 The failure of Contractor to achieve Final Acceptance within two hundred and twenty five (225) days after the Guaranteed Provisional Acceptance Date;

15.1.4 The failure of the Plant to continue to operate at Minimum Performance Level after Provisional Acceptance and prior to Final Acceptance, unless such failure is caused by FPL's failure to properly operate and maintain the Plant in accordance with Contractor's written instructions provided hereunder;

15.1.5 The Plant, during the period of time between Provisional Acceptance and Final Acceptance, is not capable of being operated in accordance with Plant operating procedures and all Applicable Laws and Applicable Permits, and other requirements of the Agreement, and all operating conditions specified in the Scope of Work;

15.1.6 The failure by Contractor to pay liquidated damages as required herein;

15.1.7 Any failure by Contractor to make any other payment or payments required to be made to FPL under the Contract Documents within five (5) Business Days after receipt of written notice from FPL of Contractor's failure to make such other payment or payments (except, in the case of payments other than Schedule Liquidated Damages, to the extent Contractor disputes such other payment or payments in good faith and in accordance with the terms of this Agreement);

15.1.8 Any of the following occurs:

(a) Contractor fails to supply sufficient skilled workers or suitable materials or equipment;

(b) Contractor fails to make prompt payments when due to Subcontractors or Vendors for labor, materials or equipment;

ECRC-08-2914 HEARING EXHIBIT - 00000084

(c) Contractor suspends performance of a material portion of the Work (other than as provided in: (i) Article XIV, FORCE MAJEURE AND FPL CAUSED DELAY; (ii) Section 15.4.1, Suspension by FPL for Convenience, (iii) Section 15.7, TERMINATION BY CONTRACTOR DUE TO FPL DEFAULT; or (iv) pursuant to a Change Order); or

(d) Contractor fails to comply with any provision of any Applicable Law,

and if in each paragraph (a) through (d) of this Section, such condition remains unremedied for thirty (30) days following written notice thereof by FPL, or for such longer period, not to exceed sixty (60) days, during which time Contractor diligently pursues the cure of such material breach, if such material breach is capable of being cured;

15.1.9 The failure by Contractor to deliver any recovery plan described in Section 5.3.3, of Section 5.3, PROJECT SCHEDULE, of Article V, PROJECT SCHEDULE, within thirty (30) days after the date such recovery plan is due pursuant to the terms of such Section, or following approval of a recovery plan pursuant to such Section, the failure of Contractor to meet the schedule set forth in such recovery plan;

15.1.10 Any breach by Contractor of any representation or warranty made by Contractor in Article XIII, REPRESENTATIONS;

15.1.11 Any breach by Contractor of any obligation, covenant or agreement of Contractor hereunder other than those breaches specified in this Section 15.1, and:

(a) Such breach is not cured by Contractor within fifteen (15) days after notice thereof from FPL; or

(b) If such breach is not capable of being cured within such fifteen (15) day period (as determined by FPL in its sole discretion), Contractor fails to:

(i) Commence to cure such breach within such fifteen (15) day period;

(ii) Thereafter diligently proceed to cure such breach in a manner satisfactory to FPL in its sole discretion;

(iii) Cure such breach within ninety (90) days after notice thereof from FPL;

15.1.12 Any of the following occurs:

(a) Contractor or Contractor Parent Company consents to the appointment of or taking possession by, a receiver, a trustee, custodian, or liquidator of itself or of a substantial part of its assets, or fails or admits in writing its inability to pay its debts generally as they become due, or makes a general assignment for the benefit of creditors;

(b) Contractor or the Contractor Parent Company files a voluntary petition in bankruptcy or a voluntary petition or an answer seeking reorganization in a proceeding under any applicable bankruptcy or insolvency laws or an answer admitting the material allegations of a petition filed against it in any such proceeding, or seeks relief by voluntary petition, answer or consent, under the provisions of any now existing or future bankruptcy, insolvency or other similar law providing for the liquidation, reorganization, or winding up of corporations, or providing for an agreement, composition, extension, or adjustment with its creditors;

(c) A substantial part of Contractor's or the Contractor Parent Company's assets is subject to the appointment of a receiver, trustee, liquidator, or custodian by court order and such order shall remain in effect for more than thirty (30) days; or

(d) Contractor or the Contractor Parent Company is adjudged bankrupt or insolvent, has any property sequestered by court order and such order shall remain in effect for more than thirty (30) days, or has filed against it a petition under any bankruptcy, reorganization, arrangement, insolvency, readjustment of debt, dissolution or liquidation law of any jurisdiction, whether now or hereafter in effect, and such petition shall not be dismissed within thirty (30) days of such filing;

ECRC-08-2915 HEARING EXHIBIT - 00000085

15.1.13 The dissolution of Contractor, except for the purpose of merger, consolidation or reorganization where the successor expressly assumes Contractor's obligations hereunder and such assignment and assumption does not materially adversely affect the ability of the successor to perform its obligations under the Contract Documents and the Parent Guaranty remains in full force and effect for the obligations of such successor;

15.1.14 The transfer by Contractor of all or a substantial portion of the:

(a) Rights and/or obligations of Contractor hereunder, except for an assignment permitted hereunder; or

(b) Assets or obligations of Contractor, except where the transferee expressly assumes the transferred obligations and such transfer does not materially adversely affect the ability of Contractor or the transferee, as applicable, to perform its obligations under the Contract Documents, as determined by FPL in its sole discretion;

15.1.15 The failure of Contractor to provide and maintain in full force and effect any Contractor Parent Guaranty as required pursuant to Section 11.8, PARENT GUARANTY, of Article XI, CONTRACTOR GUARANTEES AND LIQUIDATED DAMAGES and, in the event that a Credit Trigger Event has occurred after the Final Acceptance Date, the failure of Contractor to provide and maintain a Letter of Credit (or such other collateral permitted pursuant to such Section 11.8) in the face amount required in accordance with paragraph 3 of Appendix E – Credit Trigger Event;

15.1.16 Any failure by Contractor to maintain the insurance coverages required of it in accordance with Article IX, INSURANCE;

15.1.17 Any failure of Contractor to maintain the Letter of Credit in accordance with Section 7.5, LETTERS OF CREDIT, of Article VII, CONTRACT PRICE; PAYMENTS TO CONTRACTOR, including but not limited to any adjustment in the stated amount thereof (or posting of additional collateral permitted pursuant to such Section 7.5) upon the occurrence of a Credit Trigger Event; unless the available amount thereunder (as such available amount may be increased upon the occurrence of a Credit Trigger Event) has been drawn in full in accordance with the terms thereof;

15.1.18 Any abandonment of the Work by Contractor, where "Abandonment" for the purposes of this Section shall mean that Contractor has substantially reduced personnel at the Job Site or removed required equipment from the Job Site such that, in the opinion of an experienced construction manager, Contractor would not be capable of completing the Critical Milestones in accordance with the Project Schedule; or

15.1.19 The occurrence of a Credit Event of Default.

15.2 TERMINATION BY FPL DUE TO CONTRACTOR DEFAULT; OTHER REMEDIES.

15.2.1 Upon the occurrence of a Contractor Event of Default, FPL may, at its option, terminate this Agreement, without prejudice to any other rights and remedies available to FPL under this Agreement, by giving written notice thereof to Contractor, which termination shall be effective upon the giving of such notice by FPL.

15.2.2 In the event of a termination by FPL under this Section 15.2, FPL shall have the right to take possession of and use all of the Contractor Equipment located at the Job Site on the date of such termination for the purpose of completing the Work and may employ any other Person to complete the Work by whatever method that FPL may deem necessary. In addition, FPL may make such expenditures as in FPL's sole judgment will accomplish the timely completion of the Work in accordance with the terms hereof.

15.2.3 In the event of termination by FPL under this Section 15.2, Contractor shall not be entitled to receive any further payments under the Contract Documents (other than undisputed payments owed and payable to Contractor hereunder prior to the date of such termination).

15.2.4 In the event of termination by FPL under this Section 15.2, Contractor shall be responsible for and shall reimburse FPL for the following amounts:

HEARING EXHIBIT - 00000086
FCRC-08-2916

(a) All reasonable costs and expenses incurred by FPL to engage a substitute contractor to complete (or cure deficiencies in) the Work, including, without limitation, overhead and legal, engineering and other professional expenses;

(b) All reasonable costs and expenses incurred in connection with the termination of the Contract Documents, including costs and expenses incurred in connection with the obligations set forth under Section 15.9, OBLIGATIONS UPON TERMINATION;

(c) The amount by which:

(i) The cost reasonable to complete (or cure deficiencies in) the Work, exceeds

(ii) The balance of the Contract Price unpaid at the time of the termination; and

(d) All actual damages occasioned by reason of said default, except that Parties agree that Schedule Liquidated Damages shall apply in lieu of delay damages for late completion.

15.2.5 Upon the occurrence and during the continuance of a Contractor Event of Default but prior to termination of this Agreement by FPL, FPL may, without prejudice to any of its other rights or remedies:

(a) Seek performance by any guarantor of Contractor's obligations hereunder;

(b) Seek equitable relief to cause Contractor to take action or to refrain from taking action pursuant to this Agreement, or to make restitution of amounts improperly received under this Agreement;

(c) Make such payments or perform such obligations as are required to cure such Contractor Event of Default, and then draw on or make a claim against the Letter of Credit or other security provided pursuant to this Agreement for the cost of such payment or performance and/or offset the cost of such payment or performance against payments otherwise due to Contractor under this Agreement; provided that FPL shall be under no obligation to cure any such Contractor Event of Default;

(d) Seek damages as provided in Section 15.2.4, including proceeding against any bond, guarantee, letter of credit, or other security given by or for the benefit of Contractor for its performance under this Agreement;

(e) Require direct payment or co-payment to Subcontractors or Vendors and any such payments or co-payments shall be credited against amounts due to Contractor under the Agreement; or

(f) Assign to FPL any agreement or purchase order with a Subcontractor or Vendor, provided that:

(i) FPL shall assume the obligations under such agreement or purchase order accruing after the date of such assignment;

(ii) If requested by FPL, Contractor shall remain responsible for administering and managing such agreement or purchase order (including enforcing the warranty obligations thereunder); and

(iii) In no event shall Contractor be relieved of its obligation to achieve Provisional Acceptance or Final Acceptance as a result of such assignment.

15.3 TERMINATION BY FPL FOR CONVENIENCE.

15.3.1 FPL may terminate this Agreement at any time for any reason in its sole discretion by giving written notice thereof to Contractor, which termination shall be effective upon the giving of such notice by FPL. Upon receiving any such notice of termination, Contractor shall stop performing the Work and, except as otherwise directed by FPL, shall cancel as quickly as possible all orders placed by it with Subcontractors and Vendors and shall use all reasonable efforts to minimize cancellation charges and other costs and expenses associated with the termination of the Agreement. Contractor shall also promptly assign all subcontracts and purchase orders which FPL wishes to retain in accordance with Section 15.9, OBLIGATIONS UPON TERMINATION.

15.3.2 In the event of a termination by FPL under Section 15.3.1, Contractor shall be entitled to receive, as its sole and exclusive remedy for such termination, a termination payment ("Termination Payment") equal to the termination amount as set forth in the Termination Payment Schedule.

15.3.3 Intentionally Deleted.

15.3.4 In addition to FPL's right to terminate set forth in Section 15.3.1 above, FPL may terminate this Agreement because any of the following occurs pursuant to the Power Plant Siting Act, § 403.501-518, Florida Statutes and/or Chapter 62-17, Part I, (§ 62-17.011-62-17.293) of the Florida Administrative Code, the procedural rule implementing the act or otherwise:

(a) FPL does not select the Project pursuant to the "Request for Proposals";

(b) The Siting Board does not issue a "Land Use Order" for the Project;

(c) The Siting Board does not issue a "Final Certification Order";

(d) The Florida Department of Environmental Protection does not issue the "Air Construction Permit";

(e) The State of Florida Public Service Commission does not issue a "Need Order" for the Project;

(f) The Project is unable to obtain the applicable local, county, state or federal permits not covered by the Power Plant Siting Act;

(g) The administrative law judge responsible for recommending the Project to the Governor fails to recommend the Project;

(h) The Governor fails to approve the Project;

(i) Any other Government Authority whose approval or recommendation is necessary for the Project to be constructed fails to grant such approval or give such recommendation; or

(j) As a condition of obtaining any of the foregoing approvals or recommendations, FPL is required to materially amend the proposal for the Project (as determined in FPL's sole discretion);

then Contractor shall not be entitled to receive any further payments under the Contract Documents, except for the applicable Termination Payment.

15.3.5 Any amount owed pursuant to this Section 15.3, shall be subject to adjustment to the extent any Work contains Defects.

15.4 SUSPENSION BY FPL FOR CONVENIENCE.

15.4.1 FPL may suspend all or a portion of the Work to be performed under the Contract Documents at any time for any reason in its sole discretion by giving written notice thereof to Contractor. Such suspension, not to exceed 90 days individually and 180 days total while this Agreement is in effect, shall continue for the period specified in the notice of suspension; provided that Contractor agrees to resume performance of the Work promptly upon receipt of notice from FPL. Upon receiving any such notice of suspension, unless the notice requires otherwise, Contractor shall:

(a) Immediately discontinue the Work on the date and to the extent specified in the notice;

(b) Place no further orders or subcontracts for Equipment, services or facilities with respect to suspended Work, other than to the extent required in the notice;

(c) Promptly make every reasonable effort to obtain suspension, with terms reasonably satisfactory to FPL, of all orders, subcontracts and rental agreements to the extent they relate to performance of suspended Work;

(d) Continue to protect and maintain the Work performed, including those portions on which Work has been suspended; and

HEARING EXHIBIT - 00000088
FCRC-08-2918

(e) Take any other reasonable steps to minimize costs and expenses associated with such suspension.

15.4.2 Except as provided in Section 15.4.3, below, as full compensation for any suspension under this Section, Contractor will be reimbursed by FPL for the costs, as reasonably incurred, without duplication of any item, to the extent that such costs directly result from such suspension of the Work and to the extent that they do not reflect reimbursement for Contractor's, Vendors' or Subcontractors' anticipated profit from unperformed Work, including all necessary and reasonable costs incurred in connection with demobilization and remobilization of Contractor's facility and Labor and Contractor Equipment, plus an amount equal to 15% of such amounts.

15.4.3 Upon delivery of notice by FPL to Contractor to resume suspended Work, Contractor shall, as promptly as reasonably possible, resume performance under the Contract Documents to the extent required in the notice. Contractor may request a Change Order as a result of a suspension of Work under this Section within fourteen (14) days after receipt of notice to resume the suspended Work; provided that such suspension was not due to Contractor's negligence, willful misconduct or noncompliance with the terms of this Agreement. Contractor shall submit to FPL a request for Changes in accordance with Article VI, CHANGE ORDERS, and such request shall be accompanied by sufficient documentation setting forth the schedule impact and monetary extent of such claim in sufficient detail to permit thorough analysis by FPL; provided that if such information is not available within such fourteen (14) day period, Contractor shall notify FPL of such within such fourteen (14) day period and provide an expected date (which shall be as soon as reasonably practicable) for providing such information. If Contractor does not submit a request for Changes within such fourteen (14) day period and provide the information regarding schedule and monetary impact as required above within such fourteen (14) day period (or by the expected date if not possible during such fourteen (14) day period), Contractor shall not be entitled to any additional consideration or other amendments hereto and shall be deemed to have waived all claims and offsets against FPL as a result of the suspension of Work. Contractor shall permit access by FPL to pertinent records for purposes of reviewing the claims by Contractor of schedule and monetary impact.

15.4.4 Contractor shall not have any recourse to the provisions of Sections 15.4.2 or 15.4.3 if and to the extent that any suspension by FPL under this Section 15.4.1 occurs contemporaneously with any Force Majeure Event, FPL Caused Delay or a breach of Contractor's obligations under this Agreement.

15.5 [INTENTIONALLY DELETED]

15.6 FPL EVENTS OF DEFAULT

The occurrence and continuation of any of the following events shall constitute an event of default by FPL (each, an "FPL Event of Default"):

15.6.1 A failure by FPL to make payment of any undisputed amount when due, and such breach is not cured by FPL within fifteen (15) days after FPL's receipt of notice thereof from Contractor; or

15.6.2 Any breach by FPL of any representation or warranty made by FPL in Article XIII, REPRESENTATIONS;

15.6.3 Any of the following occurs:

(a) FPL consents to the appointment of or taking possession by, a receiver, a trustee, custodian, or liquidator of itself or of a substantial part of its assets, or fails or admits in writing its inability to pay its debts generally as they become due, or makes a general assignment for the benefit of creditors;

(b) FPL files a voluntary petition in bankruptcy or a voluntary petition or an answer seeking reorganization in a proceeding under any applicable bankruptcy or insolvency laws or an answer admitting the material allegations of a petition filed against it in any such proceeding, or seeks relief by voluntary petition, answer or consent, under the provisions of any now existing or future bankruptcy, insolvency or other similar law providing for the liquidation, reorganization, or winding up of corporations, or providing for an agreement, composition, extension, or adjustment with its creditors;

ECRC-08-2919 HEARING EXHIBIT - 00000089

(c) A substantial part of FPL's assets is subject to the appointment of a receiver, trustee, liquidator, or custodian by court order and such order shall remain in effect for more than thirty (30) days; or

(d) FPL is adjudged bankrupt or insolvent, has any property sequestered by court order and such order shall remain in effect for more than thirty (30) days, or has filed against it a petition under any bankruptcy, reorganization, arrangement, insolvency, readjustment of debt, dissolution or liquidation law of any jurisdiction, whether now or hereafter in effect, and such petition shall not be dismissed within thirty (30) days of such filing.

15.6.4 Any breach by FPL of any obligation, covenant or agreement of FPL hereunder other than those breaches specified in this Section 15.6, and:

(a) Such breach is not cured by FPL within fifteen (15) days after notice thereof from Contractor; or

(b) If such breach is not capable of being cured within such fifteen (15) day period (as determined by Contractor in its sole discretion), FPL fails to:

(i) Commence to cure such breach within such fifteen (15) day period;

(ii) Thereafter diligently proceed to cure such breach in a manner satisfactory to Contractor in its sole discretion; or

(iii) Cure such breach within ninety (90) days after notice thereof from Contractor.

15.6.5 The dissolution of FPL, except for the purpose of merger, consolidation or reorganization where the successor expressly assumes FPL's obligations hereunder and such assignment and assumption does not materially adversely affect the ability of the successor to perform its obligations under the Contract Documents.

15.6.6 The transfer by FPL of all or a substantial portion of the:

(a) Rights and/or obligations of FPL hereunder, except for an assignment permitted hereunder; or

(b) Assets or obligations of FPL, except where the transferee expressly assumes the transferred obligations and such transfer does not materially adversely affect the ability of FPL or the transferee, as applicable, to perform its obligations under the Contract Documents, as determined by Contractor in its sole discretion;

15.6.7 Any failure by FPL to maintain the insurance coverages required of it in accordance with Article IX, INSURANCE;

15.7 TERMINATION BY CONTRACTOR DUE TO FPL DEFAULT.

15.7.1 Subject to Section 15.7.2, below, upon the occurrence and during the continuance of an FPL Event of Default beyond the applicable grace period, Contractor may terminate this Agreement thirty (30) Days after giving written notice thereof to FPL so long as the amount owed by FPL (other than any amount disputed in accordance with the terms of this Agreement) is not paid within such period.

15.7.2 In the event of such termination, Contractor shall be entitled to receive an amount equal to the Termination Payment as its sole and exclusive remedy for such termination.

15.8 CONTINUING OBLIGATIONS AND REMEDIES DURING EVENT OF DEFAULT

In the event of the occurrence of any default hereunder:

15.8.1 Neither Party shall be relieved of any of its liabilities or obligations hereunder, unless and until such liabilities and obligations are terminated in accordance with the provisions hereof; and

15.8.2 Each Party shall have the right to pursue any right or remedy available to it, hereunder.

15.9 OBLIGATIONS UPON TERMINATION

Upon a termination of this Agreement pursuant to Section 15.2:

FCRC-08-2920 HEARING EXHIBIT - 00000090

15.9.1 Contractor shall leave the Job Site and remove from the Job Site all Contractor Equipment, waste, rubbish and Hazardous Material as FPL may request;

15.9.2 FPL shall take possession of the Job Site and of the Equipment (whether at the Job Site, in transit or otherwise);

15.9.3 Contractor shall promptly assign to FPL or its designee any contract rights (including warranties, licenses, patents and copyrights) that it has to any and all Equipment and the Work, including, without limitation, contracts with Subcontractors and Vendors, and Contractor shall execute such documents as may be reasonably requested by FPL to evidence such assignment, subject to FPL's assumption of same and, if required, FPL's adequate assurance to such Subcontractors or Vendors regarding FPL's ability to pay;

15.9.4 Contractor shall promptly furnish FPL with copies of all Drawings and, to the extent available, Final Plans, and copies of all computer files containing Drawings or Final Plans;

15.9.5 Contractor hereby grants FPL and its designee with the right to use, free of charge, all patented, copyrighted and other proprietary information relating to the Work that FPL deems necessary to complete the Work, and Contractor shall execute such documents as may be reasonably requested by FPL to evidence such right;

15.9.6 Contractor shall assist FPL in preparing an inventory of all Equipment in use or in storage at the Job Site;

15.9.7 Contractor shall perform all Remediation Work requested by FPL; and

15.9.8 Contractor shall take such other action as required hereunder upon termination of this Agreement.

15.10 TERMINATION AND SURVIVAL OF TERMS

Upon termination of this Agreement pursuant to this Article, the rights and obligations of the Parties hereunder shall terminate, except for the rights and obligations:

15.10.1 Accrued as of the date of termination;

15.10.2 Arising out of events occurring prior to the date of termination; and

15.10.3 Of the Parties which survive termination, including the rights and obligations forth in Articles XII, CONTRACTOR'S WARRANTIES, and XIII, REPRESENTATIONS.

ARTICLE XVI.
INDEMNIFICATION

16.1 CONTRACTOR INDEMNIFICATION

Contractor agrees to reimburse, indemnify, defend and hold FPL, the Financing Parties and their Affiliates and each of their respective directors, officers, employees, representatives, agents, advisors, consultants, counsel and assigns harmless from and against, on an After-Tax Basis, any and all losses, claims, obligations, demands, assessments, penalties, liabilities, costs, damages and expenses (including reasonable attorneys' fees and expenses) (collectively, "Damages") asserted against or incurred by such indemnitees by reason of or resulting from any and all of the following:

16.1.1 Any bodily injury, death or damage to property caused by any act or omission (including strict liability) or willful misconduct relating to or arising out of the performance of the Work or any curative action under any warranty following performance of the Work, of Contractor or any Affiliate thereof, any Subcontractor or Vendor, or anyone directly or indirectly employed by any of them, or anyone for whose acts such Person may be liable;

16.1.2 Any third party claims resulting in bodily or property damage arising out of defective and/or nonconforming Work relating to or arising out of the performance of the Work;

16.1.3 Claims by any Government Authority for any Contractor Taxes;

16.1.4 Any pollution or contamination which originates from sources in Contractor's or its Subcontractors' or Vendors' possession, use or control or caused by the release by Contractor or its Subcontractors or Vendors

ECRC-08-2921 HEARING EXHIBIT - 00000091

(excluding Pre-Existing Hazardous Material other than as provided in (e) below), including, without limitation, from Hazardous Material, toxic waste, industrial hazards, sanitary waste, fuel, lubricant, motor oil, paint, solvent, bilge and garbage;

16.1.5 Any release or exacerbation of Pre-Existing Hazardous Materials or rendering removal or remediation of Pre-Existing Hazardous Materials more costly, which in any of such events is caused by any negligent act or omission of Contractor or any Affiliate thereof, any Subcontractor or Vendor, or anyone directly or indirectly employed by any of them, or anyone for whose acts such Person may be liable;

16.1.6 To the extent FPL has paid all undisputed amounts due pursuant to the Contract Documents, any Lien, as set forth in Section 3.25, CLAIMS AND LIENS FOR LABOR AND MATERIALS, of Article III, CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR, on the Equipment, the Job Site or any fixtures or personal property included in the Work (whether or not any such Lien is valid or enforceable) created by, through or under, or as a result of any act or omission (or alleged act or omission) of, Contractor or any Subcontractor, Vendor or other Person providing labor or materials in connection with the Work;

16.1.7 Any claim, action or proceeding by any Person for unauthorized disclosure, use, infringement or misappropriation of any Intellectual Property Right arising from:

(a) Contractor's performance (or that of its Affiliates, Subcontractors or Vendors) under the Contract Documents, including, without limitation, the Work, Equipment, Drawings, Final Plans or other items and services provided by Contractor or any Subcontractor or Vendor hereunder;

(b) The use or ownership of any Contractor Deliverable;

(c) Any license granted hereunder; or

(d) The design, engineering, construction, use, operation or ownership of the Plant or any portion thereof;

(Without limiting the provisions of Section 12.3, PROPRIETARY RIGHTS, of Article XII, CONTRACTOR'S WARRANTIES, if FPL is enjoined from completing the Project or any part thereof, or from the use, operation or enjoyment of the Project or any part thereof, as a result of such claim or legal action or any litigation based thereon, Contractor shall promptly use its best efforts to have such injunction removed at no cost to FPL.)

16.1.8 Any vitiation of any insurance policy procured under Article IX, INSURANCE, as a result of Contractor's failure to comply with any of the requirements set forth in such policy or any other act by Contractor or any Subcontractor or Vendor;

16.1.9 Any failure of the Project, as designed, constructed or completed by Contractor, to comply with, or be capable of operating in compliance with, Applicable Laws or the conditions or provisions of Applicable Permits;

16.1.10 Any failure of Contractor to comply with Applicable Laws or the conditions or provisions of Applicable Permits; and

16.1.11 Any claims with respect to employer's liability or worker's compensation filed by any employee of Contractor or any of its Subcontractors or Vendors.

16.2 FPL INDEMNIFICATION

FPL agrees to reimburse, indemnify, defend and hold Contractor and its Affiliates and each of their respective directors, officers, employees, representatives, agents, advisors, consultants and counsel harmless from and against, on an After-Tax Basis, any and all Damages asserted against or incurred by such indemnitees by reason of or resulting from any and all of the following:

16.2.1 Any bodily injury, death or damage to property caused by (a) any act or omission (including strict liability) or willful misconduct of FPL or its agents or employees or others under FPL's direct control or (b) a breach by FPL of its obligations hereunder;

HEARING EXHIBIT - 00000092
FCRC-08-2922

16.2.2 Claims by any Government Authority for any FPL Taxes;

16.2.3 Any Pre-Existing Hazardous Material on the Property Site, except to the extent covered by Section 16.1.5, Contractor Release or Exacerbation; and

16.2.4 Any claims with respect to employer's liability or worker's compensation filed by any employee of FPL.

16.3 CONDITIONS OF INDEMNIFICATION

The respective rights and obligations of the Parties and the other indemnitees under this Article with respect to claims resulting from the assertion of liability by third parties shall be subject to the following terms and conditions:

16.3.1 *Notice of Proceedings*. Within fourteen (14) days (or such earlier time as might be required to avoid prejudicing the indemnifying Party's position) after receipt of notice of commencement of any legal action or of any claims against such indemnitee in respect of which indemnification will be sought, the Person claiming to be indemnified under the terms of this Section (the "Indemnified Person") shall give the Party from which indemnification is sought (the "Indemnifying Party") written notice thereof, together with a copy of such claim, process or other legal pleading. Failure of the Indemnified Person to give such notice will not reduce or relieve the Indemnifying Party of liability hereunder unless and to the extent that the Indemnifying Party was precluded from defending such claim, action, suit or proceeding as a result of the failure of the Indemnified Person to give such notice. In any event, the failure to so notify shall not relieve the Indemnifying Party from any liability that it may have to the Indemnified Person otherwise than under this Article.

16.3.2 *Conduct of Proceedings*. Each Party and each other indemnitee shall have the right, but not the obligation, to contest, defend and litigate any claim, action, suit or proceeding by any third party alleged or asserted against it arising out of any matter in respect of which it is entitled to be indemnified hereunder and the reasonable costs and expenses thereof (including reasonable attorneys' fees and expert witness fees) shall be subject to the said indemnity; provided that the indemnifying Party shall be entitled, at its option, to assume and control the defense of such claim, action, suit or proceeding at its expense upon its giving written notice thereof to the Indemnified Person. The Indemnified Person shall provide reasonable assistance to the Indemnifying Party, at the Indemnifying Party's expense, in connection with such claim, action, suit or proceeding. Upon such assumption, the Indemnifying Party shall reimburse the Indemnified Person for the reasonable costs and expenses previously incurred by it prior to the assumption of such defense by the Indemnifying Party. The Indemnifying Party shall keep the Indemnified Person informed as to the status and progress of such claim, action, suit or proceeding. Except as set forth in paragraph (c) below, in the event the Indemnifying Party assumes the control of the defense, the Indemnifying Party will not be liable to the Indemnified Person under this Article for any legal fees or expenses subsequently incurred by the Indemnified Person in connection with such defense. The Indemnifying Party shall control the settlement of all claims over which it has assumed the defense; provided, however, that the Indemnifying Party shall not agree to or conclude any settlement that affects the Indemnified Person without the prior written approval of the Indemnified Person, (whose said approval shall not be unreasonably withheld).

16.3.3 *Representation*. In the event the Indemnifying Party assumes control of the defense, the Indemnified Person shall have the right to employ its own counsel and such counsel may participate in such claim, action, suit or proceeding, but the fees and expenses of such counsel shall be at the expense of such Indemnified Person, when and as incurred, unless the:

(a) Employment of counsel by such Indemnified Person has been authorized in writing by the Indemnifying Party;

(b) Indemnified Person shall have reasonably concluded that there may be a conflict of interest between the Indemnifying Party and the Indemnified Person in the conduct of the defense of such action; or

ECRC-08-2923 HEARING EXHIBIT - 00000093

(c) Indemnified Person shall have reasonably concluded and specifically notified the Indemnifying Party either that there may be specific defense available to it which are different from or additional to those available to the Indemnifying Party.

If any of the preceding clauses (a) through (c) shall be applicable, then counsel for the Indemnified Person shall have the right to direct the defense of such claim, action, suit or proceeding on behalf of the Indemnified Person and the reasonable fees and expenses of such counsel shall be reimbursed by the Indemnifying Party.

16.4 CONTRIBUTORY NEGLIGENCE

Except as provided in Section 16.2.2, above, if the joint, concurring, comparative or contributory fault, negligence or willful misconduct of the Parties gives rise to Damages for which a Party is entitled to indemnification under this Article, then such Damages shall be allocated between the Parties in proportion to their respective degrees of fault, negligence or willful misconduct contributing to such Damages.

16.5 REMEDIES NOT EXCLUSIVE

The rights under this Article shall not be exclusive with respect to any other right or remedy provided for in the Contract Documents.

16.6 PAYMENT

All payments required to be made under this Article shall be made on an After-Tax Basis and within thirty (30) days of demand therefor.

16.7 SURVIVAL OF INDEMNIFICATION

The provisions of this Article shall survive the Final Acceptance Date and the termination of this Agreement.

ARTICLE XVII.
DISPUTE RESOLUTION

17.1 FRIENDLY CONSULTATION

In the event of any dispute, controversy or claim between the Parties arising out of or relating to the Contract Documents, or the breach, termination or invalidity thereof (collectively, a "Dispute"), the Parties shall attempt in the first instance to resolve such Dispute through friendly consultations between the Parties. If such consultations do not result in a resolution of the Dispute within thirty (30) days after notice of a Dispute is delivered by either Party, then either Party may pursue all of its remedies available pursuant to the Contract Documents. The Parties agree to attempt to resolve all Disputes arising hereunder promptly, equitably and in a good faith manner. The Parties further agree to provide each other with reasonable access during normal business hours to any and all non-privileged records, information and data pertaining to such Dispute.

17.2 LITIGATION.

17.2.1 If a Dispute cannot be resolved pursuant to Section 17.1, FRIENDLY CONSULTATION, and in the event of litigation arising hereunder, the Parties agree that the venue for such litigation shall be the courts of the State of Florida in Miami-Dade County or Palm Beach County, Florida or the United States District Court for the Southern District of Florida, unless such other location or forum is mutually agreed. The Parties irrevocably waive any objection which any of them may now or hereafter have to the bringing of any such action or proceeding in such respective jurisdictions, including any objection to the laying of venue based on the grounds of forum non conveniens and any objection based on the grounds of lack of in personam jurisdiction. To facilitate the comprehensive resolution of related disputes, and upon the sole discretion and request of FPL, Contractor agrees and will stipulate in any proceeding to the consolidation of any litigation or other proceeding arising out of or relating to this Agreement with any other litigation or other proceeding arising out of or relating to any other agreement relating to the Project.

17.2.2 IN ANY LITIGATION ARISING FROM OR RELATED TO THE CONTRACT DOCUMENTS, THE PARTIES HERETO EACH HEREBY KNOWINGLY, VOLUNTARILY AND INTENTIONALLY WAIVE THE RIGHT EACH MAY HAVE TO A TRIAL BY JURY WITH RESPECT TO ANY LITIGATION BASED HEREON, OR ARISING OUT OF, UNDER OR IN CONNECTION WITH THE

HEARING EXHIBIT - 00000094
ECRC-08-2924

CONTRACT DOCUMENTS, OR ANY COURSE OF CONDUCT, COURSE OF DEALING, STATEMENTS (WHETHER ORAL OR WRITTEN) OR ACTIONS OF EITHER PARTY TO THE CONTRACT DOCUMENTS. THIS PROVISION IS A MATERIAL INDUCEMENT FOR FPL AND CONTRACTOR TO ENTER INTO THIS AGREEMENT.

17.2.3 The rights and obligations of the Parties under this Article shall not be impaired, reduced or otherwise affected as a result of any of the following the:

(a) Receipt by a Party from any third party of any amounts in reimbursement of Damages that are the subject of the Dispute; or

(b) Assignment or transfer by either Party of any or all of its rights and/or obligations under the Contract Documents as permitted hereunder.

17.2.4 In the event of any Dispute pursuant to this Article XVII, Dispute Resolution, the prevailing Party shall be entitled to recover its reasonable attorneys' fees and costs incurred in connection therewith.

17.3 CONTINUING OBLIGATIONS AND RIGHTS

When any Dispute occurs and is the subject of friendly consultations or litigation, Contractor shall continue the Work in accordance with the Project Schedule and the terms hereof and FPL shall continue to make payments of undisputed amounts in accordance with the Contract Documents, and the Parties shall otherwise continue to exercise their rights, and fulfill their respective obligations, under the Contract Documents.

17.4 TOLLING STATUTE OF LIMITATIONS

All applicable statutes of limitation and defenses based upon the passage of time and similar contractual limitations shall be tolled while the procedures specified in this Article are pending. The Parties will take such action, if any, required to effectuate such tolling. Without prejudice to the procedures specified in this Article, a Party may file a complaint for statute of limitations purposes, if in its sole judgment such action may be necessary to preserve its claims or defenses. Despite such action, the Parties will continue to participate in good faith in the procedures specified in this Article.

17.5 AUDIT RIGHTS

In the event of a claim by FPL under this Agreement involving an amount greater than Fifty Thousand Dollars ($50,000), Contractor shall grant audit rights to FPL with respect to all relevant documentation pertaining to such claim

ARTICLE XVIII.
MISCELLANEOUS

18.1 ASSIGNMENT.

18.1.1 Except as expressly permitted in the Contract Documents, Contractor may not assign this Agreement, the Contract Documents or any portion hereof, or any of the rights or obligations hereunder, without the prior written consent of FPL, which consent shall not be unreasonably delayed. This Agreement shall inure to the benefit of, and be binding upon, the successors and permitted assigns of the Parties.

18.1.2 FPL shall be entitled to assign this Agreement, the Contract Documents and its rights and obligations hereunder (a) to any Affiliate, without the consent of Contractor and (b) to any other Person, with the consent of Contractor, which consent shall not be unreasonably withheld or delayed, and Contractor shall release FPL from all obligations hereunder upon any such assignment; provided, however, that notwithstanding any assignment pursuant to clause (a) above, FPL shall remain responsible for all financial obligations under this Agreement. In addition, Contractor hereby consents to the granting of a security interest in and an assignment by FPL of the Contract Documents and its rights herein to the Financing

ECRC-08-2925 HEARING EXHIBIT - 00000095

Parties and their successors, assigns and designees. In furtherance of the foregoing, Contractor acknowledges that the Financing Parties may under certain circumstances assume the interests and rights of FPL under the Contract Documents.

18.1.3 Contractor acknowledges that the Financing Parties may under certain circumstances foreclose upon and sell, or cause FPL to sell or lease the Project and cause any new lessee or purchaser of the Plant to assume all of the interests, rights and obligations of FPL arising under the Contract Documents. In such event, Contractor agrees to the assignment by FPL and the Financing Parties of the Contract Documents and its rights herein to such purchaser or lessee and shall release FPL and the Financing Parties from all obligations hereunder upon any such assignment.

18.2 GOOD FAITH DEALINGS; AUTHORSHIP

The Parties undertake to act fairly and in good faith in relation to the performance and implementation of the Contract Documents and to take such other reasonable measures as may be necessary for the realization of its purposes and objectives. The Parties collectively have prepared the Contract Documents, and none of the provisions hereof shall be construed against one Party on the ground that such Party is the author of the Contract Documents or any part hereof.

18.3 CONFIDENTIALITY.

18.3.1 For purposes of this Agreement, "Confidential Information" shall mean:

(a) The contents of the Contract Documents;

(b) Any information relating to the negotiations or performance of the Contract Documents; and

(c) Any information provided pursuant to the Contract Documents relating to the Project, Plant, FPL, Contractor or their Affiliates which:

(i) The disclosing Party designates in writing as confidential, proprietary or the like and which is received by the other Party;

(ii) By its nature is such that the receiving Party should reasonably conclude that possession of such information is of material commercial or competitive value to the disclosing Party;

(iii) Relates to the configuration, operation, management processes or profitability of the Plant; or

(iv) Relates to Project partners or prospective Project partners of FPL, including the names thereof.

18.3.2 Information shall be Confidential Information for the purposes hereof regardless of:

(a) The form in which it is communicated or maintained (whether oral, written, electronic or visual);

(b) Whether of a business, financial, legal, technical, managerial or other nature; and

(c) Whether prepared by the disclosing Party or otherwise.

18.3.3 Each Party agrees to hold all Confidential Information in confidence and not disclose it other than to its Affiliates, contractors (or potential contractors), subcontractors, vendors, consultants, advisors, Financing Parties (or potential Financing Parties), employees, directors, officers, agents, advisors or representatives (collectively, the "Personnel") for purposes of the Project or to any purchaser of the Project or a direct or indirect interest in Owner. Each Party agrees that only Personnel who need to have access to Confidential Information in order to perform their duties will be authorized to receive the same, and then only to the extent needed and provided such Personnel have been advised of the obligations and restrictions set forth in this Section 18.3. Each Party shall be responsible for any breach of this Agreement by its Personnel.

18.3.4 Notwithstanding the foregoing, information shall not be deemed to be Confidential Information where it:

HEARING EXHIBIT - 00000096
FCRC-08-2926

(a) Is or becomes public information or otherwise generally available to the public through no act of or failure to act by the receiving Party;

(b) Was, prior to the date of this Agreement, already in the possession of the receiving Party and was not received by such Party directly or indirectly from the other Party;

(c) Is rightfully received by the receiving Party from a third party who is not prohibited from disclosing it to such Party and is not breaching any agreement by disclosing it to such Party;

(d) Is independently developed by the receiving Party without benefit of Confidential Information received from the other Party;

(e) Is the property of the Party disclosing such information;

(f) Is necessary or advisable for FPL to exercise its Intellectual Property Rights under this Agreement; or

(g) Is necessary or advisable to disclose such information for the purpose of enforcing or exercising the disclosing Party's rights hereunder.

Specific information shall not be deemed to be within the foregoing exceptions merely because it is embraced by more general information within such exceptions, nor shall a combination of features be deemed to be within such exceptions merely because the individual features are within such exceptions.

18.3.5 If a Party is required by Applicable Law or any Government Authority to disclose any Confidential Information, such Party shall promptly notify the other Party of such requirement prior to disclosure so that the other Party may seek an appropriate protective order and/or waive compliance with the terms of this Section 18.3. If such protective order or other remedy is not obtained, then such Party shall furnish only that portion of the Confidential Information which is legally required to be furnished by the Applicable Law or Government Authority; provided, however, that prior to making any such disclosure, such Party will:

(a) Minimize the amount of Confidential Information to be provided consistent with the interests of the other Party; and

(b) Make every reasonable effort (which shall include participation by the other Party in discussions with the Government Authority involved) to secure confidential treatment of the Confidential Information to be provided.

If efforts to secure confidential treatment are not successful, the other Party shall have the prior right to revise such information in a manner consonant with its interests and the requirements of the Government Authority involved.

18.3.6 Each Party acknowledges that the other Party would not have an adequate remedy at law for money damages if the covenants contained in this Section 18.3 were breached and that any such breach would cause the other Party irreparable harm. Accordingly, each Party also agrees that in the event of any breach or threatened breach of this Section 18.3 by such Party or its Personnel, the other Party, in addition to any other remedies it may have at law or in equity, shall be entitled, without the requirement of posting a bond or other security, to equitable relief, including injunctive relief and specific performance.

18.3.7 All right and title to, and interest in, FPL's Confidential Information shall remain with FPL. Subject to Section 3.32, all Confidential Information obtained, developed or created by or for Contractor exclusively for the Project, including copies thereof, is the exclusive property of FPL whether delivered to FPL or not. No right or license is granted to Contractor or any third party respecting the use of Confidential Information owned by FPL by virtue of this Agreement, except to the extent required for Contractor's performance of its obligations hereunder. Except for that Confidential Information which FPL requires to construct, operate, and/or maintain the Project and its power generation facilities, which Confidential Information shall not be subject to any obligation of return by FPL, at any time upon written request by a disclosing Party, the other Party shall promptly return to the disclosing Party all its Confidential Information,

ECRC-08-2927 HEARING EXHIBIT - 00000097

including all copies thereof, and shall promptly purge all electronic copies of such Confidential Information; provided that the other Party shall be entitled to keep one (1) copy of such Confidential Information for its legal records. The return of Confidential Information to the disclosing Party, the purging of electronic copies of Confidential Information or the retention of a copy of Confidential Information for legal records shall not release a Party from its obligations hereunder with respect to such Confidential Information.

18.3.8 Contractor shall coordinate with FPL with respect to, and provide advance copies to FPL for review of, the text of any proposed announcement or publication that include any non-public information concerning the Work prior to the dissemination thereof to the public or to any Person other than Subcontractors, Vendors, the Financing Parties or advisors of Contractor, in each case, who agree to keep such information confidential. If FPL delivers written notice to Contractor rejecting any such proposed announcement or publication within two (2) Business Days after receiving such advance copies, Contractor shall not make such public announcement or publication; provided, however, that Contractor may disseminate or release such information in response to requirements of Government Authorities.

18.4 NOTICE

18.4.1 Whenever a provision of the Contract Documents requires or permits any consent, approval, notice, request, or demand from one Party to another, the consent approval, notice, request, or demand must be in writing and delivered in accordance with this Section in order to be effective. Any such consent approval, notice, request or demand shall be delivered and received if:

(a) Personally delivered or if delivered by telegram or courier service, when actually received by the Party to whom notice is sent;

(b) Delivered by telex or facsimile, on the first Business Day following the day transmitted (with confirmation of receipt);

(c) Delivered by mail (whether actually received or not), at the close of business on the third Business Day following the day when placed in the mail, postage prepaid, certified or registered, addressed to the appropriate Party,

In each case, at the address and/or facsimile numbers of such Party set forth below (or at such other address as such Party may designate by written notice to the other Party in accordance with this Section):

(i) If to Contractor:

SunPower Corporation, Systems
1414 Harbour Way South
Richmond, California 94804
Attention: President
Fax: (510) 540-0552

With a copy to:

Fax: (561) 694-3960

With a copy to:

Florida Power & Light Company
700 Universe Boulevard
Juno Beach, Florida
Attention: General Counsel
Fax: (561) 691-7305

18.4.2 Any Party may change its address, facsimile number or e-mail number for the purposes of this Agreement by giving notice thereof to the other Party in the manner provided herein.

18.5 WAIVER

No delay, failure or refusal on the part of any Party to exercise or enforce any right under the Contract Documents shall impair such right or be construed as a waiver of such right or any obligation of another Party, nor shall any single or partial exercise of any right hereunder preclude other or further exercise of any right. The failure of a Party to give notice to the other Parties of a breach of the Contract Documents shall not constitute a waiver thereof. Any waiver of any obligation or right hereunder shall not constitute a waiver of any other obligation or right, then existing or arising in the future. Each Party shall have the right to waive any of the terms and conditions of the Contract Documents that are for its benefit. To be effective, a waiver of any obligation or right must be in writing and signed by the Party waiving such obligation or right.

18.6 SEVERABILITY

If any provision of the Contract Documents is held to be illegal, invalid, or unenforceable under present or future laws, such provision shall be fully severable; the Contract Documents shall be construed and enforced as if such illegal, invalid or unenforceable provision had never comprised a part of the Contract Documents; and the remaining provisions of the Contract Documents shall remain in full force and effect and shall not be affected by the illegal, invalid, or unenforceable provision or by its severance from the Contract Documents. Furthermore, in lieu of such illegal, invalid or unenforceable provision, there shall be added automatically as a part of the Contract Documents a provision as similar in its terms to such illegal, invalid or unenforceable provision as may be possible and be legal, valid and enforceable.

18.7 GOVERNING LAW

The Contract Documents, and the rights and obligations of the Parties under or pursuant to the Contract Documents, shall be interpreted and construed according to the substantive laws of the State of Florida (regardless of any other jurisdiction's choice of law rules).

18.8 ENTIRE AGREEMENT; AMENDMENTS

The Contract Documents contain the entire understanding of the Parties with respect to the subject matter hereof and supersede all prior agreements, arrangements, discussions and undertakings between the Parties (whether written or oral) with respect to the subject matter hereof. The Contract Documents may only be amended by written instrument signed by all the Parties.

18.9 EXPENSES AND FURTHER ASSURANCES

Each Party shall pay its own costs and expenses in relation to the negotiation, preparation, execution and carrying into effect of the Contract Documents. Each Party shall, from time to time on being requested to do so by, and at the cost and expense of, the other Party, do all such acts and/or execute and deliver all such

ECRC-08-2929 HEARING EXHIBIT - 00000099

instruments and assurances as are reasonably necessary for carrying out or giving full effect to the terms of the Contract Documents.

18.10 NO THIRD PARTY BENEFICIARY

Except with respect to the rights of the Financing Parties, permitted successors and assigns and as provided above and the rights of indemnitees under Article XVI, INDEMNIFICATION:

18.10.1 Nothing in the Contract Documents nor any action taken hereunder shall be construed to create any duty, liability or standard of care to any Person that is not a Party;

18.10.2 No person that is not a Party shall have any rights or interest, direct or indirect, in the Contract Documents or the services to be provided hereunder; and

18.10.3 The Contract Documents are intended solely for the benefit of the Parties, and the Parties expressly disclaim any intent to create any rights in any third party as a third-party beneficiary to the Contract Documents or the services to be provided hereunder.

18.11 OFFSET

Notwithstanding any other provision hereof, any and all amounts owing or to be paid by FPL to Contractor hereunder or otherwise, shall be subject to offset and reduction in an amount equal to any amounts that may be owing at any time by Contractor to FPL. Further, for the avoidance of doubt, with respect to any provision of this Agreement that allows FPL to offset, set-off or draw against the Letter of Credit any amount then owed to Contractor, FPL shall have the express right to include in the amount offset, set-off or drawn under the Letter of Credit all of the reasonable costs and expenses it incurs in connection with enforcing such provision (including attorneys' and other consultants' fees).

18.12 COUNTERPARTS

This Agreement may be executed in multiple counterparts, each of which shall be deemed an original, and all of which together shall constitute one and the same instrument.

18.13 LIMITATIONS OF LIABILITY

18.13.1 Contractor's maximum liability under this Agreement shall be limited to (x) prior to the Provisional Acceptance Date, one hundred percent (100%) of the Contract Price and (y) after the Provisional Acceptance Date, 25% of the Contract Price, less the amount of Liquidated Damages previously paid by Contractor; provided, however, that such limitation of liability shall not apply to (i) Contractor's indemnification obligations under the Agreement related to claims of third parties; (ii) costs incurred by Contractor (and in the event of Contractor default, FPL) in achieving Provisional Acceptance and Final Acceptance (including the amount of any reduction in the Contract Price in the event that Contractor makes the election provided for in Section 10.5.1(b)); or (iii) any loss or damage arising out of any tort (including negligence and strict liability) or connected with Contractor's fraud, willful misconduct or illegal or unlawful acts. Contractor's limitations of liability shall not be reduced by the amount of insurance proceeds available to Contractor. FPL's maximum liability under this Agreement shall be limited to one hundred percent (100%) of the Contract Price prior to the Provisional Acceptance Date and 25% of the Contract Price after the Provisional Acceptance Date, except with respect to any payment due and payable pursuant to Section 7.1,Contract Price; provided however, that such limitation of liability shall not apply to any loss or damage arising out of any tort (including negligence and strict liability) or connected with FPL's fraud, willful misconduct or illegal or unlawful acts. FPL's limitations of liability shall not be reduced by the amount of insurance proceeds available to FPL.

18.13.2 Except as expressly set forth in this Agreement, and notwithstanding anything else in this Agreement to the contrary, Contractor and FPL waive claims against each other for any indirect, special or consequential damages arising out of or relating to this Agreement. This mutual waiver includes:

18.13.3 Damages incurred by FPL for rental expenses, for losses of use, income, profit, financing, business and reputation, and for loss of management or employee productivity, or the services of such persons;

ECRC-08-2930 HEARING EXHIBIT - 00000100

18.13.4 Damages incurred by Contractor for principal office expenses, including the compensation of personnel stationed there, for loss of financing, business and reputation, and for loss of profit except anticipated profit arising directly from the work; and

18.13.5 This mutual waiver is applicable, without limitation, to all consequential damages due to either Party's termination in accordance with Article XV, TERMINATION.

The foregoing waiver shall not preclude or limit recovery (i) of Schedule Liquidated Damages, (ii) of damages payable by Contractor to FPL pursuant to Section 15.2.4, Amounts Due FPL, of Article XV, TERMINATION, (iii) of the Termination Payment; or (iv) under any indemnity or reimbursement obligation hereunder related to claims of third parties.

18.14 TIME IS OF THE ESSENCE

Contractor acknowledges that timely achievement by Contractor of Mechanical Completion, Provisional Acceptance and Final Acceptance by the applicable scheduled date therefore is essential to FPL, and therefore TIME IS OF THE ESSENCE in performing all of Contractor's obligations set forth herein.

18.15 RECORDS RETENTION

Contractor agrees to retain for a period of five (5) years from the Final Acceptance Date all records relating to its performance of the Work or Contractor's warranty obligations herein, and to cause all Subcontractors and Vendors engaged in connection with the Work or the performance by Contractor of its warranty obligations herein to retain for the same period all their records relating to the Work.

18.16 SUCCESSORS AND ASSIGNS

Subject to Section 18.1, ASSIGNMENT, this Agreement shall be binding on the Parties hereto and on their respective successors and assigns.

18.17 FINANCING PARTIES' REQUIREMENTS

Contractor acknowledges that FPL may borrow certain funds from the Financing Parties for the construction of the Plant and that, as a condition to making loans to FPL, the Financing Parties may from time to time require certain documents from, and agreements by, Contractor and its Subcontractors and Vendors. In connection therewith, Contractor agrees to furnish to the Financing Parties, and to cause its Subcontractors and Vendors to furnish to the Financing Parties, such written information, certificates, copies of invoices and receipts, lien waivers (upon payment), affidavits, consents to assignment of the Contract Documents and other like documents as the Financing Parties may reasonably request. In addition, Contractor agrees to accept all revisions or amendments to the Contract Documents which are reasonably requested by the Financing Parties in order to facilitate Financial Closing, provided that such revisions or amendments are of a nature typically obtained by financing parties in non-recourse financing. Upon the request of the Financing Parties, as a condition precedent to Financial Closing, Contractor shall state in writing whether or not it is satisfied with FPL's performance to that date.

18.18 FINANCIAL ASSURANCES

18.18.1 In the event that there is a default under Section 15.1.19, then, in addition to any other remedies that FPL may have under this Agreement or otherwise, FPL may inform Contractor of such determination and Contractor shall have ten (10) Business Days after receipt of notice of such determination from FPL to meet with FPL's senior management and provide assurance reasonably acceptable to FPL that Contractor is capable of performing and completing the Work and its obligations under the Contract Documents.

18.18.2 In the event such assurance is not acceptable to FPL, as determined by FPL in its sole discretion, Contractor shall immediately as requested by FPL:

(a) Require direct payment or co-payment to Subcontractors and any such payments or co-payments shall be credited against amounts due to Contractor under the Agreement;

(b) Adjust the amount of Work to be performed by Contractor and in good faith negotiate corresponding adjustments in the Contract Price and, if applicable, Critical Milestones; and/or

ECRC-08-2931 HEARING EXHIBIT - 00000101

(c) Assign to FPL any agreement or purchase order with a Subcontractor or Vendor, provided that:

(i) FPL shall assume the obligations under such agreement or purchase order accruing after the date of such assignment;

(ii) If requested by FPL, Contractor shall remain responsible for administering and managing such agreement or purchase order (including enforcing the warranty obligations thereunder);

(iii) In no event shall Contractor be relieved of its obligations under this Agreement, including its obligation to achieve Provisional Acceptance or Final Acceptance as a result of such assignment; and

(iv) If Contractor remains responsible for administering and managing agreements or purchase orders pursuant to subparagraph (ii) above, then in no event shall Contractor be entitled to an FPL Caused Delay, Force Majeure Event or other relief in connection with any matter or claim arising out of or in any way related to FPL exercising its rights pursuant to this Section 18.18.

18.19 WAIVER OF CLAIMS.

18.19.1 In the event that this Agreement is terminated by FPL in accordance with its terms, and FPL subsequently signs an agreement to complete the Work (or any portion thereof) with any Person, then Contractor shall and shall cause its Affiliates, including Contractor Parent Company, to waive the right to make any claims (other than claims by Contractor with respect to amounts specifically provided herein to be paid to Contractor in the event of a termination hereunder) against FPL or any Person with whom FPL negotiates or executes an agreement for completion of any portion of the Work based upon:

(a) Such termination;

(b) Any subsequent negotiations with any Person; and

(c) Execution of such agreement and performance thereunder.

Such waiver includes, without limitation, a waiver of any claims against FPL and any Person with whom FPL negotiates or executes an agreement for completion of any portion of the Work, for tortious interference with business relationships.

18.19.2 Contractor agrees to reimburse, indemnify, defend and hold FPL, the Financing Parties and their Affiliates and each of their respective directors, officers, employees, representatives, agents, advisors, consultants, counsel and assigns harmless from and against, on an After-Tax Basis, any and all losses, claims, obligations, demands, assessments, penalties, liabilities, costs, damages and expenses (including attorneys' fees and expenses) for any claim made by Contractor or any of the above entities pursuant to paragraphs (a), (b) or (c) of Section 18.19.1, above. Contractor expressly agrees that any Person with whom FPL negotiates or executes an agreement for completion of any portion of the Work is an express third party beneficiary of this Section.

18.20 ACCEPTANCE OR REJECTION IN BANKRUPTCY.

18.20.1 Notwithstanding anything contained in this Agreement to the contrary, if an order for relief under Chapter 11 of the Bankruptcy Code is entered with respect to Contractor during the term of the Agreement, then Contractor acknowledges and agrees that it will, subject to Bankruptcy Court approval, formally assume or reject, subject to the requirements of 11 U.S.C. §365, the Agreement within seven (7) days of delivery of written request for such action by FPL. If Contractor fails to timely move for approval or rejection of the Agreement, it acknowledges and agrees that:

(a) It will not contest or in any way otherwise take any action to oppose such a motion filed by FPL or the lifting of the automatic stay of 11 U.S.C§362 to permit FPL to enforce its rights under the Agreement (the "Lift Stay Order");

ECRC-08-2932 HEARING EXHIBIT - 00000102

(b) It waives all rights it may have under 11 U.S.C. §362(f);

(c) It hereby consents to the ex parte entry of the Lift Stay Order pursuant to 11 U.S.C. §362(f); and

(d) At the option of FPL, it hereby agrees that it will execute an agreed Lift Stay Order on forty-eight (48) hours' notice.

18.20.2 Contractor acknowledges and represents to FPL and agrees that:

(a) It is familiar with the Agreement and the importance of completing its obligations under the Agreement on time and in accordance with its terms; and

(b) Based upon such familiarity, it is critical to performance of its obligations under the Agreement that FPL have prompt and immediate access (in accordance with the requirements of this Agreement) to its contractual remedies under the Agreement in the event of a Contractor Event of Default.

18.21 CONTRACTOR'S LICENSE

Contractor hereby states and FPL acknowledges that Contractor does not presently hold a license as a qualified business entity under Fla. Stat. Chapter 489 (a "Florida Contractor's License"), but that an application for such qualification has been submitted to the Florida Department of Business and Professional Regulation for processing. FPL further acknowledges its full knowledge of Contractor's failure to have a Florida Contractor's License status and hereby agrees that FPL shall not challenge the enforceability of this Agreement based on Contractor's failure to have a Contractor's License as of the date of the execution of this Agreement. In order to satisfy the requirements of this Agreement, Contractor hereby covenants, warrants and agrees that it shall receive all proper licenses required to perform the work more particularly described herein prior to beginning physical work on the Project, including but not limited to a Florida Contractor's License.

ECRC-08-2933 HEARING EXHIBIT - 00000103

HEARING EXHIBIT - 00000108

Appendix A
SCOPE OF WORK

1.0 PROJECT DESCRIPTION

1.1 This project consists of the installation of the following ground mounted, single axis tracking, photovoltaic (PV) power generation systems:

1.1.1 A 25 MW (net) photovoltaic power generation system to be located in Desoto County, FL. This installation will be connected to FPL's transmission system.

2.0 SCOPE OF WORK

2.1 Work by Contractor

2.1.1 The Work to be provided by Contractor shall include all work (except for those items specifically excluded) required to deliver a PV system ("Plant") capable of operating in accordance with the attached performance specifications, laws and permits, and in accordance with the project milestone schedule. Contractor's scope of work shall include, but shall not necessarily be limited to, the engineering, design, supply, delivery, installation, construction, training, start-up, and testing, as necessary to deliver the commercially operational Plant. Contractor shall design and construct the Project in accordance with this Appendix A, Scope of Work, and all of the Exhibits attached hereto. The following equipment, material and services shall be provided:

2.1.2 Structural systems as necessary to support photovoltaic panels, inverters, switchgear, circuit breakers, protective relaying equipment, control systems, transformers, enclosures, and other components.

2.1.3 Electric systems for all Plant services including power wiring, switchgear, duct banks, cable trays, conduit, circuit breakers, disconnect switches, inverters, instruments, transformers, protective relaying, lighting, and other components as required.

2.1.4 Instrumentation, controls, interconnecting control wiring, panels, cable tray and/or conduits required for the complete individual equipment and system controls.

2.1.5 Lighting fixtures, lighting panels, convenience receptacles, wiring, raceways and other components required for a complete lighting system, including site access and site area lighting.

2.1.6 Grounding rods and other components for a complete grounding system and lightning protection system.

2.1.7 A condition monitoring system for local and remote monitoring. Remote monitoring shall be capable of connecting to the Internet for web-enabled data monitoring.

2.1.8 AC kWh meter cabinets for FPL provided primary and backup revenue meters.

2.1.9 Site meteorological station(s) as required to obtain data to determine system performance.

2.1.10 All required equipment tests and inspections.

2.1.11 Engineering and technical support services for permits and licenses that require Contractor provided design and information. Contractor shall use best efforts in supplying support for all FPL licensing and approval requirements.

2.1.12 Site Security during construction and commissioning. Permanent site security system including perimeter fencing, and four (4) manual gates.

2.1.13 Construction consumables through Provisional Acceptance. Consumables will include but not be limited to chemicals, fuses, and other supplies. Contractor will also supply all necessary electrical power and water required for construction.

2.1.14 Delivery, unloading, and storage of all Contractor supplied equipment.

2.1.15 Operating tests to demonstrate guaranteed performance.

2.1.16 All calculations necessary for proper sizing of electrical and mechanical equipment and systems to insure safe and reliable plant operation under all plant operating modes.

2.1.17 Contractor shall comply with all permit requirements. Contractor shall develop an environmental control program that incorporates all permit and Exhibit A

ECRC-08-2939 HEARING EXHIBIT - 00000109

(Environmental Rules for Contractors) requirements for the construction and startup activities at the Job Site.

2.1.18 Contractors shall have a safety program for the site that incorporates all OSHA and Appendix X (Safe and Secure Workplace Policy) requirements.

2.1.19 Temporary facilities for FPL's site staff during construction and commissioning. For bid purposes assume space is required for 4 people.

2.1.20 Deleted.

2.1.21 Installation of FPL provided metering transformers and the supply and installation of conduits from the metering transformers to the meter cabinet. FPL shall provide the revenue metering cables.

2.2 Work by FPL

2.2.1 FPL will provide a permitted, cleared, and level graded site.

2.2.1.1 Site development and preparation includes access roads, grubbing, clearing, site leveling, site landscaping and soil stabilization. The maximum change in elevation shall be 7% in any direction.

2.2.2 Utility grade AC kWh meters will be supplied and installed by FPL. Primary and backup meters will be provided.

2.2.3 FPL will prepare and submit the Small Generator Interconnection Request. The Interconnection Study will be provided to the Contractor within 30 days of the effective contract date.

2.3 Boundary and Interface Limits

2.3.1 All work provided by Contractor shall be within the site boundary limits.

2.3.1.1 The site boundary is detailed in Exhibit C (Site Boundary limit).

2.3.1.2 The site boundary existing conditions and proposed Sunshine Substation location is detailed in Exhibit D (Site Development Plan).

2.3.1.2.1. Existing conditions shown are for informational use only and not for construction.

2.3.1.2.2. The Sunshine Substation location and layout are for informational use only and not for construction.

2.3.1.3 Contractor shall connect into, interface or terminate at the connection to 23 kV FPL distribution.

2.3.1.4 The interface location to be the Contractor-provided switch cabinet from which the Plant output will leave the site boundary at distribution or transmission voltage. FPL to provide interconnection between the switch cabinet and FPL Sunshine Substation.

3.0 PLANT DESIGN CRITERIA

3.1 Site Location

3.1.1 The Plant will be situated in Desoto County, FL near Arcadia.

3.1.2 The plant location is 27.30°N, 81.70°W.

3.1.3 Design Data

3.1.3.1 Range of Ambient Conditions: The Plant shall be capable of continuous operation between the following extreme temperatures:

3.1.3.1.1. 104°F maximum ambient temperature.

3.1.3.1.2. 18°F minimum ambient temperature

3.1.3.2 Wind Load per Florida Building Code, 2004, effective July 1, 2005 as amended by Desoto County.

3.1.3.3 Seismic Load per Florida Building Code, 2004, effective July 1, 2005 as amended by Desoto County

ECRC-08-2940 HEARING EXHIBIT - 00000110

3.1.3.4 Precipitation:

3.1.3.4.1. Annual Average = 49.34"

3.1.3.4.2. Maximum Monthly Average = 7.81"

3.1.3.4.3. Minimum Monthly Average = 1.76"

3.1.3.4.4. One day maximum = 7.51"

3.1.3.5 Design Storm Events, 24 hour precipitation

3.1.3.5.1. 10 year (10% probability) – 8.0 "

3.1.3.5.2. 25 year (4% probability) – 9.0"

3.1.3.5.3. 110 year (1% probability) – 12.0"

Note 1: For storm water detention, retention, and evaporation pond facilities unless specific state or local regulations are more stringent.

Note 2: For site drainage facilities unless specific state or local regulations are more stringent.

Note 3: For site drainage system without causing damage to major plant facilities.

3.1.3.6 Freeze Protection: Freeze protection shall be provided for and limited to all instrumentation and instrument sensing lines.

3.2 Operational Criteria

3.2.1 The Plant shall be designed for fully automatic, unmanned operation. This shall include startup, shutdown, abnormal operating condition (i.e. voltage, frequency excursions) detection and shutdown, data monitoring, etc.

3.3 Plant Performance

3.3.1 Contractor shall design and construct the Plant to produce the specified net electrical AC power of 25 MW, based on Standard Test Conditions.

3.3.2 Contractor shall provide a recommended spare parts list, including the proposed pricing for spare parts within 30 days of the Contract effective date.

3.3.3 The Plant shall be designed to maximize the annual energy production.

3.4 General Requirements

3.4.1 The systems and equipment supplied by Contractor shall be suitable for the environment in which they will be located and shall be designed for a Plant life of at least thirty (30) years.

3.4.2 The specifications provided herein are intended to identify overall system requirements and certain specific hardware requirements, which FPL requires to ensure that the Plant provided by Contractor shall operate reliably and safely during the Plant's design life, and that the Plant shall be able to be operated and maintained in a cost-effective manner. The adequacy of the overall system design to meet these requirements is the responsibility of Contractor.

3.4.3 The general system performance criteria are defined in this Technical Specification and the Exhibits. Contractor is responsible for ensuring that all system performance criteria included in this specification are met by the final Plant design.

3.5 Reliability and Maintainability

3.5.1 The design philosophy used to attain high reliability and maintainability shall be consistent with industry standards including:

3.5.1.1 Design margins and de-rating factors in sizing equipment to account for wear, performance degradation, voltage drops, and other conditions. Performance guarantees, however, shall be based on the new and clean condition.

ECRC-08-2941 HEARING EXHIBIT - 00000111

3.5.1.2 Provisions to isolate and bypass equipment for repair where feasible without shutdown of the system of which it is a part, such as repairing a component with minimized need to shut down surrounding components.

3.5.1.3 Access provisions for maintenance of equipment items known to require frequent service, such as inverters. Stairs shall be provided to elevated locations when access is required on a daily or frequent basis.

3.5.1.4 Access and removal provisions for all equipment parts from Plant using conventional maintenance equipment.

3.5.1.5 Compliance with manufacturer requirements for pull space and recommendations for laydown/storage areas.

3.5.2 Contractor shall provide as part of the equipment operations and maintenance manual, the typical daily, monthly, and annual maintenance activities expected for the Plant. This shall include inspection and testing activities, preventative/periodic maintenance activities, and recommended equipment replacement intervals for the Plant.

3.6 Noise

3.6.1 The Plant shall meet all applicable Federal, State, and local noise requirements.

3.6.2 The near-field A-weighted sound pressure level resulting from each balance-of-plant individual equipment package shall not exceed a spatial average of 85 dBA at a distance of three (3) feet from the equipment face and five (5) feet above the ground and personnel platforms unless approved by FPL. Contractor shall evaluate near field noise level on an individual equipment basis as certain Plant equipment is inherently noisy and special noise control measures may be necessary to comply with the 85-dBA criteria. For certain equipment, these noise control measures are not practical for reasons of performance, cost, maintenance access, heat buildup, space limitations, safety, etc. Therefore, if it is not reasonable and feasible to meet the 85-dBA criteria, administrative controls shall be implemented. Administrative controls include posting warning signs, prescribing hearing protection, and limiting access to ensure worker noise exposure does not exceed a 90 dBA average over an eight (8) hour period. The intent of this requirement is to control occupational noise exposure levels, protect worker hearing, and improve working conditions. The noise levels must conform to Occupational Safety and Health Act and all applicable State and local requirements.

3.6.3 In the design and layout of equipment, Contractor shall endeavor to attain permissible noise exposure levels, without the use of hearing protection. In areas where this is not practical, as discussed in Section 3.7.2, above, Contractor shall conduct an in-plant noise survey to identify the in-plant areas that are exposed to A-weighted sound pressure levels exceeding 85 dBA. Contractor shall designate areas over 85 dBA as high noise level areas with signs in the Plant, and shall indicate boundaries on the as-built general arrangement drawings for the mandatory wearing of hearing protection.

3.7 Miscellaneous Technical Requirements

3.7.1.1 Long-term operability, maintainability and safe operation of the Plant is of primary concern to FPL. As a result, Contractor shall take prudent measures in the design to facilitate ease of operation and maintenance and provide adequate access to all equipment.

3.8 Codes, Regulations and Standards

3.8.1.1 Contractor shall design and construct the Plant in accordance with all federal, state and local laws and the codes, regulations and standards listed below. The codes and standards utilized shall be the latest editions in effect on the effective date of this Contract. Where these codes do not govern specific features of the equipment or system, Contractor and Original Equipment Manufacturer (OEM) standards shall be applied. Where local codes or ordinances will have an impact on the design (e.g. building height restrictions) FPL and Contractor shall jointly address these with the local authorities having jurisdiction.

ECRC-08-2942 HEARING EXHIBIT - 00000112

3.8.2 Federal Regulations

3.8.2.1 Federal Environmental Standards

3.8.2.1.1. US Environmental Protection Agency Regulations

A. Resource Conservation and Recovery Act Regulations

B. Clean Water Act

C. Clean Air Act

D. Oil Pollution Act

E. Comprehensive Environmental Response, Compensation and Liability Act

F. Emergency Planning and Right-to-Know Act

G. Toxic Substances Control Act

3.8.2.1.2. National Environmental Policy Act

3.8.2.1.3. US Fish and Wildlife Regulations (e.g. Endangered Species Act)

3.8.2.1.4. US Army Corps of Engineers Regulations

3.8.2.2 Occupational Safety and Health Act (OSHA)

3.8.2.2.1. 29 CFR 1910 Occupational Safety and Health Standards

3.8.2.2.2. 29 CFR 1926 Safety and Health Regulations for Construction

3.8.2.3 US Department of Transportation Regulations

3.8.2.4 Code of Federal Regulations

3.8.3 Applicable State, County and Local Codes and Regulations

3.8.3.1 Florida Department of Environmental Protection Regulations

3.8.3.2 Florida Water Management District Regulations

3.8.3.3 Florida Fish and Wildlife Conservation Commission Regulations

3.8.3.4 Florida Department of Community Affairs Regulations

3.8.3.5 County Regulations

3.8.3.6 Florida Department of Transportation Regulations

3.8.3.7 Local Codes and Ordinances

3.8.4 Applicable Industry Codes and Standards from the following list. Alternative standards may be used only upon FPL's acceptance of Contractor's written request, which shall specify the proposed alternative standard, why such change is necessary and how compliance is to be achieved.

3.8.4.1 Mechanical

3.8.4.1.1. ANSI - American National Standards Institute,

3.8.4.1.2. PTC - Power Test Codes - Applicable Test Codes

3.8.4.1.3. ASNT - American Society for Nondestructive Testing

3.8.4.1.4. ASTM - American Society for Testing and Materials

3.8.4.1.5. AWS - American Welding Society

3.8.4.1.6. SSPC - Steel Structures Painting Council

3.8.4.1.7. MSS – Manufacturers Standardization Society

3.8.4.2 Electrical

3.8.4.2.1. ANSI - American National Standards Institute

3.8.4.2.2. FM - Factory Mutual

3.8.4.2.3. ICEA - Insulated Cable Engineers Association

3.8.4.2.4. IEEE - Institute of Electrical and Electronics Engineers

3.8.4.2.5. IESNA - Illuminating Engineering Society of North America

ECRC-08-2943 HEARING EXHIBIT - 00000113

3.8.4.2.6. ISA - International Society for Measurement and Control
3.8.4.2.7. LPC - Lightning Protection Code
3.8.4.2.8. NEC - National Electrical Code
3.8.4.2.9. NEMA - National Electrical Manufacturers Association
3.8.4.2.10. NESC - National Electrical Safety Code UL - Underwriters
3.8.4.2.11. UL Underwriters Laboratories
3.8.4.2.12. NFPA – National electric code (NEC)
3.8.4.2.13. EN – European Norms
3.8.4.2.14. IEC – International Electric Code

3.8.4.3 Civil/Structural/Architectural

3.8.4.3.1. ACI - American Concrete Institute
A. ACI 318 - Building Code Requirements for Reinforced Concrete
B. ACI Manual of Standard Practice
C. ACI 350R – Environmental Engineering Concrete Structures

3.8.4.3.2. ADA - Americans with Disabilities Act
3.8.4.3.3. AISC - American Institute of Steel Construction
3.8.4.3.4. AISI - American Iron and Steel Institute "Specification for Design of Cold-Formed Steel Structural Members," Parts 1 and 2
3.8.4.3.5. AWS - American Welding Society
3.8.4.3.6. FBC – Florida Building Code
3.8.4.3.7. SSPC - Steel Structures Painting Council

4.0 MECHANICAL SYSTEMS AND EQUIPMENT

4.1 General

4.1.1 Motors

4.1.1.1 General Purpose Induction Motors, 250 HP and below, shall meet NEMA (MG-1), NEC and the following standards and criteria:

4.1.1.1.1. Class F insulation/B temperature rise, Service Factor = 1.15.
4.1.1.1.2. Rated ambient forty degrees Centigrade (40°C).
4.1.1.1.3. TEFC Enclosure for outdoor applications, ODP Enclosure for indoor application.
4.1.1.1.4. Standard Efficiency.
4.1.1.1.5. Standard Balance Rotors or better.
4.1.1.1.6. Space heaters in all motors 25 HP and above (static motor winding heaters are not an acceptable alternate).

5.0 ELECTRICAL SYSTEMS AND EQUIPMENT

5.1 General Requirements

5.1.1 The Plant electrical systems shall be designed to supply power to auxiliary electrical equipment and systems.

5.1.2 Voltage insulation levels, equipment interrupting and continuous current capacities, circuit protection and mechanical strengths shall be selected and coordinated in accordance with calculations and the recommendations of IEEE, ICEA, NEMA and ANSI

5.1.3 Environmental Conditions

HEARING EXHIBIT - 00000114
ECRC-08-2944

5.1.3.1 MV and LV switchgear, MV and LV MCC's, inverters, DC systems (battery and charger systems), DC and AC distribution panels may be located in pre-fabricated walk-in Power Distribution Centers (PDC's). PDC's shall be environmentally controlled to meet the electrical equipment ambient requirements.

5.1.3.2 Conduit and cable tray entry to outdoor enclosures, panels, switchgear, cabinets, etc. shall not be from the top. Bottom entry is preferred for rain protection. If bottom entry is not practical and side entry is required, entrances shall be installed with watertight fittings or FPL approved flashings.

5.1.3.3 Enclosures for all equipment shall be in accordance with NEMA Standards and type number and shall be suitable for their location as follows:

5.1.3.3.1. NEMA 1.... Indoors (General Purpose)

5.1.3.3.2. NEMA 3R. Outdoors and Indoors (in wet locations)

5.1.3.3.3. NEMA 4.... Outdoors and Indoors (in wet locations – dust tight)

5.1.3.3.4. NEMA 4X. Outdoors - Indoors in wet and corrosion resistant locations

5.1.3.3.5. NEMA 7.... Classified Areas, Class I, Div 1 Group D

5.1.3.3.6. NEMA 9.... Classified Areas, Class II, Div 1

5.1.3.3.7. NEMA 12.. Non-environmentally controlled indoor dusty areas

5.1.3.3.8. Enclosures containing non-arching devices (sealed contacts, terminals, etc.) may be NEMA 12 or 4X in Class I, Division 2 areas.

5.2 Raceway, and Miscellaneous Services

5.2.1 Conduit and Cable Tray

5.2.1.1 Underground conduits shall be schedule 40 PVC direct buried rated or concrete encased rated. Underground conduits may be directly buried in areas that do not require concrete encased duct banks for structural considerations. Use of buried cable is acceptable provided it meets applicable industry codes and standards.

5.2.1.2 Aboveground conduit shall generally be RGS. Aluminum, PVC schedule 80, or PVC-coated conduit may also be used in corrosive areas. Aboveground conduit shall be ¾ inch minimum except ½ inch conduit may be used to connect to instruments or devices with ½" nipples as required.

5.2.1.3 Connections to equipment requiring removal from service or subjected to vibration or movement shall be made with flexible conduit. Liquid tight flexible metal conduit and approved fittings shall be used for outdoor and indoor equipment.

5.2.2 Cable Tray

5.2.2.1 Cable tray shall be per NEMA VE-1.

5.2.2.2 All cable trays, excluding instrumentation trays, shall be provided with external ground wire bonded to the tray and connected to the Plant ground grid at a pre-determined spacing not to exceed 100 feet.

5.2.2.3 Cable trays shall be aluminum or galvanized steel ladder type with tray covers where mechanical protection is necessary. All signal circuits (for levels 1&2) carrying trays shall be galvanized steel or aluminum solid bottom or ventilated trough trays with tray covers

ECRC-08-2945 HEARING EXHIBIT - 00000115

5.3 Power and Instrument Cable

5.3.1 For 4160v, Medium voltage cable shall be rated 8kV, 90°C or 105°C, stranded copper conductor, shielded, EPR insulation (100% level), and an overall PVC, CPE or CSPE cable jacket. (Note: 5kV at 133% level may be used in lieu of 8kV).

5.3.2 For 6900v, Medium voltage cable shall be rated 8kV, 90°C or 105°C, stranded copper conductor, shielded, EPR insulation (133% level), and an overall PVC, CPE or CSPE cable jacket. (Note: 15kV at 100% insulation may be used in lieu of 8kV.)

5.3.3 Multi-conductor control and power cable shall be rated 600 volts, 90°C, stranded copper conductors, XLP or EPR insulation and an overall PVC, CPE or CSPE cable jacket.

5.3.4 Single conductor wire and cable shall be rated 600 V, 90°C for XLP and 90°C or 105°C for EPR insulation. Single conductor 600 V tray cable greater than #1/0 AWG shall have EPR insulation with a PVC, CPE or CSPE cable jacket. Non-jacketed FREP insulation with appropriate UL flame test may also be used for large single conductor cables.

5.3.5 Single pair instrument cable shall be rated 600 V, XLP or PVC insulation, twisted shielded pairs with drain wires and a PVC, CPE or CSPE cable jacket.

5.3.6 Multi-pair instrument cable shall be rated 600 V, XLP or PVC insulation, twisted shielded pairs with drain wires, overall shield, and a PVC, CPE or CSPE cable jacket.

5.3.7 All custom control panel wiring shall be insulated with 600 V NEC type SIS insulation and all panel wiring shall have wire numbers for identification. Vendor supplied control panels of a proven field design may provide their field proven cable insulation.

5.3.8 The allowable ampacity of power cables shall be in accordance with ICEA and NEC requirements.

5.3.9 Lighting and fixture cable shall be furnished with 600 volt insulation.

5.3.10 Cables shall meet IEEE 383 flame test requirements. All cables installed in cable tray shall be rated for such installation.

5.3.11 For 1000 v, Low voltage cable shall be rated 1kV, 90°C or 105°C, stranded copper conductor, EPR insulation (100% level), and an overall PVC, CPE or CSPE cable jacket.

5.4 Inverters

5.4.1 Inverters shall be utility grade and specifically designed for PV installations.

5.4.2 Inverters shall meet the following minimum standards:

5.4.2.1 UL 1741 - Standard for Inverters, Converters, Controllers and Interconnection System Equipment for Use With Distributed Energy Resources. IEC 62103 or EN 50178 Standards for Inverters for use with 1000 volt DC systems. For 1000 volt DC systems, in the event of conflict, IEC Standards supersede UL Standards.

5.4.2.2 IEEE 929-2000 - Recommended Practice for Utility Interface of Photovoltaic (PV) Systems

5.5 Transformers

5.5.1 Contractor shall design and furnish and install interconnecting transformer(s) that step-up the inverter output voltage to the FPL distribution systems nominal voltage. The interconnecting transformer(s) shall be designed to provide zero sequence current to a ground fault on the FPL feeder (i.e. the PV generation shall be interconnected to the distribution system via a grounded system according to the IEEE-1547 standard).

5.5.2 The Contractor shall provide the interconnecting circuit breaker on the high side of each of the interconnecting transformer(s). The circuit breaker shall be rated for the distribution system voltage and short circuit available current at each corresponding location.

ECRC-08-2946 HEARING EXHIBIT - 00000116

6.0 CIVIL AND STRUCTURAL FEATURES

6.1 Civil Design Basis

The design for new facilities will require new surveys and topographic information as required for the areas involved in the new construction. Contractor shall be responsible to collect regional and local information regarding regional and local geology and seismology. Contractor shall be responsible for all surveys that are required to determine the final site plans. Contractor shall also be responsible to perform geotechnical investigations as necessary to develop the final site plan.

6.1.1 Surface Surveys and Investigations

6.1.1.1 The position of any surface penetration of underground utilities (i.e., valve station, manhole) within the construction area shall be physically verified by Contractor as part of the site survey.

6.1.1.2 Contractor shall be solely responsible for furnishing all labor, materials, tools and equipment to perform all surveying work and provide all services necessary for, or incidental to construction of buildings, new utilities, and other new facilities; and to establish and maintain benchmarks, to make measurements to verify location of completed construction, and to survey alignment to existing property boundaries. Underground utilities, exclusion zones, and surface penetrations shall be identified on Contractors drawings.

6.1.2 Minimum Soil Requirement Assumptions

6.1.2.1 The Project design shall be based on the following minimum soil requirements:

6.1.2.1.1. 200 psf/ft minimum allowable lateral bearing pressure.

6.1.2.1.2. 400 psf minimum allowable skin friction resisting uplift.

6.1.2.1.3. 2000 Ohm-cm minimum soil resistivity (For Civil/Structural considerations only).

6.1.2.1.4. 7.0 pH minimum.

6.1.2.1.5. Refer to Section 6.3 for maximum allowable deflections.

6.1.3 Easement and Setbacks

6.1.3.1 Contractor shall observe all easements unless specific exceptions are obtained from FPL. Easements shall be identified on the Site Plan Drawings to be developed by Contractor. Minimum setback requirements shall be in accordance with local zoning codes and ordinances.

6.1.4 Contractor shall develop and provide analyses and detailed designs for dewatering systems.

6.2 Site Preparation

The Project design shall take into account existing site conditions with respect to soil characteristics and drainage. Contractor will be responsible for preparing, submitting and securing of all required construction-related permits. Contractor will also be required to prepare and submit any and all site compliance certifications regarding work completion to applicable agencies (e.g. as-built certification of storm water management system, if required).

6.2.1 Site Maintenance

6.2.1.1 All temporary access roadways used by Contractor shall be maintained in serviceable condition.

6.2.1.2 Excess and unsuitable soils will be disposed of on site.

6.2.1.3 Contractor shall be responsible for compliance with State and local requirements for fugitive dust emissions. Contractor shall prevent the spread of dust during its operations.

6.2.1.4 On-site open burning will not be permitted unless approved by appropriate local authorities and FPL.

6.2.2 Fill and Construction Drainage

ECRC-08-2947 HEARING EXHIBIT - 00000117

6.2.2.1 Any fill that is brought onsite from any offsite location shall meet FPL's clean fill criteria (Exhibit B, Clean Fill Criteria). Testing of the fill at the offsite source shall be performed to assure that the fill meets these criteria.

6.2.2.2 Contractor shall be responsible for installing and maintaining adequate drainage and preventing soil erosion at the site during construction in accordance with State and local sediment and erosion control rules, regulations, and ordinances.

6.2.2.3 Final grade elevations shall be chosen to provide good foundation support for major structures and equipment, and minimize the disposal of excess materials. The foundation design will be based on the recommendations presented in the final geotechnical report.

6.2.3 Excavating, Filling and Backfilling

6.2.3.1 Contractor shall be responsible for furnishing all supervision, labor, tools, materials and equipment, performing all operations in connection with excavating of all materials (excluding pre-existing Hazardous Materials), obtaining fill and backfill materials, installing and compacting of fill and backfill materials and producing final grade lines across the Plant.

6.2.3.2 Contractor shall remove from the site all rubbish and debris found thereon, so as to prepare the site for excavation (Hazardous Materials are excluded).

6.2.3.3 Contractor shall take appropriate measures, including dewatering, to prevent the foundation and trenched areas from becoming unstabilized by the flow of water into the excavation or by cave-ins or slippage.

6.2.3.4 Slopes of excavated areas shall be protected from rutting and scouring. Surface water shall not be permitted to flow uncontrolled down any embankment slope.

6.2.3.5 In areas requiring vehicle access or crane placement, suitable subgrade shall be provided to sustain traffic loads.

6.2.3.6 Contractor's quality of work, including excavating, filling, backfilling, compacting, dewatering, subgrade preparation and stabilization, shoring and drainage shall comply with the geotechnical engineer's recommendations, the applicable American Society for Testing and Materials (ASTM) standards and any State and local standards.

6.2.3.7 Before backfilling, excavated areas to be backfilled shall be cleared of all extraneous materials.

6.2.4 Contractor shall recommend the finish grade material and ground cover to minimize future maintenance requirements.

6.2.5 Control of Water

6.2.5.1 Dewatering to remove groundwater, including any rainwater or surface runoff that enters excavations shall be managed in accordance with the Stormwater Pollution Prevention Plan, South West Florida Water Management District (SWFWMD), County and FDEP requirements.

6.2.6 Soil Erosion and Sediment Control

6.2.6.1 Contractor shall develop soil erosion and sediment control plans. Contractor shall obtain and conform to the local erosion and sediment control regulation.

6.2.6.2 Soil erosion and sediment controls shall generally consist of control of runoff, vegetative stabilization, and sediment traps. All slopes, drainage ditches and other exposed areas shall be stabilized by vegetation. Sediment traps such as hay bales or synthetic filter fabric (silt fence) shall be installed around catch basin inlets, culvert inlets and at the top and toe of slopes. Temporary sedimentation basins shall be provided during construction and converted to permanent basins. Contractor shall maintain erosion and

ECRC-08-2948 HEARING EXHIBIT - 00000118

sediment control systems throughout construction at the site and any soil disposal areas.

6.2.7 Drainage

6.2.7.1 Contractor shall develop and implement a temporary drainage system for the construction phase of the project. The drainage system shall comply with all federal, State and local regulations. Included shall be the necessary sedimentation and erosion control measures during both construction and permanent operational phases. The drainage system shall be designed to comply with the July, 2002, 40CFR112 Spill Prevention Countermeasures and Control rule changes published in the Federal Register.

6.2.7.2 Contact and non-contact surface runoff from the power block and associated facilities will be collected and routed to on-site stormwater ponds. Construction area runoff shall also be routed to on-site stormwater ponds.

6.2.7.3 All swales shall be erosion control protected by grass and, if required, with man made material or rip rap.

6.3 Foundations

6.3.1 Foundations shall be reinforced concrete designed to support loads imposed. Driven pier foundations are acceptable if design is based on applicable wind loading requirements and allowable bearing values for soil.

6.3.1.1.1. Maximum vertical deflection, based on 4 ½" OD structural member, to be ¾ inches.

6.3.1.1.2. Maximum horizontal deflection, based on 4 ½" OD structural member, to be 1 inch.

6.3.2 Type of foundations required and allowable bearing values for soil shall be confirmed or as recommended by the geotechnical engineer based on the existing subsurface conditions. Differential settlement of foundations due to cut and fill affects shall be calculated and considered in the foundation design. Foundations for heavy equipment are expected to be totally on cut or on fill. If necessary, lean concrete may be added to minimize differential settlements for foundations that are partially on cut and partially on fill. The following foundation design criteria shall be used:

6.3.2.1 Total settlement: 1-1/2 inches. Differential settlement: 0.3 percent slope between adjacent column support points.

6.3.2.2 Foundations shall be designed using static analysis techniques assuming rigid elements and linear soil pressure distribution such that the allowable settlement and bearing pressure criteria are not exceeded. The minimum factors of safety against overturning and sliding shall be 1.5 and 1.25, respectively.

6.4 Concrete

6.4.1 Reinforced concrete structures shall be designed and constructed in accordance with ACI 318, Building Code Requirements for Reinforced Concrete. Concrete work shall conform to the requirements of ACI 301, Specifications for Structural Concrete

6.4.2 Concrete production, proportioning and placing as well as the formwork, reinforcing, joints and embedded items, repair, curing and protection shall all be in accordance with the applicable ACI Standards and Specifications. All concrete mixes shall be approved by the responsible design engineer and submitted to FPL for review and comment prior to use.

6.4.3 Grout shall be pre-packaged non-shrinking grout requiring water only, suitable for the service. Proportioning, mixing, placing, temperature, surface preparation and curing shall be in accordance with manufacturer's requirements. Contractor shall provide the required quality assurance testing.

6.4.4 Reinforcing bars shall be deformed bars conforming to ASTM A615, Grade 60. Welded wire fabric shall conform to ASTM A185.

ECRC-08-2949 HEARING EXHIBIT - 00000119

6.4.5 Cement shall be Portland cement conforming to ASTM C150, Type (as required by soil conditions).

6.4.6 Aggregates for normal weight concrete shall conform to ASTM C33.

6.5 Site Restoration

All site development areas disturbed during construction, including laydown, parking and temporary office trailers, etc. shall be restored and stabilized in accordance with post-construction stormwater drainage requirements as specified in the Permits.

6.6 Structural Design Basis

The structural design of buildings, structures and portions thereof shall be in accordance with the Florida Building Code, 2004 effective July 1, 2005, and as amended by Desoto County. Structural design loads shall be in accordance with the following:

6.6.1 Wind Loads

Wind loads shall be in accordance with the Florida Building Code, 2004 effective July 1, 2005, and as amended by Desoto County.

6.6.2 Seismic Loads

Seismic loads and element design criteria shall be in accordance with the Florida Building Code, 2004, effective July 1, 2005, and as amended by Desoto County.

6.6.3 Hydrostatic Loads

Below grade structures shall be designed to resist water pressure, corrosion and uplift.

6.7 Steel Structures and Miscellaneous Steel

6.7.1 Steel structures for buildings and equipment support shall be designed, fabricated and erected in accordance with the AISC Specification for Structural Steel Building - Allowable Stress Design and Plastic Design, the Code of Standard Practice for Steel Buildings and Bridges, and the Manual of Steel Construction - Volume II – Connections, and the requirements of OSHA. Steel structures shall also conform to the applicable ASTM Standards, the AWS Codes and RCSC's "Specification for Structural Joints" using ASTM A325 or A490 bolts.

6.7.2 Contractor shall furnish and install steel access platforms, with ladders and galvanized stairs and grating in accordance with the requirements of the Occupational Safety and Health Administration requirements. Access shall be provided for normal operation and maintenance of Plant. Stair access shall be provided where practical with ladder access provided to other less frequently accessed components.

6.7.3 Materials for structural steel and miscellaneous steel shall conform to the requirements of the American Society for Testing and Materials "Standard Specification for Structural Steel" ASTM A36/ASTM A572 Grade 50/ASTM A992, and the requirements provided herein. Structural steel required for tube girts shall conform to ASTM A500, Grade B. All structural and miscellaneous steel shall be hot dip galvanized.

6.7.4 Structural steel checkered plate shall be two-way diagonal raised pattern floor plate. Checkered plate for exterior use shall be galvanized.

6.7.5 Open-web steel joists shall comply with the Steel Joist Institute "Standard Specification and Load Tables."

6.7.6 Metal decking shall comply with SDI "Design Manual for Floor Decks and Roof Decks."

6.7.7 Steel grating shall conform to ASTM A569 with minimum 3/16-inch wide by 1-1/4 inch deep bearing bars. Structural steel grating shall be welded and hot-dipped galvanized after fabrication in accordance with ASTM A123. Grating shall be banded at edges and openings with bars of the same size as the bearing bars. Grating for exterior use shall be serrated.

6.7.8 Ship ladders are not permitted unless approved by FPL.

ECRC-08-2950 HEARING EXHIBIT - 00000120

6.7.9 Anchor bolts shall conform to ASTM A307, A36, or ASTM F1554 Grades 36, 55, and 105 with nuts conforming to ASTM A563, Grade A heavy hexagon. Anchor bolt sleeves shall conform to ASTM A501.

6.7.10 Expansion bolts shall be unfinished bolts in expansion shell anchors, or wedge bolt anchors. As an alternate Contractor can use drilled holes with anchors set in epoxy, if in accordance with equipment manufacturer requirements.

6.7.11 Anchor bolts shall be used for all structural and building columns, all major equipment, and all vibrating equipment.

6.7.12 Expansion bolts may be used for stairs, ladders, handrails, platform posts, and minor equipment. Expansion bolts shall not be used where the required bolt diameter is larger than 3/4 inch.

6.7.13 Steel pipe for handrail shall conform to ASTM A53, Type E or S, Grade B. Handrails for exterior use shall be galvanized.

6.7.14 Filler metal for welding shall conform to the requirements of AWS D1.1.

6.7.15 A member's end connection shall not have strength less than that provided by a full depth 3/8 inch thick clip angle.

6.7.16 Galvanizing, as specified herein, shall conform to the requirements of ASTM A123 or ASTM A153, as applicable.

6.7.17 Grating shall be welded bar grating, galvanized, banded and secured with clips. Metal decking shall be galvanized.

6.8 Painting

6.8.1 The Project scope shall include protective coating systems on all equipment and building materials except for stainless steel, insulated piping and concrete not exposed to a corrosive environment.

6.8.1.1 Hot-dip galvanized, in accordance with Applicable Industry Codes and Standards, is an acceptable protective coating.

6.9 Fencing

6.9.1 Site perimeter fence shall be 7 feet high and have an overall height of 8 feet from the bottom of the fabric to the top barbed wire. The fence shall have top rail, bottom tension wire, and three strands of barbed wire mounted on 45 degree extension arms. The upper strand shall be approximately 12 inches out from the fence and 12 inches above the top of the fabric. Posts shall be set in concrete as detailed.

6.9.2 Materials for site chain link fencing shall be as follows. All steel or malleable iron parts and accessories shall be hot-dip galvanized in accordance with ASTM A123 after fabrication.

6.9.2.1 Fabric - 9 gauge, 2 inch mesh; galvanized ASTM A392, Class 2; twisted selvage on top, knuckled selvage on bottom.

6.9.2.2 Posts - Steel pipe, ASTM F1083 standard weight (Schedule 40).

6.9.2.3 Line posts - 2-3/8 inch OD pipe, 3.65 lb per ft.

6.9.2.4 Terminal posts (end, corner, and pull) - 2-7/8 inch OD pipe, 5.79 lb per ft.

6.9.2.5 Gate posts (swing gates) - Gate or leaf 6 ft wide or less, 2-7/8 inch OD pipe, 5.79 lb per ft; gate or leaf over 6 ft wide and up to 13 ft, 4 inch OD pipe, 9.10 lb per ft; gate or leaf over 13 ft and up to 18 ft wide, 6-5/8 inch OD pipe, 18.97 lb per ft; gate or leaf over 18 ft wide, 8-5/8 inch OD pipe, 28.55 lb per ft.

6.9.2.6 Top Rail - 1-5/8 inch OD (Schedule 40) pipe, 2.27 lb per ft; or 1-5/8 by 1-1/4 inch roll formed sections weighing 1.35 lb per ft.

6.9.2.7 Post tops - Pressed steel, malleable iron with pressed steel extension arm, or one-piece aluminum casting with hole for top tension wire, designed to fit over the outside of the posts and to prevent entry of moisture into tubular posts.

ECRC-08-2951 HEARING EXHIBIT - 00000121

6.9.2.8 Barbed wire Galvanized, ASTM A121 Class 3; two 12-1/2 gauge steel wires with 4 point round 14 gauge barbs spaced 5 inches apart.

6.9.2.9 Stretcher bars - Steel, 3/16 by 3/4 inch, or equivalent cross-sectional area.

6.9.2.10 Fabric ties - Aluminum bands or wires.

6.9.2.11 Gate frames - 1-7/8 inch OD (Schedule 40) pipe, 2.72 lb per ft; or 2 inch square, 4.32 lb per ft.

6.9.2.12 Tension wire - Galvanized coil spring wire, 6 gauge ASTM A641 Class 3.

6.9.2.13 Setting cement - Minwax "Super Por-Rok Cement" or Master Builders "Set 45."

6.9.3 Site gates shall be swing type, hinged to swing 180 degrees from closed to open, complete with frames, latches, stops, keepers, hinges, fabric, braces, pad-locks, and three strands of barbed wire. Gate leaves, except those on walk-through gates, shall have intermediate members and diagonal truss rods as required for rigid construction and shall be free from sag or twist. Gates shall be fitted with vertical extension arms or shall have frame end members extended to carry barbed wire. Joints between frame members shall be made by welding or by means of heavy fittings and shall be rigid and watertight. Truss rods shall be not less than 3/8 inch diameter. Gate fabric shall be same as fence fabric and shall be attached to frame ends by stretcher bars, bolt hooks, or other mechanical means.

6.9.3.1 Hinges shall be heavy pattern with large bearing surfaces and shall not twist or turn under the action of the gate.

6.9.3.2 Latches shall be plunger bar type, full gate height, and arranged to engage the gate stop, except single gates less than 10 feet wide may be provided with a forked latch. Latches shall be arranged for padlocking with the padlock accessible from both sides of the gate.

6.9.3.3 Stops shall consist of a roadway plate with anchor set in concrete and arranged to engage the plunger.

6.9.3.4 Keepers shall consist of mechanical devices for securing and supporting the free end of the gates when in the full open position. Keepers shall be mounted on 2-7/8 inch outside diameter pipe posts filled with concrete and set in concrete foundations.

6.9.3.5 Gates shall be installed so that they cannot be removed without disassembly of the hardware. Hardware attachment bolts shall be peened so that removal will be difficult.

6.9.4 The installed site fence shall conform to the alignment and finish grade indicated. Unless otherwise indicated or specified, all posts shall be plumb and spaced 10 feet apart. Where necessary, the fence grade shall be adjusted to fit the ground contour by slipping the fence fabric links.

6.9.5 Ground surface irregularities shall be graded as required to minimize changes in vertical alignment and to provide a smooth profile for the fence. Clearance below the bottom of the fence shall not exceed 2 inches.

6.9.6 The plan and profile of each reach of fence between corner posts, or between corner posts and gate posts, shall be straight. Ground surfaces shall be graded as required to achieve the straight profiles before each reach of fence is installed.

6.9.7 Top rail and bottom tension wire shall be installed before the fabric. To minimize raising the bottom of the fence to gain access, bottom tension wires shall be installed in the lowest position possible (approximately 6 inches above grade) and shall be attached to each post and securely anchored at terminal and gate posts. Straight runs between braced posts shall not exceed 1,500 feet. A terminal post shall be provided at each change in slope.

6.9.8 Fabric shall be attached to the top rail and bottom tension wire at 24 inch centers and to the line posts at 15 inch centers, all on the security side of the fence. Barbed wire

ECRC-08-2952 HEARING EXHIBIT - 00000122

shall be fastened to each extension arm by internal clips or external fabric ties. Stretcher bars shall be provided at each gate, terminal, and pull post. Each stretcher bar shall be threaded through the fabric and anchored to the post at 15 inch centers by positive mechanical means.

6.9.9 Each gate and terminal post shall be braced by a horizontal pipe brace and an adjustable truss extending to an adjacent line post. Corner posts located where the deflection angle is 10 degrees or greater shall be braced in both directions.

7.0 INSTRUMENT AND CONTROL SYSTEM

7.1 General

7.1.1 The Plant's instrument and control systems shall be designed to provide for the safe and efficient start-up, operation, shutdown and emergency shutdown of the Plant.

7.2 Instrumentation General Design and Installation

7.2.1 All instruments and equipment shall be installed in a manner which assures reasonable protection against mechanical damage, wetting, or extremes of heat or cold. Instrumentation shall be stored in accordance with the manufacturer's recommendations until installation. Final locations and orientations must be selected for accessibility, repair, and calibration in place, easy access to the rear of the instruments (if needed), and for disconnection without resorting to cutting, burning, or welding.

7.3 Instrument Cabinets and Local Control Panels

7.3.1 Local Instrument Rack / Enclosure / Cabinet Installation

7.3.1.1 Instrument racks/enclosures/cabinets shall be secured to structural steel or to concrete. Racks/enclosures/cabinets shall be electrically grounded. Bolting to bare or galvanized metal shall be used for attaching a ground strap.

7.3.1.2 Prior to installation, Contractor shall ensure that instrument racks/enclosures/cabinets have sufficient clearances for the required blowdown piping and headers, door swing radius, etc., and that the racks/enclosures/cabinets are completely accessible for maintenance.

7.3.1.3 The racks/enclosures/cabinets shall be installed and anchored in place so that they are level and plumb and properly aligned in accordance with the above mounting requirements.

7.3.1.4 Racks/enclosures/cabinets shall not be supported by handrails. All instrument line penetrations into instrument enclosures/cabinets shall be through bulkhead fittings (couplings). Bulkhead couplings shall be supplied on instrument enclosures/cabinets for each instrument location. Top entry of instrument cabinets or instrument enclosures/cabinets junction boxes is prohibited. Bottom entry is the preferred method for conduits.

7.4 Local Instrument Cabinets / Racks

7.4.1 Instrument and Control Wiring and Instrument Cabinet Wiring

7.4.1.1 Both ends of conductor or wire pair shall be identified with a wire number or instrument tag number.

7.4.1.2 All necessary precautions shall be taken to maintain a high standard of cleanliness during storage and assembly. All metal chips, turnings, rust, dust, weld splatter, scale, and other particles shall be removed without destroying the continuity of the surface.

7.4.2 Marking

7.4.2.1 Contractor shall install stamped stainless steel tags for the following Contractor purchased equipment:

ECRC-08-2953 HEARING EXHIBIT - 00000123

7.4.2.1.1. All instruments shall be tagged with the appropriate instrument tag number. Tags shall be secured with stainless steel wire with ends crimped together.

7.4.2.1.2. Each local instrument cabinet shall have a stainless steel tag permanently affixed to the cabinet front.

7.4.2.1.3. Each cabinet mounted instrument shall have a tag affixed to the instrument.

7.4.3 Continuous Monitoring System

7.4.3.1 Contractor shall provide a continuous monitoring system (Data Acquisition system – DAS) that is capable of providing real-time performance monitoring, historical data storage and retrieval, and Internet accessibility of data.

7.4.3.1.1. The monitoring system shall provide AC energy production on the individual inverter level.

7.4.3.1.2. The monitoring system shall provide solar irradiance, ambient temperature and wind speed.

7.4.3.1.3. All monitored information is stored on the data logger as 15 minute averages and transmitted for processing, storage and backup. For added security, the DAS shall include a battery backup, so it can store up to four weeks of data.

8.0 PROJECT SPECIFIC CONSTRUCTION REQUIREMENTS

8.1 Lay down and Storage Requirements

8.2 Condition of Delivery of Equipment and Materials

8.2.1 In general, equipment and materials will be delivered to the site by truck. Contractor shall coordinate the ordering, delivery, and storage of all materials necessary for the performance of its Work, and Contractor shall be responsible for damage, loss, theft, casualty, shortages, shrinkage, and non-conformance of materials and equipment.

8.2.2 Truck deliveries and traffic shall comply with permit requirements.

8.3 Construction Support Facilities

8.3.1 Contractor shall provide all necessary temporary facilities at the site to support its staff and labor force and the delivery, unloading and storage of equipment and materials.

8.3.2 Contractor shall provide copies of drawings/specifications/ vendor manuals or other documents that FPL requires on-site during the project. Contractor shall also provide FPL personnel access to document control for specific information needs.

8.3.3 Any temporary storage facilities shall be capable of meeting any state, federal, or local requirements.

8.4 Construction Quality Control

8.4.1 First line, primary inspection and testing (hereafter referred to as Quality Control) are the responsibility of Contractor. Contractor's quality control procedures shall be clearly stated in the Quality Control Manual, and shall specify field inspections and inspection criteria. A summary of FPL's minimum requirements for Contractor's Inspection/Testing program is identified below. These minimum requirements are to be supplemented with additional requirements as determined by Contractor as specifications are developed and code requirements are identified. Problems discovered during inspections and testing which could impair job cost, schedule, or Plant function, will be immediately conveyed to FPL. Contractor's Quality Program must also include Contractor Quality Assurance.

8.4.2 Contractor shall conform to prevailing quality industry standards in accordance with Contractors profession in the location of the project. Any work which does not meet this standard of care shall be repaired, replaced, and re-performed at the sole expense of Contractor.

ECRC-08-2954 HEARING EXHIBIT - 00000124

8.5 FPL's Scope of Services-Quality Assurance

8.5.1 FPL will perform an overview of the Quality Control function as practiced by Contractor. This overview does not include "Hold" or "Witness" points. Every effort will be made to implement a meaningful overview inspection without impeding Contractor's efforts or job progress. The overview is intended to assist Contractor in meeting design and code requirements, and to prevent deficient material/workmanship rather than to identify it after the fact. FPL's representatives will conduct the overview inspections. Concerns arising from the overview inspection will immediately be conveyed to Contractor for incorporation into Contractor's Quality Control Program for corrective action, recurrence control, and trending. FPL's representatives will continually monitor and evaluate Contractor's timeliness and adequacy of corrective actions and recurrence controls.

8.5.2 As a means of assuring that the performance of the Work fulfills the requirements of the Contract Documents, Contractor shall maintain a Quality Management Organization, which provides Quality Control/Quality Assurance expertise in a number of key areas. The program shall be capable of providing assurance that the receipt, storage, erection, installation, testing, and examination of all equipment, components, materials, and services will comply with the requirements of the Contract documents. The Quality Program shall be documented in a Quality Control Manual, which shall be submitted to FPL for approval 30 days after Notice to Proceed.

9.0 STARTUP AND COMMISSIONING REQUIREMENTS

9.1 General Requirements

9.1.1 Contractor shall provide FPL a Startup Execution Plan document that describes in detail all aspects of the Startup and Commissioning Program including how commissioning activities shall be incorporated into the design, procurement and construction of the Work. The Execution Plan shall be submitted to FPL for review and approval. FPL's approval shall not be unreasonably withheld.

9.2 Scope of Startup Program

9.2.1 Contractor shall supply all required labor to execute the startup plan and supply all test and calibration equipment, materials, and services necessary to perform all testing, system calibration, checkout, functional testing and initial operation as well as make adjustments, perform event and trip analysis to determine the root cause, and correct deficiencies, completely in accordance with this specification.

9.2.2 Construction Turn-over and Pre-commissioning

9.2.2.1 As the various subsystems, systems and equipment packages are brought to a state of mechanical completion by Contractor's construction organization they will one by one be turned over to Contractor's startup organization by means of a pre-commissioning procedure. Contractor will perform the non-operational adjustments, and checks to verify that each item of equipment, subsystem, package and system is ready for operational start-up and testing.

9.2.2.2 The following activities and verification steps are included:

9.2.2.2.1. Physical construction complete (a checklist shall be provided by Contractor).

9.2.2.2.2. Compile associated documentation for code compliance, QA/QC, design basis.

9.2.2.2.3. Complete post construction testing (i.e. cold alignment, bump motors for rotation, pressure test, bolt torque, electrical insulation, contact resistance for field assembled electrical connections, and continuity tests, etc.).

9.2.2.2.4. Complete cleanup, painting, insulation and/or punch-list items sufficiently to safely perform the startup testing and initial operation.

ECRC-08-2955 HEARING EXHIBIT - 00000125

9.2.2.3 As the pre-commissioning for each individual item of major equipment, subsystem and major system is completed it will be documented with a turnover package demonstrating that it is ready for commissioning. The pre-commissioning package shall contain the procedures for executing the above activities, and documentation of their results. The package may be a subset of the Startup Turnover Package.

9.2.3 Start-Up Program Field Activities

9.2.3.1 During this phase Contractor will perform the calibration, testing and operation of the various portions of the Plant, starting with component tests, and then progressing through tests of subsystems and complete systems, and then operation of the Plant as a whole. The overall startup sequence and logic shall be developed by Contractor's Startup Manager so that subsystem startup packages are completed and presented to FPL's Operations Department in proper sequence to support an orderly startup. Coordination of Startup Activities shall include the following:

9.2.3.2 From commencement of startup activities, Contractor's startup personnel, under the direction of Contractor's Startup Manager, will directly coordinate all such activities for energization and operation of equipment and systems being started up.

9.2.3.3 Contractor's Startup Manager will initially hold weekly and later, daily startup coordination meetings. Contractor's Startup Manager and FPL will mutually agree on the frequency of the meetings. All subcontractors performing work in areas currently being readied for subsystem turnover for operation shall attend, as well as Contractor's Construction Superintendent, appropriate manufacturer's technical representatives, and FPL's representative. The meeting shall include a review of activities since the last meeting and a look ahead at activities planned for the next two weeks.

9.2.3.4 Contractor shall maintain a single integrated punch-list of outstanding activities for the construction, commissioning, startup, and initial operation of the project. FPL shall have the authority to add or delete items from the punch-list.

9.2.3.5 FPL may elect to witness any or all pre-commissioning or startup activities. The coordination meeting shall serve as the mechanism for notifying FPL of when activities are taking place.

9.2.3.6 Contractor shall provide written procedures for use by Contractor's commissioning team and FPL's plant operating staff for all Commissioning Procedures.

9.3 Operating Mode, Capability Verification and Guaranteed Performance Tests

9.3.1 The Plant shall successfully complete the Operating Mode Tests, the Capability Verification Tests and the Guaranteed Performance Tests in accordance with Appendix HH(Performance Testing), to demonstrate compliance with the Agreement requirements for Minimum Performance Levels and Guaranteed Performance Levels.

9.3.1.1 Operating Mode Tests – Test(s) that demonstrate the capability of the Plant to operate automatically from morning startup, through the day, and evening shutdown. Test should also demonstrate the capability of the Plant to automatically operate in response to abnormal operating conditions, such as the failure of an inverter, distribution system disturbances, etc.

9.3.1.2 Capability Verification Tests – Test(s) that demonstrate the capability of the Plant to operate automatically, safely, and reliably over the full range of capacity, from startup to full capacity.

9.3.1.3 Guaranteed Performance Tests – Test(s) that demonstrate the guaranteed capacity of the plant.

ECRC-08-2956 HEARING EXHIBIT - 00000126

9.3.2 Contractor shall provide the Plant performance test procedures that will demonstrate the Plant meets the required performance specifications.

9.3.3 Contractor shall be required to provide to FPL, for review and acceptance, detailed documents for these tests (test procedures) which will include but not be limited to:

9.3.3.1 Description of the test

9.3.3.2 List of all data to be collected

9.3.3.3 Instrumentation and location for taking all data points

9.3.3.4 Correction curves

9.3.3.5 Instrument and test accuracy's

9.3.3.6 Sample calculations

9.3.4 The draft Test documents shall be submitted for review at least 120 days before the expected test date. FPL shall provide comments within thirty (30) Business Days. Contractor will provide written response to FPL's comments within 10 Business Days and make necessary modifications to the test procedures.

9.4 Environmental Control Program

9.4.1 Contractor shall develop and maintain an Environmental Control Program document to assure that all construction and start-up activities associated with the Project conform to best environmental practices, federal, state and local regulations, applicable permit conditions, conditions of certification, Environmental Rules for Contractors, and any other construction and start-up constraints identified in the Project's environmental permitting process. A secondary purpose of the Environmental Control Program is to provide the basis for emergency response programs that will be in place during construction and operation of the Project. The Program shall include an Environmental Control Plan and all other relevant program documents (i.e., permit matrices, storm water pollution prevention plan, spill prevention, control and countermeasure plan, emergency response plan, copies of permits, etc). The Environmental Control Program document will provide all relevant references for the project's environmental management.

9.4.2 The Environmental Control Program shall include an Environmental Control Plan that describes the processes that will be followed in order to comply with applicable Laws and permits. The plan assigns specific responsibilities for compliance with environmental restrictions and response to emergency situations during construction and startup of Project facilities.

9.4.3 The Environmental Control Program document shall also include a matrix of permit compliance activities, due dates, responsible person and current status. Copies of Contractor's and FPL's environmental permits applicable to the Project shall be included in the document.

9.4.4 The Environmental Control Program document shall be submitted to FPL for review and approval no later than 30 days prior to site mobilization.

9.5 FPL Notification

9.5.1.1 In the event Contractor becomes aware of any imminent conditions of non-compliance or receives either a Letter of Non-Compliance or Notice of Violation, Contractor shall immediately contact FPL and initiate appropriate measures to correct the non-complying condition or activity and prevent its recurrence.

9.6 FPL Audits

9.6.1.1 FPL shall reserve the right to conduct periodic quality control/quality assurance assessments and environmental audits of Contractor's project activities. Assessment and Audit findings in non-compliance with project permit requirements shall be immediately corrected by Contractor.

ECRC-08-2957 HEARING EXHIBIT - 00000127

10.0 PROCUREMENT

10.1 Selection of Equipment Suppliers

10.1.1 Contractor shall procure equipment in accordance with the requirements of the Agreement from reputable suppliers who normally produce the type of equipment specified for use in heavy industrial applications.

10.1.2 Where specific requirements for equipment are included herein, Contractor shall ensure that these requirements are included in Contractor's specifications and complied with by the selected manufacturer. Contractor shall be responsible for proposing resolutions to any exceptions taken by suppliers to the requirements outlined herein and obtaining FPL's concurrence with these resolutions prior to accepting the exceptions.

10.1.3 FPL's review of these exceptions will be limited to ensuring compliance with the intent of these specifications, specifically to establish a minimum level of quality and functionality. FPL's concurrence or comments will be forwarded to Contractor within ten (10) Business Days of the date they are received in FPL's offices.

10.1.4 For other equipment, manufacturers and model numbers listed in this Technical Specification are representative only of the quality of equipment proposed. Manufacturers and model numbers of equal quality may be substituted for those listed in this Technical Specification.

10.1.5 Contractor shall have the obligation of ordering, receiving delivery of, storing, caring for, and installing such equipment and materials. Contractor shall coordinate the ordering, delivery, and storage of all materials necessary for the performance of its Work, and Contractor shall be responsible for damage, loss, theft, casualty, shortages, shrinkage, and non-conformance of materials and equipment.

10.1.6 No substitutions shall be made in the Work unless permitted in the Agreement and only then upon Contractor receiving prior written approval.

10.2 Vendor Inspection

10.2.1.1 FPL reserves the right to participate in scheduled vendor inspections of any equipment supplied under the terms of this Contract in accordance with the terms of the Contract. Contractor shall submit to FPL, prior to use, a listing of planned inspections for the major equipment to be supplied.

10.3 Material and Equipment Quality Control

10.3.1.1 Contractor shall provide new equipment, materials, and workmanship suitable for this application.

10.4 Inspection and Shop Testing

10.4.1 Contractor shall provide for shop inspection and testing of major equipment as determined by Contractor. Testing programs shall be established by Contractor, but shall not be less thorough than the manufacturer's standard testing procedures. Contractor is responsible for insuring that the manufacturers conform to the manufacturing specifications for quality, inspections and testing contained in all equipment contracts.

10.4.2 FPL reserves the right of shop inspection visits and may witness shop tests in accordance with the terms of the Agreement. Shop inspections by FPL do not relieve Contractor of responsibility contained in the Agreement. Contractor shall endeavor to notify FPL of the tests at least 5 Business Days in advance of tests.

10.4.3 Contractor shall submit certified copies of test reports and shop tests, to FPL.

11.0 PROJECT ADMINISTRATION

11.1 Project Meetings

11.1.1 During all active phases of the Project, Contractor shall be required to participate in a monthly Project Review Meeting with FPL. During the engineering, design, and procurement phases of the Project, this meeting will normally be held in Contractor's home office. Each of Contractor's lead discipline engineers will be required to update

ECRC-08-2958 HEARING EXHIBIT - 00000128

FPL's organization on the discipline progress to date, review design activities currently in progress, and discuss problem areas and the plan developed by Contractor to address and resolve them. After the start of construction, the monthly Project Review Meetings will normally be held in Contractor's site office and will be attended by Contractor's Project Manager, Project Engineering Manager, Home Office Construction Manager, Site Construction Manager, Startup Manager, and Project Controls Engineer. Update responsibilities and activities will correspond to those identified for the pre-construction phases of the project in the preceding paragraph.

11.1.2 In addition to the monthly meetings, Contractor shall submit a monthly progress report which includes schedules, detailing progress against the Level 2 CPM schedule, percent complete curves for the engineering and construction phases of the project, bulk commodity installation progress curves, and a discussion of problem areas and proposed resolutions. Attached to this report, Contractor shall provide current revisions of the purchase order, contractor drawing, and vendor drawing lists.

11.1.3 Between Project Review Meetings, Contractor shall conduct weekly construction/startup review meeting with all key site personnel in attendance. FPL's Representatives may attend these meetings.

11.2 Document Preparation Requirements

11.2.1 Contractor shall produce all engineering documentation normally required for a project of this type, including, but not limited to, flexibility and expandability requirements, design objectives and constraints design studies and analyses, design calculations, equipment specifications and detailed design drawings.

11.2.2 The design documents shall be certified and approved by a licensed professional engineer and architect, and such other certified professionals as required by Law. Prior to Final Acceptance, Contractor shall turn over to FPL copies of all engineering documentation.

11.3 Project Submittals

11.3.1 Contractor shall supply the following drawings and information to FPL as part of the scope of Work. Items marked with an asterisk (*) shall be submitted for FPL's review. The transmittal of documents for FPL's review shall be by letter referencing that the documents are submitted per this Section of the Contract. Any comments from FPL shall be returned within ten (10) Business Days. As-builts shall be provided for the site plan, array layout and shading drawings, underground electrical drawings, electrical wiring and control wiring diagrams

11.3.1.1 *Site Plan

11.3.1.2 *Array Layout and shading diagrams

11.3.1.3 *Underground electrical drawings

11.3.1.4 *Erosion and Sedimentation Control Plans

11.3.1.5 *Dewatering Plans

11.3.1.6 *Electrical diagrams

11.3.1.7 *Array wiring diagrams

11.3.1.8 *Structural drawings

11.3.1.9 *Finish Grading and Paving drawing

11.3.1.10 *QA/QC Manual (Project Execution Plan and Project Coordination Procedure Manual)

11.3.1.11 Calculations substantiating any portion of the design, that is normally provided on request by FPL.

11.3.1.12 Drawings and Operating & Maintenance manuals for all equipment provided in Contractor's scope of work.

11.3.1.13 *Performance Test Procedures in accordance with 9.3.5.

ECRC-08-2959 HEARING EXHIBIT - 00000129

11.3.2 All vendor drawings shall be sent to FPL in electronic format. Each vendor drawing shall be sent with a unique file number.

11.3.3 Contractor shall prepare and provide (including routine updates) to FPL, all typical lists including, but not limited to, the following:

11.3.3.1 Spare parts and special tools lists

11.3.3.2 Electrical Load List (Motors, Heaters, etc.)

11.3.3.3 Equipment List/Instrument List

11.3.3.4 Overall Plant Control Scheme

11.3.3.5 Instrument Data Sheets

11.3.3.6 Cable and Conduit Schedule

11.3.4 At the conclusion of the project and prior to Final Acceptance, Contractor shall supply to FPL a set of compact discs (CD's) containing final revision of the drawings and documents listed above.

12.0 INTERCONNECTION PROTECTION AND METERING EQUIPMENT

12.1 Protective Relay Systems

12.1.1 FPL shall provide the PV plant generation interconnection protective relay systems for the Project. The protective relay panels will be installed by the Contractor. The interconnection protection will include a fiber optic communication system. This protective relay equipment will be installed in the by the Contractor.

12.2 Interfaces

12.2.1 Interfaces between the PV plant switchgear and other plant electrical systems, and the FPL interconnecting protective relay equipment will be provided by the Contractor.

12.3 Cable

12.3.1 Cable and conduit runs between the PV generating facility equipment and the interconnection protective relay equipment will be provided and installed by the Contractor.

12.4 Revenue Meters

12.4.1 The revenue meter will be provided and installed by FPL. The revenue metering transformers will be provided by FPL and will be installed by the Contractor on structures designed and installed by the Contractor. The conduit runs from the metering transformers to the meter cabinets will be provided by the Contractor. FPL will provide the metering cables to be installed by the Contractor. The metering transformers will be provided and installed by the Contractor. The transformers may be installed in the LV equipment provided by the Contractor. The location of the metering transformers shall be reviewed and approved by FPL. Conduit runs between the metering transformers and the metering cabinet shall be provided by the Contractor. The metering cables will be provided by FPL.

Appendix A – Scope of Work
Exhibit A – Environmental Rules for Contractors

HEARING EXHIBIT - 00000131

APPENDIX A
EXHIBIT A
ENVIRONMENTAL RULES FOR CONTRACTORS

1. This document must be made a part of all contracts and subcontracts by the EPC contractor for work to be performed on the Project site.

2. All contractors and subcontractors must review site orientation documents and sign affidavit if required by FPL Project Construction Manager (PCM). All contractors must implement an Environmental Control Program, reviewed and approved by FPL, as specified in the Scope of Work documents.

3. All contractors and subcontractors must inform the FPL Project Construction Manager (or designee) in writing of the type and amount of any chemicals (prior to their delivery to the site) to be brought on-site to complete the work. All contractors and subcontractors shall further notify the FPL PCM in writing during the course of construction, if any additional chemicals are to be brought on site.

4. All contractors and subcontractors must provide Material Safety Data Sheets (MSDS's) for all chemicals as directed by the FPL PCM prior to chemicals being brought on-site. Per the OSHA Hazard Communications standard, MSDS's must be maintained (by all contractors and subcontractors) on-site for any chemicals that could pose a health or physical threat to personnel, and all personnel must be Hazard Communication trained. The FPL PCM is responsible for ensuring that required Hazard Communication training is provided to FPL employees potentially exposed to these chemicals. Contractors are responsible for training their personnel.

5. No hazardous materials may be brought onto the Project site unless necessary for contracted work. Arsenic free bentonite shall be used for all drilling.

6. Waste management, including determination of the type of waste, quantity, and appropriate storage prior to off-site disposal, must be coordinated with the FPL PCM.
   - All contractors and subcontractors must provide FPL PCM with waste minimization plans. [Plans often include product substitution, process changes to eliminate or reduce chemical use, and/or recycling or reusing materials;]
   - Copies of any analyses performed to classify wastes as hazardous or non-hazardous must be given to FPL PCM and copied to FPL Environmental Services;
   - Hazardous materials used and hazardous waste generated must be stored in temporary or permanent secondary containment in areas agreed to by FPL PCM;
   - Secondary containment structures shall be maintained free from stormwater or other materials that defeat the purpose of the secondary containment. Stormwater or other materials removed from secondary containment structures must be managed appropriately.
   - All wastes must be stored in designated hazardous and non-hazardous containers appropriately labeled prior to proper disposal.
   - All original manifests, shipping papers, certificates of disposal, or other documents associated with waste transport and disposal must be provided to FPL PCM. Waste manifests must be signed by FPL contractor or subcontractor whose EPA ID number is used for waste disposal (unless otherwise specified – e.g., FDEP may required use of Substation's EPA ID number for contiguous project operations. In this case strict waste minimization and management is required in order to prevent changing current waste generation status of Substation).
   - All contractors and subcontractors must inform FPL PCM of all disposal sites to be used for hazardous and non-hazardous wastes prior to contract award;
   - All contractor and subcontractor employees responsible for managing hazardous wastes must be properly trained. Documentation of that training is to be provided to the FPL PCM and to FPL Environmental Services.
   - Hazardous materials releases or spills of any kind must be reported immediately to the FPL PCM (see Item 7); and
   - Contractor must consult with FPL PCM to determine if hazardous waste identification number should be obtained prior to contract award.

7. All contractors and subcontractors must coordinate with FPL PCM for proper storage of flammable or other types of chemicals.

8. All contractors and subcontractors are responsible for knowing and complying with all local, state and federal reporting and response requirements for releases or spills of oil, petroleum products, onsite products and

ECRC-08-2962 HEARING EXHIBIT - 00000132

chemicals, hazardous materials or hazardous wastes. All contractors and subcontractors must ensure that spill prevention measures are in place during the course of work at the Project site. This includes:

- Ensuring that all containers are closed at the end of each work day;
- Use of temporary hoses is carefully planned;
- Secondary containment is used for work near drains;
- All fuel and oil tanks used by all contractors and subcontractors must be placed in temporary secondary containment on an impervious surface;
- All contractors and subcontractors must maintain appropriate spill clean-up equipment near tanks and equipment that have potential for leaks;
- Following work and prior to start up, all contractors and subcontractors must ensure that all valves, manways, and pipelines are closed if appropriate to minimize risk of spills;
- All contractors and subcontractors must assume that all "out-of-service" lines will leak when brought back into service – appropriate spill containment measures must be taken;
- All contractors and subcontractors must document the training of personnel in spill awareness, notification (internal FPL/Agencies), and identification of spill risk areas; and
- All contractors and subcontractors must review the site's spill plans and know appropriate FPL site contact in the case of **ANY** spill. All contractors and subcontractors must coordinate with FPL PCM in order to understand the plant's spill response plans.

9. All contractors and subcontractors must comply with all applicable local, state, and federal laws in the course of performing work at the Project site. All contractors and subcontractors must coordinate with FPL PCM to ensure that the terms of permits and conditions of site certification to conduct work are met. Copies of any and all permits acquired by all contractors and subcontractors shall be provided to the FPL PCM. All contractors and subcontractors must coordinate any contact with regulatory agencies with the identified FPL contact.

10. All contractors and subcontractors must include environmental issues in daily safety tailgate sessions. FPL PCM should attend meetings when possible.

11. If work is conducted on Risk Management Plan (RMP) or Process Safety Management (PSM) regulated system, all requirements in the RMP and PSM documents must be reviewed/coordinated with the designated FPL contact and addressed during the course of work.

12. All contractors and subcontractors are required to maintain "good housekeeping" during the course of the project and must perform a thorough site clean-up following completion of the work. All unused products / chemicals are the property of the contractor and must be removed from the site at the end of the job unless specific arrangements are made with the PCM. All contractors and subcontractors must inform the FPL PCM when chemicals have been removed from the site.

13. All contractors and subcontractors must conduct a post-project site "walk-down" with the FPL PCM and plant environmental specialist to ensure that environmental issues are addressed and resolved.

14. All required erosion control/stormwater pollution prevention practices must be implemented and documented as required by regulations, Stormwater Pollution Prevention (SWPP) Plans or Best Management Practices (BMP) Plans. A listing of these requirements shall be coordinated with FPL PCM. Contractor is responsible for development and implementation of such plans. Conditions of Certification and / or all other applicable permit conditions must be strictly observed.

15. Threatened and endangered species are not expected to be present either in or near the Project area. Federal, state and local rules and regulations are designed to protect these species from harassment and harm. If threatened and endangered are observed on or near the site, the contractor and subcontractors are obligated to comply with these rules and regulations.

ENVIRONMENTAL FIELD INSPECTION FORM

FACILITY: _____ **DATE:** _____

Instructions:

Walk site *at least once a week* and review each of the following areas

Explain each "No" answer in the comment section

Sign completed form and provide to FPL Project Manager with copy to FPL Environmental Services

General Environmental Management		**YES**	**NO**
1	Is housekeeping in all areas in good condition? All areas should be neat, orderly, and clean.		
2	Is the site free of any dead animals?		
3	Are spill cleanup materials and equipment in good condition and in close proximity to where they might be needed?		
4	Does security appear adequate? Fencing, locks, and lighting are in good condition.		
5	Are all contractors and subcontractors following the FPL Environmental Rules for Contractors? Has the Environmental Control Plan been implemented effectively?		

Waste Management		**YES**	**NO**
6	Is sandblast or bead blast material swept up? All material should be swept and contained for proper disposal. **Note that blast material containing metals could be hazardous waste; appropriate testing and documentation must be performed.*		
7	Are trash receptacles free of the following hazardous, universal, or recyclable waste? • Aerosol cans • Containers with product (e.g. paint, solvent) • Saturated oily rags or absorbent pads (SC – any oily rag/wiper prohibited) • Rags or absorbent pads with solvent odor • Discarded equipment that contains refrigerant • Recyclable items (aluminum cans, metal, cardboard, paper, etc.) • Universal waste (mercury containing lamps, batteries, pesticides, thermostats) • Tires		

ECRC-08-2964 HEARING EXHIBIT - 00000134

ENVIRONMENTAL FIELD INSPECTION FORM

		YES	NO
8	Is waste properly contained in drums? • Bungs closed and no open funnels • Lids sealed tight • Clearly labeled with contents • Where contents are flammable, drum is grounded • Drums not stacked • Outside of drum clean; no evidence of waste product		
9	Are drums in good condition (includes empty drums)? • Free of dents • Free of holes • Free of rust • Free of bulges or leaks		
10	Is hazardous waste secondary containment in good condition? • Free of cracks, gaps, waste product, and no breaching • Containment drains closed		
11	Is hazardous waste secondary containment free of product or water?		
12	Is the emergency equipment in the hazardous waste storage area in working order? • Telephone or paging system must work properly • There must be a fire extinguisher present that is inspected monthly • Spill clean-up equipment must be present and in good condition • If the facility is a small quantity generator, emergency response information must be posted near the communication system.		
13	Will the isles in the Hazardous Waste Satellite and Accumulation (storage) areas allow for movement of emergency response equipment? • Must be able to see all sides of drum for markings and drum conditions.		
14	Is the accumulation start date on all drums in hazardous waste storage for disposal area?		
15	Are used oil drums and tanks properly marked with the words "Used Oil"?		
16	Are used batteries and mercury containing lamps stored in their designated area?		
17	Are used batteries and mercury containing lamps marked with accumulation start date?		
18	Are crushed or broken mercury containing lamps contained to prevent release of mercury?		
19	Are leaking batteries contained to prevent release of acid?		

ECRC-08-2965
HEARING EXHIBIT - 00000135

EXHIBIT A
APPENDIX A
ENVIRONMENTAL RULES FOR CONTRACTORS
(continued)

ENVIRONMENTAL FIELD INSPECTION FORM

Chemical/New Product Management	YES	NO
20 Are new products properly stored in labeled containers? • Labeled with contents and appropriate hazard warnings • Containers kept closed • No open top buckets/pails with product • The original manufacturers label intact and readable • MSDS available onsite		
21 Are flammable liquids and aerosols stored in flammable cabinets?		
22 Is the quantity of gasoline storage inside a building < 25 gallons?		
23 Are the "No Smoking" areas free from any evidence of smoking?		
24 Are hazardous materials properly stored away from storm drains or pervious surfaces?		
25 Are storm drains free of hazardous materials? • No staining, discoloration • No odors • No visible sheen		

Air Emissions Management	YES	NO
26 Is the facility area free from any evidence of particulate fallout from stack emissions?		
27 Are fugitive emissions minimized and area sources minimized? (Sandblast curtains, slow vehicle speeds, water truck operating, etc.)		
28 Is the area free from any objectionable odors?		
29 Is excessive noise minimized?		

ECRC-08-2966 HEARING EXHIBIT - 00000136

ENVIRONMENTAL FIELD INSPECTION FORM

Water Quality Management	YES	NO
30 Is the storm-water retention pond (if applicable) properly maintained? Retention ponds should be unclogged, mowed, free of weeds, and structurally sound with all erosion and sedimentation barriers in place and in good condition.		
31 Do the water discharge areas look clean? • Free of foam • No sheen • Each outfall clearly labeled		
32 Is the area free from evidence of industrial wastewater discharging to the ground? (e.g. reverse osmosis reject, etc.)		
33 Are all onsite wells locked?		
34 Are all onsite wells in good shape with no damage?		

Tanks, Pipelines	YES	NO
35 Are the tanks or pipes free from any signs of leakage or spillage?		
36 Are the areas on ground around tanks or piping free from evidence of staining or dying vegetation?		
37 Are oil piping systems properly aligned and are supports/foundations in good condition?		
38 Do all above ground tank structures look sound? • No buckling, cracks, wetting, discoloration, blistering • No significant corrosion • No cracks in base/apron • No signs of settlement • No water accumulation inside dike		
39 Are storage tank/piping release detection systems free of oil? (e.g., double-bottom tank, monitoring wells, etc.)		

	YES	NO

ECRC-08-2967
HEARING EXHIBIT - 00000137

ENVIRONMENTAL FIELD INSPECTION FORM

40	Is the Cathodic Protection working properly? Electrical box shows that amps of current is flowing		
41	Is secondary containment for tanks in good condition? • Concrete secondary containment should be free of cracks or penetrations. • Earthen dikes should be free of erosion, oil stains, trash accumulation or undergrowth. • Are valves in proper location to allow adequate drainage from containment?		
42	Is secondary containment for tanks free of product and water?		
43	Are transformers in proper containment and free of leaks?

ECRC-08-2968 HEARING EXHIBIT - 00000138

Appendix A – Scope of Work
Exhibit B – Clean Fill Criteria

APPENDIX A
EXHIBIT B
CLEAN FILL CRITERIA

MEMORANDUM

To: Distribution

From:
Date:
Re: **Recommended Clean Fill Screening Process for FPL Utility Properties**

Section 376.30701, Florida Statutes (2003) and the Florida Department of Environmental Protection ("FDEP") rule Chapter 62-780, Florida Administrative Code ("F.A.C.") directs the FDEP to apply the Soil Cleanup Target Levels ("SCTLs") of rule Chapter 62-777, F.A.C. to all contaminated sites where a clean up is required. The SCTLs are conservative default cleanup criteria for approximately 500 constituents many of which are naturally occurring in Florida soils. For FPL, this new soils rule mainly impacts construction projects and the cleanup of contaminated sites.

Furthermore, the SCTLs of Chapter 62-777, F.A.C. may be viewed as an indication of whether or not contamination exists at a site. If a clean up is required due to the discovery of "contamination" the FDEP will require a site to meet residential SCTLs for a "no further action" determination. If a site cannot meet residential soil levels, then some sort of engineering control such as an asphalt cover and fencing will be required in addition to an institutional control such as a deed restriction and an agency permit.

Therefore, future liability for FPL may be created unless fill material brought onto FPL Utility property meets the residential levels for any constituents present. It is advisable that FPL sample and perform analytical testing on representative samples of fill material prior to bringing the fill material onto FPL owned or leased property. In this regard, the following sampling and analysis is recommended prior to bringing clean fill onto any FPL owned or leased property:

Incorporate the Purchase of Clean Fill into the Project and Project Schedule.
This will enable your facility to schedule the physical collection and laboratory analysis of one or more representative samples of the specific fill to be brought on site just prior to delivery. Typical laboratory turn around time is 1-2 weeks. Laboratory analyses may be rushed (1-4 business days) at an additional cost (25-100% markup). This is the best way to ensure that the fill being brought onto FPL property will meet the residential clean soil criteria.

Suggested Screening Process
Soil samples should be collected and analyzed for the clean fill parameters. The standard clean soil parameters are arsenic, barium, cadmium, chromium, lead, selenium, silver, PCBs, and TRPH.

If time permits (i.e., non-rush or pre-qualification samples), it is recommended that the samples first be tested for arsenic as a screening tool. If the arsenic residential SCTL is met, then the laboratory can test the existing soil samples for the remaining clean soil parameters as determined necessary. If time is of the essence (i.e. rush analyses required), samples should be analyzed for all listed parameters at once.

Finally, it should be noted that any fill material that is to be reused on site should undergo the same process, and pass analytical screening for Chapter 62-777, F.A.C. constituents at residential levels.

EXHIBIT A
APPENDIX B
CLEAN FILL CRITERIA
(continued)

RESIDENTIAL SOIL CLEANUP TARGET LEVELS (SCTLs)*
Per Chapter 62-777 F.A.C.
Updated May 16,2005

CONSTITUENT	mg/kg
Arsenic	2.1
Barium	120
Cadmium	82
Chromium	210
Lead	400
Selenium	440
Silver	410
PCBs	0.5
TRPH	460

Note:

The SCTLs are regulatory-derived values that are subject to periodic review. To ensure that the most up-to-date values are used, consult Chapter 62-777 Florida Administrative Code (F.A.C.), Table 2 (www.dep.state.fl.us/waste/quick_topics/rules/), or contact a JES environmental specialist for assistance.

Appendix B – Project Controls Requirements

APPENDIX B
PROJECT CONTROLS REQUIREMENTS

PROJECT CONTROL REQUIREMENTS

1.0 GENERAL PROGRAM REQUIREMENTS

1.1 Provide adequate methods and tools for budget control, scheduling, tracking, trending, and reporting of work in progress for the engineering, procurement and construction activities related to the Project. Owner's intent is to monitor the Agreement at the Project level.

1.2 Identify Contractor's organization.

1.3 Develop and implement a standardized method of invoicing and payment process for work performed.

2.0 SCHEDULE GENERAL REQUIREMENTS

2.1 Bid /Proposal Submittal Requirements

Contractor shall submit a summary schedule with his proposal. This schedule shall be a drafted time-scaled logic diagram that indicates completion of all major activities. Contractor should clearly indicate each contractual milestone submittal date and FPL's deliveries along with Contractors planned completion date, clearly indicating relationships between major activities. Contractor is encouraged to plan for earlier completion dates than the contractual completion dates provided such dates do not interfere with the planned activities of other Contractors or FPL.

2.2 Project Execution Schedule

a. Contractor shall provide an electronic copy (in the most current version of MicroSoft(MS) Project) of Contractor's Construction schedule to FPL within 10 days of Contract award for FPL's approval. The schedule shall be prepared with the understanding that the Contractor's schedule is the Project Master Schedule.

b. Weekly and monthly updates shall be provided to FPL with cut-off dates and submittal dates as determined by FPL. FPL reserves the right of review and approval for the Project Execution Schedule.

c. The schedule shall allow each activity to be assigned to:

- Work Package (No. 1, 2, 3, or 4),
- Area (Unit 3, Unit 4 or Common), and
- Responsibility (Contractor, Engineer, or FPL)

2.3 Schedule Project Progress Reporting (included with Monthly Report)

Within ten (10) days after each calendar month, Contractor shall submit a brief report describing progress from the previous month, an update of the schedule, any commercial or technical issues that remain open, and a matrix of the contract milestones containing the contract date, current scheduled/actual date, and variance between the two.

2.4 Project Schedule Development

a. Contractor's schedule shall be based on FPL's Milestones and Key Dates provided over the course of the Contract.

b. Contractor shall retain responsibility for development and implementation of the schedule covering the scope of work. Contractor retains sole responsibility for meeting schedule Finish Dates.

c. Contractor's Project schedule will include manpower requirements and commodity installation plans. Commodity Installation curves to be developed at a minimum for earthwork, concrete, cable, terminations, panel and support structure installation.

2.5 Project Schedule Integration

a. Contractor shall maintain the project master schedule and integrate other contractor schedules with the mechanical schedule. Also, Contractor shall integrate activities provided by Engineering and FPL for the project into the project master schedule. Contractor schedules shall have a level of detail equivalent to a Level 2 schedule (approximately 100 to 300 activities).

b. The testing, startup of components and systems, and the performance testing shall be integrated by the Contractor into the project master schedule. Contractor shall review the logic to validated correctness of sequence and time durations for all activities in the project master schedule.

3.0 SCHEDULE/PROGRESS MEASUREMENT

3.1 Weekly Progress And Schedule Review

FPL and Contractor representatives shall meet weekly to review the Work progress and update the Work completion schedule. Contractor's representative shall present the following:

a. The current status of their Job Progress.

b. A detailed three week look-ahead schedule

c. Project Milestones current status update and forecast vs. baseline schedule

d. Their current and projected manpower by craft.

e. The material delivery status.

f. The status of drawings and other submittals.

g. Any changes in the Work.

h. The status of "As-Built" Drawings (if required).

i. Problem areas or concerns.

3.2 Progress review meetings will be held weekly at FPL's Jobsite offices.

3.3 Productivity Meetings – Any T&M or Target Price Contractor shall also participate in a weekly productivity meeting with FPL.

3.4 Three Week Look Ahead Schedules

a. Contractor shall develop a 3-week daily work schedule as shown in Attachment 1, Three Week Look Ahead Schedule Example. Generally the schedule shall be submitted to FPL with a copy to all other affected Contractors by the close of business Monday. Any submittals received after 9:00 AM each Tuesday morning shall be considered non-compliant. The exact timing of development may be modified by FPL after commencement of field mobilization.

b. The Three-Week Look Ahead Schedule (3WLAS) will be a bar chart containing activities and durations, area designations, and restraints. Activities shall be planned and scheduled overall consistent with the Project Schedule. The schedule shall be grouped by area.

c. The level of detail required for the 3WLAS shall be determined by the current status of the work and its complexity and coordination with FPL or other Contractors.

d. The key Contractor personnel who will be responsible for working closely with FPL's staff to achieve efficient execution of the Contract shall have the authority to represent Contractor.

3.5 Contractor's three week look-ahead schedule shall:

a. Indicate all planned work and testing that is to be accomplished during the current week and the next two week period all in support of, and in accordance with, Contractor's Construction Schedule.

b. Include major construction equipment requirements

c. Highlight any material or drawing needs from either FPL or Contractor.

d. Reflect the planned and actual activities of the previous week.

e. Include any activities that are required to be accomplished by others that would impact and/or prevent Contractor from starting and/or accomplishing its planned work.

f. Be presented in the level of detail sufficient to direct the efforts of the craft on a day-to-day basis.

4.0 COST REPORTING REQUIREMENTS

4.1 Cost Management Report - Contractor shall provide at a minimum on a bi-weekly basis the Claims, Changes or extra work, delays or accelerations, interferences and the like known to Contractor that have occurred or may be claimed to have occurred since project onset. This information is required to be provided in Microsoft Excel. The report is referred to as the Cost Management Report and will include current status of aforementioned items, initiated dates, dollar exposure amounts (incremental to the executed contract amount), drawing references, subcontractor documentation, etc. as required to establish an understanding of the issues. If there are no known Claims, Changes, etc the Cost Management Report shall still be issued bi-weekly stating NONE. The most recent Cost Management Report shall be attached to each Contractor invoice.

4.2 Contractor shall invoice per the conditions of the contract terms. Additionally at the request of the Owner, Contractor is required to provide an estimate of the next invoice within two business days of the request. It is understood that this request in only an estimate and may be revised with issuance of the formal invoice. .

4.3 Contractor shall develop a Work Breakdown Structure (WBS) assigning cost codes encompassing the entire Scope of Work in an adequate level of detail to provide the outlined reporting requirements contained herein. Ultimately, the WBS should be developed in sufficient detail to permit assignment and allocation of costs to the functional classifications specified in the Owner Property Retirement Unit Catalog.

5.0 MATERIAL STATUS

5.1 Contractor shall maintain an updated Materials List and Shipment Origin and Profile Report for materials procured.

5.2 Contractor shall provide a weekly update of the Materials List and Shipment Origin and Profile Report to FPL.

5.3 Contractor, during the Weekly Progress and Schedule Review Meeting, shall provide a list of shortages and late deliveries that could negatively affect construction and installation if not received in a timely manner.

5.4 Contractor shall provide a composite Materials List and Shipment Origin and Profile Report for all FPL procured materials.

6.0 CONTRACTOR'S DAILY REPORT

6.1 Contractor shall submit to FPL's designated field representative prior to 10:00 a.m. each day, starting from the day Contractor mobilizes at the site, a completed and signed Contractor's Daily Force Report utilizing the form provided as Attachment 2, Daily Force Report, hereto. The Daily Force Report shall contain a listing of Contractor and Contractor manpower, including personnel by responsibility, craft, and remarks concerning the daily field activities.

7.0 TIME AND MATERIALS (T&M) WORK

7.1 Any Contract with a T&M contract or an incentive based contract shall fully report progress and expended man-hours at the individual line item level of FPL's EVMS.

7.2 This includes work performed by any Contractor doing Extra Work Order work on a T&M basis.

8.0 MONTHLY PROGRESS REPORT REQUIREMENTS

8.1 Brief narrative overview of Project status.

8.2 Brief narrative of identified critical issues.

8.3 Brief narrative of short term look ahead activities.

8.4 Updated organization chart for the Project.

8.5 Safety and environmental issues/status.

8.6 Project Milestones current status update and forecast vs. baseline schedule

8.7 Contractor Project schedules shall be updated and submitted in adobe acrobat format (pdf). These schedules shall show current status and the projected completion dates of all Project phases against the current planned schedule.

8.8 An electronic copy (data file) of the most recently updated complete MS Project integrated Project Schedule network.

8.9 Cost Management Report

8.10 Manpower curves (manpower plan with actual and forecast to go over time)

8.11 Progress curves (% Complete progress versus time).

8.12 Construction commodity curves (actual vs. original baseline and current plan) as identified in Section 2.4c above. A variance explanation and/or recovery plan shall be provided by Contractor should progress monitored on fall behind the plan.

8.13 Procurement Status Report. A complete listing of all equipment and materials to be procured by the Contractor, including status of the procurement process (bid, evaluate & award). The information included in this report shall be consistent and support the Project Schedule.

Appendix D – Construction and Milestone Payment Schedule

Appendix E – Credit Trigger Event

Appendix E

Credit Trigger Event

1. As provided in Section 1.1.31, a "Credit Trigger Event" shall be deemed to occur if, at the end of the most recently ended fiscal quarter of Contractor, Contractor fails to maintain a Tangible Net Worth of greater than $550,000,000.

2. Upon the occurrence of a Credit Trigger Event and thereafter, the face amount of the Letter of Credit issued pursuant to Section 7.5 shall be adjusted to (or other collateral posted as permitted by Section 7.5 which, together with the then-existing Letter of Credit equal) the stated amount corresponding to the "Level" indicated below including Contractor's Tangible Net Worth at the end of the most recently ended fiscal quarter of Contractor:

Level	Tangible Net Worth	Required Stated Amount Prior to Initial LC Amount Expiration Date	Required Stated Amount After Initial LC Amount Expiration Date
1	Less than or equal to $550,000,000 but greater than $500,000,000	$10,000,000	$6,500,000
2	Less than or equal to $500,000,000 but greater than $450,000,000	$13,750,000	$9,000,000
3	Less than or equal to $450,000,000	$17,500,000	$12,500,000

3. After the Letter of Credit Expiration Date and thereafter until the end of the Warranty Period, upon the occurrence of a Credit Trigger Event, a Letter of Credit shall be issued pursuant to Section 11.8 (or other collateral posted as permitted in Section 11.8) in a stated amount corresponding to the "Level" indicated below including Contractor's Tangible Net Worth at the end of the most recently ended fiscal quarter of Contractor, in addition to the Contractor Parent Guaranty:

Level	Tangible Net Worth	Required Stated Amount After Letter of Credit Expiration Date but Prior to Tenth Anniversary of Final Acceptance Date	Required Stated Amount After Tenth Anniversary of Final Acceptance Date Until the end of all of the Warranty Periods
1	Less than or equal to $550,000,000 but greater than $500,000,000	$500,000	0
2	Less than or equal to $500,000,000 but greater than $450,000,000	$1,000,000	0
3	Less than or equal to $450,000,000 but greater than $400,000,000	$2,000,000	0
4	Less than or equal to $400,000,000	$2,000,000	$500,000

Appendix H – Form of Contractor Certificate for Partial Waiver of Liens

APPENDIX H

FORM OF CONTRACTOR CERTIFICATE FOR PARTIAL WAIVER OF LIENS

This CONTRACTOR'S PARTIAL LIEN WAIVER AND RELEASE ("Contractor's Partial Lien Waiver and Release") is made by SunPower Corporation, Systems, a Delaware corporation ("Contractor"), on behalf of itself, its successors and assigns, and those acting by or through any of the foregoing, for and in consideration of the sum of [AMOUNT OF PARTIAL PAYMENT REQUEST] DOLLARS ($[_____]) (the "Progress Payment") and other good and valuable consideration, in hand paid, the receipt and sufficiency of which are hereby acknowledged, as full payment on account of all labor, services, materials, equipment and other work performed through the ___ day of _____, 200_ (the "Release Date"), for Florida Power & Light Company, a Florida corporation ("Owner"), in connection with the construction of a solar photovoltaic electric generation facility, and all services and utilities related thereto, in De Soto County, Florida (such facility, together with the property on which such facility is located, the "Project"), pursuant to that certain TURNKEY ENGINEERING, PROCUREMENT AND CONSTRUCTION AGREEMENT FOR SOLAR PHOTOVOLTAIC GENERATING FACILITY, dated as of June [__], 2008, between Owner and Contractor, as the same may be amended from time to time (as the same may be amended, modified and supplemented from time to time, the "Agreement").

Solely with respect to the Work performed by the Contractor relating to the Project on or prior to the Release Date, the Contractor does hereby unconditionally and irrevocably waive, release, remise, relinquish and quit-claim (collectively, the "Release") all actions, claims, demands, liens, lien rights and claims of lien, of any kind whatsoever (collectively, "Claims"), which Contractor ever had or now has, known or unknown, against the Project or against Owner, its parents, subsidiaries and affiliates, at all tiers, and its and their insurers, sureties, employees, officers, directors, representatives, shareholders, agents, and all parties acting for any of them (collectively, the "Released Entities"), including, without limitation, all claims related to, in connection with, or arising out of, all facts, acts, events, circumstances, changes or extra work, constructive or actual delays or accelerations, interferences and the like, which have occurred or may be claimed to have occurred. The foregoing Release shall only be effective with respect to Claims arising in connection with the portion of the work performed by Contractor prior to the Release Date.

The Contractor warrants and represents, solely with respect to all Work completed through the Release Date that (a) the Contractor has not assigned or pledged any rights or claims in any amount due or to become due from Owner in connection with the Project; (b) payment has been or will be made to all subcontractors, laborers and material suppliers, at all tiers, for all labor, services, materials and equipment furnished by or through the Contractor for the Project, including all payroll taxes and contributions required to be made; (c) no claims from subcontractors, vendors, mechanics or materialmen against the Released Entities have been submitted to Contractor with respect to the Project or remain unsatisfied as of the date hereof; (d) no mechanics' or materialmen's liens have been filed with respect to the Project that have not been discharged or for which a bond has not been posted in accordance with the Agreement; and (e) payment of all amounts due has been made to all consultants, employees, subcontractors, laborers and material suppliers, at all tiers, and all other entities, for all labor, services, materials and equipment furnished by or through Contractor for the Project, including, without limitation, all payroll taxes and contributions required to be made and all wages, overtime pay, premium pay, holiday pay, sick pay, personal leave pay, severance pay, fees, fringe benefits, commissions

ECRC-08-3000 HEARING EXHIBIT - 00000169

and reimbursable expenses required to be paid and all deductions for dues, fees or contributions required to be made in connection with all collective bargaining agreements in existence, if any, which affect any worker(s) providing services for the Project.

Solely with respect to all Work for the Project completed through the Release Date, the Contractor agrees to defend, indemnify and hold the Released Entities harmless from and against any and all actions, causes of action, losses or damages of whatever kind, including, without limitation, reasonable attorneys' fees and costs in arbitration and at the pre-trial, trial and appellate levels, which the Released Entities may suffer by reason of (a) any claim made against the Project or any of the Released Entities relating to labor, services, materials or equipment furnished by or through the Contractor in connection with the Project, or (b) any breach of any representation or warranty made by the Contractor to Owner in connection with the Project, including the representations and warranties included herein, any false statement made in this Contractor's Partial Lien Waiver and Release or any misrepresentation or omission made to Owner by the Contractor.

The Contractor acknowledges and agrees that (a) Owner is relying upon the representations and warranties made herein as a material inducement for Owner to make the Progress Payment to the Contractor; (b) this Contractor's Partial Lien Waiver and Release is freely and voluntarily given by the Contractor, and the Contractor has had the advice of counsel in connection herewith and is fully informed as to the legal effects of this Contractor's Partial Lien Waiver and Release, and the Contractor has voluntarily accepted the terms herein for the consideration recited above; and (c) the tendering of the Progress Payment by Owner and the receipt of the Progress Payment and the execution of this Contractor's Partial Lien Waiver and Release by the Contractor shall not, in any manner whatsoever, release the Contractor from (i) its continuing obligations with respect to the completion of any work at the Project that remains incomplete, including warranty work or guaranty work, or the correction of defective or non-conforming work; (ii) any contractual, statutory or common law obligations of the Contractor with respect to the Released Entities in connection with the Project; or (iii) any other obligations of the Contractor with respect to Released Entities in connection with the Project.

Appendix H-1 – Form of Subcontractor Certificate for Partial Waiver of Liens

HEARING EXHIBIT - 00000172

APPENDIX H-1

FORM OF SUBCONTRACTOR CERTIFICATE FOR PARTIAL WAIVER OF LIENS

This SUBCONTRACTOR'S PARTIAL LIEN WAIVER AND RELEASE is made by [_____], a [_____] (the "Releasor"), subcontractor to SunPower Corporation, Systems, a Delaware corporation ("Contractor"), on behalf of Releasor, its successors and assigns, and those acting by or through any of the foregoing, for and in consideration of the sum of Ten and No/100 DOLLARS ($10.00) and other good and valuable consideration, in hand paid, the receipt and sufficiency of which are hereby acknowledged, as full payment on account of all labor, services, materials, equipment and other work furnished through the ___ day of _____, 200_ (the "Release Date"), for work in connection with the construction of a solar photovoltaic electric generation facility, and all services and utilities related thereto, in De Soto County, Florida (such facility, together with the property on which such facility is located, the "Project") by Contractor on behalf of Florida Power & Light Company, a Florida corporation ("Owner").

Solely with respect to the work performed by the Releasor on or prior to the Release Date in connection with the Project, the Releasor does hereby unconditionally and irrevocably waive, release, remise, relinquish and quit-claim (collectively, the "Release") all actions, claims, demands, liens, lien rights and claims of lien, of any kind whatsoever (collectively, "Claims"), which Releasor ever had or now has, known or unknown, against the Project or against Owner or Contractor, their partners, parents, subsidiaries and affiliates, at all tiers, and their insurers, sureties, employees, officers, directors, representatives, shareholders, agents, and all parties acting for any of them (collectively, the "Released Entities"), including, without limitation, all claims related to, in connection with, or arising out of, all facts, acts, events, circumstances, changes or extra work, constructive or actual delays or accelerations, interferences and the like, which have occurred or may be claimed to have occurred. The foregoing Release shall only be effective with respect to Claims arising in connection with the portion of the work performed by Releasor prior to the Release Date.

The Releasor warrants and represents, solely with respect to all work by Releasor completed for the Project through the Release Date, that (a) the Releasor has not assigned or pledged any rights or claims in any amount due or to become due from Contractor in connection with the Project; (b) payment has been or will be made to all of its subcontractors, laborers and material suppliers, at all tiers, for all labor, services, materials and equipment furnished by or through the Releasor for the Project, including all payroll taxes and contributions required to be made; (c) no claims from any of its subcontractors, vendors, mechanics or materialmen against the Released Entities in connection with the Project have been submitted to Releasor with respect to the Project or remain unsatisfied as of the date hereof; (d) no mechanics' or materialmen's liens have been filed with respect to the Project that have not been discharged; and (e) payment of all amounts due has been made to all consultants, employees, subcontractors, laborers and material suppliers, at all tiers, and all other entities, for all labor, services, materials and equipment furnished by or through Releasor for the Project, including, without limitation, all payroll taxes and contributions required to be made and all wages, overtime pay, premium pay, holiday pay, sick pay, personal leave pay, severance pay, fees, fringe benefits, commissions and reimbursable expenses required to be paid and all deductions for dues, fees or contributions required to be made in connection with all collective bargaining agreements in existence, if any, which affect any worker(s) providing services for the Project.

Solely with respect to all work by Releasor in connection with the Project completed through the Release Date, the Releasor agrees to defend, indemnify and hold the Released Entities harmless from and against any and all actions, causes of action, losses or damages of whatever kind, including, without limitation, reasonable attorneys' fees and costs in arbitration and at the pre-trial, trial and appellate levels, which the Released Entities may suffer by reason of (a) any claim made against the Project or any of the Released Entities relating to labor, services, materials or equipment furnished by or through the Releasor, or (b) any breach of any representation or warranty made by the Releasor to the Released Entities, including the representations and warranties included herein, any false statement made in this Subcontractor's Partial Lien Waiver and Release, or any misrepresentation or omission made to the Released Entities by the Releasor.

The Releasor acknowledges and agrees that (a) the Contractor and Owner are relying upon the representations and warranties made herein as a material inducement for the Contractor to make payment to the Releasor; (b) this Subcontractor's Partial Lien Waiver and Release is freely and voluntarily given by the Releasor and the Releasor has had the advice of counsel in connection herewith and is fully informed as to the legal effects of this Subcontractor's Partial Lien Waiver and Release and the Releasor has voluntarily accepted the terms herein for the consideration recited above; and (c) the tendering of payment by the Contractor and the receipt of payment and the execution of this Subcontractor's Partial Lien Waiver and Release by the Releasor shall not, in any manner whatsoever, release the Releasor from (i) its continuing obligations with respect to the completion of any work at the Project that remains incomplete, including warranty work or guaranty work, or the correction of defective or non-conforming work; (ii) any contractual, statutory or common law obligations of the Releasor with respect to any of the Released Entities in connection with the Project; or (iii) any other obligations of the Releasor with respect to any of the Released Entities in connection with the Project.

ECRC-08-3006 HEARING EXHIBIT - 00000175

Appendix I – Form of Contractor Parent Guaranty

APPENDIX I

FORM OF CONTRACTOR PARENT GUARANTY

THIS GUARANTY (this "Guaranty"), dated as of June [__], 2008, is issued by SunPower Corporation, a Delaware corporation (the "Guarantor"), in favor of Florida Power & Light Company, a Florida corporation ("Owner").

Pursuant to Section 11.8 of Turnkey Engineering, Procurement and Construction Agreement for Solar Photovoltaic Generating Facility dated as of June [__], 2008, (as the same may be amended, modified and supplemented from time to time, the "Agreement") by and between SunPower Corporation, Systems, a Delaware corporation, and of which Guarantor is the parent (the "Subsidiary"), and Owner, Guarantor hereby covenants and agrees with Owner as follows:

Section 1. Definitions. Capitalized terms used herein and not otherwise defined shall have their respective meanings as set forth in the Agreement.

Section 2. Guaranty.

(a) Guaranty. Guarantor hereby irrevocably and unconditionally guarantees, as primary obligor and not merely as surety, to and for the benefit of Owner and any successor or permitted assignee of Owner under the Agreement, the full and prompt payment and performance by Subsidiary of each and every payment and performance obligation of Subsidiary arising under the Agreement (whether such obligation presently exists or is created, incurred or arising from time to time hereafter), including, without limitation, the payment when due of any indemnities, refunds and liquidated damages payable at any time under the Agreement, all amounts payable to Owner pursuant to Section 3(a) of this Guaranty and the performance of the Work (the "Guaranteed Obligations"). Guarantor further agrees that if Subsidiary shall fail to pay or perform in full when due all or any part of the Guaranteed Obligations, Guarantor will immediately pay or perform the same upon demand.

(b) Absolute Guaranty. Subject to Section 2(e) of this Guaranty, Guarantor agrees that its obligations under this Guaranty are irrevocable, absolute, independent and unconditional and shall not be affected by any circumstance that constitutes a legal or equitable discharge of a guarantor or surety other than payment and performance in full of the Guaranteed Obligations. In furtherance of the foregoing and without limiting the generality thereof, Guarantor agrees, subject to the other terms and conditions hereof, as follows:

(i) this Guaranty is a guaranty of payment and performance and not of collectibility;

(ii) Owner may from time to time, without notice or demand and without affecting the validity or enforceability of this Guaranty or giving rise to any limitation, impairment or discharge of Guarantor's liability hereunder, (A) create new obligations or liabilities under the Agreement or renew, extend, accelerate or otherwise change the time, place, manner or terms of the Guaranteed Obligations or otherwise amend or modify the Agreement or change the terms of the Guaranteed Obligations or any part thereof, (B) settle, compromise, release or discharge, or accept or refuse any offer of payment of, or substitutions for, the Guaranteed Obligations or any agreement relating thereto and/or subordinate the payment of the same to the payment of any other obligations, (C) request or accept other guaranties of the Guaranteed Obligations, (D) take and hold security for the payment of this Guaranty or the Guaranteed Obligations, (E) substitute, release, exchange, compromise, subordinate or modify, with or without consideration, any security for payment of the Guaranteed Obligations, any other guaranties of the Guaranteed Obligations, or any other obligation of any Person with respect to the Guaranteed Obligations, (F) enforce and apply any security now or hereafter held by or for the benefit of Owner in respect of this Guaranty or the Guaranteed Obligations and direct the order or manner of sale thereof, or exercise any other right or remedy that Owner may have against any such security, as Owner in its discretion may determine consistent with the Agreement and any applicable security agreement, notwithstanding that such action operates to impair

or extinguish any right of subrogation, reimbursement, indemnification or contribution or any other right or remedy of Guarantor against Subsidiary or any other guarantor of the Guaranteed Obligations or any other guaranty of or security for the Guaranteed Obligations, (G) assign the Guaranteed Obligations in whole or in part to the extent provided in the Agreement, or (H) exercise any other rights available to Owner under the Agreement, at law or in equity; and

(iii) this Guaranty and the obligations of Guarantor hereunder shall be valid and enforceable and shall not be subject to any limitation, impairment or discharge for any reason (other than payment in full of the Guaranteed Obligations and as otherwise set forth in this Guaranty), including, without limitation, the occurrence of any of the following, whether or not Guarantor shall have had notice or knowledge of any of them: (A) any failure to assert or enforce, or agreement not to assert or enforce, or the stay or enjoining, by order of court, by operation of law or otherwise, of the exercise or enforcement of, any claim or demand or any right, power or remedy with respect to the Guaranteed Obligations or any agreement relating thereto, or with respect to any other guaranty of or security for the payment of the Guaranteed Obligations; (B) any waiver, amendment or modification of, or any consent to departure from, any of the terms or provisions of the Agreement or any agreement or instrument executed pursuant thereto or of any other guaranty or security for the Guaranteed Obligations; (C) the Guaranteed Obligations, or any agreement relating thereto, at any time being found to be illegal, invalid or unenforceable in any respect; (D) the personal or corporate incapacity of any Person; (E) the bankruptcy, receivership or insolvency of Subsidiary or any other Person, or the discharge of Subsidiary's or any other Person's obligations in any bankruptcy, receivership or similar proceeding; (F) any merger or consolidation of Subsidiary or Guarantor into or with any other Person, or any sale, lease or transfer of any of the assets of Subsidiary or Guarantor to any other Person, (G) any change in the ownership of any interests of Subsidiary or any change in the relationship between Subsidiary and Guarantor, or any termination of such relationship or (H) any other act or thing or omission, or delay to do any other act or thing, which may or might in any manner or to any extent vary the risk of Guarantor as an obligor in respect of the Guaranteed Obligations.

(c) Payments. All payments made by Guarantor hereunder shall be made without set-off or counterclaim and without any deduction or withholding for any reason, except as expressly provided to the contrary in the Agreement. All payments hereunder shall be made in U.S. dollars in immediately available funds.

(d) Reinstatement. Notwithstanding anything to the contrary contained herein, this Guaranty shall continue to be effective or be reinstated, as the case may be, if at any time any payment, or part thereof, under this Guaranty is rescinded or must otherwise be returned or restored by Owner upon the insolvency, bankruptcy, dissolution, liquidation or reorganization of, or similar event affecting, Subsidiary or Guarantor, or any substantial part of either's property, or otherwise, all as though such payment had not been made.

(e) Defenses. Notwithstanding anything herein to the contrary, Guarantor specifically reserves to itself all rights, counterclaims and other defenses that the Subsidiary is or may be entitled to arising from or out of the Agreement, except for any counterclaims or defenses arising out of the bankruptcy, insolvency, dissolution or liquidation of the Subsidiary, the lack of power or authority of the Subsidiary to enter into the Agreement or to perform its obligations thereunder, or the lack of validity or enforceability of the Subsidiary's obligations under the Agreement or any transaction thereunder.

Section 3. Other Provisions of the Guaranty.

(a) Costs and Expenses. The prevailing party in any action or proceeding shall be entitled to recover from the other party all of its reasonable costs and expenses incurred in connection with such action or proceeding, including reasonable attorneys' fees and costs at the trial court and all appellate levels.

ECRC-08-3009 HEARING EXHIBIT - 00000178

(b) Waivers by Guarantor. Guarantor hereby waives for the benefit of Owner, to the maximum extent permitted by Applicable Laws:

(i) all of the following: (A) notice of acceptance hereof or of any matter referred to in Section 2 hereof , (B) all presentments and demands for payment, (C) notices of default, nonpayment, protests, notices of protest, notices of dishonor and notices of any renewal, extension or modification of the Guaranteed Obligations or any agreement related thereto, (D) notice of any action taken or omitted to be taken by Owner in reliance hereon and any and all notices which may or might be lawfully waived by Guarantor, (E) any requirement that Owner be diligent or prompt in making demands hereunder or in giving notice to Guarantor of any default by Subsidiary, or asserting any other rights of Owner hereunder against Subsidiary, (F) any requirement that Owner protect, secure, perfect or insure any security interest or lien or any property subject thereto, (G) any bankruptcy, insolvency, reorganization, arrangement, adjustment, composition, liquidation or similar event of either Subsidiary or Guarantor that might constitute a defense to any payment required under the Agreement or hereunder, (H) any event, occurrence or other circumstance which might otherwise constitute a legal or equitable discharge of a surety or guarantor, including any defense based upon any law, rule or regulation which provides that the obligation of a surety must not be greater or more burdensome than the obligation of the principal, (I) any defense arising by reason of the incapacity, lack of authority or any disability or other defense of Subsidiary including, without limitation, any defense based on or arising out of the lack of validity or the unenforceability of the Guaranteed Obligations or any agreement or instrument relating thereto or by reason of the cessation of the liability of Subsidiary from any cause other than payment in full of the Guaranteed Obligations or termination of this Guaranty in accordance with its terms, (J) any defense arising out of any election by Owner to foreclose on any security held by or for the benefit of Owner pursuant to one or more judicial or nonjudicial sales, even though such election operates to impair or extinguish any right of subrogation, reimbursement, indemnification or contribution or any other right or remedy of Guarantor against Subsidiary or any other guarantor of the Guaranteed Obligations or any other guaranty of or any security for the Guaranteed Obligations, (K) the benefit of any statute of limitations affecting Guarantor's liability hereunder or the enforcement hereof, and (L) any rights to set-offs, recoupments and counterclaims;

(ii) any requirement, and any right to require, as a condition of payment by Guarantor, (A) that any right or power be exercised or any action be taken against either Subsidiary, any other guarantor or any collateral security for the Guaranteed Obligations, (B) that Owner proceed against or exhaust any security held from Subsidiary or any other person, or (C) that Owner pursue any other remedy in Owner's power whatsoever, and Guarantor waives the right to have the property of Subsidiary first applied to the discharge of the Guaranteed Obligations. Owner may, at its election, exercise any right or remedy it may have against Subsidiary or any security now or hereafter held by Owner. Guarantor waives (D) any principles or provisions of Applicable Laws, statutory or otherwise, that are or might be in conflict with the terms of this Guaranty and any defense based on the discharge of Subsidiary by operation of Applicable Laws, notwithstanding any intervention or omission by Owner, including any defenses or benefits that may be derived from or afforded by Applicable Laws (whether now in effect or hereafter adopted) that limit the liability of or exonerate guarantors or sureties, and (E) any defense based on or arising out of the absence, impairment or loss of any right of subrogation, reimbursement, indemnification or contribution or any other right or remedy of Guarantor against Subsidiary or any such security, whether resulting from such election by Subsidiary or otherwise; and

(iii) all rights and benefits under (A) provisions of Applicable Laws purporting to (1) reduce the obligation of a surety or guarantor upon the acceptance by a creditor of anything in partial satisfaction of an obligation, (2) exonerate a surety or guarantor if by any act of the creditor, without the consent of the surety or guarantor, the original obligation of the principal is altered in any respect, or the remedies or rights of the creditor against the principal, in respect thereto, are in any way impaired or suspended (it being expressly understood and agreed that Owner may compromise, settle, alter, extend, waive, amend, suspend or surrender any Guaranteed Obligation or

ECRC-08-3010 HEARING EXHIBIT - 00000179

any right or remedy with respect thereto without notice to or consent by Guarantor and without affecting Guarantor's obligations hereunder), (3) exonerate the surety or guarantor to the extent that the creditor does not proceed against the principal, or pursue any other remedy in the creditor's power which the surety or guarantor cannot pursue, and which would lighten the surety's or guarantor's burden, and (4) reduce a surety's or guarantor's obligations in proportion to the principal obligation, and (B) provisions of Applicable Laws requiring or permitting creditors or lienors to marshal assets or liens; it being the intention hereof that Guarantor shall remain liable as principal, to the extent set forth in this Guaranty, for so long as this Guaranty shall remain in effect, notwithstanding any act, omission or thing which might otherwise operate as a legal or equitable discharge of the Guarantor other than the payment in full of the Guarantee Obligations.

(c) **Deferral of Subrogation**. Until such time as all of the Guaranteed Obligations have been fully satisfied, notwithstanding any payment made by Guarantor hereunder or the receipt of any amounts by Owner with respect to the Guaranteed Obligations: (i) Guarantor (on behalf of itself, its successors and assigns, including any surety or guarantor) agrees not to exercise any all rights it may have at law or in equity (including, without limitation, any law subrogating Guarantor to the rights of Owner) to seek subrogation, contribution, indemnification, or any other form of reimbursement from Subsidiary, any other guarantor, or any other Person now or hereafter primarily or secondarily liable for any of the Guaranteed Obligations of Subsidiary to Owner, for any disbursement made by Guarantor under or in connection with this Guaranty or otherwise; and (ii) Guarantor agrees not to obtain any benefit of, and any right to participate in, any security, whether real or personal property, now or hereafter held by Owner for the Guaranteed Obligations.

Section 4. Representations and Warranties of Guarantor. Guarantor hereby represents and warrants to Owner as follows:

(a) Guarantor is duly organized, validly existing and in good standing under the laws of its jurisdiction of organization;

(b) Guarantor has full power, authority and legal right to execute and deliver this Guaranty and all other instruments, documents and agreements required by the provisions of this Guaranty to be executed, delivered and performed by Guarantor, and to perform its obligations hereunder and thereunder;

(c) The execution, delivery and performance of this Guaranty and all other instruments, documents and agreements required by the provisions of this Guaranty to be executed, delivered and performed by Guarantor have been duly authorized by all necessary company action on the part of Guarantor;

(d) This Guaranty has been duly executed and delivered by Guarantor and constitutes the legal, valid and binding obligation of Guarantor, enforceable against it in accordance with its terms; and

(e) All necessary action has been taken under Applicable Laws to authorize the execution, delivery and performance of this Guaranty. No governmental approvals or other consents, approvals, or notices of or to any Person are required in connection with the execution, delivery, performance by Guarantor or the validity or enforceability, of this Guaranty.

Section 5. Notices. All notices and other communications provided for hereunder must be in writing to be effective and shall be deemed to be delivered and received (a) if personally delivered or if delivered by courier service, when actually received by the party to whom notice is sent, (b) if delivered by facsimile, on the first Business Day following the day transmitted, or (c) if delivered by mail (whether actually received or not), at the close of business on the third Business Day following the day when placed in the mail, postage prepaid, certified or registered, addressed to the appropriate party hereto, at the address and/or facsimile numbers of such party set forth below (or at such other address as such party may designate by written notice to the other party in accordance with this Section:

(a) If to Guarantor:

SunPower Corporation
3939 North First Street
San Jose, California 95134
Attention: Chief Financial Officer
Facsimile: (408) 739-7713

(b) If to Owner:

Florida Power & Light Company
700 Universe Boulevard
Juno Beach, FL 33408
Attention: [_____]
Facsimile: [_____]

The addresses and facsimile numbers of either party for notices given pursuant to this Guaranty may be changed by means of a written notice given to the other party at least fifteen (15) Business Days prior to the effective date of such change.

Section 6. Miscellaneous Provisions.

(a) Waiver; Remedies Cumulative. No failure on the part of Owner to exercise, and no delay on the part of Owner in exercising, any right or remedy, in whole or in part hereunder shall operate as a waiver thereof. No single or partial exercise of any right or remedy shall preclude any other or further exercise thereof or the exercise of any other right or remedy. No waiver by Owner shall be effective unless it is in writing and such writing expressly states that it is intended to constitute such waiver. Any waiver given by Owner of any right, power or remedy in any one instance shall be effective only in that specific instance and only for the purpose for which given, and will not be construed as a waiver of any right, power or remedy on any future occasion. In addition, Guarantor may not claim that Owner could have avoided or mitigated, in any manner or through any action, the damages resulting from a default of Subsidiary under the Agreement. The rights and remedies of Owner herein provided are cumulative and not exclusive of any rights or remedies provided by law.

(b) Successors and Assigns. This Guaranty shall be binding upon the successors of Guarantor and shall inure to the benefit of Owner and its successors and permitted assigns. Guarantor shall not assign or transfer all or any party of its rights or obligations hereunder without the prior written consent of Owner. Any purported assignment or delegation without such written consent shall be null and void. Owner may assign its rights and obligations hereunder to any assignee of its rights under the Agreement permitted in accordance with the Agreement. No other Persons shall be a third-party beneficiary of, or otherwise benefit by, this Guaranty or have or acquire any rights by reason of this Guaranty.

(c) Amendment. This Guaranty may not be modified, amended, terminated or revoked, in whole or in part, except by an agreement in writing signed by Owner and Guarantor.

(d) Termination and Release. Subject to Section 2(d) hereof, this Guaranty shall remain in effect until the payment in full of the Guaranteed Obligations. No release of this Guaranty shall be valid unless executed by Owner and delivered to Guarantor.

(e) GOVERNING LAW; JURISDICTION.

(i) THE RIGHTS AND OBLIGATIONS OF THE PARTIES UNDER OR PURSUANT TO THIS GUARANTY SHALL BE GOVERNED BY AND CONSTRUED IN ACCORDANCE WITH THE LAWS OF THE STATE OF FLORIDA, WITHOUT REGARD FOR

ECRC-08-3012
HEARING EXHIBIT - 00000181

ANY PRINCIPLES OF CONFLICTS OF LAW THAT WOULD DIRECT OR PERMIT THE APPLICATION OF THE LAW OF ANY OTHER JURISDICTION.

(ii) THE EXCLUSIVE VENUE FOR ANY ACTION OR PROCEEDING RELATED TO THIS GUARANTY SHALL BE, AND GUARANTOR HEREBY SUBMITS TO THE JURISDICTION OF, THE FEDERAL COURTS OF THE UNITED STATES FOR THE SOUTHERN DISTRICT OF FLORIDA, PROVIDED, THAT IF FOR WHATEVER THE REASON THE FEDERAL COURTS OF THE UNITED STATES FOR THE SOUTHERN DISTRICT OF FLORIDA WILL NOT OR CANNOT HEAR SUCH ACTION OR PROCEEDING, THE EXCLUSIVE VENUE FOR ANY ACTION OR PROCEEDING RELATED TO THIS GUARANTY SHALL BE, AND GUARANTOR HEREBY SUBMITS TO THE JURISDICTION OF, THE COURTS OF THE STATE OF FLORIDA IN PALM BEACH COUNTY. THE PARTIES IRREVOCABLY WAIVE ANY OBJECTION WHICH ANY OF THEM MAY NOW OR HEREAFTER HAVE TO THE BRINGING OF ANY SUCH ACTION OR PROCEEDING IN SUCH RESPECTIVE JURISDICTIONS,

(iii) GUARANTOR WAIVES ANY OBJECTION WHICH IT MAY HAVE TO THE LAYING OF VENUE OF ANY SUCH SUIT, ACTION OR PROCEEDING IN ANY OF SUCH COURTS AND ANY CLAIM THAT ANY SUCH SUIT, ACTION OR PROCEEDING HAS BEEN BROUGHT IN AN INCONVENIENT FORUM, INCLUDING ANY OBJECTION TO THE LAYING OF VENUE BASED ON THE GROUNDS OF FORUM NON CONVENIENS AND ANY OBJECTION BASED ON THE GROUNDS OF LACK OF IN PERSONAM JURISDICTION.

(iv) GUARANTOR IRREVOCABLY CONSENTS TO SERVICE OF PROCESS OUT OF ANY OF THE AFOREMENTIONED COURTS IN ANY MANNER PERMITTED BY SUCH COURTS, INCLUDING REGISTERED OR CERTIFIED MAIL, POSTAGE PREPAID, TO GUARANTOR AT ITS ADDRESS SET FORTH IN THIS AGREEMENT (OR AS OTHERWISE NOTICED TO THE OTHER PARTY PURSUANT TO SECTION 5), IN EACH CASE SUCH SERVICE TO BECOME EFFECTIVE THIRTY (30) DAYS AFTER SUCH MAILING.

(v) GUARANTOR AGREES THAT FINAL JUDGMENT IN ANY SUCH ACTION OR PROCEEDING SHALL BE CONCLUSIVE AND MAY BE ENFORCED IN ANY OTHER JURISDICTION BY SUIT ON THE JUDGMENT OR IN ANY OTHER MANNER PROVIDED BY LAW.

(vi) NOTHING IN THIS SECTION SHALL AFFECT THE RIGHT OF OWNER (A) TO SERVE LEGAL PROCESS IN ANY OTHER MANNER PERMITTED BY LAW, OR (B) TO BRING ANY SUIT, ACTION OR PROCEEDING AGAINST THE UNDERSIGNED OR ITS PROPERTIES IN THE COURTS OF ANY OTHER JURISDICTIONS.

(vii) GUARANTOR AND OWNER EACH HEREBY IRREVOCABLY AND UNCONDITIONALLY WAIVE ANY AND ALL RIGHT TO TRIAL BY JURY IN ANY ACTION, SUIT OR COUNTERCLAIM ARISING IN CONNECTION WITH THIS GUARANTY. THIS PROVISION IS A MATERIAL INDUCEMENT FOR GUARANTOR AND OWNER TO ENTER INTO THIS GUARANTY.

(f) **Survival**. All representations and warranties made in this Guaranty and in any other instrument, document, and agreement delivered pursuant hereto or in connection herewith shall survive the execution and delivery of this Guaranty.

(g) **Severability**. If any provision of this Guaranty is held to be illegal, invalid, or unenforceable under present or future laws, such provision shall be fully severable; this Guaranty shall be construed and enforced as if such illegal, invalid or unenforceable provision had never comprised a part of this Guaranty; and the remaining provisions of the Guaranty shall remain in full force and effect and shall not be affected by the illegal, invalid, or unenforceable provision or by its severance from the Guaranty. Furthermore, in lieu of such illegal, invalid or unenforceable provision, there shall

be added automatically as a part of this Guaranty a provision as similar in its terms to such illegal, invalid or unenforceable provision as may be possible and be legal, valid and enforceable.

(h) Information. Owner shall have no obligation to disclose or discuss with Guarantor its assessment, or Guarantor's assessment, of Subsidiary's financial condition. Guarantor acknowledges and agrees that it has adequate means to obtain information from Subsidiary on a continuing basis concerning Subsidiary's financial condition and its ability to perform its obligations under the Agreement, and Guarantor assumes the responsibility for being and keeping informed of Subsidiary's financial condition and of all circumstances bearing upon the risk of nonpayment of the Guaranteed Obligations. Guarantor hereby waives and relinquishes any duty on the part of Owner to disclose any matter, fact or thing relating to the business, operations or conditions of Subsidiary now known or hereafter known by Owner.

(i) Counterparts. Guarantor and Owner acknowledge and agree that this Guaranty may be executed in multiple counterparts, and transmitted via telecopy, each such counterpart (whether transmitted via telecopy or otherwise), when executed, shall constitute an integral part of one and the same agreement.

This Guaranty has been duly executed on behalf of the Guarantor by its authorized officer as of the date first written above.

Appendix J – Option Pricing

HEARING EXHIBIT - 00000184

Appendix J

Option Pricing

FPL may elect to purchase any, all or none of the options listed below, subject to maximum annual quantities, in the column entitled "Option Description" (each an "Option", collectively the "Options"). The price of each of the Options for the Project is set forth in the column entitled "Option Price", which price shall be paid at the same percentages upon achievement of the same milestones set forth in the Construction and Payment Milestone Schedule attached to the Agreement.[1] In the event FPL notifies Contractor of its exercise of a given Option, upon FPL's delivery of a Final Notice to Proceed with respect to the associated commencement of Work, an additional Letter of Credit shall be issued pursuant to the requirements of Section 7.5 with a face amount equal to five percent (5%) of the related Option Price through the final acceptance date, after which the face amount of such Letter of Credit shall equal two and one-half percent (2.5%) of the Option Price until the expiration of such Letter of Credit on the second anniversary of the final acceptance date.

The notice to proceed date (s), critical milestone dates, guaranteed provisional acceptance and final acceptance dates, construction and milestone payment dates, and termination payment dates shall be mutually agreed by the Parties at the time of Option exercise. In order to choose any of the Options, FPL must notify Contractor on or before the date set forth in the column entitled "Option Date". In the event FPL exercises an Option set forth herein, such Option(s) shall thereafter be considered part of the Work, and Contractor shall promptly commence and diligently pursue to completion such additional Work.

Option Description	Option Price	Option Date
1) 25 MW (net) capacity increase.	$134,100,590	July 1, 2009 (for 2010 install)
2) 5 MW (net) capacity increase. FPL may exercise this option up to five times, for a total of 25 MW (net) capacity increase.	$27,244,759 for each 5 MW option selected	July 1, 2009 (for 2010 install)
3) 25 MW (net) capacity increase.	$128,608,566	January 1, 2010 (for 2011 install)
4) 5 MW (net) capacity increase. FPL may exercise this option up to five times, for a total of 25 MW (net) capacity increase.	$26,129,369 for each 5 MW option selected	January 1, 2010 (for 2011 install)

[1] The Option Price assumes the Driven Pier Design (as defined in Section 7.1 of the Agreement) is implemented. In the event that Contractor elects not to effect the Driven Pier Design, the Parties will mutually agree on appropriate revisions to the Option Price.

HEARING EXHIBIT - 00000185

Materials Cost Adjustments:

Indexing for Steel

Parties agree that the prices for Options #3 and 4 above will be adjusted in the event of an increase or decrease of more than 5% in the price of steel on The Steel Index (www.thesteelindex.com) between the (i) average index price in dollars/per short ton using "US Domestic Hot Rolled-Coil" of the of the prior four (4) week period preceding the original date the EPC agreement is executed and (ii) the average index price of the prior four (4) week period preceding the date that the Option is exercised. If The Steel Index is not available for such purposes, the Parties shall use the American Metal Market (www.amm.com) instead. For purposes of the foregoing price adjustment steel shall be deemed to represent 8% of the total Option Price. The price shall be adjusted by the proportional increase or decrease (as applicable) of the index price beyond the 5% tolerance band (e.g. an increase of 9% in the index shall cause 8% of the Option Price to increase by 4% (i.e. 9%-5%=4%). For purposes of clarification, only the 8% steel portion of the Option Price increases 4%. For example, if FPL exercises the 25 MW Option for a 2011 installation at $128,608,566 and the index increases 9%, the Option Price shall increase $409,600.

Appendix K – Module Warranty

SUNPOWER

SUNPOWER LIMITED WARRANTY FOR PV MODULES

SPR-315E-xxx-x, SPR-300E-xxx-x, SPR-305-xxx-x, SPR-290-xxx-x, SPR-230-xxx-x, SPR-225-xxx-x, SPR-220-xxx-x, SPR-217-xxx-x, SPR-215-xxx-x, SPR-210-xxx-x, SPR-205-xxx-x, SPR-200-xxx-x, SPR-90-xxx-x ("xxx-x" define product variants)

1. Limited Product Warranty – Ten (10) Year Repair, Replacement or Refund Remedy

SunPower Corporation with offices at 3939 North First Street, San Jose, CA 95134 ("SunPower") warrants that for ten (10) years from the date of delivery, its Photovoltaic modules ("PV modules") shall be free from defects in materials and workmanship under normal application, installation, use and service conditions. If the PV modules fail to conform to this warranty, then for a period ending ten (10) years from date of delivery to the original end-customer ("the Customer"), SunPower will, at its option, either repair or replace the product, or refund the purchase price as paid by the Customer ("Purchase Price"). The repair, replacement or refund remedy shall be the sole and exclusive remedy provided under the Limited Product Warranty and shall not extend beyond the ten (10) year period set forth herein. This Limited Product Warranty does not warrant a specific power output, which shall be exclusively covered under clause 2 hereinafter (Limited Power Warranty).

2. Limited Power Warranty

a) SunPower additionally warrants: If, within twelve (12) years from date of delivery to the Customer any PV module(s) exhibits a power output less than 90% of the Minimum Peak Power[1] as specified at the date of delivery in SunPower's Product datasheet, provided that such loss in power is determined by SunPower (at its sole and absolute discretion) to be due to defects in material or workmanship SunPower will replace such loss in power by either providing to the Customer additional PV modules to make up such loss in power or by providing monetary compensation equivalent to the cost of additional PV modules required to make up such loss in power or by repairing or replacing the defective PV modules, at the option of SunPower

b) SunPower additionally warrants: If, within twenty five (25) years from date of delivery to the Customer any PV module(s) exhibits a power output less than 80% of the Minimum Peak Power[1] as specified at the date of delivery in SunPower's Product datasheet, provided that such loss in power is determined by SunPower (at its sole and absolute discretion) to be due to defects in material or workmanship SunPower will replace such loss in power by either providing to the Customer additional PV modules to make up such loss in power or by providing monetary compensation equivalent to the cost of additional PV modules required to make up such loss in power or by repairing or replacing the defective PV modules, at the option of SunPower.

3. Exclusions and limitations

a) Warranty claims must in any event be filed within the applicable Warranty period.
b) Warranty claims may only be made by, or on the behalf of, the original end customer or a person to whom title has been transferred for the PV Modules.
c) The Limited Warranties do not apply to any of the following:
    1. PV modules which in SunPower's absolute judgment have been subjected to: misuse, abuse, neglect or accident; alteration, improper installation, application or removal (including but not

[1] *"Minimum Peak Power" = Peak power minus the Peak power tolerance (as specified in SunPower's Product datasheet). "Peak power" is the power in peak watts that a PV module generates at STC (Standard Test conditions: Irradiance of 1000 W/m², light spectrum AM 1.5g and a cell temperature of 25 degrees C)*

limited to installation, application or removal by any party other than a SunPower authorized dealer; non-observance of SunPower's installation, users and/or maintenance instructions; repair or modifications by someone other than an approved service technician of SunPower; power failure surges, lightning, flood, fire, accidental breakage or other events outside SunPower's control.

2. Cosmetic defects stemming from normal wear and tear of PV module materials.
3. PV modules installed in locations, which in SunPower's absolute judgment may be subject to direct contact with salt water.

d) The Limited Warranties do not cover any transportation costs for return of the PV modules, or for reshipment of any repaired or replaced PV modules, or cost associated with installation, removal or reinstallation of the PV modules.

e) When used on a mobile platform of any type, the Limited Power Warranty, applying to any of the PV modules shall be limited to twelve (12) years as per the provisions of clause 2(a) hereof.

f) Warranty claims will not apply if the type or serial number of the PV modules is altered, removed or made illegible.

4. Limitation of Warranty Scope

SUBJECT TO THE LIMITIATIONS UNDER APPLICABLE LAW, THE LIMITED WARRANTIES SET FORTH HEREIN ARE EXPRESSLY IN LIEU OF AND EXCLUDE ALL OTHER EXPRESS OR IMPLIED WARRANTIES, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY AND OF FITNESS FOR PARTICULAR PURPOSE, USE, OR APPLICATION, AND ALL OTHER OBLIGATIONS OR LIABILITIES ON THE PART OF SUNPOWER, UNLESS SUCH OTHER WARRANTIES, OBLIGATIONS OR LIABILITIES ARE EXPRESSLY AGREED TO IN WRITING SIGNED AND APPROVED BY SUNPOWER. SUNPOWER SHALL HAVE NO RESPONSIBILITY OR LIABILITY WHATSOEVER FOR DAMAGE OR INJURY TO PERSONS OR PROPERTY OR FOR OTHER LOSS OR INJURY RESULTING FROM ANY CAUSE WHATSOEVER ARISING OUT OF OR RELATED TO THE PRODUCT, INCLUDING, WITHOUT LIMITATION, ANY DEFECTS IN THE MODULE, OR FROM USE OR INSTALLATION. UNDER NO CIRCUMSTANCES SHALL SUNPOWER BE LIABLE FOR INCIDENTAL, CONSEQUENTIAL OR SPECIAL DAMAGES, HOWSOEVER CAUSED. LOSS OF USE, LOSS OF PROFITS, LOSS OF PRODUCTION, LOSS OF REVENUES ARE THEREFORE SPECIFICALLY BUT WITHOUT LIMITATION EXCLUDED.

SUNPOWER'S AGGREGATE LIABILITY, IF ANY, IN DAMAGES OR OTHERWISE, SHALL NOT EXCEED THE PURCHASE PRICE PAID TO SUNPOWER BY THE CUSTOMER, FOR THE UNIT OF PRODUCT OR SERVICE FURNISHED OR TO BE FURNISHED, AS THE CASE MAY BE, WHICH GAVE RISE TO THE WARRANTY CLAIM.

SOME STATES DO NOT ALLOW LIMITATIONS ON IMPLIED WARRANTIES OR THE EXCLUSION OF DAMAGES SO THE ABOVE LIMITATIONS OR EXCLUSIONS MAY NOT APPLY TO YOU.

5. Obtaining Warranty Performance

If you feel you have a justified claim covered by this Limited Warranty, immediately notify the (a) Installer, who sold the PV-modules, or (b) any authorized SunPower distributor, of the claim in writing, or (c) send such notification to SunPower Corporation, 3939 North First Street, San Jose, CA 95134, directly. In addition, please enclose evidence of the date of delivery of the PV module. If applicable, your installer or distributor will give advice on handling the claim. If further assistance is required, please write to SunPower for instructions. The return of any PV-modules will not be accepted unless prior written authorization has been given by SunPower.

$124,601,646	90.00%	9/1/2009
$131,523,960	95.00%	10/1/2009
$131,523,960	95.00%	11/1/2009
$138,446,274	100.00%	12/1/2009
$138,446,274	100.00%	1/1/2010

*Termination values are based on a Contract Price of $138,446,274. If the Contract Price is adjusted pursuant to the Agreement, the termination values shall be adjusted to the product of the adjusted Contract Price and the applicable "% Owed of Total Contract Price" for a given termination value.

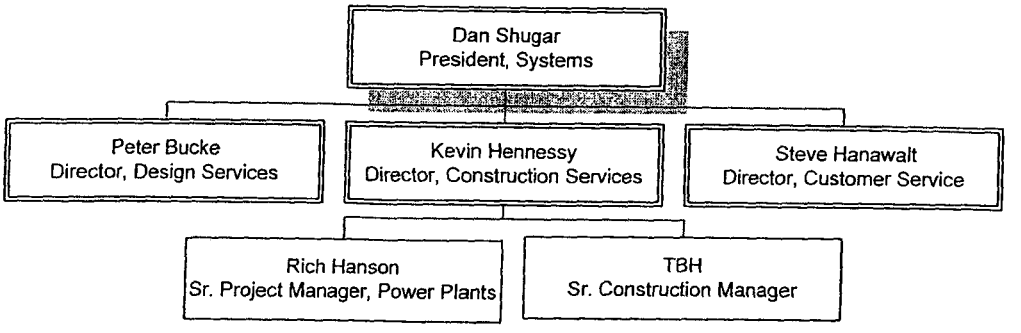
Note:
The Termination Payment due and payable upon a termination on or prior to January 1, 2009, shall be the applicable amount provided for under the column "Termination Dollars Due" for a termination on or after a date specified under the column "If Terminated After" less the aggregate amount of the Contract Price paid by FPL to Contractor as of such date. The Termination Payment due and payable upon a termination after January 1, 2009 shall be the greater of: (1) the applicable amount provided for under the column "Termination Dollars Due" for a termination on or after a date specified under the column "If Terminated After" less the aggregate amount of the Contract Price paid by FPL to Contractor as of such date and (2) the aggregate amount of outstanding approved and unpaid Requests for Payment made pursuant to the Agreement which entitle Contractor to payment in accordance with the Construction and Milestone Payment Schedule. If FPL issues a Notice to Proceed before January 1, 2009, the parties will consider, in their sole discretion, amending by mutual agreement the dates stated in this Appendix N.

Appendix O – Project Management Team

HEARING EXHIBIT - 00000195

APPENDIX O

Project Management Team



TBH – To be hired, subject to the approval requirements of Section 3.12.1 of the Agreement

Biographical Information:

Daniel S. Shugar, President, SunPower Systems

Mr. Shugar leads Supply Chain, Manufacturing, Product Development, and Project Engineering and Construction. Since January 1996, Mr. Shugar has overseen the installation of over 200 MW of solar PV projects. He has been active in solar power since 1988. Mr. Shugar has a B.S. in Electrical Engineering from Rensselaer Polytechnic University, and an MBA from Golden Gate University in San Francisco.

Kevin Hennessy, Director, Construction Services

Mr. Hennessy is a Professional Engineer with over 25 years of commercial construction experiences. He has extensive knowledge of design and construction methods of all types of building systems and has developed projects all over the globe. He is responsible for the Design and Construction groups in the Systems Group at SunPower. This team has been responsible for implementation of the largest Solar PV Energy projects throughout the world, including several projects over 20MW's. Kevin is a California licensed Civil Engineer and has a M.S. in Civil Engineering from Stanford University.

Peter Buecke, Director Design Services

Mr. Buecke is an architect who has led the design and construction division for several national home builders. He is responsible for all activities related to the design and engineering of large ground-mounted and roof-top solar projects. He has over 20 years of experience on project planning with success in setting and meeting project design milestones. He has a B.S in Design from the College of Architecture at Arizona State University.

Steve Hanawalt, Director, Customer Service

Mr. Hannawalt leads the Customer Service and O&M Group for SunPower Systems. His energy facility operations and management experience includes start-up engineering, performance engineering, operations management, and asset optimization. Prior to joining SunPower, he was Vice President of

Plant Optimization at Calpine Corporation, a large independent power producer. In that capacity his group provided the 25,000 MW fleet with system commissioning services, performance and reliability engineering, and real-time performance monitoring and diagnostic services. Plant Optimization provided the performance, reliability, and cost structure inputs to System Dispatch to optimize the economic dispatch of the generating units. Mr. Hanawalt received his B.S. in Mechanical Engineering from the University of California, Berkeley and is currently pursuing his MBA.

Rich Hanson, Senior Project Manager

Mr. Hanson has been involved as a project manager of utility size power plants since joining SunPower Corp . Most recently he was responsible for completing a 14 MW ground mounted tracking system at Nellis Air Force Base in Las Vegas, NV. Prior to joining SunPower, Rich was Director of Construction for a Construction Management firm in the California Central Valley, specializing in design/build management of medical office buildings, airport construction, and regional shopping centers.

HEARING EXHIBIT - 00000201

APPENDIX R

FORM OF CONTRACTOR CERTIFICATE FOR FINAL WAIVER OF LIENS

This CONTRACTOR'S FULL LIEN WAIVER AND RELEASE ("Contractor's Full Lien Waiver and Release") is made by SunPower Corporation, Systems, a Delaware corporation ("Contractor"), on behalf of itself, its successors and assigns, and those acting by or through any of the foregoing, for and in consideration of [AMOUNT OF FINAL PAYMENT REQUEST] DOLLARS ($[_____]) and other good and valuable consideration, in hand paid, the receipt and sufficiency of which are hereby acknowledged, as full and final payment on account of all labor, services, materials, equipment and other work performed for Florida Power & Light Company ("Owner"), in connection with the construction of a solar photovoltaic electric generation facility, and all services and utilities related thereto, in De Soto County, Florida (such facility, together with the property on which such facility is located, the "Project"), pursuant to that certain TURNKEY ENGINEERING, PROCUREMENT AND CONSTRUCTION AGREEMENT FOR SOLAR PHOTOVOLTAIC GENERATING FACILITY, dated as of June [__], 2008, between Owner and Contractor, as the same may be amended from time to time (the "Agreement").

Contractor does hereby unconditionally and irrevocably waive, release, remise, relinquish and quit-claim all actions, claims, demands, liens, lien rights and claims of lien, of any kind whatsoever, which Contractor ever had, now has, or may have in the future, known or unknown, against the Project or against Owner, its parents, subsidiaries and affiliates, at all tiers, and its and their insurers, sureties, employees, officers, directors, representatives, shareholders, agents, and all parties acting for any of them related to or arising from the Project (collectively, the "Released Entities"), including, without limitation, all claims related to, in connection with, or arising out of, all facts, acts, events, circumstances, changes or extra work, constructive or actual delays or accelerations, interferences and the like, which have occurred or may be claimed to have occurred.

The Contractor warrants and represents that (a) the Contractor has not assigned or pledged any rights or claims in any amount due or to become due from Owner related to or arising from the Project; (b) payment has been or will be made to all subcontractors, laborers and material suppliers, at all tiers, for all labor, services, materials and equipment furnished by or through the Contractor for the Project, including all payroll taxes and contributions required to be made; (c) no claims from subcontractors, vendors, mechanics or materialmen against the Released Entities have been submitted to Contractor with respect to the Project or remain unsatisfied as of the date hereof; (d) no mechanics' or materialmen's liens have been filed with respect to the Project that have not been discharged or for which a bond has not been posted in accordance with the Agreement; (e) payment of all amounts due has been made to all consultants, employees, subcontractors, laborers and material suppliers, at all tiers, and all other entities, for all labor, services, materials and equipment furnished by or through Contractor for the Project, including, without limitation, all payroll taxes and contributions required to be made and all wages, overtime pay, premium pay, holiday pay, sick pay, personal leave pay, severance pay, fees, fringe benefits, commissions and reimbursable expenses required to be paid and all deductions for dues, fees or contributions required to be made in connection with all collective bargaining agreements in existence, if any, which affect any worker(s) providing services for the Project; and (f) all contracts with consultants and subcontractors employed, used or engaged by Contractor in connection with the Project have been completed or have been terminated.

ECRC-08-3159 HEARING EXHIBIT - 00000202

The Contractor agrees to defend, indemnify and hold the Released Entities harmless from and against any and all actions, causes of action, losses or damages of whatever kind, including, without limitation, reasonable attorneys' fees and costs in arbitration and at the pre-trial, trial and appellate levels, which the Released Entities may suffer by reason of (a) any claim made against the Project or any of the Released Entities relating to labor, services, materials or equipment furnished by or through the Contractor related to or arising from the Project, or (b) any breach of any representation or warranty made by the Contractor to Owner related to or arising from the Project, including the representations and warranties included herein, any false statement made in this Contractor's Full Lien Waiver and Release or any misrepresentation or omission made to Owner by the Contractor.

The Contractor acknowledges and agrees that (a) Owner is relying upon the representations and warranties made herein as a material inducement for Owner to make payment to the Contractor; (b) this Contractor's Full Lien Waiver and Release is freely and voluntarily given by the Contractor, and the Contractor has had the advice of counsel in connection herewith and is fully informed as to the legal effects of this Contractor's Full Lien Waiver and Release, and the Contractor has voluntarily accepted the terms herein for the consideration recited above; and (c) the tendering of payment by Owner and the receipt of payment and the execution of this Contractor's Full Lien Waiver and Release by the Contractor shall not, in any manner whatsoever, release the Contractor from (i) its continuing obligations with respect to the completion of any work at the Project that remains incomplete, including warranty work or guaranty work, or the correction of defective or non-conforming work; (ii) any contractual, statutory or common law obligations of the Contractor with respect to the Released Entities related to or arising from the Project; or (iii) any other obligations of the Contractor with respect to Released Entities related to or arising from the Project.

Appendix R-1 – Form of Subcontractor Certificate for Final Waiver of Liens

HEARING EXHIBIT - 00000205

APPENDIX R-1

FORM OF SUBCONTRACTOR CERTIFICATE FOR FINAL WAIVER OF LIENS

This SUBCONTRACTOR'S FULL LIEN WAIVER AND RELEASE ("Subcontractor's Full Lien Waiver and Release") is made by [_____], a [_____] (the "Releasor"), subcontractor to SunPower Corporation, Systems, a Delaware corporation ("Contractor"), on behalf of Releasor, its successors and assigns, and those acting by or through any of the foregoing, for and in consideration of the sum of Ten and No/100 DOLLARS ($10.00) and other good and valuable consideration, in hand paid, the receipt and sufficiency of which are hereby acknowledged, as full and final payment on account of all labor, services, materials, equipment and other work furnished in connection with the construction of a solar photovoltaic electric generation facility, and all services and utilities related thereto, in De Soto County, Florida (such facility, together with the property on which such facility is located, the "Project") by Contractor on behalf of Florida Power & Light Company, a Florida corporation ("Owner").

Releasor does hereby unconditionally and irrevocably waive, release, remise, relinquish and quit-claim all actions, claims, demands, liens, lien rights and claims of lien, of any kind whatsoever, which Releasor ever had, now has, or may have in the future, known or unknown, against the Project, or against Owner or Contractor, their partners, parents, subsidiaries and affiliates, at all tiers, and their insurers, sureties, employees, officers, directors, representatives, shareholders, agents, and all parties acting for any of them related to or arising from the Project (collectively, the "Released Entities"), including, without limitation, all claims related to, in connection with, or arising out of, all facts, acts, events, circumstances, changes or extra work, constructive or actual delays or accelerations, interferences and the like, which have occurred or may be claimed to have occurred.

The Releasor warrants and represents that (a) the Releasor has not assigned or pledged any rights or claims in any amount due or to become due from Contractor related to or arising from the Project; (b) payment has been or will be made to all of its subcontractors, laborers and material suppliers, at all tiers, for all labor, services, materials and equipment furnished by or through the Releasor for the Project, including all payroll taxes and contributions required to be made; (c) no claims from any of its subcontractors, vendors, mechanics or materialmen against the Released Entities have been submitted to Releasor with respect to the Project or remain unsatisfied as of the date hereof; (d) no mechanics' or materialmen's liens have been filed with respect to the Project that have not been discharged; (e) payment of all amounts due has been made to all consultants, employees, subcontractors, laborers and material suppliers, at all tiers, and all other entities, for all labor, services, materials and equipment furnished by or through Releasor for the Project, including, without limitation, all payroll taxes and contributions required to be made and all wages, overtime pay, premium pay, holiday pay, sick pay, personal leave pay, severance pay, fees, fringe benefits, commissions and reimbursable expenses required to be paid and all deductions for dues, fees or contributions required to be made in connection with all collective bargaining agreements in existence, if any, which affect any worker(s) providing services for the Project; and (f) all contracts with consultants and subcontractors employed, used or engaged by Releasor in connection with the Project have been completed or have been terminated.

The Releasor agrees to defend, indemnify and hold the Released Entities harmless from and against any and all actions, causes of action, losses or damages of whatever kind, including, without limitation, reasonable attorneys' fees and costs in arbitration and at the pre-trial, trial and

ECRC-08-3163 HEARING EXHIBIT - 00000206

appellate levels, which the Released Entities may suffer by reason of (a) any claim made against the Project or any of the Released Entities relating to labor, services, materials or equipment furnished by or through the Releasor related to or arising from the Project, or (b) any breach of any representation or warranty made by the Releasor to the Released Entities related to or arising from the Project, including the representations and warranties included herein, any false statement made in this Subcontractor's Full Lien Waiver and Release, or any misrepresentation or omission made to the Released Entities by the Releasor.

The Releasor acknowledges and agrees that (a) the Contractor and Owner are relying upon the representations and warranties made herein as a material inducement for the Contractor or Owner to make payment to the Releasor; (b) this Subcontractor's Full Lien Waiver and Release is freely and voluntarily given by the Releasor and the Releasor has had the advice of counsel in connection herewith and is fully informed as to the legal effects of this Subcontractor's Full Lien Waiver and Release and the Releasor has voluntarily accepted the terms herein for the consideration recited above; and (c) the tendering of payment by the Contractor and the receipt of payment and the execution of this Subcontractor's Full Lien Waiver and Release by the Releasor shall not, in any manner whatsoever, release the Releasor from (i) its continuing obligations with respect to the completion of any work at the Project that remains incomplete, including warranty work or guaranty work, or the correction of defective or non-conforming work related to or arising from the Project; (ii) any contractual, statutory or common law obligations of the Releasor with respect to any of the Released Entities related to or arising from the Project; or (iii) any other obligations of the Releasor with respect to any of the Released Entities related to or arising from the Project.

APPENDIX U

Form of Letter of Credit

Florida Power & Light Company
700 Universe Blvd
Juno Beach, FL
Attention: Project General Manager

Re: Irrevocable Standby Letter of Credit No. _____

Gentlemen:

We hereby establish in your favor this Irrevocable Standby Letter of Credit No. _____ (the "Letter of Credit") for the account of SunPower Corporation, Systems, a Delaware corporation ("Contractor"), effective immediately and expiring on June 30, 2009.

We have been informed by the Applicant, but do not independently verify, that this Letter of Credit is issued pursuant to the terms of that certain Turnkey Engineering, Procurement and Construction Agreement for Solar Photovoltaic Generating Facility dated as of June [__], 2008, between Florida Power & Light Company, a Florida corporation ("Beneficiary"), and Contractor, as the same may be amended (the "Agreement").

1. Stated Amount. The amount of funds available for drawing under this Letter of Credit shall be U.S. $6,900,000.00 (six million nine hundred thousand United States Dollars) (the "Stated Amount").

2. Drawings. A drawing hereunder may be made by you on any Business Day on or prior to the date this Letter of Credit expires by delivering to Wells Fargo Bank, N.A., at any time during its business hours on such Business Day, at One Front Street 21st Floor, San Francisco, CA 94111, a copy of this Letter of Credit together with (i) a Draw Certificate executed by an authorized person substantially in the form of Attachment A hereto (the "Draw Certificate"), appropriately completed and purportedly signed by your authorized officer and (ii) your draft substantially in the form of Attachment B hereto (the "Draft"), appropriately completed and purportedly signed by your authorized officer. Partial drawings and multiple presentations may be made under this Letter of Credit. Draw Certificates and Drafts under this Letter of Credit may be sent by overnight delivery or courier to Wells Fargo Bank, N.A., at its address set forth above Attention: Standby Letter of Credit Unit. Drawings may also be presented to us via telefacsimile to our telefacsimile no. (415) 296-8905 (each such drawing, a "Fax Drawing"); *provided however* that you confirm our receipt of any Fax Drawing by telephone to our telephone no. 1-800-798-2815 (option 1). In the event of a presentation by facsimile transmission, the original of such documents shall be sent to address set forth in the preceding sentence, as aforesaid, by overnight courier for receipt by us within one (1) Business Day of the date of such facsimile transmission.

3. Time and Method for Payment. We hereby agree to honor a drawing hereunder made in compliance with this Letter of Credit by transferring in immediately available funds the amount

ECRC-08-3170 HEARING EXHIBIT - 00000213

specified in the Draft delivered to us in connection with such drawing to such account at such bank in the United States as you may specify in your Draw Certificate. If the Draw Certificate is presented to us at such address by 10:00 a.m., California time on any Business Day, payment will be made not later than 3:00 p.m., California time on the next day and if such Draw Certificate is so presented to us after 10:00 a.m., California time on any Business Day, payment will be made on the second Business Day. In clarification, we agree to honor the Draw Certificate upon receipt thereof, without regard to the truth or falsity of the assertions made therein.

4. Non-Conforming Demands. If a demand for payment made by you hereunder does not, in any instance, conform to the terms and conditions of this Letter of Credit, we shall give you prompt notice that the demand for payment was not effected in accordance with the terms and conditions of this Letter of Credit, stating the reasons therefore and that we will upon your instructions hold any documents at your disposal or return the same to you. Upon being notified that the demand for payment was not effected in conformity with this Letter of Credit, you may correct any such non-conforming demand.

5. Expiration. This Letter of Credit shall automatically expire at the close of business on June 30, 2009 or such earlier date on which we receive a Cancellation Certificate in the form of Attachment C hereto purportedly executed by your authorized officer upon which this Letter of Credit shall be cancelled (the "Expiration Date").

6. Rollover. The Letter of Credit shall be deemed automatically extended without amendment for one additional period of one (1) year from the present expiration date, unless at least sixty (60) Business Days prior to such expiration date we shall notify you by registered mail or overnight courier at the above address (or such other address as may be designated by you as contemplated by numbered paragraph 9) that we elect not to consider this Letter of Credit extended for such additional one year period; provided, however, in any event this Letter of Credit shall expire on June 30, 2010.

7. Business Day. As used herein, "Business Day" shall mean any day on which commercial banks are not authorized or required to close in the State of California.

8. Governing Law. Except as far as otherwise expressly stated herein, this Letter of Credit is subject to the International Standby Practices ("ISP98"), except for Rule 3:14(a), International Chamber of Commerce Publication No. 590. As to matters not addressed by the ISP98, this Letter of Credit shall be governed by and construed in accordance with the laws of the State of California and applicable U.S. federal law.

9. Notices. All communications to you in respect of this Letter of Credit shall be in writing and shall be delivered to the address shown for you herein before or such other address as may from time to time be designated by you in a written notice to us. All documents to be presented to us hereunder and all other communications to us in respect of this Letter of Credit, which other communications shall be in writing, shall be delivered to the address for us indicated on the signature page hereof, or such other address as may from time to time be designated by us in a written notice to you.

10. Irrevocability. This Letter of Credit is irrevocable.

11. Transferability. We shall not authorize any transfer of this Letter of Credit until a transfer certificate, substantially in the form of Attachment D hereto, is completed to our satisfaction and received by us. All transfer charges shall be for the account of the Contractor. This Letter of

Credit may not be transferred to any person with whom U.S. persons are prohibited from doing business under U.S. Foreign Asset Control Regulations or other applicable U.S. laws and regulations. Transfer of the Letter of Credit may not change the place of expiration from our above office.

12. Complete Agreement. This Letter of Credit sets forth in full our undertaking, and such undertaking shall not in any way be modified, amended, amplified or limited by reference to any document, instrument or agreement referred to herein, except for the ISP-98 and Attachments A, B, C, and D hereto and the notices referred to herein and any such reference shall not be deemed to incorporate herein by reference any document, instrument or agreement except as set forth above.

SINCERELY,

Appendix Y –Form of Quality Assurance Programs

HEARING EXHIBIT - 00000224

APPENDIX Y
FORM OF QUALITY ASSURANCE PROGRAMS

Contractor shall have in effect at all times a Quality System which as a minimum conforms to the American National Standard ANSI/ASQ ISO 9001, Model for Quality Assurance, or an approved alternative. The project specific Quality System will conform to but not be identical to the ISO 9001 Model. A site specific Quality System will be submitted for approval. This system shall ensure that all materials and services (including subcontracted materials and services) provided on this project comply with the specification and applicable Codes.

1.0 Quality Assurance Program:

1.1 Contractor shall have a QA Program in effect at all times to verify that all items and services, including subcontracted items and services, comply with the contract requirements.

1.2 This program will clearly establish the authority and responsibility of those responsible for the QA Program. Persons performing quality functions will have sufficient and well-defined responsibility and authority to enforce quality requirements; to identify, initiate, recommend, and provide solutions to quality problems; and to verify the effectiveness of the solutions.

1.3 Contractor shall submit a controlled copy of his QA or Quality Systems Manual for review and acceptance by Owner. In addition, Contractor will make available for review copies of any associated implementing procedures and/or instructions. A post award meeting will be held at Contractor's facility to discuss the Project's QA and quality requirements.

1.4 Contractor shall utilize a quality plan for all stages of the project including design, procurement, installation/erection, testing, start-up and turnover. The quality plan will identify critical activities, inspections and other quality verification points that will be performed to ensure the quality of work meets specified requirements.

1.5 Prior to the post award meeting, Contractor shall make available for review the quality plan for the project that includes implementing procedures, instructions, and check-sheets (which may include but not limited to):

1.5.1 Test & Inspections

1.5.2 Quality System Audits

1.5.3 Nondestructive Examination Control

1.5.4 Control of Special Process

1.5.5 Non-conformance Control and Corrective Actions

1.5.6 Material Control

1.5.7 Document Control and Record Retention

Contractor's preliminary site Construction Quality Plan includes "Inspection and Test plans" that comply with the National Codes (ASME, AWS, ACI). Owner will perform an overview of Contractor's Quality System. This overview does not include "Hold" or "Witness" points. Every effort will be made to implement a meaningful overview without impeding Contractor's efforts or job progress. Owner's overview is intended to assist Contractor implement an effective Quality System and associated quality controls focused on problem prevention and continuous improvement. Concerns arising from the overview activities will immediately be conveyed to Contractor for incorporation into Contractor's Quality System or Project's Quality Plan for corrective action, recurrence control, and trending. Owner's representatives will continually monitor and evaluate Contractor's timeliness and adequacy of corrective actions and recurrence controls.

1.6 If subsequent to its acceptance, the QA Program is found to be ineffective or inadequate in providing acceptable quality controls, Owner reserves the right to require the necessary revisions.

2.0 Contractor's Responsibilities for Suppliers

2.1 Material and equipment quality control: Contractor shall provide new equipment, materials and workmanship for their application.

2.2 Contractor is responsible for the work and materials specified in the contract and shall require its subcontractors/suppliers to comply with the appropriate technical and quality requirements of the specification and associated procurement documents.

2.3 Contractor will identify, in purchase documents to his suppliers, all applicable quality and QA requirements imposed by the specification on Contractor and will ensure compliance thereto. Contractor has the prime responsibility for vendor surveillance and evaluating and monitoring the implementation of

ECRC-08-3182 HEARING EXHIBIT - 00000225

the Quality Assurance Programs of his suppliers. . The degree of overview should be based on results of the evaluation and ongoing quality performance.

2.4 Contractor will submit a copy of his Vendor Surveillance plans to Owner for review prior to implementation. Upon request, Contractor will submit to Owner copies of the reports of the vendor surveillance activities that he performs on his suppliers.

3.0 Witness Points

3.1 Owner will have the right to establish witness points for which Contractor will give ten (10) business days prior notification. In addition, Owner may establish witness points to ensure resolution of quality problems.

3.2 Witness points are defined as predetermined points during fabrication when equipment or activities may be inspected or witnessed for compliance with the Purchase Order, specification, and quality requirements.

3.3 Owner will have the right to access Contractor and Contractor's Suppliers facilities at any time to verify the progress and quality of the work.

4.0 Stop Work Action

4.1 Owner will orally notify and confirm in writing to Contractor of any situation where, in the judgment of Owner, Contractor or Contractor's suppliers are performing work contrary to the conditions and terms of the Contract or where continued operations could cause damage, preclude further inspection, or render remedial action ineffective for any product or service provided by Contractor or Contractor's suppliers.

4.2 If, after this notification, Contractor does not commence appropriate corrective action to the satisfaction of Owner, Owner will initiate stop work action on the specified product or service and so notify Contractor in writing.

4.3 Upon receipt of a Stop Work Directive (SWD) from Owner, Contractor and Contractor's suppliers will cease operations, including shipments, on any specified product or service to the extent stipulated by the SWD. Resumption of operations will not be undertaken until Contractor has obtained a written authorization from Owner. A written authorization to resume further operations will only be granted upon approval of Contractor's written commitment to correct those conditions itemized on the SWD. Correction of the actual deficiency will be required prior to release for shipment.

5.0 Deviations and Nonconformance's

5.1 Departure from any requirement of this Specification shall be considered a deviation or nonconformance. Examples include physical defects in equipment, test failures, equipment out-of-tolerance, or deviations from the specification, inspection or test procedures. No deviation or nonconformance from this Specification will be accepted until approved in writing by Owner.

5.2 Access to Contractor's facility and their suppliers' facilities shall be provided to the Owner (or agent) at its' option, to evaluate the effectiveness of the quality systems. Necessary changes, which may be required to conform to the above requirements, shall be made by Contractor.

6.0 Inspection, Shop Testing and Quality Verification

6.1 Contractor shall develop, implement and provide to the owner a Quality Control Plan for Equipment Suppliers that identifies the level and extent of shop inspection, testing and other quality verification activities. Contractor shall identify the number of man-days budgeted regarding each equipment supplier listed on the Quality Control Plan.

6.2 Testing programs shall be established by Contractor, but shall not be less thorough than the manufacturer's standard testing procedures or as outlined in the major equipment contracts. Contractor is responsible for insuring that the manufacturers meet specification requirements for quality, inspections and testing contained in all equipment contracts.

6.3 Contractor's inspection and testing programs can be established based on previous experience however Contractor shall demonstrate to Owner justification of inspection activities.

6.4 Contractor shall perform inspection, shop testing or other quality verification activities with appropriately qualified and experienced personnel.

6.5 Contractor shall develop and maintain a monthly schedule that identifies the quality verification activities and witness points to be performed on this project. Copies of this schedule shall be provided to the owner.

ECRC-08-3183 HEARING EXHIBIT - 00000226

6.5.1 The Owner reserves the right of shop inspection visits and may witness shop tests, provided that Contractors Schedule is not impacted. Any shop inspections by Owner does not relieve Contractor of its responsibility contained in the terms of the Contract. Contractor shall notify Owner of impending inspection visits or tests at least ten (10) business days in advance of inspections or tests. Shop inspections shall also be identified in Contractor's schedule.

6.6 Contractor shall furnish to Owner certified copies of test reports and shop tests whether Owner witnesses the shop test or not.

7.0 Equipment Expediting Services

Expediting services are included for all engineered equipment to track the engineering phase to ensure timely delivery of vendor design drawings and documents, as well as timely engineering design drawing review, and timely resolution of open issues. Expediting services are also included to track the manufacturing and testing phase to ensure timely shipment of equipment that passes all tests and meets vendor as well as Contractor quality assurance and quality control program requirements.

8.0 Construction Quality Control

First line, primary inspection and testing (hereafter referred to as Quality Control) is the responsibility of Contractor. Contractor's quality control procedures shall be clearly stated in the Project's Quality Control Manual, and shall specify field inspections and inspection criteria. Problems discovered during inspections and testing which could impair job cost, schedule, or facility function, will be immediately conveyed to Owner.

9.0 Construction Meetings

Contractor shall conduct meetings with subcontractor supervisory personnel prior to task performance, to insure understanding of the design specification requirements. At this time, inspection requirements and witness points shall be explained. Meetings shall be documented.

10.0 Construction Surveillance

The surveillance, which shall include hands-on inspections and documentation, verifies that the installations conform to the drawings, specifications, and applicable codes. Surveillance shall include in-process inspections, early in the process, as an effort to evoke problem prevention instead of problem resolution that comes with performing only final inspections. Contractor is obligated to engineer, construct and operate equipment in accordance with manufacturers' recommendations. Owner must be notified in writing prior to Contractor initiating actions that deviate from manufacturer's recommendations.

11.0 Test Monitoring

Testing shall be observed and documented by qualified Contractor personnel. Testing procedures and test reports should be reviewed as well as direct observation of the test process.

12.0 Inspection Plan

Contractor shall develop an Inspection Plan that identifies the Quality Control activities Contractor will perform. This plan shall outline the usage and extent of the above methods, or additional methods to be used by Contractor to monitor the quality of the installation. As a minimum, Contractor's Quality Control Program shall include monitor the systems and construction activities identified on Table 1.

13.0 As-Builts

Contractor shall develop and implement a document control program to ensure that the project submittals identified in section 11.3 of the EPC Contract Exhibit A, are properly controlled and as-builts are provided to the owner in accordance to the project document submittal schedule.

ECRC-08-3184
HEARING EXHIBIT - 00000227

Table 1
Minimum Construction QC Program Requirements

Systems/Components to be addressed (include but not limited to):

- Transformers
- Inverters
- Structural Steel
- Protective Relays
- Instruments & Controls
- Foundations
- Motors
- Cable trays, and conduit
- Switchgear, Busway, & Motor Control Centers
- PV panels

Construction Activities to be addressed (include but not limited to):

- Receiving Inspection & Storage
- Soil Compaction
- Coatings Application
- Survey Controls
- Cable Pulling and Terminations
- Host Utility Tie-ins
- Loop Checks of Instruments
- Close-out of Electronic Spaces
- Construction Tests, Turnover and Start Up
- Document Control
- Control of nonconformances
- Concrete Testing
- Structural Steel Jointing
- Setting of Protective Relays
- Close-out of Switchgear and Boxes
- Tagging/Clearance
- Calibration

End

HEARING EXHIBIT - 00000228

Appendix Z – Form of Safety Plan

APPENDIX Z
FORM OF SAFETY PLAN

Safety Rules and Regulations for Contractors

1.0 Purpose

Safety is vital to the well being of all employees, the quality of the work being done, and the cost effectiveness of Owner projects. The purpose of this procedure is to ensure that contractors comply with OSHA standard 29 CFR Part 1926, identify and correct potential safety hazards prior to starting work, and monitor the effectiveness of their own safety programs.

2.0 Contractor's Responsibilities

2.1 Prior to the commencement of any site work by Contractor, Contractor will designate in writing to Owner a competent safety representative. This representative shall make frequent and regular safety inspections of the jobsite. These inspections shall be documented in writing to Owner's format or similar and submitted to Owner for his review within three (3) working days of performance. All at-risk behavior and/or unsafe conditions noted during the inspections shall be corrected immediately. At risk behavior and /or unsafe conditions noted during inspections shall be corrected immediately. A Job Safety Analysis (JSA) is required to be performed by Contractor for all essential jobs.

2.2 Contractor shall initiate an accident prevention program and shall instruct each employee on the jobsite in the recognition and avoidance of unsafe acts and/or conditions applicable to its work environment to control or eliminate injury. Contractor shall enforce the project and OSHA safety rules on its employees.

2.3 Contractor is responsible for providing and requiring the use of appropriate personal protective equipment (PPE) in all operations where there is and exposure to hazardous conditions or where the hazard assessment results would require PPE.

2.4 Contractor shall designate in writing to Owner the names of the competent persons as required by OSHA Standard 29 CFR Part 1926 for Contractor's work activities. Contractor shall ensure this individual understands his responsibilities and is capable of identifying existing and predictable hazards in the surroundings or working conditions which are unsanitary, hazardous, or dangerous to employees, and understands that he/she has the authorization to take prompt corrective measures to eliminate them.

2.5 Contractor shall initiate and implement a hurricane/severe storm preparedness procedure in accordance with section 23.0. (Need Clarification. OSHA Section 1926.23 does not refer to hurricane/severe storm preparedness.)

3.0 Pre-Construction Meeting

Contractor shall attend a pre-construction meeting with Owner to understand the project conditions, safety requirements, and site policies and rules before starting work at the jobsite. A jobsite tour may be made to confirm Contractor's awareness of potential safety hazards. It is Contractor's obligation to implement measures necessary to establish and maintain safe working conditions on the Project.

4.0 Instruction and Training

Instruction and training of employees in an OSHA requirement will be required on this project. Examples of such training to be provided by Contractor are:

4.1 Orientation -- Newly employed or transferred personnel shall be instructed in the site safety rules/policies and the safety practices required by their work assignments. Contractor shall document this training and demonstrate to Owner that the employees know and understand the training.

4.2 Daily Work Assignments – All work assignments must include specific attention to safety. The Risk Assessment Tailboard (RAT) process or equivalent will be utilized each morning or when a new task is assigned. (See attached program)

4.3 Safety Meetings – Properly conducted and recorded weekly safety meetings are required. Results of these safety meetings are to be submitted to Owner within three (3) working days for review.

4.4 Specific Instructions – OSHA requires that employees who perform specific tasks or operate specific equipment be trained in its usage. Contractor shall ensure only those personnel qualified by training or experience shall be permitted to operate machinery. These qualifications shall be documented by Contractor, maintained and kept on file at the jobsite for review by Owner.

ECRC-08-3187 HEARING EXHIBIT - 00000230

5.0 Recordkeeping

It is the Contractor's responsibility to maintain all records required by OSHA, Workers Compensation Insurance or similar regulations. This includes the maintenance of an accident log, annual summary and posting of posters.

6.0 Hazardous materials

6.1 Contractor is responsible for notifying Owner of any hazardous chemicals or substances that are brought or caused to have been brought on the jobsite. The legal storage, use, and disposal of hazardous chemicals or substances are the responsibility of Contractor.

6.2 If hazardous chemicals are going to be used, then Contractor will implement a Hazard Communication program that will include training, MSDS, and labeling.

6.3 Use of chemicals may result in hazardous waste. In such cases, the Contractor shall institute a program to address hazardous waste storage and disposal in accordance with the code of federal regulations, state regulations, and other requirements delineated in the bid and contract documents.

6.4 When personal exposure to chemicals, particulates, aerosols or fumes is reasonably expected to exist and exceed allowable limits, then the Contractor shall put an Industrial Hygiene program in place.

7.0 Fire Prevention

7.1 Contractor shall be responsible for fire protection in its work, operational, and storage areas in accordance with all local, county, state, and federal requirements 24 hours per day, seven days per week, through the duration of this contract

7.2 Contractor shall comply with all fire and safety rules and regulations established on the project

8.0 Third Party Safety Inspections

In addition to visits and safety inspections by corporate representatives, Contractor is advised that the Project may be inspected from time to time by authorized third parties. These may include representatives of Owner, insurance companies, or OSHA. Upon proper identification, they are entitled to access and courteous consideration.

9.0 Project Safety Rules and Guidelines

All personnel on the project are required to comply with project specific rules and these guidelines. Contractor shall ensure that all of its employees have read these guidelines and understand its contents. The following jobsite rules apply:

9.1 Clothing Requirements

9.1.1 Shirts with at least a 4-inch sleeve shall be worn at all times. Tank tops are not permitted.

9.1.2 Long pants are required.

9.1.3 Sandals, tennis shoes, or any other street type shoe will not be permitted.

9.1.4 Loose fitting clothes or jewelry shall not be worn around moving machinery, grinding operations, etc.

9.2 Personal Protective Equipment

9.2.1 ANSI approved hard hats shall be worn at all times in the construction area unless a hazard assessment performed by the Contractor shows that wearing the hard hat would make the specific job more unsafe. All areas of this jobsite are hard hat areas. This includes cabs on heavy equipment such as cranes and backhoes.

9.2.2 Safety glasses with side shields are required in the construction areas at all times.

9.2.3 Approved eye and face protection is required as follows: goggles, welding hoods and shields, and face shields will be required to be properly worn at all times when in the area of operations, such as when welding, burning, grinding, chipping, chemical handling, corrosive liquids or molten materials, drilling, sawing, driving nails, power actuated tools, concrete pouring, tampers and gas fueled hand operated equipment (i.e. chainsaws). This section will also apply to those employees of Contractor who are assisting any worker as an apprentice or helper. Prescription glasses must be ANSI approved or safety glasses must be worn over the prescription glasses.

ECRC-08-3188 HEARING EXHIBIT - 00000231

9.2.4 OSHA approved hearing and respiratory equipment shall be worn when required. Contractor shall meet the selection, fitting and maintenance requirements of OSHA.

9.2.5 All employees shall wear approved safety harnesses when working six feet or more above the ground or when working in a precarious position. The lanyard shall be securely attached to the employee 100% of the time and shall be rigged such that the employee can neither free fall more that 6 feet (1.8m), nor contact any lower level. Safety harnesses shall also be worn and attached to the tie-off rail when working out of extensible and articulating boom platforms and to vertical drop lines when working from suspended scaffolding. Specific project requirements may exist and contractor will adhere to the more stringent requirements of fall arrest equipment use.

9.2.6 Seat belts shall be worn by all employees operating any motor vehicle and any equipment with rollover protection structures during performance of the work.

9.2.7 Safety nets shall be provided when work places are more than 25 feet above the ground where the use of other fall protection devices is impractical.

9.2.8 Approved work boots or shoes shall be worn in all construction areas unless a hazard assessment performed by the Contractor shows that ANSI approved shoes are required. All contractors shall ensure that their work boots or shoes provide adequate protection from foot injuries due to falling or rolling objects as identified in the hazard assessment. Deck and athletic style shoes are not considered an approved work shoe and are not to be worn on the project.

9.2.9 Chemical resistant protective footwear shall be worn when there is a possibility of hazardous chemicals coming in contact with the foot. Chemical resistant footwear shall be resistant to the type of chemical to which it is exposed.

9.2.10 Work gloves are required to be worn for all manual material handling jobs.

10.0 Signs, Signals, Barricades and Lights

10.1 Signs, Signals and barricades shall be visible at all times where a hazard exists.

10.2 All streets, roads, highways, and other public thoroughfares, which are closed to traffic, shall be protected by effective barricades on which shall be placed acceptable and highly visible warning signs. Barricades shall be located at the nearest intersecting public highway or street on each side of the blocked section.

10.3 All open trenches and other excavations shall be provided with suitable barriers, signs, and lights to the extent that adequate protection is provided. Obstructions, such as material piles and equipment, shall be provided with similar warning signs and lights.

10.4 All barricades, signs, lights and other protective devices shall be installed and maintained in conformity with applicable statutory requirements.

10.5 When any work is performed at night or where daylight is shut off or obscured, Contractor shall, at its expense, provide artificial light sufficient to permit work to be carried on efficiently, satisfactorily and safely, and to permit thorough inspection. During such times, the access to the place of work shall also be clearly illuminated. All wiring for electric light and power shall be installed and maintained in a first-class manner, securely fastened in place at all points, and shall be kept as far as possible from telephone wires, signal wires, and wires used for firing blasts.

10.6 Signs, signals and barricades shall be removed when the hazard no longer exists.

10.7 Contractor's employees working in an area of potential traffic had shall wear approved reflective type vests.

11.0 Rigging Equipment

11.1 All rigging equipment shall be free from defects, in good operating condition and maintained in a safe condition. Rigging equipment shall be inspected before use on each shift and as necessary to ensure that it is safe.

ECRC-08-3189 HEARING EXHIBIT - 00000232

11.2 A designated, competent employee of Contractor shall thoroughly inspect rigging equipment monthly to ensure that it is safe. Records shall be kept on jobsite of each of these inspections by Contractor and shall be made available to Owner upon request.

11.3 Contractor shall immediately remove damaged rigging equipment from service.

12.0 Hand and Power Tools

12.1 All hand and power tools, whether furnished by Contractor, or by Contractor's employee, shall be maintained in a safe condition.

12.2 Contractors shall not issue nor permit the use of unsafe hand or power tools.

12.3 Electrical power tools shall be grounded or double insulated with proper assured equipment grounding inspections or Ground Fault Interrupter circuit protection provided.

12.4 Pneumatic power tools shall be secured to the hose or whip by some positive means.

12.5 Only properly trained Contractor's employees shall operate power actuated tools. Contractor shall maintain certification records, employee certification cards, or equivalent certification documentation or each of its employees using power actuated tools during performance of the work.

12.6 All portable grinders shall conform to OSHA and ANSI requirements.

12.7 Cords, leads and hoses shall be kept at least seven feet off the ground or placed off to the side to prevent creating a tripping or traffic hazard.

13.0 Compressed Gas Cylinders

13.1 Compressed gas cylinders shall be secured in an upright position at all times. Location of cylinder storage areas must be approved by Owner.

13.2 When transporting, moving and storing cylinders, valve protection caps shall be in place and secured.

13.3 Cylinders shall not be hoisted by magnets or choker slings. Valve protection caps shall not be used for hoisting cylinders.

13.4 Cylinders shall be kept away from sparks, hot slag and flames, or be adequately protected.

13.5 Cylinders shall not be placed where they can become part of an electrical circuit.

13.6 Cylinders shall be labeled as to the nature of their contents.

13.7 Oxygen cylinders in storage shall be separated from fuel gas cylinders or combustible material a minimum of 20 feet, or by a non-combustible barrier at least five feet high having a fire resistant rating of at least one-half hour. Empty cylinders shall be separated as above from full cylinders and stored with like cylinders.

13.8 "No Smoking" signs shall be posted at storage areas and signs shall clearly indicate contents of cylinders.

13.9 Anti-flash back valves shall be provided on all oxygen and acetylene lines.

14.0 Jobsite Transportation Rules

14.1 All drivers of motor vehicles shall be licensed, trained, and instructed to exercise good cautious operating judgement as well as observe posted speed limits. Maximum speed limit is 25 miles per hour unless posted otherwise. However, slower speeds are necessary in congested areas.

14.2 Seat belts shall be worn at all times when travelling in vehicles and equipment.

14.3 All Contractor's means of ingress, egress and parking will be adequately marked as such, since their employees are to travel these routes only.

14.4 Use your horn for safety at blind corners, when passing, etc.

14.5 Established hand signals or turns signals are to be used.

14.6 Reckless driving or other non-observance of these instructions will be cause for withdrawal of drive-in privileges and may result in denial of access to the project.

ECRC-08-3190 HEARING EXHIBIT - 00000233

15.0 Cranes and Derricks

15.1 Contractor shall certify all cranes and derricks as being in safe operating condition before using the crane or derrick on jobsite. This certification shall be maintained by Contractor and made available to Owner upon request.

15.2 Contractor shall comply with the manufacturer's specifications and limitations applicable to the operation of all cranes and derricks. Contractor shall designate a competent person who shall inspect all machinery and equipment before each use, to make sure it is in safety operating condition. Any deficiencies shall be repaired, or defective parts replaced, before continued use.

15.3 The swing radius of cranes shall be barricaded where practical and/or in areas where work is being performed.

15.4 Hand signals prescribed by ANSI shall be posted at an operator's station; employees assigned to work around the crane will be trained in the use of hand signals.

15.5 Equipment shall not be operated where any of the equipment or load will come within 10 feet (3.1 M) of electrical distribution or transmission lines less than 50 kV. Minimum clearance between lines and any part of the crane or load must be 10 feet plus 0.4 inches for each 1 kV over 50 kV or twice the length of the line insulator but never less than 10 feet.

15.6 Contractor's employees shall not ride headache ball, hook, or load being handled by the crane.

15.7 While in use, equipment shall not be lubricated or have maintenance performed.

15.8 Rated load capabilities, recommended operating speeds, special hazard warning, specific hand signal diagrams and special instructions shall be visible to the operator while he is at the control station.

15.9 Contractor's employees shall not be allowed to work under the load of cranes. Tag lines shall be used on all loads. Special caution should be used in concrete bucket operations.

15.10 Cranes and derricks shall be inspected prior to use and at monthly intervals. Contractor shall maintain records on jobsite of these inspections. Contractor shall make copies available to Owner upon request.

16.0 Equipment and Motor Vehicles

16.1 All equipment must be inspected daily before use by Contractor's operator. Contractor must also make formal inspections at 30-day intervals with proper documentation maintained at the jobsite by Contractor and copies shall be made available to Owner upon request.

16.2 Defective equipment shall be repaired or removed from service immediately.

16.3 All rubber-tired, self-propelled scrapers, rubber-tired, front-end loaders, rubber-tired dozers, wheel-type agricultural and industrial tractors, crawler tractors, crawler-type loaders and motor graders shall be equipped with rollover protective structures and seat harnesses.

16.4 All Contractors' operators of construction equipment should be properly licensed and certified by a competent person. Copies of the certifications shall be maintained on jobsite by Contractor and made available to Owner upon request.

16.5 All equipment with an obstructed view to the rear must have a reverse signal alarm audible above the noise level or a flagman.

16.6 All cracked or broken glass shall be replaced before bringing vehicles on the jobsite. If glass is broken or damaged on jobsite and if damage is severe enough to cause a potential safety problem, the machine shall be stopped until such damage has been repaired.

16.7 Vehicles used to transport employees shall have seats firmly secured and adequate for the number of employees to be carried and all passengers should be properly seated. Standing on the back of moving vehicles is prohibited.

16.8 Location for storage of all fuels, lubricants, starting fluids, etc., shall be reviewed by Owner before use by Contractor.

17.0 Ladders

17.1 The use of ladders with broken or missing rungs or steps, broken or split rails or other defective construction is prohibited.

ECRC-08-3191 HEARING EXHIBIT - 00000234

17.2 Ladders shall extend no less than thirty-six inches (36") above landing and be secured to prevent displacement.

17.3 Portable ladders must be equipped with safety shoes.

17.4 Wooden ladders shall not be painted.

17.5 Metal or conductive ladders shall not be used on the jobsite.

18.0 Floor and Wall Openings and Stairways

18.1 Floor and wall openings shall be guarded by a standard guardrail, midrail, and toeboard, or a cover installed and secured to prevent movement.

18.2 Guardrails must be of sufficient strength to support two hundred (200) pounds of pressure when applied at midspan of the guardrail parallel with the floor and perpendicular to the guardrail with a minimum deflection of three (3) inches.

18.3 Covers must be adequately secured to prevent displacement and have "Danger" signs attached identifying the hazard.

18.4 Every flight of stairs having four or more risers shall be equipped with standard stair railings. Stairs are not to be used until risers and railings are securely installed. Treads will be poured as soon as possible were poured treads apply.

18.5 Debris and other loose materials shall not be allowed on stairways or at access point to stairway. Debris shall not be allowed to accumulate on stairwells.

19.0 Excavations and Trenching

19.1 Prior to opening any excavation or trench, Contractor must notify Owner. In addition, Contractor shall contact any other necessary personnel to determine whether underground installations, i.e., sewer, telephone, fuel, electric lines, etc., may be encountered and where they are located. An excavation permit may be required specific by project.

19.2 Excavations and trenches shall be inspected by a competent person daily and after every rainfall to determine if they are safe.

19.3 After the soil is classified, all banks 4 feet high or more shall be sloped to the angle of repose (the greatest angle above the horizontal place at which a material will lie without sliding), shored, or have trench shields installed.

19.4 Ladders or steps shall be provided in all trenches 4 feet or more in depth. Ladders or steps shall be located to require no more than 25 feet of lateral travel before having access or egress.

19.5 Material excavated shall be stored at least 2 feet from the edge of the excavation, or the trench shall be shored to prevent material from falling into the excavation.

19.6 All trenches and excavations shall be properly barricaded to prevent persons from waling into them.

19.7 All walkways or ramps crossing over excavations shall be securely fastened and equipped with standard guardrails.

20.0 Housekeeping

20.1 During the course of construction, all debris and scrap material shall be kept away from the work area.

20.2 Containers shall be provided by Contractor for the collection and separation of waste, trash, oily and used rags and other refuse. Metal (dumpster type) containers must be used and emptied promptly.

20.3 Garbage and other waste shall be disposed of at frequent and regular intervals in a manner approved by Owner.

20.4 Contractor shall notify Owner of any hazardous waste it will generate during performance of the work. Contractor has the direct responsibility of maintaining proper storage of these wastes while onsite and will verify to Owner in writing that the wastes have been disposed of in a legal manner.

20.5 Contractor shall not pour, bury, burn, nor in any way dispose of any chemical on the work jobsite without the written permission of Owner.

20.6 Contractor shall dispose of all combustible debris to a solid waste disposal site.

ECRC-08-3192 HEARING EXHIBIT - 00000235

20.7 NO OPEN BURNING OF DEBRIS OR RUBBISH WILL BE PERMITTED ON THE PROJECT.

20.8 Materials and supplies shall be stored in locations that will not block access ways, and shall be arranged to permit easy cleaning of the area.

20.9 All hoses, cables, extension cords, and similar materials shall be located, arranged, and grouped so they will not block any access way and will permit easy cleaning and maintenance.

21.0 Medical Services - Contractor's Responsibilities:

21.1 Provisions shall be made prior to commencement of the project for prompt medical attention in case of serious injury.

21.2 Contractor shall ensure that first aid supplies be easily accessible when required. Contents shall be inspected and refilled weekly.

21.3 Contractor shall provide proper equipment for prompt transportation of injured person to a physician or hospital or a communication system to contact necessary ambulance service.

21.4 Contractor shall post telephone numbers and addresses of the physicians, hospital and ambulances.

21.5 Contractor shall complete and retain on file "Employer's First Report of Injury" and OSHA Form 300 and provide Owner a copy upon request.

21.6 Contractor shall ensure that each of its lower-tier subcontractors meet these medical requirements.

22.0 First Aid and Medical Procedures

22.1 Each occupational illness or injury shall be reported immediately by Contractor to Owner's project manager. For emergency cases, ambulance services will be contacted immediately by the quickest means available.

22.2 A daily record shall be kept on all employees requiring first aid treatment.

22.3 If medical treatment is required, Contractor must provide transportation of the injured to a hospital or physician. A representative of the Contractor shall accompany the injured employee and remain at the facility until the employee is ready to return. All reports from the physician concerning treatment, diagnosis, return to work status and restrictions shall be brought back to the project and a copy forwarded to Owner's construction manager, subject to employee's permission through the medical treatment authorization form provided in contractors safety plan..

22.4 Contractor must conduct accident investigations for all serious accidents and OSHA recordable injuries. The accident report shall include root cause determination, corrective actions taken, and measures to prevent the incident from reoccurring.

23.0 Hurricane/Severe Storm Emergency Response Procedure

23.1 Contractor will implement an organized, orderly system to prepare the Project site for inclement weather associated with hurricanes or severe storms.

23.2 Contractor is responsible for training each of their employees on the Construction Project Hurricane / Severe Storm Emergency Response Procedure

23.3 Contractor shall establish a Storm Damage Assessment Team.

23.4 Contractor shall monitor hurricane / severe storm activity by all available resources (i.e. Internet, radio broadcast, weather bulletins, etc).

24.0 Hurricane / Severe Storm Preparedness Plan:

Contractor program shall address inspection of work areas; storage areas, shops and trailers to ensure all equipment and material are properly secured. As a minimum, the following activities shall be addressed:

24.1 Hurricane / Severe Storm Watch (36 to 48 Hours Notice):

24.1.1 Band and secure all lumber.

24.1.2 Band and secure all plastic pipe, conduit, and other similar objects.

24.1.3 Band and secure all siding, decking, sheet metal, and other similar objects.

24.1.4 Dismantle and/or secure all scaffolds and temporary platforms.

ECRC-08-3193 HEARING EXHIBIT - 00000236

24.1.5 Inspect and secure all temporarily installed piping, ductwork, and equipment. The may include adding lashing or lowering the equipment or material to the ground.

24.1.6 Finish bolting up all unfinished erected structural steel. Add additional steel, if necessary, to ensure the stability of the structure.

24.1.7 Lash down all unsecured tanks, silos, ductwork, and hoppers.

24.1.8 Tie down all storage vans, SEA containers, and temporary structures. This includes stairways, printshacks, and other similar structures.

24.1.9 Tie down all gang boxes or other similar items located in elevated positions up in the structures.

24.1.10 Dismantle and/or secure all large signs and similar structures.

24.1.11 Remove all radiation sources from the project.

24.1.12 If possible, remove all fuel trucks and tanks from the project. Trucks and tanks left onsite shall be secured and diked to contain a spill.

24.1.13 If possible, all hazardous material shall be removed from the project. Material left onsite shall be secured and diked to contain a spill.

24.1.14 All elevated work areas for example; Turbine decks shall be cleared of all loose material.

24.2 Hurricane / Severe Storm Warning (1 to 24 Hours Notice):

24.2.1 Contractors should make sure that all materials and equipment are secured by this time.

24.2.2 Shut down the Project Construction Power System.

24.2.3 Shut off the construction water system.

24.2.4 All crane booms shall be lowered to the ground and secured.

24.2.5 All small vehicles such as golf carts, welding machines and compressors shall be secured.

24.2.6 All office trailers and buildings shall be locked.

24.2.7 Project shall be evacuated.

24.3 Following a Hurricane / Severe Storm:

24.3.1 Once the hurricane / severe storm has passed, the Storm Damage Assessment Team shall return to the site to determine if the site is safe for employee re-entry.

24.3.2 Each contractor shall appoint a management person as a contact. The Storm Damage Assessment Team shall communicate to the appointed persons the condition of the site.

24.3.3 If the site is unsafe for employee entry, the Storm Damage Assessment Team shall determine what resources are needed to make the site safe for re-occupancy.

24.3.4 The Storm Damage Assessment Team shall request from the appropriate contractor site management appointee the necessary resources to prepare the site for re-occupancy.

24.3.5 Only when the site has been determined safe for re-occupancy by the Storm Damage Assessment Team, shall site personnel be allowed back to the site to resume normal construction activities.

24.4 Hurricane/Severe Storm Response Construction Site Team

Contractor shall maintain a list of team members and phone numbers of those employees on the site teams.

FORM OF SAFETY PLAN
(continued)

EXHIBIT Z - ATTACHMENT 1

My Safety Principles

- Plan every job
- Anticipate unplanned events
- Use the right tool for the job
- Identify the hazard
- Assess the risk
- Put controls in place to minimize the possibility of injury
- Protect each other
- Use a "Buddy" system
- Do not take short cuts
- Believe in Zero injuries
- Wear protective equipment
- Keep all work areas clean
- Inspect all tools prior to each use

Post Job Safety Review

1. Was anyone injured or did an unplanned event occur today?
   Yes_____ No_____
   If yes, explain:
   _____
   _____
   _____
2. What problems did you have with today's work assignment?
   _____
   _____
   _____
3. What can we do tomorrow to improve performance?

____Post "Hot Work Permit" if required
____Move/cover combustibles in area

Excavations
____Ladders every 25 feet
____Know soil classification
____Slope, shore, or shield over 5 feet
____Barricade around open trench
____Keep spoils 2 ft back from edge

Scaffolds
____Check for ladder access
____Insure standard guardrails are installed

EXHIBIT Z - ATTACHMENT 2
Risk Assessment Tailboard (RAT) Process

Definition

The Risk Assessment Tailboard sheet is a daily task process that empowers the employees to assess the hazards for the job and implement controls necessary to attain Zero accidents. It also provides a check sheet for personal protective equipment use, training, procedural compliance, and provisions for a post safety job review. The risk assessment process is to be used at least daily.

Purpose

FPL recognizes the importance of holding tailboards before each job, assessing the hazards of that particular job, and instituting the necessary controls to minimize the potential for injury. Daily planning involves safety instruction by the supervisor and crew input into the hazard assessment and control process before the job begins.

Process

- All known hazards must be identified, removed, abated, and/or acknowledged by the crew.
- The foreman/supervisor shall analyze each task for hazards and indicate what safety measures need to be taken.
- The supervisor shall ensure that each employee understands the work to be performed, hazards present, and corrective measures needed to prevent injury.
- If the work changes or unexpected problems arise during the work activities, then another safety assessment is to be done.
- The supervisor shall assure that the necessary safety equipment, procedures, and/or training is provided to the employees before work begins.

Documentation and Feedback

With the exception of the post job safety review, the RAT sheet is to be completed entirely before the work begins. It is the supervisor's responsibility to audit the work throughout the day to ensure adherence to the risk assessment process.

FPL construction management has the responsibility to audit the work activities throughout the day to ensure precautions are being taken and controls are in place.

At the end of the day, the supervisor completes the post job safety review section of the RAT sheet. It is then turned in to the FPL Construction Manager weekly for review and action as needed.

Report all accidents and near misses to supervision. It is essential to analyze these incidents to determine why problems occurred and to institute changes for future work.

APPENDIX Z-1
SAFE AND SECURE WORKPLACE POLICY

Rev. 9/9/98

SAFE AND SECURE WORKPLACE POLICY FOR SUPPLIERS

Objective: To provide a safe and secure workplace for FPL employees, supplier employees, customers and the public.

Scope: This Policy applies to any individual or organization, its employees and its sub-contractors, (hereinafter collectively referred to as "Supplier"), responsible for performing the work identified by the purchase contract, for or on behalf of Florida Power & Light Company (hereinafter referred to as "FPL") and its subsidiaries on FPL premises, FPL customers' premises, FPL rights-of-way or FPL facilities, including facilities under construction and excluding only nuclear power stations, (hereinafter collectively referred to as "FPL Premises"), for periods equal to or greater than 30 employee days cumulative per calendar year. For example, if a Supplier has 30 employees who each work one full 8 hour day on FPL Premises in any one calendar year, this Policy applies to the Supplier. If a Supplier has one employee who works 30 or more full 8 hour days in any one calendar year on FPL Premises, this Policy applies to the Supplier.

The policy covers three specific areas:

- Pre-assigned Screening
- Controlled Substance and Alcohol Abuse
- Workplace Violence Policies

Violation: If Suppliers' employees are found to be in pre-access violation of this Policy, Supplier's employees shall be denied access to FPL Premises. Supplier employees found to be in post-access violation of any part of this Policy shall be removed immediately by the Supplier from FPL's Premises.

Compliance: If Supplier fails to comply with this Policy, Supplier may be considered in breach of contract. FPL or its designee shall have upon request immediate access to Suppliers' records to assure compliance with the requirements of this Policy.

Policy Details: The Supplier must address three specific issues regarding Safe and Secure Workplace.

II. Controlled Substances and Alcohol Abuse:

All Supplier employees should be fit-for-duty and report to work able to perform their duties safely. Use or possession of controlled substances and/or alcoholic beverages, as defined in

Chapter 561 of the Florida Statutes, by Supplier employees is an unsafe work practice which creates an increased risk to Supplier employee safety and the safety of others. The use or possession of any illegal drug or controlled substance without a valid prescription and/or the misuse of any prescription or over-the-counter medication by any Supplier employee shall constitute a violation of this Policy.

Any Supplier employee who is consuming or is under the influence of any alcoholic beverage while on FPL Premises shall be in violation of this Policy.

All Suppliers must have in place a controlled substance and alcohol Policy All employees who are subject to the requirements of the Omnibus Transportation Employee Testing Act of 1991, including Supplier employees required to hold a Commercial Driver's License, will be subject to random testing for controlled substances and alcohol according to the federally mandated random testing rate.

Supplier employees will be denied access to or immediately removed from FPL Premises for: (1) Possession or use of a controlled substance without a valid prescription; (2) distribution or sale of controlled substances at any time on or off the job; (3) positive test result for controlled substances without a valid prescription or alcohol; (4) being under the influence of a controlled substance or alcohol; or (5) refusal to test for controlled substances or alcohol.

ECRC-08-3198
HEARING EXHIBIT - 00000241

Supplier employees taking prescription medication are required to consult with their physicians to determine whether the medication may have an adverse effect on performance. Supplier employees taking over-the-counter medication are responsible for being aware of any adverse effects it may have on their performance as defined on the manufacturer's label. If prescribed or over-the-counter medication may have an adverse effect on performance, the Supplier employee is required to notify the Supplier prior to reporting to FPL's Premises. Failure to inform the Supplier's representative of taking prescription or over-the-counter medication which may have an adverse effect on performance may result in that employee's denial of access to FPL Premises. In all events the Supplier is responsible for determining the employee's fitness for duty.

Supplier employees taking prescription medications must be prepared to provide satisfactory, verifiable proof that the medication has been prescribed to the Supplier employee, and that it is necessary for the individual's current medical condition. Possession of the prescription bottle will provide the required proof.

Any Supplier employee called to perform unscheduled work at FPL Premises must state whether he/she has consumed alcohol within five (5) hours of the time he/she reports to work or is otherwise "unfit" for duty. Supplier employees that have consumed alcohol within the five (5) hour abstinence period shall not be permitted to work on FPL Premises except under conditions when:

1. The Supplier employee being called believes that he/she is fit for duty; and, based on information provided by the individual, the Supplier also believes he/she is fit for duty; or
2. The Supplier employee's fitness for duty is verified by a breath analysis for alcohol prior to entering the FPL worksite and the individual believes he/she is fit for duty.

In addition to the requirements set forth herein, all Suppliers shall comply with all applicable state and/or federal laws regarding drug and alcohol testing of their employees that are assigned to FPL Premises. All testing performed pursuant to this policy shall be at the blood alcohol rates specified in the Omnibus Transportation Employee Testing Act of 1991. **All Supplier employees will be subject to "post accident" and/or "reasonable suspicion" controlled substances and alcohol testing while on FPL Premises. "Reasonable suspicion" shall be determined in the sole discretion of FPL. No Supplier employee required to take a post-accident alcohol test under the Policy shall use alcohol for eight hours following the accident, or until he/she undergoes a post-accident alcohol test, whichever occurs first. This testing will be required when there is reasonable suspicion that an individual is in violation of the substance abuse and alcohol Policy. Supplier shall immediately notify FPL of any accidents involving or caused by its employees or subcontractors on FPL Premises.**

III. Workplace Violence:

FPL is committed to providing a safe and secure workplace. Supplier employees are expected to work in concert with FPL employees to ensure that the workplace remains safe and secure for all.

Behavior that could be perceived by a reasonable person as threatening or indicating the possibility of violence is prohibited. This may include, but is not limited to verbal threats, gestures, abusive language or physical altercation (fighting, shoving, etc.).

Displaying or carrying in any manner a weapon, firearm or destructive device (as those terms are defined in Chapter 790 of the Florida Statutes) on the Supplier employee's person or in his/her belongings, on any FPL Premises, in his/her personal vehicle while engaged in FPL work or activities, or in an FPL vehicle at any time is prohibited.

Supplier employees that violate these policies will be removed immediately by the Supplier from FPL Premises, and denied access to any FPL Premises. Supplier shall immediately notify FPL Corporate Security of violations of this Section III.

IV. Reporting Illegal Conduct or Workplace Violence:

FPL employees and Supplier employees benefit from an atmosphere of good ethical and legal conduct. Suppliers and their employees with information concerning abuse of company assets, fraud, theft, possession or use of illegal drugs, threats of violence or any other behavior at FPL that might be considered illegal, shall

ECRC-08-3199 HEARING EXHIBIT - 00000242

report that information immediately. Such information can be reported to the corporate security hotline anytime day or night at 888-694-6444.

V. Acknowledgment:

Suppliers must make their employees aware of this Policy and have Supplier employees acknowledge so in writing prior to beginning work at FPL Premises.

TURNKEY ENGINEERING, PROCUREMENT AND CONSTRUCTION
AGREEMENT
FOR
SOLAR PHOTOVOLTAIC GENERATING FACILITY

THIS TURNKEY ENGINEERING, PROCUREMENT AND CONSTRUCTION AGREEMENT FOR SOLAR PHOTOVOLTAIC GENERATING FACILITY (this "Agreement"), dated as of July 9, 2008, is by and between FLORIDA POWER & LIGHT COMPANY, a Florida corporation (hereinafter called "FPL") and SunPower Corporation, Systems, a Delaware corporation (hereinafter called "Contractor").

W I T N E S S E T H:

WHEREAS, FPL wishes to construct and operate a solar photovoltaic generation facility with a minimum nominal capacity of 10 MW (net), and all services and utilities related thereto, all to be built on the Property Site (as hereinafter defined) located in Brevard County, Florida;

WHEREAS, Contractor has represented that it is experienced and qualified in providing technical assistance, licensing, engineering, procurement, supply, construction management, construction, commissioning, start-up and testing services, and that it possesses the requisite expertise and resources to complete the Work (as hereinafter defined);

WHEREAS, Contractor has agreed to provide, through itself or through Subcontractors and Vendors (as such terms are hereinafter defined), such Work on a "turn-key" basis for the Contract Price (as hereinafter defined); and

WHEREAS, Contractor has agreed to guarantee the timely and proper completion of the Work in strict accordance with the terms and conditions hereinafter set forth.

NOW, THEREFORE, in consideration of the foregoing premises, the mutual promises and covenants herein contained, and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, FPL and Contractor hereby agree as follows:

ARTICLE I.
GENERAL MATTERS

1.1 DEFINED TERMS

As used in this Agreement, including the appendices, exhibits and other attachments hereto, each of the following terms shall have the meaning assigned to such term as set forth below:

1.1.1 "Affiliate" means, in relation to any Person, any other Person:

(a) Which directly or indirectly controls, or is controlled by, or is under common control with, such Person; or

(b) Which directly or indirectly beneficially owns or holds fifty percent (50%) or more of any class of voting stock or other equity interests of such Person; or

(c) Which has fifty percent (50%) or more of any class of voting stock or other equity interests that is directly or indirectly beneficially owned or held by such Person, or

(d) Who either holds a general partnership interest in such Person or such Person holds a general partnership interest in the other Person.

For purposes of this definition, the word "controls" means possession, directly or indirectly of the power to direct or cause the direction of the management or policies of a Person, whether through the ownership of voting securities or otherwise.

ECRC-08-3221 HEARING EXHIBIT - 00000251

1.1.2 "After-Tax Basis" means, with respect to any indemnity payment to be received by any Person, the amount of such payment (the base payment) supplemented by a further payment (the additional payment) to that Person so that the sum of the base payment plus the additional payment shall, after deduction of the amount of all Federal, state, and local income Taxes required to be paid by such Person in respect of the receipt or accrual of the base payment and the additional payment (taking into account any reduction in such income Taxes resulting from Tax benefits realized by the recipient as a result of the payment or the event giving rise to the payment), be equal to the amount required to be received. Such calculations shall be made on the basis of the highest generally applicable Federal, state, and local income tax rates applicable to the corporation for whom the calculation is being made for all relevant periods, and shall take into account the deductibility of state and local income taxes for Federal income tax purposes. The foregoing calculations shall be made by the recipient Person's third party tax advisors.

1.1.3 "Agreement" has the meaning set forth in the first paragraph hereof, as same may be amended, supplemented or modified from time to time in accordance with the terms hereof.

1.1.4 "Applicable Laws" means any act, statute, law, regulation, permit, license, ordinance, rule, judgment, order, decree, directive, guideline or policy (to the extent mandatory) or any similar form of decision or determination by, or any interpretation or administration of, any of the foregoing by any Government Authority with jurisdiction over the Plant, the Job Site, the performance of the Work or other services to be performed under the Contract Documents.

1.1.5 "Applicable Permits" means any and all permits, clearances, licenses, authorizations, consents, filings, exemptions, rulings or approvals from or required by any Government Authority that are necessary for the performance of the Work or ownership or use of the Work.

1.1.6 "Applicable Standards" means those sound and prudent practices, acts, methods, specifications, codes and standards of design, engineering, assembly, erection, installation, construction, performance, safety and workmanship prudently and generally engaged in or observed by the majority of the professional engineering and construction contractors performing engineering and construction services for major, grid-connected solar electric generating facilities in the United States that, in the exercise of good judgment, would have been expected to accomplish the desired result in a manner consistent with Applicable Laws, Applicable Permits, reliability, safety, environmental protection, local conditions, economy and efficiency. Notwithstanding the foregoing, the Work or any portion thereof shall meet specifications that are at least as stringent as those set forth in Appendix A, Scope of Work, and any other specifications set forth in this Agreement.

1.1.7 "Builder's Risk Policy" has the meaning set forth in Section 9.9.4, All Risk Installation and Builder's Risk Insurance, of Article IX, INSURANCE.

1.1.8 "Business Day" means any day other than a Saturday, Sunday or a legal holiday in Florida, United States.

1.1.9 "Capability Verification Test" means the test further described in Appendix HH, Performance Testing.

1.1.10 "Change In Law" means the (A) enactment, adoption, promulgation, modification, or repeal (in each case, after the date of this Agreement but before the date of Provisional Acceptance) of any Applicable Law of any Government Authority of (i) the State of Florida (or any city, county or municipality therein) or (ii) the Federal Government of the United States to the extent such federal law, directly affects the Work performed at the Property Site or (B) the modification after the date of this Agreement of any FPL Permit, and as to both (A) and (B) that establishes requirements that materially and adversely affect Contractor's costs or schedule for performing the Work; provided, however, a change in (x) any federal, state or local Tax law or any other law imposing a Tax, duty, levy, impost, fee, royalty, or charge for which Contractor is responsible hereunder, or (y) any Applicable Law affecting the cost of Contractor's or any Subcontractor's or Vendor's Labor, including increases in worker's compensation rates, shall not be a Change In Law pursuant to this Agreement.

1.1.11 "Change Order" has the meaning set forth in Section 6.1, CHANGE ORDER AT FPL'S REQUEST, of Article VI, CHANGE ORDERS.

ECRC-08-3222 HEARING EXHIBIT - 00000252

1.1.12 "Changes" has the meaning set forth in Section 6.1, CHANGE ORDER AT FPL'S REQUEST, of Article VI, CHANGE ORDERS.

1.1.13 "Commencement Date" means the date Contractor anticipates it will construct improvements at, or deliver materials to, the Job Site that may be insured pursuant to a builder's risk policy, as set forth in a written Notice delivered by Contractor to FPL pursuant to Section 5.1.1.

1.1.14 "Confidential Information" has the meaning set forth in Section 18.3, CONFIDENTIALITY, of Article XVIII, MISCELLANEOUS.

1.1.15 "Construction and Milestone Payment Schedule" means the schedule of construction/milestone completion installment payments of the Contract Price attached hereto as Appendix D.

1.1.16 "Contract Documents" means this Agreement and all appendices, exhibits incorporated into the Agreement (as set forth in Section 1.3, APPENDICES), as same may be amended, supplemented or modified from time to time in accordance with the terms hereof.

1.1.17 "Contract Price" means the total sum payable by FPL as stated in Section 7.1, Contract Price, for all labor, all materials, and all equipment, which sum shall be due in accordance with the terms of the Contract Documents as consideration for the timely performance of the Scope of Work to be performed by or through Contractor on a "turn-key" basis in order to complete the Project, all in strict accordance with the terms of the Contract Documents, which sum shall only be subject to adjustment in accordance with the Contract Documents, including but not limited to the adjustments contemplated in Appendix J, Option Pricing.

1.1.18 "Contractor" means SunPower Corporation, Systems, a Delaware corporation (as referenced in the opening paragraph hereof), and includes its legal successors and permitted assignees as may be accepted by FPL, in writing, pursuant to the terms of the Contract Documents.

1.1.19 "Contractor Deliverables" means each of the design criteria, system descriptions, manuals, Drawings, Final Plans, design calculations, quality assurance reports and all other material documents relating to the Project to be delivered to FPL in accordance with the requirements of the Contract Documents.

1.1.20 "Contractor Equipment" means all of the equipment, materials, apparatus, structures, tools, supplies and other goods provided and used by Contractor and its Subcontractors and Vendors for performance of the Work but which is not intended to be incorporated into the Plant.

1.1.21 "Contractor Event of Default" has the meaning set forth in Section 15.1, CONTRACTOR EVENTS OF DEFAULT, of Article XV, TERMINATION.

1.1.22 "Contractor Insurance Policies" has the meaning set forth in Section 9.1, CONTRACTOR INSURANCE POLICIES, of Article IX, INSURANCE.

1.1.23 "Contractor Parent Company" has the meaning set forth in Section 11.8, PARENT GUARANTY, of Article XI, CONTRACTOR GUARANTEES AND LIQUIDATED DAMAGES.

1.1.24 "Contractor Parent Guaranty" has the meaning set forth in Section 11.8, PARENT GUARANTY, of Article XI, CONTRACTOR GUARANTEES AND LIQUIDATED DAMAGES.

1.1.25 "Contractor Permits" means the Applicable Permits, other than FPL Permits, to be obtained by Contractor as described in Appendix A, Scope of Work, or otherwise required pursuant to the Contract Documents.

1.1.26 "Contractor Project Engineering Manager" means the person designated by Contractor as having the responsibility, authority and supervisory power of Contractor for the engineering and design of the Plant.

1.1.27 "Contractor Project Manager" means the person designated by Contractor as having the centralized responsibility, authority and supervisory power of Contractor for design, procurement, construction, testing and start-up of the Plant, as well as all matters relating to the administration of the provisions of the Contract Documents.

ECRC-08-3223 HEARING EXHIBIT - 00000253

1.1.28 "Contractor Site Manager" means an employee of Contractor, working under the supervision of the Contractor Project Manager, located at the Property Site on a daily basis.

1.1.29 "Contractor Taxes" has the meaning set forth in Section 3.24, CONTRACTOR TAXES, of Article III, CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR.

1.1.30 "Contractor's Representative" has the meaning given in Section 3.12, PROJECT MANAGEMENT AND CONTRACTOR'S REPRESENTATIVE, of Article III, CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR.

1.1.31 "Credit Trigger Event" shall be deemed to occur if, at the end of the most recently ended fiscal quarter of Contractor, Contractor fails to maintain a Tangible Net Worth of greater than $550,000,000.

1.1.32 "Credit Event of Default" shall be deemed to occur if, at the end of the most recently ended fiscal quarter of Contractor, Contractor fails to maintain a Tangible Net Worth of greater than $100,000,000.

1.1.33 "Credit Rating" means, on the date such rating is determined, the LC Issuing Bank's latest: (i) unsecured debt rating; (ii) corporate credit rating; or (iii) issuer rating.

1.1.34 "Critical Milestones" means the Milestones set forth in Appendix C, Critical Milestones and Milestones.

1.1.35 "Critical Parameters" has the meaning set forth in Section 3.19.7, Quality Assurance Program, of Article III, CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR.

1.1.36 "Critical Path" means a determination of the Project Schedule specifically illustrating those unique activities and durations that must be completed in sequence to complete the Work, which sequence shall be determined using critical path method precedence networking techniques applied by Contractor.

1.1.37 "Damages" has the meaning set forth in Section 16.1, CONTRACTOR INDEMNIFICATION, of Article XVI, INDEMNIFICATION.

1.1.38 "Day" or "day" means a period of twenty-four (24) consecutive hours from 12:00 midnight (Eastern time), and shall include Saturdays, Sundays and all holidays except that in the event a time period set forth in the Contract Documents expires on a Day that is not a Business Day, such period shall be deemed to expire on the next Business Day thereafter.

1.1.39 "Defect" means, any designs, engineering, software, drawings, components, tools, Equipment, installation, construction, workmanship or Work that, in FPL's reasonable judgment:

(a) Do not conform to the terms or requirements of the Contract Documents;

(b) Are not of uniform good quality, free from defects or deficiencies in design, application, manufacture or workmanship, or that contain improper or inferior workmanship; or

(c) Would adversely affect the:

(i) Performance of the Plant under anticipated operating conditions;

(ii) Continuous safe operation of the Plant during the Plant's design life;

(iii) Structural integrity of the Plant;

(iv) Economic value of FPL's investment in the Plant, all as determined by reference to Prudent Utility Practices.

Anything to the contrary notwithstanding, the Parties agree that Work shall be considered to be defective if it does not conform to Applicable Standards.

1.1.40 "Dispute" has the meaning set forth in Section 17.1, FRIENDLY CONSULTATION, of Article XVII, DISPUTE RESOLUTION.

1.1.41 "Drawings" means all:

ECRC-08-3224 HEARING EXHIBIT - 00000254

(a) Specifications, calculations, designs, plans, drawings, engineering and analyses, and other documents which determine, establish, define or otherwise describe the scope, quantity, and relationship of the components of the Plant, including the structure and foundation thereof; and

(b) Technical drawings, operating drawings, specifications, shop drawings, diagrams, illustrations, schedules and performance charts, calculations, samples, patterns, models, operation and maintenance manuals, piping and instrumentation diagrams, underground structure drawings, conduit and grounding drawings, lighting drawings, conduit and cable drawings, electric one-line's, electric schematics, connection diagrams and technical information of a like nature,

prepared or modified by Contractor or any of its Subcontractors or Vendors all of which are required to be delivered by Contractor, or any Subcontractor or Vendor, from time to time under the Contract Documents or at FPL's request which illustrates any of the Equipment or any other portion of the Work, either in components or as completed.

1.1.42 "Energy Yield Test" has the meaning set forth in Section 11.4.

1.1.43 "Environmental Control Program" means the environmental control program provided by FPL to Contractor.

1.1.44 "Environmental Plan" has the meaning set forth in Section 3.19.4, Health Plan, Safety Plan, and Environmental Plan, of Article III, CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR.

1.1.45 "Environmental Resource Plan" means the environmental resource plan prepared by FPL, which has been provided to Contractor prior to the date of the Agreement.

1.1.46 "Equipment" means all of the equipment, materials, apparatus, structures, tools, supplies, goods and other items provided by Contractor and its Subcontractors and Vendors that are installed or incorporated into the Plant or otherwise form or are intended to form part of the Work or the Plant (other than Contractor Equipment).

1.1.47 "Exempt Equipment" has the meaning set forth in Section 3.24.2, Exempt Equipment, of Article III, CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR.

1.1.48 "Expected Energy Output" has the meaning set forth in Section 2.1.2 of Appendix HH.

1.1.49 "Final Acceptance" means that all of the following have occurred as of the most recent applicable Tests:

(a) Provisional Acceptance has been achieved;

(b) The Tests, mechanical calibrations, electrical continuity and ground fault tests have been successfully completed and any Defects found have been corrected;

(c) Either the:

(i) Final Acceptance Performance Level specified in Section 11.3, FINAL ACCEPTANCE PERFORMANCE LEVEL; GUARANTEED PERFORMANCE LEVEL, of Article XI, CONTRACTOR GUARANTEES AND LIQUIDATED DAMAGES, has been met or exceeded as determined pursuant to Section 11.6, DETERMINATION OF PERFORMANCE, of Article XI, CONTRACTOR GUARANTEES AND LIQUIDATED DAMAGES; or

(ii) Plant has achieved at a minimum the Minimum Performance Level as determined pursuant to Section 11.6, DETERMINATION OF PERFORMANCE, of Article XI, CONTRACTOR GUARANTEES AND LIQUIDATED DAMAGES, and (A) the Contract Price has been reduced in accordance with Section 10.5 for the percentage of the Final Acceptance Performance Level that has not been achieved and (B) Contractor has performed all Remediation Work requested by FPL related to any Work not associated with the percentage of the Final Acceptance Performance Level that has been achieved;

ECRC-08-3225 HEARING EXHIBIT - 00000255

(d) The Plant has been constructed in accordance with the Contract Documents and the Drawings;

(e) The Final Plans accurately reflect the Plant as constructed;

(f) The Plant is capable of being operated in a safe, normal, reliable and continuous manner in accordance with Applicable Laws and Applicable Permits (excluding for this purpose all variances or waivers of any Applicable Permits) and the Contract Documents at all operating conditions and modes specified in the Scope of Work;

(g) Contractor shall have delivered to FPL all operation and maintenance manuals and Final Plans in accordance with the Scope of Work;

(h) No defective or incomplete portions of the Work exist;

(i) Either:

(i) All items on the Punch List have been completed; or

(ii) The Parties have reached an agreement pursuant to Section 10.6, PUNCH LIST, of Article X, SYNCHRONIZATION, TESTS, MECHANICAL COMPLETION, PROVISIONAL ACCEPTANCE AND FINAL ACCEPTANCE, and Contractor has paid all amounts due to FPL pursuant thereto;

(j) All of Contractor's cleanup and related obligations have been completed;

(k) Any and all Liens in respect to the Plant, the Contract Documents, the Equipment, the Job Site or any fixtures, personal property or Equipment included in the Work created by, through or under, or as a result of any act or omission of, Contractor or any Subcontractor, Vendor or other Person providing labor or materials in connection with the Work shall have been released or bonded in form reasonably satisfactory to FPL;

(l) Contractor has delivered to FPL a Contractor's Lien Waiver and Release, in substantially the form of Appendix R, Form of Contractor Certificate for Final Waiver of Liens, from Contractor and Subcontractor's Certificate for Final Waiver of Liens in the form of Appendix R-1, Form of Subcontractor Certificate for Final Waiver of Liens, from each Substantial Subcontractor and Substantial Vendor;

(m) Contractor shall have paid all Schedule Liquidated Damages due under the Contract Documents, if any;

(n) All other outstanding obligations of Contractor hereunder that FPL has notified Contractor of shall have been satisfied; and

(o) FPL has approved of and signed the Final Acceptance Certificate pursuant to Section 10.8.

1.1.50 "Final Acceptance Certificate" means the certificate issued by FPL indicating that Final Acceptance has been achieved by Contractor.

1.1.51 "Final Acceptance Date" means the date of achievement of Final Acceptance as indicated in the Final Acceptance Certificate pursuant to Section 10.8, FINAL ACCEPTANCE OF THE PLANT, of Article X, SYNCHRONIZATION, TESTS, MECHANICAL COMPLETION, PROVISIONAL ACCEPTANCE AND FINAL ACCEPTANCE.

1.1.52 "Final Acceptance Performance Level" means that, at a minimum, the Actual Energy Output is equal to or greater than ninety-five percent (95%) of the Net Energy Output Guarantee when corrected to Guarantee Design Conditions, calculated as follows:

Actual Energy Output $\geq$ (0.95) * Net Energy Output Guarantee

Where "Actual Energy Output" has the meaning given in Section 2.1.2 of Appendix HH.

ECRC-08-3226 HEARING EXHIBIT - 00000256

1.1.53 "Final Acceptance Performance Level Date" has the meaning set forth in Section 11.4.1.

1.1.54 "Final Plans" means final Drawings and final specifications, as revised to reflect the changes during construction, and shall include as-built drawings, piping and instrumentation diagrams, underground structure drawings (including buried piping, all utilities, and critical hidden items), electric one-lines, electric schematics and connection diagrams.

1.1.55 "Financial Closing" means that all of the following events shall have occurred (which events may occur over a period of time) with respect to the Plant: (i) the Financing Documents have been fully executed (which documents may be executed over a period of time) which together provide for financing for the Plant in an amount and on the terms acceptable to FPL; (ii) all conditions precedent to the initial availability of funds under the Financing Documents referred to in the preceding clause (i) have been fulfilled or waived and the first draw thereunder has been made by FPL; and (iii) FPL has received commitments for such equity as is required by FPL and satisfies the requirements of the Financing Parties.

1.1.56 "Financing Documents" means all the loan agreements, notes, indentures, securities, debt instruments, bonds, security agreements, swap agreements, letters of credit and other documents or agreements with a Financing Party or relating to a financing (including refinancing) by a Financing Party.

1.1.57 "Financing Parties" means the lenders, security holders, investors, export credit agencies, multilateral institutions, equity providers and others providing debt or equity financing or refinancing to or on behalf of FPL or any Affiliate of FPL or for the Project or any portion thereof, or any trustee or agent acting on behalf of any of the foregoing.

1.1.58 "Force Majeure Event" has the meaning set forth in Section 14.1, DEFINITION OF FORCE MAJEURE EVENT, of Article XIV, FORCE MAJEURE AND FPL CAUSED DELAY.

1.1.59 "FPL" means Florida Power & Light Company, a Florida corporation (as referenced in the opening paragraph hereof) and it includes its legal successors and those assignees as may be designated by FPL, in writing, pursuant to the terms of this Agreement.

1.1.60 "FPL Caused Delay" means a material delay in Contractor's performance of any Critical Milestone, to the extent Contractor demonstrates that such delay was actually and demonstrably caused by FPL's failure to perform any covenant of FPL hereunder (other than by exercise of rights under this Agreement, including the exercise by FPL of the right to have defective or nonconforming Work corrected or re-executed), including, without limitation, FPL's failure to timely obtain any FPL Permit, and which actually, demonstrably and adversely affects the Critical Path. Contractor expressly acknowledges and agrees that any delay, to the extent caused by Contractor's action or inaction (other than by exercise of rights under this Agreement), is not an FPL Caused Delay.

1.1.61 "FPL Event of Default" has the meaning set forth in Section 15.6, FPL EVENTS OF DEFAULT, of Article XV, TERMINATION

1.1.62 "FPL Interconnection Facilities" shall have the meaning ascribed thereto in Section 2.3 of Appendix A, Scope of Work.

1.1.63 "FPL Permits" means the Applicable Permits to be obtained by FPL as set forth in Appendix A, Scope of Work.

1.1.64 "FPL Taxes" has the meaning set forth in Section 4.9, FPL TAXES, of Article IV, CERTAIN OBLIGATIONS OF FPL.

1.1.65 "GAAP" shall mean generally accepted accounting principles in the United States of America, consistently applied throughout the specified period.

1.1.66 "Government Authority" means any and all foreign, national, federal, state, county, city, municipal, local or regional (or equivalent) authorities, departments, bodies, commissions, corporations, branches, directorates, agencies, ministries, courts, tribunals, judicial authorities, legislative bodies, administrative bodies,

ECRC-08-3227 HEARING EXHIBIT - 00000257

regulatory bodies, autonomous or quasi-autonomous entities or taxing authorities or any department, municipality or other political subdivision thereof.

1.1.67 "Grid" means the interconnected high voltage transmission facilities being a part of the FPL transmission system.

1.1.68 "Guarantee Design Conditions" means Standard Test Conditions as such term is defined in the Scope of Work and Appendix HH.

1.1.69 "Guaranteed Performance Level" means the Net Energy Output Guarantee, as guaranteed by Contractor pursuant to Section 11.3, FINAL ACCEPTANCE PERFORMANCE LEVEL; GUARANTEED PERFORMANCE LEVEL, of Article XI, CONTRACTOR GUARANTEES AND LIQUIDATED DAMAGES.

1.1.70 "Guaranteed Performance Test" means the test performed by Contractor in order to determine the Net Energy Output of the Plant, as more particularly described in Section 2.0 of Appendix HH, Acceptance Testing.

1.1.71 "Guaranteed Provisional Acceptance Date" means June 30, 2010, the date which Contractor guarantees that the Project shall achieve Provisional Acceptance, as such date may be extended in accordance with the terms hereof.

1.1.72 "Hazardous Material" means any hazardous or toxic chemicals, hazardous materials, hazardous waste, hazardous constituents, hazardous or toxic or radioactive substances or petroleum products (including crude oil or any fraction thereof) defined or regulated as such under any Applicable Laws.

1.1.73 "Health Plan" has the meaning set forth in Section 3.19.4, Health Plan, Safety Plan, and Environmental Plan, of Article III, CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR.

1.1.74 "Indemnified Person" has the meaning set forth in Section 16.3, CONDITIONS OF INDEMNIFICATION, of Article XVI, INDEMNIFICATION.

1.1.75 "Indemnifying Party" has the meaning set forth in Section 16.3, CONDITIONS OF INDEMNIFICATION, of Article XVI, INDEMNIFICATION.

1.1.76 "Independent Engineer" means the Person appointed by the Financing Parties and approved by FPL to ensure that the Work is completed in accordance with the Contract Documents.

1.1.77 "Initial LC Amount Expiration Date" has the meaning set forth in Section 7.5.1.

1.1.78 "Initial Site Mobilization" means the first instance when any of Contractor or its Subcontractors' or Vendors' Labor or other representatives is present on the Property Site after the date of this Agreement.

1.1.79 "Intangible Asset" means any asset that is treated as an intangible asset according to GAAP, including:

(a) goodwill, including any amounts (however designated on the balance sheet) representing the cost of acquisitions of subsidiaries in excess of underlying tangible assets;

(b) patents, trademarks and copyrights;

(c) leasehold improvements not recoverable at the expiration of a lease; and

(d) deferred charges (including, but not limited to, unamortized debt discount and expense, organization expenses and experimental and development expenses, but excluding prepaid expenses).

1.1.80 "Intellectual Property Rights" has the meaning set forth in Section 3.32, INTELLECTUAL PROPERTY RIGHTS, of Article III, CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR.

1.1.81 "Job Site" means the Property Site (other than the area designated as Protected Areas, if any, and not constituting a part of the Job Site on the survey provided by FPL pursuant to Section 4.7, DESCRIPTION OF PROPERTY SITE, of Article IV, CERTAIN OBLIGATIONS OF FPL) and any other areas where Contractor

ECRC-08-3228 HEARING EXHIBIT - 00000258

may temporarily obtain care, custody and control, use, easement or license for purposes directly, indirectly or incidentally related to performance of, or as an accommodation to, the Work.

1.1.82 "Labor" means the workforce of the relevant Person, including its staff and employee and non-employee and skilled and unskilled workers.

1.1.83 "Latest Notice to Proceed Date" has the meaning set forth in Section 5.2.4.

1.1.84 "LC Issuing Bank" means the domestic financial institution, acceptable to FPL and the Financing Parties and satisfying the requirements set forth in Section 7.5.3, LC Issuing Bank, of Article VII, CONTRACT PRICE; PAYMENTS TO CONTRACTOR, which institution will issue the Letter of Credit on behalf of Contractor in connection with the Project, as more particularly described in Section 7.5, LETTERS OF CREDIT, of Article VII, CONTRACT PRICE; PAYMENTS TO CONTRACTOR.

1.1.85 "Lease" means that certain Enhanced Use Lease, dated as of June 25, 2008, by and between FPL, as lessee, and the National Aeronautics and Space Administration, John F. Kennedy Space Center, as lessor.

1.1.86 "Letter of Credit" has the meaning set forth in Section 7.5, LETTERS OF CREDIT, of Article VII, CONTRACT PRICE; PAYMENTS TO CONTRACTOR.

1.1.87 "Lien" means any lien, security interest, mortgage, hypothecation, encumbrance or other restriction on title or property interest.

1.1.88 "Lift Stay Order" has the meaning set forth in Section 18.20, ACCEPTANCE OR REJECTION IN BANKRUPTCY, of Article XVIII, MISCELLANEOUS.

1.1.89 "Major Equipment" means any item or component, or set of items of components, of the Project with a value in excess of $250,000, the proper or efficient function of which materially affects the Plant's output or reliability.

1.1.90 "Major Manufacturers" means the manufacturers of the Major Equipment.

1.1.91 "Mechanical Completion" means that:

(a) The Equipment for the Project has been installed, including with the required connections and controls to produce electrical power;

(b) All Equipment related to the solar tracking system, if any, has been installed and checked for alignment, lubrication and rotation;

(c) All remaining electrical systems have been checked out and are ready for operation;

(d) All electrical continuity and ground fault tests and all mechanical tests and calibrations have been completed; and

(e) All instrumentation is operational and has been calibrated in accordance with manufacturers' standards and guidelines and, where possible, loop checked.

1.1.92 "Milestones" means the activities, events and targets, or combination thereof, set forth in Appendix C, Critical Milestones and Milestones, attached hereto.

1.1.93 "Minimum Performance Level" means that, at a minimum and as determined in Section 11.6, DETERMINATION OF PERFORMANCE, of Article XI, CONTRACTOR GUARANTEES AND LIQUIDATED DAMAGES, the Net Energy Output is equal to or greater than fifty percent (50%) of the Net Energy Output Guarantee when corrected to Guarantee Design Conditions.

1.1.94 "Module Warranty Period" has the meaning set forth in Section 12.1.4(c).

1.1.95 "Moody's" means Moody's Investor Services, Inc.

1.1.96 "Net Energy Output" means electrical energy of the Plant, in kWh, measured at the revenue quality meters at the FPL Interconnection Facilities.

ECRC-08-3229 HEARING EXHIBIT - 00000259

1.1.97 "Net Energy Output Guarantee" has the meaning set forth in Section 11.3, GUARANTEED PERFORMANCE LEVEL, of Article XI, CONTRACTOR GUARANTEES AND LIQUIDATED DAMAGES.

1.1.98 "Noise Guarantee" means that the Project will function at a noise level that is equal to or less than the lower of the noise limitations set forth in Appendix A, Scope of Work, or the noise limitations contained in the Applicable Permits and Applicable Laws (as demonstrated by the Noise Test and excluding for purposes of determining compliance with the Applicable Permits and Applicable Laws all variances and waivers that may be applicable thereto).

1.1.99 "Noise Test" means the tests more particularly described in Appendix A, Scope of Work, which shall be performed simultaneously with the testing of the Minimum Performance Level and the Guaranteed Performance Level in order to evidence satisfaction of the Noise Guarantee for the Plant.

1.1.100 "Notice to Proceed" means the written notice given from FPL to Contractor directing Contractor to commence performance of the entire Work.

1.1.101 "Notice to Proceed Date" has the meaning set forth in Section 5.2.4.

1.1.102 "O&M Contractor" means the Person selected by FPL for the operation and maintenance of the Plant.

1.1.103 "O&M Personnel" has the meaning set forth in Section 3.22, TRAINING OF O&M PERSONNEL, of Article III, CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR

1.1.104 "Operating Guidelines" means the guidelines or requirements specified in the Utility interconnection agreement applicable to the Project.

1.1.105 "Operating Mode Test" means the test further described in Appendix A, Scope of Work.

1.1.106 "Parties" means collectively, FPL and Contractor.

1.1.107 "Party" means individually, FPL or Contractor.

1.1.108 "Payment Output Percentage" means the percentage determined in accordance with the following formula:

Payment Output Percentage = (1.2 x Output Percentage) - 20

Where:

Output Percentage = the percentage of the Guaranteed Performance Level achieved up to 95% (for purposes of Section 10.5.1) and 97% (for purposes of Section 11.4.3).

1.1.109 "Person" means an individual, partnership, corporation, limited liability company, company, business trust, joint stock company, trust, unincorporated association, joint venture, Government Authority or other entity of whatever nature.

1.1.110 "Plant" means the nominal 10 MW (net) solar photovoltaic, electrical generating facility, to be located on the Property Site, including the solar photovoltaic panels, the solar tracking system, if any, and all structures, facilities, appliances, lines, conductors, instruments, apparatus, components, roads and other equipment comprising and integrating the entire facility as more particularly described in Appendix A, SCOPE OF WORK.

1.1.111 "Plant Warranty Period" has the meaning set forth in Section 12.1.4(b).

1.1.112 "Pre-Existing Hazardous Material" means Hazardous Material that existed on or in the Property Site prior to Initial Site Mobilization by Contractor.

1.1.113 "Procedures Manual" has the meaning set forth in Section 3.19.3, Procedures Manual, of Article III, CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR.

ECRC-08-3230 HEARING EXHIBIT - 00000260

1.1.114 "Project" means the Plant and all equipment, services and utilities related thereto which must be designed, constructed, assembled, erected, commissioned, started, tested and otherwise completed by, or through, Contractor as part of the Scope of Work and in strict accordance with the provisions of the Contract Documents.

1.1.115 "Project Achievement Certificate" means a duly executed certificate in substantially the form of Appendix Q attached hereto, which is submitted by Contractor to FPL with a Request for Payment.

1.1.116 "Project Loss Manual" means the project loss manual prepared by FPL which has been provided to Contractor prior to the date of this Agreement.

1.1.117 "Project Schedule" means the schedule for completion of the Work attached hereto as Appendix B, Project Schedule.

1.1.118 "Property Site" means that certain piece of property located in Brevard County, Florida, as more particularly described in Appendix P, Legal Description of Property Site.

1.1.119 "Protected Areas" has the meaning set forth in Section 3.16.4, *Protected Areas*, of Article III, CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR.

1.1.120 "Provisional Acceptance" means that all of the following have occurred for the Project:

(a) Mechanical Completion has been achieved;

(b) The Plant has been synchronized with the Grid in accordance with the Scope of Work and the Utility's interconnection requirements;

(c) The Plant is capable of being operated safely, normally, reliably and continuously in accordance with the requirements of all Applicable Laws, Applicable Permits and the Contract Documents at all operating conditions and modes specified in the Scope of Work;

(d) The Project has achieved at a minimum the Minimum Performance Level as determined pursuant to Section 11.6, DETERMINATION OF PERFORMANCE, of Article XI, CONTRACTOR GUARANTEES AND LIQUIDATED DAMAGES;

(e) The Project has achieved the Noise Guarantee simultaneously with the Minimum Performance Level;

(f) The Operating Mode Tests and the Capability Verification Tests have been successfully completed and all criteria for passing such tests have achieved;

(g) Contractor has provided FPL with copies of all Contractor Permits;

(h) The training of O&M Personnel has been completed;

(i) All spare parts required under the Contract Documents have been delivered by Contractor to the Property Site in accordance with Section 3.26, SPARE PARTS AVAILABILITY, of Article III, CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR;

(j) All Work has been completed in accordance with the requirements of the Contract Documents (other than items on the Punch List); and

(k) Contractor shall have paid all Schedule Liquidated Damages due under the Contract Documents, if any.

For the avoidance of doubt, it is expressly acknowledged and agreed that the commencement or completion of any stormwater system to be built in connection with the Project shall not be a condition to achieving Provisional Acceptance.

1.1.121 "Provisional Acceptance Date" means the actual date of achieving Provisional Acceptance as determined pursuant to Section 10.7, PROVISIONAL ACCEPTANCE, of Article X, SYNCHRONIZATION, TESTS, MECHANICAL COMPLETION, PROVISIONAL ACCEPTANCE AND FINAL ACCEPTANCE.

ECRC-08-3231 HEARING EXHIBIT - 00000261

1.1.122 "Prudent Utility Practices" means those sound and prudent practices, acts, methods, specifications, codes and standards generally followed by the United States electric utility industry with respect to design, construction, operation, and maintenance of first class, major electric generating, transmission, and distribution facilities (including but not limited to, the engineering, operating and safety practices generally followed by the electric utility industry) that, in the exercise of good judgment, would have been expected to accomplish the desired result in a manner consistent with Applicable Laws, Applicable Permits, reliability, safety, environmental protection, local conditions, economy and efficiency.

1.1.123 "Punch List" has the meaning set forth in Section 10.6, PUNCH LIST, of Article X, SYNCHRONIZATION, TESTS, MECHANICAL COMPLETION, PROVISIONAL ACCEPTANCE AND FINAL ACCEPTANCE.

1.1.124 "Qualified Insurer" has the meaning set forth in Section 9.3, QUALIFIED INSURERS, of Article IX, INSURANCE.

1.1.125 "Quality Assurance Program" has the meaning set forth in Section 3.19.7, Quality Assurance Program, of Article III, CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR.

1.1.126 "Quality Control Manual" has the meaning set forth in Section 3.19.7, Quality Assurance Program, of Article III, CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR.

1.1.127 "Remediation Work" means work required by FPL to remove all Work and Contractor Equipment from the Property Site and restore the Property Site to the condition of the Property Site immediately prior to Initial Site Mobilization.

1.1.128 "Remedial Plan" means a plan of corrective action, submitted by Contractor pursuant to Section 10.5, PERFORMANCE SHORTFALLS, of Article X, SYNCHRONIZATION, TESTS, MECHANICAL COMPLETION, PROVISIONAL ACCEPTANCE AND FINAL ACCEPTANCE, that specifies in reasonable detail the actions Contractor proposes to undertake to cause the Project to satisfy the Final Acceptance Performance Level, and the period of time in which Contractor proposes to complete the corrective action; provided that such corrective action is reasonably likely to cause the Project to satisfy the Final Acceptance Performance Level as determined by root cause analysis of the deficiencies identified by previous testing.

1.1.129 "Request for Payment" means the written requests from Contractor to FPL for payment hereunder, which requests shall be in substantially the form of Appendix F, Form of Request for Payment.

1.1.130 "S&P" means Standard and Poor's Ratings Group (a division of McGraw Hill Companies).

1.1.131 "Safe and Secure Workplace Policy" means the safe and secure workplace policy of FPL which is attached hereto as Appendix Z-1, Safe and Secure Workplace Policy, as same may be amended or modified by FPL from time to time.

1.1.132 "Safety Plan" has the meaning set forth in Section 3.19.4, Health Plan, Safety Plan and Environmental Plan, of Article III, CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR.

1.1.133 "Schedule Liquidated Damages" has the meaning set forth in Section 11.2, SCHEDULE LIQUIDATED DAMAGES, of Article XI, CONTRACTOR GUARANTEES AND LIQUIDATED DAMAGES.

1.1.134 "Scheduled Synchronization Date(s)" means the date identified by Contractor in a notice received by FPL at least one hundred forty (140) days prior to such date as being the date on which Contractor will first attempt to cause the generating equipment of the Project to be electrically synchronized and connected to the Grid.

1.1.135 "Scope of Work" means the services and work to be provided, or caused to be provided, by or through Contractor under the Contract Documents for the Contract Price, as more particularly described in Appendix A, Scope of Work, as the same may be amended from time to time in accordance with the terms hereof, and which Scope of Work includes, without limitation, all licenses, Contractor Permits, technical assistance, engineering, assembly, construction management, construction, services, labor, materials,

ECRC-08-3232 HEARING EXHIBIT - 00000262

equipment, Contractor Equipment, operations and management that are indicated on, inferable from, or incidental to, the Contract Documents or the Drawings prepared in connection with the Contract Documents or that are likely to be required in accordance with Applicable Law, or that are properly and customarily included within the general scope and magnitude of the work incorporated into similar projects having similar output and performance requirements, all in order to produce a Project that complies with the requirements of the Contract Documents.

1.1.136 "Subcontractor" means any contractor, constructor or material man who performs any portion of the Scope of Work other than Contractor.

1.1.137 "Substantial Subcontractor" means a Subcontractor whose contract or contracts (in the aggregate) with Contractor require payments by Contractor totaling at least Two Hundred Fifty Thousand Dollars ($250,000.00).

1.1.138 "Substantial Vendor" means a Vendor whose contract or purchase orders (in the aggregate) with Contractor require payments by Contractor of at least Two Hundred Fifty Thousand Dollars ($250,000.00).

1.1.139 "Switchyard Facilities" means the area adjacent to the Plant designated by FPL for the 23 kV voltage equipment and apparatus used for connecting the Plant to the FPL Interconnection Facilities, all as more particularly described in Appendix A, Scope of Work.

1.1.140 "Tangible Net Worth" with respect to any Person means such Person's total stockholder's equity minus its Intangible Assets, each as would be reflected on a balance sheet prepared in accordance with GAAP.

1.1.141 "Tax" or "Taxes" means all fees, taxes, including sales taxes, use taxes, stamp taxes, value-added taxes, ad valorem taxes and property taxes (personal and real, tangible and intangible), customs, duties, tariffs, levies, assessments, withholdings and other charges and impositions of any nature, plus all related interest, penalties, fines and additions to tax, now or hereafter imposed by any Applicable Law or Government Authority (including penalties or other amounts payable pursuant to subtitle B of Title I of ERISA).

1.1.142 "Termination Payment" has the meaning set forth in Section 15.3.2, Termination Payment, of Article XV, TERMINATION.

1.1.143 "Termination Payment Schedule" means Appendix N hereto.

1.1.144 "Test Notice" has the meaning set forth in Section 10.1.2, Test Notice, of Article X, SYNCHRONIZATION, TESTS, MECHANICAL COMPLETION, PROVISIONAL ACCEPTANCE AND FINAL ACCEPTANCE

1.1.145 "Tests" means the Operating Mode Test, the Capability Verification Test, the Guaranteed Performance Test and the Noise Test.

1.1.146 "Utility" means FPL.

1.1.147 "Vendor" means any supplier, manufacturer or vendor of Equipment to Contractor or any Subcontractor.

1.1.148 "Warranty Period" and "Warranty Periods" have the meanings set forth in Section 12.1.4, Warranty Period, of Article XII, CONTRACTOR'S WARRANTIES.

1.1.149 "Work" has the meaning set forth in Section 3.1, SCOPE OF WORK; APPLICABLE STANDARDS, of Article III, CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR, and includes the Plant, the Equipment, the Contractor Deliverables and any other product or result of the Work, but excludes any storm water system at or related to the Project Site.

1.2 INTERPRETATION

Unless the context of the Contract Documents otherwise requires:

1.2.1 The headings contained in this Agreement are used solely for convenience and do not constitute a part of this Agreement between the Parties, nor should they be used to aid in any manner to construe or interpret this Agreement;

ECRC-08-3233 HEARING EXHIBIT - 00000263

1.2.2 The gender of all words used herein shall include the masculine, feminine and neuter and the number of all words shall include the singular and plural words;

1.2.3 The terms "hereof", "herein" "hereto" and similar words refer to this entire Agreement and not to any particular Article, Section, Appendix or any other subdivision of this Agreement;

1.2.4 References to "Article," "Section" or "Exhibit" are to this Agreement unless specified otherwise;

1.2.5 Reference to "this Agreement" (including any Appendix hereto) or any other agreement, Exhibit, permit or document shall be construed as a reference to such agreement or document as the same may be amended, modified, supplemented or restated, and shall include a reference to any document which amends, modifies, supplements or restates, or is entered into, made or given pursuant to or in accordance with its terms;

1.2.6 References to any law, statute, rule, regulation, notification or statutory provision (including Applicable Laws, Applicable Permits and the Operating Guidelines) shall be construed as a reference to the same as it may have been, or may from time to time be, amended, modified or re-enacted;

1.2.7 References to any Person shall be construed as a reference to such Person's successors and permitted assigns; and

1.2.8 References to "includes," "including" and similar phrases means "including, without limitation."

1.3 APPENDICES

The following Appendices are attached to and incorporated into and made a part of this Agreement:

1.3.1 Appendix A ..... Scope of Work

1.3.2 Appendix B..... Project Controls Requirements

1.3.3 Appendix C..... Critical Milestones and Milestones

1.3.4 Appendix D ..... Construction and Milestone Payment Schedule

1.3.5 Appendix E..... Credit Trigger Event

1.3.6 Appendix F..... Form of Request for Payment

1.3.7 Appendix G ..... Form of Final Acceptance Certificate

1.3.8 Appendix H ..... Form of Contractor Certificate for Partial Waiver of Liens

1.3.9 Appendix H-1 ..... Form of Subcontractor Certificate for Partial Waiver of Liens

1.3.10 Appendix I..... Form of Contractor Parent Guaranty

1.3.11 Appendix J..... Option Pricing

1.3.12 Appendix K ..... Module Warranty

1.3.13 Appendix L..... Operating and Maintenance Manuals

1.3.14 Appendix M..... FPL Permits

1.3.15 Appendix N ..... Termination Payment Schedule

1.3.16 Appendix O ..... Project Management Team

1.3.17 Appendix P..... Legal Description of Property Site

1.3.18 Appendix Q ..... Form of Project Achievement Certificate

1.3.19 Appendix R..... Form of Contractor Certificate for Final Waiver of Liens

1.3.20 Appendix R-I..... Form of Subcontractor Certificate for Final Waiver of Liens

ECRC-08-3234 HEARING EXHIBIT - 00000264

1.3.21 Appendix S ..... Form of Request for Change Order

1.3.22 Appendix T ..... Intentionally Deleted

1.3.23 Appendix U ..... Form of Letter of Credit

1.3.24 Appendix V ..... Contractor's Exclusions

1.3.25 Appendix W ..... Intentionally Deleted

1.3.26 Appendix X ..... Intentionally Deleted

1.3.27 Appendix Y ..... Form of Quality Assurance Programs

1.3.28 Appendix Z ..... Form of Safety Plan

1.3.29 Appendix Z-1 ..... Safe and Secure Workplace Policy

1.3.30 Appendix HH ..... Acceptance Testing

1.3.31 Appendix II ..... Performance Degradation Testing

1.4 ORDER OF PRECEDENCE

1.4.1 In the event of conflicts among the terms of the Contract Documents, interpretations shall be based upon the following Contract Documents which are set forth in ranked order of precedence:

(a) Amendments, addenda or other modifications to the Contract Documents (including Change Orders) duly signed and issued after the signing of this Agreement and effected in accordance with the terms hereof, with those of a later date having precedence over those of an earlier date;

(b) The Agreement; and

(c) The Appendices to the Agreement.

In the event of a conflict among, or within, any other Contract Document(s) within any one of the levels set forth in the foregoing order of precedence, or between the Contract Documents and Applicable Laws or Applicable Permits, or among Applicable Laws or Applicable Permits themselves, the more stringent or higher quality requirements shall control. All obligations imposed on Contractor and each Subcontractor under the Agreement or under Applicable Laws, Applicable Permits or Applicable Standards and not expressly imposed or addressed in the Contract Documents shall be in addition to and supplement the obligations imposed on Contractor under the Contract Documents, and shall not be construed to create an "irreconcilable conflict."

1.5 LANGUAGE

1.5.1 The Contract Documents and all documentation to be supplied hereunder (including, without limitation, all Contractor Deliverables and all warranties provided hereunder) shall be in the English language.

ARTICLE II.
RETENTION OF CONTRACTOR

2.1 RETENTION OF CONTRACTOR

FPL hereby engages Contractor, and Contractor hereby agrees to be engaged by FPL to perform the Work in accordance with the terms and conditions set forth herein.

2.2 STATUS OF CONTRACTOR; NO PARTNERSHIP

Contractor shall be an independent contractor with respect to any and all Work performed and to be performed under the Contract Documents. The Contract Documents shall not be interpreted or construed to create an association, joint venture or partnership relationship among or between the Parties or any similar relationship, obligations or liabilities. Neither Party shall have any right, power or authority to enter into any agreement or undertaking for, act on behalf of, or to act as or be an agent or representative of, or to otherwise bind or obligate the other Party.

ECRC-08-3235 HEARING EXHIBIT - 00000265

2.3 SUBCONTRACTORS AND VENDORS.

2.3.1 Subject to the terms hereof, Contractor shall have the right to have any portion of the Work performed by a Subcontractor or Vendor qualified to perform such Work pursuant to written subcontracts or written purchase orders; provided that Contractor shall not be relieved from any liability or obligation under the Contract Documents. Except as otherwise expressly provided in the Contract Documents, Contractor shall be solely responsible for engaging, managing, supervising and paying all such Subcontractors and Vendors. Contractor shall require that all Work performed, and all Equipment provided by Subcontractors and Vendors are received, inspected and otherwise furnished in accordance with the Contract Documents, and Contractor shall be solely liable for all acts, omissions, liabilities and Work (including Defects therein) of such Subcontractors and Vendors. FPL shall not have any obligation or liability to any Subcontractor or Vendor. Nothing in any contract, subcontract or purchase order with any Subcontractor or Vendor shall in any way diminish or relieve Contractor from any duties and obligations under the Contract Documents; and each such contract, subcontract and purchase order must provide that the rights thereunder are assignable to FPL and the Financing Parties or their designees at any time without the prior consent of the applicable Subcontractor or Vendor. No Subcontractor or Vendor is intended to be or shall be deemed a third-party beneficiary of the Contract Documents.

2.3.2 FPL shall have the right to approve, in advance in writing, each Substantial Subcontractor and Substantial Vendor in accordance with the terms hereof. Prior to retaining any Substantial Subcontractors or Substantial Vendors, Contractor shall notify FPL in writing and provide it with such information as necessary to enable FPL to evaluate each such proposed Substantial Subcontractor or Substantial Vendor for the portion of the Work proposed to be performed by it. Within fifteen (15) days after receipt of such information, FPL shall advise Contractor if any proposed Substantial Subcontractor or Substantial Vendor is unacceptable. If FPL fails to object to any proposed Substantial Subcontractor or Substantial Vendor within such fifteen (15) day period, Contractor may retain such Substantial Subcontractor or Substantial Vendor for the portion of the Work proposed. If FPL objects in writing (stating with reasonable detail the basis for such objection) within such fifteen (15) day period to such proposed Substantial Subcontractor or Substantial Vendor, Contractor shall not retain such proposed Substantial Subcontractor or Substantial Vendor. Approval of any Substantial Subcontractor or Substantial Vendor under this paragraph shall only be for the portion of the Work so approved. Contractor hereby acknowledges and agrees that the review and/or acceptance of any subcontract by FPL and the acceptance of the approved Substantial Subcontractors and Substantial Vendors shall not: (i) modify, in any way, the obligations of Contractor pursuant to the Contract Documents; or (ii) be raised as a claim or as a defense or counterclaim to any claim in connection with the Contract Documents.

2.3.3 Contractor shall submit to FPL a copy of each purchase order or agreement entered into with a Substantial Subcontractor or Substantial Vendor for Major Equipment. Each purchase order or agreement shall show, where applicable, the Vendor's or Subcontractor's name, manufacturer's name, materials type, model number, size, quantity and lists of the Major Equipment ordered, and shall be submitted to FPL when issued for purchase. For purposes of clarity, it is understood and agreed that no document required to be submitted to FPL pursuant to this Section 2.3.3 shall be required to contain any economic terms, all of which economic terms may be redacted prior to submission to FPL.

2.3.4 Each subcontract and purchase order shall require such Subcontractor and Vendor to assume toward Contractor those terms and conditions of contracting which Contractor customarily includes in its subcontracts. At a minimum, all subcontracts shall require the Subcontractors to comply with Applicable Laws and Applicable Permits, shall provide that FPL has the right of inspection as provided hereunder and require such Subcontractors and Vendors to:

(a) Be subject to the labor obligations hereunder as well as the safety and security provisions of the Contract Documents;

(b) Provide guarantees and warranties with respect to its portion of the Work and the Equipment,

(c) Provide certificates of insurance as set forth herein;

ECRC-08-3236 HEARING EXHIBIT - 00000266

(d) Be subject to the dispute resolution procedures as required herein; and

(e) Have such terms and conditions as are reasonably and customarily obtained.

All subcontracts shall preserve and protect the rights of FPL, shall not prejudice such rights and shall require each Subcontractor to enter into similar agreements with other Subcontractors.

2.3.5 In addition to the requirements set forth in Section 2.3.4, above, Contractor shall include in each subcontract and purchase order the following language to make FPL an express third-party beneficiary of such subcontract or purchase order:

> "The parties hereto agree and acknowledge that the services/work/equipment to be provided hereunder by [subcontractor] will be incorporated into the power station being developed by [FPL]. As such, the parties expressly agree that FPL is a third party beneficiary of this [Agreement] entitled, in its own name or in the name of [Contractor], to enforce this [Agreement] against [subcontractor]."

ARTICLE III.
CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR

3.1 SCOPE OF WORK; APPLICABLE STANDARDS.

3.1.1 Contractor shall, at its own cost and expense:

(a) Design, engineer, procure, construct, start up, and carry out the Tests for the Plant, and perform its other obligations hereunder, including completion of the Scope of Work and any warranty work hereunder; and

(b) Manage, supervise, inspect and furnish all Labor, Equipment, Contractor Equipment, temporary structures, temporary utilities, products and services for the foregoing,

all on a turnkey basis, in accordance with the Contract Documents, including, without limitation, the Project Schedule and the Scope of Work, as the same may be modified from time to time in accordance with the terms hereof by a Change Order or other amendment hereto (all of the foregoing being collectively referred to in this Agreement as the "Work").

3.1.2 Subject to the remedies provided for herein, Contractor shall perform the Work and turn the Plant over to FPL in a manner that is:

(a) Sufficient, complete and adequate in all respects necessary for the Project to successfully achieve Provisional Acceptance by the Guaranteed Provisional Acceptance Date;

(b) In conformance with professional standards and skill, expertise and diligence of design and construction professionals regularly involved in first class, major grid-connected solar power projects in the United States;

(c) In compliance with the terms of the Contract Documents, the Operating Guidelines, the Utility's interconnection requirements, all Applicable Laws, Applicable Standards and Applicable Permits; and

(d) Approved as to form, use and content by all Government Authorities and private entities authorized to administer or enforce any building or construction code or standard whose approval of the final design of the Plant, or any portion thereof, is necessary for the construction, operation or interconnection of the Plant.

3.1.3 *Contractor's Exclusions*. In light of the foregoing, Contractor has included within the Contract Price the cost to complete the entire Scope of Work. Items need not be specifically listed in the Contract Documents or in Appendix A, Scope of Work, in order to be deemed to be items within the Scope of Work. It is understood that Contractor is better qualified to list exclusions than FPL is to list inclusions. Therefore,

ECRC-08-3237 HEARING EXHIBIT - 00000267

any item indicated on the Contract Documents, inferable therefrom, incidental thereto or required in accordance with any Applicable Law, Applicable Standards, Applicable Permits or Prudent Utility Practices, that is not specifically excluded from the Scope of Work in Contractor's exclusions set forth on Appendix V, Contractor's Exclusions, is to be considered as part of the Scope of Work. In addition, the Scope of Work includes all that should be properly included and all that would be customarily included within the general scope and magnitude of the Work in order to achieve the Guaranteed Performance Level applicable to the Project. As a result, except for Contractor's exclusions set forth on Appendix V, Contractor's Exclusions, Contractor hereby waives any and all claims for an increase in the Contract Price or an extension of the Guaranteed Provisional Acceptance Date based, in whole or in part, upon an assertion that any certain license, technical assistance, engineering, assembly, construction, service, labor, material, equipment, operation or management is beyond the Scope of Work when such license, technical assistance, engineering, assembly, construction, service, labor, material, equipment, operation or management is indicated in the Contract Documents, the Drawings or other instruments of service prepared in connection with the Contract Documents, inferable therefrom, incidental thereto, required in accordance with any Applicable Law, Applicable Standards, Applicable Permits, Prudent Utility Practices or otherwise necessary in order to complete a Project in accordance with and subject to the requirements of the Contract Documents.

3.1.4 Contractor shall perform the Work in conformance with professional standards and skill, expertise and diligence of design and construction professionals regularly involved in first class, major, grid-connected solar power projects for public utilities in the United States. Without limiting the generality of the foregoing, Contractor shall:

(a) Comply with, and shall cause the Work and all components thereof to comply with, the Operating Guidelines, Applicable Laws, Applicable Standards, Applicable Permits, Prudent Utility Practices, the requirements of the Contract Documents and the generally accepted standard of care, skill and diligence as would be provided by, in the case of engineering services, a prudent engineering firm, and in the case of construction or procurement services, by a prudent construction firm, in each case experienced in supplying such services in the United States to power-producing entities for first class, major power projects;

(b) Cause the Work to be performed with Contractor's best skill and judgment, in a safe, expeditious, good and workmanlike manner in accordance with the preceding paragraph (a);

(c) Cause the Work to be approved as to form, use and content by all Government Authorities and private entities authorized to administer or enforce any building or construction code or standard whose approval of the final design of the Project, or any portion thereof, is necessary for the construction or operation of the Project;

(d) Cause the Plant to be designed to operate, and shall cause the Plant to be capable of being operated, at all levels and operating modes in accordance with the Operating Guidelines, Applicable Laws, Applicable Standards, Applicable Permits, Prudent Utility Practices and the requirements of the Contract Documents; and

(e) Cause the Plant and all items of Equipment and improvements comprising the Plant to be designed, manufactured, installed, calibrated and tested where applicable in accordance with the published standards (as of the dates specified) of the organizations listed in the Scope of Work and Contractor shall notify FPL of any standards of such organizations that are inconsistent with each other and advise FPL of the manner in which it intends to resolve such inconsistency in accordance with the published standard.

Contractor shall inspect or cause to be inspected all items to be incorporated into or used in the performance of the Work and shall reject those items determined not to be in compliance with the requirements of the Contract Documents. Except as otherwise expressly provided in this Agreement, the standard of performance set forth in this Section 3.1.4, shall apply to all aspects of the Work, and this Section 3.1.4, shall be deemed to be incorporated by reference into each provision of the Contract Documents describing the Work, Contractor's obligations hereunder, or referring to the "requirements of

ECRC-08-3238 HEARING EXHIBIT - 00000268

the Contract Documents", "in accordance with the Contract Documents" or words of similar effect. In no event will references in any provision of Contract Documents to one or more of the standards, guidelines, practices, regulations, laws, or permits contained in this Section 3.1.4, be interpreted to limit in the applicability of all such standards, guidelines, practices, regulations, laws, and permits to such provision. Additionally, as a condition to meeting Provisional Acceptance and Final Acceptance, the Work for such milestone must be completed in accordance with all of the standards, guidelines, practices, regulations, laws, and permits contained in this Section 3.1.4.

3.1.5 Contractor acknowledges that this Agreement constitutes, subject to the terms hereof, a fixed price obligation to:

(a) Engineer, design, procure, construct, test and start up through Provisional Acceptance a turnkey Project, complete in every detail, within the time and for the purpose designated herein;

(b) Achieve Final Acceptance within the time designated herein;

(c) Comply with all of the warranty obligations set forth in this Agreement; and

(d) Perform Contractor's other obligations hereunder.

References to the obligations of Contractor under this Agreement as being "turnkey" and performing the Work on a "turnkey basis" means that Contractor is obligated to supply all of the Equipment and design services, install all of the Equipment and supply all labor and to supply and perform all of the Work, in each case as may reasonably be required, necessary, incidental, or appropriate (whether or not specifically set forth in this Agreement) to complete the Work such that the Project satisfies the applicable terms, conditions, and Contractor's obligations concerning the Guaranteed Performance Level and other guarantees and requirements set forth in this Contract Documents, all for the Contract Price.

3.2 CONTROL AND METHOD OF THE WORK.

3.2.1 Subject to the terms hereof, Contractor shall be solely responsible for performing or causing to be performed the Work in accordance with the terms of the Contract Documents, and for all means, methods, techniques, sequences, procedures, and safety and security programs in connection with such performance. Contractor shall inform FPL in advance concerning its plans for carrying out the Work.

3.2.2 Whenever the words "as ordered," "as directed," "as required," "as permitted," "as allowed," "approved," "reasonable," "suitable," "acceptable," "properly," "satisfactory," or words or phrases of similar effect and import are used, it shall be understood that none of such terms shall imply that FPL has any authority over, right to control or responsibility for supervision of Contractor or its Subcontractors or Vendors, such supervision (including sole control over and responsibility therefor) being strictly reserved for Contractor. Any method of Work suggested by FPL that is used by Contractor will be used at the risk and responsibility of Contractor, and FPL will assume no responsibility therefor.

3.3 COMPLIANCE WITH LAW

Contractor shall comply, and shall cause all of its Subcontractors, Vendors and Persons that it has a right to direct who are engaged in the performance of any of the Work to comply with, all Applicable Laws and Applicable Permits. Contractor shall perform the Work in a manner designed to protect the environment on and off the Job Site and minimize damage or nuisance to Persons and property of the public or others, including damage or nuisance resulting from pollution, noise or other causes arising as a consequence of methods of construction or operation of the Plant. The foregoing shall not be construed as to limit Contractor's obligations and liabilities under Section 3.15, PROTECTION AND SAFETY, below.

3.4 CERTAIN MATTERS PERTAINING TO JOB SITE.

3.4.1 *Project Inspection.* Contractor acknowledges that, prior to the date of this Agreement, Contractor:

(a) Has made a complete and careful examination of the Job Site and the surrounding areas, drawings and specifications and other information set forth in the Contract Documents;

(b) Has made a complete and careful examination to determine the difficulties and hazards incident to the performance of the Work, including:

(i) The location of the Project;

(ii) The proximity of the Project to adjacent facilities and structures;

(iii) The conditions of the roads and waterways in the vicinity of the Job Site, including the conditions affecting shipping and transportation, access, disposal, handling and storage of materials;

(iv) The nature and character of the soil, terrain, surface and subsurface conditions of the Job Site;

(v) The labor conditions in the region of the Job Site;

(vi) Applicable Laws and Applicable Permits;

(vii) Rights of FPL regarding the Job Site as set forth herein;

(viii) The local weather conditions based upon previous weather data;

(ix) The qualifications of all Subcontractors and Vendors;

(x) The Safe and Secure Workplace Policy, the Project Loss Manual and Environmental Control Program; and

(xi) All other known matters and other matters that Contractor should know under Applicable Standards that might affect Contractor's performance under this Agreement or the design, engineering, procurement, construction, start-up, demonstration and testing of the Plant; and

(c) Has determined to Contractor's satisfaction the nature and extent of such difficulties and hazards.

3.4.2 *Responsibility for Interpreting Sub-Surface Data*. Notwithstanding the above, where FPL has made investigations of subsurface conditions in areas where Work is to be performed under this Agreement, such investigations are made by FPL for the purpose of study and design. To the extent the records of such investigation are included in this Agreement, the interpretation of such records shall be the sole responsibility of Contractor. FPL assumes no responsibility whatsoever with respect to the sufficiency or accuracy of such investigations, the records thereof, or of the interpretations set forth and there is no warranty or guarantee, either express or implied, that the conditions indicated by such investigations or records thereof are representative of those existing throughout such areas, or any part thereof, or that unforeseen developments may not occur, or that materials other than or in proportions different from those indicated may not be encountered.

3.4.3 In light of the foregoing and subject to Section 3.4.4, Differing Condition, Contractor accepts the Job Site in its existing condition and waives any right to additional compensation beyond the Contract Price or an extension of the Guaranteed Provisional Acceptance Date, and any other claims that may arise due, in whole or in part, to errors or omissions in, or inconsistencies among, the Contract Documents and any information provided in connection with the Project. Contractor shall be solely responsible for performing any preliminary Work on the Job Site necessary for the commencement of construction to occur, including removal of all physical impediments to performing Work on the Job Site, above and below ground.

3.4.4 *Differing Condition*. Notwithstanding the acknowledgments set forth in Section 3.4.1, no less than sixty (60) days prior to commencement of Contractor's mobilization on the Job Site (the "Geotechnical Investigation Completion Date"), Contractor may conduct a geotechnical investigation in the location of the Job Site or any portion thereof as Contractor reasonably deems necessary to confirm the site conditions referred to in Sections 3.4.1, and 3.4.2, above. If as a result of the geotechnical investigation, Contractor:

ECRC-08-3240 HEARING EXHIBIT - 00000270

(a) Encounters any concealed subsurface conditions which a reasonable, experienced Contractor would not foresee existing at the Job Site and which vary materially from the conditions shown in the Contract Documents; and

(b) Any such condition causes a material increase or decrease in the Contract Price or time required for performance of the Work or otherwise materially affects any provision of this Agreement,

then Contractor shall notify FPL thereof and FPL may either:

(i) Issue a Change Order to address such condition; or

(ii) Terminate this Agreement pursuant to Section 15.3.

Contractor specifically waives the right to make any such claims after the Geotechnical Investigation Completion Date. Except as set forth in this Section 3.4.4, Contractor assumes the risk of surface and subsurface conditions at the Job Site and shall not be entitled to an extension of the Project Schedule or an increase in the Contract Price.

3.5 FPL ACCESS TO JOB SITE

Subject to Contractor's reasonable safety policies, FPL shall have the right to have representatives on the Job Site full time. In addition, Contractor shall provide reasonable access to the Job Site and the Work at all times to FPL, FPL's other contractors, the Independent Engineer and the Financing Parties and their respective employees, representatives, agents and consultants, subject to Contractor's reasonable safety policies.

3.6 INSPECTION AND TESTING OF WORK IN PROGRESS.

3.6.1 Each item of Equipment to be supplied by Contractor shall be subject to inspection and testing during and upon completion of its fabrication and installation in accordance with the provisions of the Scope of Work. Without limiting the foregoing, Contractor shall be responsible for inspection and testing of the Equipment in accordance with Applicable Standards.

3.6.2 Contractor shall perform inspection, expediting, quality surveillance and traffic services as are required for performance of the Scope of Work. Contractor shall perform such detailed inspection of Work in progress at intervals appropriate to the stage of construction or fabrication of the Project as is necessary to ensure that such Work is proceeding in accordance with this Agreement and the Contract Documents and to protect FPL against Defects and deficiencies in such Work. At least fifteen (15) Business Days prior to the time Contractor or its representative intends to inspect any item of Major Equipment, Contractor shall notify FPL in writing of such inspection which notice shall state the date, time and place where such inspection is to be conducted (provided that, if the inspection will occur at a location outside of the United States of America, Contractor shall provide such notice as soon as possible but in no event less than fifteen (15) Business Days prior to such inspection). FPL and/or its designated agent may, at FPL's option, accompany Contractor to the inspection by notifying Contractor in writing within five (5) Business Days of receipt of notice of the inspection. FPL's failure to notify Contractor within the permitted time period shall be deemed to be a decision by FPL not to attend the inspection. Contractor shall arrange for access to the manufacturer's facilities to permit any such inspection to be conducted smoothly. Contractor shall reimburse FPL for any costs necessarily and reasonably incurred by FPL due to Contractor's failure to prepare any portion of the Work for inspection or testing after having provided notice to FPL of any such inspection or test. With respect to any inspection that FPL chooses not to attend, Contractor shall:

(a) Keep FPL informed in all material respects of the progress and quality of all work;

(b) Advise FPL of any deficiencies revealed through such inspections and of the measures proposed by Contractor to remedy such deficiencies in order to avoid any delay in the completion of the Work and Contractor's performance of the Work; provided that, any such notice provided pursuant to this Section 3.6.2, shall not constitute a request for adjustment, extension or modification of the Project Schedule or FPL's consent to any of the same; and

ECRC-08-3241 HEARING EXHIBIT - 00000271

(c) Upon FPL's request, provide FPL with a reasonable opportunity to review Contractor's records with respect to such inspections. Contractor shall include the right to inspection by FPL or its representative in all subcontracts and purchase orders.

3.6.3 Contractor shall permit FPL and, as authorized by FPL, any Person designated by FPL, and the Financing Parties to inspect, test and observe the Work from time to time; provided, however, that none of such Persons shall have any authority or responsibility for such Work. Contractor shall provide FPL each month during performance of the Work with a schedule of all testing proposed for the following three (3) month period in compliance with the requirements of the Scope of Work.

3.7 NO WAIVER OF RESPONSIBILITY

No inspection made, acceptance of Work, payment of money or approval given by FPL, the Financing Parties or the Independent Engineer shall relieve Contractor of its obligations for the proper performance of the Work in accordance with the terms hereof. Subject to the limitations of Article XII, Contractor's Warranties, FPL may reject any Work with Defects or which is not in accordance with the requirements of the Contract Documents, regardless of the stage of completion, the time or place of discovery of error, and whether FPL previously accepted any or all of such Work through oversight or otherwise. Except with respect to the achievement of Provisional Acceptance and Final Acceptance, no approval given by FPL, in and of itself, shall be considered as an assumption of risk or liability by any such Person. Any such approval shall mean that the Person giving the approval has no objection to the adoption or use by Contractor of the matter approved at Contractor's own risk and responsibility. Contractor shall have no claim relating to any such matter approved, including any claims relating to the failure or inefficiency of any method approved.

3.8 DEFECTIVE WORK

3.8.1 Prior to Provisional Acceptance, Contractor shall at its own cost and expense correct or replace any Work that contains a Defect, or is not otherwise in accordance with the Contract Documents. Equipment that has been replaced, if situated on the Job Site, shall be removed by Contractor from the Job Site at Contractor's own cost and expense.

3.8.2 If Contractor or any Subcontractor defaults or neglects to carry out the Scope of Work in accordance with the Contract Documents and Contractor fails within a reasonable period of time (as reasonably determined by FPL) after it knows or should have known of such default or neglects to commence and continue correction of such default or neglect with diligence and promptness, FPL may, without prejudice to other remedies FPL may have under this Agreement, correct such deficiencies. In such event, an appropriate Change Order shall be issued deducting from payments then or thereafter due to Contractor the reasonable cost of correcting such deficiencies, including reasonable compensation for the costs to enforce this provision (including reasonable attorneys' fees) and any consultant's additional services and reasonable expenses made necessary by such default, neglect or failure. If payments then or thereafter due to Contractor are not sufficient to cover such amounts, Contractor shall pay the difference to FPL within three (3) days from FPL's request therefor.

3.8.3 Contractor shall correct any and all deficiencies as required by the Contract Documents notwithstanding any actual or possible legal obligation or duty of a Subcontractor concerning same and nothing contained in this Section shall modify Contractor's obligation to achieve Final Acceptance in accordance with the Contract Documents.

3.9 CLEAN-UP.

3.9.1 Without limiting the provisions of Section 3.16, ENVIRONMENTAL MATTERS, Contractor shall at all times keep the Job Site reasonably free from waste, rubbish and Hazardous Material, other than Pre-Existing Hazardous Material, relating to its Work. Contractor shall maintain the Job Site in a neat and orderly condition throughout the performance of the Work. Contractor shall employ sufficient personnel to clean its office and FPL's office at the Job Site and work areas each working day and shall cooperate with the other Persons working at the Job Site to keep the Job Site clean.

ECRC-08-3242 HEARING EXHIBIT - 00000272

3.9.2 Prior to the Final Acceptance Date or as soon as practicable after the termination of this Agreement by FPL in accordance with the provisions of Article XV, TERMINATION, Contractor shall:

(a) Remove all Contractor Equipment from the Job Site (other than equipment, supplies and materials necessary or useful to the operation or maintenance of the Plant and Equipment and equipment, supplies and materials directed by FPL to remain at the Job Site until completion of the Plant);

(b) Clean out all pits, pipes, chambers and conduits;

(c) Tear down and remove all temporary structures on the Job Site built by it or its Subcontractors and restore such areas to a condition consistent with that of a newly constructed photovoltaic solar power plant, except as required by Applicable Law, Section 3.16.4, Protected Areas, or any other provision of this Agreement; and

(d) Remove all waste, rubbish and Hazardous Material from and around the Job Site, except that Contractor shall not be required to excavate, remove, transport or otherwise dispose of:

(i) Pre-Existing Hazardous Material on the Job Site, other than as set forth in Section 3.16.1(d); and

(ii) Any waste, rubbish or Hazardous Material caused by FPL or its representatives.

3.10 OBTAINING, MAINTAINING AND IDENTIFYING PERMITS

3.10.1 Contractor shall, and shall cause its Subcontractors to comply with, all Applicable Permits, including FPL Permits and Contractor Permits. Contractor shall timely obtain and maintain all Contractor Permits. In addition, Contractor shall timely prepare and submit to the applicable Government Authority all engineering and construction related submittals, reports and other items (including those set forth in Appendix A, Scope of Work) required to maintain and comply with any FPL Permit and provide all assistance reasonably requested by FPL in connection with FPL's efforts to obtain the FPL Permits, including, without limitation, witnesses testimony, depositions, preparation and submission of exhibits, reports or submittals, technical calculations and attending meetings; provided that FPL shall provide Contractor, at no cost to FPL, with all information, documentation and assistance reasonably requested by Contractor to permit Contractor to comply with the provisions of this Section 3.10.1. In the event that any Applicable Permit is required for the Plant or to perform the Work that is not identified in the Contract Documents, Contractor or FPL, as applicable, shall promptly, after it becomes aware of the need for such Applicable Permit, notify the other Party that such Applicable Permit is required. If such permit is of a nature typically obtained by contractors in power projects, Contractor shall, at its sole cost and expense, be obligated to obtain and maintain such Applicable Permit on behalf of FPL. Otherwise, FPL shall obtain and maintain such Applicable Permit.

3.10.2 All Applicable Permits (other than any building permits (but excluding any applicable occupancy certificates) or other Applicable Permits designated as either "To be issued in the name of Contractor" or "To be issued in the name of FPL and Contractor" on Appendix A, Scope of Work, or Appendix M, FPL Permits) shall be issued in the name of FPL unless otherwise required by Applicable Law or such Applicable Permit. If any Contractor Permit (or application therefor) is in the name of FPL or otherwise requires action by FPL, FPL shall, upon the request of Contractor, sign such application or take such action as reasonably appropriate.

3.10.3 FPL reserves the right to review any such application of Contractor; provided, however, that FPL's exercise of such right shall not under any circumstances be considered an approval of the necessity, effect or contents of such application or related permit. Contractor shall deliver to FPL true and complete copies of all Applicable Permits obtained by Contractor upon its receipt thereof. Contractor shall use best efforts to identify in writing to FPL all Applicable Permits and other government requirements for performance of the Work not identified in the Contract Documents, or shall confirm in writing that, to the best of Contractor's knowledge, there are no such Applicable Permits or other government requirements other than as identified in the Contract Documents prior to the date of this Agreement.

ECRC-08-3243 HEARING EXHIBIT - 00000273

3.11 LABOR.

3.11.1 *General.* Contractor shall be responsible for retaining all Labor necessary for it to perform its obligations hereunder and comply with the provisions hereof, all in accordance with Applicable Laws. Contractor shall be responsible for all costs incurred in complying with this Section 3.11, or otherwise associated with its Labor, including, without limitation, costs incurred by any member of its Labor, whether by direct contract or subcontract, for medical treatment, transport and accommodation as a result of injuries or illness arising from engagement or employment in the execution of the Work.

3.11.2 *Engagement of Labor.* Contractor shall make its own arrangements for the engagement of all Labor in connection with the Contract Documents and the performance of the Work. Contractor shall employ in the performance of the Work only Labor, whether supervisors, skilled workers or laborers, who are competent to perform their assigned duties in a safe and secure manner and shall use all reasonable efforts to cause its Subcontractors and Vendors to adhere to the same standard with respect to their Labor. Contractor agrees, where required by Applicable Law, to employ only licensed personnel in good standing with their respective trades and licensing authorities to perform engineering, design, architectural and other professional services in the performance of the Work. All such professional services shall be performed with the degree of care, safety, skill and responsibility customary among such licensed personnel. All Labor shall have received formal documented training, to the extent required by Applicable Standards, in their area of expertise and, if applicable, certification.

3.11.3 *Identification.* Contractor shall identify each member of its and its Subcontractor's and Vendor's Labor in accordance with the standards and procedures that are mutually acceptable to the Parties.

3.11.4 *Supply of Services for Labor.* Contractor shall provide and maintain at the Job Site, in accordance with Applicable Laws and Applicable Permits, such accommodations, services and amenities as necessary for all Labor employed for the purpose of or in connection with the Contract Documents, including all water supply (both for drinking and other purposes), electricity supply, sanitation, safety, security, fire prevention and fire-fighting equipment, refuse disposal systems and other requirements in connection with such accommodations or amenities.

3.11.5 *Alcohol and Drugs.* Contractor shall not possess, consume, import, sell, give, barter or otherwise dispose of any alcoholic beverages or drugs (excluding drugs for proper medical purposes and then only in accordance with Applicable Law) at the Job Site, or permit or suffer any such possession, consumption, importation, sale, gift, barter or disposal by its Subcontractors, agents or Labor and shall at all times assure that the Job Site is kept free of all such substances. Contractor shall immediately identify and remove from its or its Subcontractors' employment at the Job Site any person (whether in the charge of Contractor or any Subcontractor) who is in possession of or under the influence of any dangerous or controlled drug, alcohol or other such substance at any time during such person's performance of any portion of the Work, excluding any person using a prescription drug under supervision and approval from a medical doctor, or any other person who does or whose actions may create any unsafe condition or other situation that may cause damage or harm to any person or property.

3.11.6 *Arms and Ammunition.* Except as required for Job Site security, Contractor shall not possess, give, barter or otherwise dispose of, to any person or persons, any arms or ammunition of any kind at the Job Site, or permit or suffer the same as aforesaid and shall at all times assure that the Job Site is kept free from arms and ammunition.

3.11.7 *Disorderly Conduct.* Contractor shall be responsible for the conduct and deeds of its Labor and its Subcontractors' Labor relating to the Contract Documents and the consequences thereof. Contractor shall at all times take all reasonable precautions to prevent any unlawful, riotous or disorderly conduct by or among such Labor and for the preservation of peace, protection and safety of Persons and property in the area of the Job Site against the same. Contractor shall not interfere with any members of any authorized police, military or security force in the execution of their duties.

3.11.8 *General Management of Employees.* Subject to FPL's rights as set forth in Section 3.11.11, Replacement at FPL's Request, Contractor shall preserve its rights to exercise and shall exercise its management rights in

ECRC-08-3244 HEARING EXHIBIT - 00000274

performing the Work. Such management rights shall include the rights to hire, discharge, promote and transfer employees; to select and remove foremen or other persons at other levels of supervision; to establish and enforce reasonable standards of production; to introduce, to the extent feasible, labor saving equipment and materials; to determine the number of craftsmen necessary to perform a task, job or project; and to establish, maintain and enforce rules and regulations conducive to efficient and productive operations.

3.11.9 *Labor Disputes*. Contractor shall use reasonable efforts to minimize the risk of labor-related delays or disruption of the progress of the Work. Contractor shall promptly take any and all reasonable steps that may be available in connection with the resolution of violations of collective bargaining agreements or labor jurisdictional disputes, including the filing of appropriate processes with any court or administrative agency having jurisdiction to settle, enjoin or award damages resulting from violations of collective bargaining agreements or labor jurisdictional disputes. Contractor shall advise FPL promptly, in writing, of any actual or threatened labor dispute of which Contractor has knowledge that might materially affect the performance of the Work by Contractor or by any of its Subcontractors or Vendors. Notwithstanding the foregoing, the settlement of strikes, walkouts, lockouts or other labor disputes shall be at the discretion of the Party having the difficulty, except as expressly provided for in Section 14.1, Definition of Force Majeure Event.

3.11.10 *Personnel Documents*. Contractor shall ensure that all its personnel and personnel of any Subcontractors or Vendors performing the Work are, and at all times shall be, in possession of all such documents (including, without limitation, visas, driver's licenses and work permits) as may be required by any and all Applicable Laws.

3.11.11 *Replacement at FPL's Request*. Within one (1) day after request by FPL, Contractor shall remove from the Job Site and performance of the Work, and shall cause any Subcontractor or Vendor to remove from the Job Site and performance of the Work, any Person performing the Work whom FPL determines, in its sole discretion, to be creating a safety hazard or a material risk of either: (i) non-achievement of Mechanical Completion or Provisional Acceptance; or (ii) material non-performance by Contractor in accordance with this Agreement. In addition, Contractor shall include in each subcontract a provision that requires each Subcontractor and Vendor to remove any employee or independent contractor of such Subcontractor or Vendor used in the Work or in such Subcontractor's and Vendor's warranty obligations within one (1) day after receiving notice from FPL to remove such employee or independent contractor.

3.12 PROJECT MANAGEMENT AND CONTRACTOR'S REPRESENTATIVE.

3.12.1 *Project Management*. Contractor has designated a management team as set forth on Appendix O, Project Management Team, and any future members of the management team must be approved by FPL in writing prior to his/her designation, which approval shall not be unreasonably withheld. During the performance of the Work from the Initial Site Mobilization and thereafter, Contractor shall maintain continuously at the Job Site adequate management, supervisory, administrative, security and technical personnel, including the Contractor Site Manager, to ensure expeditious and competent handling of all matters related to the Work, according to its determination of the staffing required for this purpose. Contractor will not re-assign, remove or replace the Contractor Project Manager, Contractor Project Engineering Manager or Contractor Site Manager without FPL's prior written consent, which consent shall not be unreasonably withheld. Contractor shall promptly replace its Contractor Project Manager, Contractor Project Engineering Manager or Contractor Site Manager, upon written request of FPL, if such individual is disorderly or if in FPL's opinion, such individual is otherwise incompetent for his position and responsibilities.

3.12.2 *Contractor's Representative*. Contractor shall appoint one individual (the "Contractor's Representative"), with the prior written consent of FPL, which shall not be unreasonably withheld, who shall be authorized to act on behalf of Contractor and with whom FPL may consult at all reasonable times, and whose instructions, requests and decisions in writing will be binding upon Contractor. Contractor shall not remove or replace such representative without prior written notice to FPL.

ECRC-08-3245 HEARING EXHIBIT - 00000275

3.13 TEMPORARY OFFICE QUARTERS.

3.13.1 During the performance of the Work from the Initial Site Mobilization and thereafter, Contractor shall maintain, at a reasonable location designated by FPL, a suitable office at the Property Site at or near the site of the Work which shall be the headquarters of Contractor's Representative designated pursuant to Section 3.12, Project Management and Contractor's Representative, above.

3.13.2 Contractor shall provide FPL's representatives with office space, including all utilities, heating, ventilation and air conditioning, contemporaneously with the existence of Contractor's site office specified in paragraph (a) above, which office space shall be subject to the approval of FPL and be in compliance with the requirements therefore in Appendix A, SCOPE OF WORK. Contractor shall properly maintain such offices and shall employ sufficient personnel to clean such office each working day that such offices are used. Contractor shall be responsible for paying all utility deposits and charges, other than long distance telephone charges related to calls made by FPL and its representatives, related to such offices for FPL.

3.14 COOPERATION WITH OTHER CONTRACTORS/COMMUNITY.

3.14.1 Contractor acknowledges that work may be performed by others at the Job Site during the execution of Work under this Agreement. Contractor further acknowledges that FPL, through itself or through its employees, subcontractors or agents, will continue to work and perform activities in connection therewith at and around the Job Site during the execution of the Work under this Agreement. Contractor shall cooperate and cause its Subcontractors and Vendors to cooperate with FPL and other unrelated contractors who may be working at or near the Job Site in order to assure that neither Contractor, nor any of its Subcontractors or Vendors unreasonably hinders or increases, or makes more difficult than necessary the work being done by FPL and other unrelated contractors. Contractor agrees to perform the Work in full cooperation with such others and to permit, without charge, reasonable access to, and use of, the Job Site and the Work, by said others or by FPL, whether such Work is partially or entirely complete, when, in the judgment of FPL, such access or use is necessary for the performance and completion of the work of others. All material and labor shall be furnished, and the Work performed, at such time or times as shall be for the best interest of all contractors concerned, to the end that all Work, and the work of any separate contractor, will be properly coordinated and completed in accordance with the applicable schedules and the times of completion required by the Contract Documents.

3.14.2 In addition to complying with all Applicable Laws and Applicable Permits, Contractor shall use reasonable efforts, and cause its Subcontractors and Vendors to use their reasonable efforts, to assist FPL in creating, assessing and carrying out programs which shall, during all phases of the Work, minimize the impacts upon the host community caused by the construction of the Project. Such programs shall include: (i) sequencing of the Work so as to minimize the impacts of noise and dust at and around the Job Site; and (ii) using local labor and other resources whenever possible and cost effective.

3.15 PROTECTION AND SAFETY.

3.15.1 Prior to the Provisional Acceptance Date, Contractor shall be responsible for the security, protection and safety of all Persons (including members of the public and the employees, agents, contractors, consultants and representatives of FPL, the Financing Parties, Contractor and its Subcontractors and Vendors, and other contractors and subcontractors) and all public and private property (including structures, sewers and service facilities above and below ground, along, beneath, above, across or near the Job Site) that are at or near the Job Site or that are in any manner affected by the performance of the Work. As of the Provisional Acceptance Date, FPL shall have operational control over the Project. Notwithstanding the foregoing, Contractor shall remain responsible for the security, protection and safety of all Persons performing any portion of the Work at the direction of Contractor as well as any damage to property caused directly or indirectly by Contractor's negligent acts or omissions and/or failure to comply with the provisions of the Contract Documents while on the Job Site.

3.15.2 Contractor shall initiate and maintain reasonable safety precautions and accident prevention programs for the Job Site and in the performance of the Work, which shall be in compliance with all Applicable Laws and Applicable Permits, to prevent injury to persons or damage to property on, about or adjacent to the Job

ECRC-08-3246 HEARING EXHIBIT - 00000276

Site and in the performance of the Work. Without limiting the generality of the foregoing, Contractor shall furnish and maintain all necessary safety equipment such as barriers, signs, warning lights and guards as required to provide adequate protection to persons and property. In addition, Contractor shall give reasonable notice to owners of public and private property and utilities when such property is susceptible to injury or damage through the performance of the Work and shall make all necessary arrangements with such owners relative to the removal and replacement of protection of such property or utilities.

3.15.3 Contractor shall provide FPL with notice of Close Calls and Mishaps (as such terms are defined in the Lease) sufficient for FPL to comply with the requirements of Section 14.2 of the Lease. To the extent that Contractor is not required to provide FPL with notice pursuant to the first sentence of this Section 3.15.3, Contractor shall provide FPL, within five (5) Days following its occurrence, with written:

(a) Notification of all Occupational Safety and Health Act recordable events;

(b) Notifications and copies of all citations by Government Authorities concerning accidents or safety violations at the Job Site;

(c) Reports of near misses at the Job Site; and

(d) Copies of written accident reports for lost time accidents.

Contractor shall promptly deliver to FPL any written communication with any Government Authority or insurance company (including any notices) with respect to accidents that occur at the Job Site.

3.16 ENVIRONMENTAL MATTERS.

3.16.1 *Hazardous Material.* Contractor shall, and shall cause its Subcontractors and Vendors to, comply with all Applicable Laws relating to Hazardous Material and all Applicable Permits. Without limiting the generality of the foregoing:

(a) Contractor shall, and shall cause its Subcontractors and Vendors to, apply for, obtain, maintain and renew all Contractor Permits, and comply with all Applicable Permits, in any case, as required by Applicable Laws regarding Hazardous Material that are necessary, customary or advisable for the performance of the Work. Contractor shall, and shall cause its Subcontractors and Vendors to, have an independent Environmental Protection Agency identification number for disposal of Hazardous Material under the Contract Documents if and as required under Applicable Laws or Applicable Permits.

(b) Contractor shall conduct its activities under the Contract Documents, and shall cause each of its Subcontractors to conduct its activities, in a manner designed to prevent pollution of the environment or any other release of any Hazardous Material by Contractor and its Subcontractors and Vendors in a manner or at a level requiring remediation pursuant to any Applicable Law.

(c) Contractor shall not cause or allow the release or disposal of Hazardous Material at the Job Site, bring Hazardous Material to the Job Site, or transport Hazardous Material from the Job Site, except in accordance with Applicable Law and Applicable Permits. Contractor shall be responsible for the management of and proper disposal of all Hazardous Material brought onto or generated at the Job Site by it or its Subcontractors or Vendors, if any. Contractor shall cause all such Hazardous Material brought onto or generated at the Job Site by it or its Subcontractors or Vendors, if any, to be:

(i) Transported only by carriers maintaining valid permits and operating in compliance with such permits and laws regarding Hazardous Material pursuant to manifest and shipping documents identifying only Contractor as the generator of waste or person who arranged for waste disposal; and

(ii) Treated and disposed of only at treatment, storage and disposal facilities maintaining valid permits operating in compliance with such permits and laws regarding Hazardous

ECRC-08-3247 HEARING EXHIBIT - 00000277

Material, from which, to the best of Contractor's knowledge, there has been and will be no release of Hazardous Material.

(iii) Contractor shall submit to FPL a list of all Hazardous Material to be brought onto or generated at the Job Site prior to bringing or generating such Hazardous Material onto or at the Job Site. Contractor shall keep FPL informed as to the status of all Hazardous Material on the Job Site and disposal of all Hazardous Material from the Job Site.

(d) If Contractor or any of its Subcontractors or Vendors releases any Hazardous Material on, at, or from the Job Site, or becomes aware of any Person who has stored, released or disposed of Hazardous Material on, at, or from the Job Site during the Work, Contractor shall immediately notify FPL in writing. If Contractor's Work involved the area where such release occurred, Contractor shall immediately stop any Work affecting the area. Contractor shall, at its sole cost and expense, diligently proceed to take all necessary or desirable remedial action to clean up fully the contamination caused by any:

(i) Release by Contractor or any of its Subcontractors or Vendors of any Pre-Existing Hazardous Material; and

(ii) Hazardous Material that was brought onto or generated at the Job Site by Contractor or any of its Subcontractors or Vendors, whether on or off the Job Site.

(e) If Contractor discovers any Pre-Existing Hazardous Material that has been stored, released or disposed of at the Property Site, Contractor shall immediately notify FPL in writing. If Contractor's Work involves the area where such a discovery was made, Contractor shall immediately stop any Work affecting the area and FPL shall determine a reasonable course of action. Contractor shall not, and shall cause its Subcontractors and Vendors to not, take any action that may exacerbate any such contamination.

(f) Contractor shall be solely responsible for remedial action to clean up fully the contamination referenced in Section 3.16.1(d). If so requested by FPL, Contractor shall cooperate with and assist FPL in making the Job Site available for taking necessary remedial steps to clean up any such contamination at FPL's expense as determined in accordance with Section 6.3, CHANGES TO CONTRACT PRICE; DISPUTES, of Article VI, CHANGE ORDERS. Contractor shall promptly deliver to FPL any notice or violation, letter of non-compliance or similar communication from any Government Authority.

3.16.2 *Waste Treatment and Disposal.* Without limiting the foregoing:

(a) *Toxic Waste and Industrial Hazards:* Contractor shall be responsible for the proper management and disposal of all toxic waste and industrial hazards brought onto or generated at the Job Site by it or its Subcontractors or Vendors, if any. Contractor shall, and shall cause its Subcontractors and Vendors to, comply with all Applicable Laws, Applicable Permits and applicable safety standards related to the treatment, storage, disposal, transportation and handling of toxic wastes and industrial hazards. Contractor shall not store or dispose of toxic wastes and industrial hazards near groundwater, surface water or drainage systems. Liquid wastes shall not be dumped onto the ground or in any groundwater, surface water or drainage systems. All waste oil and grease resulting from construction activities shall be collected and disposed of in a manner that prevents contamination to soil, ground water, and surface water, and incinerated if possible. Vehicle maintenance shall be conducted in safe areas away from watercourses and oil or fluid runoff shall be collected in grease traps. Toxic waste and industrial hazard storage containers shall be well-labeled.

(b) *Sanitary and Solid Waste:* Contractor shall take appropriate measures in accordance with the Applicable Law and Applicable Permits for the treatment and disposal of sanitary and solid waste, and in particular, Contractor shall perform the Work in such a manner so as to protect environmentally sensitive areas and water supplies. Run-off from disposal sites shall be curtailed.

ECRC-08-3248 HEARING EXHIBIT - 00000278

3.16.3 *Fuel Storage*. The location, facilities, safety measures and environmental and pollution control in connection with storage of fuel or like substances shall comply with all Applicable Laws and Applicable Permits.

3.16.4 *Protected Areas*. Contractor acknowledges that portions of the Property Site may be wetlands or other protected areas ("Protected Areas") as indicated on the survey to be provided by FPL pursuant to Section 4.7, DESCRIPTION OF PROPERTY SITE, of Article IV, CERTAIN OBLIGATIONS OF FPL. Certain of these Protected Areas, if designated on such survey, do not constitute a part of the Job Site. Contractor shall erect a temporary barrier or other blockade to isolate Protected Areas and protect such areas from impact by any Work. Contractor shall not allow any Work to be conducted in or otherwise interfere with or impact such Protected Areas. Contractor shall, and shall cause its Subcontractors and Vendors to, comply with the Environmental Resource Plan and all permits, rules, regulations and all other Applicable Laws and Applicable Permits in connection with the Protected Areas on or adjacent to the Property Site.

3.17 FIRE PREVENTION.

3.17.1 Contractor shall be responsible for providing adequate fire prevention and protection at the Job Site and shall take all reasonable precautions to minimize the risk of fire at the Job Site. Contractor shall provide instruction to the Labor in fire prevention control and shall provide appropriate fire-fighting and fire protection equipment and systems at the Job Site.

3.17.2 Contractor shall promptly collect and remove combustible debris and waste material from the Job Site in accordance with Applicable Laws and Applicable Permits, and shall not permit such debris and material to accumulate. Contractor shall control the usage of fires for any purpose in the vicinity of the Work and shall agree upon the appropriateness of any such fires with FPL. Any areas of vegetation damaged by fire which are reasonably determined by FPL to have been initiated by Contractor's or Subcontractors' Labor shall be recultivated and otherwise rehabilitated by Contractor, at Contractor's expense.

3.17.3 Contractor will complete all systems, procedures and Equipment constituting the Plant fire protection system as necessary during construction to protect Work in progress, in particular with regard to fuel and other flammable materials.

3.18 RELIGIOUS AND ARCHAEOLOGICAL RESOURCES

In the event any archaeological or religious sites, places, monuments or areas are discovered or identified by Contractor during the performance of Work under the Contract Documents, Contractor shall leave such sites untouched and protected by fencing and shall immediately stop any Work affecting the area. Contractor shall notify FPL of any such discovery as soon as practicable, and Contractor shall carry out FPL's instructions for dealing with the same. All fossils, coins, articles of value or antiquity and structures and other remains or things of geological, archaeological, historical, religious, cultural or similar interest discovered on the Job Site shall, as between FPL and Contractor, be deemed to be the absolute property of FPL. Contractor shall prevent its and its Subcontractors' and Vendors' Labor and any other Persons from removing or damaging any such article or thing.

3.19 REPORTS, PLANS AND MANUALS.

3.19.1 *Status Reports*. Within ten (10) days after the beginning of each month, commencing with the month following the date of this Agreement, Contractor shall prepare and submit to FPL written progress reports, in accordance with the requirements of Appendix B, Project Schedule and Reporting Requirements, which include a description of the progress and status of the Work compared to the Project Schedule, the status of Equipment and other scheduled deliveries, the Subcontractors' activities and engineering, procurement and construction progress. In addition, each such progress report will provide cost information regarding backcharges and a summary of any Changes executed by the Parties as of the date of such report. A reasonable number of photographs shall also be included reasonably documenting the construction progress. Each photograph shall show the date, Contractor's name and description of the view taken. In accordance with Section 5.3, PROJECT SCHEDULE, of Article V, PROJECT SCHEDULE, Contractor shall also report any events which may affect the Project Schedule, including any Force Majeure Events, liens on the Property Site or the Project, or any asserted violations of Applicable Laws.

ECRC-08-3249 HEARING EXHIBIT - 00000279

3.19.2 *Reporting of Accidents*. Contractor shall report in writing to FPL (and, to the extent required by any Applicable Law or Applicable Permit, the appropriate Government Authority) details of any significant safety event or accident required to be reported under U.S. Department of Labor Occupational Safety & Health Administration standards that is on or about the Job Site as soon as possible after its occurrence, but in any event not later than forty-eight (48) hours after such accident occurs. In the case of any fatality or serious injury or accident, Contractor shall, in addition, notify FPL (and, to the extent required by any Applicable Law or Applicable Permit, the appropriate Government Authority) immediately.

3.19.3 *Procedures Manual*. No later than forty-five (45) days following the date hereof, Contractor shall prepare and submit to FPL a procedures manual that describes the administrative procedures to be used by Contractor and FPL for interfacing during the performance of the Work (the "Procedures Manual"). Contractor shall either promptly make changes to the Procedures Manual suggested by FPL or negotiate and resolve in good faith with FPL such changes. Upon approval of the Procedures Manual by the Parties, the Parties shall comply with the provisions thereof. The Procedures Manual may be changed from time to time with the approval of the Parties. Contractor shall provide six (6) copies, as well as an electronic copy, of the Procedures Manual to FPL.

3.19.4 *Health Plan, Safety Plan and Environmental Plan*. No later than thirty (30) days prior to Initial Site Mobilization, Contractor shall prepare and submit to FPL:

(a) A health plan that includes health, first aid facility/area with qualified attendant and emergency procedures to be used at the Job Site (the "Health Plan");

(b) An environmental plan (the "Environmental Plan" as more particularly described in Appendix A, Scope of Work) that includes:

(i) A Hazardous Material, waste and industrial hazards management and disposal program which details the controlled usage and treatment of all Hazardous Material, toxic wastes, industrial hazards, sanitary waste, solid waste and other waste brought onto, used or produced at the Job Site or in relation to the Work and outlines a management structure for carrying out the specific provisions of such program;

(ii) An environmental protection and management program, including, without limitation, a sediment and erosion control program

(iii) A revegetation program, with a Change Order related thereto; and

(iv) The description, location and drawings of construction facilities and temporary works; and

(c) A safety plan substantially in the form of Appendix Z, Form of Safety Plan, which shall include an acknowledgement by Contractor that Contractor shall at all times remain in compliance with all federal, state and local safety codes (the "Safety Plan").

Each of the Health Plan, Environmental Plan and Safety Plan shall be consistent with all Applicable Laws and Applicable Permits and shall be submitted to FPL for review and comment. Contractor shall either promptly make changes to such Health Plan, Environmental Plan or Safety Plan incorporating the comments of FPL or negotiate and resolve in good faith with FPL any such changes. Contractor shall comply and ensure that its Subcontractors comply with the Health Plan, Environmental Plan, Safety Plan, the Safe and Secure Workplace Policy, the Project Loss Manual and the Environmental Control Program.

3.19.5 *Meetings*. During the performance of the Scope of Work, Contractor and FPL shall, at a minimum, conduct meetings each month at a mutually convenient time and date for the purpose of reviewing the progress of the Scope of Work, the latest progress reports, the Health Plan, the Environmental Plan, the Safety Plan, Quality Assurance Program, Contractor's and Subcontractors' adherence to the Scope of Work and the Project Schedule as well as the status of any claims on the Project and claims submitted pursuant to the terms of the Contract Documents. Contractor shall prepare detailed minutes of each such meeting, in form and content acceptable to FPL, and shall distribute same to FPL within five (5) days after such meeting.

ECRC-08-3250 HEARING EXHIBIT - 00000280

3.19.6 *Contractor Not Relieved of Duties or Responsibilities.* Neither the submission to or approval by FPL of progress and other reports, plans and manuals, nor the provision of general descriptions shall relieve Contractor of any of its duties or responsibilities under the Contract Documents.

3.19.7 *Quality Assurance Program.*

(a) Contractor shall use effective quality assurance programs (collectively, the "Quality Assurance Program"), which such programs:

(i) Propose the manner in which Contractor intends to achieve the highest standards in the performance of the entire Scope of Work;

(ii) Shall be acceptable to FPL; and

(iii) Shall be consistent with the requirements of Appendix Y, Form of Quality Assurance Programs, and Appendix A, Scope of Work, in performing the Work.

(b) Within thirty (30) days after the date of this Agreement, Contractor shall provide to FPL a description of the Quality Assurance Program, which shall be substantially in the form of Appendix Y, Form of Quality Assurance Programs, (the "Quality Control Manual"), to be used by Contractor in the performance of the Work. The Quality Control Manual shall also include all proposed types of Critical Parameters that Contractor shall define as the Scope of Work progresses. "Critical Parameters" are defined as construction critical dimensions, commissioning critical set-points, critical alignments and process critical set-ups for Equipment, sub-systems, systems and the Plant, as mutually agreed to by the Parties.

(c) As soon as the Critical Parameters have been finalized, Contractor shall include the same in the Project Schedule. Contractor shall provide FPL with tentative dates for the performance of Critical Parameters, which dates shall be updated monthly, and shall also provide FPL with twenty-four (24) hour written notice prior to performance of any Critical Parameters. FPL will review and provide comments to such programs in writing within thirty (30) days after submission by Contractor.

(d) If FPL's comments are reasonable changes to the quality assurance programs submitted by Contractor, Contractor will effect such changes at no additional cost to FPL and resubmit such programs to FPL within ten (10) days after Contractor receives FPL's comments. FPL will have ten (10) days after such resubmission to review and provide comments to such programs resubmitted by Contractor. Such procedure shall continue with the same ten (10) day time periods until FPL accepts such programs. If FPL fails to respond within any of the applicable periods specified above, FPL shall be deemed to have agreed to the last such programs submitted by Contractor. If applicable, Contractor shall also submit verification of ISO 9001 qualification.

(e) Contractor's program shall address how improvement actions will be applied on the Project's processes, products and services. Contractor shall also have in place a formal system of collecting, reviewing and evaluating corrective and preventive actions from a lessons learned process that will ensure desirable changes regarding engineering, procurement, construction, start-up, turnover or operation feedback from recently completed (or in process projects) are incorporated.

(f) A post award (pre-production) meeting shall be held at Contractor's facility to demonstrate Contractor's understanding of the quality and quality assurance requirements, and present their methods of complying with these requirements.

3.20 DRAWINGS, ENGINEERING DATA AND OTHER MATERIALS.

3.20.1 All Drawings, Final Plans, reports and other information (except financial, accounting and payroll records) furnished to Contractor, or prepared by it, its Subcontractors or others in connection with the performance of the Work, whenever provided, shall be kept by Contractor in an orderly and catalogued fashion for reference by FPL during the performance by Contractor of the Work. Contractor shall maintain at the

HEARING EXHIBIT - 00000281
FCRC-08-3251

Property Site at least one (1) copy of all Drawings, Final Plans, Change Orders and other modifications in good order and marked to record all changes made during performance of the Work, including, without limitation, all field deviations from the construction drawings. As a condition precedent to Final Acceptance, or upon the earlier termination of this Agreement, Contractor shall transfer the Final Plans to FPL and they shall become the sole property of FPL.

3.20.2 Final Plans (in both hard copy and magnetic media at no extra charge to FPL), if not furnished earlier, shall be furnished to FPL upon Contractor's request for a Final Acceptance Certificate or upon the earlier termination of this Agreement. Contractor and any of its Subcontractors, as applicable, may retain copies all such documents for their records, subject to the confidentiality provisions of this Agreement.

3.20.3 No later than March 1, 2009, Contractor shall furnish FPL (in electronic format whenever available) with conceptual engineering drawings and the specifications pertaining to the electric generators and step-up transformers of the Plant, including demonstrations that the:

(a) Requirements for reactive supply facilities at the Plant will be met; and

(b) Plant will meet the guidelines and performance standards set forth in the Contract Documents and the Operating Guidelines.

3.20.4 Contractor shall submit all Drawings in electronic format to FPL in accordance with Appendix A, Scope of Work, for review and comment as provided in the Scope of Work. Based upon FPL's comments, if any, Contractor shall resolve FPL's comments. Contractor shall revise such Drawings from time to time, as required to reflect any changes, in the actual installation of any individual Equipment or system or the Plant as a whole. Notwithstanding anything contained herein to the contrary, FPL's review and/or acceptance of the Drawings, or any portion thereof, shall not in any way relieve Contractor of any of its obligations or warranties set forth herein, including, but not limited to, its full responsibility for the accuracy of the dimensions, details, integrity and quality of the Drawings.

3.21 OPERATING AND MAINTENANCE MANUALS

Contractor shall supply FPL with manuals and/or handbooks (in electronic format) which provide, either in a single manual or handbook or collectively, complete operating and maintenance instructions (including inventories of spare parts and tools and parts lists with ordering instructions) for each major piece of Equipment and system of the Plant. Each such manual and handbook shall comply with the requirements of the Scope of Work and the guidelines contained in Appendix L, including with respect to matters such as quantity, content and the time when such manuals are to be supplied to FPL, and shall be substantially complete and delivered to FPL prior to Mechanical Completion in order to support training of personnel and start-up and testing of the Plant.

3.22 TRAINING OF O&M PERSONNEL.

3.22.1 During the construction of the Plant, and at least ninety (90) days prior to the Provisional Acceptance Date, Contractor shall provide, at its own expense, a training program in Plant operation and maintenance for FPL's Plant personnel and the O&M Contractor's Plant personnel (collectively, "O&M Personnel"). The training program provided by Contractor shall be subject to FPL's prior written approval and shall:

(a) Include classroom and field training;

(b) Include all manuals, drawings, and other educational materials necessary or desirable for the adequate training of O&M Personnel; and

(c) Establish quality controls so that O&M Personnel are suitably trained and capable of operating and maintaining the Plant after Provisional Acceptance.

Representatives of manufacturers of Equipment shall be utilized to provide specialized training for such Equipment where deemed necessary by the Parties. All training programs conducted in accordance with this Section 3.22, shall be videotaped and made available to FPL in electronic format.

ECRC-08-3252 HEARING EXHIBIT - 00000282

3.22.2 Contractor shall make every reasonable effort to use the O&M Personnel during Plant start-up and initial operation; however, neither FPL nor O&M Contractor shall be obligated to:

(a) Supply personnel for the construction of the Plant; nor

(b) Provide during Plant start-up and initial operation more O&M Personnel than the number of O&M Personnel FPL and O&M Contractor would use during normal Plant operation as determined by FPL. Contractor shall have complete responsibility for directing, coordinating, monitoring and supervising O&M Personnel during Plant start-up and initial Plant operations.

3.22.3 In addition, Contractor shall:

(a) Remain solely responsible for performing the Work in accordance with this Agreement, including Contractor's obligation to achieve Mechanical Completion, achieve Provisional Acceptance by the Guaranteed Provisional Acceptance Date and achieve Final Acceptance, regardless of any act, omission, failure, non-achievement, or non-performance of the O&M Personnel;

(b) Remain fully responsible for all acts and omissions of the O&M Personnel in connection with the commissioning and operation of the Plant until the Provisional Acceptance Date as fully as if Contractor had independently engaged such O&M Personnel; and

(c) Be responsible for all acts and omissions of the O&M Personnel after the Provisional Acceptance Date if such acts or omissions are taken at the direction of Contractor.

3.22.4 The cost of the O&M Personnel's travel, lodging, food and other living expenses shall be borne by FPL. Contractor shall have the right to require FPL to remove O&M Personnel from the Job Site if Contractor reasonably believes that any such O&M Personnel is unable to properly perform its obligations in connection with the commissioning and operation of the Plant and Contractor provides FPL a written explanation of its reasons for exercising the removal rights granted to it hereunder; provided that the failure of such O&M Personnel to perform their obligations or the removal of any O&M Personnel pursuant to this Section 3.22, shall not relieve Contractor of any of its obligations hereunder.

3.23 ACCOUNTING INFORMATION; FINANCIAL REPORTING REQUIREMENTS

3.23.1 During the term of this Agreement and continuing for five (5) years after the Final Acceptance Date, Contractor will provide FPL with any reasonably necessary assistance, including providing all documents, cost information and other information that FPL believes necessary, in a form reasonably acceptable to FPL, for FPL's federal, state or local tax filings, exemptions or positions advocated by FPL, including, without limitation, sales, use and property taxes; provided, however, that such access to cost information not otherwise made available to FPL pursuant to the terms hereof shall be disclosed to an independent auditor of FPL's choice that agrees to keep secret from FPL, Contractor's cost and other competitively sensitive information.

3.23.2 Unless otherwise publicly available, Contractor shall as soon as available, but in any event within sixty (60) days after each of the first three (3) quarters of each calendar year, deliver to FPL a copy of the complete unaudited balance sheet for such quarter for the Contractor Parent Company prepared in accordance with generally accepted accounting principles and certified by the Chief Financial Officer of Contractor Parent Company. Unless otherwise publicly available, Contractor shall as soon as available, but in any event within ninety (90) days after December 31 of each year, deliver to FPL a copy of the complete audited financial statements for such year with an unqualified opinion for the Contractor Parent Company prepared in accordance with generally accepted accounting principles.

3.24 CONTRACTOR TAXES.

3.24.1 Except for FPL Taxes, Contractor shall, as required by applicable law, pay and administer any and all Taxes and duties incurred or payable in connection with the Work, including, without limitation, taxes based on or related to the income, receipts, capital or net worth of Contractor, Contractor's or its Subcontractors' or Vendors' Labor or income, except for FPL Taxes (collectively, "Contractor Taxes"); provided, however, that if Contractor is responsible for payment of FPL Taxes under Applicable Law,

ECRC-08-3253 HEARING EXHIBIT - 00000283

unless otherwise instructed by FPL or FPL is contesting such FPL Taxes, Contractor shall pay such FPL Taxes and any penalties and interest due thereon, and FPL shall reimburse Contractor for such FPL Taxes and any penalties and interest due thereon resulting from instructions provided by FPL upon submission of evidence of payment. Contractor shall promptly provide FPL with reports or other evidence reasonably acceptable to FPL showing the payment of Contractor Taxes by Contractor and any FPL Taxes required to be paid by Contractor pursuant to this Section 3.24. Contractor shall use commercially reasonable efforts to cooperate with FPL to endeavor to minimize any FPL Taxes. Notwithstanding the foregoing, Contractor agrees to purchase for resale to FPL any machinery or equipment in connection with the Work that would be the type of property that would qualify as manufacturing machinery and equipment entitled to the exemption from the Florida sales and use tax provided under Applicable Laws and, at the direction of FPL, Contractor agrees to take such action as may be reasonably required to allow such property, to the extent possible to qualify for any sales or use tax exemption. If required in connection with the purchase of any such property from its Vendors, to the extent permitted by applicable law, Contractor agrees to provide its Vendors a resale certificate or applicable affidavit as approved by the State of Florida reflecting the fact that Contractor is purchasing such property for resale to FPL. Contractor agrees to take any other action reasonably necessary to ensure that the purchase of qualifying machinery with respect to the Work is exempt from sales and use tax under Florida (or other applicable) law. To the extent Contractor is required by Applicable Law to collect sales tax from FPL, Contractor shall collect sales tax from FPL on all materials physically incorporated in the Plant that are not subject to exemption unless FPL has elected to provide Contractor with a direct pay certificate issued to FPL by the State of Florida, in which case, FPL shall pay such sales tax directly to the State of Florida. In the event that an assessment for sales and/or use or excise taxes are levied against Contractor, any Subcontractor or Vendor, Contractor shall promptly notify FPL and furnish to FPL a copy of such assessment. In the event that FPL determines that the assessment should be contested and so notifies Contractor in writing, FPL may, at FPL's sole cost and expense, file such documents as are necessary to contest such assessment. FPL shall exclusively control any contest, assessment or other action regarding any such taxes or assessments, or any penalties or interest in respect thereof. In addition to Contractor's other obligations as set forth herein, Contractor shall cooperate with and assist FPL, at FPL's expense, in any contest or proceeding relating to Taxes payable by FPL hereunder.

3.24.2 Exempt Equipment. Some of the machinery, equipment, parts or other items of tangible personal property to be incorporated into the Plant may be exempt from certain taxes (such exempt items, the "Exempt Equipment"). FPL and Contractor will work together to determine which purchases constitute purchases of Exempt Equipment, and Contractor and FPL will take reasonably necessary actions to ensure that such Exempt Equipment qualifies for applicable tax exemptions.

3.25 CLAIMS AND LIENS FOR LABOR AND MATERIALS

If FPL is paying when due all undisputed amounts in accordance with the Contract Documents, Contractor shall, at Contractor's sole expense, discharge and cause to be released, whether by payment or posting of an appropriate surety bond in accordance with Applicable Law, within ten (10) days after receipt of a written demand from FPL, any Lien in respect to the Plant, the Contract Documents, the Equipment, the Job Site or any fixtures or personal property included in the Work (whether or not any such Lien is valid or enforceable) created by, through or under, or as a result of any act or omission (or alleged act or omission) of, Contractor or any Subcontractor, Vendor or other Person providing labor or materials within the scope of Contractor's Work. Notwithstanding the foregoing provision, as long as FPL, in its sole discretion, determines that the Job Site and the improvements thereon will not be subject to any liability, penalty or forfeiture, upon the written request of Contractor, FPL may permit Contractor to contest the validity, enforceability or applicability of any such Lien, in which event FPL shall provide, at no cost to FPL, such cooperation as Contractor may reasonably request in connection therewith.

3.26 SPARE PARTS AVAILABILITY.

3.26.1 *Start-up Spare Parts*. Prior to Mechanical Completion, Contractor shall obtain all spare parts required for Plant start-up and testing. All spare parts not used during Plant start-up and testing shall become the

ECRC-08-3254 HEARING EXHIBIT - 00000284

property of FPL, it being understood and agreed that additional photovoltaic panels held by Contractor at the Project Site but not incorporated into the Project shall not be deemed to be spare parts.

3.26.2 *Operating Spare Parts*. At least ten (10) days prior to the Provisional Acceptance Date, Contractor shall provide FPL with each manufacturer's recommended spare parts list for the Equipment, which list shall include part numbers, recommended quantities, price, mean times to failure, mean times to repair and a description of lead times necessary for orders of such spare parts, in each case to the extent reasonably available to Contractor. Contractor agrees to:

(a) Obtain from each Major Manufacturer an assignable guaranty that such Major Manufacturer will have available for purchase by FPL for a period of five (5) years after the Provisional Acceptance Date, all spare parts for the Major Equipment supplied by such Major Manufacturer required to keep the Plant in good operating condition, it being understood that some of such parts are not "shelf items" and will have to be manufactured by the Major Manufacturer after it receives an order for them;

(b) Make spare parts (other than spare parts for the Major Equipment) available for purchase by FPL for a period of five (5) years after the Provisional Acceptance Date to the extent that Contractor is able to obtain them from the manufacturer who supplied them for the Plant as originally built;

(c) Find another source that can supply such spare parts if Contractor is unable to obtain such spare parts from such manufacturer; and

(d) Obtain a firm price for such spare parts reasonably acceptable to FPL for a period of five (5) years after the Provisional Acceptance Date.

3.26.3 With regard to the spare parts described in paragraph (b) above, upon written notice from FPL at any time prior to the Provisional Acceptance Date, Contractor shall, at FPL's expense but without mark-up or multiplier, purchase and have delivered to the Job Site as soon as possible permanent plant spares. Contractor will pay for and replace such spares if used during start-up and commissioning of the Plant.

3.27 CONTRACTOR'S OBLIGATION TO NOTIFY

Contractor shall keep FPL advised as to the status of the Equipment and Work and shall promptly inform FPL in writing upon the occurrence of any of the following, any:

3.27.1 Occurrence or event that may be expected to impact the schedule for delivery and/or installation of Equipment;

3.27.2 Technical problem not anticipated at the start of the Work or of significant magnitude that may impact the Plant or any component thereof or the Project Schedule;

3.27.3 Defect; and

3.27.4 Material changes to previously submitted information. FPL shall have the right to verify the information provided by Contractor. In connection therewith, Contractor shall identify those items provided to FPL that would enable FPL to verify such information in an expedient manner.

3.28 CONSTRUCTION UTILITIES

Contractor shall be responsible for the cost, supply and availability of electric power and distribution requirements for the performance of the Work at the Job Site for the construction and up to Provisional Acceptance; provided, however, Contractor shall be responsible for the cost of any such items to the extent required in order to reperform any Tests. Contractor shall provide its own telephone, facsimile, radio and other communication facilities at the Job Site as necessary for the performance of the Work. If FPL determines that any Test performed or to be performed by Contractor will result in financial harm to FPL, Contractor will accommodate FPL's reasonable requests to mitigate or alleviate such harm to FPL. In addition, Contractor shall provide, at its sole cost and expense, all chemicals for commissioning, start-up and testing and its own temporary lighting, water and sewer facilities at the Job Site.

ECRC-08-3255 HEARING EXHIBIT - 00000285

3.29 LINES AND GRADES

Contractor shall provide for the proper laying out of the construction Work, for making measurements and for establishing temporary or permanent reference marks in connection with the construction Work and Plant. Contractor shall ensure that all improvements constructed in connection with the Work are constructed within the boundaries of the Property Site as delineated in Appendix P, Legal Description of Property Site, and do not encroach on any easements, rights of way or other improvements existing on the Property Site as delineated in Appendix P, Legal Description of Property Site. FPL may at its sole discretion and cost, check the reference marks, lines, grades and measurements so established. Contractor shall carefully preserve all monuments, bench marks and reference points. In case of its destruction thereof, Contractor will be responsible for all damages, costs and expenses related to their replacement and for any mistake or loss of time that may result therefrom. Permanent monuments or bench marks which must be removed or disturbed shall be protected until they can be properly referenced for relocation. Contractor shall furnish materials and assistance for the proper replacement of such monuments or bench marks.

3.30 TEMPORARY STRUCTURES

Temporary structures for offices, quarters, storage and other uses for Contractor, its Subcontractors and Vendors and FPL shall be constructed only in locations approved by FPL. Contractor shall erect temporary walls, bulkheads or fences where required to isolate the construction area from adjacent property in order to increase safety and security and to minimize noise, dust and dirt from affecting the property surrounding the Job Site.

3.31 WEATHERPROOF COVERINGS

Contractor shall provide adequate and sufficient weatherproof and flame resistant coverings for outdoor storage at the Job Site. The cover or sheeting shall be tied down to prevent moisture from damaging the Equipment.

3.32 INTELLECTUAL PROPERTY RIGHTS.

3.32.1 Contractor agrees to grant and hereby grants to FPL an irrevocable, permanent, non-exclusive, royalty-free license to utilize all of Contractor's trade secrets, patents, copyrights, trademarks, proprietary rights or information, licenses and other intellectual property rights (collectively, the "Intellectual Property Rights") and the Intellectual Property Rights of third parties (to the extent of Contractor's rights thereto which can be transferred without violation of obligations owed to such third parties), to the extent now existing or developed primarily for the Project, related to the Work, to the extent reasonably necessary for completion, design, construction, installation, operation, maintenance, repair, or replacement of the Project, or Contractor's expansion, modification, or alteration of the Project (or any subsystem or component thereof designed, specified, or constructed by Contractor under this Agreement).

3.32.2 FPL shall have the right to assign the benefit of such license to any Financing Party in connection with granting a security interest in the Project or any portion thereof, to a purchaser in connection with a transfer of the Project, or to any subsequent purchaser or assignee of same. Any such purchaser or assignee shall acquire such license subject to the same terms and restrictions as stated in this Section 3.32.

3.32.3 Contractor shall, prior to directing any Subcontractor to produce any design or engineering work in connection with the Project, obtain a valid written assignment of all applicable Intellectual Property Rights from such Subcontractor in terms identical to those that obligate Contractor to FPL as expressed in this Section 3.32, which Intellectual Property Rights Contractor hereby assigns to FPL.

3.32.4 Should Contractor or any employee or agent of Contractor make any invention or discovery in connection with performing the Work, such invention or discovery shall be deemed to be the sole and exclusive property of Contractor. To the extent FPL has any right or title thereto or interest therein, FPL hereby assigns (and shall cause the assignment of) all such right and title to, and interest in, any such invention or discovery to Contractor. FPL shall, at Contractor's expense and request, cooperate in pursuing and effecting the transfer to Contractor of all of FPL's right and title to and interest in any such invention or discovery, including, without limitation, executing or causing the execution of assignments and applications, and assign with prosecution and enforcement of rights with respect to any such invention or

ECRC-08-3256 HEARING EXHIBIT - 00000286

discovery, including, without limitation, executing patent applications and powers of attorney with respect thereto. Notwithstanding the above, in the event FPL contributes to the joint invention of any invention or discovery in connection with the Project ("FPL Assisted Discoveries"), Contractor hereby grants (and shall grant) to FPL a non-exclusive, royalty-free license to use such FPL Assisted Discoveries for any purpose at any location in the State of Florida.

3.32.5 This Section 3.32, shall survive the expiration or termination of this Agreement.

3.33 EMERGENCIES

In the event of any emergency that endangers or could endanger life or property, Contractor shall take such action as may be reasonable and necessary to prevent, avoid or mitigate injury, damage or loss and shall, as soon as possible, report any such incidents, including Contractor's response and actions with respect thereto, to FPL.

3.34 [INTENTIONALLY DELETED]

3.35 WASTEWATER, POTABLE WATER

Contractor shall supply at its expense all raw, potable and other water at the Job Site as necessary in connection with the installation, start-up and testing of the Plant. Contractor shall dispose of all wastewater in conformance with Applicable Law and Applicable Permits.

3.36 [INTENTIONALLY DELETED]

3.37 START UP PROCESS

Contractor shall perform the Plant start-up in accordance with the process set forth in Appendix A, Scope of Work. Whenever FPL's staffing situation permits, FPL and Contractor shall mutually agree upon and utilize qualified FPL seconded personnel for start-up leadership positions, including the technical start-up manager and key start-up supervision positions; provided, however, Contractor shall remain fully responsible for all acts and omissions of such personnel in connection with the commissioning and operation of the Plant until the Provisional Acceptance Date as if Contractor had independently engaged such personnel, and be responsible for all acts and omissions of such personnel after the Provisional Acceptance Date if such acts or omissions are taken at the direction of Contractor.

3.38 ACCOMMODATIONS REGARDING TESTING

Contractor shall (excluding any action which will affect Contractor's ability to complete the Work within the time required pursuant to this Agreement or increase Contractor's cost to complete the Work) coordinate with FPL the scheduling of any Test, which efforts may include modification of Contractor's planned test program to maximize the value of energy sold. Contractor shall coordinate such Test with the dispatch schedule for the Plant, so as not to interfere with FPL's or its Affiliates' obligations with respect thereto.

3.39 ACCESS; COMPLIANCE WITH LEASE

Contractor shall use only the entrance(s) to the Job Site specified by FPL for ingress and egress of all personnel, equipment, vehicles, and materials. Contractor shall perform the Work consistent and in accordance with FPL's leasehold, license and easement rights in and to the Job Site. Contractor has reviewed the Lease and confirms that the rights granted to FPL therein are sufficient for Contractor to perform its Work hereunder. Contractor shall comply with the terms of the Lease, including but not limited to all restrictions applicable to FPL and/or its contractors respecting permitted use, access, landowner entry, impacts to the Property Site, environmental plans and compliance, insurance, security and accidents, all as more particularly described in the Lease.

3.40 NATURE OF OBLIGATIONS

Except as expressly stated to the contrary herein, the Contract Price includes the cost of completion of all the foregoing obligations. Contractor hereby agrees that it shall be ultimately responsible for the performance of all activities, which may be necessary and desirable for the full performance of the Scope of Work, all in accordance with the Contract Documents.

ECRC-08-3257 HEARING EXHIBIT - 00000287

ARTICLE IV.
CERTAIN OBLIGATIONS OF FPL

4.1 PERMITS

FPL shall, with Contractor's reasonable assistance (to be provided at no cost to FPL), timely obtain and maintain, at its own cost and expense, all FPL Permits. In addition, FPL shall execute such applications as Contractor may reasonably request in connection with obtaining any of the Contractor Permits; provided, that FPL shall provide Contractor with such information and documentation, at no cost to FPL, as Contractor shall reasonably request in order to execute such applications. FPL shall deliver to Contractor evidence that the FPL Permits necessary to begin construction of the Plant have been received by FPL or, if any such required FPL Permit has not actually been issued, that it has been approved for issuance, or in the opinion of FPL, will be approved for issuance.

4.2 INTERCONNECTION FACILITIES

At least thirty (30) days prior to the Provisional Acceptance Date, FPL shall give Contractor reasonable access to the FPL Interconnection Facilities.

4.3 FPL OBLIGATIONS IN SCOPE OF WORK

FPL shall comply with each and every obligation and duty assigned to FPL in the Scope of Work.

4.4 [INTENTIONALLY DELETED]

4.5 ACCESS TO PROPERTY SITE

Subject to the Lease (including but not limited to the restrictions contained in Section 4.2 of the Lease) and Section 3.37, START UP PROCESS, of Article III, CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR, and consistent with the terms of the Applicable Permits and FPL's leasehold, license, and easement rights in and to the Job Site, FPL shall make the Job Site reasonably available to Contractor and its Subcontractors and Vendors and assure reasonable rights of ingress and egress to and from the Job Site for Contractor and its Subcontractors and Vendors for performance of the Work; provided, however, that Contractor shall coordinate with FPL regarding: (i) initial entry onto the Job Site or any part thereof; and (ii) contact with the Persons who own property on or near, or have granted license or easement rights in and to, the Job Site. During the period commencing on the Final Acceptance Date and ending at the expiration of the Warranty Period provided in Section 12.1.4(c), FPL shall make the Job Site reasonably available to Contractor for the sole purpose of monitoring FPL's compliance with operation and maintenance manuals and manufacturers' guidelines applicable to the Equipment in connection with Contractor's satisfaction of its warranty obligations under Article 12, Contractor's Warranties.

4.6 [INTENTIONALLY DELETED]

4.7 DESCRIPTION OF PROPERTY SITE

On or before thirty (30) days after the date of the Agreement, FPL shall deliver to Contractor a boundary survey of the Property Site. Contractor may rely on such boundary survey for the sole purpose of establishing the boundaries of the Property Site.

4.8 NOTICE OF FINANCIAL CLOSING

FPL shall give Contractor prompt written notice of the scheduled and actual date of Financial Closing.

4.9 FPL TAXES

FPL shall pay all real property taxes assessed against the Property Site and any permanent use charges (but excluding charges and taxes for utilities and fuel to be supplied by Contractor as required hereunder, which shall be Contractor's responsibility), and, subject to Section 3.24, CONTRACTOR TAXES, of Article III, CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR FPL, shall be responsible for the payment of, or reimbursement to Contractor of, state or local sales and/or use taxes assessed by the State of Florida (or any city, county or municipality therein) in connection with the purchase of all Equipment,

ECRC-08-3258 HEARING EXHIBIT - 00000288

except for such taxes FPL contests in good faith, in each case including any such taxes resulting from a Change In Law (collectively, "FPL Taxes"). In the event that FPL is required to pay additional Taxes, penalties or interest because Contractor failed to follow written instructions of FPL appropriately or to comply with its obligations under Section 3.24, CONTRACTOR TAXES, of Article III, CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR FPL, Contractor shall be responsible for the cost of such additional Taxes, penalties or interest within thirty (30) days of FPL's request therefor.

4.10 FPL'S COOPERATION

At no additional cost to FPL, FPL shall make reasonable efforts to supply to Contractor, in a timely manner, either directly or indirectly, material information and data that is available to FPL and that is required for the performance of the Work; provided, however, FPL does not warrant the correctness of the information and documentation provided hereunder. Although FPL may provide or may have provided Contractor with copies of certain studies, reports or other information (including oral statements), Contractor acknowledges and agrees that:

4.10.1 All such documents or information have been or will be provided as background information and as an accommodation to Contractor;

4.10.2 FPL makes no representations or warranties with respect to the accuracy of such documents or the information (including oral statements) or opinions therein contained or expressed; and

4.10.3 It is not relying on FPL for any information, data, inferences, conclusions, or other information with respect to the Job Site (other than the boundary survey referred to in Section 4.7, DESCRIPTION OF PROPERTY SITE), including the surface and subsurface conditions of the Job Site and the surrounding areas.

4.11 FPL'S REPRESENTATIVE

No later than the date of this Agreement, FPL shall designate in writing one or more representatives at the Property Site (at least one of whom shall be at the Job Site during normal business hours) who shall act as the point of contact for both Contractor and the Independent Engineer with respect to the prosecution of the Work, administration of the Contract Documents on behalf of FPL, approval of Contractor's submissions hereunder and inspection of the Work, as reasonably necessary for Contractor's performance of the Work; provided that such representative(s) shall not be authorized to execute or make any amendments to, authorize Change Orders in respect of, or provide waivers under, this Agreement. FPL shall provide Contractor with prior written notice in the event that it designates any additional representatives or removes any existing representatives.

4.12 [INTENTIONALLY DELETED]

4.13 OPERATION AND MAINTENANCE

Subject to Contractor's removal rights set forth in Section 3.22, TRAINING OF O&M PERSONNEL, of Article III, CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR, FPL shall, commencing fifteen (15) days prior to the anticipated Provisional Acceptance Date (as determined by FPL based on the circumstances existing at the time of determination), provide O&M Personnel with skills and training appropriate for the operation of a photovoltaic solar power plant reasonably required for training by Contractor as provided in accordance with Section 3.22, TRAINING OF O&M PERSONNEL, of Article III, CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR, and for testing, start-up, operation, commissioning, and maintenance of the Project; provided, however, that Contractor shall remain solely responsible for performing the Work in accordance with this Agreement, including Contractor's obligation to achieve Mechanical Completion and Provisional Acceptance on or before the Guaranteed Provisional Acceptance Date, regardless of any act, omission, failure, non-achievement, negligence or non-performance of such O&M Personnel.

ECRC-08-3259 HEARING EXHIBIT - 00000289

ARTICLE V.
PROJECT SCHEDULE

5.1 [INTENTIONALLY DELETED]

5.2 NOTICE TO PROCEED

5.2.1 *Commencement Date.* Between two to eight (2-8) weeks before Contractor will construct improvements at, or deliver materials to, the Job Site that may be insured pursuant to a Builder's Risk Policy, Contractor shall deliver in writing to FPL a notice setting forth the Commencement Date.

5.2.2 *[Intentionally Deleted]*

5.2.3 *[Intentionally Deleted]*

5.2.4 *Notice to Proceed.* The Business Day after which FPL provides Contractor with the Notice to Proceed shall be the "Notice to Proceed Date"; provided, however, that the Notice to Proceed Date shall not be later than March 1, 2009 (the "Latest Notice to Proceed Date"). On the Notice to Proceed Date, Contractor shall commence and shall thereafter diligently pursue all of the Work assigning to it a priority that should reasonably permit the attainment of Provisional Acceptance on or before the Guaranteed Provisional Acceptance Date. Contractor shall proceed with the performance of the Work in accordance with the Project Schedule.

5.2.5 *Delay in Notice to Proceed.* If a Notice to Proceed has not been issued by the Latest Notice to Proceed Date, and such failure causes an increase in the Contract Price or time required for performance of the Work, then Contractor shall promptly notify FPL thereof in writing and FPL may either (i) issue a Change Order to address such failure in which event the Latest Notice to Proceed Date shall be extended for thirty (30) days and the procedure set forth herein shall be repeated upon the expiration of each additional thirty (30) day period; or (ii) terminate this Agreement pursuant to Section 15.3,and FPL shall only be obligated to pay Contractor an amount equal to any applicable Termination Payment. If this Agreement is terminated pursuant to this Section 5.2.5, then except as set forth in Section 15.3, neither Party shall have any further rights or obligations hereunder (other than such rights and obligations that by the express terms of this Agreement survive the expiration or earlier termination of this Agreement).

5.3 PROJECT SCHEDULE.

5.3.1 Contractor shall perform the Work in compliance with the Project Schedule, including completing the Work required by the Guaranteed Provisional Acceptance Date and the Final Acceptance Date. Contractor hereby covenants and warrants to FPL that in undertaking to complete the Work in accordance with the terms hereof, Contractor has taken into consideration and made reasonable allowances for hindrances and delays incident to such Work not caused by FPL. Contractor shall provide the reports as required herein, and provide any further information required by FPL as FPL, the Financing Parties or the Independent Engineer may reasonably request to verify actual progress and forecast future progress of the Work. Contractor shall promptly notify FPL in writing of any occurrence that Contractor has reason to believe will adversely affect the completion of the Work by the Guaranteed Provisional Acceptance Date or materially adversely affect completion of the Work in accordance with the Project Schedule. Contractor will specify in said notice the corrective action planned by Contractor to overcome the effect of the delay or potential delay.

5.3.2 Without limiting the obligations of Contractor under Section 5.3.1, above, Contractor shall provide, together with its monthly status reports required hereunder, a project schedule and any updates thereto that provide for the orderly, practicable and expeditious completion of the Work in accordance with the requirements of the Contract Documents. The project schedule and any update shall be presented electronically on a monthly basis and in such reasonable detail as FPL and the Independent Engineer may require and shall address all material elements of the Work. Additionally, the updated project schedule shall be made available to FPL monthly, and as otherwise reasonably requested by FPL, in MS Project format on a computer located at the Property Site. Contractor shall consult with FPL in connection with each update provided under this paragraph. Notwithstanding anything contained herein to the contrary, in

ECRC-08-3260 HEARING EXHIBIT - 00000290

the absence of a Change Order, no update to the project schedule shall in any way amend, alter or otherwise change the Project Schedule or the Guaranteed Provisional Acceptance Date.

5.3.3 *Adequate Assurance*. In the event FPL reasonably believes Contractor's completion of any Critical Milestone set forth in Appendix C, Critical Milestones and Milestones, will not be completed by the date required therein, FPL shall notify Contractor in writing, and Contractor shall, within seven (7) days of receipt of FPL's notice, provide to FPL a written plan detailing the activities or sequence of events Contractor will implement to assure completion of the Critical Milestone by the date required in Appendix C, Critical Milestones and Milestones, and Contractor shall promptly implement such activities and sequence of events. In the event Contractor fails to complete any of the Critical Milestones by the date required in Appendix C, Critical Milestones and Milestones, Contractor shall provide to FPL a written recovery plan that will demonstrate achievement of the Critical Milestone at the earliest possible date to minimize delay of the Project Schedule and Contractor shall promptly implement any such recovery plan. Such recovery plan shall include, without limitation, reasonable evidence of increases in Contractor's work force, increases in the number of shifts, overtime operations, additional days of Work per week, and such other evidence (including Critical Path schedule analysis) as necessary for the timely completion of the Work in accordance with the Contract Documents. Approval by FPL and the Independent Engineer of such plan shall not:

(a) Be deemed in any way to have relieved Contractor of its obligations under this Agreement relating to the failure to achieve Mechanical Completion or Provisional Acceptance by the Guaranteed Provisional Acceptance Date;

(b) Be a basis for an increase in the Contract Price; or

(c) Limit the rights of FPL under Section 11.2, SCHEDULE LIQUIDATED DAMAGES, of Article XI, CONTRACTOR GUARANTEES AND LIQUIDATED DAMAGES.

Further, Contractor acknowledges that the implementation of any such recovery plan may result in material additional costs and expenditures for Contractor (including by way of overtime, additional crews and/or additional shifts). Contractor agrees that it shall not be entitled to a Change Order or any other compensation or increase in the Contract Price in connection with the implementation of any such recovery plan.

5.3.4 No later than fifteen (15) days following the date hereof, Contractor shall prepare and submit to FPL for review and comment a preliminary draft of the Critical Path, in form and content acceptable to FPL. Upon receipt of comment from FPL, Contractor shall either promptly make changes to the Critical Path as suggested by FPL or negotiate and resolve in good faith with FPL such changes. Upon approval of the Critical Path by the Parties, Contractor shall comply with the provisions thereof. Contractor shall provide five (5) copies, as well as an electronic copy, of the Critical Path to FPL. Contractor shall not revise or modify the Critical Path, except pursuant to a Scope Change Order mutually agreed by the Parties.

5.3.5 In no event will Contractor's failure to complete one or more Milestones by the date required for such Milestone change, delay or otherwise affect the required completion date for any other Milestone.

5.4 ACCELERATION OF WORK

In addition to the provisions of Sections 5.3.3, above, relating to delays in the Work, in the event of delay, including any event which causes the prosecution of the Work to fail to conform to the Project Schedule, FPL may, by notice to Contractor, direct that the Work be accelerated by means of overtime, additional crews or additional shifts or resequencing of the Work. If:

(a) Such delay arises from any FPL Caused Delay or Force Majeure Event; or

(b) Contractor provides reasonable evidence to FPL that such delay results from a suspension pursuant to Section 15.4, SUSPENSION BY FPL FOR CONVENIENCE, of Article XV, TERMINATION.

then Contractor shall be entitled to reimbursement of increased cost as a result of such acceleration (i.e., premium portion of overtime pay, additional crew, shift or Equipment cost and such other items of incremental cost requested in advance by Contractor and approved by FPL which approval will not be unreasonably withheld) less savings or costs not incurred due to such acceleration, but expressly waives any other compensation therefor. CONTRACTOR SHALL RECEIVE NO SUCH REIMBURSEMENT FOR COSTS ARISING OUT OF, AND CONTRACTOR SHALL BE SOLELY RESPONSIBLE FOR ANY COSTS INCURRED BY CONTRACTOR AS A RESULT OF, ACCELERATION RELATED TO ANY EVENT OTHER THAN THE EVENTS SPECIFICALLY DESCRIBED IN THIS SECTION 5.4, PARAGRAPHS (a) AND (b), ABOVE. Contractor shall cause prosecution of the Work to conform to the Project Schedule within thirty (30) days after receiving written notice from FPL to accelerate the Work.

5.5 LIQUIDATED DAMAGES

Nothing contained in this Article shall relieve Contractor of its obligation to pay Schedule Liquidated Damages in the event that Provisional Acceptance is not achieved by the Guaranteed Provisional Acceptance Date.

ARTICLE VI.
CHANGE ORDERS

6.1 CHANGE ORDER AT FPL'S REQUEST.

6.1.1 FPL may at any time, by written notice to Contractor, request an addition to or deletion from or other changes in the Work or schedule therefor (together with any necessary or requested amendments to this Agreement with respect thereto) (hereinafter "Change" or "Changes") by submitting a Request for Change Order in the form attached hereto as Appendix S, Form of Request for Change Order. Contractor shall review and consider such requested Change and shall make a written response thereto within ten (10) days after receiving such request. If Contractor believes that giving effect to any Change requested by FPL will increase or decrease its cost of performing the Work, shorten or lengthen the time needed for completion of the Work, require modification of its warranties in Article XII, CONTRACTOR'S WARRANTIES, or require a modification of any other provisions of the Contract Documents, its response to the Change request shall set forth such changes (including any amendments to the Contract Documents) that Contractor deems necessary as a result of the requested Change and its justification therefor. If Contractor accepts the Changes requested by FPL (together with any amendments to the Contract Documents specified therein) or if the Parties agree upon a modification of such requested Changes, the Parties shall set forth the agreed upon Change in the Work and agreed upon amendments to the Contract Documents, if any, in a written change order signed by all Parties (a "Change Order"). Each Change Order shall constitute a final settlement of all items covered therein, including any compensation for impact on, or delay or acceleration in, performing the Work. If the Parties do not agree upon all terms of the Change Order, Contractor shall proceed with such Work and the dispute shall be resolved in accordance with Article XVII, DISPUTE RESOLUTION; provided that if the Parties are unable to reach agreement on the cost of a requested Change, Contractor shall perform the requested Change in accordance with Section 6.3, CHANGES TO CONTRACT PRICE, below.

6.1.2 FPL may at any time, by written notice to Contractor, propose Changes in the Work or the Project Schedule due to a Force Majeure Event or an FPL Caused Delay. If there is a material impact that will actually, demonstrably, adversely and materially affect Contractor's ability to complete one or more Critical Milestones by the required date as a result of such Force Majeure Event or an FPL Caused Delay, then the Parties agree to bargain reasonably and in good-faith for the execution of a mutually acceptable Change Order. Force Majeure Events will only entitle Contractor to extensions of the Project Schedule.

6.2 CHANGE ORDERS REQUESTED BY CONTRACTOR.

6.2.1 It is the intent of FPL and Contractor that the Scope of Work attached hereto as Appendix A, Scope of Work, includes all items necessary for the proper execution and completion of the Work. As more particularly described in Section 3.1.3, Contractor's Exclusions, of Article III, CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR work not described in the Scope of Work attached hereto

ECRC-08-3262 HEARING EXHIBIT - 00000292

as Appendix A, Scope of Work, shall not require a Change Order if such work is consistent with and reasonably inferable from the Scope of Work, so that an engineering, procurement and construction contractor of Contractor's experience and expertise should have anticipated that the work would have been required.

6.2.2 Subject to Section 6.2.3, below, Contractor may at any time, by written notice to FPL, request a Change in the Work (together with any necessary or requested amendments to the Contract Documents) and FPL may accept or reject such request in its sole discretion. If Contractor believes that such requested Change will increase or decrease its cost of performing the Work, lengthen or shorten the time needed for completion of the Work, require modification of its warranties in Article XII, CONTRACTOR'S WARRANTIES, or require a modification of any other provisions of the Contract Documents, it shall notify FPL of such, setting forth its justification for and effect of such changes, within ten (10) days after making a request for a Change. If FPL accepts the Changes requested by Contractor (together with amendments to the Contract Documents specified therein, if any), or if the Parties agree upon a modification of such requested Changes, the Parties shall set forth the agreed upon Change in the Work and agreed upon amendments to the Contract Documents, if any, in a written Change Order signed by all Parties. For the avoidance of doubt, the Parties agree that FPL's representative referred to in Section 4.11 shall not have authority to approve Change Orders. The Parties acknowledge and agree that one or more of the documents and agreements, including agreements with Subcontractors, may not be amended orally or through course of conduct. The Parties hereby express their intention that this Agreement will not be modified orally, through course of conduct or otherwise (regardless of whether any other agreements or documents relating to this Project have been so amended or modified).

6.2.3 Contractor may at any time, by written notice to FPL, propose Changes in the Work or the Critical Milestones due to:

(a) A Force Majeure Event, provided that such Force Majeure Event has an impact that will actually, demonstrably, adversely and materially affect Contractor's ability to complete one or more Critical Milestones by the required dates and further provided that Contractor complies with requirements provided in Article XIV, FORCE MAJEURE EVENT AND FPL CAUSED DELAY, and Section 6.2.2, above;

(b) An FPL Caused Delay, provided that such FPL Caused Delay has a demonstrable material cost increase to Contractor and/or schedule impact that will actually, demonstrably, adversely and materially affect Contractor's ability to complete one or more Critical Milestones by the required dates and further provided that Contractor complies with the requirements set forth in Article XIV, FORCE MAJEURE EVENT AND FPL CAUSED DELAY;

(c) A Change In Law, provided that such Change In Law prevents Contractor from performing all or a portion of the Work, has a demonstrable material cost increase to Contractor and/or has a schedule impact that will actually, demonstrably, adversely and materially affect Contractor's ability to complete one or more Critical Milestones by the required dates, and further provided that Contractor shall diligently make adjustments to minimize the effect of such Change In Law on the Project; or

(d) Certain unforeseeable subsurface conditions but only to the extent provided in Section 3.4.4, Differing Condition, of Article III, CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR.

Unless the foregoing conditions are met, Contractor may not request a Change in the Work or Critical Milestones due to a Force Majeure Event, FPL Caused Delay, Change In Law or unforeseeable subsurface conditions.

6.2.4 If FPL agrees that Contractor has met all of the applicable conditions precedent for a requested Change, then the Parties agree to bargain reasonably and in good faith for the execution of a mutually acceptable Change Order. Force Majeure Events will only entitle Contractor to extensions of the Project Schedule. If in such event the Parties are unable to agree on a mutually acceptable Change Order, then the dispute shall

ECRC-08-3263 HEARING EXHIBIT - 00000293

be resolved in accordance with Article XVII, DISPUTE RESOLUTION. Any extension permitted under this Section shall be of an equitable duration designed to reflect the delay actually caused by the relevant event despite Contractor's reasonable efforts to mitigate the same.

6.2.5 Intentionally Deleted.

6.2.6 If Contractor knows of circumstances or events that do or may require a Change in the Work or Project Schedule, and Contractor does not provide written notification to FPL of such within fifteen (15) days after the date Contractor knows or should have known (in the exercise of due diligence) of such circumstances or events, then Contractor shall not have any right to request or require any additional consideration or other changes as to cost, schedule, warranty obligations or other provisions hereof, and Contractor shall have waived any claims or offsets against FPL, with respect to any Change Order or any necessary Change in the Work or Project Schedule arising out of such circumstances or events.

6.3 CHANGES TO CONTRACT PRICE; DISPUTES

A Change Order initiated by either Party may have the effect of either increasing or decreasing the Contract Price. Any Contractor response to a Change Order under Section 6.1, CHANGE ORDER AT FPL'S REQUEST, above, and any Contractor request for Changes under Section 6.2, CHANGE ORDERS REQUESTED BY CONTRACTOR, above, shall be accompanied by a proposed all inclusive final lump sum cost (separating materials and labor) to FPL. In the event that the Parties are unable to reach an agreement on an all-inclusive final lump sum cost to FPL or a not-to-exceed cost as a result of a requested Change, then Contractor agrees to perform the requested Change and the Contract Price shall be adjusted by the amount of such additional cost and expense as is not in dispute pending resolution of the dispute pursuant to Article XVII, DISPUTE RESOLUTION. In addition, in the event that FPL and Contractor are unable to reach agreement on a Change Order for a Change requested by either FPL or Contractor, at the direction of FPL (and only at the direction of FPL), FPL's proposed Changes shall become effective as a Change Order and Contractor shall continue to perform the Work in accordance with such Change Order and the proposed Changes shall be performed by Contractor at its sole cost and expense pending resolution of the dispute pursuant to Article XVII, DISPUTE RESOLUTION.

6.4 INFORMATION REQUESTS

FPL may request that Contractor provide written information (prior to the issuance of a request for Changes) regarding the effect of a contemplated Change on pricing, scheduling, warranty obligations or on other terms of the Contract Documents. The purpose of such a request will be to determine whether or not a Change will be implemented. Contractor shall provide the requested information within fourteen (14) days after the receipt of said request. Contractor will be allowed to reasonably delay its response to such request to the extent that fulfilling such request would significantly delay progress on the Work, unless FPL agrees to extend the required completion date for the affected Milestone. Such an information request is not a Change Order and does not authorize Contractor to commence performance of the contemplated change in Scope of Work.

6.5 MINOR CHANGES

FPL shall have the direct authority to issue clarifications and order minor changes in the Work, effected by written order, which do not involve any adjustment to the Contract Price or the Guaranteed Provisional Acceptance Date and do not require Contractor to incur any additional material cost or expense; provided that such clarifications and changes are consistent with the intent of the Contract Documents. Such clarifications and changes shall be binding on FPL and Contractor. Contractor shall carry out such written orders promptly and Contractor shall receive no additional compensation therefor, nor shall there be any change to the Contract Documents.

ECRC-08-3264 HEARING EXHIBIT - 00000294

7.3 GENERAL PROVISIONS FOR PAYMENTS.

7.3.1 If applicable, any payment by FPL shall be accompanied by a notice to Contractor specifying the amount of each deduction and setting forth the reason(s) why the deduction is justified; provided that FPL's failure to provide any such notice shall not result in a breach hereof or be deemed a waiver of any right to deduct any amount hereunder. NOTWITHSTANDING ANY PROVISION OF THIS AGREEMENT TO THE CONTRARY, FAILURE BY FPL TO PAY ANY AMOUNT DISPUTED IN GOOD FAITH UNTIL RESOLUTION OF SUCH DISPUTE IN ACCORDANCE WITH THIS AGREEMENT SHALL NOT ALLEVIATE, DIMINISH, OR MODIFY IN ANY RESPECT CONTRACTOR'S OBLIGATIONS TO PERFORM HEREUNDER, INCLUDING CONTRACTOR'S OBLIGATION TO MEET THE GUARANTEED PROVISIONAL ACCEPTANCE DATE.

7.3.2 Failure or forbearance on the part of FPL in withholding any amounts due under a Request for Payment or invoice shall not be construed as accepting or acquiescing to any disputed claims. In addition, the making of any payment by FPL shall not constitute an admission by it that the Work covered by such payment (or any Work previously performed) is satisfactory or timely performed, and FPL shall have the same right to challenge the satisfactoriness and timeliness of such Work as if it had not made such payment. If, after any such payment has been made, it is subsequently determined by FPL, acting reasonably, that Contractor was not entitled to all or a portion of any such payment, Contractor shall promptly refund all or a portion of such payment to FPL.

7.3.3 *Protect FPL From Loss*. Notwithstanding any other provision to the contrary contained herein, FPL, in addition to its rights set forth in Section 7.5, LETTERS OF CREDIT, shall have no obligation to make payments to Contractor hereunder and FPL may decide not to certify payment or may nullify the whole or a part of a certification for payment made pursuant to a previous Request for Payment to such extent as may be necessary in FPL's opinion to protect FPL from loss because of:

(a) Defective Work not remedied;

(b) Third party claims filed (including Liens), or reasonable evidence indicating probable filing of such claims;

(c) Failure of Contractor to make payments when due to Subcontractors or Vendors;

(d) Damage to FPL or another contractor, including damage to the property of FPL or any of its Affiliates but only to the extent Contractor may be liable for such damage pursuant to this Agreement;

(e) Contractor's, or any Subcontractor's or Vendor's failure to carry out the Scope of Work in accordance with the Contract Documents;

(f) The occurrence of a Contractor Event of Default;

(g) A good faith determination by FPL that Contractor cannot, with prompt and reasonable acceleration of the Work, achieve Provisional Acceptance before the Guaranteed Provisional Acceptance Date; provided, however, the amount withheld or retained on account of this paragraph, shall not exceed the amount of Schedule Liquidated Damages which would be payable under Section 11.2, SCHEDULE LIQUIDATED DAMAGES, of Article XI, CONTRACTOR GUARANTEES AND LIQUIDATED DAMAGES, on account of the then estimated delay in Provisional Acceptance;

(h) Contractor's failure to deliver a recovery plan acceptable to FPL as set forth in:

(i) Section 5.3.3, Adequate Assurance, of Article V, PROJECT SCHEDULE, or

(ii) the failure of Contractor to cause the prosecution of the Work to conform to any such recovery plan accepted by FPL;

(i) Contractor's failure to deliver any Contractor Deliverable to FPL on or before the date such item is scheduled to be delivered; or

ECRC-08-3266 HEARING EXHIBIT - 00000295

(j) Contractor's failure to remove and replace, or cause any Subcontractor or Vendor to remove and replace, within ten (10) days after receiving notice pursuant to Section 3.11.11, Replacement at FPL's Request, of Article III, CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR, any employee of Contractor or such Subcontractor or Vendor who is employed in the Work or the warranty obligations of Contractor or such Subcontractor or Vendor.

Notwithstanding the provisions of Section 15.7, TERMINATION BY CONTRACTOR DUE TO FPL DEFAULT, of Article XV, TERMINATION, and 17.3, CONTINUING OBLIGATIONS AND RIGHTS, of Article XVII, DISPUTE RESOLUTION, Contractor shall not have any rights of termination or suspension under such Sections as a result of FPL's exercise or attempted exercise of its rights under this Section 7.3. FPL shall release payments withheld pursuant to this Section 7.3.3 within thirty (30) days from the date when Contractor cures all such breaches to the satisfaction of FPL.

7.3.4 Each payment made pursuant to this Article shall be paid directly to Contractor. Such payment shall be wire-transferred to an account or accounts designated by Contractor in its Request for Payment.

7.4 INTENTIONALLY DELETED.

7.5 LETTERS OF CREDIT

No later than March 1, 2009, Contractor shall, at its own expense, cause the LC Issuing Bank to issue and maintain, by renewal or replacement, for the periods specified herein, an irrevocable, unconditional, transferable, standby, revolving letter of credit in favor of FPL meeting the requirements of this Section 7.5, and in form and substance as set forth on Appendix U, Form of Letter of Credit, (the "Letter of Credit") and such Letter of Credit must provide for draws in the United States. The Letter of Credit shall constitute security for Contractor's obligations hereunder. All fees and charges, including, without limitation, issuing, commitment and operation fees and charges, relating to the Letter of Credit shall be borne by Contractor. The Letter of Credit shall comply with and be subject to the following terms and conditions:

7.5.1 Upon issuance, the Letter of Credit shall have a face amount equal to One Million One Hundred and Forty-Five Thousand Six Hundred and 00/100 Dollars ($1,145,600.00). On July 1, 2009, the face amount shall automatically be increased to (or the LC Issuing Bank may issue a replacement Letter of Credit with a face amount equal to) Two Million Eight Hundred and Sixty Four Thousand and 00/100 Dollars ($2,864,000.00); provided, if Contractor elects to cause the LC Issuing Bank to issue a replacement Letter of Credit to FPL, upon receipt of such replacement Letter of Credit by FPL, FPL shall, as promptly as practicable thereafter, mark the replaced Letter of Credit "canceled" and return it to the LC Issuing Bank for cancellation .On the date (the "Initial LC Amount Expiration Date") sixty (60) days after either Contractor satisfies the Energy Yield Test or the Contract Price is reduced, in each case, in accordance with Section 11.4.3,, and thereafter so long as the Letter of Credit is required to be provided hereunder, the face amount shall automatically be reduced to (or the LC Issuing Bank may issue a replacement Letter of Credit with a face amount equal to) One Million Four Hundred and Thirty-Two Thousand and 00/100 Dollars ($1,432,000.00); provided, if Contractor elects to cause the LC Issuing Bank to issue a replacement Letter of Credit to FPL, upon receipt of such replacement Letter of Credit by FPL, FPL shall, as promptly as practicable thereafter, mark the replaced Letter of Credit "canceled" and return it to the LC Issuing Bank for cancellation. Within seven (7) Days of FPL's notice to Contractor of the occurrence of a Credit Trigger Event, either (a) the face amount of the Letter of Credit shall be adjusted in accordance with paragraph 2 of Appendix E – Credit Trigger Event or (b) Contractor shall post additional collateral in a form acceptable to FPL, including cash, which combined with the then-existing Letter of Credit, shall equal the adjusted face amount then-applicable in accordance with paragraph 2 of Appendix E – Credit Trigger Event. Thirty (30) days after the later of (a) the second anniversary of the Final Acceptance Date and (b) the date that Contractor has satisfied all warranty obligations related to breaches of warranty for which Contractor was notified prior to the second anniversary of the Final Acceptance Date (such later date, the "Letter of Credit Expiration Date"), FPL shall return the Letter of Credit to the LC Issuing Bank with instructions for cancellation.

7.5.2 FPL shall have the right to draw upon the Letter of Credit by presenting to the LC Issuing Bank a draw certificate pursuant to the Letter of Credit attached hereto as Appendix U, Form of Letter of Credit. FPL

FCRC-08-3267 HEARING EXHIBIT - 00000296

ARTICLE VIII.
TITLE, RISK OF LOSS AND POSSESSION

8.1 CLEAR TITLE

8.1.1 Contractor warrants and guarantees that legal title to and the ownership of the Work (including, without limitation, all Equipment, patents, licenses, Contractor Deliverables, operation and maintenance manuals and any spare parts purchased by Contractor on behalf of FPL at FPL's request in connection with the construction, operation and maintenance of the Plant) shall pass to FPL, free and clear of any and all Liens, upon Provisional Acceptance.

8.1.2 Notwithstanding anything to the contrary, the costs of unloading and transporting to the Job Site are included in the Contract Price.

8.2 RISK OF LOSS

8.2.1 From the date hereof until the Provisional Acceptance Date, Contractor hereby assumes the risk of loss for the Project and the Work, including:

(a) Any Equipment whether on or off the Job Site;

(b) All other Work completed on or off the Job Site; and

(c) All Work in progress.

8.2.2 All Equipment not yet incorporated into the Plant shall be stored in secured areas. Contractor shall bear the responsibility of preserving, safeguarding, and maintaining such Equipment and any other completed Work and Work in progress (including spare parts provided by FPL). If any loss, damage, theft or destruction occurs to the Work, on or off the Job Site, for which Contractor has so assumed the risk of loss, Contractor shall, at FPL's option and at Contractor's cost, promptly repair or replace the property affected thereby. If FPL elects not to repair or replace the affected property, Contractor shall pay to FPL any proceeds received from the insurance required to be maintained by Contractor pursuant to Section 9.1.8 due to such loss, damage, theft or destruction. Risk of loss for the Project and the Work shall pass to FPL (excluding Contractor Equipment and other items to be removed by Contractor, which shall remain the responsibility of Contractor) on the Provisional Acceptance Date. Subject to the foregoing, from and after the date of the transfer of risk of loss, FPL shall assume all risk of physical loss or damage thereto; provided, however, Contractor shall, subject to the provisions of Article XII, Contractor's Warranties, continue to be responsible after Provisional Acceptance Date for claims, physical loss or damage to the Work to the extent resulting from (a) the acts or omissions of Contractor or any Affiliate thereof, any Subcontractor or Vendor, or anyone directly or indirectly employed by any of them, or anyone for whose acts such Person may be liable and/or (b) any failure to comply with the requirements of the Contract Documents.

ARTICLE IX.
INSURANCE

9.1 CONTRACTOR INSURANCE POLICIES

Upon execution of the Agreement and continuing through the Final Acceptance Date, Contractor shall, at its sole cost and expense, obtain and maintain and cause its Subcontractors to obtain and maintain in force insurance policies satisfying the requirements of this Article, providing the following coverages of the types and in the amounts as follows (the "Contractor Insurance Policies"):

9.1.1 *Workers' Compensation Insurance*. Workers' Compensation that complies with the laws of the State of Florida and such other jurisdictions as may be applicable to its operations and includes an alternate employer endorsement. The amount of coverage of the insurance policy shall be the statutory amount required by the laws of the State of Florida. Where applicable, coverage shall include protection under the U.S. Longshoreman's and Harbor Worker's Act, Outer Continental Shelf Lands Act and Maritime Law, including the Jones Act and Death on the High Seas Act. Contractor expressly agrees to comply with all

ECRC-08-3269 HEARING EXHIBIT - 00000297

provisions of the Workers' Compensation Laws or similar employee benefit laws of the United States, or wherein said Work is to be performed, or of the countries from which its personnel are employed, where required, if applicable.

9.1.2 *Employers' Liability Insurance*. Employers' Liability Insurance including Occupational Disease in the amount of One Million Dollars ($1,000,000).

9.1.3 *Comprehensive or Commercial General Liability Insurance*. Comprehensive or Commercial General Liability insurance shall be on a broad form occurrence basis which shall be in the amount of Two Million Dollars ($2,000,000) per occurrence and Two Million Dollars ($2,000,000) in the aggregate for this Project including, but not limited to coverage for the following:

(a) Premises and Construction Operations;

(b) Independent Contractors;

(c) Products and Completed Operations, maintained for a period of two (2) years from the Final Acceptance Date;

(d) Explosion, Collapse and Underground Hazards;

(e) Broad Form Contractual Liability Coverage, applicable to damages and indemnities set forth in this Agreement;

(f) Personal Injury Coverage;

(g) Non-Owned Watercraft, if applicable;

(h) Broad Form Property Damage;

(i) Cross Liability coverage or Severability of Interest clause;

(j) Broad Form Named Insured Endorsement; and

(k) Action over coverage.

9.1.4 *Automobile Liability Insurance*. Automobile Liability Insurance, on an occurrence basis including coverage for all owned, leased, hired or non-owned automotive equipment (and containing appropriate no fault insurance provisions or other endorsements as are required under jurisdictional law or requirements), in the amount of One Million Dollars ($1,000,000) per occurrence or the amount required by Applicable Law, whichever is greater.

9.1.5 *Umbrella Excess Liability Insurance*. Umbrella Excess Liability to be provided on a following form basis with coverage as broad as the primary policies in the amount of Twenty Million Dollars ($20,000,000) each occurrence and in the aggregate.

9.1.6 *All Risk Equipment Insurance*. All Risk Equipment Insurance covering all risk of physical damage to equipment owned by Contractor and/or provided for use at the Job Site by Contractor.

9.1.7 *Professional Liability Insurance*. Professional Liability Insurance on a claims made basis with limits of $1,000,000 each occurrence and, at execution of this Agreement, $2,000,000, and upon the Commencement Date, $3,000,000, aggregate for liability arising out of any negligent act, error, mistake or omission resulting from Contractor's engineering, procurement, construction, design, commissioning, start-up and testing services, such coverage to remain in effect for not less than four (4) years following Provisional Acceptance.

9.1.8 *Inland and Marine Cargo Insurance*. Inland and Marine Cargo Insurance, if applicable - replacement value, which coverage may be included as part of the Builder's Risk Policy.

ECRC-08-3270 HEARING EXHIBIT - 00000298

9.2 FORM OF CONTRACTOR INSURANCE POLICIES.

9.2.1 Each Contractor Insurance Policy shall be written on an occurrence basis. Subject to the limits and coverages specified in Section 9.1, CONTRACTOR INSURANCE POLICIES, and except for Workers' Compensation, Contractor shall name FPL, designated Affiliates of FPL, the Utility, the Financing Parties and any other Person designated by FPL (including their respective officers, directors and employees) as additional insureds on Contractor's liability policies as required to be carried by Contractor by the provisions of Section 9.1, CONTRACTOR INSURANCE POLICIES, for liabilities of Contractor under the Contract Documents. Each Contractor Insurance Policy shall provide, either in its printed text or by endorsement, that:

(a) It shall be primary with respect to the interest of FPL, designated Affiliates of FPL and the Financing Parties (including their respective officers, directors and employees); and

(b) Any other insurance maintained by FPL, designated Affiliates of FPL or the Financing Parties is in excess and not contributory to Contractor Insurance Policies in all instances regardless of any like insurance coverage that FPL, designated Affiliates of FPL and the Financing Parties may have.

9.2.2 Contractor shall require the issuers of the coverages specified in 9.1, CONTRACTOR INSURANCE POLICIES, to amend such Contractor Insurance Policies to:

(a) Include a waiver of all rights of subrogation against the Financing Parties, FPL and designated Affiliates of FPL and any other Person designated by FPL and their respective directors, officers and employees;

(b) Contain a severability of interest provision;

(c) Provide that none of the Financing Parties, FPL or designated Affiliates of FPL or their respective directors, officers or employees shall be liable for the payment of premiums under such policy;

(d) Provide that complete copies of all inspection or other reports required or performed for the insurer shall be provided to both FPL and the Financing Parties within thirty (30) days of delivery to Contractor;

(e) Provide that FPL and the Financing Parties must be given at least sixty (60) days' prior written notice of any change in, non-renewal or cancellation of such coverages that are initiated by insurer, except ten (10) days for non-payment of premium, and

(f) Provide that FPL and the Financing Parties must be given at least sixty (60) days' prior written notice of any change in, non-renewal or cancellation of such coverages that are initiated by Contractor, except ten (10) days for non-payment of premium.

9.2.3 Contractor shall be responsible for additional costs associated with modifying inadequate coverage, terms and conditions to meet the requirements of this Agreement. Contractor shall comply with all the conditions stipulated in each of the insurance policies. Contractor shall make no material alteration to the terms of any insurance required herein without the prior written approval of FPL. If an insurer makes (or purports to make) any such alteration, Contractor shall notify FPL immediately. If any such notice is sent from an office outside the United States, it will be sent by international courier. Contractor shall be responsible to insure against risk of loss or damage to any Contractor Equipment and other equipment and tools that will not be incorporated into or become part of the Project.

9.3 QUALIFIED INSURERS

All Contractor Insurance Policies shall be written by insurers reasonably acceptable to FPL and the Financing Parties and that are rated "A-" or higher by A.M. Best's Key Rating Guide, or as may be approved in writing by FPL and the Financing Parties from time to time (a "Qualified Insurer"). In addition, if required by the Financing Parties, the Qualified Insurer must be able to provide a non-vitiation endorsement.

ECRC-08-3271 HEARING EXHIBIT - 00000299

9.4 CERTIFICATES OF INSURANCE

Contractor shall require all insurers under Contractor Insurance Policies to provide the Financing Parties, FPL and such other interested Persons as may be designated by FPL with certificates of insurance, in form and substance acceptable to the Financing Parties and FPL, evidencing and describing the insurance policies and endorsements maintained hereunder prior to commencement of the Work, or upon issuance of such policies, if earlier, and on each issuance anniversary while such insurance is in effect. The certificates of insurance shall evidence and describe the insurance policies and endorsements, including, without limitation, the requirements for the additional insured and waiver of subrogation as described in Section 9.2, FORM OF CONTRACTOR INSURANCE POLICIES. Notwithstanding anything to the contrary contained herein, evidence of such coverage shall be provided to FPL as a condition precedent to Initial Site Mobilization.

9.5 INSPECTION OF CONTRACTOR INSURANCE POLICIES

In respect of all Contractor Insurance Policies, Contractor shall, when so requested by FPL, produce Contractor's policies of insurance and confirmation of premium payment for such policies. If policies have not been secured on a project specific basis, Contractor may delete proprietary information not relevant to Contractor/FPL project prior to transmission.

9.6 SUBCONTRACTORS' INSURANCE

Before permitting any of its Subcontractors to perform any Work at the Job Site, Contractor shall obtain a certificate of insurance from each such Subcontractor evidencing that such Subcontractor has obtained the insurance required of Subcontractors by Contractor and in the case of Substantial Subcontractors, as required by FPL. All policies of Substantial Subcontractors shall include, and Contractor shall use reasonable efforts to require all other Subcontractors to include, a waiver of any right of subrogation of the insurers thereunder against FPL, the Financing Parties and Contractor, and any right of the insurers to set-off or counterclaim, offset or any other deduction, whether by attachment or otherwise, in respect of any liability or any such Person insured under such policy. Policies provided by Substantial Subcontractors and Substantial Vendors shall be in amounts and upon conditions as are customarily and normally provided in the major, grid-connected solar power generation industry.

9.7 REMEDY ON FAILURE TO INSURE

If Contractor shall fail to obtain and keep in force Contractor Insurance Policies, FPL may, without limiting any other remedy it may have, obtain and keep in force any such insurance and pay such premium or premiums as may be necessary for that purpose and recover from Contractor whether by way of deduction, offset or otherwise the cost of obtaining and maintaining such insurance.

9.8 MANAGEMENT OF INSURANCE POLICIES

Except as directed by FPL, Contractor shall be responsible for managing and administering all Contractor Insurance Policies, including the payment of all deductibles and self-insured retention amounts, the filing of all claims and the taking of all necessary and proper steps to collect any proceeds on behalf of the relevant insured Person. Contractor shall at all times keep FPL informed of the filing and progress of any claim. If Contractor shall fail to perform these responsibilities, FPL may take such action as it determines appropriate under the circumstances. In the event Contractor collects proceeds on behalf of other Persons, it shall ensure that these are paid directly from the insurers to the relevant Person and, in the event that it receives any such proceeds, it shall, unless otherwise directed by FPL, pay such proceed to such Party forthwith and prior thereto, hold the same in trust for the recipient.

9.9 FPL INSURANCE POLICIES

Subject to Section 9.9.3, prior to the Initial Site Mobilization by Contractor and continuing through the Final Acceptance Date, FPL shall obtain and maintain in force with responsible and reputable insurance carriers, subject to usual and customary terms, exclusions and limitations and deductible provisions the following insurance of the types set forth below:

9.9.1 *Workers' Compensation Insurance*. Workers' Compensation covering all of FPL's employees - statutory limit;

ECRC-08-3272 HEARING EXHIBIT - 00000300

9.9.2 *Employers' Liability Insurance*. Employers' Liability covering all of FPL's employees;

9.9.3 *Property Insurance*. After Provisional Acceptance and through the end of all of the Warranty Periods, FPL shall provide property insurance for the Plant and the Property Site in an amount and on terms that FPL deems reasonable.

9.9.4 *All Risk Installation and Builder's Risk Insurance*. No later than the Commencement Date, FPL shall obtain and maintain in force an All Risk Installation and Builder's Risk Insurance Policy (the "Builder's Risk Policy"). The Builder's Risk Policy shall be in an amount at least equal to the maximum foreseeable loss that could reasonably be sustained with respect to the Project or, if such amount is unavailable, such lower amount as may be commercially available at the time FPL procures such policy. A certificate of insurance evidencing the Builder's Risk Policy shall be furnished to the Contractor within thirty days after Contractor notifies FPL in writing that it will construct improvements at, or deliver materials to, the Job Site that may be insured pursuant to a builder's risk policy. Contractor shall be named as an additional insured on any Project-specific Builder's Risk Policy. The Builder's Risk Policy may contain separate sub-limits and deductibles subject to insurance company underwriting guidelines, provided the per occurrence deductible shall not exceed the amounts which are available to FPL on a commercially reasonable basis, as determined by FPL in its sole discretion. The Builder's Risk Policy will be maintained in accordance with terms reasonably available in the insurance market for the construction of major solar electric generating facilities and shall cover physical loss to property at the Job Site which results from a Defect but will not cover the Defect, including the cost to remedy the Defect. FPL shall cause the underwriter of the Builder's Risk Policy to waive all rights of subrogation against Contractor and its Subcontractors for damages covered by the Builder's Risk Policy. If a loss is insured under the Builder's Risk Policy, FPL will prepare and submit to the insurer any claim and proof of loss in accordance with the terms of the Builder's Risk Policy, and Contractor shall provide FPL with such documentation as FPL may reasonably require in connection with the preparation of such claim and proof of loss. FPL shall use commercially reasonable efforts for the benefit of the Parties in pursuing any claim under the Builder's Risk Policy, including, if permitted by the Builder's Risk Policy, pursuit of partial payment for partial proof of loss and payment of undisputed amounts due under the Builder's Risk Policy, provided Contractor acknowledges and agrees that the Builder's Risk Policy may not require such partial payments. FPL shall keep the Contractor reasonably informed of the status of claims negotiations between FPL and the insurer under the Builder's Risk Policy and if Contractor is not satisfied with the progress of such negotiations, it shall have the right to address such dissatisfaction with FPL's management and FPL shall use reasonable efforts to address Contractor's concerns. Notwithstanding the foregoing and subject to FPL's obligation to use commercially reasonable efforts in pursuing claims under the Builder's Risk Policy, any decisions made in the settlement or negotiation of any claim under the Builder's Risk Policy shall be in FPL's sole discretion. Upon availability and reasonable prior notice, Contractor's authorized representative shall be entitled to receive a copy of the Builder's Risk Policy. Contractor is responsible for the deductible under the Builder's Risk Policy; provided, however, Contractor's responsibility therefor shall in no event exceed $[500,000] per occurrence.

9.10 FORM OF FPL'S POLICIES

9.10.1 FPL shall provide Contractor with a certificate of insurance evidencing those policies set forth in Section 9.9, FPL INSURANCE POLICIES. As it applies to this Agreement, FPL shall provide that the insurance required pursuant to Section 9.9, FPL INSURANCE POLICIES, shall, except for Workers' Compensation, name Contractor and its Subcontractors as additional insureds thereunder only as their respective interests may appear but only with respect to Work performed pursuant to the Agreement.

9.10.2 Contractor shall be responsible for the payment of all deductibles for such claims caused, directly or indirectly, through the acts or omissions of Contractor, any Affiliate thereof, any Subcontractor or Vendor, or anyone directly or indirectly employed by any of them, or anyone for whose acts such Person may be liable.

ECRC-08-3273 HEARING EXHIBIT - 00000301

9.11 CONTRACTOR'S ASSISTANCE

In the event a loss is sustained under any of FPL's policies, such loss will be adjusted by FPL and/or the Financing Parties with the insurance companies. Contractor will assist FPL and the Financing Parties in the adjustment of losses. In the event a loss is sustained under the Builder's Risk Policy, such loss will be adjusted by Contractor and FPL with the insurance companies. FPL and Contractor agree to waive all rights of recovery against each other, and shall cause their respective underwriters to waive all rights of subrogation, for damages caused by fire and/or other perils to the extent covered and paid for by the Cargo Insurance. Contractor shall cooperate with FPL in obtaining and maintaining the insurance policies of FPL and shall provide all Drawings, Final Plans, certificates and other information that FPL or its insurers may reasonably require. Upon FPL's reasonable request, Contractor shall with all due diligence comply with the conditions of FPL's insurance polices and all reasonable requirements of the insurers in connection with the settlement of claims, the recovery of losses and the prevention of accidents and shall bear at its own cost the consequences of any failure to do so.

9.12 RESPONSIBILITY FOR SAFE DELIVERY OF MATERIALS OF CONTRACTOR

In addition to Section 8.2., RISK OF LOSS, of Article VIII, RISK OF LOSS AND POSSESSION, Contractor shall comply with all warranty requirements or other requirements set forth in all policies, including transport or marine/inland marine cargo insurance policies.

9.13 NO LIMITATION ON LIABILITY

Nothing in this Article shall be deemed to limit Contractor's liability under the Contract Documents regardless of the insurance coverages required by this Article. Except for the coverage limits of liability for insurance companies set forth in Section 9.1, CONTRACTOR INSURANCE POLICIES, no limitation of liability provided to Contractor under the Contract Documents is intended nor shall run to the benefit of any insurance company or in any way prejudice, alter, diminish, abridge or reduce, in any respect, the amount of proceeds of insurance otherwise payable to FPL or the Financing Parties under coverage required to be carried by Contractor under the Contract Documents, it being the intent of the Parties that the full amount of insurance coverage bargained for be actually available notwithstanding any limitation of liability contained in the Contract Documents, if any. FPL assumes no responsibility for the solvency of any insurer or the failure of any insurer to settle any claim.

9.14 FPL CONTROLLED INSURANCE PROGRAM

FPL and Contractor agree that FPL may substitute its own Owner's Controlled Insurance Program ("OCIP") for the purpose of providing during the term of the Agreement Worker's Compensation insurance, Commercial General Liability insurance and other insurance requested by FPL that is typically covered by OCIPs. In such event, FPL shall procure and pay the costs for certain insurance coverages on behalf of Contractor and Subcontractors.

ARTICLE X.
SYNCHRONIZATION, TESTS, MECHANICAL COMPLETION, PROVISIONAL ACCEPTANCE AND FINAL ACCEPTANCE

10.1 GENERAL.

10.1.1 All start-up, synchronization, operation and testing conducted by Contractor shall be in accordance with the Contract Documents, applicable manufacturers' instructions and warranty requirements, Applicable Laws, Applicable Standards, Applicable Permits, Prudent Utility Practices and any and all applicable rules as agreed to by FPL and Contractor. Contractor shall provide FPL with at least thirty (30) days' advance written notice of the first Test that involves delivering energy to the Grid. In addition, no Test of the Plant that delivers electrical output shall be conducted unless Contractor gives prior written notice thereof as provided in Section 10.1.2, Test Notice. FPL, Financing Parties, the Utility, the Independent Engineer, all relevant Government Authorities and their respective authorized representatives shall have the right to inspect the Work and to be present during the start-up, synchronization, operation and testing of the Project pursuant to this Article.

ECRC-08-3274 HEARING EXHIBIT - 00000302

10.1.2 Test Notice.

(a) Prior to performing any Test, Contractor shall deliver to FPL a written notice thereof (a "Test Notice") specifying a date for commencement of any or all of the Tests. Contractor shall coordinate with FPL the scheduling of any Test and FPL shall coordinate such Test with the dispatch schedule for the Plant, so as not to interfere with FPL's or its Affiliates' obligations with respect thereto. Contractor shall deliver a Test Notice at least ten (10) Business Days prior to the commencement of any Test. FPL shall, within five (5) Business Days after its receipt of such Test Notice, deliver to Contractor a written notice:

(i) Accepting such Test Notice; or

(ii) Denying that the prerequisites for performing such Test have been completed and stating the facts upon which such reasonable denial is based.

(b) Upon receipt of notice denying that the prerequisites for performing such Test have been completed, Contractor shall take such action as is appropriate to remedy the conditions described in such notice from FPL. Following any such remedial action, Contractor shall deliver to FPL a new Test Notice conforming to the requirements of this Section 10.1.2, and the provisions of this Section 10.1.2, shall apply with respect to such new Test Notice in the same manner as they applied with respect to the original Test Notice.

(c) The foregoing procedure shall be repeated as often as necessary until FPL no longer rejects the Test Notice; provided, however, if Contractor is required to notify following receipt of FPL's written notice in which FPL denies that the prerequisites for performing a task have been completed, such renotification may be given within five (5) Business Days of such notice by FPL, and FPL shall have three (3) Business Days following the receipt of such resubmitted notice to file written objections as described above. Contractor shall reschedule Tests as requested by FPL to reasonably accommodate the schedules of Persons whom FPL deems necessary to attend the Tests. Contractor shall promptly notify FPL of any proposed change in the schedule of Tests and may not conduct any such test under such proposed changed schedule unless FPL receives reasonable advance notice of the actual date of commencement of such rescheduled test. FPL shall be responsible for notifying the Utility, the Financing Parties and the Independent Engineer for witnessing Tests. Contractor shall reimburse FPL for all additional direct costs reasonably and necessarily incurred by FPL due to Contractor's failure to provide written notice in accordance with this Section 10.2, or due to Contractor's failure to prepare any portion of the Work for inspections or testing after having provided notice to FPL of any such inspection or test.

10.2 SYNCHRONIZATION

Together with the notice of the Scheduled Synchronization Date, Contractor shall provide FPL a start-up and test schedule for the Project and copies of all manufacturers' specifications, schedules of protection schemes, and protection relay settings. Contractor shall promptly give FPL notice of any expected change in the Scheduled Synchronization Date or other information provided with the notice as described above (or any modifications thereto); provided that Contractor shall provide at least ten (10) days prior written notice of the actual synchronization date. Contractor shall perform the synchronization procedures in accordance with the Scope of Work and FPL's direction regarding Utility's requirements. Utility and its authorized representatives shall have the right to be present during the synchronization.

10.3 MECHANICAL COMPLETION

Upon satisfaction of all requirements for Mechanical Completion, Contractor shall provide FPL with a notice of Mechanical Completion. Within three (3) Business Days of receipt of such notice, FPL shall notify Contractor in writing whether or not Contractor has fulfilled the requirements of Mechanical Completion. If Contractor has not fulfilled such requirements for Mechanical Completion, FPL shall specify in such notice to Contractor in reasonable detail the reasons that the requirements for Mechanical Completion have not been met. Contractor shall promptly act to correct such deficiencies so as to achieve Mechanical Completion as soon as possible (and no later than by the applicable date set forth in Appendix C, Critical Milestones and

ECRC-08-3275 HEARING EXHIBIT - 00000303

Milestones, if such date has not already passed). Following any such remedial action, Contractor shall deliver to FPL a new notice of Mechanical Completion and the provisions of this Section 10.3, shall apply with respect to such new Mechanical Completion notice in the same manner as they applied to the original Mechanical Completion notice so long as, if the Guaranteed Provisional Acceptance Date shall have passed, Contractor is paying Schedule Liquidated Damages when due in accordance with Article XI, CONTRACTOR GUARANTEES AND LIQUIDATED DAMAGES.

10.4 PERFORMANCE TESTS

10.4.1 Contractor is responsible for conducting the Tests and any required re-tests for the purposes of determining achievement of the Minimum Performance Level and the Final Acceptance Performance Level. Only after the Project:

(a) Has achieved Mechanical Completion;

(b) Has been synchronized with the Grid in accordance with the Scope of Work and Utility's requirements;

(c) Is capable of being operated safely, normally, reliably and continuously in accordance with the requirements of the Contract Documents at all operating conditions and modes specified in the Scope of Work (although minor portions of the Project not essential to its safe, continuous and reliable operation may remain to be completed); and

(d) Is ready for the Tests to be performed in accordance with the Contract Documents,

shall Contractor conduct the Tests.

10.4.2 Each Test shall be conducted in accordance with the terms of the Contract Documents, including the Scope of Work and Appendix HH, after complying with the notice provisions of Section 10.1.2, Test Notice. If the Project achieves the Minimum Performance Level, Contractor shall, upon satisfaction of the other requirements to Provisional Acceptance, submit a notice of Provisional Acceptance in accordance with Section 10.7, PROVISIONAL ACCEPTANCE. If the Project fails all or any part of the Tests, including, without limitation, the failure to achieve the Minimum Performance Level, Contractor shall take appropriate corrective action and the Tests shall be performed again. If the Project fails all or any part of the retest, Contractor shall take appropriate corrective action and the Tests shall be repeated. If Contractor fails to achieve the Minimum Performance Level and satisfy all of the other requirements of Provisional Acceptance on or prior to the Guaranteed Provisional Acceptance Date, Contractor shall pay Schedule Liquidated Damages in accordance with Section 11.2, SCHEDULE LIQUIDATED DAMAGES, of Article XI, CONTRACTOR GUARANTEES AND LIQUIDATED DAMAGES. In addition, Contractor shall repeat the Tests in accordance with Section 11.6.1 during the applicable time periods set forth in Section 11.1, COMPLETION GUARANTEE, of Article XI, CONTRACTOR GUARANTEES AND LIQUIDATED DAMAGES. Contractor shall provide a written report of the results of each Test to FPL.

10.5 PERFORMANCE SHORTFALLS.

10.5.1 Prior to the Guaranteed Provisional Acceptance Date, if the Project has achieved the Minimum Performance Level necessary for Provisional Acceptance, as determined pursuant to Section 11.6, DETERMINATION OF PERFORMANCE, of Article XI, CONTRACTOR GUARANTEES AND LIQUIDATED DAMAGES (but not the Final Acceptance Performance Level), and the Project is capable of being operated safely, normally and continuously in accordance with the requirements of the Contract Documents at all operating levels specified in the Scope of Work (although minor portions of the Project not essential to its safe, continuous and reliable operation may remain to be completed), and after complying with the notice provisions of Section 10.1.2, Test Notice, Contractor may conduct the Tests again in accordance with the terms of the Contract Documents, including the Scope of Work, in order to attempt to achieve the Final Acceptance Performance Level. If the Project fails to achieve all or any part of the Final Acceptance Performance Level after the Guaranteed Provisional Acceptance Date, Contractor shall, subject to Contractor's rights set forth in the following sentence, submit a Remedial Plan reasonably acceptable to FPL and take appropriate corrective action and repeat the Tests. If the Project fails all or any part of the

ECRC-08-3276 HEARING EXHIBIT - 00000304

Final Acceptance Performance Level after the Guaranteed Provisional Acceptance Date but all other requirements for Final Acceptance have been met, including the achievement of the Minimum Performance Level, Contractor shall have the option of:

(a) Submitting a Remedial Plan reasonably acceptable to FPL and take appropriate corrective action and repeat the Tests; or

(b) Giving notice to FPL of its declaration of Final Acceptance and reducing the Contract Price based on the results of the last Guaranteed Performance Test performed (and during which the Noise Guarantee was simultaneously satisfied) prior to the issuance of such notice.

If Contractor selects option (b), above, (i) the Contract Price will be reduced to an amount equal to the Contract Price multiplied by the Payment Output Percentage and (ii) Contractor shall perform all Remediation Work requested by FPL related to Work not associated with the percentage of the Final Acceptance Performance Level that has been achieved. For example, if 75% of the Final Acceptance Performance Level is achieved, to the extent requested by FPL, Work not associated with achieving such 75% of the Final Acceptance Performance Level (such Work being referred to as the "Non-Accepted Work") shall be removed from the Property Site and the Property Site on which such Non-Accepted Work is located or performed shall be restored to the condition of the Property Site immediately prior to Initial Site Mobilization to the extent requested by FPL.

10.5.2 Notwithstanding the foregoing and subject to the terms and conditions contained herein, Contractor may repeat the Tests until the earliest of the:

(a) Date that is one hundred and eighty (180) days after the Guaranteed Provisional Acceptance Date;

(b) Achievement by Contractor of the Final Acceptance Performance Level; or

(c) Delivery by Contractor to FPL of Contractor's notice of declaration of Final Acceptance and reduction of the Contract Price in accordance with Section 10.5.1.

Contractor shall provide a written report of the results of each Test to FPL. The Minimum Performance Level, the Final Acceptance Performance Level and any other Net Energy Output used to calculate any reduction of Contract Price shall be achieved only while the Plant is operating in compliance with the Noise Guarantee (excluding for this purpose all waivers and variances permitted under Applicable Permits).

10.5.3 If the Final Acceptance Performance Level is not achieved within one hundred and eighty (180) days after the Guaranteed Provisional Acceptance Date and Contractor has not selected option (b) of Section 10.5.1, then the Contract Price will be automatically reduced to an amount equal to the Contract Price multiplied by the Payment Output Percentage, which Payment Output Percentage shall be based on the results of the last Guaranteed Performance Test performed (and during which the Noise Guarantee was simultaneously satisfied) prior to one hundred and eighty (180) days after the Guaranteed Provisional Acceptance Date.

10.5.4 At no time between the Provisional Acceptance Date and Final Acceptance shall the performance of the Project fall below the Minimum Performance Level, for reasons not due to FPL's operation of the Project or a Force Majeure Event.

10.6 PUNCH LIST.

10.6.1 At all times during performance of the Work, Contractor shall maintain a list setting forth parts of the Work which remain to be performed in order to confirm that the Work fully complies with the terms of the Contract Documents. Contractor shall promptly provide a copy of such list to FPL upon request. Contractor shall make such revisions to such list as and when requested by FPL from time to time.

10.6.2 No later than thirty (30) days before the Provisional Acceptance Date, Contractor shall prepare and submit to FPL a comprehensive list (the "Punch List") of items to be completed for the Project to reach Final Acceptance. The Punch List shall not include any item that affects the safety, reliability or operability of the Equipment, the Plant or any portion thereof or requires a shut-down or reduced operation of the

ECRC-08-3277 HEARING EXHIBIT - 00000305

Equipment, the Project or any portion thereof to be completed. Contractor shall make such revisions to the Punch List as and when reasonably requested by FPL from time to time.

10.6.3 The Parties agree that with respect to Punch List items that remain uncompleted and which are preventing Final Acceptance, it may be more expedient for FPL to complete such Punch List items, at its election and option. If the Parties are able to agree upon the commercial value of all items on the Punch List, and FPL so elects, at its sole discretion, FPL may, in lieu of requiring Contractor to complete any item on the Punch List, require Contractor to pay to FPL an amount equal to one hundred fifty percent (150%) of the commercial value of such Punch List item as reasonably determined by FPL. FPL shall have the right to offset such amount owed by Contractor against any amounts owed by FPL to Contractor at Final Acceptance, or otherwise under the Contract Documents.

10.7 PROVISIONAL ACCEPTANCE.

10.7.1 After completing the Tests in accordance with Section 10.4, TESTS, and Contractor determines that all of the requirements for Provisional Acceptance have been completed, Contractor shall provide written notice thereof to FPL.

10.7.2 Within three (3) Business Days following receipt by FPL of such notice of Provisional Acceptance, FPL shall notify Contractor in writing whether or not Contractor has fulfilled the requirements of Provisional Acceptance. If Contractor has fulfilled the requirements of Provisional Acceptance, FPL shall notify Contractor that it has achieved Provisional Acceptance. If Contractor has not fulfilled such requirements for Provisional Acceptance, FPL shall specify in such notice to Contractor in reasonable detail the reasons for determining that the requirements for Provisional Acceptance have not been met. Contractor shall promptly act to correct such deficiencies so as to achieve Provisional Acceptance as soon as possible (and no later than by the Guaranteed Provisional Acceptance Date if such date has not already passed). Following any such remedial action, Contractor shall deliver to FPL a new notice of Provisional Acceptance and the provisions of this Section 10.7.2, shall apply with respect to such new Provisional Acceptance notice in the same manner as they applied to the original Provisional Acceptance notice. The foregoing procedure shall be repeated as often as necessary, so long as Contractor is paying when due Schedule Liquidated Damages (if applicable), until acceptance by FPL of Contractor's Provisional Acceptance notice and delivery by FPL of its own notice to Contractor that Provisional Acceptance has been achieved. The date on which Provisional Acceptance is achieved by Contractor shall be the "Provisional Acceptance Date."

10.8 FINAL ACCEPTANCE OF THE PLANT

After achieving Provisional Acceptance in accordance with Section 10.7, PROVISIONAL ACCEPTANCE, when Contractor determines that all of the requirements for Final Acceptance have been completed (other than execution of the Final Acceptance Certificate by FPL), or when Contractor has elected to or is required to declare Final Acceptance pursuant to Section 10.5, PERFORMANCE SHORTFALLS, Contractor shall submit a proposed Final Acceptance Certificate, in substantially the form attached hereto as Appendix G, Form of Final Acceptance Certificate, to FPL. As soon thereafter as reasonably practicable, a team consisting of representatives of FPL, the Financing Parties, the Independent Engineer and Contractor shall make a final inspection of the Plant. Within ten (10) Business Days following such final inspection, FPL, with the consent of the Financing Parties, if applicable, shall notify Contractor in writing whether Contractor has fulfilled the requirements of the Contract Documents to reach Final Acceptance (other than execution of the Final Acceptance Certificate by FPL). If such requirements have been fulfilled, FPL will execute the proposed Final Acceptance Certificate. If the requirements for Final Acceptance have not been fulfilled, then FPL shall deliver a written notice to such effect to Contractor describing in reasonable detail the deficiencies noted and corrective action recommended, including projected target dates for the completion of such incomplete or remedial Work. Contractor shall promptly act to correct any such deficiencies. The procedure set forth in this Section 10.8, shall be repeated as necessary, until the earlier of: (i) the date on which Contractor has fulfilled the requirements for the issuance of the Final Acceptance Certificate and FPL executes such certificate; or (ii) termination of this Agreement.

ECRC-08-3278 HEARING EXHIBIT - 00000306

benefit of Contractor, in such order as FPL may elect in its sole discretion. In addition, FPL, in its sole discretion, may collect Schedule Liquidated Damages by drawing on the Letter of Credit if not timely paid by Contractor.

11.6 DETERMINATION OF PERFORMANCE.

11.6.1 Contractor's compliance with the Minimum Performance Level for purposes of achieving Provisional Acceptance shall be determined on the basis of the Tests conducted in accordance with Article X, SYNCHRONIZATION, TESTS, MECHANICAL COMPLETION, PROVISIONAL ACCEPTANCE AND FINAL ACCEPTANCE, and Appendix HH, and the results of such Tests shall be conclusive for such purpose. The Net Energy Output of the Plant shall be determined pursuant to the Guaranteed Performance Test and shall be measured while the Plant is operating in compliance with the Noise Guarantee (excluding for this purpose all waivers and variances permitted under Applicable Permits).

11.6.2 Contractor's compliance with the Minimum Performance Level and the Guaranteed Performance Level, or the extent of its failure to comply therewith, for purposes of achieving Final Acceptance shall be determined on the basis of the Tests conducted in accordance with Article X, SYNCHRONIZATION, TESTS, MECHANICAL COMPLETION, PROVISIONAL ACCEPTANCE AND FINAL ACCEPTANCE, and Appendix HH, and the results of such tests shall be conclusive for such purpose. The Net Energy Output of the Plant shall be determined pursuant to the Guaranteed Performance Test and shall be measured while the Plant is operating in compliance with the Noise Guarantee (excluding for this purpose all waivers and variances permitted under Applicable Permits).

11.7 ABSOLUTE OBLIGATIONS

The Parties understand and agree that Contractor's obligation to achieve the Minimum Performance Level simultaneously with achievement of the Noise Guarantee, is an absolute obligation, which must be achieved. Notwithstanding anything contained herein to the contrary, after the Project has achieved Provisional Acceptance and during the time period prior to Final Acceptance, the Project shall be capable of being operated in accordance with all of the Plant's operating procedures and all Applicable Laws, Applicable Permits and the other requirements of the Contract Documents, and all operating conditions specified in the Scope of Work, excluding for this purpose all waivers and variances permitted under Applicable Permits. The obligations set forth in this Section 11.7 are absolute obligations of Contractor regardless of the amounts and expenses required to be incurred by Contractor to satisfy such obligation, and notwithstanding that such amounts may exceed the Contract Price.

11.8 PARENT GUARANTY

Contractor's ultimate corporate parent is SunPower Corporation (the "Contractor Parent Company"). Concurrently with the execution of this Agreement, Contractor shall provide to FPL an irrevocable, unconditional guarantee in the form of Appendix I, Form of Contractor Parent Guaranty, duly executed by Contractor Parent Company for the benefit of FPL and the Financing Parties under terms and conditions acceptable to FPL and the Financing Parties ("Contractor Parent Guaranty"). In order to provide FPL and the Financing Parties with evidence of Contractor's and Contractor Parent Company's financial ability to complete the Project, Contractor agrees to comply with reasonable requests for financial information. After the Letter of Credit Termination Date, upon the occurrence of a Credit Trigger Event, at FPL's request, Contractor shall provide a Letter of Credit with a stated amount (or post other collateral, including cash in an amount) determined pursuant to paragraph 3 of Appendix E attached hereto in addition to the Contractor Parent Guaranty.

ARTICLE XII.
CONTRACTOR'S WARRANTIES

12.1 WARRANTIES.

12.1.1 Contractor warrants to FPL that all Equipment shall:

(a) Be new and of good quality;

ECRC-08-3282 HEARING EXHIBIT - 00000307

12.2.2 If Contractor fails to commence to complete the correction of any Defect or cure of any breach of warranty as required herein within five (5) days after receipt of notice from FPL to perform such obligations or thereafter fails to diligently continue to complete such corrections or cure, then FPL may correct (or cause to be corrected) such Defect or cure (or cause to be cured) such breach of warranty and Contractor shall be liable for all reasonable costs, charges, and expenses incurred by FPL in connection therewith (including attorneys' and other consultants' fees), and Contractor shall, within fifteen (15) days after request therefor, pay to FPL an amount equal to such costs, charges, and expenses. Any such request by FPL shall be accompanied by proper documentation evidencing such costs, charges and expenses. Such correction of a Defect or cure of a breach of warranty by FPL (or caused by FPL) shall be deemed performed by Contractor and the Warranty Period applicable thereto for such corrected or cured Work shall be extended in accordance with Section 12.1.4.

12.2.3 If, during the a given Warranty Period, Contractor shall change, repair or replace any Major Equipment item or component, FPL, in its reasonable discretion, may require Contractor to conduct and satisfactorily complete any test required by FPL with respect to the affected Equipment; provided, however, in connection with any performance of a test pursuant to this Section 12.2.3, appropriate allowance with respect to the performance of such Equipment shall be made for the fact that such Equipment may have operated prior thereto. If after running such test pursuant to this Section, the results indicate a degradation in the performance of the Project (as measured against the test results used to satisfy the requirements of Section 12.1.3) or the Project fails to satisfy any other Test, then Contractor shall repair, correct or replace such affected Equipment and re-run such test until the Project performs at a level consistent with the performance of the Project immediately prior to the change, repair or replacement of such Equipment.

12.3 PROPRIETARY RIGHTS

Without limiting any of the provisions of this Agreement, if FPL or Contractor is prevented from completing the Plant, the Work or any part thereof; or from the use, operation, or enjoyment of the Plant, the Work or any part thereof as a result of a claim, action or proceeding by any Person for unauthorized disclosure, use, infringement or misappropriation of any Intellectual Property Right arising from Contractor's performance (or that of its Subcontractors or Vendors) under the Contract Documents, including, without limitation, the Work, Equipment, the Contractor Deliverables or other items and services provided by Contractor or any Subcontractor or Vendor hereunder, Contractor shall promptly, but in no event later than thirty (30) days from the date of any action or proceeding, take all actions necessary to remove such impediment, including:

12.3.1 Secure termination of the injunction and procure for FPL or its Affiliates or assigns, as applicable, the right to use such materials, Equipment or Contractor Deliverables in connection with the operation and maintenance of the Project, without obligation or liability; or

12.3.2 Replace such materials, Equipment or Contractor Deliverables, with a non-infringing equivalent, or modify same to become non-infringing,

All at Contractor's sole expense, but subject to all the requirements of the Contract Documents.

12.4 REPAIRS AND TESTING BY FPL.

12.4.1 During the Warranty Period, without prior notice to Contractor and without affecting the warranties of Contractor hereunder, FPL shall be permitted to:

(a) Make repairs or replacements on Equipment so long as the repair or replacement involves the correct installation of spare parts and is otherwise conducted in accordance with the operation and maintenance manuals, the manufacturer specifications and the Procedures Manual; and

(b) Adjust or test Equipment as outlined in the instruction manuals provided by Contractor or any Subcontractor or Vendor.

12.4.2 In the event of an emergency and if, in the reasonable judgment of FPL, the delay that would result from giving notice to Contractor could cause serious loss or damage which could be prevented by immediate action, any action (including correction of Defects) may be taken by FPL or a third party chosen by FPL, without giving prior notice to Contractor, and in the case of a Defect, the reasonable cost of correction shall

ECRC-08-3286 HEARING EXHIBIT - 00000308

be paid by Contractor. In the event such action is taken by FPL, Contractor shall be promptly notified within five (5) Business Days after correction efforts are implemented, and shall assist whenever and wherever possible in making the necessary corrections.

12.5 VENDORS AND SUBCONTRACTORS

Contractor shall, for the protection of Contractor and FPL, obtain from the Vendors and Subcontractors such guarantees and warranties with respect to Work performed and Equipment supplied, used and installed hereunder as are reasonably obtainable, which guarantees and warranties shall equal or exceed those set forth in Section 12.1, WARRANTIES, and shall be made available and assignable to FPL and the Financing Parties to the full extent of the terms thereof upon the expiration of Contractor's warranty hereunder. FPL shall be an express third party beneficiary of all such guarantees and warranties. All such warranties obtained shall be in addition to, and shall not alter the warranties of, Contractor. Upon FPL's request, Contractor shall use all reasonable efforts to force Subcontractors to honor warranties including, but not limited to, filing suit to enforce same. To the extent available, FPL shall have the right to require Contractor to secure additional warranty or extended guarantee protection pursuant to a Change Order issued in accordance with the provisions of Article VI, CHANGE ORDERS. Upon the earlier of the Provisional Acceptance Date or termination of this Agreement, Contractor shall deliver to FPL copies of all relevant contracts providing for such guarantees and warranties.

12.6 ASSIGNMENT OF WARRANTIES

Upon the expiration of all of the Warranty Periods or termination of this Agreement, Contractor shall assign to FPL all warranties received by it from Subcontractors and Vendors or otherwise obtained under Section 12.5, VENDORS AND SUBCONTRACTORS (or the Plant or Work in the event of termination of this Agreement). Such assignment of warranties to FPL must also allow FPL to further assign such warranties. However, in the event that FPL makes any warranty claim against Contractor with respect to Equipment or services supplied in whole or in part by any Subcontractor or Vendor, and Contractor fulfills its obligations with respect to such claim by FPL, Contractor shall be entitled to enforce for its own benefit any warranty given by such Subcontractor or Vendor with respect to such Equipment and services.

12.7 SURVIVAL OF WARRANTIES

The provisions of this Article shall survive the expiration or termination of this Agreement.

ARTICLE XIII.
REPRESENTATIONS

13.1 REPRESENTATIONS AND WARRANTIES.

13.1.1 Contractor represents and warrants to FPL that:

(a) Contractor is a corporation, duly organized, validly existing, and in good standing under the laws of the State of Delaware and is duly authorized and qualified to conduct business in the State of Florida;

(b) Contractor has all requisite power and authority to conduct its business, own its properties and execute and deliver this Agreement and perform its obligations hereunder in accordance with the terms hereof;

(c) The execution, delivery, and performance of the Contract Documents have been duly authorized by all requisite corporate action and this Agreement constitutes the legal, valid and binding obligation of Contractor, enforceable against Contractor in accordance with its terms;

(d) Neither the execution, delivery or performance of the Contract Documents conflicts with, or results in a violation or breach of the terms, conditions or provisions of, or constitutes a default under, the organizational documents of Contractor or any agreement, contract, indenture or other instrument under which Contractor or its assets are bound, nor violates or conflicts with any Applicable Law or any judgment, decree, order, writ, injunction or award applicable to Contractor;

ECRC-08-3287 HEARING EXHIBIT - 00000309

(e) Contractor is not in violation of any Applicable Law or Applicable Permit, which violations, individually or in the aggregate, would affect its performance of its obligations under the Contract Documents;

(f) Except as described in Section 18.21, Contractor's License, Contractor is the holder of all governmental consents, licenses, permissions and other authorizations and Applicable Permits required to operate and conduct its business now and as contemplated by the Contract Documents, other than Contractor Permits and FPL Permits which will be obtained in accordance with the terms of the Contract Documents;

(g) There is no pending controversy, legal action, arbitration proceeding, administrative proceeding or investigation instituted, or to the best of Contractor's knowledge threatened, against or affecting, or that could affect, the legality, validity and enforceability of the Contract Documents or the performance by Contractor of its obligations under the Contract Documents, nor does Contractor know of any basis for any such controversy, action, proceeding or investigation;

(h) Contractor has examined this Agreement, including all Appendices attached hereto, thoroughly and become familiar with all its terms and provisions;

(i) Contractor, by itself and through its Subcontractors and Vendors, has the full experience and proper qualifications to design and perform the Work and to construct the Plant in accordance with the terms of the Contract Documents;

(j) Contractor has visited and examined the Property Site and is fully familiar with such Property Site and surrounding area and based on such visit and examination has no reason to believe that Contractor will be unable to complete the Work in accordance with the Contract Documents;

(k) To the best of its knowledge, Contractor has reviewed all other documents and information necessary and available to Contractor in order to ascertain the nature, location and scope of the Work, the character and accessibility of the Property Site, the existence of obstacles to construction of the Plant and performance of the Work, the availability of facilities and utilities, and the location and character of existing or adjacent work or structures;

(l) Contractor owns or has the right to use all patents, trademarks, service marks, tradenames, copyrights, licenses, franchises, permits and intellectual property rights necessary to perform the Work without conflict with the rights of others;

(m) Each of Contractor and the Contractor Parent Company is financially solvent, able to pay its debts as they mature, and possessed of sufficient working capital to complete its obligations under this Agreement;

(n) FPL may provide or may have provided Contractor with copies of certain studies, reports or other information (including oral statements) and Contractor represents and acknowledges that:

(i) All such documents or information have been or will be provided as background information and as an accommodation to Contractor;

(ii) FPL makes no representations or warranties with respect to the accuracy of such documents or the information (including oral statements) or opinions therein contained or expressed; and

(iii) It is not relying on FPL for any information, data, inferences, conclusions, or other information with respect to the Job Site (other than the boundary survey referred to in Section 4.7, DESCRIPTION OF PROPERTY SITE), including the surface conditions of the Job Site and the surrounding areas;

(o) All Persons who will perform any portion of the Work have and will have all business and professional certifications required by Applicable Law to perform their respective services under this Agreement;

ECRC-08-3288 HEARING EXHIBIT - 00000310

(p) The access rights granted to or obtained by Contractor to the Job Site are adequate for the performance of the Work and operation of the Plant; and

(q) The Plant will be designed and constructed to achieve or exceed the Net Energy Output Guarantee.

13.1.2 FPL represents and warrants to Contractor that:

(a) FPL is a corporation, duly organized, validly existing, and in good standing under the laws of Florida and is duly authorized and qualified to conduct business in the State of Florida;

(b) FPL has all requisite power and authority to conduct its business, own its properties and execute and deliver the Contract Documents and perform its obligations hereunder in accordance with the terms hereof;

(c) The execution, delivery, and performance of the Contract Documents have been duly authorized by all requisite corporation action and this Agreement constitutes the legal, valid and binding obligation of FPL, enforceable against FPL in accordance with its terms;

(d) Neither the execution, delivery or performance of the Contract Documents conflicts with, or results in a violation or breach of the terms, conditions or provisions of, or constitutes a default under, the organizational documents of FPL or any agreement, contract, indenture or other instrument under which FPL or its assets are bound, nor violates or conflicts with any Applicable Law or any judgment, decree, order, writ, injunction or award applicable to FPL;

(e) FPL is not in violation of any Applicable Law or Applicable Permit, which violations, individually or in the aggregate, would affect its performance of its obligations under the Contract Documents; and

(f) FPL is the holder of all governmental consents, licenses, permissions and other authorizations and Applicable Permits required to operate and conduct its business now and as contemplated by the Contract Documents, other than FPL Permits which will be obtained in accordance with the terms of the Contract Documents.

13.2 SURVIVAL OF REPRESENTATIONS AND WARRANTIES

The representations and warranties of the Parties herein shall survive execution and termination of this Agreement.

ARTICLE XIV.
FORCE MAJEURE AND FPL CAUSED DELAY

14.1 DEFINITION OF FORCE MAJEURE EVENT

14.1.1 As used herein, the term "Force Majeure Event" shall mean any event or circumstance, or combination of events or circumstances, that arises after the date hereof, is beyond the reasonable control of the Party claiming the Force Majeure Event, is unavoidable or could not be prevented or overcome by the reasonable efforts and due diligence of the Party claiming the Force Majeure Event and has an impact which will actually, demonstrably, adversely and materially affect such Party's ability to perform its obligations in accordance with the terms of the Contract Documents or has an impact which will actually, demonstrably, adversely and materially affect the Critical Path of the Work and performance of its obligations in accordance with the terms of the Contract Documents. Without limiting the generality of the foregoing, events that may give rise to a Force Majeure Event include, without limitation:

(a) Acts of God;

(b) Natural disasters;

(c) Fires;

(d) Earthquakes;

(e) Lightning;

ECRC-08-3289 HEARING EXHIBIT - 00000311

(f) Floods;

(g) Storms;

(h) Civil disturbances;

(i) Terrorism;

(j) Riots;

(k) War; and

(l) The action of or failure to act on the part of any Government Authority having or asserting jurisdiction that is binding upon the Parties and has been opposed by all reasonable means,

In each case, that meet the definition of Force Majeure Event as set forth above.

14.1.2 Notwithstanding the foregoing, the term "Force Majeure Event" does not include, without limitation:

(a) Strikes, work stoppages (or deteriorations), slowdowns or other labor actions, unless such strike, work stoppage or other labor action is a result of strike, work stoppage or other labor action originated by employees of the Party not claiming the Force Majeure Event;

(b) Any labor or manpower shortages;

(c) Unavailability, late delivery, failure, breakage or malfunction of equipment or materials or events that affect the cost of equipment or materials;

(d) Economic hardship (including lack of money);

(e) Perils of sea;

(f) Delays in transportation (including delays in clearing customs) other than delays in transportation resulting from accidents or closure of roads or other transportation route by Government Authorities;

(g) Changes in Applicable Laws;

(h) Weather conditions normally experienced in the geographic area of the Project, it being the intent of the Parties that only when the number of days lost as a result of adverse weather (as reported by the National Weather Service or a similar agency) exceeds the number usually encountered in the geographic area of the Project for any given month based on a ten (10) year average (as reported by the National Weather Service or a similar agency) will Contractor be allowed to claim a Force Majeure Event, subject however to the other requirements for an event or occurrence to be Force Majeure Event and the other requirements set forth in this Article;

(i) Actions of a Government Authority with respect to Contractor's compliance with Applicable Laws or Applicable Permits;

(j) Any failure by Contractor to obtain and/or maintain any Applicable Permit it is required to obtain and/or maintain hereunder;

(k) Any other act, omission, delay, default or failure (financial or otherwise) of a Subcontractor or Vendor; or

(l) Any surface or subsurface conditions at the Property Site (subject to Contractor's rights as provided in Section 3.4.4, Differing Condition, of Article III, CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR).

14.1.3 Notwithstanding the foregoing and solely for the purpose of conducting the acceptance testing provided for in Section 2 of Appendix HH – Acceptance Testing, the term "Force Majeure Event" includes solar conditions that do not meet the express criteria set forth in in Section 2 of Appendix HH – Acceptance

ECRC-08-3290 HEARING EXHIBIT - 00000312

Testing, subject however to the other requirements for an event or occurrence to be Force Majeure Event and the other requirements set forth in this Article.

14.2 NOTICE OF FORCE MAJEURE EVENT

The Party claiming a Force Majeure Event shall within five (5) Business Days after it knows or should have known of the occurrence of the Force Majeure Event (or in any event, no later than twenty (20) days after the commencement of the Force Majeure Event), give the other Party written notice describing the details of the cause and nature of the Force Majeure Event, the anticipated length of delay due to the Force Majeure Event and any other affect on the Party's performance of its obligations hereunder; provided that if the Force Majeure Event results in a breakdown of communications rendering it not reasonably practicable to give notice within the applicable time limit specified herein, then the Party claiming a Force Majeure Event shall give such notice as soon as reasonably practicable after the reinstatement of communications, but no later than five (5) Business Days after such reinstatement. Within fifteen (15) days after initial notification, such Party shall provide sufficient proof of the occurrence and duration of such Force Majeure Event to the other Party and shall thereafter provide the other Party with periodic supplemental updates to reflect any change in information given to the other Party as often as requested by the other Party. The Party claiming the Force Majeure Event shall give notice to the other Party of: (i) the cessation of the relevant Force Majeure Event; and (ii) the cessation of the effects of such Force Majeure Event on the performance by it of its obligations under the Contract Documents as soon as practicable after becoming aware thereof. No Force Majeure Event shall relieve any Party from performing those of its obligations that are not affected by the Force Majeure Event.

14.3 DELAY FROM FORCE MAJEURE EVENT

14.3.1 So long as the conditions set forth in this Section 14.3 are satisfied, and subject to Section 14.7, PERFORMANCE NOT EXCUSED, neither Party shall be responsible or liable for, or deemed in breach of this Agreement because of, any failure or delay in complying with its obligations under or pursuant to the Contract Documents to the extent that such failure has been caused, or contributed to, by one or more Force Majeure Events or its effects or by any combination thereof, and in such event:

(a) Except as otherwise provided herein, the performance by the Party claiming the Force Majeure Event of its obligations hereunder shall be suspended, and in the event that such Party is required to start or complete an action during a specific period of time, such start date or period for completion shall be extended, on the condition that:

(i) Such suspension of performance and extension of time shall be of no greater scope and of no longer duration than is required by the effects of the Force Majeure Event;

(ii) The Party claiming the Force Majeure Event complies with Section 14.2, NOTICE OF FORCE MAJEURE EVENT; and

(iii) The Party claiming the Force Majeure Event continually uses commercially reasonable efforts to alleviate and mitigate the cause and effect of the Force Majeure Event and remedy its inability to perform; and

(b) In the event Contractor desires to claim a Force Majeure Event, it must submit a request for Changes pursuant to Section 6.2, CHANGE ORDERS REQUESTED BY CONTRACTOR, of Article VI, CHANGE ORDERS.

14.3.2 Solely with respect to a Force Majeure Event described in Section 14.1.3, if such Force Majeure Event continues for sixty (60) consecutive days from the commencement of acceptance testing, then, solely for purposes of Section 11.2, FPL shall deem Contractor to have satisfied the Minimum Performance Level and Schedule Liquidated Damages shall not be payable. In such event, Contractor shall not be deemed to have achieved Provisional Acceptance until solar conditions exist that meet the express criteria set forth in in Section 2 of Appendix HH – Acceptance Testing and the Minimum Performance Level is achieved in accordance with Section 11.6.

ECRC-08-3291 HEARING EXHIBIT - 00000313

14.3.3 Contractor's failure to comply with this Section 14.3, shall constitute a waiver of any claims as a result of a Force Majeure Event.

14.4 REMOVAL OF FORCE MAJEURE

If, within a reasonable time after a Force Majeure Event that has caused Contractor to suspend or delay performance of the Work, action to be undertaken at the expense of FPL has been identified and recommended to Contractor, and Contractor has failed within five (5) days after receipt of notice thereof from FPL to take such action as Contractor could lawfully and reasonably initiate to remove or relieve either the Force Majeure Event or its direct or indirect effects, FPL may, in its sole discretion and after notice to Contractor, initiate such reasonable measures as will be designed to remove or relieve such Force Majeure Event or its direct or indirect effects and thereafter require Contractor to resume full or partial performance of the Work. To the extent Contractor's failure to take such measures results in expense in addition to what FPL would have paid to Contractor (whether as part of the original Contract Price or as additional compensation to the extent the requested measures constituted a Change Order altering the scope of the Work) had Contractor taken such measures, such additional expense shall be for Contractor's account.

14.5 NOTICE OF FPL CAUSED DELAY

14.5.1 In the event Contractor desires to claim an FPL Caused Delay, Contractor shall within five (5) Business Days after it knows or should have known of the occurrence of the FPL Caused Delay, give FPL written notice describing the details of the FPL Caused Delay, the anticipated length of such delay and any other affect on Contractor's performance of its obligations hereunder. Within fifteen (15) days after initial notification, Contractor shall:

(a) Provide to FPL demonstrable proof of the occurrence and duration of such FPL Caused Delay and, if requested by FPL, such proof shall be provided, and in any event verified, by an independent third party reasonably acceptable to FPL and Contractor at the sole cost and expense of Contractor; and

(b) Thereafter provide FPL with periodic supplemental updates to reflect any change in information given to FPL as often as requested by FPL.

14.5.2 In the event that Contractor claims an FPL Caused Delay in violation of this provision, FPL shall be entitled to set-off against any payments due to Contractor or draw upon any security provided by Contractor (including the Letter of Credit) to compensate FPL for all costs (including reasonable attorneys' and other consultants' fees) incurred in enforcing this Section 14.5.

14.6 DELAY FROM FPL CAUSED DELAY

14.6.1 So long as the conditions set forth in this Section 14.6, are satisfied and subject to Section 14.7, PERFORMANCE NOT EXCUSED, Contractor shall not be responsible or liable for, or deemed in breach of the Contract Documents because of, any failure or delay in completing the Work in accordance with the Project Schedule or achieving Provisional Acceptance by the Guaranteed Provisional Acceptance Date to the extent that such failure has been caused by one or more FPL Caused Delays, and in such event, except as otherwise provided herein, the start date or period for completion of any portion of the Work shall be extended, on the condition that:

(a) Such suspension of performance and extension of time shall be of no greater scope and of no longer duration than is required by the effects of the FPL Caused Delay;

(b) Contractor complies with Section 14.5, NOTICE OF FPL CAUSED DELAY; and

(c) Contractor provides all assistance reasonably requested by FPL for the elimination or mitigation of the FPL Caused Delay.

14.6.2 In the event Contractor desires to claim an FPL Caused Delay, it must submit a request for Changes pursuant to Section 6.2, CHANGE ORDERS REQUESTED BY CONTRACTOR, of Article VI, CHANGE ORDERS, and Contractor shall be entitled to suspension of performance or extension of time (including an extension of the Guaranteed Provisional Acceptance Date) together with demonstrated, justified and

ECRC-08-3292 HEARING EXHIBIT - 00000314

reasonable additional costs incurred by reason of such delay to the extent agreed upon by both Parties pursuant to a Change Order in accordance with Section 6.2, CHANGE ORDERS REQUESTED BY CONTRACTOR, of Article VI, CHANGE ORDERS. Failure to comply with the terms of this Section 14.6, shall constitute a waiver of any claims for an increase in the Project Schedule or the Contract Price as a result of an FPL Caused Delay.

14.7 PERFORMANCE NOT EXCUSED

The payment of money owed shall not be excused because of a Force Majeure Event or FPL Caused Delay. In addition, a Party shall not be excused under this Article from timely performance of its obligations hereunder to the extent that the claimed Force Majeure Event or FPL Caused Delay was caused by any negligent or intentional acts, errors, or omissions, or for any breach or default of the Contract Documents by such Party. Furthermore, no suspension of performance or extension of time shall relieve the Party benefiting therefrom from any liability for any breach of the obligations that were suspended or failure to comply with the time period that was extended to the extent such breach or failure occurred prior to the occurrence of the applicable Force Majeure Event or FPL Caused Delay. Notwithstanding anything contained herein to the contrary, Contractor shall not withdraw Contractor's Equipment and personnel from the Job Site or otherwise demobilize without the prior authorization of FPL. Contractor shall not be entitled to receive reimbursement for its costs of demobilization and/or remobilization as a result of any Force Majeure Event.

ARTICLE XV.
TERMINATION

15.1 CONTRACTOR EVENTS OF DEFAULT

The occurrence of any of the following events shall constitute an event of default by Contractor (each a "Contractor Event of Default"):

15.1.1 The failure of Contractor, subject to the grace period provided in Section 11.1, COMPLETION GUARANTEE, of Article XI, CONTRACTOR GUARANTEES AND LIQUIDATED DAMAGES, to achieve Provisional Acceptance by the Guaranteed Provisional Acceptance Date;

15.1.2 Intentionally Deleted.

15.1.3 The failure of Contractor to achieve Final Acceptance within two hundred and twenty five (225) days after the Guaranteed Provisional Acceptance Date;

15.1.4 The failure of the Plant to continue to operate at Minimum Performance Level after Provisional Acceptance and prior to Final Acceptance, unless such failure is caused by FPL's failure to properly operate and maintain the Plant in accordance with Contractor's written instructions provided hereunder;

15.1.5 The Plant, during the period of time between Provisional Acceptance and Final Acceptance, is not capable of being operated in accordance with Plant operating procedures and all Applicable Laws and Applicable Permits, and other requirements of the Agreement, and all operating conditions specified in the Scope of Work;

15.1.6 The failure by Contractor to pay liquidated damages as required herein;

15.1.7 Any failure by Contractor to make any other payment or payments required to be made to FPL under the Contract Documents within five (5) Business Days after receipt of written notice from FPL of Contractor's failure to make such other payment or payments (except, in the case of payments other than Schedule Liquidated Damages, to the extent Contractor disputes such other payment or payments in good faith and in accordance with the terms of this Agreement);

15.1.8 Any of the following occurs:

(a) Contractor fails to supply sufficient skilled workers or suitable materials or equipment;

(b) Contractor fails to make prompt payments when due to Subcontractors or Vendors for labor, materials or equipment;

ECRC-08-3293 HEARING EXHIBIT - 00000315

(c) Contractor suspends performance of a material portion of the Work (other than as provided in: (i) Article XIV, FORCE MAJEURE AND FPL CAUSED DELAY; (ii) Section 15.4.1, Suspension by FPL for Convenience, (iii) Section 15.7, TERMINATION BY CONTRACTOR DUE TO FPL DEFAULT; or (iv) pursuant to a Change Order); or

(d) Contractor fails to comply with any provision of any Applicable Law,

and if in each paragraph (a) through (d) of this Section, such condition remains unremedied for thirty (30) days following written notice thereof by FPL, or for such longer period, not to exceed sixty (60) days, during which time Contractor diligently pursues the cure of such material breach, if such material breach is capable of being cured;

15.1.9 The failure by Contractor to deliver any recovery plan described in Section 5.3.3, of Section 5.3, PROJECT SCHEDULE, of Article V, PROJECT SCHEDULE, within thirty (30) days after the date such recovery plan is due pursuant to the terms of such Section, or following approval of a recovery plan pursuant to such Section, the failure of Contractor to meet the schedule set forth in such recovery plan;

15.1.10 Any breach by Contractor of any representation or warranty made by Contractor in Article XIII, REPRESENTATIONS;

15.1.11 Any breach by Contractor of any obligation, covenant or agreement of Contractor hereunder other than those breaches specified in this Section 15.1, and:

(a) Such breach is not cured by Contractor within fifteen (15) days after notice thereof from FPL; or

(b) If such breach is not capable of being cured within such fifteen (15) day period (as determined by FPL in its sole discretion), Contractor fails to:

(i) Commence to cure such breach within such fifteen (15) day period;

(ii) Thereafter diligently proceed to cure such breach in a manner satisfactory to FPL in its sole discretion;

(iii) Cure such breach within ninety (90) days after notice thereof from FPL;

15.1.12 Any of the following occurs:

(a) Contractor or Contractor Parent Company consents to the appointment of or taking possession by, a receiver, a trustee, custodian, or liquidator of itself or of a substantial part of its assets, or fails or admits in writing its inability to pay its debts generally as they become due, or makes a general assignment for the benefit of creditors;

(b) Contractor or the Contractor Parent Company files a voluntary petition in bankruptcy or a voluntary petition or an answer seeking reorganization in a proceeding under any applicable bankruptcy or insolvency laws or an answer admitting the material allegations of a petition filed against it in any such proceeding, or seeks relief by voluntary petition, answer or consent, under the provisions of any now existing or future bankruptcy, insolvency or other similar law providing for the liquidation, reorganization, or winding up of corporations, or providing for an agreement, composition, extension, or adjustment with its creditors;

(c) A substantial part of Contractor's or the Contractor Parent Company's assets is subject to the appointment of a receiver, trustee, liquidator, or custodian by court order and such order shall remain in effect for more than thirty (30) days; or

(d) Contractor or the Contractor Parent Company is adjudged bankrupt or insolvent, has any property sequestered by court order and such order shall remain in effect for more than thirty (30) days, or has filed against it a petition under any bankruptcy, reorganization, arrangement, insolvency, readjustment of debt, dissolution or liquidation law of any jurisdiction, whether now or hereafter in effect, and such petition shall not be dismissed within thirty (30) days of such filing;

ECRC-08-3294 HEARING EXHIBIT - 00000316

15.1.13 The dissolution of Contractor, except for the purpose of merger, consolidation or reorganization where the successor expressly assumes Contractor's obligations hereunder and such assignment and assumption does not materially adversely affect the ability of the successor to perform its obligations under the Contract Documents and the Parent Guaranty remains in full force and effect for the obligations of such successor;

15.1.14 The transfer by Contractor of all or a substantial portion of the:

(a) Rights and/or obligations of Contractor hereunder, except for an assignment permitted hereunder; or

(b) Assets or obligations of Contractor, except where the transferee expressly assumes the transferred obligations and such transfer does not materially adversely affect the ability of Contractor or the transferee, as applicable, to perform its obligations under the Contract Documents, as determined by FPL in its sole discretion;

15.1.15 The failure of Contractor to provide and maintain in full force and effect any Contractor Parent Guaranty as required pursuant to Section 11.8, PARENT GUARANTY, of Article XI, CONTRACTOR GUARANTEES AND LIQUIDATED DAMAGES and, in the event that a Credit Trigger Event has occurred after the Final Acceptance Date, the failure of Contractor to provide and maintain a Letter of Credit (or such other collateral permitted pursuant to such Section 11.8) in the face amount required in accordance with paragraph 3 of Appendix E – Credit Trigger Event;

15.1.16 Any failure by Contractor to maintain the insurance coverages required of it in accordance with Article IX, INSURANCE;

15.1.17 Any failure of Contractor to maintain the Letter of Credit in accordance with Section 7.5, LETTERS OF CREDIT, of Article VII, CONTRACT PRICE; PAYMENTS TO CONTRACTOR, including but not limited to any adjustment in the stated amount thereof (or posting of additional collateral permitted pursuant to such Section 7.5) upon the occurrence of a Credit Trigger Event; unless the available amount thereunder (as such available amount may be increased upon the occurrence of a Credit Trigger Event) has been drawn in full in accordance with the terms thereof;

15.1.18 Any abandonment of the Work by Contractor, where "Abandonment" for the purposes of this Section shall mean that Contractor has substantially reduced personnel at the Job Site or removed required equipment from the Job Site such that, in the opinion of an experienced construction manager, Contractor would not be capable of completing the Critical Milestones in accordance with the Project Schedule; or

15.1.19 The occurrence of a Credit Event of Default.

15.2 TERMINATION BY FPL DUE TO CONTRACTOR DEFAULT; OTHER REMEDIES.

15.2.1 Upon the occurrence of a Contractor Event of Default, FPL may, at its option, terminate this Agreement, without prejudice to any other rights and remedies available to FPL under this Agreement, by giving written notice thereof to Contractor, which termination shall be effective upon the giving of such notice by FPL.

15.2.2 In the event of a termination by FPL under this Section 15.2, FPL shall have the right to take possession of and use all of the Contractor Equipment located at the Job Site on the date of such termination for the purpose of completing the Work and may employ any other Person to complete the Work by whatever method that FPL may deem necessary. In addition, FPL may make such expenditures as in FPL's sole judgment will accomplish the timely completion of the Work in accordance with the terms hereof.

15.2.3 In the event of termination by FPL under this Section 15.2, Contractor shall not be entitled to receive any further payments under the Contract Documents (other than undisputed payments owed and payable to Contractor hereunder prior to the date of such termination).

15.2.4 In the event of termination by FPL under this Section 15.2, Contractor shall be responsible for and shall reimburse FPL for the following amounts:

ECRC-08-3295 HEARING EXHIBIT - 00000317

(a) All reasonable costs and expenses incurred by FPL to engage a substitute contractor to complete (or cure deficiencies in) the Work, including, without limitation, overhead and legal, engineering and other professional expenses;

(b) All reasonable costs and expenses incurred in connection with the termination of the Contract Documents, including costs and expenses incurred in connection with the obligations set forth under Section 15.9, OBLIGATIONS UPON TERMINATION;

(c) The amount by which:

(i) The cost reasonable to complete (or cure deficiencies in) the Work, exceeds

(ii) The balance of the Contract Price unpaid at the time of the termination; and

(d) All actual damages occasioned by reason of said default, except that Parties agree that Schedule Liquidated Damages shall apply in lieu of delay damages for late completion.

15.2.5 Upon the occurrence and during the continuance of a Contractor Event of Default but prior to termination of this Agreement by FPL, FPL may, without prejudice to any of its other rights or remedies:

(a) Seek performance by any guarantor of Contractor's obligations hereunder;

(b) Seek equitable relief to cause Contractor to take action or to refrain from taking action pursuant to this Agreement, or to make restitution of amounts improperly received under this Agreement;

(c) Make such payments or perform such obligations as are required to cure such Contractor Event of Default, and then draw on or make a claim against the Letter of Credit or other security provided pursuant to this Agreement for the cost of such payment or performance and/or offset the cost of such payment or performance against payments otherwise due to Contractor under this Agreement; provided that FPL shall be under no obligation to cure any such Contractor Event of Default;

(d) Seek damages as provided in Section 15.2.4, including proceeding against any bond, guarantee, letter of credit, or other security given by or for the benefit of Contractor for its performance under this Agreement;

(e) Require direct payment or co-payment to Subcontractors or Vendors and any such payments or co-payments shall be credited against amounts due to Contractor under the Agreement; or

(f) Assign to FPL any agreement or purchase order with a Subcontractor or Vendor, provided that:

(i) FPL shall assume the obligations under such agreement or purchase order accruing after the date of such assignment;

(ii) If requested by FPL, Contractor shall remain responsible for administering and managing such agreement or purchase order (including enforcing the warranty obligations thereunder); and

(iii) In no event shall Contractor be relieved of its obligation to achieve Provisional Acceptance or Final Acceptance as a result of such assignment.

15.3 TERMINATION BY FPL FOR CONVENIENCE.

15.3.1 FPL may terminate this Agreement at any time for any reason in its sole discretion by giving written notice thereof to Contractor, which termination shall be effective upon the giving of such notice by FPL. Upon receiving any such notice of termination, Contractor shall stop performing the Work and, except as otherwise directed by FPL, shall cancel as quickly as possible all orders placed by it with Subcontractors and Vendors and shall use all reasonable efforts to minimize cancellation charges and other costs and expenses associated with the termination of the Agreement. Contractor shall also promptly assign all subcontracts and purchase orders which FPL wishes to retain in accordance with Section 15.9, OBLIGATIONS UPON TERMINATION.

ECRC-08-3296 HEARING EXHIBIT - 00000318

15.3.2 In the event of a termination by FPL under Section 15.3.1, Contractor shall be entitled to receive, as its sole and exclusive remedy for such termination, a termination payment ("Termination Payment") equal to the termination amount as set forth in the Termination Payment Schedule.

15.3.3 Intentionally Deleted.

15.3.4 In addition to FPL's right to terminate set forth in Section 15.3.1 above, FPL may terminate this Agreement because any of the following occurs pursuant to the Power Plant Siting Act, § 403.501-518, Florida Statutes and/or Chapter 62-17, Part I, (§ 62-17.011-62-17.293) of the Florida Administrative Code, the procedural rule implementing the act or otherwise:

(a) FPL does not select the Project pursuant to the "Request for Proposals";

(b) The Siting Board does not issue a "Land Use Order" for the Project;

(c) The Siting Board does not issue a "Final Certification Order";

(d) The Florida Department of Environmental Protection does not issue the "Air Construction Permit";

(e) The State of Florida Public Service Commission does not issue a "Need Order" for the Project;

(f) The Project is unable to obtain the applicable local, county, state or federal permits not covered by the Power Plant Siting Act;

(g) The administrative law judge responsible for recommending the Project to the Governor fails to recommend the Project;

(h) The Governor fails to approve the Project;

(i) Any other Government Authority whose approval or recommendation is necessary for the Project to be constructed fails to grant such approval or give such recommendation; or

(j) As a condition of obtaining any of the foregoing approvals or recommendations, FPL is required to materially amend the proposal for the Project (as determined in FPL's sole discretion);

then Contractor shall not be entitled to receive any further payments under the Contract Documents, except for the applicable Termination Payment.

15.3.5 Any amount owed pursuant to this Section 15.3, shall be subject to adjustment to the extent any Work contains Defects.

15.4 SUSPENSION BY FPL FOR CONVENIENCE.

15.4.1 FPL may suspend all or a portion of the Work to be performed under the Contract Documents at any time for any reason in its sole discretion by giving written notice thereof to Contractor. Such suspension, not to exceed 90 days individually and 180 days total while this Agreement is in effect, shall continue for the period specified in the notice of suspension; provided that Contractor agrees to resume performance of the Work promptly upon receipt of notice from FPL. Upon receiving any such notice of suspension, unless the notice requires otherwise, Contractor shall:

(a) Immediately discontinue the Work on the date and to the extent specified in the notice;

(b) Place no further orders or subcontracts for Equipment, services or facilities with respect to suspended Work, other than to the extent required in the notice;

(c) Promptly make every reasonable effort to obtain suspension, with terms reasonably satisfactory to FPL, of all orders, subcontracts and rental agreements to the extent they relate to performance of suspended Work;

(d) Continue to protect and maintain the Work performed, including those portions on which Work has been suspended; and

ECRC-08-3297 HEARING EXHIBIT - 00000319

(e) Take any other reasonable steps to minimize costs and expenses associated with such suspension.

15.4.2 Except as provided in Section 15.4.3, below, as full compensation for any suspension under this Section, Contractor will be reimbursed by FPL for the costs, as reasonably incurred, without duplication of any item, to the extent that such costs directly result from such suspension of the Work and to the extent that they do not reflect reimbursement for Contractor's, Vendors' or Subcontractors' anticipated profit from unperformed Work, including all necessary and reasonable costs incurred in connection with demobilization and remobilization of Contractor's facility and Labor and Contractor Equipment, plus an amount equal to 15% of such amounts.

15.4.3 Upon delivery of notice by FPL to Contractor to resume suspended Work, Contractor shall, as promptly as reasonably possible, resume performance under the Contract Documents to the extent required in the notice. Contractor may request a Change Order as a result of a suspension of Work under this Section within fourteen (14) days after receipt of notice to resume the suspended Work; provided that such suspension was not due to Contractor's negligence, willful misconduct or noncompliance with the terms of this Agreement. Contractor shall submit to FPL a request for Changes in accordance with Article VI, CHANGE ORDERS, and such request shall be accompanied by sufficient documentation setting forth the schedule impact and monetary extent of such claim in sufficient detail to permit thorough analysis by FPL; provided that if such information is not available within such fourteen (14) day period, Contractor shall notify FPL of such within such fourteen (14) day period and provide an expected date (which shall be as soon as reasonably practicable) for providing such information. If Contractor does not submit a request for Changes within such fourteen (14) day period and provide the information regarding schedule and monetary impact as required above within such fourteen (14) day period (or by the expected date if not possible during such fourteen (14) day period), Contractor shall not be entitled to any additional consideration or other amendments hereto and shall be deemed to have waived all claims and offsets against FPL as a result of the suspension of Work. Contractor shall permit access by FPL to pertinent records for purposes of reviewing the claims by Contractor of schedule and monetary impact.

15.4.4 Contractor shall not have any recourse to the provisions of Sections 15.4.2 or 15.4.3 if and to the extent that any suspension by FPL under this Section 15.4.1 occurs contemporaneously with any Force Majeure Event, FPL Caused Delay or a breach of Contractor's obligations under this Agreement.

15.5 [INTENTIONALLY DELETED]

15.6 FPL EVENTS OF DEFAULT

The occurrence and continuation of any of the following events shall constitute an event of default by FPL (each, an "FPL Event of Default"):

15.6.1 A failure by FPL to make payment of any undisputed amount when due, and such breach is not cured by FPL within fifteen (15) days after FPL's receipt of notice thereof from Contractor; or

15.6.2 Any breach by FPL of any representation or warranty made by FPL in Article XIII, REPRESENTATIONS;

15.6.3 Any of the following occurs:

(a) FPL consents to the appointment of or taking possession by, a receiver, a trustee, custodian, or liquidator of itself or of a substantial part of its assets, or fails or admits in writing its inability to pay its debts generally as they become due, or makes a general assignment for the benefit of creditors;

(b) FPL files a voluntary petition in bankruptcy or a voluntary petition or an answer seeking reorganization in a proceeding under any applicable bankruptcy or insolvency laws or an answer admitting the material allegations of a petition filed against it in any such proceeding, or seeks relief by voluntary petition, answer or consent, under the provisions of any now existing or future bankruptcy, insolvency or other similar law providing for the liquidation, reorganization, or winding up of corporations, or providing for an agreement, composition, extension, or adjustment with its creditors;

ECRC-08-3298 HEARING EXHIBIT - 00000320

(c) A substantial part of FPL's assets is subject to the appointment of a receiver, trustee, liquidator, or custodian by court order and such order shall remain in effect for more than thirty (30) days; or

(d) FPL is adjudged bankrupt or insolvent, has any property sequestered by court order and such order shall remain in effect for more than thirty (30) days, or has filed against it a petition under any bankruptcy, reorganization, arrangement, insolvency, readjustment of debt, dissolution or liquidation law of any jurisdiction, whether now or hereafter in effect, and such petition shall not be dismissed within thirty (30) days of such filing.

15.6.4 Any breach by FPL of any obligation, covenant or agreement of FPL hereunder other than those breaches specified in this Section 15.6, and:

(a) Such breach is not cured by FPL within fifteen (15) days after notice thereof from Contractor; or

(b) If such breach is not capable of being cured within such fifteen (15) day period (as determined by Contractor in its sole discretion), FPL fails to:

(i) Commence to cure such breach within such fifteen (15) day period;

(ii) Thereafter diligently proceed to cure such breach in a manner satisfactory to Contractor in its sole discretion; or

(iii) Cure such breach within ninety (90) days after notice thereof from Contractor.

15.6.5 The dissolution of FPL, except for the purpose of merger, consolidation or reorganization where the successor expressly assumes FPL's obligations hereunder and such assignment and assumption does not materially adversely affect the ability of the successor to perform its obligations under the Contract Documents.

15.6.6 The transfer by FPL of all or a substantial portion of the:

(a) Rights and/or obligations of FPL hereunder, except for an assignment permitted hereunder; or

(b) Assets or obligations of FPL, except where the transferee expressly assumes the transferred obligations and such transfer does not materially adversely affect the ability of FPL or the transferee, as applicable, to perform its obligations under the Contract Documents, as determined by Contractor in its sole discretion;

15.6.7 Any failure by FPL to maintain the insurance coverages required of it in accordance with Article IX, INSURANCE;

15.7 TERMINATION BY CONTRACTOR DUE TO FPL DEFAULT.

15.7.1 Subject to Section 15.7.2, below, upon the occurrence and during the continuance of an FPL Event of Default beyond the applicable grace period, Contractor may terminate this Agreement thirty (30) Days after giving written notice thereof to FPL so long as the amount owed by FPL (other than any amount disputed in accordance with the terms of this Agreement) is not paid within such period.

15.7.2 In the event of such termination, Contractor shall be entitled to receive an amount equal to the Termination Payment as its sole and exclusive remedy for such termination.

15.8 CONTINUING OBLIGATIONS AND REMEDIES DURING EVENT OF DEFAULT

In the event of the occurrence of any default hereunder:

15.8.1 Neither Party shall be relieved of any of its liabilities or obligations hereunder, unless and until such liabilities and obligations are terminated in accordance with the provisions hereof; and

15.8.2 Each Party shall have the right to pursue any right or remedy available to it, hereunder.

15.9 OBLIGATIONS UPON TERMINATION

Upon a termination of this Agreement pursuant to Section 15.2:

ECRC-08-3299 HEARING EXHIBIT - 00000321

15.9.1 Contractor shall leave the Job Site and remove from the Job Site all Contractor Equipment, waste, rubbish and Hazardous Material as FPL may request;

15.9.2 FPL shall take possession of the Job Site and of the Equipment (whether at the Job Site, in transit or otherwise);

15.9.3 Contractor shall promptly assign to FPL or its designee any contract rights (including warranties, licenses, patents and copyrights) that it has to any and all Equipment and the Work, including, without limitation, contracts with Subcontractors and Vendors, and Contractor shall execute such documents as may be reasonably requested by FPL to evidence such assignment, subject to FPL's assumption of same and, if required, FPL's adequate assurance to such Subcontractors or Vendors regarding FPL's ability to pay;

15.9.4 Contractor shall promptly furnish FPL with copies of all Drawings and, to the extent available, Final Plans, and copies of all computer files containing Drawings or Final Plans;

15.9.5 Contractor hereby grants FPL and its designee with the right to use, free of charge, all patented, copyrighted and other proprietary information relating to the Work that FPL deems necessary to complete the Work, and Contractor shall execute such documents as may be reasonably requested by FPL to evidence such right;

15.9.6 Contractor shall assist FPL in preparing an inventory of all Equipment in use or in storage at the Job Site;

15.9.7 Contractor shall perform all Remediation Work requested by FPL; and

15.9.8 Contractor shall take such other action as required hereunder upon termination of this Agreement.

15.10 TERMINATION AND SURVIVAL OF TERMS

Upon termination of this Agreement pursuant to this Article, the rights and obligations of the Parties hereunder shall terminate, except for the rights and obligations:

15.10.1 Accrued as of the date of termination;

15.10.2 Arising out of events occurring prior to the date of termination; and

15.10.3 Of the Parties which survive termination, including the rights and obligations forth in Articles XII, CONTRACTOR'S WARRANTIES, and XIII, REPRESENTATIONS.

ARTICLE XVI.
INDEMNIFICATION

16.1 CONTRACTOR INDEMNIFICATION

Contractor agrees to reimburse, indemnify, defend and hold FPL, the Financing Parties and their Affiliates and each of their respective directors, officers, employees, representatives, agents, advisors, consultants, counsel and assigns harmless from and against, on an After-Tax Basis, any and all losses, claims, obligations, demands, assessments, penalties, liabilities, costs, damages and expenses (including reasonable attorneys' fees and expenses) (collectively, "Damages") asserted against or incurred by such indemnitees by reason of or resulting from any and all of the following:

16.1.1 Any bodily injury, death or damage to property caused by any act or omission (including strict liability) or willful misconduct relating to or arising out of the performance of the Work or any curative action under any warranty following performance of the Work, of Contractor or any Affiliate thereof, any Subcontractor or Vendor, or anyone directly or indirectly employed by any of them, or anyone for whose acts such Person may be liable;

16.1.2 Any third party claims resulting in bodily or property damage arising out of defective and/or nonconforming Work relating to or arising out of the performance of the Work;

16.1.3 Claims by any Government Authority for any Contractor Taxes;

16.1.4 Any pollution or contamination which originates from sources in Contractor's or its Subcontractors' or Vendors' possession, use or control or caused by the release by Contractor or its Subcontractors or Vendors

ECRC-08-3300 HEARING EXHIBIT - 00000322

(excluding Pre-Existing Hazardous Material other than as provided in (e) below), including, without limitation, from Hazardous Material, toxic waste, industrial hazards, sanitary waste, fuel, lubricant, motor oil, paint, solvent, bilge and garbage;

16.1.5 Any release or exacerbation of Pre-Existing Hazardous Materials or rendering removal or remediation of Pre-Existing Hazardous Materials more costly, which in any of such events is caused by any negligent act or omission of Contractor or any Affiliate thereof, any Subcontractor or Vendor, or anyone directly or indirectly employed by any of them, or anyone for whose acts such Person may be liable;

16.1.6 To the extent FPL has paid all undisputed amounts due pursuant to the Contract Documents, any Lien, as set forth in Section 3.25, CLAIMS AND LIENS FOR LABOR AND MATERIALS, of Article III, CERTAIN OBLIGATIONS AND RESPONSIBILITIES OF CONTRACTOR, on the Equipment, the Job Site or any fixtures or personal property included in the Work (whether or not any such Lien is valid or enforceable) created by, through or under, or as a result of any act or omission (or alleged act or omission) of, Contractor or any Subcontractor, Vendor or other Person providing labor or materials in connection with the Work;

16.1.7 Any claim, action or proceeding by any Person for unauthorized disclosure, use, infringement or misappropriation of any Intellectual Property Right arising from:

(a) Contractor's performance (or that of its Affiliates, Subcontractors or Vendors) under the Contract Documents, including, without limitation, the Work, Equipment, Drawings, Final Plans or other items and services provided by Contractor or any Subcontractor or Vendor hereunder;

(b) The use or ownership of any Contractor Deliverable;

(c) Any license granted hereunder; or

(d) The design, engineering, construction, use, operation or ownership of the Plant or any portion thereof;.

(Without limiting the provisions of Section 12.3, PROPRIETARY RIGHTS, of Article XII, CONTRACTOR'S WARRANTIES, if FPL is enjoined from completing the Project or any part thereof, or from the use, operation or enjoyment of the Project or any part thereof, as a result of such claim or legal action or any litigation based thereon, Contractor shall promptly use its best efforts to have such injunction removed at no cost to FPL.)

16.1.8 Any vitiation of any insurance policy procured under Article IX, INSURANCE, as a result of Contractor's failure to comply with any of the requirements set forth in such policy or any other act by Contractor or any Subcontractor or Vendor;

16.1.9 Any failure of the Project, as designed, constructed or completed by Contractor, to comply with, or be capable of operating in compliance with, Applicable Laws or the conditions or provisions of Applicable Permits;

16.1.10 Any failure of Contractor to comply with Applicable Laws or the conditions or provisions of Applicable Permits; and

16.1.11 Any claims with respect to employer's liability or worker's compensation filed by any employee of Contractor or any of its Subcontractors or Vendors.

16.2 FPL INDEMNIFICATION

FPL agrees to reimburse, indemnify, defend and hold Contractor and its Affiliates and each of their respective directors, officers, employees, representatives, agents, advisors, consultants and counsel harmless from and against, on an After-Tax Basis, any and all Damages asserted against or incurred by such indemnitees by reason of or resulting from any and all of the following:

16.2.1 Any bodily injury, death or damage to property caused by (a) any act or omission (including strict liability) or willful misconduct of FPL or its agents or employees or others under FPL's direct control or (b) a breach by FPL of its obligations hereunder;

ECRC-08-3301 HEARING EXHIBIT - 00000323

16.2.2 Claims by any Government Authority for any FPL Taxes;

16.2.3 Any Pre-Existing Hazardous Material on the Property Site, except to the extent covered by Section 16.1.5, Contractor Release or Exacerbation; and

16.2.4 Any claims with respect to employer's liability or worker's compensation filed by any employee of FPL.

16.3 CONDITIONS OF INDEMNIFICATION

The respective rights and obligations of the Parties and the other indemnitees under this Article with respect to claims resulting from the assertion of liability by third parties shall be subject to the following terms and conditions:

16.3.1 *Notice of Proceedings*. Within fourteen (14) days (or such earlier time as might be required to avoid prejudicing the indemnifying Party's position) after receipt of notice of commencement of any legal action or of any claims against such indemnitee in respect of which indemnification will be sought, the Person claiming to be indemnified under the terms of this Section (the "Indemnified Person") shall give the Party from which indemnification is sought (the "Indemnifying Party") written notice thereof, together with a copy of such claim, process or other legal pleading. Failure of the Indemnified Person to give such notice will not reduce or relieve the Indemnifying Party of liability hereunder unless and to the extent that the Indemnifying Party was precluded from defending such claim, action, suit or proceeding as a result of the failure of the Indemnified Person to give such notice. In any event, the failure to so notify shall not relieve the Indemnifying Party from any liability that it may have to the Indemnified Person otherwise than under this Article.

16.3.2 *Conduct of Proceedings*. Each Party and each other indemnitee shall have the right, but not the obligation, to contest, defend and litigate any claim, action, suit or proceeding by any third party alleged or asserted against it arising out of any matter in respect of which it is entitled to be indemnified hereunder and the reasonable costs and expenses thereof (including reasonable attorneys' fees and expert witness fees) shall be subject to the said indemnity; provided that the indemnifying Party shall be entitled, at its option, to assume and control the defense of such claim; action, suit or proceeding at its expense upon its giving written notice thereof to the Indemnified Person. The Indemnified Person shall provide reasonable assistance to the Indemnifying Party, at the Indemnifying Party's expense, in connection with such claim, action, suit or proceeding. Upon such assumption, the Indemnifying Party shall reimburse the Indemnified Person for the reasonable costs and expenses previously incurred by it prior to the assumption of such defense by the Indemnifying Party. The Indemnifying Party shall keep the Indemnified Person informed as to the status and progress of such claim, action, suit or proceeding. Except as set forth in paragraph (c) below, in the event the Indemnifying Party assumes the control of the defense, the Indemnifying Party will not be liable to the Indemnified Person under this Article for any legal fees or expenses subsequently incurred by the Indemnified Person in connection with such defense. The Indemnifying Party shall control the settlement of all claims over which it has assumed the defense; provided, however, that the Indemnifying Party shall not agree to or conclude any settlement that affects the Indemnified Person without the prior written approval of the Indemnified Person, (whose said approval shall not be unreasonably withheld).

16.3.3 *Representation*. In the event the Indemnifying Party assumes control of the defense, the Indemnified Person shall have the right to employ its own counsel and such counsel may participate in such claim, action, suit or proceeding, but the fees and expenses of such counsel shall be at the expense of such Indemnified Person, when and as incurred, unless the:

(a) Employment of counsel by such Indemnified Person has been authorized in writing by the Indemnifying Party;

(b) Indemnified Person shall have reasonably concluded that there may be a conflict of interest between the Indemnifying Party and the Indemnified Person in the conduct of the defense of such action; or

ECRC-08-3302 HEARING EXHIBIT - 00000324

(c) Indemnified Person shall have reasonably concluded and specifically notified the Indemnifying Party either that there may be specific defense available to it which are different from or additional to those available to the Indemnifying Party.

If any of the preceding clauses (a) through (c) shall be applicable, then counsel for the Indemnified Person shall have the right to direct the defense of such claim, action, suit or proceeding on behalf of the Indemnified Person and the reasonable fees and expenses of such counsel shall be reimbursed by the Indemnifying Party.

16.4 CONTRIBUTORY NEGLIGENCE

If the joint, concurring, comparative or contributory fault, negligence or willful misconduct of the Parties gives rise to Damages for which a Party is entitled to indemnification under this Article, then such Damages shall be allocated between the Parties in proportion to their respective degrees of fault, negligence or willful misconduct contributing to such Damages.

16.5 REMEDIES NOT EXCLUSIVE

The rights under this Article shall not be exclusive with respect to any other right or remedy provided for in the Contract Documents.

16.6 PAYMENT

All payments required to be made under this Article shall be made on an After-Tax Basis and within thirty (30) days of demand therefor.

16.7 SURVIVAL OF INDEMNIFICATION

The provisions of this Article shall survive the Final Acceptance Date and the termination of this Agreement.

ARTICLE XVII.
DISPUTE RESOLUTION

17.1 FRIENDLY CONSULTATION

In the event of any dispute, controversy or claim between the Parties arising out of or relating to the Contract Documents, or the breach, termination or invalidity thereof (collectively, a "Dispute"), the Parties shall attempt in the first instance to resolve such Dispute through friendly consultations between the Parties. If such consultations do not result in a resolution of the Dispute within thirty (30) days after notice of a Dispute is delivered by either Party, then either Party may pursue all of its remedies available pursuant to the Contract Documents. The Parties agree to attempt to resolve all Disputes arising hereunder promptly, equitably and in a good faith manner. The Parties further agree to provide each other with reasonable access during normal business hours to any and all non-privileged records, information and data pertaining to such Dispute.

17.2 LITIGATION.

17.2.1 If a Dispute cannot be resolved pursuant to Section 17.1, FRIENDLY CONSULTATION, and in the event of litigation arising hereunder, the Parties agree that the venue for such litigation shall be the courts of the State of Florida in Miami-Dade County or Palm Beach County, Florida or the United States District Court for the Southern District of Florida, unless such other location or forum is mutually agreed. The Parties irrevocably waive any objection which any of them may now or hereafter have to the bringing of any such action or proceeding in such respective jurisdictions, including any objection to the laying of venue based on the grounds of forum non conveniens and any objection based on the grounds of lack of in personam jurisdiction. To facilitate the comprehensive resolution of related disputes, and upon the sole discretion and request of FPL, Contractor agrees and will stipulate in any proceeding to the consolidation of any litigation or other proceeding arising out of or relating to this Agreement with any other litigation or other proceeding arising out of or relating to any other agreement relating to the Project.

17.2.2 IN ANY LITIGATION ARISING FROM OR RELATED TO THE CONTRACT DOCUMENTS, THE PARTIES HERETO EACH HEREBY KNOWINGLY, VOLUNTARILY AND INTENTIONALLY WAIVE THE RIGHT EACH MAY HAVE TO A TRIAL BY JURY WITH RESPECT TO ANY LITIGATION BASED HEREON, OR ARISING OUT OF, UNDER OR IN CONNECTION WITH THE

ECRC-08-3303 HEARING EXHIBIT - 00000325

CONTRACT DOCUMENTS, OR ANY COURSE OF CONDUCT, COURSE OF DEALING, STATEMENTS (WHETHER ORAL OR WRITTEN) OR ACTIONS OF EITHER PARTY TO THE CONTRACT DOCUMENTS. THIS PROVISION IS A MATERIAL INDUCEMENT FOR FPL AND CONTRACTOR TO ENTER INTO THIS AGREEMENT.

17.2.3 The rights and obligations of the Parties under this Article shall not be impaired, reduced or otherwise affected as a result of any of the following the:

(a) Receipt by a Party from any third party of any amounts in reimbursement of Damages that are the subject of the Dispute; or

(b) Assignment or transfer by either Party of any or all of its rights and/or obligations under the Contract Documents as permitted hereunder.

17.2.4 In the event of any Dispute pursuant to this Article XVII, Dispute Resolution, the prevailing Party shall be entitled to recover its reasonable attorneys' fees and costs incurred in connection therewith.

17.3 CONTINUING OBLIGATIONS AND RIGHTS

When any Dispute occurs and is the subject of friendly consultations or litigation, Contractor shall continue the Work in accordance with the Project Schedule and the terms hereof and FPL shall continue to make payments of undisputed amounts in accordance with the Contract Documents, and the Parties shall otherwise continue to exercise their rights, and fulfill their respective obligations, under the Contract Documents.

17.4 TOLLING STATUTE OF LIMITATIONS

All applicable statutes of limitation and defenses based upon the passage of time and similar contractual limitations shall be tolled while the procedures specified in this Article are pending. The Parties will take such action, if any, required to effectuate such tolling. Without prejudice to the procedures specified in this Article, a Party may file a complaint for statute of limitations purposes, if in its sole judgment such action may be necessary to preserve its claims or defenses. Despite such action, the Parties will continue to participate in good faith in the procedures specified in this Article.

17.5 AUDIT RIGHTS

In the event of a claim by FPL under this Agreement involving an amount greater than Fifty Thousand Dollars ($50,000), Contractor shall grant audit rights to FPL with respect to all relevant documentation pertaining to such claim

ARTICLE XVIII.
MISCELLANEOUS

18.1 ASSIGNMENT.

18.1.1 Except as expressly permitted in the Contract Documents, Contractor may not assign this Agreement, the Contract Documents or any portion hereof, or any of the rights or obligations hereunder, without the prior written consent of FPL, which consent shall not be unreasonably delayed. This Agreement shall inure to the benefit of, and be binding upon, the successors and permitted assigns of the Parties.

18.1.2 FPL shall be entitled to assign this Agreement, the Contract Documents and its rights and obligations hereunder (a) to any Affiliate, without the consent of Contractor and (b) to any other Person, with the consent of Contractor, which consent shall not be unreasonably withheld or delayed, and Contractor shall release FPL from all obligations hereunder upon any such assignment; provided, however, that notwithstanding any assignment pursuant to clause (a) above, FPL shall remain responsible for all financial obligations under this Agreement. In addition, Contractor hereby consents to the granting of a security interest in and an assignment by FPL of the Contract Documents and its rights herein to the Financing

Parties and their successors, assigns and designees. In furtherance of the foregoing, Contractor acknowledges that the Financing Parties may under certain circumstances assume the interests and rights of FPL under the Contract Documents.

18.1.3 Contractor acknowledges that the Financing Parties may under certain circumstances foreclose upon and sell, or cause FPL to sell or lease the Project and cause any new lessee or purchaser of the Plant to assume all of the interests, rights and obligations of FPL arising under the Contract Documents. In such event, Contractor agrees to the assignment by FPL and the Financing Parties of the Contract Documents and its rights herein to such purchaser or lessee and shall release FPL and the Financing Parties from all obligations hereunder upon any such assignment.

18.2 GOOD FAITH DEALINGS; AUTHORSHIP

The Parties undertake to act fairly and in good faith in relation to the performance and implementation of the Contract Documents and to take such other reasonable measures as may be necessary for the realization of its purposes and objectives. The Parties collectively have prepared the Contract Documents, and none of the provisions hereof shall be construed against one Party on the ground that such Party is the author of the Contract Documents or any part hereof.

18.3 CONFIDENTIALITY.

18.3.1 For purposes of this Agreement, "Confidential Information" shall mean:

(a) The contents of the Contract Documents;

(b) Any information relating to the negotiations or performance of the Contract Documents; and

(c) Any information provided pursuant to the Contract Documents relating to the Project, Plant, FPL, Contractor or their Affiliates which:

(i) The disclosing Party designates in writing as confidential, proprietary or the like and which is received by the other Party;

(ii) By its nature is such that the receiving Party should reasonably conclude that possession of such information is of material commercial or competitive value to the disclosing Party;

(iii) Relates to the configuration, operation, management processes or profitability of the Plant; or

(iv) Relates to Project partners or prospective Project partners of FPL, including the names thereof.

18.3.2 Information shall be Confidential Information for the purposes hereof regardless of:

(a) The form in which it is communicated or maintained (whether oral, written, electronic or visual);

(b) Whether of a business, financial, legal, technical, managerial or other nature; and

(c) Whether prepared by the disclosing Party or otherwise.

18.3.3 Each Party agrees to hold all Confidential Information in confidence and not disclose it other than to its Affiliates, contractors (or potential contractors), subcontractors, vendors, consultants, advisors, Financing Parties (or potential Financing Parties), employees, directors, officers, agents, advisors or representatives (collectively, the "Personnel") for purposes of the Project or to any purchaser of the Project or a direct or indirect interest in Owner. Each Party agrees that only Personnel who need to have access to Confidential Information in order to perform their duties will be authorized to receive the same, and then only to the extent needed and provided such Personnel have been advised of the obligations and restrictions set forth in this Section 18.3. Each Party shall be responsible for any breach of this Agreement by its Personnel.

18.3.4 Notwithstanding the foregoing, information shall not be deemed to be Confidential Information where it:

ECRC-08-3305 HEARING EXHIBIT - 00000327

(a) Is or becomes public information or otherwise generally available to the public through no act of or failure to act by the receiving Party;

(b) Was, prior to the date of this Agreement, already in the possession of the receiving Party and was not received by such Party directly or indirectly from the other Party;

(c) Is rightfully received by the receiving Party from a third party who is not prohibited from disclosing it to such Party and is not breaching any agreement by disclosing it to such Party;

(d) Is independently developed by the receiving Party without benefit of Confidential Information received from the other Party;

(e) Is the property of the Party disclosing such information;

(f) Is necessary or advisable for FPL to exercise its Intellectual Property Rights under this Agreement; or

(g) Is necessary or advisable to disclose such information for the purpose of enforcing or exercising the disclosing Party's rights hereunder.

Specific information shall not be deemed to be within the foregoing exceptions merely because it is embraced by more general information within such exceptions, nor shall a combination of features be deemed to be within such exceptions merely because the individual features are within such exceptions.

18.3.5 If a Party is required by Applicable Law or any Government Authority to disclose any Confidential Information, such Party shall promptly notify the other Party of such requirement prior to disclosure so that the other Party may seek an appropriate protective order and/or waive compliance with the terms of this Section 18.3. If such protective order or other remedy is not obtained, then such Party shall furnish only that portion of the Confidential Information which is legally required to be furnished by the Applicable Law or Government Authority; provided, however, that prior to making any such disclosure, such Party will:

(a) Minimize the amount of Confidential Information to be provided consistent with the interests of the other Party; and

(b) Make every reasonable effort (which shall include participation by the other Party in discussions with the Government Authority involved) to secure confidential treatment of the Confidential Information to be provided.

If efforts to secure confidential treatment are not successful, the other Party shall have the prior right to revise such information in a manner consonant with its interests and the requirements of the Government Authority involved.

18.3.6 Each Party acknowledges that the other Party would not have an adequate remedy at law for money damages if the covenants contained in this Section 18.3 were breached and that any such breach would cause the other Party irreparable harm. Accordingly, each Party also agrees that in the event of any breach or threatened breach of this Section 18.3 by such Party or its Personnel, the other Party, in addition to any other remedies it may have at law or in equity, shall be entitled, without the requirement of posting a bond or other security, to equitable relief, including injunctive relief and specific performance.

18.3.7 All right and title to, and interest in, FPL's Confidential Information shall remain with FPL. Subject to Section 3.32, all Confidential Information obtained, developed or created by or for Contractor exclusively for the Project, including copies thereof, is the exclusive property of FPL whether delivered to FPL or not. No right or license is granted to Contractor or any third party respecting the use of Confidential Information owned by FPL by virtue of this Agreement, except to the extent required for Contractor's performance of its obligations hereunder. Except for that Confidential Information which FPL requires to construct, operate, and/or maintain the Project and its power generation facilities, which Confidential Information shall not be subject to any obligation of return by FPL, at any time upon written request by a disclosing Party, the other Party shall promptly return to the disclosing Party all its Confidential Information,

ECRC-08-3306 HEARING EXHIBIT - 00000328

including all copies thereof, and shall promptly purge all electronic copies of such Confidential Information; provided that the other Party shall be entitled to keep one (1) copy of such Confidential Information for its legal records. The return of Confidential Information to the disclosing Party, the purging of electronic copies of Confidential Information or the retention of a copy of Confidential Information for legal records shall not release a Party from its obligations hereunder with respect to such Confidential Information.

18.3.8 Contractor shall coordinate with FPL with respect to, and provide advance copies to FPL for review of, the text of any proposed announcement or publication that include any non-public information concerning the Work prior to the dissemination thereof to the public or to any Person other than Subcontractors, Vendors, the Financing Parties or advisors of Contractor, in each case, who agree to keep such information confidential. If FPL delivers written notice to Contractor rejecting any such proposed announcement or publication within two (2) Business Days after receiving such advance copies, Contractor shall not make such public announcement or publication; provided, however, that Contractor may disseminate or release such information in response to requirements of Government Authorities.

18.4 NOTICE

18.4.1 Whenever a provision of the Contract Documents requires or permits any consent, approval, notice, request, or demand from one Party to another, the consent approval, notice, request, or demand must be in writing and delivered in accordance with this Section in order to be effective. Any such consent approval, notice, request or demand shall be delivered and received if:

(a) Personally delivered or if delivered by telegram or courier service, when actually received by the Party to whom notice is sent;

(b) Delivered by telex or facsimile, on the first Business Day following the day transmitted (with confirmation of receipt);

(c) Delivered by mail (whether actually received or not), at the close of business on the third Business Day following the day when placed in the mail, postage prepaid, certified or registered, addressed to the appropriate Party,

In each case, at the address and/or facsimile numbers of such Party set forth below (or at such other address as such Party may designate by written notice to the other Party in accordance with this Section):

(i) If to Contractor:

SunPower Corporation, Systems
1414 Harbour Way South
Richmond, California 94804
Attention: President
Fax: (510) 540-0552

With a copy to:

Latham & Watkins LLP
Sears Tower, Suite 5800
233 S. Wacker Drive
Chicago, IL 60606
Attention: Mark P. Ramsey
Fax: (312) 993-9767

(ii) If to FPL:

ECRC-08-3307 HEARING EXHIBIT - 00000329

Florida Power & Light Company
700 Universe Boulevard
Juno Beach, Florida
Attention: E. N. Scoville II
Director – Construction
Fax: (561) 694-3960

With a copy to:

Florida Power & Light Company
700 Universe Boulevard
Juno Beach, Florida
Attention: General Counsel
Fax: (561) 691-7305

18.4.2 Any Party may change its address, facsimile number or e-mail number for the purposes of this Agreement by giving notice thereof to the other Party in the manner provided herein.

18.5 WAIVER

No delay, failure or refusal on the part of any Party to exercise or enforce any right under the Contract Documents shall impair such right or be construed as a waiver of such right or any obligation of another Party, nor shall any single or partial exercise of any right hereunder preclude other or further exercise of any right. The failure of a Party to give notice to the other Parties of a breach of the Contract Documents shall not constitute a waiver thereof. Any waiver of any obligation or right hereunder shall not constitute a waiver of any other obligation or right, then existing or arising in the future. Each Party shall have the right to waive any of the terms and conditions of the Contract Documents that are for its benefit. To be effective, a waiver of any obligation or right must be in writing and signed by the Party waiving such obligation or right.

18.6 SEVERABILITY

If any provision of the Contract Documents is held to be illegal, invalid, or unenforceable under present or future laws, such provision shall be fully severable; the Contract Documents shall be construed and enforced as if such illegal, invalid or unenforceable provision had never comprised a part of the Contract Documents; and the remaining provisions of the Contract Documents shall remain in full force and effect and shall not be affected by the illegal, invalid, or unenforceable provision or by its severance from the Contract Documents. Furthermore, in lieu of such illegal, invalid or unenforceable provision, there shall be added automatically as a part of the Contract Documents a provision as similar in its terms to such illegal, invalid or unenforceable provision as may be possible and be legal, valid and enforceable.

18.7 GOVERNING LAW

The Contract Documents, and the rights and obligations of the Parties under or pursuant to the Contract Documents, shall be interpreted and construed according to the substantive laws of the State of Florida (regardless of any other jurisdiction's choice of law rules).

18.8 ENTIRE AGREEMENT; AMENDMENTS

The Contract Documents contain the entire understanding of the Parties with respect to the subject matter hereof and supersede all prior agreements, arrangements, discussions and undertakings between the Parties (whether written or oral) with respect to the subject matter hereof. The Contract Documents may only be amended by written instrument signed by all the Parties.

18.9 EXPENSES AND FURTHER ASSURANCES

Each Party shall pay its own costs and expenses in relation to the negotiation, preparation, execution and carrying into effect of the Contract Documents. Each Party shall, from time to time on being requested to do so by, and at the cost and expense of, the other Party, do all such acts and/or execute and deliver all such

ECRC-08-3308 HEARING EXHIBIT - 00000330

instruments and assurances as are reasonably necessary for carrying out or giving full effect to the terms of the Contract Documents.

18.10 NO THIRD PARTY BENEFICIARY

Except with respect to the rights of the Financing Parties, permitted successors and assigns and as provided above and the rights of indemnitees under Article XVI, INDEMNIFICATION:

18.10.1 Nothing in the Contract Documents nor any action taken hereunder shall be construed to create any duty, liability or standard of care to any Person that is not a Party;

18.10.2 No person that is not a Party shall have any rights or interest, direct or indirect, in the Contract Documents or the services to be provided hereunder; and

18.10.3 The Contract Documents are intended solely for the benefit of the Parties, and the Parties expressly disclaim any intent to create any rights in any third party as a third-party beneficiary to the Contract Documents or the services to be provided hereunder.

18.11 OFFSET

Notwithstanding any other provision hereof, any and all amounts owing or to be paid by FPL to Contractor hereunder or otherwise, shall be subject to offset and reduction in an amount equal to any amounts that may be owing at any time by Contractor to FPL. Further, for the avoidance of doubt, with respect to any provision of this Agreement that allows FPL to offset, set-off or draw against the Letter of Credit any amount then owed to Contractor, FPL shall have the express right to include in the amount offset, set-off or drawn under the Letter of Credit all of the reasonable costs and expenses it incurs in connection with enforcing such provision (including attorneys' and other consultants' fees).

18.12 COUNTERPARTS

This Agreement may be executed in multiple counterparts, each of which shall be deemed an original, and all of which together shall constitute one and the same instrument.

18.13 LIMITATIONS OF LIABILITY

18.13.1 Contractor's maximum liability under this Agreement shall be limited to (x) prior to the Provisional Acceptance Date, one hundred percent (100%) of the Contract Price and (y) after the Provisional Acceptance Date, 25% of the Contract Price, less the amount of Liquidated Damages previously paid by Contractor; provided, however, that such limitation of liability shall not apply to (i) Contractor's indemnification obligations under the Agreement related to claims of third parties; (ii) costs incurred by Contractor (and in the event of Contractor default, FPL) in achieving Provisional Acceptance and Final Acceptance (including the amount of any reduction in the Contract Price in the event that Contractor makes the election provided for in Section 10.5.1(b)); or (iii) any loss or damage arising out of any tort (including negligence and strict liability) or connected with Contractor's fraud, willful misconduct or illegal or unlawful acts. Contractor's limitations of liability shall not be reduced by the amount of insurance proceeds available to Contractor. FPL's maximum liability under this Agreement shall be limited to one hundred percent (100%) of the Contract Price prior to the Provisional Acceptance Date and 25% of the Contract Price after the Provisional Acceptance Date, except with respect to any payment due and payable pursuant to Section 7.1,Contract Price; provided however, that such limitation of liability shall not apply to any loss or damage arising out of any tort (including negligence and strict liability) or connected with FPL's fraud, willful misconduct or illegal or unlawful acts. FPL's limitations of liability shall not be reduced by the amount of insurance proceeds available to FPL.

18.13.2 Except as expressly set forth in this Agreement, and notwithstanding anything else in this Agreement to the contrary, Contractor and FPL waive claims against each other for any indirect, special or consequential damages arising out of or relating to this Agreement. This mutual waiver includes:

18.13.3 Damages incurred by FPL for rental expenses, for losses of use, income, profit, financing, business and reputation, and for loss of management or employee productivity, or the services of such persons;

ECRC-08-3309 HEARING EXHIBIT - 00000331

18.13.4 Damages incurred by Contractor for principal office expenses, including the compensation of personnel stationed there, for loss of financing, business and reputation, and for loss of profit except anticipated profit arising directly from the work; and

18.13.5 This mutual waiver is applicable, without limitation, to all consequential damages due to either Party's termination in accordance with Article XV, TERMINATION.

The foregoing waiver shall not preclude or limit recovery (i) of Schedule Liquidated Damages, (ii) of damages payable by Contractor to FPL pursuant to Section 15.2.4, Amounts Due FPL, of Article XV, TERMINATION, (iii) of the Termination Payment; or (iv) under any indemnity or reimbursement obligation hereunder related to claims of third parties.

18.14 TIME IS OF THE ESSENCE

Contractor acknowledges that timely achievement by Contractor of Mechanical Completion, Provisional Acceptance and Final Acceptance by the applicable scheduled date therefore is essential to FPL, and therefore TIME IS OF THE ESSENCE in performing all of Contractor's obligations set forth herein.

18.15 RECORDS RETENTION

Contractor agrees to retain for a period of five (5) years from the Final Acceptance Date all records relating to its performance of the Work or Contractor's warranty obligations herein, and to cause all Subcontractors and Vendors engaged in connection with the Work or the performance by Contractor of its warranty obligations herein to retain for the same period all their records relating to the Work.

18.16 SUCCESSORS AND ASSIGNS

Subject to Section 18.1, ASSIGNMENT, this Agreement shall be binding on the Parties hereto and on their respective successors and assigns.

18.17 FINANCING PARTIES' REQUIREMENTS

Contractor acknowledges that FPL may borrow certain funds from the Financing Parties for the construction of the Plant and that, as a condition to making loans to FPL, the Financing Parties may from time to time require certain documents from, and agreements by, Contractor and its Subcontractors and Vendors. In connection therewith, Contractor agrees to furnish to the Financing Parties, and to cause its Subcontractors and Vendors to furnish to the Financing Parties, such written information, certificates, copies of invoices and receipts, lien waivers (upon payment), affidavits, consents to assignment of the Contract Documents and other like documents as the Financing Parties may reasonably request. In addition, Contractor agrees to accept all revisions or amendments to the Contract Documents which are reasonably requested by the Financing Parties in order to facilitate Financial Closing, provided that such revisions or amendments are of a nature typically obtained by financing parties in non-recourse financing. Upon the request of the Financing Parties, as a condition precedent to Financial Closing, Contractor shall state in writing whether or not it is satisfied with FPL's performance to that date.

18.18 FINANCIAL ASSURANCES

18.18.1 In the event that there is a default under Section 15.1.19, then, in addition to any other remedies that FPL may have under this Agreement or otherwise, FPL may inform Contractor of such determination and Contractor shall have ten (10) Business Days after receipt of notice of such determination from FPL to meet with FPL's senior management and provide assurance reasonably acceptable to FPL that Contractor is capable of performing and completing the Work and its obligations under the Contract Documents.

18.18.2 In the event such assurance is not acceptable to FPL, as determined by FPL in its sole discretion, Contractor shall immediately as requested by FPL:

(a) Require direct payment or co-payment to Subcontractors and any such payments or co-payments shall be credited against amounts due to Contractor under the Agreement;

(b) Adjust the amount of Work to be performed by Contractor and in good faith negotiate corresponding adjustments in the Contract Price and, if applicable, Critical Milestones; and/or

ECRC-08-3310 HEARING EXHIBIT - 00000332

(c) Assign to FPL any agreement or purchase order with a Subcontractor or Vendor, provided that:

(i) FPL shall assume the obligations under such agreement or purchase order accruing after the date of such assignment;

(ii) If requested by FPL, Contractor shall remain responsible for administering and managing such agreement or purchase order (including enforcing the warranty obligations thereunder);

(iii) In no event shall Contractor be relieved of its obligations under this Agreement, including its obligation to achieve Provisional Acceptance or Final Acceptance as a result of such assignment; and

(iv) If Contractor remains responsible for administering and managing agreements or purchase orders pursuant to subparagraph (ii) above, then in no event shall Contractor be entitled to an FPL Caused Delay, Force Majeure Event or other relief in connection with any matter or claim arising out of or in any way related to FPL exercising its rights pursuant to this Section 18.18.

18.19 WAIVER OF CLAIMS.

18.19.1 In the event that this Agreement is terminated by FPL in accordance with its terms, and FPL subsequently signs an agreement to complete the Work (or any portion thereof) with any Person, then Contractor shall and shall cause its Affiliates, including Contractor Parent Company, to waive the right to make any claims (other than claims by Contractor with respect to amounts specifically provided herein to be paid to Contractor in the event of a termination hereunder) against FPL or any Person with whom FPL negotiates or executes an agreement for completion of any portion of the Work based upon:

(a) Such termination;

(b) Any subsequent negotiations with any Person; and

(c) Execution of such agreement and performance thereunder.

Such waiver includes, without limitation, a waiver of any claims against FPL and any Person with whom FPL negotiates or executes an agreement for completion of any portion of the Work, for tortious interference with business relationships.

18.19.2 Contractor agrees to reimburse, indemnify, defend and hold FPL, the Financing Parties and their Affiliates and each of their respective directors, officers, employees, representatives, agents, advisors, consultants, counsel and assigns harmless from and against, on an After-Tax Basis, any and all losses, claims, obligations, demands, assessments, penalties, liabilities, costs, damages and expenses (including attorneys' fees and expenses) for any claim made by Contractor or any of the above entities pursuant to paragraphs (a), (b) or (c) of Section 18.19.1, above. Contractor expressly agrees that any Person with whom FPL negotiates or executes an agreement for completion of any portion of the Work is an express third party beneficiary of this Section.

18.20 ACCEPTANCE OR REJECTION IN BANKRUPTCY.

18.20.1 Notwithstanding anything contained in this Agreement to the contrary, if an order for relief under Chapter 11 of the Bankruptcy Code is entered with respect to Contractor during the term of the Agreement, then Contractor acknowledges and agrees that it will, subject to Bankruptcy Court approval, formally assume or reject, subject to the requirements of 11 U.S.C. §365, the Agreement within seven (7) days of delivery of written request for such action by FPL. If Contractor fails to timely move for approval or rejection of the Agreement, it acknowledges and agrees that:

(a) It will not contest or in any way otherwise take any action to oppose such a motion filed by FPL or the lifting of the automatic stay of 11 U.S.C§362 to permit FPL to enforce its rights under the Agreement (the "Lift Stay Order");

ECRC-08-3311 HEARING EXHIBIT - 00000333

(b) It waives all rights it may have under 11 U.S.C. §362(f);

(c) It hereby consents to the ex parte entry of the Lift Stay Order pursuant to 11 U.S.C. §362(f); and

(d) At the option of FPL, it hereby agrees that it will execute an agreed Lift Stay Order on forty-eight (48) hours' notice.

18.20.2 Contractor acknowledges and represents to FPL and agrees that:

(a) It is familiar with the Agreement and the importance of completing its obligations under the Agreement on time and in accordance with its terms; and

(b) Based upon such familiarity, it is critical to performance of its obligations under the Agreement that FPL have prompt and immediate access (in accordance with the requirements of this Agreement) to its contractual remedies under the Agreement in the event of a Contractor Event of Default.

18.21 CONTRACTOR'S LICENSE

Contractor hereby states and FPL acknowledges that Contractor does not presently hold a license as a qualified business entity under Fla. Stat. Chapter 489 (a "Florida Contractor's License"), but that an application for such qualification has been submitted to the Florida Department of Business and Professional Regulation for processing. FPL further acknowledges its full knowledge of Contractor's failure to have a Florida Contractor's License status and hereby agrees that FPL shall not challenge the enforceability of this Agreement based on Contractor's failure to have a Contractor's License as of the date of the execution of this Agreement. In order to satisfy the requirements of this Agreement, Contractor hereby covenants, warrants and agrees that it shall receive all proper licenses required to perform the work more particularly described herein prior to beginning physical work on the Project, including but not limited to a Florida Contractor's License.

ECRC-08-3312 HEARING EXHIBIT - 00000334

IN WITNESS WHEREOF the Parties have executed and delivered this Agreement as of the date first above written.

ECRC-08-3317 HEARING EXHIBIT - 00000339

Appendix A
SCOPE OF WORK

1.0 PROJECT DESCRIPTION

1.1 This project consists of the installation of the following ground mounted, fixed tilt, photovoltaic (PV) power generation system:

1.1.1 A 10 MW (net) photovoltaic power generation system at the National Aeronautics and Space Administration (NASA) John F. Kennedy Space Center (KSC), located near Titusville, Florida. This installation will be connected to FPL's distribution system.

1.1.2 The 10 MW (net) photovoltaic power generation system shall include the installation of 4 MW_{DC} of bifacial modules.

2.0 SCOPE OF WORK

2.1 Work by Contractor

2.1.1 The Work to be provided by Contractor shall include all work (except for those items specifically excluded) required to deliver a PV system ("Plant") capable of operating in accordance with the attached performance specifications, laws and permits, and in accordance with the project milestone schedule. Contractor's scope of work shall include, but shall not necessarily be limited to, the engineering, design, supply, delivery, installation, construction, training, start-up, and testing, as necessary to deliver the commercially operational Plant. Contractor shall design and construct the Project in accordance with this Appendix A, Scope of Work, and all of the Exhibits attached hereto. The following equipment, material and services shall be provided:

2.1.2 Structural systems as necessary to support photovoltaic panels, inverters, switchgear, circuit breakers, protective relaying equipment, control systems, transformers, enclosures, and other components.

2.1.3 Electric systems for all Plant services including power wiring, switchgear, duct banks, cable trays, conduit, circuit breakers, disconnect switches, inverters, instruments, transformers, protective relaying, lighting, and other components as required.

2.1.4 Instrumentation, controls, interconnecting control wiring, panels, cable tray and/or conduits required for the complete individual equipment and system controls.

2.1.5 Lighting fixtures, lighting panels, convenience receptacles, wiring, raceways and other components required for a complete lighting system, including site access and site area lighting.

2.1.6 Grounding rods and other components for a complete grounding system and lightning protection system.

2.1.7 A condition monitoring system for local and remote monitoring. Remote monitoring shall be capable of connecting to the Internet for web-enabled data monitoring.

2.1.8 AC kWh meter cabinets for FPL provided primary and backup revenue meters.

2.1.9 Site meteorological station(s) as required to obtain data to determine system performance.

2.1.10 All required equipment tests and inspections.

2.1.11 Engineering and technical support services for permits and licenses that require Contractor provided design and information. Contractor shall use best efforts in supplying support for all FPL licensing and approval requirements.

2.1.12 Site Security during construction and commissioning. Permanent site security system including perimeter fencing, and four (4) manual gates.

2.1.13 Construction consumables through Provisional Acceptance. Consumables will include but not be limited to chemicals, fuses, and other supplies. Contractor will also supply all necessary electrical power and water required for construction.

2.1.14 Delivery, unloading, and storage of all Contractor supplied equipment.

2.1.15 Operating tests to demonstrate guaranteed performance.

2.1.16 All calculations necessary for proper sizing of electrical and mechanical equipment and systems to insure safe and reliable plant operation under all plant operating modes.

ECRC-08-3318 HEARING EXHIBIT - 00000340

2.1.17 Contractor shall comply with all permit requirements. Contractor shall develop an environmental control program that incorporates all permit and Exhibit A (Environmental Rules for Contractors) requirements for the construction and startup activities at the Job Site.

2.1.18 Contractors shall have a safety program for the site that incorporates all OSHA and Appendix X (Safe and Secure Workplace Policy) requirements.

2.1.19 Temporary facilities for FPL's site staff during construction and commissioning. For bid purposes assume space is required for 4 people.

2.1.20 Installation of FPL provided metering transformers and the supply and installation of conduits from the metering transformers to the meter cabinet. FPL shall provide the revenue metering cables.

2.2 Work by FPL

2.2.1 FPL will provide a permitted, cleared, and level graded site.

2.2.1.1 Site development and preparation includes access roads, grubbing, clearing, site leveling, site landscaping and soil stabilization. The maximum change in elevation shall be 7% in any direction.

2.2.2 Utility grade AC kWh meters will be supplied and installed by FPL. Primary and backup meters will be provided.

2.2.3 FPL will prepare and submit the Small Generator Interconnection Request. The Interconnection Study will be provided to the Contractor within 30 days of the effective contract date.

2.3 Boundary and Interface Limits

2.3.1 All work provided by Contractor shall be within the site boundary limits.

2.3.1.1 The site boundary is detailed in Exhibit C (Site Boundary limit).

2.3.1.2 The site boundary existing conditions are detailed in Exhibit D (Site Development Plan).

2.3.1.2.1. Existing conditions shown are for informational use only and not for construction.

2.3.1.3 Contractor shall connect into, interface or terminate at the connection to 13.8 kV FPL distribution system, at the southeast corner of the site boundary.

2.3.1.4 The interface location to be the Contractor-provided switch cabinet from which the Plant output will leave the site boundary at distribution or transmission voltage. FPL to provide interconnection between the switch cabinet and FPL Courtenay Substation.

3.0 PLANT DESIGN CRITERIA

3.1 Site Location

3.1.1 The Plants will be situated at NASA's John F. Kennedy Space Center located near Titusville, Florida.

3.1.2 The plant location is 28.48°N, 80.68°W.

3.1.3 Design Data

3.1.3.1 Range of Ambient Conditions: The Plant shall be capable of continuous operation between the following extreme temperatures:

3.1.3.1.1. 103 °F maximum ambient temperature.

3.1.3.1.2. 19 °F minimum ambient temperature

3.1.3.2 Wind Load per Florida Building Code, 2004, effective July 1, 2005 as amended by Brevard County.

3.1.3.3 Seismic Load per Florida Building Code, 2004, effective July 1, 2005 as amended by Brevard County

ECRC-08-3319 HEARING EXHIBIT - 00000341

3.1.3.4 Precipitation:

3.1.3.4.1. Annual Average = 55.02"

3.1.3.4.2. Maximum Monthly Average = 7.87"

3.1.3.4.3. Minimum Monthly Average = 2.35"

3.1.3.4.4. One day maximum = 11.44"

3.1.3.5 Design Storm Events, 24 hour precipitation

3.1.3.5.1. 10 year (10% probability) – 8.0"

3.1.3.5.2. 25 year (4% probability) – 10.0"

3.1.3.5.3. 110 year (1% probability) – 12.0"

Note 1: For storm water detention, retention, and evaporation pond facilities unless specific state or local regulations are more stringent.

Note 2: For site drainage facilities unless specific state or local regulations are more stringent.

Note 3: For site drainage system without causing damage to major plant facilities.

3.1.3.6 Freeze Protection: Freeze protection shall be provided for and limited to all instrumentation and instrument sensing lines.

3.2 Operational Criteria

3.2.1 The Plant shall be designed for fully automatic, unmanned operation. This shall include startup, shutdown, abnormal operating condition (i.e. voltage, frequency excursions) detection and shutdown, data monitoring, etc.

3.3 Plant Performance

3.3.1 Contractor shall design and construct the Plant to produce the specified net electrical AC power of 10 MW, based on Standard Test Conditions.

3.3.2 Contractor shall provide a recommended spare parts list, including the proposed pricing for spare parts within 30 days of the Contract effective date.

3.3.3 The Plant shall be designed to maximize the annual energy production.

3.4 General Requirements

3.4.1 The systems and equipment supplied by Contractor shall be suitable for the environment in which they will be located and shall be designed for a Plant life of at least thirty (30) years.

3.4.2 The specifications provided herein are intended to identify overall system requirements and certain specific hardware requirements, which FPL requires to ensure that the Plant provided by Contractor shall operate reliably and safely during the Plant's design life, and that the Plant shall be able to be operated and maintained in a cost-effective manner. The adequacy of the overall system design to meet these requirements is the responsibility of Contractor.

3.4.3 The general system performance criteria are defined in this Technical Specification, the Exhibits and Appendix HH. Contractor is responsible for ensuring that all system performance criteria included in this specification are met by the final Plant design.

3.5 Reliability and Maintainability

3.5.1 The design philosophy used to attain high reliability and maintainability shall be consistent with industry standards including:

3.5.1.1 Design margins and de-rating factors in sizing equipment to account for wear, performance degradation, voltage drops, and other conditions. Performance guarantees, however, shall be based on the new and clean condition.

ECRC-08-3320 HEARING EXHIBIT - 00000342

3.5.1.2 Provisions to isolate and bypass equipment for repair where feasible without shutdown of the system of which it is a part, such as repairing a component with minimized need to shut down surrounding components.

3.5.1.3 Access provisions for maintenance of equipment items known to require frequent service, such as inverters. Stairs shall be provided to elevated locations when access is required on a daily or frequent basis.

3.5.1.4 Access and removal provisions for all equipment parts from Plant using conventional maintenance equipment.

3.5.1.5 Compliance with manufacturer requirements for pull space and recommendations for laydown/storage areas.

3.5.2 Contractor shall provide as part of the equipment operations and maintenance manual, the typical daily, monthly, and annual maintenance activities expected for the Plant. This shall include inspection and testing activities, preventative/periodic maintenance activities, and recommended equipment replacement intervals for the Plant.

3.6 Noise

3.6.1 The Plant shall meet all applicable Federal, State, and local noise requirements.

3.6.2 The near-field A-weighted sound pressure level resulting from each balance-of-plant individual equipment package shall not exceed a spatial average of 85 dBA at a distance of three (3) feet from the equipment face and five (5) feet above the ground and personnel platforms unless approved by FPL. Contractor shall evaluate near field noise level on an individual equipment basis as certain Plant equipment is inherently noisy and special noise control measures may be necessary to comply with the 85-dBA criteria. For certain equipment, these noise control measures are not practical for reasons of performance, cost, maintenance access, heat buildup, space limitations, safety, etc. Therefore, if it is not reasonable and feasible to meet the 85-dBA criteria, administrative controls shall be implemented. Administrative controls include posting warning signs, prescribing hearing protection, and limiting access to ensure worker noise exposure does not exceed a 90 dBA average over an eight (8) hour period. The intent of this requirement is to control occupational noise exposure levels, protect worker hearing, and improve working conditions. The noise levels must conform to Occupational Safety and Health Act and all applicable State and local requirements.

3.6.3 In the design and layout of equipment, Contractor shall endeavor to attain permissible noise exposure levels, without the use of hearing protection. In areas where this is not practical, as discussed in Section 3.7.2, above, Contractor shall conduct an in-plant noise survey to identify the in-plant areas that are exposed to A-weighted sound pressure levels exceeding 85 dBA. Contractor shall designate areas over 85 dBA as high noise level areas with signs in the Plant, and shall indicate boundaries on the as-built general arrangement drawings for the mandatory wearing of hearing protection.

3.7 Miscellaneous Technical Requirements

3.7.1.1 Long-term operability, maintainability and safe operation of the Plant is of primary concern to FPL. As a result, Contractor shall take prudent measures in the design to facilitate ease of operation and maintenance and provide adequate access to all equipment.

3.8 Codes, Regulations and Standards

3.8.1.1 Contractor shall design and construct the Plant in accordance with all federal, state and local laws and the codes, regulations and standards listed below. The codes and standards utilized shall be the latest editions in effect on the effective date of this Contract. Where these codes do not govern specific features of the equipment or system, Contractor and Original Equipment Manufacturer (OEM) standards shall be applied. Where local codes or ordinances will have an impact on the design (e.g. building height restrictions) FPL and Contractor shall jointly address these with the local authorities having jurisdiction.

ECRC-08-3321 HEARING EXHIBIT - 00000343

3.8.2 Federal Regulations

3.8.2.1 Federal Environmental Standards

3.8.2.1.1. US Environmental Protection Agency Regulations

A. Resource Conservation and Recovery Act Regulations

B. Clean Water Act

C. Clean Air Act

D. Oil Pollution Act

E. Comprehensive Environmental Response, Compensation and Liability Act

F. Emergency Planning and Right-to-Know Act

G. Toxic Substances Control Act

3.8.2.1.2. National Environmental Policy Act

3.8.2.1.3. US Fish and Wildlife Regulations (e.g. Endangered Species Act)

3.8.2.1.4. US Army Corps of Engineers Regulations

3.8.2.2 Occupational Safety and Health Act (OSHA)

3.8.2.2.1. 29 CFR 1910 Occupational Safety and Health Standards

3.8.2.2.2. 29 CFR 1926 Safety and Health Regulations for Construction

3.8.2.3 US Department of Transportation Regulations

3.8.2.4 Code of Federal Regulations

3.8.3 Applicable State, County and Local Codes and Regulations

3.8.3.1 Florida Department of Environmental Protection Regulations

3.8.3.2 Florida Water Management District Regulations

3.8.3.3 Florida Statutes, Chapter 373 (Water Resources)

3.8.3.4 Florida Fish and Wildlife Conservation Commission Regulations

3.8.3.5 Florida Department of Community Affairs Regulations

3.8.3.6 County Regulations

3.8.3.7 Florida Department of Transportation Regulations

3.8.3.8 Local Codes and Ordinances

3.8.4 Applicable Industry Codes and Standards from the following list. Alternative standards may be used only upon FPL's acceptance of Contractor's written request, which shall specify the proposed alternative standard, why such change is necessary and how compliance is to be achieved.

3.8.4.1 Mechanical

3.8.4.1.1. ANSI - American National Standards Institute,

3.8.4.1.2. PTC - Power Test Codes - Applicable Test Codes

3.8.4.1.3. ASNT - American Society for Nondestructive Testing

3.8.4.1.4. ASTM - American Society for Testing and Materials

3.8.4.1.5. AWS - American Welding Society

3.8.4.1.6. SSPC - Steel Structures Painting Council

3.8.4.1.7. MSS – Manufacturers Standardization Society

3.8.4.2 Electrical

3.8.4.2.1. ANSI - American National Standards Institute

3.8.4.2.2. FM - Factory Mutual

3.8.4.2.3. ICEA - Insulated Cable Engineers Association

3.8.4.2.4. IEEE - Institute of Electrical and Electronics Engineers

ECRC-08-3322 HEARING EXHIBIT - 00000344

3.8.4.2.5. IESNA - Illuminating Engineering Society of North America
3.8.4.2.6. ISA - International Society for Measurement and Control
3.8.4.2.7. LPC - Lightning Protection Code
3.8.4.2.8. NEC - National Electrical Code
3.8.4.2.9. NEMA - National Electrical Manufacturers Association
3.8.4.2.10. NESC - National Electrical Safety Code UL - Underwriters
3.8.4.2.11. UL Underwriters Laboratories
3.8.4.2.12. NFPA – National electric code (NEC)
3.8.4.2.13. EN – European Norms
3.8.4.2.14. IEC – International Electric Code

3.8.4.3 Civil/Structural/Architectural

3.8.4.3.1. ACI - American Concrete Institute
A. ACI 318 - Building Code Requirements for Reinforced Concrete
B. ACI Manual of Standard Practice
C. ACI 350R – Environmental Engineering Concrete Structures

3.8.4.3.2. ADA - Americans with Disabilities Act
3.8.4.3.3. AISC - American Institute of Steel Construction
3.8.4.3.4. AISI - American Iron and Steel Institute "Specification for Design of Cold-Formed Steel Structural Members," Parts 1 and 2

3.8.4.3.6. FBC – Florida Building Code
3.8.4.3.7. SSPC - Steel Structures Painting Council

4.0 MECHANICAL SYSTEMS AND EQUIPMENT

4.1 General

4.1.1 Motors

4.1.1.1 General Purpose Induction Motors, 250 HP and below, shall meet NEMA (MG-1), NEC and the following standards and criteria:

4.1.1.1.1. Class F insulation/B temperature rise, Service Factor = 1.15.
4.1.1.1.2. Rated ambient forty degrees Centigrade (40°C).
4.1.1.1.3. TEFC Enclosure for outdoor applications, ODP Enclosure for indoor application.
4.1.1.1.4. Standard Efficiency.
4.1.1.1.5. Standard Balance Rotors or better.
4.1.1.1.6. Space heaters in all motors 25 HP and above (static motor winding heaters are not an acceptable alternate).

5.0 ELECTRICAL SYSTEMS AND EQUIPMENT

5.1 General Requirements

5.1.1 The Plant electrical systems shall be designed to supply power to auxiliary electrical equipment and systems.

5.1.2 Voltage insulation levels, equipment interrupting and continuous current capacities, circuit protection and mechanical strengths shall be selected and coordinated in accordance with calculations and the recommendations of IEEE, ICEA, NEMA and ANSI

5.1.3 Environmental Conditions

5.1.3.1 MV and LV switchgear, MV and LV MCC's, inverters, DC systems (battery and charger systems), DC and AC distribution panels may be located in pre-fabricated walk-in Power Distribution Centers (PDC's). PDC's shall be environmentally controlled to meet the electrical equipment ambient requirements.

5.1.3.2 Conduit and cable tray entry to outdoor enclosures, panels, switchgear, cabinets, etc. shall not be from the top. Bottom entry is preferred for rain protection. If bottom entry is not practical and side entry is required, entrances shall be installed with watertight fittings or FPL approved flashings.

5.1.3.3 Enclosures for all equipment shall be in accordance with NEMA Standards and type number and shall be suitable for their location as follows:

5.1.3.3.1. NEMA 1.... Indoors (General Purpose)

5.1.3.3.2. NEMA 3R. Outdoors and Indoors (in wet locations)

5.1.3.3.3. NEMA 4.... Outdoors and Indoors (in wet locations – dust tight)

5.1.3.3.4. NEMA 4X. Outdoors - Indoors in wet and corrosion resistant locations

5.1.3.3.5. NEMA 7.... Classified Areas, Class I, Div 1 Group D

5.1.3.3.6. NEMA 9.... Classified Areas, Class II, Div 1

5.1.3.3.7. NEMA 12.. Non-environmentally controlled indoor dusty areas

5.1.3.3.8. Enclosures containing non-arching devices (sealed contacts, terminals, etc.) may be NEMA 12 or 4X in Class I, Division 2 areas.

5.2 Raceway, and Miscellaneous Services

5.2.1 Conduit and Cable Tray

5.2.1.1 Underground conduits shall be schedule 40 PVC direct buried rated or concrete encased rated. Underground conduits may be directly buried in areas that do not require concrete encased duct banks for structural considerations. Use of buried cable is acceptable provided it meets applicable industry codes and standards.

5.2.1.2 Aboveground conduit shall generally be RGS. Aluminum, PVC schedule 80, or PVC-coated conduit may also be used in corrosive areas. Aboveground conduit shall be ¾ inch minimum except ½ inch conduit may be used to connect to instruments or devices with ½" nipples as required.

5.2.1.3 Connections to equipment requiring removal from service or subjected to vibration or movement shall be made with flexible conduit. Liquid tight flexible metal conduit and approved fittings shall be used for outdoor and indoor equipment.

5.2.2 Cable Tray

5.2.2.1 Cable tray shall be per NEMA VE-1.

5.2.2.2 All cable trays, excluding instrumentation trays, shall be provided with external ground wire bonded to the tray and connected to the Plant ground grid at a pre-determined spacing not to exceed 100 feet.

5.2.2.3 Cable trays shall be aluminum or galvanized steel ladder type with tray covers where mechanical protection is necessary. All signal circuits (for levels 1&2) carrying trays shall be galvanized steel or aluminum solid bottom or ventilated trough trays with tray covers

ECRC-08-3324 HEARING EXHIBIT - 00000346

5.3 Power and Instrument Cable

5.3.1 For 4160v, Medium voltage cable shall be rated 8kV, 90°C or 105°C, stranded copper conductor, shielded, EPR insulation (100% level), and an overall PVC, CPE or CSPE cable jacket. (Note: 5kV at 133% level may be used in lieu of 8kV).

5.3.2 For 6900v, Medium voltage cable shall be rated 8kV, 90°C or 105°C, stranded copper conductor, shielded, EPR insulation (133% level), and an overall PVC, CPE or CSPE cable jacket. (Note: 15kV at 100% insulation may be used in lieu of 8kV.)

5.3.3 Multi-conductor control and power cable shall be rated 600 volts, 90°C, stranded copper conductors, XLP or EPR insulation and an overall PVC, CPE or CSPE cable jacket.

5.3.4 Single conductor wire and cable shall be rated 600 V, 90°C for XLP and 90°C or 105°C for EPR insulation. Single conductor 600 V tray cable greater than #1/0 AWG shall have EPR insulation with a PVC, CPE or CSPE cable jacket. Non-jacketed FREP insulation with appropriate UL flame test may also be used for large single conductor cables.

5.3.5 Single pair instrument cable shall be rated 600 V, XLP or PVC insulation, twisted shielded pairs with drain wires and a PVC, CPE or CSPE cable jacket.

5.3.6 Multi-pair instrument cable shall be rated 600 V, XLP or PVC insulation, twisted shielded pairs with drain wires, overall shield, and a PVC, CPE or CSPE cable jacket.

5.3.7 All custom control panel wiring shall be insulated with 600 V NEC type SIS insulation and all panel wiring shall have wire numbers for identification. Vendor supplied control panels of a proven field design may provide their field proven cable insulation.

5.3.8 The allowable ampacity of power cables shall be in accordance with ICEA and NEC requirements.

5.3.9 Lighting and fixture cable shall be furnished with 600 volt insulation.

5.3.10 Cables shall meet IEEE 383 flame test requirements. All cables installed in cable tray shall be rated for such installation.

5.3.11 For 1000 v, Low voltage cable shall be rated 1kV, 90°C or 105°C, stranded copper conductor, EPR insulation (100% level), and an overall PVC, CPE or CSPE cable jacket.

5.4 Inverters

5.4.1 Inverters shall be utility grade and specifically designed for PV installations.

5.4.2 Inverters shall meet the following minimum standards:

5.4.2.1 UL 1741 - Standard for Inverters, Converters, Controllers and Interconnection System Equipment for Use With Distributed Energy Resources. IEC 62103 or EN 50178 Standards for Inverters for use with 1000 volt DC systems. For 1000 volt DC systems, in the event of conflict, IEC Standards supersede UL Standards.

5.4.2.2 IEEE 929-2000 - Recommended Practice for Utility Interface of Photovoltaic (PV) Systems

5.5 Transformers

5.5.1 Contractor shall design and furnish and install interconnecting transformer(s) that step-up the inverter output voltage to the FPL distribution systems nominal voltage. The interconnecting transformer(s) shall be designed to provide zero sequence current to a ground fault on the FPL feeder (i.e. the PV generation shall be interconnected to the distribution system via a grounded system according to the IEEE-1547 standard).

5.5.2 The Contractor shall provide the interconnecting circuit breaker on the high side of each of the interconnecting transformer(s). The circuit breaker shall be rated for the distribution system voltage and short circuit available current at each corresponding location.

ECRC-08-3325 HEARING EXHIBIT - 00000347

6.0 CIVIL AND STRUCTURAL FEATURES

6.1 Civil Design Basis

The design for new facilities will require new surveys and topographic information as required for the areas involved in the new construction. Contractor shall be responsible to collect regional and local information regarding regional and local geology and seismology. Contractor shall be responsible for all surveys that are required to determine the final site plans. Contractor shall also be responsible to perform geotechnical investigations as necessary to develop the final site plan.

6.1.1 Surface Surveys and Investigations

6.1.1.1 The position of any surface penetration of underground utilities (i.e., valve station, manhole) within the construction area shall be physically verified by Contractor as part of the site survey.

6.1.1.2 Contractor shall be solely responsible for furnishing all labor, materials, tools and equipment to perform all surveying work and provide all services necessary for, or incidental to construction of buildings, new utilities, and other new facilities; and to establish and maintain benchmarks, to make measurements to verify location of completed construction, and to survey alignment to existing property boundaries. Underground utilities, exclusion zones, and surface penetrations shall be identified on Contractors drawings.

6.1.2 Easement and Setbacks

6.1.2.1 Contractor shall observe all easements unless specific exceptions are obtained from FPL. Easements shall be identified on the Site Plan Drawings to be developed by Contractor. Minimum setback requirements shall be in accordance with local zoning codes and ordinances.

6.1.3 Contractor shall develop and provide analyses and detailed designs for dewatering systems.

6.2 Site Preparation

The Project design shall take into account existing site conditions with respect to soil characteristics and drainage. Contractor will be responsible for preparing, submitting and securing of all required construction-related permits. Contractor will also be required to prepare and submit any and all site compliance certifications regarding work completion to applicable agencies (e.g. as-built certification of storm water management system, if required).

6.2.1 Site Maintenance

6.2.1.1 All temporary access roadways used by Contractor shall be maintained in serviceable condition.

6.2.1.2 Excess and unsuitable soils will be disposed of on site.

6.2.1.3 Contractor shall be responsible for compliance with State and local requirements for fugitive dust emissions. Contractor shall prevent the spread of dust during its operations.

6.2.1.4 On-site open burning will not be permitted unless approved by appropriate local authorities and FPL.

6.2.2 Fill and Construction Drainage

6.2.2.1 Any fill that is brought onsite from any offsite location shall meet FPL's clean fill criteria (Exhibit B, Clean Fill Criteria). Testing of the fill at the offsite source shall be performed to assure that the fill meets these criteria.

6.2.2.2 Contractor shall be responsible for installing and maintaining adequate drainage and preventing soil erosion at the site during construction in accordance with State and local sediment and erosion control rules, regulations, and ordinances.

6.2.2.3 Final grade elevations shall be chosen to provide good foundation support for major structures and equipment, and minimize the disposal of excess

ECRC-08-3326 HEARING EXHIBIT - 00000348

materials. The foundation design will be based on the recommendations presented in the final geotechnical report.

6.2.3 Excavating, Filling and Backfilling

6.2.3.1 Contractor shall be responsible for furnishing all supervision, labor, tools, materials and equipment, performing all operations in connection with excavating of all materials (excluding pre-existing Hazardous Materials), obtaining fill and backfill materials, installing and compacting of fill and backfill materials and producing final grade lines across the Plant.

6.2.3.2 Contractor shall remove from the site all rubbish and debris found thereon, so as to prepare the site for excavation (Hazardous Materials are excluded).

6.2.3.3 Contractor shall take appropriate measures, including dewatering, to prevent the foundation and trenched areas from becoming unstabilized by the flow of water into the excavation or by cave-ins or slippage.

6.2.3.4 Slopes of excavated areas shall be protected from rutting and scouring. Surface water shall not be permitted to flow uncontrolled down any embankment slope.

6.2.3.5 In areas requiring vehicle access or crane placement, suitable subgrade shall be provided to sustain traffic loads.

6.2.3.6 Contractor's quality of work, including excavating, filling, backfilling, compacting, dewatering, subgrade preparation and stabilization, shoring and drainage shall comply with the geotechnical engineer's recommendations, the applicable American Society for Testing and Materials (ASTM) standards and any State and local standards.

6.2.3.7 Before backfilling, excavated areas to be backfilled shall be cleared of all extraneous materials.

6.2.4 Contractor shall recommend the finish grade material and ground cover to minimize future maintenance requirements.

6.2.5 Control of Water

6.2.5.1 Dewatering to remove groundwater, including any rainwater or surface runoff that enters excavations shall be managed in accordance with the Stormwater Pollution Prevention Plan, St. John's River Water Management District (SWFWMD), County and FDEP requirements.

6.2.6 Soil Erosion and Sediment Control

6.2.6.1 Contractor shall develop soil erosion and sediment control plans. Contractor shall obtain and conform to the local erosion and sediment control regulation.

6.2.6.2 Soil erosion and sediment controls shall generally consist of control of runoff, vegetative stabilization, and sediment traps. All slopes, drainage ditches and other exposed areas shall be stabilized by vegetation. Sediment traps such as hay bales or synthetic filter fabric (silt fence) shall be installed around catch basin inlets, culvert inlets and at the top and toe of slopes. Temporary sedimentation basins shall be provided during construction and converted to permanent basins. Contractor shall maintain erosion and sediment control systems throughout construction at the site and any soil disposal areas.

6.2.7 Drainage

6.2.7.1 Contractor shall develop and implement a temporary drainage system for the construction phase of the project. The drainage system shall comply with all federal, State and local regulations. Included shall be the necessary sedimentation and erosion control measures during both construction and permanent operational phases. The drainage system shall be designed to

ECRC-08-3327 HEARING EXHIBIT - 00000349

comply with the July, 2002, 40CFR112 Spill Prevention Countermeasures and Control rule changes published in the Federal Register.

6.2.7.2 Contact and non-contact surface runoff from the power block and associated facilities will be collected and routed to on-site stormwater ponds. Construction area runoff shall also be routed to on-site stormwater ponds.

6.2.7.3 All swales shall be erosion control protected by grass and, if required, with man made material or rip rap.

6.3 Foundations

6.3.1 Foundations shall be reinforced concrete designed to support loads imposed. Driven pier foundations are acceptable if design is based on applicable wind loading requirements and allowable bearing values for soil.

6.3.2 Type of foundations required and allowable bearing values for soil shall be confirmed or as recommended by the geotechnical engineer based on the existing subsurface conditions. Differential settlement of foundations due to cut and fill affects shall be calculated and considered in the foundation design. Foundations for heavy equipment are expected to be totally on cut or on fill. If necessary, lean concrete may be added to minimize differential settlements for foundations that are partially on cut and partially on fill. The following foundation design criteria shall be used:

6.3.2.1 Total settlement: 1-1/2 inches. Differential settlement: 0.3 percent slope between adjacent column support points.

6.3.2.2 Foundations shall be designed using static analysis techniques assuming rigid elements and linear soil pressure distribution such that the allowable settlement and bearing pressure criteria are not exceeded. The minimum factors of safety against overturning and sliding shall be 1.5 and 1.25, respectively.

6.4 Concrete

6.4.1 Reinforced concrete structures shall be designed and constructed in accordance with ACI 318, Building Code Requirements for Reinforced Concrete. Concrete work shall conform to the requirements of ACI 301, Specifications for Structural Concrete

6.4.2 Concrete production, proportioning and placing as well as the formwork, reinforcing, joints and embedded items, repair, curing and protection shall all be in accordance with the applicable ACI Standards and Specifications. All concrete mixes shall be approved by the responsible design engineer and submitted to FPL for review and comment prior to use.

6.4.3 Grout shall be pre-packaged non-shrinking grout requiring water only, suitable for the service. Proportioning, mixing, placing, temperature, surface preparation and curing shall be in accordance with manufacturer's requirements. Contractor shall provide the required quality assurance testing.

6.4.4 Reinforcing bars shall be deformed bars conforming to ASTM A615, Grade 60. Welded wire fabric shall conform to ASTM A185.

6.4.5 Cement shall be Portland cement conforming to ASTM C150, Type (as required by soil conditions).

6.4.6 Aggregates for normal weight concrete shall conform to ASTM C33.

6.5 Site Restoration

All site development areas disturbed during construction, including laydown, parking and temporary office trailers, etc. shall be restored and stabilized in accordance with post-construction stormwater drainage requirements as specified in the Permits.

6.6 Structural Design Basis

The structural design of buildings, structures and portions thereof shall be in accordance with the Florida Building Code, 2004 effective July 1, 2005, and as amended by Brevard County. Structural design loads shall be in accordance with the following:

ECRC-08-3328 HEARING EXHIBIT - 00000350

6.6.1 Wind Loads

Wind loads shall be in accordance with the Florida Building Code, 2004 effective July 1, 2005, and as amended by Brevard County.

6.6.2 Seismic Loads

Seismic loads and element design criteria shall be in accordance with the Florida Building Code, 2004, effective July 1, 2005, and as amended by Brevard County.

6.6.3 Hydrostatic Loads

Below grade structures shall be designed to resist water pressure, corrosion and uplift.

6.7 Steel Structures and Miscellaneous Steel

6.7.1 Steel structures for buildings and equipment support shall be designed, fabricated and erected in accordance with the AISC Specification for Structural Steel Building - Allowable Stress Design and Plastic Design, the Code of Standard Practice for Steel Buildings and Bridges, and the Manual of Steel Construction - Volume II – Connections, and the requirements of OSHA. Steel structures shall also conform to the applicable ASTM Standards, the AWS Codes and RCSC's "Specification for Structural Joints" using ASTM A325 or A490 bolts.

6.7.2 Contractor shall furnish and install steel access platforms, with ladders and galvanized stairs and grating in accordance with the requirements of the Occupational Safety and Health Administration requirements. Access shall be provided for normal operation and maintenance of Plant. Stair access shall be provided where practical with ladder access provided to other less frequently accessed components.

6.7.3 Materials for structural steel and miscellaneous steel shall conform to the requirements of the American Society for Testing and Materials "Standard Specification for Structural Steel" ASTM A36/ASTM A572 Grade 50/ASTM A992, and the requirements provided herein. Structural steel required for tube girts shall conform to ASTM A500, Grade B. All structural and miscellaneous steel shall be hot dip galvanized.

6.7.4 Structural steel checkered plate shall be two-way diagonal raised pattern floor plate. Checkered plate for exterior use shall be galvanized.

6.7.5 Open-web steel joists shall comply with the Steel Joist Institute "Standard Specification and Load Tables."

6.7.6 Metal decking shall comply with SDI "Design Manual for Floor Decks and Roof Decks."

6.7.7 Steel grating shall conform to ASTM A569 with minimum 3/16-inch wide by 1-1/4 inch deep bearing bars. Structural steel grating shall be welded and hot-dipped galvanized after fabrication in accordance with ASTM A123. Grating shall be banded at edges and openings with bars of the same size as the bearing bars. Grating for exterior use shall be serrated.

6.7.8 Ship ladders are not permitted unless approved by FPL.

6.7.9 Anchor bolts shall conform to ASTM A307, A36, or ASTM F1554 Grades 36, 55, and 105 with nuts conforming to ASTM A563, Grade A heavy hexagon. Anchor bolt sleeves shall conform to ASTM A501.

6.7.10 Expansion bolts shall be unfinished bolts in expansion shell anchors, or wedge bolt anchors. As an alternate Contractor can use drilled holes with anchors set in epoxy, if in accordance with equipment manufacturer requirements.

6.7.11 Anchor bolts shall be used for all structural and building columns, all major equipment, and all vibrating equipment.

6.7.12 Expansion bolts may be used for stairs, ladders, handrails, platform posts, and minor equipment. Expansion bolts shall not be used where the required bolt diameter is larger than 3/4 inch.

6.7.13 Steel pipe for handrail shall conform to ASTM A53, Type E or S, Grade B. Handrails for exterior use shall be galvanized.

6.7.14 Filler metal for welding shall conform to the requirements of AWS D1.1.

6.7.15 A member's end connection shall not have strength less than that provided by a full depth 3/8 inch thick clip angle.

6.7.16 Galvanizing, as specified herein, shall conform to the requirements of ASTM A123 or ASTM A153, as applicable.

6.7.17 Grating shall be welded bar grating, galvanized, banded and secured with clips. Metal decking shall be galvanized.

6.8 Painting

6.8.1 The Project scope shall include protective coating systems on all equipment and building materials except for stainless steel, insulated piping and concrete not exposed to a corrosive environment.

6.8.1.1 Hot-dip galvanized, in accordance with Applicable Industry Codes and Standards, is an acceptable protective coating.

6.9 Fencing

6.9.1 Site perimeter fence shall be 7 feet high and have an overall height of 8 feet from the bottom of the fabric to the top barbed wire. The fence shall have top rail, bottom tension wire, and three strands of barbed wire mounted on 45 degree extension arms. The upper strand shall be approximately 12 inches out from the fence and 12 inches above the top of the fabric. Posts shall be set in concrete as detailed.

6.9.2 Materials for site chain link fencing shall be as follows. All steel or malleable iron parts and accessories shall be hot-dip galvanized in accordance with ASTM A123 after fabrication.

6.9.2.1 Fabric - 9 gauge, 2 inch mesh; galvanized ASTM A392, Class 2; twisted selvage on top, knuckled selvage on bottom.

6.9.2.2 Posts - Steel pipe, ASTM F1083 standard weight (Schedule 40).

6.9.2.3 Line posts - 2-3/8 inch OD pipe, 3.65 lb per ft.

6.9.2.4 Terminal posts (end, corner, and pull) - 2-7/8 inch OD pipe, 5.79 lb per ft.

6.9.2.5 Gate posts (swing gates) - Gate or leaf 6 ft wide or less, 2-7/8 inch OD pipe, 5.79 lb per ft; gate or leaf over 6 ft wide and up to 13 ft, 4 inch OD pipe, 9.10 lb per ft; gate or leaf over 13 ft and up to 18 ft wide, 6-5/8 inch OD pipe, 18.97 lb per ft; gate or leaf over 18 ft wide, 8-5/8 inch OD pipe, 28.55 lb per ft.

6.9.2.6 Top Rail - 1-5/8 inch OD (Schedule 40) pipe, 2.27 lb per ft; or 1-5/8 by 1-1/4 inch roll formed sections weighing 1.35 lb per ft.

6.9.2.7 Post tops - Pressed steel, malleable iron with pressed steel extension arm, or one-piece aluminum casting with hole for top tension wire, designed to fit over the outside of the posts and to prevent entry of moisture into tubular posts.

6.9.2.8 Barbed wire Galvanized, ASTM A121 Class 3; two 12-1/2 gauge steel wires with 4 point round 14 gauge barbs spaced 5 inches apart.

6.9.2.9 Stretcher bars - Steel, 3/16 by 3/4 inch, or equivalent cross-sectional area.

6.9.2.10 Fabric ties - Aluminum bands or wires.

6.9.2.11 Gate frames - 1-7/8 inch OD (Schedule 40) pipe, 2.72 lb per ft; or 2 inch square, 4.32 lb per ft.

6.9.2.12 Tension wire - Galvanized coil spring wire, 6 gauge ASTM A641 Class 3.

6.9.2.13 Setting cement - Minwax "Super Por-Rok Cement" or Master Builders "Set 45."

6.9.3 Site gates shall be swing type, hinged to swing 180 degrees from closed to open, complete with frames, latches, stops, keepers, hinges, fabric, braces, pad-locks, and three strands of barbed wire. Gate leaves, except those on walk-through gates, shall have intermediate members and diagonal truss rods as required for rigid construction

ECRC-08-3330 HEARING EXHIBIT - 00000352

and shall be free from sag or twist. Gates shall be fitted with vertical extension arms or shall have frame end members extended to carry barbed wire. Joints between frame members shall be made by welding or by means of heavy fittings and shall be rigid and watertight. Truss rods shall be not less than 3/8 inch diameter. Gate fabric shall be same as fence fabric and shall be attached to frame ends by stretcher bars, bolt hooks, or other mechanical means.

6.9.3.1 Hinges shall be heavy pattern with large bearing surfaces and shall not twist or turn under the action of the gate.

6.9.3.2 Latches shall be plunger bar type, full gate height, and arranged to engage the gate stop, except single gates less than 10 feet wide may be provided with a forked latch. Latches shall be arranged for padlocking with the padlock accessible from both sides of the gate.

6.9.3.3 Stops shall consist of a roadway plate with anchor set in concrete and arranged to engage the plunger.

6.9.3.4 Keepers shall consist of mechanical devices for securing and supporting the free end of the gates when in the full open position. Keepers shall be mounted on 2-7/8 inch outside diameter pipe posts filled with concrete and set in concrete foundations.

6.9.3.5 Gates shall be installed so that they cannot be removed without disassembly of the hardware. Hardware attachment bolts shall be peened so that removal will be difficult.

6.9.4 The installed site fence shall conform to the alignment and finish grade indicated. Unless otherwise indicated or specified, all posts shall be plumb and spaced 10 feet apart. Where necessary, the fence grade shall be adjusted to fit the ground contour by slipping the fence fabric links.

6.9.5 Ground surface irregularities shall be graded as required to minimize changes in vertical alignment and to provide a smooth profile for the fence. Clearance below the bottom of the fence shall not exceed 2 inches.

6.9.6 The plan and profile of each reach of fence between corner posts, or between corner posts and gate posts, shall be straight. Ground surfaces shall be graded as required to achieve the straight profiles before each reach of fence is installed.

6.9.7 Top rail and bottom tension wire shall be installed before the fabric. To minimize raising the bottom of the fence to gain access, bottom tension wires shall be installed in the lowest position possible (approximately 6 inches above grade) and shall be attached to each post and securely anchored at terminal and gate posts. Straight runs between braced posts shall not exceed 1,500 feet. A terminal post shall be provided at each change in slope.

6.9.8 Fabric shall be attached to the top rail and bottom tension wire at 24 inch centers and to the line posts at 15 inch centers, all on the security side of the fence. Barbed wire shall be fastened to each extension arm by internal clips or external fabric ties. Stretcher bars shall be provided at each gate, terminal, and pull post. Each stretcher bar shall be threaded through the fabric and anchored to the post at 15 inch centers by positive mechanical means.

6.9.9 Each gate and terminal post shall be braced by a horizontal pipe brace and an adjustable truss extending to an adjacent line post. Corner posts located where the deflection angle is 10 degrees or greater shall be braced in both directions.

7.0 INSTRUMENT AND CONTROL SYSTEM

7.1 General

7.1.1 The Plant's instrument and control systems shall be designed to provide for the safe and efficient start-up, operation, shutdown and emergency shutdown of the Plant.

ECRC-08-3331 HEARING EXHIBIT - 00000353

7.2 Instrumentation General Design and Installation

7.2.1 All instruments and equipment shall be installed in a manner which assures reasonable protection against mechanical damage, wetting, or extremes of heat or cold. Instrumentation shall be stored in accordance with the manufacturer's recommendations until installation. Final locations and orientations must be selected for accessibility, repair, and calibration in place, easy access to the rear of the instruments (if needed), and for disconnection without resorting to cutting, burning, or welding.

7.3 Instrument Cabinets and Local Control Panels

7.3.1 Local Instrument Rack / Enclosure / Cabinet Installation

7.3.1.1 Instrument racks/enclosures/cabinets shall be secured to structural steel or to concrete. Racks/enclosures/cabinets shall be electrically grounded. Bolting to bare or galvanized metal shall be used for attaching a ground strap.

7.3.1.2 Prior to installation, Contractor shall ensure that instrument racks/enclosures/cabinets have sufficient clearances for the required blowdown piping and headers, door swing radius, etc., and that the racks/enclosures/cabinets are completely accessible for maintenance.

7.3.1.3 The racks/enclosures/cabinets shall be installed and anchored in place so that they are level and plumb and properly aligned in accordance with the above mounting requirements.

7.3.1.4 Racks/enclosures/cabinets shall not be supported by handrails. All instrument line penetrations into instrument enclosures/cabinets shall be through bulkhead fittings (couplings). Bulkhead couplings shall be supplied on instrument enclosures/cabinets for each instrument location. Top entry of instrument cabinets or instrument enclosures/cabinets junction boxes is prohibited. Bottom entry is the preferred method for conduits.

7.4 Local Instrument Cabinets / Racks

7.4.1 Instrument and Control Wiring and Instrument Cabinet Wiring

7.4.1.1 Both ends of conductor or wire pair shall be identified with a wire number or instrument tag number.

7.4.1.2 All necessary precautions shall be taken to maintain a high standard of cleanliness during storage and assembly. All metal chips, turnings, rust, dust, weld splatter, scale, and other particles shall be removed without destroying the continuity of the surface.

7.4.2 Marking

7.4.2.1 Contractor shall install stamped stainless steel tags for the following Contractor purchased equipment:

7.4.2.1.1. All instruments shall be tagged with the appropriate instrument tag number. Tags shall be secured with stainless steel wire with ends crimped together.

7.4.2.1.2. Each local instrument cabinet shall have a stainless steel tag permanently affixed to the cabinet front.

7.4.2.1.3. Each cabinet mounted instrument shall have a tag affixed to the instrument.

7.4.3 Continuous Monitoring System

7.4.3.1 Contractor shall provide a continuous monitoring system (Data Acquisition system – DAS) that is capable of providing real-time performance monitoring, historical data storage and retrieval, and Internet accessibility of data.

7.4.3.1.1. The monitoring system shall provide AC energy production on the individual inverter level.

ECRC-08-3332 HEARING EXHIBIT - 00000354

7.4.3.1.2. The monitoring system shall provide solar irradiance, ambient temperature and wind speed.

7.4.3.1.3. All monitored information is stored on the data logger as 15 minute averages and transmitted for processing, storage and backup. For added security, the DAS shall include a battery backup, so it can store up to four weeks of data.

8.0 PROJECT SPECIFIC CONSTRUCTION REQUIREMENTS

8.1 Lay down and Storage Requirements

8.2 Condition of Delivery of Equipment and Materials

8.2.1 In general, equipment and materials will be delivered to the site by truck. Contractor shall coordinate the ordering, delivery, and storage of all materials necessary for the performance of its Work, and Contractor shall be responsible for damage, loss, theft, casualty, shortages, shrinkage, and non-conformance of materials and equipment.

8.2.2 Truck deliveries and traffic shall comply with permit requirements.

8.3 Construction Support Facilities

8.3.1 Contractor shall provide all necessary temporary facilities at the site to support its staff and labor force and the delivery, unloading and storage of equipment and materials.

8.3.2 Contractor shall provide copies of drawings/specifications/ vendor manuals or other documents that FPL requires on-site during the project. Contractor shall also provide FPL personnel access to document control for specific information needs.

8.3.3 Any temporary storage facilities shall be capable of meeting any state, federal, or local requirements.

8.4 Construction Quality Control

8.4.1 First line, primary inspection and testing (hereafter referred to as Quality Control) are the responsibility of Contractor. Contractor's quality control procedures shall be clearly stated in the Quality Control Manual, and shall specify field inspections and inspection criteria. A summary of FPL's minimum requirements for Contractor's Inspection/Testing program is identified below. These minimum requirements are to be supplemented with additional requirements as determined by Contractor as specifications are developed and code requirements are identified. Problems discovered during inspections and testing which could impair job cost, schedule, or Plant function, will be immediately conveyed to FPL. Contractor's Quality Program must also include Contractor Quality Assurance.

8.4.2 Contractor shall conform to prevailing quality industry standards in accordance with Contractors profession in the location of the project. Any work which does not meet this standard of care shall be repaired, replaced, and re-performed at the sole expense of Contractor.

8.5 FPL's Scope of Services-Quality Assurance

8.5.1 FPL will perform an overview of the Quality Control function as practiced by Contractor. This overview does not include "Hold" or "Witness" points. Every effort will be made to implement a meaningful overview inspection without impeding Contractor's efforts or job progress. The overview is intended to assist Contractor in meeting design and code requirements, and to prevent deficient material/workmanship rather than to identify it after the fact. FPL's representatives will conduct the overview inspections. Concerns arising from the overview inspection will immediately be conveyed to Contractor for incorporation into Contractor's Quality Control Program for corrective action, recurrence control, and trending. FPL's representatives will continually monitor and evaluate Contractor's timeliness and adequacy of corrective actions and recurrence controls.

8.5.2 As a means of assuring that the performance of the Work fulfills the requirements of the Contract Documents, Contractor shall maintain a Quality Management Organization, which provides Quality Control/Quality Assurance expertise in a

ECRC-08-3333 HEARING EXHIBIT - 00000355

number of key areas. The program shall be capable of providing assurance that the receipt, storage, erection, installation, testing, and examination of all equipment, components, materials, and services will comply with the requirements of the Contract documents. The Quality Program shall be documented in a Quality Control Manual, which shall be submitted to FPL for approval 30 days after Notice to Proceed.

9.0 STARTUP AND COMMISSIONING REQUIREMENTS

9.1 General Requirements

9.1.1 Contractor shall provide FPL a Startup Execution Plan document that describes in detail all aspects of the Startup and Commissioning Program including how commissioning activities shall be incorporated into the design, procurement and construction of the Work. The Execution Plan shall be submitted to FPL for review and approval. FPL's approval shall not be unreasonably withheld.

9.2 Scope of Startup Program

9.2.1 Contractor shall supply all required labor to execute the startup plan and supply all test and calibration equipment, materials, and services necessary to perform all testing, system calibration, checkout, functional testing and initial operation as well as make adjustments, perform event and trip analysis to determine the root cause, and correct deficiencies, completely in accordance with this specification.

9.2.2 Construction Turn-over and Pre-commissioning

9.2.2.1 As the various subsystems, systems and equipment packages are brought to a state of mechanical completion by Contractor's construction organization they will one by one be turned over to Contractor's startup organization by means of a pre-commissioning procedure. Contractor will perform the non-operational adjustments, and checks to verify that each item of equipment, subsystem, package and system is ready for operational start-up and testing.

9.2.2.2 The following activities and verification steps are included:

9.2.2.2.1. Physical construction complete (a checklist shall be provided by Contractor).

9.2.2.2.2. Compile associated documentation for code compliance, QA/QC, design basis.

9.2.2.2.3. Complete post construction testing (i.e. cold alignment, bump motors for rotation, pressure test, bolt torque, electrical insulation, contact resistance for field assembled electrical connections, and continuity tests, etc.).

9.2.2.2.4. Complete cleanup, painting, insulation and/or punch-list items sufficiently to safely perform the startup testing and initial operation.

9.2.2.3 As the pre-commissioning for each individual item of major equipment, subsystem and major system is completed it will be documented with a turnover package demonstrating that it is ready for commissioning. The pre-commissioning package shall contain the procedures for executing the above activities, and documentation of their results. The package may be a subset of the Startup Turnover Package.

9.2.3 Start-Up Program Field Activities

9.2.3.1 During this phase Contractor will perform the calibration, testing and operation of the various portions of the Plant, starting with component tests, and then progressing through tests of subsystems and complete systems, and then operation of the Plant as a whole. The overall startup sequence and logic shall be developed by Contractor's Startup Manager so that subsystem startup packages are completed and presented to FPL's Operations Department in proper sequence to support an orderly startup. Coordination of Startup Activities shall include the following:

ECRC-08-3334 HEARING EXHIBIT - 00000356

9.2.3.2 From commencement of startup activities, Contractor's startup personnel, under the direction of Contractor's Startup Manager, will directly coordinate all such activities for energization and operation of equipment and systems being started up.

9.2.3.3 Contractor's Startup Manager will initially hold weekly and later, daily startup coordination meetings. Contractor's Startup Manager and FPL will mutually agree on the frequency of the meetings. All subcontractors performing work in areas currently being readied for subsystem turnover for operation shall attend, as well as Contractor's Construction Superintendent, appropriate manufacturer's technical representatives, and FPL's representative. The meeting shall include a review of activities since the last meeting and a look ahead at activities planned for the next two weeks.

9.2.3.4 Contractor shall maintain a single integrated punch-list of outstanding activities for the construction, commissioning, startup, and initial operation of the project. FPL shall have the authority to add or delete items from the punch-list.

9.2.3.5 FPL may elect to witness any or all pre-commissioning or startup activities. The coordination meeting shall serve as the mechanism for notifying FPL of when activities are taking place.

9.2.3.6 Contractor shall provide written procedures for use by Contractor's commissioning team and FPL's plant operating staff for all Commissioning Procedures.

9.3 Operating Mode, Capability Verification and Guaranteed Performance Tests

9.3.1 The Plant shall successfully complete the Operating Mode Tests, the Capability Verification Tests and the Guaranteed Performance Tests in accordance with Appendix HH(Performance Testing), to demonstrate compliance with the Agreement requirements for Minimum Performance Levels and Guaranteed Performance Levels.

9.3.1.1 Operating Mode Tests – Test(s) that demonstrate the capability of the Plant to operate automatically from morning startup, through the day, and evening shutdown. Test should also demonstrate the capability of the Plant to automatically operate in response to abnormal operating conditions, such as the failure of an inverter, distribution system disturbances, etc.

9.3.1.2 Capability Verification Tests – Test(s) that demonstrate the capability of the Plant to operate automatically, safely, and reliably over the full range of capacity, from startup to full capacity.

9.3.1.3 Guaranteed Performance Tests – Test(s) that demonstrate the guaranteed capacity of the plant.

9.3.2 Contractor shall provide the Plant performance test procedures that will demonstrate the Plant meets the required performance specifications.

9.3.3 Contractor shall be required to provide to FPL, for review and acceptance, detailed documents for these tests (test procedures) which will include but not be limited to:

9.3.3.1 Description of the test

9.3.3.2 List of all data to be collected

9.3.3.3 Instrumentation and location for taking all data points

9.3.3.4 Correction curves

9.3.3.5 Instrument and test accuracy's

9.3.3.6 Sample calculations

9.3.4 The draft Test documents shall be submitted for review at least 120 days before the expected test date. FPL shall provide comments within thirty (30) Business Days. Contractor will provide written response to FPL's comments within 10 Business Days and make necessary modifications to the test procedures.

ECRC-08-3335 HEARING EXHIBIT - 00000357

9.4 Environmental Control Program

9.4.1 Contractor shall develop and maintain an Environmental Control Program document to assure that all construction and start-up activities associated with the Project conform to best environmental practices, federal, state and local regulations, applicable permit conditions, conditions of certification, Environmental Rules for Contractors, and any other construction and start-up constraints identified in the Project's environmental permitting process. A secondary purpose of the Environmental Control Program is to provide the basis for emergency response programs that will be in place during construction and operation of the Project. The Program shall include an Environmental Control Plan and all other relevant program documents (i.e., permit matrices, storm water pollution prevention plan, spill prevention, control and countermeasure plan, emergency response plan, copies of permits, etc). The Environmental Control Program document will provide all relevant references for the project's environmental management.

9.4.2 The Environmental Control Program shall include an Environmental Control Plan that describes the processes that will be followed in order to comply with applicable Laws and permits. The plan assigns specific responsibilities for compliance with environmental restrictions and response to emergency situations during construction and startup of Project facilities.

9.4.3 The Environmental Control Program document shall also include a matrix of permit compliance activities, due dates, responsible person and current status. Copies of Contractor's and FPL's environmental permits applicable to the Project shall be included in the document.

9.4.4 The Environmental Control Program document shall be submitted to FPL for review and approval no later than 30 days prior to site mobilization.

9.5 FPL Notification

9.5.1.1 In the event Contractor becomes aware of any imminent conditions of non-compliance or receives either a Letter of Non-Compliance or Notice of Violation, Contractor shall immediately contact FPL and initiate appropriate measures to correct the non-complying condition or activity and prevent its recurrence.

9.6 FPL Audits

9.6.1.1 FPL shall reserve the right to conduct periodic quality control/quality assurance assessments and environmental audits of Contractor's project activities. Assessment and Audit findings in non-compliance with project permit requirements shall be immediately corrected by Contractor.

10.0 PROCUREMENT

10.1 Selection of Equipment Suppliers

10.1.1 Contractor shall procure equipment in accordance with the requirements of the Agreement from reputable suppliers who normally produce the type of equipment specified for use in heavy industrial applications.

10.1.2 Where specific requirements for equipment are included herein, Contractor shall ensure that these requirements are included in Contractor's specifications and complied with by the selected manufacturer. Contractor shall be responsible for proposing resolutions to any exceptions taken by suppliers to the requirements outlined herein and obtaining FPL's concurrence with these resolutions prior to accepting the exceptions.

10.1.3 FPL's review of these exceptions will be limited to ensuring compliance with the intent of these specifications, specifically to establish a minimum level of quality and functionality. FPL's concurrence or comments will be forwarded to Contractor within ten (10) Business Days of the date they are received in FPL's offices.

10.1.4 For other equipment, manufacturers and model numbers listed in this Technical Specification are representative only of the quality of equipment proposed.

ECRC-08-3336 HEARING EXHIBIT - 00000358

Manufacturers and model numbers of equal quality may be substituted for those listed in this Technical Specification.

10.1.5 Contractor shall have the obligation of ordering, receiving delivery of, storing, caring for, and installing such equipment and materials. Contractor shall coordinate the ordering, delivery, and storage of all materials necessary for the performance of its Work, and Contractor shall be responsible for damage, loss, theft, casualty, shortages, shrinkage, and non-conformance of materials and equipment.

10.1.6 No substitutions shall be made in the Work unless permitted in the Agreement and only then upon Contractor receiving prior written approval.

10.2 Vendor Inspection

10.2.1.1 FPL reserves the right to participate in scheduled vendor inspections of any equipment supplied under the terms of this Contract in accordance with the terms of the Contract. Contractor shall submit to FPL, prior to use, a listing of planned inspections for the major equipment to be supplied.

10.3 Material and Equipment Quality Control

10.3.1.1 Contractor shall provide new equipment, materials, and workmanship suitable for this application.

10.4 Inspection and Shop Testing

10.4.1 Contractor shall provide for shop inspection and testing of major equipment as determined by Contractor. Testing programs shall be established by Contractor, but shall not be less thorough than the manufacturer's standard testing procedures. Contractor is responsible for insuring that the manufacturers conform to the manufacturing specifications for quality, inspections and testing contained in all equipment contracts.

10.4.2 FPL reserves the right of shop inspection visits and may witness shop tests in accordance with the terms of the Agreement. Shop inspections by FPL do not relieve Contractor of responsibility contained in the Agreement. Contractor shall endeavor to notify FPL of the tests at least 5 Business Days in advance of tests.

10.4.3 Contractor shall submit certified copies of test reports and shop tests, to FPL.

11.0 PROJECT ADMINISTRATION

11.1 Project Meetings

11.1.1 During all active phases of the Project, Contractor shall be required to participate in a monthly Project Review Meeting with FPL. During the engineering, design, and procurement phases of the Project, this meeting will normally be held in Contractor's home office. Each of Contractor's lead discipline engineers will be required to update FPL's organization on the discipline progress to date, review design activities currently in progress, and discuss problem areas and the plan developed by Contractor to address and resolve them. After the start of construction, the monthly Project Review Meetings will normally be held in Contractor's site office and will be attended by Contractor's Project Manager, Project Engineering Manager, Home Office Construction Manager, Site Construction Manager, Startup Manager, and Project Controls Engineer. Update responsibilities and activities will correspond to those identified for the pre-construction phases of the project in the preceding paragraph.

11.1.2 In addition to the monthly meetings, Contractor shall submit a monthly progress report which includes schedules, detailing progress against the Level 2 CPM schedule, percent complete curves for the engineering and construction phases of the project, bulk commodity installation progress curves, and a discussion of problem areas and proposed resolutions. Attached to this report, Contractor shall provide current revisions of the purchase order, contractor drawing, and vendor drawing lists.

11.1.3 Between Project Review Meetings, Contractor shall conduct weekly construction/startup review meeting with all key site personnel in attendance. FPL's Representatives may attend these meetings.

ECRC-08-3337 HEARING EXHIBIT - 00000359

11.2 Document Preparation Requirements

11.2.1 Contractor shall produce all engineering documentation normally required for a project of this type, including, but not limited to, flexibility and expandability requirements, design objectives and constraints design studies and analyses, design calculations, equipment specifications and detailed design drawings.

11.2.2 The design documents shall be certified and approved by a licensed professional engineer and architect, and such other certified professionals as required by Law. Prior to Final Acceptance, Contractor shall turn over to FPL copies of all engineering documentation.

11.3 Project Submittals

11.3.1 Contractor shall supply the following drawings and information to FPL as part of the scope of Work. Items marked with an asterisk (*) shall be submitted for FPL's review. The transmittal of documents for FPL's review shall be by letter referencing that the documents are submitted per this Section of the Contract. Any comments from FPL shall be returned within ten (10) Business Days. As-builts shall be provided for the site plan, array layout and shading drawings, underground electrical drawings, electrical wiring and control wiring diagrams

11.3.1.1 *Site Plan

11.3.1.2 *Array Layout and shading diagrams

11.3.1.3 *Underground electrical drawings

11.3.1.4 *Erosion and Sedimentation Control Plans

11.3.1.5 *Dewatering Plans

11.3.1.6 *Electrical diagrams

11.3.1.7 *Array wiring diagrams

11.3.1.8 *Structural drawings

11.3.1.9 *Finish Grading and Paving drawing

11.3.1.10 *QA/QC Manual (Project Execution Plan and Project Coordination Procedure Manual)

11.3.1.11 Calculations substantiating any portion of the design, that is normally provided on request by FPL.

11.3.1.12 Drawings and Operating & Maintenance manuals for all equipment provided in Contractor's scope of work.

11.3.1.13 *Performance Test Procedures in accordance with 9.3.5.

11.3.2 All vendor drawings shall be sent to FPL in electronic format. Each vendor drawing shall be sent with a unique file number.

11.3.3 Contractor shall prepare and provide (including routine updates) to FPL, all typical lists including, but not limited to, the following:

11.3.3.1 Spare parts and special tools lists

11.3.3.2 Electrical Load List (Motors, Heaters, etc.)

11.3.3.3 Equipment List/Instrument List

11.3.3.4 Overall Plant Control Scheme

11.3.3.5 Instrument Data Sheets

11.3.3.6 Cable and Conduit Schedule

11.3.4 At the conclusion of the project and prior to Final Acceptance, Contractor shall supply to FPL a set of compact discs (CD's) containing final revision of the drawings and documents listed above.

ECRC-08-3338 HEARING EXHIBIT - 00000360

12.0 INTERCONNECTION PROTECTION AND METERING EQUIPMENT

12.1 Protective Relay Systems

12.1.1 FPL shall provide the PV plant generation interconnection protective relay systems for the Project. The protective relay panels will be installed by the Contractor. The interconnection protection will include a fiber optic communication system. This protective relay equipment will be installed in the by the Contractor.

12.2 Interfaces

12.2.1 Interfaces between the PV plant switchgear and other plant electrical systems, and the FPL interconnecting protective relay equipment will be provided by the Contractor.

12.3 Cable

12.3.1 Cable and conduit runs between the PV generating facility equipment and the interconnection protective relay equipment will be provided and installed by the Contractor.

12.4 Revenue Meters

12.4.1 The revenue meter will be provided and installed by FPL. The revenue metering transformers will be provided by FPL and will be installed by the Contractor on structures designed and installed by the Contractor. The conduit runs from the metering transformers to the meter cabinets will be provided by the Contractor. FPL will provide the metering cables to be installed by the Contractor. The metering transformers will be provided and installed by the Contractor. The transformers may be installed in the LV equipment provided by the Contractor. The location of the metering transformers shall be reviewed and approved by FPL. Conduit runs between the metering transformers and the metering cabinet shall be provided by the Contractor. The metering cables will be provided by FPL.

ECRC-08-3339 HEARING EXHIBIT - 00000361

Appendix A – Scope of Work
Exhibit A – Environmental Rules for Contractors

APPENDIX A
EXHIBIT A
ENVIRONMENTAL RULES FOR CONTRACTORS

1. This document must be made a part of all contracts and subcontracts by the EPC contractor for work to be performed on the Project site.

2. All contractors and subcontractors must review site orientation documents and sign affidavit if required by FPL Project Construction Manager (PCM). All contractors must implement an Environmental Control Program, reviewed and approved by FPL, as specified in the Scope of Work documents.

3. All contractors and subcontractors must inform the FPL Project Construction Manager (or designee) in writing of the type and amount of any chemicals (prior to their delivery to the site) to be brought on-site to complete the work. All contractors and subcontractors shall further notify the FPL PCM in writing during the course of construction, if any additional chemicals are to be brought on site.

4. All contractors and subcontractors must provide Material Safety Data Sheets (MSDS's) for all chemicals as directed by the FPL PCM prior to chemicals being brought on-site. Per the OSHA Hazard Communications standard, MSDS's must be maintained (by all contractors and subcontractors) on-site for any chemicals that could pose a health or physical threat to personnel, and all personnel must be Hazard Communication trained. The FPL PCM is responsible for ensuring that required Hazard Communication training is provided to FPL employees potentially exposed to these chemicals. Contractors are responsible for training their personnel.

5. No hazardous materials may be brought onto the Project site unless necessary for contracted work. Arsenic free bentonite shall be used for all drilling.

6. Waste management, including determination of the type of waste, quantity, and appropriate storage prior to off-site disposal, must be coordinated with the FPL PCM.
   - All contractors and subcontractors must provide FPL PCM with waste minimization plans. [Plans often include product substitution, process changes to eliminate or reduce chemical use, and/or recycling or reusing materials;]
   - Copies of any analyses performed to classify wastes as hazardous or non-hazardous must be given to FPL PCM and copied to FPL Environmental Services;
   - Hazardous materials used and hazardous waste generated must be stored in temporary or permanent secondary containment in areas agreed to by FPL PCM;
   - Secondary containment structures shall be maintained free from stormwater or other materials that defeat the purpose of the secondary containment. Stormwater or other materials removed from secondary containment structures must be managed appropriately.
   - All wastes must be stored in designated hazardous and non-hazardous containers appropriately labeled prior to proper disposal.
   - All original manifests, shipping papers, certificates of disposal, or other documents associated with waste transport and disposal must be provided to FPL PCM. Waste manifests must be signed by FPL contractor or subcontractor whose EPA ID number is used for waste disposal (unless otherwise specified – e.g., FDEP may required use of Substation's EPA ID number for contiguous project operations. In this case strict waste minimization and management is required in order to prevent changing current waste generation status of Substation).
   - All contractors and subcontractors must inform FPL PCM of all disposal sites to be used for hazardous and non-hazardous wastes prior to contract award;
   - All contractor and subcontractor employees responsible for managing hazardous wastes must be properly trained. Documentation of that training is to be provided to the FPL PCM and to FPL Environmental Services.
   - Hazardous materials releases or spills of any kind must be reported immediately to the FPL PCM (see Item 7); and
   - Contractor must consult with FPL PCM to determine if hazardous waste identification number should be obtained prior to contract award.

7. All contractors and subcontractors must coordinate with FPL PCM for proper storage of flammable or other types of chemicals.

8. All contractors and subcontractors are responsible for knowing and complying with all local, state and federal reporting and response requirements for releases or spills of oil, petroleum products, onsite products and

ECRC-08-3341 HEARING EXHIBIT - 00000363

chemicals, hazardous materials or hazardous wastes. All contractors and subcontractors must ensure that spill prevention measures are in place during the course of work at the Project site. This includes:

- Ensuring that all containers are closed at the end of each work day;
- Use of temporary hoses is carefully planned;
- Secondary containment is used for work near drains;
- All fuel and oil tanks used by all contractors and subcontractors must be placed in temporary secondary containment on an impervious surface;
- All contractors and subcontractors must maintain appropriate spill clean-up equipment near tanks and equipment that have potential for leaks;
- Following work and prior to start up, all contractors and subcontractors must ensure that all valves, manways, and pipelines are closed if appropriate to minimize risk of spills;
- All contractors and subcontractors must assume that all "out-of-service" lines will leak when brought back into service – appropriate spill containment measures must be taken;
- All contractors and subcontractors must document the training of personnel in spill awareness, notification (internal FPL/Agencies), and identification of spill risk areas; and
- All contractors and subcontractors must review the site's spill plans and know appropriate FPL site contact in the case of **ANY** spill. All contractors and subcontractors must coordinate with FPL PCM in order to understand the plant's spill response plans.

9. All contractors and subcontractors must comply with all applicable local, state, and federal laws in the course of performing work at the Project site. All contractors and subcontractors must coordinate with FPL PCM to ensure that the terms of permits and conditions of site certification to conduct work are met. Copies of any and all permits acquired by all contractors and subcontractors shall be provided to the FPL PCM. All contractors and subcontractors must coordinate any contact with regulatory agencies with the identified FPL contact.

10. All contractors and subcontractors must include environmental issues in daily safety tailgate sessions. FPL PCM should attend meetings when possible.

11. If work is conducted on Risk Management Plan (RMP) or Process Safety Management (PSM) regulated system, all requirements in the RMP and PSM documents must be reviewed/coordinated with the designated FPL contact and addressed during the course of work.

12. All contractors and subcontractors are required to maintain "good housekeeping" during the course of the project and must perform a thorough site clean-up following completion of the work. All unused products / chemicals are the property of the contractor and must be removed from the site at the end of the job unless specific arrangements are made with the PCM. All contractors and subcontractors must inform the FPL PCM when chemicals have been removed from the site.

13. All contractors and subcontractors must conduct a post-project site "walk-down" with the FPL PCM and plant environmental specialist to ensure that environmental issues are addressed and resolved.

14. All required erosion control/stormwater pollution prevention practices must be implemented and documented as required by regulations, Stormwater Pollution Prevention (SWPP) Plans or Best Management Practices (BMP) Plans. A listing of these requirements shall be coordinated with FPL PCM. Contractor is responsible for development and implementation of such plans. Conditions of Certification and / or all other applicable permit conditions must be strictly observed.

15. Threatened and endangered species are not expected to be present either in or near the Project area. Federal, state and local rules and regulations are designed to protect these species from harassment and harm. If threatened and endangered are observed on or near the site, the contractor and subcontractors are obligated to comply with these rules and regulations.

ENVIRONMENTAL FIELD INSPECTION FORM

FACILITY: _____ **DATE:** _____

Instructions:

Walk site *at least once a week* and review each of the following areas

Explain each "No" answer in the comment section

Sign completed form and provide to FPL Project Manager with copy to FPL Environmental Services

General Environmental Management		**YES**	**NO**
1	Is housekeeping in all areas in good condition? All areas should be neat, orderly, and clean.		
2	Is the site free of any dead animals?		
3	Are spill cleanup materials and equipment in good condition and in close proximity to where they might be needed?		
4	Does security appear adequate? Fencing, locks, and lighting are in good condition.		
5	Are all contractors and subcontractors following the FPL Environmental Rules for Contractors? Has the Environmental Control Plan been implemented effectively?		

Waste Management		**YES**	**NO**
6	Is sandblast or bead blast material swept up? All material should be swept and contained for proper disposal. **Note that blast material containing metals could be hazardous waste; appropriate testing and documentation must be performed.*		
7	Are trash receptacles free of the following hazardous, universal, or recyclable waste? • Aerosol cans • Containers with product (e.g. paint, solvent) • Saturated oily rags or absorbent pads (SC – any oily rag/wiper prohibited) • Rags or absorbent pads with solvent odor • Discarded equipment that contains refrigerant • Recyclable items (aluminum cans, metal, cardboard, paper, etc.) • Universal waste (mercury containing lamps, batteries, pesticides, thermostats) • Tires		

ENVIRONMENTAL FIELD INSPECTION FORM

		YES	NO
8	Is waste properly contained in drums? • Bungs closed and no open funnels • Lids sealed tight • Clearly labeled with contents • Where contents are flammable, drum is grounded • Drums not stacked • Outside of drum clean; no evidence of waste product		
9	Are drums in good condition (includes empty drums)? • Free of dents • Free of holes • Free of rust • Free of bulges or leaks		
10	Is hazardous waste secondary containment in good condition? • Free of cracks, gaps, waste product, and no breaching • Containment drains closed		
11	Is hazardous waste secondary containment free of product or water?		
12	Is the emergency equipment in the hazardous waste storage area in working order? • Telephone or paging system must work properly • There must be a fire extinguisher present that is inspected monthly • Spill clean-up equipment must be present and in good condition • *If the facility is a small quantity generator, emergency response information must be posted near the communication system.*		
13	Will the isles in the Hazardous Waste Satellite and Accumulation (storage) areas allow for movement of emergency response equipment? • Must be able to see all sides of drum for markings and drum conditions.		
14	Is the accumulation start date on all drums in hazardous waste storage for disposal area?		
15	Are used oil drums and tanks properly marked with the words "Used Oil"?		
16	Are used batteries and mercury containing lamps stored in their designated area?		
17	Are used batteries and mercury containing lamps marked with accumulation start date?		
18	Are crushed or broken mercury containing lamps contained to prevent release of mercury?		
19	Are leaking batteries contained to prevent release of acid?		

EXHIBIT A
APPENDIX A
ENVIRONMENTAL RULES FOR CONTRACTORS
(continued)

ENVIRONMENTAL FIELD INSPECTION FORM

Chemical/New Product Management	**YES**	**NO**
20 Are new products properly stored in labeled containers? • Labeled with contents and appropriate hazard warnings • Containers kept closed • No open top buckets/pails with product • The original manufacturers label intact and readable • MSDS available onsite		
21 Are flammable liquids and aerosols stored in flammable cabinets?		
22 Is the quantity of gasoline storage inside a building < 25 gallons?		
23 Are the "No Smoking" areas free from any evidence of smoking?		
24 Are hazardous materials properly stored away from storm drains or pervious surfaces?		
25 Are storm drains free of hazardous materials? • No staining, discoloration • No odors • No visible sheen		

Air Emissions Management	**YES**	**NO**
26 Is the facility area free from any evidence of particulate fallout from stack emissions?		
27 Are fugitive emissions minimized and area sources minimized? (Sandblast curtains, slow vehicle speeds, water truck operating, etc.)		
28 Is the area free from any objectionable odors?		
29 Is excessive noise minimized?		

EXHIBIT A
APPENDIX A
ENVIRONMENTAL RULES FOR CONTRACTORS
(continued)

ENVIRONMENTAL FIELD INSPECTION FORM

Water Quality Management	YES	NO
30 Is the storm-water retention pond (if applicable) properly maintained? Retention ponds should be unclogged, mowed, free of weeds, and structurally sound with all erosion and sedimentation barriers in place and in good condition.		
31 Do the water discharge areas look clean? • Free of foam • No sheen • Each outfall clearly labeled		
32 Is the area free from evidence of industrial wastewater discharging to the ground? (e.g. reverse osmosis reject, etc.)		
33 Are all onsite wells locked?		
34 Are all onsite wells in good shape with no damage?		

Tanks, Pipelines	YES	NO
35 Are the tanks or pipes free from any signs of leakage or spillage?		
36 Are the areas on ground around tanks or piping free from evidence of staining or dying vegetation?		
37 Are oil piping systems properly aligned and are supports/foundations in good condition?		
38 Do all above ground tank structures look sound? • No buckling, cracks, wetting, discoloration, blistering • No significant corrosion • No cracks in base/apron • No signs of settlement • No water accumulation inside dike		
39 Are storage tank/piping release detection systems free of oil? (e.g., double-bottom tank, monitoring wells, etc.)		

	YES	NO

ENVIRONMENTAL FIELD INSPECTION FORM

40	Is the Cathodic Protection working properly? Electrical box shows that amps of current is flowing		
41	Is secondary containment for tanks in good condition? • Concrete secondary containment should be free of cracks or penetrations. • Earthen dikes should be free of erosion, oil stains, trash accumulation or undergrowth. • Are valves in proper location to allow adequate drainage from containment?		
42	Is secondary containment for tanks free of product and water?		
43	Are transformers in proper containment and free of leaks?

HEARING EXHIBIT - 00000370

APPENDIX A
EXHIBIT B
CLEAN FILL CRITERIA

MEMORANDUM

To: Distribution

From:
Date:
Re: ***Recommended Clean Fill Screening Process for FPL Utility Properties***

Section 376.30701, Florida Statutes (2003) and the Florida Department of Environmental Protection ("FDEP") rule Chapter 62-780, Florida Administrative Code ("F.A.C.") directs the FDEP to apply the Soil Cleanup Target Levels ("SCTLs") of rule Chapter 62-777, F.A.C. to all contaminated sites where a clean up is required. The SCTLs are conservative default cleanup criteria for approximately 500 constituents many of which are naturally occurring in Florida soils. For FPL, this new soils rule mainly impacts construction projects and the cleanup of contaminated sites.

Furthermore, the SCTLs of Chapter 62-777, F.A.C. may be viewed as an indication of whether or not contamination exists at a site. If a clean up is required due to the discovery of "contamination" the FDEP will require a site to meet residential SCTLs for a "no further action" determination. If a site cannot meet residential soil levels, then some sort of engineering control such as an asphalt cover and fencing will be required in addition to an institutional control such as a deed restriction and an agency permit.

Therefore, future liability for FPL may be created unless fill material brought onto FPL Utility property meets the residential levels for any constituents present. It is advisable that FPL sample and perform analytical testing on representative samples of fill material prior to bringing the fill material onto FPL owned or leased property. In this regard, the following sampling and analysis is recommended prior to bringing clean fill onto any FPL owned or leased property:

Incorporate the Purchase of Clean Fill into the Project and Project Schedule.
This will enable your facility to schedule the physical collection and laboratory analysis of one or more representative samples of the specific fill to be brought on site just prior to delivery. Typical laboratory turn around time is 1-2 weeks. Laboratory analyses may be rushed (1-4 business days) at an additional cost (25-100% markup). This is the best way to ensure that the fill being brought onto FPL property will meet the residential clean soil criteria.

Suggested Screening Process
Soil samples should be collected and analyzed for the clean fill parameters. The standard clean soil parameters are arsenic, barium, cadmium, chromium, lead, selenium, silver, PCBs, and TRPH.

If time permits (i.e., non-rush or pre-qualification samples), it is recommended that the samples first be tested for arsenic as a screening tool. If the arsenic residential SCTL is met, then the laboratory can test the existing soil samples for the remaining clean soil parameters as determined necessary. If time is of the essence (i.e. rush analyses required), samples should be analyzed for all listed parameters at once.

Finally, it should be noted that any fill material that is to be reused on site should undergo the same process, and pass analytical screening for Chapter 62-777, F.A.C. constituents at residential levels.

ECRC-08-3349 HEARING EXHIBIT - 00000371

EXHIBIT A
APPENDIX B
CLEAN FILL CRITERIA
(continued)

RESIDENTIAL SOIL CLEANUP TARGET LEVELS (SCTLs)*
Per Chapter 62-777 F.A.C.
Updated May 16,2005

CONSTITUENT	mg/kg
Arsenic	2.1
Barium	120
Cadmium	82
Chromium	210
Lead	400
Selenium	440
Silver	410
PCBs	0.5
TRPH	460

Note:

The SCTLs are regulatory-derived values that are subject to periodic review. To ensure that the most up-to-date values are used, consult Chapter 62-777 Florida Administrative Code (F.A.C.), Table 2 (www.dep.state.fl.us/waste/quick_topics/rules/), or contact a JES environmental specialist for assistance.

Appendix B – Project Controls Requirements

APPENDIX B
PROJECT CONTROLS REQUIREMENTS

PROJECT CONTROL REQUIREMENTS

1.0 GENERAL PROGRAM REQUIREMENTS

1.1 Provide adequate methods and tools for budget control, scheduling, tracking, trending, and reporting of work in progress for the engineering, procurement and construction activities related to the Project. Owner's intent is to monitor the Agreement at the Project level.

1.2 Identify Contractor's organization.

1.3 Develop and implement a standardized method of invoicing and payment process for work performed.

2.0 SCHEDULE GENERAL REQUIREMENTS

2.1 Bid /Proposal Submittal Requirements

Contractor shall submit a summary schedule with his proposal. This schedule shall be a drafted time-scaled logic diagram that indicates completion of all major activities. Contractor should clearly indicate each contractual milestone submittal date and FPL's deliveries along with Contractors planned completion date, clearly indicating relationships between major activities. Contractor is encouraged to plan for earlier completion dates than the contractual completion dates provided such dates do not interfere with the planned activities of other Contractors or FPL.

2.2 Project Execution Schedule

a. Contractor shall provide an electronic copy (in the most current version of MicroSoft(MS) Project) of Contractor's Construction schedule to FPL within 10 days of Contract award for FPL's approval. The schedule shall be prepared with the understanding that the Contractor's schedule is the Project Master Schedule.

b. Weekly and monthly updates shall be provided to FPL with cut-off dates and submittal dates as determined by FPL. FPL reserves the right of review and approval for the Project Execution Schedule.

c. The schedule shall allow each activity to be assigned to:

- Work Package (No. 1, 2, 3, or 4),
- Area (Unit 3, Unit 4 or Common), and
- Responsibility (Contractor, Engineer, or FPL)

2.3 Schedule Project Progress Reporting (included with Monthly Report)

Within ten (10) days after each calendar month, Contractor shall submit a brief report describing progress from the previous month, an update of the schedule, any commercial or technical issues that remain open, and a matrix of the contract milestones containing the contract date, current scheduled/actual date, and variance between the two.

2.4 Project Schedule Development

a. Contractor's schedule shall be based on FPL's Milestones and Key Dates provided over the course of the Contract.

b. Contractor shall retain responsibility for development and implementation of the schedule covering the scope of work. Contractor retains sole responsibility for meeting schedule Finish Dates.

c. Contractor's Project schedule will include manpower requirements and commodity installation plans. Commodity Installation curves to be developed at a minimum for earthwork, concrete, cable, terminations, panel and support structure installation.

2.5 Project Schedule Integration

a. Contractor shall maintain the project master schedule and integrate other contractor schedules with the mechanical schedule. Also, Contractor shall integrate activities provided by Engineering and FPL for the project into the project master schedule. Contractor schedules shall have a level of detail equivalent to a Level 2 schedule (approximately 100 to 300 activities).

b. The testing, startup of components and systems, and the performance testing shall be integrated by the Contractor into the project master schedule. Contractor shall review the logic to validated correctness of sequence and time durations for all activities in the project master schedule.

3.0 SCHEDULE/PROGRESS MEASUREMENT

3.1 Weekly Progress And Schedule Review

FPL and Contractor representatives shall meet weekly to review the Work progress and update the Work completion schedule. Contractor's representative shall present the following:

a. The current status of their Job Progress.
b. A detailed three week look-ahead schedule
c. Project Milestones current status update and forecast vs. baseline schedule
d. Their current and projected manpower by craft.
e. The material delivery status.
f. The status of drawings and other submittals.
g. Any changes in the Work.
h. The status of "As-Built" Drawings (if required).
i. Problem areas or concerns.

3.2 Progress review meetings will be held weekly at FPL's Jobsite offices.

3.3 Productivity Meetings – Any T&M or Target Price Contractor shall also participate in a weekly productivity meeting with FPL.

3.4 Three Week Look Ahead Schedules

a. Contractor shall develop a 3-week daily work schedule as shown in Attachment 1, Three Week Look Ahead Schedule Example. Generally the schedule shall be submitted to FPL with a copy to all other affected Contractors by the close of business Monday. Any submittals received after 9:00 AM each Tuesday morning shall be considered non-compliant. The exact timing of development may be modified by FPL after commencement of field mobilization.
b. The Three-Week Look Ahead Schedule (3WLAS) will be a bar chart containing activities and durations, area designations, and restraints. Activities shall be planned and scheduled overall consistent with the Project Schedule. The schedule shall be grouped by area.
c. The level of detail required for the 3WLAS shall be determined by the current status of the work and its complexity and coordination with FPL or other Contractors.
d. The key Contractor personnel who will be responsible for working closely with FPL's staff to achieve efficient execution of the Contract shall have the authority to represent Contractor.

3.5 Contractor's three week look-ahead schedule shall:

a. Indicate all planned work and testing that is to be accomplished during the current week and the next two week period all in support of, and in accordance with, Contractor's Construction Schedule.
b. Include major construction equipment requirements
c. Highlight any material or drawing needs from either FPL or Contractor.
d. Reflect the planned and actual activities of the previous week.
e. Include any activities that are required to be accomplished by others that would impact and/or prevent Contractor from starting and/or accomplishing its planned work.
f. Be presented in the level of detail sufficient to direct the efforts of the craft on a day-to-day basis.

4.0 COST REPORTING REQUIREMENTS

4.1 Cost Management Report - Contractor shall provide at a minimum on a bi-weekly basis the Claims, Changes or extra work, delays or accelerations, interferences and the like known to Contractor that have occurred or may be claimed to have occurred since project onset. This information is required to be provided in Microsoft Excel. The report is referred to as the Cost Management Report and will include current status of aforementioned items, initiated dates, dollar exposure amounts (incremental to the executed contract amount), drawing references, subcontractor documentation, etc. as required to establish an understanding of the issues. If there are no known Claims, Changes, etc the Cost Management Report shall still be issued bi-weekly stating NONE. The most recent Cost Management Report shall be attached to each Contractor invoice.

4.2 Contractor shall invoice per the conditions of the contract terms. Additionally at the request of the Owner, Contractor is required to provide an estimate of the next invoice within two business days of the request. It is understood that this request in only an estimate and may be revised with issuance of the formal invoice.

4.3 Contractor shall develop a Work Breakdown Structure (WBS) assigning cost codes encompassing the entire Scope of Work in an adequate level of detail to provide the outlined reporting requirements contained herein. Ultimately, the WBS should be developed in sufficient detail to permit assignment and allocation of costs to the functional classifications specified in the Owner Property Retirement Unit Catalog.

5.0 MATERIAL STATUS

5.1 Contractor shall maintain an updated Materials List and Shipment Origin and Profile Report for materials procured.

5.2 Contractor shall provide a weekly update of the Materials List and Shipment Origin and Profile Report to FPL.

5.3 Contractor, during the Weekly Progress and Schedule Review Meeting, shall provide a list of shortages and late deliveries that could negatively affect construction and installation if not received in a timely manner.

5.4 Contractor shall provide a composite Materials List and Shipment Origin and Profile Report for all FPL procured materials.

6.0 CONTRACTOR'S DAILY REPORT

6.1 Contractor shall submit to FPL's designated field representative prior to 10:00 a.m. each day, starting from the day Contractor mobilizes at the site, a completed and signed Contractor's Daily Force Report utilizing the form provided as Attachment 2, Daily Force Report, hereto. The Daily Force Report shall contain a listing of Contractor and Contractor manpower, including personnel by responsibility, craft, and remarks concerning the daily field activities.

7.0 TIME AND MATERIALS (T&M) WORK

7.1 Any Contract with a T&M contract or an incentive based contract shall fully report progress and expended man-hours at the individual line item level of FPL's EVMS.

7.2 This includes work performed by any Contractor doing Extra Work Order work on a T&M basis.

8.0 MONTHLY PROGRESS REPORT REQUIREMENTS

8.1 Brief narrative overview of Project status.

8.2 Brief narrative of identified critical issues.

8.3 Brief narrative of short term look ahead activities.

8.4 Updated organization chart for the Project.

8.5 Safety and environmental issues/status.

8.6 Project Milestones current status update and forecast vs. baseline schedule

8.7 Contractor Project schedules shall be updated and submitted in adobe acrobat format (pdf). These schedules shall show current status and the projected completion dates of all Project phases against the current planned schedule.

8.8 An electronic copy (data file) of the most recently updated complete MS Project integrated Project Schedule network.

8.9 Cost Management Report

8.10 Manpower curves (manpower plan with actual and forecast to go over time)

8.11 Progress curves (% Complete progress versus time).

8.12 Construction commodity curves (actual vs. original baseline and current plan) as identified in Section 2.4c above. A variance explanation and/or recovery plan shall be provided by Contractor should progress monitored on fall behind the plan.

8.13 Procurement Status Report. A complete listing of all equipment and materials to be procured by the Contractor, including status of the procurement process (bid, evaluate & award). The information included in this report shall be consistent and support the Project Schedule.

Appendix H – Form of Contractor Certificate for Partial Waiver of Liens

APPENDIX H

FORM OF CONTRACTOR CERTIFICATE FOR PARTIAL WAIVER OF LIENS

This CONTRACTOR'S PARTIAL LIEN WAIVER AND RELEASE ("Contractor's Partial Lien Waiver and Release") is made by SunPower Corporation, Systems, a Delaware corporation ("Contractor"), on behalf of itself, its successors and assigns, and those acting by or through any of the foregoing, for and in consideration of the sum of [AMOUNT OF PARTIAL PAYMENT REQUEST] DOLLARS ($[_____]) (the "Progress Payment") and other good and valuable consideration, in hand paid, the receipt and sufficiency of which are hereby acknowledged, as full payment on account of all labor, services, materials, equipment and other work performed through the ___ day of _____, 200_ (the "Release Date"), for Florida Power & Light Company, a Florida corporation ("Owner"), in connection with the construction of a solar photovoltaic electric generation facility, and all services and utilities related thereto, in Brevard County, Florida (such facility, together with the property on which such facility is located, the "Project"), pursuant to that certain TURNKEY ENGINEERING, PROCUREMENT AND CONSTRUCTION AGREEMENT FOR SOLAR PHOTOVOLTAIC GENERATING FACILITY, dated as of July [__], 2008, between Owner and Contractor, as the same may be amended from time to time (as the same may be amended, modified and supplemented from time to time, the "Agreement").

Solely with respect to the Work performed by the Contractor relating to the Project on or prior to the Release Date, the Contractor does hereby unconditionally and irrevocably waive, release, remise, relinquish and quit-claim (collectively, the "Release") all actions, claims, demands, liens, lien rights and claims of lien, of any kind whatsoever (collectively, "Claims"), which Contractor ever had or now has, known or unknown, against the Project or against Owner, its parents, subsidiaries and affiliates, at all tiers, and its and their insurers, sureties, employees, officers, directors, representatives, shareholders, agents, and all parties acting for any of them (collectively, the "Released Entities"), including, without limitation, all claims related to, in connection with, or arising out of, all facts, acts, events, circumstances, changes or extra work, constructive or actual delays or accelerations, interferences and the like, which have occurred or may be claimed to have occurred. The foregoing Release shall only be effective with respect to Claims arising in connection with the portion of the work performed by Contractor prior to the Release Date.

The Contractor warrants and represents, solely with respect to all Work completed through the Release Date that (a) the Contractor has not assigned or pledged any rights or claims in any amount due or to become due from Owner in connection with the Project; (b) payment has been or will be made to all subcontractors, laborers and material suppliers, at all tiers, for all labor, services, materials and equipment furnished by or through the Contractor for the Project, including all payroll taxes and contributions required to be made; (c) no claims from subcontractors, vendors, mechanics or materialmen against the Released Entities have been submitted to Contractor with respect to the Project or remain unsatisfied as of the date hereof; (d) no mechanics' or materialmen's liens have been filed with respect to the Project that have not been discharged or for which a bond has not been posted in accordance with the Agreement; and (e) payment of all amounts due has been made to all consultants, employees, subcontractors, laborers and material suppliers, at all tiers, and all other entities, for all labor, services, materials and equipment furnished by or through Contractor for the Project, including, without limitation, all payroll taxes and contributions required to be made and all wages, overtime pay, premium pay, holiday pay, sick pay, personal leave pay, severance pay, fees, fringe benefits, commissions

ECRC-08-3376 HEARING EXHIBIT - 00000396

and reimbursable expenses required to be paid and all deductions for dues, fees or contributions required to be made in connection with all collective bargaining agreements in existence, if any, which affect any worker(s) providing services for the Project.

Solely with respect to all Work for the Project completed through the Release Date, the Contractor agrees to defend, indemnify and hold the Released Entities harmless from and against any and all actions, causes of action, losses or damages of whatever kind, including, without limitation, reasonable attorneys' fees and costs in arbitration and at the pre-trial, trial and appellate levels, which the Released Entities may suffer by reason of (a) any claim made against the Project or any of the Released Entities relating to labor, services, materials or equipment furnished by or through the Contractor in connection with the Project, or (b) any breach of any representation or warranty made by the Contractor to Owner in connection with the Project, including the representations and warranties included herein, any false statement made in this Contractor's Partial Lien Waiver and Release or any misrepresentation or omission made to Owner by the Contractor.

The Contractor acknowledges and agrees that (a) Owner is relying upon the representations and warranties made herein as a material inducement for Owner to make the Progress Payment to the Contractor; (b) this Contractor's Partial Lien Waiver and Release is freely and voluntarily given by the Contractor, and the Contractor has had the advice of counsel in connection herewith and is fully informed as to the legal effects of this Contractor's Partial Lien Waiver and Release, and the Contractor has voluntarily accepted the terms herein for the consideration recited above; and (c) the tendering of the Progress Payment by Owner and the receipt of the Progress Payment and the execution of this Contractor's Partial Lien Waiver and Release by the Contractor shall not, in any manner whatsoever, release the Contractor from (i) its continuing obligations with respect to the completion of any work at the Project that remains incomplete, including warranty work or guaranty work, or the correction of defective or non-conforming work; (ii) any contractual, statutory or common law obligations of the Contractor with respect to the Released Entities in connection with the Project; or (iii) any other obligations of the Contractor with respect to Released Entities in connection with the Project.

Appendix H-1 – Form of Subcontractor Certificate for Partial Waiver of Liens

APPENDIX H-1

FORM OF SUBCONTRACTOR CERTIFICATE FOR PARTIAL WAIVER OF LIENS

This SUBCONTRACTOR'S PARTIAL LIEN WAIVER AND RELEASE is made by [_____], a [_____] (the "Releasor"), subcontractor to SunPower Corporation, Systems, a Delaware corporation ("Contractor"), on behalf of Releasor, its successors and assigns, and those acting by or through any of the foregoing, for and in consideration of the sum of Ten and No/100 DOLLARS ($10.00) and other good and valuable consideration, in hand paid, the receipt and sufficiency of which are hereby acknowledged, as full payment on account of all labor, services, materials, equipment and other work furnished through the ___ day of _____, 200_ (the "Release Date"), for work in connection with the construction of a solar photovoltaic electric generation facility, and all services and utilities related thereto, in Brevard County, Florida (such facility, together with the property on which such facility is located, the "Project") by Contractor on behalf of Florida Power & Light Company, a Florida corporation ("Owner").

Solely with respect to the work performed by the Releasor on or prior to the Release Date in connection with the Project, the Releasor does hereby unconditionally and irrevocably waive, release, remise, relinquish and quit-claim (collectively, the "Release") all actions, claims, demands, liens, lien rights and claims of lien, of any kind whatsoever (collectively, "Claims"), which Releasor ever had or now has, known or unknown, against the Project or against Owner or Contractor, their partners, parents, subsidiaries and affiliates, at all tiers, and their insurers, sureties, employees, officers, directors, representatives, shareholders, agents, and all parties acting for any of them (collectively, the "Released Entities"), including, without limitation, all claims related to, in connection with, or arising out of, all facts, acts, events, circumstances, changes or extra work, constructive or actual delays or accelerations, interferences and the like, which have occurred or may be claimed to have occurred. The foregoing Release shall only be effective with respect to Claims arising in connection with the portion of the work performed by Releasor prior to the Release Date.

The Releasor warrants and represents, solely with respect to all work by Releasor completed for the Project through the Release Date, that (a) the Releasor has not assigned or pledged any rights or claims in any amount due or to become due from Contractor in connection with the Project; (b) payment has been or will be made to all of its subcontractors, laborers and material suppliers, at all tiers, for all labor, services, materials and equipment furnished by or through the Releasor for the Project, including all payroll taxes and contributions required to be made; (c) no claims from any of its subcontractors, vendors, mechanics or materialmen against the Released Entities in connection with the Project have been submitted to Releasor with respect to the Project or remain unsatisfied as of the date hereof; (d) no mechanics' or materialmen's liens have been filed with respect to the Project that have not been discharged; and (e) payment of all amounts due has been made to all consultants, employees, subcontractors, laborers and material suppliers, at all tiers, and all other entities, for all labor, services, materials and equipment furnished by or through Releasor for the Project, including, without limitation, all payroll taxes and contributions required to be made and all wages, overtime pay, premium pay, holiday pay, sick pay, personal leave pay, severance pay, fees, fringe benefits, commissions and reimbursable expenses required to be paid and all deductions for dues, fees or contributions required to be made in connection with all collective bargaining agreements in existence, if any, which affect any worker(s) providing services for the Project.

ECRC-08-3380 HEARING EXHIBIT - 00000400

Solely with respect to all work by Releasor in connection with the Project completed through the Release Date, the Releasor agrees to defend, indemnify and hold the Released Entities harmless from and against any and all actions, causes of action, losses or damages of whatever kind, including, without limitation, reasonable attorneys' fees and costs in arbitration and at the pre-trial, trial and appellate levels, which the Released Entities may suffer by reason of (a) any claim made against the Project or any of the Released Entities relating to labor, services, materials or equipment furnished by or through the Releasor, or (b) any breach of any representation or warranty made by the Releasor to the Released Entities, including the representations and warranties included herein, any false statement made in this Subcontractor's Partial Lien Waiver and Release, or any misrepresentation or omission made to the Released Entities by the Releasor.

The Releasor acknowledges and agrees that (a) the Contractor and Owner are relying upon the representations and warranties made herein as a material inducement for the Contractor to make payment to the Releasor; (b) this Subcontractor's Partial Lien Waiver and Release is freely and voluntarily given by the Releasor and the Releasor has had the advice of counsel in connection herewith and is fully informed as to the legal effects of this Subcontractor's Partial Lien Waiver and Release and the Releasor has voluntarily accepted the terms herein for the consideration recited above; and (c) the tendering of payment by the Contractor and the receipt of payment and the execution of this Subcontractor's Partial Lien Waiver and Release by the Releasor shall not, in any manner whatsoever, release the Releasor from (i) its continuing obligations with respect to the completion of any work at the Project that remains incomplete, including warranty work or guaranty work, or the correction of defective or non-conforming work; (ii) any contractual, statutory or common law obligations of the Releasor with respect to any of the Released Entities in connection with the Project; or (iii) any other obligations of the Releasor with respect to any of the Released Entities in connection with the Project.

ECRC-08-3382 HEARING EXHIBIT - 00000402

Appendix I – Form of Contractor Parent Guaranty

APPENDIX I

FORM OF CONTRACTOR PARENT GUARANTY

THIS GUARANTY (this "Guaranty"), dated as of July [__], 2008, is issued by SunPower Corporation, a Delaware corporation (the "Guarantor"), in favor of Florida Power & Light Company, a Florida corporation ("Owner").

Pursuant to Section 11.8 of Turnkey Engineering, Procurement and Construction Agreement for Solar Photovoltaic Generating Facility dated as of July [__], 2008, (as the same may be amended, modified and supplemented from time to time, the "Agreement") by and between SunPower Corporation, Systems, a Delaware corporation, and of which Guarantor is the parent (the "Subsidiary"), and Owner, Guarantor hereby covenants and agrees with Owner as follows:

Section 1. Definitions. Capitalized terms used herein and not otherwise defined shall have their respective meanings as set forth in the Agreement.

Section 2. Guaranty.

(a) Guaranty. Guarantor hereby irrevocably and unconditionally guarantees, as primary obligor and not merely as surety, to and for the benefit of Owner and any successor or permitted assignee of Owner under the Agreement, the full and prompt payment and performance by Subsidiary of each and every payment and performance obligation of Subsidiary arising under the Agreement (whether such obligation presently exists or is created, incurred or arising from time to time hereafter), including, without limitation, the payment when due of any indemnities, refunds and liquidated damages payable at any time under the Agreement, all amounts payable to Owner pursuant to Section 3(a) of this Guaranty and the performance of the Work (the "Guaranteed Obligations"). Guarantor further agrees that if Subsidiary shall fail to pay or perform in full when due all or any part of the Guaranteed Obligations, Guarantor will immediately pay or perform the same upon demand.

(b) Absolute Guaranty. Subject to Section 2(e) of this Guaranty, Guarantor agrees that its obligations under this Guaranty are irrevocable, absolute, independent and unconditional and shall not be affected by any circumstance that constitutes a legal or equitable discharge of a guarantor or surety other than payment and performance in full of the Guaranteed Obligations. In furtherance of the foregoing and without limiting the generality thereof, Guarantor agrees, subject to the other terms and conditions hereof, as follows:

(i) this Guaranty is a guaranty of payment and performance and not of collectibility;

(ii) Owner may from time to time, without notice or demand and without affecting the validity or enforceability of this Guaranty or giving rise to any limitation, impairment or discharge of Guarantor's liability hereunder, (A) create new obligations or liabilities under the Agreement or renew, extend, accelerate or otherwise change the time, place, manner or terms of the Guaranteed Obligations or otherwise amend or modify the Agreement or change the terms of the Guaranteed Obligations or any part thereof, (B) settle, compromise, release or discharge, or accept or refuse any offer of payment of, or substitutions for, the Guaranteed Obligations or any agreement relating thereto and/or subordinate the payment of the same to the payment of any other obligations, (C) request or accept other guaranties of the Guaranteed Obligations, (D) take and hold security for the payment of this Guaranty or the Guaranteed Obligations, (E) substitute, release, exchange, compromise, subordinate or modify, with or without consideration, any security for payment of the Guaranteed Obligations, any other guaranties of the Guaranteed Obligations, or any other obligation of any Person with respect to the Guaranteed Obligations, (F) enforce and apply any security now or hereafter held by or for the benefit of Owner in respect of this Guaranty or the Guaranteed Obligations and direct the order or manner of sale thereof, or exercise any other right or remedy that Owner may have against any such security, as Owner in its discretion may determine consistent with the Agreement and any applicable security agreement, notwithstanding that such action operates to impair

ECRC-08-3384 HEARING EXHIBIT - 00000404

or extinguish any right of subrogation, reimbursement, indemnification or contribution or any other right or remedy of Guarantor against Subsidiary or any other guarantor of the Guaranteed Obligations or any other guaranty of or security for the Guaranteed Obligations, (G) assign the Guaranteed Obligations in whole or in part to the extent provided in the Agreement, or (H) exercise any other rights available to Owner under the Agreement, at law or in equity; and

(iii) this Guaranty and the obligations of Guarantor hereunder shall be valid and enforceable and shall not be subject to any limitation, impairment or discharge for any reason (other than payment in full of the Guaranteed Obligations and as otherwise set forth in this Guaranty), including, without limitation, the occurrence of any of the following, whether or not Guarantor shall have had notice or knowledge of any of them: (A) any failure to assert or enforce, or agreement not to assert or enforce, or the stay or enjoining, by order of court, by operation of law or otherwise, of the exercise or enforcement of, any claim or demand or any right, power or remedy with respect to the Guaranteed Obligations or any agreement relating thereto, or with respect to any other guaranty of or security for the payment of the Guaranteed Obligations; (B) any waiver, amendment or modification of, or any consent to departure from, any of the terms or provisions of the Agreement or any agreement or instrument executed pursuant thereto or of any other guaranty or security for the Guaranteed Obligations; (C) the Guaranteed Obligations, or any agreement relating thereto, at any time being found to be illegal, invalid or unenforceable in any respect; (D) the personal or corporate incapacity of any Person; (E) the bankruptcy, receivership or insolvency of Subsidiary or any other Person, or the discharge of Subsidiary's or any other Person's obligations in any bankruptcy, receivership or similar proceeding; (F) any merger or consolidation of Subsidiary or Guarantor into or with any other Person, or any sale, lease or transfer of any of the assets of Subsidiary or Guarantor to any other Person, (G) any change in the ownership of any interests of Subsidiary or any change in the relationship between Subsidiary and Guarantor, or any termination of such relationship or (H) any other act or thing or omission, or delay to do any other act or thing, which may or might in any manner or to any extent vary the risk of Guarantor as an obligor in respect of the Guaranteed Obligations.

(c) **Payments**. All payments made by Guarantor hereunder shall be made without set-off or counterclaim and without any deduction or withholding for any reason, except as expressly provided to the contrary in the Agreement. All payments hereunder shall be made in U.S. dollars in immediately available funds.

(d) **Reinstatement**. Notwithstanding anything to the contrary contained herein, this Guaranty shall continue to be effective or be reinstated, as the case may be, if at any time any payment, or part thereof, under this Guaranty is rescinded or must otherwise be returned or restored by Owner upon the insolvency, bankruptcy, dissolution, liquidation or reorganization of, or similar event affecting, Subsidiary or Guarantor, or any substantial part of either's property, or otherwise, all as though such payment had not been made.

(e) **Defenses**. Notwithstanding anything herein to the contrary, Guarantor specifically reserves to itself all rights, counterclaims and other defenses that the Subsidiary is or may be entitled to arising from or out of the Agreement, except for any counterclaims or defenses arising out of the bankruptcy, insolvency, dissolution or liquidation of the Subsidiary, the lack of power or authority of the Subsidiary to enter into the Agreement or to perform its obligations thereunder, or the lack of validity or enforceability of the Subsidiary's obligations under the Agreement or any transaction thereunder.

Section 3. Other Provisions of the Guaranty.

(a) **Costs and Expenses**. The prevailing party in any action or proceeding shall be entitled to recover from the other party all of its reasonable costs and expenses incurred in connection with such action or proceeding, including reasonable attorneys' fees and costs at the trial court and all appellate levels.

ECRC-08-3385 HEARING EXHIBIT - 00000405

(b) **Waivers by Guarantor**. Guarantor hereby waives for the benefit of Owner, to the maximum extent permitted by Applicable Laws:

(i) all of the following: (A) notice of acceptance hereof or of any matter referred to in Section 2 hereof, (B) all presentments and demands for payment, (C) notices of default, nonpayment, protests, notices of protest, notices of dishonor and notices of any renewal, extension or modification of the Guaranteed Obligations or any agreement related thereto, (D) notice of any action taken or omitted to be taken by Owner in reliance hereon and any and all notices which may or might be lawfully waived by Guarantor, (E) any requirement that Owner be diligent or prompt in making demands hereunder or in giving notice to Guarantor of any default by Subsidiary, or asserting any other rights of Owner hereunder against Subsidiary, (F) any requirement that Owner protect, secure, perfect or insure any security interest or lien or any property subject thereto, (G) any bankruptcy, insolvency, reorganization, arrangement, adjustment, composition, liquidation or similar event of either Subsidiary or Guarantor that might constitute a defense to any payment required under the Agreement or hereunder, (H) any event, occurrence or other circumstance which might otherwise constitute a legal or equitable discharge of a surety or guarantor, including any defense based upon any law, rule or regulation which provides that the obligation of a surety must not be greater or more burdensome than the obligation of the principal, (I) any defense arising by reason of the incapacity, lack of authority or any disability or other defense of Subsidiary including, without limitation, any defense based on or arising out of the lack of validity or the unenforceability of the Guaranteed Obligations or any agreement or instrument relating thereto or by reason of the cessation of the liability of Subsidiary from any cause other than payment in full of the Guaranteed Obligations or termination of this Guaranty in accordance with its terms, (J) any defense arising out of any election by Owner to foreclose on any security held by or for the benefit of Owner pursuant to one or more judicial or nonjudicial sales, even though such election operates to impair or extinguish any right of subrogation, reimbursement, indemnification or contribution or any other right or remedy of Guarantor against Subsidiary or any other guarantor of the Guaranteed Obligations or any other guaranty of or any security for the Guaranteed Obligations, (K) the benefit of any statute of limitations affecting Guarantor's liability hereunder or the enforcement hereof, and (L) any rights to set-offs, recoupments and counterclaims;

(ii) any requirement, and any right to require, as a condition of payment by Guarantor, (A) that any right or power be exercised or any action be taken against either Subsidiary, any other guarantor or any collateral security for the Guaranteed Obligations, (B) that Owner proceed against or exhaust any security held from Subsidiary or any other person, or (C) that Owner pursue any other remedy in Owner's power whatsoever, and Guarantor waives the right to have the property of Subsidiary first applied to the discharge of the Guaranteed Obligations. Owner may, at its election, exercise any right or remedy it may have against Subsidiary or any security now or hereafter held by Owner. Guarantor waives (D) any principles or provisions of Applicable Laws, statutory or otherwise, that are or might be in conflict with the terms of this Guaranty and any defense based on the discharge of Subsidiary by operation of Applicable Laws, notwithstanding any intervention or omission by Owner, including any defenses or benefits that may be derived from or afforded by Applicable Laws (whether now in effect or hereafter adopted) that limit the liability of or exonerate guarantors or sureties, and (E) any defense based on or arising out of the absence, impairment or loss of any right of subrogation, reimbursement, indemnification or contribution or any other right or remedy of Guarantor against Subsidiary or any such security, whether resulting from such election by Subsidiary or otherwise; and

(iii) all rights and benefits under (A) provisions of Applicable Laws purporting to (1) reduce the obligation of a surety or guarantor upon the acceptance by a creditor of anything in partial satisfaction of an obligation, (2) exonerate a surety or guarantor if by any act of the creditor, without the consent of the surety or guarantor, the original obligation of the principal is altered in any respect, or the remedies or rights of the creditor against the principal, in respect thereto, are in any way impaired or suspended (it being expressly understood and agreed that Owner may compromise, settle, alter, extend, waive, amend, suspend or surrender any Guaranteed Obligation or

ECRC-08-3386 HEARING EXHIBIT - 00000406

any right or remedy with respect thereto without notice to or consent by Guarantor and without affecting Guarantor's obligations hereunder), (3) exonerate the surety or guarantor to the extent that the creditor does not proceed against the principal, or pursue any other remedy in the creditor's power which the surety or guarantor cannot pursue, and which would lighten the surety's or guarantor's burden, and (4) reduce a surety's or guarantor's obligations in proportion to the principal obligation, and (B) provisions of Applicable Laws requiring or permitting creditors or lienors to marshal assets or liens; it being the intention hereof that Guarantor shall remain liable as principal, to the extent set forth in this Guaranty, for so long as this Guaranty shall remain in effect, notwithstanding any act, omission or thing which might otherwise operate as a legal or equitable discharge of the Guarantor other than the payment in full of the Guarantee Obligations.

(c) **Deferral of Subrogation**. Until such time as all of the Guaranteed Obligations have been fully satisfied, notwithstanding any payment made by Guarantor hereunder or the receipt of any amounts by Owner with respect to the Guaranteed Obligations: (i) Guarantor (on behalf of itself, its successors and assigns, including any surety or guarantor) agrees not to exercise any all rights it may have at law or in equity (including, without limitation, any law subrogating Guarantor to the rights of Owner) to seek subrogation, contribution, indemnification, or any other form of reimbursement from Subsidiary, any other guarantor, or any other Person now or hereafter primarily or secondarily liable for any of the Guaranteed Obligations of Subsidiary to Owner, for any disbursement made by Guarantor under or in connection with this Guaranty or otherwise; and (ii) Guarantor agrees not to obtain any benefit of, and any right to participate in, any security, whether real or personal property, now or hereafter held by Owner for the Guaranteed Obligations.

Section 4. Representations and Warranties of Guarantor. Guarantor hereby represents and warrants to Owner as follows:

(a) Guarantor is duly organized, validly existing and in good standing under the laws of its jurisdiction of organization;

(b) Guarantor has full power, authority and legal right to execute and deliver this Guaranty and all other instruments, documents and agreements required by the provisions of this Guaranty to be executed, delivered and performed by Guarantor, and to perform its obligations hereunder and thereunder;

(c) The execution, delivery and performance of this Guaranty and all other instruments, documents and agreements required by the provisions of this Guaranty to be executed, delivered and performed by Guarantor have been duly authorized by all necessary company action on the part of Guarantor;

(d) This Guaranty has been duly executed and delivered by Guarantor and constitutes the legal, valid and binding obligation of Guarantor, enforceable against it in accordance with its terms; and

(e) All necessary action has been taken under Applicable Laws to authorize the execution, delivery and performance of this Guaranty. No governmental approvals or other consents, approvals, or notices of or to any Person are required in connection with the execution, delivery, performance by Guarantor or the validity or enforceability, of this Guaranty.

Section 5. Notices. All notices and other communications provided for hereunder must be in writing to be effective and shall be deemed to be delivered and received (a) if personally delivered or if delivered by courier service, when actually received by the party to whom notice is sent, (b) if delivered by facsimile, on the first Business Day following the day transmitted, or (c) if delivered by mail (whether actually received or not), at the close of business on the third Business Day following the day when placed in the mail, postage prepaid, certified or registered, addressed to the appropriate party hereto, at the address and/or facsimile numbers of such party set forth below (or at such other address as such party may designate by written notice to the other party in accordance with this Section:

ECRC-08-3387 HEARING EXHIBIT - 00000407

(a) If to Guarantor:

SunPower Corporation
3939 North First Street
San Jose, California 95134
Attention: Chief Financial Officer
Facsimile: (408) 739-7713

(b) If to Owner:

Florida Power & Light Company
700 Universe Boulevard
Juno Beach, FL 33408
Attention: [_____]
Facsimile: [_____]

The addresses and facsimile numbers of either party for notices given pursuant to this Guaranty may be changed by means of a written notice given to the other party at least fifteen (15) Business Days prior to the effective date of such change.

Section 6. Miscellaneous Provisions.

(a) Waiver; Remedies Cumulative. No failure on the part of Owner to exercise, and no delay on the part of Owner in exercising, any right or remedy, in whole or in part hereunder shall operate as a waiver thereof. No single or partial exercise of any right or remedy shall preclude any other or further exercise thereof or the exercise of any other right or remedy. No waiver by Owner shall be effective unless it is in writing and such writing expressly states that it is intended to constitute such waiver. Any waiver given by Owner of any right, power or remedy in any one instance shall be effective only in that specific instance and only for the purpose for which given, and will not be construed as a waiver of any right, power or remedy on any future occasion. In addition, Guarantor may not claim that Owner could have avoided or mitigated, in any manner or through any action, the damages resulting from a default of Subsidiary under the Agreement. The rights and remedies of Owner herein provided are cumulative and not exclusive of any rights or remedies provided by law.

(b) Successors and Assigns. This Guaranty shall be binding upon the successors of Guarantor and shall inure to the benefit of Owner and its successors and permitted assigns. Guarantor shall not assign or transfer all or any party of its rights or obligations hereunder without the prior written consent of Owner. Any purported assignment or delegation without such written consent shall be null and void. Owner may assign its rights and obligations hereunder to any assignee of its rights under the Agreement permitted in accordance with the Agreement. No other Persons shall be a third-party beneficiary of, or otherwise benefit by, this Guaranty or have or acquire any rights by reason of this Guaranty.

(c) Amendment. This Guaranty may not be modified, amended, terminated or revoked, in whole or in part, except by an agreement in writing signed by Owner and Guarantor.

(d) Termination and Release. Subject to Section 2(d) hereof, this Guaranty shall remain in effect until the payment in full of the Guaranteed Obligations. No release of this Guaranty shall be valid unless executed by Owner and delivered to Guarantor.

(e) GOVERNING LAW; JURISDICTION.

(i) THE RIGHTS AND OBLIGATIONS OF THE PARTIES UNDER OR PURSUANT TO THIS GUARANTY SHALL BE GOVERNED BY AND CONSTRUED IN ACCORDANCE WITH THE LAWS OF THE STATE OF FLORIDA, WITHOUT REGARD FOR

ANY PRINCIPLES OF CONFLICTS OF LAW THAT WOULD DIRECT OR PERMIT THE APPLICATION OF THE LAW OF ANY OTHER JURISDICTION.

(ii) THE EXCLUSIVE VENUE FOR ANY ACTION OR PROCEEDING RELATED TO THIS GUARANTY SHALL BE, AND GUARANTOR HEREBY SUBMITS TO THE JURISDICTION OF, THE FEDERAL COURTS OF THE UNITED STATES FOR THE SOUTHERN DISTRICT OF FLORIDA, PROVIDED, THAT IF FOR WHATEVER THE REASON THE FEDERAL COURTS OF THE UNITED STATES FOR THE SOUTHERN DISTRICT OF FLORIDA WILL NOT OR CANNOT HEAR SUCH ACTION OR PROCEEDING, THE EXCLUSIVE VENUE FOR ANY ACTION OR PROCEEDING RELATED TO THIS GUARANTY SHALL BE, AND GUARANTOR HEREBY SUBMITS TO THE JURISDICTION OF, THE COURTS OF THE STATE OF FLORIDA IN PALM BEACH COUNTY. THE PARTIES IRREVOCABLY WAIVE ANY OBJECTION WHICH ANY OF THEM MAY NOW OR HEREAFTER HAVE TO THE BRINGING OF ANY SUCH ACTION OR PROCEEDING IN SUCH RESPECTIVE JURISDICTIONS,

(iii) GUARANTOR WAIVES ANY OBJECTION WHICH IT MAY HAVE TO THE LAYING OF VENUE OF ANY SUCH SUIT, ACTION OR PROCEEDING IN ANY OF SUCH COURTS AND ANY CLAIM THAT ANY SUCH SUIT, ACTION OR PROCEEDING HAS BEEN BROUGHT IN AN INCONVENIENT FORUM, INCLUDING ANY OBJECTION TO THE LAYING OF VENUE BASED ON THE GROUNDS OF FORUM NON CONVENIENS AND ANY OBJECTION BASED ON THE GROUNDS OF LACK OF IN PERSONAM JURISDICTION.

(iv) GUARANTOR IRREVOCABLY CONSENTS TO SERVICE OF PROCESS OUT OF ANY OF THE AFOREMENTIONED COURTS IN ANY MANNER PERMITTED BY SUCH COURTS, INCLUDING REGISTERED OR CERTIFIED MAIL, POSTAGE PREPAID, TO GUARANTOR AT ITS ADDRESS SET FORTH IN THIS AGREEMENT (OR AS OTHERWISE NOTICED TO THE OTHER PARTY PURSUANT TO SECTION 5), IN EACH CASE SUCH SERVICE TO BECOME EFFECTIVE THIRTY (30) DAYS AFTER SUCH MAILING.

(v) GUARANTOR AGREES THAT FINAL JUDGMENT IN ANY SUCH ACTION OR PROCEEDING SHALL BE CONCLUSIVE AND MAY BE ENFORCED IN ANY OTHER JURISDICTION BY SUIT ON THE JUDGMENT OR IN ANY OTHER MANNER PROVIDED BY LAW.

(vi) NOTHING IN THIS SECTION SHALL AFFECT THE RIGHT OF OWNER (A) TO SERVE LEGAL PROCESS IN ANY OTHER MANNER PERMITTED BY LAW, OR (B) TO BRING ANY SUIT, ACTION OR PROCEEDING AGAINST THE UNDERSIGNED OR ITS PROPERTIES IN THE COURTS OF ANY OTHER JURISDICTIONS.

(vii) GUARANTOR AND OWNER EACH HEREBY IRREVOCABLY AND UNCONDITIONALLY WAIVE ANY AND ALL RIGHT TO TRIAL BY JURY IN ANY ACTION, SUIT OR COUNTERCLAIM ARISING IN CONNECTION WITH THIS GUARANTY. THIS PROVISION IS A MATERIAL INDUCEMENT FOR GUARANTOR AND OWNER TO ENTER INTO THIS GUARANTY.

(f) Survival. All representations and warranties made in this Guaranty and in any other instrument, document, and agreement delivered pursuant hereto or in connection herewith shall survive the execution and delivery of this Guaranty.

(g) Severability. If any provision of this Guaranty is held to be illegal, invalid, or unenforceable under present or future laws, such provision shall be fully severable; this Guaranty shall be construed and enforced as if such illegal, invalid or unenforceable provision had never comprised a part of this Guaranty; and the remaining provisions of the Guaranty shall remain in full force and effect and shall not be affected by the illegal, invalid, or unenforceable provision or by its severance from the Guaranty. Furthermore, in lieu of such illegal, invalid or unenforceable provision, there shall

be added automatically as a part of this Guaranty a provision as similar in its terms to such illegal, invalid or unenforceable provision as may be possible and be legal, valid and enforceable.

(h) Information. Owner shall have no obligation to disclose or discuss with Guarantor its assessment, or Guarantor's assessment, of Subsidiary's financial condition. Guarantor acknowledges and agrees that it has adequate means to obtain information from Subsidiary on a continuing basis concerning Subsidiary's financial condition and its ability to perform its obligations under the Agreement, and Guarantor assumes the responsibility for being and keeping informed of Subsidiary's financial condition and of all circumstances bearing upon the risk of nonpayment of the Guaranteed Obligations. Guarantor hereby waives and relinquishes any duty on the part of Owner to disclose any matter, fact or thing relating to the business, operations or conditions of Subsidiary now known or hereafter known by Owner.

(i) Counterparts. Guarantor and Owner acknowledge and agree that this Guaranty may be executed in multiple counterparts, and transmitted via telecopy, each such counterpart (whether transmitted via telecopy or otherwise), when executed, shall constitute an integral part of one and the same agreement.

This Guaranty has been duly executed on behalf of the Guarantor by its authorized officer as of the date first written above.

ECRC-08-3390 HEARING EXHIBIT - 00000410

Appendix J – Option Pricing

HEARING EXHIBIT - 00000411

Appendix K – Module Warranty

SUNPOWER

SUNPOWER LIMITED WARRANTY FOR PV MODULES

SPR-315E-xxx-x, SPR-300E-xxx-x, SPR-305-xxx-x, SPR-290-xxx-x, SPR-230-xxx-x, SPR-225-xxx-x, SPR-220-xxx-x, SPR-217-xxx-x, SPR-215-xxx-x, SPR-210-xxx-x, SPR-205-xxx-x, SPR-200-xxx-x, SPR-90-xxx-x ("xxx-x" define product variants)

1. Limited Product Warranty – Ten (10) Year Repair, Replacement or Refund Remedy

SunPower Corporation with offices at 3939 North First Street, San Jose, CA 95134 ("SunPower") warrants that for ten (10) years from the date of delivery, its Photovoltaic modules ("PV modules") shall be free from defects in materials and workmanship under normal application, installation, use and service conditions. If the PV modules fail to conform to this warranty, then for a period ending ten (10) years from date of delivery to the original end-customer ("the Customer"), SunPower will, at its option, either repair or replace the product, or refund the purchase price as paid by the Customer ("Purchase Price"). The repair, replacement or refund remedy shall be the sole and exclusive remedy provided under the Limited Product Warranty and shall not extend beyond the ten (10) year period set forth herein. This Limited Product Warranty does not warrant a specific power output, which shall be exclusively covered under clause 2 hereinafter (Limited Power Warranty).

2. Limited Power Warranty

a) SunPower additionally warrants: If, within twelve (12) years from date of delivery to the Customer any PV module(s) exhibits a power output less than 90% of the Minimum Peak Power[1] as specified at the date of delivery in SunPower's Product datasheet, provided that such loss in power is determined by SunPower (at its sole and absolute discretion) to be due to defects in material or workmanship SunPower will replace such loss in power by either providing to the Customer additional PV modules to make up such loss in power or by providing monetary compensation equivalent to the cost of additional PV modules required to make up such loss in power or by repairing or replacing the defective PV modules, at the option of SunPower

b) SunPower additionally warrants: If, within twenty five (25) years from date of delivery to the Customer any PV module(s) exhibits a power output less than 80% of the Minimum Peak Power[1] as specified at the date of delivery in SunPower's Product datasheet, provided that such loss in power is determined by SunPower (at its sole and absolute discretion) to be due to defects in material or workmanship SunPower will replace such loss in power by either providing to the Customer additional PV modules to make up such loss in power or by providing monetary compensation equivalent to the cost of additional PV modules required to make up such loss in power or by repairing or replacing the defective PV modules, at the option of SunPower.

3. Exclusions and limitations

a) Warranty claims must in any event be filed within the applicable Warranty period.

b) Warranty claims may only be made by, or on the behalf of, the original end customer or a person to whom title has been transferred for the PV Modules.

c) The Limited Warranties do not apply to any of the following:

1. PV modules which in SunPower's absolute judgment have been subjected to: misuse, abuse, neglect or accident; alteration, improper installation, application or removal (including but not

---

[1] *"Minimum Peak Power" = Peak power minus the Peak power tolerance (as specified in SunPower's Product datasheet). "Peak power" is the power in peak watts that a PV module generates at STC (Standard Test conditions: Irradiance of 1000 W/m², light spectrum AM 1.5g and a cell temperature of 25 degrees C)*

limited to installation, application or removal by any party other than a SunPower authorized dealer; non-observance of SunPower's installation, users and/or maintenance instructions; repair or modifications by someone other than an approved service technician of SunPower; power failure surges, lightning, flood, fire, accidental breakage or other events outside SunPower's control.

2. Cosmetic defects stemming from normal wear and tear of PV module materials.
3. PV modules installed in locations, which in SunPower's absolute judgment may be subject to direct contact with salt water.

d) The Limited Warranties do not cover any transportation costs for return of the PV modules, or for reshipment of any repaired or replaced PV modules, or cost associated with installation, removal or reinstallation of the PV modules.

e) When used on a mobile platform of any type, the Limited Power Warranty, applying to any of the PV modules shall be limited to twelve (12) years as per the provisions of clause 2(a) hereof.

f) Warranty claims will not apply if the type or serial number of the PV modules is altered, removed or made illegible.

4. Limitation of Warranty Scope

SUBJECT TO THE LIMITIATIONS UNDER APPLICABLE LAW, THE LIMITED WARRANTIES SET FORTH HEREIN ARE EXPRESSLY IN LIEU OF AND EXCLUDE ALL OTHER EXPRESS OR IMPLIED WARRANTIES, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY AND OF FITNESS FOR PARTICULAR PURPOSE, USE, OR APPLICATION, AND ALL OTHER OBLIGATIONS OR LIABILITIES ON THE PART OF SUNPOWER, UNLESS SUCH OTHER WARRANTIES, OBLIGATIONS OR LIABILITIES ARE EXPRESSLY AGREED TO IN WRITING SIGNED AND APPROVED BY SUNPOWER. SUNPOWER SHALL HAVE NO RESPONSIBILITY OR LIABILITY WHATSOEVER FOR DAMAGE OR INJURY TO PERSONS OR PROPERTY OR FOR OTHER LOSS OR INJURY RESULTING FROM ANY CAUSE WHATSOEVER ARISING OUT OF OR RELATED TO THE PRODUCT, INCLUDING, WITHOUT LIMITATION, ANY DEFECTS IN THE MODULE, OR FROM USE OR INSTALLATION. UNDER NO CIRCUMSTANCES SHALL SUNPOWER BE LIABLE FOR INCIDENTAL, CONSEQUENTIAL OR SPECIAL DAMAGES, HOWSOEVER CAUSED. LOSS OF USE, LOSS OF PROFITS, LOSS OF PRODUCTION, LOSS OF REVENUES ARE THEREFORE SPECIFICALLY BUT WITHOUT LIMITATION EXCLUDED.

SUNPOWER'S AGGREGATE LIABILITY, IF ANY, IN DAMAGES OR OTHERWISE, SHALL NOT EXCEED THE PURCHASE PRICE PAID TO SUNPOWER BY THE CUSTOMER, FOR THE UNIT OF PRODUCT OR SERVICE FURNISHED OR TO BE FURNISHED, AS THE CASE MAY BE, WHICH GAVE RISE TO THE WARRANTY CLAIM.

SOME STATES DO NOT ALLOW LIMITATIONS ON IMPLIED WARRANTIES OR THE EXCLUSION OF DAMAGES SO THE ABOVE LIMITATIONS OR EXCLUSIONS MAY NOT APPLY TO YOU.

5. Obtaining Warranty Performance

If you feel you have a justified claim covered by this Limited Warranty, immediately notify the (a) Installer, who sold the PV-modules, or (b) any authorized SunPower distributor, of the claim in writing, or (c) send such notification to SunPower Corporation, 3939 North First Street, San Jose, CA 95134, directly. In addition, please enclose evidence of the date of delivery of the PV module. If applicable, your installer or distributor will give advice on handling the claim. If further assistance is required, please write to SunPower for instructions. The return of any PV-modules will not be accepted unless prior written authorization has been given by SunPower.

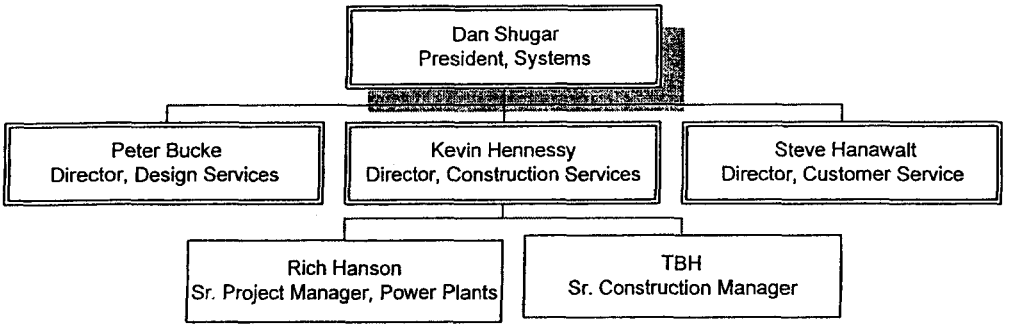
Appendix O – Project Management Team

APPENDIX O

Project Management Team



TBH – To be hired, subject to the approval requirements of Section 3.12.1 of the Agreement

Biographical Information:

Daniel S. Shugar, President, SunPower Systems

Mr. Shugar leads Supply Chain, Manufacturing, Product Development, and Project Engineering and Construction. Since January 1996, Mr. Shugar has overseen the installation of over 200 MW of solar PV projects. He has been active in solar power since 1988. Mr. Shugar has a B.S. in Electrical Engineering from Rensselaer Polytechnic University, and an MBA from Golden Gate University in San Francisco.

Kevin Hennessy, Director, Construction Services

Mr. Hennessy is a Professional Engineer with over 25 years of commercial construction experiences. He has extensive knowledge of design and construction methods of all types of building systems and has developed projects all over the globe. He is responsible for the Design and Construction groups in the Systems Group at SunPower. This team has been responsible for implementation of the largest Solar PV Energy projects throughout the world, including several projects over 20MW's. Kevin is a California licensed Civil Engineer and has a M.S. in Civil Engineering from Stanford University.

Peter Buecke, Director Design Services

Mr. Buecke is an architect who has led the design and construction division for several national home builders. He is responsible for all activities related to the design and engineering of large ground-mounted and roof-top solar projects. He has over 20 years of experience on project planning with success in setting and meeting project design milestones. He has a B.S in Design from the College of Architecture at Arizona State University.

Steve Hanawalt, Director, Customer Service

Mr. Hannawalt leads the Customer Service and O&M Group for SunPower Systems. His energy facility operations and management experience includes start-up engineering, performance engineering, operations management, and asset optimization. Prior to joining SunPower, he was Vice President of

Plant Optimization at Calpine Corporation, a large independent power producer. In that capacity his group provided the 25,000 MW fleet with system commissioning services, performance and reliability engineering, and real-time performance monitoring and diagnostic services. Plant Optimization provided the performance, reliability, and cost structure inputs to System Dispatch to optimize the economic dispatch of the generating units. Mr. Hanawalt received his B.S. in Mechanical Engineering from the University of California, Berkeley and is currently pursuing his MBA.

Rich Hanson, Senior Project Manager

Mr. Hanson has been involved as a project manager of utility size power plants since joining SunPower Corp . Most recently he was responsible for completing a 14 MW ground mounted tracking system at Nellis Air Force Base in Las Vegas, NV. Prior to joining SunPower, Rich was Director of Construction for a Construction Management firm in the California Central Valley, specializing in design/build management of medical office buildings, airport construction, and regional shopping centers.

Appendix R – Form of Contractor Certificate for Final Waiver of Liens

APPENDIX R

FORM OF CONTRACTOR CERTIFICATE FOR FINAL WAIVER OF LIENS

This CONTRACTOR'S FULL LIEN WAIVER AND RELEASE ("Contractor's Full Lien Waiver and Release") is made by SunPower Corporation, Systems, a Delaware corporation ("Contractor"), on behalf of itself, its successors and assigns, and those acting by or through any of the foregoing, for and in consideration of [AMOUNT OF FINAL PAYMENT REQUEST] DOLLARS ($[_____]) and other good and valuable consideration, in hand paid, the receipt and sufficiency of which are hereby acknowledged, as full and final payment on account of all labor, services, materials, equipment and other work performed for Florida Power & Light Company ("Owner"), in connection with the construction of a solar photovoltaic electric generation facility, and all services and utilities related thereto, in Brevard County, Florida (such facility, together with the property on which such facility is located, the "Project"), pursuant to that certain TURNKEY ENGINEERING, PROCUREMENT AND CONSTRUCTION AGREEMENT FOR SOLAR PHOTOVOLTAIC GENERATING FACILITY, dated as of July [__], 2008, between Owner and Contractor, as the same may be amended from time to time (the "Agreement").

Contractor does hereby unconditionally and irrevocably waive, release, remise, relinquish and quit-claim all actions, claims, demands, liens, lien rights and claims of lien, of any kind whatsoever, which Contractor ever had, now has, or may have in the future, known or unknown, against the Project or against Owner, its parents, subsidiaries and affiliates, at all tiers, and its and their insurers, sureties, employees, officers, directors, representatives, shareholders, agents, and all parties acting for any of them related to or arising from the Project (collectively, the "Released Entities"), including, without limitation, all claims related to, in connection with, or arising out of, all facts, acts, events, circumstances, changes or extra work, constructive or actual delays or accelerations, interferences and the like, which have occurred or may be claimed to have occurred.

The Contractor warrants and represents that (a) the Contractor has not assigned or pledged any rights or claims in any amount due or to become due from Owner related to or arising from the Project; (b) payment has been or will be made to all subcontractors, laborers and material suppliers, at all tiers, for all labor, services, materials and equipment furnished by or through the Contractor for the Project, including all payroll taxes and contributions required to be made; (c) no claims from subcontractors, vendors, mechanics or materialmen against the Released Entities have been submitted to Contractor with respect to the Project or remain unsatisfied as of the date hereof; (d) no mechanics' or materialmen's liens have been filed with respect to the Project that have not been discharged or for which a bond has not been posted in accordance with the Agreement; (e) payment of all amounts due has been made to all consultants, employees, subcontractors, laborers and material suppliers, at all tiers, and all other entities, for all labor, services, materials and equipment furnished by or through Contractor for the Project, including, without limitation, all payroll taxes and contributions required to be made and all wages, overtime pay, premium pay, holiday pay, sick pay, personal leave pay, severance pay, fees, fringe benefits, commissions and reimbursable expenses required to be paid and all deductions for dues, fees or contributions required to be made in connection with all collective bargaining agreements in existence, if any, which affect any worker(s) providing services for the Project; and (f) all contracts with consultants and subcontractors employed, used or engaged by Contractor in connection with the Project have been completed or have been terminated.

ECRC-08-3478 HEARING EXHIBIT - 00000428

The Contractor agrees to defend, indemnify and hold the Released Entities harmless from and against any and all actions, causes of action, losses or damages of whatever kind, including, without limitation, reasonable attorneys' fees and costs in arbitration and at the pre-trial, trial and appellate levels, which the Released Entities may suffer by reason of (a) any claim made against the Project or any of the Released Entities relating to labor, services, materials or equipment furnished by or through the Contractor related to or arising from the Project, or (b) any breach of any representation or warranty made by the Contractor to Owner related to or arising from the Project, including the representations and warranties included herein, any false statement made in this Contractor's Full Lien Waiver and Release or any misrepresentation or omission made to Owner by the Contractor.

The Contractor acknowledges and agrees that (a) Owner is relying upon the representations and warranties made herein as a material inducement for Owner to make payment to the Contractor; (b) this Contractor's Full Lien Waiver and Release is freely and voluntarily given by the Contractor, and the Contractor has had the advice of counsel in connection herewith and is fully informed as to the legal effects of this Contractor's Full Lien Waiver and Release, and the Contractor has voluntarily accepted the terms herein for the consideration recited above; and (c) the tendering of payment by Owner and the receipt of payment and the execution of this Contractor's Full Lien Waiver and Release by the Contractor shall not, in any manner whatsoever, release the Contractor from (i) its continuing obligations with respect to the completion of any work at the Project that remains incomplete, including warranty work or guaranty work, or the correction of defective or non-conforming work; (ii) any contractual, statutory or common law obligations of the Contractor with respect to the Released Entities related to or arising from the Project; or (iii) any other obligations of the Contractor with respect to Released Entities related to or arising from the Project.

APPENDIX R-1

FORM OF SUBCONTRACTOR CERTIFICATE FOR FINAL WAIVER OF LIENS

This SUBCONTRACTOR'S FULL LIEN WAIVER AND RELEASE ("Subcontractor's Full Lien Waiver and Release") is made by [_____], a [_____] (the "Releasor"), subcontractor to SunPower Corporation, Systems, a Delaware corporation ("Contractor"), on behalf of Releasor, its successors and assigns, and those acting by or through any of the foregoing, for and in consideration of the sum of Ten and No/100 DOLLARS ($10.00) and other good and valuable consideration, in hand paid, the receipt and sufficiency of which are hereby acknowledged, as full and final payment on account of all labor, services, materials, equipment and other work furnished in connection with the construction of a solar photovoltaic electric generation facility, and all services and utilities related thereto, in Brevard County, Florida (such facility, together with the property on which such facility is located, the "Project") by Contractor on behalf of Florida Power & Light Company, a Florida corporation ("Owner").

Releasor does hereby unconditionally and irrevocably waive, release, remise, relinquish and quit-claim all actions, claims, demands, liens, lien rights and claims of lien, of any kind whatsoever, which Releasor ever had, now has, or may have in the future, known or unknown, against the Project, or against Owner or Contractor, their partners, parents, subsidiaries and affiliates, at all tiers, and their insurers, sureties, employees, officers, directors, representatives, shareholders, agents, and all parties acting for any of them related to or arising from the Project (collectively, the "Released Entities"), including, without limitation, all claims related to, in connection with, or arising out of, all facts, acts, events, circumstances, changes or extra work, constructive or actual delays or accelerations, interferences and the like, which have occurred or may be claimed to have occurred.

The Releasor warrants and represents that (a) the Releasor has not assigned or pledged any rights or claims in any amount due or to become due from Contractor related to or arising from the Project; (b) payment has been or will be made to all of its subcontractors, laborers and material suppliers, at all tiers, for all labor, services, materials and equipment furnished by or through the Releasor for the Project, including all payroll taxes and contributions required to be made; (c) no claims from any of its subcontractors, vendors, mechanics or materialmen against the Released Entities have been submitted to Releasor with respect to the Project or remain unsatisfied as of the date hereof; (d) no mechanics' or materialmen's liens have been filed with respect to the Project that have not been discharged; (e) payment of all amounts due has been made to all consultants, employees, subcontractors, laborers and material suppliers, at all tiers, and all other entities, for all labor, services, materials and equipment furnished by or through Releasor for the Project, including, without limitation, all payroll taxes and contributions required to be made and all wages, overtime pay, premium pay, holiday pay, sick pay, personal leave pay, severance pay, fees, fringe benefits, commissions and reimbursable expenses required to be paid and all deductions for dues, fees or contributions required to be made in connection with all collective bargaining agreements in existence, if any, which affect any worker(s) providing services for the Project; and (f) all contracts with consultants and subcontractors employed, used or engaged by Releasor in connection with the Project have been completed or have been terminated.

The Releasor agrees to defend, indemnify and hold the Released Entities harmless from and against any and all actions, causes of action, losses or damages of whatever kind, including, without limitation, reasonable attorneys' fees and costs in arbitration and at the pre-trial, trial and

ECRC-08-3482 HEARING EXHIBIT - 00000432

appellate levels, which the Released Entities may suffer by reason of (a) any claim made against the Project or any of the Released Entities relating to labor, services, materials or equipment furnished by or through the Releasor related to or arising from the Project, or (b) any breach of any representation or warranty made by the Releasor to the Released Entities related to or arising from the Project, including the representations and warranties included herein, any false statement made in this Subcontractor's Full Lien Waiver and Release, or any misrepresentation or omission made to the Released Entities by the Releasor.

The Releasor acknowledges and agrees that (a) the Contractor and Owner are relying upon the representations and warranties made herein as a material inducement for the Contractor or Owner to make payment to the Releasor; (b) this Subcontractor's Full Lien Waiver and Release is freely and voluntarily given by the Releasor and the Releasor has had the advice of counsel in connection herewith and is fully informed as to the legal effects of this Subcontractor's Full Lien Waiver and Release and the Releasor has voluntarily accepted the terms herein for the consideration recited above; and (c) the tendering of payment by the Contractor and the receipt of payment and the execution of this Subcontractor's Full Lien Waiver and Release by the Releasor shall not, in any manner whatsoever, release the Releasor from (i) its continuing obligations with respect to the completion of any work at the Project that remains incomplete, including warranty work or guaranty work, or the correction of defective or non-conforming work related to or arising from the Project; (ii) any contractual, statutory or common law obligations of the Releasor with respect to any of the Released Entities related to or arising from the Project; or (iii) any other obligations of the Releasor with respect to any of the Released Entities related to or arising from the Project.

APPENDIX U

Form of Letter of Credit

Florida Power & Light Company
700 Universe Blvd
Juno Beach, FL
Attention: Project General Manager

Re: Irrevocable Standby Letter of Credit No. _____

Gentlemen:

We hereby establish in your favor this Irrevocable Standby Letter of Credit No. _____ (the "Letter of Credit") for the account of SunPower Corporation, Systems, a Delaware corporation ("Contractor"), effective immediately and expiring on December 31, 2009.

We have been informed by the Applicant, but do not independently verify, that this Letter of Credit is issued pursuant to the terms of that certain Turnkey Engineering, Procurement and Construction Agreement for Solar Photovoltaic Generating Facility dated as of July 9, 2008, between Florida Power & Light Company, a Florida corporation ("Beneficiary"), and Contractor, as the same may be amended (the "Agreement").

1. Stated Amount. The amount of funds available for drawing under this Letter of Credit shall be U.S. $1,145,600 (one million one hundred forty-five thousand six hundred United States Dollars) (the "Stated Amount").

2. Drawings. A drawing hereunder may be made by you on any Business Day on or prior to the date this Letter of Credit expires by delivering to Wells Fargo Bank, N.A., at any time during its business hours on such Business Day, at One Front Street 21st Floor, San Francisco, CA 94111, a copy of this Letter of Credit together with (i) a Draw Certificate executed by an authorized person substantially in the form of Attachment A hereto (the "Draw Certificate"), appropriately completed and purportedly signed by your authorized officer and (ii) your draft substantially in the form of Attachment B hereto (the "Draft"), appropriately completed and purportedly signed by your authorized officer. Partial drawings and multiple presentations may be made under this Letter of Credit. Draw Certificates and Drafts under this Letter of Credit may be sent by overnight delivery or courier to Wells Fargo Bank, N.A., at its address set forth above Attention: Standby Letter of Credit Unit. Drawings may also be presented to us via telefacsimile to our telefacsimile no. (415) 296-8905 (each such drawing, a "Fax Drawing"); *provided however* that you confirm our receipt of any Fax Drawing by telephone to our telephone no. 1-800-798-2815 (option 1). In the event of a presentation by facsimile transmission, the original of such documents shall be sent to address set forth in the preceding sentence, as aforesaid, by overnight courier for receipt by us within one (1) Business Day of the date of such facsimile transmission.

3. Time and Method for Payment. We hereby agree to honor a drawing hereunder made in compliance with this Letter of Credit by transferring in immediately available funds the amount

specified in the Draft delivered to us in connection with such drawing to such account at such bank in the United States as you may specify in your Draw Certificate. If the Draw Certificate is presented to us at such address by 10:00 a.m., California time on any Business Day, payment will be made not later than 3:00 p.m., California time on the next day and if such Draw Certificate is so presented to us after 10:00 a.m., California time on any Business Day, payment will be made on the second Business Day. In clarification, we agree to honor the Draw Certificate upon receipt thereof, without regard to the truth or falsity of the assertions made therein.

4. Non-Conforming Demands. If a demand for payment made by you hereunder does not, in any instance, conform to the terms and conditions of this Letter of Credit, we shall give you prompt notice that the demand for payment was not effected in accordance with the terms and conditions of this Letter of Credit, stating the reasons therefore and that we will upon your instructions hold any documents at your disposal or return the same to you. Upon being notified that the demand for payment was not effected in conformity with this Letter of Credit, you may correct any such non-conforming demand.

5. Expiration. This Letter of Credit shall automatically expire at the close of business on December 31, 2009 or such earlier date on which we receive a Cancellation Certificate in the form of Attachment C hereto purportedly executed by your authorized officer upon which this Letter of Credit shall be cancelled (the "Expiration Date").

6. Rollover. The Letter of Credit shall be deemed automatically extended without amendment for one additional period of one (1) year from the present expiration date, unless at least sixty (60) Business Days prior to such expiration date we shall notify you by registered mail or overnight courier at the above address (or such other address as may be designated by you as contemplated by numbered paragraph 9) that we elect not to consider this Letter of Credit extended for such additional one year period; provided, however, in any event this Letter of Credit shall expire on December 31, 2010.

7. Business Day. As used herein, "Business Day" shall mean any day on which commercial banks are not authorized or required to close in the State of California.

8. Governing Law. Except as far as otherwise expressly stated herein, this Letter of Credit is subject to the International Standby Practices ("ISP98"), except for Rule 3:14(a), International Chamber of Commerce Publication No. 590. As to matters not addressed by the ISP98, this Letter of Credit shall be governed by and construed in accordance with the laws of the State of California and applicable U.S. federal law.

9. Notices. All communications to you in respect of this Letter of Credit shall be in writing and shall be delivered to the address shown for you herein before or such other address as may from time to time be designated by you in a written notice to us. All documents to be presented to us hereunder and all other communications to us in respect of this Letter of Credit, which other communications shall be in writing, shall be delivered to the address for us indicated on the signature page hereof, or such other address as may from time to time be designated by us in a written notice to you.

10. Irrevocability. This Letter of Credit is irrevocable.

11. Transferability. We shall not authorize any transfer of this Letter of Credit until a transfer certificate, substantially in the form of Attachment D hereto, is completed to our satisfaction and received by us. All transfer charges shall be for the account of the Contractor. This Letter of

Credit may not be transferred to any person with whom U.S. persons are prohibited from doing business under U.S. Foreign Asset Control Regulations or other applicable U.S. laws and regulations. Transfer of the Letter of Credit may not change the place of expiration from our above office.

12. Complete Agreement. This Letter of Credit sets forth in full our undertaking, and such undertaking shall not in any way be modified, amended, amplified or limited by reference to any document, instrument or agreement referred to herein, except for the ISP-98 and Attachments A, B, C, and D hereto and the notices referred to herein and any such reference shall not be deemed to incorporate herein by reference any document, instrument or agreement except as set forth above.

SINCERELY,

FORM OF DRAW CERTIFICATE

The undersigned hereby certifies to Wells Fargo Bank N.A. (the "Issuer"), with reference to Irrevocable Letter of Credit No. _____ (the "Letter of Credit") issued by Issuer in favor of the undersigned ("Beneficiary") (capitalized terms used herein and not defined herein shall have the respective meanings set forth in the Letter of Credit), as follows:

(1) The undersigned is the _____ of Beneficiary and is duly authorized by Beneficiary to execute and deliver this Certificate on behalf of Beneficiary.

(2) Beneficiary hereby makes demand against the Letter of Credit by Beneficiary's presentation of the draft accompanying this Certificate, for payment of _____ dollars (U.S.$_____), such amount, when aggregated together with any amount not drawn down, is not in excess of the Stated Amount (as in effect of the date hereof).

(3) Beneficiary is entitled to draw the amount set forth in paragraph 2 hereof because:

[Check applicable provision(s)]

[___] The conditions for a drawing pursuant to the Agreement have been met.

[___] The rating of the outstanding unsecured indebtedness of the bank or trust company that issued the Letter of Credit has fallen below a rating of A-, as determined by Standard and Poor's Corporation, or a rating of A-3, as determined by Moody's Investors Services, Inc., and Contractor has failed, within ten (10) days after receipt of written notice (copy attached) thereof by the Beneficiary to replace such Letter of Credit with another Letter of Credit issued by a financial institution acceptable to Beneficiary on the same terms as the Letter of Credit being replaced.

[___] The Contractor has failed to renew the Letter of Credit within sixty (60) Business Days prior to the expiration thereof.

(4) You are hereby directed to make payment of the requested drawing to: (insert wire instructions)

Appendix Y –Form of Quality Assurance Programs

HEARING EXHIBIT - 00000450

APPENDIX Y
FORM OF QUALITY ASSURANCE PROGRAMS

Contractor shall have in effect at all times a Quality System which as a minimum conforms to the American National Standard ANSI/ASQ ISO 9001, Model for Quality Assurance, or an approved alternative. The project specific Quality System will conform to but not be identical to the ISO 9001 Model. A site specific Quality System will be submitted for approval. This system shall ensure that all materials and services (including subcontracted materials and services) provided on this project comply with the specification and applicable Codes.

1.0 Quality Assurance Program:

1.1 Contractor shall have a QA Program in effect at all times to verify that all items and services, including subcontracted items and services, comply with the contract requirements.

1.2 This program will clearly establish the authority and responsibility of those responsible for the QA Program. Persons performing quality functions will have sufficient and well-defined responsibility and authority to enforce quality requirements; to identify, initiate, recommend, and provide solutions to quality problems; and to verify the effectiveness of the solutions.

1.3 Contractor shall submit a controlled copy of his QA or Quality Systems Manual for review and acceptance by Owner. In addition, Contractor will make available for review copies of any associated implementing procedures and/or instructions. A post award meeting will be held at Contractor's facility to discuss the Project's QA and quality requirements.

1.4 Contractor shall utilize a quality plan for all stages of the project including design, procurement, installation/erection, testing, start-up and turnover. The quality plan will identify critical activities, inspections and other quality verification points that will be performed to ensure the quality of work meets specified requirements.

1.5 Prior to the post award meeting, Contractor shall make available for review the quality plan for the project that includes implementing procedures, instructions, and check-sheets (which may include but not limited to):

1.5.1 Test & Inspections

1.5.2 Quality System Audits

1.5.3 Nondestructive Examination Control

1.5.4 Control of Special Process

1.5.5 Non-conformance Control and Corrective Actions

1.5.6 Material Control

1.5.7 Document Control and Record Retention

Contractor's preliminary site Construction Quality Plan includes "Inspection and Test plans" that comply with the National Codes (ASME, AWS, ACI). Owner will perform an overview of Contractor's Quality System. This overview does not include "Hold" or "Witness" points. Every effort will be made to implement a meaningful overview without impeding Contractor's efforts or job progress. Owner's overview is intended to assist Contractor implement an effective Quality System and associated quality controls focused on problem prevention and continuous improvement. Concerns arising from the overview activities will immediately be conveyed to Contractor for incorporation into Contractor's Quality System or Project's Quality Plan for corrective action, recurrence control, and trending. Owner's representatives will continually monitor and evaluate Contractor's timeliness and adequacy of corrective actions and recurrence controls.

1.6 If subsequent to its acceptance, the QA Program is found to be ineffective or inadequate in providing acceptable quality controls, Owner reserves the right to require the necessary revisions.

2.0 Contractor's Responsibilities for Suppliers

2.1 Material and equipment quality control: Contractor shall provide new equipment, materials and workmanship for their application.

2.2 Contractor is responsible for the work and materials specified in the contract and shall require its subcontractors/suppliers to comply with the appropriate technical and quality requirements of the specification and associated procurement documents.

2.3 Contractor will identify, in purchase documents to his suppliers, all applicable quality and QA requirements imposed by the specification on Contractor and will ensure compliance thereto. Contractor has the prime responsibility for vendor surveillance and evaluating and monitoring the implementation of

ECRC-08-3501
HEARING EXHIBIT - 00000451

the Quality Assurance Programs of his suppliers. . The degree of overview should be based on results of the evaluation and ongoing quality performance.

2.4 Contractor will submit a copy of his Vendor Surveillance plans to Owner for review prior to implementation. Upon request, Contractor will submit to Owner copies of the reports of the vendor surveillance activities that he performs on his suppliers.

3.0 Witness Points

3.1 Owner will have the right to establish witness points for which Contractor will give ten (10) business days prior notification. In addition, Owner may establish witness points to ensure resolution of quality problems.

3.2 Witness points are defined as predetermined points during fabrication when equipment or activities may be inspected or witnessed for compliance with the Purchase Order, specification, and quality requirements.

3.3 Owner will have the right to access Contractor and Contractor's Suppliers facilities at any time to verify the progress and quality of the work.

4.0 Stop Work Action

4.1 Owner will orally notify and confirm in writing to Contractor of any situation where, in the judgment of Owner, Contractor or Contractor's suppliers are performing work contrary to the conditions and terms of the Contract or where continued operations could cause damage, preclude further inspection, or render remedial action ineffective for any product or service provided by Contractor or Contractor's suppliers.

4.2 If, after this notification, Contractor does not commence appropriate corrective action to the satisfaction of Owner, Owner will initiate stop work action on the specified product or service and so notify Contractor in writing.

4.3 Upon receipt of a Stop Work Directive (SWD) from Owner, Contractor and Contractor's suppliers will cease operations, including shipments, on any specified product or service to the extent stipulated by the SWD. Resumption of operations will not be undertaken until Contractor has obtained a written authorization from Owner. A written authorization to resume further operations will only be granted upon approval of Contractor's written commitment to correct those conditions itemized on the SWD. Correction of the actual deficiency will be required prior to release for shipment.

5.0 Deviations and Nonconformance's

5.1 Departure from any requirement of this Specification shall be considered a deviation or nonconformance. Examples include physical defects in equipment, test failures, equipment out-of-tolerance, or deviations from the specification, inspection or test procedures. No deviation or nonconformance from this Specification will be accepted until approved in writing by Owner.

5.2 Access to Contractor's facility and their suppliers' facilities shall be provided to the Owner (or agent) at its' option, to evaluate the effectiveness of the quality systems. Necessary changes, which may be required to conform to the above requirements, shall be made by Contractor.

6.0 Inspection, Shop Testing and Quality Verification

6.1 Contractor shall develop, implement and provide to the owner a Quality Control Plan for Equipment Suppliers that identifies the level and extent of shop inspection, testing and other quality verification activities. Contractor shall identify the number of man-days budgeted regarding each equipment supplier listed on the Quality Control Plan.

6.2 Testing programs shall be established by Contractor, but shall not be less thorough than the manufacturer's standard testing procedures or as outlined in the major equipment contracts. Contractor is responsible for insuring that the manufacturers meet specification requirements for quality, inspections and testing contained in all equipment contracts.

6.3 Contractor's inspection and testing programs can be established based on previous experience however Contractor shall demonstrate to Owner justification of inspection activities.

6.4 Contractor shall perform inspection, shop testing or other quality verification activities with appropriately qualified and experienced personnel.

6.5 Contractor shall develop and maintain a monthly schedule that identifies the quality verification activities and witness points to be performed on this project. Copies of this schedule shall be provided to the owner.

ECRC-08-3502
HEARING EXHIBIT - 00000452

6.5.1 The Owner reserves the right of shop inspection visits and may witness shop tests, provided that Contractors Schedule is not impacted. Any shop inspections by Owner does not relieve Contractor of its responsibility contained in the terms of the Contract. Contractor shall notify Owner of impending inspection visits or tests at least ten (10) business days in advance of inspections or tests. Shop inspections shall also be identified in Contractor's schedule.

6.6 Contractor shall furnish to Owner certified copies of test reports and shop tests whether Owner witnesses the shop test or not.

7.0 Equipment Expediting Services

Expediting services are included for all engineered equipment to track the engineering phase to ensure timely delivery of vendor design drawings and documents, as well as timely engineering design drawing review, and timely resolution of open issues. Expediting services are also included to track the manufacturing and testing phase to ensure timely shipment of equipment that passes all tests and meets vendor as well as Contractor quality assurance and quality control program requirements.

8.0 Construction Quality Control

First line, primary inspection and testing (hereafter referred to as Quality Control) is the responsibility of Contractor. Contractor's quality control procedures shall be clearly stated in the Project's Quality Control Manual, and shall specify field inspections and inspection criteria. Problems discovered during inspections and testing which could impair job cost, schedule, or facility function, will be immediately conveyed to Owner.

9.0 Construction Meetings

Contractor shall conduct meetings with subcontractor supervisory personnel prior to task performance, to insure understanding of the design specification requirements. At this time, inspection requirements and witness points shall be explained. Meetings shall be documented.

10.0 Construction Surveillance

The surveillance, which shall include hands-on inspections and documentation, verifies that the installations conform to the drawings, specifications, and applicable codes. Surveillance shall include in-process inspections, early in the process, as an effort to evoke problem prevention instead of problem resolution that comes with performing only final inspections. Contractor is obligated to engineer, construct and operate equipment in accordance with manufacturers' recommendations. Owner must be notified in writing prior to Contractor initiating actions that deviate from manufacturer's recommendations.

11.0 Test Monitoring

Testing shall be observed and documented by qualified Contractor personnel. Testing procedures and test reports should be reviewed as well as direct observation of the test process.

12.0 Inspection Plan

Contractor shall develop an Inspection Plan that identifies the Quality Control activities Contractor will perform. This plan shall outline the usage and extent of the above methods, or additional methods to be used by Contractor to monitor the quality of the installation. As a minimum, Contractor's Quality Control Program shall include monitor the systems and construction activities identified on Table 1.

13.0 As-Builts

Contractor shall develop and implement a document control program to ensure that the project submittals identified in section 11.3 of the EPC Contract Exhibit A, are properly controlled and as-builts are provided to the owner in accordance to the project document submittal schedule.

HEARING EXHIBIT - 00000454

Appendix Z – Form of Safety Plan

HEARING EXHIBIT - 00000455

APPENDIX Z
FORM OF SAFETY PLAN

Safety Rules and Regulations for Contractors

1.0 Purpose

Safety is vital to the well being of all employees, the quality of the work being done, and the cost effectiveness of Owner projects. The purpose of this procedure is to ensure that contractors comply with OSHA standard 29 CFR Part 1926, identify and correct potential safety hazards prior to starting work, and monitor the effectiveness of their own safety programs.

2.0 Contractor's Responsibilities

2.1 Prior to the commencement of any site work by Contractor, Contractor will designate in writing to Owner a competent safety representative. This representative shall make frequent and regular safety inspections of the jobsite. These inspections shall be documented in writing to Owner's format or similar and submitted to Owner for his review within three (3) working days of performance. All at-risk behavior and/or unsafe conditions noted during the inspections shall be corrected immediately. At risk behavior and /or unsafe conditions noted during inspections shall be corrected immediately. A Job Safety Analysis (JSA) is required to be performed by Contractor for all essential jobs.

2.2 Contractor shall initiate an accident prevention program and shall instruct each employee on the jobsite in the recognition and avoidance of unsafe acts and/or conditions applicable to its work environment to control or eliminate injury. Contractor shall enforce the project and OSHA safety rules on its employees.

2.3 Contractor is responsible for providing and requiring the use of appropriate personal protective equipment (PPE) in all operations where there is and exposure to hazardous conditions or where the hazard assessment results would require PPE.

2.4 Contractor shall designate in writing to Owner the names of the competent persons as required by OSHA Standard 29 CFR Part 1926 for Contractor's work activities. Contractor shall ensure this individual understands his responsibilities and is capable of identifying existing and predictable hazards in the surroundings or working conditions which are unsanitary, hazardous, or dangerous to employees, and understands that he/she has the authorization to take prompt corrective measures to eliminate them.

2.5 Contractor shall initiate and implement a hurricane/severe storm preparedness procedure in accordance with section 23.0. (Need Clarification. OSHA Section 1926.23 does not refer to hurricane/severe storm preparedness.)

3.0 Pre-Construction Meeting

Contractor shall attend a pre-construction meeting with Owner to understand the project conditions, safety requirements, and site policies and rules before starting work at the jobsite. A jobsite tour may be made to confirm Contractor's awareness of potential safety hazards. It is Contractor's obligation to implement measures necessary to establish and maintain safe working conditions on the Project.

4.0 Instruction and Training

Instruction and training of employees in an OSHA requirement will be required on this project. Examples of such training to be provided by Contractor are:

4.1 Orientation – Newly employed or transferred personnel shall be instructed in the site safety rules/policies and the safety practices required by their work assignments. Contractor shall document this training and demonstrate to Owner that the employees know and understand the training.

4.2 Daily Work Assignments – All work assignments must include specific attention to safety. The Risk Assessment Tailboard (RAT) process or equivalent will be utilized each morning or when a new task is assigned. (See attached program)

4.3 Safety Meetings – Properly conducted and recorded weekly safety meetings are required. Results of these safety meetings are to be submitted to Owner within three (3) working days for review.

4.4 Specific Instructions – OSHA requires that employees who perform specific tasks or operate specific equipment be trained in its usage. Contractor shall ensure only those personnel qualified by training or experience shall be permitted to operate machinery. These qualifications shall be documented by Contractor, maintained and kept on file at the jobsite for review by Owner.

ECRC-08-3506 HEARING EXHIBIT - 00000456

5.0 Recordkeeping

It is the Contractor's responsibility to maintain all records required by OSHA, Workers Compensation Insurance or similar regulations. This includes the maintenance of an accident log, annual summary and posting of posters.

6.0 Hazardous materials

6.1 Contractor is responsible for notifying Owner of any hazardous chemicals or substances that are brought or caused to have been brought on the jobsite. The legal storage, use, and disposal of hazardous chemicals or substances are the responsibility of Contractor.

6.2 If hazardous chemicals are going to be used, then Contractor will implement a Hazard Communication program that will include training, MSDS, and labeling.

6.3 Use of chemicals may result in hazardous waste. In such cases, the Contractor shall institute a program to address hazardous waste storage and disposal in accordance with the code of federal regulations, state regulations, and other requirements delineated in the bid and contract documents.

6.4 When personal exposure to chemicals, particulates, aerosols or fumes is reasonably expected to exist and exceed allowable limits, then the Contractor shall put an Industrial Hygiene program in place.

7.0 Fire Prevention

7.1 Contractor shall be responsible for fire protection in its work, operational, and storage areas in accordance with all local, county, state, and federal requirements 24 hours per day, seven days per week, through the duration of this contract

7.2 Contractor shall comply with all fire and safety rules and regulations established on the project

8.0 Third Party Safety Inspections

In addition to visits and safety inspections by corporate representatives, Contractor is advised that the Project may be inspected from time to time by authorized third parties. These may include representatives of Owner, insurance companies, or OSHA. Upon proper identification, they are entitled to access and courteous consideration.

9.0 Project Safety Rules and Guidelines

All personnel on the project are required to comply with project specific rules and these guidelines. Contractor shall ensure that all of its employees have read these guidelines and understand its contents. The following jobsite rules apply:

9.1 Clothing Requirements

9.1.1 Shirts with at least a 4-inch sleeve shall be worn at all times. Tank tops are not permitted.

9.1.2 Long pants are required.

9.1.3 Sandals, tennis shoes, or any other street type shoe will not be permitted.

9.1.4 Loose fitting clothes or jewelry shall not be worn around moving machinery, grinding operations, etc.

9.2 Personal Protective Equipment

9.2.1 ANSI approved hard hats shall be worn at all times in the construction area unless a hazard assessment performed by the Contractor shows that wearing the hard hat would make the specific job more unsafe. All areas of this jobsite are hard hat areas. This includes cabs on heavy equipment such as cranes and backhoes.

9.2.2 Safety glasses with side shields are required in the construction areas at all times.

9.2.3 Approved eye and face protection is required as follows: goggles, welding hoods and shields, and face shields will be required to be properly worn at all times when in the area of operations, such as when welding, burning, grinding, chipping, chemical handling, corrosive liquids or molten materials, drilling, sawing, driving nails, power actuated tools, concrete pouring, tampers and gas fueled hand operated equipment (i.e. chainsaws). This section will also apply to those employees of Contractor who are assisting any worker as an apprentice or helper. Prescription glasses must be ANSI approved or safety glasses must be worn over the prescription glasses.

FCRC-08-3507 HEARING EXHIBIT - 00000457

9.2.4 OSHA approved hearing and respiratory equipment shall be worn when required. Contractor shall meet the selection, fitting and maintenance requirements of OSHA.

9.2.5 All employees shall wear approved safety harnesses when working six feet or more above the ground or when working in a precarious position. The lanyard shall be securely attached to the employee 100% of the time and shall be rigged such that the employee can neither free fall more that 6 feet (1.8m), nor contact any lower level. Safety harnesses shall also be worn and attached to the tie-off rail when working out of extensible and articulating boom platforms and to vertical drop lines when working from suspended scaffolding. Specific project requirements may exist and contractor will adhere to the more stringent requirements of fall arrest equipment use.

9.2.6 Seat belts shall be worn by all employees operating any motor vehicle and any equipment with rollover protection structures during performance of the work.

9.2.7 Safety nets shall be provided when work places are more than 25 feet above the ground where the use of other fall protection devices is impractical.

9.2.8 Approved work boots or shoes shall be worn in all construction areas unless a hazard assessment performed by the Contractor shows that ANSI approved shoes are required. All contractors shall ensure that their work boots or shoes provide adequate protection from foot injuries due to falling or rolling objects as identified in the hazard assessment. Deck and athletic style shoes are not considered an approved work shoe and are not to be worn on the project.

9.2.9 Chemical resistant protective footwear shall be worn when there is a possibility of hazardous chemicals coming in contact with the foot. Chemical resistant footwear shall be resistant to the type of chemical to which it is exposed.

9.2.10 Work gloves are required to be worn for all manual material handling jobs.

10.0 Signs, Signals, Barricades and Lights

10.1 Signs, Signals and barricades shall be visible at all times where a hazard exists.

10.2 All streets, roads, highways, and other public thoroughfares, which are closed to traffic, shall be protected by effective barricades on which shall be placed acceptable and highly visible warning signs. Barricades shall be located at the nearest intersecting public highway or street on each side of the blocked section.

10.3 All open trenches and other excavations shall be provided with suitable barriers, signs, and lights to the extent that adequate protection is provided. Obstructions, such as material piles and equipment, shall be provided with similar warning signs and lights.

10.4 All barricades, signs, lights and other protective devices shall be installed and maintained in conformity with applicable statutory requirements.

10.5 When any work is performed at night or where daylight is shut off or obscured, Contractor shall, at its expense, provide artificial light sufficient to permit work to be carried on efficiently, satisfactorily and safely, and to permit thorough inspection. During such times, the access to the place of work shall also be clearly illuminated. All wiring for electric light and power shall be installed and maintained in a first-class manner, securely fastened in place at all points, and shall be kept as far as possible from telephone wires, signal wires, and wires used for firing blasts.

10.6 Signs, signals and barricades shall be removed when the hazard no longer exists.

10.7 Contractor's employees working in an area of potential traffic had shall wear approved reflective type vests.

11.0 Rigging Equipment

11.1 All rigging equipment shall be free from defects, in good operating condition and maintained in a safe condition. Rigging equipment shall be inspected before use on each shift and as necessary to ensure that it is safe.

ECRC-08-3508 HEARING EXHIBIT - 00000458

11.2 A designated, competent employee of Contractor shall thoroughly inspect rigging equipment monthly to ensure that it is safe. Records shall be kept on jobsite of each of these inspections by Contractor and shall be made available to Owner upon request.

11.3 Contractor shall immediately remove damaged rigging equipment from service.

12.0 Hand and Power Tools

12.1 All hand and power tools, whether furnished by Contractor, or by Contractor's employee, shall be maintained in a safe condition.

12.2 Contractors shall not issue nor permit the use of unsafe hand or power tools.

12.3 Electrical power tools shall be grounded or double insulated with proper assured equipment grounding inspections or Ground Fault Interrupter circuit protection provided.

12.4 Pneumatic power tools shall be secured to the hose or whip by some positive means.

12.5 Only properly trained Contractor's employees shall operate power actuated tools. Contractor shall maintain certification records, employee certification cards, or equivalent certification documentation or each of its employees using power actuated tools during performance of the work.

12.6 All portable grinders shall conform to OSHA and ANSI requirements.

12.7 Cords, leads and hoses shall be kept at least seven feet off the ground or placed off to the side to prevent creating a tripping or traffic hazard.

13.0 Compressed Gas Cylinders

13.1 Compressed gas cylinders shall be secured in an upright position at all times. Location of cylinder storage areas must be approved by Owner.

13.2 When transporting, moving and storing cylinders, valve protection caps shall be in place and secured.

13.3 Cylinders shall not be hoisted by magnets or choker slings. Valve protection caps shall not be used for hoisting cylinders.

13.4 Cylinders shall be kept away from sparks, hot slag and flames, or be adequately protected.

13.5 Cylinders shall not be placed where they can become part of an electrical circuit.

13.6 Cylinders shall be labeled as to the nature of their contents.

13.7 Oxygen cylinders in storage shall be separated from fuel gas cylinders or combustible material a minimum of 20 feet, or by a non-combustible barrier at least five feet high having a fire resistant rating of at least one-half hour. Empty cylinders shall be separated as above from full cylinders and stored with like cylinders.

13.8 "No Smoking" signs shall be posted at storage areas and signs shall clearly indicate contents of cylinders.

13.9 Anti-flash back valves shall be provided on all oxygen and acetylene lines.

14.0 Jobsite Transportation Rules

14.1 All drivers of motor vehicles shall be licensed, trained, and instructed to exercise good cautious operating judgement as well as observe posted speed limits. Maximum speed limit is 25 miles per hour unless posted otherwise. However, slower speeds are necessary in congested areas.

14.2 Seat belts shall be worn at all times when travelling in vehicles and equipment.

14.3 All Contractor's means of ingress, egress and parking will be adequately marked as such, since their employees are to travel these routes only.

14.4 Use your horn for safety at blind corners, when passing, etc.

14.5 Established hand signals or turns signals are to be used.

14.6 Reckless driving or other non-observance of these instructions will be cause for withdrawal of drive-in privileges and may result in denial of access to the project.

ECRC-08-3509
HEARING EXHIBIT - 00000459

15.0 Cranes and Derricks

15.1 Contractor shall certify all cranes and derricks as being in safe operating condition before using the crane or derrick on jobsite. This certification shall be maintained by Contractor and made available to Owner upon request.

15.2 Contractor shall comply with the manufacturer's specifications and limitations applicable to the operation of all cranes and derricks. Contractor shall designate a competent person who shall inspect all machinery and equipment before each use, to make sure it is in safety operating condition. Any deficiencies shall be repaired, or defective parts replaced, before continued use.

15.3 The swing radius of cranes shall be barricaded where practical and/or in areas where work is being performed.

15.4 Hand signals prescribed by ANSI shall be posted at an operator's station; employees assigned to work around the crane will be trained in the use of hand signals.

15.5 Equipment shall not be operated where any of the equipment or load will come within 10 feet (3.1 M) of electrical distribution or transmission lines less than 50 kV. Minimum clearance between lines and any part of the crane or load must be 10 feet plus 0.4 inches for each 1 kV over 50 kV or twice the length of the line insulator but never less than 10 feet.

15.6 Contractor's employees shall not ride headache ball, hook, or load being handled by the crane.

15.7 While in use, equipment shall not be lubricated or have maintenance performed.

15.8 Rated load capabilities, recommended operating speeds, special hazard warning, specific hand signal diagrams and special instructions shall be visible to the operator while he is at the control station.

15.9 Contractor's employees shall not be allowed to work under the load of cranes. Tag lines shall be used on all loads. Special caution should be used in concrete bucket operations.

15.10 Cranes and derricks shall be inspected prior to use and at monthly intervals. Contractor shall maintain records on jobsite of these inspections. Contractor shall make copies available to Owner upon request.

16.0 Equipment and Motor Vehicles

16.1 All equipment must be inspected daily before use by Contractor's operator. Contractor must also make formal inspections at 30-day intervals with proper documentation maintained at the jobsite by Contractor and copies shall be made available to Owner upon request.

16.2 Defective equipment shall be repaired or removed from service immediately.

16.3 All rubber-tired, self-propelled scrapers, rubber-tired, front-end loaders, rubber-tired dozers, wheel-type agricultural and industrial tractors, crawler tractors, crawler-type loaders and motor graders shall be equipped with rollover protective structures and seat harnesses.

16.4 All Contractors' operators of construction equipment should be properly licensed and certified by a competent person. Copies of the certifications shall be maintained on jobsite by Contractor and made available to Owner upon request.

16.5 All equipment with an obstructed view to the rear must have a reverse signal alarm audible above the noise level or a flagman.

16.6 All cracked or broken glass shall be replaced before bringing vehicles on the jobsite. If glass is broken or damaged on jobsite and if damage is severe enough to cause a potential safety problem, the machine shall be stopped until such damage has been repaired.

16.7 Vehicles used to transport employees shall have seats firmly secured and adequate for the number of employees to be carried and all passengers should be properly seated. Standing on the back of moving vehicles is prohibited.

16.8 Location for storage of all fuels, lubricants, starting fluids, etc., shall be reviewed by Owner before use by Contractor.

17.0 Ladders

17.1 The use of ladders with broken or missing rungs or steps, broken or split rails or other defective construction is prohibited.

ECRC-08-3510 HEARING EXHIBIT - 00000460

17.2 Ladders shall extend no less than thirty-six inches (36") above landing and be secured to prevent displacement.

17.3 Portable ladders must be equipped with safety shoes.

17.4 Wooden ladders shall not be painted.

17.5 Metal or conductive ladders shall not be used on the jobsite.

18.0 Floor and Wall Openings and Stairways

18.1 Floor and wall openings shall be guarded by a standard guardrail, midrail, and toeboard, or a cover installed and secured to prevent movement.

18.2 Guardrails must be of sufficient strength to support two hundred (200) pounds of pressure when applied at midspan of the guardrail parallel with the floor and perpendicular to the guardrail with a minimum deflection of three (3) inches.

18.3 Covers must be adequately secured to prevent displacement and have "Danger" signs attached identifying the hazard.

18.4 Every flight of stairs having four or more risers shall be equipped with standard stair railings. Stairs are not to be used until risers and railings are securely installed. Treads will be poured as soon as possible were poured treads apply.

18.5 Debris and other loose materials shall not be allowed on stairways or at access point to stairway. Debris shall not be allowed to accumulate on stairwells.

19.0 Excavations and Trenching

19.1 Prior to opening any excavation or trench, Contractor must notify Owner. In addition, Contractor shall contact any other necessary personnel to determine whether underground installations, i.e., sewer, telephone, fuel, electric lines, etc., may be encountered and where they are located. An excavation permit may be required specific by project.

19.2 Excavations and trenches shall be inspected by a competent person daily and after every rainfall to determine if they are safe.

19.3 After the soil is classified, all banks 4 feet high or more shall be sloped to the angle of repose (the greatest angle above the horizontal place at which a material will lie without sliding), shored, or have trench shields installed.

19.4 Ladders or steps shall be provided in all trenches 4 feet or more in depth. Ladders or steps shall be located to require no more than 25 feet of lateral travel before having access or egress.

19.5 Material excavated shall be stored at least 2 feet from the edge of the excavation, or the trench shall be shored to prevent material from falling into the excavation.

19.6 All trenches and excavations shall be properly barricaded to prevent persons from waling into them.

19.7 All walkways or ramps crossing over excavations shall be securely fastened and equipped with standard guardrails.

20.0 Housekeeping

20.1 During the course of construction, all debris and scrap material shall be kept away from the work area.

20.2 Containers shall be provided by Contractor for the collection and separation of waste, trash, oily and used rags and other refuse. Metal (dumpster type) containers must be used and emptied promptly.

20.3 Garbage and other waste shall be disposed of at frequent and regular intervals in a manner approved by Owner.

20.4 Contractor shall notify Owner of any hazardous waste it will generate during performance of the work. Contractor has the direct responsibility of maintaining proper storage of these wastes while onsite and will verify to Owner in writing that the wastes have been disposed of in a legal manner.

20.5 Contractor shall not pour, bury, burn, nor in any way dispose of any chemical on the work jobsite without the written permission of Owner.

20.6 Contractor shall dispose of all combustible debris to a solid waste disposal site.

ECRC-08-3511 HEARING EXHIBIT - 00000461

20.7 NO OPEN BURNING OF DEBRIS OR RUBBISH WILL BE PERMITTED ON THE PROJECT.

20.8 Materials and supplies shall be stored in locations that will not block access ways, and shall be arranged to permit easy cleaning of the area.

20.9 All hoses, cables, extension cords, and similar materials shall be located, arranged, and grouped so they will not block any access way and will permit easy cleaning and maintenance.

21.0 Medical Services - Contractor's Responsibilities:

21.1 Provisions shall be made prior to commencement of the project for prompt medical attention in case of serious injury.

21.2 Contractor shall ensure that first aid supplies be easily accessible when required. Contents shall be inspected and refilled weekly.

21.3 Contractor shall provide proper equipment for prompt transportation of injured person to a physician or hospital or a communication system to contact necessary ambulance service.

21.4 Contractor shall post telephone numbers and addresses of the physicians, hospital and ambulances.

21.5 Contractor shall complete and retain on file "Employer's First Report of Injury" and OSHA Form 300 and provide Owner a copy upon request.

21.6 Contractor shall ensure that each of its lower-tier subcontractors meet these medical requirements.

22.0 First Aid and Medical Procedures

22.1 Each occupational illness or injury shall be reported immediately by Contractor to Owner's project manager. For emergency cases, ambulance services will be contacted immediately by the quickest means available.

22.2 A daily record shall be kept on all employees requiring first aid treatment.

22.3 If medical treatment is required, Contractor must provide transportation of the injured to a hospital or physician. A representative of the Contractor shall accompany the injured employee and remain at the facility until the employee is ready to return. All reports from the physician concerning treatment, diagnosis, return to work status and restrictions shall be brought back to the project and a copy forwarded to Owner's construction manager, subject to employee's permission through the medical treatment authorization form provided in contractors safety plan..

22.4 Contractor must conduct accident investigations for all serious accidents and OSHA recordable injuries. The accident report shall include root cause determination, corrective actions taken, and measures to prevent the incident from reoccurring.

23.0 *Hurricane/Severe Storm* Emergency Response Procedure

23.1 Contractor will implement an organized, orderly system to prepare the Project site for inclement weather associated with hurricanes or severe storms.

23.2 Contractor is responsible for training each of their employees on the Construction Project Hurricane / Severe Storm Emergency Response Procedure

23.3 Contractor shall establish a Storm Damage Assessment Team.

23.4 Contractor shall monitor hurricane / severe storm activity by all available resources (i.e. Internet, radio broadcast, weather bulletins, etc).

24.0 Hurricane / Severe Storm Preparedness Plan:

Contractor program shall address inspection of work areas; storage areas, shops and trailers to ensure all equipment and material are properly secured. As a minimum, the following activities shall be addressed:

24.1 Hurricane / Severe Storm Watch (36 to 48 Hours Notice):

24.1.1 Band and secure all lumber.

24.1.2 Band and secure all plastic pipe, conduit, and other similar objects.

24.1.3 Band and secure all siding, decking, sheet metal, and other similar objects.

24.1.4 Dismantle and/or secure all scaffolds and temporary platforms.

FCRC-08-3512
HEARING EXHIBIT - 00000462

24.1.5 Inspect and secure all temporarily installed piping, ductwork, and equipment. The may include adding lashing or lowering the equipment or material to the ground.

24.1.6 Finish bolting up all unfinished erected structural steel. Add additional steel, if necessary, to ensure the stability of the structure.

24.1.7 Lash down all unsecured tanks, silos, ductwork, and hoppers.

24.1.8 Tie down all storage vans, SEA containers, and temporary structures. This includes stairways, printshacks, and other similar structures.

24.1.9 Tie down all gang boxes or other similar items located in elevated positions up in the structures.

24.1.10 Dismantle and/or secure all large signs and similar structures.

24.1.11 Remove all radiation sources from the project.

24.1.12 If possible, remove all fuel trucks and tanks from the project. Trucks and tanks left onsite shall be secured and diked to contain a spill.

24.1.13 If possible, all hazardous material shall be removed from the project. Material left onsite shall be secured and diked to contain a spill.

24.1.14 All elevated work areas for example; Turbine decks shall be cleared of all loose material.

24.2 Hurricane / Severe Storm Warning (1 to 24 Hours Notice):

24.2.1 Contractors should make sure that all materials and equipment are secured by this time.

24.2.2 Shut down the Project Construction Power System.

24.2.3 Shut off the construction water system.

24.2.4 All crane booms shall be lowered to the ground and secured.

24.2.5 All small vehicles such as golf carts, welding machines and compressors shall be secured.

24.2.6 All office trailers and buildings shall be locked.

24.2.7 Project shall be evacuated.

24.3 Following a Hurricane / Severe Storm:

24.3.1 Once the hurricane / severe storm has passed, the Storm Damage Assessment Team shall return to the site to determine if the site is safe for employee re-entry.

24.3.2 Each contractor shall appoint a management person as a contact. The Storm Damage Assessment Team shall communicate to the appointed persons the condition of the site.

24.3.3 If the site is unsafe for employee entry, the Storm Damage Assessment Team shall determine what resources are needed to make the site safe for re-occupancy.

24.3.4 The Storm Damage Assessment Team shall request from the appropriate contractor site management appointee the necessary resources to prepare the site for re-occupancy.

24.3.5 Only when the site has been determined safe for re-occupancy by the Storm Damage Assessment Team, shall site personnel be allowed back to the site to resume normal construction activities.

24.4 Hurricane/Severe Storm Response Construction Site Team

Contractor shall maintain a list of team members and phone numbers of those employees on the site teams.

EXHIBIT Z - ATTACHMENT 1

My Safety Principles

- Plan every job
- Anticipate unplanned events
- Use the right tool for the job
- Identify the hazard
- Assess the risk
- Put controls in place to minimize the possibility of injury
- Protect each other
- Use a "Buddy" system
- Do not take short cuts
- Believe in Zero Injuries
- Wear protective equipment
- Keep all work areas clean
- Inspect all tools prior to each use

Post Job Safety Review

1. Was anyone injured or did an unplanned event occur today?
   Yes_____ No_____
   If yes, explain:
   _____
   _____
   _____
2. What problems did you have with today's work assignment?
   _____
   _____
   _____
3. What can we do tomorrow to improve performance?

Risk Assessment

Potential Hazards	*Controls or Corrective Measures*

Housekeeping
____Keep work area and access clear
____Remove nails in boards
____Clean work area daily

Fall Protection
____100% tie off above 6 feet
____Lifeline installed
____Double Lanyards/harness

Lifting
____Lift with legs and with back straight
____Get help with heavy loads
____Use material handling equipment
____Get help for weight over 40 lbs

Ladders
____Tie off ladders using 4 to 1 rule
____Face ladder when climbing
____Use both hands when climbing
____Extend 36" above landing
____Use handline to raise or lower tools
____One worker on a ladder

Pinch Point/Line of Fire
____Wear gloves
____Be aware of swing radius on machinery
____Don't place hands on end of pipe
____Use a tag line to control material

Lockout/Tagout
____The equipment has been properly tagged or locked out, drained, vented, and energy released

Rigging
____Inspect rigging before each use
____Do not work under and overhead load
____Check load charts for safe work limits
____Check tag on nylon sling for load limits

Power Hand Tools
____Use guards and handles
____Wear eye protection
____Unplug tools when not in use
____Proper tool is in use for the job
____Inspect tools daily

Welding/Burning
____Wear gloves/protective clothing
____Use cutting/burning goggles
____Use/inspect fire extinguisher
____100% spark containment
____Ground welding machine
____Post "Hot Work Permit" if required
____Move/cover combustibles in area

Excavations
____Ladders every 25 feet
____Know soil classification
____Slope, shore, or shield over 5 feet
____Barricade around open trench
____Keep spoils 2 ft back from edge

Scaffolds
____Check for ladder access
____Insure standard guardrails are installed

EXHIBIT Z - ATTACHMENT 2
Risk Assessment Tailboard (RAT) Process

Definition

The Risk Assessment Tailboard sheet is a daily task process that empowers the employees to assess the hazards for the job and implement controls necessary to attain Zero accidents. It also provides a check sheet for personal protective equipment use, training, procedural compliance, and provisions for a post safety job review. The risk assessment process is to be used at least daily.

Purpose

FPL recognizes the importance of holding tailboards before each job, assessing the hazards of that particular job, and instituting the necessary controls to minimize the potential for injury. Daily planning involves safety instruction by the supervisor and crew input into the hazard assessment and control process before the job begins.

Process

- All known hazards must be identified, removed, abated, and/or acknowledged by the crew.
- The foreman/supervisor shall analyze each task for hazards and indicate what safety measures need to be taken.
- The supervisor shall ensure that each employee understands the work to be performed, hazards present, and corrective measures needed to prevent injury.
- If the work changes or unexpected problems arise during the work activities, then another safety assessment is to be done.
- The supervisor shall assure that the necessary safety equipment, procedures, and/or training is provided to the employees before work begins.

Documentation and Feedback

With the exception of the post job safety review, the RAT sheet is to be completed entirely before the work begins. It is the supervisor's responsibility to audit the work throughout the day to ensure adherence to the risk assessment process.

FPL construction management has the responsibility to audit the work activities throughout the day to ensure precautions are being taken and controls are in place.

At the end of the day, the supervisor completes the post job safety review section of the RAT sheet. It is then turned in to the FPL Construction Manager weekly for review and action as needed.

Report all accidents and near misses to supervision. It is essential to analyze these incidents to determine why problems occurred and to institute changes for future work.

END

APPENDIX Z-1
SAFE AND SECURE WORKPLACE POLICY

Rev. 9/9/98

SAFE AND SECURE WORKPLACE POLICY FOR SUPPLIERS

Objective: To provide a safe and secure workplace for FPL employees, supplier employees, customers and the public.

Scope: This Policy applies to any individual or organization, its employees and its sub-contractors, (hereinafter collectively referred to as "Supplier"), responsible for performing the work identified by the purchase contract, for or on behalf of Florida Power & Light Company (hereinafter referred to as "FPL") and its subsidiaries on FPL premises, FPL customers' premises, FPL rights-of-way or FPL facilities, including facilities under construction and excluding only nuclear power stations, (hereinafter collectively referred to as "FPL Premises"), for periods equal to or greater than 30 employee days cumulative per calendar year. For example, if a Supplier has 30 employees who each work one full 8 hour day on FPL Premises in any one calendar year, this Policy applies to the Supplier. If a Supplier has one employee who works 30 or more full 8 hour days in any one calendar year on FPL Premises, this Policy applies to the Supplier.

The policy covers three specific areas:

- Pre-assigned Screening
- Controlled Substance and Alcohol Abuse
- Workplace Violence Policies

Violation: If Suppliers' employees are found to be in pre-access violation of this Policy, Supplier's employees shall be denied access to FPL Premises. Supplier employees found to be in post-access violation of any part of this Policy shall be removed immediately by the Supplier from FPL's Premises.

Compliance: If Supplier fails to comply with this Policy, Supplier may be considered in breach of contract. FPL or its designee shall have upon request immediate access to Suppliers' records to assure compliance with the requirements of this Policy.

Policy Details: The Supplier must address three specific issues regarding Safe and Secure Workplace.

II. Controlled Substances and Alcohol Abuse:

All Supplier employees should be fit-for-duty and report to work able to perform their duties safely. Use or possession of controlled substances and/or alcoholic beverages, as defined in

Chapter 561 of the Florida Statutes, by Supplier employees is an unsafe work practice which creates an increased risk to Supplier employee safety and the safety of others. The use or possession of any illegal drug or controlled substance without a valid prescription and/or the misuse of any prescription or over-the-counter medication by any Supplier employee shall constitute a violation of this Policy.

Any Supplier employee who is consuming or is under the influence of any alcoholic beverage while on FPL Premises shall be in violation of this Policy.

All Suppliers must have in place a controlled substance and alcohol Policy All employees who are subject to the requirements of the Omnibus Transportation Employee Testing Act of 1991, including Supplier employees required to hold a Commercial Driver's License, will be subject to random testing for controlled substances and alcohol according to the federally mandated random testing rate.

Supplier employees will be denied access to or immediately removed from FPL Premises for: (1) Possession or use of a controlled substance without a valid prescription; (2) distribution or sale of controlled substances at any time on or off the job; (3) positive test result for controlled substances without a valid prescription or alcohol; (4) being under the influence of a controlled substance or alcohol; or (5) refusal to test for controlled substances or alcohol.

ECRC-08-3517 HEARING EXHIBIT - 00000467

Supplier employees taking prescription medication are required to consult with their physicians to determine whether the medication may have an adverse effect on performance. Supplier employees taking over-the-counter medication are responsible for being aware of any adverse effects it may have on their performance as defined on the manufacturer's label. If prescribed or over-the-counter medication may have an adverse effect on performance, the Supplier employee is required to notify the Supplier prior to reporting to FPL's Premises. Failure to inform the Supplier's representative of taking prescription or over-the-counter medication which may have an adverse effect on performance may result in that employee's denial of access to FPL Premises. In all events the Supplier is responsible for determining the employee's fitness for duty.

Supplier employees taking prescription medications must be prepared to provide satisfactory, verifiable proof that the medication has been prescribed to the Supplier employee, and that it is necessary for the individual's current medical condition. Possession of the prescription bottle will provide the required proof.

Any Supplier employee called to perform unscheduled work at FPL Premises must state whether he/she has consumed alcohol within five (5) hours of the time he/she reports to work or is otherwise "unfit" for duty. Supplier employees that have consumed alcohol within the five (5) hour abstinence period shall not be permitted to work on FPL Premises except under conditions when:

1. The Supplier employee being called believes that he/she is fit for duty; and, based on information provided by the individual, the Supplier also believes he/she is fit for duty; or
2. The Supplier employee's fitness for duty is verified by a breath analysis for alcohol prior to entering the FPL worksite and the individual believes he/she is fit for duty.

In addition to the requirements set forth herein, all Suppliers shall comply with all applicable state and/or federal laws regarding drug and alcohol testing of their employees that are assigned to FPL Premises. All testing performed pursuant to this policy shall be at the blood alcohol rates specified in the Omnibus Transportation Employee Testing Act of 1991. **All Supplier employees will be subject to "post accident" and/or "reasonable suspicion" controlled substances and alcohol testing while on FPL Premises. "Reasonable suspicion" shall be determined in the sole discretion of FPL. No Supplier employee required to take a post-accident alcohol test under the Policy shall use alcohol for eight hours following the accident, or until he/she undergoes a post-accident alcohol test, whichever occurs first. This testing will be required when there is reasonable suspicion that an individual is in violation of the substance abuse and alcohol Policy. Supplier shall immediately notify FPL of any accidents involving or caused by its employees or subcontractors on FPL Premises.**

III. Workplace Violence:

FPL is committed to providing a safe and secure workplace. Supplier employees are expected to work in concert with FPL employees to ensure that the workplace remains safe and secure for all.

Behavior that could be perceived by a reasonable person as threatening or indicating the possibility of violence is prohibited. This may include, but is not limited to verbal threats, gestures, abusive language or physical altercation (fighting, shoving, etc.).

Displaying or carrying in any manner a weapon, firearm or destructive device (as those terms are defined in Chapter 790 of the Florida Statutes) on the Supplier employee's person or in his/her belongings, on any FPL Premises, in his/her personal vehicle while engaged in FPL work or activities, or in an FPL vehicle at any time is prohibited.

Supplier employees that violate these policies will be removed immediately by the Supplier from FPL Premises, and denied access to any FPL Premises. Supplier shall immediately notify FPL Corporate Security of violations of this Section III.

IV. Reporting Illegal Conduct or Workplace Violence:

FPL employees and Supplier employees benefit from an atmosphere of good ethical and legal conduct. Suppliers and their employees with information concerning abuse of company assets, fraud, theft, possession or use of illegal drugs, threats of violence or any other behavior at FPL that might be considered illegal, shall

ECRC-08-3518 HEARING EXHIBIT - 00000468

report that information immediately. Such information can be reported to the corporate security hotline anytime day or night at 888-694-6444.

V. **Acknowledgment:**

Suppliers must make their employees aware of this Policy and have Supplier employees acknowledge so in writing prior to beginning work at FPL Premises.

Re: A 46.0-acre tract of land currently an old citrus grove on the northwest side of Courtenay Parkway (SR 3), adjoining the Kennedy Space Center, adjacent east to an Air Liquide industrial plant, on Merritt Island in unincorporated Brevard County, Florida.

Dear Mr. Corson:

We have investigated and analyzed the referenced property for the purpose of estimating its market value in fee simple as of January 17, 2008, the last date of formal inspection. The property is described in the attached report.

The property is part of NASA's 140,000-acre Kennedy Space Center, the principal home and launch facilities of the U.S. Space Shuttle program. The appraised property is an old citrus grove operated under license from the U.S. Fish & Wildlife Service, which manages all of the undeveloped land within the Kennedy Space Center. The location of the appraised property is just inside the south boundary of the Merritt Island Natural Wildlife Refuge.

The scope of our analysis included inspection of the property, collecting and analyzing relative data and information about the property and of comparable properties, and applying the applicable approaches to value. Since the property is undeveloped land, only the sales comparison approach was utilized. We also had conversations with Mr. Jim Ball of NASA in order to understand the basis of land use and zoning issues, and the limitations on development imposed by NASA on land use and third-party development within the space center.

Based upon our investigation and subject to the assumptions and limiting conditions set forth in the attached report, it is our opinion that the market value of the fee simple interest of the 46.0 acre parcel of land appraised, as of January 17, 2008, was **$75,000 per gross acre**, resulting in a value of:

THREE MILLION FOUR HUNDRED FIFTY THOUSAND DOLLARS
($3,450,000)

This opinion of value is qualified by certain definitions, assumptions and limiting conditions set forth on Pages 5 through 11 of the attached report. We particularly call your attention to the following Extraordinary Assumptions:

1. No formal survey of the property is available and the property's size of 46.0 gross acres, is based on calculations made by personnel of the Kennedy Space Center. We have assumed this size accurately reflects the land being considered by our client and have relied on this size in our valuation.

2. NASA is proposing a long-term lease of the appraised property to FP&L, but limitations on the use of the land (type of permitted uses) have not been reduced to writing and available for consideration in our appraisal. NASA, the Kennedy Space Center and the Fish & Wildlife Service will dictate the uses deemed appropriate for the land, but no local zoning and land use regulations apply within the federal government ownership. We have assumed that the property would have a mixture of comparative permitted uses as outlined in Brevard County's three primary industrial zoning classifications (PBP, PIP and I-U). If the uses under NASA are restricted or materially less than those permitted in the latter three county zoning classifications, our estimate of value would require reconsideration. (For expanded discussion on this assumption, see Land Use Plan/Zoning, and Highest and Best Use sections in the report.)

This summary appraisal was prepared under the Uniform Standards of Professional Appraisal Practice (USPAP). The report is intended only for the client's use, or its designated agents, and may not be relied upon for any other use or distributed to any unintended user without permission.

INTRODUCTION

HEARING EXHIBIT - 00000481

EXECUTIVE SUMMARY

Property Location	The northwest side of Courtenay Parkway (S.R. 3) along and within the south boundary of the NASA Kennedy Space Center campus, adjoined on the west side an Air Liquide industrial plant, on Merritt Island in unincorporated Brevard County, Florida. Brevard County identifies the property as being 7110 North Courtenay Parkway, Merritt Island, Florida 32953.
County	Brevard County, Florida
Owner of Record	United States Government
Interest Appraised	Fee simple estate
Primary Influences	The property is just inside the south boundary of the 140,000-acre NASA Kennedy Space Center. Only 5% of the associated land is developed with facilities with the balance undeveloped and managed by the U.S. Fish and Wildlife Service as part of the Merritt Island Natural Wildlife Refuge. The appraised property is an old citrus grove operated under license from the Fish & Wildlife Service. An existing electrical power line is within and parallel to the west line of the property and serves the privately owned Air Liquide facility to the immediate west, which is outside the space center land ownership.
Dates	Date of Last Inspection January 17, 2008 Date of Value January 17, 2008 Date of Report January 31, 2008
Land Size and Shape	Rectangular shaped 46.0 acres (see Extraordinary Assumption 1).
Improvements	No buildings are on the property. The existing citrus grove improvements consist of swales, perimeter and internal drainage ditches, wells and pump station, etc.
Utilities	A municipal water line is located along SR 3. Sanitary sewer is located approximately one mile to the north inside the gated environment of the space center. Electricity is currently to the property as part of the citrus grove facilities (well pumps, etc.)

EGRDA08-KSN HEARING EXHIBIT - 00000482

EXECUTIVE SUMMARY (Continued)

Soil Types	Copeland-Bradenton-Wabasso complex, limestone substratum (80.3%) and Bradenton fine sand, limestone substratum (19.7%).
FLUP/Zoning	The land is subject only to those uses that would be permitted by NASA and the Kennedy Space Center. According to Mr. Jim Ball, Real Estate Director, NASA has been exploring development of a 320-acre area of existing citrus groves north of the appraised property as a potential light industry technology center, tentatively called Exploration Park. The land would be leased to a private developer who would develop the necessary land infrastructure (water, sewer, interior roads, etc.) as well as vertical structures that would be leased to end-users complimentary and beneficial to the space center. At present, this proposed project is on hold.
Concluded Highest and Best Use of the Land	As a potential light industrial site providing support services to the space center (see Extraordinary Assumption #2).
Market Value Conclusion	Sales Comparison Approach $3,450,000 Value per gross acre $75,000
Paraphrased Extraordinary Assumptions	1. We have relied on the represented size of the property as being 46.0 acres. 2. As the property is part of federally-owned land and NASA has not reduced to writing the uses to which the property will be limited, we have assumed that the permitted uses would be a reasonable mixture of those uses permitted by Brevard County's PBP, PIP and I-U industrial zoning categories. If NASA limits the uses to which the property may be used materially less than the comparative uses permitted under the three mentioned county zoning classifications, our estimate of value may require reconsideration.

CERTIFICATION

We certify that, to the best of our knowledge and belief:

1. The statements of fact contained in this report are true and correct.

2. The reported analyses, opinions and conclusions are limited only by the reported assumptions, limiting conditions, and legal instructions, and our personal, impartial, and unbiased professional analyses, opinions and conclusions.

3. We have no present or prospective interest in, or no bias with respect to, the property that is the subject of this report, and we have no personal interest or bias with respect to the parties involved.

4. Our engagement in this assignment was not contingent upon developing or reporting predetermined results.

5 Our compensation for completing this assignment is not contingent upon the development or reporting of a predetermined value or direction in value that favors the cause of the client, the amount of the value opinion, the attainment of a stipulated result, or the occurrence of a subsequent event directly related to the intended use of this appraisal.

6. We have made a personal inspection of the property that is the subject of this report from offsite only, and did not contact the property owner, and his/her designated representative.

7. No one provided significant professional assistance to the persons signing this report.

8. The use of this report is subject to the requirements of the State of Florida relating to review by the Florida Real Estate Appraisal Board.

9. The use of this report is subject to the requirements of the Appraisal Institute relating to review by its duly authorized representatives.

10. The reported analyses, opinions and conclusion were developed, and this report was prepared, in conformity with the requirements of the Code of Professional Ethics and Standards of Professional Appraisal Practice of the Appraisal Institute, which include the Uniform Standards of Professional Practice.

11. That we have not revealed the results of such appraisal to other than the proper officials of Florida Power & Light or its designated agents and will not do so until authorized by same, or until required by due process-of-law, or until release from this obligation by having publicly testified as to such results.

FOR CPN 43
HEARING EXHIBIT - 00000486

GENERAL UNDERLYING ASSUMPTIONS

1. The legal description used in this report is assumed to be correct.

2. No survey of the property has been made by the appraiser and no responsibility is assumed in connection with such matters. Sketches in this report are included only to assist the reader in visualizing the property.

3. No responsibility is assumed for matters of a legal nature affecting title to the property nor is an opinion of title rendered. The title is assumed to be good and merchantable.

4. Information furnished by others is assumed to be true, correct, and reliable. A reasonable effort has been made to verify such information; however, no responsibility for its accuracy is assumed by the appraiser.

5. All mortgages, liens, encumbrances, leases and servitudes have been disregarded unless so specified within the report.

6. The property is appraised as though under responsible ownership and competent management.

7. It is assumed that there are no hidden or unapparent conditions involving the property, subsoil, or structures that would render it more or less valuable. No responsibility is assumed for such conditions or for tests that may be required to discover such factors.

8. It is assumed that there is full compliance with all applicable local, state, and federal environmental regulations and laws unless noncompliance is stated, defined, and considered in the appraisal report.

9. It is assumed that all applicable zoning and use regulations and restrictions have been complied with, unless a non-conformity has been stated, defined, and considered in the appraisal report.

10. It is assumed that all required licenses, consents, or other legislative or administrative authority from any local, state, or national governmental or private entity or organization have been or can be obtained or renewed for any use on which the value estimate contained in this report is based.

11. It is assumed that the utilization of the land and existing or proposed improvements is within the boundaries of the property lines of the property described and there is no encroachment or trespass unless noted within the report.

ECRC 08-(01
HEARING EXHIBIT - 00000487

GENERAL UNDERLYING ASSUMPTIONS (Continued)

12. No consideration is given to oil, gas or mineral rights, which are assumed to be included in the fee simple title, or whether the property is subject to surface entry for the exploration or removal of such materials except as is expressly stated.

13. No consideration is given to the fauna or flora life that may exist on a property and cause a loss in value of use due to their presence.

14. Unless otherwise stated in this report, the existence of hazardous substances, including, but not limited to, asbestos, polychlorinated biphenyls, petroleum leakage, or agricultural chemicals which may be present on the property, or other environmental conditions which were not called to the attention of the appraiser or of which the appraiser did not become aware during the inspection are assumed not to exist. The appraiser has no knowledge of the existence of such materials on or in the property unless otherwise stated. The appraiser, moreover, is not qualified to test such substances or conditions. The presence of these or other hazardous substances or environmental conditions may affect the value of the property. However, the value estimated herein is predicated on the assumption that no such conditions exist on or in the property or in such proximity thereto that they would cause a loss in value. No responsibility is assumed for any such conditions nor for any expertise or engineering knowledge required to discover them.

15. A limited soil study or information relating to geologic conditions covering the subject property was made available to the appraisers. It is assumed that the portions of the appraised property that are considered developable uplands contain soil conditions capable of supporting residential development without extraordinary foundation or soil remedial expenses.

16. We have assumed there are no significant environmental issues regarding wetlands and the existing drainage is/could be made adequate to accommodate typical industrial/business park development.

EMINENT DOMAIN HEARING EXHIBIT - 00000488

EXTRAORDINARY ASSUMPTIONS

Extraordinary Assumption is defined as follows:

> An assumption, directly related to a specific assignment, which, if found to be false, could alter the appraiser's opinions or conclusions. Extraordinary assumptions presume as fact otherwise uncertain information about physical, legal, or economic characteristics of the subject property; or about conditions external to the property, such as market conditions or trends; or about the integrity of data used in an analysis. [1]

This appraisal is based on the following Extraordinary Assumptions.

1. No formal survey of the property is available and the property's size of 46.0 gross acres is based on calculations made by NASA personnel at the Kennedy Space Center. We have assumed this size accurately reflects the land being considered by our client and have relied on this size in our valuation.

2. NASA is proposing a long-term ground lease of the property to FP&L, but limitations on the use of the land (type of permitted uses) have not been reduced to writing and available for formal consideration in our appraisal. NASA, the Kennedy Space Center and the Fish & Wildlife Service will dictate the uses deemed appropriate as no local zoning and land use regulations apply within the federal government ownership. We have assumed that the property will have a mixture of comparative permitted uses as those found in Brevard County's three primary industrial zoning classifications (PBP, PIP and I-U). If the uses under NASA are restricted or materially less than those uses permitted in the latter three Brevard County zoning classifications, our estimate of value would require reconsideration. (For expanded discussion on this assumption, see Land Use Plan/Zoning and Highest and Best Use sections in the report.)

1 USPAP 2006 Edition, The Appraisal Foundation.

EGRC 08/06 HEARING EXHIBIT - 00000489

GENERAL LIMITING CONDITIONS

1. With reference to the property, the appraiser will not be required to give testimony or to appear in court because of having made this appraisal, unless arrangements have been previously made.

2. Possession of this report, or a copy thereof, does not carry with it the right to publication. It may not be used for any purpose by any person other than the party to whom it is addressed without the written consent of the firm and, in any event, only with proper written qualifications and only in its entirety.

3. The distribution of the total valuation in this report between land and improvements applies only under the reported highest and best use of the property. The value for this property and/or allocations of values for land and improvements must not be used in conjunction with any other appraisal or property and are invalid, if so used.

4. Real estate investments have an inherent element of risk which varies with property classification and other factors which affect value. Performance and success are dependent upon many variables such as responsible ownership, competent management, the state of the economy, federal, state and local tax laws, market liquidity, and other factors of a local, national or world character which influence the market. Consequently, this value estimate does not absolutely fix or set the price at which the property will sell. It merely states a probable selling price under the conditions set forth in the definition of market value. The projections set forth herein are based on anticipated or stated conditions, and as such represent the judgment of the appraisers, and must be considered in this context.

5. Neither all nor any part of the contents of this report, or copy thereof, shall be conveyed to the public through advertising, public relations, news, sales or any other media without written consent and approval of the appraiser. Nor shall the appraiser, firm, or professional organization of which the appraiser is a member be identified without written consent of the appraiser.

6. No environmental impact studies were requested or made in conjunction with this analysis, and the appraiser hereby reserves the right to alter, amend, revise or rescind any of the value opinions based upon any subsequent environmental impact studies, research or investigation.

7. Easements are most likely described in Title Policies for property. A current survey and/or title search is recommended to determine the existence of easements, encroachments, restrictions, and reservations.

EDRC 08-697 HEARING EXHIBIT - 00000490

GENERAL LIMITING CONDITIONS (Continued)

Easements may or may not be recorded or may exist by customary use or other legal means. The appraisers have not, and are not qualified to, search legal records as to other easements. Because rights of others can have influence on real estate values, the values reported herein are predicated on a qualified legal opinion that the assumption above regarding easements and the rights of others is representative of actual conditions.

Acceptance of and/or use of this report constitutes acceptance of the foregoing General Underlying Assumptions, Extraordinary Assumptions, and General Limiting Conditions. Appraiser's liability extends only to the stated client, not subsequent parties or users, and limited to the amount of fee received by appraisers.

EXHIBIT - 00000491

GENERAL INFORMATION

OUR CLIENT

S.F. Holden, Inc. was engaged by Mr. Tim Corson with FP&L Corporate Real Estate to prepare an appraisal of the herein described property.

INTENDED USE AND USER OF THE APPRAISAL

The intended user of this appraisal is our client for the purpose of establishing the market value of the property for possible long-term lease.

PURPOSE, DATE AND INTEREST OF THE APPRAISAL

The purpose of our appraisal is to estimate the market value of the fee simple estate of the property as of January 17, 2008, the last date of formal inspection.

SCOPE OF WORK

An appraiser's *Scope of Work* involves designing a plan of investigation and analysis that leads to a valuation that answers the client's reason for and intended use of the resulting appraisal. In order to estimate the market value of the appraised property, we:

- analyzed the physical, legal and economic characteristics of the property and analyzed its supporting neighborhood,
- estimated the property's highest and best use,
- contacted NASA officials regarding the physical and legal factors impacting the property as well as various people in the public and private sector involved in real estate transactions, including real estate brokers, other real estate appraisers and buyers and sellers knowledgeable regarding local conditions and real estate transactions, and
- since the property is undeveloped land we have utilized only the sales comparison approach. This approach involved researching comparable unencumbered land sales in the relevant market area and applying appropriate adjustments.

EXHIBIT - 00000493

DEFINITIONS

Market Value is defined as:

Market value is the major focus of most real property appraisal assignments. Both economic and legal definitions of market value have been developed and refined. A current economic definition agreed upon by agencies that regulate federal financial institutions in the United States of America is:

> The most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller each acting prudently and knowledgeably, and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby:
>
> 1. Buyer and seller are typically motivated;
> 2. Both parties are well informed or well advised, and acting in what they consider their own best interests;
> 3. A reasonable time is allowed for exposure in the open market;
> 4. Payment is made in terms of cash in United States dollars or in terms of financial arrangements comparable thereto; and
> 5. The price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions granted by anyone associated with the sale. [2]

Fee Simple Estate is defined as:

> Absolute ownership unencumbered by any other interest or estate, subject only to the limitations imposed by the governmental powers of taxation, eminent domain, police power, and escheat. [3]

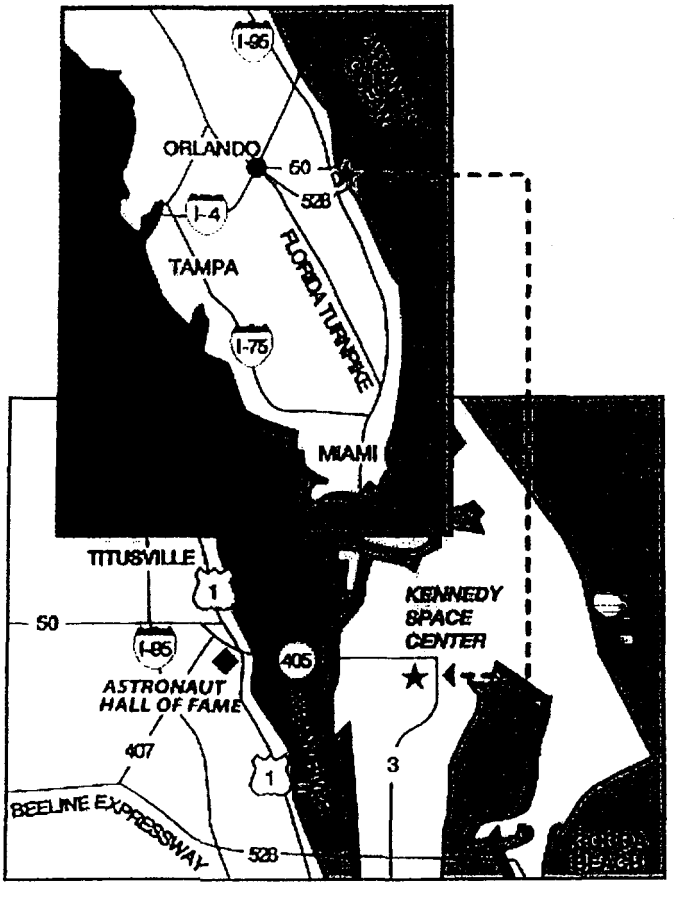
EDR HEARING EXHIBIT - 00000494

PRESENTATION OF DATA

EQR-00-TN2 HEARING EXHIBIT - 00000495

NEIGHBORHOOD ANALYSIS

The appraised property is part of the U.S. National Aeronautical and Space Administration's (NASA) Kennedy Space Center, which encompasses 140,000 acres of federally-owned land in northeast Brevard County, Florida. The space center encompasses the whole of northern Merrit Island north to the Brevard-Volusia county line as well as the associated east coast line of Florida. The Kennedy Space Center is the principal home of the U.S. space shuttle program and principal site of the United State's civilian and military space launch facilities. The popular visitor center outside of the space center's secured environment is Florida's fourth highest revenue generating tourist attraction.



The 140,000 acres of the space center extend west from the barrier island along the Atlantic Ocean, across the Banana River bay to the west side of northern Merritt Island. The City of Titusville is northwest of the space center across the wide Indian River bay that separates Merritt Island from Florida's mainland. The City of Cocoa on the mainland is southwest of the Kennedy Space Center.

HEARING EXHIBIT - 00000496

NEIGHBORHOOD ANALYSIS (Continued)

Two principal access routes are available to the Kennedy Space Center. The western route is via several highways that converge south of Titusville for connection to S.R. 405 across the Indian River onto Merritt Island. These routes are either directly from Interstate 95 or the northeast extension of S.R. 528 east from Orlando. The Astronaut Hall of Fame attraction is located along S.R. 405 on the west side of the Indian River while the space center's large visitor and tourist attraction center is along S.R. 405 on Merritt Island west of a gated entry into the secured portion of the space center.

The second access route is also via S.R. 528 as it continues east from its connection with Interstate 95 to the City of Cocoa on its way across the middle of Merritt Island to the coastal community of Cocoa Beach, Port of Canaveral and Canaveral Air Force Base on Florida's coast. Courtenay Parkway (S.R. 3) is the principal north-south traffic arterial through the whole of Merritt Island and connects to S.R. 528 approximately nine miles south of the southern Merrit Island gate entrance into the space center.

LEGAL DESCRIPTION OF THE PROPERTY

No legal description has been provided. The property is part of a 480-acre parcel of land located in Section 13, Township 23 South, Range 36 East, of Brevard County, Florida, identified by the Brevard County Property Appraiser under folio number 23-36-13-00-00001.0-0000.00. Although vacant land, the address assigned by the Brevard County Address Assignment Office is 7110 North Courtenay Parkway, Merritt Island, Florida 32953.

OWNERSHIP HISTORY

The appraised property is part of the 140,000-acre Kennedy Space Center in northeast Brevard County, Florida, the entire land holdings being owned by the U.S. Federal Government. The associated land has been under government ownership for more than 30 years.

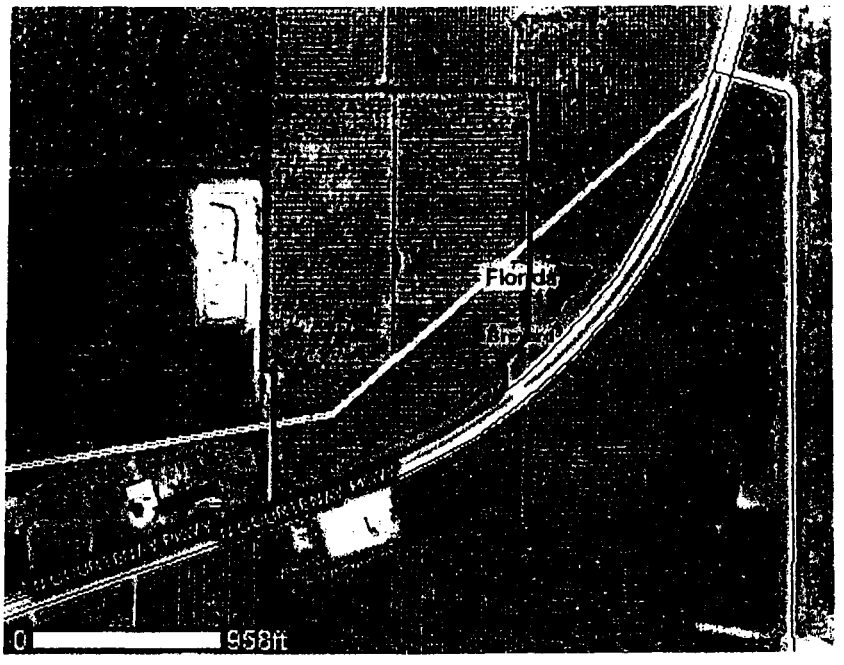
DESCRIPTION OF THE PROPERTY

The appraised property is located along the northwest side of North Courtenay Parkway (SR 3), adjacent to the boundary of the Kennedy Space Center campus on Merrit Island. Courtenay Parkway is a four-lane divided highway with wide center grassed median at the property location.

The property is rectangular-shaped and represented to consist of 46.0 gross acres. It is currently improved with an old citrus grove bounded on the east and north sides by drainage ditches and agricultural-oriented field road used for machinery access during citrus harvests.

EXHIBIT - 00000497

DESCRIPTION OF THE PROPERTY (Continued)



The property is generally flat and level and at the relative finished grade of Courtenay Parkway. According to the USDA Natural Resource Center, the property's soil mix is summarized in the following table:[4]

Soil Classification

Unit Symbol	Unit Name	Acres	%
16	Copeland-Bradenton-Wabasso complex, limestone substratum	39.7	80.2%
8	Bradenton fine sand, limestone substratum	9.8	19.8%
Totals		49.5	100.0%

USDA, Natural Resource Center, Web Soil Survey

According to FEMA community panel 125092-0285E, dated April 3, 1989, the property is in an "X", or undetermined, flood zone.

4 The difference between the 46.0 acre size represented by the client and the 49.5 acre size estimated by the USDA Soil Survey results from the USDA web-based system requiring an "area of interest" to be drawn using the provided sketch function along the approximate boundaries of a property. The result may or may not match the actual boundary and area under appraisal. Therefore, this table is shown for informational purposes only as to the gernal division of the property's soil classifications.

DESCRIPTION OF THE PROPERTY (Continued)

Public electricity is developed to the property and telephone service is available but not developed to the property. While municipal water is located along S.R. 3 at the property's location, the nearest municipal sewer line is approximately 1+ mile north on Courtenay Parkway, inside the secured environment of the Kennedy Space Center.

ABUTTING OR IMMEDIATE AREA USES

The property is bordered on its west side by an Air Liquide industrial plant that fronts the northerly side of Courtenay Parkway. This is a French company headquartered in Paris and second on the world market in its field. The company supplies industrial gases and services to various industries including medical, chemical and electronic manufacturers. It operates in over 70 countries with major sites in Japan as well as Houston, Texas and Newark, Delaware in the U.S. Its presence adjacent to the Kennedy Space Center is for supplying various gases used in NASA's space program. This property is located on land outside of the federally-owned space center campus.

The north and east sides of the property consist of additional citrus groves under license from the U.S. Fish and Wildlife Service. South across Courtenay Parkway from the southwest corner is a small one-story NASA reception center. This center is used for issuing press credentials during space shuttle launches, provides limited office space for contractors working for NASA, a conference room for meetings outside the gated environment of the space center.

For a distance of approximately one mile north of the property to the Courtenay Parkway security entrance into the gated environment of the space center, the land is either undeveloped in nature vegetation or old citrus groves. For approximately two miles west along S.R. 3 from the property the land is predominantly older citrus groves interi..ixed with sparse single family homes on rural acrea_es.

FLORA, FAUNA AND WILDLIFE ISSUES

No report by a biologist or environmental scientist is available and our valuation has assumed that the property is not inhabited by endangered or protected wildlife. Considering that the property is developed as a grove, environmental issues will likely be minimal.

ECRC-08-706
HEARING EXHIBIT - 00000499

EASEMENTS AND ENCROACHMENTS

An apparent electric power line easement, the width of which was not available, runs south-to-north along the west inside line of the property. This corridor serves the Air Liquide plant to the immediate west of the property.

We did not notice and are not aware of any apparent encroachment into the property from adjacent land uses.

PROPERTY ASSESSMENT AND TAXES

In Florida, all property is assessed on a 100% fee simple basis. The subject property is identified as being part of a 480-acre tax parcel under tax folio number 23-36-13-00-00001.0-0000.00. This 480-acre and inverted "L" shaped parcel includes land on both sides of Courtenay Parkwark comprised of native lands, wetlands and licensed citrus groves as well as the previously described small reception center. For calendar 2007 this parcel was assessed at a "just value" of $7,200,000, or $15,000 per acre.

Since the U.S. Government is this tax parcel's owner and not liable for the payment of property taxes, the property appraiser's estimated "just value", as derived by a computer-assisted mass appraisal program, does not bear reference to the property's true market value. As a consequence, no correlation between the county property appraisers "just value" and our estimate of the property's fee simple market value is anticipated.

LAND USE PLAN AND ZONING LIMITATIONS

In the State of Florida, county and municipal land use plans versus zoning limit the level of intensity to which a property may be developed. Unless a land use classification is changed or amended, a property's zoning classification cannot exceed the uses permitted by the adopted land use plan. Conversely, because the 140,000 acre Kennedy Space Center is owned by the federal government, the broad land use in the space center is subject only to those limitations imposed by NASA, the U.S. Fish & Wildlife Service and related federal agencies having jurisdiction over the space center's land. No municipal or county land use or zoning regulations apply within the boundary of the Kennedy Space Center.

According to discussions with Jim Ball, NASA's representative regarding the appraised property, NASA has been seeking to maximize the use of approximately 320 acres presently in marginally productive citrus groves (operated under license from the U.S. Fish & Wildlife Service) west of S.R. 3 north of the subject property. To be known as Exploration Park, the intent is to lease for a base period of 50 years 320 acres to a master developer who would develop all of the necessary horizontal land infrastructure (internal roads, utility system, etc.) then develop vertical buildings leased to businesses and vendors supporting the activities of the space center as its transitions in 2009 and

E HEARING EXHIBIT - 00000500

LAND USE PLAN AND ZONING LIMITATIONS (Continued)

2010 from its current shuttle oriented space program to a more diversified spaceport for the NASA Orion Crew Exploration Vehicle coupled with both military and increased commercial launch activities to the International Space Station.

According to the RFP prepared in late 2006 and provided for our review, upwards of 2 million SqFt of buildings are envisioned. At present, this proposal is on hold.

Since there are no sales of similar vacant properties within the NASA ownership, it is necessary to use sales of vacant land sold outside of the Kennedy Space Center as the basis of market value. We have reviewed Brevard County's industrial zoning categories as reference for the potential use of the subject property. Under the county's 1988 Comprehensive Plan there are four standard industrial zoning categories: Planned Business Park (PBP), Planned Industrial Park (PIP), Light Industrial (IU), and Heavy Industrial (IU-1). Of these four, the first three are applicable for consideration and briefly described below.

Planned Business Park (PBP) zoning classification is intended to encourage compatible development within areas designated community commercial and planned industrial on the future land use map of the county comprehensive plan.

- The minimum park size is five acres with a minimum divided lot size of one-half acre.
- Permitted uses are all those uses in the BU-1 and BU-2 zoning categories and hotels and motels, limited to 30 units per acre.
- Permitted accessory uses primarily intended for employees and visitors and located entirely within a principle building are branch banks, credit unions and post offices; cafeterias or snack bars; exhibition halls specifically related to the principal use of the property, and retail sales limited to the sale of sundries, stationery, office supplies and similar goods and the sale of products and materials manufactured on the premises (which shall not exceed five percent of the gross floor area).
- Permitted uses with conditions are a single family residence.
- Conditional uses include marinas, commercial or recreational, and towers and antennas.
- Depending on the abutting land use (zoning), the maximum achievable building height is 45 feet.

Planned Industrial Park (PIP) zoning is intended for locations which are served by major roads but are not feasible for light or heavy industrial developments because of proximity to residential uses. The regulations for this district are intended to encourage development compatible with surrounding or abutting residential districts, with suitable open spaces, landscaping and parking areas. Manufacturing activities that can be carried on in a relatively unobtrusive manner, and certain facilities that are necessary to serve the employees of the district, are permitted.

EGRE-08-700
HEARING EXHIBIT - 00000501

LAND USE PLAN AND ZONING LIMITATIONS (Continued)

- The minimum land size is three acres with a minimum divided lot size of one acre.
- Permitted uses are all those uses in the BU-1 and BU-2 zoning categories and motels.
- Permitted uses with conditions are a boatbuilding facility, recovered materials processing facility and single family residence.
- Customary accessory uses are permitted, including operations required to maintain or support any use permitted in this zone on the same lot as the permitted use, such as maintenance shops, and machine shops, provided these take place within enclosed buildings. In addition, uses permitted as a convenience to the occupants thereof and their customers and employees are convention or exhibit hall, dining and recreational facilities.
- Conditional uses include commercial/industrial marina and towers and antennas.
- Depending on the abutting land use (zoning), the maximum achievable building height is 45 feet.

Light Industrial (I-U) zoning is intended for areas in which the principal use of land is for manufacturing, assembling and fabrication, and for warehousing. These uses do not depend primarily on frequent personal visits of customers or clients, but usually require good accessibility to major rail, air or street transportation routes.

- The minimum lot size is 20,000 SqFt.
- Permitted uses are all those uses in the BU-1 and BU-2 zoning categories, except, single family residence.
- Permitted uses with conditions are assisted living facilities; commercial entertainment and amusement enterprises (small scale); power substations and transmission facilities; recovered materials processing facility.
- Customary accessory uses are permitted, including operations required to maintain or support any use permitted in this zone on the same lot as the permitted use, such as maintenance shops, and machine shops, provided these take place within enclosed buildings. In addition, uses permitted as a convenience to the occupants thereof and their customers and employees are convention or exhibit hall, laundry, dining and recreational facilities. Also roadside stands used for the sale of agricultural produce and security trailers.
- Condition uses are alcoholic beverages for on-premises consumption; commercial entertainment and amusement enterprises (large scale); commercial/recreational and commercial/industrial marina; composting and/or mulching facility; flea markets (recreational vehicles); motocross; towers and antennas; truss manufacturing plant.
- Depending on the abutting land use (zoning), the maximum achievable building height is 60 feet.

EXHIBIT - 00000502

LAND USE PLAN AND ZONING LIMITATIONS (Continued)

The permitted uses in the "BU-1" and "BU-2" zoning categories, which form the basic uses permitted in all three of the described industrial categories, are essentially retail/commercial uses associated with freestanding retail businesses and shopping centers, office buildings, automotive centers, gasoline service stations, etc. One of the "permitted uses with conditions" in both the BU-1 and BU-2 zoning categories is "substations, and transmission facilities."

ECUBE CORP
HEARING EXHIBIT - 00000503

ANALYSIS AND CONCLUSIONS

HIGHEST AND BEST USE

Highest and best use may be defined as:

> "The reasonably probable and legal use of vacant land or an improved property, which is physically possible, appropriately supported, financially feasible, and that results in the highest value." [5]

The four criteria the highest and best use must meet are legally permissible, physically possible, financially feasible, and maximally productive.

1. "Legally Permissible: In all cases the appraiser must determine which uses are legally permissible. Private restrictions, zoning, building codes, historic district controls, and environmental regulations must be investigated because they may preclude many potential uses.

2. Physically Possible: The size, shape, area, terrain, and accessibility of a parcel of land and the risk of natural disasters such as floods or earthquakes affect the uses for which it can be developed.

3. Financially Feasible: In determining which uses are legally permissible and physically possible, an appraiser eliminates some uses from consideration. Then the uses that meet the first two criteria are analyzed further. If the uses are income-producing, the analysis will study which are likely to produce an income, or return, equal to or greater than the amount needed to satisfy operating expenses, financial obligations, and capital amortization.

4. Maximally Productive: Of the financially feasible uses, the use that produces the highest residual land value consistent with the rate of return warranted by the market for that use is the highest and best use." [6]

ECR 03-07 HEARING EXHIBIT - 00000505

HIGHEST AND BEST USE (Continued)

Analysis and Conclusion

NASA does not have the right to sell land to non-government interests within the boundary of the Kennedy Space Center, but may lease the land on a short or long-term basis to a private user. Accordingly, NASA has offered the appraised property to our client under a proposed long-term lease. After examining those factors explicit in the determination of a property's highest and best use, it is our judgment that the property's highest and best use is for some form of industrial-related development compatible with and beneficial to NASA and the Kennedy Space Center.

Conceptually, owners of real property who hold the 100% fee simple interest in property are entitled to fully enjoy all the uses that property may be developed to unless limited by government's imposition of land use regulations and zoning ordinances. However, depending on an individual property's particular characteristics (e.g., location, access, market conditions at a given point in time, etc.) not all of the rights of use permitted by zoning may have equal value or be appropriate for development.

As of the date of our valuation, the uses that NASA will allow have not been put into a written document and no ready comparison can be made to the rights of use embodied by zoning associated with the sales used in our valuation. We are informed that the space center's visitor center north of the subject ranks as the fourth highest tourist revenue center in Florida, exceeded only by Disney World, Sea World and the like in Orlando. NASA's future plans for the visitor center include developing a hotel and such use will not be permitted at the subject property. In addition, uses that would compete with or be incompatible to the proposed 320-acre Exploration Park will not be permitted. However, what the potential competing and incompatible uses are have not been determined as the full extent of the proposed Exploration Park has not been determined.

The above discussion is intended to illustrate that although our client intends to use the subject property for a specific purpose, market value requires consideration of all of the uses to which property may be used. If NASA limits the permitted uses that the subject may be used in addition to that which the client intends to use the property for, consideration of a discount from our estimate of the land's market value would be appropriate.

HEARING EXHIBIT - 00000506

THE APPRAISAL PROCESS

The appraisal process is an orderly program in which data used to estimate the value of a property is acquired, classified, analyzed, and presented. This is accomplished through the use of one or more of the three appraisal approaches; namely the cost, sales comparison and income approaches.

The basis of the three approaches to value is the principle of substitution, which affirms that a prudent purchaser has three alternatives available; either to buy a vacant parcel of land and develop a similar property (cost approach), acquire an equally desirable existing property offering comparable utility (sales comparison approach), or acquire a substitute income stream of comparable quality, quantity, and durability (income approach). Since the property being appraised is undeveloped land, the sales comparison approach is the only applicable method of valuation and has been utilized in our valuation.

Following the general decline of Florida's residential real estate market by early 2006, the commercial and industrial market appears to have materially declined in activity by early 2007. During the course of this appraisal, we had discussions with numerous participants in Brevard County's industrial real estate market, including with buyers and sellers, real estate brokers, county property appraiser personnel and other independent appraisers. While numerous transactions were considered, many were not appropriate for comparison due to unrealistic size differences from the subject property, sold when the market was materially superior in sale conditions, had significantly more intense zoning and use capabilities, were physically more developed than the subject property, or were materially distance from the nearest population center.

Consequently, the data selected for comparison is judged the most appropriate, geographically closest and most indicative of past market activity. The selected data also includes a current listing of industrially-zoned land of relatively comparable size located in the S.R. 3 corridor on Merritt Island south of the subject property.

Except for the listing, all of the closed sales utilized sold in the open and public market as arms-length transactions and did not involve seller financing requiring cash-equivalent considerations. The sales also occurred since the beginning of calendar 2006, but each requires consideration of a possible adjustment to reflect current slower market conditions.

The transaction data was further analyzed and compared in regards to general location, size and shape, access, highway exposure, zoning and availability of utility systems. The relative comparability of each transaction characteristic was compared using a qualitative analysis, which ascribes a quality factor of similar, superior, or inferior for each sale characteristic. If the characteristic of the sale is similar to that of the appraised

ECRC 08-714
HEARING EXHIBIT - 00000507

THE APPRAISAL PROCESS (Continued)

property, no consideration is given and is considered a neutral adjustment. An inferior characteristic would require a positive (upward) adjustment to be made to the sale to make it similar to the subject if dollar or percentage adjustments were used. Conversely, a superior characteristic would require a negative (downward) consideration.

LAND VALUE ANALYSIS (Continued)

Discussion of Sales (Continued)

Sale 1 is the January 2006 purchase of 15.93 acres for $1,792,200 ($112,505 per acre) at 3155 Grissom Parkway, in the City of Cocoa, FL. The property is part of a large M-2, medium industrial, zoned area of northern Cocoa, in the northwest quadrant of S.R. 528 and U.S. Highway One. The area is dominated by older industrial activities and warehouses and is the location of a large Rinker Materials cement batch-plant complex, the dominant supplier of cement and concrete block product in Florida. Grissom Parkway parallels S.R. 528 and is the main east-west arterial through the industrial neighborhood. The sale property is located behind small industrial users fronting the north side of the parkway and is accessed by an extended driveway. The land was purchased for and is now developed with a large metal building for Federal Express regional ground delivery operations.

We rate this land sale superior in market conditions, which would require a downward adjustment to the market conditions evident as of the date of the appraised property's valuation. Other factors such as zoning, size and proximity to utility systems (water and sewer) at the time of sale are rated superior. On the other hand, the sale would be rated inferior in highway exposure to the subject property. Overall this sale is rated very superior at $112,505 per acre as an indication of value per acre for the appraised property.

Sale 2 is the May 2007 sale of an aggregate 9.68 acres for $1,200,300 ($123,998 per acre) located along the south side of Grissom Parkway, one-half block west of Sale 1. The land's rear south side backs to the north side of S.R. 528, a limited access highway. This transaction consisted of five adjoining lots all zoned M-2 by the City of Cocoa and purchased individually by the buyer using three different entities from a single seller. The individual tracts range in size from 1.09 to 2.94 acres and the property was purchased with the intent to develop individual buildings. Since purchase, the buyer has filled the land to above the grade of Grissom Parkway in anticipation of further horizontal land infrastructure.

It is recognized that this sale was comprised of five separate lots, each being less than three acres in size, increasing the property future's marketability. That is, the five associated tax parcels involved will allow the buyer to sell each lot individually without further subdivision of the land or additional platting.

We rate this sale similar in market conditions to those evident as of the date of valuation. Other factors such as zoning, size and proximity to utility systems (water and sewer) at sale are rated superior. On the other hand, the sale would be rated superior

EDR-07 HEARING EXHIBIT - 00000510

LAND VALUE ANALYSIS (Continued)

Discussion of Sales (Continued)

because of its additional exposure to S.R. 528 compared to the subject property. Overall this sale is rated very superior at $123,998 per acre as an indication of value per acre for the appraised property.

Current Listing 1 is a 37.66-acre tract offered for sale at $3,750,000 ($99,575 per acre) that has been on the market for more than six months. The property is located 1/2 block east of Courtenay Parkway (SR 3) two blocks north of the northeast corner of the intersection of SR 3 and S.R. 528 on Merritt Island. Comprised of an old citrus grove, the property has 390-feet along the north side of a barge canal that provides boating access between the Indian River along the west side of Merritt Island and the Banana River along the east side of Merritt Island. According to the broker frontage along the barge canal carries no premium due to the U.S. Corps of Engineer's restriction on canal openings into adjacent private property and the canal is of no contribution to industrial users. This listed property is bounded on the north by two-lane Smith Road and on the west by cleared and vacant commercially zoned land fronting Courtenay Parkway.

The property is zoned PIP, Planned Industrial Park, by Brevard County and is being offered as industrially-zoned land. All utilities are available but will have to be extended ½-block from S.R. 3. According to the listing agent, who is well known in Melbourne County and also is a well-qualified state-certified general appraiser, no offers have been made within the last six months. He also anticipates a sale of the property will likely occur at a price substantially lower than the current listed price.

We rate this current listing similar in market conditions to those evident as of the date of valuation, but superior in transaction status being an offer to sell versus a closed market sale. Other factors such as zoning, size and proximity to utility systems (water and sewer) are rated as similar. On the other hand, the listing is rated inferior in highway exposure compared to the subject property, although this is not a significant factor. Overall this listing is rated very superior at $99,575 per acre as an indication of value per acre for the appraised property.

Conclusion

After analysis the data results in the following array of indicated value:

Sale 2 is very superior at	$123,998 per acre
Sale 1 is very superior at	$112,505 per acre
Current Listing 1 is very superior at	$99,575 per acre

SUBJECT

ECR-06-INS HEARING EXHIBIT - 00000511

LAND VALUE ANALYSIS (Continued)

Conclusion (Continued)

As previously mentioned, during the course of the appraisal discussions were had with numerous participants in Brevard County's industrial real estate market. The price indications from the data utilized do not adequately reflect current market conditions for a 46-acre undeveloped parcel of land presumed to have industrial development potential just inside the large as well as undeveloped and unsecured area of the Kennedy Space Center. All of the data rankings establish superior prices and indicate a conclusion must be below the lowest indication, which is Listing 1. Lengthy discussions with the listing broker were conducted in order to gauge the market. In the final analysis, it is our judgment that the fee simple value of the appraised property is between $75,000 and $85,000 per acre, with the most reasonable estimate of a point value at the low end of this range at $75,000 per acre. Therefore,

46.0 acres x $75,000 per acre =	$3,450,000

LUP/Zoning	Industrial LUP with M-2 zoning allowing heavy industrial uses, by the City of Cocoa, FL
Land Area	9.68 acres
Shape/Topography	Rectangular shaped tract fronting the south side of Grissom Parkway, with the rear south side backing to the north side of S.R. 528, a limited access highway
Utilities	All municipal utilities and services were available at sale including city water and sanitary sewer
Improvements at Sale	A few small older buildings that contributed no value to the property, and which have since been demolished
Sale Price	$1,200,300
Price per Acre	$123,998
Financing	All cash sale to the seller
Comments	This sale consisted of five adjoining tax parcels with individual deeds and prices established for each parcel, aggregating to the total land size and purchase price

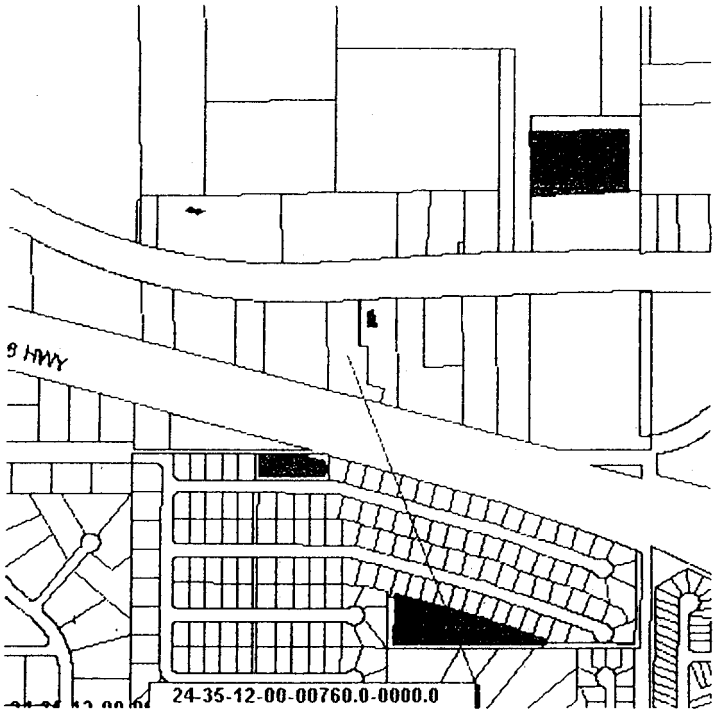
EC HEARING EXHIBIT - 00000517

LAND SALE 2 (Continued)

	shown. The property has since been filled to above the grade of Grissom Parkway and leveled in anticipation of the buyer developing seven 160' x 311' lots for individual buildings.
Verification	Don Blauvelt (S.F. Holden, Inc.) with David Kabboord, the seller (321-783-1234)

HEARING EXHIBIT - 00000518

LAND SALE 2 (Continued)



(eastern parcel of five contiguous parcels of this sale)

HEARING EXHIBIT - 00000519

CURRENT LISTING 1

OR Book/Page	Not Applicable
Date	As of January 24, 2008
Grantor	Pinner Groves, Inc.
Grantee	Not Applicable
Parcel ID No.	24-36-11-00-00500.00-0000.00
Location	½ block east of Courtenay Parkway (S.R. 3) on the south side of Smith Road, Merritt Island, FL
Legal Description	Abridged: Part of Section 11, T-24-S, R-23-E in Brevard County, Florida
LUP/Zoning	PI, Planned Industrial, LUP and PIP, Planned Industrial Park, zoning
Land Area	37.66 acres
Shape/Topography	Rectangular shaped parcel of level land
Utilities Available	All municipal services and utilities are available but must be extended from Courtenay Parkway
Current Improvements	Old citrus grove facilities of no value to the highest and best zoned use of the property
Listed Price	$3,750,000
Listed Price per Acre	$99,575
Financing	Sale requires all cash to the seller
Comments	Property backs to and has 390 feet along the north side of the barge canal that runs just north and parallel to SR 528 providing boat access between the Indian River to the west and the Banana River bay to the east. Due to U.S. Army Corps of Engineers regulations, no canal bank opening into abutting private property is permitted.

EC HEARING EXHIBIT - 00000520

CURRENT LISTING 1 (Continued)

Comments (Continued)	According to the listing agent, no serious offer has been made for purchase of the property in the past six months and the expectation is that a sale will not occur unless a significant reduction is made to the current asking price.
Verification	Don Blauvelt (S.F. Holden, Inc.) with Dennis Basile of Pruitt Real Estate, Inc. (321-427-9560)

1988 Comprehensive Plan
Industrial Zoning Categories

EC HEARING EXHIBIT - 00000523

1988 Comprehensive Plan.
Industrial Zoning Categories. p. 95

(6) Tourist commercial and transient commercial zoning classifications:

a. General tourist commercial zoning classification, TU-1.

b. Transient tourist commercial zoning classification, TU-2.

(7) Industrial zoning classifications:

a. Planned business park zoning classification, PBP.

b. Planned industrial park zoning classification, PIP.

c. Light industrial zoning classification, IU.

d. Heavy industrial zoning classification, IU-1.

(8) Special zoning classifications:

a. Environmental area zoning classification, EA.

b. Government managed land zoning classification, GML.

c. Institutional zoning classification, IN.

(b) *Consistency of zoning classifications with comprehensive plan.* The 1988 county comprehensive plan establishes specific future land use designations, which are depicted on the future land use map within the future land use element. The future land use element also has policies and criteria which delineate how the various designations shall be applied. The zoning classifications depicted on the official zoning map of the county shall be consistent with the future land use map and the policies and criteria relating to the application of future land use designations on the future land use map.

(1) *Future land use designations.*

a. *Residential.* Residential uses include single-family detached, single-family attached, multiple-family, recreational vehicle park and mobile home developments.

1. Residential 30:

A. Maximum, unless otherwise provide herein: 30 units per acre.

B. Merritt Island redevelopment area: Development containing a mixture of uses: 50 units per acre per policy 1.3(B)(2) of the Future Land Use Element.

C. Redevelopment district: 37.5 units per acre per policies 1.3(B)(1) and

1988 Comprehensive Plan,
PBP, PIP & IU Industrial Zoning, pp. 227-238.

(8) *Structural height standards.*

a. Where the property abuts any other land located in the GU, AGR, AU, ARR, REU, RU-1-7, RU-1-9, RU-1-11, RU-1-13, RR-1, EU, EU-1, EU-2, SEU, SR, RVP, TR-1-A, TR-1, TR-2, TR-3, TRC-1, RRMH-1, RRMH-2.5, RRMH-5, EA, PA or GML zoning classification, the maximum height threshold of any structure or building thereon shall be 35 feet.

b. Where the property abuts any other land located in the RA-2-4, RA-2-6, RA-2-8, RA-2-10, RU-2-4, RU-2-6, RU-2-8, RU-2-10, RU-2-12, RP or BU-1-A zoning classification, the maximum height threshold of any structure or building thereon shall be 45 feet.

c. Where the property abuts any other land located in the RU-2-15, RU-2-30, BU-1, BU-2, PBP IU, IU-1, TU-1 or TU-2 zoning classification, the maximum height threshold of any structure or building thereon shall be 60 feet.

d. Where any structure or building exceeds 35 feet in height, all conditions enumerated in section 62-2101.5 as applicable shall be fully satisfied.

e. Structures or buildings may not exceed the maximum height thresholds stated in this subsection unless otherwise permitted by section 62-2101.5.

(9) *Site plan.* A site plan shall be submitted in accordance with article VIII of this chapter.

(10) *Metal buildings.* Metal buildings shall be permitted in this zoning classification subject to the restrictions presented in section 62-2115.

(11) *Maximum floor area ratio.* The floor area ratio shall be governed by section 62-2110.

(Code 1979, § 14-20.13(B); Ord. No. 95-47, §§ 58, 59, 10-19-95; Ord. No. 95-49, §§ 13, 18, 10-19-95; Ord. No. 96-16, §§ 61, 62, 3-28-96; Ord. No. 97-40, § 5, 10-14-97; Ord. No. 98-12, § 12, 2-26-98; Ord. No. 99-07, § 12, 1-28-99; Ord. No. 01-30, § 13, 5-24-01; Ord. No. 2002-42, § 7, 8-27-02; Ord. No. 04-29, § 29, 8-5-04; Ord. No. 2004-52, § 26, 12-4-04; Ord. No. 05-27, § 3, 5-19-05)

* Additional Pc and CUP uses are listed in sections 62-1541, 1542, 1543 and 1544.					

(Ord. No. 2000-07, § 2, 1-25-00; Ord. No. 2000-50, § 5, 10-31-00)

Sec. 62-1541. Planned business park, PBP.

The PBP planned business park zoning classification is intended to encourage compatible development within areas designated community commercial and planned industrial on the future land use map of the county comprehensive plan. The intent of the regulations for this classification is to provide the opportunity for the aggregation of land, prevent piecemeal nonresidential development and protect environmentally and historically significant areas. The SR 405/SR 407 corridor shall apply to property fronting that area of SR 405 running from Barna Avenue to the Indian River Lagoon and that area of SR 407 running from I-95 to SR 405.

(1) *Permitted uses.*

a. Permitted uses are as follows:

All uses permitted in the BU-1 and BU-2 classification.

Hotels and motels, limited to 30 units per acre.

b. Permitted uses with conditions are as follows (see division 5, subdivision II, of this article):

Uses "permitted with conditions" will be controlled by section 62-1540 and performance standards.

Preexisting use.

Single family residence.

(2) *Accessory uses.* The following uses shall be permitted if primarily intended for the use of employees and visitors, as long as they are located entirely within the principal building:

Branch banks, credit unions and post offices.

Cafeterias or snack bars.

Exhibition halls specifically related to the principal use of the property.

Retail sales, limited to the sale of sundries, stationery, office supplies and similar goods and the sale of products and materials manufactured on the premises, which shall not exceed five percent of the gross floor area.

(3) *Conditional uses.* Conditional uses are as follows:

Change of nonconforming agricultural use.

Land alteration (over five acres).

Marinas, commercial or recreational.

Substantial expansion of a preexisting use.

Towers and antennas.

(4) *Lot, site and building requirements.*

a. *Generally.*

1. Minimum park size is five acres.

2. Minimum lot size is one-half acre.

3. Minimum building size is 2,500 square feet.

4. Maximum structural coverage is 50 percent of the lot.

5. Minimum common open space is 20 percent of the site.

b. *SR 405/SR 407 corridor.*

1. Minimum lot size is three acres.

2. Minimum lot width is 300 feet.

3. Minimum lot depth is 400 feet.

4. Minimum building size is 10,000 square feet.

5. Maximum structural coverage is 50 percent of the lot.

6. Minimum common open space is 20 percent of the site.

(5) *Setbacks.*

HEARING EXHIBIT - 00000527

a. *Generally.*

1. The front setback shall be 25 feet from an internal access road or 50 feet from any public right-of-way.

2. The side setback shall be 50 feet, or zero feet where a marginal access road is provided or where a single access is utilized by more than one lot from an internal road and parking facilities are shared.

3. The rear setback shall be 25 feet, or 40 feet if the rear lot line is the site periphery, or zero feet if the rear lot line abuts a railroad right-of-way.

4. On property adjacent to a river or lagoon, a minimum of 30 percent of the river frontage shall be left open as breezeway/visual corridor.

b. *SR 405/SR 407 corridor.*

1. The front setback shall be 100 feet from an internal access road, or 200 feet from SR 405 or SR 407.

2. The side setback shall be 50 feet. A 100-foot side street setback is required where the lot is a corner lot.

3. The rear setback shall be 100 feet.

(6) *Structural height standards.*

a. Where the property abuts any other land located in the GU, AGR, AU, ARR, REU, RU-1-7, RU-1-9, RU-1-11, RU-1-13, RR-1, EU, EU-1, EU-2, SEU, SR, RVP, TR-1-A, TR-1, TR-2, TR-3, TRC-1, RRMH-1, RRMH-2.5, RRMH-5, EA, PA or GML zoning classification, the maximum height threshold of any structure or building thereon shall be 35 feet.

b. Where the property abuts any other land located in the RA-2-4, RA-2-6, RA-2-8, RA-2-10, RU-2-4, RU-2-6, RU-2-8, RU-2-10, RU-2-12, RU-2-15, RU-2-30, RP, BU-1-A, BU-1, BU-2, TU-1, TU-2, PBP, PIP, IU or IU-1 zoning classification, the maximum height threshold of any structure or building thereon shall be 45 feet.

c. Where any structure or building exceeds 35 feet in height, all conditions enumerated in section 62-2101.5 as applicable shall be fully satisfied.

d. Structures or buildings may not exceed the maximum height thresholds stated in this subsection unless otherwise permitted by section 62-2101.5.

(7) *Parking and loading.*

a. Loading facilities and truck parking. Loading docks are prohibited on an interior street frontage. They shall be located to the rear of the front building line, paved, and have adequate drainage. Parking for trucks and other commercial vehicles and heavy equipment shall be located at the rear of all principal structures. No shipping or receiving shall be permitted within 75 feet of residentially zoned property.

(8) *Lighting and utilities.*

a. Shaded light sources shall be used to illuminate signs, facades, buildings, and parking and loading areas, shall be arranged to eliminate glare onto roadways and streets, and shall be directed away from properties lying outside the district.

b. Shaded light sources are lighting elements shielded with an opaque shade to direct the light.

c. No neon lights, intermittent lights or flashing lights shall be allowed.

(9) *Metal buildings.* Metal buildings shall be permitted subject to the restrictions of section 62-2115.

(10) *Maximum floor area ratio.* The floor area ratio shall be governed by section 62-2110.

(Code 1979, § 14-20.14(A); Ord. No. 95-47, §§ 60, 61, 10-19-95; Ord. No. 95-49, § 18, 10-19-95; Ord. No. 96-16, §§ 63, 64, 3-28-96; Ord. No. 97-48, § 1, 12-9-97; Ord. No. 98-12, § 13, 2-26-98; Ord. No. 99-07, § 12, 1-28-99; Ord. No. 2000-07, § 3, 1-25-00; Ord. No. 01-30, § 14, 5-24-01; Ord. No. 2002-01, § 6, 1-8-02; Ord. No. 2002-42, § 8, 8-27-02; Ord. No. 04-43, § 1, 10-19-04; Ord. No. 2004-52, § 27, 12-4-04)

State Law References: Planned unit developments encouraged, F.S. § 163.3202(3).

Sec. 62-1542. Planned industrial park, PIP.

The PIP planned industrial park zoning classification is intended for locations which are served by major roads but are not feasible for light or heavy industrial developments because of proximity to residential uses. The regulations for this district are intended to encourage development compatible with surrounding or abutting residential districts, with suitable open spaces, landscaping and parking areas. Consequently, manufacturing activities that can be carried on in a relatively unobtrusive manner, and certain facilities that are necessary to serve the employees of the district, are permitted. All property in this zoning classification shall have a structure located on the property with a minimum of 300 square feet prior to utilizing the property for any of the uses permitted in this section.

(1) *Permitted uses.*

a. The following uses are permitted providing they are in compliance with the performance standards set forth in division 6, subdivision III, of this article and providing they take place within substantial buildings completely enclosed with walls and a roof.

All uses permitted in the BU-1 and BU-2 classification.

Motels.

b. Permitted uses with conditions are as follows (see division 5, subdivision II, of this article):

Uses "permitted with conditions" will be controlled by section 62-1540 and performance standards.

Boatbuilding facility.

Preexisting use.

Recovered materials processing facility.

Single family residence.

(2) *Accessory uses.*

a. Customary accessory uses are permitted, including operations required to maintain or support any use permitted in this zone on the same lot as the permitted use, such as maintenance shops, and machine shops, provided these take place within enclosed buildings.

b. The following uses are permitted as a convenience to the occupants thereof and their customers and employees:

Convention or exhibit hall.

Dining facilities.

Recreational facilities.

(3) *Conditional uses.* Conditional uses are as follows:

Change of nonconforming agricultural use.

Commercial/industrial marina.

Land alteration (over five acres).

Substantial expansion of a preexisting use.

Towers and antennas.

(4) *Minimum size and lot size.* The minimum lot size shall be one acre, having a minimum width of 150 feet and a minimum depth of 200 feet. The minimum size of a planned industrial site as designated on the future land use map shall be three acres.

(5) *Setbacks.*

a. *Front yard.* All buildings shall be set back from all street right-of-way lines at least 50 feet.

b. *Side yard.* No building or wall shall be located closer than 50 feet to a side yard lot line.

c. *Rear yard.* No structures or truck parking and loading shall be located closer than 25 feet to the rear lot line. No rear yard is required where the lot abuts on an existing or proposed railroad right-of-way or spur.

(6) *Maximum lot coverage.* Structural coverage, including storage areas, shall not exceed 50 percent of the area of the lot.

(7) *Structural height standards.*

a. Where the property abuts any other land located in the GU, AGR, AU, ARR, REU, RU-1-7, RU-1-9, RU-1-11, RU-1-13, RR-1, EU, EU-1, EU-2, SEU, SR, RVP, TR-1-A, TR-1, TR-2, TR-3, TRC-1, RRMH-1, RRMH-2.5, RRMH-5, EA, PA or GML zoning classification, the maximum height threshold of any structure or building thereon shall be 35 feet.

b. Where the property abuts any other land located in the RA-2-4, RA-2-6, RA-2-8, RA-2-10, RU-2-4, RU-2-6, RU-2-8, RU-2-10, RU-2-12, RU-2-15, RU-2-30, RP, BU-1-A, BU-1, BU-2, PBP, PIP, IU, IU-1, TU-1 or TU-2 zoning classification, the maximum height threshold of any structure or building thereon shall be 45 feet.

c. Where any structure or building exceeds 35 feet in height, all conditions enumerated in section 62-2101.5 as applicable shall be fully satisfied.

d. Structures or buildings may not exceed the maximum height thresholds stated in this subsection unless otherwise permitted by section 62-2101.5.

(8) *Other requirements.*

a. *Loading facilities and truck parking.*

1. Loading docks are prohibited on an interior street frontage. They shall be located to the rear of the front building line of all principal structures, paved, and have adequate drainage.

2. Parking for trucks and other commercial vehicles and heavy equipment shall be located at the rear of all principal structures.

3. No shipping or receiving shall be permitted within 75 feet of residentially zoned

HEARING EXHIBIT - 00000531

property.

b. *Storage.* All storage areas shall be located to the rear of the primary structures. All outside storage areas shall be enclosed by a visual barrier when viewed from the public road right-of-way or adjacent lots not industrially zoned. Such enclosure shall be a minimum of six feet and a maximum of eight feet in height, and in no case shall materials be stacked or stored so as to exceed the height of the enclosure. The enclosure shall be either a masonry wall, opaque fence, landscaped berm or other materials adequate to create a permanent opaque barrier. The storage area's entrance and exit gates shall also be opaque when materials within it are visible from any public road right-of-way or adjacent lots not industrially zoned. Storage areas must be located at least 75 feet from any street right-of-way lines. No motor vehicle which is inoperable or trailer which is unusable shall be stored or used for storage on any lot or parcel of ground in this zone unless it is within a completely enclosed building.

c. *Lighting and utilities.*

1. Shaded light sources shall be used to illuminate signs, facades, buildings, and parking and loading areas, shall be so arranged as to eliminate glare from roadways and streets, and shall be directed away from properties lying outside the district.

2. Shaded light sources are lighting elements shielded with an opaque shade to direct the light.

3. No neon lights, intermittent lights or flashing lights or such lighted signs shall be allowed.

d. *Riverfront property.* On property bordering a river, a minimum of 30 percent of the river frontage shall be left open as breezeway/visual corridor.

(Code 1979, § 14-20.14(B); Ord. No. 95-46, §§ 1, 2, 10-19-95; Ord. No. 95-47, §§ 62, 63, 10-19-95; Ord. No. 95-49, §§ 8, 18, 10-19-95; Ord. No. 96-16, §§ 65, 66, 3-28-96; Ord. No. 97-48, § 2, 12-9-97; Ord. No. 98-11, § 5, 2-26-98; Ord. No. 98-12, § 14, 2-26-98; Ord. No. 98-13, § 1, 2-26-98; Ord. No. 99-07, § 12, 1-28-99; Ord. No. 2000-07, § 4, 1-25-00; Ord. No. 01-30, § 15, 5-24-01; Ord. No. 2002-42, § 9, 8-27-02; Ord. No. 04-43, § 1, 10-19-04)

State Law References: Planned unit developments encouraged, F.S. § 163.3202(3).

Sec. 62-1543. Light industrial, IU.

The IU light industrial zoning classification is established to provide areas in which the principal use of land is for manufacturing, assembling and fabrication, and for warehousing. These uses do not depend primarily on frequent personal visits of customers or clients, but usually require good accessibility to major rail, air or street transportation routes. All property in this zoning classification shall have a structure located on the property with a minimum of 300 square feet prior to utilizing the property for any of the uses permitted in this section.

(1) *Permitted uses.*

a. The following uses and structures are permitted provided they comply with the performance standards set forth in division 6, subdivision III, of this article and take place within an enclosed building:

All uses permitted in the BU-1 and BU-2 classification, except, single-family residence.

b. Permitted uses with conditions are as follows (see division 5, subdivision II, of this article):

Uses "permitted with conditions" will be controlled by section 62-1540 and performance standards.

Assisted living facility.

Commercial entertainment and amusement enterprises (small scale).

Power substations and transmission facilities.

Preexisting use.

Recovered materials processing facility.

Treatment and recovery facility.

(2) *Accessory uses.*

a. Customary accessory buildings and uses are permitted, including operations required to maintain or support any use permitted in this zone on the same lot as the permitted use, such as maintenance shops and machine shops.

b. The following uses are permitted as a convenience to the occupants thereof and their customers and employees:

Convention or exhibition hall.

Dining facilities.

Laundry.

Recreational facilities.

c. Roadside stands used for the sale of agricultural produce as provided in chapter 86, article IV, are permitted as an accessory use.

d. Security trailers are permitted as an accessory use.

(3) *Conditional uses.* Conditional uses are as follows:

Alcoholic beverages for on-premises consumption.

Change of nonconforming agricultural use.

Commercial entertainment and amusement enterprises (large scale).

Commercial/recreational and commercial/industrial marina.

Composting facility.

Flea markets (recreational vehicles).

Land alteration (over five acres).

Motocross.

Mulching facility.

Substantial expansion of a preexisting use.

Towers and antennas.

Truss manufacturing plant.

(4) *Minimum lot size.* Individual building sites shall be of such size that space requirements provided in this chapter are complied with. All lots shall have a minimum size of 20,000 square feet, and have a minimum width of 100 feet and a minimum depth of 200 feet.

(5) *Setbacks.*

a. *Front yard.* Structures shall be set back not less than 40 feet from the front property line.

b. *Side yard.* No building or wall shall be located closer than 15 feet to a side yard lot line. The width of a side yard which abuts a residential district shall be at least 100 feet, 20 feet of which shall be a buffer zone.

c. *Rear yard.* No structures or truck parking and loading shall be located closer than 25 feet to the rear lot line. Where the lot abuts a residential district, no structures shall be permitted closer than 100 feet to the rear lot line. However, no rear yard is required where the lot abuts on an existing or proposed railroad right-of-way or spur. Truck parking and loading facility setbacks is addressed in subsection (8)a. of this section.

(6) *Maximum lot coverage.* Building coverage, including storage areas, shall not exceed 50 percent

HEARING EXHIBIT - 00000534

of the area of the lot.

(7) *Structural height standards.*

a. Where the property abuts any other land located in the GU, AGR, AU, ARR, REU, RU-1-7, RU-1-9, RU-1-11, RU-1-13, RR-1, EU, EU-1, EU-2, SEU, SR, RVP, TR-1-A, TR-1, TR-2, TR-3, TRC-1, RRMH-1, RRMH-2.5, RRMH-5, EA, PA or GML zoning classification, the maximum height threshold of any structure or building thereon shall be 35 feet.

b. Where the property abuts any other land located in the RA-2-4, RA-2-6, RA-2-8, RA-2-10, RU-2-4, RU-2-6, RU-2-8, RU-2-10, RU-2-12, RP or BU-1-A zoning classification, the maximum height threshold of any structure or building thereon shall be 45 feet.

c. Where the property abuts any other land located in the RU-2-15, RU-2-30, BU-1, BU-2, PBP, PIP, IU, IU-1, TU-1 or TU-2 zoning classification, the maximum height threshold of any structure or building thereon shall be 60 feet.

d. Where any structure or building exceeds 35 feet in height, all conditions enumerated in section 62-2101.5 as applicable shall be fully satisfied.

e. Structures or buildings may not exceed the maximum height thresholds stated in this subsection unless otherwise permitted by section 62-2101.5.

(8) *Other requirements.*

a. *Loading facilities and truck parking.* No shipping or receiving of goods shall be permitted within 100 feet of residentially zoned property. Where the lot abuts a commercial district, no truck parking and loading shall be permitted closer than 50 feet to the rear lot line. However, no rear yard is required where the lot abuts an existing or proposed railroad right-of-way or spur.

b. *Storage.* All storage areas shall be located to the rear of the primary structures. All open areas for storage shall be enclosed by a visual barrier when viewed from the public road right-of-way or adjacent lots not industrially zoned. Such enclosure shall be a minimum of six feet and a maximum of eight feet in height, and in no case shall materials be stacked or stored so as to exceed the height of the enclosure. The enclosure shall be either a masonry wall, opaque fence, landscaped berm or other materials adequate to create a permanent opaque barrier. The storage area's entrance and exit gates shall also be opaque when materials within it are visible from any public road right-of-way or adjacent lots not industrially zoned. Storage areas must be located at least 25 feet from any side or rear lot line. No motor vehicle which is inoperable or trailer which is unusable shall be stored or used for storage on any lot or parcel of ground in this zone unless it is within a completely enclosed building.

c. *Fencing.* When any property used for the uses permitted in this zoning classification is

HEARING EXHIBIT - 00000535

contiguous to or abuts property zoned other than BU-1, BU-2, PBP, PIP, IU or IU-1, a six-foot fence shall be constructed on the contiguous property line and may be constructed within the front setback area, provided that the fence is not opaque, notwithstanding the requirements of section 62-2109.

d. *Lighting and utilities.*

1. Shaded light sources shall be used to illuminate signs, facades, buildings, and parking and loading areas, shall be so arranged as to eliminate glare from roadways and streets, and shall be directed away from properties lying outside the district.

2. Shaded light sources are lighting elements shielded with an opaque shade to direct the light.

3. No neon lights, intermittent lights or flashing lights or such lighted signs shall be allowed.

e. *Performance standards.* All permitted uses within this zone shall be subject to the performance standards outlined in division 6, subdivision III, of this article.

f. *Riverfront property.* On property bordering a river, a minimum of 30 percent of the river frontage shall be left open as breezeway/visual corridor.

(9) *Maximum floor area ratio.* The maximum floor area ratio shall be 2.48.

(Code 1979, § 14-20.14(C); Ord. No. 95-17, § 2, 4-11-95; Ord. No. 95-46, §§ 3, 4, 10-19-95; Ord. No. 95-47, §§ 64, 65, 10-19-95; Ord. No. 95-49, § 18, 95; Ord. No. 96-16, §§ 67, 68, 3-28-96; Ord. No. 96-35, § 1, 7-23-96; Ord. No. 97-48, § 3, 12-9-97; Ord. No. 98-12, § 15, 2-26-98; Ord. No. 98-11, § 6, 2-26-98; Ord. No. 99-07, §§ 12, 21, 1-28-99; Ord. No. 99-45, § 2, 8-12-99; Ord. No. 2000-07, § 5, 1-25-00; Ord. No. 01-07, § 7, 2-20-01; Ord. No. 01-30, § 16, 5-24-01; Ord. No. 2002-42, § 10, 8-27-02; Ord. No. 04-29, § 30, 8-5-04; Ord. No. 2004-52, § 28, 12-4-04)

Sec. 62-1544. Heavy industrial, IU-1.

The IU-1 heavy industrial district is established to provide areas in which the principal use of land is primarily for manufacturing and other heavy uses. However, the application of performance and design standards should minimize many of the adverse effects of these heavy industrial uses. Property in this zoning classification shall have a structure located on the property with a minimum of 300 square feet prior to utilizing the property for any of the uses permitted in this section.

(1) *Permitted uses.*

a. The following uses are permitted, provided that they comply with the performance standards set forth in division 6, subdivision III, of this article:

All uses permitted in the BU-1, BU-2 and IU classifications, except, single-family

Sec. 62-1482. General retail commercial, BU-1.

The BU-1 general retail commercial zoning classification encompasses land devoted to general retail shopping, offices and personal services to serve the needs of the community. Where this zoning classification is presently located or is proposed to be located adjacent to the lagoonal water edge or fronts on the ocean, water-dependent uses such as fish, shellfish and wildlife production, recreation, water-dependent industry and utilities, marinas and navigation shall have the highest priority. The next highest priority for uses along the waterfront include water-related uses such as utilities, commerce and industrial uses. Water-enhanced uses such as restaurants and tourist attractions shall have the next highest use priorities. Of lowest priority are those uses which are nonwater-dependent and nonwater-enhanced, and those which result in an irretrievable commitment of coastal resources.

(1) *Permitted uses.*

a. All business uses and all material and products shall be confined within substantial buildings completely enclosed with walls and a roof; however, retail items of substantial size or which of necessity must remain outside of a building may be permitted to be displayed outside the buildings. Such retail items include but are not limited to motor vehicles, utility sheds, nursery items such as plants and trees, and boats.

b. The following uses, or other uses of a similar nature compatible with the character of the uses specifically described in this subsection, are permitted, and shall be limited to retail only:

Administrative, executive and editorial offices.

Antique shops.

Aquariums.

Art goods and bric-a-brac shops.

Artists' studios.

Auditoriums.

Automobile hire.

Automobile parts, if confined within a structure.

Automobile repairs, minor (as defined in Section 62-1102).

Automobile sales and storage, provided sales are from a permanent structure and the storage area meets the requirements of article VIII of this chapter, pertaining to site plans, and article XIII, division 2, of this chapter, pertaining to landscaping.

Automobile tires and mufflers (new), sales and service.

Automobile washing.

Bait and tackle shop.

Bakery sales, with baking permitted on the premises.

Banks and financial institutions.

Barbershops and beauty parlors.

Bed and breakfast inn.

Bicycle sales and service.

Billiard rooms and electronic game arcades (soundproofed).

Bookstores.

Bowling alleys (soundproofed).

Cafeterias.

Ceramics and pottery; finishing and sales; no production or firing except accessory to on site sales only.

Civic, philanthropic or fraternal organizations.

Coin laundromats.

Colleges and universities.

Commercial schools offering instruction in dramatic, musical or other cultural activity, including martial arts.

Confectionery and ice cream stores.

Conservatories.

Contractors' offices, with no outside storage.

Convenience stores, with or without gasoline sales.

Curio shops.

Dancing halls and academies (soundproofed).

Child or adult day care centers.

Display and sales rooms.

Dog and pet hospitals and beauty parlors, with no outside kennels or runs.

Drug and sundry stores.

Dyeing and carpet cleaning.

Electrical appliance and lighting fixtures.

Employment agencies.

Fraternities and sororities.

Florist shops.

Foster homes.

Fruit stores (packing on premises).

Funeral homes and mortuaries.

Furniture stores.

Furriers.

Gift shops.

Grocery stores.

Group homes, levels I and II.

Hardware stores.

Hat cleaning and blocking.

Hobby shops.

Hospitals.

Interior decorating, costuming and draperies.

Jewelry stores.

Laboratories.

Laundries.

Lawn mower sales.

Leather good stores.

Luggage shops.

Mail order offices.

Meat, fish and seafood markets.

Medical buildings and clinics, and dental clinics.

Messenger offices.

Millinery stores.

Motorcycle sales and service.

Music, radio and television shops and repairs.

Newsstands.

Nursing homes.

Optical stores.

Paint and wallpaper stores.

Parking lots (commercial).

Parks and public recreational facilities.

Pawnshops.

Pet shops, with property enclosed to prevent any noxious odors.

Photograph studios and galleries.

Plant nurseries (no outside bulk storage of mulch, topsoil, etc.).

Post offices.

Printing services.

Professional offices and office buildings.

Resort dwellings.

Restaurants.

Sale of alcoholic beverage, package only.

Schools for business training.

Schools, private or parochial.

Shoe repair shops.

Shoe stores.

Single-family residence.

Soft drink stands.

Souvenir stores.

Stationery stores and bookstores.

Tailor shops.

Tearooms.

Telephone and telegraph stations and exchanges.

Television and broadcasting stations, including studios, transmitting stations and towers and other incidental uses usually pertaining to such stations.

Theaters, but no drive-ins.

Ticket offices and waiting rooms for common carriers.

Tobacco stores.

Upholstery shops.

Wearing apparel stores.

Worship, places of.

c. Permitted uses with conditions are as follows (see division 5, subdivision II, of this article):

Assisted living facility.

Automobile and motorcycle repair (major) and paint and body work.

Boat sales and service.

Cabinetmaking and carpentry.

Dry cleaning plants, accessory to pickup stations.

Farm machinery sales and service.

Gasoline service stations.

Manufacturing, compounding, processing, packaging, storage, treatment or assembly of certain products.

Outdoor restaurant seating.

Outside sale of mobile homes.

Preexisting use.

Substations, and transmission facilities.

Security mobile home.

Self storage mini-warehouses.

Tourist efficiencies and hotels and motels.

Treatment and recovery facility.

HEARING EXHIBIT - 00000542

(2) *Accessory buildings or uses.* Accessory buildings and uses customary to commercial and residential uses are permitted. (Refer to definition cited in section 62-1102 and standards cited in section 62-2100.5). Additional accessory uses are as follows:

a. Completely enclosed lumber sales are permitted as an accessory use to hardware and supply stores.

b. A roadside stand used as provided in chapter 86, article IV, is permitted as an accessory use.

(3) *Conditional uses.* Conditional uses are as follows:

Alcoholic beverages for on-premises consumption.

Change of nonconforming agricultural use.

Commercial entertainment and amusement enterprises (small scale and large scale).

Commercial/recreational and commercial/industrial marinas.

Land alteration (over five acres and up to ten acres).

Performance Overlay Districts.

Plant nurseries (with outside bulk storage of mulch, topsoil, etc.)

Security mobile home.

Substantial expansion of a preexisting use.

Towers and antennas.

Trailer and truck rental.

(4) *Minimum lot size.* Except for gasoline service stations, an area not less than 7,500 square feet is required, having a width and depth of not less than 75 feet.

(5) *Setbacks.*

a. *Generally.*

1. Gasoline Service Station setbacks in this zoning classification shall be governed by section 62-1835.7.

2. The front setback shall be 25 feet from the front lot line.

HEARING EXHIBIT - 00000543

3. The rear setback shall be 15 feet from the rear lot line. However, if the rear lot line abuts a dedicated 20-foot alley or roadway, the setback shall be five feet.

4. Side Setbacks:

a. Where a side lot line abuts a residential zone, such side setback shall be a minimum of 15 feet.

b. Where a side lot line abuts a non-residential zone, such side setback shall be 5 feet.

c. Where a side lot line abuts a combination of commercial, industrial or residential zonings, the respective side setbacks as stated in a. or b. above shall apply to the affected side yard area.

d. Where a 20 foot dedicated alleyway or roadway exists adjacent to or abutting the rear lot line, and the zoning adjacent to the side yard area is non-residential, no side setback is required when a three hour firewall is constructed along the side lot line. However, where the side lot line abuts a residential zone on that side, the minimum side setback shall be 15 feet.

e. Notwithstanding the requirements of section 5(a)(4)(b) above, where a 20-foot dedicated alleyway or roadway does not exist adjacent to or abutting the rear lot line, lots whose sides abut non-residential zonings may utilize a ten-foot paved driveway setback along one side and a zero foot setback on the other provided a three-hour firewall is constructed where the building is proposed within five feet of the side property line. However, where the side lot line abuts a residential zone on that side, the minimum side setback shall be 15 feet.

f. On a corner lot, the side street setback shall be 15 feet. If a corner lot is contiguous to a key lot, then the side street setback shall 25 feet.

5. *Within the Merritt Island Redevelopment Area.* On all lots in the Merritt Park Place Subdivision except corner lots, structures shall be set back not less than 15 feet from the front lot line where parking is located to the side or rear of the principal structure. Otherwise, all other provisions as described above shall apply.

b. *Breezeway/visual corridor.* All riverfront and oceanfront properties are subject to breezeway/visual corridor regulations enumerated in section 62-2105.

(6) *Minimum floor area.* All structures shall contain a minimum of 300 square feet of floor area.

(7) *Structural height standards.*

a. Where the property abuts any other land located in the GU, AGR, AU, ARR, REU, RU-1-7, RU-1-9, RU-1-11, RU-1-13, RR-1, EU, EU-1, EU-2, SEU, SR, RVP, TR-1-A, TR-1, TR-2, TR-3, TRC-1, RRMH-1, RRMH-2.5, RRMH-5, EA, PA or GML zoning classification, the maximum height threshold of any structure or building thereon shall be 35 feet.

b. Where the property abuts any other land located in the RA-2-4, R-2-6, RA-2-8, RA-2-10, RU-2-4, RU-2-6, RU-2-8, RU-2-10, RU-2-12, RP or BU-1-A zoning classification, the maximum height threshold of any structure or building thereon shall be 45 feet.

c. Where the property abuts any other land located in the RU-2-15, RU-2-30, BU-1, BU-2, PIP, PBP, IU, IU-1, TU-1 or TU-2 zoning classification, the maximum height threshold of any structure or building thereon shall be 60 feet.

d. Where any structure or building exceeds 35 feet in height, all conditions enumerated in section 62-2101.5 as applicable shall be fully satisfied.

e. Structures or buildings may not exceed the maximum height thresholds stated in this subsection unless otherwise permitted by section 62-2101.5.

(8) *Fencing and buffering.* See article XIII, division 2, of this article, pertaining to landscaping.

(9) *Metal buildings.* Metal buildings shall be permitted in this zoning classification subjectto the restrictions presented in section 62-2115.

(10) *Maximum floor area ratio.* The floor area ratio shall be governed by section 62-2110.

(Code 1979, § 14-20.12(B); Ord. No. 95-17, § 1, 4-11-95; Ord. No. 95-47, §§ 52, 53, 10-19-95; Ord. No. 95-49, §§ 3, 9, 12, 18, 21, 10-19-95; Ord. No. 95-51, § 4, 10-19-95; Ord. No. 96-16, §§ 55, 56, 3-28-96; Ord. No. 96-46, § 14, 10-22-96; Ord. No. 97-23, § 2, 7-8-97; Ord. No. 97-40, § 2, 10-14-97; Ord. No. 99-07, § 12, 1-28-99; Ord. No. 99-24, § 9, 4-8-99; Ord. No. 2000-50, § 3, 10-31-00; Ord. No. 01-07, § 2, 2-20-01; Ord. No. 01-30, § 10, 5-24-01; Ord. No. 2002-42, § 4, 8-27-02; Ord. No. 2002-43, § 2, 8-27-02; Ord. No. 2002-49, § 33, 9-17-02; Ord. No. 2003-03, § 27, 1-14-03; Ord. No. 03-36, § 1, 8-7-03; Ord. No. 04-29, § 26, 8-5-04; Ord. No. 2004-52, § 23, 12-4-04; Ord. No. 05-27, § 3, 5-19-05; Ord. No. 05-40, § 7, 8-23-05; Ord. No. 06-21, § 3, 4-25-06; Ord. No. 06-36, § 3, 5-24-06; **Ordinance No. 2007-059, enacted December 6, 2007.**)

Sec. 62-1483. Retail, warehousing and wholesale commercial, BU-2.

The BU-2 retail, warehousing and wholesale commercial zoning classification encompasses lands devoted to general retail and wholesale business, contracting and heavy repair services and warehousing activities. Where this zoning classification is presently located or is proposed to be located adjacent to the lagoonal water edge or fronts on the ocean, water-dependent uses such as fish, shellfish and wildlife production, recreation, water-dependent industry and utilities, marinas and navigation shall have the highest priority. The next highest priority for uses along the waterfront include water-related uses such as utilities, commerce and industrial uses. Water-enhanced uses such as restaurants and tourist attractions shall have the next highest use priorities. Of lowest priority are those uses which are nonwater-dependent and nonwater-enhanced, and those which result in an irretrievable commitment of coastal resources.

(1) *Permitted uses.*

a. All business uses and all materials and products shall be confined within substantial buildings completely enclosed with walls and a roof, however, retail items of substantial size or which of necessity must remain outside of a building may be permitted to be displayed outside the building. Such retail items include but are not limited to motor vehicles, utility sheds, nursery items such as plants and trees, boats and mobile homes.

b. All uses listed below, or other uses of a similar nature compatible with the character of uses described herein:

Administrative, executive and editorial offices.

Antique shops.

Aquariums.

Art goods and bric-a-brac shops.

Artists' studios.

Auditoriums.

Automobile hire.

Automobile repairs, minor and major, as defined in Section 62-1102 (also see Section 62-1837.6).

Automobile washing.

Bait and tackle shop.

Bakery sales, with baking permitted on the premises.

Banks and financial institutions.

Barbershops and beauty parlors.

Bicycle sales and service.

Billiard rooms and electronic arcades (soundproofed).

Bookstores.

Bottling beverages.

HEARING EXHIBIT - 00000546

Bowling alleys (soundproofed).

Cafeterias.

Ceramics and pottery; finishing and sales, including production and firing.

Child or adult day care centers.

Civic, philanthropic or fraternal organizations.

Colleges and universities.

Commercial schools offering instruction in dramatic, musical or other cultural activity, including martial arts.

Confectionery and ice cream stores.

Conservatories.

Convenience stores, with or without gasoline sales.

Curio shops.

Dancing halls and academies (soundproofed).

Display and sales rooms.

Dog and pet hospitals and beauty parlors.

Drug and sundry stores.

Dry cleaning and laundry pickup stations.

Dry cleaning plants.

Dyeing and carpet cleaning.

Electrical appliance and lighting fixtures.

Employment agencies.

Feed and hay for animals and stock.

Fertilizer stores.

Florist shops.

Foster homes.

Fraternities and sororities.

Fruit stores (packing on premises).

Funeral homes and mortuaries.

Furniture stores.

Furriers.

Gift shops.

Glass installation.

Grocery stores.

Group homes, levels I and II.

Hardware stores.

Hat cleaning and blocking.

Hobby shops.

Hospitals.

Ice plants.

Interior decorating, costuming and draperies.

Jewelry stores.

Kindergartens.

Laboratories.

Laundries.

Lawn mower sales.

Leather good stores.

Luggage shops.

Mail order offices.

Meat markets.

Medical buildings and clinics, and dental clinics.

Messenger offices.

Millinery stores.

Music, radio and television shops and repairs.

Newsstands.

Nursing homes.

Optical stores.

Paint and body shops.

Paint and wallpaper stores.

Parking lots (commercial).

Parks and public recreational facilities.

Pawnshops.

Pet kennels.

Pet shops, with property enclosed to prevent any noxious odors.

Photograph galleries.

Photographic studios.

Plant nurseries.

Plumbing and electrical shops.

Post offices.

Printing services.

Professional offices and office buildings.

Resort dwellings.

Restaurants.

Sale of alcoholic beverages, package only.

Schools for business training.

Schools, private or parochial.

Seafood processing plants not located within 300 feet of any residential zone boundary.

Sharpening and grinding shops.

Ship chandlery.

Shoe repair shops.

Shoe stores.

Single-family residence.

Soft drink stands.

Souvenir stores.

Stationery stores and bookstores.

Tailor shops.

Tearooms.

Telephone and telegraph stations and exchanges.

Television and broadcasting stations, including studios, transmitting stations and towers, power plants and other incidental uses usually pertaining to such stations.

Testing laboratories.

Theaters, but no drive-ins.

Ticket offices and waiting rooms for common carriers.

Tobacco stores.

certain products.

Mini-warehouses.

Minor automobile repairs.

Mobile home and travel trailer sales.

Motorcycle sales and service.

Outdoor restaurant seating.

Outside sale of mobile homes.

Preexisting use.

Railroad, motor truck and water freight and passenger stations.

Recovered materials processing facility.

Security mobile home.

Service station for automotive vehicles and U-haul service.

Substations, and transmission facilities.

Tourist efficiencies and hotels and motels.

Treatment and recovery facility.

Warehouses.

(2) *Accessory buildings or uses.* Accessory buildings and uses customary to commercial and residential uses are permitted. (Refer to definition cited in section 62-1102 and standards cited in section 62-2100.5). Additional accessory uses are as follows:

A roadside stand used as provided in chapter 86, article IV is permitted as an accessory use.

(3) *Conditional uses.* Conditional uses are as follows:

Alcoholic beverages for on-premises consumption.

Automobile sales and storage (under one acre in the Merritt Island Redevelopment Area).

Change of nonconforming agricultural use.

EXHIBIT - 00000552

Commercial entertainment and amusement enterprises (large scale).

Commercial/recreational and commercial/industrial marinas.

Flea markets (recreational vehicles may be an accessory use pursuant to division 5, subdivision II, of this article).

Land alteration (over five acres and up to ten acres).

Security mobile home.

Substantial expansion of a preexisting use.

Towers and antennas.

(4) *Minimum lot size.* Except for gasoline service stations, an area not less than 7,500 square feet is required, having a width and depth of not less than 75 feet.

(5) *Setbacks.*

a. *Generally.*

1. Gasoline Service Station setbacks in this zoning classification shall be governed by section 62-1835.7.

2. The front setback shall be 25 feet from the front lot line.

3. The rear setback shall be 15 feet from the rear lot line. However, if the rear lot line abuts a dedicated 20-foot alley or roadway, the setback shall be five feet.

4. Side Setbacks:

a. Where a side lot line abuts a residential zone, such side setback shall be a minimum of 15 feet.

b. Where a side lot line abuts a non-residential zone, such side setback shall be 5 feet.

c. Where a side lot line abuts a combination of commercial, industrial or residential zonings, the respective side setbacks as stated in a. or b. above shall apply to the affected side yard area.

d. Where a 20 foot dedicated alleyway or roadway exists adjacent to or abutting the rear lot line, and the zoning adjacent to the side yard area is non-residential, no side setback is required when a three hour firewall is constructed along the side lot line. However, where the side lot line abuts

a residential zone on that side, the minimum side setback shall be 15 feet.

e. Notwithstanding the requirements of section 5(a)(4)(b) above, where a 20-foot dedicated alleyway or roadway does not exist adjacent to or abutting the rear lot line, lots whose sides abut non-residential zonings may utilize a ten-foot paved driveway setback along one side and a zero foot setback on the other provided a three-hour firewall is constructed where the building is proposed within five feet of the side property line. However, where the side lot line abuts a residential zone on that side, the minimum side setback shall be 15 feet.

f. On a corner lot, the side street setback shall be 15 feet. If a corner lot is contiguous to a key lot, then the side street setback shall 25 feet.

b. *Breezeway/visual corridor.* All riverfront and oceanfront properties are subject to breezeway/visual corridor regulations enumerated in section 62-2105.

(6) *Minimum floor area.* All structures shall contain a minimum of 300 square feet of floor area.

(7) *Structural height standards.*

a. Where the property abuts any other land located in the GU, AGR, AU, ARR, REU, RU-1-7, RU-1-9, RU-1-11, RU-1-13, RR-1, EU, EU-1, EU-2, SEU, SR, RVP, TR-1-A, TR-1, TR-2, TR-3, TRC-1, RRMH-1, RRMH-2.5, RRMH-5, EA, PA or GML zoning classification, the maximum height threshold of any structure or building thereon shall be 35 feet.

b. Where the property abuts any other land located in the RA-2-4, RA-2-6, RA-2-8, RA-2-10, RU-2-4, RU-2-6, RU-2-8, RU-2-10, RU-2-12, RP or BU-1-A zoning classification, the maximum height threshold of any structure or building thereon shall be 45 feet.

c. Where the property abuts any other land located in the RU-2-15, RU-2-30, BU-1, BU-2, PBP, PIP, IU, IU-1, TU-1 or TU-2 zoning classification, the maximum height threshold of any structure or building thereon shall be 60 feet.

d. Where any structure or building exceeds 35 feet in height, all conditions enumerated in section 62-2101.5 as applicable shall be fully satisfied.

e. Structures or buildings may not exceed the maximum height thresholds stated in this subsection unless otherwise permitted by section 62-2101.5.

(8) *Fencing and buffering.* See article XIII, division 2, of this article, pertaining to landscaping.

(9) *Metal buildings.* Metal buildings shall be permitted in this zoning classification subject to the restrictions presented in section 62-2115.

(10) *Maximum floor area ratio.* The floor area ratio shall be governed by section 62-2110.

Secs. 62-1484--62-1510. Reserved.

Subdivision VII.

Tourist Commercial and Transient Tourist Use

Sec. 62-1511. General tourist commercial, TU-1.

The TU-1 general tourist commercial zoning classification encompasses lands devoted to general tourist-related activities and recognizes the need for higher densities for motels and hotels. Also, a limitation of kitchen facilities is specified to prevent the conversion of motel and hotel units to permanent residential use. For purposes of this section, permanent residential use shall mean any use of one dwelling unit for more than three months by one family or one individual or any dwelling unit for which a lease is available for a period of time exceeding three months. The uses listed in subsection (1) of this section, or other uses of a similar nature that are compatible with the character of the uses specifically set forth in this section, are permitted.

(1) *Permitted uses.*

a. Permitted uses are as follows:

Art galleries, libraries and museums.

Civic, philanthropic or fraternal organizations.

Hotels and motels.

Parks and public recreational facilities.

Resort dwellings.

Restaurants.

Sale of alcoholic beverages, package only.

Single-family residence.

PHILIP M. HOLDEN, MAI

State-Certified General Real Estate Appraiser RZ 1666

Philip M. Holden, who holds the MAI designation in the Appraisal Institute, is the President of S.F. Holden, Inc., a real estate appraisal and consulting firm established in 1964. He is a registered real estate broker in the State of Florida and is past-president of the Society of Real Estate Appraisers, Palm Beach County Chapter and the Florida Chapter of the American Society of Farm Managers and Rural Appraisers. Mr. Holden has been appraising real estate since September 1974, and has successfully completed the following courses or seminars given by real estate appraisal organizations:

Appraisal Courses and Seminars
Valuation of Less Than Fee - May 1995, 1996
Riparian Rights - May 1994
Easement Valuation - May 1994
Cattle Grazing Seminar - May 1993
Permanent Plantings – October 1997
Appraising Rural Properties – May 1997
Realtors Land Institute Citrus Course – May 1999
University of Florida, Citrus Seminar – April 1999
Highest/Best Use/ Valuation Techniques – May 2000
Attacking and Defending Appraisals – June 2000
SFWMD Federal Land Acquisitions – May 2001
SJRWMD Land Acquisitions – December 2001
SFWMD Oil & Gas Mineral Valuation – May 2002
SFWMD Everglades Restoration – May 2002
USPAP and USPAP Core Law – November 2002
Appraising the Appraisal – 2003
Automation in Appraisal Reporting – 2003
SFWMD Appraisal Seminar – May 2003
SFWMD Appraisal Seminar – May 2004
SFWMD Appraisal Seminar – May 2005
SFWMD Appraisal Seminar – May 2006
SFWMD Appraisal Seminar – May 2007
Valuation of Conservation Easements – Jan 2008

Appraisal Institute
USPAP Update - December 1995
Limited Appraisals/Evaluations - May 1995
Income Valuation - March 1995

American Institute of Real Estate Appraisers
Course 1-A - August 1976
Course VIII - June 1977
Course 1-B - March 1978 and 1986
Course II - March 1979
Standards of Professional Practice – June 1992

Real Estate Broker
Bert Rogers – June 2004

Society of Real Estate Appraisers
Course 101 - June 1976
Course R-2 - January 1977
Course 201 - January 1978 & 1984
Litigation Valuation - February 1988
Standards of Professional Practice - March 1989

In addition to the above listed courses, Mr. Holden has attended many seminars and two-day courses. He was also an instructor for the Appraisal Institute, Course 101. Recent speaking engagements include the Realtor's Land Institute, the International Association of Assessing Officers, and the University of Florida IFAC course in appraising citrus. Mr. Holden is qualified as an expert in the courts and also served as Special Master for the Palm Beach County Property Appraisal Adjustment Board. Some of the major property types which Mr. Holden has appraised are: agricultural (farms, ranches, citrus groves, dairies) commercial (shopping centers, offices); industrial properties, and residential properties (individual homes and subdivisions). Mr. Holden specializes in unique and special-purpose properties including rights-of-way (proposed and abandoned), one-of-a-kind buildings and partially-completed buildings, marinas, packing houses, damaged properties and churches. Other areas of specialization include the analysis of various interests such as leasehold/leased fee, partial-ownership interests and easements including under- and above-ground, flowage, and conservation, and other uncommon ownerships. Typically, the appraisal work has been for sale and/or purchase, mortgages, litigation (eminent domain, bankruptcy, dissolution of real estate) and taxation issues.

DONALD G. BLAUVELT, MAI, SRA
Florida State-Certified General Real Estate Appraiser RZ 511

Donald G. Blauvelt has been an independent real estate appraiser since 1972 and is a past-president of the Society of Real Estate Appraisers Oklahoma Green Country Chapter. He has been a state certified General Real Estate Appraiser in Florida since the inception of the national state certification requirements, with current licensure through November 30, 2008. Mr. Blauvelt has successfully completed the following courses or seminars by real estate appraisal organizations:

America Institute of Real Estate Appraisers
Course 1A, Real Estate Principles, 1972
Course 1B, Capitalization Techniques, 1974
Course II, Urban Property, 1977
Course IV, Litigation Valuation, 1988
Course VI, Investment Analysis, 1977
Course VIII, Single Family Property, 1974

Society of Real Estate Appraisers
Course 101, Real Estate Principles, 1972
Course 201, Income Property Appraising, 1973
Course 301, Special Applications, 1975

Appraisal Seminars
Business Practices and Ethics (AI), 2006
Standards of Professional Practice, 1992
USPAP Core Law for Appraisers, 1994, 1997
USPAP National Update (bi-annually), 1996-2004, 2006
Florida Appraisal Law Update, 1996-2004, 2006
Litigation Valuation, 1993

In addition to the above, Mr. Blauvelt has attended numerous seminars sponsored by the Appraisal Institute, SFWMD and others regarding continuing education requirements of the Appraisal Institute and State of Florida's appraisal licensure.

Mr. Blauvelt has appraisal assignment experience in the states of Alabama, Arkansas, Arizona, California, Connecticut, Florida, Georgia, Idaho, Illinois, Indiana, Kansas, Kentucky, Louisiana, Massachusetts, Mississippi, Missouri, New Hampshire, New Jersey, New Mexico, New York, North Carolina, Ohio, Oklahoma, Pennsylvania, South Carolina, Tennessee, Texas and Virginia. Mr. Blauvelt has qualified as an expert in multiple courts in multiple states.

Major property types that Mr. Blauvelt has appraised in the past or has continuing valuation assignments include agricultural properties (farms, ranches, citrus groves); commercial properties (many types of single and multi-tenant income producing or owner-occupied); industrial properties; special purpose or unique properties; residential properties (planned subdivisions); and vacant land.

Clients include federally-regulated lenders, insurance companies, private individuals and government agencies.

FPL's Response to Staff's Fourth Request for Production of Documents (No. 17)

HEARING EXHIBIT - 00000560

Q.

Please provide all workpapers to support FPL's assertion on Page 17 of its petition (Items 41) that:

a. In 2011, the first year when all three projects are in service for the full year, the system average bill impact is projected to be an increase of 83 cents per 1000 kWh;

b. Over the first 25 years of operations (2009-2033) the system average bill impact is projected to be an increase of 31 cents for the average customer.

A.

Documents responsive to this request are provided as Bates No. ECRC-08-4707.

FPL's Response to Staff's Fifth Request for Production of Documents (No. 25)

Q.

Regarding the NASA KSC Center Enhanced Use Lease for FPL's Space Coast Solar Project, please provide:

a. The Property Market Value Analysis FPL performed before entering the lease to justify the Fair Market Value of the Phase 1 property $75,000 per acre specified in article 3.1 of the Lease.

b. The analysis performed before entering the lease to justify the Fair Lease Value of the Leased property $7,500 per acre per year specified in article 3.1 of the Lease.

A.

a. FPL relied on the property appraisal that was conducted for the site to justify the Fair Market Value of the property at $75,000 per acre. This appraisal was previously produced in response to Staff's Fourth Request for Production of Documents No. 12(b) (Bates No. ECRC 08-679 through 08-764). In addition, based on verbal discussions with NASA prior to signing the lease, this appraised value is consistent with (and is lower than) NASA's independent appraisal of the property.

b. The value of the Leased property was negotiated by FPL and NASA-KSC by utilizing an Income Capitalization Approach, a common and acceptable real estate appraisal technique. A "ground lease" must be long enough to make the transaction desirable to the tenant (i.e. FPL) and landlord/landowner (i.e. NASA-KSC). Such leases often have terms of 50 years or longer and a lease for 99 years is not uncommon. The value of a ground lease is usually determined by dividing the ground rent by an appropriate "capitalization rate." The subject property was appraised at $75,000 per acre, utilizing an acceptable "capitalization rate" or "discount rate" of 10%. The parties discussed the Fair Lease Value of $7,500/acre on several occasions and agreed that the method used to arrive at the Fair Lease Value was equitable to both parties.

NASA JOHN F. KENNEDY SPACE CENTER

ENHANCED USE LEASE

This Enhanced Use Lease (the "**Lease**") is made as of the date set forth below by the signatories, by and between the NATIONAL AERONAUTICS AND SPACE ADMINISTRATION, an Agency of the United States, John F. Kennedy Space Center, Kennedy Space Center, Florida, as the lessor (hereinafter "**NASA-KSC**"), and Florida Power & Light Company, a corporation organized and existing under the laws of the state of Florida, as the lessee (hereinafter "**FPL**"). This Lease is made under the authority of section 315 of the National Aeronautics and Space Act of 1958, as amended (42 U.S.C. §2459j) with reference to the following facts:

RECITALS

A. NASA-KSC is committed to using its real property assets to efficiently support the Nation's space exploration activities and enable the greatest public benefit from the application of NASA-KSC technology and resources acquired pursuant to its mission.

B. As the Nation's primary space launch facility for human and robotic space exploration missions, NASA-KSC is a significant Federal consumer of electric power, and pursuant to 42 U.S.C. §8251, *as amended*, and Executive Order 13423, NASA-KSC is committed to expanding the use of renewable energy within its facilities by implementing renewable energy projects and by purchasing electricity from renewable energy sources that will reduce emissions contributing to air pollution and global climate change.

C. FPL, serving as Florida's largest electric utility provider and the sole supplier of electric power to NASA-KSC, is committed to increasing the contribution of renewable energy to Florida's electric power supply by developing new generating capacity utilizing renewable energy sources such as solar, wind, and biomass.

D. In furtherance of their respective missions and energy objectives, NASA-KSC and FPL (hereinafter referred to jointly as "the **Parties**") entered into a Memorandum of Understanding ("**MOU**") on December 13, 2007, to collaborate in determining the technical and financial feasibility of developing renewable energy projects using the land and/or facilities available at NASA-KSC.

E. FPL, pursuant to the MOU, has proposed to develop a major photovoltaic power generation facility ("**FPL PV Facility**") on vacant land owned by NASA-KSC in a phased development plan that will harness solar power to generate up to fifteen (15)

HEARING EXHIBIT - 00000568

megawatts of electricity using the intellectual capacity of NASA-KSC and commercial technology originally developed by NASA-KSC as a power source for the International Space Station, other Earth-orbiting satellites, and spacecraft involved in planetary exploration.

F. Accordingly, the Parties have agreed to enter into this Lease for the leased Property defined in section 1.3 below, in accordance with the terms and conditions set forth herein, for the purpose of developing and operating a PV facility to generate renewable energy for use and distribution by both FPL and NASA-KSC. The Parties acknowledge and agree that the leased Property is not being provided to FPL as Government-furnished property under any contract or subcontract, and FPL agrees that it shall not charge or submit for payment any consideration provided pursuant to this Lease as a direct cost or charge under any such contract or subcontract.

NOW, THEREFORE, NASA-KSC and FPL agree as follows:

ARTICLE 1 PROPERTY

1.1 Lease of Property: FPL PV Facility Phase 1. NASA-KSC hereby leases to FPL, and FPL hereby leases from NASA-KSC, for the term set forth in section 2.1 and subject to the covenants hereinafter set forth, the property located on Kennedy Space Center designated as FPL PV Facility Phase 1, encompassing sixty (60) acres, more or less, as legally described on the survey map attached hereto as Exhibit A ("**Phase 1**").

1.2 Option to Lease Property: FPL PV Facility Phase 2. NASA-KSC hereby grants to FPL an option to lease for the term set forth in section 2.1 and subject to the mutual agreement of the Parties and the covenants hereinafter set forth, the property located on Kennedy Space Center designated as FPL PV Facility Phase 2, encompassing forty-eight (48) acres, more or less, as legally described on the survey map attached hereto as Exhibit A ("**Phase 2**"), provided that the effective date of FPL's leasehold interest therein and obligations hereinafter set forth shall commence on a date determined by mutual agreement of the Parties, but not later than August 1, 2020, and provided further, that FPL will provide to NASA-KSC written notice of its intent to exercise said option at least sixty (60) days prior to the exercise thereof. At FPL's request, and at NASA-KSC's sole discretion, additional acreage may be included in Phase 2 beyond that described in Exhibit A contingent upon the completion of additional environmental analysis as may be required by NASA-KSC. The parties agree that of the forty-eight (48) acres presently encompassing Phase 2, a total of up to eight (8) acres will be unsuitable or unavailable for FPL use and will not be included in determination of consideration due to NASA for Phase 2. Phase 1 and Phase 2 together shall be referred to as the "**Phases**" and, individually, each a "**Phase**". This option is contingent upon FPL providing, and NASA-KSC accepting, the proposed consideration for the Phase 2 acreage. The Parties intend that the consideration for Phase 2 will be a to-be-negotiated expansion of the NASA PV Facility. However, NASA-KSC, at its sole discretion, reserves the right to receive monetary consideration in lieu of nonmonetary consideration for the Phase 2 acreage.

HEARING EXHIBIT - 00000569

1.3 Property Disposition. The property described in Exhibit A (hereinafter the "**leased Property**") consists of vacant, undeveloped land with no existent utility or other municipal services. FPL acknowledges that it has inspected the leased Property, or has had the leased Property inspected by consultants retained by FPL, and has found it acceptable for the Permitted Use (as defined in section 4.1). FPL accepts the leased Property "AS IS", and acknowledges that NASA-KSC has made no covenant, representation, or warranty of any kind, express or implied, with regard to the suitability of leased Property for the Permitted Use, and that NASA-KSC has no duty to make any improvements to the leased Property.

ARTICLE 2 TERM

2.1 Term of Lease. The term of this Lease for Phase 1 shall be for a period of thirty (30) years, commencing on August 1, 2008 (the "**Phase 1 Commencement Date**") and, unless sooner terminated as hereinafter provided, expiring on July 31, 2038. The term of this Lease for Phase 2 shall commence on the date as set forth in the option notice as provided in section 1.2 (the "**Phase 2 Commencement Date**") and, unless sooner terminated as hereinafter provided, expire thirty (30) years thereafter. The Phase 1 Commencement Date and Phase 2 Commencement Date shall generically for each Phase be referred to as the "**Commencement Date**".

2.2 Modification of Term of Lease for Technology Upgrade.

(a) During the basic term of this Lease, the Parties may desire to upgrade the FPL Facility and NASA PV Facility (as defined in Section 3.2) to incorporate new technology that will increase electric power production and/or improve cost effectiveness. Upon mutual agreement of the parties, the term of this Lease may be extended by up to twenty (20) years, with corresponding modification to consideration, to accommodate the installation and amortization of any such upgrade.

(b) In the event that FPL is unable to use the leased Property due to any of the following: (i) FPL is denied any permits necessary to construct and operate the FPL PV Facility and/or NASA PV Facility; (ii) fire, natural disaster, or other casualty; (iii) hostile acts, warfare, or major accidents; (iv) condemnation for a public or quasi-public use under any statute or by right of eminent domain or private purchase in lieu thereof by any competent authority; then FPL shall have the right to terminate the Lease within thirty (30) days after providing NASA-KSC with written notice. FPL shall also have the right to terminate the Lease within thirty (30) days after providing NASA-KSC with written notice in the event that there is a change in law or applicable regulation and action or inaction by any Federal, state, or local legislative, executive, administrative judicial agency or body which invalidates any government incentive that FPL is to receive for operating a photovoltaic power generation facility. Except for any obligations that specifically survive

HEARING EXHIBIT - 00000570

the termination of the Lease as set forth herein, both FPL and NASA-KSC shall be released of any and all liability and obligations specified in the Lease as of the termination date.

2.3 Possession. NASA-KSC shall deliver possession of the leased Property to FPL for each of the Phases described upon the Commencement Date for the particular Phase, and FPL shall not use or occupy the leased Property until such delivery.

2.4 Expiration of the Term: Upon expiration of the term, or upon other termination as provided under this Lease, FPL shall immediately cease all power generation operations at the FPL PV Facility located on the leased Property. Within one hundred eighty (180) days after the expiration, FPL shall remove and properly dispose of all improvements made to the leased Property in accordance with Article 11 of this Lease, whereupon FPL shall vacate and surrender the leased Property to NASA-KSC. Surrender of the leased Property shall not be deemed to be a payment in lieu of any consideration that may be due pursuant to this Lease.

ARTICLE 3 CONSIDERATION

3.1 Fair Market Value. NASA-KSC and FPL agree that the Fair Market Value ("**FMV**") of the Phase 1 property is seventy-five thousand dollars ($75,000) per acre as of the Phase 1 Commencement Date. Accordingly, the Parties agree that the Fair Market Lease Value of the Leased property is seven thousand five hundred dollars ($7,500) per acre per year, which value shall be escalated at 2.5 percent per annum commencing in 2010 for the remaining term of the Lease. The Fair Market Lease Value per acre of the leased Property to be conveyed in Phase 2 shall be the same escalated value as that determined for Phase 1.

3.2 Nonmonetary Consideration. FPL shall provide, no later than twelve (12) months from the Commencement Date of each Phase, nonmonetary consideration in the form of one (1) separate photovoltaic electric power generation system (the "**NASA PV Facility**") to be operated and maintained by FPL for the entire term of the Lease but titled to, and generating electrical power for the exclusive use of, NASA-KSC. The installed capital cost for the design and construction of the NASA PV Facility for Phase 1 shall be six million three hundred fifty-nine thousand and twenty-seven dollars ($6,359,027) as set forth in Exhibit E. The cost to operate and maintain the NASA PV Facility, to include capital replacement costs, as well as the costs of operation and maintenance that are typical for a photovoltaic power generation facility, as specified in Article 7 of the Lease and Exhibit D, shall be no less than one million two hundred thousand dollars ($1,200,000) over the thirty (30) year term as described in Exhibit E. By March 1 of each year of the term, FPL shall provide to NASA-KSC an annual accounting of operations and maintenance costs incurred during the preceding calendar year. The NASA PV Facility shall be sited on the NASA-KSC land identified in Exhibit B to this Lease and shall consist of the buildings, other structures, fixtures, and equipment as specified, designed, and constructed in accordance with the requirements of this Lease. As a condition to the commencement of each Phase of this Lease, FPL shall submit for

HEARING EXHIBIT - 00000571

NASA-KSC approval the proposed design and estimated cost of the NASA PV Facility, to include all costs associated with the design, acquisition, construction, and installation of the NASA PV Facility, as well as the projected expenses that FPL will incur to effect the connection to the NASA PV Facility to the NASA-KSC electrical power distribution system. Upon completion of the NASA PV Facility, FPL shall document to the satisfaction of NASA-KSC the consideration value of the NASA PV Facility by submitting to NASA-KSC records of the actual costs and expenses incurred, as well as the projected operating and maintenance expenses.

3.3 Modification of Consideration for Technology Upgrades. In the event the parties desire to upgrade the FPL PV Facility and NASA PV Facility to incorporate new technology that will increase electric power production and/or improve cost effectiveness, the parties may, by mutual agreement, modify the consideration due for any extension in the Lease term.

3.4 Cash Consideration. Provided FPL furnishes satisfactory records of actual and projected costs and expenses for the costs associated with the NASA PV Facility, and provided said records verify that NASA-KSC has received the FMV for the leased Property, there shall be no rent or other cash consideration payable to NASA-KSC for the term of the Phase for which the noncash consideration is provided. If the amounts expended by FPL to provide nonmonetary consideration as defined in this section are less than the FMV as specified, then FPL shall pay in cash to NASA-KSC the difference between the value of the noncash consideration and the FMV of the leased Property. Any cash consideration due shall be made by check payable to NASA-Kennedy Space Center and forwarded to:

National Aeronautics and Space Administration
NASA Shared Services Center (NSSC) – FMD Accounts Receivable
Attn : For the Accounts of Kennedy Space Center
Building 1111, C Road
Stennis Space Center, MS 39529

ARTICLE 4 USE OF LEASED PROPERTY

4.1 Permitted Use. FPL shall use and occupy the leased Property solely for the construction, operation, and maintenance of a photovoltaic power generation facility for generation of electrical power to serve the public utility grid and for lawful purposes incidental thereto (the **"Permitted Use"**), the Permitted Use being subject to, and consistent with the following: (i) the NASA-KSC approved Site Development Plan described in Section 5.2 of the Lease which shall be incorporated into this Lease as Exhibit A-1 for the FPL PV Facility; (ii) the NASA-KSC approved Site Development Plan described in Section 5.2 of the Lease which shall be incorporated into this Lease as Exhibit B-1 for the NASA PV Facility; (iii) the final Environmental Assessment incorporated into this Lease as Exhibit C for the leased Property; (iv) an antenna located

HEARING EXHIBIT - 00000572

on approximately one (1) acre of the leased Property that NASA-KSC retains the right to access, operate, and maintain; and (v) all other terms and conditions of this Lease.

4.2 Right of Access. NASA-KSC hereby grants FPL a right of access to the leased Property and to other NASA-KSC property as may be required to perform FPL's obligations pursuant to this Lease, subject to applicable security controls requiring access credentials to be issued by NASA-KSC to FPL personnel and contractors. As a secure Federal facility, NASA-KSC specifically reserves the following rights: (a) to control ingress to and egress from the leased Property, (b) to erect and maintain gates and to regulate or prevent traffic, and (c) restrict access in the event of extraordinary and unpredictable circumstances that could arise from hostile acts, warfare, major accidents, or natural disaster, provided that under such circumstances, access by NASA-badged FPL employees and contractors will be no less than NASA-badged KSC administrative employees. If FPL is restricted from accessing the leased Property due to an event of extraordinary and unpredictable circumstances that could arise from hostile acts, warfare, major accidents, or natural disaster, then FPL's failure to operate and maintain the leased Property during the restricted period shall not be deemed an Event of Default as defined in Section 13.1 of the Lease.

4.3 Right of Entry. NASA-KSC reserves the right to enter the leased Property without prior notification of FPL at any time for reasons it deems in its sole discretion to constitute an emergency requiring immediate response, and at other times for reasons it deems in its sole discretion to be necessary to the protection or administration of its property subject to the prior notification of FPL. Any claim for liability for property damage to, or personal injuries on, the leased Property resulting from NASA-KSC's entry on the leased Property shall be determined pursuant to the Federal Tort Claims Act, 28 U.S.C. 1346, *et seq.*

4.4 Impact from Operations on Other NASA-KSC Land. FPL acknowledges and accepts impacts to its operations at the FPL PV Facility that may arise from KSC land management practices on other NASA-KSC land, such as controlled burning and habitat management performed from time to time by the U.S. Fish and Wildlife Service. In the event that NASA-KSC receives notification that there is to be a controlled burn adjacent to the leased Property, then NASA-KSC shall immediately notify FPL so that the controlled burn can be coordinated with FPL. Any claim for liability for property damage to, or personal injuries on, the leased Property resulting from NASA-KSC's land management practices shall be determined pursuant to the Federal Tort Claims Act, 28 U.S.C. 1346, *et seq.*

ARTICLE 5 SITE DEVELOPMENT

5.1 Environmental Condition Report Furnished to FPL. Prior to the Commencement Date of Phase I, NASA-KSC shall, at its own expense, prepare an Environmental Condition Report ("**ECR**") for the leased Property, to be acknowledged and signed by representatives of NASA-KSC and FPL. The ECR shall set forth those

HEARING EXHIBIT - 00000573

environmental conditions and matters affecting the leased Property known as of the Commencement Date as determined from records of the leased Property and the analysis reflected therein.

5.2 Site Development Plan. FPL shall submit for NASA-KSC approval a Site Development Plan for each Phase, as well as for the NASA PV Facility. Each such Site Development Plan shall be consistent with the previously completed Environmental Assessment, addressing any mitigation required therein, and shall show perimeter controls, access points, internal roadways, structures, storm water retention or drainage, and any other site improvements. FPL shall be responsible for ensuring that its contractors construct the FPL PV Facility and the NASA PV Facility in accordance with the NASA-approved Site Development Plans. Each approved Site Development Plan for each Phase of the FPL PV Facility shall be incorporated into this Lease as Exhibit A-1. The approved Site Development Plan for the NASA PV Facility shall be incorporated into this Lease as Exhibit B-1. The Environmental Assessment covering all leased Property is incorporated as Exhibit C.

5.3 Site Development Permits. FPL shall obtain from NASA-KSC excavation permits and/or environmental permits as may be required to perform site development and restoration.

5.4 Land Clearing Waste. All waste resulting from land clearing shall be disposed of off NASA-KSC property or disposed of through the use of appropriate NASA-KSC-approved controlled burning techniques.

ARTICLE 6 DESIGN AND CONSTRUCTION OF FACILITIES

6.1 FPL PV Facility. FPL shall design and construct the FPL PV Facility and the utility grade interconnection systems in compliance with all applicable local, state, and Federal laws and regulations, including Chapter 373, Florida Statutes. FPL will provide to NASA-KSC, for information purposes only, copies of all specifications and design drawings, as well as a complete set of as-built drawings for each Phase of the FPL PV Facility completed.

6.2 NASA PV Facility. FPL shall design and construct the NASA PV Facility and the utility grade interconnection systems in compliance with all applicable local, state, and Federal laws and regulations, including Chapter 373, Florida Statutes. All NASA PV Facility specifications, as well as design drawings at the 45 and 90 percent level of completion shall be submitted to NASA-KSC for approval. NASA-KSC shall be furnished a copy of the final 100 percent design drawings. In the event that NASA-KSC does not approve or disapprove such specifications within five (5) business days after receipt, then the specifications shall be deemed to be approved. In the event that NASA-KSC requires additional equipment or design changes that exceed the requirements or capabilities of the equipment and design installed in the FPL PV Facility, and are not otherwise required to correct a material adverse impact to NASA-KSC property or

HEARING EXHIBIT - 00000574

distribution facilities, NASA-KSC will be responsible to provide any engineering, supply, delivery, installation, construction, and testing of such equipment or design. Upon completion of the NASA PV Facility, FPL shall provide to NASA-KSC all final specifications, as well as a complete set of as-built drawings.

6.3 Davis-Bacon Act Compliance. If the scope of work to be performed by FPL for the NASA PV Facility is determined to be subject to the requirements of Davis-Bacon, FPL and its contractor(s) shall comply with all wage determinations and other applicable provisions.

6.4 Warranties. FPL and its contractors shall take all steps necessary to ensure that NASA enjoys the benefits of all manufacturers' warranties of PV system equipment and installation, for any system or portion of system that is constructed for the benefit of NASA, however titled.

6.5 Final Completion. After FPL completes the construction of the NASA PV Facility, it shall notify NASA-KSC in writing of such completion. NASA-KSC shall inspect the NASA PV Facility within ten (10) business days of receiving such notice and give FPL written notice specifying any details of construction or mechanical adjustment which remain to be performed by FPL, and except for the details contained in such written notice from NASA-KSC, all obligations of FPL in regard to the construction of the NASA PV Facility shall be deemed to have been satisfied. With prior notice to NASA-KSC, FPL shall have the right to enter the NASA PV Facility to complete any such unfinished details. Final completion of the NASA PV Facility will be documented in writing by the NASA-KSC Director of Center Operations.

ARTICLE 7 OPERATION, MAINTENANCE, AND REPAIR

7.1 General Requirements. FPL, at its own expense, shall maintain and operate the FPL PV Facility and the NASA PV Facility throughout the term of this Lease. FPL shall perform preventive maintenance in accordance with the manufacturer of the FPL PV Facility and NASA PV Facility recommended maintenance schedule, as well as any greater standards of care and maintenance that may be required for public utility systems. FPL shall perform corrective maintenance or repairs, at its own expense, as required to keep the FPL PV Facility and NASA PV Facility operating at reasonable performance capability. In the event that repairs to the NASA PV Facility are necessary due to fire, natural disaster, or other casualty and such repairs do not arise out of the FPL's maintenance and operation of the NASA PV Facility, then such repairs shall be the responsibility of NASA-KSC.

7.2 Records and Notices. FPL shall maintain records of all preventive and corrective maintenance performed at the NASA PV Facility and shall submit copies of all such records to NASA-KSC on a quarterly basis. If power generation or connection at the NASA PV Facility must be interrupted for any length of time in order to perform preventive or corrective maintenance, FPL will provide notice of such requirement to

HEARING EXHIBIT - 00000575

NASA-KSC in accordance with the Spaceport Power Switching Memorandum of Understanding dated September 1, 2003, between NASA-KSC and FPL.

ARTICLE 8 ENVIRONMENTAL COMPLIANCE

8.1 Environmental Definitions. As used in this Lease, "**Hazardous Material**" shall mean any substance that is (a) defined under any Environmental Law (as defined below) as a hazardous substance, hazardous waste, hazardous material, pollutant, or contaminant; (b) a petroleum hydrocarbon, including crude oil or any fraction or mixture thereof; (c) hazardous, toxic, corrosive, flammable, explosive, infectious, radioactive, carcinogenic, or a reproductive toxicant; or (d) otherwise regulated pursuant to any Environmental Law. As used in this Lease, "**Environmental Law**" shall mean all Federal, state, and local laws, statutes, ordinances, regulations, rules, judicial and administrative orders and decrees, permits, licenses, approvals, authorizations, and similar requirements of all Federal, state, and local governmental agencies (including NASA-KSC) or other governmental authorities pertaining to the protection of human health and safety or the environment, now existing or later adopted during the Term. As used in this Lease, "**Lease Activities**" shall mean the lawful activities of FPL that are part of the ordinary course of FPL's business in accordance with the Permitted Use. As used in this Lease, "**Materials**" shall mean the materials handled, used, or stored by FPL in the ordinary course of conducting Lease Activities.

8.2 Environmental Requirements. FPL hereby agrees that (a) FPL shall not conduct, or permit to be conducted, on the leased Property any activity which is not a Lease Activity; (b) FPL shall not use, store or otherwise handle, or permit any use, storage, or other handling of, any Hazardous Material on or about or beneath the leased Property unless it is a material handled, used, or stored by FPL in the ordinary course of conducting Lease Activities; (c) all such materials shall be handled, used, or stored by FPL in accordance with applicable Environmental Law; (d) FPL shall obtain and maintain in effect all permits and licenses required pursuant to any Environmental Law for its Lease Activities and shall at all times comply with all applicable Environmental Laws; (e) FPL shall not engage in the storage, treatment, or disposal on or about or beneath the leased Property of any Hazardous Material except for temporary accumulation of Hazardous Material waste generated in the course of Lease Activities, which accumulation is conducted in accordance with applicable Environmental Law; (f) FPL shall not install any aboveground or underground storage tank or any subsurface lines for the storage or transfer of any Hazardous Material, except for the lawful discharge of waste to sanitary sewer; (g) FPL shall not cause or permit to occur any release of any Hazardous Material or any condition of pollution or nuisance on or about or beneath the leased Property, whether affecting surface water or groundwater, air, the land or the subsurface environment; and (h) if any release of a Hazardous Material to the environment, or any condition of pollution or nuisance, occurs on or about or beneath the leased Property as a result of any act or omission of FPL, its agents, employees, contractors, subcontractors, invitees, or licensees, FPL, at its sole cost and expense, shall promptly undertake all remedial measures required to clean up and abate or otherwise

HEARING EXHIBIT - 00000576

respond to the release, pollution, or nuisance in accordance with all applicable Environmental Laws. After notification to FPL, NASA-KSC and its duly appointed representatives shall have the right, but not the obligation, to enter the leased Property at any reasonable time for the purpose of inspecting the storage, use, and handling of any Hazardous Material on the leased Property in order to determine FPL's compliance with the requirements of this Lease and applicable Environmental Laws. If NASA-KSC gives written notice to FPL that FPL's use, storage, or handling of any Hazardous Material on the leased Property may not comply with this Lease or applicable Environmental Law, FPL shall correct any such violation within five (5) calendar days, or such other period to which the parties may mutually agree, after FPL's receipt of such notice from NASA-KSC. The liability of FPL under this section of this Lease shall survive the termination of this Lease with respect to acts or omissions that occur before such termination.

ARTICLE 9 UTILITIES AND MUNICIPAL SERVICES

9.1 Fire and Rescue. NASA-KSC shall provide fire and rescue services for the FPL PV Facility located on the leased Property at the Kennedy Space Center. FPL shall be responsible to install and/or obtain, at its own expense, any other utility or municipal service it may require.

ARTICLE 10 INDEMNIFICATION AND INSURANCE

10.1 Damage or Injury. Except as otherwise provided in this Lease, NASA-KSC shall not be liable to FPL, and FPL hereby waives and releases all claims against NASA-KSC, for any damage to, or loss or theft of, any property or for any bodily or personal injury, illness, or death of any person in, on, or about the leased Property arising at any time and from any cause whatsoever, unless the same is caused solely by the willful misconduct or gross negligence of NASA-KSC. FPL shall indemnify and defend NASA-KSC against and hold NASA-KSC harmless from all claims, demands, liabilities, damages, losses, costs, and expenses, including reasonable attorneys' fees and disbursements, arising from or related to any use or occupancy of the leased Property, or any condition of the leased Property, or any default in the performance of FPL's obligations under this Lease, or any damage to any property (including property of employees and invitees of FPL), or any bodily or personal injury, illness, or death of any person (including employees and invitees of FPL) occurring in, on, or about the leased Property or any part thereof arising at any time and from any cause whatsoever (unless the same is caused solely by the willful misconduct or gross negligence of NASA-KSC) , or occurring in, on, or about any part of the leased Property when such damage, bodily or personal injury, illness, or death is caused by any act or omission of FPL or its agents, employees, contractors, invitees, or licensees. This section of this Lease shall survive the termination of this Lease with respect to any damage, bodily or personal injury, illness, or death occurring prior to such termination.

HEARING EXHIBIT - 00000577

10.2 Insurance Coverages and Amounts. FPL acknowledges that any contractors working at the FPL PV Facility and NASA PV Facility shall obtain and keep the following insurance: (a) commercial general liability insurance, including contractual liability, broad form property damage liability, fire legal liability, products and completed operations, and medical payments, with limits not less than two million dollars ($2,000,000) per occurrence and aggregate, insuring against claims for bodily injury, personal injury, and property damage arising from the use, occupancy, or maintenance of the leased Property; (b) business auto liability insurance with limits not less than one million dollars ($1,000,000) per accident covering owned, hired, or non-owned vehicles; (c) workers' compensation insurance for all of its employees in statutory limits as required by Florida law; and (d) employers'liability insurance which affords not less than five hundred thousand dollars ($500,000) for each coverage. FPL, at its option, may maintain all risk property insurance for all personal property, trade fixtures, and equipment of FPL installed by FPL in the leased Property and may obtain business income and extra expense coverage. Any assignees or sublessees under this Lease shall also be required to obtain and keep the foregoing insurance with such coverage amounts. Relating to all insurance coverage for the FPL PV Facility, FPL is self-insured and maintains a comprehensive property and liability insurance program with deductibles of two million dollars ($2,000,000) per occurrence. FPL shall provide NASA-KSC with evidence of such self-insurance prior to the Commencement Date. Relating to commercial general liability insurance coverage for the NASA PV Facility, NASA-KSC self-insures its own risk of loss from appropriations covering those liabilities for which NASA-KSC has waived its sovereign immunity pursuant to 28 U.S.C. 1346 *et seq.* or other applicable statute.

10.3 Insurance Requirements.

(a) Except as otherwise provided herein, all insurance and all renewals thereof shall be issued by companies with a rating of at least "A- VIII" (or its equivalent successor) or better in the current edition of Best's Insurance Reports (or its equivalent successor or, if there is no equivalent successor rating, otherwise acceptable to NASA-KSC) and be licensed to do and doing business in Florida.

(b) Except as otherwise provided herein, each policy shall be endorsed to provide that the policy shall not be canceled or materially altered without thirty (30) days prior written notice to NASA-KSC and shall remain in effect notwithstanding any such cancellation or alteration until such notice shall have been given to NASA-KSC and such period of thirty (30) days shall have expired.

(c) Except as otherwise provided herein, the commercial general liability and any automobile liability insurance shall be endorsed to name NASA-KSC (and any other parties designated by NASA-KSC) as an additional insured, shall be primary and noncontributing with any insurance which may be carried by NASA-KSC, and shall afford coverage for all claims based on any act, omission, event, or condition that occurred or arose (or the onset of which occurred or arose) during the policy period.

HEARING EXHIBIT - 00000578

(d) In the event that FPL assigns the Lease or sublets the leased Property, then such assignee or sublessee shall deliver certificates of insurance and endorsements to NASA-KSC at least ten (10) days before the transfer date between FPL and the assignee or the sublessee and at least ten (10) days before expiration of each policy. Such documents shall be delivered to the address for certificate holder set forth below. Each certificate of insurance shall list the certificate holder as follows:

National Aeronautics and Space Administration
John F. Kennedy Space Center
Attn: Office of the Chief Counsel
Mail Code: CC
Kennedy Space Center, FL 32899

(e) If NASA-KSC at any time believes that the limits or extent of coverage or deductibles with respect to any of the insurance required in this Lease are insufficient, NASA-KSC may determine the proper and reasonable limits and extent of coverage and deductibles for such insurance, and such insurance shall thereafter be carried with the limits and extent of coverage and deductibles as so determined until further change pursuant to the provisions of this Lease.

10.4 Subrogation. In the event that FPL assigns the Lease or sublets the leased Property, the assignees or sublessees shall waive, under all policies of insurance now or hereafter carried by the assignees or sublessees insuring or covering the leased Property or any operation thereof, all rights of subrogation which any such insurer may have to any claims of the assignees or sublessees against NASA-KSC. Assignees or sublessees shall procure from each of the insurers under all such policies of insurance a waiver of all rights of subrogation which the insurer might otherwise, if at all, have to any claims of assignees or sublessees against NASA-KSC by obtaining from the insurer the following statement: "The insurer waives any right of subrogation against the United States of America which might arise by reason of any payment made under this policy."

ARTICLE 11 RESTORATION OF THE PROPERTY

11.1 General Requirements. On or before the expiration of this Lease, or upon its earlier termination pursuant to this Lease, all buildings, fixtures, equipment, and any other improvements made by FPL to the leased Property, whether temporary or permanent in character, shall be removed and properly disposed of by FPL, and FPL shall restore the leased Property to a cleared, graded condition or to a condition satisfactory to NASA-KSC within a reasonable time. Should FPL fail or neglect to remove said property and restore the leased Property within a reasonable time, then at the option of NASA-KSC, the buildings, fixtures, equipment, and any other improvements made by FPL on the leased Property shall either become the property of the United States without compensation to FPL therefore, or NASA-KSC may cause the buildings, fixtures, equipment, and other improvements made by FPL to be removed at the expense of FPL, and FPL shall have no claim for damages against the United States, its officers, or agents

HEARING EXHIBIT - 00000579

on account of such removal and restoration work. FPL shall pay the United States within thirty (30) days after receiving a copy of any written invoices any reasonable sum which may be expended by NASA-KSC in accomplishing the restoration of the leased Property pursuant to this section of this Lease.

11.2 Environmental Condition Report Furnished to NASA-KSC. Upon completion of the restoration of the leased Property pursuant to this section, FPL shall prepare, at its own expense, and submit to NASA-KSC an updated ECR, to be acknowledged and signed by representatives of NASA-KSC and FPL. The ECR shall set forth those environmental conditions and matters affecting the leased Property known as of the restoration date, based on all known activities that have occurred at the leased Property as well as information contained in the records of the leased Property and the analysis reflected therein. FPL shall not be obligated to remedy any environmental conditions and matters affecting the leased Property that are not a result of FPL's Lease Activities on the leased Property.

ARTICLE 12 ASSIGNMENT OR SUBLEASE

12.1 Prohibition. Except as otherwise provided herein, FPL shall not, directly or indirectly, without the prior written consent of NASA-KSC (which consent may be not be arbitrarily withheld), assign this Lease or any interest herein, or sublease the leased Property or any part thereof, or permit the use or occupancy of the leased Property by any person or entity other than FPL. FPL shall not, directly or indirectly, without the prior written consent of NASA-KSC (which consent may not be arbitrarily withheld), pledge, mortgage, or hypothecate this Lease or any interest herein. This Lease shall not, nor shall any interest herein, be assignable as to the interest of FPL involuntarily or by operation of law without the prior written consent of NASA-KSC (which consent may not be arbitrarily withheld or delayed). FPL agrees that the instrument by which any assignment or sublease through which NASA-KSC's consent is accomplished shall expressly provide that the assignee or sublessee will perform all of the covenants to be performed by FPL under this Lease (in the case of a sublease, only insofar as such covenants relate to the portion of the leased Property subject to such sublease) as and when performance is due after the effective date of the assignment or sublease and that NASA-KSC will have the right to enforce such covenants directly against such assignee or sublessee. Any purported assignment or sublease without an instrument containing the foregoing provisions shall be void. FPL shall be permitted to assign the Lease or sublet all or any portion of the leased Property without the prior written consent of NASA-KSC if the assignee or sublessee's interest in the Lease arises out of the transfer of any of the following: (1) all of FPL's assets; (2) the transfer of FPL's assets incident to a merger or corporate consolidation; or (3) a stock purchase by FPL or of FPL by an assignee or sublessee.

12.2 NASA-KSC's Consent or Termination. Except as otherwise provided herein, if FPL wishes to assign this Lease or sublease all or any part of the leased Property, FPL shall give written notice to NASA-KSC identifying the intended assignee

HEARING EXHIBIT - 00000580

or sublessee by name and address and specifying all of the terms of the intended assignment or sublease. FPL shall give NASA-KSC such additional information concerning the intended assignee or sublessee (including complete financial statements and a business history) or the intended assignment or sublease (including true copies thereof) as NASA-KSC requests. Except as otherwise provided herein, for a period of thirty (30) days after such written notice is given by FPL, NASA-KSC shall have the right, by giving written notice to FPL, to consent in writing to the intended assignment or sublease, unless NASA-KSC determines not to consent.

12.3 Completion. If NASA-KSC consents in writing, FPL may complete the intended assignment or sublease subject to the following covenants: (a) the assignment or sublease shall be on the same terms as set forth in the written notice given by FPL to NASA-KSC, (b) no assignment or sublease shall be valid and no assignee or sublessee shall take possession of the leased Property or any part thereof until an executed duplicate original of such assignment or sublease has been delivered to NASA-KSC, and (c) all "excess rent" (as defined below) derived from such assignment or sublease shall be paid to NASA-KSC. Such excess rent shall be deemed to be, and shall be paid by FPL to NASA-KSC as, additional rent. FPL shall pay such excess rent to NASA-KSC immediately as and when such excess rent becomes due and payable to FPL. As used in this section of this Lease, "**excess rent**" shall mean the amount by which the total money and other economic consideration to be paid by the assignee or sublessee as a result of an assignment or sublease, whether denominated rent or otherwise, exceeds, in the aggregate, the total amount of rent which FPL is obligated to pay to NASA-KSC under this Lease (prorated to reflect the rent allocable to the portion of the Property subject to such assignment or sublease), less only the reasonable costs paid by FPL for additional improvements installed in the portion of the Property subject to such assignment or sublease by FPL at FPL's sole cost and expense for the specific assignee or sublessee in question, without deduction for carrying costs due to vacancy or otherwise. Such costs of additional improvements shall be amortized without interest over the term of such assignment or sublease.

12.4 FPL Not Released. Except as otherwise provided herein, no assignment or sublease shall release FPL from FPL's obligations and liabilities under this Lease or alter the primary liability of FPL to pay all rent and to perform all obligations to be paid and performed by FPL. In the event that an assignee has a net worth in excess of fifty million dollars ($50,000,000), then FPL shall be released from any obligations and liability under the Lease as of the date of such assignment. No assignment or sublease shall amend or modify this Lease in any respect, and every assignment and sublease shall be subject and subordinate to this Lease. The acceptance of rent by NASA-KSC from any other person or entity shall not be deemed to be a waiver by NASA-KSC of any provision of this Lease. Consent to one assignment or sublease shall not be deemed consent to any subsequent assignment or sublease. FPL shall pay to NASA-KSC all direct costs and shall reimburse NASA-KSC for all expenses incurred by NASA-KSC in connection with any assignment or sublease requested by FPL which shall not exceed five hundred dollars ($500). Except as otherwise provided herein, if any assignee, sublessee, or successor of FPL defaults in the performance of any obligation to be performed by FPL under this

HEARING EXHIBIT - 00000581

Lease, NASA-KSC may proceed directly against FPL without the necessity of exhausting remedies against such assignee, sublessee, or successor.

ARTICLE 13 EVENTS OF DEFAULT AND REMEDIES

13.1 Default by FPL. The occurrence of any one or more of the following events ("**Event of Default**") shall constitute a breach of this Lease by FPL:

(a) FPL fails to provide the consideration required under this Lease, or other amount of money or charge payable by FPL, and such failure continues for more than sixty (60) days after written notice from NASA-KSC that such consideration becomes due or payable; or

(b) FPL fails to perform or breaches any other agreement or covenant of this Lease to be performed or observed by FPL as and when performance or observance is due, and such failure or breach continues for more than thirty (30) days after NASA-KSC gives written notice thereof to FPL; provided, however, that if, by the nature of such agreement or covenant, such failure or breach cannot reasonably be cured within such period of thirty (30) days, an Event of Default shall not exist as long as FPL commences with due diligence and dispatch the curing of such failure or breach within such period of thirty (30) days and, having so commenced, thereafter prosecutes with diligence and dispatch and completes the curing of such failure or breach; or

(c) FPL (i) files, or consents by answer or otherwise to the filing against it of, a petition for relief or reorganization or arrangement or any other petition in bankruptcy or for liquidation or to take advantage of any bankruptcy, insolvency, or other debtors' relief law of any jurisdiction, (ii) makes an assignment for the benefit of its creditors, or (iii) consents to the appointment of a custodian, receiver, trustee, or other officer with similar powers of FPL or of any substantial part of FPL's property; or

(d) Without consent by FPL, a court or government authority enters an order, and such order is not vacated within thirty (30) days, (i) appointing a custodian, receiver, trustee, or other officer with similar powers with respect to FPL or with respect to any substantial part of FPL's property, or (ii) constituting an order for relief or approving a petition for relief or reorganization or arrangement or any other petition in bankruptcy or for liquidation or to take advantage of any bankruptcy, insolvency, or other debtors' relief law of any jurisdiction, or (iii) ordering the dissolution, winding-up, or liquidation of FPL; or

(e) This Lease or any estate of FPL hereunder is levied upon under any attachment or execution and such attachment or execution is not vacated within thirty (30) days; or

(f) FPL abandons the Property.

HEARING EXHIBIT - 00000582

13.2 Termination. If an Event of Default occurs, NASA-KSC shall have the right at any time to give a written termination notice to FPL, and on the date specified in such notice, FPL's right to possession shall terminate and this Lease shall terminate. Upon such termination, NASA-KSC shall have the full and immediate right to possession of the leased Property and NASA-KSC shall have the right to recover from FPL all amounts of money or charges otherwise due under this Lease, including but not limited to amounts due for restoration of the leased Property. Termination under this Article shall create no liability on the part of NASA-KSC for FPL's capital costs of construction, maintenance, operation, upgrade, or removal of facilities, and such costs shall not be recoverable from NASA-KSC.

13.3 Continuation. If an Event of Default occurs, this Lease shall continue in effect for so long as NASA-KSC does not terminate FPL's right to possession, and NASA-KSC shall have the right to enforce all its rights and remedies under this Lease, including the right to recover the consideration due under this Lease. Acts of maintenance or preservation or efforts to relet the leased Property or the appointment of a receiver upon initiative of NASA-KSC to protect NASA-KSC's interest under this Lease shall not constitute a termination of FPL's right to possession unless written notice of termination is given by NASA-KSC to FPL.

13.4 Remedies Cumulative. Subject to Section 15.5, upon the occurrence of an Event of Default, NASA-KSC shall have the right to exercise and enforce all rights and remedies granted or permitted by law. The remedies provided for in this Lease are cumulative and in addition to all other remedies available to NASA-KSC at law or in equity by statute or otherwise. Exercise by NASA-KSC of any remedy shall not be deemed to be an acceptance of surrender of the leased Property by FPL, either by agreement or by operation of law.

13.5 FPL's Primary Duty. All agreements and covenants to be performed or observed by FPL under this Lease shall be at FPL's sole cost and expense and without any abatement of rent. If FPL fails to pay any sum of money to be paid by FPL or to perform any other act to be performed by FPL under this Lease, NASA-KSC shall have the right, but shall not be obligated, and without waiving or releasing FPL from any obligations of FPL, to make any such payment or to perform any such other act on behalf of FPL in accordance with this Lease. All sums so paid by NASA-KSC and all costs incurred or paid by NASA-KSC shall be deemed additional rent hereunder and FPL shall pay the same to NASA-KSC within thirty (30) days after receipt of written invoices, together with interest on all such sums and costs from the date of expenditure by NASA-KSC to the date of repayment by FPL at the rate of 10 percent per annum.

13.6 Abandoned Property. If FPL abandons the leased Property, or is dispossessed by process of law or otherwise, all alterations, additions, fixtures, and improvements made by FPL and left in the leased Property, and all buildings, fixtures, equipment, and other improvements belonging to FPL and left at the leased Property, shall be deemed to be abandoned. NASA-KSC may retain the same, or at the option of

HEARING EXHIBIT - 00000583

NASA-KSC, sell or otherwise dispose of the same in any commercially reasonable manner.

13.7 Default by NASA-KSC. If NASA-KSC defaults under this Lease, FPL shall give written notice to NASA-KSC specifying such default with particularity, and NASA-KSC shall have sixty (60) days after receipt of such notice within which to cure such default. In the event of any default by NASA-KSC, FPL's exclusive remedy shall be an action for damages against NASA-KSC as an agency of the United States.

ARTICLE 14 NOTICES

14.1 Method. Except as otherwise specifically provided in this Lease, all requests, approvals, consents, notices, and other communications under this Lease shall be properly given only if made in writing and either deposited in the United States mail, postage prepaid and certified with return receipt requested, or delivered by hand (which may be through a messenger or recognized delivery, courier, or air express service), or sent via facsimile or electronic mail, and addressed to the applicable party as specified in this Lease below (or such other personnel or place as a party may from time to time designate in a written notice to the other party). Such requests, approvals, consents, notices, and other communications shall be effective on the date of receipt (evidenced by the certified mail receipt) if delivered by United States mail; of hand delivery if hand delivered; or of transmission as evidenced by a machine-generated receipt or proof of transmission if sent via facsimile or electronic mail. If any such request, approval, consent, notice, or other communication is not received or cannot be delivered due to a change in the address of the receiving party, of which notice was not previously given to the sending party, or due to a refusal to accept by the receiving party, such request, approval, consent, notice, or other communication shall be effective on the date delivery is attempted. Any request, approval, consent, notice, or other communication under this Lease may be given on behalf of a party by the attorney for such party.

HEARING EXHIBIT - 00000584

14.2 Close Calls and Mishaps.

(a) For purposes of this Lease, the following terms shall have the following meanings: (i) "**Close Call**" shall mean an occurrence or a condition of employee concern in which there is no injury, or only minor injury requiring first aid, or damage to property or equipment of less than one thousand dollars ($1000), but which possesses a potential to cause a Mishap (as defined below); and (ii) "**Mishap**" shall mean an unplanned event on or about the leased Property and arising from the acts or omissions of FPL or its employees, agents, contractors, or invitees that results in at least one of the following: (1) injury to any person; (2) damage to public or private property (including foreign property); (3) occupational injury or occupational illness to any person; or (4) failure of a NASA mission. FPL shall report all Close Calls or Mishaps to NASA-KSC by telephoning the NASA-KSC Safety and Mission Assurance Directorate at 321-867-7911 (321-867-SAFE). If emergency response is required due to an injury, fire, release of hazardous materials or serious damage, call 911 (321-867-7911 from a cell phone).

(b) In addition, if a Mishap involves the death of an employee, or the hospitalization for inpatient care of three or more employees, then as soon as possible after the Mishap but in no event more than eight hours after FPL has knowledge of any such Mishap, FPL shall notify both the Occupational Safety and Health Administration ("**OSHA**") by telephoning the area office nearest the site of the Mishap or OSHA's toll-free number, 800–321–6742, and the NASA-KSC Safety and Mission Assurance Directorate at 321-867-7911 (321-867-SAFE).

(c) NASA-KSC reserves the right, to be exercised in its sole discretion, to investigate any Mishap in accordance with NASA-KSC's policies and procedures. FPL shall cooperate in any such investigation. If FPL conducts an independent Mishap investigation, FPL shall provide KSC with a copy of the final Mishap report.

ARTICLE 15 MISCELLANEOUS

15.1 General. The words "NASA-KSC" and "FPL" as used herein shall include the plural as well as the singular. If there is more than one FPL, the obligations hereunder imposed upon FPL shall be joint and several. Time is of the essence of this Lease and each and all of its provisions. This Lease shall benefit and bind NASA-KSC and FPL and the permitted personal representatives, heirs, successors, and assigns of NASA-KSC and FPL. If any provision of this Lease is determined to be illegal or unenforceable, such determination shall not affect any other provision of this Lease, and all such other provisions shall remain in full force and effect. FPL shall not record this Lease or any memorandum or short form of it.

15.2 No Waiver. The waiver by NASA-KSC or FPL of any breach of any covenant in this Lease shall not be deemed to be a waiver of any subsequent breach of the same or any other covenant in this Lease, nor shall any custom or practice which may

HEARING EXHIBIT - 00000585

grow up between NASA-KSC and FPL in the administration of this Lease be construed to waive or to lessen the right of NASA-KSC or FPL to insist upon the performance by NASA-KSC or FPL in strict accordance with this Lease. The subsequent acceptance of rent hereunder by NASA-KSC or the payment of rent by FPL shall not waive any preceding breach by FPL of any covenant in this Lease, nor cure any Event of Default, nor waive any forfeiture of this Lease or unlawful detainer action.

15.3 Exhibits. The exhibits referred to in this Lease are hereby incorporated and made a part of this Lease.

15.4 Broker(s). FPL warrants and represents to NASA-KSC that FPL has negotiated this Lease directly with NASA-KSC and has not authorized or employed, or acted by implication to authorize or to employ, any other real estate broker to act for FPL in connection with this Lease.

15.5 Damages. NASA-KSC and FPL each hereby expressly, irrevocably, fully, and forever releases, waives, and relinquishes any and all right to receive punitive, exemplary, and consequential damages from the other (or any past, present, or future member, trustee, director, officer, employee, agent, representative, or advisor of the other) in any claim, demand, action, suit, proceeding, or cause of action in which NASA-KSC and FPL are parties, which in any way (directly or indirectly) arises out of, results from, or relates to, any of the following, in each case whether now existing or hereafter arising and whether based on contract or tort or any other legal basis: This Lease; any past, present, or future act, omission, conduct, or activity with respect to this Lease; any transaction, event or occurrence contemplated by this Lease; the performance of any obligation or the exercise of any right under this Lease; or the enforcement of this Lease. NASA-KSC and FPL reserve the right to recover actual damages, with interest, attorneys' fees, costs, and expenses as provided in this Lease, for any breach of this Lease.

15.6 Entire Agreement. There are no oral agreements between NASA-KSC and FPL affecting this Lease, and this Lease supersedes and cancels any and all previous negotiations, arrangements, brochures, offers, agreements, and understandings, oral or written, if any, between NASA-KSC and FPL or displayed by NASA-KSC to FPL with respect to the subject matter of this Lease, the leased Property. There are no commitments, representations, or assurances between NASA-KSC and FPL or between any real estate broker and FPL other than those expressly set forth in this Lease, and all reliance with respect to any commitments, representations, or assurances is solely upon commitments, representations, and assurances expressly set forth in this Lease. This Lease may not be amended or modified in any respect whatsoever except by an agreement in writing signed by NASA-KSC and FPL.

15.7 Governing Law. NASA-KSC and FPL agree to first attempt to settle any dispute arising out of or in connection with this Lease by good-faith negotiation. If the parties are unable to resolve amicably any dispute arising out of or in connection with this Lease, each shall have all remedies available at law or in equity. U.S. Federal law

HEARING EXHIBIT - 00000586

governs this Lease for all purposes, including, but not limited to, determining the validity of this Lease, the meaning of its provisions, and the rights, obligations and remedies of the Parties. NASA-KSC and FPL consent and agree that any legal proceeding involving this Lease, or the activities conducted under this Lease, which involves the United States, NASA-KSC, its Administrator, or any of its officials or employees, shall be brought in an Administrative Court or Federal Court of competent jurisdiction. FPL shall, at its sole cost and expense, promptly comply with all applicable Federal, state, and local laws.

15.8 Taxes and Assessments. FPL shall pay, to the applicable taxing authority upon written demand and prior to delinquency, all taxes, assessments, excises, levies, fees, and charges, including all payments related to the cost of providing facilities or services, of every kind and description, general or special, ordinary or extraordinary, foreseen or unforeseen, secured or unsecured, whether or not now customary or within the contemplation of NASA-KSC and FPL (collectively "**Taxes**"), that are levied, assessed, charged, confirmed, or imposed by any public or government authority upon or against, or measured by, or reasonably attributable to, the leased Property or any part thereof or any improvements constructed upon. FPL may contest the legal validity or amount of any Taxes for which it is responsible under this Lease, and may institute such proceedings as it considers necessary to recover or reduce its Taxes, provided that FPL shall bear all expenses in pursuing such contest or proceeding. FPL shall not pay any Taxes that are attributable to the NASA PV Facility.

15.9 Anti-Deficiency Act. NASA-KSC's ability to perform its obligations under this Lease is subject to the availability of appropriated funds. Nothing in this Lease commits the United States Congress to appropriate funds for the purposes stated herein (pursuant to the Anti-Deficiency Act, 31 U.S.C. §1341).

15.10 Authority. NASA-KSC is the sole owner of the leased Property and has the unrestricted right and authority to sign this Lease and to grant FPL the rights granted in this Lease. There are no mortgages encumbering the leased Property

15.11 Successors and Assigns. The terms and provisions of this Lease shall run with the land and be binding on and inure to the benefit of the heirs, successors, assigns and personal representatives of the Parties. NASA-KSC agrees to promptly notify FPL upon the transfer of any interest in the leased Property.

15.12 Quiet Enjoyment. FPL may peaceably and quietly have, hold, and enjoy the leased Property during the Term, and except as otherwise provided in this Lease, NASA-KSC shall take no action regarding the leased Property that will interfere with the Permitted Use.

HEARING EXHIBIT - 00000587

IN WITNESS WHEREOF, NASA-KSC and FPL have executed this Lease as of the latter date set forth below:

FPL:
Florida Power and Light Company,
A Florida Corporation

By: _____
Eric E. Silagy,
Vice President of Development

Date: June 25, 2008

NASA-KSC:
NATIONAL AERONAUTICS AND SPACE ADMINISTRATION,
an Agency of the United States

By _____
W. W. Parsons
Director, John F. Kennedy Space Center

Date: 6/24/08

Note: This exhibit represents the escalated and present value of rental payments for Phase I land based on the highlighted assumptions above. It assumes that Phase I begins in August of 2008 and price escalation occurs at the beginning of each contract year. The present value of the rental payments for Phase II will be based on this same calculation, with the exception that the assumptions can change based on mutual acceptance by both parties. The Subtotal in Contract Year 30 includes 30 years of operation, maintenance and capital replacement costs with a value of $1,200,000, the net present value of which is $400,000. The remaining $6,359,027 represents installed capital costs of the NASA PV Facility.

9

FPL's response to Staff's First Set of Interrogatories (Nos. 1 – 15)

Q.

Section 4 of FPL's petition indicates that the Utility Water Act Group (UWAG), of which FPL is a member, has petitioned for a writ of certiorari seeking to have the Supreme Court review the Second Circuit's ruling. Section 6 of the petition indicates that FPL is going to take two actions to help limit the compliance cost impact of potential revisions to the Phase II Rule on FPL and its customers. Based upon FPL's knowledge and best understanding, please explain:

a) What would be the chance of success in getting the writ of certiorari;

b) What would be the chance of success in receiving a favorable ruling from the Supreme Court;

c) What would be the chance of success for FPL's actions proposed in Section 6?

A.

a) On April 11, 2008, the Supreme Court has granted *certiorari* to the Utility Water Act Group (UWAG), PSEG and Entergy in the *Riverkeeper II* case regarding the issue of whether the Clean Water Act authorizes the EPA to compare costs with benefits in determining the best technology available (BTA) for minimizing adverse environmental impact at cooling water intake structures. The Supreme Court will only be reviewing the cost-benefit issue. They will not be reviewing the Second Circuit decision on restoration (i.e. that restoration is not allowed to be used for impact reduction).

b) The chance of success is unknown at this time. However the fact that the Supreme Court chose this case out of the 18 pages of cases that were requested to be reviewed is encouraging. In addition, the Solicitor General filed a "Brief for the Federal Respondents in Opposition" (Attachment 1), on behalf of EPA that stated under "Argument" on Page 9,

> "1. Petitioners (i.e. UWAG, PSEG and Entergy) contend that the court of appeals erred in holding that, in determining BTA, EPA may not consider the relationship between a technology's cost and benefits. The government agrees."
>
> Therefore, the Solicitor General will be arguing, along with UWAG, that the cost-benefit test should be allowed to achieve compliance in the 316 (b) Phase II Rule.

c) The chance of success is unknown at this time. However, conversations with EPA rule-writers have indicated that technological and legal arguments that can support the rule-making effort (i.e. don't conflict with the Second Circuit remands or the Supreme Court decision) will be considered, which is a positive indication for the chances of success. Also, if states, such as Florida are willing to submit comments during the rule-making process, those comments will be given a great deal of weight.

Q.

Section 4 of the petition points out that the EPA has reinitiated rulemaking to address the areas of the Phase II Rule that were remanded by the Second Circuit. Please provide FPL's best estimate of the date when the EPA rulemaking process will be completed.

A.

According to the most recent conversations with EPA (April 17, 2008), the EPA is proposing to issue a draft rule by December 2008, with a final rule being published by late 2009. Obviously, this timeframe for publishing the final rule may change based on the outcome of the Supreme Court decision which will likely be published sometime during the summer of 2009.

Q.

Section 5 of the petition states that if the currently remanded provisions were removed from EPA's revised Phase II rule, the initial estimated compliance costs for retrofitting all FPL's affected facilities would exceed $1.5 billion.

a) Please identify or describe how this estimate was derived;

b) Please provide the cost components that contribute to the $1.5 billion.

A.

a) UWAG contracted the Electric Power Research Institute (EPRI), in conjunction with John Maulbetsch, a renowned cooling tower expert, to develop a "calculator" that will estimate the cost of retrofitting cooling towers onto an existing power plants. Factors considered are cooling water flow, difficulty of the retrofit (i.e. spatial, locational, geology, etc. issues), as well as many other factors. This calculator has been reviewed by EPA and the results from this effort will be submitted to EPA as part of the rule-making process. While final values will not be available until this fall, it is believed that the costs submitted will be in the same range as those provided herein with the exception of the retrofit cost at St. Lucie. EPRI is finding as they move through the process that retrofitting nuclear plants is substantially more expensive than first believed and certainly more expensive that retrofitting similarly sized fossil units.

b) See the following table for cost components. The $1.5 billion is only the capital cost. As shown in the documents that are provided in response to Request No. 2 in Staff's First Request for Production of Documents, there are substantial O&M costs, parasitic power requirements and heat rate penalties as well.

Plant	Capital
Cape Canaveral	$228
Cutler	$61
Ft. Myers	$210
Lauderdale	$106
Port Everglades	$361
Riviera	$163
Sanford Unit 3	$48
St. Lucie	$404
Total	$1,581

* Costs based on EPRI Model - November 2007

Q.

On April 13, 2007, FPL notified the Commission of EPA's decision to suspend the rule, and FPL's decision to continue its Comprehensive Demonstration Studies (CDS), irrespective of the ultimate outcome of EPA's further rulemaking (Section 5 of the LaBauve Affidavit).

a) Please identify the deadline (that EPA set up before the suspension of Phase II rule) for FPL submitting to the EPA a CDS;

b) Please identify the time line that FPL currently has for finishing its CWS in light of the changed circumstances regarding the Phase II rule;

c) Please provide up-to-date information regarding the data collection, analysis, and high level technology evaluation activities carried out and/or planned to be carried out in all FPL's facilities in support of submitting a CDS to the EPA.

A.

a) and b) See the following table for responses.

"Phase II" Plant	CDS deadline for Submittal Pre - Rule Suspension	Post-Rule Suspension
Cutler	1/7/2008	7/21/2010
St. Lucie	1/7/2008	7/23/2010
Port Everglades	3/18/2008	3/18/2008
Lauderdale	6/17/2008	6/17/2008
Riviera	8/12/2008	8/12/2008
Ft. Myers	11/14/2008	11/14/2008
Cape Canaveral	8/9/2010	8/9/2010
Sanford Unit 3	8/15/2006	8/15/2006

c) FPL is carrying out data collection, analysis and high level technology evaluation, as required to meet the FDEP's CDS expectations that apply while the 316(b) Phase II rule is remanded and the FDEP is therefore addressing the 316 (b) requirements in the NPDES permitting process by using the Best Professional Judgment (BPJ) approach that the FDEP had relied upon prior to the Phase II rule.

Q.

In Section 6 of the petition FPL states that it believes it is prudent for the company to take two actions to help limit the compliance cost impact of potential revisions to the Phase II Rule on FPL and its customers.

a) Section 366.8255 defines "environmental compliance cost" as "cost or expenses incurred by an electric utility in complying with environmental laws or regulations." Please explain how the above mentioned two actions could be defined as activities for complying with environmental laws or regulations rather than activities for changing/ making environmental laws or regulations.

b) FPL cited the "test" the Commission has adopted for determining whether costs qualify for ECRC recovery (PSC-94-0044-FOF-EI) "2. the activity is legally required to comply with a governmentally imposed environmental regulation ...." (Section 3 of the petition) Please explain how the above mentioned two actions could be defined as activities that are legally required to comply with the environmental regulation rather than activities for changing/making the regulation.

A.

A very similar issue was addressed in Docket No. 050007-EI, concerning FPL's request to recover the legal expenses associated with challenging the Clean Air Interstate Rule. In authorizing FPL to recover legal expenses prudently incurred for this challenge, the Commission made the following observations:

"We find that the definition of environmental compliance costs in Section 366.8255, Florida Statutes, includes prudently incurred litigation costs associated with FPL's complying with the Clean Air Interstate Rule. The costs of compliance with a rule and the cost of litigating the legitimacy of a rule are closely linked. To comply with a rule, the utility must understand the rule, and whether the rule is consistent with the statute under which it was adopted. If there is a legitimate argument that the rule is not consistent with the statute being implemented then the utility may recover the costs of challenging the rule through the ECRC."

Order No. PSC-05-1251-FOF-EI, dated December 22, 2005, at page 13.

FPL believes that the Commission expects utilities to take steps to control the level of costs that must be incurred for environmental compliance. Sometimes, an effective way to control the costs of complying with a particular environmental law or regulation is to participate in the regulatory and legal processes involved in defining compliance. That is the case here, and FPL believes that the rationale expressed in Order No. PSC-05-1251-FOF-EI with respect to the Clean Air Interstate Rule applies with equal force to FPL's attempts to control the costs of complying with Section 316 (b).

Q.

Please clarify whether FPL would violate any federal, state, or local environmental statute, administrative regulation, order, ordinance, regulation or other requirement, should FPL chose not to implement the two actions described in Section 6 of the petition.

A.

See response to Interrogatory No. 5 regarding the Commission's observations on the costs of compliance with a rule and the cost of litigating the legitimacy of a rule.

Q.

Section 6 of the petition specifies "the first action is encouraging various government agencies to participate in support of UWAG's position before the Supreme Court, in the event that the (Supreme) Court grants certiorari with respect to the Second Circuit ruling."

a) Please explain when FPL will commence this action, given that the Supreme Court is expected to rule on UWAG's petition for certiorari in the Spring of 2008 (Section 14 of the LaBauve Affidavit);

b) Please clarify whether FPL would need to take this action should the certiorari not be granted.

A.

a) FPL plans to commence this action in May 2008. However, at this time, we are planning to use in-house resources to meet with the Governor, Attorney General and FDEP to encourage them to become active in this process. FPL does not expect the ECRC recovery for the costs of these actions to be substantial.

b) N/A

Q.

Section 6 of the petition indicates that "the second action is targeted at the EPA's rulemaking effort to address the Second Circuit's remand. FPL would need to educate various state and federal agencies in an attempt to have them support the rulemaking (and possibly legislative) process so that a balanced and equitable rule is achieved ..."

a) Please explain whether FPL has engaged in similar actions before to influence the outcome of an EPA rule remand and rule revision, the actions FPL took, the results of that action, and how FPL recovered its legal and consultant's costs;

b) Please provide a table of contents of the materials or a summary of the messages that FPL plans to educate/ convey to the various government agencies in the current case.

A.

a) Yes. FPL did engage in similar action associated with the Clean Air Interstate Rule (CAIR). FPL had actively participated in the EPA rulemaking process for CAIR through EPA and FDEP sponsored workshops and by filing comments on proposed rules. FPL decided to challenge the CAIR when the final rule included provisions which were not in the best interest of FPL's customers. FPL's challenge of CAIR was implemented through use of available legal approaches, the first of which was a request for reconsideration during the rulemaking process at EPA to reconsider four provisions of the rule. The second approach was a petition for judicial review that was filed in the DC Circuit Court of Appeals of the final CAIR for a review of EPA's authority to implement those provisions in the rule that FPL and other petitioners were challenging. The challenge of CAIR required that technical deficiencies in the EPA rulemaking process be identified. FPL met with other interested utilities within Florida under the guidance of outside counsel and created the Florida Association of Electric Utilities (FAEU) to challenge specific provisions of CAIR that were of interest to the FAEU membership. FPL also retained counsel to challenge remaining provisions of CAIR which were not included within the scope of the FAEU challenge. The FPL and FAEU challenge of EPA's Final CAIR included studies that were conducted through the use of expert consultants to review the technical merits of EPA's analyses, perform similar analyses, and determine where errors had been made by EPA in the rulemaking process. In the CAIR challenge FPL and FAEU were unable to obtain necessary changes during the rulemaking process and have continued the rule challenge through court appeal of the rule. Recovery of FPL's costs associated with the technical analyses and legal challenges to CAIR have been approved by the Commission and are currently being recovered through the Environmental Cost Recovery Clause.

b) FPL intends to convey the following messages to various government agencies:

a. Cost to customers

i. The $1.5 billion dollar cost of constructing cooling towers (the worst case outcome for a rule without cost-benefit considerations) would be borne by customers of FPL through the ECRC

1. For most or all of FPL facilities the impact to the environment does not warrant that cost.

2. Operating expenses for the cooling towers would also be extremely high.

b. Loss of efficiency/parasitic load from retrofitting plants with cooling towers

i. FPL's Phase II facilities were designed to use once-through cooling water for cooling purposes. Retrofitting with cooling towers, without replacing the condensers of those facilities would result in less cooling, greater turbine backpressure and therefore, reduced efficiency. Thus, each of these facilities would require more fuel and produce more air emissions to generate the same amount of energy as they currently produce.

ii. The parasitic load to operate the pumps and fans associated with the cooling towers would significantly exceed the current parasitic load so more of the produced electricity would be utilized by the facility rather than sold on the grid. One estimate has shown that the combination of lost efficiency and parasitic load would be approximately 57 MW for these 8 facilities.

c. Impact on manatees

i. Five of the FPL Phase II facilities have "manatee protection plans" included in their State Industrial Wastewater permits. These plans require those facilities to provide warm water refuges (currently designated as critical manatee habitat) for manatees during the winter. Cooling towers would not be able to provide adequate volumes of water at a high enough temperature to keep the manatees warm. Thus, installation of cooling towers would put FPL in a conflict between the Clean Water Act and the Endangered Species Act.

d. Use of Freshwater

i. Currently all but one of the Phase II facilities use salt or brackish water for condenser cooling purposes. In most cases, due to the locations of these facilities, having saltwater cooling towers would potentially negatively impact the surrounding residents, businesses, highways, etc.

ii. Freshwater cooling towers would require millions of gallons per day/per facility that would be evaporated for cooling purposes. With Florida starved for freshwater already, this does not seem to be a prudent choice. Not only that, but the water is just not available (from Water Management Districts - WMD's).

e. Spatial/Locational Issues

i. Construction of cooling towers at all 8 facilities would be challenging from a spatial/locational standpoint. While many of the plants were in rural areas when they were built, cities and commercial areas have grown up around them. Most facilities would have difficulty siting a cooling tower within their current property boundaries, or would have to site them fairly remotely from the plant which increases cost significantly.

ii. Most of the facilities are close to highways or airports that would be impacted by fogging associated with cooling towers. Plume abatement technology is very expensive and requires in most cases for the cooling towers to be in a single line, rather than "back-to-back". This adds to the spatial problems.

iii. The aesthetic and noise issues associated with cooling towers, locating them in residential areas, would also make siting difficult.

f. Nuclear (St. Lucie) issues

i. Retrofitting nuclear plants with cooling towers is even more expensive than fossil plants of similar size. This is due to additional costs for licensing, security issues, size of cooling towers required, etc.

ii. Nuclear plants have virtually no air emissions associated with their operation. As mentioned above, the decreased efficiency and parasitic load would require replacement energy which results in increased air emissions. This situation is more pronounced when a fossil plant will have to supply replacement power for a nuclear plant.

g. Desalination

i. FDEP and various WMD's have been having conversations with FPL in an attempt to collocate desalination plants in associate with power plants that use once-through cooling. This option would no longer exist with cooling towers as the purpose of this collocation is to have the desalination plants dilute their relatively small amount of "brine" effluent by mixing it with the power plant's large quantity of once-through cooling water.

Q.

The Phase II Rule established performance standards to reduce the mortality of aquatic organisms by cooling water intake structures at certain large electric generating plants (Section 4 of the LaBauve Affidavit). Such provisions (e.g. restoration and cost-benefit test eligibility) have been remanded now and FPL is seeking to keep these provisions in the EPA's revised Phase II Rule (Section 7 and Section 10 of the LaBauve Affidavit).

a) Please provide the rationale, in the perspective of environmental protection, of keeping the remanded provisions in the revised Phase II Rule.

b) Please explain how restoration (mitigation) can guarantee the same results of reductions in impingement mortality and entrainment of fish and shellfish in power plant intakes as a full retrofit. Please provide relevant scientific data to support the explanation.

A.

a) Section 316(b) of the Clean Water Act requires that, "...the location, design, construction, and capacity of cooling water intake structures reflect the best technology available (BTA) for **minimizing adverse environmental impact**". In the suspended Phase II Rule, EPA, as the federal agency responsible for protecting our environment, promulgated a rule that did not define "adverse environmental impact" (AEI) but, rather required Phase II facilities to achieve certain performance standards for reduction of impingement mortality and entrainment which EPA believed would be protective of the environment (particularly fish and shellfish). Since retrofitting facilities with dry cooling towers was prohibitively expensive and not efficient in many areas of the country, they based those performance standards on the reduction of impingement mortality and entrainment that would be achieved by using cooling towers and would not result in AEI. FPL is asking EPA to keep as much of the Phase II rule in place as possible. The cost-benefit portion was crucial because in many instances, certain technologies do not work or cause even bigger problems than they solve. In most cases, impingement numbers are very small and while most facilities might entrain billions of organisms, when these numbers of egg and larval organisms are converted to "adult equivalents" that number too, is relatively small. Thus, for the cost-benefit provision, EPA (supported by previous Circuit Court rulings) had decided in the Phase II Rule that the cost for a technology should not be significantly greater than the benefit derived. This prevents companies from having to spend hundreds of millions of dollars to install technologies such as cooling towers in situations where there is little or no adverse environmental impact.

b) FPL did not plan to rely on the restoration provision and therefore is not planning to expend any significant resources to "revive" it.

Q.

In Section 7 of the petition, FPL states that it believes it is prudent for the company to contract with various law firms and consultants.

a) Please specify the specialties those various law firms will utilize and the activities in which they will be involved;

b) Please also specify the specialties those consultants will utilize and the activities in which they will be involved.

A.

a) Attorneys

- Bracewell Giuliani – Assist FPL in taking regulatory compliance options/concepts and converting them to rules that would be defensible in future court proceedings. Assist in organizing contacts/meetings with various regulatory/legislative officials to discuss related issues. Agencies that Brace-Giuliani might contact would include the Environmental Protection Agency (at various levels), Department of Energy, Council on Environmental Quality, the Office of Management and Budgets, as well as others.

- Bill Horn (Attorney), Birch, Horton, Bittner and Cherot Law Firm-- Mostly contacts related to the manatee and other wildlife related issues. Agencies he might contact would include the US Fish and Wildlife Service, Florida Department of Environmental Protection, Florida Fish and Wildlife Conservation Service, and others.

b) Consultant –ENSR – Assist with generating cooling tower impact information, evaluation biological information and then providing this information to enhance/support EPA's rule making effort.

Q.

Section 8 of the petition indicates that the initial O&M estimate is $700,000;

a) Please provide the details (cost components) that contribute to the $700,000.

b)Please provide the estimate of the total O&M costs (FPL's share) that would be required for achieving the goals described in Section 4 and Section 6 of the petition:

(1)Having the Supreme Court review the Second Circuit's ruling;

(2)Achieving a balanced and equitable rule.

A.

a) FPL's initial O&M estimates assumed the following:

1. Bracewell – Giuliani: retainer - $45,000/month
2. Bill Horn - Birch, Horton, Bittner and Cherot: retainer - $10,000/month
3. ENSR - $33,000 total cost
4. Total Cost for 12 months - $693,000

However, the final proposal from the attorneys contained slightly lower costs so the new estimates are:

1. Bracewell – Giuliani: retainer - $35,000/month
2. Bill Horn: retainer - $6,000/month
3. ENSR - $33,000 total cost
4. Total Cost for 12 months - $525,000

Please note, that, due to the granting of certiorari review by the Supreme Court and the uncertainty in the Rulemaking process., it is now likely that most of the expenditures will take place somewhat later than originally anticipated -- in late 2008 and 2009, following the release of the proposed Phase II Rule.

b) 1) FPL does not presently anticipate making substantial expenditures in support of the Supreme Court review, because EPA, UWAG and other groups are already planning to support that effort. It is possible, however, that FPL will be required to incur costs to provide backup support to EPA and/or UWAG.

2) Almost the entire $525,000 would be focused on achieving a balanced and equitable rule, with possibly a push for new legislation, if required.

Q.

Section 8 of the petition indicates that FPL is attempting to arrange for other utilities to share the cost of the proposed activities. Please provide the details of the status of these arrangements for each such utility.

A.

To date, no other utilities have agreed to split costs. Please see the response to Interrogatory No. 11 concerning support of the Supreme Court review of the Second Circuit's remand decision. FPL has found that other utilities with large stakes in the outcome of this rulemaking are putting their resources into supporting the Supreme Court review, which means that FPL therefore does not have incur the substantial costs to do so. In turn, other utilities are looking to FPL to bear the cost of proceeding on the rulemaking front.

Q.
Please specify how much has been set in FPL's base rates for the environmental litigation and consulting costs.

A.
FPL's MFRs in Docket No. 050045-EI, which were based on FPL's 2006 budget, do not include any environmental legal or legal-related consulting costs.

Q.
Please identify what would be the litigation and consulting costs (towards achieving the goals described in Section 6 of the petition) that FPL will spend in 2008.

A.
FPL's current projection for 2008 litigation and consulting costs related to this petition is $50,000.

Q.

Please quantify FPL's 2008 environmental litigation and consulting expenses (adjusted for escalation) that will not be covered in FPL's base rates for 2008.

A.

FPL's MFRs in Docket No. 050045-EI, which were based on FPL's 2006 budget, do not include any environmental legal or legal-related consulting costs, therefore, FPL's current projection for 2008 litigation and consulting costs related to this petition of $50,000 will not be covered in FPL's base rates for 2008.

10

FPL's response to Staff's Second Set of Interrogatories (Nos. 16 – 17)

HEARING EXHIBIT - 00000619

Q.

Refer to Form 42-8A on page 29-30 of 43 of the Final True-up Filing Schedule regarding the Port Everglades ESP (Project No. 25). Please explain or describe how the figures in line 4 were derived.

A.

The figures on line 4 from January through May 2007 represent the balance in work order 1662-924 (Port Everglades Unit 3 Electrostatic Precipitator Installation) while the work order was in Construction Work in Progress. This work order was placed in-service in June 2007. Please refer to FPL's response to Staff Third Request for POD, Question No. 4.

Q.

Refer to Form 42-8A on page 39-40 of 43 of the Final True-up Filing Schedules regarding the Deferred Gain on Sales of Emission Allowance:

a. Please explain or describe how the figures in line 1d were derived.

b. Please explain or describe why FPL used the Energy Jurisdictional Factor and Demand Jurisdictional Factor that were provided in 2005 ECRC Order of this Commission (PSC-05-1251-FOF-EI, II. F) rather than using the Factors that were provided in 2006 ECRC Order (PSC-06-0972-FOF-EI, II. F) in calculating line 11 and 13.

A.

a. The figures in line 1d represents the balance in Account 254.900. Please see FPL's response to Staff's Third Request for POD, Question No. 5.

b. FPL inadvertently used the previous years factors in Form 42-8A pages 39-40 of 43. The factors on lines 9 and 10 and the results on lines 11 through 13 are shown for information purposes only. The actual jurisdictionalization, based on Order PSC-06-0972-FOF-EI, II. F, are shown on Forms 42-5A and 42-7A.

The O&M costs, (Amortization of Gains), are allocated to energy and jurisdictionalized on Form 42-5A. The capital costs, (Negative Return on Investment) are allocated to energy and jurisdictionalized on Form 42-7A.

Attached please find the revised Form 42-8A using the factors approved in the ECRC Order PSC-06-0972-FOF-EI.

Florida Power & Light Company
Environmental Cost Recovery Clause
For the Period January through June 2007

Schedule of Amortization of and Negative Return on
Deferred Gain on Sales of Emission Allowances
(in Dollars)

Line		Beginning of Period Amount	January Actual	February Actual	March Actual	April Actual	May Actual	June Actual	End of Period Amount

FPL's response to Staff's Third Set of Interrogatories (Nos. 18 – 33)

HEARING EXHIBIT - 00000624

Q.

Regarding Item 22, 31 and 32, respectively, on pages 12, 14 and 15 of FPL's Petition for Approval of Three Solar Energy Projects, please describe or explain what is the expected in-service date for the first portion of solar generation for each project; and what are the expected MWs for the first portion of solar generation for each project.

A.

Martin Solar: The Martin Solar project is currently in the process of design and optimization of the layout and configuration of the solar field and the steam plant. Once this process is completed, then an estimate of the amount of generation expected and a description of the intial configuration can be provided. If as part of the optimization process it is determined that it would not be cost effective to phase-in the solar generation, then the entire 75 MW is expected to be placed into service by the end of 2010.

DeSoto Solar: The current construction of Desoto PV solar field is scheduled to begin in January 2009 for completion in December 2009. The PV solar field will most likely be commissioned in stages beginning in July 2009 and continuing until December. The final startup schedule for the PV solar fields is currently being developed. It is anticipated that each phase will be 5 MW.

Space Coast Solar: The current construction of Space Coast PV solar field is scheduled to begin in September 2009 for completion in July 2010. Commissioning of the PV solar field will most likely be in stages of 2 MW increments beginning in April 2010. The final startup schedule for this work will not be developed until mid year 2009. As part of the compensation for the land lease with Kennedy Space Center, FPL will also commence construction of the Kennedy Space Center PV solar field during the first quarter of 2009.

Q.

Please describe or explain FPL's plan to add incremental additional solar capacity for each project after the in-service dates for the first portion of solar generation for each of the three solar projects.

A.

Please see FPL's response to Staff's Third Set of Interrogatories No. 18.

Q.

Regarding FPL Energy Company's 310 MW SEGS described on page 12 of FPL's petition (Item 24), please describe or explain what is the:
a. Technology used in that solar facility;

b. Life-time (in-service years) of that facility before and after the upgrade.

A.

a. Similar to what is being proposed at Martin Solar, the SEGS facility is concentrating solar power utilizing solar thermal trough technology. The parabolic trough solar collectors track the sun in order to collect and concentrate the sun's energy onto heat collection elements located in the focal line of the parabolic reflectors. The heat collection elements contain a heat transfer fluid which is heated by the concentrated solar radiation. The heated transfer fluid is then circulated to heat exchangers that produce steam which is routed to a steam turbine generator. The SEGS facility consists of seven separate solar fields and steam turbine generators.

b. The original estimated service life of the SEGS facilities was 30 years. The newly installed heat collection elements have a manufacturer's predicted service life of 30 years which when added to each of the SEGS facilities could result in a remaining service life of from 39 years to 43 years.

Q.

Regarding FPL Energy Company's 250 MW solar thermal facility described on page 12 of FPL's petition (Item 24), please describe or explain what are the :

a. Technology used in that solar facility;

b. Life-time (in-service years) of that facility;

c. Projected construction costs, in-service costs, and O&M costs associated with the completed project.

A.

On March 14, 2008, FPL Energy filed with the California Energy Commission (CEC) an Application for Certification of the Beacon Solar Energy Project (Beacon Solar). The application has been deemed incomplete by the CEC at this time. The project is still in the development stage with a planned in-service date of 2012 or later, and is subject to final technology selection.

a. Similar to the SEGS facilities and what is being proposed at Martin Solar, the proposed Beacon facility, as currently being planned, will be concentrating solar power utilizing solar thermal trough technology. The parabolic trough solar collectors will track the sun in order to collect and concentrate the sun's energy on to heat collection elements located in the focal line of the parabolic reflectors. The heat collection elements will contain a heat transfer fluid which is heated by the concentrated solar radiation. The heated transfer fluid will then circulated to heat exchanger(s) that produce steam which will be routed to a steam turbine generator.

b. The estimated service life of the Beacon Solar project is 30 years.

c. The only available cost for the plant at this time is the total capital cost, which is estimated at approximately $1 billion.

Q.

Please explain what are the specific reasonable and customary industry practices FPL used in the design, procurement, and construction of each project in a cost effective manner appropriate to the location of the facility.

A.

For both DeSoto and Space Coast PV solar fields, FPL has entered into a turnkey EPC contract with a highly qualified supplier and contractor experienced in utility-scale projects. As part of the process, FPL followed a well-defined request for information ("RFI") process which was initially conducted in 2007 with responses from 26 international and domestic companies involved in the development, manufacturing, and construction of utility-scale PV systems and projects. In February of 2008 a request for proposals ("RFP") was issued which resulted in responses from 8 companies of which 4 provided conforming proposals after obtaining bid clarifications and conducting an initial screening evaluation. A detailed bid evaluation on the conforming proposals identified two low bidders. Initial negotiations with the two companies was conducted which resulted in a final selection.

FPL is using trained and qualified employees with extensive experience in designing, procuring, and constructing utility facilities to oversee the project management aspects of the PV projects.

FPL's approach to designing, procuring, and constructing the Martin Solar project will be more complicated due to several unique attributes of the project.

DESIGN & ENGINEERING: Several different experienced engineering companies have and/or will be utilized for different phases of the project. Worley Parsons developed the conceptual design in order to prepare initial estimates, schedules, performance predictions, and permit support. Because this first of a kind project will send solar field steam into an existing operating combined cycle unit, FPL has retained Black & Veatch, the original design engineer for Martin Unit 8, to design all interfaces between the existing plant and the new solar field. This approach will minimize costs associated with understanding the design limitations of the existing facility. FPL had discussions with the key solar industry engineering suppliers and is now negotiating with a joint venture company (Kiewit-MAN Solar Millennium; or "K-MSM") to potentially supply solar field engineering, procurement, and construction support services to the project. FPL has issued a limited notice to proceed to K-MSM for early solar engineering work while the negotiation process continues.

EQUIPMENT PROCUREMENT: FPL is currently working with the leading global suppliers of solar components to develop the most cost effective solutions to support the Martin project requirements. These contracts are expected to be awarded by the 4th quarter of 2008.

CONSTRUCTION: FPL is in discussion with several potential construction contractors for the Martin Solar Energy Center.

Q.

Regarding the FPL's lease of property at KSC (NASA John F. Kennedy Space Center Enhanced Use Lease), please describe or explain what is FPL's economic analysis that supports the nonmonetary and monetary considerations appearing in Article 3 of the lease relative to other comparable alternative sites that may have been available to FPL.

A.

In December 2007, FPL commissioned an appraisal of the NASA land to ascertain the fair market value (FMV) of the property. The FMV amount referenced in the lease represents the low end of the range identified in the appraisal. The appraised value was determined using a sales comparison approach, which identified three comparable properties within close proximity to the site that were most indicative of past market activity. The values of those three comparable properties ranged from 33%-65% higher than the final value of the NASA property, which was discounted due to the slower market conditions at the time of the appraisal. The lease payment negotiated with NASA provides for an annual payment of 10% of the FMV, which is consistent with generally accepted market values for property rental rates. While the lease payment consists of non-monetary consideration, the total of the non-monetary consideration to NASA does not exceed the amount FPL would have paid to lease the property solely for monetary consideration. A copy of the Property Appraisal is provided in item 12b of Staff's Fourth Request for Production of Documents.

Q.

Please list the dates that FPL expects to enter into each of the various contracts for the design, procurement, and construction of each of the three projects.

A.

For the Martin Solar project, FPL awarded the balance-of-plant engineering contract in July, 2008. FPL expects to complete negotiation of a solar field engineering, procurement, and construction support services contract by the 4th quarter of 2008. (A limited notice to proceed with the early solar field engineering activities associated with this contract was issued in August 2008.) FPL expects to begin awarding the construction contracts as early as the 4th quarter of 2008.

The EPC contract for DeSoto Solar was awarded July 3, 2008 and the EPC contract for Space Coast Solar was awarded July 9, 2008.

Q. For each of the three solar projects, please describe what are the costs of services, costs of products, and associated costs provided by each vendor under contract to FPL Energy, FPL Group, and internally by FPL.

A.It is anticipated that all contracts to vendors for services and products associated with the three solar field projects will be issued by FPL. Additionally, FPL will incur internal expenses for each project. The following table summarizes FPL's approximate internal costs through July 2008:

INTERNAL FPL COSTS FOR THREE SOLAR PROJECTS (APPROX - THROUGH JULY 2008)

Martin Solar Project	$400,000
DeSoto Solar Project	$120,000
Space Coast Solar Project	$190,000

The tables below describe the approximate costs of services, products, and associated costs provided by vendors to date:

MARTIN SOLAR PROJECT:

Company	**Service**	**Contract Value, $**
WorleyParsons Engineering	Conceptual Design	[redacted]
Boyle Engineering	Conceptual Design	
Black & Veatch Engineering	Detailed Design	
Augustyne & Company	Solar Meter Supply	
Golder Associates	Permit Support	
Lucido & Associates	Land Planning	
Richard L. Shepard & Associates	Permit Support	
Scrivner Energy Consultants	Conceptual Design	
LBFH	Permit Support	
Kiewit-Man Solar Millennium	Limited Notice to Proceed-Early Solar engineering	
FPL Energy	Engineering and Project management support	[redacted]

DeSoto Solar and Space Coast Solar Projects:

Supplier	**Service**	**Applicability**	**Contract Value $**
Archaeological & Historical Conservancy	Site Assessment	DeSoto	[redacted]
Boyle Engineering	Conceptual Design	DeSoto	
Ecology & Environment	Environmental Assessment	Space Coast	
Golder Associates	Permit Support	Both	[redacted]
Pandion Systems	Site Analysis	Space Coast	
SF Holden	Property Appraisal	Space Coast	
Wilson Miller	Permit Support	DeSoto	
Sun Power	EPC	DeSoto	
Sun Power	EPC	Space Coast	
Budnick	Proj Mgmt Services	DeSoto	
Budnick	Proj Mgmt Services	Space Coast	[redacted]
FPL Energy	Engineering & Proj Mgmt Services	DeSoto	[redacted]
FPL Energy	Engineering & Proj Mgmt Services	Space Coast	[redacted]

Q.

Please describe what are the estimated replacement power costs resulting from any planned or forced outages associated with the installation of Martin Solar throughout the construction period.

A.

There are no estimated replacement power costs currently associated with the installation of the Martin Solar Project. FPL presently expects that the work associated with the installation of Martin Solar will be completed during maintenance outages scheduled for Martin 8 that are unrelated to the Martin Solar Project.

Q.

Please state whether the replacement power costs discussed in interrogatory No. 26 above are included in the estimated costs of the Martin Solar Project.

A.

For the reasons expressed in FPL's response to Staff's Third Set of Interrogatories No. 26, FPL has not, at this time, included replacement power costs in the estimated costs.

Q.
Please state what will be the life-time (in-service years) for each of the three solar generation facilities.

A.
The Martin Solar generating facility is expected to be in service as long as Martin Unit 8 remains in service. There will be 20 years of book life
remaining on Martin Unit 8 when the solar project is placed in service at the end of 2010.

The DeSoto and Space Coast solar fields and associated equipment are being designed for a plant life of 25 years.

Q.

For each of the three solar generation facilities, please describe the potential for upgrading and the additional in-service years resulting from the upgrades.

A.

The three solar facilities will use state of the art technology. FPL, at this time, has not identified the opportunity for upgrading the three solar generation facilities beyond what is being proposed to be installed. However, there may be opportunities at both the DeSoto and Space Coast sites to expand and/or upgrade the facilities in the future. These facilities have additional land available and design characteristics that permit streamlined expansions or upgrades to occur.

Q. Regarding FPL's statement on page 10 of its petition (Item 17) that the Martin Solar project will consist of up to approximately 180,000 mirrors over 500 acres, please respond to the following questions:

a. Will these mirrors be manufactured overseas?
b. If "yes", what is the estimated variance of the capital costs due to fluctuations in the value of the U.S. dollar, as FPL mentioned on page 18 of its petition (Item 43)?
c. Concerning the significance of the numbers, what is the estimated frequency of maintenance and replacement of these mirrors, and what will be the associated O&M costs?

a. The manufacturing location of the mirrors has not been determined at this time. FPL is currently in discussions with both domestic and international mirror suppliers. Some of the international suppliers are working to establish manufacturing facilities in the U.S., including possibly Florida, to service the growing domestic solar market.

b. FPL is unable to estimate this variance (if any) at this time as the supplier has not been determined.

c. The total O&M is estimated to be $[redacted]/kw, a portion of which will relate to maintenance and replacement of the mirrors. This estimate assumes an annual mirror replacement of 0.3%. The cost for the replacement mirrors is estimated at approximately $100,000 per year.

Q.

Regarding FPL's statement on page 18 of its petition (Item 43) "many key components are currently manufactured overseas," please respond to the following questions:

a. Does this statement apply to the PV solar panels that will be used in DeSoto Solar and Space Coast Solar projects?

b. If "yes", what is the estimated variance of the capital costs due to the fluctuations in the value of the U.S. dollar, as FPL mentioned on page 18 of its petition (Item 43)?

A.

a. The PV panels for DeSoto and Space Coast projects are being manufactured overseas.

b. Since the contract with the EPC contractor for both sites is a Fixed Cost Lump Sum U.S. dollar-denominated, it will not be subject to currency fluctuations.

Q.
Please describe or explain, in detail if possible, the scope of FPL's Greenhouse Gas (GHG) Reduction Program.

A.
The purpose of FPL's proposed Greenhouse Gas Reduction Program is to implement both the reporting and emission reduction requirements established under Chapter 403 of the Florida Statutes, as amended by HB 7135. HB 7135 provides for a regulatory and legislative process to implement the Governor's Executive Order 07-127 that set a maximum allowable emission level of greenhouse gasses in the state of Florida. The Environmental Protection Agency (EPA) has also received appropriations to begin rulemaking for the mandatory reporting of GHG emissions from sources. A proposed rule is anticipated from EPA by September of 2008 with a final rule promulgated by June of 2009.

HB 7135 requires major emitters, including electric utilities, to report GHG emissions to the nonprofit partnership "The Climate Registry" providing historical and current greenhouse gas emission data to establish the baseline emissions and targets for the required compliance reductions to meet the 2017, 2025 and 2050 goals established in the Governor's executive order 07-127. FPL plans to comply with State reporting requirements for its GHG emissions through participation in The Climate Registry reporting program. Reporting GHG emissions to the registry requires an annual membership fee, use of specific reporting protocols for the calculation and reporting of GHG emissions in an electronic reporting system, and third party verification of reported emissions to provide accreditation for the reporting entity's emissions. FPL plans to begin GHG reporting activities in 2009 as it implements FPL's Greenhouse Gas Reduction Program. FPL has proposed to recover the costs associated with joining the registry and the preparation of the initial GHG report.

HB 7135 required that DEP initiate rulemaking activities to establish a Florida GHG cap-and-trade program no earlier than January 1, 2010. Details of that program have not yet been established and it is unknown at this time whether allowances will be allocated to sources in whole or in part or available only at auction. Regardless of whether the allowances are allocated or auctioned the CO2 allowances become part of the fossil generation costs. FPL has included CO2 emission allowance market price projections in its evaluation of proposed generation expansion projects including its proposed Nuclear Uprate projects, Turkey Point Nuclear Unit 6 & 7 expansion, West County Energy Center 3 and the proposed Conversion Projects at Riviera and Cape Canaveral Plants. Future CO2 allowance and program management costs would be included in FPL's Greenhouse Gas Reduction Program.

FPL's nuclear, renewable and conversion generation projects along with our energy efficiency program will reduce greenhouse gas emissions which will help to achieve compliance with the Cap and Trade rule being developed by DEP. To achieve the future reduction goals established by the Executive Order, which will be included in DEP's Cap and

Trade rule, FPL anticipates that additional reductions in its GHG emissions will be required beyond the currently planned projects. The additional reductions will likely require a combination of the implementation of carbon sequestration and storage technology and the use of verified carbon offset projects. Costs associated with the implementation of controls and storage technologies for GHG emission reductions, and prudently incurred costs for required offsets for mitigation of GHG emissions to comply with regulations would also be included in FPL's Greenhouse Gas Reduction Program.

Q.
Please provide workpapers (break down in line items) to support FPL's estimate of $50,000 O&M costs for the 2009 initial implementation of the projected GHG registration and consultant fees.

A.
FPL tentatively plans to begin implementation of its Greenhouse Gas Reduction Program in 2009 and has projected costs for this project in 2009 associated with participation in The Climate Registry. FPL expects to begin incurring such costs following publication of registry guidance and rulemaking by the DEP, which is anticipated to occur prior to June 2009 date for the final federal mandatory GHG emissions reporting rule. FPL's preliminary estimate of $50,000 in 2009 O&M expenses for the project includes the projected registration and consultant fees for the first year of Climate Registry participation. Specifically, FPL anticipates the following required activities in 2009 for The Climate Registry:

1. Annual Membership Fee for joining The Climate Registry: $15,000
(annual fee is $10,000 and includes additional one time fee of $5,000 for reporting prior year baseline emissions)

2. Preparation of GHG Baseline Emission Inventory for FPL: $20,000
(includes contractor labor costs for identification of emission source data, selection and application of registry approved methods, and quantification of baseline GHG emission data)

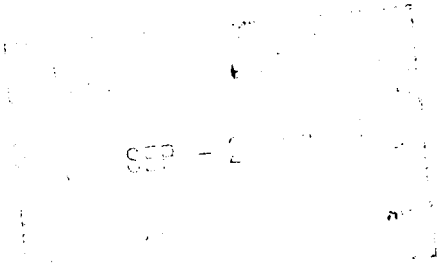
3. Preparing, formatting, and data entry of FPL emissions data for submittal to the Climate Registry Information System (CRIS): $15,000 (includes contractor labor costs associated with data entry for: a) Creation of corporate/entity profile inputs; b) Creation of facility accounts with location specific information; c) Populating entities with baseline GHG emission inventory data into on-line reporting system)

12

FPL's response to Staff's Fourth Set of Interrogatories (Nos. 34 - 45)

Q.
For each of the three solar projects, please provide the information requested in the attached tables 1-1 through 1-2. Monthly data should be provided for a full calendar year.

A.
Attached are the completed tables 1-1 through 1-2 which contain the most current information.



Solar Project Name : Space Coast (NASA)
Estimated Data

Cost data		
	Fixed Array	**Tracking**
Incremental Gross Capacity (MW)	10	Not Applicable
Incremental Net Capacity (MW)	10	Not Applicable
Construction start date [1]	1st Quarter 2009	Not Applicable
In-service date	3rd Quarter 2010	Not Applicable
Useful life (years)	30	Not Applicable
Total Site area	60 acres	Not Applicable
Overnight construction costs ($/kw) [2]	7,790	Not Applicable
CWIP ($)	4,277,000	Not Applicable

Q.

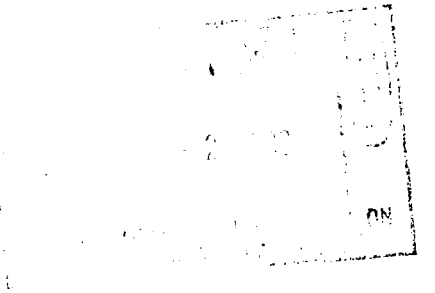
Please provide a side-by-side comparison of the revenue requirements for each solar project compared to payments that could be made for an equivalent amount of capacity and/or energy pursuant to FPL's standard offer contract filed in Docket No. 080193-EQ. Please provide a detailed explanation of all assumptions.

A.

FPL's Standard Offer Contract, filed in Docket No. 080193-EQ, requires that a project provide both firm capacity and energy to FPL. FPL's Martin Solar project provides steam to be used in the Martin 8 unit and does not add any capacity to the system. FPL is currently assuming that solar PV projects do not provide any firm capacity pending actual operating data of the projects during peak hours. Therefore all three projects are considered to provide energy on as-available basis. Since these projects do not provide firm capacity, a comparison of their revenue requirements versus payments to be received under FPL's Standard Offer Contract would not be a meaningful comparison.



Q.

Please provide a one line diagram of the Martin Solar project which clearly shows where the steam generated by Martin Solar facility will be introduced into the existing steam cycle for Martin Power Plant Unit 8.

A.

The attached process flow diagram shows the two locations considered for introducing the Martin Solar facility steam into the existing steam cycle for Martin 8. FPL has selected the high pressure (HP) steam injection option. [redacted]

FPL

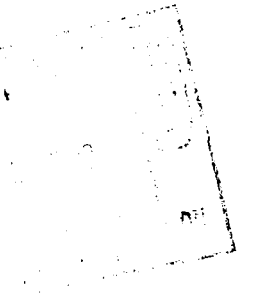
HEARING EXHIBIT - 00000658

Q.

When the Martin Solar facility is producing steam, will one or more of the existing combustion turbines that comprise the combined-cycle facility be shut down completely or continue to run at a reduced output?

A.

No, none of the combustion turbines will be shut down or run at a reduced output. All of the combustion turbines can continue to produce full output when the Martin Solar facility is producing steam. Steam produced by the Martin Solar facility will displace the Unit 8 duct burners, when running, or other less-efficient generation from FPL's system.



Q.
Please provide a sample calculation which demonstrates how FPL will calculate the fuel savings at the Martin facility as a result of the operation of the solar steam generator.

A.
The solar steam generation at Martin will displace more expensive energy from the system's marginal generating units. Fuel savings result from the reduction in fuel use at those marginal units. For any given period of time the fuel saving calculations must be performed with the use of a production cost model. FPL is using the PMAREA model for this purpose. However, as requested, FPL is providing a sample calculation of how these savings would be determined for a given hour.

Example (using representative data):

Solar steam generated energy at Martin for a peak hour = 75 MWH
Fuel cost of Martin solar steam generation = 0 $/MWH

Heat rate of marginal unit at this hour = 9,000 btu/kWh
Fuel price of energy at this marginal unit = 11.0 $/MMBtu (gas)
Price of energy at marginal unit = 9,000 * 11 / 1,000 = 99 $/MWH
Fuel cost savings for the peak hour = 99 * 75 = $ 7,425

Avoided fuel = 9,000 * 75 / 1,000 = 675 MMBtu of avoided gas

Q.
Please provide a side-by-side comparison of the revenue requirements for the Martin Plant Site with Martin Solar and without Martin Solar. Please provide a detailed explanation of all assumptions used in developing this comparison.

A.
Table 41-1, attached, shows the incremental revenue requirements of the Martin Solar Project. These incremental revenue requirements consist of increased capital and O&M costs partly offset by fuel and emission cost savings. Table 41-2 shows the assumptions used in the analysis.

In analyzing the economics of the Martin Solar Project, FPL compared the revenue requirements of two cases: one with the solar project, and one without it. For capital and O&M costs at the Martin Plant, FPL developed incremental capital and O&M cost impacts of the solar project. The capital and O&M revenue requirements associated with the existing plant were not quantified, as they were considered equal to both cases and would not impact the results of the comparison.

Fuel and emission savings were developed by running both cases with the PMAREA production costing model.

In-Service Date	December-10

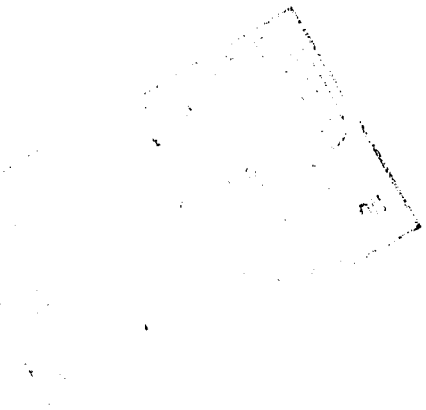
Table 41-2

Q.

Please describe or explain what will be the efficiency of the PV solar panels which will be used respectively in DeSoto and Space Coast PV solar facilities.

A.

The conversion efficiency of the PV solar panels used at both the DeSoto and the Space Coast PV facilities is expected to be 18.7%.



Q.

For each of FPL's PV Solar Projects, please describe or explain:

a. Whether some form of Tracker system will be used;
b. What are the benefits and/or drawbacks of including/not including such a system?

A.
a. At the DeSoto facility a single-axis tracking system will be employed. At the Space Coast facility a fixed tilt support system will be used.

b. The benefit of including a single-axis tracking system is that it will automatically track the movement of the sun throughout the day to optimize the capture of the sun's energy. In order to deploy and demonstrate the two different technologies, FPL determined that the DeSoto location was better suited for the Tracker and the Space Coast for the Fixed system. The drawback of the Tracker system is its higher initial cost compared to a fixed system.

Q.
Please explain the difference in capacity factors for Desoto Solar and Space Coast Solar (i.e. location, tracking, etc).

A.
The capacity factor for DeSoto is expected to be approximately 23% and for Space Coast 20%. The improved capacity at DeSoto is a result of (1) the installation of a PV tracker control system for positioning of the panels to optimize solar collection compared with a fixed tilt PV system at Space Coast, and (2) the greater solar irradiation (kwh/m2/day) at the DeSoto location than at the Space Coast location.

Q.

Please provide the estimation of the hourly energy production, as stated in Section 366.92(4), Florida Statutes, for each of the three solar projects using the table below:

Time of the day	Martin Solar (kW)	DeSoto Solar (kW)	Space Coast Solar (kW)
1:00 am			
2:00 am			
3:00 am			
4:00 am			
5:00 am			
6:00 am			
7:00am			
8:00 am			
9:00 am			
10:00 am			
11:00 am			
12:00 am			
1:00 pm			
2:00 pm			
3:00 pm			
4:00 pm			
5:00 pm			
6:00 pm			
7:00 pm			
8:00 pm			
9:00 pm			
10:00 pm			
11:00 pm			
12:00 pm			

A.

See table 45-1 which shows estimated daily energy production for each of the three solar projects. These energy production patterns are based on an annual average, for the first in-service year.

Table 45-1

Time of the day	Martin Solar (kW)	DeSoto Solar (kW)	Space Coast Solar (kW)
1:00 AM	0	0	0

FPL's response to Staff's Fifth Set of Interrogatories (Nos. 46 - 48)

HEARING EXHIBIT - 00000669

Q.

Regarding the variance of the O&M cost of Project No. 19a described on page 7, line 13-17, of witness Dubin's testimony dated 08/04/08, please explain why three vendors rather than one as originally projected are being used to conduct repairs.

A.

FPL determined that the leaks needed to be repaired sooner than the original schedule contemplated and thus required additional vendor resources. This will allow FPL to implement a more proactive approach to avoid future leaks that should decrease future repair costs.

Q.

Regarding the O&M costs of Project No. 31 addressed on page 10, line 4-15, of witness Dubin's testimony and Form 42-5E filed on 08/04/08, please explain or describe the following:

a. Whether FPL has included the costs of the two actions FPL intends to undertake to help limit the compliance cost impact of potential revisions to the Phase II Rule which were described in FPL's Petition for Approval to Modify the Scope of its CWA 316(b) Phase II Rule Project filed on 03/31/08?

b. If the answer to the above question is "yes", how much has been included?

A.

Project number is 28. The answer is yes. We are forecasting to spend $50,000.

Q.

Regarding the leasing of NASC_KSC property related to the Space Coast Solar Project, please explain or describe:

a) How many MW (or KW) will the NASA PV Facility produce when it is completed and before the potential Phase II expansion?

b) What does FPL intend to use the optional 40 acres of FPL PV Facility Phase II leasing property specified in article 1.2 of the Enhanced Use Lease?

c) The "capital replacement costs" specified in article 3.2 of the Enhanced Use Lease.

d) What are the estimates of the capital replacement costs?

A.

a) FPL is currently in negotiations with the EPC contractor for the NASA PV facility, and therefore the exact size of the NASA PV system has not been determined. Our current estimate is that the capacity of the NASA PV facility will fall somewhere in the range of 600-800 kW before the potential Phase II expansion.

b) FPL has no current development plans for the additional 40 acres, but has retained the option for potential future expansion of renewable at the site.

c) Some pieces of equipment used in the solar PV facility have a life expectancy that is less than the life of the solar array, such as the inverters. As a result, this equipment will need to be replaced during the life of the project. The "capital replacement costs" are the costs associated with the purchase of this replacement equipment.

d) FPL's estimated 30 year O&M cost for the NASA PV Facility includes the capital replacement cost of approximately $160,000 each for the three inverters in the 12 to 15 year time frame.

14

FPL's response to Staff's Sixth Set of Interrogatories (Nos. 49 - 50)

HEARING EXHIBIT - 00000673

Q.

For each of the following items, please refer to FPL's August 29, 2008, filing and to the depreciation rates that were approved in Docket No. 050188-EI, Order No. PSC-05-0902-S-EI, issued September 14, 2005.

a. Form 42-4PE, p. 51 of 54, Project 03 – Continuous Emissions Monitoring, Cutler Common Account 31100, explain why the depreciation rate being used is 0.00%, instead of the approved rate of -0.2%.

b. Form 42-4PE, p. 51 of 54, Project 03 – Continuous Emissions Monitoring, Cutler Unit 5 Account 31200, explain why the depreciation rate being used is 0.20%, instead of the approved rate of -0.4%

c. Form 42-4PE, p. 51 of 54, Project 03 – Continuous Emissions Monitoring, Martin Unit 8 Account 34300, explain why the depreciation rate being used is 5.50%, instead of the approved rate of 5.8%

d. Form 42-8E, p. 53 of 54, Project 23 – Spill Prevention Clean-up and Countermeasures, Cutler Common Account 31400, explain why the depreciation rate being used is 0.00%, instead of the approved rate of -3.1%.

e. Form 42-8E, p. 53 of 54, Project 23 – Spill Prevention Clean-up and Countermeasures, Cutler Unit 5 Account 31200, explain why the depreciation rate being used is 0.20%, instead of the approved rate of -1.2%.

f. Form 42-8E, p. 53 of 54, Project 23 – Spill Prevention Clean-up and Countermeasures, Martin Unit 8 Account 34300, explain why the depreciation rate being used is 5.50%, instead of the approved rate of 5.8%.

g. For each item a. through f., if the correct depreciation rate is not being used, provide the correct depreciation calculation.

A.

a. Cutler Common Account 31100 has been fully recovered in base rates. Rather than reverse depreciation on the assets at this plant acct/location which have been fully recovered, or overrecovered, and since Cutler Common, as a whole, has been fully recovered, FPL has ceased depreciation entirely until such time as the asset again has a positive net book value (i.e., plant in service exceeds the reserve balance).

b. Rather than reverse depreciation on the assets at this plant acct/location which have not been fully recovered, and since Cutler Unit 5, as a whole has not yet been fully recovered, the depreciation rate that is currently being used is the composite remaining life rate for Cutler Unit 5.

c. The rate used for Martin Unit 8 account 34300 is what was approved in Order PSC-05-0821-PAA-EI, Docket No. 050300-EI, issued 8/11/05.

d. Cutler Common Account 31400 has been fully recovered in base rates. See the company response to Part a above for explanation of rate.

e. Cutler Unit 5 account 31400 (the question erroneously mentions account 31200) has not been fully recovered. See the company response to Part b above for explanation of rate.

f. See the response to Part c above.

g. Not applicable

Q.

Please refer to FPL's August 29, 2008, filing, Form 42-8E, p. 52 of 54, Project 12 – Scherer Discharge Pipeline. What is the approved depreciation rate for Scherer Common Account 31000? Provide the number of the Order in which it was approved.

A.

There is no approved depreciation rate for Scherer Common . This account is Land & Land Rights and is not depreciable.

FPL's response to Staff's Eighth Set of Interrogatories (Nos. 52 - 56)

HEARING EXHIBIT - 00000682

Q.

In the response to staff's third set of interrogatories, question No. 23, regarding FPL's lease of property at NASA-KSC, FPL stated that "while the lease payment consists of non-monetary consideration, the total of the non-monetary consideration to NASA does not exceed the amount FPL would have paid to lease the property solely for monetary consideration." Please describe or explain the benefits that FPL and its rate payers would obtain for electing the non-monetary consideration as the leasing payment versus only monetary consideration.

A.

From a narrow economic perspective, there is no economic benefit or detriment to FPL or its customers in the use of non-monetary consideration versus monetary consideration for the land lease because the value of the non-monetary consideration to NASA is equivalent to the amount that would have been paid to NASA using only monetary consideration.

However, there are a number of indirect benefits associated with this approach. By providing NASA with an in-kind payment in the form of a separate state-of-the latest photovoltaic (PV) system, FPL is enabling the construction of additional renewable generation in Florida that otherwise likely would not be constructed with these funds by NASA. This additional PV facility will be a zero-greenhouse gas emitting facility, and the energy it creates will displace such energy otherwise coming from fossil fuel-sourced generation. Since NASA is an agency supported by taxpayer dollars, there is also a public benefit from enhancing renewable energy usage at the facility.

In addition, having this facility as part of NASA's power generation has the potential to further enhance public awareness of renewables and could provide research and educational opportunities for NASA as well as the public. This facility will also help to encourage other federal facilities to develop similar renewable projects nationwide. NASA's ability to collect data and conduct PV research could also potentially advance the application of solar PV in outer space.

Q.

Please use the following table to provide detailed comparisons of the NASA-KSC Lease between non-monetary consideration and the monetary consideration if it were provided in lieu of the non monetary consideration:

A.

FPL's NASA KSC Lease	Length of the Lease (years)	*Non-Monetary Consideration*			Monetary Consideration
		NASA PV Facility (details of the projects/ items to be included)	Capital Costs ($ Amount)	O&M Cost plus the Replacement Costs ($ Amount)	($ Amount)
Phase I	30	Approx. 750 kW still under development with final capacity TBD	Net Present Value (NPV) $6,359,027	NPV $400,000	NPV $6,759,027
Potential Extension	20	TBD	TBD	TBD	TBD
Sub-total					
Phase II	30 if exercised	TBD	TBD	TBD	TBD
Potential Extension	20 if exercised				
Sub-total					
Grand Total	TBD	TBD	TBD	TBD	TBD

Q.

Please refer to FPL's responses to staff's fourth set of interrogatories, question No. 34, Table 1-1 on page 1 & 2 of 3. Please describe or explain why the Installed Costs ($/kw) and the Overnight Construction Costs ($/kw) for the Space Coast Solar Energy Center are both higher than that of the DeSoto Solar Energy Center, given the fact that (a) both the Incremental Gross Capacity and the Incremental Net Capacity of the Space Coast Solar Center (10 MW) are less than that of the Desoto Solar Center (25 MW); (b) a solar center with tracking systems (such as the DeSoto center) is generally more expensive than a solar center with fixed array systems (such as the Space Coast Solar); and (c) the costs of the Space Coast Solar Center includes net present value of the long term land lease (refer to footnote 2 in the table).

A.

The Installed and Overnight costs for the Space Coast Solar Energy Center (SCSEC) are higher than those for the DeSoto Solar Energy Center (DSEC) for two primary reasons.

First, as noted in (a) above, the SCSEC is a smaller facility, and therefore can not achieve the same economies of scale as the DSEC project. In other words, all else being equal, it is typical for unit price to decrease (e.g. $/kw) as project size increases due to the ability to negotiate better pricing when purchasing more equipment and also the ability to spread the development, engineering, interconnection, and construction costs over a larger number of kilowatts. In addition, as noted in (c) above, the unit cost for SCSEC is higher because it includes the value of the land lease, which is not required for the DSEC.

With respect to item (b) above, it is true that tracking systems are generally more expensive than fixed systems. In the case of SCSEC, the relative equipment savings are reflected in the overall cost. If the SCSEC were to have a tracking system, the overall cost for that facility would be higher than the current price.

Q.

For purposes of determining the reasonableness and prudence of the costs associated with the Space Coast Solar project, please explain in detail how FPL has "used reasonable and customary industry practices in the design, procurement, and construction of the project in a cost-effective manner appropriate to the location of the facility," as section 366,92(4) requires. In particular, please explain how the non-monetary compensation for the NASA-KSC Lease is a "reasonable and customary practice."

A.

FPL has used reasonable and customary industry practices in the design, procurement and construction of the project, and has negotiated to secure favorable pricing and terms for its customers. For example, FPL has entered into a turnkey EPC contract for the Space Coast PV solar project with a highly qualified supplier and contractor experienced in utility-scale PV projects. As part of the process, FPL followed a well-defined request for information ("RFI") process which was initially conducted in 2007 with responses from 26 international and domestic companies involved in the development, manufacturing, and construction of utility-scale PV systems and projects. In February of 2008 a request for proposals ("RFP") was issued which resulted in responses from 8 companies of which 4 provided conforming proposals after obtaining bid clarifications and conducting an initial screening evaluation. A detailed bid evaluation on the conforming proposals identified two low bidders. Initial negotiations with the two companies was conducted which resulted in a final selection.

FPL is using trained and qualified employees with extensive experience in designing, procuring, and constructing utility facilities to oversee the project management aspects of the PV project.

With regard to the non-monetary consideration aspect of this project, FPL has documented a favorable in-kind exchange with the overall cost being equivalent to that for monetary consideration. In this regard, the actual means of payment is not relevant in that the overall amount to be paid is the same. Please see FPL's response to Interrogatory No. 52 for a discussion of benefits to customers from FPL's form of compensation for the project.

Q.

Please provide a levelized cost (in $/kWh) for various capacity factors for each solar project. Please provide the raw data and a chart depicting this information.

A.

The levelized costs for each of the three solar projects are shown in the attached table and chart. Costs were levelized over a 30-year life. Capacity factors ranging from 5% to 30% are provided in $/MWH. The information that was used in this analysis has been shown in more detail in the response to Question 51, Staff's Seventh Set of Interrogatories.

Please note that the costs shown here do not include the system benefits of fuel and emission cost savings.

PEF's Response to Staff's Second Request for Production of Documents (No. 2)

HEARING EXHIBIT - 00000692

BEFORE THE PUBLIC SERVICE COMMISSION

In re: Environmental Cost Recovery Clause	Docket No. 080007-EI
	Dated: July 31, 2008

PROGRESS ENERGY FLORIDA'S RESPONSE TO STAFF'S SECOND REQUEST FOR PRODUCTION OF DOCUMENTS (NO. 2)

PROGRESS ENERGY FLORIDA, INC. ("PEF"), pursuant to Rule 28-106.206, Florida Administrative Code, Rule 1.350, Florida Rules of Civil Procedure, and the Order Establishing Procedure in this matter, hereby responds to Staff's Second Request for Production of Documents (No. 2):

RESPONSE

2. **Please refer to the testimony and exhibits of Will Garrett dated April 2, 2008. Please provide a reconciliation and corrected pages 2, 10, 12, and 13 of forms 42-8E. Please cite all sources and include the rationale for using the particular capital structure and cost rates.**

Response:

Progress Energy believes that this request should refer to Form 42-8A instead of form 42-8E and that this request concerns the calculation of the return on equity and debt on pages 2, 10, 12, and 13 of Form 42-8A. The capital structure and cost rates in these calculations were provided in response to Staff's First Request for Production of Documents in Docket No. 080007-EI. The return on equity and debt can only be calculated for individual months because changes in the net investment during the year render a full year calculation of the return impossible. Also, there are true-ups to the return amounts in certain months for prior period corrections and retroactive in-service dates. The true-up amounts were calculated as the amount necessary to adjust the return to agree to the corrected schedules through the end of the month when the true-up was included. Progress Energy emphasizes that the corrected schedules were not used as the basis for any part of the schedule after that month.

Form 42-8A Page 2 sums the return on equity and debt for all Above Ground Storage Tank Secondary Containment projects for peaking load facilities. The calculation of the return for each facility appears on Exhibit WG-2, pages 2 - 6 and includes projects 4.1a - 4.1h. The return for Project 4.1c includes a true-up in January 2007 because the CWIP – Non-Interest Bearing and Net Investment amounts (Lines 4 & 5) were omitted for

HEARING EXHIBIT - 00000693

December 2006 in error and therefore the return was improperly calculated for that month in the 2006 True-Up Filing (Exhibit WG-2, Docket 070007). The return on equity true-up is an increase of $7,506 and the return on debt true-up is an increase of $1,372. Please see Attachment A for the corrected 2006 schedule. Project 4.1c also includes a return true-up in March 2007 because during the month the project was placed in service retroactively as of November 2006. The return on equity true-up is a decrease of $211 and the return on debt true-up is a decrease of $38. Please see Attachments B and C for the corrected 2006 and 2007 schedules as a result of this issue. Project 4.1d and Project 4.1h also include immaterial return on equity true-ups totaling a decrease of $90 and return on debt true-ups totaling a decrease of $17 due to other minor calculation errors.

Form 42-8A Page 10 is correct as filed.

Form 42-8A Page 12 includes a true-up to the return in June 2007 because the asset was placed in service that month retroactively as of January 2007. The return on equity true-up is a decrease of $827 and the return on debt true-up is a decrease of $151. Please see Attachment D for the corrected 2007 schedule.

Form 42-8A Page 13 includes a true-up to the return in July 2007 because the final part of that project was placed in service that month retroactively as of March 2007. The return on equity true-up is a decrease of $978 and the return on debt true-up is a decrease of $179. Please see Attachment E for the corrected 2007 schedule.

SERVED this 31st day of July, 2008.

CONTRACT NO. _____

This Contract (hereinafter "Contract"), effective November 12, 2007, by and between PROGRESS ENERGY SERVICE COMPANY, LLC, whose address is 410 South Wilmington Street, Raleigh, NC 27601, (hereinafter referred to as "Owner"), and CH2M Hill, a corporation, whose place of incorporation is Florida, and whose office is located at 9311 San Pedro Avenue, Suite 800, San Antonio, TX, 78216, (hereinafter referred to as "Consultant").

This Contract is based on an understanding between Consultant and Owner that Consultant has represented itself as and is qualified, equipped, and available to provide consulting services associated with an entity-wide comprehensive Greenhouse Gas Inventory.

THEREFORE, in consideration of the work to be done by Consultant, the payments to be made by Owner, and the other promises set forth below, the parties agree as follows:

Consultant shall furnish all services, supplies, tools, equipment, and transportation necessary to provide the following -

A detailed analysis of GHG emissions will be conducted for all of the six major GHGs (CO_2, CH_4, N_2O, PFCs, HFCs, and SF6) and will include direct and indirect emissions from each of the following owned or controlled functional areas of the organization:

- Stationary sources (e.g., boilers, turbines, internal combustion engines)
- Electricity transmission and distribution (e.g., transmission and distribution losses from purchased or wheeled electricity)
- Fugitive sources (e.g., air conditioning, fire suppression equipment, SF6)
- Mobile sources (e.g., road, air, rail)
- Process sources (e.g., sorbent use for flue gas desulfurization systems)
- Facilities (e.g., office buildings)

Sources of Scope 3 emissions (as defined in the WBCSD/WRI GHG Protocol - such as employee commuting and transportation of waste materials) will be identified, but not quantified in this scope of work.

Owner will form a GHG Inventory Core Team to lead the project. The Core Team will: (1) generate and execute a Owner GHG Inventory Plan, (2) direct all project activities and (3) prepare project communications for management reviews.

Development of the GHG inventory will require the following distinct tasks:

Task 1. **Develop GHG Inventory Plan.** The GHG Inventory Plan will define the scope of work, roles and responsibilities, project timeline, resource needs for data collection and deliverables. It will also capture key decisions that will be required early in the project, such as operational boundaries; identification of sources that will be included and excluded in the inventory; years to be included for data collection; and the inventory protocol.

Task 2. **Collect Data.** Identified field resources will develop a comprehensive list of GHG emissions sources and will collect operational data required to support the emissions calculations.

Task 3. **Calculate GHG Emissions.** GHG emissions will be calculated and documented on an Excel spreadsheet for each year selected in the GHG Inventory Plan. Benefits from completed or

ongoing emissions reductions projects will also be calculated. Once the inventory has been generated, potential de minimis sources will be identified and a baseline will be established. For each source, the spreadsheet will indicate the quality of the calculation or estimation methodology used and an explanation of why this approach was chosen.

Task 4. **Establish Ongoing Implementation Strategy.** The GHG Inventory Core Team will develop the ongoing strategy for collecting, calculating and documenting the annual GHG emissions inventory and carbon offsets. The recommended strategy will be documented for internal management review.

The Scope of Work shall herein after be referred to as "Work".

The Work is to be undertaken at different Owner sites and at Consultants place of business.

All Work shall be performed as directed by Owner's Designated Representative.

SECTION 2. SCHEDULE OF WORK

The Work shall start on or about November 15, 2007 and shall be completed no later than May 1, 2008. Time is of the essence. Actual dates of Work performance shall be coordinated by Owner's Designated Representative.

Consultant recognizes that in the electric utility industry it is frequently necessary for outage-related work to be rescheduled. Therefore, in accepting this Work, Consultant recognizes that the Work may be rescheduled within a reasonable time of the specified dates and agrees to comply with any reasonable rescheduling of Work without additional cost to Owner.

Consultant shall, within ten (10) days after signing this Contract, submit a detailed schedule indicating the sequence, method, and other specific details of how the Work will be completed.

SECTION 3. PERFORMANCE

All Work shall be undertaken in a professional manner and to the satisfaction of Owner. In performance of the Work, Consultant shall exercise the degree of skill and care required by the generally accepted level of professional standards. Work not completed to the satisfaction of Owner or which does not meet the above standards shall be immediately corrected or revised by Consultant at no cost to Owner. If it is impractical for Consultant to re-perform the Work, Consultant shall either reimburse Owner for any costs it may incur as a result of the defects or, at Owner's option, an equitable portion of the price for the Work shall be refunded to Owner.

SECTION 4. COMMENCEMENT OF WORK

Consultant shall not commence the Work awarded under the Contract and Owner will not be obligated to pay Consultant for Work commenced prior to Consultant's having properly executed the Contract and returned it to Owner.

Except as necessary to comply with the specific pre-conditions set out below, Consultant shall not commence the Work awarded under this Contract, oral or written, and Owner will not be obligated to pay Consultant for Work commenced prior to Consultant satisfying the insurance requirements and providing Owner with an acceptable Certificate of Insurance as set forth in Section 18. Insurance.

SECTION 5. OWNER'S DESIGNATED REPRESENTATIVE

As used in this Contract, "Owner's Designated Representative" means Kristin Beck, 410 S Wilmington Street, PEB 1505, Raleigh, NC. 27601, who is the liaison between Owner and Consultant during performance of the Work. No agreement with Owner's Designated Representative shall affect or modify any of the terms or obligations contained in this Contract except as provided in Section 7. Changes. A copy of all correspondence concerning the authorized Work shall be sent to Owner's Designated Representative specified in the Contract. Owner reserves the right to change its Designated Representative at any time.

SECTION 6. COMPENSATION

[redacted]

Upon completion of performance by Consultant of the Work described above and acceptance by Owner, Owner will pay to Consultant, as full compensation for the Work performed under this Contract, an amount determined to be [redacted] the tasks of Greenhouse Gas inventory Plan Development and Greenhouse Gas Inventory Development. Invoices shall be submitted to the Designated Representative on a monthly basis in order to receive payment.

B. Invoices and Payments

All payments, including the final payment, are subject to adjustment during, after completion, or after termination of the Work on the basis of any final accounting which may be made by Owner. Owner may withhold from any payment, including the final payment: (1) any amount incorrectly invoiced; (2) any amount in dispute; (3) or an amount sufficient to completely protect Owner from any loss, damage or expense arising out of assertions by other parties of any claim or lien against Owner because of Consultant's performance of this Contract, (4) any amount due under the indemnity provisions of this agreement The undisputed portion of any invoice shall be paid by Owner as hereinafter provided.

Invoices for Work performed under this Contract should be sent to: Kristin Beck, c/o Progress Energy Service Company, LLC, 410 S Wilmington Street, PEB 1505, Raleigh, NC 27601. Each invoice must show the Contract number. Unless the compensation is firm price under this Contract, the following information shall apply:

The invoice shall include a statement or be accompanied by a billing transaction register showing each employee's name, classification, hours worked, and applicable rate of compensation to Consultant. If any special equipment has been used, the invoice must also specify the equipment used, hours of usage and rate of reimbursement for use. On-site labor, off-site labor, material and any equipment costs must appear separately on the invoice.

Consultant assumes exclusive liability for all sales or use taxes applicable to any materials, supplies, equipment or tools which Consultant buys, rents or leases and uses or consumes in conjunction with the performance of the Work.

Copies of supplier invoices shall be submitted with Consultant's invoice for (a) the cost of tools, equipment or other property used by Consultant in performance of the Work; and (b) materials, parts or other property that Consultant installs, incorporates, furnishes or otherwise supplies for Owner's use or consumption that becomes the property of Owner; and a note on these copies of invoices that states "property transferred to Owner."

Consultant is responsible for paying the lowest allowable sales or usage tax rate under applicable law for materials supplied under this Contract. Invoices submitted which include payment of tax at higher than the statutorily allowed rate shall be reduced to reflect only the amount Consultant was legally required to pay. Any excess amount paid by Consultant shall not be reimbursed to Consultant.

Prior to final payment, Consultant shall furnish to Owner a signed notarized tax affidavit certifying that all sales or use tax with respect to this property has been paid. The required affidavit is included in this Contract as an attachment titled "N. C. Sales/Use Tax Affidavit."

Subject to the above conditions, final payment will be made not later than thirty (30) days after all of the following have been completed:

(1) All Work has been completed and accepted, including outstanding punch list items, final cleanup, testing, demobilization, and receipt of all required documentation by Owner.

(2) A correct invoice covering the Work has been presented to Owner.

C. Overtime and Portal-to-Portal Pay

[redacted]

D. Overbillings/Offsets/Credits/Refunds

[redacted]

SECTION 7. CHANGES

Owner's Designated Representative may, at anytime, provide Consultant with a written field directive to make changes in, additions to and omissions from the Work or the schedule, and Consultant shall promptly proceed with the performance of this Contract as so changed. If Consultant becomes aware of a change in the Work or the schedule that it feels is necessary, it shall provide a written request to the Owner Designated Representative, for a change to be issued. Any claim for equitable adjustment of the compensation as a result of the change, addition or omission must be submitted to Owner within ten (10) calendar days from the date the directive is issued. These claims must be itemized and supported with adequate documentation. Work performed outside the scope or schedule set forth in this Contract which is not requested by a written field directive may not form the basis of a claim for additional compensation. If an omission is made from the Work, a decrease in compensation shall be agreed to by both parties. Any

increase or decrease in compensation to be paid under this Contract for changes in Work shall not be binding on Owner unless and until a Contract Amendment setting forth the compensation change is signed by both parties.

SECTION 8. FINANCIAL AUDITS

Consultant shall maintain accurate and detailed records, in accordance with generally accepted accounting principles consistently applied, of all expenditures or costs relating to any Work performed under this Contract and of any performance statistics relevant to this Contract. If the Work is being performed other than on a fixed price basis and/or includes incentive provisions, Owner shall have the right to inspect, examine and make copies of any or all books, accounts, records and other writings of Consultant relating to the performance or cost of the Work. If the Work is being performed on a fixed-price basis only, Owner shall have the above-specified rights only upon termination or suspension of the Work. Such audit rights shall be extended to Owner or to any representative designated by Owner. Audits shall take place at times and locations mutually agreed upon by both parties, although Consultant must make the materials to be audited available within one (1) week of the request for them. Costs incurred in undertaking the audit will be borne by Owner but costs incurred by Consultant as a result of Owner's exercising its right to audit will be borne by Consultant.

SECTION 9. INTELLECTUAL PROPERTY

Consultant agrees that it will promptly notify Owner of any discovery or invention that relates to or arises out of the Work paid for under this Contract. Consultant further agrees to assign all rights Consultant has or may assert to such invention or discovery, including patent, copyright, and trade secret rights. Where such rights are assigned to Owner, the application for patent or copyright shall be made at the discretion and expense of Owner and through attorneys named by Owner.

Any copyrightable material in any form shall be deemed to be a "work for hire" under the Copyright Act. Consultant hereby assigns any copyright in any copyrightable material produced hereunder to Owner, and agrees to execute assignment documents that may be deemed necessary or appropriate by Owner to protect its ownership of any such copyright.

SECTION 10. PUBLICATION OF RESEARCH

Consultant agrees not to publish, release, disclose, or disseminate to anyone other than Owner designated employees with a need to know, whether in writing or orally, the results of any Work performed or any information obtained as a result of Work, without express prior written consent by Owner.

SECTION 11. NOT USED

SECTION 12. TERMINATION AND SUSPENSION

Each party has the absolute right to cancel this Contract at any time for its convenience, but both agree to give five (5) days notice (commencing after receipt of a written notice) to the other party of its election to terminate. In the event of termination Consultant shall use its best efforts to immediately curtail all charges and commitments made under this Contract. If Owner requests the termination, it will pay Consultant for the work actually performed and all Work related expenses he/she has incurred or become obligated for prior to the date of termination. In the event this Contract is based upon a firm fixed price, Consultant understands that Owner will not pay Consultant more than the fixed price agreed upon. If Consultant terminates, he/she shall be responsible for all costs and expenses incurred by Owner in hiring another Consultant to complete the Work beyond those agreed to in the above compensation section.

Consultant shall also cooperate with Owner and the new Consultant in explaining the Work which was done prior to Consultant's withdrawal and assisting the new Consultant in getting fully acquainted with the Work as quickly as possible.

SECTION 13. PATENTS AND COPYRIGHTS

Consultant agrees that in performing this Contract it will not use or provide to Owner any process, program, document, data, design, device or material which infringes on any patent, copyright, trade secrets, or other proprietary right of any third party. Consultant agrees to indemnify and defend Owner, at Consultant's expense, against any suit or proceeding brought against Owner for any infringement arising out of Consultant's Work under this Contract. Owner will promptly notify Consultant in writing of any such suit or proceeding and will assist Consultant in defending the action by providing any necessary information at Consultant's expense. If use of the Work is enjoined, then Consultant shall obtain a license for Owner to continue using the Work, or modify the Work so that it no longer infringes, without degrading its function or performance.

SECTION 14. STATUS OF CONSULTANT

It is the intent of the parties to create between them the relationship of owner and independent Consultant. It is agreed that nothing shall operate to change or alter such relationship, except a further agreement in writing between them.

SECTION 15. SUBLETTING OR ASSIGNING CONTRACT

Consultant shall not sublet any portion of any Work or assign the Contract without first submitting the proposed subcontract or assignment to Owner's Designated Representative and receiving written consent from Owner's Designated Representative to subcontract or assign. Any assignment without the consent of Owner shall be void. A request to sublet or assign must contain the name and location of individuals or firms to whom Work will be sublet or to whom the Contract is to be assigned, information on the qualifications and experience of those individuals or firms to perform the Work, and an estimate of the cost of the Work to be performed by the subcontractor or assignee. The general terms and conditions of this Contract and any Contract Amendment regarding the Work to be performed must be incorporated into and attached to any subcontract or assignment. Consent to subletting or assignment will not relieve Consultant of responsibility for the performance of Work in accordance with the terms and conditions of this Contract and any Amendments executed by both parties.

SECTION 16. REPORTS

Consultant shall furnish to Owner a work progress report in letter form at the end of each month of the Contract term in which authorized Work is being undertaken. The report will include a description of the Work undertaken, in progress, and completed during the period covered and statements indicating whether the schedule of various tasks is being met.

SECTION 17. CONSULTANT PERSONNEL MATTERS

Personnel provided by Consultant under this Contract shall at all times remain the sole responsibility of said Consultant for purposes of personal and professional liability.

Consultant is solely responsible for all aspects of the labor relations of its personnel, including but not limited to, wages, benefits, discipline, hiring, firing, promotions, pay raises, overtime and job and shift

assignments. Owner shall have no responsibility for or power over these areas. Such personnel shall be and remain the employees of Consultant at all times.

All personnel to be provided by Consultant under this Contract shall be employees of Consultant and shall not be independent contractors. Consultant shall withhold from each employee's pay sufficient funds for federal, state, and local income taxes as required by applicable law, funds required by the Federal Insurance Contributions Act, and as may otherwise be required by applicable law. Consultant further agrees to defend, indemnify, and hold Owner harmless from any claims, fines, and penalties based on any allegations that such withholdings were not made, or that such withholdings were inadequate.

Consultant shall comply with the Fair Labor Standards Act, and shall pay overtime to its employees as required by all applicable federal, state and local laws, rules, regulations, and ordinances. In the event that Consultant fails to comply with this requirement, Consultant shall be required to indemnify, defend and hold Owner harmless from all claims, actions, fines, penalties, and liabilities resulting from any such failure.

In selecting employees to undertake any Work authorized under this Contract, Consultant shall select only those persons who are qualified by the necessary education, training and experience to provide a high quality performance of the Work. If Owner determines, in its sole discretion, that any personnel supplied by Consultant are unsuitable for the Work, Owner shall so advise Consultant and Consultant shall remove that employee from performing Work under this Contract and assign other individuals to perform the Work. If Owner determines, in its sole discretion, that the presence on Owner's premises of any employee of Consultant is not consistent with the best interest of Owner, Owner may direct Consultant to remove that employee from the premises and assign another employee to work in place of the unacceptable employee. Replacement of employees under either of the above circumstances shall be at no cost to Owner. Consultant shall absorb any travel costs or travel time to the site for the replacement employee and from the site for the replaced employee. Consultant shall give Owner advance notice prior to removing Consultant's supervisory or professional personnel from the job.

Consultant's employees shall be properly dressed to Owner's standards at all times while on Owner's property. Employees not properly dressed will be refused entry to or will be subject to discharge from the Work Site.

Code of Ethics

Consultant, Consultant's employees, and employees of Consultant's subcontractor(s) performing Work under this Contract shall comply with Owner's Code of Ethics. Owner will make the Code of Ethics available to Consultant in order for Consultant to provide a copy to any employee with (i) a presence for a single period of 15 working days or more upon property owned or leased by Owner or any of Owner's subsidiaries or affiliates and/or (ii) access to Owner's business critical infrastructure. Each such employee shall sign an Acknowledgment Form in substantially the form set forth by Owner. Consultant shall retain the signed forms for Owner audit purposes for the term of the Contract plus one (1) year. The audit right provided herein shall not be restricted by any other audit provisions of the Contract. Consultant shall not be required to obtain signatures on Acknowledgement Forms for those employees assigned to Owner sites exclusively to provide storm support.

Consultant, Consultant's employees, and employees of Consultant's subcontractor(s) performing Work under this Contract are obligated to comply with all applicable laws and regulations and with all applicable health, safety and security rules, programs and procedures. The Owner Code of Ethics identifies principles concerning lawful and ethical conduct that must be followed by Consultant's employees in the performance of Work. The Code of Ethics also provides for an AlertLine reporting

mechanism that enables the reporting of suspected violations of law and of the Code of Ethics as a part of Owner's program to prevent and detect violations of law and criminal or unethical conduct.

SECTION 18. INSURANCE

Consultant shall provide and maintain in full force and effect at no additional cost to Owner for the duration of the Contract the following minimum amounts of insurance:

(a) Commercial general liability insurance or comprehensive general liability insurance with a minimum limit of $2,000,000 per occurrence for bodily injury and damage to property including contractual liability, premises/operations, products/completed operations, independent contractors, broad form property damage, and personal injury and a minimum aggregate amount of $4,000,000 or commercial/comprehensive general liability insurance plus additional excess umbrella liability insurance to meet these limits.

(b) Comprehensive automobile liability insurance with a minimum combined single limit of $1,000,000 per accident for bodily injury and damage to property, or covering bodily injuries or death in a sum not less than $500,000 per person and $1,000,000 per accident and covering damages to property in a sum of at least $250,000 per accident or comprehensive automobile liability insurance plus additional excess umbrella liability insurance to meet these limits. This insurance shall apply to any auto, whether owned or non-owned.

(c) Workers' compensation insurance as specified by state law in each state where work is to be performed; when workers' compensation is required, Consultant shall also provide employer's liability insurance in the minimum amount of $500,000 each accident and $500,000 per employee for bodily injury by disease with a disease policy aggregate of $1,000,000, or employer's liability insurance plus additional excess umbrella liability insurance to meet these limits.

All such coverages shall be primary. Consultant agrees that it shall add Owner, its officers, employees, agents and shareholders [and the North Carolina Eastern Municipal Power Agency (NCEMPA) for work performed at or associated with Roxboro Unit No. 4, Mayo Plant, Brunswick Nuclear Plant, and Harris Nuclear Plant] and all of Owner's parent, subsidiary, and affiliate companies to Consultant's liability insurance policies as additional insureds. Consultant shall require its insurance carrier or agent to certify that this requirement has been satisfied on all Insurance Certificates issued under this Contract.

Consultant waives and shall require its insurers providing the coverages specified above (excluding professional liability coverage, if required) to waive all rights of recovery against Owner, its officers, employees, agents, and shareholders [and the North Carolina Eastern Municipal Power Agency (NCEMPA) for work performed at Roxboro Unit No. 4, Mayo Plant, Brunswick Nuclear Plant, and Harris Nuclear Plant] and all of Owner's parent, subsidiary, and affiliate companies. Consultant shall require its insurance carrier or agent to certify that this requirement has been satisfied on all Insurance Certificates issued under this Contract.

Before any Work is initiated and before any invoices are paid for Work performed under this Contract, Consultant shall provide written proof of compliance with the above insurance requirements by delivering to:

Kyeshia Woods-Cosby
Progress Energy Service Company
P. O. Box 1551 (PEB 2C3)
Raleigh, NC 27602

a copy of certificate of insurance completed by his insurance carrier or agent certifying that minimum insurance coverages as required above are in effect and that the coverage will not be canceled or changed until thirty (30) days after written notice is given Owner. Consultant shall maintain, update, and renew the Certificate for the duration of the Contract. No payment will be made to Consultant prior to receipt by Owner of an acceptable Certificate of Insurance. In the event an acceptable Certificate of Insurance becomes outdated, Owner may elect to withhold payment of invoices, suspend Work or take other appropriate action until an acceptable and properly dated Certificate is received by Owner.

SECTION 19. INDEMNITY

To the maximum extent permitted by applicable law, Consultant shall indemnify and defend Owner (including its parent, subsidiary and affiliate companies), its officers, employees, agents, and any other party with an ownership interest in the premises, from and against all liability, loss, costs, claims, damages, expenses, judgments, and awards, whether or not covered by insurance, arising or claimed to have arisen:

(a) wholly or in part from acts or omissions of, or as a result of Work done or omitted from being done, or as a result of negligence by Consultant, subcontractors or assignees and their agents or employees, or Owner's negligence (including its parent, subsidiary and affiliate companies) which resulted in:

(1) injury to (including mental or emotional) or death of any person, including employees of Owner (including its parent, subsidiary and affiliate companies), or

(2) damage to or destruction of any property, real or personal, including without limitation property of Owner (including its parent, subsidiary and affiliate companies) and its other contractors, Owner's (including its parent, subsidiary and affiliate companies') employees, and fellow employees;

(b) out of injuries sustained and/or occupational diseases contracted by Consultant's, subcontractor's, or assignee's employees, if any, of such a nature and arising under such circumstances as to create liability by Owner (or its parent, subsidiary or affiliate companies) or Consultant under the Workers' Compensation Act, and all amendments thereto, of the state having jurisdiction, including all claims and causes of action of any character against Owner (and its parent, subsidiary and affiliate companies) by any employee of Consultant, its subcontractors or assignees, or the employer of such employees, or any person or concern claiming by, under or through them resulting from or in any manner growing out of such injuries or occupational diseases; and

(c) from demands, actions or disputes asserted by any subcontractors, employees or suppliers of Consultant.

Indemnification shall include all costs including attorney's fees reasonably incurred in pursuing indemnity claims under or enforcement of this Contract.

SECTION 20. SECURITY

Consultant and Consultant's employees who perform Work at any Owner property, shall comply with the security practices and procedures prescribed by Owner to cover that Property. Consultant shall advise its employees of these practices and procedures and secure their consent in a form satisfactory to Owner to abide by the procedures. Owner will make a copy of these practices and procedures available to Consultant upon request.

SECTION 21. FITNESS-FOR-DUTY POLICY

1. Consultant acknowledges its awareness of Owner's contract personnel Fitness-For-Duty Program (FFDP) Drug and Alcohol Abuse Policy, which is as follows:

> The use, possession, or sale of narcotics, hallucinogens, depressants, stimulants, marijuana, or other controlled substances on Owner Property or while in pursuit of Owner business is prohibited. (This does not apply to medication prescribed by a licensed physician and taken in accordance with such prescription.) Unauthorized consumption of alcohol on Owner Property is also prohibited. The use of the above substances or alcohol on or away from Owner Property which adversely affects the employee's job performance, or may reflect unfavorably on public or governmental confidence in the manner in which Owner carries out its responsibilities, as determined by Owner, is also prohibited.

The term "Owner Property" includes any property or facility owned, leased, or under control of Progress Energy, Inc. or any of it subsidiaries wherever located, including land, buildings, structures, installations, boats, planes, helicopters, and other vehicles.

SECTION 22. LAWS AND PROJECT RULES

A. General

Consultant and its subcontractors, if any, shall observe and abide by all applicable laws, federal, state and local, and the rules and regulations of any lawful regulatory body acting thereunder in connection with the Work. Without limiting the foregoing, Consultant agrees to comply with applicable provisions of the Americans with Disabilities Act, Fair Labor Standards Act of 1938, Executive Order No. 11246, the Rehabilitation Act of 1973, the Vietnam Veterans Readjustment Act of 1974, as amended, and their respective implementing regulations, which are made a part hereof as if set out herein. Consultant warrants that it will meet the legal requirements of the Immigration Reform and Control Act of 1986, including, but not limited to, verifying workers' eligibility for U.S. employment through the completion of an I-9 form. Consultant and its subcontractors, if any, shall also comply with all applicable Owner health, safety and security rules, programs or procedures.

To the extent applicable, during the performance of this Contract, the Consultant agrees as follows:

(1) The Consultant will not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin. Consultant will take affirmative action to ensure that applicants are employed, and that employees are treated during employment, without regard to their race, color, religion, sex, or national origin. Such action shall include, but not be limited to the following: Employment, upgrading, demotion, or transfer, recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including

apprenticeship. Consultant agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided by the contracting officer setting forth the provisions of this nondiscrimination clause.

(2) Consultant will, in all solicitations or advertisements for employees placed by or on behalf of Consultant, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, or national origin.

(3) Consultant will send to each labor union or representative of workers with which he has a collective bargaining agreement or other contract or understanding, a notice to be provided by the agency contracting officer, advising the labor union or workers' representative of Consultant's commitments under section 202 of Executive Order 11246 of September 24, 1965, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

(4) Consultant will comply with all provisions of Executive Order 11246 of September 24, 1965, and of the rules, regulations, and relevant orders of the Secretary of Labor.

(5) Consultant will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by the rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to his books, records, and accounts by the contracting agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

(6) In the event of Consultant's non-compliance with the nondiscrimination clauses of this Contract or with any of such rules, regulations, or orders, this Contract may be canceled, terminated or suspended in whole or in part and Consultant may be declared ineligible for further Government contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in Executive Order 11246 of September 24, 1965, or by rule, regulation, or order of the Secretary of Labor, or as otherwise provided by law.

(7) Consultant will include the provisions of paragraphs (1) through (7) in every subcontract or purchase order unless exempted by rules, regulations, or orders of the Secretary of Labor issued pursuant to section 204 of Executive Order 11246 of September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. Consultant will take such action with respect to any subcontract or purchase order as may be directed by the Secretary of Labor as a means of enforcing such provisions including sanctions for noncompliance: Provided, however, that in the event Consultant becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction, Consultant may request the United States to enter into such litigation to protect the interests of the United States.

Consultant shall indemnify and hold Owner (or its parent, subsidiary or affiliate companies) and its plant co-owners harmless with respect to any claims, expenses (including attorney's fees), liability or damages arising out of Consultant's failure to comply with any applicable laws, rules, or regulations, or any Owner rules, programs, or procedures.

Work performed and materials and equipment provided by Consultant shall conform to and comply with all the applicable federal, state, and municipal laws, rules, and regulations concerning occupational health and safety, including, but not limited to, the Occupational Safety and Health act of 1970 and the regulations and standards issued thereunder (hereinafter "OSHA requirements"). Consultant warrants that any work performed in a location partially or entirely under Consultant's control shall be performed in accordance with "OSHA Requirements". Consultant further warrants that all materials and equipment furnished by Consultant shall conform to and comply with all applicable provisions of "OSHA requirements" and the regulations and standards issued thereunder, specifically those (designed to accept a lockout device, machine guards in place, etc.). Consultant shall require these warranties of adherence to "OSHA requirements" from each subcontractor and supplier it employs. Consultant shall indemnify and

PEF-POD3-NO3-014 HEARING EXHIBIT - 00000714

hold harmless Owner (including its parent, subsidiary and affiliate companies) from all damages suffered by Owner (including its parent, subsidiary and affiliate companies) (including damages to third parties) as a result if the failure of Consultant or any of its subcontractors or suppliers to comply with "OSHA requirements" and for the failure of any of the materials or equipment.

Consultant shall fully comply with all export and import control laws and regulations with regard to any Work performed by Consultant or with regard to information supplied by Owner to Consultant under this Agreement. In particular, Consultant shall not directly or indirectly use, export, re-export, distribute, transfer or transmit any such Work or information in whole or in part, in any form without all required United States and foreign government licenses and authorizations, including but not limited to any applicable export controls of the U.S. Nuclear Regulatory Commission, the U.S. Department of Energy or the U.S. Department of Commerce. In no event shall Owner be obligated under this Contract or any other agreement to provide access to or furnish any Work or information except in compliance with applicable United States export control laws, regulations, policies, licenses and approvals.

Notices

All notices or official communications required to be given hereunder shall be in writing by either party and shall be deemed sufficient when mailed by United States certified mail, return receipt requested, or hand delivered to Owner's Designated Representative (if to Owner) at the addresses set forth herein or by recognized overnight delivery service, to the address initially set forth in the Contract. All notices shall be deemed delivered on the day they are hand-delivered to the other party or, if sent by overnight delivery service, two (2) days after tendered to such service.

Either party may change its address for the receipt of notices, requests or other communications hereunder by written notice duly given to the other party. This change shall be made by Amendment.

The parties' obligation to provide written notice to each other may not be waived. Electronic or computerized mail is not an acceptable form of delivery of notices required by this Contract. The Parties expressly and unequivocally waive any claim against the other Party based upon actual, verbal, or constructive notices. All written notice requirements are to be strictly construed and are a nonwaivable condition precedent to pursuing any claims, rights, or remedies by Consultant under this Contract.

B. Employment Taxes and Contributions

Consultant assumes exclusive liability for all contributions, taxes or payments required to be made under the applicable federal and state Unemployment Compensation Act, Social Security Acts and all amendments, and by all other current or future acts, federal or state, requiring payment by the Consultant on account of the person hired, employed or paid by Consultant for Work performed under this Contract. When Work is to be performed in South Carolina, Consultant shall submit to Owner, prior to commencement of Work, a properly completed State of South Carolina, Department of Revenue, Nonresident Taxpayer Registration Affidavit Income Tax Withholding form which will be included as an attachment.

C. Drawings and Specifications

It is the intent of Owner to have all drawings and specifications for the Work comply with all applicable statutes, regulations, and ordinances. If Consultant discovers any discrepancy or conflict between the drawings and specifications and applicable legal requirements, Consultant shall immediately report the discrepancy in writing to Owner's Designated Representative.

D. Federal Subcontracting Requirements:

This section is applicable only to a contract which is in excess of $500,000 ($1,000,000 for constructions of any public facility). The federal subcontracting requirements do not apply to contracts with small disadvantaged business concerns, women-owned business concerns, hubzone small business concerns, veteran-owned small business concerns, and small business concerns. The language applies to contracts with larges business concerns only.

1. The provisions of the following Laws, Executive Orders, and any rules and regulations issued thereunder, are incorporated herein by reference as part of this Contract.

   - Provisions of the Utilization of Small Business Concerns clause set forth at Section 52.219-8 of the Federal Acquisition Regulations, Title 48 of the Code of Federal Regulations
   - Provisions of the Small Business Subcontracting Plan clause set forth at Section 52.219-9 of the Federal Acquisition Regulations, Title 48 of the Code of Federal Regulations.

2. The Consultant agrees to fully comply with such provisions and any amendments thereof. In addition, all subcontracts and agreements that the Consultant enters into to accomplish the Work under the terms of this Contract shall obligate such subcontractors to comply with such provisions.

3. Compliance with the above provisions involve the development of a subcontracting plan, as prescribed in 19.704 of the Federal Acquisition Regulations, herein incorporated by reference. The attached Supplier Diversity and Business Development Subcontracting Report shall be used to report awards to small business concerns under the subcontracting plan.

SECTION 23. SEVERABILITY

If any term or provision of this Contract is held illegal or unenforceable by a court with jurisdiction over the Contract, all other terms in this Contract will remain in full force, and the illegal or unenforceable provision shall be deemed struck. In the event that the stricken provision materially affects the rights, obligations or duties of either party, Owner and Consultant shall substitute a provision by mutual agreement that preserves the original intent of the parties as closely as possible under applicable law.

SECTION 24. AMENDMENT OF CONTRACT

The terms and conditions of this Contract may be changed or modified only by execution of a written Contract Amendment executed by both parties. Oral amendments to this Contract or to any Amendment issued under it shall have no effect.

SECTION 25. GOVERNING LAW

This Contract shall be governed by the laws of the State of North Carolina, except that the North Carolina conflict-of-law provisions shall not be invoked in order to apply the laws of any other state or jurisdiction. Owner and Consultant expressly waive their rights to a trial by jury in any action brought hereunder.

SECTION 26. CONFIDENTIALITY; USE OF INFORMATION

The terms of this Contract and all Amendments to it are to remain confidential and shall not be provided in any form to any other party except upon order of a regulatory body or a court of competent jurisdiction. Consultant will not make any public statements or publish any information related to the Work performed or to be performed under this Contract without the prior written consent of Owner.

Materials which are reviewed by Consultant in the course of this Contract may contain trade secrets which are the property of Owner or which have been loaned, licensed, purchased or leased for Owner's use. Consultant agrees not to reveal any trade secret material to any person in any form and further agrees not to use the material for itself for any purpose not connected with this Contract.

Consultant agrees that if access is granted to Owner's computer network or a segment thereof, that this access is solely for the business purpose(s) described in Section 1 of this Contract. Consultant agrees that access for any other purpose or the use of Owner's computer network to access other networks, is strictly forbidden and that Consultant is responsible and liable for all damages or unauthorized access resulting from these actions. This activity will result in the discontinuation of any and all network connections, and Consultant understands that it may be subject to civil and/or criminal prosecution. Consultant further agrees that any information that it obtains from Owner's computer network is subject to all of the terms and conditions of this Contract.

Any program, document, data or information supplied by Consultant to Owner may be used, copied or disclosed by Owner as necessary in the normal course of its business, notwithstanding any copyright of Consultant in such materials and notwithstanding any notices or legends appearing thereon.

All reports, correspondence, documents, data, and other information relating to the Work are exclusively Owner's property and are to be considered as proprietary and confidential. All copies of all materials which are provided to Consultant by Owner must be returned to Owner upon completion of each assignment and before final payment for the completed Work will be made.

Consultant shall obtain a statement from every employee who will work under this Contract that he/she understands and agrees with the terms of the Contract.

SECTION 27. PUBLIC COMMUNICATION

Consultant agrees to cooperate with Owner in maintaining good community relations. Owner will issue all public statements, press releases, and similar publicity concerning the Work, its progress, completion, and characteristics. Consultant shall not make or assist anyone to make any such statements, releases, photographs, or publicity without prior written approval of Owner.

SECTION 28. NONWAIVER

Owner's failure to insist on performance of any of the terms and conditions herein or to exercise any right or privilege or Owner's waiver of any breach hereunder shall not thereafter waive any of Owner's rights or privileges under this Contract or at law. Any waiver of any specific breach shall be effective only if given expressly by Owner in writing.

SECTION 29. MERGER

This Contract embodies the entire agreement between Owner and Consultant. The parties shall not

PEF-POD3-NO3-017 HEARING EXHIBIT - 00000717

be bound by or liable for any statement, writing, representation, promise, inducement or understanding not set forth above. No changes, modifications or amendments of any terms and conditions of this Contract are valid or binding unless agreed to by the parties in writing and signed by their authorized agents.

Each party to this agreement and its counsel have participated in the creation of this agreement. The normal rule of construction to the effect that ambiguities are to be resolved against the drafting party shall not be employed in the interpretation of this agreement or of any amendments or exhibits to this agreement.

SECTION 30. BACKGROUND INVESTIGATION AND DRUG SCREEN

Consultant shall conduct background investigations (BI) as described below for all Consultant's or sub-contractor's employees where the scope of work to be performed will require: (i) a presence for a single period of 15 working days or more upon property owned or leased by Owner or any of Owner's subsidiaries or affiliates and/or (ii) access to Owner's business critical infrastructure. In addition, BI requirements may be applied to other personnel at the sole discretion of Owner's Designated Representative. Owner shall reimburse Consultant a reasonable and customary amount for performing such full or updated background investigations unless Work is performed on a firm fixed price basis. Owner shall not be obligated to reimburse Consultant for any BI expense for individuals who fail to meet the minimum acceptable qualifications. Owner has the right to require proof of such investigation and satisfactory compliance with the minimum criteria, which shall be readily available for Owner's inspection. Owner requires that Consultant maintain records of investigations for a minimum of five (5) years after the Work is completed.

Consultant is solely responsible for ensuring that its employees assigned to the Work meet or exceed the requirements of this section. Consultant must have all background investigations completed prior to the start of Work or in the case of emergencies, may be permitted to start Work while the investigations are being conducted. (If an emergent need requires delay in processing, all background investigations must be completed within 10 working days of the start date)

A. Responsibilities

Consultant shall be responsible to:

1. Initiate and ensure the completion of the appropriate background investigation. Employees should be required to complete a background questionnaire or employment application which includes history of residences, employment/unemployment periods, military history and criminal history. Consultant is the employer and makes decisions regarding assignments based on these guidelines.

2. Notify the worker of the terms and conditions of the background investigation and requirements of this Contract.

3. Furnish Owner with workers who meet or exceed the requirements of the BI and terms and conditions of the Contract.

4. Obtain written permission for the release of the worker's personal history information and information contained in the background investigation report and drug screen to Owner.

5. Require worker or subcontractor to report any arrest and evaluate under the rejection criteria to determine if worker meets Owner's criteria for rejection. (All workers who meet the criteria for rejection must be removed from Owner's Work immediately.)

PEF-POD3-NO3-018

HEARING EXHIBIT - 00000718

B. Types and Components of Background Investigation

1. Full Background Investigation

a. Employment History

Except as noted below, employment history must be verified for a minimum of 3 years, or to age 18, with previous employers by obtaining the following information:

Verification of all claimed periods of employment including disciplinary history, reason for termination and eligibility for rehire, and any other information that would reflect adversely upon reliability and trustworthiness.

If the employment history cannot be verified for the entire 3-year period, the reason must be included in the background investigation report.

Verify periods of self-employment and/or unemployment exceeding one hundred eighty (180) days within the 3 year period. Where information is not available, it will be verified by a reference or other sources. If no other source is available a relative may verify unemployment periods.

b. Military Record

All full time military service within the 3-year period must be verified by using Form DD-214 (member 4 copy) or other means.

c. Criminal Record

Prior to the applicant beginning employment a criminal history record check covering the previous five years, or to age 18, shall be conducted in each state/locality where the applicant has resided and in areas where the applicant has worked or attended school for more than 90 days during past 5 years.

Record checks should be conducted by contacting the appropriate agency of record such as state law enforcement agency, state criminal record repositories, local law enforcement agencies, state and local courts. Consultant shall ensure record repositories hold complete criminal history information (pending cases, misdemeanor records, and felony records, etc).

Reported criminal records should include specific offense information, court and jurisdiction and disposition of charge.

2. Updated Background Investigation

An updated background investigation is acceptable for re-hired workers if the worker previously had a full background investigation completed that meets Owner's criteria and it was completed by the current Consultant within the past three years of current effective work start date. The following components shall be checked:

- Employment history which covers the period of separation from Consultant exceeding 90 days
- Criminal history check in the county or counties where worker has resided and in areas where the applicant has worked or attended school for more than 90 days since the last BI for Progress Energy was conducted
