TEMPLATE REVISION LOG

NPV Rev #	AEP Rev #	Date	Name	Changes Made	Approved By
		1/22/2004	DC	Made template a R only - NR will be done on the original 15 year template.	GB, DK
		1/27/2004	DC	Change Months on Input Sheet to "Month 1", "Month 2" etc	GB, DK
		1/27/2004	DC	Added detailed approval section on AEP Worksheet	DK
		1/28/2004	DC	Corrected AEP cell # C35 to reference Input S23	DK
		1/29/2004	DC	Changed AEP Deferred Costs formulas (Col K35 - K 44) so that Deferred Charges do not exceed amounts projected to be spent. Revised comment. Confirmed with MN and BG that costs are allocated first to ECC in the books.	DK, GB
		1/29/2004	DC	Changed NPV Cell B23 to an "IF" Statement, so that projects that do not have an ECC show aero contribution on the NPV.	DK
		1/29/2004	DC	Put if statement on AEP worksheet so that projects that do not have an ECC do not calculate a Deferred Debit, interest etc..	
11.4	1.2	7/8/2004	DC	Updated Non-Fuel Rates as per Interim Rates approved by PSC effective for Meter Reads August 2004. NSB template removed - rates for rest of Company to be used as rates will eventually be the same at final hearing.	GB, DK
11.5		10/6/2004	DC	Revised formula for the contribution on the NPV to be zero when there is no AEP surcharge even though there may be a small ECC.	GB
11.6		11/18/2004	DC	Updated Non-Fuel Rates as per Rates approved by PSC effective 11/18/04	MS, DK, GB
		11/18/2004	DC	Updated Interest Rate - See back-up WACD - Gas Rate Case	GB
		11/18/2004	DC	Updated ROR to reflect WACC approved in NG Rate Case effective 11/18/04	GB
	1.3	11/18/2004	DC	Updated ROR as per WACC approved in Gas Rate Case 10/18/04 effective 11/18/04	GB
		11/18/2004	DC	Added Gas Lighting Service - checked by DK 10/29/04	GB, DK
11.7	1.4	2/18/2005	DC	Update ROR to reflect Year-end Surveillance Rate	GB
12	2	3/9/2005	DC	Link AEP & NPV to Input Sheet so that revenues are recognized in the month of projecte not year-end turn-ons.	GB, DK
12.1	2.1	3/31/2005	DC	Updated ROR to reflect final Year-end Surveillance Report Rate	CM
12.2	12.2	4/21/2005	DC	Updated O&M % to reflect Budget 2005 (adjusted for Propane savings $604 less tax)	GB
12.2		2/24/2006	DC	Updated Avg Shares Outstansing and Available for Common as at 12/31/2005	GB
12.3	12.3	4/6/2006	DC	Update ROR to reflect Dec 2005 Average Mid-Point Surveillance Rate	GB

Attachments: Internal Controls Master Checklist.xls

Hi Everyone!

As many of you are aware, the Company has specific internal controls that must be performed on a regular basis. Additionally, we need to be able to provide documentation to show we have complied with our internal controls requirements. Therefore, I am attaching a checklist of our company's internal controls. Please review the file and let me know if you have been assigned any items that need to be reassigned, and who the responsible individual should be. Also, if you are responsible for an item, but the control needs to be modified to reflect practice please send me your revisions (track the changes so I can clearly see what has been revised). To help make it easier for review, you can click the arrow next to "Responsibility" in cell A3 and select your position to view only the internal control requirements specific to your position.

Thanks for your help!

Thank you,
April Lundgren
Sr. SEC Accountant
Florida Public Utilities Company

Internal Controls Checklist

Responsibility	Freq	Control #	Control Description
Cash Accountant	Daily	4	Cash is disbursed from a limited number of bank accounts, inter-company account transfers are minimized; and inactive accounts are closed timely.
Cash Accountant	Monthly	1	The Cash Accountant who is independent of the cash disbursements function prepares bank account reconciliations monthly.
Accounting Manager	Monthly	2	The General Accounting Manager reviews, approves and signs off on all bank reconciliations monthly except for payroll account and returns.
Division Manager	Monthly	3	Expense account balances are compared to current and prior year amounts; large variances are investigated by Division Managers who are held accountable to the budget by management.
Cash Accountant	Daily	4	Borrowings and repayments to the line of credit (LOC) are done automatically by Bank of America on a daily basis, based on daily cash requirements.
Cash Accountant	Monthly	2	Cash is reconciled monthly by the Cash Accountant and all reconciling items are investigated and cleared timely.
Cash Accountant	Monthly	5	The Cash Accountant records the borrowings on the LOC per the bank statement. The General Ledger Accountant reconciles LOC per bank statement to the general ledger.
Cash Accountant	Monthly	6	LOC Interest is automatically withdrawn from the bank account monthly and the Cash Accountant reconciles the bank accounts monthly.
GL Accountant	Monthly	8	General Ledger Accountant performs a reconciliation of accrued interest each month that is reviewed and approved by the General Accounting Manager.
Cash Accountant	Monthly	9	Bank notifies Company when the interest is due on the long-term debt. The interest is paid via a wire transfer.
GL Accountant	Quarterly	7	General Leger Accountant analyzes the monthly interest expense based on current borrowings and verifies the interest charged and recorded is reasonable.
Financial Analyst	Quarterly	10	The financial analyst calculates the Company's compliance with the debt covenants and the CFO reviews and approves the calculation.
CFO	Annual	1	The Board of Directors are required to approve all financing to be obtained by the Company.
CFO	Annual	3	The CFO is the only person able to initiate and create a letter of credit with the bank.
IT Director	Daily	10	Only Customer Relations Director, Customer Information Systems Manager, IT Director, CFO and Business Systems Analyst have access to the customer rate master file in ORCOM
Sr Regulatory Acct	Monthly	1	There is a set formula to the price structure: Selling Price is fuel rate plus base rate plus conservation. This formula is consistently used each year.
Sr Regulatory Acct	Monthly	5	Projected over/under recovery is monitored and updated from actual monthly billings and cost by Senior Regulatory Accountant on a monthly basis and filed with the commission
Sr Regulatory Acct	Annual	3	Senior Regulatory Accountant calculates the fuel price to be charged for the year based on the annual electricity contract. The annual electric contract fixes the price of electricity for the entire year and therefore the rates are only updated once a year
Sr Regulatory Acct	Annual	4	Fuel rate for the following year are prepared by Senior Regulatory Accountant in August or September in a given year using budgeted information on usage and cost, and it is filed with the Commission. In early November or December, the Commission approves the monthly projected rates for the following year. These rates are used for billing customers in the following year
Sr Regulatory Acct	Annual	6	After the projected rates for the following year is approved by the Commission, Senior Regulatory Accountant prepares an e-mail to notify Customer Relations Department of new approved rate per the commission.
Cust Relations Director	Annual	7	Customer Relations Director inputs the rate change in the ORCOM (billing system).
Cust Information Mgr	Annual	8	Customer Information Manager verifies the rate in ORCOM agrees to the new rate communicated by the Senior Regulatory Accountant and approves the entry.
Sr Regulatory Acct	Annual	9	The Fuel Rate Memo is sent out to each division by Senior Regulatory Accountant once the PPA is determined, so each division is aware of the current rate.
CIS Analyst	Annual	11	FPU establishes an annual fixed billing meter reading schedule and distributes the schedule to the local offices. The schedule identifies the exact dates when the rate will change which is effective on the "read date" of cycle 1 of each January
Cust Relations Director	Annual	12	Customer Relations Director ensures that the Senior Regulatory Accountant has submitted the rate change form each year prior to the scheduled effective date.
CIS Manager	Annual	13	CIS Manager verifies the rate change entry in ORCOM was completed by the required effective date. CIS Manager's review is documented by signing and dating the Fuel Adjustment Form Electric.
Accounting Manager	As Req	2	Base Rate is determined by the Commission, and it is only changed when a new rate study is done.
Gas Logistics Mgr	Daily	3	FPU currently limits propane purchases to two main vendors: INERGY and DYNEGY.
IT Director	Daily	6	Only Customer Relations Director, Customer Information Manager, IT Director, CFO, and Business Systems Analyst have access to the customer rate master file in ORCOM
Propane Director	Monthly	1	Director of Propane sends out the ORCOM Propane Rates and Propane Rates Quick Reference to each division, marketing staff and customer relations department once the price is determined, so each propane related personnel is aware of the current rate.
Propane Director	Monthly	2	Propane Gas Adjustment Form to change the price charged per unit of propane is prepared and signed off by Director of Propane.
Cust Relations Director	Monthly	4	Customer Relations Director signs off on the Propane Gas Adjustment Form and inputs the rate change in ORCOM (billing system).
Cust Information Mgr	Monthly	5	Customer Information Manager verifies the rate in ORCOM agrees to the amount indicated on the Propane Gas Adjustment Form and approves the entry.
CIS Analyst	Monthly	7	FPU establishes an annual fixed billing meter readingp schedule and distributes the schedule to the local offices. The schedule identifies the exact dates when the rate will change which is effective on the "read date" of cycle 1 of each month for metered propane and the "billed date" of cycle 1 of each month for bulk propane.
Cust Relations Director	Monthly	8	Customer Relations Director ensures that the Director of Propane has submitted the rate change form each month prior to the scheduled effective date.
CIS Manager	Monthly	9	CIS Manager verifies the rate change entry in ORCOM was completed by the required effective date. CIS Manager's review is documented by signing and dating the Propane Gas Adjustment Form.
IT Director	Daily	11	Only Customer Relations Director, Customer Information Systems Manager, IT Director, CFO, and Business Systems Analyst have access to the customer rate master file in ORCOM

Responsibility	Freq	Control #	Control Description
Sr Regulatory Acct	Monthly	1	There is a set formula to the price structure: Selling Price is PGA plus Base Rate plus conservation plus AEP and surcharges where applicable. This formula is consistently used each year.
Sr Regulatory Acct	Monthly	3	Projected over/under recovery is monitored and updated from actual monthly billings and cost by Senior Regulatory Accountant on a monthly basis and filed with the commission
Gas Logistics Mgr	Monthly	4	PGA is compared with market rate each month for reasonableness check by Gas Logistics Manager and documented on the Projected Rate Sheet.
Gas Logistics Mgr	Monthly	5	Gas Logistics Manager determines the PGA for forward months based on the Projected Rate Sheet prepared by Senior Regulatory Accountant which details budget and accounting projections and updates for current market conditions
Gas Logistics Mgr	Monthly	7	Gas Logistics Manager prepares and signs off on the Natural Gas Rate Adjustment form and submits to Customer Relations Department.
Cust Relations Director	Monthly	8	Customer Relations Director signs off on the Natural Gas Rate Adjustment form and inputs the rate change in ORCOM (billing system).
Cust Information Mgr	Monthly	9	Customer Information Manager verifies the rate in ORCOM agrees to the approved Natural Gas Rate Adjustment form and approves the entry.
Gas Logistics Mgr	Monthly	10	The PGA Sheet is sent out to each natural gas division by Gas Logistics Manager once the PGA is determined for each month. so each division is aware of the current rate. The PGA Sheet includes current rate and historical data.
CIS Analyst	Monthly	12	FPU establishes an annual fixed billing meter reading schedule and distributes the schedule to the local offices. The schedule identifies the exact dates when the rate will change which is effective on the "read date" of cycle 1 of each month
Cust Relations Director	Monthly	13	Customer Relations Director ensures that the Gas Logistics Manager has submitted the rate change form each month prior to the scheduled effective date.
CIS Manager	Monthly	14	CIS Manager verifies the rate change entry in ORCOM was completed by the required effective date. CIS Manager's review is documented by signing and dating the Natural Gas Adjustment Form.
Sr Regulatory Acct	Annual	6	Rate projections for the following year are prepared by Senior Regulatory Accountant in August or September in a given year, and it is filed with the Commission. In early November or December, the Commission approves the monthly projected rates for the following year. These rates are used as parameters for billing customers in the following year. The Company is not allowed to exceed the rates approved by the Commission unless special approval is received
Accounting Manager	As Req	2	Base Rate is determined by the Commission, and it is only changed when a new rate study is done.
CIS Analyst	Daily	1	After every posting to the computer system, Orcom will produce a CISBAL Report (Customer Information Balance/Accounts Receivable Balancing Report). The CIS Analyst agrees and balances the amounts that are identified in the CISBAL Report to the PR2 Report (lists all accounts billed for the day by utility) and the Sales Journal (lists all posting by GL account), all variances are identified and corrected timely
IT Director	Daily	4	Access to the "Customer Control Files" is limited to the Director of Customer Relations, CIS Manager, CFO, Business System Analyst and IT Director.
IT Director	Daily	6	Orcom system produces daily routes and meters to be read which is loaded on the hand held devices.
Cust Relations Operator	Daily	7	After the bills are produced by the outside biller (Kubra) the CR Operator agrees the dollar amount and number of bills processed/mailed per the "Kubra Production Filter Log" provided by the vendor to the number and amount of the bills to be processed per the Orcom data file. Any differences researched and documented on an excel reconciliation sheet kept by the CR Operator
Cust Relations Director	Daily	8	Orcom requires all meters to be read regardless of whether the meter is active or unused.
IT Director	Daily	9	ITRON produces a report to the divisional office if the meter reader inadvertently or intentionally skips any reads. The hand held device will alert the meter reader if the read does not appear to be correct.
CIS Analyst	Daily	11	The CIS Operator sends all managers a listing of their "Premises Not Billed" for that days billing cycle.
Cust Service Manager	Daily	12	The customer service representative (CSR) performs a pre-audit on meter reads to verify that all meter exceptions were addressed. The meter exceptions identified and worked at this stage are premise or usage exceptions.
IT Director	Daily	13	Orcom identifies all pre-bills that have abnormally high or low dollars or if the customer is being charged for services they don't have on the "Bill Batch" report which is reviewed and discrepancies are resolved or overridden at the local office by the office CSR. The high or low usage is determined by comparing the current bill to the prior two months and the same month the prior year and identifies abnormally high or low usage if the current bill differs by the predetermined system parameters located in the Orcom table
IT Director	Daily	14	Orcom identifies unusual items in the billing system as a terminal or soft exception after the meter reading batch is posted to the Orcom system.
Cust Service Manager	Daily	15	The local CSR is required to review all terminal exceptions and provide a "Cycle Information Form" to the CIS Operator to override the exception for the valid prebills that should be billed. If the exception is not an accurate bill, the local CSR will move the exception to their division's exception batch to research, correct and resubmit to bill.
CIS Analyst	Daily	16	If the CIS Operator does not obtain a "Cycle Information Form" to override a terminal exception, the bill will not be created and will be sent to the "Division Batch Exception" which must be resolved in 5 days.
CIS Analyst	Daily	17	CIS Operator examines all "Cycle Information Forms" for appropriate documentation to clear all terminal exceptions in Orcom.
IT Director	Daily	18	Calculation of the amount billed is computer automated based on the current rates loaded into the system.
Cash Accountant	Monthly	2	Cash Accountant reconciles the monthly sales journal to the general ledger posting.
Accounting Manager	Monthly	3	General Accounting Manager reviews and approves the monthly revenue journal entry prepared by the cash accountant.
Sr Regulatory Acct	Monthly	5	Senior Regulatory Accountant (independent of billing) reconciles the rates charged during the month and prepares a FPSC filing each month for the gas and electric fuel rates billed to the customers for the month. The amount billed to the customers is reconciled to the cost of fuel for the month
Cust Service Manager	Monthly	10	All customer service managers are required to review and approve the monthly "No Bill" report that identifies all premises that have not been billed in 34 days.
Cust Service Manager	Daily	1	Company requires a deposit on electric, gas, and most propane accounts of approximately two months usage. In the case of commercial accounts, can supply a surety bond and an irrevocable letter of credit instead of a deposit.
Cust Service Manager	Daily	2	If customer purchases merchandise on credit, a credit report is run on customer prior to sale or delivery except for good-standing customers or customers who purchased a water-heater.
Cust Service Manager	Daily	3	A delinquent notice is sent to every account over 2 days past due which is 22 days from date of bill.

Responsibility	Freq	Control #	Control Description
Cust Service Manager	Daily	4	If account is greater than $30 and over 30 days from date of bill, a collector notice is issued and a collector will visit premises to receive payment or shut-off service.
Cust Relations Director	Daily	7	Bankrupt accounts are flagged and identified in Orcom by the Director of Customer Relations upon receipts of bankruptcy notices from the court.
IT Director	Daily	9	Only the Customer Relations department has access to post write-off bad debts to the system.
Accounting Manager	Monthly	5	All accounts over 90 days after account has closed are automatically written-off to bad debt batch and sent to an outside collection agency.
Cash Accountant	Monthly	6	An accounts receivable aging summary and write-off history analysis is sent to the division manager monthly. Division directors are evaluated based on achieving pre-determined aging goals.
Division Manager	Monthly	8	Managers have to review all accounts to be written-off to bad debts on a monthly basis and the division manager has to approve via email the bad debt accounts included in the bad debt batch before posting to the Orcom system by the Customer Service department.
CIS Analyst	Daily	1	CIS Analyst runs two queries prior to cash posting to verify all miscelleaneous cash assigned a valid general ledger account and merchandise down payments are tied to a valid contract in the system is (not posted to the customers ledger)
Cust Relations Director	Daily	2	Majority of all payments are sent to a central "Lockbox" at the Marianna facility in which the Company owns equipment that processes the mail payments and checks received.
IT Director	Daily	3	Cash cannot be posted until the prior days cash received per Cash Edit D report is reconciled to the System Balance in Orcom.
CIS Analyst	Daily	5	CIS Analyst receives a daily email from each location indicating the location has initiated a pending post of the cash receipts in Orcom. CIS Analyst logs the time that each location sent the email and verifies all locations have initiated a pending post in the system prior to a final cash post
CIS Analyst	Daily	6	CIS Analyst balances the cash receipts posted in Orcom for the day to the cash receipts identified in the "Daily Cash Reports" provided by each location to verify all cash received for the day was properly posted in the Orcom system.
CIS Analyst	Daily	7	CIS Analyst balances the "Cash Edit D" report that identifies all the types of cash received, to the CISBAL report to the cash receipts journal to verify the amount of cash applied to accounts receivable agrees to the cash received.
CIS Analyst	Daily	14	If money or cash is received from an unknown source or unidentifiable customer, the funds are recorded as a liability in an unidentified cash account. Customer Service can search this account by dollar and date posted when person calls to claim payment
CIS Analyst	Daily	15	Funds received on closed accounts can still be applied to the closed account and will trigger repayment back to the customer.
Accounting Manager	Daily	17	The person who receives and applies the cash is different than the person who posts the cash to the computer system who is different than the person who reconciles the bank accounts to the general ledger.
Division Manager	Daily	18	Cashier balances his/her drawer every 24 hours by matching the batch totals to the actual cash received for the past 24 hours and prepares a deposit ticket.
Cust Service Manager	Daily	19	Location supervisor reviews all deposit tickets, agrees the amount deposited to the "Daily Cash Report" total deposits, and intermediate posts each batch to remove access to batch from cashiers.
Division Manager	Daily	20	An armored car service picks up all cash received prior to the scheduled time daily, except for New Smyrna and West Florida.
Cust Service Manager	Weekly	16	Office CSM is responsible to review postings to the Unidentified Cash account and contact check writer to find proper placement for the funds and to make and file a photocopy of the check.
CIS Analyst	Monthly	4	CIS Analyst runs a month-end "Cash Receipts Journal", identifies the bad G/L's, and corrects the entries prior to forwarding to Accounting.
CIS Analyst	Monthly	8	CIS Analyst runs a month-end "Cash Receipts Journal" and agrees balances to the daily balancing worksheet.
CIS Analyst	Monthly	9	Customer statements are sent to customers indicating cumulative balance owed and the customer service department who is independent of cash receipts investigates discrepancies identified by the customer.
Cash Accountant	Monthly	10	Cash Accountant takes the month-end "Cash Receipts Journal" and verifies the totals agree to the monthly total of the daily cash reports and prepares a manual journal entry.
Accounting Manager	Monthly	11	General Accounting Manager reviews and approves the cash receipts journal entry prior to posting the journal entry.
Cash Accountant	Monthly	13	Cash Accountant reconciles the bank account which is reviewed and approved by the General Accounting Manager.
Cash Accountant	Quarterly	12	Cash accountant reconciles the accounts receivable aging to the general ledger quarterly.
HR Assistant	Daily	5	Prior to benefit payments, HR Assistant(independent from State Street, the custodian of benefit plan assets) forwards participant's retirement notice to AON. AON prepares and sends the participant a Retirement Application that details the entitled benefits and options of distributions. HR Assistant reviews the Retirement Application signed by the participant and prepares and sends the payment request to State Street for distribution process
HR Assistant	Weekly	10	Total amount paid per the Payroll Report is agreed to the checks generated.
Sr Tax Accountant	Monthly	7	The Senior Tax Accountant reconciles the payroll tax accounts monthly
Inventory Analyst	Monthly	7	The Inventory Analyst reconciles the payroll and deductions monthly, which are reviewed and approved by management monthly.
Accounting Manager	Monthly	8	Payroll related accruals are reviewed for completeness and reasonableness and approved by General Accounting Manager.
HR Assistant	Monthly	9	Payroll system uses edit checks to query the HR department to check whether all employee time reports have been submitted into the payroll system. If a persons time is missing, the computer report generated questions the HR department. The HR Assistant receives a report titled "Unmatched Employees" that identify employees not receiving a check
Sr Tax Accountant	Quarterly	11	Senior Tax Accountant reconciles the "701" computer report from the payroll system to the "HR 310" report computed with every payroll. Senior Tax Accountant makes sure amounts equal and computes the required tax deposits from these reports and agrees it to the actual payroll tax deposits and reconciles any discrepancies
CFO	Annual	1	Analytics are performed by AON annually. A meeting including the CEO, COO, CFO, and HR Director is held to discuss the projections and assumptions related to pension costs. Actual benefit costs are compared with expected benefit costs and any differences are investigated and resolved
Sr Financial Acct	Annual	2	Senior Financial Reporting Accountant compares the total contributions to the benefit plan and reconciled to GL for benefit costs recorded and accrued. The reconciliation is reviewed and approved by management monthly and approved by the CFO on a quarterly basis
Sr Financial Acct	Annual	3	Senior Financial Reporting Accountant prepares journal entry to true-up pension liability balance based on AON's projections and accrues for future funding. CFO review and signs off on the JE's.

Responsibility	Freq	Control #	Control Description
HR Assistant	Annual	4	HR Assistant prepares the "Pension Valuation Spreadsheet" to update AON(Actuary) with new hires, new terminations, and compensation information for all participants. To ensure that all participants are included correctly, HR Assistant generates payroll report and compare the amounts per this report to total W-2's reported.
GL Accountant	Annual	6	Detailed records are maintained of the liability for compensated absences, and the General Ledger Accountant reconciles it to the general ledger.
CFO	Daily	1	Company has a policy not to conduct transactions with officers or directors or affiliated companies of officers and directors.
CFO	Annual	2	Directors and officers are required to complete a D&O Questionnaire that identifies entities that the director or officer or a member of their immediate family that acts as a director or officer or owns.
CFO	Annual	3	The CEO and CFO review all D&O questionnaires for accuracy to the best of their knowledge.
CFO	Quarterly	4	The CEO and CFO review all SEC filings prior to ensure the related party transactions are appropriately presented based on their knowledge of the known related parties.
Sr Financial Acct	Quarterly	1	Senior Financial Accountant reconciles and maintains the liability reserve account to update losses and true-up the liability level.
CFO	Quarterly	2	CFO receives a letter from the Company's legal counsel that identifies all known or threatened litigation and the potential exposure of each incident.
CFO	Quarterly	3	CFO reviews and approves the general ledger entry prepared by Senior Financial Reporting Accountant comparing the journal entry to the approved reconciliation.
Cust Service Supervisor	Daily	1	Customer Service Supervisor (separate from warehouse personnel issues the merchandise) matches the quantity and items on the following documents: the tag removed from merchandise and the tag from warehouse file, the Pink Sales Contract, and completed Service Order, then she relieves the merchandise from inventory system.
Stores Supervisor	Weekly	4	Customer Service Supervisor runs a report of merchandised sold from the inventory system for the week and sends to the Stores Supervisor. Store Supervisor verifies that items listed on the report match all the merchandise issued from warehouse for the week. Any difference are immediately investigated.
Inventory Analyst	Monthly	2	Inventory Analyst (separate from warehouse personnel issues the merchandise) matches the White Sales Contracts to the Sold List generated by the Merchandise Inventory System and to the merchandise tags for the quantity and final costs and investigates any variances.
Accounting Manager	Monthly	3	Inventory Analyst prepares a journal entry to capture the quantity and final cost of merchandise issued that is reviewed and signed off by General Accounting Manager.
Accounting Manager	Monthly	5	Merchandise Inventory System generates the Inventory Available Report. Inventory Analyst uses this report and reconciles the perpetual inventory system report to GL balance and investigates any differences. Variances are recorded by the Inventory Analyst as a journal entry to update the G/L. General Accounting Manager reviews and signs off on the JE.
Division Manager	Annual	6	Full physical inventories of merchandise is performed every year by the warehouse personnel.
Division Manager	Daily	1	Warehouse personnel fills out and signs a Material Receipt for every item received indicating receipt of goods.
Office Services	Daily	4	If Office Services department placed the order, then the Office Services department will match the quantity of goods received to the invoice to the purchase order and also agree the price per the purchase order to the price per the invoice.
Division Manager	Daily	5	If an item received is on a Local Purchase Order, then the Stores Supervisor will agree the quantity of goods received to the invoice and also agree quoted to the price per the invoice.
Inventory Analyst	Daily	6	Inventory Analyst verifies the quantity received per the Material Receipt agrees to the quantity charged per the invoice and also agrees the amount charged per the invoice agrees to the voucher.
Division Manager	Daily	8	The stores supervisor maintains a Local Purchase Order Log and documents the date the voucher is prepared and date the invoice was received.
Division Manager	Daily	9	The duties of receiving the inventory are performed by the warehouse personnel, which are segregated from the duties of updating the perpetual inventory system which is performed by the IT department.
Office Services	Monthly	3	At the end of each month, Office Services department reviews all Material Receipt received but without a corresponding invoice. These items are listed as the month end supplies and material accrual for items received not invoiced and provided to the inventory analyst to accrue.
Accounting Manager	Monthly	7	The Inventory Analyst reconciles the perpetual inventory system to the general ledger each month. General Accounting Manager reviews and signs off the reconciliation.
Division Manager	Annual	2	Full physical inventories of materials and supplies are taken every other year with a partial inventory of items that constitute 70% of the value done in the other years.
Division Manager	Annual	1	Full physical inventories of materials and supplies are taken every other year with a partial inventory of items that constitute 70% of the value done in the other years.
Accounting Manager	Annual	2	Corporate Accounting randomly selects inventory items to be test counted. For full inventories, 5% of the inventory items are test counted. For partial inventories, 10% of the inventory items are test counted.
Accounting Manager	Annual	3	A Corporate Accounting staff verifies and accounts for all tags issued for the physical inventory. All tags are accounted for including voids and unused tags.
Accounting Manager	Annual	4	A Corporate Accounting staff and warehouse manager investigate large book to physical variances.
Division Manager	Annual	5	Items received during the physical inventory are added to the physical inventory documentation for inclusion with the inventory reconciliation.
Division Manager	Annual	6	Inventory is counted by individuals under the supervision and direction of the warehouse manager.
Division Manager	Annual	7	Tags are placed on all inventory items or bins to indicate they have been counted, and it is verified by the test
Accounting Manager	Annual	8	A Corporate Accounting Staff prepares the book to physical journal entry to be posted in the general ledger and perpetual inventory system. The entry is reviewed and approved by the Controller.
Division Manager	Daily	1	The person filling (warehouse personnel) the order initials the stock slip indicating the request was fulfilled and the person receiving the supplies and materials initials the stock slip indicating they received the items identified on the stock slip
Division Manager	Daily	2	The warehouse personnel cannot issue any supplies or materials unless a stock slip is created and signed by the issuer and the receiver.
Division Manager	Daily	3	Each stock slip issued is assigned a sequential number by Store Supervisor. Each morning, Store Supervisor enters prior day inventory issuance into the Inventory System accounting for the sequential numbering of stock slips and verifying the first stock slip number follows the prior days last stock slip number
IT Director	Monthly	4	Inventory System is interfaced with Infinium (G/L system) and automatically generates journal entry to capture quantity and value of the inventory issued.

Responsibility	Freq	Control #	Control Description
Accounting Manager	Monthly	5	Inventory Analyst (separate from warehouse personnel who issues the inventory) reconciles the perpetual inventory system report to the G/L balance and investigates any differences. Inventory Analyst prepares the adjustment journal entry if needed to update G/L. This adjustment JE is reviewed and signed by General Accounting Manager
IT Director	Monthly	7	Inventory System calculates cost on inventory relieved by multiplying the quantity by the average inventory cost per unit calculated by the system.
Division Manager	Annual	6	Full physical inventories of material and supplies are performed every other year with partial physical of items that constitutes 70% of the value done in other years by warehouse.
Office Services	Daily	1	All of the following documents are required by Office Services department to prepare voucher: Non-Inventory Material Receipt, Bill of Lading, Purchase Order and vendor invoices. The Office Services Department agrees the quantity and prices charged per these documents and verify they agree. If all items agree, a voucher is prepared
Office Services	Daily	7	Officer Services Manager matches the approved Purchase order to the Bill of Lading and Non-inventory Material Receipt and verifies the purchase was appropriately authorized per the Purchase Authorization Procedures.
Office Services	Daily	8	Office Services department receives vendor invoices, matches the quantity and price against the Non-Inventory Material Receipt and Bill of Lading, and investigates and reconciles any variances.
AP Analyst	Daily	9	Inventory is recorded into the computer system by the AP Analyst which is different than the person receiving the inventory.
Office Services	Weekly	2	Office Services department receives an EFT notification from the vendor that indicates the amount of cash that will be withdrawn from FPU's bank account by the vendor and reconciles the amount to be paid to all vouchers during that week to verify amount is accurate
Propane Director	Monthly	3	Each division performs an inventory balancing and prepares an End of Month Propane Inventory report which rolls inventory balance from prior month balance to current balance. This report is also reviewed and sent by the division supervisor to the Director of Propane to Inventory Analyst
Inventory Analyst	Monthly	4	Inventory Analyst converts the Gas Received portion in the End of Month Propane Inventory Report into dollars and reconciles to the G/L balance for all inventory received during the month.
Division Manager	Monthly	5	Physical inventories of propane at the tank farms are done monthly by tank farm personnel to record the ending inventory balance to use in the monthly inventory rollforward report. The inventory is also taken daily for division use.
Inventory Analyst	Annual	6	A reasonableness calculation of propane located in the tanks of metered customers is performed once a year. The Propane Delivery System runs a program that calculates the estimated balance at a given day of propane in a metered customers tank based on the prior date the tank was filled. This test validates the propane inventory in metered tanks on a given day. The variances are reconciled and errors identified by the report are investigated either individually or using a random sample and adjusted to correct value by the Inventory Analyst and a book to physical adjustment is posted in the G/L
Division Manager	Monthly	1	Physical of inventories of propane at the tank farms are done monthly by tank farm personnel to record the ending inventory balance to use in the monthly inventory rollforward report. The inventory is also taken daily for division use.
Inventory Analyst	Monthly	2	Inventory Analyst reconciles the physical count of Tank Farm inventory month and investigates and reconciles significant variances (done per monthly propane rollfoward report).
Accounting Manager	Monthly	4	Inventory Analyst prepares the book to physical journal entry to adjust the G/L balance, and the journal entry is approved/signed off on by the General Accounting Manager. The CFO's approval and sign off are also required for the annually customer premises book to physical adjustment entry in addition to the General Accounting Manager's approval. Monthly control for tanks
Division Manager	Monthly	5	Inventory read of tanks is performed by individuals who are familiar with the equipments and independent of inventory record keeping. Monthly control for tanks.
Inventory Analyst	Annual	3	A reasonableness calculation of propane located in the tanks of metered customers is performed once a year. The Propane Delivery System runs a program that calculates the estimated balance at a given day of propane in a metered customers tank based on the prior date the tank was filled. This test validates the propane inventory in metered tanks on a given day. The variances are reconciled and errors identified by the report are investigated either individually or using a random sample and adjusted to correct value by the Inventory Analyst and a book to physical adjustment is posted in the G/L
CFO	Annual	4	Inventory Analyst prepares the book to physical journal entry to adjust the G/L balance, and the journal entry is approved/signed off on by the General Accounting Manager. The CFO's approval and sign off are also required for the annually customer premises book to physical adjustment entry in addition to the General Accounting Manager's approval. Annual control for customer premises
Propane Clerk	Daily	1	Delivery Tickets are automatically stamped with the gallons disbursed by the meter on the delivery trucks when Drivers deliver propane.
Propane Clerk	Daily	2	For each truck, Propane Clerk accounts for all Delivery Tickets and reconciles the beginning read to the ending read on the trucks.
Propane Clerk	Daily	3	Propane Clerk runs a tape of all Delivery Tickets for all trucks and reconciles to the Delivery Edit Report generated by the Propane Delivery System(scheduling system).
Propane Clerk	Daily	4	Propane Clerk generates the Fills Do Not Agree (FDA) report which details all the variances between gallons delivered and meter reads as percentage, reviews and investigates unacceptable variances, i.e. >25% for tanks 120 gallon and smaller and >15% for tanks 250 gallons and larger. Findings are documented on the FDA report or on a service order
Office Services	Daily	11	Office Services Manager compares the vendor pricing to the OPIS Index provided by the Gas Logistics Manager and the destination pricing report provided by the vendor to verify if the accurate price is charged (usually the lower of the OPIS Index and destination pricing)
Propane Clerk	Daily	12	Propane is delivered by Drivers at each division, Propane Clerk accounts for all Delivery Tickets, and Inventory Analyst records inventory issuance in the G/L. Daily control for delivery
Division Manager	Monthly	5	Each division performs inventory balancing and prepares the End of Month Propane Inventory report which details the rollforward of prior month inventory balance to current month balance. This report is reviewed and forwarded by the Division Supervisor to the Inventory Analyst
Inventory Analyst	Monthly	6	Inventory Analyst summarizes all divisions End of Month Propane Inventory reports and prepares the inventory rollforward worksheet to calculate the month end G/L balance.
Accounting Manager	Monthly	7	Inventory Analyst converts the Gas Issued portion in the End of Month Propane Inventory Report into dollars and prepares a journal entry to record propane inventory issued during the month to update the G/L. The journal entry is reviewed and approved by the General Accounting Manager

Responsibility	Freq	Control #	Control Description
Division Manager	Monthly	8	Physical of inventories of propane at the tank farms are done monthly by tank farm personnel to record the ending inventory balance to use in the monthly inventory rollforward report. The inventory is also taken daily for division use.
Accounting Manager	Monthly	10	Inventory Analyst calculates total cost of inventory issued within the rollforward worksheet using the average cost per gallon and total quantity delivered. Inventory Analyst then prepares a month-end journal entry for propane issuance during the month to update G/L. The journal entry is reviewed and approved by the General Accounting Manager
Inventory Analyst	Monthly	12	Propane is delivered by Drivers at each division, Propane Clerk accounts for all Delivery Tickets, and Inventory Analyst records inventory issuance in the G/L. Monthly control for GL recording
Inventory Analyst	Annual	9	A reasonableness calculation of propane located in the tanks of metered customers is performed once a year. The Propane Delivery System runs a program that calculates the estimated balance at a given day of propane in a metered customers tank based on the prior date the tank was filled. This test validates the propane inventory in metered tanks on a given day. The variances are reconciled and errors identified by the report are investigated either individually or using a random sample and adjusted to correct value by the Inventory Analyst and a book to physical adjustment is posted in the G/L
Division Manager	Annual	1	Full physical inventories of merchandise are taken every year by warehouse personnel.
Accounting Manager	Annual	2	A test count of 5% of all inventories is done by individuals independent of the inventory count.
Accounting Manager	Annual	3	Corporate Accounting staff reconciles physical inventory and general ledger account and prepares necessary adjustments.
Accounting Manager	Annual	4	Corporate Accounting staff and warehouse manager investigate any book to physical variances.
Division Manager	Annual	5	Items received during the physical inventory are added to the physical inventory documentation for inclusion with the inventory reconciliation.
Division Manager	Annual	6	Inventory is counted by individuals under the supervision and direction of the warehouse manager.
Division Manager	Annual	7	After the inventory counting is completed, items without a "post-it" note are investigated.
Accounting Manager	Annual	8	Corporate Accounting staff prepares the book to physical journal entry to be posted in the general ledger and perpetual inventory system. The entry is reviewed and approved by the Controller.
Division Manager	Daily	1	Warehouse personnel fills out and signs a Material Receipt for every item received indicating receipt of goods.
Division Manager	Daily	2	The warehouse personnel generates a pre-numbered system tag in duplicate from the inventory system upon the receipt of each piece of merchandise inventory. One tag is placed on each piece of merchandise received, one tag is placed in the warehouse file
Office Services	Daily	7	If Office Services department placed the order, then the Office Services department will match the quantity of goods received to the invoice to the purchase order and also agree the price per the purchase order to the price per the invoice. If everything agrees, the Office Services department prepares the voucher
Division Manager	Daily	8	If an item received is on a Local Purchase Order, then the Sales Coordinator or local divisional purchaser will agree the quantity of goods received to the invoice to the purchase order and also agree the price per the purchase order to the price per the invoice. If all items agree the Sales Coordinator or local divisional purchaser prepares the voucher for payment
Inventory Analyst	Daily	9	Inventory Analyst verifies the price on the voucher agrees to the price on the invoice.
Division Manager	Daily	11	The Sales Coordinator maintains a Local Purchase Order Log and documents the date the voucher is prepared and date the invoice was received.
Division Manager	Daily	12	The duties of receiving and recording the inventory are performed by the warehouse personnel which are segregated from the duties of creating a voucher and processing the payment for the inventory.
Division Manager	Daily	13	Warehouses are equipped with alarm systems and guards.
Division Manager	Daily	14	Service Order is required prior to issuing merchandise.
Division Manager	Monthly	4	The Sales Coordinator receives a Merchandise Audit Report from the Stores Supervisor that identifies all system tags received in the period. This report is used to verify all system tags are received from the warehouse.
Accounting Manager	Monthly	5	Inventory Analyst accrues all items sold during the month that have not been paid using the Sold Report, all available inventory items that have not been paid using the Available Report, and all items sold and accrued in prior month that have not been paid. Inventory Analyst prepares the accrual journal entry, and it is reviewed and signed off by the General Accounting Manager
Accounting Manager	Monthly	10	The Inventory Analyst reconciles the perpetual merchandise inventory system to the general ledger each month. General Accounting Manager reviews and signs off on the reconciliation.
Division Manager	Annual	6	Full physical inventories of merchandise are taken at least once every year.
GL Accountant	Monthly	1	The General Ledger Accountant prints a pre-tax financial statement, detailed expense report, and balance sheet on a divisional level and sends the reports to the accounting department for review.
Sr Financial Acct	Monthly	2	The accountants responsible for each account will verify the financial statement accuracy and investigate large variances or fluctuations (over $5,000) between the current and prior period amounts. Each person is responsible to document the reason for the fluctuation on the Analysis Worksheet for his or her assigned accounts
Sr Financial Acct	Monthly	3	The Senior Financial Accountant verifies each person responsible documents on the Analysis Worksheet all the fluctuations over $5,000. She then prepares a letter that explains the variances between the current period and prior period for all fluctuations over $20,000 and distributes the letter to each person who receives the monthly financial statements (mainly directors and managers)
Accounting Manager	Monthly	4	General Accounting Manager prepares a Master Closing Schedule that identifies all items to be completed prior to the close and identifies person responsible.
GL Accountant	Monthly	5	General Ledger Accountant maintains a JE control log of all required journal entries and person responsible will electronically input date and their initials on the JE control log once the journal entry is completed and entered into the system
Accounting Manager	Monthly	6	The General Accounting Manager maintains a log of all account reconciliations that need to be performed and the person responsible. The person responsible in General Accounting to complete the reconciliation is required to input completion date on the log once the reconciliation is complete
IT Director	Monthly	7	Only the General Ledger Accountant, Cash Accountant, General Accounting Manager, CFO, Controller and Corporate Accounting Supervisor have access to post journal entries to Infinium.
Accounting Manager	Monthly	8	The Controller, General Accounting Manager or the Corporate Accounting Supervisor reviews, approves and signs-off on all journal entries prior to being entered into the system.
General Office Asst	Monthly	9	The General Office Assistant or designee obtains all journal entry forms from the General Ledger Accountant and verifies each journal entry was correctly key punched into Infinium. The General Office Assistant signs-off on the journal entry form indicating she proofed the entry in the system

Responsibility	Freq	Control #	Control Description
Accounting Manager	Daily	1	Only Controller, CFO, General Accounting Manager or Corporate Accounting Supervisor are authorized to initiate and release recurring wire transfers.
Accounting Manager	Daily	2	To set-up the wire transfer template for a transaction to be recurring wire transfer with Bank of America, it requires one authorized person to initiate and a second authorized person to release it.
Accounting Manager	Daily	3	Non-recurring wire transfers require one authorized person to initiate the transaction and a second authorized person to release it.
Accounting Manager	Daily	4	Bank of America's wire transfer web site requires log-in ID and password for each authorized individual.
Accounting Manager	Daily	6	Only Controller, CFO, General Accounting Manager or Corporate Accounting Supervisor are able to process wire transfers.
Cash Accountant	Monthly	5	Bank account is reconciled on a monthly basis with reconciling items investigated timely.
Division Manager	Monthly	1	The Division Manager reviews all monthly invoices for reasonableness. The review consists of comparisons to prior years, and considers the weather conditions throughout the current month.
Division Manager	Monthly	2	Supplier invoices are reconciled to the terms outlined in the contract in order to ensure compliance by division.
Division Manager	Monthly	3	Employee signs the material receipt form for the electricity purchased during the month.
Gas Logistics Mgr	Annual	4	Annual electricity meter testing is performed by the supplier together with a Florida Public Utilities representative present.
Office Services	Daily	1	Purchase Orders are only created from properly approved and documented Purchase Requisitions.
Office Services	Daily	2	Before Purchase Orders are sent to vendors, the Office Services Manager or designee reviews and approves each individual document.
Office Services	Daily	3	Office Services verifies the receipt is consistent with the original order by matching a copy of the original Purchase Order to the receipt.
Office Services	Daily	4	Office Services verifies billing is appropriate by matching the Purchase Order, receipt, and vendor invoice.
Office Services	Daily	5	Office Services Manager or designee reviews the vouchers and authorizes the processing of vendor payment. The Office Services Manager or designee agrees the price per the invoice to the OPIS Index and the destination pricing report to recalculate the amount charged to verify invoice is correct
Propane Director	Daily	6	Propane Director reviews the Purchase Order for accuracy.
Office Services	Daily	7	Field signs off on the material receipt form confirming the receipt of goods.
Office Services	Daily	8	Sequential Purchase Order numbers are utilized and are logged within the Purchase Order Number Log.
Office Services	Daily	9	Upon receipt, a delivery receipt is logged and provided to the district.
HR Director	Daily	2	The Company has segregation of duties in place for the following duties: hiring employees (HR Assistant), payroll check preparation (IT Programmer), and distribution of payroll checks (Employment Specialist and office assistants).
IT Director	Daily	6	The payroll master file in the computer system is only accessible by three IT programmers, the HR Director and the HR assistant.
HR Assistant	Bi-weekly	1	Set-up new employees, termination, and changes to payroll perm files such as pay rates, employee records, and deductions are done via a Personal Action Notice (PAN) form which is approved by the employees direct supervisor or manager, and either the CEO or COO
HR Assistant	Bi-weekly	3	Individual time sheets are created biweekly and are approved by the employees supervisor and sent to the HR assistant.
Sr Tax Accountant	Bi-weekly	4	Senior Tax Accountant receives a bi-weekly "Payroll Change" report that identifies every change to the payroll system that occurred that week and the pay rate changes are agreed to signed copies of the PAN Forms received from HR.
HR Assistant	Bi-weekly	7	The payroll system generates a "Biweekly Unmatched Employee" report that identifies all employees that have less then 80 hours if full time or no time in system. This report is reviewed by HR Assistant to verify all employees on list have had their time for the period recorded correctly
HR Assistant	Bi-weekly	8	Set-up and changes to payroll perm files such as pay rates, new hires, and additional vacation are done via a Personal Action Notice (PAN) form. Based on the "PAN Form Authorization Table", PAN is approved by the employees direct supervisor or manager, and either the CEO or COO. Deductions are done via a PAN and employee signs or submits appropriate documents
HR Assistant	Bi-weekly	9	HR Assistant reviews and approves (via email or telephone call) the payroll report prepared by the IT Programmer prior to checks being cut. HR Assistant during her review examines the report to verify nothing looks unusual and ties the total hours per the report to the hour log used to enter the payroll
HR Assistant	Bi-weekly	10	Company utilizes "Positive Pay" with Bank of America which only allows checks to clear the bank account if FPU notifies the bank ahead of time and the amount being paid agrees. HR Assistant provides an electronic file to the bank with the check numbers used and the amount of each check
IT Director	Bi-weekly	11	HR Assistant provides the IT programmer a total of the hours worked by division for the pay period as a control total for the programmer to agree to after the information is processed in the system and ready for checks to be prepared.
HR Director	Bi-weekly	19	Total amount paid per the Payroll Report is agreed to the checks generated
HR Assistant	Weekly	5	Person who enters timesheets into the payroll system creates a payroll log that identifies the total number of hours worked for that department. This control total is agreed to the Payroll Edit Report run from the payroll system by the HR Assistant to verify total hours per timesheets agree to total hours in the computer system
HR Director	Weekly	13	Manual checks are prepared infrequent mainly for employee terminations and bonus payments once a year.
HR Director	Weekly	14	Manual payroll checks require an actual signature by an authorized check signer who examines the supporting documentation indicating why a manual check is required and the amount to be paid.
Sr Tax Accountant	Monthly	12	Senior Tax Accountant reconciles monthly payroll bank account.
Cash Accountant	Monthly	12	Cash Accountant computes the outstanding checks per G/L and agrees the amount to payroll bank reconciliation.
Sr Tax Accountant	Monthly	16	The Senior Tax Accountant reconciles the payroll tax accounts monthly
Inventory Analyst	Monthly	16	The Inventory Analyst reconciles the payroll and deductions monthly.
Accounting Manager	Monthly	17	Payroll related accruals are reviewed for completeness and reasonableness and approved by General Accounting Manager.
HR Assistant	Monthly	18	Payroll system uses edit checks to query the HR department to check whether all employee time reports have been submitted into the payroll system. If a persons time is missing, the computer report generated questions the HR department. The HR Assistant receives a report titled "Unmatched Employees" that identify employees not receiving a check
Sr Tax Accountant	Quarterly	20	Senior Tax Accountant reconciles the "701" computer report from the payroll system to the "HR 310" report computed with every quarter. Senior Tax Accountant makes sure amounts equal and computes the required tax deposits from these reports and agrees it to the actual payroll tax deposits and reconciles any discrepancies

Responsibility	Freq	Control #	Control Description
GL Accountant	Annual	15	Detailed records are maintained of the liability for compensated absences, and the General Ledger Accountant reconciles it to the general ledger.
Gas Logistics Mgr	Daily	1	When additional gas is needed, the Gas Logistics Manager contacts suppliers with requests. The request is made either over the phone or via e-mail. Only the Gas Logistics Manager is authorized to purchase gas.
Gas Logistics Mgr	Daily	2	When additional gas is purchased, the gas must be scheduled with Florida Gas Transmission (FGT) on the pipeline. To do this, the Gas Logistics Manager contacts FGT via an online scheduling system. The system is password protected and only the Gas Logistics Manager is authorized to access the system.
Gas Logistics Mgr	Daily	4	Each day, the Gas Logistics Manager downloads a report from Florida Gas Transmission Company (FGT) detailing the gas that is scheduled to be delivered for that day. This report is then reconciled to the amount of gas purchased for the day
Gas Logistics Mgr	Daily	5	A reconciliation of FPU's records to the invoice is performed by the Gas Logistics Manager. Exceptions are followed up with the supplier.
AP Analyst	Monthly	3	Payments are made via a wire transfer which requires the approval from a person on the listing of authorized wire transfer personnel.
Gas Logistics Mgr	Monthly	6	Each monthly invoice is reviewed and approved by the Gas Logistics Manager to ensure the amounts of natural gas and capacity usages are appropriate.
Office Services	Monthly	7	A copy of each voucher packet is retained by the Procurement Department for their records.
Gas Logistics Mgr	Monthly	8	The Gas Logistics Manager runs reports detailing FPU's capacity and natural gas usage for the month. These reports are reviewed to gauge forecast accuracy and cost effectiveness of capacity and natural gas procurement.
AP Analyst	Daily	1	Vendor invoices are processed by A/P Analyst independent of purchasing, receiving, shipping, that are done at division level or in Office Services.
Office Services	Daily	2	Office Services Assistant or designee compares invoices to approved purchase orders and receiving reports, and check mathematical accuracy of invoices.
Sr Construction Acct	Daily	5	Improvement Requisition (IR) form is required for all capital expenditures over $2,500 that will be constructed and has to be approved based on the predetermined authorization table.
Division Manager	Daily	6	Purchase Requisitions (PR) are approved by Local or Division Managers based on a predetermined authorization table for all capital expenditures purchased and not constructed.
AP Analyst	Daily	7	A/P Analyst receives all vouchers and invoices prior to payment and verifies the voucher has been properly approved based on the predetermined authorization limits.
Sr Construction Acct	Daily	8	Senior Construction Accountant assigns every IR a sequential five-digit number which represents the sub-ledger account in the G/L and is used through out all accounting and reporting functions, such as A/P, fixed asset recording, and expenditures
Accounting Manager	Daily	13	Controller, General Accounting Manager, Office Services Manager, CFO or Corporate Accounting Supervisor reviews all expenditures over $500 for proper coding in the general ledger.
Accounting Manager	Daily	14	CFO, Controller, General Accounting Manager, Office Services Manager or Corporate Accounting Supervisor reviews G/L coding on all vouchers or Purchase Requisitions over $500 to ensure proper G/L classification.
Sr Construction Acct	Daily	16	All assets designated as taggable are assigned a pre-numbered tag to be attached to the asset and the number is included in the fixed asset system.
IT Director	Daily	18	Access to fixed asset system (Infinium) is limited to the following authorized individuals: Senior Construction Accountant, General Accounting Manager, Part-time Accountant, CFO, Senior Project Accountant, Controller and Corporate Accounting Supervisor
Sr Construction Acct	Monthly	4	Senior Construction Accountant maintains log for on going capital projects and monitors expenditure against budget per Improvement Requisition form. All project variances are required to have an IR Revision form completed and approved by the division manager if the variance exceeds 15% and $1,000 on a project basis or 10% on a material variance. Management holds Division Managers accountable for capital expenditure variances
Sr Construction Acct	Monthly	9	Senior Construction Accountant analyzes all open IR's based on actual expenditures compared to budgeted expenditures on a monthly basis.
Sr Construction Acct	Monthly	10	Division managers receive a report indicating all open IR's for the division and the progress on the construction comparing budgeted expenditures to actual expenditures. They are required to investigate, respond, and approve any significant variances via Revision form on closed IR's.
Sr Construction Acct	Monthly	11	All project variances are required to have an IR Revision form completed and approved by the division manager if the variance exceeds 15% and $1,000 on a project basis or 10% on a material variance.
Sr Construction Acct	Monthly	12	Senior Construction Accountant reconciles the detailed fixed asset costs in Infinium (fixed asset computer system) to the general ledger on a monthly basis.
Accounting Manager	Monthly	15	General Accounting staff performs monthly expense account analysis and investigates any variances over $5,000.
Division Manager	Monthly	17	Division Manager's notify Senior Construction Accountant once projects are completed.
Accounting Manager	Monthly	19	Depreciation is automatically computed by the Report Writer. Depreciation journal entry is recorded by Senior Construction Accountant and approved by General Accounting Manager. Reconciliation is done within Infinium when the journal is recorded to make sure that the depreciation amount is accurate. General Accounting Manager reviews this reconciliation before she signs off on the journal entry
Sr Construction Acct	Monthly	21	Senior Construction Accountant reconciles the change in the accumulated depreciation account in the general ledger on a monthly basis.
Sr SEC Accountant	Quarterly	22	Journal entry prepared by Senior SEC Accountant or Senior Project Accountant to reclassify retirement obligation from accumulated depreciation is approved by the Controller via her review of the top level journal entries in the financial statement preparation process
Division Manager	Annual	3	Division Manager approves budgets for yearly capital expenditures.
Sr Project Accountant	Five-Year	20	Composite depreciation rates are assigned by the FPSC via a depreciation study.
GL Accountant	Quarterly	1	Company's environmental attorney's provide an email to the COO, CFO, G/L Accountant, and General Accounting Manager that identifies a projected range of environmental liabilities by case.
GL Accountant	Quarterly	2	C.F.O. or Controller approves the environmental worksheet prepared by the G/L Accountant. The environmental liability is recorded as management's best estimate.
GL Accountant	Quarterly	3	General Accounting Manager reviews and approves the general ledger journal entry prepared by the G/L Accountant after comparing the journal entry to the approved environmental worksheet.
GL Accountant	Monthly	4	GL Accountant reconciles the environmental liability and asset account on a monthly basis.
AP Analyst	Daily	1	Segregation of Duties - AP Analyst independent of purchasing, receiving, and shipping process vendor invoices. Purchasing, receiving and shipping process are done at division level or in Office Services.

Responsibility	Freq	Control #	Control Description
AP Analyst	Daily	2	AP Analyst reviews all vouchers for required authorization and approvals according to the authorization levels contained in the "Authorization Procedure" and Routine Recurring or Recurring Utility payment list.
Accounting Manager	Daily	3	General Accounting Manager audits random vouchers for proper approval and invoice is stamped with "Entered" prior to approving "Cash Requirements Report".
Division Manager	Daily	4	Managers at a divisional level compare quantities and prices on the invoices to approved purchase orders and receiving reports and check the mathematical accuracy of the invoice prior to approving the voucher for payment.
AP Analyst	Daily	5	AP analyst stamps "entered" and records the date on each invoice recorded into the system to prevent duplicate payments.
AP Analyst	Daily	6	AP analyst runs a tape on invoices entered into the computer system and agrees the total to the AP system generated "session batch" report.
IT Director	Daily	7	System alerts user when an invoice number, invoice date, and amount have already been entered into the computer system to prevent duplicate payments.
General Office Asst	Daily	8	General Office Assistant or designee compares the items entered into the computer system to the supporting documentation for entry accuracy such as the name of the vendor, the invoice number, the due date, and the invoice amount
Accounting Manager	Daily	9	CFO, Controller, General Accounting Manager, Office Services Manager or the Corporate Accounting Supervisor reviews G/L coding on all vouchers or PO's over $500 to ensure proper G/L classification
AP Analyst	Daily	10	All checks are printed by computer through the accounts payable system. No handwritten checks are allowed.
AP Analyst	Daily	13	Vouchers are required to be approved in writing. Level of approval is dictated by FPU's authorization schedule included in the "Authorization Procedure."
AP Analyst	Daily	16	AP Analyst who processes the disbursements does not create nor approve vouchers paid via check except for 1099 and check orders, and some items automatically deducted from account – interest payments, loan reductions, void payments
AP Analyst	Weekly	14	Checks above $2,500 require the Controller's, CFO's, COO's, or Corporate Accounting Supervisor's signature in addition to the computer-printed CEO's signature included on the checks.
General Office Asst	Weekly	15	Signed checks are mailed by the General Office Assistant or designee, who is independent of AP Analyst who processes accounts payable.
Cash Accountant	Monthly	11	The Bank of America Operating Account is reconciled monthly by the Cash Accountant and all reconciling items are investigated and cleared timely by Cash Accountant, or the Cash Accountant will make sure that the responsible person resolves the discrepancies
Accounting Manager	Monthly	12	General Accounting Manager reviews and signs off on the bank reconciliation.
Inventory Analyst	Monthly	17	Inventory Analyst receives all purchase order logs and departmental local purchase order (LPO) logs at the end of each month and investigates all items over $1,000 issued in the current month or items accrued at the end of the prior month to determine if they need to be accrued at the end of the current month
AP Analyst	Monthly	18	AP Analyst reconciles accounts payable subsidiary ledger to the general ledger and differences are resolved timely. This reconciliation is reviewed and signed off by General Accounting Manager.
Office Services	Daily	1	If purchase is initiated through a formal purchase order, then Office Services reconciles the Purchase Order, receipt, and invoice in order to verify that the billed amount is appropriate.
Division Manager	Daily	2	If purchase is initiated through a local purchase order (LPO), then Voucher Auditor will reconcile LPO, receipt, and invoice in order to verify that the billed amount is appropriate. The Division Manager or authorized personnel approve the voucher for payment
Office Services	Daily	3	For high dollar value purchases, Division Manager and / or Executive approval is necessary on the purchase requisition. The level of approval is dictated by FPU's authorization schedule.
Division Manager	Daily	4	The Local Manager authorizes each voucher packet for payment processing.
Office Services	Daily	5	Office Services Manager reviews each Purchase Order for appropriateness before sending to the vendor.
Office Services	Daily	6	Office Services verifies the receipt is consistent with the original Purchase Order (open Purchase Orders in the active Purchase Order file) by matching the receipt to a copy of the Purchase Order.
Office Services	Daily	7	Office Services verifies billing is appropriate by matching the Purchase Order, receipt form, and vendor invoice.
Office Services	Daily	8	Office Services Manager or designate reviews the vouchers and authorizes the processing of payment.
Division Manager	Daily	9	Goods received are inspected for quality and completeness before being accepted.
Division Manager	Daily	10	Division or Office Service Manager reconciles the Purchase Order, receipt, and invoice in order to verify that the billed amount is appropriate.
Division Manager	Daily	11	Upon receipt, deliveries are verified to be complete by comparing the receipt to the Purchase Order.
Division Manager	Daily	12	The field signs off on the material receipt form authorizing their receipt.
Division Manager	Daily	13	Local Purchase Order Logs are kept by each division to record the local Purchase Orders issued. Local Purchase Orders are also sequentially numbered.
Office Services	Daily	14	Purchase Order numbers are sequential and are logged within the Purchase Order Log.
Office Services	Daily	15	Most vendor invoices are directed through Office Services and some subsequently forwarded to the appropriate Division or Department.
Division Manager	Monthly	3	Senior Management are highly involved in the monthly reporting process as a mean to ensure that all transactions are properly reported.
Accounting Manager	Quarterly	2	Division directors and other senior management team members are required to sign a statement stating that all business transactions to their knowledge are accurately disclosed in the financial statements.
Accounting Manager	Quarterly	4	Controller, Corporate Accounting Supervisor, and Senior SEC Reporting Accountant reviews new pronouncement and attend training courses to ensure financial statements are properly prepared with current regulations.
CFO	Quarterly	5	Controller, CEO and CFO reviews all 10Q an 10K filings to verify that all business transactions to their knowledge are accurately disclosed in the financial statements.
Accounting Manager	Quarterly	6	Company Attorney sends a report to the CFO listing any known and/or anticipated liabilities the Company is involved.
Division Manager	Annual	1	Division director's review of the annual financial statements for the appropriate reporting of all transactions is aided by their detailed and thorough understanding of all significant business transactions. Events known to exist, but not reported are identified during management's financial statement review, and subsequently reported to Accounting for recording, adjustment, or re-classification
Sr SEC Accountant	Monthly	1	Senior SEC Accountant Reconciles fuel purchases per the general ledger to the invoices or summary reports provided by the fuel vendor.
Sr SEC Accountant	Monthly	3	Senior SEC Accountant reconciles the roll-forward of monthly fuel purchases, company fuel usage, and fuel sales included in the unbilled receivable calculation to the YTD general ledger balance.

Responsibility	Freq	Control #	Control Description
Sr SEC Accountant	Monthly	5	Senior SEC Accountant reconciles the unbilled revenues and receivable to the general ledger monthly.
Sr SEC Accountant	Monthly	6	The monthly unbilled calculation is reviewed and approved monthly by an accounting manager. The General Manager of South Florida reviews the monthly calculation and sign off, physically or electronically, on a quarterly
Sr SEC Accountant	Annual	2	Senior SEC Accountant tests the accuracy of the unbilled receivable computation annually by utilizing another unbilled receivable computation as a check. On an annual basis, the Senior SEC Accountant will receive a computer generated usage and billing report from the IT department for a given month by division by cycle. The usage and billing report is translated into revenue and usage by day. The daily rate is then multiplied by the number of days unbilled in the month to estimate the unbilled receivable and test the accuracy of the monthly-unbilled calculation
Sr SEC Accountant	Annual	4	The annual test calculation validates the accuracy of the billing rate used within the monthly computation.
Sr SEC Accountant	Quarterly	1	Senior SEC Reporting Accountant prepares the quarter-end closing journal entry by utilizing a standard quarter-end closing template that identifies all the typical entries that need to be recorded.
Accounting Manager	Quarterly	2	Controller, Corporate Accounting Supervisor, and Senior SEC Reporting Accountant review new pronouncements and attend training courses to verify the financial statements are properly prepared with the current regulations.
Sr SEC Accountant	Quarterly	3	Senior SEC Reporting Accountant compares the quarter financial statements to the monthly financial statements to verify the amounts for the quarter were downloaded properly.
Accounting Manager	*Quarterly*	4	*Senior SEC Reporting Accountant prepares a reference copy* of the filing and references all numbers in the filing to the supporting documentation that is attached with the reference copy. All statement figures are referenced via linked
Accounting Manager	Quarterly	5	Senior SEC Reporting Accountant publishes the draft of the filing on the P: drive and notifies the Controller and CFO it is ready for review. CEO, CFO and Controller review and approve the filing.
Accounting Manager	Quarterly	6	Every filing is sent to the Company's SEC attorney for review and comments prior to it being finalized.
Sr SEC Accountant	Quarterly	7	Senior SEC Reporting Accountant collects all comments on the filing, makes changes utilizing the track changes feature in Microsoft Word and re-sends the reviewers a redlined version identifying what has changed in the filing.
CFO	Quarterly	8	Board of Directors and the audit committee review a draft of the filing prior to it being finalized.
HR Director	Annual	N/A	The company possesses a Code of Ethics, which was adapted to incorporate various industry and company-specific issues FPU is subject to. FPU Board of Directors approved the Code of Ethics on 06/03/03. All employees are required to review and sign the Code of Ethics. The document is also posted on the website and accessible to all FPU employees
HR Director	Annual	N/A	Policies governing fair contractual relations with suppliers are addressed as a subsection within the company's Code of Ethics policy.
Accounting Manager	Annual	N/A	As a part of the Code of Ethics, a Whistle Blower Program is in place for employees to report to the Audit Committee any known or suspected activities that may improperly affect financial statements or compromise the Company's Ethics Policy
HR Director	Annual	N/A	The Director of HR (Wayne Bonn) has been effectively designated as Chief Ethics Officer. However, over-arching responsibility for ethics compliance has been delegated to all senior management personnel.
Accounting Manager	Annual	N/A	There is an internal audit function that performs compliance-based audits.
HR Director	Annual	N/A	Violations are thoroughly investigated with any necessary disciplinary actions carried out by HR.
HR Director	Annual	N/A	FPU Employees are required to re-confirm their adherence to the Code of Ethics policy by signing the Code every year.
HR Director	Annual	N/A	Code of Ethics is formally addressed by the Board of Directors annually.
HR Director	Annual	N/A	Comprehension of the company's corporate ethics policy is an integral part of the company's new employee orientation program. FPU has created an acknowledgement form, which asks new employees to sign and attest that they have read and understand FPU's corporate ethics policy.
CFO	Annual	N/A	Regular reviews are performed by the CFO and associated office personnel. Disclosure controls surrounding the integrity, reliability and transparency of financial reporting appear adequate. Disclosure control documents surrounding FPU's assumption of liabilities is adequately maintained.
HR Director	Annual	N/A	The company has designated a PR person who is the only authorized person to speak with outsiders on various company sensitive issues. Other company employees are not ~~executive~~ allowed to speak publicly on FPU matters unless they get approval from executives.
Accounting Manager	Annual	N/A	Legal review is performed prior to the filling of such documents, as the company's 10-K and 10-Q, prior to filing with the SEC.
Accounting Manager	Annual	N/A	The Audit Committee does adequately and timely review FPU's quarterly financial reporting and 8-K reports prior to public release.
CFO	Annual	N/A	Board of Directors assesses annual FPU management performance targets for reasonableness prior to formal approval.
CFO	Annual	N/A	Compensation Committee conducts reviews regarding the potential impact incentive compensation structures could have on the fiduciary responsibilities of senior management.
IT Director	Annual	N/A	IT disaster recovery plan is defined. Hurricane recovery plan is in place.
CFO	Annual	N/A	Corporate Articles of Incorporation & Company By-laws exist
CFO	Annual	N/A	Audit Committee and Nomination Committee charter exist and are utilized. Information on the Compensation Committee (as well as the Audit and Nomination Committees) is contained in the company's proxy statement.
CFO	Annual	N/A	Nomination Committee does adhere to formal guidelines in order to ascertain director independence prior to nomination.
CFO	Annual	N/A	Ethics policy covers Board of Directors independence. Board of Directs are required to complete the "Directors and Officers Questionnaire" which discusses the independence of board members. CFO and CEO review questionnaires for accuracy to the best of their knowledge. The primary monitoring control utilized with respect to changes in the status of board member independence is self-reporting
CFO	Annual	N/A	Board of Directors meets quarterly on the first Tuesday. Meeting calendar for Board of Directors is formally set and agreed upon in advance of each quarterly meeting. Dates are scheduled and managed within Outlook.
CFO	Annual	N/A	Independent directors have the ability to provide input at all meeting attended.
HR Director	Annual	N/A	Director compensation is reviewed and benchmarked against a peer group analysis (i.e. similar industry, size, number of employees, sales, debt/equity ratio, etc.).
CFO	Annual	N/A	Audit committee meets quarterly. Meeting calendar for Audit committee is formally set and agreed upon one year in advance. Dates are scheduled and managed within Outlook.
CFO	Annual	N/A	Independent audit directors do have input into the formation of agendas for all meetings.

Responsibility	Freq	Control #	Control Description
HR Director	Annual	N/A	Audit director compensation is reviewed and benchmarked against a peer group analysis (i.e. similar industry, size, number of employees, sales, debt/equity ratio, etc.).
CFO	Annual	N/A	Agenda is generally deemed to be comprehensive in scope and all recurring activities, which need to be addressed by the Board are done so within the quarterly agenda.
CFO	Annual	N/A	All relevant issues/information needed is followed up on informally and in a timely manner.
CFO	Annual	N/A	Crowe Chizek serves as the company's internal audit function. Crowe Chizek attends quarterly audit committee meetings at the request of the audit committee, and private sessions, without management present, occur at each meeting
CFO	Annual	N/A	Any Audit Committee concerns (when expressed) are directly handled by the External or Internal Auditors of the firm. Review of work completed by auditors is conducted by Audit Committee.
HR Director	Annual	N/A	Compensation Committee handles the review and approval of compensation plans for all FPU executive officers and the Board of Directors members themselves. All compensation plans are reviewed and approved by the Compensation Committee
HR Director	Annual	N/A	Executive officer and Board of Directors members' compensation are benchmarked appropriately against peer companies with comparable performance annually.
HR Director	Annual	N/A	Compensation plans are reviewed to ensure alignment between compensation incentives and desired fiduciary responsibilities is achieved.
HR Director	Annual	N/A	Position descriptions which detail skills, minimum education and competency requirements are developed by Department Heads for all position vacancies (for both internal and external positions).
HR Director	Annual	N/A	FPU requires all personnel with financial accounting and reporting responsibilities to have commensurate credentials and experience. HR verifies that aforementioned individuals have required background.
HR Director	Annual	N/A	Position descriptions (Job Summary, Duties & Responsibilities) are clearly delineated within job description documents to ensure appropriate targeting of applicant pool.
HR Director	Annual	N/A	Criteria for employee advancement are clearly defined and pendent upon the following criteria: 1) Vacancy 2) Appropriate Skill/Experience Set For Position& 3) Performance Merit.
HR Director	Annual	N/A	The company does have an Employee Tuition Assistance Program to potentially increase employees business competence.
CFO	Annual	N/A	Outlook is utilized to physically record and capture all necessary, recurring financial reporting requirements. FPU financial reporting schedule is built around SEC filing requirement deadlines and regular month-end closings. Audit committee intermittently reviews total process (from monthly calendarized close to filings) to ensure all reporting needs are being met
CFO	Annual	N/A	Accountability for preparation of all financial reporting output has been delegated to CFO (George Bachman) and Controller (Cheryl Martin). Output is regularly reviewed by Audit Committee, prior to formal publication.
CFO	Annual	N/A	Review protocols for all financial reports issued are regularly examined by both management and FPU's external auditor.
Accounting Manager	Annual	N/A	Variance analysis on financial reports is regularly performed by management and linked to a subsequent assessment of corrective actions / process deficiencies.
CFO	Annual	N/A	Audit committee regularly reviews quality of reported earnings. Audit committee meets quarterly and reviews all financial / company filings for accuracy and quality, prior to publication.
CFO	Annual	N/A	Relevant risks are reviewed on an on-going basis by management.
CFO	Annual	N/A	Disclosure controls process is regularly assessed as part of traditional SEC filing process. Accounting impacts from significant business changes regularly reviewed by executive management and are addressed within financials.
Accounting Manager	Annual	N/A	Needs assessment for all departments is at least annually performed and budget is appropriately allocated to address those needs.
Accounting Manager	Annual	N/A	FPU has an internal audit function, which focuses its efforts on evaluating and improving internal controls.
Accounting Manager	Annual	N/A	Occasionally controls assessment is performed by accounting when process deficiency is suspected.
CFO	Annual	N/A	Process is completed on an ad-hoc basis. If "fix" is easy, then usually done ASAP. However, if it is more complicated, cost – benefit analysis is first performed, prior to audit comment solution implementation. In general, Audit Committee directs timetable and appropriate responses to audit comments
Accounting Manager	Annual	N/A	Internal audit performs control assessments and provide recommendation.
Accounting Manager	Annual	N/A	Pertinent accounting estimates and judgments are reviewed by the Audit Committee, prior to formal publication of financial reports.
Accounting Manager	Annual	N/A	Consultation of accounting estimates and assumptions are discussed in advance with the auditor, when deemed necessary.
Accounting Manager	Annual	N/A	Comparison / benchmarking against peer companies is regularly performed (primarily through utilization of 10-K filings on accounting issues upon which management is unsure).
CFO	Annual	N/A	Quality of earnings is regularly reviewed by the Audit committee as part of its quarterly meeting and also reviewed by External Auditor.
CEO	Annual	N/A	Management appropriately balances long-term and short-term strategic objectives. Corporate strategic plan growth, customer segmentation and retention program are regularly reviewed within semi annual goals meeting. All goals are also reviewed informally on a quarterly basis by management. Board of Directors provides feedback on the development of reasonable goals/targets and sign offs on all management strategic goals
HR Director	Annual	N/A	Review of organization structure alignment with long/strategic objectives is regularly conducted within Board of Directors meetings and by executive management on an as need basis.
Accounting Manager	Annual	N/A	Monthly and quarterly internal reporting documentation is aligned with over-arching organizational structure and is intermittently reviewed by management and Audit Committee to ensure alignment.
Accounting Manager	Annual	N/A	Finance/Accounting roles at FPU subsidiary units are clearly delineated and well defined as to scope.
CFO	Annual	N/A	Operating managers at divisional locations are held accountable for meeting required financial reporting and performance requirements.
CFO	Annual	N/A	Corporate management regularly discusses financial reporting and performance requirements with applicable process owners of divisional units. Occasional direct meetings are made, as needed.
HR Director	Annual	N/A	Organization structure is regularly (though informally) considered by management on an on-going basis prior to significant policy changes, corporate events and/or major acquisitions. Board of Directors also intermittently directs management on organization structure on an as needed basis
Accounting Manager	Annual	N/A	Appropriate authority and authorization limits for transactions have been clearly communicated and are formally documented.

Responsibility	Freq	Control #	Control Description
Accounting Manager	Annual	N/A	Signatory approvals (especially for JE and vouchers) require appropriate management approval prior to execution of the related transactions.
HR Director	Annual	N/A	Appropriate competency in order to effectively carry out associated decisions/transactions is established through formal HR and Management review/processes (see previous associated comments of this subject).
HR Director	Annual	N/A	Segregation of duties is reviewed in terms of creation of job duties / descriptions during hiring process. The segregation of duties is also reviewed in the documentation of internal controls included in the Section 404 compliance documentation
CFO	Annual	N/A	All process owners with appropriate authority and responsibility are involved within the process. Managers are delegated and accountable for their part of the process.
HR Director	Annual	N/A	Historically, FPU has had very little turnover and full-time employees generally do not work excessive overtime (if at all). Given the seasonal component of the business contract labor is generally used to meet peak labor demands. Also, given the size of the company excessive turnover issues would be readily visible
HR Director	Annual	N/A	HR creates written position description based upon needs/core competencies to successfully carry out responsibilities of the position.
HR Director	Annual	N/A	HR creates a detailed HR policy manual, which details various guidelines, traits and behaviors to look for in potential candidates.
HR Director	Annual	N/A	The HR policy / procedures manual also includes formalized and well-defined consequences for violation of FPU policies on significant items.
HR Director	Annual	N/A	The HR policy/procedures manual is approved by senior management team.
HR Director	Annual	N/A	All employees are required to acknowledge receipt of the manual. HR Director collects the written receipts.
HR Director	Annual	N/A	When hiring a new employee, HR performs the following background checks: Criminal, Driving, Education (for degreed candidates), Credit, and Drugs.
HR Director	Annual	N/A	Formal performance evaluations are conducted at least every 12 months. Approval of performance categorization requires two levels of approval and is then communicated/reviewed with employee.
HR Director	Annual	N/A	In addition, a 360-degree evaluation is encouraged.
HR Director	Annual	N/A	Criteria for advancement are clearly defined and communicated to employees through: Position descriptions and Performance/Merit evaluation process.
HR Director	Annual	N/A	HR performs formal, independent review of all complaints and effectively acts as arbiter to both sides and assesses any allegations. Appropriate disciplinary action is reviewed by supervisor and manager of employee and HR.

Attachments: Internal Controls Master Checklist.xls

Hi Everyone!

As many of you are aware, the Company has specific internal controls that must be performed on a regular basis. Additionally, we need to be able to provide documentation to show we have complied with our internal controls requirements. Therefore, I am attaching a checklist of our company's internal controls. Please review the file and let me know if you have been assigned any items that need to be reassigned, and who the responsible individual should be. Also, if you are responsible for an item, but the control needs to be modified to reflect practice please send me your revisions (track the changes so I can clearly see what has been revised). To help make it easier for review, you can click the arrow next to "Responsibility" in cell A3 and select your position to view only the internal control requirements specific to your position.

Thanks for your help!

Thank you,
April Lundgren
Sr. SEC Accountant
Florida Public Utilities Company

Internal Controls Checklist

Responsibility	Freq	Control #	Control Description
Cash Accountant	Daily	4	Cash is disbursed from a limited number of bank accounts, inter-company account transfers are minimized; and inactive accounts are closed timely.
Cash Accountant	Monthly	1	The Cash Accountant who is independent of the cash disbursements function prepares bank account reconciliations monthly.
Accounting Manager	Monthly	2	The General Accounting Manager reviews, approves and signs off on all bank reconciliations monthly except for payroll account and returns.
Division Manager	Monthly	3	Expense account balances are compared to current and prior year amounts; large variances are investigated by Division Managers who are held accountable to the budget by management.
Cash Accountant	Daily	4	Borrowings and repayments to the line of credit (LOC) are done automatically by Bank of America on a daily basis, based on daily cash requirements.
Cash Accountant	Monthly	2	Cash is reconciled monthly by the Cash Accountant and all reconciling items are investigated and cleared timely.
Cash Accountant	Monthly	5	The Cash Accountant records the borrowings on the LOC per the bank statement. The General Ledger Accountant reconciles LOC per bank statement to the general ledger.
Cash Accountant	Monthly	6	LOC Interest is automatically withdrawn from the bank account monthly and the Cash Accountant reconciles the bank accounts monthly.
GL Accountant	Monthly	8	General Ledger Accountant performs a reconciliation of accrued interest each month that is reviewed and approved by the General Accounting Manager.
Cash Accountant	Monthly	9	Bank notifies Company when the interest is due on the long-term debt. The interest is paid via a wire transfer.
GL Accountant	Quarterly	7	General Leger Accountant analyzes the monthly interest expense based on current borrowings and verifies the interest charged and recorded is reasonable.
Financial Analyst	Quarterly	10	The financial analyst calculates the Company's compliance with the debt covenants and the CFO reviews and approves the calculation.
CFO	Annual	1	The Board of Directors are required to approve all financing to be obtained by the Company.
CFO	Annual	3	The CFO is the only person able to initiate and create a letter of credit with the bank.
IT Director	Daily	10	Only Customer Relations Director, Customer Information Systems Manager, IT Director, CFO and Business Systems Analyst have access to the customer rate master file in ORCOM
Sr Regulatory Acct	Monthly	1	There is a set formula to the price structure: Selling Price is fuel rate plus base rate plus conservation. This formula is consistently used each year.
Sr Regulatory Acct	Monthly	5	Projected over/under recovery is monitored and updated from actual monthly billings and cost by Senior Regulatory Accountant on a monthly basis and filed with the commission
Sr Regulatory Acct	Annual	3	Senior Regulatory Accountant calculates the fuel price to be charged for the year based on the annual electricity contract. The annual electric contract fixes the price of electricity for the entire year and therefore the rates are only updated once a year
Sr Regulatory Acct	Annual	4	Fuel rate for the following year are prepared by Senior Regulatory Accountant in August or September in a given year using budgeted information on usage and cost, and it is filed with the Commission. In early November or December, the Commission approves the monthly projected rates for the following year. These rates are used for billing customers in the following year
Sr Regulatory Acct	Annual	6	After the projected rates for the following year is approved by the Commission, Senior Regulatory Accountant prepares an e-mail to notify Customer Relations Department of new approved rate per the commission.
Cust Relations Director	Annual	7	Customer Relations Director inputs the rate change in the ORCOM (billing system).
Cust Information Mgr	Annual	8	Customer Information Manager verifies the rate in ORCOM agrees to the new rate communicated by the Senior Regulatory Accountant and approves the entry.
Sr Regulatory Acct	Annual	9	The Fuel Rate Memo is sent out to each division by Senior Regulatory Accountant once the PPA is determined, so each division is aware of the current rate.
CIS Analyst	Annual	11	FPU establishes an annual fixed billing meter reading schedule and distributes the schedule to the local offices. The schedule identifies the exact dates when the rate will change which is effective on the "read date" of cycle 1 of each January
Cust Relations Director	Annual	12	Customer Relations Director ensures that the Senior Regulatory Accountant has submitted the rate change form each year prior to the scheduled effective date.
CIS Manager	Annual	13	CIS Manager verifies the rate change entry in ORCOM was completed by the required effective date. CIS Manager's review is documented by signing and dating the Fuel Adjustment Form Electric.
Accounting Manager	As Req	2	Base Rate is determined by the Commission, and it is only changed when a new rate study is done.
Gas Logistics Mgr	Daily	3	FPU currently limits propane purchases to two main vendors: INERGY and DYNEGY.
IT Director	Daily	6	Only Customer Relations Director, Customer Information Manager, IT Director, CFO, and Business Systems Analyst have access to the customer rate master file in ORCOM
Propane Director	Monthly	1	Director of Propane sends out the ORCOM Propane Rates and Propane Rates Quick Reference to each division, marketing staff and customer relations department once the price is determined, so each propane related personnel is aware of the current rate
Propane Director	Monthly	2	Propane Gas Adjustment Form to change the price charged per unit of propane is prepared and signed off by Director of Propane.
Cust Relations Director	Monthly	4	Customer Relations Director signs off on the Propane Gas Adjustment Form and inputs the rate change in ORCOM (billing system).
Cust Information Mgr	Monthly	5	Customer Information Manager verifies the rate in ORCOM agrees to the amount indicated on the Propane Gas Adjustment Form and approves the entry.
CIS Analyst	Monthly	7	FPU establishes an annual fixed billing meter readingp schedule and distributes the schedule to the local offices. The schedule identifies the exact dates when the rate will change which is effective on the "read date" of cycle 1 of each month for metered propane and the "billed date" of cycle 1 of each month for bulk propane.
Cust Relations Director	Monthly	8	Customer Relations Director ensures that the Director of Propane has submitted the rate change form each month prior to the scheduled effective date.
CIS Manager	Monthly	9	CIS Manager verifies the rate change entry in ORCOM was completed by the required effective date. CIS Manager's review is documented by signing and dating the Propane Gas Adjustment Form.
IT Director	Daily	11	Only Customer Relations Director, Customer Information Systems Manager, IT Director, CFO, and Business Systems Analyst have access to the customer rate master file in ORCOM

Responsibility	Freq	Control #	Control Description
Sr Regulatory Acct	Monthly	1	There is a set formula to the price structure: Selling Price is PGA plus Base Rate plus conservation plus AEP and surcharges where applicable. This formula is consistently used each year.
Sr Regulatory Acct	Monthly	3	Projected over/under recovery is monitored and updated from actual monthly billings and cost by Senior Regulatory Accountant on a monthly basis and filed with the commission
Gas Logistics Mgr	Monthly	4	PGA is compared with market rate each month for reasonableness check by Gas Logistics Manager and documented on the Projected Rate Sheet.
Gas Logistics Mgr	Monthly	5	Gas Logistics Manager determines the PGA for forward months based on the Projected Rate Sheet prepared by Senior Regulatory Accountant which details budget and accounting projections and updates for current market conditions
Gas Logistics Mgr	Monthly	7	Gas Logistics Manager prepares and signs off on the Natural Gas Rate Adjustment form and submits to Customer Relations Department.
Cust Relations Director	Monthly	8	Customer Relations Director signs off on the Natural Gas Rate Adjustment form and inputs the rate change in ORCOM (billing system).
Cust Information Mgr	Monthly	9	Customer Information Manager verifies the rate in ORCOM agrees to the approved Natural Gas Rate Adjustment form and approves the entry.
Gas Logistics Mgr	Monthly	10	The PGA Sheet is sent out to each natural gas division by Gas Logistics Manager once the PGA is determined for each month, so each division is aware of the current rate. The PGA Sheet includes current rate and historical data.
CIS Analyst	Monthly	12	FPU establishes an annual fixed billing meter reading schedule and distributes the schedule to the local offices. The schedule identifies the exact dates when the rate will change which is effective on the "read date" of cycle 1 of each month
Cust Relations Director	Monthly	13	Customer Relations Director ensures that the Gas Logistics Manager has submitted the rate change form each month prior to the scheduled effective date.
CIS Manager	Monthly	14	CIS Manager verifies the rate change entry in ORCOM was completed by the required effective date. CIS Manager's review is documented by signing and dating the Natural Gas Adjustment Form.
Sr Regulatory Acct	Annual	6	Rate projections for the following year are prepared by Senior Regulatory Accountant in August or September in a given year, and it is filed with the Commission. In early November or December, the Commission approves the monthly projected rates for the following year. These rates are used as parameters for billing customers in the following year. The Company is not allowed to exceed the rates approved by the Commission unless special approval is received
Accounting Manager	As Req	2	Base Rate is determined by the Commission, and it is only changed when a new rate study is done.
CIS Analyst	Daily	1	After every posting to the computer system, Orcom will produce a CISBAL Report (Customer Information Balance/Accounts Receivable Balancing Report). The CIS Analyst agrees and balances the amounts that are identified in the CISBAL Report to the PR2 Report (lists all accounts billed for the day by utility) and the Sales Journal (lists all posting by GL account), all variances are identified and corrected timely
IT Director	Daily	4	Access to the "Customer Control Files" is limited to the Director of Customer Relations, CIS Manager, CFO, Business System Analyst and IT Director.
IT Director	Daily	6	Orcom system produces daily routes and meters to be read which is loaded on the hand held devices.
Cust Relations Operator	Daily	7	After the bills are produced by the outside biller (Kubra) the CR Operator agrees the dollar amount and number of bills processed/mailed per the "Kubra Production Filter Log" provided by the vendor to the number and amount of the bills to be processed per the Orcom data file. Any differences researched and documented on an excel reconciliation sheet kept by the CR Operator
Cust Relations Director	Daily	8	Orcom requires all meters to be read regardless of whether the meter is active or unused.
IT Director	Daily	9	ITRON produces a report to the divisional office if the meter reader inadvertently or intentionally skips any reads. The hand held device will alert the meter reader if the read does not appear to be correct.
CIS Analyst	Daily	11	The CIS Operator sends all managers a listing of their "Premises Not Billed" for that days billing cycle.
Cust Service Manager	Daily	12	The customer service representative (CSR) performs a pre-audit on meter reads to verify that all meter exceptions were addressed. The meter exceptions identified and worked at this stage are premise or usage exceptions.
IT Director	Daily	13	Orcom identifies all pre-bills that have abnormally high or low dollars or if the customer is being charged for services they don't have on the "Bill Batch" report which is reviewed and discrepancies are resolved or overridden at the local office by the office CSR. The high or low usage is determined by comparing the current bill to the prior two months and the same month the prior year and identifies abnormally high or low usage if the current bill differs by the predetermined system parameters located in the Orcom table
IT Director	Daily	14	Orcom identifies unusual items in the billing system as a terminal or soft exception after the meter reading batch is posted to the Orcom system.
Cust Service Manager	Daily	15	The local CSR is required to review all terminal exceptions and provide a "Cycle Information Form" to the CIS Operator to override the exception for the valid prebills that should be billed. If the exception is not an accurate bill, the local CSR will move the exception to their division's exception batch to research, correct and resubmit to bill.
CIS Analyst	Daily	16	If the CIS Operator does not obtain a "Cycle Information Form" to override a terminal exception, the bill will not be created and will be sent to the "Division Batch Exception" which must be resolved in 5 days.
CIS Analyst	Daily	17	CIS Operator examines all "Cycle Information Forms" for appropriate documentation to clear all terminal exceptions in Orcom.
IT Director	Daily	18	Calculation of the amount billed is computer automated based on the current rates loaded into the system.
Cash Accountant	Monthly	2	Cash Accountant reconciles the monthly sales journal to the general ledger posting.
Accounting Manager	Monthly	3	General Accounting Manager reviews and approves the monthly revenue journal entry prepared by the cash accountant.
Sr Regulatory Acct	Monthly	5	Senior Regulatory Accountant (independent of billing) reconciles the rates charged during the month and prepares a FPSC filing each month for the gas and electric fuel rates billed to the customers for the month. The amount billed to the customers is reconciled to the cost of fuel for the month
Cust Service Manager	Monthly	10	All customer service managers are required to review and approve the monthly "No Bill" report that identifies all premises that have not been billed in 34 days.
Cust Service Manager	Daily	1	Company requires a deposit on electric, gas, and most propane accounts of approximately two months usage. In the case of commercial accounts, can supply a surety bond and an irrevocable letter of credit instead of a deposit.
Cust Service Manager	Daily	2	If customer purchases merchandise on credit, a credit report is run on customer prior to sale or delivery except for good-standing customers or customers who purchased a water-heater.
Cust Service Manager	Daily	3	A delinquent notice is sent to every account over 2 days past due which is 22 days from date of bill.

Responsibility	Freq	Control #	Control Description
Cust Service Manager	Daily	4	If account is greater than $30 and over 30 days from date of bill, a collector notice is issued and a collector will visit premises to receive payment or shut-off service.
Cust Relations Director	Daily	7	Bankrupt accounts are flagged and identified in Orcom by the Director of Customer Relations upon receipts of bankruptcy notices from the court.
IT Director	Daily	9	Only the Customer Relations department has access to post write-off bad debts to the system.
Accounting Manager	Monthly	5	*All accounts over 90 days after account has closed are automatically written-off to bad debt batch and sent to an* outside collection agency.
Cash Accountant	Monthly	6	An accounts receivable aging summary and write-off history analysis is sent to the division manager monthly. Division directors are evaluated based on achieving pre-determined aging goals.
Division Manager	Monthly	8	Managers have to review all accounts to be written-off to bad debts on a monthly basis and the division manager has to approve via email the bad debt accounts included in the bad debt batch before posting to the Orcom system by the Customer Service department.
CIS Analyst	Daily	1	CIS Analyst runs two queries prior to cash posting to verify all miscelleaneous cash assigned a valid general ledger account and merchandise down payments are tied to a valid contract in the system is (not posted to the customers ledger)
Cust Relations Director	Daily	2	Majority of all payments are sent to a central "Lockbox" at the Marianna facility in which the Company owns equipment that processes the mail payments and checks received.
IT Director	Daily	3	Cash cannot be posted until the prior days cash received per Cash Edit D report is reconciled to the System Balance in Orcom.
CIS Analyst	Daily	5	CIS Analyst receives a daily email from each location indicating the location has initiated a pending post of the cash receipts in Orcom. CIS Analyst logs the time that each location sent the email and verifies all locations have initiated a pending post in the system prior to a final cash post
CIS Analyst	Daily	6	CIS Analyst balances the cash receipts posted in Orcom for the day to the cash receipts identified in the "Daily Cash Reports" provided by each location to verify all cash received for the day was properly posted in the Orcom system.
CIS Analyst	Daily	7	CIS Analyst balances the "Cash Edit D" report that identifies all the types of cash received, to the CISBAL report to the cash receipts journal to verify the amount of cash applied to accounts receivable agrees to the cash received.
CIS Analyst	Daily	14	If money or cash is received from an unknown source or unidentifiable customer, the funds are recorded as a liability in an unidentified cash account. Customer Service can search this account by dollar and date posted when person calls to claim payment
CIS Analyst	Daily	15	Funds received on closed accounts can still be applied to the closed account and will trigger repayment back to the customer.
Accounting Manager	Daily	17	The person who receives and applies the cash is different than the person who posts the cash to the computer system who is different than the person who reconciles the bank accounts to the general ledger.
Division Manager	Daily	18	Cashier balances his/her drawer every 24 hours by matching the batch totals to the actual cash received for the past 24 hours and prepares a deposit ticket.
Cust Service Manager	Daily	19	Location supervisor reviews all deposit tickets, agrees the amount deposited to the "Daily Cash Report" total deposits, and intermediate posts each batch to remove access to batch from cashiers.
Division Manager	Daily	20	An armored car service picks up all cash received prior to the scheduled time daily, except for New Smyrna and West Florida.
Cust Service Manager	Weekly	16	Office CSM is responsible to review postings to the Unidentified Cash account and contact check writer to find proper placement for the funds and to make and file a photocopy of the check.
CIS Analyst	Monthly	4	CIS Analyst runs a month-end "Cash Receipts Journal", identifies the bad G/L's, and corrects the entries prior to forwarding to Accounting.
CIS Analyst	Monthly	8	CIS Analyst runs a month-end "Cash Receipts Journal" and agrees balances to the daily balancing worksheet.
CIS Analyst	Monthly	9	Customer statements are sent to customers indicating cumulative balance owed and the customer service department who is independent of cash receipts investigates discrepancies identified by the customer.
Cash Accountant	Monthly	10	Cash Accountant takes the month-end "Cash Receipts Journal" and verifies the totals agree to the monthly total of the daily cash reports and prepares a manual journal entry.
Accounting Manager	Monthly	11	General Accounting Manager reviews and approves the cash receipts journal entry prior to posting the journal entry.
Cash Accountant	Monthly	13	Cash Accountant reconciles the bank account which is reviewed and approved by the General Accounting Manager.
Cash Accountant	Quarterly	12	Cash accountant reconciles the accounts receivable aging to the general ledger quarterly.
HR Assistant	Daily	5	Prior to benefit payments, HR Assistant(independent from State Street, the custodian of benefit plan assets) forwards *participant's retirement notice to AON. AON prepares and sends the participant a Retirement Application* that details the entitled benefits and options of distributions. HR Assistant reviews the Retirement Application signed by the participant and prepares and sends the payment request to State Street for distribution process
HR Assistant	Weekly	10	Total amount paid per the Payroll Report is agreed to the checks generated.
Sr Tax Accountant	Monthly	7	The Senior Tax Accountant reconciles the payroll tax accounts monthly
Inventory Analyst	Monthly	7	The Inventory Analyst reconciles the payroll and deductions monthly, which are reviewed and approved by management monthly.
Accounting Manager	Monthly	8	Payroll related accruals are reviewed for completeness and reasonableness and approved by General Accounting Manager.
HR Assistant	Monthly	9	Payroll system uses edit checks to query the HR department to check whether all employee time reports have been submitted into the payroll system. If a persons time is missing, the computer report generated questions the HR department. The HR Assistant receives a report titled "Unmatched Employees" that identify employees not receiving a check
Sr Tax Accountant	Quarterly	11	Senior Tax Accountant reconciles the "701" computer report from the payroll system to the "HR 310" report computed with every payroll. Senior Tax Accountant makes sure amounts equal and computes the required tax deposits from these reports and agrees it to the actual payroll tax deposits and reconciles any discrepancies
CFO	Annual	1	Analytics are performed by AON annually. A meeting including the CEO, COO, CFO, and HR Director is held to discuss the projections and assumptions related to pension costs. Actual benefit costs are compared with expected benefit costs and any differences are investigated and resolved
Sr Financial Acct	Annual	2	Senior Financial Reporting Accountant compares the total contributions to the benefit plan and reconciled to GL for benefit costs recorded and accrued. The reconciliation is reviewed and approved by management monthly and approved by the CFO on a quarterly basis
Sr Financial Acct	Annual	3	Senior Financial Reporting Accountant prepares journal entry to true-up pension liability balance based on AON's projections and accrues for future funding. CFO review and signs off on the JE's.

Responsibility	Freq	Control #	Control Description
HR Assistant	Annual	4	HR Assistant prepares the "Pension Valuation Spreadsheet" to update AON(Actuary) with new hires, new terminations, and compensation information for all participants. To ensure that all participants are included correctly, HR Assistant generates payroll report and compare the amounts per this report to total W-2's reported.
GL Accountant	Annual	6	Detailed records are maintained of the liability for compensated absences, and the General Ledger Accountant reconciles it to the general ledger.
CFO	Daily	1	Company has a policy not to conduct transactions with officers or directors or affiliated companies of officers and directors.
CFO	Annual	2	Directors and officers are required to complete a D&O Questionnaire that identifies entities that the director or officer or a member of their immediate family that acts as a director or officer or owns.
CFO	Annual	3	The CEO and CFO review all D&O questionnaires for accuracy to the best of their knowledge.
CFO	Quarterly	4	The CEO and CFO review all SEC filings prior to ensure the related party transactions are appropriately presented based on their knowledge of the known related parties.
Sr Financial Acct	Quarterly	1	Senior Financial Accountant reconciles and maintains the liability reserve account to update losses and true-up the liability level.
CFO	Quarterly	2	CFO receives a letter from the Company's legal counsel that identifies all known or threatened litigation and the potential exposure of each incident.
CFO	Quarterly	3	CFO reviews and approves the general ledger entry prepared by Senior Financial Reporting Accountant comparing the journal entry to the approved reconciliation.
Cust Service Supervisor	Daily	1	Customer Service Supervisor (separate from warehouse personnel issues the merchandise) matches the quantity and items on the following documents: the tag removed from merchandise and the tag from warehouse file, the Pink Sales Contract, and completed Service Order, then she relieves the merchandise from inventory system
Stores Supervisor	Weekly	4	Customer Service Supervisor runs a report of merchandised sold from the inventory system for the week and sends to the Stores Supervisor. Store Supervisor verifies that items listed on the report match all the merchandise issued from warehouse for the week. Any difference are immediately investigated
Inventory Analyst	Monthly	2	Inventory Analyst (separate from warehouse personnel issues the merchandise) matches the White Sales Contracts to the Sold List generated by the Merchandise Inventory System and to the merchandise tags for the quantity and final costs and investigates any variances
Accounting Manager	Monthly	3	Inventory Analyst prepares a journal entry to capture the quantity and final cost of merchandise issued that is reviewed and signed off by General Accounting Manager.
Accounting Manager	Monthly	5	Merchandise Inventory System generates the Inventory Available Report. Inventory Analyst uses this report and reconciles the perpetual inventory system report to GL balance and investigates any differences. Variances are recorded by the Inventory Analyst as a journal entry to update the G/L. General Accounting Manager reviews and signs off on the JE
Division Manager	Annual	6	Full physical inventories of merchandise is performed every year by the warehouse personnel.
Division Manager	Daily	1	Warehouse personnel fills out and signs a Material Receipt for every item received indicating receipt of goods.
Office Services	Daily	4	If Office Services department placed the order, then the Office Services department will match the quantity of goods received to the invoice to the purchase order and also agree the price per the purchase order to the price per the invoice
Division Manager	Daily	5	If an item received is on a Local Purchase Order, then the Stores Supervisor will agree the quantity of goods received to the invoice and also agree quoted to the price per the invoice.
Inventory Analyst	Daily	6	Inventory Analyst verifies the quantity received per the Material Receipt agrees to the quantity charged per the invoice and also agrees the amount charged per the invoice agrees to the voucher.
Division Manager	Daily	8	The stores supervisor maintains a Local Purchase Order Log and documents the date the voucher is prepared and date the invoice was received.
Division Manager	Daily	9	The duties of receiving the inventory are performed by the warehouse personnel, which are segregated from the duties of updating the perpetual inventory system which is performed by the IT department.
Office Services	Monthly	3	At the end of each month, Office Services department reviews all Material Receipt received but without a corresponding invoice. These items are listed as the month end supplies and material accrual for items received not invoiced and provided to the inventory analyst to accrue
Accounting Manager	Monthly	7	The Inventory Analyst reconciles the perpetual inventory system to the general ledger each month. General Accounting Manager reviews and signs off the reconciliation.
Division Manager	Annual	2	Full physical inventories of materials and supplies are taken every other year with a partial inventory of items that constitute 70% of the value done in the other years.
Division Manager	Annual	1	Full physical inventories of materials and supplies are taken every other year with a partial inventory of items that constitute 70% of the value done in the other years.
Accounting Manager	Annual	2	Corporate Accounting randomly selects inventory items to be test counted. For full inventories, 5% of the inventory items are test counted. For partial inventories, 10% of the inventory items are test counted.
Accounting Manager	Annual	3	A Corporate Accounting staff verifies and accounts for all tags issued for the physical inventory. All tags are accounted for including voids and unused tags.
Accounting Manager	Annual	4	A Corporate Accounting staff and warehouse manager investigate large book to physical variances.
Division Manager	Annual	5	Items received during the physical inventory are added to the physical inventory documentation for inclusion with the inventory reconciliation.
Division Manager	Annual	6	Inventory is counted by individuals under the supervision and direction of the warehouse manager.
Division Manager	Annual	7	Tags are placed on all inventory items or bins to indicate they have been counted, and it is verified by the test
Accounting Manager	Annual	8	A Corporate Accounting Staff prepares the book to physical journal entry to be posted in the general ledger and perpetual inventory system. The entry is reviewed and approved by the Controller.
Division Manager	Daily	1	The person filling (warehouse personnel) the order initials the stock slip indicating the request was fulfilled and the person receiving the supplies and materials initials the stock slip indicating they received the items identified on the stock slip.
Division Manager	Daily	2	The warehouse personnel cannot issue any supplies or materials unless a stock slip is created and signed by the issuer and the receiver.
Division Manager	Daily	3	Each stock slip issued is assigned a sequential number by Store Supervisor. Each morning, Store Supervisor enters prior day inventory issuance into the Inventory System accounting for the sequential numbering of stock slips and verifying the first stock slip number follows the prior days last stock slip number
IT Director	Monthly	4	Inventory System is interfaced with Infinium (G/L system) and automatically generates journal entry to capture quantity and value of the inventory issued.

Responsibility	Freq	Control #	Control Description
Accounting Manager	Monthly	5	Inventory Analyst (separate from warehouse personnel who issues the inventory) reconciles the perpetual inventory system report to the G/L balance and investigates any differences. Inventory Analyst prepares the adjustment journal entry if needed to update G/L. This adjustment JE is reviewed and signed by General Accounting Manager
IT Director	Monthly	7	Inventory System calculates cost on inventory relieved by multiplying the quantity by the average inventory cost per unit calculated by the system.
Division Manager	Annual	6	Full physical inventories of material and supplies are performed every other year with partial physical of items that constitutes 70% of the value done in other years by warehouse.
Office Services	Daily	1	All of the following documents are required by Office Services department to prepare voucher: Non-Inventory *Material Receipt, Bill of Lading, Purchase Order and vendor invoices.* The Office Services Department agrees the quantity and prices charged per these documents and verify they agree. If all items agree, a voucher is prepared
Office Services	Daily	7	Officer Services Manager matches the approved Purchase order to the Bill of Lading and Non-inventory Material Receipt and verifies the purchase was appropriately authorized per the Purchase Authorization Procedures.
Office Services	Daily	8	Office Services department receives vendor invoices, matches the quantity and price against the Non-Inventory Material Receipt and Bill of Lading, and investigates and reconciles any variances.
AP Analyst	Daily	9	Inventory is recorded into the computer system by the AP Analyst which is different than the person receiving the inventory.
Office Services	Weekly	2	Office Services department receives an EFT notification from the vendor that indicates the amount of cash that will be withdrawn from FPU's bank account by the vendor and reconciles the amount to be paid to all vouchers during that week to verify amount is accurate
Propane Director	Monthly	3	Each division performs an inventory balancing and prepares an End of Month Propane Inventory report which rolls inventory balance from prior month balance to current balance. This report is also reviewed and sent by the division supervisor to the Director of Propane to Inventory Analyst
Inventory Analyst	Monthly	4	Inventory Analyst converts the Gas Received portion in the End of Month Propane Inventory Report into dollars and reconciles to the G/L balance for all inventory received during the month.
Division Manager	Monthly	5	Physical inventories of propane at the tank farms are done monthly by tank farm personnel to record the ending inventory balance to use in the monthly inventory rollforward report. The inventory is also taken daily for division use.
Inventory Analyst	Annual	6	A reasonableness calculation of propane located in the tanks of metered customers is performed once a year. The *Propane Delivery System runs a program that calculates the estimated balance at a given day of propane in a* metered customers tank based on the prior date the tank was filled. This test validates the propane inventory in metered tanks on a given day. The variances are reconciled and errors identified by the report are investigated either individually or using a random sample and adjusted to correct value by the Inventory Analyst and a book to physical adjustment is posted in the G/L
Division Manager	Monthly	1	Physical of inventories of propane at the tank farms are done monthly by tank farm personnel to record the ending inventory balance to use in the monthly inventory rollforward report. The inventory is also taken daily for division use.
Inventory Analyst	Monthly	2	Inventory Analyst reconciles the physical count of Tank Farm inventory month and investigates and reconciles significant variances (done per monthly propane rollfoward report).
Accounting Manager	Monthly	4	Inventory Analyst prepares the book to physical journal entry to adjust the G/L balance, and the journal entry is approved/signed off on by the General Accounting Manager. The CFO's approval and sign off are also required for the annually customer premises book to physical adjustment entry in addition to the General Accounting Manager's approval. Monthly control for tanks
Division Manager	Monthly	5	Inventory read of tanks is performed by individuals who are familiar with the equipments and independent of inventory record keeping. Monthly control for tanks.
Inventory Analyst	Annual	3	A reasonableness calculation of propane located in the tanks of metered customers is performed once a year. The Propane Delivery System runs a program that calculates the estimated balance at a given day of propane in a metered customers tank based on the prior date the tank was filled. This test validates the propane inventory in metered tanks on a given day. The variances are reconciled and errors identified by the report are investigated either individually or using a random sample and adjusted to correct value by the Inventory Analyst and a book to physical adjustment is posted in the G/L
CFO	Annual	4	Inventory Analyst prepares the book to physical journal entry to adjust the G/L balance, and the journal entry is approved/signed off on by the General Accounting Manager. The CFO's approval and sign off are also required for the annually customer premises book to physical adjustment entry in addition to the General Accounting Manager's approval. Annual control for customer premises
Propane Clerk	Daily	1	*Delivery Tickets are automatically stamped with the gallons disbursed by the meter on the delivery trucks when* Drivers deliver propane.
Propane Clerk	Daily	2	For each truck, Propane Clerk accounts for all Delivery Tickets and reconciles the beginning read to the ending read on the trucks.
Propane Clerk	Daily	3	Propane Clerk runs a tape of all Delivery Tickets for all trucks and reconciles to the Delivery Edit Report generated by the Propane Delivery System(scheduling system).
Propane Clerk	Daily	4	Propane Clerk generates the Fills Do Not Agree (FDA) report which details all the variances between gallons delivered and meter reads as percentage, reviews and investigates unacceptable variances, i.e. >25% for tanks 120 gallon and smaller and >15% for tanks 250 gallons and larger. Findings are documented on the FDA report or on a service order
Office Services	Daily	11	Office Services Manager compares the vendor pricing to the OPIS Index provided by the Gas Logistics Manager and the destination pricing report provided by the vendor to verify if the accurate price is charged (usually the lower of the OPIS Index and destination pricing)
Propane Clerk	Daily	12	Propane is delivered by Drivers at each division, Propane Clerk accounts for all Delivery Tickets, and Inventory Analyst records inventory issuance in the G/L. Daily control for delivery
Division Manager	Monthly	5	Each division performs inventory balancing and prepares the End of Month Propane Inventory report which details the rollforward of prior month inventory balance to current month balance. This report is reviewed and forwarded by the Division Supervisor to the Inventory Analyst
Inventory Analyst	Monthly	6	Inventory Analyst summarizes all divisions End of Month Propane Inventory reports and prepares the inventory rollforward worksheet to calculate the month end G/L balance.
Accounting Manager	Monthly	7	Inventory Analyst converts the Gas Issued portion in the End of Month Propane Inventory Report into dollars and prepares a journal entry to record propane inventory issued during the month to update the G/L. The journal entry is reviewed and approved by the General Accounting Manager

Responsibility	Freq	Control #	Control Description
Division Manager	Monthly	8	Physical of inventories of propane at the tank farms are done monthly by tank farm personnel to record the ending inventory balance to use in the monthly inventory rollforward report. The inventory is also taken daily for division use.
Accounting Manager	Monthly	10	Inventory Analyst calculates total cost of inventory issued within the rollforward worksheet using the average cost per gallon and total quantity delivered. Inventory Analyst then prepares a month-end journal entry for propane issuance during the month to update G/L. The journal entry is reviewed and approved by the General Accounting Manager
Inventory Analyst	Monthly	12	Propane is delivered by Drivers at each division, Propane Clerk accounts for all Delivery Tickets, and Inventory Analyst records inventory issuance in the G/L. Monthly control for GL recording
Inventory Analyst	Annual	9	A reasonableness calculation of propane located in the tanks of metered customers is performed once a year. The Propane Delivery System runs a program that calculates the estimated balance at a given day of propane in a metered customers tank based on the prior date the tank was filled. This test validates the propane inventory in metered tanks on a given day. The variances are reconciled and errors identified by the report are investigated either individually or using a random sample and adjusted to correct value by the Inventory Analyst and a book to physical adjustment is posted in the G/L
Division Manager	Annual	1	Full physical inventories of merchandise are taken every year by warehouse personnel.
Accounting Manager	Annual	2	A test count of 5% of all inventories is done by individuals independent of the inventory count.
Accounting Manager	Annual	3	Corporate Accounting staff reconciles physical inventory and general ledger account and prepares necessary adjustments.
Accounting Manager	Annual	4	Corporate Accounting staff and warehouse manager investigate any book to physical variances.
Division Manager	Annual	5	Items received during the physical inventory are added to the physical inventory documentation for inclusion with the inventory reconciliation.
Division Manager	Annual	6	Inventory is counted by individuals under the supervision and direction of the warehouse manager.
Division Manager	Annual	7	After the inventory counting is completed, items without a "post-it" note are investigated.
Accounting Manager	Annual	8	Corporate Accounting staff prepares the book to physical journal entry to be posted in the general ledger and perpetual inventory system. The entry is reviewed and approved by the Controller.
Division Manager	Daily	1	Warehouse personnel fills out and signs a Material Receipt for every item received indicating receipt of goods.
Division Manager	Daily	2	The warehouse personnel generates a pre-numbered system tag in duplicate from the inventory system upon the receipt of each piece of merchandise inventory. One tag is placed on each piece of merchandise received, one tag is placed in the warehouse file
Office Services	Daily	7	If Office Services department placed the order, then the Office Services department will match the quantity of goods received to the invoice to the purchase order and also agree the price per the purchase order to the price per the invoice. If everything agrees, the Office Services department prepares the voucher
Division Manager	Daily	8	If an item received is on a Local Purchase Order, then the Sales Coordinator or local divisional purchaser will agree the quantity of goods received to the invoice to the purchase order and also agree the price per the purchase order to the price per the invoice. If all items agree the Sales Coordinator or local divisional purchaser prepares the voucher for payment
Inventory Analyst	Daily	9	Inventory Analyst verifies the price on the voucher agrees to the price on the invoice.
Division Manager	Daily	11	The Sales Coordinator maintains a Local Purchase Order Log and documents the date the voucher is prepared and date the invoice was received.
Division Manager	Daily	12	The duties of receiving and recording the inventory are performed by the warehouse personnel which are segregated from the duties of creating a voucher and processing the payment for the inventory.
Division Manager	Daily	13	Warehouses are equipped with alarm systems and guards.
Division Manager	Daily	14	Service Order is required prior to issuing merchandise.
Division Manager	Monthly	4	The Sales Coordinator receives a Merchandise Audit Report from the Stores Supervisor that identifies all system tags received in the period. This report is used to verify all system tags are received from the warehouse.
Accounting Manager	Monthly	5	Inventory Analyst accrues all items sold during the month that have not been paid using the Sold Report, all available inventory items that have not been paid using the Available Report, and all items sold and accrued in prior month that have not been paid. Inventory Analyst prepares the accrual journal entry, and it is reviewed and signed off by the General Accounting Manager
Accounting Manager	Monthly	10	The Inventory Analyst reconciles the perpetual merchandise inventory system to the general ledger each month. General Accounting Manager reviews and signs off on the reconciliation.
Division Manager	Annual	6	Full physical inventories of merchandise are taken at least once every year.
GL Accountant	Monthly	1	The General Ledger Accountant prints a pre-tax financial statement, detailed expense report, and balance sheet on a divisional level and sends the reports to the accounting department for review.
Sr Financial Acct	Monthly	2	The accountants responsible for each account will verify the financial statement accuracy and investigate large variances or fluctuations (over $5,000) between the current and prior period amounts. Each person is responsible to document the reason for the fluctuation on the Analysis Worksheet for his or her assigned accounts
Sr Financial Acct	Monthly	3	The Senior Financial Accountant verifies each person responsible documents on the Analysis Worksheet all the fluctuations over $5,000. She then prepares a letter that explains the variances between the current period and prior period for all fluctuations over $20,000 and distributes the letter to each person who receives the monthly financial statements (mainly directors and managers)
Accounting Manager	Monthly	4	General Accounting Manager prepares a Master Closing Schedule that identifies all items to be completed prior to the close and identifies person responsible.
GL Accountant	Monthly	5	General Ledger Accountant maintains a JE control log of all required journal entries and person responsible will electronically input date and their initials on the JE control log once the journal entry is completed and entered into the system
Accounting Manager	Monthly	6	The General Accounting Manager maintains a log of all account reconciliations that need to be performed and the person responsible. The person responsible in General Accounting to complete the reconciliation is required to input completion date on the log once the reconciliation is complete
IT Director	Monthly	7	Only the General Ledger Accountant, Cash Accountant, General Accounting Manager, CFO, Controller and Corporate Accounting Supervisor have access to post journal entries to Infinium.
Accounting Manager	Monthly	8	The Controller, General Accounting Manager or the Corporate Accounting Supervisor reviews, approves and signs-off on all journal entries prior to being entered into the system.
General Office Asst	Monthly	9	The General Office Assistant or designee obtains all journal entry forms from the General Ledger Accountant and verifies each journal entry was correctly key punched into Infinium. The General Office Assistant signs-off on the journal entry form indicating she proofed the entry in the system

Responsibility	Freq	Control #	Control Description
Accounting Manager	Daily	1	Only Controller, CFO, General Accounting Manager or Corporate Accounting Supervisor are authorized to initiate and release recurring wire transfers.
Accounting Manager	Daily	2	To set-up the wire transfer template for a transaction to be recurring wire transfer with Bank of America, it requires one authorized person to initiate and a second authorized person to release it.
Accounting Manager	Daily	3	Non-recurring wire transfers require one authorized person to initiate the transaction and a second authorized person to release it.
Accounting Manager	Daily	4	Bank of America's wire transfer web site requires log-in ID and password for each authorized individual.
Accounting Manager	Daily	6	Only Controller, CFO, General Accounting Manager or Corporate Accounting Supervisor are able to process wire transfers.
Cash Accountant	Monthly	5	Bank account is reconciled on a monthly basis with reconciling items investigated timely.
Division Manager	Monthly	1	The Division Manager reviews all monthly invoices for reasonableness. The review consists of comparisons to prior years, and considers the weather conditions throughout the current month.
Division Manager	Monthly	2	Supplier invoices are reconciled to the terms outlined in the contract in order to ensure compliance by division.
Division Manager	Monthly	3	Employee signs the material receipt form for the electricity purchased during the month.
Gas Logistics Mgr	Annual	4	Annual electricity meter testing is performed by the supplier together with a Florida Public Utilities representative present.
Office Services	Daily	1	Purchase Orders are only created from properly approved and documented Purchase Requisitions.
Office Services	Daily	2	Before Purchase Orders are sent to vendors, the Office Services Manager or designee reviews and approves each individual document.
Office Services	Daily	3	Office Services verifies the receipt is consistent with the original order by matching a copy of the original Purchase Order to the receipt.
Office Services	Daily	4	Office Services verifies billing is appropriate by matching the Purchase Order, receipt, and vendor invoice.
Office Services	Daily	5	Office Services Manager or designee reviews the vouchers and authorizes the processing of vendor payment. The Office Services Manager or designee agrees the price per the invoice to the OPIS Index and the destination pricing report to recalculate the amount charged to verify invoice is correct
Propane Director	Daily	6	Propane Director reviews the Purchase Order for accuracy.
Office Services	Daily	7	Field signs off on the material receipt form confirming the receipt of goods.
Office Services	Daily	8	*Sequential Purchase Order numbers are utilized and are logged within the Purchase Order Number Log.*
Office Services	Daily	9	Upon receipt, a delivery receipt is logged and provided to the district.
HR Director	Daily	2	The Company has segregation of duties in place for the following duties: hiring employees (HR Assistant), payroll check preparation (IT Programmer), and distribution of payroll checks (Employment Specialist and office assistants).
IT Director	Daily	6	The payroll master file in the computer system is only accessible by three IT programmers, the HR Director and the HR assistant.
HR Assistant	Bi-weekly	1	Set-up new employees, termination, and changes to payroll perm files such as pay rates, employee records, and deductions are done via a Personal Action Notice (PAN) form which is approved by the employees direct supervisor or manager, and either the CEO or COO
HR Assistant	Bi-weekly	3	Individual time sheets are created biweekly and are approved by the employees supervisor and sent to the HR assistant.
Sr Tax Accountant	Bi-weekly	4	Senior Tax Accountant receives a bi-weekly "Payroll Change" report that identifies every change to the payroll system that occurred that week and the pay rate changes are agreed to signed copies of the PAN Forms received from HR.
HR Assistant	Bi-weekly	7	The payroll system generates a "Biweekly Unmatched Employee" report that identifies all employees that have less then 80 hours if full time or no time in system. This report is reviewed by HR Assistant to verify all employees on list have had their time for the period recorded correctly
HR Assistant	Bi-weekly	8	Set-up and changes to payroll perm files such as pay rates, new hires, and additional vacation are done via a Personal Action Notice (PAN) form. Based on the "PAN Form Authorization Table", PAN is approved by the employees direct supervisor or manager, and either the CEO or COO. Deductions are done via a PAN and employee signs or submits appropriate documents
HR Assistant	Bi-weekly	9	HR Assistant reviews and approves (via email or telephone call) the payroll report prepared by the IT Programmer prior to checks being cut. HR Assistant during her review examines the report to verify nothing looks unusual and ties the total hours per the report to the hour log used to enter the payroll
HR Assistant	Bi-weekly	10	Company utilizes "Positive Pay" with Bank of America which only allows checks to clear the bank account if FPU notifies the bank ahead of time and the amount being paid agrees. HR Assistant provides an electronic file to the bank with the check numbers used and the amount of each check
IT Director	Bi-weekly	11	HR Assistant provides the IT programmer a total of the hours worked by division for the pay period as a control total for the programmer to agree to after the information is processed in the system and ready for checks to be prepared.
HR Director	Bi-weekly	19	Total amount paid per the Payroll Report is agreed to the checks generated
HR Assistant	Weekly	5	Person who enters timesheets into the payroll system creates a payroll log that identifies the total number of hours worked for that department. This control total is agreed to the Payroll Edit Report run from the payroll system by the HR Assistant to verify total hours per timesheets agree to total hours in the computer system
HR Director	Weekly	13	Manual checks are prepared infrequent mainly for employee terminations and bonus payments once a year.
HR Director	Weekly	14	Manual payroll checks require an actual signature by an authorized check signer who examines the supporting documentation indicating why a manual check is required and the amount to be paid.
Sr Tax Accountant	Monthly	12	Senior Tax Accountant reconciles monthly payroll bank account.
Cash Accountant	Monthly	12	Cash Accountant computes the outstanding checks per G/L and agrees the amount to payroll bank reconciliation.
Sr Tax Accountant	Monthly	16	The Senior Tax Accountant reconciles the payroll tax accounts monthly
Inventory Analyst	Monthly	16	The Inventory Analyst reconciles the payroll and deductions monthly.
Accounting Manager	Monthly	17	Payroll related accruals are reviewed for completeness and reasonableness and approved by General Accounting Manager.
HR Assistant	Monthly	18	Payroll system uses edit checks to query the HR department to check whether all employee time reports have been submitted into the payroll system. If a persons time is missing, the computer report generated questions the HR department. The HR Assistant receives a report titled "Unmatched Employees" that identify employees not receiving a check
Sr Tax Accountant	Quarterly	20	Senior Tax Accountant reconciles the "701" computer report from the payroll system to the "HR 310" report computed with every quarter. Senior Tax Accountant makes sure amounts equal and computes the required tax deposits from these reports and agrees it to the actual payroll tax deposits and reconciles any discrepancies

Responsibility	Freq	Control #	Control Description
GL Accountant	Annual	15	Detailed records are maintained of the liability for compensated absences, and the General Ledger Accountant reconciles it to the general ledger.
Gas Logistics Mgr	Daily	1	When additional gas is needed, the Gas Logistics Manager contacts suppliers with requests. The request is made either over the phone or via e-mail. Only the Gas Logistics Manager is authorized to purchase gas.
Gas Logistics Mgr	Daily	2	When additional gas is purchased, the gas must be scheduled with Florida Gas Transmission (FGT) on the pipeline. To do this, the Gas Logistics Manager contacts FGT via an online scheduling system. The system is password protected and only the Gas Logistics Manager is authorized to access the system
Gas Logistics Mgr	Daily	4	Each day, the Gas Logistics Manager downloads a report from Florida Gas Transmission Company (FGT) detailing the gas that is scheduled to be delivered for that day. This report is then reconciled to the amount of gas purchased for the day
Gas Logistics Mgr	Daily	5	A reconciliation of FPU's records to the invoice is performed by the Gas Logistics Manager. Exceptions are followed up with the supplier.
AP Analyst	Monthly	3	Payments are made via a wire transfer which requires the approval from a person on the listing of authorized wire transfer personnel.
Gas Logistics Mgr	Monthly	6	Each monthly invoice is reviewed and approved by the Gas Logistics Manager to ensure the amounts of natural gas and capacity usages are appropriate.
Office Services	Monthly	7	A copy of each voucher packet is retained by the Procurement Department for their records.
Gas Logistics Mgr	Monthly	8	The Gas Logistics Manager runs reports detailing FPU's capacity and natural gas usage for the month. These reports are reviewed to gauge forecast accuracy and cost effectiveness of capacity and natural gas procurement.
AP Analyst	Daily	1	Vendor invoices are processed by A/P Analyst independent of purchasing, receiving, shipping, that are done at division level or in Office Services.
Office Services	Daily	2	Office Services Assistant or designee compares invoices to approved purchase orders and receiving reports, and check mathematical accuracy of invoices.
Sr Construction Acct	Daily	5	Improvement Requisition (IR) form is required for all capital expenditures over $2,500 that will be constructed and has to be approved based on the predetermined authorization table.
Division Manager	Daily	6	Purchase Requisitions (PR) are approved by Local or Division Managers based on a predetermined authorization table for all capital expenditures purchased and not constructed.
AP Analyst	Daily	7	A/P Analyst receives all vouchers and invoices prior to payment and verifies the voucher has been properly approved based on the predetermined authorization limits.
Sr Construction Acct	Daily	8	Senior Construction Accountant assigns every IR a sequential five-digit number which represents the sub-ledger account in the G/L and is used through out all accounting and reporting functions, such as A/P, fixed asset recording, and expenditures
Accounting Manager	Daily	13	Controller, General Accounting Manager, Office Services Manager, CFO or Corporate Accounting Supervisor reviews all expenditures over $500 for proper coding in the general ledger.
Accounting Manager	Daily	14	CFO, Controller, General Accounting Manager, Office Services Manager or Corporate Accounting Supervisor reviews G/L coding on all vouchers or Purchase Requisitions over $500 to ensure proper G/L classification.
Sr Construction Acct	Daily	16	All assets designated as taggable are assigned a pre-numbered tag to be attached to the asset and the number is included in the fixed asset system.
IT Director	Daily	18	Access to fixed asset system (Infinium) is limited to the following authorized individuals: Senior Construction Accountant, General Accounting Manager, Part-time Accountant, CFO, Senior Project Accountant, Controller and Corporate Accounting Supervisor
Sr Construction Acct	Monthly	4	Senior Construction Accountant maintains log for on going capital projects and monitors expenditure against budget per Improvement Requisition form. All project variances are required to have an IR Revision form completed and approved by the division manager if the variance exceeds 15% and $1,000 on a project basis or 10% on a material variance. Management holds Division Managers accountable for capital expenditure variances
Sr Construction Acct	Monthly	9	Senior Construction Accountant analyzes all open IR's based on actual expenditures compared to budgeted expenditures on a monthly basis.
Sr Construction Acct	Monthly	10	Division managers receive a report indicating all open IR's for the division and the progress on the construction comparing budgeted expenditures to actual expenditures. They are required to investigate, respond, and approve any significant variances via Revision form on closed IR's.
Sr Construction Acct	Monthly	11	All project variances are required to have an IR Revision form completed and approved by the division manager if the variance exceeds 15% and $1,000 on a project basis or 10% on a material variance.
Sr Construction Acct	Monthly	12	Senior Construction Accountant reconciles the detailed fixed asset costs in Infinium (fixed asset computer system) to the general ledger on a monthly basis.
Accounting Manager	Monthly	15	General Accounting staff performs monthly expense account analysis and investigates any variances over $5,000.
Division Manager	Monthly	17	Division Manager's notify Senior Construction Accountant once projects are completed.
Accounting Manager	Monthly	19	Depreciation is automatically computed by the Report Writer. Depreciation journal entry is recorded by Senior Construction Accountant and approved by General Accounting Manager. Reconciliation is done within Infinium when the journal is recorded to make sure that the depreciation amount is accurate. General Accounting Manager reviews this reconciliation before she signs off on the journal entry
Sr Construction Acct	Monthly	21	Senior Construction Accountant reconciles the change in the accumulated depreciation account in the general ledger on a monthly basis.
Sr SEC Accountant	Quarterly	22	Journal entry prepared by Senior SEC Accountant or Senior Project Accountant to reclassify retirement obligation from accumulated depreciation is approved by the Controller via her review of the top level journal entries in the financial statement preparation process
Division Manager	Annual	3	Division Manager approves budgets for yearly capital expenditures.
Sr Project Accountant	Five-Year	20	Composite depreciation rates are assigned by the FPSC via a depreciation study.
GL Accountant	Quarterly	1	Company's environmental attorney's provide an email to the COO, CFO, G/L Accountant, and General Accounting Manager that identifies a projected range of environmental liabilities by case.
GL Accountant	Quarterly	2	C.F.O. or Controller approves the environmental worksheet prepared by the G/L Accountant. The environmental liability is recorded as management's best estimate.
GL Accountant	Quarterly	3	General Accounting Manager reviews and approves the general ledger journal entry prepared by the G/L Accountant after comparing the journal entry to the approved environmental worksheet.
GL Accountant	Monthly	4	GL Accountant reconciles the environmental liability and asset account on a monthly basis.
AP Analyst	Daily	1	Segregation of Duties - AP Analyst independent of purchasing, receiving, and shipping process vendor invoices. Purchasing, receiving and shipping process are done at division level or in Office Services.

Responsibility	Freq	Control #	Control Description
AP Analyst	Daily	2	AP Analyst reviews all vouchers for required authorization and approvals according to the authorization levels contained in the "Authorization Procedure" and Routine Recurring or Recurring Utility payment list.
Accounting Manager	Daily	3	General Accounting Manager audits random vouchers for proper approval and invoice is stamped with "Entered" prior to approving "Cash Requirements Report".
Division Manager	Daily	4	Managers at a divisional level compare quantities and prices on the invoices to approved purchase orders and receiving reports and check the mathematical accuracy of the invoice prior to approving the voucher for payment.
AP Analyst	Daily	5	AP analyst stamps "entered" and records the date on each invoice recorded into the system to prevent duplicate payments.
AP Analyst	Daily	6	AP analyst runs a tape on invoices entered into the computer system and agrees the total to the AP system generated "session batch" report.
IT Director	Daily	7	System alerts user when an invoice number, invoice date, and amount have already been entered into the computer system to prevent duplicate payments.
General Office Asst	Daily	8	General Office Assistant or designee compares the items entered into the computer system to the supporting documentation for entry accuracy such as the name of the vendor, the invoice number, the due date, and the invoice amount
Accounting Manager	Daily	9	CFO, Controller, General Accounting Manager, Office Services Manager or the Corporate Accounting Supervisor reviews G/L coding on all vouchers or PO's over $500 to ensure proper G/L classification
AP Analyst	Daily	10	All checks are printed by computer through the accounts payable system. No handwritten checks are allowed.
AP Analyst	Daily	13	Vouchers are required to be approved in writing. Level of approval is dictated by FPU's authorization schedule included in the "Authorization Procedure."
AP Analyst	Daily	16	AP Analyst who processes the disbursements does not create nor approve vouchers paid via check except for 1099 and check orders, and some items automatically deducted from account – interest payments, loan reductions, void payments.
AP Analyst	Weekly	14	Checks above $2,500 require the Controller's, CFO's, COO's, or Corporate Accounting Supervisor's signature in addition to the computer-printed CEO's signature included on the checks.
General Office Asst	Weekly	15	Signed checks are mailed by the General Office Assistant or designee, who is independent of AP Analyst who processes accounts payable.
Cash Accountant	Monthly	11	The Bank of America Operating Account is reconciled monthly by the Cash Accountant and all reconciling items are investigated and cleared timely by Cash Accountant, or the Cash Accountant will make sure that the responsible person resolves the discrepancies
Accounting Manager	Monthly	12	General Accounting Manager reviews and signs off on the bank reconciliation.
Inventory Analyst	Monthly	17	Inventory Analyst receives all purchase order logs and departmental local purchase order (LPO) logs at the end of each month and investigates all items over $1,000 issued in the current month or items accrued at the end of the prior month to determine if they need to be accrued at the end of the current month
AP Analyst	Monthly	18	AP Analyst reconciles accounts payable subsidiary ledger to the general ledger and differences are resolved timely. This reconciliation is reviewed and signed off by General Accounting Manager.
Office Services	Daily	1	If purchase is initiated through a formal purchase order, then Office Services reconciles the Purchase Order, receipt, and invoice in order to verify that the billed amount is appropriate.
Division Manager	Daily	2	If purchase is initiated through a local purchase order (LPO), then Voucher Auditor will reconcile LPO, receipt, and invoice in order to verify that the billed amount is appropriate. The Division Manager or authorized personnel approve the voucher for payment
Office Services	Daily	3	For high dollar value purchases, Division Manager and / or Executive approval is necessary on the purchase requisition. The level of approval is dictated by FPU's authorization schedule.
Division Manager	Daily	4	The Local Manager authorizes each voucher packet for payment processing.
Office Services	Daily	5	Office Services Manager reviews each Purchase Order for appropriateness before sending to the vendor.
Office Services	Daily	6	Office Services verifies the receipt is consistent with the original Purchase Order (open Purchase Orders in the active Purchase Order file) by matching the receipt to a copy of the Purchase Order.
Office Services	Daily	7	Office Services verifies billing is appropriate by matching the Purchase Order, receipt form, and vendor invoice.
Office Services	Daily	8	Office Services Manager or designate reviews the vouchers and authorizes the processing of payment.
Division Manager	Daily	9	Goods received are inspected for quality and completeness before being accepted.
Division Manager	Daily	10	Division or Office Service Manager reconciles the Purchase Order, receipt, and invoice in order to verify that the billed amount is appropriate.
Division Manager	Daily	11	Upon receipt, deliveries are verified to be complete by comparing the receipt to the Purchase Order.
Division Manager	Daily	12	The field signs off on the material receipt form authorizing their receipt.
Division Manager	Daily	13	Local Purchase Order Logs are kept by each division to record the local Purchase Orders issued. Local Purchase Orders are also sequentially numbered.
Office Services	Daily	14	Purchase Order numbers are sequential and are logged within the Purchase Order Log.
Office Services	Daily	15	Most vendor invoices are directed through Office Services and some subsequently forwarded to the appropriate Division or Department.
Division Manager	Monthly	3	Senior Management are highly involved in the monthly reporting process as a mean to ensure that all transactions are properly reported.
Accounting Manager	Quarterly	2	Division directors and other senior management team members are required to sign a statement stating that all business transactions to their knowledge are accurately disclosed in the financial statements.
Accounting Manager	Quarterly	4	Controller, Corporate Accounting Supervisor, and Senior SEC Reporting Accountant reviews new pronouncement and attend training courses to ensure financial statements are properly prepared with current regulations.
CFO	Quarterly	5	Controller, CEO and CFO reviews all 10Q an 10K filings to verify that all business transactions to their knowledge are accurately disclosed in the financial statements.
Accounting Manager	Quarterly	6	Company Attorney sends a report to the CFO listing any known and/or anticipated liabilities the Company is involved.
Division Manager	Annual	1	Division director's review of the annual financial statements for the appropriate reporting of all transactions is aided by their detailed and thorough understanding of all significant business transactions. Events known to exist, but not reported are identified during management's financial statement review, and subsequently reported to Accounting for recording adjustment or re-classification
Sr SEC Accountant	Monthly	1	Senior SEC Accountant Reconciles fuel purchases per the general ledger to the invoices or summary reports provided by the fuel vendor.
Sr SEC Accountant	Monthly	3	Senior SEC Accountant reconciles the roll-forward of monthly fuel purchases, company fuel usage, and fuel sales included in the unbilled receivable calculation to the YTD general ledger balance.

Responsibility	Freq	Control #	Control Description
Sr SEC Accountant	Monthly	5	Senior SEC Accountant reconciles the unbilled revenues and receivable to the general ledger monthly.
Sr SEC Accountant	Monthly	6	The monthly unbilled calculation is reviewed and approved monthly by an accounting manager. The General Manager of South Florida reviews the monthly calculation and sign off, physically or electronically, on a quarterly
Sr SEC Accountant	Annual	2	Senior SEC Accountant tests the accuracy of the unbilled receivable computation annually by utilizing another unbilled receivable computation as a check. On an annual basis, the Senior SEC Accountant will receive a computer generated usage and billing report from the IT department for a given month by division by cycle. The usage and billing report is translated into revenue and usage by day. The daily rate is then multiplied by the number of days unbilled in the month to estimate the unbilled receivable and test the accuracy of the monthly unbilled calculation
Sr SEC Accountant	Annual	4	The annual test calculation validates the accuracy of the billing rate used within the monthly computation.
Sr SEC Accountant	Quarterly	1	Senior SEC Reporting Accountant prepares the quarter-end closing journal entry by utilizing a standard quarter-end closing template that identifies all the typical entries that need to be recorded.
Accounting Manager	Quarterly	2	Controller, Corporate Accounting Supervisor, and Senior SEC Reporting Accountant review new pronouncements and attend training courses to verify the financial statements are properly prepared with the current regulations.
Sr SEC Accountant	Quarterly	3	Senior SEC Reporting Accountant compares the quarter financial statements to the monthly financial statements to verify the amounts for the quarter were downloaded properly.
Accounting Manager	Quarterly	4	Senior SEC Reporting Accountant prepares a reference copy of the filing and references all numbers in the filing to the supporting documentation that is attached with the reference copy. All statement figures are referenced via linked
Accounting Manager	Quarterly	5	Senior SEC Reporting Accountant publishes the draft of the filing on the P: drive and notifies the Controller and CFO it is ready for review. CEO, CFO and Controller review and approve the filing.
Accounting Manager	Quarterly	6	Every filing is sent to the Company's SEC attorney for review and comments prior to it being finalized.
Sr SEC Accountant	Quarterly	7	Senior SEC Reporting Accountant collects all comments on the filing, makes changes utilizing the track changes feature in Microsoft Word and re-sends the reviewers a redlined version identifying what has changed in the filing.
CFO	Quarterly	8	Board of Directors and the audit committee review a draft of the filing prior to it being finalized.
HR Director	Annual	N/A	The company possesses a Code of Ethics, which was adapted to incorporate various industry and company-specific issues FPU is subject to. FPU Board of Directors approved the Code of Ethics on 06/03/03. All employees are required to review and sign the Code of Ethics. The document is also posted on the website and accessible to all FPU employees
HR Director	Annual	N/A	Policies governing fair contractual relations with suppliers are addressed as a subsection within the company's Code of Ethics policy.
Accounting Manager	Annual	N/A	As a part of the Code of Ethics, a Whistle Blower Program is in place for employees to report to the Audit Committee any known or suspected activities that may improperly affect financial statements or compromise the Company's Ethics Policy
HR Director	Annual	N/A	The Director of HR (Wayne Bonn) has been effectively designated as Chief Ethics Officer. However, over-arching responsibility for ethics compliance has been delegated to all senior management personnel.
Accounting Manager	Annual	N/A	There is an internal audit function that performs compliance-based audits.
HR Director	Annual	N/A	Violations are thoroughly investigated with any necessary disciplinary actions carried out by HR.
HR Director	Annual	N/A	FPU Employees are required to re-confirm their adherence to the Code of Ethics policy by signing the Code every year.
HR Director	Annual	N/A	Code of Ethics is formally addressed by the Board of Directors annually.
HR Director	Annual	N/A	Comprehension of the company's corporate ethics policy is an integral part of the company's new employee orientation program. FPU has created an acknowledgement form, which asks new employees to sign and attest that they have read and understand FPU's corporate ethics policy.
CFO	Annual	N/A	Regular reviews are performed by the CFO and associated office personnel. Disclosure controls surrounding the integrity, reliability and transparency of financial reporting appear adequate. Disclosure control documents surrounding FPU's assumption of liabilities is adequately maintained.
HR Director	Annual	N/A	The company has designated a PR person who is the only authorized person to speak with outsiders on various company sensitive issues. Other company employees are not ~~executive~~ allowed to speak publicly on FPU matters unless they get approval from executives.
Accounting Manager	Annual	N/A	Legal review is performed prior to the filling of such documents, as the company's 10-K and 10-Q, prior to filing with the SEC.
Accounting Manager	Annual	N/A	The Audit Committee does adequately and timely review FPU's quarterly financial reporting and 8-K reports prior to public release.
CFO	Annual	N/A	Board of Directors assesses annual FPU management performance targets for reasonableness prior to formal approval.
CFO	Annual	N/A	Compensation Committee conducts reviews regarding the potential impact incentive compensation structures could have on the fiduciary responsibilities of senior management.
IT Director	Annual	N/A	IT disaster recovery plan is defined. Hurricane recovery plan is in place.
CFO	Annual	N/A	Corporate Articles of Incorporation & Company By-laws exist
CFO	Annual	N/A	Audit Committee and Nomination Committee charter exist and are utilized. Information on the Compensation Committee (as well as the Audit and Nomination Committees) is contained in the company's proxy statement.
CFO	Annual	N/A	Nomination Committee does adhere to formal guidelines in order to ascertain director independence prior to nomination.
CFO	Annual	N/A	Ethics policy covers Board of Directors independence. Board of Directs are required to complete the "Directors and Officers Questionnaire" which discusses the independence of board members. CFO and CEO review questionnaires for accuracy to the best of their knowledge. The primary monitoring control utilized with respect to changes in the status of board member independence is self-reporting
CFO	Annual	N/A	Board of Directors meets quarterly on the first Tuesday. Meeting calendar for Board of Directors is formally set and agreed upon in advance of each quarterly meeting. Dates are scheduled and managed within Outlook.
CFO	Annual	N/A	Independent directors have the ability to provide input at all meeting attended.
HR Director	Annual	N/A	Director compensation is reviewed and benchmarked against a peer group analysis (i.e. similar industry, size, number of employees, sales, debt/equity ratio, etc.).
CFO	Annual	N/A	Audit committee meets quarterly. Meeting calendar for Audit committee is formally set and agreed upon one year in advance. Dates are scheduled and managed within Outlook.
CFO	Annual	N/A	Independent audit directors do have input into the formation of agendas for all meetings.

Responsibility	Freq	Control #	Control Description
HR Director	Annual	N/A	Audit director compensation is reviewed and benchmarked against a peer group analysis (i.e. similar industry, size, number of employees, sales, debt/equity ratio, etc.).
CFO	Annual	N/A	Agenda is generally deemed to be comprehensive in scope and all recurring activities, which need to be addressed by the Board are done so within the quarterly agenda.
CFO	Annual	N/A	All relevant issues/information needed is followed up on informally and in a timely manner.
CFO	Annual	N/A	Crowe Chizek serves as the company's internal audit function. Crowe Chizek attends quarterly audit committee meetings at the request of the audit committee, and private sessions, without management present, occur at each meeting
CFO	Annual	N/A	Any Audit Committee concerns (when expressed) are directly handled by the External or Internal Auditors of the firm. Review of work completed by auditors is conducted by Audit Committee.
HR Director	Annual	N/A	Compensation Committee handles the review and approval of compensation plans for all FPU executive officers and the Board of Directors members themselves. All compensation plans are reviewed and approved by the Compensation Committee.
HR Director	Annual	N/A	Executive officer and Board of Directors members' compensation are benchmarked appropriately against peer companies with comparable performance annually.
HR Director	Annual	N/A	Compensation plans are reviewed to ensure alignment between compensation incentives and desired fiduciary responsibilities is achieved.
HR Director	Annual	N/A	Position descriptions which detail skills, minimum education and competency requirements are developed by Department Heads for all position vacancies (for both internal and external positions).
HR Director	Annual	N/A	FPU requires all personnel with financial accounting and reporting responsibilities to have commensurate credentials and experience. HR verifies that aforementioned individuals have required background.
HR Director	Annual	N/A	Position descriptions (Job Summary, Duties & Responsibilities) are clearly delineated within job description documents to ensure appropriate targeting of applicant pool.
HR Director	Annual	N/A	Criteria for employee advancement are clearly defined and pendent upon the following criteria: 1) Vacancy 2) Appropriate Skill/Experience Set For Position& 3) Performance Merit.
HR Director	Annual	N/A	The company does have an Employee Tuition Assistance Program to potentially increase employees business competence.
CFO	Annual	N/A	Outlook is utilized to physically record and capture all necessary, recurring financial reporting requirements. FPU financial reporting schedule is built around SEC filing requirement deadlines and regular month-end closings. Audit committee intermittently reviews total process (from monthly calendarized close to filings) to ensure all reporting needs are being met
CFO	Annual	N/A	Accountability for preparation of all financial reporting output has been delegated to CFO (George Bachman) and Controller (Cheryl Martin). Output is regularly reviewed by Audit Committee, prior to formal publication.
CFO	Annual	N/A	Review protocols for all financial reports issued are regularly examined by both management and FPU's external auditor.
Accounting Manager	Annual	N/A	Variance analysis on financial reports is regularly performed by management and linked to a subsequent assessment of corrective actions / process deficiencies.
CFO	Annual	N/A	Audit committee regularly reviews quality of reported earnings. Audit committee meets quarterly and reviews all financial / company filings for accuracy and quality, prior to publication.
CFO	Annual	N/A	Relevant risks are reviewed on an on-going basis by management.
CFO	Annual	N/A	Disclosure controls process is regularly assessed as part of traditional SEC filing process. Accounting impacts from significant business changes regularly reviewed by executive management and are addressed within financials.
Accounting Manager	Annual	N/A	Needs assessment for all departments is at least annually performed and budget is appropriately allocated to address those needs.
Accounting Manager	Annual	N/A	FPU has an internal audit function, which focuses its efforts on evaluating and improving internal controls.
Accounting Manager	Annual	N/A	Occasionally controls assessment is performed by accounting when process deficiency is suspected.
CFO	Annual	N/A	Process is completed on an ad-hoc basis. If "fix" is easy, then usually done ASAP. However, if it is more complicated, cost – benefit analysis is first performed, prior to audit comment solution implementation. In general, Audit Committee directs timetable and appropriate responses to audit comments
Accounting Manager	Annual	N/A	Internal audit performs control assessments and provide recommendation.
Accounting Manager	Annual	N/A	Pertinent accounting estimates and judgments are reviewed by the Audit Committee, prior to formal publication of financial reports.
Accounting Manager	Annual	N/A	Consultation of accounting estimates and assumptions are discussed in advance with the auditor, when deemed necessary.
Accounting Manager	Annual	N/A	Comparison / benchmarking against peer companies is regularly performed (primarily through utilization of 10-K filings on accounting issues upon which management is unsure).
CFO	Annual	N/A	Quality of earnings is regularly reviewed by the Audit committee as part of its quarterly meeting and also reviewed by External Auditor.
CEO	Annual	N/A	Management appropriately balances long-term and short-term strategic objectives. Corporate strategic plan growth, customer segmentation and retention program are regularly reviewed within semi annual goals meeting. All goals are also reviewed informally on a quarterly basis by management. Board of Directors provides feedback on the development of reasonable goals/targets and sign offs on all management strategic goals
HR Director	Annual	N/A	Review of organization structure alignment with long/strategic objectives is regularly conducted within Board of Directors meetings and by executive management on an as need basis.
Accounting Manager	Annual	N/A	Monthly and quarterly internal reporting documentation is aligned with over-arching organizational structure and is intermittently reviewed by management and Audit Committee to ensure alignment.
Accounting Manager	Annual	N/A	Finance/Accounting roles at FPU subsidiary units are clearly delineated and well defined as to scope.
CFO	Annual	N/A	Operating managers at divisional locations are held accountable for meeting required financial reporting and performance requirements.
CFO	Annual	N/A	Corporate management regularly discusses financial reporting and performance requirements with applicable process owners of divisional units. Occasional direct meetings are made, as needed.
HR Director	Annual	N/A	Organization structure is regularly (though informally) considered by management on an on-going basis prior to significant policy changes, corporate events and/or major acquisitions. Board of Directors also intermittently directs management on organization structure on an as needed basis
Accounting Manager	Annual	N/A	Appropriate authority and authorization limits for transactions have been clearly communicated and are formally documented.

Responsibility	Freq	Control #	Control Description
Accounting Manager	Annual	N/A	Signatory approvals (especially for JE and vouchers) require appropriate management approval prior to execution of the related transactions.
HR Director	Annual	N/A	Appropriate competency in order to effectively carry out associated decisions/transactions is established through formal HR and Management review/processes (see previous associated comments of this subject).
HR Director	Annual	N/A	Segregation of duties is reviewed in terms of creation of job duties / descriptions during hiring process. The segregation of duties is also reviewed in the documentation of internal controls included in the Section 404 compliance documentation.
CFO	Annual	N/A	All process owners with appropriate authority and responsibility are involved within the process. Managers are delegated and accountable for their part of the process.
HR Director	Annual	N/A	Historically, FPU has had very little turnover and full-time employees generally do not work excessive overtime (if at all). Given the seasonal component of the business contract labor is generally used to meet peak labor demands. Also, given the size of the company excessive turnover issues would be readily visible.
HR Director	Annual	N/A	HR creates written position description based upon needs/core competencies to successfully carry out responsibilities of the position.
HR Director	Annual	N/A	HR creates a detailed HR policy manual, which details various guidelines, traits and behaviors to look for in potential candidates.
HR Director	Annual	N/A	The HR policy / procedures manual also includes formalized and well-defined consequences for violation of FPU policies on significant items.
HR Director	Annual	N/A	The HR policy/procedures manual is approved by senior management team.
HR Director	Annual	N/A	All employees are required to acknowledge receipt of the manual. HR Director collects the written receipts.
HR Director	Annual	N/A	When hiring a new employee, HR performs the following background checks: Criminal, Driving, Education (for degreed candidates), Credit, and Drugs.
HR Director	Annual	N/A	Formal performance evaluations are conducted at least every 12 months. Approval of performance categorization requires two levels of approval and is then communicated/reviewed with employee.
HR Director	Annual	N/A	In addition, a 360-degree evaluation is encouraged.
HR Director	Annual	N/A	Criteria for advancement are clearly defined and communicated to employees through: Position descriptions and Performance/Merit evaluation process.
HR Director	Annual	N/A	HR performs formal, independent review of all complaints and effectively acts as arbiter to both sides and assesses any allegations. Appropriate disciplinary action is reviewed by supervisor and manager of employee and HR.

MEMORANDUM

TO:	M. Becker [MB] G. Blazina [GB] W. Bonn [WB] J. Costlow [JC] D. Cox [DC] M. Cutshaw [MC] B. Kennedy [BK] D. Kitner [DK] T. Knowles [TK]	C. Martin [CM] J. Petty [JP] K. Pomeroy [KP] C. Schaak [CS] M. Schneidermann [MLS] M. Seagrave [MSS] C. Snyder [CS] C. Stein [CLS]
Cc:	J.T. English	G. Bachman
FR:	Bonnie Erdek (BE)	
SUBJECT:	*"Create a Successful Propane Business" – 26th March 2007*	
DATE:	*30th March 2007*	

Participants absent from the meeting: J Petty
G. Blazina, M. Cutshaw, D. Kitner, K. Pomeroy and C. Schaak attended telephonically.
B. Erdek kept the record.

CLS facilitated. CARE comments were shared at the outset of the meeting.
During this session short-term projects were revisited; previously assigned dates for each entry were reviewed and modified as necessary, completions were notated. Mid-term and long-term project forecasts were evaluated and updates were furnished; where applicable completion dates were modified. Time-lines and other adjustments are reflected on the table attached.

It was determined that this Committee would within six months. At the next session, please be prepared to: 1] report further progress and successes for incomplete short and mid-term projects and 2] reassess the value of long-term projects and establish time-lines and elements necessary to accomplish defined goals. [illegible]

<u>Next meeting date: September 11, 2007 at 3 PM. Location: 3rd floor conference room</u>
GB, MC, DK, KP, and CS will attend remotely. Phone access no.: 877.393.3856/access code: 1760

Short-Term: Dec '04 - June '05

Project	Team Leader
▶ Eliminate field sup [$77K] ✓ *To be completed 4/1/05*	BK
▶ Eliminate Development Mgr [$85K] ✓ *To be completed 4/1/05* [+ $15K - Central FL]	BK
▶ Reassign [2] Mktg positions [$66K] ✓ *1st postion moved to natural;* ✓ *2nd position complete 5/3/105* Effective 6/1/05	MSS
▶ Propane delivery system - Phase I • Meter reads tied to PDS ✓ *Prototype failure: 3/10/05* ✓ *Demo: 7/15/05* ✓ *Clerical roll-out 8/31/05* ✓ *Complete training by 10/8/05* ✓ *Research contractor assistance* • Monthly conf call [MLS] • Need timeframes for Phases II & III ✓ ORCOM - data for inventory - Phase II - 4/07] ✓ Include on-site bill generation - Phase III	TK/ JP *ongoing*
▶ Rate management • Margin control [$200K] ✓ *+ 4¢ effective 2/1/05* • Step rates *[in process]* ✓ Separate mtg scheduled 3-4/06	MLS *ongoing*
▶ Reduce bill to one-page ✓ *Test file 4/20/05;* ✓ *To be completed 9/30/05*	JP

Mid-Term: July '05 - Dec '05

Project	Team Leader
▶ Remote tank monitoring ✓ 100 units expected w/b tested ✓ Develop monthly cost & guarantee • *Training completed 9/15/05* • *Roll-Out - 6/1/06* • *Tie-in to AS-400 - 6/1/06*	MLS TK
▶ Increase regulatory compliance fee [$55K] • Will go up 25¢ 8/1/05 [to $2.22]	MLS *ongoing*
▶ Change organization structure ✓ Improve plant productivity ✓ Dedicated dispatch & Cust Svs ✓ TECO Partners market LP ✓ Outsourcing back office ✓ More shared responsibility ✓ Dedicated propane collections ✓ Reduce staff ✓ Propane call center ▶ Direct-Charge non-propane employees • Review all allocations ✓ *To be completed 7/1/06*	MLS Team: DK, MC, A/C'g BK & MSS *ongoing*
▶ Zone pricing based on distance [surcharge] • Up-size tanks installed outside defined service area • No meters outside defined area ✓ Operational in Central FL ✓ *To be completed 7/1/07*	DK
▶ Grow forklift cylinder exchange program ✓ *Phase I - 9/30/05-enhance NE & CF* ✓ *Phase II - Re-evaluate 7/1/07* • *other divisions - Re-evaluate 7/1/07*	MSS

Long-Term: 2006 +

Project	Team Leader
▶ Sell or trade unprofitable divisons	MLS
▶ Relocate propane operations ▶ Separate natural/LP ops w/ new bldg	BK, MLS
▶ Keep propane ops in FB office [forfeit lease]	MC
▶ Sell Rainbow Lakes property ✓ *Appraisal by 3/31/06* ▶ Sell 488 Plant	DK
▶ Seasonal drivers ✓ Commissioned bobtail drivers ✓ Driver - base amt + ¢ per gal	MLS *on hold*
▶ Implement forklift cylinder exchange in SF by 6/1/07	BK
▶ Incentive district managers	MLS
▶ Low load factor customers ✓ *To be completed 5/30/06*	MLS
▶ Explore value-added services ✓ *To be evaluated 6/1/06* ✓ *To be completed 9/1/06*	MSS, BK & JC
▶ Budget billing • [4] formats w/be presented to directors w/o 6/15/05 ✓ *To be completed 7/30/05*	JP

Short-Term: Dec '04 - June '05

Project	Team Leader
▶ Gas supply management • Financial, physical, weather hedging • Gas Logistics - buy/schedule LP [to date $35K] [$150K] • New supply contact 4/1/06	MLS
▶ Close NSB office [3/31/05] [$5K]	DK
▶ Contractors • Removals/installations NOTE: *no economic impact now*	BK *ongoing*
▶ Direct-charge repairs	MLS
▶ Re-light policy [$10K]	BK
▶ Direct-charge fleet mgr	MLS
▶ No DOT cylinder installations NOTE: *no immediate impact*	BK
▶ Depreciation	GB

Legend:
Completed

Mid-Term: July '05 - Dec '05

Project	Team Leader
▶ Review profitability of Lauderhill ✓ *Meet by 0/1/07*	MSS, Team: BK, MLS, DC
▶ Recapture capital equipment • Recover inactive tank assets ✓ *To be completed 0/1/07*	MLS *ongoing*
▶ Car allowance ✓ *Analysis proves negligible*	DC
▶ Customer-owned tanks ✓ *Analysis completed 11/30/05* ✓ *Roll-out 1/31/06*	MSS
▶ Reduce meter reading expenses • Dedicated meter reader • Outside contractor ✓ *RFP by 3/1/06*	MLS
▶ Improve new customer ROI [$33K]	MSS
▶ Third party tank refurbishment ✓ *To be completed 5/1/06*	MLS
▶ Build existing customer load	MSS *ongoing*
▶ Expanded payment options • Check-by-phone by 2/15/06 • Web-based access • Related Cust. Svs. Training ✓ *To be completed 2/15/06*	JP
▶ Review misc. serv. fee [$44K] *[moved from short-term]* ✓ *To be completed 12/31/07* ✓ *Jobbing Fees - 5/1/07*	DK

Long-Term: 2006 +

Project	Team Leader
▶ On-site bill generation [Phase II - delivery system] • Inventory mechanism Strategy budget ✓ *To be completed 5/31/06*	TK & JP

Attachments: DIRECT TESTIMONY_v2Tdc.doc

Looking good. My only suggestions so far is as follows:

Doreen- page 2, I think you mean Accounting and Finance Departments, and the Divisions of FPUC.

Robert and or Doreen- On page 30 I would also suggest ending the Question right before this one " Can you please review your recommendation for the cost rate of long term debt?" with a summary of why we think that the Commission should consider changing our Cost of Capital structure to allow for a prorated removal of nonregulated operations from our consolidated cost of capital structure. Just restate in summary fashion of what we would like them to do.

Robert, are we going to have this completely done before this Monday?

Thanks Cheryl Martin

Cheryl Martin
Controller
Florida Public Utilities Company
(561) 838-1725

DIRECT TESTIMONY

DOREEN COX
ROBERT CAMFIELD

COST OF EQUITY AND RATE OF RETURN REQUIREMENTS
of
FLORIDA PUBLIC UTILITIES COMPANY

Q. Please state your name, title, and business address.

A. Witness Cox. My name is Doreen Cox. I am a Financial Analyst with Florida Public Utilities Company. My business address is 401 South Dixie Highway, West Palm Beach, Florida, 33401.

Witness Camfield. My name is Robert Camfield. I am Vice President with Christensen Associates Energy Consulting LLC, and my business address is Suite 700, 4610 University Avenue, Madison, Wisconsin, 53705.

Q. What is the scope of your testimony?

A. The scope of our testimony is twofold. First, we address the issue of the cost of common equity to Florida Public Utilities Company. Estimates of the equity cost rate underlie our common equity rate of return recommendation. Second, we integrate the equity rate of return with the other financial components of Florida

Public Utilities Company's capital structure to determine the weighted average cost of capital and accompanying overall rate of return recommendation. Our rate of return recommendation should be used by the Commission to set retail electricity prices of Florida Public Utilities Company in the current docket.

Deleted: gas

Q. Please review your professional background and experience that qualifies you to provide such recommendations.

A. Witness Cox. I received a Bachelor of Science Degree in Management from the University of West Indies in 1979, with a concentration in Accounting. I subsequently earned a Master of Science Degree in Accounting, also from the University of West Indies. I am a member of the Jamaican Institute of Chartered Accountants.

I joined Florida Public Utilities Company in 1999, and I hold the position of Financial Analyst, which reports to the Chief Financial Officer. In this position, I support the CFO, the Accounting and Finance Divisions of Florida Public Utilities. My position covers a variety of operating and planning responsibilities including project assessment, budget and financial projections, and cash flow analysis. I assist in the preparation of quarterly reports to our Board of Directors, and the compliance monitoring with respect to the Financial Covenants of Florida Public Utilities Company's long- and short-term sources of external funds.

Deleted: Department, and the Marketing

Deleted: and support.

Formatted: No underline

Witness Camfield. Yes. I joined the Michigan Public Service Commission in 1976 as a staff economist. During my tenure with the Michigan Commission, I was involved in several retail electricity and natural gas pricing issues, and I testified in rate case proceedings regarding cost of capital and retail gas tariff design. I joined the New Hampshire Public Service Commission in 1979 as the senior economist, and held the position of chief economist beginning in 1981. As Chief Economist, I was responsible for the administration of the economics department of the Commission Staff. I oversaw the analysis of regulatory issues, the coordination and guidance of staff participation in regulatory proceedings, the preparation and development of testimony, and I provided policy advice to the Commission on a variety of issues such as construction work in progress, financial planning, and the determination of PURPA Section 133 rates. I joined Southern Company in 1983, and held positions in several departments including Pricing and Economic Analysis at Georgia Power Company, Costing Analysis of Southern Company Services, and Southern Company's Strategic Planning Group. In 1994, I joined Laurits R. Christensen Associates, Inc. ("Christensen Associates") as a senior economist, and currently hold the position of Vice President with Christensen Associates Energy Consulting LLC., a subsidiary consulting group of Christensen Associates.

My experience covers a gamut of issues facing regulated industries. I have been involved in the negotiation of power supply contracts and the terms of franchise licenses. My overseas assignments are several, and I have managed a large market restructuring project in Central Europe. I have served on national and regional advisory panels, and I have advised integrated electric utilities, independent power producers, transmission and distribution companies, utility associations, offices of consumer advocate, and regulatory agencies on numerous policy and technical issues. Innovations include two-part tariffs for transmission services, web-based self-designing retail electric products, marginal cost-based cost-of-service methods, and principles for efficient pricing of distribution services. I have published chapters in technical books, reports, and articles in noted journals such as *The Electricity Journal, IEEE Transactions on Power Systems*, and *CIGRE.* Currently, I serve as Program Director of the Edison Electric Institute's Market Design and Transmission Pricing School.

Q. Can you please review the statutory mandates that guide the determination of rate of return for public utilities?

A. Yes, the statutory principles of rate of return for public utilities substantially rest with two decisions of the Supreme Court of the United States. In the Bluefield Water Works and Improvement Co. v. Public Service Commission of West Virginia case (262 U.S. 679, 1923), the U.S. Supreme Court set forth its view on fair rate of return, as follows:

> "...A public utility is entitled to such rates as will permit it to earn a return on the value of the property which it employs for the convenience of the public equal to that generally being made at the same time and in the same general part of the country on investments in other business undertakings which are attended by corresponding risks and uncertainties; but it has no

constitutional right to profits such as are realized or anticipated in highly profitable enterprises or speculative ventures. The return should be reasonably sufficient to assure confidence in the financial soundness of the utility and should be adequate, under efficient and economical management, to maintain and support its credit and enable it to raise the money necessary for the proper discharge of its public duties. A rate of return may be reasonable at one time and become too high or too low by changes affecting opportunities for investment, the money market and business conditions generally."

A second landmark decision of U.S. Supreme Court echoed, fortified, and expanded upon the fair return standard established by the "Bluefield" decision cited above for capital committed to public utilities. This second decision is the Federal Power Commission v. Hope Natural Gas Company case (320 U.S. 391, 1944). A most relevant passage of this latter decision is as follows:

"From the investor or company point of view it is important that there be enough revenue not only for operating expenses but also for the capital costs of the business. These include service on the debt and dividends on the stock... By that standard the return to the equity owner should be commensurate with return on investments in other enterprises having corresponding risks. That return, moreover, should be sufficient to assure confidence in the financial integrity of the enterprise, so as to maintain its credit and attract capital."

These longstanding decisions provide the recognized framework for the fair rate of return on capital committed by investors to public service. In these decisions, the U.S. Supreme Court codified, in clear and readily understandable terms, a statutory benchmark that serves as the basis to set fair and equitable prices for retail public services such as natural gas, while also providing a fair rate of return on the capital provided by investors. Though they reach back many years, these decisions remain to this day the cornerstone for the determination of rate of return requirements. The challenge for regulators, regulated utilities, and interested parties to regulatory proceedings is to operationalize these principles in contemporary regulatory processes.

Q. Please provide an overview of your approach to the determination of the rate of return requirements for Florida Public Utilities Company.

A. Our approach follows the prescribed methodology of the Florida Public Service Commission to determine the overall weighted average cost of capital ("WACC") and the overall rate of return, for regulatory purposes. Specifically, we develop a forward-looking consolidated capital structure for the year 2008 with the exclusion of capital structure balances associated with the Company's propane subsidiary, Flo-Gas. For determining retail prices in the instant docket, the recommended capital structure is determined on the basis of the 13-month average balances of the components that comprise the capital structure of the Company. We develop a traditional capital structure including the key elements of long-term debt, short-term

Deleted: s

Deleted: FloGas

debt, preferred stock, and common shareholder equity. Similarly, we develop a regulatory capital structure that contains, in addition to these components, balances for customer deposits, accumulated deferred taxes and accumulated investment tax credits of the Company dedicated to providing retail electricity services. Traditional elements of the capital structure are scaled pro rata, such that the regulatory capital structure, in total, matches the rate base attributable to the provision for electricity services.

It is good regulatory policy to accurately capture the means by which Florida Public Utilities Company underwrites its assets and rate within the regulatory capital structure, providing that such structure contains an appropriate balance of equity and debt, given the regulatory and operational business risks facing the Company. Contemporary business, regulatory, and financial risks confronting energy utilities are higher than in past years. Consequently, and consistent with the business objectives of providing low-cost and reliability service, Florida Public Utilities will fund its assets with larger equity participation in total capital than in years past and, to this end, the year-end 2008 capital structure is a better representation of the expected capital structure of the Company. This is because the year-end balances capture the prospective weight, on average, that common equity will assume within the Company's capital structure. Furthermore, the year-end balances of the components of capital provide a better balance of debt and equity for the purpose of minimizing the weighted average cost of capital. Accordingly, the adoption of the projected year-end capital structure to determine retail prices, which would constitute a departure of the Florida PSC from its general policy of using the 13-

month average capital structure, would be in the long-term interests of retail consumers and the Company as well. Accordingly, we offer the year-end capital structure as an alternative to the 13-month average approach.

The cost rates applied to the 13-month 2008 balances of long-term debt and preferred stock include the interest rate on the face amount and issuance costs unique to each individual issue, and related debt expenses where appropriate. The cost rate applied to customer deposits balances is based upon market segment-specific interest rates, as determined by the Commission. The balances for accumulated deferred taxes and investment tax credits are included in the regulatory capital structure at cost rates of zero and the overall cost of capital stated on a traditional basis, respectively.

Deleted: What about the Non-Zero Cost Tax Credits???

The rate of return for common equity is determined by applying four capital cost assessment methodologies including Discounted Cash Flow, Capital Asset Pricing Model, and an assessment of Realized Historical Returns. The latter approach constitutes a benchmark by which investors gauge the prospects attending financial assets and, along with other information, form expectations of future returns. By assumption and empirical assessment, efficient markets value (price) financial assets accordingly. These three methods are well founded by modern finance theory and are often used to determine the cost rate for common equity capital. A fourth methodology, referred to as *ex post* Risk Premium, infers the underlying opportunity cost of capital on a basis of the relative risks of debt and equity capital.

Deleted: form
Deleted: such as
Deleted: d

Q. Can you please summarize your findings and recommendations?

Deleted: 66

A. Yes. Our studies give rise to an overall rate of return recommendation of 8.07%. The determination of the 8.07% rate of return is shown on Exhibit 1, which reveals the balance amounts for each financial component of the capital structure, the share that each component represents, the attending cost rate, and the overall rate of return. As mentioned above, the overall rate of return recommendation is based upon a 13-month 2008 regulatory capital structure that, consistent with utility regulatory policy in the State of Florida incorporates customer deposits, accumulated deferred income taxes, and investment tax credit balances.

The recommended 8.07% overall return level incorporates a common equity return of 11.50%. As mentioned, the opportunity cost of shareholders of Florida Public Utilities Company is assessed with four analysis methods. The results of studies employing these valuation methods are shown on Exhibit 2, along with the equity return recommendation.

Deleted: sis

Deleted: tical

This recommendation, if adopted by the Florida Public Service Commission, will enable Florida Public Utilities Company to continue to provide highly reliable electricity service to its customers at favorable prices. At the same time, the recommendation provides an adequate level of compensation to the shareholders of Florida Public Utilities Company on the capital that they have committed to the Company. Satisfactory returns to equity also enable the Company to continue to attract long- and short-term debt at favorable terms and interest rates that, in both the near-term future and the long-run, are in the best interest of retail electricity consumers.

Fair and adequate allowed returns to capital are vital, and we cannot over-emphasize to the Commission the importance of setting the overall rate of return at a sufficient level, particularly in the current environment of considerable levels of risk and uncertainty. The determination of an adequate return level by the Florida Public Service Commission signals to the investment community including mutual funds, long-term private investors, speculators, mortgage bankers, and commercial banks that the business and regulatory environment in which Florida Public Utilities Company operates has continuity and stability over the long term. Importantly, it also signals that the Commission is supportive of the Company and the job that we do on an on-going basis for retail consumers.

Q. Electricity is intermingled with and highly dependent upon energy markets, particularly markets for primary fuels. Can you please provide a profile of contemporary electricity markets and the implications for electricity distributors and the cost of equity capital?

Deleted: ha

A. Infrastructure industries, including the electricity services industry in particular, is undergoing significant restructuring with no immediate end in sight. The dimensions of restructuring assume a number of dimensions including service unbundling in both retail and wholesale markets including competitive entry, new mechanisms to determine the prices for services. At the wholesale level, utilities face and are part of the expansion of wholesale services and contract mechanisms to hedge varying degrees of risks; divestiture of generation; and the appearance of wide scale participation in wholesale electricity commodity markets by power traders and speculators, who are deeply involved in commodity markets generally. Wholesale markets are being organized through the auspices of regional transmission organizations referred to as RTOs. RTOs serve as the agent for markets as a whole, where regional markets are unbundled according to time (hourly markets), space (locational pricing of energy), and services including energy, reserves (including regulation, spin, non-spin, and supplemental categories), as well as financial transmission rights (FTRs) of various types. While wide scale change has been in the works for years and is arguably most pronounced at the wholesale level, as precipitated in a major way by the Energy Act of 1992, significant change has been and is currently underway within retail markets as well. At the retail level, regulated utilities face a gamut of changes regarding new regulatory governance arrangements including pre-approval, decoupling, and various performance assessment mechanisms; auctions for provider of last resort ("POLR") services; renewable resource portfolio standards, and new rules and requirements regarding reliability requirements, aside from the new reliability (and implied cost) commitments imposed on service providers by the North American Electric Reliability Council ("NERC"), which has been recently appointed by the

Deleted: including traders

Deleted: that

Federal Energy Regulatory Commission ("FERC") as the national reliability organization ("ERO").

Driven to improve earnings performance and exploit growth opportunities, many integrated electric utilities have since the late-1980s pursued non-regulated business ventures including activities fairly far afield from electricity services such as real estate and insurance, and diversified energy services including distribution operations, nuclear generation, and renewable resources, and power trading. In a number of cases, generation (and to a lesser extent transmission) assets have been sold off to independent generation companies or unregulated generation entities have been formed from the generation business units of the integrated utilities. At this point a much larger range of business activities and business organizations and entity structure is present within the electricity services sector of the economy, obtained through competitive entry and consolidation of functionality across entities. The financial performance of entities within the electricity services industry, included the expected returns to capital and the risks attending those returns, and is much more closely linked to energy markets, generally.

The net result is generally positive, as competitive entry arguably obtains reduced costs to the benefit of consumers, at least in the long run. Nonetheless, these changes in structure, much of which have been accompanied by and ushered in through regulatory changes, have also raised capital risks associated with electricity

Deleted: all

Deleted: s

services, as perceived by investors. This backdrop of higher capital risks occur at a time when electricity service providers including Florida Public Utilities Company face steadily expanding electricity service demands and an array of new requirements covering, among other things, capital renewal at a time of fast rising costs for electrical equipment.

(further discussion forthcoming)

Q. Your testimony mentions capital risks and capital renewal. Perhaps you can elaborate on the meaning of capital, and how it comes about.

A. Capital refers to economic resources. Capital is accumulated savings over time, where savings refers to the proportion of the output of an economy that is not consumed as current goods and services. Essentially, savings is the share of output held back and invested in—i.e., put into—capital resources. In the broadest interpretation, capital is output-producing goods (and services). The cumulative level of investment over time, covering many years and centuries, constitutes the capital stock of an economy and a society. It is useful to mention that capital can assume various investment forms aside from financial assets in private and public companies and other entities. The stock of capital includes real estate, household goods, education, public property and infrastructure such as libraries, museums, parks, roads, and transit systems. Individuals, firms, and government entities invest funds in capital resources if the expected flows of benefits realized by the investments in the future are equal to or greater than the value of current consumption given up or foregone.

Q. Please review the notions of cost of capital, opportunity cost of capital, and discuss how risk affects the opportunity cost of capital.

A. The cost of capital is the compensation required by investors for postponing consumption, for expected inflation, and for exposure to capital risks of various dimensions. *Cost of capital* refers to the underlying interest rate used to discount expected benefit flows of capital resources including returns to financial assets, and is sometimes referred to as the rate of discount, or simply the discount rate.

Financial assets include a multitude of debt vehicles, equity, and derivatives, and are tailored to participants of capital markets including household, small business, corporate, and government segments. Participants across these segments can supply capital—i.e., investors including lenders and holders of common and preferred stock—and also demand capital (borrowers and common stock issuing companies). Commercial banks, credit unions, finance companies, capital exchanges, and investment banks serve as intermediaries that provide the institutional means that facilitates the interaction and linkage of the supply and demand sides of financial markets. These functions essentially include lending, borrowing, and the issuance of equity vehicles. Banks and credit unions borrow (and store) financial assets that in turn are invested in the form of debt and to a lesser extent equity.

Formatted: Space After: 0 pt

Deleted: ¶

Formatted: Indent: Left: 0", Space After: 0 pt

Deleted: t

Household debt vehicles include, for example, personal loans covering appliances, household services, and credit card mechanisms through finance companies and banks, and real estate and so-called home equity loans. Business loads include short-term loans and lines of credit with banks, inventory financing through business wholesalers, and commercial paper of various terms. Corporate debt can be in the form of lines of credit with banks, and mortgage and debenture bonds, while government debt can be in the form of revenue bonds of cities, and short- and long-term debt of various terms.

Deleted: mortgages

Equity refers to common and preferred stock, where the investor assumes a share in the ownership of a corporate entity. In some cases, debt instruments can participate in equity returns and have rights of conversion to common stock. Derivatives refers to options and forward contracts that are specifically designed for speculation and risk hedging, where the market worth of the derivative is determined by investor expectations in the underlying price of a financial asset or commodity.

The underlying cost of capital is relevant to investors and, in the large, individuals and entities (including government entities) that provide savings and thus the accumulation of capital within the macro economy. In the case of financial assets, expected benefits are in the form of future cash flows including interest payments, dividend payments, market appreciation, and return of principal. When investors supply funds to entities such as utilities and government entities and municipalities, not only are they postponing consumption—giving up the value of alternative

Formatted: Indent: Left: 0.38", Space After: 0 pt

Deleted: , in the case of

Deleted: the

Deleted: le

expenditures in some other way, they are also exposing funds to the devaluation of ongoing inflation and various uncertainties and risk attending future cash flows. Investors are willing to incur these risk factors only if they are adequately compensated. While the market prices of other inputs including labor, materials, energy can be easily verifiable, the cost of capital—essentially, the price of capital—is not easily discerned and, all too often, requires estimation through the cautious application of analytical methods.

Deleted: ¶

The cost of capital, however, remains positive (>0) absent inflation and risks, as savers require compensation for foregoing the right to use the funds saved for consumption of goods and services—essentially, the time value of money.

The cost of capital is determined by the demand for capital, supply of savings, expectations of inflation, and perceptions of risks harbored by participants in capital markets. The demand for and supply of capital are determined by expectations of future levels of economic activity, while expected inflation is driven largely by monetary policy over the relevant timeframe. Perceptions of risk, in turn, cover many dimensions including uncertain government policy and the effects of natural phenomena such as weather. The cost of capital—the discount rate stated in nominal terms—increases with rising demand for capital, with expectations of higher rates of inflation, and with heightened perceptions of risk.

Deleted: The cost of capital, however, remains positive (>0) absent inflation and risks, as savers require compensation for foregoing the right to use the funds saved for consumption of goods and services—essentially, the time value of money. ¶

Dimensions of risk also cover idiosyncratic risks associated with specific capital resources, such as that of individual entities or companies. Accordingly, financial markets will re-price downward the bonds of a private company, should the *current* financial condition of the company suddenly decline. Essentially, the decrease in the company's current condition, reflected as reduced interest coverage—causes the expectation of the future condition of the company to also decline. Expectations of future financial conditions (possible states) of the specific company are idiosyncratic risks. Because cost of capital rises with increased risks, the price of the bonds decline. Bond prices and discount rates, in the form of the net interest rates or bond yields (and yield to maturity), move in opposite directions; bond yields increase as bond prices decline, and decrease as bond prices rise.

Resources migrate to the highest valued use and worth, given perceived risks, such that the returns to capital are equivalent to opportunity costs. The various forms of capital compete among themselves for savings and with other non-capital resource inputs and opportunities. Similarly, the vehicles of investment of individual entities, such as the specific bonds of a municipality or the common stock of a company, must compete for savings through a process of capital attraction. That is, if the outlook for earnings of a company rises, participants in capital markets—investors—allocate more capital to the company by bidding up the price of the stock thus increasing the company's market capitalization. Conversely, perceptions of heightened risks associated with the debt of a company or municipality precipitates a decline in the market value of the outstanding bonds, as capital migrates from the company/municipality to other resource opportunities. Thus, the prices of financial assets of entities including debt and equity securities are highly sensitive to perceptions of risk. Capital markets trade off risks and expected returns, given the overall menu of available choices, as alternative opportunities. At an undefined point in time such that levels of supply and demand for capital and expectations of inflation are roughly equivalent (as a matter of consensus), the cost of capital is a matter of risk. Essentially, then, the cost of a specific source of capital is basically determined by the underlying riskiness of that investment in view of alternative opportunities that, together, represent the investors' current opportunity set. Hence, cost of capital associated with specific investment opportunities, are only differentiated by risks, as the other factors that impact cost of capital—i.e., supply-demand, inflation expectations—are common to all investments, and capital more generally. Competitive capital markets, through the process of assessing, buying, and selling, ensure that the expected payoff in the form of market rate of return is approximately equal to that of other investments of equivalent risk. In short, debt and equity investment vehicles of comparable risk are priced the same. If not, investors as participants in capital markets will bid up securities with comparatively low risks and bid down others with comparatively high risks. If investor perceptions of capital risks attending a utility increase—or the expectations for returns decline—markets bid down the securities of the utility. This implies that a utility will be unable to attract capital on equivalent terms, a result that is manifested in either of two ways: the quantity of capital acquired, in the form of new securities offerings, is reduced for a given level of return (stated in

Deleted: g

dollars), or a higher prospective rate of return attends the new offerings—it costs more to obtain an equivalent quantity of capital.

As mentioned above, investor rate of return is the discount rate that causes the present value of the expected cash flows, as receipts realized by investors, to equal the market value of the financial asset. From the utility side, the cost of funds raised to the utility through the sale of securities is equal to the discounted present value of the cash outflows to be paid by the utility, as expected by investors. But since the (positive) cash flows stream to the investor is identical to the cash outflows of the utility, the two discount rates must be identical, abstracting from the effects of flotation costs, which causes the costs to the issuer to exceed the return required by investors to the extent that flotation costs decrease the net amount of funds actually available to the issue. In other words, the cost of capital to the utility is synonymous with the investors' expected rate of return. Hence, the cost of capital is the discounted expected cash flows necessary for the security to "pay the price"—i.e., in order to satisfy investors' required rate of return.

When capital markets are sufficiently competitive, they ensure that the market value and worth of financial vehicles of the outstanding debt and equity—as held by the investment community, which can include households, financial institutions, government entities, and non-financial companies, is set (i.e., priced) at a level such that the returns to capital approximate the cost of capital. Because investors are averse to risks, competitive financial markets price financial assets inversely according to perceptions of risks, all other factors held constant.

Q. Why is this conceptual construct relevant and how does it relate to Florida Public Utilities and its capital needs?

Formatted: Indent: Left: 0", Hanging: 0.38", Space After: 0 pt

Formatted: Space After: 0 pt

A. As discussed, capital resources are the result of cumulative investment, and are obtained or funded directly or indirectly from savings of households and firms over time. Savings is the share of income of the economy as a whole that is not expended as consumption within a current period, and is typically measured as dollars or percentage shares in either quarterly or annual periods. This means that the capital resources employed by Florida Public Utilities Company including power delivery systems such as transformers and lines, meters, trucks and vehicles, computer systems, software, office facilities and buildings, inventory and stores, and land are costly, where cost is reflected as the annual carrying charges on capital, measured in the form of the net utility rate base.

Whereas the cost of skilled labor, materials and supplies, purchases of generation and transmission services, or other inputs used into the production process of utilities are expressed in money terms – *e.g.*, purchased power stated as dollars per megawatt hour – the cost of capital is expressed as an interest rate, typically shown as an annual percentage of the principal amount committed by investors. The cost of capital – or perhaps more accurately, the *cost rate of capital* – to the firm can be referred to as the *required rate of return* (%) on the capital resources committed by investors. In the case of public utilities, invested capital is referred to as the rate base, valued at either original cost or fair market value. For the determination of setting retail prices in the U.S., the regulatory convention is to value the capital of public utilities at original cost.

To facilitate the commitment of capital (investment) by savers and their agents to the firm, the firm offers property rights, including bonds or promissory notes to debt holders and shares of stock to equity investors. These property rights define the commercial terms and conditions under which savers and their agents, as investors, commit capital. Property rights are capital (financial) assets, and are generally tradable. Financial assets are claims on the income of the firm as compensation for the commitment of capital, and are the financial obligations of the firm. Shares of stock constitute ownership in the firm.

In the case of long-term debt – *i.e.,* mortgage bonds, debentures, and long-term notes – the interest on the principal (face) amount of a bond (debt) or the coupon rate on the share of preferred stock defines the level of compensation. Often, the interest rate is a predefined annual rate that remains fixed over the term of the debt. However, long-term debt instruments can have a number of other provisions that, in essence, provide for more complete contracting by managing risks through risk sharing between the debt holders and the borrower (the firm). These provisions can include 1) adjustments to the rate of interest to reflect contemporary market conditions *and* rates of inflation, 2) participation in earnings of the firm, 3) conversion rights, and 4) voting rights in the management of the firm.

In the case of short-term promissory notes, agreements with commercial banks define the mechanism by which interest, stated in dollars, is determined. Often, the commercial terms of promissory notes define interest to be paid monthly on the outstanding daily balance (principal) outstanding. The rate of interest applied to the outstanding balance is typically tied (indexed) to the interest rate on obligations of some widely known financial market – say, the London Inter Bank Offer Rate (LIBOR) or Fed Funds – which also varies daily or monthly.

Common stock property rights are somewhat different from other financial obligations because, as owners of the firm, the returns to shareholders are residual amounts following the compensation of other resources employed by the firm including debt obligations. Common equity is essentially compensated last, and bears the burden of much of the business, regulatory, and financial risks of the firm. For this reason, common equity is, in virtually all cases, more costly than other forms of financial instruments.

As with other markets, capital markets have primary and secondary dimensions. Primary markets are the institutions and processes that facilitate the initial sale of the financial obligations of the firm to initial investors, whereas secondary markets are structured market processes that provide the means by which investors can purchase and sell existing rights, including shares of stock and debt obligations. Financial instruments can assume many forms, and debt securities (bonds) and equity shares are actively traded in financial markets, which are generally considered to be highly liquid and competitive. However, to the degree that the financial obligations 1) carry specialized and non-common commercial terms, and 2) for firms that are of small scale, the secondary – and to a lesser extent, primary market – is less liquid. In short, the pool of buyers and sellers is limited; thus, the volume of transactions is comparatively small and sometimes intermittent. Relatively low levels of liquidity imply higher transaction costs and risks to investors, which translates directly into higher costs of capital to the firm.

Competition is a term that describes some markets, and markets are said to be competitive if certain conditions exist. Markets can be characterized as competitive if they involve: 1) a very large number of buyers and sellers, 2) information relevant to the determination of prices is readily available, complete and not costly, and 3) transactions costs are low. Because of the workably competitive nature of financial markets, arbitrage opportunities are more or less exhausted. This means that, for both primary and secondary markets, financial property rights trade at levels (prices) such that perceived risks and opportunity for prospective returns to capital are appropriately balanced and approximate that of other investment opportunities. Thus, above-normal returns, which implicitly include compensation for risks, cannot be seemingly realized by investors over prospective periods in systematic fashion.

Formatted: Indent: Left: 0.38", Space After: 0 pt

Deleted: and

Deleted: systematically

Deleted: .

Competition inherent to U.S. and worldwide financial markets ensures that the prices of common shares (share prices) and bonds are at a level that reflects the opportunity cost of capital. As an example, assume that the perceived risks attending the returns to common shareholders of firm A are equivalent to that of firm B and other firms. If the share prices of firm A suggest a market return 10%, while the prices of firm B and other firms of comparable risks suggest (allow) market returns of 13%, the market price of firm A will fall to a level that provides a basis for market returns of just 13%, prospectively. A price that allowed for a 10% prospective market return is insufficient in the presence of opportunities for market return of 13% on alternate investments of comparable risk. Essentially, the 13% market rate of return on investment alternatives constitutes the opportunity cost of capital. Most remarkable is the expedience – literally, in minutes – with which share prices adjust to levels that appropriately balance prospective returns to equilibrium levels *based upon perceptions of risks*. In short, equivalent and comparable risks translate directly into comparable rates of return, which is the cost of capital of common shareholders in – and thus of – the firm.

As mentioned early on, the cost of capital is a function of the demand for and supply of capital, investor expectations of inflation, and investor perceptions of risks. Because the conditions of demand and supply as well as expectations of inflation are more-or-less common to financial markets at any point in time, financial vehicles are differentiated by risks. Hence, the expected returns and prices of bonds and common shares (normalized for denomination and size) at any point in time are largely if not exclusively differentiated by perceptions of risk.

Formatted: Space After: 0 pt

Q. Would you please review the capital structure, interest coverage requirements, and the implications for sufficient coverage?

A. Interest coverage refers to the times that debt interest is covered by income, and is the most important measure of investment risk of corporate debt. Interest coverage is a major concern of Florida Public Utilities Company as it is the basis upon which the Company maintains its favorable credit standing with markets and continues to obtain long- and short-term debt at favorable rates of interest. Pre- and After-Tax Interest coverage under the recommended capital structure and rate return is **XXX** and **XXX** times, respectively.

For purposes of comparison, we also show interest coverage over the historical timeframe on Exhibit 13. As can be seen the coverage implied by the recommended rate of return is adequate though not at a robust level. Two conclusions are reached:

1) While the implied coverage level is acceptable, the Company must sustain a flow of earnings at consistent levels in order to maintain adequate coverage and also satisfy debt covenants.

2) Contingency events and business conditions that give rise to sudden and unexpected changes in revenue or cost flows can imply immediate shortfall in coverage. In short, the coverage level obtained from earnings

at the recommended rate of return is only adequate in today's environment of higher capital risks.

The importance of coverage cannot be overstated. Indeed, in discussions with investment banks, commercial banks, and stock analysts regarding the financial conditions and soundness of the Company, a salient point of concern continues to be coverage of debt. Lending entities, private investors, and investment banks continue to emphasize the importance of consistently-realized adequate interest coverage as the essential measure of the Company's capability to service long- and short-term corporate debt.

Deleted: about

As can be seen, the recommended rate of return requirement, 8.07%, provides satisfactory interest coverage. And although the overall return recommendation provides adequate coverage, it is certainly not abundant. Hence, it is absolutely necessary that Florida Public Utilities Company realize adequate and sustained flows of income to ensure that the Company satisfies credit risk requirements. Coverage is our window of access to capital at favorable rates of interest and under reasonable terms, enables the Company to provide electricity services. Setting the overall rate of return at a satisfactory level of 8.07% is necessary and in the best interest of retail electricity consumers.

Q. What is the appropriate capital structure for determining retail prices in this docket?

A. In the absence of large-scale subsidiary operations, the Florida Commission should generally utilize a consolidated capital structure where such approach provides a

Formatted: Space After: 0 pt

reasonable balance between debt and equity. Under such conditions, the Commission is assured that the service provider is, in the best interest of retail consumers, underwriting its assets dedicated to providing utility services at least cost.

Deleted: can be well

This can be viewed as a principle that defines criteria useful to the Commission in regulatory decisions regarding the issue of the appropriate capital structure for the determination of retail prices. Specifically, and as a general rule, the Commission should only deviate from a consolidated capital structure when this condition – i.e., an appropriate balance between debt and equity – is not satisfied. The corollary to this principle is that the Commission and its staff should never remove or add accounting-based line items from a consolidated capital structure that is appropriately balanced. Two facts of financial accounting underlie this corollary, as follows:

Deleted: statement

Deleted: is essentially

Deleted: – a principle of financial prudence –

Deleted: sets forth

Deleted: a

Deleted: for

Deleted: to apply in its

Deleted: on the

Deleted: ratemaking purposes

Deleted: That is,

Deleted: ¶

1) A firm cannot ever trace and identify, as a matter of dollar flows, specific sources of funds to specific uses of funds. The Treasury of a firm essentially constitutes a pool or inventory of current funds, cash, that continually experiences fund inflows and outflows. One cannot say that a specific source of funds is earmarked for a specific use. As an example, one cannot say that cash flow returns and operating income that arise from the Company's electricity operations are used solely to underwrite resources for the electricity business. Electricity-sourced cash flows are, in fact, used across the combined

Deleted: , dollars,

operations of the natural gas, electricity, and propane businesses of the Company – and similarly for the natural gas and propane operations.

2) The Company's balances of long-term debt, short-term debt, preferred stock, and common equity stated on a consolidated basis represent the accrual over years of the net flows of funds of the Company including external and internal sources. The balances for these financing vehicles can and should be used as the basis by which the Company underwrites any and all of its assets, stated on either a consolidated or an individual basis. This is simply a business, accounting, and financial fact.

There is no reasonable basis, thus, to exclude Flo-Gas balances from the Company's capital structure for purposes of setting retail electricity prices in the current docket. Indeed, exclusion of Flo-Gas balances may harm retail electricity consumers in various ways, aside from the inherent contradiction to the realities and facts of financial accounting identified above.

Second, exclusion of Flo-Gas balances from the capital structures used to set prices for the regulated operations, including electricity and natural gas, implicitly assigns common equity, which is comparatively high cost, to the Company's unregulated propane operations, placing the propane operations at a competitive disadvantage with other propane companies. One can expect that other companies will leverage assets in a manner similar to that of the Company, in order to finance propane and competitive, non-regulated energy services. As a consequence, the Company needs to follow a similar policy. If the Company is required to assign only equity to non-

regulated operations, it is implicitly forced to charge correspondingly higher prices in order to generate adequate returns.

Third, the consolidated capital structure of Florida Public Utilities Company stated on 13-month average basis for 2008 represents a sound balance of debt and equity financing that fully satisfies the financial needs of the Company, particularly in view of the comparatively small size of Florida Public Utilities. This is evidenced by the comparative sample of electric utilities used to determine the cost of capital. Specifically, equity participation within the Company's 2008 capital structure resides within one standard deviation of the average participation of the sample. Hence, the Company's financing policy and strategy conforms to a reasonableness standard, in addition to fully satisfying the financial prudence and flow of funds criteria outlined above.

Nonetheless, the recommended weighted average cost of capital presented within our testimony follows the Commission's prescription. Namely, the Flo-Gas balances are excluded from common shareholder equity for purposes of determining the overall rate of return to set retail electricity prices within the immediate docket.

Q. Can you please review your recommendation for the cost rate of long-term debt?

A. Yes. Florida Public Utilities Company has raised long-term debt from time to time based upon the need for capital and our Company's financial policy of maintaining a balanced capital structure. Because of our conservative management philosophy, we have consistently raised new debt issues at favorable rates of interest at the time of issue. Contributing to favorable interest rates are the conservative sinking fund provisions of the earlier higher cost debt issues of the late-1980s – early-1990s. The cost rate of 7.96% for long-term debt, shown in the column entitled "Annual Cost Based Rate" of Exhibit 3, reflects the weighted average cost of the five issues of long-term mortgage bonds of the Company, currently. These debt issues have face interest rates of 4.90% to 10.03%, and were issued by the Company over the period 1988 – 2001. The balances shown reflect the amounts that the Company expects to carry on its balance sheet on average over the year 2008 and beyond. The Company does not plan to issue long-term debt during the interim two years. The 7.96% overall cost of long-term debt reflects issuance costs and losses on reacquired debt, which causes the effective cost rate to be somewhat greater than that of the weighted cost of the face interest rates alone. The 7.96% overall cost rate for long term debt is calculated using the amortization schedule for debt expenses. This costing procedure follows the conventional accounting approach to determining the cost rate for long-term debt, and is consistent with the policy endorsed by the Florida Public Service Commission.

Q. Please review the cost rate of short-term debt and related issues?

A. Florida Public Utilities Company maintains, and expects to maintain over the foreseeable future, a short-term debt facility that makes available short-term debt at a cost rate determined by London Inter Bank Offer Rate (LIBOR). The short-term debt cost rate is equal to the 30-day LIBOR plus 90 basis points, plus other charges related to unused facility balances as well as fees charged for the facility itself. The Company currently has a $12 million line of credit with Bank of America, which upon 30 days notice can be increased to a maximum of $20 million. Based on current cash flow projections we anticipate increasing the line to $15 million by November 2007. We anticipate lowering the line of credit to $12 million after the issuance of additional shares of common equity, which is scheduled for the middle of 2008.

Deleted: issuance of additional shares of common equity, which is scheduled for the middle of 2008. In view of the 2008 equity issuance, the Company expects to reduce its debt facility to $12 million beginning in July 2008.

The interest rate margin above LIBOR (90 basis points) for the Company's current short-term debt facility is somewhat above that of the Company's previous short-term debt facility, which reached the end of its contract in March 2003. The higher margin requirements, as imposed by financial lending institutions internationally, reflect higher perceived risks, both generally and within energy markets, than in previous years.

Deleted: level of margin

The expected effective short-term debt cost rate incurred by the Company for short-term debt, for use to determine prices in the current docket, is determined by first projecting the Federal Funds rates in the U.S. for the timeframe over which the retail electricity prices will apply. Then, given the historical relationship between

Deleted:

LIBOR and the rate for U.S. Fed Funds, the LIBOR rate is estimated. Once determined, the short-term debt cost to Florida Public Utilities is obtained by recognition of the 90 basis points margin above LIBOR plus other charges covering the unused balances and the fee for the availability of the credit facility.

Deleted: simply adding

Deleted: to LIBO

Deleted: , as estimated.

Deleted: the

Deleted: .

The key short-term interest rate is the Fed Funds rate. Historically, Fed Funds have traded 18 Basis Points below LIBOR over the 1990 – 2006 timeframe. The interest rate on Fed Funds is determined by the monetary policy of the Board of Governors of the Federal Reserve Bank, and closely follows that of short-term U.S. Treasury Bills. Historically, Federal Funds "trade" at interest rates slightly above that of 90-day T-Bills. At this point, we anticipate with the apparent consensus view that monetary policy and thus the short term interest rates will hold firm at current levels over the foreseeable future, which implies a fed funds rate of 5.25%, which implies a LIBOR interest rate of 5.43%. In turn, this result translates into a cost rate of 6.33% for the outstanding balances on short-term debt balances, once the margin above LIBOR is recognized. The fees associated with the unused credit line and direct charges when coupled to charges for the outstanding balances obtains an overall effective short-term debt interest rate of 6.81%, which is applied to the 13-month average balances of short-term debt.

It is useful to briefly describe the longer history, as it relates to the determination of short-term interest rates. Specifically, the Federal Reserve followed a policy interest rate targeting for a number of years prior to late-1979, when money supply targeting was abruptly adopted. The result was high and volatile short-term interest rates though money supply targeting arguably reduced substantially the high levels of inflation and inflation expectations of the early 1980s. From the mid-1980s forward, monetary policy has been more accommodative of economic conditions and needs, with the long-term objective of containing overall inflation at moderate levels. As observed during the 1990s, the Federal Reserve has employed an array of indicators and metrics to determine monetary policy including reserve targeting. As a general rule, reserve targeting gives rise to greater variation in short-term interest rates, while interest rate targeting, which suggests greater variation in the supply of reserves, suggests less variation but, depending upon the stage of the economy, substantially higher or lower interest rates. At this writing, short-term interest rates, with fed funds residing at 5.25%, are expected to hold over the foreseeable future barring changes in the expected level of economic activity or current escalation of core inflation.

The use of the current 5.25% fed funds interest rate as the basis for the Company's effective short-term debt cost rate is in keeping with the Commission's decisions regarding the Company's rate change filings of 2003 and 2004. Also and as mentioned above, this interest rate level appears at this time to be likely to hold over the foreseeable future.

Deleted: than currently observed.

Finally, we wish to discuss the methodology used to determine the effective interest rate for 2006. The interest rate charges on the Company's short-term debt facility is based on daily balances. If the daily balances closely approximate month-end balances, month-end balances provide a useful basis to determine the average short-term debt cost rate. Where the daily balances deviate significantly from the month end balances, however, this approach will not provide an accurate reflection of the Company's true cost of short-term debt. This was the case for the Company during 2006. Accordingly, the short-term debt cost rate for the historical year 2006 has been developed using the average daily balances which accurately reflects the true cost rate incurred by the Company on short-term debt during that year.

Q. Please review the cost rate of preferred stock?

A. Florida Public Utilities preferred stock consists of a single issue of 6000 shares that dates to December 28, 1945 at a coupon rate of 4.75%, as shown on Exhibit 5.

Q. You briefly discussed methods for the determination of the cost of equity capital in the summary of your approach to rate of return. Can you elaborate on the methods?

Formatted: Space After: 0 pt

A. Yes. We begin by reiterating three essential points. First, the cost of equity of the firm – and of investors in the firm – is a function of perceptions of risk, the demand for and supply of capital, and expectations of inflation. Second, the cost of common equity of the firm is equal to the opportunity cost of capital incurred by common shareholders of the firm contemporaneously, though the experience of long-term history guides the assessment of opportunity costs. Third, the cost of equity of the firm is equal to the expected market rate of return on alternative investments of comparable risks available to shareholders – *i.e.*, the opportunity cost of capital.

The determination of the opportunity cost rate for equity capital is challenging for two reasons. In the case of debt, both the market price and future expected cash flow returns to capital are observable by inspection. Thus, the net expected yield to maturity, which reflects the opportunity cost of capital to holders of debt, can be determined directly. This *is* the market rate of return, *ex ante*. For purposes of determining the overall utility rate of return, however, the cost rate of long-term debt is that which is set at the time of issuance in primary financial markets.

In contrast, expectations of investors about the prospective cash flows and market returns on common equity cannot be observed directly, and must be inferred with estimation procedures. Also, allowed equity rate of return is typically set according to the current and expected cost of capital, though much of the equity investment was committed in many years past.

In the determination of cost rate for debt obligations, investors' perceptions of risks are implicit in the primary and secondary market prices of the debt obligations themselves, and need not be known or even estimated. In contrast, the determination of the cost of common equity involves the perceptions of future risks harbored by investors, as a matter of the consensus view. Perceptions of risk are also not observable directly, and thus must be inferred.

In short, the cost of common equity can only be discerned through the proper and careful application of well established methods that provide the cornerstone for modern finance theory. While the methods employed herein are well-established, the procedures to determine the cost of equity capital require estimation of key parameters.

As mentioned, the recommendation for the rate of return on equity for Florida Public Utilities Company is developed by applying four estimation methods. These procedures include variations of the constant growth Discounted Cash Flow model (DCF), and the Capital Asset Pricing Model (CAPM). These classical approaches are commonly recognized within modern finance theory and are readily utilized by the investment community. The results of these two formal models of the cost of capital are augmented by historical returns realized by utility and non-utility companies of comparable risks, and results inferred from the so-called risk-premium methodology.

The constant growth Discounted Cash Flow (DCF) model was originally developed by Myron Gordon in 1957, and was advanced actively during the early 1960s. In its classical form, the derived DCF model defines the cost of capital as the sum of the adjusted dividend yield, and expectations of future growth in cash flows to investors including dividends and future appreciation in share prices. The classical (one-stage) DCF model is as follows:

$$k_{e,j} = D_{0,j}(1+E(g_j))/P_{0,j} + E(g_j)$$

with,

$k_{e,j}$ = cost of equity capital, asset j

$D_{0,j}$ = current dividends per common share, asset j

$E(g_j)$ = expected growth in future cash flow returns to investors in asset j

$P_{0,j}$ = current price per common share, asset j

Formatted: Space After: 0 pt

Formatted: Space After: 0 pt, Tabs: 3.13", Left

The one-stage form of DCF model is an elegant and intuitively tractable model with two terms, a mathematical result derived from the constant growth present value model. A cursory review of historical returns of equities suggests substantial variation in growth in the internal returns to capital and market appreciation is both the typical and dominant pattern. It is palpable that the *expected path of future returns* harbored by investors may assume a pattern of non-constant growth. This means that, at least under some market conditions, the constant growth form of discounted cash flow may not represent investor expectations of growth with sufficient accuracy. Arguably, other forms of DCF may serve as better approximations of investor expectations.

A plausible means to better model expectations of varying growth might be with stochastic models, where the path of returns and growth is a function of time, with a random component. However, stochastic models introduce considerable complexity. As a first order approximation to stochastic processes, multiple step constant growth models known as multi-stage DCF can serve nicely. Essentially, multi-stage DCF is a variation of present value theory which postulates that future returns assume a pattern of several growth steps or stages. While any number of stages of constant growth is possible, two- or three- stages are typically applied. In stylized fashion, the Three-Stage DCF model is shown below:

$$P_{0,j} = (1+g_j)/(k_{e,j}-g_j)\{D_{0,j}(1 - F^5_j) + D_{5,j}(F^5_j - F^{10}_j) + D_{10,j}(F^{10}_j)$$

with,

$k_{e,j}$ = cost of equity capital, asset j

$D_{t,j}$ = current and future dividends per common share, asset j

$E(g_j)$ = expected growth in future cash flow returns to investors in asset j

$P_{0,j}$ = current price per common share, asset j

F $= (1+E(g_j))/(1+k_{e,j})$

Formatted: Space After: 0 pt

Formatted: Space After: 0 pt

Appendix I provides a step-by-step derivation of the classical and multi-stage discounted cash flow models shown above.

The Capital Asset Price Model (CAPM) was developed by William Sharpe (1961) and John Lintner (1964). CAPM was derived from mean-variation analysis and, in particular, portfolio selection developed by H. Markowitz (1952). The derived CAPM shows how the valuation of a financial asset (price) is based upon two components: risk free returns and an *adjusted risk-based return.* Surrogates for risk free returns can be observed directly in capital markets, and include market returns on short- and intermediate-term debt. As a general rule, the cost rates and market returns on government debt obligations serve as appropriate surrogates.

The adjusted risk-based return is based upon three factors: 1) the covariation of the returns to the asset and that of markets for risky assets, 2) the statistical variance of returns of the market for risky assets, and 3) the *difference* between expected overall returns on risky assets, and risk free returns. The third parameter is referred to as the excess return, and is equal to the difference between the overall returns to risky assets for the market as a whole, and the risk free return rate. The CAPM is shown below:

$$k_{e,j} = r_f + B_{jm} * (r_m - r_f) \qquad \text{with, } B_{jm} = \sigma_{jm} / \sigma_m^2$$

where,

$k_{e,j}$ = cost of capital for risky asset *j*, stated in percentage terms

r_f = risk free rate of return

B_{jm} = ratio of the covariation between risky asset *j* and the market as a whole, σ_{jm}, and the variance of market returns, σ_m^2

r_m = rate of return on the market as a whole

Formatted: Space After: 0 pt

Appendix II derives the Capital Asset Pricing Model, as shown above.

The efficient market hypothesis plays an essential role in the determination of the cost of capital. Specifically, the working assumption, which is largely though not completely borne out by empirical analysis, is that capital markets are fairly efficient. This means that the supply and demand for risky financial assets, as reflected in bid and ask prices to buy and sell shares, result in financial assets being traded at price levels where *rates of return above the cost of capital cannot be systematically realized.* Above-normal returns – returns above the cost of capital – are realized only randomly. Essentially, the opportunities to systematically realize returns above the underlying cost of capital are exhausted by the competitive market process.

Estimating the cost of capital though not trivial can be fairly straightforward, and both the DCF and CAPM approaches provide a useful framework. The risks to investors in various sectors of the energy services industry cannot ever be known directly; risks – and hence the implied cost of capital – can only be inferred. Specifically, the determination of useful estimates of the cost of common equity capital within either framework requires a discerning application of theory through careful analysis such as that presented herein. In particular, the determination of the cost of equity capital faces two overarching challenges, as follows:

- both approaches are forward looking and thus the results are highly dependent upon useful estimates of investor expectations about future market performance.
- The underlying assumptions for DCF and CAPM include, among other things, an efficient market and rational behavior of investors such that all opportunities for above- and below-normal returns to capital are exhausted on an expected value basis. In short, capital markets value financial assets

at the implied opportunity costs of capital, given investor perceptions of risk.

It is useful to mention that the notion of *risky assets* can apply to any real or financial asset wherein the prospective returns from holding the asset are uncertain. Risky assets include commodity contracts, financial property rights, financial derivatives, and real assets such as transmission facilities. Risk assessment and option theory, moreover, can be applied to the analysis of unbundled services, such as electricity transmission development plans. Within the context of this discussion, however, risky assets refers to financial obligations of firms – common stock – and asset values refers to prices of common stock as observed on major stock exchanges.

Measurement of historical returns and risk metrics are increasingly used as a basis to assess plausible returns in the future. As discussed, efficient markets suggest that *all* financial assets are priced at levels such that the *expected* future returns of individual assets are equivalent to the underlying opportunity cost. Thus, if historical returns guide expectations of future returns, historical returns provide a useful benchmark and, within reasonable bounds, reflect the opportunity cost of capital. In this respect, the Historical Returns methodology can be viewed as a market-based approach of Comparable Earnings, and thus fully satisfies *Bluefield* and *Hope* criteria. The key to successfully applying this approach is to identify and measure historical returns in a manner that reasonable reflects expectations of investors about the future outlook.

Historically realized returns and future expected returns of financial assets are ordered according to risks. This ordering according to risks is a natural and inevitable result of competitive financial markets: because risk is costly, higher costs must be offset by higher returns. While it is not based upon an explicit model, the analysis of the risk premia among classes of risky assets provides a means to infer the underlying opportunity cost of capital. The underlying concept of the risk premium approach is that *differences* in perceptions of risks among financial assets such as equities and debt are revealed in differences between the historical market returns. The historical differences between equity and debt returns – *i.e.*, the Risk Premium – can thus serve as a surrogate for the compensation for risk in the future. Risk premia, when combined with the expected cost of debt prospectively, provides a useful benchmark to gauge the underlying cost of equity capital.

Deleted: s

Application of the Risk Premium approach contains two potential pitfalls, as follows:

- the opportunity cost of common equity capital, stated in nominal terms, is sensitivity to the demand for and supply of capital;
- the observed risk premia between debt and equity is quite sensitivity to expected inflation, and Risk Premium analysis must account for expected inflation in the future. That is, the underlying rate of inflation and

conditions of the historical period over which risk premiums are estimated must match that of the expected conditions of the relevant period over which the common equity recommendation is being applied, and over which retail electricity prices are being set.

Q. You discuss the importance of comparability and measures of risk as the basis to determine the cost of common equity. Please elaborate.

A. As defined by the "Bluefield" and "Hope" decisions of the U.S. Supreme Court, a public utility is (to paraphrase) entitled to a rate of return on shareholder capital committed for the convenience and necessity of the public equivalent to that realized by companies in other businesses of comparable risk. Thus, the immediate task at hand is comparability: to identify and select companies of comparable business, regulatory, and financial risks to that of Florida Public Utilities Company. Once selected, we determine the cost of common equity for the sample(s) of comparable companies that, by definition, is the opportunity cost of capital.

The starting point is the market portfolio; that is, we begin with virtually all common shares traded on U.S. equity exchange markets. Specifically, we have drawn heavily though not exclusively from a set of data sources including the Value Line data banks, to which we have full access. The Value Line data banks cover some 7000 listings. For these listings, Value Line reports a wide range of financial data, business descriptions and classification, historical price experience, and various diagnostic statistics of interest.

Deleted: 8

____From the market portfolio we proceed to develop two samples. One sample known as the *Electric Utilities* sample is limited to electricity service providers that have modest yet significant market participation, and are of comparable risk to Florida Public Utilities Company. The second sample relaxes the "line of business" restriction, and covers natural gas distribution companies. This sample is referred to as the *Comparable Risk Gas Distribution Utilities* sample. The second sample closely matches the market participation of Florida Public Utilities Company, while also satisfying comparable risk criteria.

____The determination of the first sample involves two steps. The first step is to conduct an initial screen according to the defined selection criteria. As mentioned, these criteria are as follows:

- Liquidity: companies that are of modest size but yet have sufficient market presence and participation to ensure sufficient market activity and transaction volume; and,
- Business Line: companies whose primary business line is retail electricity services.

This first screen produced the twenty two electric utility companies shown on Exhibit 6-A, including Florida Public Utilities Company. As can be seen, the revenues of these

companies range from $XX for Y1, to over $XX for Y2.

Some of these twenty two companies have substantial involvement in non-gas retail business lines. On the surface, we might expect that such endeavors to diversify the

Deleted: gas

overall business would tend to reduce variation in earnings, variation in internal cash flow, and variation in market returns thus reducing overall investment risk. Hence, members of the utility sample are gas distribution utility companies that are largely if not exclusively in the retail electric business – sometimes referred to as a *pure play*. The second selection step of determining the utility sample applies risk criteria. These criteria include three dimensions or metrics:

Deleted: gas

Deleted: Not sure if this should be referring to gas or electric??

- the coefficient of variation in earnings per share over five and ten years;
- the coefficient of variation in internal cash flow per share over five and ten years; and,
- market Beta, which as discussed above is the ratio of the covariation of the market returns of the individual companies and the market as a whole; and the statistical variance of the returns of the market.

Subject:	Update 2, Schedule

Colleagues,

At this point, I intend to delivery a second interim draft of the testimony and to finalize the cost of capital testimony either late Thursday or early Friday. I will be out of the office tomorrow, leaving tonight, but can be reached on my cell phone (608-469-1157) if something comes up. Advise if the schedule needs to be advanced.

Doreen, Mike: I will check in with you at some poin tomorrow. However, don't hesitate to leave a v-mail in Madison or call me directly if something comes up.

Robert

Subject: Update on cost of capital

Doreen,
Cheryl,

I have made substantial progress toward completion of the cost of capital analysis this weekend, and intend to have, pretty much, a complete case in your hands late this week. In the last couple of years, there appears to be divergence from historical relationships, for key data series - inflation expectations, risks/cost of capital, yields. Capital market data is always noisy. Nonetheless, my models and conceptual approach don't appear to fit as well as earlier, DCF in particular. However, it is likely that 11.50% will hold.

Robert

Subject: Update On Schedule D-2

Mike,

I have discussed the issue of consistency between historical and forecast balances for capital with Doreen. We will incorporate the Flo-Gas balances within the statement of year-end equity balances, as the applicant is instructed to do so. Also, the reacquired debt balances will be shown in L-T Debt. I will need to develop these balances, which I will do tonight.

Robert

Subject: RE: Update

I will put it on my "to do" list. I would note that this change is not reflected in the D's Final.xls I just sent to Cheryl.

Subject: Update

Doreen,

Just a comment...Mike mentioned to me that the caption for schedule D-2 indicates that the capital balances shown on the schedule should reflect the most recent 5-years, where the last year extends through the projected year. The schedule is labeled, on the other hand, as "5-year history" such that, as you have it, balances through '06 would seem appropriate. Robert

Subject:	Update

Cheryl,
Doreen,

With the exception of customer deposits, the substantive D Schedules for the years 2006 and 2007 are completed, and I intend to complete customer deposits for these two years later on tonight. Remaining to be completed are the historical capital structure for the historical years 2002 - 2006 inclusive (D-2) as well as the financial ratios for '06 and '07 (D-7). These latter two elements plus D-9 affect the request for interim relief and are important; I will try to get them completed by tomorrow COB; the operative constraint is historical data which should be available via the 10-K's filed with the SEC, and inputs from other schedules. Nonetheless, I think things are in good shape, though Doreen may find flaws in this initial work.

There are two issues that I wish to bring up, however:

1) The short-term debt rate for 2006 is significantly understated because of computational method. That is, the actual interest expense to cover short-term balances is determined daily, while the balances used to compute the 2006 rate, for regulatory purposes, utilizes month-end balances. Apparently, the month-end balances are much higher than the daily balances; hence, the computated average interest rate over the course of 2006 (3.53%) appears to be significantly understated. Accordingly, for 2006 I use an imputed interest rate (6.03%) based on the commercial terms for FPUC's S-T debt facility, which is based on the observed average 1-month LIBOR rates for the 12-months of 2006. However, this approach still understates the overall cost of capital, because the short term debt balances are overstated within the overall capital structure. The better way, I believe, is to use the observed average daily balances, which are accurate and also in-keeping with the fair representation of the balances of S-T debt carried by FPU, on average. Month-end balances for the other components of the capital structure is a good representation of average balances, as the balances for these items do not vary much over the course of the month. In the case of S-T debt, however, the month-end balances appear to be much higher than daily balances. Doreen and I discussed this issue earlier today.

2) For the determination of the average outstanding long-term debt (L-T), I am subtracting the average monthly balances of unamortized issuance expense and other balances associated with reacquisition of L-T debt, in lieu of year-end balances. This approach is in keeping with the principle of average capital structure, and also provides for higher amounts to be taken from the outstanding principle amounts for the various issues of L-T debt.

Talk with you soon.

Regards,
Robert

Subject: 2006ROR_4thqtr revised 3_22_2007.xls

Robert:

Please see tab ROR-DEBT for the interest expense for 2006. In November there is a credit balance due to an adjustment for an over-accrual for $4,067.86. The interest expense for that month was $1,586.98.

Thanks

Doreen

Subject: updated cash/ capital expenditure forecast

Doreen,

I need the latest cash and capital forecast to answer these questions next Thursday:

Capital Expenditure and Construction Program

- Please provide a forecast for annual capital expenditures for the years 2007 through 2011?
- What is the nature of the projects included in the capital expenditure forecast? Are there any significant projects being undertaken during this time period?
- How does FPU expect to finance its capital expenditure program? Will external financing be required to fund the expenditures? If so, will debt or equity be issued to fund the expenditures?

Thanks!

George

RE: SFAS 142 Valuation Analysis

Dear Mr. Bachman:

Pursuant to your request and in accordance with our engagement arrangement, we have completed a valuation of the Natural Gas Reporting Unit and the Propane Reporting Unit (the Reporting Units) of Florida Public Utilities Company (FPU or the Company). The purpose of this engagement is to assist you in determining the fair value of the Reporting Units as of January 1, 2007. The function of the valuation report is to assist FPU with its application of Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standard 142, *Goodwill and Other Intangible Assets* ("SFAS142"). The valuation should not be distributed, circulated, quoted from, or cited in any manner that is not consistent with the stated purpose and function.

Although all of the relevant analyses and appraisal procedures required by Standard 9 of the *Uniform Standards of Professional Appraisal Practice (USPAP)* have been performed, we are communicating our opinion using this Summary Report format. This Summary Report has been prepared in accordance with requirements for a restricted use appraisal report provided in Standard 10-2(b) of *USPAP*. As a result, the information contained in our report will be for sole use of the Company in connection with the purpose outlined above and should not be distributed to outside parties, other than your external audit team at BDO Seidman, LLP, without our express written consent. Use of this Summary Report should be restricted to and consistent with its stated purpose only. The opinions and conclusions set forth in the Summary Report cannot be understood properly without additional information in our workfiles.

Based on the data, presented in the accompanying report, it is our opinion that the fair value of the Reporting Units, as of January 1, 2007, are as follows:

Assets	Fair Value	Carrying Value	Goodwill Impairment
Natural Gas Reporting Unit	$ 68,800,000	$ 55,788,228	No
Propane Reporting Unit	$ 18,200,000	$ 12,314,719	No

The informed judgment of the valuator, operating in the context of reasonableness and common sense, must be inherent in the valuation process, guiding the consideration of relevant facts in the determination of value. Should the report be challenged, we can render whatever assistance to defend these amounts for an additional fee computed at our standard hourly billing rates in effect at that time.

We are pleased to provide you with the accompanying report and appreciate the opportunity to be of service to you. If you have any questions regarding this report, please contact Daniel P. Hawn at (954) 356-5736.

Respectfully submitted,

RSM McGladrey, Inc.

Daniel P. Hawn
Director, Business Valuation

DRAFT - FOR DISCUSSION PURPOSES ONLY

Statement of Assumptions and Limiting Conditions

This report has been made with the following general assumptions and limiting conditions:

1. This engagement is limited to the opinion of the fair value of the Natural Gas Reporting Unit and the Propane Reporting Unit of Florida Public Utilities Company, as of January 1, 2007, for purposes of complying with SFAS No. 142, *Goodwill and Other Intangible Assets* and should not be used for any other purpose. Neither this report nor any portion thereof (including, without limitation, any conclusions as to value, the identity of RSM McGladrey, Inc., or individuals signing or associated with this report, or the professional associations or organizations with which they are affiliated) shall be disseminated to third parties by any means without the prior written consent and approval of RSM McGladrey, Inc. with the exception of your external auditor, BDO Seidman LLP.

2. No investigation has been made of, and no responsibility is assumed for, the legal description or for legal matters including title or encumbrances. Title to all property is assumed to be good and marketable unless otherwise stated. All property is further assumed to be free and clear of any or all liens, easements or encumbrances unless otherwise stated. In arriving at our opinion, we have assumed that the Company is in compliance with all relevant federal and state laws.

3. Information furnished by others, upon which all or portions of this report are based, is believed to be reliable; however, no warranty is given as to the accuracy of such information. The Company and its management warranted to us that the information supplied to us was complete and correct to the best of their knowledge. It has been assumed that all facts and circumstances that would significantly affect the appraisal results have been disclosed to us. Any significant errors in, or omissions from, the information supplied to us will have a corresponding effect on our analyses and conclusions.

4. We have not made an independent investigation of the fair value of the Company's tangible assets and thus do not offer an opinion regarding their value.

5. We have compiled summary financial data and ratios that are contained in the report and various appendices. The data in these appendices represent financial data extracted from the Company's historical financial statements as well as other sources. The financial information does not constitute a complete presentation of the Company's financial statements in accordance with generally accepted accounting principles. The information is included solely to assist in the development of the value conclusion presented in this report and should not be used to obtain credit, or for any other purpose.

6. Regarding any projections of earnings or cash flows that may be used in the analysis herein, they have been based upon the assumptions provided or approved by Company management. Some assumptions inevitably will not materialize and unanticipated events may occur; therefore, the actual results achieved during the projection period will vary from the projection and the variations may be substantial.

7. We express no opinion on any matters that require legal expertise including, but not limited to, the tax aspects related to the Company.

8. Neither RSM McGladrey, Inc., nor any individuals signing or associated with this report shall be required by reason of this report to give testimony or appear in court or other legal proceedings unless specific arrangements have been made.

9. This report is valid only for the effective date of January 1, 2007. No responsibility is taken for changes in market conditions and no obligation is assumed to revise this report to reflect events or conditions which occur subsequent to the date hereof.

Definition and Scope of the Appraisal

Fair Value

For purposes of this valuation, the basis of value is fair value, defined as follows:

> *The amount at which an asset (or liability) could be bought (or incurred) or sold (or settled) in a current transaction between willing parties, that is, other than in a forced or liquidation sale.* [SFAS No. 141]

Scope of the Appraisal

The scope of the work included the following:

- Discussions with management of FPU (Management) concerning the Company's services, markets, past performance and the future growth potential.
- Review of the economic environment and industry segment in which the Reporting Units operate.
- Review and analysis of the Company's financial information in audited statements prepared by Deloitte & Touché LLP, for the fiscal years ended December 31, 2001 to 2003; BDO Seidman LLP, for the fiscal years ended December 31, 2004 to 2006; and internal financial statements for the Reporting Units for the years ended December 31, 2001 to 2006; as well as other financial documentation relating to its operations which were pertinent to this valuation.
- Review and analysis of the Reporting Units' projected future operating performance.
- Review and analysis of other information deemed relevant to this valuation report and its underlying purpose.

Our discussions with Management included written correspondence and phone conversations with Mehrdad Khojasteh, Corporate Accounting Supervisor, April Lundgren, Senior SEC Accountant, and Doreen Cox, Financial Analyst, primarily between April and May 2007. The reader is advised that this valuation is heavily dependent upon information supplied by the above persons. As a basis for our valuation, we have also relied on various financial and information sources, which are listed in Appendix A of this report.

Overview

Business Description

Florida Public Utilities Company engages in the purchase, transmission, distribution, and sale of electricity and natural gas to residential, commercial, and industrial customers in Florida. It also sells propane gas, as well as merchandise and other service related products. As of December 31, 2006, the company owned 1,558 miles of natural gas pipe located in central and south Florida; 22 miles of electric transmission lines located in northeast Florida; and 1,082 miles of electric distribution lines located in northeast and northwest Florida. It served 82,000 natural gas and electricity customers and 13,000 propane gas customers. Florida Public Utilities was founded in 1924 and is headquartered in West Palm Beach, Florida.

In October 2001, FPU acquired Z-Gas Company, Inc., a propane gas service distribution company in a stock for stock transaction valued at approximately $600,000. The transaction involved the issuance of 31,960 shares of the Company's stock and $20,000 of cash. The merger added approximately 1,000 customers to the propane operation in the Northeast Florida division.

In December 2001, the Company acquired certain net assets of Atlantic Utilities, the Florida operation of Southern Union Company, in a cash transaction valued at approximately $9.8 million. Atlantic Utilities served approximately 4,400 natural gas customers in New Smyrna Beach and approximately 1,900 propane customers in central and south Florida.

In November 2002, the Company acquired Nature Coast Gas, Inc. for approximately $740,000. Nature Coast serves approximately 1,200 propane customers in Inglis, Florida with annual sales of nearly 460,000 gallons. In 2003, subsequent acquisition adjustments increase the goodwill created with this transaction from $223,000 to $240,000.

National Economy – Summary and Outlook

Despite the higher than expected growth during the fourth quarter, U.S. consensus projections[1] released for December showed that analysts did not significantly change their expectations for real GDP growth in 2007 from prior forecasts, with real GDP growth of 2.4 percent in 2007 (up slightly from a forecast of 2.3 percent in November) and 3.0 percent growth in 2008. Over the longer term, analysts projected real GDP growth of 3.0 percent annually through 2017.

After wild swings through much of the year, inflation expectations continued to decrease from prior months, with forecasts of 1.8 percent for 2007 (down from more than 2.5 percent expectations early in the fourth quarter) and 2.3 percent for 2008. The long-term outlook was for 2.3 percent annual inflation through 2017.

Nominal growth rates can be calculated by combining real GDP growth and inflationary growth forecasts. As such, short-term nominal growth rates were forecast to be 4.2 percent in 2007 and 5.3 percent in 2008, while nominal long-term growth was predicted to be 5.3 percent. As such, a company planning to grow at least as fast as the national economy as a whole over the next decade would most likely have to increase revenue in the 4.0 to 6.0 percent range to keep pace with not only overall economic growth, but also inflationary growth. On the other hand, a company operating at capacity, or in a mature and stable market, would most likely grow at the lower inflationary rates in the future.

[1] Consensus forecasts – USA, Consensus Economics, January 2007 release

	Short-Term			Long-Term
Real GDP	3.5	2.4	3.0	3.0
Inflation	2.6	1.8	2.3	2.3
Nominal Growth Rates	**6.1**	**4.2**	**5.3**	**5.3**

The national economic outlook is consistent with the outlook for the Company and the industry sector in which it operates. A discussion of the industry follows.

Brief Industry Overview

Natural Gas Industry

The natural gas operations of Florida Public Utilities Company are regulated by the Florida Public Service Commission (FPSC), which has jurisdiction over retail rates, quality of service and reliability, issuances of securities, planning, siting and construction of facilities, accounting and depreciation practices, and other matters.

In general, the FPSC's pricing objective is to set rates at a level that allows the utility to collect total revenues (revenue requirements) equal to its cost of providing service, plus a reasonable return on invested capital.

The costs of owning, operating and maintaining the utility system, other than fuel, purchased power, conservation and certain environmental costs, are recovered through base rates. These costs include operation and maintenance expenses, depreciation and taxes, as well as a return on FPU's investment in assets used. The rate of return on rate base, which is intended to approximate FPU's, primarily includes its costs for debt, deferred income taxes at a zero cost rate and an allowed return on common equity. Base rates are determined in FPSC rate setting hearings that occur at irregular intervals at the initiative of FPU.

Fuel, purchased power, conservation and certain environmental costs are recovered through levelized monthly charges established pursuant to the FPSC's cost recovery clauses. These charges, which are reset annually in an FPSC proceeding, are based on estimated costs of fuel, environmental compliance, conservation programs and purchased power and estimated customer usage for a specific recovery period, with a true-up adjustment to reflect the variance of actual costs from the projected charges. The FPSC may disallow recovery of any costs that it considers imprudently incurred.

Composed almost entirely of methane, natural gas is a combustible gaseous fuel used in residential and commercial applications. It is produced, transported, and consumed in measures associated with cubic feet. One cubic foot is equal to the volume of gas that could be contained in a cubic area measuring one foot in all three dimensions under a pressure of 14.73 pounds per square inch at 60 degrees Fahrenheit. Although the energy content of natural gas can vary depending on its precise chemical composition, 1,000 cubic feet of natural gas has the energy equivalent of approximately one million British thermal units (Btu). A Btu is a standard unit used to measure the amount of heat produced by an energy source.

By the turn of the twenty-first century, natural gas usage was becoming increasingly important in generating electricity. Much safer than nuclear energy and significantly cleaner for the environment than coal, natural gas took over as the energy source of choice in power generation plants and many industrial complexes. The effects of the Clean Air Act were expected to expand its role even farther. In addition, natural gas played a significant role in industrial cogeneration (retaining and distributing the heat energy produced by generating electricity).

During the early years of the 2000s, the natural gas industry was suffering from the effects of a sluggish economy, inconsistent deregulation, and upheaval in the energy industry as a whole, caused in part by the California energy crisis during 2000 and the demise of energy giant Enron after that company's fraudulent bookkeeping practices came to light. The situation led to large-scale sell-offs, downsizing, and a sharp decline in many companies' equity. Although natural gas makes up just one-third of the entire energy industry, because most energy companies have diversified interests that span the market, the beginning of the twenty-first century saw the industry weather a difficult storm of consumer and investor distrust. As a result, even though natural gas usage was expected to increase, production capabilities were declining.

Propane Industry

Propane is used primarily for space and water heating, clothes drying and cooking. Residential customers are typically homeowners, while commercial customers include motels, restaurants, retail stores and laundromats. Industrial users, such as manufacturers, use propane as a heating and energy source in manufacturing and drying processes. In addition, propane is used to supply heat for drying crops and as a fuel source for certain vehicles.

Propane is extracted from natural gas at processing plants or separated from crude oil during the refining process. Propane is normally transported and stored in a liquid state under moderate pressure or refrigeration for ease of handling in shipping and distribution. When the pressure is released or the temperature is increased, propane is usable as a flammable gas. Propane is colorless and odorless; an odorant is added to allow its detection. Propane is clean-burning, producing negligible amounts of pollutants when consumed.

The retail propane industry is mature, with total demand expected to remain relatively flat or to decline slightly. The industry is relatively stable and predictable due to the largely non-discretionary nature of propane use. Accordingly, the demand for propane has historically been relatively unaffected by general economic conditions but has been a function of weather conditions. It is common practice in the propane distribution industry to price products to customers based on a per gallon margin over wholesale costs. As a result, distributors generally seek to maintain their margins by passing costs through to customers, thus insulating themselves from the volatility in propane prices. However, during periods of sharp price fluctuations in supply costs, distributors may be unable or unwilling to pass entire cost increases or decreases through to customers. In these cases, significant increases or decreases in per gallon margins may result. In addition, the timing of cost pass-throughs can significantly affect margins. The propane distribution industry is highly fragmented, characterized by a large number of relatively small, independently owned and operated local distributors. Each year a significant number of these local distributors have sought to sell their business for reasons that include retirement and estate planning. In addition, the propane distribution industry is becoming more complex due to increasing environmental regulations and escalating capital requirements needed to acquire advanced, customer oriented technologies. Primarily as a result of these factors, the industry is undergoing consolidation.

Propane competes with other sources of energy, some of which are less costly for equivalent energy value. The Propane Reporting Unit competes for customers against suppliers of electricity, natural gas and fuel oil. Competition from alternative energy sources has been increasing as a result of reduced regulation of many utilities including natural gas and electricity. Except for certain industrial and commercial applications, propane is generally not competitive with natural gas in areas where natural gas pipelines already exist because natural gas is a significantly less expensive source of energy than propane. The gradual expansion of the nation's natural gas distribution systems has resulted in the availability of natural gas in many areas that previously depended upon propane. Although the extension of natural gas pipelines tends to displace propane distribution in areas affected, new opportunities for propane sales arise as more geographically remote neighborhoods are developed. Although propane is similar to fuel oil in certain applications and market demand, propane and fuel oil compete to a lesser extent primarily because of the cost of converting from one to another. In addition to competing with alternative energy sources, the Propane Reporting Unit competes with other companies engaged in the retail propane distribution business. Competition in the propane industry is highly fragmented and generally occurs on a local basis with other large full-service multi-state propane marketers, thousands of smaller local independent marketers and farm cooperatives. According to the National Propane Gas Association, the domestic retail market for propane is approximately 11 billion gallons annually. It is estimated that approximately 50 million Americans use propane on a daily basis. The 10 largest retailers account for approximately 45% of the total retail sales of propane in the United States, and that no single marketer has a greater than 10% share of the total retail market in the United States.

Business Valuation Methodology

Business valuation methodology is generally categorized into three broad approaches: the market-based approach, the asset-based approach and the income-based approach. Within each of these approaches, there are different methods that can be used to analyze the fair value of intangible assets and intellectual property.

Methods within the market-based approach are used to estimate value through analysis of recent sales of comparable assets. With respect to the valuation of intangible assets, these types of assets often have little guideline transaction data available. This is due to the fact that these assets are created over time and are designed to meet the needs of a specific organization, and are not generally bought or sold separate from the business enterprise.

Methods within the asset-based approach establish value based on the cost of reproducing or replacing the asset, less depreciation from physical deterioration and functional, technical and economic obsolescence, if present and measurable. The asset-based approach stresses the utility characteristics of the asset. This approach is most useful as a value indicator when the components of the asset are relatively new; however, it fails to capture the economic benefits arising from the use of the asset over time.

"Income," as used in the income-based approach, is a general term that connotes any future benefits that can be quantified in monetary terms. In using this approach, the first step is to make a projection of the total monetary benefits expected to accrue to an investor as a result of the utilization of the asset. This stream of monetary benefits is then discounted over the entire projection period to arrive at the present worth, or value of the asset. This approach focuses on the income-producing capability of the acquired asset(s) and when appropriate, best represents the present value of the future economic benefits expected to be derived from them.

In determining the fair value of the Reporting Units, we have utilized an income-based approach and a market-based approach. The following pages discuss our analyses and conclusions.

Determination of Value – Income Approach

Discounted Cash Flow Method

The Discounted Cash Flow ("DCF") method calculates the present value of future cash flows to each Reporting Unit. Under SFAS 142, this methodology is the preferred choice in the absence of having a quoted stock market price for each Reporting Unit. In order to determine the present value of these future cash flows for each Reporting Unit, it was necessary to rely upon management's forecast of future revenues, expenses, and cash flows. We have discussed with management the factors affecting each Reporting Unit's financial performance and relied upon management's forecast in our analysis.

Management's forecast is generally within the range of the market participants for the Natural Gas Reporting Unit. For the Propane Reporting Unit, growth is forecast to outpace the market participants. This is due primarily to the growth potential for propane services in the market areas that the Propane Reporting Unit services. There is a trend for residents in the Propane Reporting Unit's service areas to install gas appliances or stand-by generators, which offer back-up power in case of hurricanes. These market trends will result in growth greater than the industry growth rate for the near future.

The Natural Gas Reporting Unit had a working capital deficit as of the valuation date. To account for this deficit, the total invested capital (from both the income and market approaches) was reduced by the difference between the estimated market participant normalized working capital less the Natural Gas Reporting Unit's actual working capital.

The DCF was prepared on an invested capital basis. Invested capital refers to the aggregate of all classes of debt and equity invested in the business. In preparing a DCF analysis on an invested capital basis, forecasted debt-free cash flow is discounted to present value at the Reporting Unit's respective weighted average cost of capital. Interest expense is excluded from the forecast as debt-free cash flow represents an economic benefit that is available to all capital holders of an enterprise. The result of this analysis is to develop a measure of invested capital value. Subtracting the fair value of outstanding debt from the indicated invested capital value results in each Reporting Unit's fair value of equity as of the valuation date. Note that the Company does not allocate debt to the reporting units. In addition, we have been informed that the other long-term liabilities will most likely be satisfied through future customer cost recovery charges. Accordingly, these liabilities were not deducted when calculating the fair value of the Reporting Units.

The net cash flow available to the Company's Reporting Units' invested capital is calculated as follows:

CF = EBIT - Taxes + DEPR/AMRT - CAPEX - (+) Increases (Decreases) in NWC

Where:

CF	=	Forecasted net cash flow to invested capital
EBIT	=	Earnings before interest and taxes (operating income)
Taxes	=	Based on each Reporting Unit's respective effective tax rate
DEPR/AMRT	=	Depreciation and amortization included in the calculation of EBIT
CAPEX	=	Capital expenditures required to support future revenue growth
NWC	=	Net working capital

Terminal Year Value

Since specific forecasts of future benefits beyond a reasonable number of years are not meaningful, business valuators calculate a terminal value. The projected cash flows past the specific discrete period are included in the terminal value.

The terminal value of each respective Reporting Unit was calculated by normalizing residual year-end net cash flow to invested capital. Capital expenditures were determined to equal depreciation and amortization in the residual year.

The terminal, also termed residual, value at the end of the forecast period is computed based upon the capitalization of normalized cash flow into perpetuity and is calculated as follows:

$$TV = \frac{TYCF}{WACC - g}$$

Where:

TV	=	Terminal value
TYCF	=	Terminal year cash flow
WACC	=	Weighted average cost of capital
g	=	Anticipated long-term growth rate

Weighted Average Cost of Capital

The appropriate discount rate to be used in discounting net cash flows to invested capital is the weighted average cost of capital (WACC). The WACC is based on the cost of both debt and equity capital depending on the weighting of each component in the firm's capital structure. The general formula for estimating the WACC is:

$$WACC = (r_e \times W_e) + (r_d [1 - t] \times W_d)$$

where:

$WACC$	=	Weighted average cost of capital
r_e	=	Cost of equity capital
r_d	=	Cost of debt capital
W_e	=	Percentage of equity capital, at market value
W_d	=	Percentage of debt capital, at market value
t	=	the firm's effective income tax rate

Determination of the Cost of Equity Capital

We determined that the discounted future returns approach was best suited to value the Reporting Units. Our next step was to determine the appropriate rate for each Reporting Unit. We utilized the capital asset pricing model to estimate the rate of return currently available in the market for investments with comparable risk. Our estimate of the discount and capitalization rate is derived from published market data and other relevant factors and is comprised of the following:

- *Risk-Free Rate* - The risk-free rate of return is the return an investor could obtain from a low-risk guaranteed investment. This return is assumed to be equivalent to the yield to maturity of long-term Treasury bonds even though this investment is not entirely risk-free.

- *Beta* – The beta is a measure of relative risk. It measures an individual company's risk relative to the market as a whole.
- *Equity Risk Premium* - The equity risk premium is the extra return earned by an average equity investor in excess of the return from long-term Treasury bonds.
- *Risk Premium for Size* - Generally, the total returns on small company stocks exceeded the total returns from large company stocks.
- *Other Risk Factors* - Based on the Company's successful integration of its recent acquisitions and its continued profitability, no additional risk factors are warranted for the Natural Gas Reporting Unit. An incremental risk factor of 1% was applied to the Propane Reporting Unit to reflect the risk of realizing its anticipated future growth.
- *Average Long-Term Growth Rate* - The average long-term growth rate, which includes inflation, has been estimated to be 3% for the Natural Gas Reporting Unit and 4% for the Propane Reporting Unit.

Determination of the Cost of Debt Capital

We have determined the cost of debt capital and the effective tax rate to be 6.35% and 37.6%, respectively, which correlates to an after-tax cost of debt of 3.96%. The cost of debt was based on the Baa bond rate, which is considered to be a medium-grade obligation (i.e., neither highly protected nor poorly secured).

Determination of the Capital Structure

A controlling interest is being valued which has the ability to determine the capital structure of a company. Based on our analysis of both the natural gas and propane industries (specifically, the guideline public companies), we have determined that the equity and debt should be weighted 55% and 45% for the Natural Gas Reporting Unit and 70% and 30% for the Propane Reporting Unit.

The calculation of the WACC discount rate is presented on Schedule 3 in Appendix D for the Natural Gas Reporting Unit and Appendix E for the Propane Reporting Unit.

Mid-Year Discounting Convention

If it is assumed that each year's cash flow is to be available to the owner at the end of each year, the number of periods by which to discount each cash flow would be one for the first year's cash flow, two for the second year, and so forth. However, if it is assumed that a company's cash flows will be available to the owner throughout the year the discount rate needs to be adjusted using the mid-year discounting convention. The first year's cash flows are discounted by ½ a year, the second year's cash flow by 1½ years, and so forth. The terminal year value is discounted by the same factor as the last discrete forecast year. It was assumed that the Reporting Unit's cash flow would be available throughout the year; accordingly, the mid-year discounting convention was applied.

Calculation of Value

The complete analysis for each Reporting Unit is set forth on the accompanying indicated schedule section grouping. Accordingly, the fair value of each Reporting Unit is set forth below under the DCF methodology as of the valuation date.

Reporting Unit	Section	Schedule	Fair Value of as of January 1, 2007[1]
Natural Gas Reporting Unit	Appendix D	Schedule 4	$ 64,700,000
Propane Reporting Unit	Appendix E	Schedule 4	$ 17,100,000

[1]The Company does not allocate interest-bearing debt to the Reporting Units. Accordingly, the fair value and carrying value represent the value of total invested capital (equity plus debt).

DRAFT - FOR DISCUSSION
PURPOSES ONLY

Determination of Value – Market Approach

The market approach to valuation is a general way of determining a value indication of a business or an equity interest therein using one or more methods that compare the subject company to similar businesses, business ownership interests and securities (investments) that have been sold.

Guideline companies are companies that provide a reasonable basis for comparison to the relative investment characteristics of the entity being valued. Ideally, guideline companies operate in the same industry as the subject business, but if there is insufficient information available for companies in the same industry, it may be necessary to consider companies with an underlying similarity of relevant investment characteristics such as markets, products, growth, cyclical variability and other salient factors.

For purposes of our application of the market approach – guideline public company method, FPU's Reporting Units were attributed to two different industry/operating segments: Natural Gas and Propane. Accordingly, our selected guideline public companies for each respective operating segment are listed below.

Natural Gas Companies

AGL Resources, Inc. (AGL), an energy services holding company, principally distributes natural gas in Florida, Georgia, Maryland, New Jersey, Tennessee, and Virginia. It operates in four segments: Distribution Operations, Retail Energy Operations, Wholesale Services, and Energy Investments. The Distribution Operations segment operates utilities with approximately 43,000 miles of distribution and transmission mains in the six states. The Retail Energy Operations segment markets natural gas and related services to retail customers in Georgia. The Wholesale Services segment's activities include asset management, transportation, storage, production and peaking services, and wholesale marketing. The Energy Investments segment comprises investments in Jefferson Island Storage & Hub, LLC, which operates a storage and hub facility in Louisiana; AGL Networks, LLC, which provides telecommunications conduit and dark fiber; and Pivotal Propane of Virginia, Inc., which offers propane air. As of December 31, 2006, AGL had approximately 7.35 billion cubic feet of liquefied natural gas (LNG) storage capacity in 5 LNG plants located in Georgia, New Jersey, and Tennessee, as well as owned 3 propane storage facilities in Virginia and Georgia, which had a combined capacity of approximately 4.5 million gallons. It serves approximately 2.2 million customers in six states. AGL Resources was founded in 1856 and is based in Atlanta, Georgia.

Atmos Energy Corporation (AEC) and its subsidiaries engage in the natural gas utility business, as well as in other natural gas nonutility businesses in the United States. As of September 30, 2006, it distributed natural gas to approximately 3.2 million residential, commercial, public authority, and industrial customers in Colorado, Kansas, Kentucky, Louisiana, Mississippi, Tennessee, Texas, Georgia, Illinois, Iowa, Missouri, and Virginia. AEC also transports natural gas for others through its distribution system. It provides various natural gas management services, which include furnishing natural gas supplies, contract negotiation and administration, load forecasting, gas storage acquisition and management services, transportation services, peaking sales and balancing services, capacity utilization strategies, and gas price management services to municipalities, natural gas utility systems, and industrial natural gas consumers. In addition, AEC offers regulated and nonregulated natural gas transmission and storage services, as well as manages company-owned natural gas storage and pipeline assets. As of the above date, it owned approximately 75,869 miles of underground distribution and transmission mains; and approximately 6,127 miles of gas transmission and gathering lines. AEC was founded in 1906. It was formerly known as Energas Company and changed its name to Atmos Energy Corporation in 1988. AEC is headquartered in Dallas, Texas.

Chesapeake Utilities Corporation (CUC), through its subsidiaries, engages in the distribution, transmission, and marketing of natural gas. It distributes natural gas to residential, commercial, and industrial customers in central and southern Delaware, the Salisbury and Cambridge, Maryland's Eastern Shore, and parts of Florida. CUC also offers natural gas supply and supply management services. In addition, it engages in the distribution and wholesale marketing of propane to large independent and petrochemical companies, resellers, and southeastern retail propane companies in central and southern Delaware, the Eastern Shore of Maryland and Virginia, southeastern Pennsylvania, and parts of Florida. As of December 31, 2006, CUC distributed natural gas to approximately 59,100 customers; and propane to approximately 33,300 customers, as well as delivered approximately 24.2 million retail and wholesale gallons of propane. It also owned approximately 965 miles of natural gas distribution mains located in its Delaware and Maryland service areas, and 726 miles of natural gas distribution mains in its central Florida service areas; and approximately 366 miles of transmission pipelines. Further, CUC provides advanced information services, such as information technology-related business services and solutions for both enterprise and e-business applications in the United States and internationally. CUC was founded in 1859 and is based in Dover, Delaware.

Piedmont Natural Gas Company, Inc. (PNG), an energy services company, distributes natural gas to residential, commercial, and industrial customers in portions of North Carolina, South Carolina, and Tennessee. It also operates various businesses, including unregulated retail natural gas marketing, interstate natural gas storage, and intrastate natural gas transportation. As of October 31, 2006, PNG served 1,016,000 customers, including 62,000 customers served by municipalities. PNG was founded in 1949 and is headquartered in Charlotte, North Carolina.

Southern Union Company (SUC), together with its subsidiaries, engages in the gathering, processing, transportation, storage, and distribution of natural gas in the United States. SUC operates in three segments: Transportation and Storage, Gathering and Processing, and Distribution. The Transportation and Storage segment primarily engages in the interstate transportation and storage of natural gas from gas producing areas in Texas, Oklahoma, Colorado, the Gulf of Mexico, and the Gulf Coast to markets throughout the Midwest and from the Gulf Coast to Florida; and liquid natural gas terminalling and regasification services. The Gathering and Processing segment engages in the gathering, transmission, treating, processing, and redelivery of natural gas and natural gas liquids in Texas and New Mexico. The Distribution segment engages in the local distribution of natural gas in Missouri and Massachusetts. As of December 31, 2006, SUC distributed natural gas to approximately 560,000 residential, commercial, and industrial customers through local distribution systems consisting of 8,983 miles of mains, 6,028 miles of service lines, and 45 miles of transmission lines. SUC was incorporated in 1932 and is based in Houston, Texas.

TECO Energy, Inc. (TECO), through its subsidiaries, engages in diversified energy-related operations in the United States. TECO's activities primarily include generation, purchase, transmission, distribution, and sale of electric energy. TECO provides retail electric services to approximately 661,000 customers in the west central Florida. It also purchases, distributes, and sells natural gas to approximately 332,000 customers, including residential, commercial, industrial, and electric power generation customers in Florida. In addition, TECO owns interests in coal processing and loading facilities, synthetic fuel production facilities, and mineral rights, as well as owns or operates surface and underground mines in eastern Kentucky, Tennessee, and Virginia; and provides waterborne transportation, storage, and transfer services of coal and other dry-bulk commodities. TECO was founded in 1899 and is headquartered in Tampa, Florida.

Propane Companies

AmeriGas Partners, L.P. (AP), through its subsidiary, AmeriGas Propane, L.P., operates as a retail propane distributor in the United States. As of September 30, 2006, the partnership served approximately 1.3 million residential, commercial, industrial, agricultural, and motor fuel customers from approximately 600 district locations in 46 states. In addition to distributing propane, the partnership sells, installs, and services propane appliances, including heating systems. In certain markets, it also installs and services propane fuel systems for motor vehicles. AP operates as the general partner to the partnership. The partnership was formed in 1994 and is based in King of Prussia, Pennsylvania.

Ferrellgas Partners, L.P. (FP), through its subsidiaries, distributes propane and related equipment and supplies primarily in the United States. Its propane is used in residential and commercial buildings space heating, water heating, and cooking; agricultural applications, such as crop drying, space heating, irrigation, and weed control; and in various industrial applications as an engine fuel, and as a heating or energy source in manufacturing and drying processes. FP's other activities include common carrier services; the wholesale marketing of propane appliances and propane; and the sale of refined fuels and carbon dioxide. FP serves residential, industrial/commercial, portable tank exchange, agricultural, and other customers in the United States, the District of Columbia, Puerto Rico, and Canada. FP provides propane through a network of independent and partnership-owned distribution outlets. As of July 31, 2006, it had 846 propane distribution locations. FP was founded in 1939 and is headquartered in Overland Park, Kansas.

Energy Transfer Partners, L.P. (ETP), through its subsidiaries, operates natural gas midstream, and transportation and storage businesses. ETP owns and operates natural gas pipeline systems, and processing and treating plants through which it gathers, compresses, treats, blends, processes, and markets natural gas. It also transports natural gas from various natural gas producing areas through connections with other pipeline systems. In addition, ETP operates natural gas storage facilities; and engages in the wholesale and retail of propane. ETP was founded in 1996 and is based in Dallas, Texas. ETP operates as a subsidiary of Energy Transfer Equity, L.P.

Star Gas Partners, L.P. (SGP) *operates as a home heating oil distributor and services provider in the United States.* It sells home heating oil; installs, maintains, and repairs heating and air conditioning equipment; and markets other petroleum products, including diesel fuel and gasoline. SGP offers its products and services primarily to residential and commercial customers. As of September 30, 2006, SGP served approximately 430,000 home heating oil customers from locations in the northeast and Mid-Atlantic regions. Kestrel Heat, LLC operates as the general partner of the company. SGP was founded in 1995 and is headquartered in Stamford, Connecticut.

Suburban Propane Partners, L.P. (SPP), through its partnerships and subsidiaries, engages in the distribution and marketing of propane, fuel oil, and refined fuels, as well as the marketing of natural gas and electricity in deregulated markets. As of September 30, 2006, SPP served approximately 1,000,000 residential, commercial, industrial, and agricultural customers through approximately 300 locations in 30 states located primarily in the east and west coast regions of the United States. SPP also markets and distributes fuel oil, kerosene, diesel fuel, and gasoline to approximately 136,000 residential and commercial customers in the northeast region of the United States; and natural gas and electricity to approximately 78,000 customers in the deregulated markets of New York and Pennsylvania. In addition, SPP sells, installs, and services various types of whole-house heating and cooling products, air cleaners, humidifiers, de-humidifiers, hearth products, and space heaters to its propane, fuel oil, natural gas, and electricity customers. It also offer services, such as duct cleaning, air balancing, and energy audits to those customers. Suburban Energy Services Group LLC serves as the general partner to SPP. SPP was founded in 1945 and is based in Whippany, New Jersey.

Valuation Adjustments

In order to make comparisons between each respective Reporting Unit and the chosen guideline public companies, the calculated multiples of the guideline entities required adjustments for various differences. Adjustments were necessitated to account for the guideline comparable companies' ranging levels of earnings growth and differences in expected earnings before interest, taxes, depreciation, and amortization ("EBITDA") profitability. Differences in risk are adequately captured in the growth and profitability adjustments.

Margin Adjustment

An adjustment was applied to the guideline comparable companies to account for their varying levels of profitability. The chosen measure for determining profitability in this analysis was earnings before interest, taxes, depreciation, *and amortization ("EBITDA") margin. Accordingly, adjustments were applied to* the Reporting Unit's respective guideline comparable companies' total invested capital to fiscal year ended 2006 revenue multiple.

Growth Adjustment

Similarly, an adjustment was made to the calculated multiples to account for the differences in expected growth rates in earnings between the guideline public companies and each Reporting Unit. The projected five-year earnings per share growth rates were obtained from Multex for the guideline public companies. The Reporting Unit's growth rates were obtained from management's discounted cash flow forecasts. Accordingly, adjustments were applied to the Reporting Unit's respective guideline public companies' total invested capital to fiscal year ended 2006 revenue and EBITDA multiples.

Summary

After making the above adjustments, we applied the lower quartile multiples to each Reporting Unit's revenue and EBITDA. The lower quartile multiples were selected primarily due to the relative size of the Reporting Units compared to the guideline public companies.

Calculation of Value

The complete analyses for each Reporting Unit is set forth on the accompanying indicated schedule section. Accordingly, the fair value of each Reporting Unit is set forth below under the Guideline Public Company Methodology as of the valuation date.

Reporting Unit	Section	Schedule	Fair Value of as of January 1, 2007[1]
Natural Gas Reporting Unit	Appendix D	Schedule 5	$ 72,800,000
Propane Reporting Unit	Appendix E	Schedule 5	$ 19,300,000

[1]The Company does not allocate interest-bearing debt to the Reporting Units. Accordingly, the fair value represents the value of total invested capital (equity plus debt).

Summary and Conclusion

The following table displays the selected fair values for each Reporting Unit using the income approach – discounted cash flow method and the market approach – guideline public company method.

Summary of Selected Fair Values as of January 1, 2007

Reporting Unit	Reporting Unit DCF Value	Reporting Unit GPC Value	Selected Fair Value[1]
Natural Gas Reporting Unit	$ 64,700,000	$ 72,800,000	$ 68,800,000
Propane Reporting Unit	$ 17,100,000	$ 19,300,000	$ 18,200,000

[1]The Company does not allocate interest-bearing debt to the Reporting Units. Accordingly, the fair value represents the value of total invested capital (equity plus debt).

Pursuant to the above analysis, we have placed equal reliance on the income approach - discounted cash flow method and the market approach – guideline public company method to arrive at each Reporting Unit's respective fair value as of the valuation date.

In order to assess on a preliminary basis whether or not goodwill is impaired at the Reporting Unit level, the fair value indicators above must be compared with the carrying value of each Reporting Unit, including goodwill. If the Reporting Unit's fair value is greater than its carrying value, then goodwill is not impaired and no further undertakings are required.

Summary of Reporting Unit Fair Values and Step One Test

Reporting Unit	Fair Value	Carrying Value	Goodwill Impairment
Natural Gas Reporting Unit	$ 68,800,000	$ 55,788,228	No
Propane Reporting Unit	$ 18,200,000	$ 12,314,719	No

[1]The Company does not allocate interest-bearing debt to the Reporting Units. Accordingly, the fair value and carrying value represent the value of total invested capital (equity plus debt).

Accordingly, since the fair value of each Reporting Unit exceeds its carrying value, there is not goodwill impairment pursuant to SFAS 142.

BIOGRAPHIES OF APPRAISERS

DANIEL P HAWN, CPA*/ABV, ASA
DIRECTOR

Summary of Experience

Dan Hawn is a director with RSM McGladrey, Inc., specializing in business valuations and litigation services. He serves as a director of RSM McGladrey's South Florida Business Valuation Group.

Dan has over 12 years of experience performing and managing business valuation engagements for a variety of purposes including financial accounting, purchase price allocations, estate and gift taxes, buy/sell agreements, shareholder redemptions, merger and acquisitions, employee stock ownership plans, S Corporation elections, marital dissolutions, and corporate planning. He has valued closely held business interests in a variety of entities including operating companies, personal holding companies, professional practices, limited partnerships, and limited liability companies. In addition, he has been involved in the valuation of intellectual property and intangible assets, the quantification of applicable minority and/or marketability discounts, and the calculation of lost profits and monetary damages.

Dan is a Certified Public Accountant and has earned the Accredited in Business Valuation (ABV) designation from the American Institute of Certified Public Accountants and the Accredited Senior Appraiser in Business Valuation (ASA) designation from the American Society of Appraisers.

Prior to joining RSM McGladrey, Dan served as a manager for a national and regional consulting firm.

Professional Designations

Certified Public Accountant (CPA), Licensed in the State of Florida and the State of Michigan
Accredited in Business Valuation (ABV), American Institute of Certified Public Accountants
Accredited Senior Appraiser, American Society of Appraisers

Notes:

(1) Note: The above forecasts, based on estimates by the Company's management, have been prepared in connection with a business appraisal and are not intended to conform with accounting standards for the compilation, review, or audit of forecasts or projections.

(2) Because the Reporting Unit had a working capital deficit as of the valuation date, working capital was reduced by the difference between the median working capital for market participants, less the Reporting Unit's actual working capital balance as of the valuation date.

Florida Public Utilities Company
Natural Gas Reporting Unit
Discounted Cash Flow Assumptions

We based the Income Approach on a Discounted Cash Flow Analysis of the Company. We relied primarily on the Reporting Unit's historical financial statements and management's projections as an indicator of cash flow.

A. **Revenue** – Revenue was projected to increase by 1.2%, 4.7%, 7.6%, 3.0%, 3.0%, for 2007 through 2011 and 3.0% for the residual period.

B. **Cost of Revenue** – Cost of revenue was projected to be 61.7% of revenue throughout the projection period.

C. **Depreciation Expense** – Depreciation expense was projected based on management's projection of $4,364,000, $4,495,000, $4,629,000, $4,768,000, and $4,911,000 for 2007 to 2011, respectively. For the residual period, capital expenditures and depreciation were set equal, based on the theory that in the long run, a company will replace its fixed assets as they are retired.

D. **Other Operating Expenses** – Other operating expenses were projected to be 24.5%, 24.7%, 24.1%, 24.3%, and 24.5% of revenue for 2007 through 2011, respectively. Other operating expenses were projected at 24.5% of revenue for the residual period.

E. **Income Tax Expense** – Income tax expense was calculated at an effective tax rate of 37.6%.

F. **Capital Expenditures** – Capital expenditures were forecast at $4.5 million for 2007 through 2009. For 2010, capital expenditures were grown with revenue through 2011. This level of capital expenditures, which is expected to approximate depreciation expense, reflects the necessary maintenance and replacement required to achieve the Reporting Unit's projected revenue. In the residual, capital expenditures and depreciation were set equal based on the theory that in the long run, a company will replace its fixed assets as they are retired.

G. **Working Capital** – Working capital was forecast based on an analysis of the Company's current assets and current liabilities, consideration of future expected working capital needs, and a review of the guideline public companies working capital. Accordingly, incremental working capital was projected at 6.7% of the change in revenue based on the median for the guideline companies.

(1) Note: The above forecasts, based on estimates by the Company's management, have been prepared in connection with a business appraisal and are not intended to conform with accounting standards for the compilation, review, or audit of forecasts or projections.

Florida Public Utilities Company
Propane Reporting Unit
Discounted Cash Flow Assumptions

We based the Income Approach on a Discounted Cash Flow Analysis of the Company. We relied primarily on the Reporting Unit's historical financial statements and management's projection as an indicator of cash flow.

A. **Revenue** –Revenue was projected to increase by 13.9%, 6.5%, 7.3%, 7.0%, 6.7%, for 2007 through 2011 and 4.0% for the residual period.

B. **Cost of Revenue** – Cost of revenue was projected to be 53.0% of revenue throughout the projection period.

C. **Depreciation Expense** – Depreciation expense was projected based on management's projection of $794,000, $847,000, $904,000, $963,000, and $1,025,000 for 2007 through 2011, respectively. In the Residual, depreciation and capital expenditures were set equal to each other based on the theory that in the long run, a company will replace its fixed assets as they are retired.

D. **Other Operating Expenses** – Other operating expenses projected to be 33.2% of revenue for 2007, 33.4% of revenue for 2008, and 33.2% of revenue for the remainder of the projection period.

E. **Other Income** – Other income was projected at 0.1% of revenue throughout the projection period.

F. **Income Tax Expense** – Income tax expense was calculated at an effective tax rate of 37.6%.

G. **Capital Expenditures** – Capital expenditures were projected at $1,594,000, $1,841,000, $1,671,000, $1,649,000, and $1,535,000 for 2007 through 2011, respectively. In the residual, capital expenditures and depreciation were set equal based on the theory that in the long run, a company will replace its fixed assets as they are retired.

H. **Working Capital** – Working capital was forecast based on an analysis of the Company's current assets and current liabilities, consideration of future expected working capital needs, and a review of the guideline public companies working capital. Accordingly, incremental working capital was projected at 5.0% of the change in revenue based on the median for the guideline companies.

Florida Public Utilities

$15mm 6.850% due 10/01/31

Refunding Savings Analysis

Refunding Comparison

Florida Public Utilities	Current Bonds	Refunding Bonds	Difference
Principal	$15,000,000	$15,000,000	
Maturity	10/1/2031	12/15/2036	5.2 yr
Coupon	**6.85%**	**5.90%**	**-0.95%**
Annual Interest Expense	$1,027,500	$885,000	-$142,500
U/W Fee		3.15%	
PV Bond Insurance	n/a	0.15%	
All-In Cost	**6.85%**	**6.43%**	**-0.42%**
NPV Savings through Initial Maturity			**$762,252**

Highlights

? **The average coupon is reduced by .95% resulting in annual savings of $142,500 and NPV savings of $0.76 million.**

? **The all-in cost of debt is reduced by 0.42%.**

? **This structure retains short-term, par call flexibility (no call 5 yrs)**

? **The refunding bonds include an estate feature limited annually to $25,000 per holder and to 1.0% of the original principal amount in the aggregate.**

Marc,
We need to have this in the builder's hands by Friday or they have stated they will go all electric. Sorry for the short timeframe but we just received an email stating they are ahead of schedule on this project.

BUILDER AGREEMENT

THIS BUILDER AGREEMENT (this "Agreement") is made and entered into effective this ____ day of___________, 2007 (the "Effective Date"), by and between Florida Public Utilities Company, a Florida corporation ("Company"), and Morrison Homes, a Florida corporation ("Builder") (Company and Builder may sometimes be collectively referred to as the "Party" or "Parties").

WITNESSETH

WHEREAS, Builder intends to build a community named Wellington Woods, consisting of, among other improvements, approximately one hundred forty-seven (147) residences, located in Volusia County, Florida (the "Project"). A legal description of the Project is attached hereto as Exhibit "A" and incorporated herein by this reference; and

WHEREAS, Company desires to install a natural gas distribution system within the Project in order to make service available from time to time to owners, occupants and residents of the Project and Builder has agreed to permit Company to install such a system to service the Project, pursuant to the terms and conditions hereinafter set forth.

NOW, THEREFORE, in consideration of the mutual covenants set forth herein, and for other good and valuable considerations, the receipt and sufficiency of which are hereby acknowledged, Company and Builder hereby agree as follows.

1. **Installation of Gas Distribution System**.

1.1. Installation. Company agrees to install a natural gas distribution system within the residential portions of the Project, including all necessary distribution lines, meters and ancillary facilities (collectively, the "Gas Distribution System") as Company deems reasonably necessary to provide natural gas service to owners, occupants and residents within the Project. From time to time, Company shall install additional lines, meters and ancillary facilities ("System Extensions") which Company deems reasonably necessary to extend the Gas Distribution System to other areas of the Project in order to supply gas service to non-residential portions of the Project that apply for and qualify for gas service from Company. For purposes of this Agreement, the term "Gas Distribution System" shall include any System Extensions that are added by Company.

1.2. Location. The location of the gas lines and all infrastructure and improvements relating to the Gas Distribution System shall be subject to Builder's prior written approval, which approval shall not be unreasonably withheld or delayed. Prior to commencing installation of the Gas Distribution System, Company shall provide, for Builder's review and comment, plans and specifications in accordance with which the Gas Distribution System is to be installed ("Gas Distribution System Plans and Specifications"). Upon completion of installation of each three thousand (3000) linear feet of the Gas Distribution System (each being a, "Completed Portion"), Company shall commence restoration of those portions of the Project disturbed by Company during installation of the Completed Portion and shall continue diligently such restoration work until complete. Restoration work shall be completed so that the surface of the land shall be restored to substantially the same condition existing immediately prior to commencement of the installation of the Completed Portion.

1.3. Preparation for Installation and Easements.

1.3.1. Builder agrees to provide adequate physical and legal access (including the easements described below) to all areas of the Project where portions of the Gas Distribution System are to be installed and such additional portions of the project as are reasonably necessary for Company to access, maintain and operate the Gas Distribution System. Within fifteen (15) days after Builder approves the location of all or any portion of the Gas Distribution System (in accordance with Section 1.2 hereof), Builder shall grant to Company (or cause the owner of the appropriate property to grant to Company) such easements as are reasonably necessary for Company to construct, operate, maintain and repair the Gas Distribution System within the Project.

1.3.2. Builder has provided Company a plat of all or a portion of the Project (recorded in Official Records Book ______, Page ______, Public Records of Volusia County, Florida), which depicts the location of streets, lots and easements encompassed therein (the "Plat"). If additional plats ("Additional Plats") are created for the Project, Builder shall provide Company a copy thereof within ten (10) days after recording. The Plat and all Additional Plats (whether or not provided to Company) shall be collectively referred to herein as "Project Plats". Notwithstanding any provision contained herein to the contrary and in addition to the easements referenced in Section 1.3.1 hereof, Builder hereby grants Company an easement over those portions of the Project designated on Project Plats as a utility easement or right-of-way (public or private) (or other similar designations) for purposes of installing, operating, maintaining, repairing and replacing the Gas Distribution System.

1.3.3. Builder reserves the right to relocate any easement granted to Company if Builder deems such relocation to be necessary for the development of the Project. If Company has not installed the portion of the Gas Distribution System proposed to be installed in the relocated easement, but has commenced the design and engineering thereof prior to the date Company receives written notice from Builder of its desire to amend an easement, Builder shall be required (prior to amendment of the easement) to reimburse Company for Company's actual, out-of-pocket expenses incurred in redesigning and/or reengineering the applicable portion of the Gas Distribution System. If Builder desires to relocate any easement relating to a portion of the Gas Distribution System after the system has been installed, Builder must first, (i) obtain Company prior written consent (which consent shall not be unreasonably withheld or delayed) and (ii) reimburse Company for all costs incurred by Company in relocating the Gas Distribution System, including, but not limited to the cost of redesigning and/or reengineering the Gas Distribution System, and the cost of all materials and labor therefore.

1.4. Coordination of Installation. Company agrees to cooperate with Builder with respect to the construction of the Gas Distribution System so as to minimize interference with or delay to Builder's construction and development of the Project. Builder has provided Company a copy of its anticipated construction schedule for the Project, a true and correct copy of which is attached hereto as Exhibit "B" and incorporated herein (the "Builder's Construction Schedule"). Builder acknowledges that Company will rely upon the Builder's Construction Schedule for purposes of coordinating its acquisition of materials, mobilization of equipment and labor at the worksite and installation of the Gas Distribution System.

1.5. Ownership of Gas Distribution System; Maintenance. Notwithstanding any provision contained herein to the contrary, the Gas Distribution System shall remain the exclusive property of Company at all times during the term of this Agreement and following its expiration or earlier termination. Company shall have the sole obligation and responsibility for the maintenance of the Gas Distribution System. Company shall at all times maintain the Gas Distribution System in accordance with the requirements of all appropriate governmental and regulatory agencies.

1.6. Supply Date. Subject to any delay caused by Force Majeure or the actions or inactions of Builder, Company agrees that the Gas Distribution System shall be complete and operational to provide natural gas service to the first completed residential structure utilizing natural gas service, in the Project, at least ten (10) calendar days prior to the issuance of Certificate of Occupancy (CO) for the first residential structure within the Project.

2. Minimum Gas Compliant Units; Installation of Internal Piping

2.1. Minimum GCU.

2.1.1. Builder acknowledges that Company will make a substantial economic investment in order to construct the Gas Distribution System and that Company is willing to undertake such investment given Company's anticipated usage of the Gas Distribution System by current and future owners, occupants or residents in the Project. In consideration for the substantial investment made by Company in constructing the Gas Distribution System and the mutual covenants contained herein, Builder agrees that at least one hundred forty (140) residential units ("Minimum Required GCU") in the Project shall have installed therein (a) 50-gallon gas water heater, (b) gas central heating or hydro heat system, and (c) a gas range or gas cook top/wall oven combination. In addition, Builder agrees that all model and speculative residential units in the Project shall have installed therein the GCU minimum, plus at least one additional gas appliance, i.e., gas fireplace, gas dryer, gas summer kitchen or gas spa /pool heater. Each residential unit constructed in compliance with the foregoing two (2) sentences shall be referred to herein as a "Gas Compliant Unit" or "GCU" and each of the appliances installed in a GCU shall be referred to herein as an "Appliance" and collectively as the "Appliances".

2.1.2. Builder shall, within fifteen (15) days after completion of the last GCU in the Project, pay Company an omission fee ("Omission Fee") equal to the Omission Rate (as hereinafter defined) multiplied by the integer obtained by subtracting the actual number of GCU in the Project from the Minimum Required GCU. The Omission Rate shall equal <u>$570.00</u> x (1+ (Time x .04)). Time shall mean the number of years (and partial years) between the Effective Date and the date upon which the Omission Fee is paid. Nothing contained in this Section 2.1.2 shall be construed as limiting other remedies available to Company as result of the Builder's failure to comply with the Minimum Required GCU requirement set forth herein.

2.2. <u>Installation</u>. Builder shall provide all labor, materials, equipment and supervision to install (at no cost to Company) each Appliance. Company shall provide all gas internal piping, venting and other equipment (the "Internal Piping") necessary to service the gas appliances installed in each GCU and to connect same to the external gas meter installed by Company at an external location (reasonably selected by Company) at each GCU.

2.2.1. <u>Optional Additional piping.</u> At the request of owner or Authorized Builder, whichever is applicable, the Company shall install any or all of the optional piping and/or apparatus (the "Optional Piping and Facilities") in any qualified Unit, provided owner or Authorized Builder provides company sufficient notice such that it may install the Optional piping and Facilities simultaneously with installation of the qualified Unit Connection and Piping.

2.2.2. Owner or Builder shall reimburse Company for the cost of installation of the Optional Piping and Facilities in accordance with Exhibit "C." For purposes of this Agreement, references to the "Qualified Unit Connection and Piping" shall include any Optional Piping and Facilities requested to be installed by owner or authorized Builder.

2.3. <u>Ownership of Internal Piping, Appliances and External Piping</u>.

2.3.1. All piping, meters, vents and other equipment installed by company between the main line of the Gas Distribution System and the external meter installed by Company at each GCU (including such meter) (the "External Piping") shall be the exclusive property of the Company. Company shall at all times maintain the External Piping, including the meter, in accordance with the requirements of all appropriate governmental agencies.

2.3.2. The Internal Piping and the Appliances shall be the exclusive property of the Builder and its successors and assigns. Builder or the successor or assign of Builder with respect to each GCU shall at all times during and following the expiration or earlier termination of this Agreement, service, maintain, repair and replace the Internal Piping and the Appliances.

3. **Successors, Assigns And Assignment**. The Builder and the Company each bind itself, its successors, assigns and legal representatives to the other party in respect to all covenants, agreements and obligations contained in this Agreement. If Builder desires to convey to other builders or Builders any or all of the land upon which the Project is to be constructed, such conveyance may not be undertaken and shall not be effective until such builder or Builder expressly assumes all of the obligations and responsibilities of Builder hereunder (to the reasonable satisfaction of Company). Similarly, if Builder desires to assign this Agreement or any portion hereof to a homeowner's association, as a condition of such assignment, the homeowner's association shall pass a valid and appropriate resolution expressly assuming all of the obligations and responsibilities of Builder hereunder (such resolution being to the reasonable satisfaction of Company).

4. **Force Majeure**. Neither Party shall be liable to the other for any failure to perform pursuant to the terms and conditions of this Agreement to the extent such performance was prevented by an event of Force Majeure. The term "Force Majeure" shall mean Acts of God, strikes, lockouts, or other industrial disturbance, acts of the public enemy, wars, riots, epidemics, industrial disturbances that affect the Parties or its customers, breakage or non-foreseeable accident to machinery or lines of pipe, and any other causes, whether of the kind herein enumerated or otherwise, not within the control of the Party whose performance is affected and which, in each of the above cases, by the exercise of due diligence such Party is unable to prevent or overcome utilizing commercially reasonable efforts; such term shall likewise include the inability of a Party to acquire, or delays on the part of such Party in acquiring at reasonable cost and by the exercise of reasonable diligence, servitudes, rights of way, grants, permits, permissions, licenses, materials or supplies which are required to enable such Party to fulfill its obligations hereunder. The Party whose performance is excused by an event of Force Majeure shall promptly notify the other Party in writing of such occurrence and its estimated duration, shall promptly remedy such Force Majeure if and to the extent reasonably possible and shall resume such performance as soon as possible; provided, however, that neither Party shall be required to settle any labor dispute against its will.

5. **Duration**.

5.1. Expiration; Automatic Extension. Subject to Subsection 5.2 hereof, this Agreement shall automatically expire on June 1, 2017. The term of this Agreement shall be automatically extended for terms of one (1) year periods unless written notice is provided at least ninety (90) days but no greater than one hundred twenty (120) days prior to the expiration of the initial term of this Agreement or any extension thereto by one Party to the other Party that it will not allow the extension of the term of this Agreement.

5.2. Early Termination. Notwithstanding any provision contained herein to the Contrary, either Party may terminate this Agreement by providing the other at least fifteen (15) days prior written notice if the Minimum Required GCU has been constructed and Company has made the GCU Payment thereof.

5.3. Survival of Easements. Notwithstanding the expiration or earlier termination of this Agreement (regardless of the cause therefore), the easements created herein and required to be granted herein shall survive, and the rights, privileges and responsibilities created therein shall not be adversely affected by, the termination or expiration of this Agreement

6. **Notices**. Any notices sent by either party to the other pursuant to this Agreement shall be sent by either U.S. mail, postage prepaid, return requested, or by receipted overnight national delivery service (e.g., Federal Express), and shall, if not sooner received, be deemed received three (3) business days after deposit in the United States Mail, or one business day after receipt by any overnight national delivery service, as aforesaid. All notices shall be addressed to each party at the following address, or such other address as either party may hereafter designate to the other party in writing:

If to Builder:	Morrison Homes Orlando 151 Southhall Lane, Suite 200 Maitland, FL 32751-7172 Attn: Steven R. Earl, Vice President, Purchasing Fax No. 407.629.5282 Phone No. 407.629.0077
If to Company:	Florida Public Utilities Company 401 South Dixie Highway West Palm Beach, Florida 33401-5807 Attn: Marc Seagrave, Director of Marketing Fax No. 561.833.8562 Phone No. 561.838.1714
With a copy to:	Florida Public Utilities Company 450 South Highway 17-92

Debary, FL 32713
Attn: Donald Kitner, Director
Fax No. 386.668.2692
Phone No. 386-668-2600

7. **Governing Law: Dispute Resolution**. This Agreement shall be governed by and construed in accordance with the laws of the State of Florida without reference to the laws of any other jurisdiction. Builder and Company agree to submit any disputes arising under this agreement to non-binding mediation; provided, that applicable statutes of limitation will be tolled during the pendency of such mediation. In the event Company and Builder cannot in good faith agree on a mediator within fifteen (15) days of the request of either party for mediation, or, if the parties remain in dispute following mediation, any such dispute will be resolved by final, binding arbitration. Arbitration shall be accomplished expeditiously in Orange County, Florida, and shall be conducted by the American Arbitration Association (in accordance with its rules) which will appoint three arbitrators, one of which must be an attorney. The arbitrators shall render a written judgment accompanied by findings of fact and conclusions of law, which are subject to review by the appellate courts of the State of Florida. Judgment upon the award rendered by the arbitrator(s) may be entered in any Court having jurisdiction thereof. The parties shall share equally the arbitrators' fees and costs until the prevailing party is determined or the parties have agreed in writing to an alternate allocation of fees and costs. In any suit or arbitration proceeding brought by either party, the prevailing party will be entitled to recover attorneys' fees, costs and expenses actually incurred by the prevailing party in such suit or arbitration proceeding or in any appeal. The parties consent that any arbitration may be consolidated with any other arbitration concerning this Agreement to which Company or Builder is a party and that a dispute shall not be submitted to such binding arbitration if there are any third parties who are not subject to such binding arbitration but who are proper parties to such dispute. This Section 8 shall survive expiration or any termination of this Agreement.

8. **Indemnity**.

    8.1. Company agrees to protect, defend, reimburse, indemnify and hold the Builder, its agents and employees and each of them, hereinafter collectively referred to, for the purposes of this paragraph, as Builder, free and harmless from and against any and all claims or damages (including attorneys' fees) incurred by Builder by reason of the negligent or intentional installation of the Gas Distribution System by Company; provided however, that Company shall not be responsible to Builder for damages resulting out of bodily injury or damages to property which are attributable to the negligent acts or omissions of Builder, its respective agents, servants, employees, officers, tenants, residents or homeowners.

    8.2. Builder agrees to protect, defend, reimburse, indemnify and hold the Company, its agents, and employees and each of them, hereinafter collectively referred to, for the purposes of this paragraph, as Company, free and harmless from and against any and all claims or damages (including attorneys' fees) incurred by Company by reason of the negligent or intentional acts of Builder and its respective agents, servants, employees, officers, tenants, residents or homeowners; provided however, that Builder shall not be responsible to Company for damages resulting out of bodily injury or damages to property which are attributable to the negligent acts or omissions of Company.

8.3. This Section 8 shall survive the expiration or early termination of this Agreement.

9. **Damages to Property; Limitation on Liability**.

9.1. Any damage to the Project caused by Company, its agents or employees, shall be promptly repaired to the reasonable satisfaction of Builder at Company's expense. Any damage caused to Company's equipment by Builder, its agents, employees, contractors, subcontractors, tenants, residents or homeowners shall be promptly repaired by Company at Builder's expense. Builder will take all reasonable precautions to notify its agents, employees, contractors, subcontractors, tenants, residents and homeowners of the location of Company's equipment.

9.2. Company shall have no liability to Builder or any third party for any special, indirect, incidental or consequential damages or loss of any kind, including, without limitation, damages for personal injury, loss of profits or savings, loss of use, or any other damages, whether based on strict liability, or negligence, whether resulting from installation, use or maintenance of the Gas Distribution System, breach of this Agreement or otherwise, except for direct, specific damages to the extent caused by Company's negligence or misconduct.

10. **Miscellaneous**. This Agreement constitutes the entire understanding and agreement between the Parties and supersedes any and all prior negotiations, understandings or agreements with respect to this subject matter. This Agreement may be amended only by written instrument signed by both of the Parties. Whenever possible, each provision of this Agreement shall be interpreted in such manner as to be effective and valid under Florida law, but if any provision of this Agreement or the application thereof to any Party or circumstance is prohibited by or invalid under applicable law, that provision shall be effective only to the extent of such prohibition or invalidity, without invalidating the remaining provisions of this Agreement or the application of the same. Nothing contained herein shall be construed as a joint venture, partnership or any other similar relationship between Company and Builder. The captions, headings, titles, and subtitles herein are inserted for convenience of reference only and are to be ignored in any construction of the provisions of this Agreement. This Agreement shall be binding upon, and shall inure to the benefit of, the Parties, and their respective successors and assigns, and no assignment shall relieve either Party of such Party's obligations hereunder without written consent of the other Party. This

Agreement shall be subject to all applicable laws, rules, orders, permits, and regulations of any federal, state, or local governmental authority having jurisdiction over the Parties, their facilities, or the transactions contemplated. This Agreement may be executed in one or more counterparts, each of which shall be deemed to be an original, but all of which together shall constitute one in the same instrument.

11. **<u>Recording</u>**. This Agreement may be recorded by Company among the Public Records of the County in which the Project is located.

12. **<u>Exclusivity</u>**. During the term of this Agreement and for any subsequent terms thereafter, Builder agrees that Company has an exclusive right to provide natural gas services to the Project and that Builder will not grant, or allow others to grant any easement or right-of-way for purposes of delivering natural gas service. Builder certifies that there is no existing contractual agreement with any third party for the provision of natural gas service to the Project, with the exception of this Agreement.

[remainder of page intentionally left blank]

IN WITNESS WHEREOF, the Parties have caused this Agreement to be signed by their respective duly authorized officers as of the date first above written.

Marc,
We need to have this in the builder's hands by Friday or they have stated they will go all electric. Sorry for the short timeframe but we just received an email stating they are ahead of schedule on this project.

Instructions for using the AEP & Net Present Value (NPV) Templates

Revised 5/18/2005

OBJECTIVE

The AEP & Net Present Value (NPV) Templates are to be used as an analytical tool for evaluating potential revenue generating investments and to determine the AEP surcharge rate for the recovery of the Excess Construction Costs.

INPUT

The general input areas are shaded in light blue - all relevant cells should be updated for all projects. Enter data as follows:

1	**Project Name**	Short description of investment.
2	**Beginning In Year**	Projected year that the project will commence.
3	**Piping Allowance**	Estimated Piping Allowance per class of customer if not capitalized (see note 24).
4	**Occupancy Rate**	Anticipated occupancy level.
5	**Cost of Service per Customer**	Estimated cost of providing service to each class of customer.
6	**Mains**	Cost of installing main per year.
7	**New Residential Customers**	Estimated residential customer added each month for each year.
8	**Therms per Customer each Month**	Average monthly therms per residential customer.
9	**New General Service Customers**	Estimated General Service customers added each month for each year.
10	**Therms per Customer each Month**	Average monthly therms per General Service customer.
11	**New Large Volume Customers**	Estimated Large Volume customer added each month for each year.
12	**Therms per Customer each Month**	Average monthly therms per Large Volume customer.
13	**Gas Lighting Service**	Estimated other customer added each month for each year.
14	**Therms per Customer each Month**	Average monthly therms per other customer.
15	**Customer Charge**	Estimated Customer Charge for Other Customers added.
16	**Other Income**	Other "non base revenue" estimated positive cash flows to be generated by the project for each year. Note - pass-through revenues, such as fuel and gross receipts tax are not to be included.
17	**Other Expenses**	Other expenses estimated to be incurred from the project for each year eg Sales Rep Commissions. Note - pass-through expenses, such as fuel and gross receipts tax are not to be included.
18	**AEP Worksheet**	Enter AEP surcharge rate that provides cost recovery within 8-10 years.

GENERAL INFORMATION

19 Contracts with Access Fees (up-front payments to Developers) should be carefully worded to ensure that there is a corresponding clause for a penalty for units not connected. The payments to the Developer should be entered on the cash flow analysis as a capital expenditure in the year that it is anticipated that the payment will be made. The access fee should be treated as an up-front capital expenditure.

20 On the Income Statement Section of the NPV analysis it is assumed that the up-front access fee, including piping allowance (capitalized) will be depreciated at the same rate as the other capital expenditure items. The actual contract, however, should be worded such that it allows us to depreciate the piping allowance over the life of the contract.

Instructions for using the AEP & Net Present Value (NPV) Templates

NPV MODEL ASSUMPTIONS

25 Inflation is not included in either revenues or expenses - null effect, in addition to which the discount rate includes the inflation risk.

26 Asset Remaining Value - represents the value of the investment at the end of the analysis. Can also be seen as representative of the future income streams beyond the time frame of the template. For regulated companies it is calculated as the average of the last three years Net Income Before Interest, Taxes and Depreciation times a multiplier of 8. A multiplier of 6 is used for non-regulated projects.

27 Required Return - WACC as per Year End Survellance Report using Cost of Equity Rate as per last Rate Case.

28 Ratio of Debt Financing - assumes that future projects will be financed by debt and equity equally.

29 O&M Expenses - "R" = 31% Base Revenue "NR" = 35% Base Revenue (Budgeted Expenses). For acquisitions this percentage can be replaced by a $ amount by entering the estimated O&M expenses in cell B94.

30 Interest Rate - Weighted Average Cost of Debt.

31 Depreciation Book % - Book Depreciation Rate.

32 Income Tax % - Income Tax Rate.

PROCESS

33 **Ensure that the variables, such as rates, are correct and review to ensure that the results, such as revenues and expenses seem reasonable.**

34 Submit NPV (& AEP) worksheets for approval as per steps below.

35 Prepare IR after approval has been granted.

36 Submit approved IR , AEP worksheet and NPV to General Accounting.

37 A copy of all approved NPVs and AEPs must also be forwarded to the Accounting Department for the attention of the Executive Assistant.

Marc,
We need to have this in the builder's hands by Friday or they have stated they will go all electric. Sorry for the short timeframe but we just received an email stating they are ahead of schedule on this project.

Don Kitner

DEVELOPER AGREEMENT

THIS DEVELOPER AGREEMENT (this "Agreement") is made and entered into effective this ____ day of___________, 2007 (the "Effective Date"), by and between Florida Public Utilities Company, a Florida corporation ("Company"), and Earley Development, Inc., a Florida corporation ("Developer") (Company and Developer may sometimes be collectively referred to as the "Party" or "Parties").

WITNESSETH

WHEREAS, Developer intends to build a community named Wellington Woods, consisting of, among other improvements, approximately one hundred forty-seven (147) residences, located in Volusia County, Florida (the "Project"). A legal description of the Project is attached hereto as Exhibit "A" and incorporated herein by this reference; and

WHEREAS, Company desires to install a natural gas distribution system within the Project in order to make service available from time to time to owners, occupants and residents of the Project and Developer has agreed to permit Company to install such a system to service the Project, pursuant to the terms and conditions hereinafter set forth.

NOW, THEREFORE, in consideration of the mutual covenants set forth herein, and for other good and valuable considerations, the receipt and sufficiency of which are hereby acknowledged, Company and Developer hereby agree as follows.

1. **Installation of Gas Distribution System**.

   1.1. Installation. Company agrees to install a natural gas distribution system within the residential portions of the Project, including all necessary distribution lines, meters and ancillary facilities (collectively, the "Gas Distribution System") as Company deems reasonably necessary to provide natural gas service to owners, occupants and residents within the Project. From time to time, Company shall install additional lines, meters and ancillary facilities ("System Extensions") which Company deems reasonably necessary to extend the Gas Distribution System to other areas of the Project in order to supply gas service to non-residential portions of the Project that apply for and qualify for gas service from Company. For purposes of this Agreement, the term "Gas Distribution System" shall include any System Extensions that are added by Company.

   1.2. Location. The location of the gas lines and all infrastructure and improvements relating to the Gas Distribution System shall be subject to Developer's prior written approval, which approval shall not be unreasonably withheld or delayed. Prior to commencing installation of the Gas Distribution System, Company shall provide, for Developer's review and comment, plans and specifications in accordance with which the Gas Distribution System is to be installed ("Gas Distribution System Plans and Specifications"). Upon completion of installation of each three thousand (3000) linear feet of the Gas Distribution System (each being a, "Completed Portion"), Company shall commence restoration of those portions of the Project disturbed by Company during installation of the Completed Portion and shall continue diligently such restoration work until complete. Restoration work shall be completed so that the surface of the land shall be restored to substantially the same condition existing immediately prior to commencement of the installation of the Completed Portion.

1.3. Preparation for Installation and Easements.

1.3.1. Developer agrees to provide adequate physical and legal access (including the easements described below) to all areas of the Project where portions of the Gas Distribution System are to be installed and such additional portions of the project as are reasonably necessary for Company to access, maintain and operate the Gas Distribution System. Within fifteen (15) days after Developer approves the location of all or any portion of the Gas Distribution System (in accordance with Section 1.2 hereof), Developer shall grant to Company (or cause the owner of the appropriate property to grant to Company) such easements as are reasonably necessary for Company to construct, operate, maintain and repair the Gas Distribution System within the Project.

1.3.2. Developer has provided Company a plat of all or a portion of the Project (recorded in Official Records Book ______, Page ______, Public Records of Volusia County, Florida), which depicts the location of streets, lots and easements encompassed therein (the "Plat"). If additional plats ("Additional Plats") are created for the Project, Developer shall provide Company a copy thereof within ten (10) days after recording. The Plat and all Additional Plats (whether or not provided to Company) shall be collectively referred to herein as "Project Plats". Notwithstanding any provision contained herein to the contrary and in addition to the easements referenced in Section 1.3.1 hereof, Developer hereby grants Company an easement over those portions of the Project designated on Project Plats as a utility easement or right-of-way (public or private) (or other similar designations) for purposes of installing, operating, maintaining, repairing and replacing the Gas Distribution System.

1.3.3. Developer reserves the right to relocate any easement granted to Company if Developer deems such relocation to be necessary for the development of the Project. If Company has not installed the portion of the Gas Distribution System proposed to be installed in the relocated easement, but has commenced the design and engineering thereof prior to the date Company receives written notice from Developer of its desire to amend an easement, Developer shall be required (prior to amendment of the easement) to reimburse Company for Company's actual, out-of-pocket expenses incurred in redesigning and/or reengineering the applicable portion of the Gas Distribution System. If Developer desires to relocate any easement relating to a portion of the Gas Distribution System after the system has been installed, Developer must first, (i) obtain Company prior written consent (which consent shall not be unreasonably withheld or delayed) and (ii) reimburse Company for all costs incurred by Company in relocating the Gas Distribution System, including, but not limited to the cost of redesigning and/or reengineering the Gas Distribution System, and the cost of all materials and labor therefore.

1.4. Coordination of Installation. Company agrees to cooperate with Developer with respect to the construction of the Gas Distribution System so as to minimize interference with or delay to Developer's construction and development of the Project. Developer has provided Company a copy of its anticipated construction schedule for the Project, a true and correct copy of which is attached hereto as Exhibit "B" and incorporated herein (the "Developer's Construction Schedule"). Developer acknowledges that Company will rely upon the Developer's Construction Schedule for purposes of coordinating its acquisition of materials, mobilization of equipment and labor at the worksite and installation of the Gas Distribution System.

1.5. Ownership of Gas Distribution System; Maintenance. Notwithstanding any provision contained herein to the contrary, the Gas Distribution System shall remain the exclusive property of Company at all times during the term of this Agreement and following its expiration or earlier termination. Company shall have the sole obligation and responsibility for the maintenance of the Gas Distribution System. Company shall at all times maintain the Gas Distribution System in accordance with the requirements of all appropriate governmental and regulatory agencies.

1.6. Supply Date. Subject to any delay caused by Force Majeure or the actions or inactions of Developer, Company agrees that the Gas Distribution System shall be complete and operational to provide natural gas service to the first completed residential structure utilizing natural gas service, in the Project, at least ten (10) calendar days prior to the issuance of Certificate of Occupancy (CO) for the first residential structure within the Project.

2. **Successors, Assigns And Assignment**. The Developer and the Company each bind itself, its successors, assigns and legal representatives to the other party in respect to all covenants, agreements and obligations contained in this Agreement. If Developer desires to convey to other Developers or Developers any or all of the land upon which the Project is to be constructed, such conveyance may not be undertaken and shall not be effective until such Developer or Developer expressly assumes all of the obligations and responsibilities of Developer hereunder (to the reasonable satisfaction of Company). Similarly, if Developer desires to assign this Agreement or any portion hereof to a homeowner's association, as a condition of such assignment, the homeowner's association shall pass a valid and appropriate resolution expressly

assuming all of the obligations and responsibilities of Developer hereunder (such resolution being to the reasonable satisfaction of Company).

3. **Force Majeure**. Neither Party shall be liable to the other for any failure to perform pursuant to the terms and conditions of this Agreement to the extent such performance was prevented by an event of Force Majeure. The term "Force Majeure" shall mean Acts of God, strikes, lockouts, or other industrial disturbance, acts of the public enemy, wars, riots, epidemics, industrial disturbances that affect the Parties or its customers, breakage or non-foreseeable accident to machinery or lines of pipe, and any other causes, whether of the kind herein enumerated or otherwise, not within the control of the Party whose performance is affected and which, in each of the above cases, by the exercise of due diligence such Party is unable to prevent or overcome utilizing commercially reasonable efforts; such term shall likewise include the inability of a Party to acquire, or delays on the part of such Party in acquiring at reasonable cost and by the exercise of reasonable diligence, servitudes, rights of way, grants, permits, permissions, licenses, materials or supplies which are required to enable such Party to fulfill its obligations hereunder. The Party whose performance is excused by an event of Force Majeure shall promptly notify the other Party in writing of such occurrence and its estimated duration, shall promptly remedy such Force Majeure if and to the extent reasonably possible and shall resume such performance as soon as possible; provided, however, that neither Party shall be required to settle any labor dispute against its will.

4. **Duration**.

   4.1. Expiration; Automatic Extension. Subject to Subsection 4.2 hereof, this Agreement shall automatically expire on June 1, 2017. The term of this Agreement shall be automatically extended for terms of one (1) year periods unless written notice is provided at least ninety (90) days but no greater than one hundred twenty (120) days prior to the expiration of the initial term of this Agreement or any extension thereto by one Party to the other Party that it will not allow the extension of the term of this Agreement.

   4.2. Early Termination. Notwithstanding any provision contained herein to the Contrary, either Party may terminate this Agreement by providing the other at least fifteen (15) days prior written notice if the Minimum Required GCU has been constructed and Company has made the GCU Payment thereof.

   4.3. Survival of Easements. Notwithstanding the expiration or earlier termination of this Agreement (regardless of the cause therefore), the easements created herein and required to be granted herein shall survive, and the rights, privileges and responsibilities created therein shall not be adversely affected by, the termination or expiration of this Agreement

5. **Notices**. Any notices sent by either party to the other pursuant to this Agreement shall be sent by either U.S. mail, postage prepaid, return requested, or by receipted

overnight national delivery service (e.g., Federal Express), and shall, if not sooner received, be deemed received three (3) business days after deposit in the United States Mail, or one business day after receipt by any overnight national delivery service, as aforesaid. All notices shall be addressed to each party at the following address, or such other address as either party may hereafter designate to the other party in writing:

If to Developer:	Earley Development, Inc. 337 Ferncreek Avenue Orlando, FL 32803 Attn: Thorpe Earley, Principal Fax No. 407.898.8229 Phone No. 407.898.0023
If to Company:	Florida Public Utilities Company 401 South Dixie Highway West Palm Beach, Florida 33401-5807 Attn: Marc Seagrave, Director of Marketing Fax No. 561.833.8562 Phone No. 561.838.1714
With a copy to:	Florida Public Utilities Company 450 South Highway 17-92 Debary, FL 32713 Attn: Donald Kitner, Director Fax No. 386.668.2692 Phone No. 386-668-2600

6. **Governing Law: Dispute Resolution**. This Agreement shall be governed by and construed in accordance with the laws of the State of Florida without reference to the laws of any other jurisdiction. Developer and Company agree to submit any disputes arising under this agreement to non-binding mediation; provided, that applicable statutes of limitation will be tolled during the pendency of such mediation. In the event Company and Developer cannot in good faith agree on a mediator within fifteen (15) days of the request of either party for mediation, or, if the parties remain in dispute following mediation, any such dispute will be resolved by final, binding arbitration. Arbitration shall be accomplished expeditiously in Orange County, Florida, and shall be conducted by the American Arbitration Association (in accordance with its rules) which will appoint three arbitrators, one of which must be an attorney. The arbitrators shall render a written judgment accompanied by findings of fact and conclusions of law, which are subject to review by the appellate courts of the State of Florida. Judgment upon the award rendered by the arbitrator(s) may be entered in any Court having jurisdiction thereof. The parties shall share equally the arbitrators' fees and costs until the prevailing party is determined or the parties have agreed in writing to an alternate allocation of fees and costs. In any suit or arbitration proceeding brought by either party, the prevailing party will be entitled to recover

attorneys' fees, costs and expenses actually incurred by the prevailing party in such suit or arbitration proceeding or in any appeal. The parties consent that any arbitration may be consolidated with any other arbitration concerning this Agreement to which Company or Developer is a party and that a dispute shall not be submitted to such binding arbitration if there are any third parties who are not subject to such binding arbitration but who are proper parties to such dispute. This Section 8 shall survive expiration or any termination of this Agreement.

7. **<u>Indemnity</u>.**

7.1. Company agrees to protect, defend, reimburse, indemnify and hold the Developer, its agents and employees and each of them, hereinafter collectively referred to, for the purposes of this paragraph, as Developer, free and harmless from and against any and all claims or damages (including attorneys' fees) incurred by Developer by reason of the negligent or intentional installation of the Gas Distribution System by Company; provided however, that Company shall not be responsible to Developer for damages resulting out of bodily injury or damages to property which are attributable to the negligent acts or omissions of Developer, its respective agents, servants, employees, officers, tenants, residents or homeowners.

7.2. Developer agrees to protect, defend, reimburse, indemnify and hold the Company, its agents, and employees and each of them, hereinafter collectively referred to, for the purposes of this paragraph, as Company, free and harmless from and against any and all claims or damages (including attorneys' fees) incurred by Company by reason of the negligent or intentional acts of Developer and its respective agents, servants, employees, officers, tenants, residents or homeowners; provided however, that Developer shall not be responsible to Company for damages resulting out of bodily injury or damages to property which are attributable to the negligent acts or omissions of Company.

7.3. This Section 7 shall survive the expiration or early termination of this Agreement.

8. **<u>Damages to Property; Limitation on Liability</u>.**

8.1. Any damage to the Project caused by Company, its agents or employees, shall be promptly repaired to the reasonable satisfaction of Developer at Company's expense. Any damage caused to Company's equipment by Developer, its agents, employees, contractors, subcontractors, tenants, residents or homeowners shall be promptly repaired by Company at Developer's expense. Developer will take all reasonable precautions to notify its agents, employees, contractors, subcontractors, tenants, residents and homeowners of the location of Company's equipment.

FPU Initials: ______
Date: ______
Developer Initials: ______
Date: ______

8.2. Company shall have no liability to Developer or any third party for any special, indirect, incidental or consequential damages or loss of any kind, including, without limitation, damages for personal injury, loss of profits or savings, loss of use, or any other damages, whether based on strict liability, or negligence, whether resulting from installation, use or maintenance of the Gas Distribution System, breach of this Agreement or otherwise, except for direct, specific damages to the extent caused by Company's negligence or misconduct.

9. **Miscellaneous**. This Agreement constitutes the entire understanding and agreement between the Parties and supersedes any and all prior negotiations, understandings or agreements with respect to this subject matter. This Agreement may be amended only by written instrument signed by both of the Parties. Whenever possible, each provision of this Agreement shall be interpreted in such manner as to be effective and valid under Florida law, but if any provision of this Agreement or the application thereof to any Party or circumstance is prohibited by or invalid under applicable law, that provision shall be effective only to the extent of such prohibition or invalidity, without invalidating the remaining provisions of this Agreement or the application of the same. Nothing contained herein shall be construed as a joint venture, partnership or any other similar relationship between Company and Developer. The captions, headings, titles, and subtitles herein are inserted for convenience of reference only and are to be ignored in any construction of the provisions of this Agreement. This Agreement shall be binding upon, and shall inure to the benefit of, the Parties, and their respective successors and assigns, and no assignment shall relieve either Party of such Party's obligations hereunder without written consent of the other Party. This Agreement shall be subject to all applicable laws, rules, orders, permits, and regulations of any federal, state, or local governmental authority having jurisdiction over the Parties, their facilities, or the transactions contemplated. This Agreement may be executed in one or more counterparts, each of which shall be deemed to be an original, but all of which together shall constitute one in the same instrument.

10. Recording. This Agreement may be recorded by Company among the Public Records of the County in which the Project is located.

11. **Exclusivity**. During the term of this Agreement and for any subsequent terms thereafter, Developer agrees that Company has an exclusive right to provide natural gas services to the Project and that Developer will not grant, or allow others to grant any easement or right-of-way for purposes of delivering natural gas service. Developer certifies that there is no existing contractual agreement with any third party for the provision of natural gas service to the Project, with the exception of this Agreement.

[remainder of page intentionally left blank]

IN WITNESS WHEREOF, the Parties have caused this Agreement to be signed by their respective duly authorized officers as of the date first above written.

Marc,
We need to have this in the builder's hands by Friday or they have stated they will go all electric. Sorry for the short timeframe but we just received an email stating they are ahead of schedule on this project.

Wellington Woods, Deland

- Project is a medium-size natural gas community on Orange Camp Road, located near three of our other natural gas communities – Crystal Cove, Carriage Homes and Victoria Park.
- The builder, Morrison Homes, opted to go with natural gas to remain competitive in our natural gas corridor.
- This is an AEP project that is expected to be paid off in its ninth year.
- Proposed development will service 147 homes of which 140 will be required to be gas-compliant homes.
- The first homes are expected to be built by mid-2007.
- The developer of the project is Earley Development, Inc. of Orlando. There will be a separate agreement for builder and for developer.
- Homes will be approximately 2500 square feet, with beginning prices of $300,000.
- Homes will utilize water heater, furnace, and range. Builder anticipates piping for gas dryers, but revenue has not been included. Fireplaces and summer kitchens will be offered, but not included in the revenue analysis. Builder is seriously considering adding gas lighting for the entry way.
- NPV yields a 20% Average ROR on investment.
- The distribution system will consist of approximately 11500' of 2" PE main, 6200' of 1 ¼" PE main, and approximately 7000' of 3/4" service line.
- Morrison Homes ranks as one of the nation's top 25 homebuilders for home sales, with presence in California, Nevada, Arizona, Colorado, Texas and Florida.
- This is the first time FPU has partnered with this national builder.

Here is the tracked changes version. We did not track changes on the Pension tables within the footnote. We are still waiting to determine if there are any changes to the Cash flow statement as a result of the FASB 158 journal entry, as well as confirmation that the deferred taxes on the regulated portion is a regulatory tax asset vs. just a deferred tax asset. Also, the breakdown in the segment information for total assets has to be updated for FASB 158. We show that in red. We are also still waiting on a pending fuel item to determine if a late JE is necessary. We should know this early next week. Finally, we are waiting on legal clarification on our gas contract exhibits. They are shown in red as well. That should be early next week as well. Thanks Cheryl Martin

As of June 30, 2006, the aggregate market value of the Registrant's Common Stock held by non-affiliates (based upon the closing price of the Common Stock on that date on the American Stock Exchange) was approximately $71,300,000.

On February 9, 2007, 6,024,739 shares of the Registrant's $1.50 par value common stock were outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the registrant's Proxy Statement for the May 8, 2007 Annual Meeting of Shareholders are incorporated by reference in Part III hereof.

PART I

Item 1. Business

General

Florida Public Utilities Company (FPU) was incorporated on March 6, 1924 and reincorporated on April 29, 1925 under the 1925 Florida Corporation Law. We provide natural gas, electricity and propane gas to residential, commercial and industrial customers in Florida. We do not produce energy and are not a generating utility. Our regulated segments sell natural gas and electricity to approximately 82,000 customers, and our unregulated segment sells propane through a wholly owned subsidiary, Flo-Gas Corporation, to approximately 13,000 customers. We also sell merchandise and other service related products on a limited basis as a complement to the natural and propane gas segments.

Our three primary business segments are aligned with our products and are natural gas, electric and propane gas. The Florida Public Service Commission (FPSC) regulates the natural gas and electric segments. We operate through five divisions based on geographic areas:

(1) South Florida Division - provides natural and propane gas to customers in West Palm Beach, Palm Beach Gardens, North Palm Beach, Jupiter, Riviera Beach, Palm Beach, Lake Worth, Royal Palm Beach, Wellington, Boynton Beach, Delray Beach, Boca Raton, Lauderdale Lakes, Deerfield Beach, Stuart, Palm City and other areas near these major cities.
(2) Central Florida Division - provides natural and propane gas to customers in Sanford, Deland, Deltona, DeBary, Orange City, Lake Mary, Winter Springs, New Smyrna Beach, Edgewater, Longwood, Port Orange and other areas near these major cities.
(3) Northwest Florida Division - provides electricity to customers in Marianna, Bristol, Altha, Cottondale, Malone, Alford and other areas near these major cities.
(4) Northeast Florida Division - provides electricity and propane gas to customers in Fernandina Beach, Jacksonville, Callahan, Yulee and other areas near these major cities.
(5) West Florida Division - provides propane gas to customers in Dunnellon, Inglis, Crystal River, Inverness, Brooksville and other areas near these major cities.

Business Environment

Natural and propane gas are some of the most popular forms of energy today. Gas is used for heating, cooling, cooking, backup generation and decorative lighting by businesses and homeowners and in many other ways by various industries. Natural gas is also used in combination with other fuels to improve environmental performance and decrease pollution in the generation of electricity.

Natural and propane gas have seen increased demand in Florida as a result of the recent hurricanes and the popularity of generators. Generators themselves do not impact usage significantly for a region; however, gas appliances have been added as a result of generator popularity, and that does increase gas usage. Prices of natural and propane gas

have decreased during 2006 due in part to the absence of a hurricane affecting the Gulf of Mexico.

As a result of historically high natural gas costs in 2005, alternatives such as coal and nuclear power for generation of electricity have seen increased interest. Our sales in the electric segment have not been impacted by higher electricity costs due to long-term favorable fixed price contracts for purchasing electricity. However, our contracts expire at the end of 2006 for our Northeast division and 2007 for our Northwest division and our electric prices are expected to significantly increase to close to market prices with the new contracts. Although this will not directly impact our income from operations because increased fuel costs are passed through to the customer, this may impact the number of units sold.

Deleted: the 2005

Because of the hurricanes in 2004 and 2005, the electric industry in Florida has seen increased interest in improving reliability of electric services during and after hurricanes. Regulators have been researching the issue and have introduced new storm hardening requirements to improve electric reliability with storm hardening rules regarding pole inspections, strengthened design specifications for wind loading, vegetation management practices and installation of underground facilities for electric distribution and transmission systems. We are able to comply with these reliability standards and are seeking rate relief and implementation for these new requirements in 2007.

Deleted: The Company is

Deleted: is

Business Segments
We are organized in three operating and reporting segments: natural gas, electric and propane gas. We are also involved in limited merchandise sales and other services within our natural gas and propane areas to complement these segments. For information concerning revenues, operating income and identifiable assets of each of our segments, see Note 13 in Notes to Consolidated Financial Statements.

Natural Gas
Natural gas is primarily composed of methane, which is a colorless, odorless fuel that burns cleaner than many other traditional fossil fuels. Odorant is added to enable easy detection of a gas leak.

Deleted: one to readily detect

We provide natural gas to customers in our South and Central Florida divisions. The vast majority of the natural gas we distribute is purchased in the Gulf Coast region, both onshore and offshore.

We use Florida Gas Transmission (FGT) as our natural gas pipeline in peninsular Florida. FGT is under the jurisdiction of the Federal Energy Regulatory Commission (FERC). We use gas marketers and producers independently to procure all gas supplies for our markets. We use Florida City Gas and Indiantown Gas Company to provide wholesale gas transportation services in areas distant from our interconnections with FGT. We pass all fuel costs on to our customers. We also transport natural gas for customers who purchase their own gas supplies and arrange for pipeline transportation. Our operating results are not adversely affected if our customers purchase gas from third parties because we do not profit on the fuel portion of sales.

Our natural gas revenues are affected by the rates charged to customers, supply costs for natural gas purchased for resale, economic conditions in our service areas and weather.

Although the FPSC permits us to pass through to customers the increase in price for our gas supply, higher rates may cause customers to purchase less natural gas.

Our current portfolio of natural gas customers is reasonably diverse, with the largest customer using natural gas for the generation of electricity. We are not dependent on any single natural gas customer for over ten percent of our total natural gas revenues.

The FPSC approved joint transportation and territorial agreements with Indiantown Gas Company in October 2006. We plan to transport natural gas through Indiantown's system to new developments. In the early phase, Indiantown Gas Company will provide operational and customer service related work. We also began construction in the Indiantown area to install natural gas mains in the first phase of this development for approximately 100 homes. The next two developments are slated to break ground in 2007 for construction of approximately 1,000 homes.

Electric

We provide electricity to our customers in our Northwest and Northeast Florida divisions. Wholesale electricity is purchased from two suppliers: Gulf Power Company and JEA (formerly Jacksonville Electric Authority). In 1996, we executed ten-year fixed-price purchased power contracts with both suppliers. Gulf Power Company provides electric power to the Northwest division and JEA provides electric power to the Northeast division. Less than 1% of our power supply is purchased on an as-available basis from a self-generating paper mill in Fernandina Beach, located in our Northeast division. These long-term contracts provided our customers with the lowest consumer electric rates in Florida.

Deleted: ,

During 2006 we completed the negotiations and executed final contracts for the supply of electricity in our Northeast division beginning January 1, 2007 and our Northwest division beginning in January 1, 2008. We are seeking approval of the contract with Gulf Power Company from the FPSC in 2007. We expect that rates charged to our customers will significantly increase to closer to market when the new contracts become effective in 2007 and 2008. We are unable to estimate what impact higher rates could have on electric consumption, but electricity usage could decrease.

The Northwest and Northeast divisions experience a variety of weather patterns. Hot summers and cold winters produce year-round electric sales that normally do not have highly seasonal fluctuations. None of the electric segment's customers represent more than ten percent of our total electric revenues.

The electric utility industry has not been deregulated in the state of Florida. All customers within a given service or franchise area purchase from a single electricity provider in that area.

Propane Gas

We provide propane gas to customers in our Northeast, West, Central and South Florida divisions and can purchase our propane supply from several different wholesale companies. Propane gas is delivered to Florida by barges and railcars to terminals in Tampa and Ft. Lauderdale, and through the Dixie Pipeline terminus at Alma and Albany, Georgia. Propane is also delivered by transport to our facilities and directly to a customer's premise. We believe that the propane gas supply infrastructure is adequate to meet the needs of the industry in Florida for the foreseeable future.

Propane gas is not as affected by environmental regulations as other petroleum products. However, propane gas is a hazardous material and as such is subject to strict code enforcement and safety requirements.

As with natural gas, the sales volume of propane gas is affected by the season and the weather. Typically, Florida has a tourist season that coincides with the winter months. The propane segment's sales volumes and revenues are closely balanced between residential and commercial customers. We employ two strategies to become less weather dependent, concentrating on the forklift propane gas cylinder exchange market and marketing propane gas appliances not used for heating air. We believe that water heaters and forklift cylinder exchange accounts are good ways to become less weather reliant. None of the propane gas segment's customers represent more than ten percent of our total propane sales volume or revenues.

Strategy

Our strategy is to leverage our expertise in the natural gas, electric and propane gas distribution business to assist us in consistently meeting our customer's expectations. Our core focus is to build mutually beneficial relationships with builders, developers and customers with high-energy usage requirements. Included in our strategy is a plan to enhance our future success by expanding our service territory into new areas with high growth potential.

Competition

We do not face substantial competition in our electric divisions. This is because no other competitor can currently provide the same energy in our areas due to FPSC regulations and territorial agreements between utilities. In addition, natural gas as an alternative fuel is only available in a small area served by our electric divisions. Although our natural gas segment operates with the same types of guidelines, there is competition in our natural gas segment from electric utilities. Normally each home will have electricity as a base fuel and natural gas as an alternative second source of energy used for cooking and heating. Electricity competes with natural gas, in large part based on the cost of fuel. Our propane gas segment is unregulated and faces competition from other suppliers of propane gas as well as alternative energy source suppliers. Competition in the propane gas segment is primarily based on price and service.

Rates and Regulation

The natural gas and electric segments are highly regulated by the FPSC. The FPSC has the authority to regulate our rates, conditions of service, issuance of securities and certain other matters affecting our natural gas and electric operations. As a result, FPSC regulation has a significant effect on our results of operations. The FPSC approves rates that are intended to permit a specified rate of return on investment. Our rate tariffs allow the cost of natural gas and electricity to be passed through to customers. Increases in the operating expenses of the regulated segments may require us to request increases in the rates charged to our customers. The FPSC has granted us the flexibility of automatically passing on increased expenses for certain fuel costs to customers. Other operational expenses, such as pension and medical expenses require us to petition the FPSC for rate increases. The FPSC is likely to grant rate increases to offset increased expenditures necessary for business operations. We successfully petitioned for an electric rate increase, which became effective on March 17, 2004, and for a natural gas rate increase that went into effect on November 18, 2004. We are currently seeking electric rate relief in 2007 for the recent storm hardening requirements implemented to improve reliability of electric utility systems.

We are subject to federal and state regulation with respect to soil, groundwater, employee health and safety matters and to environmental regulations issued by the Florida Department of Environmental Protection (FDEP), the United States Environmental Protection Agency (EPA) and other federal and state agencies.

Prior to the widespread availability of natural gas, we manufactured gas for sale to our customers or purchased utility assets from other companies that manufactured gas. The process for manufacturing gas produced by-products and residuals such as coal tar. The remnants of these residuals are sometimes found at former gas manufacturing sites. These sites face environmental regulation from various agencies including the FDEP and EPA on necessary cleanup and restoration.

Deleted: E

Franchises

We hold franchises in each of the incorporated municipalities that require franchise agreements in order to provide natural gas and electricity. Generally, these franchises have terms ranging from 10 to 30 years and terminate on varying dates. We are currently in negotiations with certain municipalities for new service areas within our current operating divisions, and renewals of existing franchises. We continue to provide services to these municipalities and do not anticipate any interruption in our service.

Employees

As of January 18, 2007, we had 362 employees, of which 9 were part-time and 2 were temporary. Of these employees, 175 were covered under union contracts with two labor unions, the Internal Brotherhood of Electric Workers and the International Chemical Workers Union. We believe that our labor relations with employees are good.

Available Information

We file periodic reports including our Form 10-Qs, Form 10-Ks, and Form 8-Ks with the Securities and Exchange Commission (SEC). These reports and our Code of Ethics Policy can be obtained through our website (http://www.fpuc.com).

Item 1A. Risk Factors

A substantial portion of our revenues and, to a large extent, our profitability, depends upon rates determined by the FPSC.

FPSC regulates many aspects of our natural gas and electric operating segments, including the retail rates that we may charge customers for natural gas and electric service. Our retail rates are set by the FPSC using a cost-of-service approach that takes into account our historical operating expenses, our fixed obligations and recovery of our capital investments, including potentially stranded obligations. Using this approach, the FPSC sets rates at a level calculated to recover such costs, adjusted to reflect known and measurable changes, and a permitted return on investment. Any rate adjustments to recover increased costs or to otherwise improve our profitability must be obtained through a petition filed with the FPSC, which is referred to as a rate case. The rates permitted by the FPSC in rate cases will determine a substantial portion of our revenues for succeeding periods and may have a material impact on our consolidated earnings, cash flows and financial position, as well as our ability to maintain our common stock dividend at current levels or to increase our dividend in the future.

Some of our natural gas and electric service costs may not be fully recovered through retail rates.

Our natural gas and electric service retail rates, once established by the FPSC, remain fixed until changed in a subsequent rate case. We may at any time elect to file a rate case to request a change in our rates or intervening parties may request that the FPSC review our rates for possible adjustment, subject to any limitations that may have been ordered by the FPSC. Earnings could be reduced to the extent that our operating costs increase more than our revenues during the period between rate cases, which may occur because of maintenance and repair of plants, fuel and purchased power expenses, employee or labor costs, inflation or other factors. In addition, even if we decide to file rate cases, our requests for rate adjustments in such rate cases may be rejected. Other parties to a rate case or the FPSC staff may contend that our current rates, or rates proposed in a rate case, are excessive and our petition for rate adjustments may be denied on that or another basis.

Our segments are sensitive to variations in weather.

Most of our segments are affected by variations in general weather conditions and unusually severe weather. We forecast energy sales on the basis of normal weather, which represents a long-term historical average. Significant variations from normal weather could have a material impact on energy sales. Unusual weather, such as hurricanes, could also adversely affect operating costs and sales.

Our natural gas and propane gas customers use gas primarily for heating purposes. As a result, our natural gas and propane gas sales peak in the winter and are more weather sensitive than electricity sales, which peak in both summer and winter periods. Mild winter weather in Florida can be expected to negatively impact results from our natural gas and propane gas operations. Severe weather conditions could also interrupt or slow down service and increase the operating costs of all our segments.

Deleted: our

We operate in an increasingly competitive industry, which may affect our future earnings.

Natural Gas

The natural gas distribution industry has been subject to competitive forces for several years. We receive our supply of natural gas at thirteen city gate stations connected to an interstate pipeline system owned by FGT and one gate station connected to an intrastate pipeline owned by Florida City Gas Company. Gulfstream Natural Gas System currently also serves peninsular Florida with interstate natural gas transmission service;

Deleted: lorida

Deleted: as

Deleted: ransmission Company

however we cannot predict if this system will be extended to areas near our existing facilities and how it could affect our gas operations.

Electric

The U.S. electric power industry has been undergoing restructuring. There is competition in wholesale power sales on a national level. Some states have mandated or encouraged competition at the retail level. While there is active wholesale competition in Florida, the retail electric business has remained substantially free from direct competition. Changes in the competitive environment occasioned by legislation, regulation, market conditions or initiatives of other electric power providers, particularly with respect to retail competition, could adversely affect our financial condition and results of operations. To the extent competitive pressures increase and the pricing and sale of electricity assumes more of the characteristics of a commodity business, the economics of our electric operating segment may come under increasing pressure. In addition, regulatory changes may increase access to electricity transmission grids by utility and non-utility purchasers and sellers of electricity, thus potentially resulting in a significant number of additional competitors.

Propane Gas

Our propane gas business is our only non-regulated business segment. Because the propane gas business is not regulated, we face significant competition in this segment. Our propane gas business competes directly with other distributors of propane gas, and other sources of energy including natural gas and electric. We may encounter increased competition in the propane gas business in the future. Our inability to compete effectively in the propane gas business, whether on the basis of price, customer service, alternative energy sources or otherwise, could have a material adverse effect on our financial condition and results of operations.

Our business could be adversely affected if our supply of natural gas is interrupted.

FGT's pipeline system transports all of our natural gas. FGT is owned by Citrus Corporation, which is jointly owned by Cross Country Energy Corporation and El Paso Corporation. Our ability to receive our normal supply of natural gas could be adversely affected by an interruption in FGT's service.

General economic conditions may adversely affect our segments.

Our segments are affected by general economic conditions. The consumption of the energy we supply is directly tied to the economy. A downturn in the economy in our local areas of operations, as well as on the state, national and international levels, could adversely affect the performance of our segments. Changes in political climate, including terrorist activities, could further negatively impact our performance. If tourism is down, then the demand for the energy we supply is reduced.

Commodity price changes may affect the operating costs and competitive position of our segments.

Most of our segments are sensitive to changes in coal, gas, oil and other commodity prices. If we are unable to increase the rates we charge to customers to reflect increases in these commodity prices, our margins and earnings will be lowered. If increased prices for any of these commodities persist for substantial periods, our competitive position could be adversely affected by customers who switch to cheaper energy sources. Further, natural gas prices have been increasingly volatile and, accordingly, the earnings from our natural gas operations are increasingly difficult to predict.

We could incur material expenses as a result of our obligations to comply with existing and new environmental laws and regulations.

We are subject to environmental regulations in connection with the ongoing conduct of our business and to civil and criminal liability for failure to comply with these regulations. In addition, new environmental laws and regulations, or new interpretations of existing laws and regulations, affecting our operations or facilities may be adopted which may cause us to incur additional material expenses.

We are subject to federal and state legislation with respect to soil, groundwater, employee health and safety matters and to environmental regulations issued by the FDEP, the United States Environmental Protection Agency (EPA) and other federal and state agencies. We may incur material future expenditures in order to comply with these existing environmental laws and regulations.

Deleted: Florida Department of Environmental Protection (

Deleted:)

We rely on a limited number of natural gas and electric suppliers, the loss of which could materially adversely affect our financial condition and results of operations.

Two pipeline suppliers under several firm contracts having expiration dates from 2007 to 2023 transport our natural gas to us. All of these contracts have provisions, which allow us to extend the terms ranging from 2020 to 2032. Our electric services are provided by two suppliers under contracts, which expire in 2006 and 2007. We have renegotiated new contracts with these same suppliers for electric services beginning in 2007 and 2008. If we were to lose any of these contracts, we may not be able to replace the corresponding energy source on acceptable terms, if at all. In addition, in the event of the expiration of the contracts, we may not be able to renew them on favorable terms, if at all. As a result, the loss of any of these suppliers, the terminations of any of these supply contracts or the non-renewal of any of these supply contracts before or upon their expiration could have material adverse effects on our financial condition and results of operations.

New supply contracts could result in substantial increases to our prices, and could materially adversely affect our financial condition and results of operations.

Two pipeline suppliers under firm contracts having expiration dates from 2007 to 2023 transport our natural gas to us. All of these contracts have provisions which allow us to extend the terms ranging from 2020 to 2032. Our electric services are provided by two suppliers under contracts, which expire in 2006 and 2007.

Deleted: ,

Electricity supply contracts expiring in 2006 and 2007 will result in the cost of electricity more than doubling over existing prices. These increases could have a significant impact on our financial condition and results of operations.

Fluctuation in prices under long-term purchase and transportation commitments may have an adverse effect on our financial condition and results of operations.

To ensure a reliable supply of electricity and natural gas at competitive prices, we have entered into purchase and transportation contracts with various suppliers and producers, which expire at various dates through 2023. Purchase prices under these contracts are determined by formulas either based on market prices or at fixed prices.

As of December 31, 2006, we have firm purchase and transportation commitments adequate to supply our expected sales requirements for electricity with contracts that will expire in 2017. Our contract in the Northeast division of the electric segment began January 1, 2007 and expires on December 31, 2017. We have a contract with a supplier for the Northwest division beginning January 1, 2008 and expiring December 31, 2017. We are currently seeking approval with the FPSC for the Northwest division contract. If the FPSC does not approve this contract, we may need to seek an alternative supplier or new contract with this same supplier for the purchase of electricity in the Northwest division.

Our natural gas pipeline transportation contracts expire in parts in 2010, 2015 and 2023. We are committed to pay demand or similar fixed charges monthly through 2023 related to the natural gas pipeline transportation agreements. Significant fluctuation in prices under these long-term purchase and transportation commitments may have a material adverse effect on our financial condition and results of operations.

Problems with operations could materially adversely impact us.

We are subject to various operational risks, including accidents, outages, equipment breakdowns or failures, or operations below expected levels of performance or efficiency. Problems such as the breakdown or failure of transmission lines, pipelines or other equipment or processes and interruptions in service which would result in performance below affected levels of output or efficiency, particularly if extending for prolonged periods of time, would have a material adverse effect on our financial condition and results of operations.

We are vulnerable to interest rate changes and may not have access to capital at favorable rates, if at all.

Changes in interest rates can affect our cost of borrowing on our line of credit, on refinancing of debt maturities and on incremental borrowing to fund new investments. Because our stock is not widely held and has a low trading volume, we may not be able to access the equity market or may be limited in the amount of equity financing. If we are unable to obtain equity or debt financing on terms satisfactory to us, our ability to fund capital expenditures and other commitments will be impaired. Moreover, even if available, the cost of such financing could reduce our margins and materially adversely affect our results of operations.

Failure to effectively and efficiently manage our growth, as well as changes in our business strategies, could have a negative impact on our performance.

An essential part of our business strategy is to grow our businesses. Much of our growth depends on our ability to find attractive development opportunities and to obtain the necessary financing for them. Our outlook is based on our expectation that we will be successful in finding and capitalizing on development opportunities, but our efforts may not be successful. Our failure to effectively and efficiently manage our growth, as well as changes in our business strategies, may have a material adverse effect on our financial condition and results of operations. If we grow our business with acquisitions there is a risk the acquisition will not have a positive effect on our financial condition.

Our ability to pay dividends on our common stock is limited.

We cannot guaranty that we will continue to pay dividends at our current annual dividend rate or at all. In particular, our ability to pay dividends in the future will depend upon, among other things, our future earnings, our cash requirements and our debt covenants.

Deleted: assure you

Provisions in our certificate of reincorporation, certain agreements, and the Florida Business Corporation Act may inhibit a takeover, which could adversely affect the value of our common stock.

Our certificate of reincorporation as well as provisions of the Florida Business Corporation Act (FBCA), contain provisions that could delay or prevent a change of control in our management that shareholders might consider favorable and may prevent them from receiving a takeover premium for their shares.

Deleted: you

Deleted: your

Our certificate of reincorporation contains provisions that make it more difficult to obtain control of our company through transactions, which have not received the approval of our board of directors. These provisions include supermajority voting requirements for certain transactions with affiliated persons, staggering the terms of the members of our board of directors, and certain procedural requirements relating to shareholder meetings and amendments to our certificate of reincorporation or bylaws.

In addition, Florida has enacted legislation that may deter or frustrate takeovers of Florida corporations. Subject to certain exceptions, the "Control Share Acquisitions" section of the FBCA generally provides that shares acquired in excess of certain specified thresholds, beginning at 20% of a corporation's outstanding voting shares, will not possess any voting rights unless such voting rights are approved by a majority vote of the corporation's disinterested shareholders.

The "Affiliated Transactions" section of the FBCA generally requires majority approval by disinterested directors or supermajority approval by disinterested shareholders of certain specified transactions (such as mergers, consolidations, sales of assets, issuance or transfer of shares or reclassifications of securities) between a corporation and a holder of more than 10% of the outstanding shares of the corporation, or any affiliate of such shareholder.

Finally, we have agreements with three of our executive officers that provide for significant payments to those executives upon a change in control under certain circumstances. The existence of these contracts may make an acquisition of our company less attractive to a possible buyer.

Conflict or turmoil in oil producing countries could impact future prices for commodities including natural gas, propane gas and electricity, and increases in these prices could materially affect our financial condition and results of operations.

Worldwide turmoil could cause crude oil and its associated products to rise on concerns of the conflicts interfering with the production of crude oil. If these conflicts are large, escalate or spread, the impact to the cost of all fuel related commodities could increase substantially. These increases could materially adversely affect our financial condition and results of operations.

Item 1B. Unresolved Staff Comments

None

Item 2. Properties

We have natural gas, electric and propane gas utility related properties. These properties include transmission, distribution, storage and general facilities at various locations in our service areas. We do not have generating facilities. We maintain property that is adequate for our current operations and we expand our existing facilities as required by growth or other operational needs.

We own natural gas mains that distribute gas through 1,558 miles of pipe located in Central and South Florida. Additionally, we have adequate gate stations in each distribution system.

In the electric segment, we own 22 miles of electric transmission lines located in Northeast Florida and 1,082 miles of electric distribution lines located in Northeast and Northwest Florida. The distribution lines are installed both under and above ground with many of the coastal locations having under ground facilities. All transmission lines are installed above ground. Additionally, we own various substations and regulator stations that are used in our operations.

Our propane gas segment has bulk storage facilities and tank installations on the customers' premises. We also have 16 community gas systems that distribute propane gas to customers in a specific area. These systems are subject to the Federal Department of Transportation Office of Pipeline Safety Regulations.

We own office and warehouse facilities in Northwest, Northeast, Central, West and South Florida, which are used for our operations and materials storage by the natural gas, electric, and propane gas segments. We also have various easements and other assets located throughout our service areas that are utilized by all of our operations.

We also own a three-story building in West Palm Beach, where our corporate headquarters is located.

All of our property is subject to a lien collateralizing our funded indebtedness under our Mortgage Indenture. See Note 7 in Notes to Consolidated Financial Statements.

Item 3. Legal Proceedings

In our operations, we currently use or have used several contamination sites that have pending or threatened environmental litigation. We are in the process of investigating and assessing this litigation. We intend to vigorously defend our rights in this litigation. We have insurance and rate relief to cover any losses or expenses incurred as a result of this litigation. We believe all future contamination assessment and remedial costs, legal fees and other related expenses would not exceed the combined sum of any insurance proceeds received and any rate relief granted.

West Palm Beach Site

We are currently evaluating remedial options to respond to environmental impacts to soil and groundwater at and in the immediate vicinity of a parcel of property we own in West Palm Beach, Florida. We previously operated a gasification plant at this site. We entered into a Consent Order with the FDEP, effective April 8, 1991. This requires us to delineate the extent of soil and groundwater impacts associated with the prior operation of the gasification plant and to remediate such soil and groundwater impacts, if necessary. We have submitted numerous reports to FDEP describing the results of soil and groundwater sampling conducted at the site. We completed the delineation of soil and groundwater impacts at the site in October 2006. An engineering consultant performed a feasibility study (FS) to evaluate appropriate remedies for the site. A FS was transmitted to FDEP on November 30, 2006.

Deleted: Florida Department of Environmental Protection (

Deleted:)

The FS evaluated a wide range of remedial alternatives based on criteria provided by applicable laws and regulations. The total costs for the remedies evaluated in the FS ranged from a low of $2.8 million to a high of $54.6 million. Based on the likely acceptability of proven remedial technologies described in the FS and implemented at similar sites in other states, consulting/remediation costs to address the impacts now characterized at the West Palm Beach site are projected to range from $4.6 million to $17.9 million. This range of costs covers such remedies as in situ solidification for deeper soil impacts, excavation of superficial soil impacts, installation of a barrier wall with a permeable biotreatment zone (PBZ), monitored natural attenuation of dissolved impacts in groundwater (MNA), or some combination of these remedies. The FS proposed a remedy of superficial soil excavation, installation of a hanging barrier wall with PBZ and MNA, the cost of which is projected to range from $4.6 million to $9.9 million.

Deleted: -

Deleted: ,

Prior to FDEP's approval of a final remedy for the site, we are unable to determine, to a reasonable degree of certainty, the complete extent or cost of remedial action that may be required. As of December 31, 2006, and subject to the limitations described above, remediation costs (including attorneys' fees and costs) for this site are projected to range from approximately $4.8 million to $18 million.

Sanford Site

We own a parcel of property located in Sanford, Florida, upon which a gasification plant was operated prior to our acquisition of the property. Following discovery of soil and groundwater impacts on the property, we have participated with four former owners and operators of the gasification plant in the funding of numerous investigations of the extent of the impacts and the identification of an appropriate remedy. On or about March 25, 1998, we executed an Administrative Order on Consent (AOC) with the four former owners and operators (Group) and the United States Environmental Protection Agency (EPA) that obligated the Group to implement a Remedial Investigation/Feasibility Study (RI/FS) and to pay EPA's past and future oversight costs. The Group also entered into a Participation Agreement and an Escrow Agreement on or about April 13, 1998 (WFS Participation Agreement). Work under the RIBS AOC and WFS Participation Agreement is now complete and we have no further obligations under either document.

Deleted: I

On July 5, 2000, EPA issued a Record of Decision (ROD) approving the final remedial action for contaminated soils at the site (OU1 Remedy). The initial estimated cost for the OU1 Remedy described in the ROD ranged from $5.6 million to $5.8 million. On June 12, 2001, EPA issued a ROD approving the final remedial action for contaminated groundwater at the site (OU2 Remedy). The present worth cost estimate for the OU2 Remedy was $320,252.

We are a party to the Second Participation Agreement entered into by members of the Group on August 1, 2000, as amended through June 19, 2002 (RD/RA Participation Agreement). The RD/RA Participation Agreement provided for funding the remedial design/remedial action (RD/RA) task for OU1 and OU2. Our share of costs for implementation of the RD/RA task for OU1 and OU2 was set at 10.5%, providing the total cost of the RD/RA task, including the pre-remedial design fieldwork, does not exceed $6 million. In 2002, we paid $210,178 to the Escrow Agent pursuant to a first call for funds in the total amount of $2 million under the RD/RA Participation Agreement. As of December 31, 2006, a balance of $550,000 remained in the Escrow Account from the first call for funds.

Deleted: I

Deleted:

In late September 2006, EPA sent us a Special Notice Letter, notifying us of EPA's selection of a final remedy for OU1 (soils), OU2 (groundwater), and OU3 (sediments), and giving the other Group members and us sixty (60) days within which to submit a "good faith offer" to EPA to provide for implementation of the selected remedies. The Special Notice Letter included an Amended ROD for OU1 (the ROD for OU1 was amended to account for a significant increase in the volume of off-site soil impacts and a change in the selected remedy), the original ROD for OU2, and a ROD for OU3. The total estimated remediation costs for the Sanford Gasification Plant Site are now projected to be $12.5 million. On November 30, 2006, we, along with the Group, submitted to EPA a good faith offer to implement the approved remedies as set forth in the RODs for OU1-OU3.

We, along with the Group, recently reached agreement on the terms and conditions of a Third Participation Agreement, to provide for funding the remediation work specified in the RODs for OU1-OU3. The Third Participation Agreement, which supersedes and replaces the Second Participation Agreement, is expected to be signed by all Group members by the end of January 2007. Our share of remediation costs under the Third Participation Agreement is set at 5% of a maximum of $13 million or $650,000. At present, it is not anticipated that the total cost of remediation will exceed $13 million. If it does, the Group members have agreed to negotiate in good faith to allocate the excess costs at such time that it reasonably appears that the total remediation costs will exceed $13 million. In any such event, we anticipate that our share will not be greater than 5% and could be less than 5%.

Assuming the Third Participation Agreement becomes effective in 2007 and EPA accepts the Group's good faith offer, our total probable legal and remediation expenses for this site are projected to be approximately $710,000.

Pensacola Site

We are the prior owner/operator of the former Pensacola gasification plant, located in Pensacola, Florida. Following notification on October 5, 1990 that FDEP had determined that we were one of several responsible parties for any environmental impacts associated with the former gasification plant site, we entered into cost sharing agreements with three other responsible parties providing for the funding of certain contamination assessment activities at the site.

Deleted: s

Following field investigations performed on behalf of the responsible parties, on July 16, 1997, FDEP approved a final remedy for the site that provides for annual sampling of selected monitoring wells. Such annual sampling has been undertaken at the site since 1998. Our share of these costs is less than $2,000 annually.

In March 1999, EPA requested site access in order to undertake an Expanded Site Inspection (ESI). The ESI was completed by EPA's contractor in 1999 and an ESI Report was transmitted to us in January 2000. The ESI Report recommends additional work at the site. The responsible parties met with FDEP on February 7, 2000 to discuss EPA's plans for the site. In February 2000, EPA indicated preliminarily that it will defer management of the site to FDEP; however, as of December 31, 2006, we have not received any written confirmation from EPA or FDEP regarding this matter. Prior to receipt of EPA's written determination regarding site management, we are unable to determine whether additional fieldwork or site remediation will be required by EPA and, if so, the scope or costs of such work.

Deleted: T

Key West Site

From 1927-1938, we owned and operated a gasification plant in Key West, Florida. The plant discontinued operations in the late 1940s; the property on which the plant was located is currently used for a propane gas distribution business. In March 1993, a Preliminary Contamination Assessment Report (PCAR) was prepared by a consultant jointly retained by the current site owner and us and was delivered to FDEP. The PCAR reported that very limited soil and groundwater impacts were present at the site. By letter dated December 20, 1993, FDEP notified us that the site did not warrant further "CERCLA consideration and a Site Evaluation Accomplished (SEA) disposition is recommended." FDEP then referred the matter to its Marathon office for consideration of whether additional work would be required by FDEP's district office under Florida law. As of December 3 1, 2006, we have received no further communication from FDEP with respect to the site. At this time, we are unable to determine whether additional fieldwork will be required by FDEP and, if so, the scope or costs of such work. In 1999, we received an estimate from our consultant that additional costs to assess and remediate the reported impacts would be approximately $166,000. Assuming the current owner shared in such costs according to the allocation agreed upon by the parties for the PCAR, our share would be approximately $83,000.

Executive Officers of the Registrant

The following sets forth certain information about the executive officers of the Company as of February 17, 2007.

Name	Age	Position	Date
John T. English	63	Chairman of the Board	2006 - Present
		Chief Executive Officer	1998 - Present
		President	1997 - Present
		Chief Operating Officer	1997 - 2000
Charles L. Stein	57	Senior Vice President	1997 - Present
		Chief Operating Officer	2001 - Present
George M. Bachman	47	Corporate Secretary	2004 - Present
		Chief Financial Officer	2001 - Present
		Treasurer	2001 - Present

Mr. English was Senior Vice President from 1993 preceding his appointment as President and Chief Operating Officer.

Mr. Stein was Vice President from 1993 preceding his appointment as Senior Vice President.

Mr. Bachman was Controller from 1996 preceding his appointment as Chief Financial Officer and Treasurer.

Each of these executive officers has an employment agreement for a three-year term, which can be renewed at the Board Meeting preceding the expiration of the agreement subject to his earlier resignation or removal. There are no family relationships among any of the executive officers and directors of the Company.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Quarterly Stock Prices and Dividends Paid

Our common shares are traded on the American Stock Exchange under the symbol FPU. The quarterly dividends declared and the reported last sale price range per share of our common stock for the most recent two years were as follows:

	2006			2005		
	Stock Prices		Dividends	Stock Prices *		Dividends
Quarter ended	Low	High	Declared	Low	High	Declared*
March 31	$13.25	$14.50	$0.1033	$11.47	$13.49	$0.1000
June 30	11.86	14.40	0.1075	11.45	12.67	0.1033
September 30	12.61	14.42	0.1075	12.67	16.84	0.1033
December 31	13.10	14.05	0.1075	13.46	16.44	0.1033

* On July 25, 2005 we issued a three for two stock split in the form of a stock dividend to our shareholders of record on July 15, 2005. All common share information has been restated to reflect the stock split.

As of February 16, 2007, there were approximately 3,900 holders of record of our common shares.

We intend to continue to pay quarterly cash dividends for the foreseeable future. Our dividend policy is reviewed on an ongoing basis by our Board of Directors and is dependent upon future earnings, cash flow, financial condition, capital requirements and other factors. Our Fifteenth Supplemental Indenture of Mortgage and Deed of Trust restricts the amount that is available for cash dividends. At December 31, 2006, approximately $9.0 million of retained earnings were free of such restriction and therefore available for the payment of dividends.

Securities Authorized for Issuance under Equity Compensation Plans

Equity Compensation Plan Information

Plan Category	Number of Securities remaining available for future issuance under equity compensation plans
Equity compensation plans approved by security holders	72,749*
Equity compensation plans not approved by security holders	0
Total	72,749

* This includes 20,714 shares for the Non-Employee Director Compensation Plan. This plan was adopted by the Board of Directors on March 18, 2005 and was approved at the 2005 meeting of shareholders. This also includes 52,035 shares for the Employee Stock Purchase Plan.

Item 6. Selected Financial Data

(Dollars in thousands, except per share data)

Years Ended December 31,	2006	2005	2004	2003	2002

Notes to the Selected Financial Data:

(1) 2002 includes gain after income taxes from the sale of non-utility real property of $70, or $0.01 per share.

(2) The Total assets and Utility plant - net for 2002 has been restated to conform to SFAS No. 143, "Accounting for Asset Retirement Obligations".

(3) On December 3, 2002, FPU entered into an agreement to sell the assets of its water utility system to the City of Fernandina Beach. The transaction closed on March 27, 2003. Revenues, Gross profit and Utility plant-net do not include discontinued operations.

(4) The Total assets and Utility plant - net for 2003 and 2002 have been restated to reflect the FPSC approved acquisition adjustment in the amount of approximately $1.0 million. (For additional information see "Goodwill and Intangible Assets" in the Notes to Consolidated Financial Statements).

(5) On July 25, 2005 we issued a three for two stock split in the form of a stock dividend to our shareholders of record on July 15, 2005. All common share information has been restated to reflect the stock split.

(6) Long-term debt is net of unamortized debt discount. Prior years have been restated to reflect the inclusion of unamortized debt discount.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operation

Deleted: s

RESULTS OF OPERATIONS

General

Effects of seasonal weather conditions, the timing of rate increases, fluctuations in demand due to the cost of fuel passed on to customers and the migration of winter residents and tourists to Florida during the winter season all have an impact on income.

Revenues and Gross Profit

Revenues include normal sales revenues, along with cost recovery revenues. The FPSC allows cost recovery revenues to directly recover costs of fuel, conservation and revenue-based taxes in our natural gas and electric segments. Revenues collected for these expenses have no effect on result of operations and fluctuations could distort the relationship of revenues between periods. Because gross profit eliminates these cost recovery revenues, we believe it provides a more meaningful basis for evaluating utility revenues.

Revenues and Gross Profit
(Dollars in thousands)

	Year Ended December 31,		
	2006	2005	2004
Natural Gas			
Revenues	$70,981	$69,094	$55,962
Cost of fuel and other pass through costs	43,909	42,815	34,232
Gross Profit	$27,072	$26,279	$21,730
Units sold:			
One thousand dekatherms (MDth)	6,230	6,224	6,124
Electric			
Revenues	$48,527	$47,450	$42,910
Cost of fuel and other pass through costs	34,259	33,352	29,732
Gross Profit	$14,268	$14,098	$13,178
Units sold:			
Mega watt hours (MWH)	849,124	814,353	766,349
Propane Gas			
Revenues	$14,727	$13,479	$11,167
Cost of fuel and other pass through costs	7,803	6,637	5,386
Gross Profit	$ 6,924	$6,842	$5,781
Units sold:			
One thousand dekatherms (MDth)	621	640	614
Consolidated			
Revenues	$134,235	$130,023	$110,039
Cost of fuel and other pass through costs	85,971	82,804	69,350
Gross Profit	$ 48,264	$ 47,219	$ 40,689

Natural Gas

Natural gas revenues increased $1.9 million, or 3% in 2006 over 2005 primarily due to increased revenue collected for taxes passed directly through to customers. A change in legislature regarding the calculation of Gross Receipts tax was effective January 1, 2006, and along with an increase to overall revenues, increased these taxes paid by our

customers by approximately $500,000. Franchise fee revenues also increased by $500,000 due to increased rates and area expansion.

Gross profit increased by $793,000, or 3% in 2006 over 2005. We had higher revenue and gross profit in 2006 compared to 2005 primarily due to lower over earning estimates. In 2006 we estimated over earnings of $230,000 and reduced our estimate for 2005 over earnings by $50,000 from $700,000 in 2005, which increased revenues and gross profit over the prior year by approximately $500,000. Other factors contributing to the increase in revenues and gross profit were 2% customer growth and storm surcharge revenues effective November 2005. The revenues and gross profit increases were slightly offset by $100,000 as a result of two transportation customers who went off-line for several months to do maintenance work.

Deleted: for several months during the year.

Natural gas revenues increased $13.1 million in 2005 over 2004 primarily due to an $8.6 million increase in the cost of fuel and other costs that were passed through to customers. The cost of natural gas increased significantly over prior years, partially as a result of recent hurricanes and their impact on supplies. Gross profit increased $4.5 million, or 21%, primarily as a result of rate relief effective in November 2004, normal customer growth and a 2% increase in units sold.

Electric

Electric revenues increased $1.1 million in 2006 over 2005. Cost of fuel and other costs that were passed through to customers contributed approximately $900,000 of the increase. Gross profit increased $170,000 or 1% in 2006 over 2005. The increase in gross profit was primarily due to a 1% increase in customer growth and units sold, excluding the two large industrial customers in our Northeast division.

Electric revenues increased $4.5 million in 2005 over 2004. Cost of fuel and other costs that were passed through to customers contributed $3.6 million of the increase. Gross profit increased $920,000 or 7% in 2005 over 2004. The increase in gross profit was primarily due to a 6% increase in units sold along with the rate increases granted in March 2004. A large distribution center was built recently in our Northwest division and increased revenues by approximately $700,000 and gross profit by approximately $91,000 in 2005 over 2004.

Propane Gas

Propane revenues increased $1.2 million, or 9.3% and gross profit increased $82,000 or 1% in 2006 compared to 2005. Revenues increased primarily due to rising fuel costs. Although customers increased by 5% in 2006, the usage per customer declined by 8% contributing to a decrease of 3% in units sold. Warmer weather was the primary reason for this decrease in usage per customer in 2006 compared to 2005. The increase in gross profit was minimal when compared to last year, primarily due to pre-buy gains of $383,000 received in 2005 not realized in 2006.

Deleted:

Deleted: because

Deleted: of

Propane revenues increased $2.3 million and gross profit increased $1.1 million or 18% in 2005 compared to 2004. The Company realized gains of approximately $383,000 as a result of buying propane supplies before market price increases. The remaining increase of 12% from the previous year resulted from propane unit sales increasing 4% due primarily to a 13% growth in residential bulk customers and units sold.

Deleted: c

Operating Expenses

Operating expenses include operation, maintenance, depreciation, amortization and taxes other than income taxes, and exclude fuel costs, conservation and taxes based on revenues that are directly passed through to customers and recovered in revenues.

Operating Expenses
(Dollars in thousands)

	Year Ended December 31,		
	2006	2005	2004
Natural gas	$ 20,954	$ 20,230	$ 16,752
Electric	$ 11,131	$ 10,596	$ 9,825
Propane gas	$ 5,850	$ 5,756	$ 5,126
Total Operating Expenses	$ 37,935	$ 36,582	$ 31,703

Natural Gas

Natural gas operating expenses increased $724,000, or 4%, in 2006 as compared with 2005. Outside of the normal inflationary impacts on our expenses, customer account expenses increased by $237,000 as a result of our customer service focus. We continued the focus on this area and increased the number of employees in an effort to respond more effectively to customers. Bad debt expense increased $49,000 over the prior year primarily due to increased revenues and aged accounts receivable on several major accounts. We increased our collection efforts in the fourth quarter of 2006 and will continue to do so in 2007.

In 2006 we had additional increases of $90,000 to sales expense resulting from initiatives to boost sales by increasing sales staff. Depreciation expense increased $137,000 principally due to construction of mains and new meters to distribute gas to a growing number of new developments in South Florida and capacity increase requirements for existing customers.

Deleted: s

Natural gas operating expenses increased $3.5 million or 21%, in 2005 as compared with 2004. Amortization expense increased $1.0 million. The bare steel replacement program and recovery of future environmental costs approved in our 2004 natural gas rate proceeding were the primary reasons for this increase. We are currently under a 50-year program to replace all bare steel mains and service lines with coated steel and polyethylene (PE) lines. We have received approval to recover the funds necessary to replace these mains and services over the 50-year period. Pursuant to an FPSC mandate, we accrue for amortization expense as an offset to the revenues received, and record a contribution to the related construction expenditures. The FPSC also approved recovery of our expected environmental liability over a 20-year period.

Based on our strategic plan, we have increased efforts in our customer service area to respond to customers. Customer account expense increased $373,000 in 2005 as compared to 2004 primarily due to increased payroll expenses for additional staffing and facility and equipment upgrades. There were also increased bad debt expenses as a result of the increases in accounts receivable due to general and fuel rate increases. The purchase of additional safety equipment, tools, hardware and office furniture contributed to a $942,000 increase in other operating expense. Other items affecting expenses included a research marketing study to provide us with data to better serve our customers and additional payroll expenses relating to hurricane preparedness and wage increases. Maintenance expense increased by $208,000 primarily due to maintenance expenditures in Central Florida for cleaning and painting a distribution regulator and gate stations and the purchase of maintenance related safety equipment and tools.

Electric
Electric operating expenses increased $535,000, or 5%, in 2006 as compared with 2005. As a result of our proactive efforts to inform and educate our electric customers about the expected 2007 and 2008 fuel rate increases in upcoming bills, sales expense increased by $120,000. Customer account expenses increased $106,000 in 2006 over the prior year mainly due to our efforts to provide adequate reserves for the increased aged accounts receivables not expected to be collected and additional revenues. Depreciation expense increased $202,000 largely due to major work done in the latter part of 2005 and the beginning of 2006. This included the rebuilding of a transmission sub-station, the rebuilding of an entire distribution sub-station with two transformers and the replacement of a failed sub-distribution station transformer.

Electric operating expenses increased $771,000, or 8%, in 2005 as compared with 2004. As we continue to focus on improving service reliability, we increased maintenance expense by $397,000 for additional tree trimming and the use of a temporary mobile substation while a new transformer was purchased and put into service. Depreciation expense increased $100,000 due to normal increases in plant assets. In 2005, other operating expenses increased $114,000 due to a shift from work on capital assets to operational needs along with personnel raises.

Propane Gas
Propane gas operating expenses increased $94,000, or 2%, in 2006 as compared with 2005. Depreciation expense increased $99,000 for the addition of plant assets including a propane delivery system that will increase the efficiency of our deliveries and improve our overall customer satisfaction. Aged accounts receivable and increased revenues contributed to an increase in our bad debt expense over the prior year.

Propane gas operating expenses increased $630,000, or 12%, in 2005 as compared with 2004. As we continued to focus on increasing our propane gas business, other operating costs increased $467,000. We placed additional emphasis in the sales area, which resulted in signing up new housing developments that will utilize propane gas. We incurred increased expenditures for piping homes, delivering propane gas, implementing a new delivery system and increasing commission payments. This increased effort in our sales area contributed to an increase of 150 customers and 4% overall units sold in our propane gas segment.

Deleted:

Administrative Expenses
Administrative expenses increased $177,000, or 2%, in 2006 over 2005. These expenses generally are related to all of our operating segments. To continue to adequately support our internal and external customers, we increased staffing in our administrative areas. Payroll increases of $322,000 related to an increased number of employees, annual pay raises and normal inflationary impacts. In 2006, we discontinued eligibility to our defined benefit pension plan for new employees and replaced the defined benefit pension plan with a 401K-match plan for new employees. Although this change will take time to reduce pension expense, we did experience a reduction of $107,000 in our pension expenses for various reasons. Medical costs increased $120,000 over the prior year and these costs are expected to continue to rise.

Regulatory storm surcharge expenses approved in our 2005 natural gas petition increased natural gas expenses by $180,000.

Deleted: ,

Administrative expenses increased $996,000, or 13%, in 2005 over 2004. These expenses related to all of our operating segments. Pension expense increased $274,000 due to our estimate that the return on the pension's assets will not keep pace with growing pension liabilities. In an effort to manage future expected increases in the pension liabilities, we decided to discontinue eligibility to our defined benefit pension plan for new employees. We replaced the defined benefit pension plan with a 401K-match plan for new employees. Medical insurance premiums continue to rise, increasing $130,000 in 2005. Compliance costs related to Sarbanes-Oxley and internal control requirements, as well as audit fees, increased outside services expenses by $156,000. With the impacts from our focus on hurricane preparations and the recent hurricanes, our safety expense increased by $235,000. A portion of this increase related to an additional safety employee and a new safety incentive program.

Total Other Income and Deductions

Other Income and Deductions include revenues and expenses from sales and installation service of merchandise, gains or losses on disposal or acquisition of property, interest expense and other miscellaneous income or expenses. The largest components of this section are merchandise sales and services income and interest expenses. Our services activities include the installation of merchandise and other contract work. Interest expense consists of interest on bonds, short-term borrowings and customer deposits.

Deleted: ,

Merchandise and Services Revenue and Expenses

Although merchandise and services revenue decreased by approximately $268,000, the overall profitability in this area increased by $325,000, compared to 2005. This was primarily a result of significant strategic changes made by management. These changes included revising the product markup structure, increasing installation fees and increasing employee training. We experienced a revenue decrease due to lower demand for merchandise as a result of a quiet hurricane season and the slow down of new construction projects in our areas.

Deleted: ,

Merchandise and services revenues and expenses both increased in 2005 from 2004 but merchandise profitability decreased $114,000. We experienced an increase in revenues and cost of sales primarily due to an increased demand for electric to gas conversions and installations of customer owned propane tanks to supply back-up generators. We had increased expenses from sub-contractors that were not passed on to customers in sales prices. Management is currently reviewing the profitability of the various merchandise installation costs and considering increasing installation fees to improve profitability in this area.

Interest Expenses

In 2006, total interest expense increased $40,000 compared to the prior year. The expense increased primarily as a result of rising interest rates.

In 2005, total interest expense increased $106,000. Interest on short-term debt increased $37,000. This was due to the increase in the average outstanding loan balance on the line of credit and higher interest rates. We also made an interest payment of $18,000 as the result of the IRS audit of prior years' tax returns. Interest on customer deposits increased $48,000 due to increased customer deposits primarily as a result of additional deposits required after implementing increased rates in our natural gas operation.

Other

Other revenues increased $51,000 compared to 2005 due to additional interest income associated with the sale of the water assets.

Income Taxes

Income tax expense decreased in 2006 over the normal tax rate on net income by $67,000. This decrease was due to tax return adjustments related to the regulatory deferred tax liabilities.

Income tax expense decreased in 2005 over the normal tax rate on net income by $43,000. Tax return adjustments related to the sale of water and the regulatory deferred tax liabilities decreased expenses by $118,000. We had an offsetting increase of $75,000 related to our IRS audit of the 2002 and 2003 income tax returns.

Cash Flows

Operating Activities

Net cash flow provided by continuing operating activities increased in 2006 by approximately $10 million compared to 2005. Amounts collected from customers exceeded payments for fuel by $6.2 million in 2006 primarily from an over recovery of fuel costs. The over recovery of fuel costs will be refunded in the following calendar year. Lower fuel costs in our natural gas segment in the latter part of the year resulted in a decrease in accounts receivable and accounts payable, contributing to a net $2 million increase to cash flow. Income taxes paid increased by approximately $600,000 primarily due to the tax effect of the collection of prior year's fuel under recoveries.

Deleted: turnaround

Net cash flow provided by continuing operating activities decreased in 2005 by approximately $1.5 million compared to 2004. Payments for fuel exceeded the amount collected from customers by an additional $3.1 million in 2005. The under recovery of fuel costs are collected in the following calendar year. Income tax payments increased approximately $1.5 million, primarily as a result of less tax depreciation and higher income. The deduction for tax depreciation was higher in both 2003 and 2004 as a result of bonus depreciation, resulting in lower taxes in those years. We also received a refund in 2004 relating to the deferral of the gain on our water assets sale.

Offsetting the decreases to 2005 cash flow was additional cash received from rate increases in our natural gas segment. The rate increases also contributed to an increase to accounts receivable of $4.0 million. Accounts payable increased $3.3 million primarily due to the increased cost of fuel in our natural gas segment.

Investing Activities
Construction expenditures increased in 2006 compared to 2005 by approximately $700,000. The increase in 2006 included large expenditures for transportation equipment in our electric segment for approximately $400,000, vehicles in our natural gas segment above 2005 levels of approximately $600,000, and various other typical capital expenditures. Offsetting total 2006 increases was a non-recurring $663,000 transformer replacement in 2005.

Deleted: 00
Deleted: the electric segment

Construction expenditures decreased in 2005 compared to 2004 by approximately $1.3 million. In 2004, there were large projects to rebuild two substations in our electric segment and additional propane community gas systems costing approximately $3.3 million. In 2005 such expenditures were lower and consisted of the purchase of a transformer in our electric segment for approximately $600,000, a new natural gas mapping system to track our assets used in serving our customers for approximately $300,000, a propane delivery system for approximately $300,000, additional propane community gas systems for approximately $300,000 and other various capital expenditures.

Financing Activities
Short term borrowings decreased by $6 million in 2006. Over recovery of fuel costs provided a large source of cash during 2006 as well as the under recovery of fuel costs from the prior year recovered in 2006.

Although additional sources of cash were provided by our rate increases and lower construction expenditures in 2005, the additional expenditures from under recovery of fuel costs and additional income taxes slightly increased our short-term debt. Short-term borrowings increased in 2005 over 2004 by approximately $3.7 million.

Capital Resources
We currently have a $12 million line of credit (LOC), which expires on July 1, 2008. Upon 30 days notice by us we can increase the LOC to a maximum of $20 million. The LOC contains affirmative and negative covenants that, if violated, would give the bank the right to accelerate the due date of the loan to be immediately payable. The covenants include certain financial ratios. All ratios are currently met and management believes we are in full compliance with all covenants and anticipates continued compliance. We reserve $1 million of the LOC to cover expenses for any major storm repairs in our electric segment and an additional $250,000 for a letter of credit insuring propane gas facilities. As of December 31, 2006, the amount borrowed from the LOC was $3.5 million. The LOC, long-term debt and preferred stock as of December 31, 2006 comprised 53% of total capitalization and debt.

In prior years we periodically paid off short-term borrowings under lines of credit using the net proceeds from the sale of long-term debt or equity securities. We may use similar types of proceeds in the future to pay off short-term borrowings, dependent on the amount borrowed from the LOC, prevailing market conditions for debt and equity, the impact to our financial covenants and the effect on income.

Our 1942 Indenture of Mortgage and Deed of Trust, which is a mortgage on all real and personal property, permits the issuance of additional bonds based upon a calculation of unencumbered net real and personal property. At December 31, 2006, such calculation would permit the issuance of approximately $39.3 million of additional bonds.

On November 30, 2006 we received approval from the FPSC to issue and sell or exchange an additional amount of $45 million in any combination of long-term debt, short-term notes and equity securities and/or to assume liabilities or obligations as guarantor, endorser or surety during calendar year 2007.

Deleted: /

Deleted: .0

We have $3.4 million in invested funds for payment of future environmental costs. We expect to use some of these funds in 2007.

Capital Requirements
Portions of our business are seasonal and dependent upon weather conditions in Florida. This factor affects the sale of electricity and gas and impacts the cash provided by operations. Construction costs also impact cash requirements throughout the year. Cash needs for operations and construction are met partially through short-term borrowings from our LOC.

Construction expenditures are expected to be higher in 2007 compared to 2006 by approximately $3.9 million. The primary reason for the expected increase in expenditures is the anticipated purchase of land for a new South Florida division office. The current division office is on environmentally impacted property, which requires relocating the office to another location to allow for clean up of the property. It will not be possible to rebuild at the current location since the property has been rezoned with a residential designation. The estimated cost of land is $3.8 million. We are planning to build and complete this new facility in the next five years. We do not have any material commitments for construction expenditures in 2007 other than vehicles of approximately $102,000.

Cash requirements will increase significantly in the future due to environmental clean up costs, sinking fund payments on long-term debt and pension contributions. Environmental clean up is forecast to require payments of approximately $600,000 in 2007, with remaining payments, which could total approximately $10.3 million, beginning in 2008. Annual long-term debt sinking fund payments of approximately $1.4 million will begin in 2008 and will continue for eleven years. Based on current projections, we will make voluntary contributions in our defined benefit pension plan of $250,000 in 2007 and $500,000 in 2008. Required contributions will begin in 2009 and are forecast to be approximately $2 million in 2009 and 2010.

Based on our current expectations for cash needs, including the possible land purchase and related construction, we may choose to consider an equity or debt financing in 2008, between $12 million and $15 million, to address those cash needs. The need and timing will depend upon operational requirements, environmental expenditures, pension contributions and construction expenditures and cannot be precisely predicted at this time. In addition, if we experience significant environmental expenditures in the next two or three years it is possible we may need to raise additional funds. If interest rates remain favorable we may consider re-financing one of our mortgage bonds. If refinancing is deemed practical, we may re-issue the bond for additional principle if this might allow

Deleted: of

us to defer a possible financing beyond 2008. There can be no assurance, however, that equity or debt financing will be available on favorable terms when the Company is seeking such financings.

Deleted: c

Outlook

Pension and Insurance Expenses

Insurance costs have been increasing and are expected to continue to increase while we expect pension costs to decrease. Pension expenses decreased in 2006 by $107,000 and our actuarial estimates show pension expense decreasing by $142,000 in 2007. Insurance expenses including Medical, Liability and Workers' Compensation increased $70,000 in 2006 and are expected to increase further in 2007.

The regulated segments received rate relief for some of the historical pension and insurance increases. Increases beyond those experienced through 2005, which are allocated to the regulated segments, may require requesting future rate relief. The propane gas segment may recover these expenses by increasing rates, depending on market conditions in the propane gas industry and the ability to remain competitive.

Due to significant cost increases for our defined benefit pension plan over the past several years and with expectations that these cost increases will continue in the years ahead, we discontinued eligibility to our pension plan for all new hires.

For new hires not eligible for the defined benefit pension plan, we established an employer match to the employee's contribution to their 401K plans. It provided for a company match of 50% for each dollar contributed by the employee, up to 6% of their salary, for a company contribution of up to 3%. Beginning in 2007, for non-union employees the plan was enhanced to provide a company match of 100% for the first 2% of an employee's contribution, and a match of 50% for the next 4% of an employee's contribution, for a total company match of up to 4%. This new enhanced match will be negotiated with our six union contracts during 2007, to be effective on their respective contract date within 2007. The employees are eligible for the company match after six months of continuous service, with vesting of 100% after three years of continuous service.

Deleted: C

Electric Power Supply Contracts

Contracts with our two electric suppliers were set to expire on December 31, 2007. Those contracts provided electricity to our customers at rates much lower than market rates. As part of our negotiations, we agreed to end the current contract terms for our Northeast division on December 31, 2006 and executed an amended contract to begin January 1, 2007 and expire December 31, 2017. Although the contract rates will increase for 2007, this enabled us to obtain lower rates for the longer term of the contract than would have been available if we hadn't revised the contract. The savings are passed through to our customers without profit to the Company.

We executed a contract for the provider of electricity in our Northwest division in December 2006 and are seeking approval of this contract and its related terms and conditions from the FPSC on or before July 1, 2007. If the FPSC does not approve this contract, we may need to seek an alternative supplier or new contract with this same supplier for the purchase of electricity in the Northwest division. This contract will be for the purchase of electricity beginning January 1, 2008. We anticipate that contract will result in rates closer to market, which could cause our customers' bills to double over existing prices in the next several years.

We are unable to estimate what impact, if any, the higher rates could have on electric consumption.

Propane Gas

We are currently reviewing the possibility of hedging activities in 2007 to help mitigate the risk of price changes for our cost of propane. We are unable to determine the impact this activity will have on our future operating income.

We used advance purchase agreements made in the normal course of procuring propane gas supplies in past years. These agreements resulted in a loss of gross profit of approximately $5,000 in 2006 and additional gross profit of approximately $383,000 in 2005 and $242,000 in 2004.

Over-earnings-Natural Gas Segment

The FPSC approves rates that are intended to permit a specified rate of return on investment and limits the maximum amount of earnings of regulated operations. We currently estimate over-earnings in 2006 of $230,000 and in 2005 of $650,000. The prior year's 2005 estimate was $700,000. These liabilities have been included in an over-earnings liability on our balance sheet, with the potential of rate refunds to customers. The calculations supporting these liabilities are complex and involve a variety of projections and estimates before the ultimate settlement of such obligations.

Our 2005 and 2006 estimates of our over-earnings liabilities could change upon the FPSC finalization and review of our earnings in 2007 and 2008. The FPSC determines the disposition of over-earnings with alternatives that include refunding to customers, funding storm damage or environmental reserves, or reducing any depreciation reserve deficiency.

In 2007 we requested that the 2005 natural gas over-earnings disposition be used to provide additional funds to our regulatory liability – storm reserve and reduce the costs currently being recovered from our customers through a storm surcharge. If the FPSC approves this disposition, we will stop the storm surcharge in 2007.

Deleted:

Electric Customers

A large commercial customer in our electric division closed its operations in late 2006. As a result we anticipate annual revenues to be reduced by approximately $300,000 and annual gross profit to be reduced by approximately $50,000.

A large distribution center was built in our Northwest division in 2004 and a second facility was added in 2006. A third distribution facility is expected to be added by the end of 2007. Additional industrial and commercial development is planned for this general area, which should increase load significantly. Additional gross profit is anticipated in the future to increase between $30,000 and $50,000 as a result of this additional development.

Natural Gas Customers

Two transportation customers in our Central Florida division performed maintenance work and as a result were off-line for approximately six months in 2006. We anticipate that they will not be fully operational until mid-2007. The decreased revenue and gross profit is estimated to be $100,000 in 2007.

Indiantown Gas Agreement
The FPSC approved our joint transportation and territorial agreements with Indiantown Gas Company in October 2006. We began construction in the Indiantown area to install natural gas mains in the first phase of this development, for approximately 100 homes. The next two developments are slated to break ground in 2007 for construction of approximately 1,000 homes.

Storm Preparedness Expenses
Regulators continue to focus on hurricane preparedness and storm recovery issues for utility companies. Newly mandated storm preparedness initiatives could impact our operating expenses and capital expenditures beginning in 2007. The initial forecasts of these annual expenditures are approximately $700,000. It is possible that additional regulation and rules will be mandated regarding storm related expenditures over the next several years. We requested with the FPSC to recover the cost of the newly mandated storm preparedness initiatives and to defer these storm related expenditures until we receive recovery through a rate increase. If approved, both the recovery and expenditures may occur by mid-2007. If the FPSC does not approve our request, we plan to file a rate proceeding in 2007 as an alternative option for recovery of these expenditures.

Land Purchase
We are currently reviewing multiple sites for the new South Florida division office. We expect to purchase land for the new South Florida division office during 2007.

Contractual Obligations

Table of Contractual Obligations
(Dollars in thousands)

Payments due by period	Total	Less than 1 year	1 to 3 years	3 to 5 years	More than 5 years
Long-term Debt Obligations	52,500		2,818	2,818	46,864
Long-term Debt Interest	63,904	3,949	7,623	7,074	45,258
Operating Lease Obligations	352	151	163	38	
Natural Gas and Propane Gas Purchase Obligations	64,904	37,768	16,244	4,568	6,324
Electric Purchase Obligations	242	53	98	91	
Other Purchase Obligations	2,682	940	1,726	14	2
Total	184,584	42,861	28,672	14,603	98,448

Long-term Debt Obligations
The Long-term debt obligations are principal amounts.

Long-term Debt Interest
The Long-term debt interest represents the interest obligation on our Mortgage Bonds.

Operating Leases
Our total operating lease obligation is $352,000. We are leasing property from the City of Fernandina Beach in our Northeast division. The total obligation for the duration of this lease is about $107,000 over the next five years. We lease our appliance showroom in the

same division for approximately $35,000 annually. We also have other operating lease agreements with various terms and expiration dates.

Purchase Obligations

A purchase order is considered an obligation if it is associated with a contract or is authorizing a specific purchase of material. The Other Purchase Obligation amount presented above represents the value of open purchase orders.

Pension, Medical Postretirement and Other Obligations

Our pension plan continues to meet all funding requirements under ERISA regulations; however, under current actuarial assumptions, contributions may be required as early as 2009. Current projections indicate that we will make voluntary contributions of $250,000 in 2007, $500,000 in 2008 and make required contributions of approximately $2 million in 2009 and 2010, decreasing to under $1 million in 2011. These payments are not included in the Contractual Obligations table.

Deleted: a

Deleted: Conractual

Environmental clean up is anticipated to require approximately $600,000 in 2007, the remainder to be paid in following years. These payments are not included in the Contractual Obligations table.

We have medical postretirement payments relating to retiree medical insurance. These payments are not included in the Contractual Obligations table. Estimated future payments are contained in Note 12 in the Notes to Consolidated Financial Statements.

Dividends

We have historically paid dividends. It is our intent to continue to pay quarterly dividends for the foreseeable future. Our dividend policy is reviewed on an ongoing basis by our Board of Directors and is dependent upon our future earnings, cash flow, financial condition, capital requirements and other factors.

Other

Impact of Recent Accounting Standards

Financial Accounting Standard Board Interpretation No. 48

In June 2006, the Financial Accounting Standards Board (FASB) issued Interpretation No. 48, Accounting for Uncertainty in Income Taxes (FIN 48). The interpretation clarifies the accounting for uncertainty in income taxes recognized in an entity's financial statements in accordance with Statement of Accounting Standards (SFAS) No. 109, Accounting for Income Taxes. The interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 also provides guidance on de-recognition, measurement, classification, interest and penalties, accounting in interim periods, disclosure and transition. This interpretation is effective for calendar years beginning January 1, 2007.

Deleted: SFAS

Deleted: No.

Deleted: ,

We do not believe that the adoption of this interpretation will have a material impact on our financial condition. We have performed an analysis of tax positions taken and expected to be taken on the tax returns and assessed the technical merits of each tax position (by relying on legislation and statutes, common legislative intent, regulations,

Deleted: and statutes

rulings, and case law). We have determined that the Company has no material uncertain tax positions.

Deleted: Florida Public Utilities

Financial Accounting Standard No. 157

In September 2006, the FASB issued Statement No. 157, "Fair Value Measurements". This Statement clarifies fair value as the market value received to sell an asset or paid to transfer a liability, the exit value, and applies to any assets or liabilities that require recurring determination of fair value. The measurement includes any applicable risk factors and does not include any adjustment for volume. This Statement is effective for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods within. The Company expects to adopt SFAS No. 157 effective January 1, 2008. The Company does not believe adoption of this Statement will have a material impact on our financial condition or results of operation.

Deleted: Financial Accounting Standards Board (

Deleted:)

Financial Accounting Standard No. 158

In September 2006, the FASB issued Statement No. 158, "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans". Statement 158 will require the Company to show the funded status of its pension and retiree health care plans as a prepaid asset or accrued liability, and to show the net deferred and unrecognized gains and losses related to the retirement plans, net of tax, as part of accumulated other comprehensive income in shareholders' equity. Previously, the net deferred and unrecognized gains and losses were netted in the prepaid asset or accrued liability recorded for the retirement plans. The Company adopted the recognition provisions of Statement 158, as required, at December 31, 2006.

Deleted: has

Deleted: will

Deleted:

The Company uses September 30 as the measurement date to measure the assets and obligations of its retirement plans. Statement 158 will require the Company to perform the measurements at December 31 no later than fiscal years ending after December 15, 2008. The Company expects to make this change in 2008.

The actuarial valuation of the retirement plan obligations has been completed and the recognition provisions of Statement 158 at December 31, 2006 resulted in an additional liability for retirement plans. The tax on this liability has been recorded as a deferred income tax asset and as a regulatory deferred tax asset. As an offset, the regulatory portion of this loss of has been deferred as a regulatory asset-retirement plans to be recovered in future rate proceedings and the remaining loss has been included in other comprehensive income. The fair value of retirement plan assets is subject to change based on market fluctuations. See the table below for a summary of the effects to our financial statements.

FASB 158 Implementation Summary

	December 31, 2006		
	Before Application of SFAS 158	Adjustment	After Application of SFAS 158
Assets:			
Other regulatory assets- retirement plans	$0	$517	$517
Liabilities and Equity:			
Accumulated other comprehensive income/(loss)	0	(146)	(146)
Long term medical and pension reserve	3,819	1,063	(4,882)
Deferred income taxes	16,224	(88)	16,136

Regulatory tax liabilities	876	(312)	564

Staff Accounting Bulletin No. 108

In September 2006, the SEC issued Staff Accounting Bulletin (SAB) No. 108 "Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements". SAB 108 requires that public companies utilize a "dual-approach" to assessing the quantitative effects of financial misstatements. This dual approach includes both an income statement focused assessment and a balance sheet focused assessment. The guidance in SAB 108 must be applied to annual financial statements for fiscal years ending after November 15, 2006. The Company has adopted SAB No.108 and there has not been any impact on our consolidated financial position or results of operations as the result of this adoption.

Financial Accounting Standard No. 154

In May 2005, the FASB issued Statement No. 154, "Accounting Changes and Error Corrections". This Statement applies to all voluntary changes in accounting principle and requires retrospective application to prior period financial statements of changes in accounting principle, unless it is impracticable to determine either the period-specific effects or the cumulative effects of the change. This Statement is effective for accounting changes and corrections of errors made in fiscal years beginning after December 15, 2005. As of January 1, 2006, we adopted SFAS No. 154.

Financial Accounting Standard Board Interpretation No. 47

In March 2005, the FASB issued Interpretation No. 47, "An Interpretation of FASB Statement No. 143". SFAS No. 143, "Accounting for Asset Retirement Obligations", requires that the fair value of an asset retirement obligation be recognized at the time those obligations are incurred. Upon initial recognition of a legal liability, costs are capitalized as part of the related long-lived asset and allocated to expense over the useful life of the asset. SFAS No. 143 also requires that components of previously recorded depreciation related to the cost of removal of assets upon retirement, whether legal asset retirement obligations or not, be removed from a company's accumulated depreciation reserve. We adopted the provisions of the Statement as of January 1, 2003, as prescribed by the FPSC. Under FPSC guidelines, the estimated cost of removal expenses for normal retirements related to regulated fixed assets were reserved through the depreciation expense and accumulated reserves. This was disclosed in a footnote until December 31, 2003, when the estimated cost of removal from accumulated depreciation was reclassified to a regulatory liability for the obligation.

This Interpretation addresses the legal obligation to retire an asset when the timing and (or) method of settlement are conditional on a future event that may or may not be within the control of the Company. This Interpretation is effective no later than the end of fiscal years ending after December 15, 2005 (December 31, 2005 for calendar-year entities). As of January 1, 2006, we adopted FIN No. 47. The adoption of this interpretation has not had an impact to our financial condition or result of operations.

Critical Accounting Policies and Estimates

Regulatory Accounting

Deleted: 5

Deleted: 4

Deleted: 7

Deleted: 8

Deleted: Although the actuarial valuation of the retirement plan obligations at year end has not yet been completed, and the fair value of retirement plan assets is subject to change based on market fluctuations through December 31, the Company estimates that Statement 158 will result in an additional liability for retirement plans of about $3 million, a reduction in deferred tax liabilities of about $1 million, and a reduction in shareholders equity of about $2 million.

Deleted: the Financial Accounting Standards Board Interpretation

We prepare our financial statements in accordance with the provisions of SFAS No. 71, "Accounting for the Effects of Certain Types of Regulation" and it is our most critical accounting policy. In general, SFAS No. 71 recognizes that accounting for rate-regulated enterprises should reflect the relationship of costs and revenues introduced by rate regulation. As a result, a regulated utility may defer recognition of a cost (a regulatory asset) or recognize an obligation (a regulatory liability) if it is probable that, through the rate making process, there will be a corresponding increase or decrease in revenues or expenses. SFAS No. 71 does not apply to our unregulated propane gas operations.

Deleted: Statement of Accounting Standards No. 71(

Deleted:) –

Use of Estimates
We are required to use estimates in preparing our financial statements so they will be in compliance with accounting principles generally accepted in the United States of America. Actual results could differ from these estimates. We believe that the accruals for potential liabilities are adequate. We use estimates including the accrual for pensions, environmental liabilities, over-earnings liability, unbilled revenues, uninsured liability claims, and the regulatory deferred income tax liability.

Deleted: ,

- Pension- An actuary calculates the estimated pension liability in accordance with FASB 87, FASB 88 as amended by FASB 132 and FASB 158.
- Environmental liabilities-These liabilities are subject to certain unknown future events.
- Over-earnings liability-This liability is subject to regulatory review and possible disallowance of some expenses in determining the amount of over-earnings.
- Unbilled revenues-Unbilled revenue is estimated with certain assumptions including unaccounted for units and the use of current month sales to estimate unbilled sales.
- Uninsured liability claims-We are self-insured for the first $250,000 of each general and auto liability claim and accrue for estimated losses occurring from both asserted and unasserted claims. The estimate for unasserted claims arising from unreported incidents is based on an analysis of historical claims data and judgment. Until January 1, 2004, we were self-insured for medical claims and required accruals of estimated claims.
- Regulatory deferred income tax liability-This liability is estimated based on historical data and is subject to finalization of our income tax return. Actual results could differ from our estimates.

Revenue Recognition
We bill utility customers on a monthly cycle basis; however, the billing cycle periods for most customers do not coincide with the accounting periods used for financial reporting. We accrue estimated revenue for gas and electric customers for consumption used but not yet billed for in an accounting period. Determination of unbilled revenue relies on the use of estimates and historical data. We believe that the estimates for unbilled revenue materially reflect the unbilled gross profit for our customers for units used but not yet billed in the current period.

The FPSC approves rates that are intended to permit a specified rate of return on investment and limits the maximum amount of earnings of regulated operations. Any earnings in excess of this maximum amount is accrued for as an over-earnings liability and revenues are reduced for this same amount. The calculations supporting these liabilities are complex and involve a variety of projections and estimates before the

Deleted: ,

Deleted: ,

ultimate settlement of such obligations. The FPSC determines the disposition of any over-earnings with alternatives that include refunding to customers, funding storm damage or environmental reserves or reducing any depreciation reserve deficiency.

Deleted: ,

Effects of Inflation

Our tariffs for natural gas and electric operations provide for fuel clauses that adjust annually for changes in the cost of fuel. Increases in other utility costs and expenses not offset by increases in revenues or reductions in other expenses could have an adverse effect on earnings due to the time lag associated with obtaining regulatory approval to recover such increased costs and expenses, the uncertainty of whether regulatory commissions will allow full recovery of such increased costs and expenses and any effect on unregulated propane gas operations.

Environmental Matters

We currently use or have used in the past, several contamination sites that are currently involved in pending or threatened environmental litigation; see Note 10- "Contingencies" in the Notes to Consolidated Financial Statements. We intend to vigorously defend our rights in this litigation. We have insurance and rate relief to cover any expected losses or expenses. We believe that the aggregate of all future contamination assessment and remedial costs, legal fees and other related expenses would not exceed the insurance proceeds received and any rate relief granted. The final 2004 natural gas rate relief granted by the FPSC provided future recovery of $8.9 million for environmental liabilities. The remaining balance to be recovered from customers through future recovery is included on the balance sheet as "Other regulatory assets-environmental".

Off-Balance Sheet Arrangements

We do not have any "off-balance sheet arrangements". In simple terms, these are obligations of a company that are not disclosed on the balance sheet. For the full definition of this term, see Item 303(a)(4) of Regulation S-K.

Forward-Looking Statements (Cautionary Statement)

This report contains forward-looking statements including those relating to the following expectations:

- Based on our current expectations for cash needs, including cash needs relating to the possible land purchase and related construction, we may choose to consider an equity or debt financing in 2008 of $12 million to $15 million to address those cash needs. The need and timing will depend upon operational requirements, environmental expenditures, pension contributions and construction expenditures and cannot be precisely predicted at this time.
- Pension expenses will continue to decrease in 2007.
- Other insurance costs will increase in 2007.
- Electric storm preparedness expenses and recovery will occur in mid 2007.
- Propane gas hedging activity may occur in 2007.
- The fuel supply contract in our Northwest Florida division beginning January 1, 2008 will be approved by the FPSC in 2007 and will be effective for the purchase of fuel supply beginning in 2008.
- Our 2005 and 2006 over-earnings liabilities in natural gas will materialize as estimated after the FPSC reviews and audits.
- We expect to have higher fuel costs for 2007, 2008 and beyond.

- The development in Indiantown will occur as estimated.
- The purchase of land for our new natural gas and propane gas division office will occur in 2007.
- The FPSC will allow our natural gas over-earnings to fund a future storm reserve and reduce our current regulatory asset related to historic storm costs and discontinue the related natural gas storm surcharge in 2007.
- We have increased our focus on collection efforts of bad debt and we expect our bad debt expense to return to normal levels in 2007 and beyond.
- The commercial and industrial growth will occur as expected in our Northwest division providing increases in our revenues and gross profit.
- The two transportation customers in our Central Florida division will be fully operational by mid-2007.

Deleted:

These statements involve certain risks and uncertainties. Actual results may differ materially from what is expressed in such forward-looking statements. Important factors that could cause actual results to differ materially from those expressed by the forward-looking statements include, but are not limited to, those set forth above in "Risk Factors".

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

All financial instruments held by us were entered into for purposes other than for trading. We have market risk exposure only from the potential loss in fair value resulting from changes in interest rates. We have no material exposure relating to commodity prices because under our regulatory jurisdictions, we are fully compensated for the actual costs of commodities (natural gas and electricity) used in our operations. Any commodity price increases for propane gas are normally passed through monthly to propane gas customers as the fuel charge portion of their rate.

None of our gas or electric contracts are accounted for using the fair value method of accounting. While some of our contracts meet the definition of a derivative, we have designated these contracts as "normal purchases and sales" under SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities".

Beginning in 2007 we plan, on a rolling four-quarter basis, to purchase a "cap" on approximately one-third of our forecast propane gas volume purchases and pre-buy or hedge with a swap one-third of our forecast anticipated propane gas purchases. The remaining one-third will fluctuate with the market price. Our energy strategy allows us to participate in two-thirds of price declines but only one-third of price increases. As of December 31, 2006, we have not entered into any hedging activities. When we do enter into hedging activities, we will determine whether they meet the definition of normal sales and purchases and if not, we will determine whether we should use hedge accounting.

We have no exposure to equity risk, as we do not hold any equity instruments. Our exposure to interest rate risk is limited to investments held for environmental costs, the water sale long term receivable and short-term borrowings on the line of credit. The investments held for environmental costs are short-term fixed income debt securities whose carrying amounts are not materially different than fair value. The short-term borrowings were $3.5 million at the end of December 2006. Therefore, we do not believe we have material market risk exposure related to these instruments. The indentures governing our two first mortgage bond series outstanding contain "make-whole"

Deleted:

provisions, which are pre-payment penalties that charge for lost interest, which render refinancing impracticable.

Our non-interest bearing long-term receivable from the sale of the water operations was discounted at 4.34%. A hypothetical 0.5% (50 basis points) increase in the interest rate used would change the current fair value from $6.0 million to $5.9 million.

Deleted: (non-interest bearing)

In 2006, a hypothetical 0.5% (50 basis points) decrease in the long-term interest rate on $52.5 million debt excluding unamortized debt discount would change the fair value from $63.0 million to $66.9 million.

Changes in short-term interest rates could have an effect on income depending on the balance borrowed on the variable rate line of credit. We had short-term debt of $3.5 million on December 31, 2006 and $9.6 million on December 31, 2005. A hypothetical 1% increase in interest rates would have resulted in a decrease in annual earnings for 2006 by $35,000 and for 2005 by $96,000, based on year-end borrowings.

Deleted: 96,000

See Notes to Consolidated Financial Statements

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Summary of Significant Accounting and Reporting Policies

A. General

The Company is an operating public utility engaged principally in the purchase, transmission, distribution and sale of electricity and in the purchase, transmission, distribution, sale and transportation of natural gas. The Company is subject to the jurisdiction of the FPSC with respect to its natural gas and electric operations. The suppliers of electric power to the Northwest Florida division and of natural gas to the natural gas divisions are subject to the jurisdiction of the FERC. The Northeast Florida division is supplied most of its electric power by a municipality which is exempt from FERC and FPSC regulation. The Company also distributes propane gas through a non-regulated subsidiary.

B. Basis of Presentation

The consolidated financial statements include the accounts of Florida Public Utilities Company (FPU) and its wholly owned subsidiary, Flo-Gas Corporation. All significant intercompany balances and transactions have been eliminated. The Company's accounting policies and practices conform to accounting principles generally accepted in the United States of America (GAAP) as applied to regulated public utilities and are in accordance with the accounting requirements and rate-making practices of the FPSC and in accordance to the rule requirements of the Securities and Exchange Commission (SEC).

C. Use of Estimates

The preparation of financial statements in conformity with GAAP requires the Company to make certain estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of any contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Some of these estimates include the accruals for pensions, environmental liabilities, liability reserves, unbilled revenue, regulatory deferred tax liabilities and over-earnings liability. Actual results may differ from these estimates and assumptions.

D. Reclassifications

Certain amounts in the prior years' financial statements have been reclassified to conform to the 2006 presentation.

E. Regulation

The financial statements are prepared in accordance with the provisions of Statement of Financial Accounting Standards (SFAS) No. 71 – "Accounting for the Effects of Certain Types of Regulation". SFAS No. 71 recognizes that accounting for rate-regulated enterprises should reflect the relationship of costs and revenues introduced by rate regulation. A regulated utility may defer recognition of a cost (a regulatory asset) or show recognition of an obligation (a regulatory liability) if it is probable that, through the ratemaking process, there will be a corresponding increase or decrease in revenues. The Company has recognized certain regulatory assets and liabilities in the consolidated balance sheets. The Company believes that the FPSC will continue to allow recovery of

such items through rates. In the event that a portion of the Company's operations are no longer subject to the provisions of SFAS No. 71, the Company would be required to write-off related regulatory assets and liabilities that are not specifically recoverable through regulated rates. In addition, the Company would be required to determine if an impairment related to other assets exists, including plant, and write-down the assets, if impaired, to their fair value.

Summary of Regulatory Assets and Liabilities
(Dollars in thousands)

	2006	2005
Assets		
Deferred development costs (1)	$3,952	$4,190
Environmental assets (2)	8,284	8,868
Storm Reserve assets (3)	270	452
Deferred retirement plan costs (5)	517	
Unamortized Rate Case expense	368	541
Under recovery of fuel costs		3,375
Unamortized piping and conversion costs (1)	1,521	1,587
Unamortized loss on reacquired debt (1)	209	227
Total Regulatory Assets	$15,121	$19,240
Liabilities		
Tax liabilities (5)	$564	$991
Cost of removal	8,800	8,256
Storm reserve liabilities	1,636	1,536
Over recovery of fuel costs	2,475	
Over recovery of conservation	355	24
Over-earnings liability (4)	880	700
Total Regulatory Liabilities	$14,710	$11,507

Deleted: 4,604

Deleted: $876

Deleted: 15,022

(1) Deferred development costs, unamortized piping and conversion costs, and unamortized loss on reacquired debt are included in deferred charges in the consolidated balance sheets.

(2) The Company has reclassified the amount due from customers as a regulatory asset for environmental costs. This was authorized by the FPSC in their most recent natural gas rate proceeding and will be recovered over 20 years.

(3) The Company has been authorized by the FPSC recovery of Storm damages incurred in 2004 in their natural gas operations and will recover those costs from customers over 30 months beginning November 2005.

(4) The Company has estimated 2005 over-earnings for regulated natural gas operations of $700, re-estimated in 2006 to be $650. The Company has estimated 2006 over earnings for regulated natural gas operations of $230. The Company has recorded these liabilities and reduced revenues. The FPSC determines the disposition of over-earnings with alternatives that include refunding to customers, funding storm damage or environmental reserves, or reducing any depreciation reserve deficiency.

Deleted: ,000

Deleted: ,000

Deleted: ,000

(5) The actuarial valuation of the retirement plan obligations has been completed and the recognition provisions of Statement 158 at December 31, 2006 resulted in a regulatory asset for the portion of the loss of $517, to be recovered in future rate proceedings. The Regulatory tax liabilities were reduced by $312.

Formatted: Bullets and Numbering

Deleted: 7

Deleted: 8

The base revenues rates for regulated segments are determined by the FPSC and remain constant until a request for an increase is filed and approved by the FPSC. For the Company to recover the effects of inflation and construction expenditures for regulated segments, a request for an increase in base revenues would be required with the filing of two separate rate cases, electric and natural gas. In 2003 the Company successfully filed for electric rate increases and petitioned to consolidate the two electric "entities" into one entity. In 2004 the Company successfully filed for a natural gas rate increase. The Company is seeking rate relief for electric storm preparedness initiatives in 2007.

F. Derivatives

None of the Company's gas or electric contracts is accounted for using the fair value method of accounting. All material contracts that meet the definition of possible derivative instruments are considered "normal purchases and sales" under SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities".

On a rolling four-quarter basis, the Company will purchase a "cap" on approximately one-third of our forecast propane volume purchases and pre-buy or hedge with a swap one-third of our forecast anticipated propane purchases. The remaining one-third will fluctuate with the market price. The Company's energy strategy allows them to participate in two-thirds of price declines but only one-third of price increases. As of December 31, 2006, the Company has not entered into any hedging activities. When the Company does enter into hedging activities, they will determine whether they meet the definition of normal sales and purchases and if not, the Company will determine whether hedge accounting should be used.

G. Revenue Recognition

The Company's revenues include base revenues, fuel adjustment charges, conservation charges and the pass-through of certain governmental imposed taxes based on revenues. Specific revenues are collected from separate FPSC approved rates that allow direct recovery of expenses from the Company's customers for fuel, conservation, and revenue based taxes. Any over or under recovery of these expense items are deferred and subsequently refunded or collected in the following period.

The Company bills utility customers on a monthly cycle basis; however, the billing cycle periods for most customers do not coincide with the accounting periods used for financial reporting. The Company accrues estimated revenue for gas and electric customers on usage not yet billed for the accounting period. Determination of unbilled revenue relies on the use of estimates, fuel purchases and historical data.

The FPSC approves rates that are intended to permit a specified rate of return on investment and limits the maximum amount of earnings of regulated operations. Any earnings in excess of this maximum amount, is accrued for as an over-earnings liability, and revenues are reduced for this same amount. The calculations supporting these liabilities are complex and involve a variety of projections and estimates before the ultimate settlement of such obligations. The FPSC determines the disposition of any over-earnings with alternatives that include refunding to customers, funding storm damage or environmental reserves, or reducing any depreciation reserve deficiency.

H. Allowance for Doubtful Accounts

The Company records an allowance for doubtful accounts based on historical information and trended current economic conditions. The following is a summary of the activity in Allowance for Doubtful Accounts for the years ending December 31:

Allowance for Doubtful Accounts				
	Balance at Beginning of Year	Write-offs	Provisions to Bad Debt Expense	Balance at End of Year
2004	$ 180,000	320,000	409,000	$ 269,000
2005	$ 269,000	292,000	295,000	$ 272,000
2006	$ 272,000	353,885	510,885	$ 429,000

The Company increased bad debt expense in 2006 due to an increase in revenues and expected write-offs related to aging accounts receivables on several major accounts. The Company has increased its focus on collections and expects bad debt expense to return to normal levels in 2007 and beyond.

I. Utility Plant and Depreciation

Utility plant is stated at original cost. Propane utility plant that has been acquired in acquisitions is stated at fair market value at the time of each acquisition. Additions to utility plant include contracted services, direct labor, transportation and materials for additions. Units of property are removed from utility plant when retired. Maintenance and repairs of property and replacement and renewal of items determined not to be units of property are charged to operating expenses. Substantially all of the utility plant and the shares of Flo-Gas Corporation collateralize the Company's First Mortgage Bonds. See Note 2 for additional information relating to the acquisition adjustment.

Utility Plant
(Dollars in thousands)

Plant Classification	2006	2005
Land	$ 1,130	$ 1,124
Buildings	6,991	6,862
Distribution	158,010	147,580
Transmission	6,878	6,799
Equipment	12,700	11,534
Furniture and Fixtures	392	369
Work-in-Progress	2,867	5,010
	$ 188,968	$ 179,278

Depreciation for the Company's regulated segments is computed using the composite straight-line method at rates prescribed by the FPSC for financial accounting purposes. Propane depreciation is computed using a composite straight-line method at an average rate based on estimated average life of approximately 20-30 years. Such rates are based on estimated service lives of the various classes of property. Depreciation provisions on average depreciable property approximate 3.9% in 2006, 3.9% in 2005, and 3.6% in 2004.

J. Impact of Recent Accounting Standards

Financial Accounting Standard Board Interpretation No. 48
In June 2006, the FASB issued Interpretation No. 48, Accounting for Uncertainty in Income Taxes (FIN 48). The interpretation clarifies the accounting for uncertainty in income taxes recognized in an entity's financial statements in accordance with SFAS No. 109, Accounting for Income Taxes. The interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 also provides guidance on de-recognition, measurement, classification, interest and penalties, accounting in interim periods, disclosure and transition. This interpretation is effective for calendar years beginning January 1, 2007.

Deleted: Financial Accounting Standards Board (

Deleted:)

Deleted: ,

We do not believe that the adoption of this interpretation will have a material impact on our financial condition. We have performed an analysis of tax positions taken and expected to be taken on the tax returns and assessed the technical merits of each tax position (by relying on legislation and statutes, common legislative intent, regulations, rulings, and case law). We have determined that the Company has no material uncertain tax positions.

Deleted: Florida Public Utilities

Financial Accounting Standard No. 157
In September 2006, the FASB issued Statement No. 157, "Fair Value Measurements". This Statement clarifies fair value as the market value received to sell an asset or paid to transfer a liability, the exit value, and applies to any assets or liabilities that require recurring determination of fair value. The measurement includes any applicable risk factors and does not include any adjustment for volume. This Statement is effective for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods within. The Company expects to adopt SFAS No. 157 effective January 1, 2008. The Company does not believe adoption of this Statement will have a material impact on our financial condition or results of operation.

Deleted: Financial Accounting Standards Board (

Deleted:)

Financial Accounting Standard No. 158
In September 2006, the FASB issued Statement No. 158, "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans". Statement 158 will require the Company to show the funded status of its pension and retiree health care plans as a prepaid asset or accrued liability, and to show the net deferred and unrecognized gains and losses related to the retirement plans, net of tax, as part of accumulated other comprehensive income in shareholders' equity. Previously, the net deferred and unrecognized gains and losses were netted in the prepaid asset or accrued liability recorded for the retirement plans. The Company adopted the recognition provisions of Statement 158, as required, at December 31, 2006.

Deleted: will

The Company uses September 30 as the measurement date to measure the assets and obligations of its retirement plans. Statement 158 will require the Company to perform the measurements at December 31 no later than fiscal years ending after December 15, 2008. The Company expects to make this change in 2008.

The actuarial valuation of the retirement plan obligations has been completed and the recognition provisions of Statement 158 at December 31, 2006 resulted in an additional liability for retirement plans. The tax on this liability has been recorded as a deferred income tax asset and as a regulatory deferred tax asset. As an offset, the regulatory portion of this loss has been deferred as a regulatory asset-retirement plans to be recovered in future rate proceedings and the remaining loss of has been included in other comprehensive income. The fair value of retirement plan assets is subject to change based on market fluctuations. See the table below for a summary of the effects to our financial statements.

FASB 158 Implementation Summary

	December 31, 2006		
	Before Application of SFAS 158	Adjustment	After Application of SFAS 158
Assets:			
Other regulatory assets- retirement plans	$0	$517	$517
Liabilities and Equity:			
Accumulated other comprehensive income/(loss)	0	(146)	(146)
Long term medical and pension reserve	3,819	1,063	(4,682)
Deferred income taxes	16,224	(88)	16,136
Regulatory tax liabilities	876	(312)	564

Staff Accounting Bulletin No. 108

In September 2006, the SEC issued Staff Accounting Bulletin (SAB) No. 108 "Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements". SAB 108 requires that public companies utilize a "dual-approach" to assessing the quantitative effects of financial misstatements. This dual approach includes both an income statement focused assessment and a balance sheet focused assessment. The guidance in SAB 108 must be applied to annual financial statements for fiscal years ending after November 15, 2006. The Company has adopted SAB No.108 and there has not been any impact on our consolidated financial position or results of operations as the result of this adoption.

Financial Accounting Standard No. 154

In May 2005, the FASB issued Statement No. 154, "Accounting Changes and Error Corrections". This Statement applies to all voluntary changes in accounting principle and requires retrospective application to prior period financial statements of changes in accounting principle, unless it is impracticable to determine either the period-specific effects or the cumulative

effects of the change. This Statement is effective for accounting changes and corrections of errors made in fiscal years beginning after December 15, 2005. As of January 1, 2006, we adopted SFAS No. 154.

Deleted: tatement of Financial Accounting Standards

Financial Accounting Standard Board Interpretation No. 47
In March 2005, the FASB issued Interpretation No. 47, "An Interpretation of FASB Statement No. 143". SFAS No. 143, "Accounting for Asset Retirement Obligations", requires that the fair value of an asset retirement obligation be recognized at the time those obligations are incurred. Upon initial recognition of a legal liability, costs are capitalized as part of the related long-lived asset and allocated to expense over the useful life of the asset. SFAS No. 143 also requires that components of previously recorded depreciation related to the cost of removal of assets upon retirement, whether legal asset retirement obligations or not, be removed from a company's accumulated depreciation reserve. The Company adopted the provisions of the Statement as of January 1, 2003, as prescribed by the FPSC. Under FPSC guidelines, the estimated cost of removal expenses for normal retirements related to regulated fixed assets were reserved through the depreciation expense and accumulated reserves. This was disclosed in a footnote until December 31, 2003, when the estimated cost of removal from accumulated depreciation was reclassified to a regulatory liability for the obligation.

Deleted: B Statement

This Interpretation addresses the legal obligation to retire an asset when the timing and (or) method of settlement are conditional on a future event that may or may not be within the control of the Company. This Interpretation is effective no later than the end of fiscal years ending after December 15, 2005 (December 31, 2005 for calendar-year entities). As of January 1, 2006, we adopted FIN No. 47. The adoption of this interpretation has not had an impact to our financial condition or result of operations.

Deleted: The Company has determined that the adoption of this interpretation will not have a material impact on its financial condition or results of operation.

Deleted: As of January 1, 2006, we adopted the Financial Accounting Standards Board Interpretation No. 47.¶

2. **Goodwill and Intangible Assets**

In accordance with SFAS No. 142, "Goodwill and Other Intangible Assets", the Company does not amortize goodwill or intangibles with indefinite lives. The Company periodically tests the applicable reporting segments, natural gas and propane gas, for impairment. In the event a segment becomes impaired, the Company would write down the associated goodwill and intangible assets to fair value. The impairment tests performed in 2005 and 2006 showed no impairment for either reporting segment.

Goodwill associated with the Company's acquisitions is identified as a separate line item on the consolidated balance sheet and consists of $500,000 in the natural gas segment and $1.9 million in the propane gas segment.

Intangible assets associated with the Company's acquisitions and software have been identified as a separate line item on the balance sheet. Summaries of those intangible assets at December 31 are as follows:

Intangible Assets
(Dollars in thousands)

		2006	2005
Customer distribution rights	(Indefinite life)	$ 1,900	$ 1,900
Customer relationships	(Indefinite life)	900	900

Software	(Five to nine year life)	3,122	2,971
Non-compete agreement	(Five year life)	35	35
Accumulated amortization		(1,552)	(1,415)
Total intangible assets, net of amortization		$4,405	$ 4,391

The 2006 amortization expense of computer software is approximately $300,000. The Company expects the amortization expense of computer software to be approximately $300,000 annually over the next five years, with the current level of software investment.

3. *Over-earnings-Natural Gas*
The FPSC approves rates that are intended to permit a specified rate of return on investment and limits the maximum amount of earnings of regulated operations. The Company has agreed with the FPSC staff to limit the earned return on equity for regulated natural gas and electric operations.

The Company estimated 2005 over-earnings for regulated natural gas operations of $700,000. The 2005 over earnings estimate was revised in 2006 to be $650,000. The Company estimated 2006 over-earnings for regulated natural gas operations of $ 230,000. These liabilities have been included in over-earnings liability on the Company's balance sheet. The calculations supporting these liabilities are complex and involve a variety of projections and estimates before the ultimate settlement of such obligations.

Deleted: was estimated

The Company feels the estimates of the 2005 and 2006 over-earnings liabilities are accurate, but it could change upon the FPSC finalization and review of earnings expected in 2007 and 2008. The FPSC determines the disposition of over-earnings with alternatives that include refunding to customers, funding storm damage or environmental reserves, or reducing any depreciation reserve deficiency.

4. *Storm Reserves*
As of December 31, 2006, the electric storm reserve was approximately $1.6 million. Since the last order on the 1999 electric disposition of over-earnings, the FPSC has allowed the Company the automatic flexibility of applying the electric over-earnings to the storm damage reserves each year since 1999 and allowing additional storm damage accruals up to a cap of $2.9 million in the electric divisions. In 2006, 2005, and 2004 there were no electric over-earnings and accordingly no additional over earnings amounts were applied to the storm damage reserves.

In October 2005, the FPSC approved recovery of 2004 natural gas storm costs plus interest and revenue taxes over a 30-month period beginning November 2005. The Company deferred storm costs as a regulatory asset due from customers on the balance sheet. As of December 31, 2006, the amount of natural gas regulatory asset relating to storm was $270,000.

The Company has requested the FPSC to allow disposition of the 2005 over recoveries in natural gas to be used to recover this regulatory asset and discontinue this storm surcharge. As part of this same request, the Company has also asked the FPSC to allow any excess over recovery amount to provide additional funds for the "regulatory liability- storm reserve" for natural gas. We expect the FPSC to rule on this request during 2007.

In 2005, the FPSC approved applying 2002 natural gas over-earnings of $118,000 to the storm reserve to cover future storm costs. This is included as part of the "regulatory liability – storm reserve" on the balance sheet.

5. Income Taxes

Deferred income taxes are provided on all significant temporary differences between the financial statements and tax basis of assets and liabilities at currently enacted tax rates. Investment tax credits have been deferred and are amortized based upon the average useful life of the related property in accordance with the rate treatment.

A. Income Taxes related to Deferred Gain on Water Sale

On March 27, 2003, the Company sold substantially all of its assets of the water division to the City of Fernandina Beach. The sale was made pursuant to a "threat of condemnation" during the fourth quarter of 2002. For tax purposes the Company elected to defer the gain on the sale of the assets pursuant to Code Section 1033 of the Internal Revenue Code of 1986 (IRC). Section 1033 allows non-recognition of gain if property is disposed as a result of threat of condemnation and property that is similar or related in service or use is purchased to replace the disposed property. To qualify, the replacement property must be purchased within the replacement period, which begins on the earlier of date of disposition (March 27, 2003) or date of threat of condemnation (December 31, 2002) and ending two years after the close of the year of sale (December 31, 2005). For real property, the replacement period is extended to three years (December 31, 2006).

The Company purchased property that is similar or related in service or use within the replacement periods with the exception of the intangible assets. During the IRS audit in 2005, the IRS disallowed a portion, approximately $900,000 of the deferral relating to the intangible assets, since replacement was no longer expected.

A $2.9 million estimated tax payment made in 2003 related to the gain on the sale of the water division. It was subsequently determined that the income tax would be deferred (see Note 3 – "Discontinued Operations"). The Company applied for a refund and received $3.9 million in July 2004, which included other estimated tax overpayments.

B. Provision for Income Taxes

The provision (benefit) for income taxes consists of the following:

(Dollars in thousands)	Years ended December 31, 2006	2005	2004
Current payable			
Federal	$ 3,550	$ 2,150	$ (566)
State	646	370	(96)
	4,196	2,520	(662)
Deferred			
Federal	(1,571)	(143)	2,003
State	(255)	(9)	358
	(1,826)	(152)	2,361

Investment tax credit	(75)	(81)	(84)
Total income taxes	$ 2,295	$ 2,287	$ 1,615

C. Effective Tax Rate Reconciliation

The difference between the effective income tax rate and the statutory federal income tax rate applied to pretax income is of continuing operations accounted for as follows:

(Dollars in thousands)	Years ended December 31,		
	2006	2005	2004
Federal income tax at statutory rate (34%)	$ 2,230	$ 2,222	$ 1,771
State income tax, net of federal benefit (5.5%)	238	237	189
Investment tax credit	(75)	(81)	(84)
Tax exempt interest	(85)	(71)	(94)
Other	(13)	(20)	(167)
Total provision for income taxes from continuing operations	$ 2,295	$ 2,287	$ 1,615

D. Deferred Income Taxes

The tax effects of temporary differences producing deferred income taxes in the accompanying consolidated balance sheets are as follows:

(Dollars in thousands)	Years ended December 31,	
Deferred tax assets:	**2006**	**2005**
Environmental	$ 2,063	$ 1,932
Self insurance	774	731
Storm reserve liability	509	408
Vacation Pay	357	320
Other deferred credits	15	61
Allowance for uncollectible accounts receivable	162	103
General liability	68	111
Rate refund	331	263
Pension	698	286
Under/Over recovery of Conservation Costs	134	9
Other	37	37
Total deferred tax assets	$ 5,148	$ 4,261
Deferred tax liabilities:		
Utility plant related	$ 20,274	$ 20,319
Deductible intangibles	696	577
Under recovery of fuel costs	762	1,704

E. IRS Audit
The IRS completed an audit in 2005 of the Company's 2002 and 2003 federal income tax returns. The audit resulted in a current income tax payable amount $361,000 due to adjustments to depreciation, reserve accounts and recognition of a portion of the water sale gain that was previously deferred. This amount was partially offset by $285,000 in deferred tax liabilities previously established.

6. Capitalization

A. Stock Dividend
On July 25, 2005 a three-for-two stock split in the form of a stock dividend was issued to the shareholders of record on July 15, 2005. All common share information has been restated to reflect the stock split for all periods presented.

B. Common Shares Reserved
The Company has reserved the following common shares for issuance as of December 31, 2006:

Dividend Reinvestment Plan	54,071
Employee Stock Purchase Plan	52,035
Board Compensation Plan	20,714
Common Stock	3,833,352

C. Preferred Stock
The Company has 6,000 shares of 4 ¾% Series A preferred stock $100 par value authorized for issuance of which 6,000 were issued and outstanding at December 31, 2006. The Company also has 5,000, 4 ¾% Series B preferred stock $100 par value authorized for issuance none of which has been issued. The annual dividend rate for the preferred stock is 4.75%.

The Company also has 32,500, $1.12 Convertible Preference stock, $20 par value and $22 redemption price, authorized for issuance none of which has been issued.

D. Dividend Restriction
The Company's Fifteenth Supplemental Indenture of Mortgage and Deed of Trust restricts the amount that is available for cash dividends. At December 31, 2006, approximately $9 million of retained earnings were free of such restriction and therefore available for the payment of dividends. The line of credit agreement contains covenants that, if violated, could restrict or prevent the payment of dividends. At December 31, 2006 the Company is not in violation of these covenants.

E. Treasury Shares

Common shares resulting from stock dividends have been allocated to common shares held as treasury shares. Treasury shares are not eligible to receive such allocations. Some of these Treasury shares were subsequently reissued, resulting in an overstatement of additional paid in capital. Accordingly the Company has restated all periods presented to reflect the correct number of treasury shares and the value of treasury shares and additional paid in capital at each year-end. As the adjustment is a reallocation of amounts between treasury stock and additional paid in capital, there is no effect on net income, earnings per common share or total stockholders' equity in any period presented.

F. Employee Stock Purchase Plan

The Company's Employee Stock Purchase Plan offers common stock at a discount to qualified employees. The following table shows the number of shares issued under the Plan and the total aggregate consideration received:

Year	Shares	Consideration
2006	25,655	$ 287,000
2005	22,427	$ 236,000
2004	24,164	$ 220,000

G. Dividend Reinvestment Plan

The Company's Dividend Reinvestment Plan is offered to all Company shareholders and allows the shareholder to reinvest dividends received and purchase additional shares without a fee. The following table shows the number of shares issued under the Plan and the total aggregate consideration received:

Year	Shares	Consideration
2006	13,972	$ 190,000
2005	14,456	$ 193,000
2004	18,513	$ 217,000

7. Long-term Debt

The Company issued its Fourteenth Series of FPU's First Mortgage Bond on September 27, 2001 in the aggregate principal amount of $15.0 million as security for the 6.85% Secured Insured Quarterly Notes, due October 1, 2031 (IQ Notes). Interest on the pledged bond accrues at the annual rate of 6.85% payable quarterly in arrears on January 1, April 1, July 1 and October 1 of each year beginning January 1, 2002.

The Company issued $14.0 million of Palm Beach County municipal bonds (Industrial Development Revenue Bonds) on November 14, 2001 to finance development in the area. The interest rate on the thirty-year callable bonds is 4.90%. The bond proceeds were restricted and held in trust until construction expenditures were actually incurred by the Company. In 2002 the remaining $8.0 million was drawn from the restricted funds held by the trustee.

In 1992, The Company issued its First Mortgage Bond 9.08% Series in the amount of $8.0 million. The thirty-year bond is due in June 2022.

The Company issued two of its Twelfth Series First Mortgage bond series on May 1, 1988; the 9.57% Series due 2018 in the amount of $10.0 million and 10.03% Series due 2018 in the amount of $5.5 million. These two issuances require sinking fund payments of $909,000 and $500,000 respectively, beginning in 2008.

Long-term debt on the balance sheet has been reduced for unamortized debt discount. The unamortized debt discount at December 31 included in long-term debt on the balance sheet is $1.8 million in 2006 and $1.9 million in 2005.

Annual Maturities of Long-Term Debt

	Total	2007	2008	2009	2010	2011	2012 & Thereafter
Long-term Debt	$50,702	($82)	1,327	$1,327	$1,327	$1,327	$ 45,476

8. Notes Payable

In 2004, FPU entered into an amended and restated loan agreement that allows the Company to increase the line of credit (LOC) upon 30 days notice by the Company to a maximum of $20.0 million. In 2006 the agreement was renewed with an expiration date of July 1, 2008. We have not exercised our option to increase the LOC limit which is currently at $12.0 million with an outstanding balance of $3.5 million and a remaining available of $8.5 million. The Company reserves $1.0 million of the LOC to cover expenses for any major storm repairs in its Northwest Florida division. An additional $250,000 of the LOC is reserved for a 'letter of credit' insuring propane facilities.

The average interest rates for the line of credit were as follows as of December 31:

Year	Rate
2006	6.2%
2005	5.3%
2004	3.3%

9. Fair Value of Financial Instruments

The carrying amounts reported in the balance sheet for investments held in escrow for environmental costs, notes payable, taxes accrued and other accrued liabilities approximate fair value. As the older bonds contain 'make whole' provisions it would negate any fluctuation in interest rates. The fair value of long-term debt excluding the unamortized debt discount is estimated by discounting the future cash flows of each issuance at rates currently offered to the Company for similar debt instruments of comparable maturities. The values at December 31 are shown below.

	2006		2005	
	Carrying Amounts	**Approximate Fair Value**	**Carrying Amounts**	**Approximate Fair Value**
Long-term debt	$ 52,500,000	$63,000,000	$52,500,000	$ 63,000,000

10. Contingencies

Environmental

The Company is subject to federal and state legislation with respect to soil, groundwater and employee health and safety matters and to environmental regulations issued by the Florida Department of Environmental Protection (FDEP), the United States Environmental Protection Agency (EPA) and other federal and state agencies. Except as discussed below, the Company does not expect to incur material future expenditures for compliance with existing environmental laws and regulations.

Site	Range From	Range To
West Palm Beach	$ 4,801,000	$ 18,027,000
Sanford	710,000	710,000
Pensacola and Other	85,000	85,000
Total	$ 5,596,000	$ 18,822,000

The Company currently has $13.8 million reserved as an environmental liability. The FPSC approved $14.0 million for total recovery based on the original 2005 projections as a basis for rate recovery. The Company has recovered $5.5 million from insurance and rate recovery, net of costs. The balance of $8.3 million is recorded as a regulatory asset. On October 18, 2004 the FPSC approved recovery of $9.1 million for environmental liabilities (the remaining amount to be recovered is $8.3 million and is included on the balance sheet as "Other regulatory assets – environmental"). The amortization of this recovery and reduction to the regulatory asset began on January 1, 2005. The majority of environmental cash expenditures is expected to be incurred before 2010, but may continue for another 10 years.

West Palm Beach Site

The Company is currently evaluating remedial options to respond to environmental impacts to soil and groundwater at and in the immediate vicinity of a parcel of property owned by it in West Palm Beach, Florida upon which the Company previously operated a gasification plant. The Company entered into a Consent Order with the Florida Department of Environmental Protection (FDEP) effective April 8, 1991, that requires the Company to delineate the extent of soil and groundwater impacts associated with the prior operation of the gasification plant and to remediate such soil and groundwater impacts, if necessary. The Company completed the delineation of soil and groundwater impacts at the site in October 2006. An engineering consultant was retained to perform a feasibility study (FS) to evaluate appropriate remedies for the site. A FS was transmitted to FDEP on November 30, 2006.

The FS evaluated a wide range of remedial alternatives based on criteria provided by applicable laws and regulations. The total costs for the remedies evaluated in the FS ranged from a low of $2.8 million to a high of $54.6 million. Based on the likely acceptability of proven remedial technologies described in the FS and implemented at similar sites in other states, consulting/remediation costs to address the impacts now characterized at the West Palm Beach site are projected to range from $4.6 million to $17.9 million. This range of costs covers such remedies as in situ solidification for deeper soil impacts, excavation of superficial soil impacts, installation of a barrier wall with a permeable biotreatment zone (PBZ), monitored natural attenuation of dissolved impacts in groundwater (MNA), or some combination of these remedies. The FS proposed a remedy of superficial soil excavation, installation of a hanging barrier wall with PBZ and MNA, the cost of which is projected to range from $4.6 million to $9.9 million.

Deleted: ,

Prior to FDEP's approval of a final remedy for the site, the Company is unable to determine, to a reasonable degree of certainty, the complete extent or cost of remedial action that may be required. As of December 31, 2006, and subject to the limitations described above, remediation costs (including attorneys' fees and costs) for this site are projected to range from approximately $4.8 million to $18.0 million.

Sanford Site

The Company owns a parcel of property located in Sanford, Florida, upon which a gasification plant was operated prior to its acquisition of the property. Following discovery of soil and groundwater impacts on the property, the Company has participated with four former owners and operators of the gasification plant in the funding of numerous investigations of the extent of the impacts and the identification of an appropriate remedy. On or about March 25, 1998, the Company executed an Administrative Order on Consent (AOC) with the four former owners and operators (collectively, the Group) and the United States Environmental Protection Agency (EPA) that obligated the Group to implement a Remedial Investigation/Feasibility Study (RI/FS) and to pay EPA's past and future oversight costs. The Group also entered into a Participation Agreement and an Escrow Agreement on or about April 13, 1998 (WFS Participation Agreement). Work under the RIBS AOC and WFS Participation Agreement is now complete and the Company has no further obligations under either document.

Deleted: I

On July 5, 2000, EPA issued a Record of Decision (ROD) approving the final remedial action for contaminated soils at the site (OU1 Remedy). The initial estimated cost for the OU1 Remedy described in the ROD ranged from $5.6 million to $5.8 million. On June 12, 2001, EPA issued a ROD approving the final remedial action for contaminated groundwater at the site (OU2 Remedy). The present worth cost estimate for the OU2 Remedy was $320,252.

The Company and the Group then entered into the Second Participation Agreement on August 1, 2000, as amended through June 19, 2002 (RD/RA Participation Agreement). The RD/RA Participation Agreement provided for funding the remedial design/remedial action (RD/RA) task for OU1 and OU2. The Company's share of costs for implementation of the RD/RA task for OU1 and OU2 was set at 10.5%, providing the total cost of the RD/RA task, including the pre-remedial design fieldwork, does not exceed $6.0 million. In 2002, the Company paid $210,178 to the Escrow Agent pursuant to a first call for funds in the total amount of $2.0 million under the RD/RA Participation Agreement. As of December 31, 2006, a balance of $550,000 remained in the Escrow Account from the first call for funds.

Deleted: I

Deleted:

In late September 2006, EPA sent a Special Notice Letter to the Company, notifying the Company of EPA's selection of a final remedy for OU1 (soils), OU2 (groundwater), and OU3 (sediments), and giving the Company and the other Group members sixty (60) days within which to submit a "good faith offer" to EPA to provide for implementation of the selected remedies. The Special Notice Letter included an Amended ROD for OU1 (the ROD for OU1 was amended to account for a significant increase in the volume of off-site soil impacts and a change in the selected remedy), the original ROD for OU2, and a ROD for OU3. The total estimated remediation costs for the Sanford Gasification Plant Site are now projected to be $12.5 million. On November 30, 2006, the Company and the Group submitted to EPA a good faith offer to implement the approved remedies as set forth in the RODs for OU1-OU3.

The Company and the Group recently reached agreement on the terms and conditions of a Third Participation Agreement, to provide for funding the remediation work specified in the RODs for OU1-OU3. The Third Participation Agreement, which supersedes and replaces the Second Participation Agreement, is expected to be signed by all Group members by the end of January 2007. The Company's share of remediation costs under the Third Participation Agreement is set at 5% of a maximum of $13.0 million, or $650,000. At present, it is not anticipated that the total cost of remediation will exceed $13.0 million. If it does, the Group members have agreed to negotiate in good faith to allocate the excess costs at such time that it reasonably appears that the total remediation costs will exceed $13.0 million. In any such event, the Company anticipates that its share will not be greater than 5% and could be less than 5%.

Assuming the Third Participation Agreement becomes effective in 2007 and EPA accepts the Group's good faith offer, the Company's total probable legal and remediation expenses for this site are projected to be approximately $710,000.

Pensacola Site

Deleted: s

The Company is the prior owner/operator of the former Pensacola gasification plant, located in Pensacola, Florida. Following notification on October 5, 1990 that FDEP had determined that the Company was one of several responsible parties for any environmental impacts associated with the former gasification plant site, the Company entered into cost sharing agreements with three other responsible parties providing for the funding of certain contamination assessment activities at the site.

Following field investigations performed on behalf of the responsible parties, on July 16, 1997, FDEP approved a final remedy for the site that provides for annual sampling of selected monitoring wells. Such annual sampling has been undertaken at the site since 1998. The Company's share of these costs is less than $2,000 annually.

In March 1999, EPA requested site access in order to undertake an Expanded Site Inspection (ESI). The ESI was completed by EPA's contractor in 1999 and an ESI Report was transmitted to the Company in January 2000. The ESI Report recommends additional work at the site. The responsible parties met with FDEP on February 7, 2000 to discuss EPA's plans for the site. In February 2000, EPA indicated preliminarily that it will defer management of the site to FDEP; however, as of December 31, 2006, the Company has not received any written confirmation from EPA or FDEP regarding this matter. Prior to receipt of EPA's written determination regarding site management, the Company is unable to determine whether additional field work or site remediation will be required by EPA and, if so, the scope or costs of such work.

Deleted: T

Key West Site

Deleted: s

From 1927 to 1938, the Company owned and operated a gasification plant in Key West, Florida. The plant discontinued operations in the late 1940s; the property on which the plant was located is currently used for a propane gas distribution business. In March 1993, a Preliminary Contamination Assessment Report (PCAR) was prepared by a consultant jointly retained by the Company and the current site owner and was delivered to FDEP. The PCAR reported that very limited soil and groundwater impacts were present at the site. By letter dated December 20, 1993, FDEP notified the Company that the site did not warrant further "CERCLA consideration and a Site Evaluation Accomplished (SEA) disposition is recommended." FDEP then referred the matter to its Marathon office for consideration of whether additional work would be required by FDEP's district office under Florida law. As of December 3 1, 2006, the Company has received no further communication from FDEP with respect to the site. At this time, we are unable to determine whether additional fieldwork will be required by FDEP and, if so, the scope or costs of such work. In 1999, the Company received an estimate from its consultant that additional costs to assess and remediate the reported impacts would be approximately $166,000. Assuming the current owner shared in such costs according to the allocation agreed upon by the parties for the PCAR, the Company's share would be approximately $83,000.

11. Commitments

A. General

To ensure a reliable supply of power and natural gas at competitive prices, the Company has entered into long-term purchase and transportation contracts with various suppliers and producers, which expire at various dates through 2015. Purchase prices under these contracts are determined by formulas either based on market prices or at fixed prices. At December 31, 2006, the Company has firm purchase and transportation commitments adequate to supply its expected future sales requirements. The Company is committed to pay demand or similar fixed charges of approximately $37.8 million during 2007 related to gas purchase agreements. Substantially all costs incurred under the electric and gas purchase agreements are recoverable from customers through fuel adjustment clause mechanisms.

B. Operating Leases

The Company's total operating lease obligation is $352,000. The Company is leasing property from the City of Fernandina Beach in our Northeast division. The Company is in the process of renegotiating the terms of this lease and it may be able to terminate this lease at an earlier date. The Company leases an appliance showroom in the same division for approximately $35,000 annually. The Company also has other operating lease agreements with various terms and expiration dates. The following table shows the Operating Lease obligations over the next five years.

	2007	2008	2009	2010	2011
Operating Lease Obligations	$151,000	$116,000	$47,000	$38,000	$0

12. Employee Benefit Plans

The actuarial valuation of the retirement plan obligations has been completed and the recognition provisions of Statement 158 at December 31, 2006 resulted in an additional liability for retirement plans, Pension Plan and Retirees Medical Plan. See Footnote 1J, Impact of Recent Accounting Standards, Financial Accounting Standard 158 for a summary of the impact to our financial statements.

A. Pension Plan

The Company sponsors a qualified defined benefit pension plan for non-union employees that were hired before January 1, 2005 and for unionized employees that work under one of the six Company union contracts that approved this change in 2005. Our six union contracts have accepted this change for their new members hired after their respective contract date in 2005.

The following tables provide a reconciliation of the changes in the plan's benefit obligations and fair value of assets over the 3-year period ending December 31, 2006 and a statement of the funded status as of December 31, of all three years:

Benefit Obligations and Funded Status

		Years Ended December 31, 2006	2005	2004
(1)	Change in Projected Benefit Obligation			
(a)	Projected Benefit Obligation at the Beginning of the Year	$36,349,925	$34,926,383	$31,540,942
(b)	Service Cost	1,225,495	1,195,723	1,084,564
(c)	Interest Cost	2,160,719	2,000,099	1,940,122
(d)	Actuarial (Gain) or Loss	541,865	(842,777)	1,708,132

Expected Return on Plan Assets

The expected rate of return on plan assets is 8.5%. The Company expects 8.5% to fall within the 40 to 50 percentile range of returns on investment portfolios with asset diversification similar to that of the Pension Plan's target asset allocation.

Investment Policy and Strategy

The Company has established and maintains an investment policy designed to achieve a long-term rate of return, including investment income and appreciation, sufficient to meet the actuarial requirements of the Pension Plan. The Company seeks to accomplish its return objectives by investing in a diversified portfolio of equity, fixed income and cash securities seeking a balance of growth and stability as well as an adequate level of liquidity for pension distributions as they fall due. Plan assets are constrained such that no more than 10% of the portfolio will be invested in any one issue.

Cash Flows

Voluntary Prescription Drug Coverage

Legislation enacted in December 2003 provides for the addition of voluntary prescription drug coverage under Medicare starting in 2006. The legislation also provides for a 28% tax-free subsidy for each qualified covered retiree's drug cost between certain thresholds if the employer's coverage is at least actuarially equivalent to the standard Medicare drug benefit. Based on the final regulations issued by the Centers for Medicare and Medicaid Services on January 21, 2005, we determined prescription drug coverage of the Florida Public Utilities Company Postretirement Medical Benefits plan to be actuarially equivalent to Medicare Part D.

Discount Rate Assumption

The discount rate assumption used to determine the postretirement benefit obligations is based on current yield rates in the double A bond market. The current year's discount rate was selected using a method that matches projected payouts from the plan with a zero-coupon double A bond yield curve. This yield curve was constructed from the underlying bond price and yield data collected as of the plan's measurement date and is represented by a series of annualized, individual discount rates with durations ranging from six months to thirty years. Each discount rate in the curve was derived from an equal weighting of the double A or higher bond universe, apportioned into distinct maturity groups. These individual discount rates are then converted into a single equivalent discount rate, which is then used for FAS discount purposes. To assure that the resulting rates can be achieved by a postretirement benefit plan, only bonds that satisfy certain criteria and are expected to remain available through the period of maturity of the plan benefits are used to develop the discount rate. Prior years' discount rate assumptions were set based on investment yields available on double A, long-term corporate bonds.

Actuarial Equivalent

In determining "Actuarial Equivalence", Aon's proprietary prescription drug pricing tool Aon Rx was used. This tool allowed us to determine the estimated Per Member Per Month (PMPM) prescription drug cost for both the Florida Public Utilities Company plan and the Medicare plan. The two PMPM's were adjusted for monthly retiree contributions. We assumed that 60% of the monthly combined medical and prescription drug retiree contribution for the Florida Public Utilities Company plan applies towards prescription drugs. Because the subsidy is the same regardless of the cost sharing structure (unless the plan is not "Actuarial Equivalent"), in general a plan that has higher cost sharing would reduce their annual cost as a percentage greater than a plan would that has lower cost sharing.

C. Health Plan

In December 2003, the Company became fully insured for its employee and retiree's medical insurance. Net health care benefits paid by the Company for active employees were approximately $1.7 million in 2006, $1.6 million in 2005, and $1.5 million in 2004, excluding administrative and stop-loss insurance.

D. 401K Plan

The Company has discontinued eligibility to the defined benefit pension plan for all new hires, and replaced it with a new 401K match.

For new hires not eligible for the defined benefit pension plan, we established an employer match to the employee's contribution to their 401K plans. It provided for a company match of 50% for each dollar contributed by the employee, up to 6% of their salary, for a Company contribution of up to 3%. Beginning in 2007, for non-union employees the plan was enhanced to provide a company match of 100% for the first 2% of an employee's contribution, and a match of 50% for the next 4% of an employee's contribution, for a total company match of up to 4%. This new enhanced match will be negotiated with our six union contracts during 2007, to be effective on their respective contract date within 2007. The employees are eligible for the company match after six months of continuous service, with vesting of 100% after three years of continuous service.

13. Segment Information

The Company is organized into two regulated business segments: natural gas and electric, and one non-regulated business segment, propane gas. There are no material inter-segment sales or transfers.

Identifiable assets are those assets used in the Company's operations in each business segment. Common assets are principally cash and overnight investments, deferred tax assets and common plant.

Business segment information for 2006, 2005 and 2004 is summarized as follows:

(Dollars in thousands)	2006	2005	2004
Revenues			
Natural gas	$ 70,981	$ 69,094	$ 55,962
Electric	48,527	47,450	42,910
Propane gas	14,727	13,479	11,167

Consolidated	$ 134,235	$ 130,023	$ 110,039
Operating income, excluding income tax			
Natural gas	$ 6,118	$ 6,049	$ 4,978

14. Quarterly Financial Data (Unaudited)

The quarterly financial data presented below reflects the influence of seasonal weather conditions, the timing of rate increases and the migration of winter residents and tourists to Central and South Florida during the winter season. Significant increases in the fourth quarter of 2005 expenses relate to the performance of previously delayed expenditures from previous quarters.

(Dollars in thousands, except per share amounts):	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
2006				
Revenues	$ 43,348	$ 29,878	$ 29,415	$ 31,594
Gross profit	$ 14,135	$ 11,402	$ 10,867	$ 11,860
Operating income	$ 4,528	$ 2,065	$ 1,488	$ 2,248
Earnings before income taxes	$ 3,507	$ 1,162	$ 609	$ 1,281
Net Income	$ 2,221	$ 738	$ 475	$ 830

Earnings per common share (basic and diluted):				
Continuing operations	$ 0.37	$ 0.12	$ 0.08	$ 0.14
2005				
Revenues	$ 35,438	$ 28,329	$ 29,190	$ 37,066
Gross profit	$ 13,619	$ 10,963	$ 10,374	$ 12,263
Operating income	$ 4,684	$ 2,215	$ 1,578	$ 2,160
Earnings before income taxes	$ 3,711	$ 1,205	$ 573	$ 1,046
Net Income	$ 2,353	$ 851	$ 260	$ 784
Earnings per common share (basic and diluted):				
Continuing operations	$ 0.40	$ 0.14	$ 0.04	$ 0.13

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Directors and Shareholders of FPU:

We have audited the accompanying consolidated balance sheets and statements of capitalization of Florida Public Utilities Company and its wholly-owned subsidiary, Flo-Gas Corporation as of December 31, 2006 and 2005 and the related consolidated statements of income, common shareholders' equity and cash flows for each of the two years in the period ended December 31, 2006. We have also audited the schedule listed in the accompanying index. These financial statements and schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedule based on our audits.

Deleted: 5
Deleted: 4
Deleted: 5

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements and schedules, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements and schedules. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Florida Public Utilities Company and its wholly-owned subsidiary, Flo-Gas Corporation at December 31, 2006 and 2005, and the results of its operation and its cash flows for each of the two years in the period ended December 31, 2006, in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, the schedule presents fairly, in all material respects, the information set forth therein.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None

Item 9A. Controls and Procedures

Disclosure Controls and Procedures

Our management carried out an evaluation, under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, of the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act). Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that, as of December 31, 2006, our disclosure controls and procedures were effective, in that they provide reasonable assurance that information required to be disclosed by us in the reports that we file or submit under the Exchange Act are recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

Changes in Internal Control over Financial Reporting

No change in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) occurred during the fiscal quarter ended December 31, 2006 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Item 9B. Other Information

None

PART III

Item 10. Directors and Executive Officers of the Registrant

Information required by this item concerning directors and nominees of the Registrant will be included under the caption "Information About Nominees and Continuing Directors" in the Registrant's Proxy Statement for the 2007 Annual Meeting of Shareholders (the "2007 Proxy Statement") and is incorporated by reference herein. Information required by this item regarding the Audit Committee will be included under the caption "Board of Directors and Committees" in the 2007 Proxy Statement and is incorporated by reference herein. Information required by this Item regarding the Code of Ethics will be included under the caption "Code of Ethics" in the 2007 Proxy Statement and is incorporated by reference herein. Information required by this Item regarding compliance with Section 16(a) of the Exchange Act will be set forth in the 2007 Proxy Statement under "Section 16(a) Beneficial Ownership Reporting Compliance" and is incorporated by reference herein. Information required by this Item concerning executive officers is set out in Part I of this Form 10-K, above.

Item 11. Executive Compensation

Information required by this Item concerning executive compensation is included under the captions "Board of Directors and Committees", "Executive Compensation", and "Compensation Committee Interlocks and Inside Participation" in the 2007 Proxy Statement is incorporated by reference herein.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

Information required by this Item concerning the security ownership of certain of the Registrant's beneficial owners and management is included under the caption "Security Ownership of Management and Certain Beneficial Owners" in the 2007 Proxy Statement and is incorporated by reference herein. See Item 5 above for equity compensation plan information, which is incorporated by reference herein.

Item 13. Certain Relationships and Related Transactions

None.

Item 14. Principal Accountant Fees and Services

Information required by this Item is set forth in the Registrant's 2007 Proxy Statement under the caption "Principal Accountant Fees and Services" and is incorporated by reference herein.

PART IV

Item 15. Exhibits, Financial Statement Schedules

(a) The following documents are filed as part of this report:

(1) Financial Statements
The following consolidated financial statements of the Company are included herein and in the Registrant's 2006 Annual Report to Shareholders:

Consolidated Statements of Income
Consolidated Balance Sheets
Consolidated Statements of Capitalization
Consolidated Statements of Common Shareholders' Equity
Consolidated Statements of Cash Flows
Notes to Consolidated Financial Statements
Report of Independent Registered Public Accounting Firm

(2) Financial Statement Schedules
The following valuation and qualifying accounts table is included herein and in the Registrant's 2006 Annual Report to Shareholders:

Allowance for Doubtful Accounts

(3) Exhibits

3(i) Amended Articles of Incorporation (Incorporated herein by reference as Exhibit 3(i) to FPU's quarterly report on Form 10-Q for the period ended June 30, 2002. SEC File No. 1-10608)

3(ii) Amended By-Laws (Incorporated herein by reference as Exhibit 3(ii) to FPU's quarterly report on Form 10-Q for the period ended June 30, 2002. SEC File No. 1-10608)

4(a) Indenture of Mortgage and Deed of Trust of FPU dated as of September 1, 1942 (Incorporated by reference herein to Exhibit 7-A to Registration No. 2-6087)

4(b) Fourteenth Supplemental Indenture dated September 1, 2001. (Incorporated by reference to exhibit 4(b) on FPU's annual report on form 10-K for the year ended December 31, 2001)

4(c) Fifteenth Supplemental Indenture dated November 1, 2001. (Incorporated by reference to exhibit 4(c) on FPU's annual report on form 10-K for the year ended December 31, 2001)

10(a) First Amendment to Amended and Restated Loan Agreement and Promissory Note between FPU and Bank of America dated August 25,

2006. (Incorporated by reference to exhibit 10(2) on FPU's Form 10Q for third quarter ending September 30, 2006, File No. 001-10608)

10(b) Contract for the transportation of natural gas between FPU and Florida Gas Transmission Company under Service Agreement for Firm Transportation Service dated June 1, 1992 (Incorporated by reference to exhibit 10(b) on FPU's Form S-2 for July 1992, File No. 0-1055)

10(c) Contract for the transportation of natural gas between FPU and Florida Gas Transmission Company under interruptible Transportation Service Agreement dated February 23, 1990 (Incorporated by reference to exhibit 10(c) on FPU's Form S-2 for July 1992, File No. 0-1055)

10(d) Contract for the transportation of natural gas between FPU and the City of Lake Worth dated March 25, 1992 (Incorporated by reference to exhibit 10(f) on FPU's Form S-2 for July 1992, File No. 0-1055)

10(e) Contract for the purchase of electric power between FPU and Jacksonville Electric Authority dated January 29, 1996. (Incorporated by reference to exhibit 10(h) on FPU's annual report on form 10-K for the year ended December 31, 2000)

10(f) Contract for the purchase of electric power between FPU and Gulf Power Company effective November 21, 1996. (Incorporated by reference to exhibit 10(i) on FPU's annual report on form 10-K for the year ended December 31, 2000)

10(g) Contract for the purchase of as-available capacity and energy between FPU and Container Corporation of America dated September 19, 1985 (Incorporated by reference to exhibit 10(i) on FPU's Form S-2 for July 1992, File No. 0-1055)

10(h) Contract for the sale of electric service between FPU and Container Corporation of America dated August 26, 1982 (Incorporated by reference to exhibit 10(j) on FPU's Form S-2 for July 1992, File No. 0-1055)

10(i) Contract for the sale of electric service between FPU and ITT Rayonier Inc. Dated April 1, 1982 (Incorporated by reference to exhibit 10(k) on FPU's Form S-2 for July 1992, File No. 0-1055)

10(j) Form of Stock Purchase and Sale Agreement between FPU and three persons who, upon termination of two trusts, will become the record and beneficial owners of an aggregate of 313,554 common shares of the Registrant (Incorporated by reference to exhibit 10(p) on FPU's Form S-2 for July 1992, File No. 0-1055)

10(k) Contract for the sale of certain assets comprising FPU's water utility business to the City of Fernandina Beach dated December 3, 2002. (Incorporated by reference to exhibit 10(o) on FPU's annual report on form 10-K for the year ended December 31, 2002)

10(l)	Transportation agreement between FPU and the City of Lake Worth (Incorporated by reference to exhibit 99.2 on FPU's Form 8-K filed April 4, 2003, File No. 001-10608)
10(m)	A Mutual Release agreement, as of March 31, 2003, by and between FPU, Lake Worth Generation, LLC, The City of Lake Worth, and The AES Corporation. (Incorporated by reference to exhibit 99.3 on FPU's Form 8-K filed April 4, 2003, File No. 001-10608)
10(n)	Amended and Restated loan agreement between FPU and Bank of America, N.A. dated October 29, 2004. (Incorporated by reference as exhibit 10(n) on FPU's annual report on form 10-K for the year ended December 31, 2004)
10(o)	Security agreement between FPU and Bank of America, N.A. dated October 29, 2004. (Incorporated by reference as exhibit 10(o) on FPU's annual report on form 10-K for the year ended December 31, 2004)
10(p)#	Non-Employee Director Compensation Plan, approved by Board of Directors on March 18, 2005. (Incorporated by reference as exhibit 10(p) on FPU's annual report on form 10-K for the year ended December 31, 2004)
10(q)	Amendment to Electric Service Contract by and between JEA and FPU dated September 25, 2006, effective January 1, 2007. (Incorporated by reference as Exhibit 10.1 to our Form 10-Q, for the quarter ending March 31, 2006, File No. 001-10608).
10 (r) #	Employment Agreement between the Company and John T. English dated March 31, 2006 (Incorporated by reference as Exhibit 10.1 to our Form 8-K, filed on March 31, 2006).
10 (s) #	Employment Agreement between the Company and Charles L. Stein dated March 31, 2006 (Incorporated by reference as Exhibit 10.2 to our Form 8-K, filed on March 31, 2006).
10 (t) #	Employment Agreement between the Company and George M. Bachman dated March 31, 2006 (Incorporated by reference as Exhibit 10.3 to our Form 8-K, filed on March 31, 2006).
10(u)	Contract for the Agreement for Generation Services by and between FPU and Gulf Power Company dated December 28, 2006, effective January 1, 2008.
14	Ethics Policy (Incorporated by reference to exhibit 99.3 on FPU's Form 10-K filed March 30, 2004 File No. 001-10608)
16	Change in certifying accountants (incorporated herein by reference as exhibit 16 to FPU's current report on Form 8-K filed April 18, 2003)

21	Subsidiary of the registrant (Incorporated by reference to exhibit 21 on FPU's annual report on form 10-K for the year ended December 31, 2000)

(Title of class)

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. [ ] Yes [X] No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. [ ] Yes [X] No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. [X] Yes [ ] No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. [X]

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer" and "large accelerated filer" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer [ ] Accelerated filer [ ] Non-accelerated filer [X]

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). [ ] Yes [X] No

As of June 30, 2006, the aggregate market value of the Registrant's Common Stock held by non-affiliates (based upon the closing price of the Common Stock on that date on the American Stock Exchange) was approximately $71,300,000.

On February 9, 2007, 6,024,739 shares of the Registrant's $1.50 par value common stock were outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the registrant's Proxy Statement for the May 8, 2007 Annual Meeting of Shareholders are incorporated by reference in Part III hereof.

PART I

Item 1. Business

General

Florida Public Utilities Company (FPU) was incorporated on March 6, 1924 and reincorporated on April 29, 1925 under the 1925 Florida Corporation Law. We provide natural gas, electricity and propane gas to residential, commercial and industrial customers in Florida. We do not produce energy and are not a generating utility. Our regulated segments sell natural gas and electricity to approximately 82,000 customers, and our unregulated segment sells propane gas through a wholly owned subsidiary, Flo-Gas Corporation, to approximately 13,000 customers. We also sell merchandise and other service related products on a limited basis as a complement to the natural and propane gas segments.

Our three primary business segments are aligned with our products and are natural gas, electric and propane gas. The Florida Public Service Commission (FPSC) regulates the natural gas and electric segments. We operate through five divisions based on geographic areas:

(1) South Florida Division - provides natural and propane gas to customers in West Palm Beach, Palm Beach Gardens, North Palm Beach, Jupiter, Riviera Beach, Palm Beach, Lake Worth, Royal Palm Beach, Wellington, Boynton Beach, Delray Beach, Boca Raton, Lauderdale Lakes, Deerfield Beach, Stuart, Palm City and other areas near these cities.
(2) Central Florida Division - provides natural and propane gas to customers in Sanford, Deland, Deltona, DeBary, Orange City, Lake Mary, Winter Springs, New Smyrna Beach, Edgewater, Longwood, Port Orange and other areas near these cities.
(3) Northwest Florida Division - provides electricity to customers in Marianna, Bristol, Altha, Cottondale, Malone, Alford and other areas near these cities.
(4) Northeast Florida Division - provides electricity and propane gas to customers in Fernandina Beach, Jacksonville, Callahan, Yulee and other areas near these cities.
(5) West Florida Division - provides propane gas to customers in Dunnellon, Inglis, Crystal River, Inverness, Brooksville and other areas near these cities.

Business Environment

Natural and propane gas are some of the most popular forms of energy today. Gas is used for heating, cooling, cooking, backup generation and decorative lighting by businesses and homeowners and in many other ways by various industries. Natural gas is also used in combination with other fuels to improve environmental performance and decrease pollution in the generation of electricity.

Natural and propane gas have seen increased demand in Florida as a result of the recent hurricanes and the popularity of generators. Generators themselves do not impact usage significantly for a region; however, gas appliances have been added as a result of generator popularity, and that does increase gas usage. Prices of natural and propane gas

have decreased during 2006 due in part to the absence of a hurricane affecting the Gulf of Mexico.

As a result of historically high natural gas costs in 2005, alternatives such as coal and nuclear power for generation of electricity have seen increased interest. Our sales in the electric segment have not been impacted by higher electricity costs due to our long-term favorable fixed price contracts for purchasing electricity. However, our long-term contract ended at the end of 2006 for our Northeast division and our long-term contract will end at the end of 2007 for our Northwest division. We now have new contracts in place with pricing much closer to current market price. Our electric prices are expected to significantly increase. Although this will not directly impact our income from operations because increased fuel costs are passed through to the customer, this may impact the number of units sold and decrease income from operations as a result of less usage.

Because of the hurricanes in 2004 and 2005, the electric industry in Florida has seen increased interest in improving reliability of electric services during and after hurricanes. Regulators have been researching the issue and have introduced new storm preparedness requirements to improve electric reliability with storm preparedness rules regarding pole inspections, strengthened design specifications for wind loading, vegetation management practices and installation of underground facilities for electric distribution and transmission systems. We are seeking rate relief and implementation for these new requirements in 2007.

Business Segments
We are organized in three operating and reporting segments: natural gas, electric and propane gas. We are also involved in limited merchandise sales and other services within our natural gas and propane gas areas to complement these segments. For information concerning revenues, operating income and identifiable assets of each of our segments, see Note 13 in Notes to Consolidated Financial Statements.

Natural Gas
Natural gas is primarily composed of methane, which is a colorless, odorless fuel that burns cleaner than many other traditional fossil fuels. Odorant is added to enable easy detection of a gas leak.

We provide natural gas to customers in our South and Central Florida divisions. The vast majority of the natural gas we distribute is purchased in the Gulf Coast region, both onshore and offshore.

We use Florida Gas Transmission (FGT) as our natural gas pipeline in peninsular Florida. FGT is under the jurisdiction of the Federal Energy Regulatory Commission (FERC). We use gas marketers and producers to procure all gas supplies for our markets. We use Florida City Gas and Indiantown Gas Company to provide wholesale gas transportation services in areas distant from our interconnections with FGT. We pass all fuel costs on to our customers. We also transport natural gas for customers who purchase their own gas supplies and arrange for pipeline transportation. Our operating results are not adversely affected if our customers purchase gas from third parties because we do not profit on the fuel portion of sales.

Our natural gas revenues are affected by the rates charged to customers, supply costs for natural gas purchased for resale, economic conditions in our service areas and weather.

Although the FPSC permits us to pass through to customers the increase in price for our gas supply, higher rates may cause customers to purchase less natural gas.

Our current portfolio of natural gas customers is reasonably diverse, with the largest customer using natural gas for the generation of electricity. We are not dependent on any single natural gas customer for over ten percent of our total natural gas revenues.

The FPSC approved joint transportation and territorial agreements with Indiantown Gas Company in October 2006. We plan to transport natural gas through Indiantown's system to new developments. In the early phase, Indiantown Gas Company will provide operational and customer service related work. We also began construction in the Indiantown area to install natural gas mains in the first phase of a development for approximately 100 homes. Two more new developments are slated to break ground in 2007 for construction of approximately 1,000 homes.

Electric

We provide electricity to our customers in our Northwest and Northeast Florida divisions. Wholesale electricity is purchased from two suppliers; Gulf Power Company and JEA (formerly Jacksonville Electric Authority). In 1996, we executed ten-year fixed-price purchased power contracts with both suppliers. Gulf Power Company provides electric power to the Northwest division and JEA provides electric power to the Northeast division. These long-term contracts provided our customers with the lowest consumer electric rates in Florida.

During 2006 we completed negotiations and executed final contracts for the supply of electricity in our Northeast division from JEA beginning January 1, 2007 and our Northwest division from Gulf Power Company beginning in January 1, 2008. We are seeking approval of the contract with Gulf Power Company from the FPSC in 2007. We expect that rates charged to our customers will significantly increase when the new contracts become effective in 2007 and 2008 because the prices are closer to market price. We are unable to estimate what impact higher rates could have on electric consumption, but electricity usage could decrease.

The Northwest and Northeast divisions experience a variety of weather patterns. Hot summers and cold winters produce year-round electric sales that normally do not have highly seasonal fluctuations. None of the electric segment's customers represent more than ten percent of our total electric revenues.

The electric utility industry has not been deregulated in the state of Florida. All customers within a given service or franchise area purchase from a single electricity provider in that area.

Propane Gas

We provide propane gas to customers in our Northeast, West, Central and South Florida divisions and can purchase our propane gas supply from several different wholesale companies. Propane gas is delivered to Florida by barges and railcars to terminals in Tampa and Ft. Lauderdale, and through the Dixie Pipeline terminus at Alma and Albany, Georgia. Propane gas is also delivered by transport to our facilities and directly to a customer's premise. We believe that the propane gas supply infrastructure is adequate to meet the needs of the industry in Florida for the foreseeable future.

Propane gas is not as affected by environmental regulations as other petroleum products. However, propane gas is a hazardous material and as such is subject to strict code enforcement and safety requirements.

As with natural gas, the sales volume of propane gas is affected by the season and the weather. Typically, Florida has a tourist season that coincides with the winter months. The propane gas segment's sales volumes and revenues are closely balanced between residential and commercial customers. We employ two strategies to become less weather dependent, concentrating on the forklift propane gas cylinder exchange market and marketing propane gas appliances not used for heating air. We believe that water heaters and forklift cylinder exchange accounts are good ways to become less weather reliant. None of the propane gas segment's customers represent more than ten percent of our total propane gas sales volume or revenues.

Strategy
Our strategy is to leverage our expertise in the natural gas, electric and propane gas distribution business to assist us in consistently meeting our customer's expectations. Our core focus is to build mutually beneficial relationships with builders, developers and customers with high-energy usage requirements. Included in our strategy is a plan to enhance our future success by expanding our service territory into new areas with high growth potential.

Competition
We do not face substantial competition in our electric divisions. This is because no other competitor can currently provide the same energy in our areas due to FPSC regulations and territorial agreements between utilities. In addition, natural gas as an alternative fuel is only available in a small area served by our electric divisions. Although our natural gas segment operates with the same types of guidelines, there is competition in our natural gas segment from electric utilities. Normally each home will have electricity as a base fuel and natural gas as an alternative source of energy used for cooking and heating. Electricity competes with natural gas, in large part based on the cost of fuel. Our propane gas segment is unregulated and faces competition from other suppliers of propane gas as well as alternative energy source suppliers. Competition in the propane gas segment is primarily based on price and service.

Rates and Regulation
The natural gas and electric segments are highly regulated by the FPSC. The FPSC has the authority to regulate our rates, conditions of service, issuance of securities and certain other matters affecting our natural gas and electric operations. As a result, FPSC regulation has a significant effect on our results of operations. The FPSC approves rates that are intended to permit a specified rate of return on investment. Our rate tariffs allow the cost of natural gas and electricity to be passed through to customers. Increases in the operating expenses of the regulated segments may require us to request increases in the rates charged to our customers. The FPSC has granted us the flexibility of automatically passing on increased expenses for certain fuel costs to customers. Other operational expenses, such as pension and medical expenses require us to petition the FPSC for rate increases. The FPSC is likely to grant rate increases to offset increased expenditures necessary for business operations. We successfully petitioned for an electric rate increase, which became effective on March 17, 2004, and for a natural gas rate increase that went into effect on November 18, 2004. We are currently seeking electric

rate relief in 2007 for the recent storm preparedness requirements implemented to improve reliability of electric utility systems.

We are subject to federal and state regulation with respect to soil, groundwater, employee health and safety matters and to environmental regulations issued by the Florida Department of Environmental Protection (FDEP), the United States Environmental Protection Agency (EPA) and other federal and state agencies.

Prior to the widespread availability of natural gas, we manufactured gas for sale to our customers or purchased utility assets from other companies that manufactured gas. The process for manufacturing gas produced by-products and residuals such as coal tar. The remnants of these residuals are sometimes found at former gas manufacturing sites. These sites face environmental regulation from various agencies including the FDEP and EPA on necessary cleanup and restoration.

Franchises

We hold franchises in each of the incorporated municipalities that require franchise agreements in order to provide natural gas and electricity. Generally, these franchises have terms ranging from 10 to 30 years and terminate on varying dates. We are currently in negotiations with certain municipalities for new service areas within our current operating divisions, and renewals of existing franchises. We continue to provide services to these municipalities and do not anticipate any interruption in our service.

Employees

As of January 18, 2007, we had 362 employees, of which 9 were part-time and 2 were temporary. Of these employees, 175 were covered under union contracts with two labor unions, the Internal Brotherhood of Electric Workers and the International Chemical Workers Union. We believe that our labor relations with employees are good.

Available Information

We file periodic reports including our Form 10-Qs, Form 10-Ks, and Form 8-Ks with the Securities and Exchange Commission (SEC). The most recent copies of Form 10-Qs and Form 10-Ks as well as a copy of our Code of Ethics Policy can be obtained through our website (http://www.fpuc.com).

Item 1A. Risk Factors

A substantial portion of our revenues and, to a large extent, our profitability, depends upon rates determined by the FPSC.

FPSC regulates many aspects of our natural gas and electric operating segments, including the retail rates that we may charge customers for natural gas and electric service. Our retail rates are set by the FPSC using a cost-of-service approach that takes into account our historical operating expenses, our fixed obligations and recovery of our capital investments, including potentially stranded obligations. Using this approach, the FPSC sets rates at a level calculated to recover such costs, adjusted to reflect known and measurable changes, and a permitted return on investment. Any rate adjustments to recover increased costs or to otherwise improve our profitability must be obtained through a petition filed with the FPSC, which is referred to as a rate case. The rates permitted by the FPSC in rate cases will determine a substantial portion of our revenues for succeeding periods and may have a material impact on our consolidated earnings, cash flows and

financial position, as well as our ability to maintain our common stock dividend at current levels or to increase our dividend in the future.

Some of our natural gas and electric service costs may not be fully recovered through retail rates.

Our natural gas and electric service retail rates, once established by the FPSC, remain fixed until changed in a subsequent rate case. We may at any time elect to file a rate case to request a change in our rates or intervening parties may request that the FPSC review our rates for possible adjustment, subject to any limitations that may have been ordered by the FPSC. Earnings could be reduced to the extent that our operating costs increase more than our revenues during the period between rate cases, which may occur because of maintenance and repair of plants, fuel and purchased power expenses, employee or labor costs, inflation or other factors. In addition, even if we decide to file rate cases, our requests for rate adjustments in such rate cases may be rejected. Other parties to a rate case or the FPSC staff may contend that our current rates, or rates proposed in a rate case, are excessive and our petition for rate adjustments may be denied on that or another basis.

Our segments are sensitive to variations in weather.

Our segments are affected by variations in general weather conditions and unusually severe weather. We forecast energy sales on the basis of normal weather, which represents a long-term historical average. Significant variations from normal weather could have a material impact on energy sales. Unusual weather, such as hurricanes, could also adversely affect operating costs and sales.

Our natural gas and propane gas customers use gas primarily for heating purposes. As a result, our natural gas and propane gas sales peak in the winter and are more weather sensitive than electricity sales, which peak in both summer and winter periods. Mild winter weather in Florida can be expected to negatively impact results from our natural gas and propane gas operations. Severe weather conditions could also interrupt or slow down service and increase the operating costs of all our segments.

We operate in an increasingly competitive industry, which may affect our future earnings.

Natural Gas
The natural gas distribution industry has been subject to competitive forces for several years. We receive our supply of natural gas at thirteen city gate stations connected to an interstate pipeline system owned by FGT and one gate station connected to an intrastate pipeline owned by Florida City Gas Company. Gulfstream Natural Gas System currently also serves peninsular Florida with interstate natural gas transmission service; however we cannot predict if this system will be extended to areas near our existing facilities and how it could affect our natural gas operations.

Electric
The U.S. electric power industry has been undergoing restructuring. There is competition in wholesale power sales on a national level. Some states have mandated or encouraged competition at the retail level. While there is active wholesale competition in Florida, the retail electric business has remained substantially free from direct competition. Changes

in the competitive environment occasioned by legislation, regulation, market conditions or initiatives of other electric power providers, particularly with respect to retail competition, could adversely affect our financial condition and results of operations. To the extent competitive pressures increase and the pricing and sale of electricity assumes more of the characteristics of a commodity business, the economics of our electric operating segment may come under increasing pressure. In addition, regulatory changes may increase access to electricity transmission grids by utility and non-utility purchasers and sellers of electricity, thus potentially resulting in a significant number of additional competitors.

Propane Gas
Our propane gas business is our only non-regulated business segment. Because the propane gas business is not regulated, we face significant competition in this segment. Our propane gas business competes directly with other distributors of propane gas, and other sources of energy including natural gas and electric. We may encounter increased competition in the propane gas business in the future. Our inability to compete effectively in the propane gas business, whether on the basis of price, customer service, alternative energy sources or otherwise, could have a material adverse effect on our financial condition and results of operations.

Our business could be adversely affected if our supply of natural gas is interrupted.

FGT's pipeline system transports all of our natural gas. FGT is owned by Citrus Corporation, which is jointly owned by Cross Country Energy Corporation and El Paso Corporation. Our ability to receive our normal supply of natural gas could be adversely affected by an interruption in FGT's service.

General economic conditions may adversely affect our segments.

Our segments are affected by general economic conditions. The consumption of the energy we supply is directly tied to the economy. A downturn in the economy in our local areas of operations, as well as on the state, national and international levels, could adversely affect the performance of our segments. Changes in political climate, including terrorist activities, could further negatively impact our performance. If tourism is down, then the demand for the energy we supply is reduced.

Commodity price changes may affect the operating costs and competitive position of our segments.

Our segments are sensitive to changes in coal, gas, oil and other commodity prices. If we are unable to increase the rates we charge to customers to reflect increases in these commodity prices, our margins and earnings will be lowered. If increased prices for any of these commodities persist for substantial periods, our competitive position could be adversely affected by customers who switch to cheaper energy sources. Further, natural gas prices have been increasingly volatile and, accordingly, the earnings from our natural gas operations are increasingly difficult to predict.

We could incur material expenses as a result of our obligations to comply with existing and new environmental laws and regulations.

We are subject to environmental regulations in connection with the ongoing conduct of our business and to civil and criminal liability for failure to comply with these regulations. In addition, new environmental laws and regulations, or new interpretations of existing laws and regulations, affecting our operations or facilities may be adopted which may cause us to incur additional material expenses.

We are subject to federal and state legislation with respect to soil, groundwater, employee health and safety matters and to environmental regulations issued by the Florida Department of Environmental Protection (FDEP), the EPA and other federal and state agencies. We may incur material future expenditures in order to comply with these existing environmental laws and regulations.

We rely on a limited number of natural gas and electric suppliers, the loss of which could materially adversely affect our financial condition and results of operations.

Two pipeline suppliers under several contracts having expiration dates from 2007 to 2023 transport our natural gas to us. These contracts have provisions, which allow us to extend the terms ranging from 2020 to 2032. Our electric services are provided by two suppliers under contracts, which expire in 2007 and 2017. We have renegotiated a new contract for the one that is set to expire in 2007 with the same supplier for electric service beginning in 2008 which we are currently awaiting approval for from the FPSC. If we were to lose any of these contracts, we might not be able to replace the corresponding energy source on acceptable terms, if at all. In addition, in the event of the expiration of the contracts, we might not be able to renew them on favorable terms, if at all. As a result, the loss of any of these suppliers, the terminations of any of these supply contracts or the non-renewal of any of these supply contracts before or upon their expiration could have material adverse effects on our financial condition and results of operations.

New supply contracts could result in substantial increases to our prices, and could materially adversely affect our financial condition and results of operations.

Two pipeline suppliers under firm contracts having expiration dates from 2007 to 2023 transport our natural gas to us. All of these contracts have provisions which allow us to extend the terms ranging from 2020 to 2032. Our electric services are provided by two suppliers under contracts, which expire in 2007 and 2017.

The recent renewal of the electricity supply contract that was terminated in 2006 and the one that will expire in 2007 will result in the cost of electricity more than doubling over existing prices. Extensions or renewals of our natural gas contracts could result in the cost of natural gas increasing. Although these increases are currently passed through to our customers, these could have a significant impact on our financial condition and results of operations due to decreased consumption or if costs cannot be passed through in the future.

Fluctuation in prices under long-term purchase and transportation commitments may have an adverse effect on our financial condition and results of operations.

To ensure a reliable supply of electricity and natural gas at competitive prices, we have entered into purchase and transportation contracts with various suppliers and producers, which expire at various dates through 2023. Purchase prices under these contracts are determined by formulas either based on market prices or at fixed prices.

As of December 31, 2006, we have firm purchase and transportation commitments adequate to supply our expected sales requirements for electricity with contracts that will expire in 2017. Our contract in the Northeast division of the electric segment began January 1, 2007 and expires on December 31, 2017. We have a contract with a supplier for the Northwest division beginning January 1, 2008 and expiring December 31, 2017. We are currently seeking approval with the FPSC for the Northwest division contract. If the FPSC does not approve this contract, we may need to seek an alternative supplier or new contract with this same supplier for the purchase of electricity in the Northwest division.

Our natural gas pipeline transportation contracts expire in parts in 2010, 2015 and 2023. We are committed to pay demand or similar fixed charges monthly through 2023 related to the natural gas pipeline transportation agreements. Significant fluctuation in prices under these long-term purchase and transportation commitments may have a material adverse effect on our financial condition and results of operations.

Problems with operations could materially adversely impact us.

We are subject to various operational risks, including accidents, outages, equipment breakdowns or failures, or operations below expected levels of performance or efficiency. Problems such as the breakdown or failure of transmission lines, pipelines or other equipment or processes and interruptions in service which would result in performance below affected levels of output or efficiency, particularly if extending for prolonged periods of time, would have a material adverse effect on our financial condition and results of operations.

We are vulnerable to interest rate changes and may not have access to capital at favorable rates, if at all.

Changes in interest rates can affect our cost of borrowing on our line of credit, on refinancing of debt maturities and on incremental borrowing to fund new investments. Because our stock is not widely held and has a low trading volume, we may not be able to access the equity market or may be limited in the amount of equity financing. If we are unable to obtain equity or debt financing on terms satisfactory to us, our ability to fund capital expenditures and other commitments will be impaired. Moreover, even if available, the cost of such financing could reduce our margins and materially adversely affect our results of operations.

Failure to effectively and efficiently manage our growth, as well as changes in our business strategies, could have a negative impact on our performance.

An essential part of our business strategy is to grow our businesses. Much of our growth depends on our ability to find attractive development opportunities and to obtain the necessary financing for them. Our outlook is based on our expectation that we will be successful in finding and capitalizing on development opportunities, but our efforts may not be successful. Our failure to effectively and efficiently manage our growth, as well as changes in our business strategies, may have a material adverse effect on our financial

condition and results of operations. If we grow our business with acquisitions there is a risk the acquisition will not have a positive effect on our financial condition.

Our ability to pay dividends on our common stock is limited.

We cannot guaranty that we will continue to pay dividends at our current annual dividend rate or at all. In particular, our ability to pay dividends in the future will depend upon, among other things, our future earnings, our cash requirements and our debt covenants.

Provisions in our certificate of reincorporation, certain agreements, and the Florida Business Corporation Act may inhibit a takeover, which could adversely affect the value of our common stock.

Our certificate of reincorporation as well as provisions of the Florida Business Corporation Act (FBCA), contain provisions that could delay or prevent a change cf control in our management that shareholders might consider favorable and may prevent them from receiving a takeover premium for their shares.

Our certificate of reincorporation contains provisions that make it more difficult to obtain control of our company through transactions, which have not received the approval of our board of directors. These provisions include supermajority voting requirements for certain transactions with affiliated persons, staggering the terms of the members of our board of directors, and certain procedural requirements relating to shareholder meetings and amendments to our certificate of reincorporation or bylaws.

In addition, Florida has enacted legislation that may deter or frustrate takeovers of Florida corporations. Subject to certain exceptions, the "Control Share Acquisitions" section of the FBCA generally provides that shares acquired in excess of certain specified thresholds, beginning at 20% of a corporation's outstanding voting shares, will not possess any voting rights unless such voting rights are approved by a majority vote of the corporation's disinterested shareholders.

The "Affiliated Transactions" section of the FBCA generally requires majority approval by disinterested directors or supermajority approval by disinterested shareholders of certain specified transactions (such as mergers, consolidations, sales of assets, issuance or transfer of shares or reclassifications of securities) between a corporation and a holder of more than 10% of the outstanding shares of the corporation, or any affiliate of such shareholder.

Finally, we have agreements with three of our executive officers that provide for significant payments to those executives upon a change in control under certain circumstances. The existence of these contracts may make an acquisition of our company less attractive to a possible buyer.

Conflict or turmoil in oil producing countries could impact future prices for commodities including natural gas, propane gas and electricity, and increases in these prices could materially affect our financial condition and results of operations.

Worldwide turmoil could cause the cost of crude oil and its associated products to rise on

concerns of the conflicts interfering with the production of crude oil. If these conflicts are large, escalate or spread, the impact to the cost of all fuel related commodities could increase substantially. These increases could materially adversely affect our financial condition and results of operations.

Item 1B. Unresolved Staff Comments

None

Item 2. Properties

We have natural gas, electric and propane gas utility related properties. These properties include transmission, distribution, storage and general facilities at various locations in our service areas. We do not have generating facilities. We maintain property that is adequate for our current operations and we expand our existing facilities as required by growth or other operational needs.

We own natural gas mains that distribute gas through 1,558 miles of pipe located in Central and South Florida. Additionally, we have adequate gate stations in each distribution system.

In the electric segment, we own 22 miles of electric transmission lines located in Northeast Florida and 1,082 miles of electric distribution lincs located in Northeast and Northwest Florida. The distribution lines are installed both under and above ground with many of the coastal locations having under ground facilities. All transmission lines are installed above ground. Additionally, we own various substations and regulator stations that are used in our operations.

Our propane gas segment has bulk storage facilities and tank installations on the customers' premises. We also have 16 community gas systems that distribute propane gas to customers in a specific area. These systems are subject to the Federal Department of Transportation Office of Pipeline Safety Regulations.

We own office and warehouse facilities in Northwest, Northeast, Central, West and South Florida, which are used for our operations and materials storage by the natural gas, electric, and propane gas segments. We also have various easements and other assets located throughout our service areas that are utilized by all of our operations.

We also own a three-story building in West Palm Beach, where our corporate headquarters is located.

All of our property is subject to a lien collateralizing our funded indebtedness under our Mortgage Indenture as discussed in Note 1-I in Notes to Consolidated Financial Statements.

Item 3. Legal Proceedings

In our operations, we currently use or have used several contamination sites that have pending or threatened environmental litigation. We are in the process of investigating and assessing this litigation. We intend to vigorously defend our rights in this litigation. We have insurance and rate relief to cover losses or expenses incurred as a result of this

litigation. We believe all future contamination assessment and remedial costs, legal fees and other related expenses would not exceed the combined sum of any insurance proceeds received and any rate relief granted.

West Palm Beach Site
We are currently evaluating remedial options to respond to environmental impacts to soil and groundwater at and in the immediate vicinity of a parcel of property we own in West Palm Beach, Florida. We previously operated a gasification plant at this site. We entered into a Consent Order with the FDEP effective April 8, 1991. This requires us to delineate the extent of soil and groundwater impacts associated with the prior operation of the gasification plant and to remediate such soil and groundwater impacts, if necessary. We have submitted numerous reports to FDEP describing the results of soil and groundwater sampling conducted at the site. We completed the delineation of soil and groundwater impacts at the site in October 2006. An engineering consultant performed a feasibility study to evaluate appropriate remedies for the site. The feasibility study was transmitted to FDEP on November 30, 2006.

The feasibility study evaluated a wide range of remedial alternatives based on criteria provided by applicable laws and regulations. The total costs for the remedies evaluated in the feasibility study ranged from a low of $2.8 million to a high of $54.6 million. Based on the likely acceptability of proven remedial technologies described in the feasibility study and implemented at similar sites, consulting/remediation costs to address the impacts now characterized at the West Palm Beach site are projected to range from $4.6 million to $17.9 million. This range of costs covers such remedies as in situ solidification for deeper soil impacts, excavation of superficial soil impacts, installation of a barrier wall with a permeable biotreatment zone (PBZ), monitored natural attenuation of dissolved impacts in groundwater (MNA) or some combination of these remedies. The feasibility study proposed a remedy of superficial soil excavation, and installation of a hanging barrier wall with PBZ and MNA, the cost of which is projected to range from $4.6 million to $9.9 million.

Prior to FDEP's approval of a final remedy for the site, we are unable to determine, to a reasonable degree of certainty, the complete extent or cost of remedial action that may be required. As of December 31, 2006, and subject to the limitations described above, remediation costs (including attorneys' fees and costs) for this site are projected to range from approximately $4.8 million to $18 million.

Sanford Site
We own a parcel of property located in Sanford, Florida, upon which a gasification plant was operated prior to our acquisition of the property. Following discovery of soil and groundwater impacts on the property, we have participated with four former owners and operators of the gasification plant in the funding of numerous investigations of the extent of the impacts and the identification of an appropriate remedy. On or about March 25, 1998, we executed an Administrative Order on Consent (AOC) with the four former owners and operators (Group) and the United States Environmental Protection Agency (EPA) that obligated the Group to implement a Remedial Investigation/Feasibility Study (RI/FS) and to pay EPA's past and future oversight costs. The Group also entered into a Participation Agreement and an Escrow Agreement on or about April 13, 1998 (WFS Participation Agreement). Work under the RI/FS AOC and RI/FS Participation Agreement is now complete and we have no further obligations under either document.

In late September 2006, EPA sent us a Special Notice Letter, notifying us of EPA's selection of a final remedy for OU1 (soils), OU2 (groundwater), and OU3 (sediments), and giving the other Group members and us sixty (60) days within which to submit a "good faith offer" to EPA to provide for implementation of the selected remedies. The Special Notice Letter included an Amended Record of Decision (ROD) for OU1 (the ROD for OU1 was amended to account for a significant increase in the volume of off-site soil impacts and a change in the selected remedy), the original ROD for OU2, and a ROD for OU3. The total estimated remediation costs for the Sanford Gasification Plant Site are now projected to be $12.5 million. On November 30, 2006, we, along with the Group, submitted to EPA a good faith offer to implement the approved remedies as set forth in the RODs for OU1 through OU3.

In January, we, along with the other members of the Group signed a Third Participation Agreement, which provides for funding the remediation work specified in the RODs for OU1 through OU3 and supercedes and replaces the Second Participation Agreement. Our share of remediation costs under the Third Participation Agreement is set at 5% of a maximum of $13 million or $650,000. At present, it is not anticipated that the total cost of remediation will exceed $13 million. If it does, the Group members have agreed to negotiate in good faith to allocate the excess costs at such time that it reasonably appears that the total remediation costs will exceed $13 million. In any such event, we do not expect our share of such additional costs to be greater than 5% and our share of such additional costs may be less than 5%.

Our future legal costs and expenses and our share future remediation expenses for this site are currently projected to be approximately $710,000.

Deleted: 710,000

Pensacola Site
We are the prior owner/operator of the former Pensacola gasification plant, located in Pensacola, Florida. Following notification on October 5, 1990 that FDEP had determined that we were one of several responsible parties for any environmental impacts associated with the former gasification plant site, we entered into cost sharing agreements with three other responsible parties providing for the funding of certain contamination assessment activities at the site.

Following field investigations performed on behalf of the responsible parties, on July 16, 1997, FDEP approved a final remedy for the site that provides for annual sampling of selected monitoring wells. Such annual sampling has been undertaken at the site since 1998. Our share of these costs is less than $2,000 annually or a total cost of $27,000.

In March 1999, EPA requested site access in order to undertake an Expanded Site Inspection (ESI). The ESI was completed by EPA's contractor in 1999 and an ESI Report was transmitted to us in January 2000. The ESI Report recommends additional work at the site. The responsible parties met with FDEP on February 7, 2000 to discuss EPA's plans for the site. In February 2000, EPA indicated preliminarily that it will defer management of the site to FDEP; however, as of December 31, 2006, we have not received any written confirmation from EPA or FDEP regarding this matter. Prior to receipt of EPA's written determination regarding site management, we are unable to determine whether additional fieldwork or site remediation will be required by EPA and, if so, the scope or costs of such work.

Key West Site

From 1927-1938, we owned and operated a gasification plant in Key West, Florida. The plant discontinued operations in the late 1940s; the property on which the plant was located is currently used for a propane gas distribution business. In March 1993, a Preliminary Contamination Assessment Report (PCAR) was prepared by a consultant jointly retained by the current site owner and us and was delivered to FDEP. The PCAR reported that very limited soil and groundwater impacts were present at the site. By letter dated December 20, 1993, FDEP notified us that the site did not warrant further "CERCLA consideration and a Site Evaluation Accomplished disposition is recommended." FDEP then referred the matter to its Marathon office for consideration of whether additional work would be required by FDEP's district office under Florida law. As of December 31, 2006, we have received no further communication from FDEP with respect to the site. At this time, we are unable to determine whether additional fieldwork will be required by FDEP and, if so, the scope or costs of such work. In 1999, we received an estimate from our consultant that additional costs to assess and remediate the reported impacts would be approximately $166,000. Assuming the current owner shared in such costs according to the allocation agreed upon by the parties for the PCAR, our share would be approximately $83,000.

Item 4. Submission of Matters to a Vote of Security Holders

None

Executive Officers of the Registrant

The following sets forth certain information about the executive officers of the Company as of February 17, 2007.

Name	Age	Position	Date
John T. English	63	Chairman of the Board	2006 - Present
		Chief Executive Officer	1998 - Present
		President	1997 - Present
		Chief Operating Officer	1997 - 2000
Charles L. Stein	57	Senior Vice President	1997 - Present
		Chief Operating Officer	2001 - Present
George M. Bachman	47	Corporate Secretary	2004 - Present
		Chief Financial Officer	2001 - Present
		Treasurer	2001 - Present

Deleted: -

Mr. English was Senior Vice President from 1993 preceding his appointment as President and Chief Operating Officer.

Mr. Stein was Vice President from 1993 preceding his appointment as Senior Vice President.

Mr. Bachman was Controller from 1996 preceding his appointment as Chief Financial Officer and Treasurer.

Each of these executive officers has an employment agreement for a three-year term, which can be renewed at the Board Meeting preceding the expiration of the agreement subject to his earlier resignation or removal. There are no family relationships among any of the executive officers and directors of the Company.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Quarterly Stock Prices and Dividends Paid

Our common shares are traded on the American Stock Exchange under the symbol FPU. The quarterly dividends declared and the reported last sale price range per share of our common stock for the most recent two years were as follows:

	2006			2005		
	Stock Prices		Dividends	Stock Prices *		Dividends
Quarter ended	Low	High	Declared	Low	High	Declared*
March 31	$13.25	$14.50	$0.1033	$11.47	$13.49	$0.1000
June 30	11.86	14.40	0.1075	11.45	12.67	0.1033
September 30	12.61	14.42	0.1075	12.67	16.84	0.1033
December 31	13.10	14.05	0.1075	13.46	16.44	0.1033

* On July 25, 2005 we issued a three for two stock split in the form of a stock dividend to our shareholders of record on July 15, 2005. All common share information has been restated to reflect the stock split.

As of February 16, 2007, there were approximately 3,900 holders of record of our common shares.

We intend to continue to pay quarterly cash dividends for the foreseeable future. Our dividend policy is reviewed on an ongoing basis by our Board of Directors and is dependent upon future earnings, cash flow, financial condition, capital requirements and other factors. Our Fifteenth Supplemental Indenture of Mortgage and Deed of Trust restricts the amount that is available for cash dividends. At December 31, 2006, approximately $9 million of retained earnings were free of such restriction and therefore available for the payment of dividends.

Securities Authorized for Issuance under Equity Compensation Plans

Equity Compensation Plan Information

Plan Category	Number of Securities remaining available for future issuance under equity compensation plans
Equity compensation plans approved by security holders	72,749*
Equity compensation plans not approved by security holders	-
Total	72,749

* This includes 20,714 shares for the Non-Employee Director Compensation Plan. This plan was adopted by the Board of Directors on March 18, 2005 and was approved at the 2005 meeting of shareholders. This also includes 52,035 shares for the Employee Stock Purchase Plan.

PERFORMANCE GRAPH

The following graph compares the yearly percentage change and the cumulative total of shareholder return on the Company's common stock with the cumulative return on the Russell 2000 Index (Russell 2000) and Standard & Poor's Utilities Index (S&P Utilities) for the last five calendar years. These comparisons assume the investment of $100 in the Company's common stock and each of the indices on January 1, 2001 and the reinvestment of dividends. The stock price performance shown in the graph below should not be considered indicative of

Deleted: 180,293

Note to the Selected Financial Data:

(1) On December 3, 2002, FPU entered into an agreement to sell the assets of its water utility system to the City of Fernandina Beach. The transaction closed on March 27, 2003. Revenues, Gross profit and Utility plant-net do not include discontinued operations.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operation

RESULTS OF OPERATIONS

General
Effects of seasonal weather conditions, the timing of rate increases, fluctuations in demand due to the cost of fuel passed on to customers and the migration of winter residents and tourists to Florida during the winter season all have an impact on income.

Revenues and Gross Profit Summary
Revenues include cost recovery revenues. The FPSC allows cost recovery revenues to directly recover costs of fuel, conservation and revenue-based taxes in our natural gas and electric segments. Revenues collected for these expenses have no effect on results of operations and fluctuations could distort the relationship of revenues between periods. Gross profit is defined as gross operating revenues less fuel, conservation and revenue-based taxes that are passed directly through to customers. Because gross profit eliminates these cost recovery revenues, we believe it provides a more meaningful basis for evaluating utility revenues. The following summary compares gross profit between periods and units sold in One thousand Dekatherm (MDth) (gas) and Megawatt Hour (MWH) (electric).

Revenues and Gross Profit
(Dollars in thousands)

	Year Ended December 31,		
	2006	2005	2004
Natural Gas			
Revenues	$70,981	$69,094	$55,962
Cost of fuel and other pass through costs	43,909	42,815	34,232
Gross Profit	$27,072	$26,279	$21,730
Units sold: (MDth)	6,230	6,224	6,124
Electric			
Revenues	$48,527	$47,450	$42,910
Cost of fuel and other pass through costs	34,259	33,352	29,732
Gross Profit	$14,268	$14,098	$13,178
Units sold: (MWH)	849,124	814,353	766,349
Propane Gas			
Revenues	$14,727	$13,479	$11,167
Cost of fuel and other pass through costs	7,803	6,637	5,386
Gross Profit	$ 6,924	$6,842	$5,781
Units sold: (MDth)	621	640	614
Consolidated			
Revenues	$134,235	$130,023	$110,039
Cost of fuel and other pass through costs	85,971	82,804	69,350
Gross Profit	$ 48,264	$ 47,219	$ 40,689

Natural Gas
Natural gas revenues increased $1.9 million, or 3% in 2006 over 2005 primarily due to increased revenue collected for taxes passed directly through to customers. A change in legislature regarding the calculation of Gross Receipts tax became effective January 1, 2006, and along with an increase to overall revenues, increased these taxes paid by our

customers by approximately $500,000. Franchise fee revenues also increased by $500,000 due to increased rates and area expansion.

Natural gas gross profit increased by $793,000, or 3% in 2006 over 2005. We had higher revenue and gross profit in 2006 compared to 2005 primarily due to billed revenue not exceeding the FPSC allowable earnings as much as in the prior year. In 2006 we reduced billed revenues and gross profit by our estimate of over-earnings of $230,000 for the year. Our estimate for 2005 was recorded at $700,000 in 2005 and we reduced that estimate in 2006 by $50,000 to $650,000. The combined effect of this was to increase our revenues and gross profit over the prior year by approximately $500,000. Other factors contributing to the increase in revenues and gross profit were 2% customer growth and storm surcharge revenues, which became effective November 2005. The revenues and gross profit increases were slightly offset by the loss of approximately $100,000 of revenue from two customers who went off-line for several months to do maintenance work.

Natural gas revenues increased $13.1 million in 2005 over 2004 primarily due to an $8.6 million increase in the cost of fuel and other costs that were passed through to customers. The cost of natural gas increased significantly over prior years, partially as a result of hurricanes and their impact on supplies. Gross profit increased $4.5 million, or 21%, primarily as a result of rate relief effective in November 2004, normal customer growth and a 2% increase in units sold. Offsetting these increases was the estimated over-earnings for 2005 of $700,000, which reduced revenues and gross profit.

Electric

Electric revenues increased $1.1 million in 2006 over 2005. Cost of fuel and other costs that were passed through to customers contributed approximately $900,000 of the increase. Gross profit increased $170,000 or 1% in 2006 over 2005. The increase in gross profit was primarily due to a slight increase in customer growth and units sold.

Electric revenues increased $4.5 million in 2005 over 2004. Cost of fuel and other costs that were passed through to customers contributed $3.6 million of the increase. Gross profit increased $920,000 or 7% in 2005 over 2004. The increase in gross profit was primarily due to a 6% increase in units sold along with the rate increases granted in March 2004. A large distribution center was built in our Northwest division and increased revenues by approximately $700,000 and gross profit by approximately $91,000 in 2005 over 2004.

Propane Gas

Propane revenues increased $1.2 million, or 9% and gross profit increased $82,000 or 1% in 2006 compared to 2005. Revenues increased primarily due to rising fuel costs. Although customers increased by 5% in 2006, the usage per customer declined by 8% contributing to a decrease of 3% in units sold. Warmer weather was the primary reason for this decrease in usage per customer in 2006 compared to 2005. The increase in gross profit was minimal when compared to last year primarily due to pre-buy gains of $383,000 realized in 2005 but not in 2006.

Propane revenues increased $2.3 million and gross profit increased $1.1 million or 18% in 2005 compared to 2004. The Company realized gains of approximately $383,000 as a result of buying propane supplies before market price increases. The remaining increase

of 12% from the previous year resulted from propane unit sales increasing 4% due primarily to a 13% growth in residential bulk customers and units sold.

Operating Expenses

Operating expenses include operation, maintenance, depreciation, amortization and taxes other than income taxes, and exclude fuel costs, conservation and taxes based on revenues that are directly passed through to customers and recovered in revenues.

Operating Expenses
(Dollars in thousands)

	Year Ended December 31,		
	2006	2005	2004
Natural gas	$ 20,954	$ 20,230	$ 16,752
Electric	11,131	10,596	9,825
Propane gas	5,850	5,756	5,126
Total Operating Expenses	$ 37,935	$ 36,582	$ 31,703

Natural Gas

Natural gas operating expenses increased $724,000, or 4%, in 2006 as compared with 2005. Outside of the normal inflationary impacts on our expenses, customer account expenses increased by $237,000 as a result of our customer service focus initiated in 2005 based on our strategic plan. We continued the focus on this area and increased the number of employees in an effort to respond more effectively to customers. Bad debt provision increased $49,000 over the prior year primarily due to increasing revenues, aging accounts receivable on several major accounts, and the slowing housing economy. We increased our collection efforts in the fourth quarter of 2006 and will continue to do so in 2007.

In 2006 we had additional increases of $90,000 to sales expense resulting from initiatives to boost sales by increasing sales staff. Depreciation expense increased $137,000 principally due to construction of mains and new meters to distribute gas to a growing number of new developments in South Florida and increasing capacity requirements for existing customers.

Natural gas operating expenses increased $3.5 million or 21%, in 2005 as compared with 2004. Amortization expense increased $1 million. The bare steel replacement program and recovery of future environmental costs approved in our 2004 natural gas rate proceeding were the primary reasons for this increase. We are currently under a 50-year program to replace all bare steel mains and service lines with coated steel and polyethylene lines. We have received approval to recover the funds necessary to replace these mains and services over the 50-year period. Pursuant to an FPSC mandate, we accrue for amortization expense as an offset to the revenues received, and record a contribution/reduction to the related construction expenditures. The FPSC also approved recovery of our expected environmental liability over a 20-year period.

Customer account expense increased $373,000 in 2005 as compared to 2004 primarily due to increased payroll expenses for additional staffing and facility and equipment upgrades. There were also increased bad debt provisions as a result of the increases in accounts receivable due to general and fuel rate increases. The purchase of additional safety equipment, tools, hardware and office furniture contributed to a $942,000 increase in other operating expense. Other items affecting expenses included a research marketing study to provide us with data to better serve our customers and additional payroll

expenses relating to hurricane preparedness and wage increases. Maintenance expense increased by $208,000 primarily due to maintenance expenditures in Central Florida for cleaning and painting a distribution regulator and gate stations and the purchase of maintenance related safety equipment and tools.

Electric
Electric operating expenses increased $535,000, or 5%, in 2006 as compared with 2005. As a result of our efforts to inform and educate our electric customers about the expected 2007 and 2008 fuel rate increases in upcoming bills, sales expense increased by $120,000. Customer account expenses increased $106,000 in 2006 over the prior year mainly due to increased bad debt provisions due to higher sales and slower housing economy. Depreciation expense increased $202,000 largely due to major construction work done in the latter part of 2005 and the beginning of 2006. This included the rebuilding of a transmission sub-station, the rebuilding of an entire distribution sub-station with two transformers and the replacement of a failed sub-distribution station transformer. Additional significant work on transformers is expected in 2008.

Electric operating expenses increased $771,000, or 8%, in 2005 as compared with 2004. As we continued to focus on improving service reliability, we increased maintenance expense by $397,000 for additional tree trimming and the use of a temporary mobile substation while a new transformer was purchased and put into service. Depreciation expense increased $100,000 due to normal increases in plant assets. In 2005, other operating expenses increased $114,000 due to a shift from work on capital assets to operational needs along with personnel raises.

Propane Gas
Propane gas operating expenses increased $94,000, or 2%, in 2006 as compared with 2005. Depreciation expense increased $99,000 for the addition of plant assets including a propane gas delivery system that will increase the efficiency of our deliveries and improve our overall customer satisfaction. Aging accounts receivable, slowing housing economy and increasing revenues contributed to an increase in our bad debt expense over the prior year.

Propane gas operating expenses increased $630,000, or 12%, in 2005 as compared with 2004. As we continued to focus on increasing our propane gas business, other operating costs increased $467,000. We placed additional emphasis in the sales area, which resulted in signing up new housing developments that will utilize propane gas. We incurred increased expenditures for piping homes, delivering propane gas, implementing a new delivery system and increasing commission payments. This increased effort in our sales area contributed to an increase of 150 customers and 4% overall units sold in our propane gas segment.

Administrative Expenses
Administrative expenses increased $177,000, or 2%, in 2006 over 2005. These expenses generally are related to all of our operating segments. To continue to adequately support our internal and external customers, we increased staffing in our administrative areas. Payroll increases of $322,000 related to an increased number of employees, annual pay raises and normal inflationary impacts. In 2006, we discontinued eligibility to our defined benefit pension plan for new employees and replaced the defined benefit pension plan with a 401K-match plan for new employees. Although this change will take time to reduce pension expense, we did experience a reduction of $107,000 in our pension expenses in

2006. Medical costs increased $120,000 over the prior year and these costs are expected to continue to rise.

Regulatory storm surcharge expenses approved in our 2005 natural gas petition increased natural gas expenses by $180,000.

Administrative expenses increased $996,000, or 13%, in 2005 over 2004. Pension expense increased $274,000 due to our estimate that the return on the pension's assets will not keep pace with growing pension liabilities. Medical insurance premiums continue to rise, increasing $130,000 in 2005. Compliance costs related to Sarbanes-Oxley and internal control requirements, as well as audit fees, increased outside services expenses by $156,000. With the impact from our focus on hurricane preparations and the 2005 hurricanes, our safety expense increased by $235,000. A portion of this increase related to compensation for an additional safety employee and costs for a new safety incentive program.

Total Other Income and Deductions

Other income and deductions include revenues and expenses from sales and installation, service of merchandise, gains or losses on disposal of property, interest expense and other income and expenses. The largest components of this section are merchandise sales, services income and interest expenses. Our service activities include the installation of merchandise and other contract work. Interest expense consists of interest on bonds, short-term borrowings and customer deposits.

Merchandise and Services Revenue and Expenses

Although merchandise and services revenue decreased by approximately $268,000 in 2006, the overall profitability in this area increased by $325,000 compared to 2005. This was primarily a result of significant strategic changes made by management. These changes included revising the product markup structure, increasing installation fees and increasing employee training. We experienced a revenue decrease due to lower demand for merchandise as a result of a quiet hurricane season and the slow down of new construction projects in our areas due to the downturn in the housing market.

Merchandise and services revenues and expenses increased in 2005 from 2004 but profitability decreased $114,000. We experienced an increase in revenues and cost of sales primarily due to an increased demand for electric to gas conversions and installations of customer owned propane gas tanks to supply back-up generators. We had increased expenses from sub-contractors that were not passed on to customers in sales prices.

Interest Expenses

In 2005, total interest expense increased $106,000. Interest on short-term debt increased $37,000. This was due to the increase in the average outstanding loan balance on the line of credit and higher interest rates. Interest on customer deposits increased $48,000 due to increased customer deposits primarily as a result of additional deposits required after implementing increased rates in our natural gas operation.

Other

Other revenues increased $51,000 compared to 2005 due to additional interest income associated with the sale of the water assets.

Income Taxes

Income tax expense decreased in 2006 over the normal tax rate on net income by $67,000. This decrease was due to tax return adjustments related to the regulatory deferred tax liabilities.

Income tax expense decreased in 2005 over the normal tax rate on net income by $43,000. Tax return adjustments related to the sale of our water assets and the regulatory deferred tax liabilities decreased expenses by $118,000. We had an offsetting increase of $75,000 related to our IRS audit of the 2002 and 2003 income tax returns.

Liquidity and Capital Resources

Summary of Primary Sources and Uses of Cash

(Dollars in thousands)

	Year Ended December 31,		
	2006	2005	2004
Sources of Cash:			
Operating activities, including working capital changes	$20,090	$10,213	$11,673
Net proceeds on short-term debt	-	3,733	3,547
Other sources of cash	1,179	1,214	648
Uses of Cash:			
Construction expenditures	13,116	12,441	13,731
Dividends paid	2,551	2,448	2,368
Net payment on short-term debt	6,092	-	-
Other uses of cash	121	75	129
Net (use) source of cash	$ (611)	$ 196	$ (360)

Cash Flows

Operating Activities

Net cash flow provided by continuing operating activities increased in 2006 by approximately $10 million compared to 2005. Fuel and other pass through costs accounted for $6.5 million of the increase. This increase resulted from the collection of the prior year's under-recoveries of $3.4 million and over-recoveries of $3.1 million in 2006. Amounts over-recovered will be refunded to customers in subsequent calendar years. Lower fuel costs during the latter part of the year in our natural gas segment contributed to a decrease in receivables and increase in cash of $3 million. The lower fuel costs and timing of payments to our major fuel suppliers resulted in a decrease to operating cash of $1 million. Income taxes paid increased by approximately $600,000 primarily due to the tax effect of the collection of prior year's fuel under-recoveries.

Net cash flow provided by continuing operating activities decreased in 2005 by approximately $1.5 million compared to 2004. Payments for fuel exceeded the amount collected from customers by an additional $3.1 million in 2005. The under-recovery of fuel costs is collected in the following calendar year. Income tax payments increased approximately $1.5 million, primarily as a result of less tax depreciation and higher income. The deduction for tax depreciation was higher in 2004 as a result of bonus depreciation, resulting in lower taxes in that year. We also received a refund in 2004 relating to the deferral of the gain on our water assets sale.

Offsetting the decreases to 2005 cash flow was additional cash received from rate increases in our natural gas segment. The rate increases also contributed to an increase to accounts receivable of $4 million. Accounts payable increased $3.3 million in 2005 primarily due to the increased cost of fuel in our natural gas segment.

Investing Activities

Capital expenditures increased in 2006 compared to 2005 by approximately $700,000. The increase in 2006 included expenditures for transportation equipment in our electric segment for approximately $400,000, vehicles in our natural gas segment above 2005 levels of approximately $600,000, and various other typical capital expenditures. Offsetting total 2006 increases was a $663,000 transformer replacement in 2005.

Capital expenditures decreased in 2005 compared to 2004 by approximately $1.3 million. In 2004, there were large projects to rebuild two substations in our electric segment and additional propane community gas systems costing approximately $3.3 million. In 2005 such expenditures were lower and consisted of the purchase of a transformer in our electric segment for $663,000, a new natural gas mapping system to track our assets used in serving our customers for approximately $300,000, a propane delivery system for approximately $300,000, additional propane community gas systems for approximately $300,000 and other various capital expenditures.

Financing Activities

Short-term borrowings decreased by $6 million in 2006. Over-recovery of fuel costs provided a large source of cash during 2006 as well as the recovery of the prior year's under-recovery of fuel costs in 2006, reducing the need for short-term borrowings.

Although additional sources of cash were provided by our rate increases and lower construction expenditures in 2005, the additional expenditures from the under-recovery of fuel costs and additional income taxes increased our short-term debt. Short-term borrowings increased in 2005 over 2004 by approximately $3.7 million.

Capital Resources

We currently have a $12 million line of credit, which expires on July 1, 2008. Upon 30 days notice by us we can increase the line of credit to a maximum of $20 million. The line of credit contains affirmative and negative covenants that, if violated, would give the bank the right to accelerate the due date of the loan to be immediately payable. The covenants include certain financial ratios. All ratios are currently met and management believes we are in full compliance with all covenants and anticipates continued compliance. We reserve $1 million of the line of credit to cover expenses for any major storm repairs in our electric segment and an additional $250,000 for a letter of credit insuring propane gas facilities. As of December 31, 2006, the amount borrowed on the line of credit was $3.5 million. The line of credit, long-term debt and preferred stock as of December 31, 2006 comprised 53% of total capitalization and debt.

In prior years we periodically paid off short-term borrowings under lines of credit using the net proceeds from the sale of long-term debt or equity securities. We may use similar types of proceeds in the future to pay off short-term borrowings, dependent on the amount borrowed from the line of credit, prevailing market conditions for debt and equity, the impact to our financial covenants and the effect on income.

Our 1942 Indenture of Mortgage and Deed of Trust, which is a mortgage on all real and personal property, permits the issuance of additional bonds based upon a calculation of unencumbered net real and personal property. At December 31, 2006, such calculation would permit the issuance of approximately $39.3 million of additional bonds.

On November 30, 2006 we received approval from the FPSC to issue and sell or exchange an additional amount of $45 million in any combination of long-term debt, short-term notes and equity securities and/or to assume liabilities or obligations as guarantor, endorser or surety during calendar year 2007. We will seek approval from the FPSC in 2007 for any possible financing in 2008.

We have $3.4 million in invested funds for payment of future environmental costs. We expect to use some of these funds in 2007.

Capital Requirements
Portions of our business are seasonal and dependent upon weather conditions in Florida. This factor affects the sale of electricity and gas and impacts the cash provided by operations. Construction costs also impact cash requirements throughout the year. Cash needs for operations and construction are met partially through short-term borrowings from our line of credit.

Capital expenditures are expected to be higher in 2007 compared to 2006 by approximately $3.9 million. The primary reason for the expected increase in expenditures is the anticipated purchase of land for a new South Florida division office. The current division office is on environmentally impacted property, which requires relocating the office to allow for clean up of the property. It is not possible to rebuild at the current location since the property has been rezoned with a residential designation. The estimated cost of land is $3.8 million. We are planning to build and complete this new facility in the next five years. We do not have any commitments for capital expenditures in 2007 other than vehicles of approximately $102,000.

Cash requirements will increase significantly in the future due to environmental clean up costs, sinking fund payments on long-term debt and pension contributions. Environmental clean up is forecast to require payments of approximately $600,000 in 2007, with remaining payments, which could total approximately $13.1 million, beginning in 2008. Annual long-term debt sinking fund payments of approximately $1.4 million will begin in 2008 and will continue for eleven years. Based on current projections, we will make voluntary contributions in our defined benefit pension plan of $250,000 in 2007 and $500,000 in 2008. Required contributions will begin in 2009 and are forecast to be approximately $2 million in 2009 and 2010.

Based on our current expectations for cash needs, including the possible land purchase and related South Florida office construction, we may choose to consider an equity or debt financing in 2008 to address those cash needs. The need and timing will depend upon operational requirements, environmental expenditures, pension contributions and construction expenditures and cannot be precisely predicted at this time. In addition, if we experience significant environmental expenditures in the next two or three years it is possible we may need to raise additional funds. If interest rates remain favorable we may consider re-financing one of our mortgage bonds. If refinancing is deemed beneficial, we may re-issue the bond for additional principal. There can be no assurance, however, that equity or debt transaction financing will be available on favorable terms or at all when we make the decision to proceed with a financing transaction.

Outlook

Pension and Insurance Expenses

Insurance costs have been increasing and are expected to continue to increase while we expect pension costs to decrease. Pension expenses decreased $107,000 in 2006 and our actuarial estimates show pension expense decreasing by $142,000 in 2007. Insurance expenses including Medical, Liability and Workers' Compensation increased $70,000 in 2006 and are expected to increase further in 2007.

The regulated segments received rate relief for some of the historical pension and insurance increases in 2003 and 2004. Increases beyond those experienced through 2005, which are allocated to the regulated segments, may require requesting future rate relief. The propane gas segment may recover these expenses by increasing rates, depending on market conditions in the propane gas industry and the ability to remain competitive.

Due to significant cost increases for our defined benefit pension plan over the past several years and with expectations that these cost increases will continue in the years ahead, we discontinued eligibility to our pension plan for all new hires.

For new hires not eligible for the defined benefit pension plan, we established an employer match to the employee's contribution to their 401K plans. It provided for a company match of 50% for each dollar contributed by the employee, up to 6% of their salary, for a company contribution of up to 3%. Beginning in 2007, for non-union employees the plan was enhanced to provide a company match of 100% for the first 2% of an employee's contribution, and a match of 50% for the next 4% of an employee's contribution, for a total company match of up to 4%. This new enhanced match will be negotiated with our six union contracts during 2007, to be effective on their respective contract date within 2007. The employees are eligible for the company match after six months of continuous service, with vesting of 100% after three years of continuous service.

Electric Power Supply Contracts

Contracts with our two electric suppliers were originally set to expire on December 31, 2007. Those contracts provided electricity to our customers at rates much lower than market rates. As part of our negotiations, we agreed to end the current contract terms for our Northeast division on December 31, 2006 and executed an amended contract to begin January 1, 2007 and expire December 31, 2017. Although the contract rates will increase for 2007, this enabled us to obtain lower rates for the longer term of the contract than would have been available if we had not revised the contract. The savings are passed through to our customers without profit to us.

We executed a contract for the provider of electricity in our Northwest division in December 2006 and are seeking approval of this contract and its related terms and conditions from the FPSC on or before July 1, 2007. If the FPSC does not approve this contract, we may need to seek an alternative supplier or new contract with this same supplier for the purchase of electricity in the Northwest division. This contract will be for the purchase of electricity beginning January 1, 2008. We anticipate that contract will result in rates closer to market, which could cause our customers' bills to double over existing prices in the next several years.

We are unable to estimate what impact, if any, the higher rates could have on electric consumption.

Propane Gas

We are currently reviewing the possibility of hedging activities in 2007 to help mitigate the risk of price changes for our cost of propane gas. We are unable to determine the impact this activity will have on our future operating income.

We used advance purchase agreements made in the normal course of procuring propane gas supplies in past years. These agreements resulted in a loss of gross profit of approximately $5,000 in 2006 and additional gross profit of approximately $383,000 in 2005 and $242,000 in 2004.

Over-earnings-Natural Gas Segment
The FPSC approves rates that are intended to permit a specified rate of return on investment and limits the maximum amount of earnings of regulated operations. We currently estimate over-earnings in 2006 of $230,000 and in 2005 of $650,000. We revised our prior year's 2005 estimate of $700,000 during 2006. These liabilities have been included in an over-earnings liability on our balance sheet, with the potential of rate refunds to customers. The calculations supporting these liabilities are complex and involve a variety of projections and estimates before the ultimate settlement of such obligations.

Our 2005 and 2006 estimates of our over-earnings liabilities could change upon the FPSC finalization and review of our earnings in 2007 and 2008. The FPSC determines the disposition of over-earnings with alternatives that include refunding to customers, funding storm damage or environmental reserves, or reducing any depreciation reserve deficiency.

In 2007 we requested that the 2005 natural gas over-earnings be used to provide additional funds to our regulatory liability – storm reserve and reduce the costs currently being recovered from our customers through a storm surcharge. If the FPSC approves this disposition, we will end the storm surcharge in 2007.

Electric Customers
A large commercial customer in our electric division closed its operations in late 2006. As a result we anticipate annual revenues to be reduced by approximately $300,000 and annual gross profit to be reduced by approximately $50,000.

A large distribution center was built in our Northwest division in 2004 and a second facility was added in 2006. A third distribution facility is expected to be added by the end of 2007. Additional industrial and commercial development is planned for this general area, which should increase load significantly. Additional gross profit is anticipated in the future to increase between $30,000 and $50,000 as a result of the additional developments.

Natural Gas Customers

Two natural gas customers went off-line for approximately six months in 2006 due to lower production, market slow down and maintenance work on their facilities. We anticipate that they will not be fully operational until mid-2007. The decreased revenue and gross profit is estimated to be $100,000 in 2007.

Indiantown Gas Agreement

The FPSC approved our joint transportation and territorial agreements with Indiantown Gas Company in October 2006. We began construction in the Indiantown area to install natural gas mains in the first phase of this development, for approximately 100 homes. Two more developments are slated for construction of approximately 1,000 homes in 2007.

Storm Preparedness Expenses

Regulators continue to focus on hurricane preparedness and storm recovery issues for utility companies. Newly mandated storm preparedness initiatives could impact our operating expenses and capital expenditures beginning in 2007. The initial forecasts of these annual expenditures are approximately $700,000. It is possible that additional regulation and rules will be mandated regarding storm related expenditures over the next several years. We requested that the FPSC allow us to recover the cost of the newly mandated storm preparedness initiatives and to defer these storm-related expenditures until we receive recovery through a rate increase. If approved, both the recovery and expenditures may occur by mid-2007. If the FPSC does not approve our request, we plan to file a rate proceeding in 2007 as an alternative option for recovery of these expenditures.

Land Purchase

We are currently reviewing multiple sites for the new South Florida division office. We expect to purchase land for the new South Florida division office during 2007.

Contractual Obligations

Table of Contractual Obligations
(Dollars in thousands)

Payments due by period:	Total	Less than 1 year	1 to 3 years	3 to 5 years	More than 5 years
Long-term Debt Obligations	$52,500	$ -	$2,818	$2,818	$46,864
Long-term Debt Interest	63,904	3,949	7,623	7,074	45,258
Operating Lease Obligations	352	151	163	38	-
Natural Gas and Propane Gas Purchase Obligations	64,904	37,768	16,244	4,568	6,324

Deleted: 242
Deleted: -
Deleted: 584
Deleted: 448

Long-term Debt Obligations

The Long-term debt obligations are principal amounts.

Long-term Debt Interest

The Long-term debt interest represents the interest obligation on our Mortgage Bonds.

Operating Lease Obligations

Our total operating lease obligation is $352,000. We are leasing property from the City of Fernandina Beach in our Northeast division. The total obligation for the duration of this lease is about $107,000 over the next five years. We lease our appliance showroom in the same division for approximately $35,000 annually. We also have other operating lease agreements with various terms and expiration dates.

Purchase Obligations

A purchase order is considered an obligation if it is associated with a contract or is authorizing a specific purchase of material. The Other Purchase Obligation amount presented above represents the amount of open orders.

Pension, Medical Postretirement and Other Obligations
Our pension plan continues to meet all funding requirements under ERISA regulations; however, under current actuarial assumptions, contributions may be required as early as 2009. Current projections indicate that we will make voluntary contributions of $250,000 in 2007, $500,000 in 2008 and make required contributions of approximately $2 million in 2009 and 2010, decreasing to under $1 million in 2011. These payments are not included in the Contractual Obligations table.

Environmental clean up is anticipated to require approximately $600,000 in 2007, the remainder to be paid in following years. These payments are not included in the Contractual Obligations table.

We have medical postretirement payments relating to retiree medical insurance. These payments are not included in the Contractual Obligations table. Estimated future payments are described in Note 12 in the Notes to Consolidated Financial Statements.

Dividends
We have historically paid dividends. It is our intent to continue to pay quarterly dividends for the foreseeable future. Our dividend policy is reviewed on an ongoing basis by our Board of Directors and is dependent upon our future earnings, cash flow, financial condition, capital requirements and other factors.

Other

Impact of Recent Accounting Standards

Financial Accounting Standard Board Interpretation No. 48
In June 2006, the FASB issued Interpretation No. 48, Accounting for Uncertainty in Income Taxes (FIN 48). The interpretation clarifies the accounting for uncertainty in income taxes recognized in an entity's financial statements in accordance with SFAS No. 109, Accounting for Income Taxes. The interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 also provides guidance on de-recognition, measurement, classification, interest and penalties, accounting in interim periods, disclosure and transition. This interpretation is effective for calendar years beginning January 1, 2007.

We have performed an analysis of tax positions taken and expected to be taken on the tax returns and assessed the technical merits of each tax position by relying on legislation, statutes, common legislative intent, regulations, rulings, and case law and determined that the Company has no material uncertain tax positions. Additionally, the IRS concluded an audit of the 2002 and 2003 tax years in September of 2005.

In February of 2007, the IRS informed us that it selected our 2003 and 2004 tax years for examination. As our tax positions have remained consistent with those from the previously audited tax years, we are not expecting any material adverse findings as the result of the impending IRS audit.

Based on the aforementioned, we believe that the adoption of FASB Interpretation No. 48 will not have a material impact on our financial condition or results of operations.

Financial Accounting Standard No. 157

In September 2006, the FASB issued Statement No. 157, "Fair Value Measurements". This Statement clarifies fair value as the market value received to sell an asset or paid to transfer a liability, that is, the exit value, and applies to any assets or liabilities that require recurring determination of fair value. The measurement includes any applicable risk factors and does not include any adjustment for volume. This Statement is effective for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods within. The Company expects to adopt SFAS No. 157 effective January 1, 2008. The Company does not believe adoption of this Statement will have a material impact on our financial condition or results of operation.

Financial Accounting Standard No. 158

In September 2006, the FASB issued Statement No. 158, "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans". Statement 158 requires the Company to show the funded status of its pension and retiree health care plans as a prepaid asset or accrued liability, and to show the net deferred and unrecognized gains and losses related to the retirement plans, net of tax, as part of accumulated other comprehensive income in shareholders' equity. Previously, the net deferred and unrecognized gains and losses were netted in the prepaid asset or accrued liability recorded for the retirement plans. The Company adopted the recognition provisions of Statement 158, as required, at December 31, 2006.

The Company uses December 31 as the measurement date to measure the assets and obligations of its retirement plans. Statement 158 will also require the Company to use December 31 as the measurement date no later than fiscal years ending after December 15, 2008. The Company currently uses this date as the measurement date, and has used it for all periods presented.

Deleted: September 30

Deleted: expects to make this change in 2008.

The actuarial valuation of the retirement plan obligations has been completed and the recognition provisions of Statement 158 at December 31, 2006 resulted in an additional liability for retirement plans. The tax on the non-regulated portion of the liability has been recorded as a deferred income tax asset. As an offset, the regulatory portion of this liability has been deferred as a regulatory asset-retirement plans to be recovered in future rate proceedings and the remaining expense for recording the liability has been included in other comprehensive income. The fair value of retirement plan assets and obligations are subject to change based on market fluctuations. The table below summarizes the effects to our financial statements.

Deleted: is

FASB 158 Implementation Summary
(Dollars in thousands)

	December 31, 2006		
	Before Application of SFAS 158	Adjustment	After Application of SFAS 158

Deferred income taxes	16,224	(88)	16,136

Staff Accounting Bulletin No. 108

In September 2006, the SEC issued Staff Accounting Bulletin (SAB) No. 108 "Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements". SAB 108 requires that public companies utilize a "dual-approach" to assessing the quantitative effects of financial misstatements. This dual approach includes an assessment from both an income statement and a balance sheet focus. The guidance in SAB 108 must be applied to annual financial statements for fiscal years ending after November 15, 2006. The Company has adopted SAB No.108 and there has not been any impact on our consolidated financial position or results of operations as the result of this adoption.

Critical Accounting Policies and Estimates

Regulatory Accounting

We prepare our financial statements in accordance with the provisions of SFAS No. 71 "Accounting for the Effects of Certain Types of Regulation" and it is our most critical accounting policy. In general, SFAS No. 71 recognizes that accounting for rate-regulated enterprises should reflect the relationship of costs and revenues introduced by rate regulation. As a result, a regulated utility may defer recognition of a cost (a regulatory asset) or recognize an obligation (a regulatory liability) if it is probable that, through the rate making process, there will be a corresponding increase or decrease in revenues or expenses. SFAS No. 71 does not apply to our unregulated propane gas operations.

Use of Estimates

We are required to use estimates in preparing our financial statements so they will be in compliance with accounting principles generally accepted in the United States of America. Actual results could differ from these estimates. We believe that the accruals for potential liabilities are adequate. The estimates in our financial statements included the accrual for pensions, environmental liabilities, over-earnings liability, unbilled revenues, allowances for doubtful accounts, uninsured liability claims and the regulatory deferred income tax and deferred income liabilities.

- Pension and post retirement benefits-An actuary calculates the estimated pension liability in accordance with FASB 87, FASB 88 as amended by FASB 132 and FASB 158.
- Environmental liabilities-These liabilities are subject to certain unknown future events. The Company reviews the environmental issues regularly with the geologists performing the feasibility studies and their legal counsel specializing in manufactured gas plant issues and negotiates with the environmental regulators and the other participating parties to determine the adequacy of the estimated liability for environmental reserves.

Deleted: ***Financial Accounting Standard No. 154***
In May 2005, the FASB issued Statement No. 154, "Accounting Changes and Error Corrections". This Statement applies to all voluntary changes in accounting principle and requires retrospective application to prior period financial statements of changes in accounting principle, unless it is impracticable to determine either the period-specific effects or the cumulative effects of the change. This Statement is effective for accounting changes and corrections of errors made in fiscal years beginning after December 15, 2005. We adopted SFAS No. 154 as of January 1, 2006; however, we did not have any impact to our financial statements in 2006 as a result of this adoption.¶

Deleted: ***Financial Accounting Standard Board Interpretation No. 47***¶
In March 2005, the FASB issued Interpretation No. 47, "An Interpretation of FASB Statement No. 143". SFAS No. 143, "Accounting for Asset Retirement Obligations", requires that the fair value of an asset retirement obligation be recognized at the time those obligations are incurred. Upon initial recognition of a legal liability, costs are capitalized as part of the related long-lived asset and allocated to expense over the useful life of the asset. SFAS No. 143 also requires that components of previously recorded depreciation related to the cost of removal of assets upon retirement, whether legal asset retirement obligations or not, be removed from a company's accumulated depreciation reserve. We adopted the provisions of the Statement as of January 1, 2003, as prescribed by the FPSC. Under FPSC guidelines, the estimated cost of removal expenses for normal retirements related to regulated fixed assets were reserved through the depreciation expense and accumulated reserves. This was disclosed in a footnote until December 31, 2003, when the estimated cost of removal from accumulated depreciation was reclassified to a regulatory liability for the obligation.¶
¶
This Interpretation addresses the legal obligation to retire an asset when the timing and (or) met[... [1]

Deleted: y

Deleted:

- Over-earnings liability-This liability is subject to regulatory review and possible disallowance of some expenses in determining the amount of over-earnings.
- Unbilled revenues-Unbilled revenue is estimated with certain assumptions including unaccounted for units and the use of current month sales to estimate unbilled sales.
- Allowances for doubtful accounts- This liability is estimated based on historical information and trended current economic conditions, certain assumptions, and is subject to unknown future events. Actual results could differ from our estimates.
- Uninsured liability claims-We are self-insured for the first $250,000 of each general and auto liability claim and accrue for estimated losses occurring from both asserted and unasserted claims. The estimate for unasserted claims arising from unreported incidents is based on an analysis of historical claims data and judgment.
- Regulatory deferred income tax and deferred income tax liabilities-These liabilities are estimated based on historical data and are subject to finalization of our income tax return. Actual results could differ from our estimates.

Deleted: y

Revenue Recognition
We bill utility customers on a monthly cycle basis; however, the billing cycle periods for most customers do not coincide with the accounting periods used for financial reporting. We accrue estimated revenue for gas and electric customers for consumption used but not yet billed for in an accounting period. Determination of unbilled revenue relies on the use of estimates and historical data. We believe that the estimates for unbilled revenue materially reflect the unbilled gross profit for our customers for units used but not yet billed in the current period.

The FPSC approves rates that are intended to permit a specified rate of return on investment and limits the maximum amount of earnings of regulated operations. Any earnings in excess of this maximum amount are accrued for as an over-earnings liability and revenues are reduced for this same amount. The calculations supporting these liabilities are complex and involve a variety of projections and estimates before the ultimate settlement of such obligations. The FPSC determines the disposition of any over-earnings with alternatives that include refunding to customers, funding storm damage or environmental reserves or reducing any depreciation reserve deficiency.

Effects of Inflation
Our tariffs for natural gas and electric operations provide for fuel clauses that adjust annually for changes in the cost of fuel. Increases in other utility costs and expenses not offset by increases in revenues or reductions in other expenses could have an adverse effect on earnings due to the time lag associated with obtaining regulatory approval to recover such increased costs and expenses, the uncertainty of whether regulatory commissions will allow full recovery of such increased costs and expenses and any effect on unregulated propane gas operations.

Environmental Matters
We currently use or have used in the past, several contamination sites that are currently involved in pending or threatened environmental litigation as discussed in Note 10-"Contingencies" in the Notes to Consolidated Financial Statements. We intend to vigorously defend our rights in this litigation. We have insurance and rate relief to cover

any expected losses or expenses. We believe that the aggregate of all future contamination assessment and remedial costs, legal fees and other related expenses would not exceed the insurance proceeds received and any rate relief granted. The final 2004 natural gas rate relief granted by the FPSC provided future recovery of $8.9 million for environmental liabilities. The remaining balance to be recovered from customers through future recovery is included on the balance sheet as "Other regulatory assets-environmental".

Off-Balance Sheet Arrangements
We do not have any off-balance sheet arrangements.

Forward-Looking Statements (Cautionary Statement)
This report contains forward-looking statements including those relating to the following expectations:

- Based on our current expectations for cash needs, including cash needs relating to the possible land purchase and related construction, we may choose to consider an equity or debt financing in 2008 to address those cash needs. The need and timing will depend upon operational requirements, environmental expenditures, pension contributions and construction expenditures and cannot be precisely predicted at this time.
- Pension expenses will continue to decrease in 2007.
- Other insurance costs will increase in 2007.
- Our anticipation of continued compliance in the foreseeable future with our line of credit covenants.
- Our expectation that cash requirements will increase significantly in the future due to environmental clean-up costs, sinking fund payment on long-term debt and pension contributions.
- Electric storm related expenditures may be necessary beginning in mid-2007 and the total cost may be significant. We may receive recovery for these expenditures.
- Propane gas hedging activity may occur in 2007.
- The fuel supply contract in our Northwest Florida division beginning January 1, 2008 will be approved by the FPSC in 2007 and will be effective for the purchase of fuel supply beginning in 2008.
- Our 2005 and 2006 over-earnings liabilities in natural gas will materialize as estimated after the FPSC reviews and audits.
- We expect to have higher fuel costs for 2007, 2008 and beyond.
- The development in Indiantown will occur as estimated.
- The purchase of land for our new natural gas and propane gas division office will occur in 2007.
- The FPSC will allow our natural gas over-earnings to fund a future storm reserve and reduce our current regulatory asset related to historic storm costs and discontinue the related natural gas storm surcharge in 2007.
-
- The commercial and industrial growth will occur as expected in our Northwest division providing increases in our revenues and gross profit.
- The two customers that went off-line in 2006 will be fully operational by mid-2007.

Deleted: We have increased our focus on collection efforts of bad debt and we expect our bad debt expense to return to normal levels in 2007 and beyond.

These statements involve certain risks and uncertainties. Actual results may differ materially from what is expressed in such forward-looking statements. Important factors

that could cause actual results to differ materially from those expressed by the forward-looking statements include, but are not limited to, those set forth above in "Risk Factors".

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

All financial instruments held by us were entered into for purposes other than for trading. We have market risk exposure only from the potential loss in fair value resulting from changes in interest rates. We have no material exposure relating to commodity prices because under our regulatory segments, we are currently fully compensated for the actual costs of commodities (natural gas and electricity) used in our operations. Any commodity price increases for propane gas are normally passed through monthly to propane gas customers as the fuel charge portion of their rate.

None of our gas or electric contracts are accounted for using the fair value method of accounting. While some of our contracts meet the definition of a derivative, we have designated these contracts as "normal purchases and sales" under SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities".

Beginning in 2007 we plan, on a rolling four-quarter basis, to purchase a "cap" on approximately one-third of our forecast propane gas volume purchases and pre-buy or hedge with a swap one-third of our forecast anticipated propane gas purchases. The remaining one-third will fluctuate with the market price. Our energy strategy allows us to participate in two-thirds of price declines but only one-third of price increases. As of December 31, 2006, we have not entered into any hedging activities. When we do enter into hedging activities, we will determine whether they meet the definition of normal sales and purchases and if not, we will determine whether we can use hedge accounting.

We have no exposure to equity risk, as we do not hold any equity instruments. Our exposure to interest rate risk is limited to investments held for environmental costs, the water sale long term receivable and short-term borrowings on the line of credit. The investments held for environmental costs are short-term fixed income debt securities whose carrying amounts are not materially different than fair value. The short-term borrowings were $3.5 million at the end of December 2006. Therefore, we do not believe we have material market risk exposure related to these instruments. The indentures governing our two first mortgage bond series outstanding contain "make-whole" provisions, which are pre-payment penalties that charge for lost interest, which render refinancing impracticable.

Our non-interest bearing long-term receivable from the sale of the water operations was discounted at 4.34%. A hypothetical 0.5% (50 basis points) increase in the interest rate used would change the current fair value from $6 million to $5.9 million.

In 2006, a hypothetical 0.5% (50 basis points) decrease in the long-term interest rate on $52.5 million debt excluding unamortized debt discount would change the fair value from $63 million to $66.9 million.

Changes in short-term interest rates could have an effect on income depending on the balance borrowed on the variable rate line of credit. We had short-term debt of $3.5 million on December 31, 2006 and $9.6 million on December 31, 2005. A hypothetical 1% increase in interest rates would have resulted in a decrease in annual earnings for 2006 by $35,000 and for 2005 by $96,000, based on year-end borrowings.

See Notes to Consolidated Financial Statements

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Summary of Significant Accounting and Reporting Policies

A. General

The Company is an operating public utility engaged principally in the purchase, transmission, distribution and sale of electricity and in the purchase, transmission, distribution, sale and transportation of natural gas. The Company is subject to the jurisdiction of the FPSC with respect to its natural gas and electric operations. The suppliers of electric power to the Northwest Florida division and of natural gas to the natural gas divisions are subject to the jurisdiction of the FERC. The Northeast Florida division is supplied most of its electric power by a municipality which is exempt from FERC and FPSC regulation. The Company also distributes propane gas through a non-regulated subsidiary.

B. Basis of Presentation

The consolidated financial statements include the accounts of Florida Public Utilities Company (FPU) and its wholly owned subsidiary, Flo-Gas Corporation. All significant intercompany balances and transactions have been eliminated. The Company's accounting policies and practices conform to accounting principles generally accepted in the United States of America (GAAP) as applied to regulated public utilities and are in accordance with the accounting requirements and rate-making practices of the FPSC and in accordance to the rule requirements of the Securities and Exchange Commission (SEC).

C. Use of Estimates

The preparation of financial statements in conformity with GAAP requires the Company to make certain estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of any contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Some of these estimates include the accruals for pensions, allowances, environmental liabilities, liability reserves, unbilled revenue, regulatory deferred tax liabilities and over-earnings liability. Actual results may differ from these estimates and assumptions.

D. Reclassifications

Certain amounts in the prior years' financial statements have been reclassified to conform to the 2006 presentation.

E. Regulation

The financial statements are prepared in accordance with the provisions of Statement of Financial Accounting Standards (SFAS) No. 71 – "Accounting for the Effects of Certain Types of Regulation". SFAS No. 71 recognizes that accounting for rate-regulated enterprises should reflect the relationship of costs and revenues introduced by rate regulation. A regulated utility may defer recognition of a cost (a regulatory asset) or show recognition of an obligation (a regulatory liability) if it is probable that, through the ratemaking process, there will be a corresponding increase or decrease in revenues. The Company has recognized certain regulatory assets and liabilities in the consolidated balance sheets. The Company believes that the FPSC will continue to allow recovery of

such items through rates. In the event that a portion of the Company's operations are no longer subject to the provisions of SFAS No. 71, the Company would be required to write-off related regulatory assets and liabilities that are not specifically recoverable through regulated rates. In addition, the Company would be required to determine if an impairment related to other assets exists, including plant, and write-down the assets, if impaired, to their fair value.

Summary of Regulatory Assets and Liabilities
(Dollars in thousands)

	2006	2005
Assets		
Deferred development costs (1)	$ 3,952	$ 4,190
Unamortized fuel related regulatory costs (6)	48	24
Environmental assets (2)	8,284	8,868
Storm Reserve assets (3)	270	452
Deferred retirement plan costs (5)	829	-
Unamortized Rate Case expense	368	541
Under-recovery of fuel costs	862	3,375
Unamortized piping and conversion costs (1)	1,521	1,587
Unamortized loss on reacquired debt (1)	209	227
Total Regulatory Assets	$16,343	$19,264
Liabilities		
Tax liabilities	$ 876	$ 991
Cost of removal	8,800	8,256
Storm reserve liabilities	1,636	1,536
Over-recovery of fuel costs	3,656	-
Over-recovery of conservation	355	24
Over-earnings liability (4)	880	700
Total Regulatory Liabilities	$16,203	$11,507

Deleted: -

Deleted: 15,481

Deleted: 2,794

Deleted: 15,341

(1) Deferred development costs, unamortized piping and conversion costs, and unamortized loss on reacquired debt are included in deferred charges in the consolidated balance sheets.
(2) The Company has included the amount due from customers as a regulatory asset for environmental costs. The FPSC authorized recovery of these environmenatl costs from customers over 20 years.
(3) The FPSC has authorized the Company to recover storm damages incurred in 2004 in their natural gas operations. Recovery of these costs from customers over 30 months began November 2005.
(4) The Company originally estimated the 2005 over-earnings for regulated natural gas operations at $700,000. In 2006 the estimate was reduced to $650,000. The Company has estimated 2006 over-earnings for regulated natural gas operations of $230,000. The Company has recorded these liabilities which reduced revenues. The FPSC determines the disposition of over-earnings with alternatives that include refunding to customers, funding storm damage or environmental reserves, or reducing any depreciation reserve deficiency.
(5) The actuarial valuation of the retirement plan obligations has been completed and the recognition provisions of Statement 158 at December 31, 2006 resulted in a regulatory asset for the portion of the loss of $829,000 to be recovered in future rate proceedings.

Deleted: his was authorized by t

Deleted: in their most recent natural gas rate proceeding and is being recovered

(6) The Company has deferred certain regulatory fuel related costs and as of January 2006 has been amortizing these over five years according to a FPSC order in the November 2005 fuel hearings.

The base revenue rates for regulated segments are determined by the FPSC and remain constant until a request for an increase is filed and approved by the FPSC or the FPSC orders the Company to reduce their rates. For the Company to recover increased costs from the effects of inflation and construction expenditures for regulated segments, a request for an increase in base revenues would be required. Separate filings would be required for the electric and natural gas segments. The Company is currently seeking rate relief for electric storm preparedness initiatives required in 2007.

F. Derivatives

None of the Company's gas or electric contracts are accounted for using the fair value method of accounting. All material contracts that meet the definition of derivative instruments are considered "normal purchases and sales" under SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities".

Deleted: possible

G. Revenue Recognition

The Company's revenues consist of base revenues, fuel adjustment charges, conservation charges and the pass-through of certain governmental imposed taxes based on revenues.

The FPSC approves base revenue rates that are intended to permit a specified rate of return on investment and limits the maximum amount of earnings of regulated operations. Fuel adjustment charges, conservation charges and the pass-through of certain governmental imposed taxes based on revenues are approved by the FPSC to allow recovery of fuel, conservation and revenue based taxes from the Company's customers. Any over or under-recovery of these expense items are deferred and subsequently refunded or collected in the following period.

Annually, any earnings in excess of this maximum amount permitted in the base rates are accrued for as an over-earnings liability and revenues are reduced an equivalent amount. The calculations supporting these liabilities are complex and involve a variety of projections and estimates before the ultimate settlement of such obligations. The FPSC determines the disposition of any over-earnings with alternatives that include refunding to customers, funding storm damage or environmental reserves, or reducing any depreciation reserve deficiency.

The Company bills utility customers on a monthly cycle basis; however, the billing cycle periods for most customers do not coincide with the accounting periods used for financial reporting. The Company accrues estimated revenue for gas and electric customers on usage not yet billed for the accounting period. Determination of unbilled revenue relies on the use of estimates, fuel purchases and historical data.

H. Allowance for Doubtful Accounts

The Company records an allowance for doubtful accounts based on historical information and trended current economic conditions. The following is a summary of the activity in Allowance for Doubtful Accounts for the years ending December 31:

	Allowance for Doubtful Accounts			
	Balance at Beginning of Year	Write-offs	Provisions to Bad Debt Expense	Balance at End of Year
2004	$ 180,000	320,000	409,000	$ 269,000
2005	$ 269,000	292,000	295,000	$ 272,000
2006	$ 272,000	35[illegible],000	5[illegible],000	$ 429,000

Deleted: 4

Deleted: 11

I. Utility Plant and Depreciation

Utility plant is stated at original cost. The propane gas utility plant that has been acquired in acquisitions was stated at fair market value when acquired. Additions to utility plant include contracted services, direct labor, transportation and materials for additions. Units of property are removed from utility plant when retired. Maintenance and repairs of property and replacement and renewal of items determined not to be units of property are charged to operating expenses. Substantially all of the utility plant and the shares of Flo-Gas Corporation collateralize the Company's first mortgage bonds.

Utility Plant
(Dollars in thousands)

Plant Classification	Annual Composite Depreciation Rate	2006	2005
Land		$ 1,130	$ 1,124
Buildings	2.0% to 4.9%	6,991	6,862
Distribution	2.0% to 8.6%	158,010	147,580
Transmission	2.2% to 3.8%	6,878	6,799
Equipment	2.0% to 20.0%	12,700	11,534
Furniture and Fixtures	4.8% to 20.0%	392	369
Work-in-Progress		2,867	5,010
		$ 188,968	$ 179,278

Depreciation for the Company's regulated segments is computed using the composite straight-line method at rates prescribed by the FPSC for financial accounting purposes. Propane gas depreciation is computed using a composite straight-line method at an average rate based on estimated average life of approximately 20-30 years. Such rates are based on estimated service lives of the various classes of property. Depreciation provisions on average depreciable property approximate 3.9% in 2006, 3.9% in 2005 and 3.6% in 2004.

J. Impact of Recent Accounting Standards

Financial Accounting Standard Board Interpretation No. 48

In June 2006, the FASB issued Interpretation No. 48, Accounting for Uncertainty in Income Taxes (FIN 48). The interpretation clarifies the accounting for uncertainty in income taxes recognized in an entity's financial statements in accordance with SFAS No. 109, Accounting for Income Taxes. The interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 also provides guidance on de-recognition, measurement, classification, interest and penalties, accounting in interim periods, disclosure and transition. This interpretation is effective for calendar years beginning January 1, 2007.

We have performed an analysis of tax positions taken and expected to be taken on the tax returns and assessed the technical merits of each tax position by relying on legislation, statutes, common legislative intent, regulations, rulings and case law and determined that the Company has no material uncertain tax positions. Additionally, the IRS concluded an audit of the 2002 and 2003 tax years in September of 2005.

In February of 2007, the IRS informed us that it selected our 2003 and 2004 tax years for examination. As our tax positions have remained consistent with those from the previously audited tax years, we are not expecting any material adverse findings as the result of the impending IRS audit.

Based on the aforementioned, we believe that the adoption of FASB Interpretation No. 48 will not have a material impact on our financial condition or results of operations.

Financial Accounting Standard No. 157

In September 2006, the FASB issued Statement No. 157, "Fair Value Measurements". This Statement clarifies fair value as the market value received to sell an asset or paid to transfer a liability, that is, the exit value, and applies to any assets or liabilities that require recurring determination of fair value. The measurement includes any applicable risk factors and does not include any adjustment for volume. This Statement is effective for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods within. The Company expects to adopt SFAS No. 157 effective January 1, 2008. The Company does not believe adoption of this Statement will have a material impact on our financial condition or results of operation.

Financial Accounting Standard No. 158

In September 2006, the FASB issued Statement No. 158, "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans". Statement 158 requires the Company to show the funded status of its pension and retiree health care plans as a prepaid asset or accrued liability, and to show the net deferred and unrecognized gains and losses related to the retirement plans, net of tax, as part of accumulated other comprehensive income in shareholders' equity. Previously, the net deferred and unrecognized gains and losses were netted in the prepaid asset or accrued liability recorded for the retirement plans. The Company adopted the recognition provisions of Statement 158, as required, at December 31, 2006.

The Company uses December 31 as the measurement date to measure the assets and obligations of its retirement plans. Statement 158 will also require the Company to use December 31 as the measurement date no later than fiscal years ending after December 15, 2008. The Company currently uses this date as the measurement date, and has used it for all periods presented.

The actuarial valuation of the retirement plan obligations has been completed and the recognition provisions of Statement 158 at December 31, 2006 resulted in an additional liability for retirement plans. The tax on the non-regulated portion of this liability has been recorded as a deferred income tax asset. As an offset, the regulatory portion of this liability has been deferred as a regulatory asset-retirement plans to be recovered in future rate proceedings and the remaining expense from recording the liability has been included in other comprehensive income. The fair value of retirement plan assets and obligations are subject to change based on market fluctuations. The table below summarizes the effects to our financial statements.

FASB 158 Implementation Summary
(Dollars in thousands)

	December 31, 2006		
	Before Application of SFAS 158	Adjustment	After Application of SFAS 158
Assets:			
Other regulatory assets- retirement plans	$ -	$829	$829
Liabilities and Equity:			
Accumulated other comprehensive income/(loss)	-	(146)	(146)
Other accruals and payables	2,034	151	2,185
Long term medical and pension reserve	3,819	912	4,731
Deferred income taxes	16,224	(88)	16,136

Staff Accounting Bulletin No. 108

In September 2006, the SEC issued Staff Accounting Bulletin (SAB) No. 108 "Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements". SAB 108 requires that public companies utilize a "dual-approach" to assessing the quantitative effects of financial misstatements. This dual approach includes an assessment from both an income statement and a balance sheet focus. The guidance in SAB 108 must be applied to annual financial statements for fiscal years ending after November 15, 2006. The Company has adopted SAB No.108 and there has not been any impact on our consolidated financial position or results of operations as the result of this adoption.

2. **Goodwill and Intangible Assets**

In accordance with SFAS No. 142, "Goodwill and Other Intangible Assets", the Company does not amortize goodwill or intangibles with indefinite lives. The Company periodically tests the applicable reporting segments, natural gas and propane gas, for

Deleted: The Company uses September 30 as the measurement date to measure the assets and obligations of its retirement plans. Statement 158 will also require the Company to use December 31 as the measurement date no later than fiscal years ending after December 15, 2008. The Company expects to make this change in 2008.¶

Deleted: is

Deleted: ***Financial Accounting Standard No. 154¶***
In May 2005, the FASB issued Statement No. 154, "Accounting Changes and Error Corrections". This Statement applies to all voluntary changes in accounting principle and requires retrospective application to prior period financial statements of changes in accounting principle, unless it is impracticable to determine either the period-specific effects or the cumulative effects of the change. This Statement is effective for accounting changes and corrections of errors made in fiscal years beginning after December 15, 2005. We adopted SFAS No. 154 as of January 1, 2006; however, we did not have any impact to our financial statements in 2006 as a result of this adoption.¶

Deleted: ***Financial Accounting Standard Board Interpretation No. 47¶***
In March 2005, the FASB issued Interpretation No. 47, "An Interpretation of FASB Statement No. 143". SFAS No. 143, "Accounting for Asset Retirement Obligations", requires that the fair value of an asset retirement obligation be recognized at the time those obligations are incurred. Upon initial recognition of a legal liability, costs are capitalized as part of the related long-lived asset and allocated to expense over the useful life of the asset. SFAS No. 143 also requires that components of previously recorded depreciation related to the cost of removal of assets upon retirement, whether legal asset retirement obligations or not, be removed from a company's accumulated depreciation reserve. The Company adopted the provisions of the Statement as of January 1, 2003, as prescribed by the FPSC. Under FPSC guidelines, the estimated cost of removal expenses for normal retirements related to regulated fixed assets were reserved through the depreciation expense and accumulated reserves. This w[... [2]

impairment. In the event a segment becomes impaired, the Company would write down the associated goodwill and intangible assets to fair value. The impairment tests performed in 2005 and 2006 showed no impairment for either reporting segment.

Goodwill associated with the Company's acquisitions is identified as a separate line item on the consolidated balance sheet and consists of $500,000 in the natural gas segment and $1.9 million in the propane gas segment.

Intangible assets associated with the Company's acquisitions and software have been identified as a separate line item on the balance sheet. Summaries of those intangible assets at December 31 are as follows:

Intangible Assets
(Dollars in thousands)

		2006	2005
Customer distribution rights	(Indefinite life)	$ 1,900	$ 1,900
Customer relationships	(Indefinite life)	900	900
Software	(Five to nine year life)	3,122	2,971
Non-compete agreement	(Five year life)	-	35
Accumulated amortization		(1,517)	(1,415)
Total intangible assets, net of amortization		$4,405	$ 4,391

The 2006 amortization expense of computer software is approximately $300,000. The Company expects the amortization expense of computer software to be approximately $300,000 annually over the next five years, with the current level of software investment. The non-compete agreements expired in 2006.

3. *Over-earnings-Natural Gas*
The FPSC approves rates that are intended to permit a specified rate of return on investment and limits the maximum amount of earnings of regulated operations. The Company has agreed with the FPSC staff to limit the earned return on equity for regulated natural gas and electric operations.

The Company estimated 2005 over-earnings for regulated natural gas operations of $700,000. The 2005 over-earnings estimate was revised in 2006 to be $650,000. The Company estimated 2006 over-earnings for regulated natural gas operations of $230,000. These liabilities have been included in the over-earnings liability on the Company's balance sheet. The calculations supporting these liabilities are complex and involve a variety of projections and estimates before the ultimate settlement of such obligations.

The Company feels the estimates of the 2005 and 2006 over-earnings liabilities are accurate, but the amounts could change upon the FPSC finalization and review of earnings expected in 2007 and 2008. The FPSC determines the disposition of over-earnings with alternatives that include refunding to customers, increasing storm damage or environmental reserves or reducing any depreciation reserve deficiency.

Deleted: it

Deleted: funding

4. *Storm Reserves*
As of December 31, 2006, the electric segment storm reserve was approximately $1.6 million. Since the last order on the 1999 disposition of electric over-earnings, the FPSC has allowed the Company the flexibility of automatically applying the electric over-earnings to the storm

damage reserves each year since 1999 and allowing additional storm damage accruals up to a cap of $2.9 million. In 2006, 2005 and 2004 there were no electric over-earnings and accordingly no additional over-earnings amounts were added to the storm damage reserves.

In October 2005, the FPSC approved recovery of 2004 natural gas segment storm costs plus interest and revenue taxes over a 30-month period beginning November 2005. The Company deferred storm costs as a regulatory asset due from customers on the balance sheet. As of December 31, 2006, the unrecovered amount of natural gas regulatory asset relating to storm costs was $270,000.

The Company has requested that the FPSC allow 2005 over-earnings in natural gas to be used to recover the regulatory asset -storm and discontinue this storm surcharge. As part of this same request, the Company has also asked the FPSC to allow any excess over-earnings amount to provide additional funds for the "regulatory liability- storm reserve" for natural gas. We expect the FPSC to rule on this request during 2007.

In 2005, the FPSC approved applying 2002 natural gas over-earnings of $118,000 to the storm reserve to cover future storm costs.

5. Income Taxes

Deferred income taxes are provided on all significant temporary differences between the financial statements and tax basis of assets and liabilities at currently enacted tax rates. Investment tax credits have been deferred and are amortized based upon the average useful life of the related property in accordance with the rate treatment.

A. Income Taxes related to Deferred Gain on Water Sale

On March 27, 2003, the Company sold substantially all of its assets of the water division to the City of Fernandina Beach. The sale was made pursuant to a "threat of condemnation" during the fourth quarter of 2002. For tax purposes the Company elected to defer the gain on the sale of the assets pursuant to Code Section 1033 of the Internal Revenue Code of 1986 (IRC). Section 1033 allows non-recognition of gain if property is disposed as a result of threat of condemnation and property that is similar or related in service or use is purchased to replace the disposed property. To qualify, the replacement property must be purchased within the replacement period, which begins on the earlier of date of disposition (March 27, 2003) or date of threat of condemnation (December 31, 2002) and ending two years after the close of the year of sale (December 31, 2005). For real property, the replacement period is extended to three years (December 31, 2006).

The Company purchased property that is similar or related in service or use within the replacement periods with the exception of the intangible assets. During the IRS audit in 2005, the IRS disallowed a portion, approximately $900,000 of the deferral relating to the intangible assets, since replacement was no longer expected.

A $2.9 million estimated tax payment was made in 2003 related to the gain on the sale of the water division. It was subsequently determined that the income tax would be deferred. The Company applied for a refund and received $3.9 million in July 2004, which included other estimated tax overpayments.

B. Provision for Income Taxes

The provision (benefit) for income taxes consists of the following:

(Dollars in thousands)	Years ended December 31, 2006	2005	2004
Current payable			
Federal	$ 3,652	$ 2,150	$ (566)
State	664	370	(96)
Current – net	4,316	2,520	(662)
Deferred			
Federal	(1,674)	(143)	2,003
State	(272)	(9)	358
Deferred – net	(1,946)	(152)	2,361
Investment tax credit	(75)	(81)	(84)
Total income taxes	$ 2,295	$ 2,287	$ 1,615

C. Effective Tax Rate Reconciliation

The difference between the effective income tax rate and the statutory federal income tax rate applied to pretax income is of continuing operations accounted for as follows:

(Dollars in thousands)	Years ended December 31, 2006	2005	2004
Federal income tax at statutory rate (34%)	$ 2,230	$ 2,222	$ 1,771
State income tax, net of federal benefit (5.5%)	238	237	189
Investment tax credit	(75)	(81)	(84)
Tax exempt interest	(85)	(71)	(94)
Other	(13)	(20)	(167)
Total provision for income taxes	$ 2,295	$ 2,287	$ 1,615

D. Deferred Income Taxes

Temporary timing differences which produce deferred income taxes in the accompanying consolidated balance sheets are as follows:

(Dollars in thousands)	Years ended December 31, 2006	2005
Deferred tax assets:		
Environmental	$ 2,063	$ 1,932
Self insurance	774	731
Storm reserve liability	509	408
Vacation pay	357	320
Other deferred credits	15	61
Allowance for uncollectible accounts receivable	162	103
General liability	68	111
Rate refund	331	263
Pension	698	286
Under/over-recovery of conservation costs	134	9

Other	37	37
Total deferred tax assets	5,148	4,261
Deferred tax liabilities:		
Utility plant related	20,274	20,319
Deductible intangibles	696	577
Under-recovery of fuel costs	643	1,704
Rate case expense	138	204
Loss on reacquired debt	79	85
Other	33	6
Total deferred tax liabilities	21,863	22,895
Net deferred income taxes liabilities	$ 16,715	$ 18,634

Deferred tax liabilities included in the consolidated balance sheets are as follows:

(Dollars in thousands)	2006	2005
Deferred income tax – current	$ 579	$ 1,066
Deferred income tax – long term	16,136	17,568
Net deferred income tax liabilities	$ 16,715	$ 18,634

E. IRS Audit

The IRS has informed us that it has selected our 2003 and 2004 tax returns for examination. At this time management is unable to estimate the effects, if any, that could result from the final resolution of this IRS audit. The Company expects the audit will be completed before the end of 2007.

Deleted: It is our understanding that the 2003 tax return is included in the audit due to a net operating loss carry back to that year. The Company may incur related interest expense and income tax liabilities as a result of this audit.

The IRS completed an audit in 2005 of the Company's 2002 and 2003 federal income tax returns. The audit resulted in a current income tax payable amount of $361,000 due to adjustments to depreciation, reserve accounts and recognition of a portion of the water sale gain that was previously deferred. This amount was partially offset by $285,000 in deferred tax liabilities previously established.

6. Capitalization

A. Stock Dividend

On July 25, 2005 a three-for-two stock split in the form of a stock dividend was issued to the shareholders of record on July 15, 2005. All common share information has been restated to reflect the stock split for all periods presented.

B. Common Shares Reserved

The Company has 3,833,352 authorized but unissued shares and 160,349 treasury shares as of December 31, 2006. The Company has reserved the following common shares for issuance as of December 31, 2006:

Dividend Reinvestment Plan	54,071
Employee Stock Purchase Plan	52,035
Board Compensation Plan	20,714

Deleted: Common Stock

Deleted: 3,833,352

C. Preferred Stock

The Company has 6,000 shares of 4 ¾% Series A preferred stock $100 par value authorized for issuance of which 6,000 were issued and outstanding at December 31, 2006. The Company also has 5,000, 4 ¾% Series B preferred stock $100 par value authorized for issuance none of which has been issued.

The Company also has 32,500, $1.12 Convertible Preference stock, $20 par value and $22 redemption price, authorized for issuance none of which has been issued.

D. Dividend Restriction

The Company's Fifteenth Supplemental Indenture of Mortgage and Deed of Trust restricts the amount that is available for cash dividends. At December 31, 2006, approximately $9 million of retained earnings were free of such restriction and therefore available for the payment of dividends. The line of credit agreement contains covenants that, if violated, could restrict or prevent the payment of dividends. At December 31, 2006 the Company is not in violation of these covenants.

E. Treasury Shares

In prior years, common shares resulting from stock dividends have been allocated to common shares held as treasury shares. Treasury shares are not eligible to receive such allocations. Some of these treasury shares were subsequently reissued, resulting in an overstatement of additional paid-in capital. Accordingly, the Company has restated all periods presented to reflect the correct number of treasury shares and the value of treasury shares and additional paid-in capital at each year-end. As the adjustment is a reallocation of amounts between treasury stock and additional paid-in capital, there is no effect on net income, earnings per common share or total stockholders' equity in any period presented.

Deleted: C

F. Employee Stock Purchase Plan

The Company's Employee Stock Purchase Plan offers common stock at a discount to qualified employees.

Deleted: . The following table shows the number of shares issued under the Plan and the total aggregate consideration received:¶
¶
Year ... [3]

G. Dividend Reinvestment Plan

The Company's Dividend Reinvestment Plan is offered to all Company shareholders and allows the shareholder to reinvest dividends received and purchase additional shares without a fee.

Deleted: The following table shows the number of shares issued under the Plan and the total aggregate consideration received:¶
¶
Year ... [4]

7. Long-term Debt

The Company issued its Fourteenth Series of FPU's First Mortgage Bond on September 27, 2001 in the aggregate principal amount of $15 million as security for the 6.85% Secured Insured Quarterly Notes, due October 1, 2031 (IQ Notes). Interest on the pledged bond accrues at the annual rate of 6.85% payable quarterly in arrears on January 1, April 1, July 1 and October 1 of each year beginning January 1, 2002.

The Company issued $14 million of Palm Beach County municipal bonds (Industrial Development Revenue Bonds) on November 14, 2001 to finance development in the area. The interest rate on the thirty-year callable bonds is 4.90%. The bond proceeds were restricted and held in trust until construction expenditures were actually incurred by the

Company. In 2002 the remaining $8 million was drawn from the restricted funds held by the trustee.

In 1992, the Company issued its First Mortgage Bond 9.08% Series in the amount of $8 million. The thirty-year bond is due in June 2022.

The Company issued two of its Twelfth Series First Mortgage bond series on May 1, 1988; the 9.57% Series due 2018 in the amount of $10 million and 10.03% Series due 2018 in the amount of $5.5 million. These two issuances require sinking fund payments of $909,000 and $500,000 respectively, beginning in 2008.

Long-term debt on the balance sheet has been reduced for unamortized debt discount. The unamortized debt discount at December 31 included in long-term debt on the balance sheet is $1.8 million in 2006 and $1.9 million in 2005.

Annual Maturities of Long-Term Debt
(Dollars in thousands)

	Total	2007	2008	2009	2010	2011	Thereafter
Long-term Debt	$52,500	-	$1,409	$1,409	$1,409	$1,409	$ 46,864

Deleted: 50
Deleted: 702
Deleted: $(82)
Deleted: 1,327
Deleted: 1,327
Deleted: 1,327
Deleted: 1,327
Deleted: 45,476

8. Notes Payable

In 2004, FPU entered into an amended and restated loan agreement that allows the Company to increase the line of credit upon 30 days notice by the Company to a maximum of $20 million. In 2006 the agreement was renewed with an expiration date of July 1, 2008. We have not exercised our option to increase the line of credit limit which is currently at $12 million with an outstanding balance of $3.5 million and a remaining amount available of $8.5 million. The Company reserves $1 million of the line of credit to cover expenses for any major storm repairs in its Northwest Florida division. An additional $250,000 of the line of credit is reserved for a 'letter of credit' insuring our propane facilities.

The average interest rates for the line of credit were as follows as of December 31:

Year	Rate
2006	6.2%
2005	5.3%
2004	3.3%

9. Fair Value of Financial Instruments

The carrying amounts reported in the balance sheet for investments held in escrow for environmental costs, notes payable, taxes accrued and other accrued liabilities approximate fair value. The fair value of long-term debt excluding the unamortized debt discount is estimated by discounting the future cash flows of each issuance at rates currently offered to the Company for similar debt instruments of comparable maturities. The values at December 31 are shown below.

Deleted: since the older bonds contain 'make whole' provisions that negates any fluctuation in interest rates

2006	2005

	Carrying Amounts	Approximate Fair Value	Carrying Amounts	Approximate Fair Value
Long-term debt	$ 52,500,000	$63,000,000	$52,500,000	$ 63,000,000

10. Contingencies

Environmental

The Company is subject to federal and state legislation with respect to soil, groundwater and employee health and safety matters and to environmental regulations issued by the Florida Department of Environmental Protection (FDEP), the United States Environmental Protection Agency (EPA) and other federal and state agencies. Except as discussed below, the Company does not expect to incur material future expenditures for compliance with existing environmental laws and regulations.

(Dollars in thousands)

Site	Range From	Range To
West Palm Beach	$ 4,801	$ 18,027
Sanford	710	710
Pensacola and Other	110	110
Total	$ 5,621	$ 18,847

Deleted: 710
Deleted: 710
Deleted: 85
Deleted: 85
Deleted: 596
Deleted: 822

The Company currently has $13.8 million reserved as an environmental liability. The FPSC approved up to $14 million for total recovery from insurance and rates based on the original 2005 projections as a basis for rate recovery. The Company has recovered a total of $5.5 million from insurance and rate recovery, net of costs incurred to date. The remaining balance of $8.3 million is recorded as a regulatory asset. On October 18, 2004 the FPSC approved recovery of $9.1 million for environmental liabilities (the remaining amount to be recovered is $8.3 million and is included on the balance sheet as "Other regulatory assets – environmental"). The amortization of this recovery and reduction to the regulatory asset began on January 1, 2005. The majority of environmental cash expenditures are expected to be incurred before 2010, but may continue for another 10 years.

West Palm Beach Site

The Company is currently evaluating remedial options to respond to environmental impacts to soil and groundwater at and in the immediate vicinity of a parcel of property owned by it in West Palm Beach, Florida upon which the Company previously operated a gasification plant. The Company entered into a Consent Order with the FDEP effective April 8, 1991, that requires the Company to delineate the extent of soil and groundwater impacts associated with the prior operation of the gasification plant and to remediate such soil and groundwater impacts, if necessary. The Company completed the delineation of soil and groundwater impacts at the site in October 2006. An engineering consultant was retained to perform a feasibility study to evaluate appropriate remedies for the site. The feasibility study was transmitted to FDEP on November 30, 2006.

The feasibility study evaluated a wide range of remedial alternatives based on criteria provided by applicable laws and regulations. The total costs for the remedies evaluated in the feasibility study ranged from a low of $2.8 million to a high of $54.6 million. Based on the likely acceptability of proven remedial

technologies described in the feasibility study and implemented at similar sites, consulting/remediation costs to address the impacts now characterized at the West Palm Beach site are projected to range from $4.6 million to $17.9 million. This range of costs covers such remedies as in situ solidification for deeper soil impacts, excavation of superficial soil impacts, installation of a barrier wall with a permeable biotreatment zone (PBZ), monitored natural attenuation of dissolved impacts in groundwater (MNA) or some combination of these remedies. The feasibility study proposed a remedy of superficial soil excavation, and installation of a hanging barrier wall with PBZ and MNA, the cost of which is projected to range from $4.6 million to $9.9 million.

Prior to FDEP's approval of a final remedy for the site, the Company is unable to determine, to a reasonable degree of certainty, the complete extent or cost of remedial action that may be required. As of December 31, 2006, and subject to the limitations described above, remediation costs (including attorneys' fees and costs) for this site are projected to range from approximately $4.8 million to $18 million.

Sanford Site

The Company owns a parcel of property located in Sanford, Florida, upon which a gasification plant was operated prior to its acquisition of the property. Following discovery of soil and groundwater impacts on the property, the Company has participated with four former owners and operators of the gasification plant in the funding of numerous investigations of the extent of the impacts and the identification of an appropriate remedy. On or about March 25, 1998, the Company executed an Administrative Order on Consent (AOC) with the four former owners and operators (collectively, the Group) and the EPA that obligated the Group to implement a Remedial Investigation/Feasibility Study (RI/FS) and to pay EPA's past and future oversight costs. The Group also entered into a Participation Agreement and an Escrow Agreement on or about April 13, 1998 (WFS Participation Agreement). Work under the RI/FS AOC and RI/FS Participation Agreement is now complete and the Company has no further obligations under either document.

In late September 2006, EPA sent a Special Notice Letter to the Company, notifying the Company of EPA's selection of a final remedy for OU1 (soils), OU2 (groundwater), and OU3 (sediments), and giving the Company and the other Group members sixty (60) days within which to submit a "good faith offer" to EPA to provide for implementation of the selected remedies. The Special Notice Letter included an Amended Record of Decision (ROD) for OU1 (the ROD for OU1 was amended to account for a significant increase in the volume of off-site soil impacts and a change in the selected remedy), the original ROD for OU2, and a ROD for OU3. The total estimated remediation costs for the Sanford Gasification Plant Site are now projected to be $12.5 million. On November 30, 2006, the Company and the Group submitted to EPA a good faith offer to implement the approved remedies as set forth in the RODs for OU1 through OU3.

In January, the Company along with the other members of the Group signed a Third Participation Agreement, which provides for funding the remediation work specified in the RODs for OU1 through OU3 and supercedes and replaces the Second Participation Agreement. The Company's share of remediation costs under the Third Participation Agreement is set at 5% of a maximum of $13 million, or

$650,000. At present, it is not anticipated that the total cost of remediation will exceed $13 million. If it does, the Group members have agreed to negotiate in good faith to allocate the excess costs at such time that it reasonably appears that the total remediation costs will exceed $13 million. In any such event, the Company does not expect our share of such additional costs to be greater than 5%; and its share of such additional costs may be less than 5%.

The Company's future legal costs and expenses and its share future remediation expenses for this site are currently projected to be approximately $710,000.

Deleted: 710,000

Pensacola Site
The Company is the prior owner/operator of the former Pensacola gasification plant, located in Pensacola, Florida. Following notification on October 5, 1990 that FDEP had determined that the Company was one of several responsible parties for any environmental impacts associated with the former gasification plant site, the Company entered into cost sharing agreements with three other responsible parties providing for the funding of certain contamination assessment activities at the site.

Following field investigations performed on behalf of the responsible parties, on July 16, 1997, FDEP approved a final remedy for the site that provides for annual sampling of selected monitoring wells. Such annual sampling has been undertaken at the site since 1998. The Company's share of these costs is less than $2,000 annually or a total of $27,000.

In March 1999, EPA requested site access in order to undertake an Expanded Site Inspection (ESI). The ESI was completed by EPA's contractor in 1999 and an ESI Report was transmitted to the Company in January 2000. The ESI Report recommends additional work at the site. The responsible parties met with FDEP on February 7, 2000 to discuss EPA's plans for the site. In February 2000, EPA indicated preliminarily that it will defer management of the site to FDEP; however, as of December 31, 2006, the Company has not received any written confirmation from EPA or FDEP regarding this matter. Prior to receipt of EPA's written determination regarding site management, the Company is unable to determine whether additional field work or site remediation will be required by EPA and, if so, the scope or costs of such work.

Key West Site
From 1927 to 1938, the Company owned and operated a gasification plant in Key West, Florida. The plant discontinued operations in the late 1940s; the property on which the plant was located is currently used for a propane gas distribution business. In March 1993, a Preliminary Contamination Assessment Report (PCAR) was prepared by a consultant jointly retained by the Company and the current site owner and was delivered to FDEP. The PCAR reported that very limited soil and groundwater impacts were present at the site. By letter dated December 20, 1993, FDEP notified the Company that the site did not warrant further "CERCLA consideration and a Site Evaluation Accomplished disposition is recommended." FDEP then referred the matter to its Marathon office for consideration of whether additional work would be required by FDEP's district office under Florida law. As of December 31, 2006, the Company has received no further communication from FDEP with respect to the site. At this time, we are unable to determine whether additional fieldwork will be required by FDEP and, if so, the scope or costs of such

work. In 1999, the Company received an estimate from its consultant that additional costs to assess and remediate the reported impacts would be approximately $166,000. Assuming the current owner shared in such costs according to the allocation agreed upon by the parties for the PCAR, the Company's share would be approximately $83,000.

11. Commitments

A. General

To ensure a reliable supply of electric and natural gas at competitive prices, the Company has entered into long-term purchase and transportation contracts with various suppliers and producers, which expire at various dates through 2015. Purchase prices under these contracts are determined by formulas either based on market prices or at fixed prices. At December 31, 2006, the Company has firm purchase and transportation commitments adequate to supply its expected future sales requirements. The Company is committed to pay demand or similar fixed charges of approximately $37.8 million during 2007 related to gas purchase agreements. Substantially all costs incurred under the electric and gas purchase agreements are recoverable from customers through fuel adjustment clause mechanisms.

B. Operating Leases

The Company's total operating lease obligation is $352,000. The Company is leasing property from the City of Fernandina Beach in our Northeast division. The Company is in the process of renegotiating the terms of this lease and it may be able to terminate this lease at an earlier date. The Company leases an appliance showroom in the same division for approximately $35,000 annually. The Company also has other operating lease agreements with various terms and expiration dates. The following table shows the approximate future obligations under noncancelable agreements.

	2007	2008	2009	2010	2011
Operating Lease Obligations	$151,000	$116,000	$47,000	$38,000	-

12. Employee Benefit Plans

The actuarial valuation of the retirement plan obligations has been completed and the recognition provisions of Statement 158 at December 31, 2006 resulted in an additional liability for retirement plans, pension plan and retirees medical plan. See Footnote 1J, Impact of Recent Accounting Standards, Financial Accounting Standard 158 for a summary of the impact to our financial statements.

A. Pension Plan

The Company sponsors a qualified defined benefit pension plan for non-union employees that were hired before January 1, 2005 and for unionized employees that work under one of the six Company union contracts and were hired before their respective contract dates in 2005.

Deleted: that approved this change in 2005. Our six union contracts have accepted this change for their new members hired after

The following tables provide a reconciliation of the changes in the plan's benefit obligations and fair value of assets over the 3-year period ending December 31, 2006 and a statement of the funded status as of December 31, of all three years:

7274

61

Benefit Obligations and Funded Status

		Years Ended December 31,		
		2006	2005	2004

	(d)	Other	5%-15%	2%	1%	1%
	(e)	Total		100%	100%	100%

Expected Return on Plan Assets

The expected rate of return on plan assets is 8.5%. The Company expects 8.5% to fall within the 40 to 50 percentile range of returns on investment portfolios with asset diversification similar to that of the Pension Plan's target asset allocation.

Investment Policy and Strategy

The Company has established and maintains an investment policy designed to achieve a long-term rate of return, including investment income and appreciation, sufficient to meet the actuarial requirements of the Pension Plan. The Company seeks to accomplish its return objectives by investing in a diversified portfolio of equity, fixed income and cash securities seeking a balance of growth and stability as well as an adequate level of liquidity for pension distributions as they fall due. Plan assets are constrained such that no more than 10% of the portfolio will be invested in any one issue.

Voluntary Prescription Drug Coverage

Legislation enacted in December 2003 provides for the addition of voluntary prescription drug coverage under Medicare starting in 2006. The legislation also provides for a 28% tax-free subsidy for each qualified covered retiree's drug cost between certain thresholds if the employer's coverage is at least actuarially equivalent to the standard Medicare drug benefit. Based on the final regulations issued by the Centers for Medicare and Medicaid Services on January 21, 2005, we determined our prescription drug coverage of the Postretirement Medical Benefits plan to be actuarially equivalent to Medicare Part D.

Discount Rate Assumption

The discount rate assumption used to determine the postretirement benefit obligations is based on current yield rates in the double A bond market. The current year's discount rate was selected using a method that matches projected payouts from the plan with a zero-coupon double A bond yield curve. This yield curve was constructed from the underlying bond price and yield data collected as of the plan's measurement date and is represented by a series of annualized, individual discount rates with durations ranging from six months to thirty years. Each discount rate in the curve was derived from an equal weighting of the double A or higher bond universe, apportioned into distinct maturity groups. These individual discount rates are then converted into a single equivalent discount rate, which is then used for FAS discount purposes. To assure that the resulting rates can be achieved by a postretirement benefit plan, only bonds that satisfy certain criteria and are expected to remain available through the period of maturity of the plan benefits are used to develop the discount rate. Prior years' discount rate assumptions were set based on investment yields available on double A, long-term corporate bonds.

Actuarial Equivalent

In determining "Actuarial Equivalence," our plan's actuary, Aon Consulting, proprietary prescription drug pricing tool, Aon Rx, was used. This tool allowed us to determine the estimated Per Member Per Month (PMPM) prescription drug cost

for both the Company plan and the Medicare plan. The two PMPM's were adjusted for monthly retiree contributions. We assumed that 60% of the monthly combined medical and prescription drug retiree contribution for the Company plan applies towards prescription drugs.

Deleted: Because the subsidy is the same regardless of the cost sharing structure unless the plan is not "Actuarial Equivalent", in general a plan that has higher cost sharing would reduce their annual cost as a percentage greater than a plan would that has lower cost sharing.

C. Health Plan

In December 2003, the Company became fully insured for its employee and retiree's medical insurance. Net health care benefits paid by the Company for active employees were approximately $1.7 million in 2006, $1.6 million in 2005 and $1.5 million in 2004, excluding administrative and stop-loss insurance.

D. 401K Plan

The Company has discontinued eligibility to the defined benefit pension plan for all new hires, and replaced it with a new 401K match.

For new hires not eligible for the defined benefit pension plan, we established an employer match to the employee's contribution to their 401K plans. It provided for a company match of 50% for each dollar contributed by the employee, up to 6% of their salary, for a Company contribution of up to 3%. Beginning in 2007, for non-union employees the plan was enhanced to provide a company match of 100% for the first 2% of an employee's contribution, and a match of 50% for the next 4% of an employee's contribution, for a total company match of up to 4%. This new enhanced match will be negotiated with our six union contracts during 2007, to be effective on their respective contract date within 2007. The employees are eligible for the company match after six months of continuous service, with vesting of 100% after three years of continuous service. The expenses incurred in 2005 and 2006 relating to the Company's 401K plan are not material.

E. Employee Stock Purchase Plan

The Company offers an employee stock purchase plan to substantially all of its employees. The plan offers a 15% discount on the Company's stock at market price fixed six months prior to the date of purchase. The recorded stock compensation expense relating to the Company's employee stock purchase plan is not material.

13. Segment Information

The Company is organized into two regulated business segments: natural gas and electric, and one non-regulated business segment, propane gas. There are no material inter-segment sales or transfers.

Identifiable assets are those assets used in the Company's operations in each business segment. Common assets are principally cash and overnight investments, deferred tax assets and common plant.

Business segment information for 2006, 2005 and 2004 is summarized as follows:

(Dollars in thousands)	2006	2005	2004
Revenues			
Natural gas	$ 70,981	$ 69,094	$ 55,962
Electric	48,527	47,450	42,910

Propane gas	14,727	13,479	11,167
Consolidated	$ 134,235	$ 130,023	$ 110,039

14. Quarterly Financial Data (Unaudited)

The quarterly financial data presented below reflects the influence of seasonal weather conditions, the timing of rate increases and the migration of winter residents and tourists to Central and South Florida during the winter season. Significant increases in the fourth quarter of 2005 expenses relate to the performance of previously delayed expenditures from previous quarters.

(Dollars in thousands, except per share amounts):	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
2006				
Revenues	$ 43,348	$ 29,878	$ 29,415	$ 31,594
Gross profit	$ 14,135	$ 11,402	$ 10,867	$ 11,860
Operating income	$ 4,528	$ 2,065	$ 1,488	$ 2,248
Earnings before income taxes	$ 3,507	$ 1,162	$ 609	$ 1,281

Net Income	$ 2,221	$ 738	$ 475	$ 830
Earnings per common share (basic and diluted):				
Continuing operations	$ 0.37	$ 0.12	$ 0.08	$ 0.14
2005				
Revenues	$ 35,438	$ 28,329	$ 29,190	$ 37,066
Gross profit	$ 13,619	$ 10,963	$ 10,374	$ 12,263
Operating income	$ 4,684	$ 2,215	$ 1,578	$ 2,160
Earnings before income taxes	$ 3,711	$ 1,205	$ 573	$ 1,046
Net Income	$ 2,353	$ 851	$ 260	$ 784

Continuing operations	$ 0.40	$ 0.14	$ 0.04	$ 0.13

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Directors and Shareholders of FPU:

We have audited the accompanying consolidated balance sheets and statements of capitalization of Florida Public Utilities Company and its wholly-owned subsidiary, Flo-Gas Corporation as of December 31, 2006 and 2005 and the related consolidated statements of income, comprehensive income, common shareholders' equity and cash flows for each of the three years in the period ended December 31, 2006. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements and schedules, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Florida Public Utilities Company and its wholly-owned subsidiary, Flo-Gas Corporation at December 31, 2006 and 2005, and the results of its operation and its cash flows for each of the three years in the period ended December 31, 2006, in conformity with accounting principles generally accepted in the United States of America.

Item 9A. Controls and Procedures

Disclosure Controls and Procedures
Our management carried out an evaluation, under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, of the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act). Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that, as of December 31, 2006, our disclosure controls and procedures were effective, in that they provide reasonable assurance that information required to be disclosed by us in the reports that we file or submit under the Exchange Act are recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

Changes in Internal Control over Financial Reporting
No change in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) occurred during the fiscal quarter ended December 31, 2006 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Item 9B. Other Information

None

PART III

Item 10. Directors and Executive Officers of the Registrant

Information required by this item concerning directors and nominees of the Registrant will be included under the caption "Information About Nominees and Continuing Directors" in the Registrant's Proxy Statement for the 2007 Annual Meeting of Shareholders (the "2007 Proxy Statement") and is incorporated by reference herein. Information required by this item regarding the Audit Committee will be included under the caption "Board of Directors and Committees" in the 2007 Proxy Statement and is incorporated by reference herein. Information required by this Item regarding the Code of Ethics will be included under the caption "Code of Ethics" in the 2007 Proxy Statement and is incorporated by reference herein. Information required by this Item regarding compliance with Section 16(a) of the Exchange Act will be set forth in the 2007 Proxy Statement under "Section 16(a) Beneficial Ownership Reporting Compliance" and is incorporated by reference herein. Information required by this Item concerning executive officers is set out in Part I of this Form 10-K, above.

Item 11. Executive Compensation

Information required by this Item concerning executive compensation is included under the captions "Board of Directors and Committees", "Executive Compensation", and "Compensation Committee Interlocks and Inside Participation" in the 2007 Proxy Statement is incorporated by reference herein.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

Information required by this Item concerning the security ownership of certain of the Registrant's beneficial owners and management is included under the caption "Security Ownership of Management and Certain Beneficial Owners" in the 2007 Proxy Statement and is incorporated by reference herein. See Item 5 above for equity compensation plan information, which is incorporated by reference herein.

Item 13. Certain Relationships and Related Transactions

None.

Item 14. Principal Accountant Fees and Services

Information required by this Item is set forth in the Registrant's 2007 Proxy Statement under the caption "Principal Accountant Fees and Services" and is incorporated by reference herein.

PART IV

Item 15. Exhibits, Financial Statement Schedules

(a) The following documents are filed as part of this report:

(1) Financial Statements
The following consolidated financial statements of the Company are included herein and in the Registrant's 2006 Annual Report to Shareholders:

Consolidated Statements of Income
Consolidated Statements of Comprehensive Income
Consolidated Balance Sheets
Consolidated Statements of Capitalization
Consolidated Statements of Common Shareholders' Equity
Consolidated Statements of Cash Flows
Notes to Consolidated Financial Statements
Report of Independent Registered Public Accounting Firm

(2) Financial Statement Schedules
The following valuation and qualifying accounts table is included in Note 1.H. herein and in the Registrant's 2006 Annual Report to Shareholders:

Allowance for Doubtful Accounts

(3) Exhibits

3(i)	Amended Articles of Incorporation (Incorporated herein by reference as Exhibit 3(i) to FPU's quarterly report on Form 10-Q for the period ended June 30, 2002. SEC File No. 1-10608)
3(ii)	Amended By-Laws (Incorporated herein by reference as Exhibit 3(ii) to FPU's quarterly report on Form 10-Q for the period ended June 30, 2002. SEC File No. 1-10608)
4(a)	Indenture of Mortgage and Deed of Trust of FPU dated as of September 1, 1942 (Incorporated by reference herein to Exhibit 7-A to Registration No. 2-6087)
4(b)	Fourteenth Supplemental Indenture dated September 1, 2001. (Incorporated by reference to exhibit 4(b) on FPU's annual report on Form 10-K for the year ended December 31, 2001)
4(c)	Fifteenth Supplemental Indenture dated November 1, 2001. (Incorporated by reference to exhibit 4(c) on FPU's annual report on Form 10-K for the year ended December 31, 2001)

10(a)	First Amendment to Amended and Restated Loan Agreement and Promissory Note between FPU and Bank of America dated August 25, 2006. (Incorporated by reference to exhibit 10(2) on FPU's Form 10-Q for third quarter ending September 30, 2006, File No. 001-10608)
10(b)	Contract for the transportation of natural gas between FPU and the City of Lake Worth dated March 25, 1992 (Incorporated by reference to exhibit 10(f) on FPU's Form S-2 for July 1992, File No. 0-1055)
10(c)	Contract for the purchase of electric power between FPU and Jacksonville Electric Authority dated January 29, 1996. (Incorporated by reference to exhibit 10(h) on FPU's annual report on Form 10-K for the year ended December 31, 2000)
10(d)	Contract for the purchase of electric power between FPU and Gulf Power Company effective November 21, 1996. (Incorporated by reference to exhibit 10(i) on FPU's annual report on Form 10-K for the year ended December 31, 2000)
10(e)	Contract for the purchase of as-available capacity and energy between FPU and Container Corporation of America dated September 19, 1985 (Incorporated by reference to exhibit 10(i) on FPU's Form S-2 for July 1992, File No. 0-1055)
10(f)	Contract for the sale of electric service between FPU and Container Corporation of America dated August 26, 1982 (Incorporated by reference to exhibit 10(j) on FPU's Form S-2 for July 1992, File No. 0-1055)
10(g)	Contract for the sale of electric service between FPU and ITT Rayonier Inc. Dated April 1, 1982 (Incorporated by reference to exhibit 10(k) on FPU's Form S-2 for July 1992, File No. 0-1055)
10(h)	Form of Stock Purchase and Sale Agreement between FPU and three persons who, upon termination of two trusts, will become the record and beneficial owners of an aggregate of 313,554 common shares of the Registrant (Incorporated by reference to exhibit 10(p) on FPU's Form S-2 for July 1992, File No. 0-1055)
10(i)	Contract for the sale of certain assets comprising FPU's water utility business to the City of Fernandina Beach dated December 3, 2002. (Incorporated by reference to exhibit 10(o) on FPU's annual report on Form 10-K for the year ended December 31, 2002)
10(j)	Transportation agreement between FPU and the City of Lake Worth (Incorporated by reference to exhibit 99.2 on FPU's Form 8-K filed April 4, 2003, File No. 001-10608)
10(k)	A Mutual Release agreement, as of March 31, 2003, by and between FPU, Lake Worth Generation, LLC, The City of Lake Worth, and The AES Corporation. (Incorporated by reference to exhibit 99.3 on FPU's Form 8-K filed April 4, 2003, File No. 001-10608)

10(l)	Amended and Restated loan agreement between FPU and Bank of America, N.A. dated October 29, 2004. (Incorporated by reference as exhibit 10(n) on FPU's annual report on Form 10-K for the year ended December 31, 2004)
10(m)	Security agreement between FPU and Bank of America, N.A. dated October 29, 2004. (Incorporated by reference as exhibit 10(o) on FPU's annual report on Form 10-K for the year ended December 31, 2004)
10(n) #	Non-Employee Director Compensation Plan, approved by Board of Directors on March 18, 2005. (Incorporated by reference as exhibit 10(p) on FPU's annual report on Form 10-K for the year ended December 31, 2004)
10(o)	Amendment to Electric Service Contract by and between JEA and FPU dated September 25, 2006, effective January 1, 2007. (Incorporated by reference as Exhibit 10.1 to our Form 10-Q, for the quarter ending September 30, 2006, File No. 001-10608)
10(p) #	Employment Agreement between the Company and John T. English dated March 31, 2006 (Incorporated by reference as Exhibit 10.1 to our Form 8-K, filed on March 31, 2006)
10(q) #	Employment Agreement between the Company and Charles L. Stein dated March 31, 2006 (Incorporated by reference as Exhibit 10.2 to our Form 8-K, filed on March 31, 2006)
10(r) #	Employment Agreement between the Company and George M. Bachman dated March 31, 2006 (Incorporated by reference as Exhibit 10.3 to our Form 8-K, filed on March 31, 2006)
10(s) *	Contract for the Agreement for Generation Services by and between FPU and Gulf Power Company dated December 28, 2006, effective January 1, 2008
14	Ethics Policy (Incorporated by reference to exhibit 99.3 on FPU's Form 10-K, filed March 30, 2004 File No. 001-10608)
16	Change in certifying accountants (Incorporated herein by reference as exhibit 16 to FPU's current report on Form 8-K, filed April 18, 2003)
21	Subsidiary of the registrant (Incorporated by reference to exhibit 21 on FPU's annual report on Form 10-K, for the year ended December 31, 2000)
23	Independent Registered Public Accounting Firm's Consent BDO Seidman LLP

Financial Accounting Standard Board Interpretation No. 47

In March 2005, the FASB issued Interpretation No. 47, "An Interpretation of FASB Statement No. 143". SFAS No. 143, "Accounting for Asset Retirement Obligations", requires that the fair value of an asset retirement obligation be recognized at the time those obligations are incurred. Upon initial recognition of a legal liability, costs are capitalized as part of the related long-lived asset and allocated to expense over the useful life of the asset. SFAS No. 143 also requires that components of previously recorded depreciation related to the cost of removal of assets upon retirement, whether legal asset retirement obligations or not, be removed from a company's accumulated depreciation reserve. We adopted the provisions of the Statement as of January 1, 2003, as prescribed by the FPSC. Under FPSC guidelines, the estimated cost of removal expenses for normal retirements related to regulated fixed assets were reserved through the depreciation expense and accumulated reserves. This was disclosed in a footnote until December 31, 2003, when the estimated cost of removal from accumulated depreciation was reclassified to a regulatory liability for the obligation.

This Interpretation addresses the legal obligation to retire an asset when the timing and (or) method of settlement are conditional on a future event that may or may not be within the control of the Company. This Interpretation is effective no later than the end of fiscal years ending after December 15, 2005 (December 31, 2005 for calendar-year entities). We adopted FIN No. 47 as of January 1, 2006. The adoption of this Interpretation has not had an impact to our financial condition or results of operations.

FLORIDA PUBLIC UTILITIES COMPANY
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)
March 31, 2007

1. Basis of Presentation

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States (GAAP) for interim financial information and with the instructions for Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. In the opinion of management, all adjustments necessary for fair presentation have been included. The operating results for the period are not necessarily indicative of the results that may be expected for the full year. For further information, refer to the audited consolidated financial statements and footnotes included in the Company's Annual Report on Form 10-K for the year ended December 31, 2006.

2. Use of Estimates

The preparation of financial statements in conformity with GAAP requires the Company to make certain estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of any contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Significant estimates include allowances, accruals for pensions, environmental liabilities, liability reserves, regulatory deferred tax liabilities, unbilled revenue and over-earnings liability. Actual results may differ from these estimates.

3. Regulation

The financial statements are prepared in accordance with the provisions of Statement of Financial Accounting Standards (SFAS) No. 71 – "Accounting for the Effects of Certain Types of Regulation". SFAS No. 71 recognizes that accounting for rate-regulated enterprises should reflect the relationship of costs and revenues introduced by rate regulation. A regulated utility may defer recognition of a cost (a regulatory asset) or show recognition of an obligation (a regulatory liability) if it is probable that, through the ratemaking process, there will be a corresponding increase or decrease in revenues. The Company has recognized certain regulatory assets and liabilities in the condensed consolidated balance sheets.

As a result, Florida Public Service Commission (FPSC) regulation has a significant effect on the Company's results of operations. The FPSC approves rates that are intended to permit a specified rate of return on investment. Rate tariffs allow the flexibility of automatically passing through the cost of natural gas and electricity to customers. Increases in the operating expenses of the regulated segments may require a request for increases in the rates charged to customers.

4. Pledged Assets

Substantially all of the Company's utility plant and the shares of its wholly owned subsidiary, Flo-Gas Corporation, collateralize the Company's First Mortgage Bonds (long-term debt). Cash, accounts receivable and inventory are collateral for the line of

credit.

5. **Restriction on Dividends**
The Company's Fifteenth Supplemental Indenture of Mortgage and Deed of Trust restricts the amount that is available for cash dividends. At March 31, 2007, approximately $10.1 million of retained earnings were free of such restriction and available for the payment of dividends. The Company's line of credit agreement contains covenants that, if violated, could restrict or prevent the payment of dividends. The Company is not in violation of these covenants.

6. **Allowance for Doubtful Accounts**
The Company records an allowance for doubtful accounts based on historical information and trended current economic conditions. The bad debt write-offs for the first quarter 2007 were $177,000 while the provisions for doubtful accounts were $174,000.

7. **Storm Reserves**
As of March 31, 2007, the Company had a storm reserve of approximately $1.7 million for the electric segment. The Company does not have a storm reserve for the natural gas or propane gas segments. Any future storm costs affecting the natural gas segment will be recovered from customers either through rate increases or through applying any available over-earnings as a reduction to the costs. All such deferred costs are subject to review and approval by the FPSC.

Deleted: for
Deleted: y

The Company deferred storm costs for the natural gas segment incurred in 2004 as a regulatory asset on the condensed consolidated balance sheets. The FPSC approved recovery of these storm costs, plus interest and revenue related taxes, over a 30-month period beginning in November 2005. As of March 31, 2007, the remaining balance of these storm costs to be recovered is $207,000.

8. **Goodwill and Other Intangible Assets**
The Company does not amortize goodwill or intangibles with indefinite lives. The Company periodically tests the applicable reporting segments, natural gas and propane gas, for impairment. In the event goodwill or intangible assets related to a segment are determined to be impaired, the Company would write down such assets to fair value. The impairment test performed in 2006 showed no impairment for either reporting segment. The Company does not believe the 2007 impairment test will indicate impairment for either reporting segment. Final results are expected in the second quarter of 2007.

Goodwill associated with the Company's acquisitions consists of $500,000 in the natural gas segment and $1.9 million in the propane gas segment. The summary of intangible assets at March 31, 2007, is as follows:

Intangible Assets
(Dollars in thousands)

		2007
Customer distribution rights	(Indefinite life)	$ 1,900
Customer relationships	(Indefinite life)	900

Software	(Five to nine year life)	3,169
Accumulated amortization		(1,603)
Total intangible assets, net of amortization		$ 4,366

The amortization expense of intangible assets was approximately $86,000 for the three months ended March 31, 2007.

9. **Common Shareholders' Equity**
Items impacting common shareholders' equity other than income and dividends are the dividend reinvestment program, employee stock purchase program, stock compensation plans and treasury stock. The net impact of these additional items increased common shareholders' equity approximately $220,000 for the three months ended March 31, 2007.

10. **Over-earnings – Natural Gas Segment**
The FPSC approves rates that are intended to permit a specified rate of return on investment and limits the maximum amount of earnings of regulated operations. The Company has agreed with the FPSC staff to limit the earned return on equity for regulated natural gas and electric operations.

The Company has recorded estimated 2006 and 2005 over-earnings for regulated natural gas operations of $25,000 and $650,000, respectively. These liabilities are included in the over-earnings liability on the Company's condensed consolidated balance sheet of March 31, 2006. The calculations supporting these liabilities are complex and involve a variety of projections and estimates before the ultimate settlement of such obligations.

Deleted: In 2006, the Company
Deleted:
Deleted: estimated 2006 over-earnings for regulated natural gas operations of $72,000. The 2006 over-earnings estimate was revised in 2007 to be $25,000.
Deleted:
Deleted: 5

The 2005 and 2006 over-earnings liabilities are based on the Company's best estimates, but the amounts could change upon the FPSC finalization and review of earnings expected in 2007 and 2008. The FPSC determines the disposition of over-earnings with alternatives that include refunding to customers, increasing storm damage or environmental reserves or reducing any depreciation reserve deficiency.

11. **Environmental Contingencies**
The Company is subject to federal and state legislation with respect to soil, groundwater and employee health and safety matters and to environmental regulations issued by the Florida Department of Environmental Protection (FDEP), the United States Environmental Protection Agency (EPA) and other federal and state agencies. For full disclosure of the legal items that impact the Company, please refer to "Contingencies" in the Notes to Consolidated Financial Statements in the Company's Form 10-K for the year ended December 31, 2006.

12. **Reclassification**
Certain amounts in the 2006 financial statements have been reclassified to conform to the 2007 presentation.

13. **IRS Examination**
In February of 2007, the IRS informed us that it has selected our 2003 and 2004 tax

Formatted: Font: Bold

years for examination. As our tax positions have remained consistent with those from the previously audited tax years, we do not expect any material adverse findings as the result of the impending IRS audit.

14. Recent Accounting Standards

Financial Accounting Standard No. 159

In February 2007, the Financial Accounting Standards Board (FASB) issued Statement No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities". This Statement permits measurement at fair value of certain firm commitments, non-financial insurance contracts and warranties, host financial instruments and recognized financial assets and liabilities, excluding consolidating investments in subsidiaries, consolidating variable interest entities, various forms of deferred compensation agreements, leases, depository institution deposit liabilities and financial instruments included in shareholders' equity. This Statement is effective for financial statements issued for fiscal years beginning after November 15, 2007. The Company expects to adopt SFAS No. 159 effective January 1, 2008. The Company does not believe adoption of this Statement will have a material impact on our financial condition or results of operation.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

We have three primary business segments: natural gas, electric and propane gas. The Florida Public Service Commission (FPSC) regulates the natural gas and electric segments.

Effects of seasonal weather conditions, the timing of rate increases, fluctuations in demand due to the cost of fuel passed on to customers and the migration of winter residents and tourists to Florida during the winter season all have an impact on income.

Results of Operations

Revenues and Gross Profit Summary

Revenues include cost recovery revenues. The FPSC allows cost recovery revenues to directly recover costs of fuel, conservation and revenue-based taxes in our natural gas and electric segments. Revenues collected for these costs and expenses have no effect on results of operations and fluctuations could distort the relationship of revenues between periods. Gross profit is defined as gross operating revenues less fuel, conservation and revenue-based taxes that are passed directly through to customers. Because gross profit eliminates these cost recovery revenues, we believe it provides a more meaningful basis for evaluating utility revenues. The following summary compares gross profit between periods and units sold in one thousand Dekatherm (MDth) (gas) and Megawatt Hour (MWH) (electric).

Revenues and Gross Profit

(Dollars and units in thousands)	Three Months Ended	
	2007	**2006**
Natural Gas		
Revenues	**$20,573**	**$26,954**
Cost of fuel and other pass through costs	12,522	18,555
Gross Profit	**$ 8,051**	**$ 8,399**
Units sold: (MDth)	1,840	1,946
Electric		
Revenues	$13,358	$11,696
Cost of fuel and other pass through costs	**9,899**	**8,273**
Gross Profit	$ 3,459	$ 3,423
Units sold: (MWH)	**186**	**197**
Propane Gas		
Revenues	**$4,681**	**$4,698**
Cost of fuel	2,348	2,385
Gross Profit	**$2,333**	**$2,313**
Units sold: (MDth)	192	200
Consolidated		
Revenues	$38,612	$43,348
Cost of fuel	24,769	29,213

Gross Profit	$13,843	$14,135

Three Months Ended March 31, 2007 Compared with Three Months Ended March 31, 2006.

Revenues and Gross Profit

Natural Gas

Natural gas service revenues decreased $6,381,000 in the first quarter of 2007 over the same period in 2006. As the cost of natural gas continues to decline, revenues to recover our cost of fuel and other costs passed through to customers decreased by $6,033,000. Since these costs do not impact our gross profit, our gross profit decreased $348,000 or 4%. The decrease in gross profit is attributable to a 5% decrease in units sold in 2007 due primarily to generally warmer weather compared to the prior year.

Electric

Electric service revenues increased $1,662,000 in the first quarter of 2007 over the same period in 2006. $1,626,000 of the increase was attributable to the cost of fuel and other costs that were passed through to customers. A new fuel contract in our Northeast division was effective January 1, 2007 and this increased the cost of fuel that was passed through to our customers. Gross profit was flat compared to the first quarter of 2006.

Propane Gas

Propane gas revenues and gross profit did not significantly fluctuate in the first quarter of 2007 over the same period in 2006.

Operating Expenses

Operating expenses increased $498,000 or approximately 5% in the first quarter of 2007 compared to the same period in 2006. The inflationary impact on payroll accounts for the majority of our expense increase. Additionally, we outsourced our meter reading function in our natural gas segment to allow for additional focus on serving our customers and increasing our collection efforts which increased customer accounts expenses.

Other Income and Deductions

Although merchandise and service revenue decreased by $ 311,000 in the first quarter of 2007 compared to the same period last year, our profit increased by $64,000. We experienced a decrease in revenue mainly due to lower demand for merchandise as a result of the slow down of new construction projects in our areas due to a downturn in the housing market. Despite the decrease to our revenues, profitability rose due to a focus by our management on pricing structure.

The total interest expense decreased $46,000 as compared to the same period last year, due mainly to a decrease in the average outstanding balance on the line of credit.

Income Taxes

Income tax expense decreased in the first quarter of 2007 by $257,000 over the same period last year as a result of lower taxable income.

Liquidity and Capital Resources

Cash Flows

Operating Activities
Net cash flow provided by operating activities for the three months ended March 31, 2007 decreased by approximately $4.8 million over the same period in 2006. Previously over recovered fuel costs in 2006 and the following year's related reduction in fuel costs passed through to our customers accounted for a decrease in the current year's net cash flow of approximately $5.1 million compared to the prior year.

Investing Activities
Construction expenditures did not fluctuate significantly between the quarters; decreasing by approximately $178,000 compared to the same period last year.

Financing Activities
Decreases in cash flow used in financing activities were mostly attributable to reductions in short-term borrowings. In the first quarter of 2007 we paid down our line of credit by $1.3 million as compared to $6.1 million in the first quarter of 2006. The increase in fuel costs during the latter part of 2005 resulted in large fuel under-recoveries and therefore a higher dependence on short-term financing in the first quarter of 2006 compared to 2007.

Capital Resources

We have a $12 million line of credit (LOC), which expires on July 1, 2008. Upon 30 days notice by us we can increase the LOC to a maximum of $20 million. The LOC contains affirmative and negative covenants that, if violated, would give the bank the right to accelerate the due date of the loan to be immediately payable. The covenants include certain financial ratios. All ratios are currently within the required limits and management believes we are in full compliance with all covenants and anticipates continued compliance in the foreseeable future. We reserve $1 million of the LOC to cover expenses for any major storm repairs in our electric segment and an additional $250,000 for a letter of credit insuring propane facilities. As of March 31, 2007, the amount borrowed from the LOC was $2.2 million. At March 31, 2007, the LOC, long-term debt and preferred stock comprised 52% of total equity and debt capitalization.

Deleted: 3

Our 1942 Indenture of Mortgage and Deed of Trust, which is a mortgage on all real and personal property, permits the issuance of additional bonds based upon a calculation of unencumbered net real and personal property. At March 31, 2007, such calculation would permit the issuance of approximately $39.8 million of additional bonds.

We have $3.4 million in invested funds for payment of future environmental costs. We expect to incur between $5.8 million and $19.1 million for expenses related to environmental clean up.

Capital Requirements
Portions of our business are seasonal and dependent on weather conditions in Florida. The weather affects the sale of electricity and gas, and thereby impacts the cash provided by operations. Construction costs also impact cash requirements throughout the year. Cash needs for operations and construction are met partially through short-term borrowings from our LOC.

We plan to purchase land for the construction of our South Florida division office within 3 years. The possible purchase of the land would increase construction expenditures by $4 to $6 million over the same period last year. Additionally, the construction expenditures for the remainder of 2007 are expected to increase due to the anticipated construction of an office building in Northeast Florida. The cost is expected to be approximately $750,000 with construction scheduled for completion in early 2008.

Deleted: T

Deleted: Additionally,

The current south Florida division office is located on environmentally impacted property, which requires relocating the office to allow for clean up of the property. It will not be possible to rebuild at the current location since this site has been rezoned with a residential designation. The estimated cost of the land is $4 million to $6 million. We are planning to build and complete this new facility in the next five years.

Material commitments for capital expenditures consist of $775,000 for the purchase of a transformer and vehicle purchases totaling approximately $200,000.

Cash requirements are anticipated to increase significantly in the future due to additional environmental clean up costs, sinking fund payments on long-term debt and pension contributions. Environmental clean up costs are forecasted to be approximately $600,000 through 2007, with remaining payments which could total approximately $13.1 million, beginning in 2008. Annual long-term debt sinking fund payments of approximately $1.4 million will begin in 2008 and will continue for eleven years. Current projections indicate that we will need to make a contribution of $250,000 to our pension plan in 2007. Congress has finalized the new funding rules and we may have significant contribution requirements for several years beginning with 2008.

Deleted: .

Due to delayed environmental clean-up costs, we currently do not anticipate that any equity or debt financing in 2007 will be required. We believe that cash from operations, coupled with short-term borrowings on the LOC, will be sufficient to satisfy our operating expenses, normal capital expenditure requirements and dividend payments through spring of 2008. However, cash requirements are forecasted to increase significantly in the future due to our environmental clean up costs, a land purchase, and sinking fund payments on long-term debt and pension contributions. If cash needs relating to the land purchase and related construction and the timing of environmental expenditures change, it is possible we may consider equity or debt financing in 2008. The need and timing will depend upon the overall company cash flow requirements. There can be no assurance, however, that equity or debt financing will be available on favorable terms, or at all, in 2008 or later years when we seek such financings.

Deleted:

Outlook

Electric Power Supply

Formatted: Font: Italic

Contracts with our two electric suppliers were originally set to expire on December 31, 2007. Those contracts provided electricity to our customers at rates much lower than market rates. As part of our negotiations, we agreed to end the current contract terms for our Northeast division on December 31, 2006 and executed an amended contract that began January 1, 2007 and will expire December 31, 2017. Although the contract rates have increased for 2007, this enabled us to obtain lower rates for the longer term of the contract than would have been available if we had not revised the contract. The savings are passed through to our customers without profit to us.

We executed a contract for the provider of electricity in our Northwest division in December 2006 and are seeking approval of this contract and its related terms and conditions from the FPSC on or before July 1, 2007. If the FPSC does not approve this contract, we may need to seek an alternative supplier or new contract with this same supplier for the purchase of electricity in the Northwest division. This contract will be for the purchase of electricity beginning January 1, 2008. We anticipate that contract will result in rates closer to market, which could cause our customers' bills to double over existing prices in the next several years.

We are unable to estimate what impact, if any, the higher rates could have on electric consumption.

Propane Gas

We continue to review the possibility of hedging activities later in 2007 to help mitigate the risk of price changes for our cost of propane gas. We are unable to determine the impact this activity will have on our future operating income.

We used advance purchase agreements made in the normal course of procuring propane gas supplies in past years. These agreements resulted in a loss of gross profit of approximately $5,000 in 2006 and additional gross profit of approximately $383,000 in 2005.

Deleted: and $242,000 in 2004

Over-earnings-Natural Gas Segment

The FPSC approves rates that are intended to permit a specified rate of return on investment and limits the maximum amount of earnings of regulated operations. We originally estimated 2006 over-earnings for regulated natural gas operations of $72,000. The 2006 over-earnings estimate was revised in 2007 to be $25,000. We originally estimated 2005 over-earnings for regulated natural gas operations of $700,000. The 2005 over-earnings estimate was revised in 2006 to be $650,000. These liabilities have been included in the over-earnings liability on our balance sheet. The calculations supporting these liabilities are complex and involve a variety of projections and estimates before the ultimate settlement of such obligations.

Our 2005 and 2006 estimates of our over-earnings liabilities could change upon the FPSC finalization and review of our earnings in 2007 and 2008. The FPSC determines the disposition of over-earnings with alternatives that include refunding to customers, funding storm damage or environmental reserves, or reducing any depreciation reserve deficiency.

In 2007, we requested that the 2005 natural gas over-earnings be used to provide additional funds to our regulatory storm reserve liability and reduce the costs currently being recovered from our customers through a storm surcharge. If the FPSC approves this disposition, we will end the storm surcharge later in 2007.

Indiantown Gas

Formatted: Font: Italic

The FPSC approved our joint transportation and territorial agreements with Indiantown in October 2006. We have also begun construction in the Indiantown area to install natural gas mains in the first phase of this development for approximately 100 homes. The next two developments are slated to break ground later in 2007 for construction of approximately 1,000 homes.

Land Purchase

We have entered into an agreement to purchase land for the new South Florida division office. We are in the process of completing a due diligence on this property and expect to finalize this phase and close during the second quarter of 2007.

Deleted: phase

Deleted: If no issues are discovered, we expect to close.

New Division Office

We are planning to build a new operations center for our Northeast division on land we are currently own. We are in the process of developing and finalizing the building plans, and expect to begin construction sometime in 2007. The cost is expected to be $750,000 and should be completed in early 2008.

Storm Related Expenditures

Formatted: Font: Italic

Regulators continue to focus on hurricane preparedness and storm recovery issues for utility companies. Newly mandated storm preparedness initiatives could impact our operating expenses and capital expenditures later in 2007. The initial forecasts of these annual expenditures are approximately $700,000. It is possible that additional regulation and rules will be mandated regarding storm related expenditures over the next several years. We requested that the FPSC allow us to recover the cost of the newly mandated storm preparedness initiatives and to defer these storm-related expenditures until we receive recovery through a rate increase. If approved, both the recovery and expenditures may occur by mid-2007. If these expenditures are approved for rate recovery in 2007, these rates would be temporary until final rates were implemented as a result of an electric base rate proceeding.

Electric Base Rate Proceeding

Formatted: Font: Italic

We plan to file a request with the FPSC in the third quarter of 2007 for a base rate increase in our electric segment. This request will include recovery of increased expenses and capital expenditures since our last rate proceeding in 2004, as well as additional storm-related expenditures as discussed above. Finalization of this request and approval, if any, of an electric base rate increase would not occur until early 2008. Possible interim rate relief for partial recovery of the increased expenditures may occur in late 2007.

Impact of Recent Accounting Standards

Financial Accounting Standard No. 159

In February 2007, the Financial Accounting Standards Board (FASB) issued Statement No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities". This Statement permits measurement at fair value of certain firm commitments, nonfinancial insurance contracts and warranties, host financial instruments and recognized financial assets and liabilities, excluding consolidating investments in subsidiaries, consolidating variable interest entities, various forms of deferred compensation agreements, leases, depository institution deposit liabilities and financial instruments included in shareholders' equity. This Statement is effective for financial statements issued for fiscal years beginning after November 15, 2007. The Company expects to adopt SFAS No. 159 effective January 1, 2008. The Company does not believe adoption of this Statement will have a material impact on our financial condition or results of operation.

Forward-Looking Statements (Cautionary Statement)

This report contains forward-looking statements including those relating to the following:

- Based on our current expectations for cash needs, including cash needs relating to the possible land purchase and related construction, we may choose to consider an equity or debt financing in 2007 or 2008.
- Our anticipation of continued compliance in the foreseeable future with our LOC covenants.
- Construction expenditures for the remainder of 2007 may increase by $4 to $6 million over the same period in 2006 if we are successful in negotiating the purchase of the land for our South Florida operations.
- Our expectation that cash requirements will increase significantly in the future due to environmental clean-up costs, sinking fund payment on long-term debt and pension contributions.
- Our belief that cash from operations, coupled with short-term borrowings on our LOC, will be sufficient to satisfy our operating expenses, normal construction expenditure and dividend payments through spring of 2008.
- Our 2006 and 2005 over-earnings liability in natural gas will materialize as estimated after the FPSC review and audit.
- We expect there will be no impairment of either reporting segment upon finalization of our impairment testing in 2007.
- We expect higher fuel costs beginning in 2008 for our Northwest electric divisions.
- The development in Indiantown will occur as estimated.
- Storm related expenditures may be necessary beginning in 2007 and the total cost may be significant. We may receive recovery for these expenditures.
- The purchase of land for our new South Florida division office may occur in 2007.

- We expect to file for an electric base rate increase in the third quarter of 2007 and finalization is expected in early 2008. Final rates, if approved by the FPSC, would not occur until 2008.
- We anticipate capital expenditures of approximately $750,000 for the construction of an office building in Northeast Florida. Construction will begin in 2007 and completed in early 2008.

Deleted: between

Deleted: and $1 million

These statements involve certain risks and uncertainties. Actual results may differ materially from what is expressed in such forward-looking statements. Important factors that could cause actual results to differ materially from those expressed by the forward-looking statements include, but are not limited to, those set forth in "Risk Factors" below and in our Form 10-K for the year ending December 31, 2006.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

All financial instruments held by us were entered into for purposes other than for trading. We have market risk exposure only from the potential loss in fair value resulting from changes in interest rates. We have no material exposure relating to commodity prices because under our regulatory jurisdictions, we are fully compensated for the actual costs of commodities (natural gas and electricity) used in our operations. Any commodity price increases for propane gas are normally passed through monthly to propane gas customers as the fuel charge portion of their rate.

None of our gas or electric contracts are accounted for using the fair value method of accounting. While some of our contracts meet the definition of a derivative, we have designated these contracts as "normal purchases and sales" under SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities".

On a rolling four-quarter basis, we will purchase a "cap" on approximately one-third of our forecast propane volume purchases and pre-buy or hedge with a swap one-third of our forecast anticipated propane purchases. The remaining one-third will fluctuate with the market price. Our energy strategy allows us to participate in two-thirds of price declines but only one-third of price increases. As of March 31, 2007, we have not entered into any hedging activities. When we do enter into hedging activities, we will determine whether they meet the definition of normal sales and purchases and if not, we will determine whether we should use hedge accounting.

We have no exposure to equity risk, as we do not hold any equity instruments. Our exposure to interest rate risk is limited to investments held for environmental costs, the long-term notes receivable from the sale of our water division and short-term borrowings on the line of credit. The investments held for environmental costs are short-term fixed income debt securities whose carrying amounts are not materially different than fair value. The short-term borrowings were approximately $2.2 million at the end of March 2007. We do not believe we have material market risk exposure related to these instruments. The indentures governing our two first mortgage bond series outstanding contain "make-whole" provisions (pre-payment penalties that charge for lost interest), which render refinancing impracticable.

Item 4. Controls and Procedures

Disclosure Controls and Procedures

Our management carried out an evaluation, under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, of the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act). Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer as of March 31, 2007, concluded that our disclosure controls and procedures were effective, in that they provide reasonable assurance that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

Changes in Internal Control over Financial Reporting

No change in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) occurred during the fiscal quarter ended March 31, 2007 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

None.

Item 1A. Risk Factors

No new risk factors have been identified outside of those included in our most recent Form 10-K for the year ending December 31, 2006. You should read the risk factors contained within the 10K in conjunction with this report.

Item 6. Exhibits

3.1 Amended Articles of Incorporation (incorporated herein by reference as Exhibit 3.1 to our quarterly report on Form 10-Q for the period ended June 30, 2002).

3.2 Amended By-Laws (incorporated herein by reference as Exhibit 3(ii) to our quarterly report on Form 10-Q for the period ended June 30, 2002).

4.1 Indenture of Mortgage and Deed of Trust of FPU dated as of September 1, 1942 (incorporated by reference herein to Exhibit 7-A to Registration No. 2-6087).

4.2 Fourteenth Supplemental Indenture dated September 1, 2001 (incorporated by reference to exhibit 4.2 on our annual report on Form 10-K for the year ended December 31, 2001).

4.3 Fifteenth Supplemental Indenture dated November 1, 2001 (incorporated by reference to exhibit 4.3 on our annual report on Form 10-K for the year ended December 31, 2001).

10.1 Amendment to Electric Service Contract by and between JEA and FPU dated September 25, 2006.

10.2 Amended Security Agreement and Promissory Note between FPU and Bank of America dated August 25, 2006.

31.1 Certification of Chief Executive Officer (CEO) per Section 302 of the Sarbanes-Oxley Act of 2002.

31.2 Certification of Chief Financial Officer (CFO) per Section 302 of the Sarbanes-Oxley Act of 2002.

32 Certification of Principal Executive Officer and Principal Financial Officer per Section 906 of the Sarbanes-Oxley Act of 2002.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

FLORIDA PUBLIC UTILITIES COMPANY
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)
March 31, 2007

1. Basis of Presentation

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States (GAAP) for interim financial information and with the instructions for Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. In the opinion of management, all adjustments necessary for fair presentation have been included. The operating results for the period are not necessarily indicative of the results that may be expected for the full year. For further information, refer to the audited consolidated financial statements and footnotes included in the Company's Annual Report on Form 10-K for the year ended December 31, 2006.

2. Use of Estimates

The preparation of financial statements in conformity with GAAP requires the Company to make certain estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of any contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Significant estimates include allowances, accruals for pensions, environmental liabilities, liability reserves, regulatory deferred tax liabilities, unbilled revenue and over-earnings liability. Actual results may differ from these estimates.

3. Regulation

The financial statements are prepared in accordance with the provisions of Statement of Financial Accounting Standards (SFAS) No. 71 – "Accounting for the Effects of Certain Types of Regulation". SFAS No. 71 recognizes that accounting for rate-regulated enterprises should reflect the relationship of costs and revenues introduced by rate regulation. A regulated utility may defer recognition of a cost (a regulatory asset) or show recognition of an obligation (a regulatory liability) if it is probable that, through the ratemaking process, there will be a corresponding increase or decrease in revenues. The Company has recognized certain regulatory assets and liabilities in the condensed consolidated balance sheets.

As a result, Florida Public Service Commission (FPSC) regulation has a significant effect on the Company's results of operations. The FPSC approves rates that are intended to permit a specified rate of return on investment. Rate tariffs allow the flexibility of automatically passing through the cost of natural gas and electricity to customers. Increases in the operating expenses of the regulated segments may require a request for increases in the rates charged to customers.

4. Pledged Assets

Substantially all of the Company's utility plant and the shares of its wholly owned subsidiary, Flo-Gas Corporation, collateralize the Company's First Mortgage Bonds (long-term debt). Cash, accounts receivable and inventory are collateral for the line of

credit.

5. Restriction on Dividends

The Company's Fifteenth Supplemental Indenture of Mortgage and Deed of Trust restricts the amount that is available for cash dividends. At March 31, 2007, approximately $10.1 million of retained earnings were free of such restriction and available for the payment of dividends. The Company's line of credit agreement contains covenants that, if violated, could restrict or prevent the payment of dividends. The Company is not in violation of these covenants.

6. Allowance for Doubtful Accounts

The Company records an allowance for doubtful accounts based on historical information and trended current economic conditions. The bad debt write-offs for the first quarter 2007 were $177,000 while the provisions for doubtful accounts were $174,000.

7. Storm Reserves

As of March 31, 2007, the Company had a storm reserve of approximately $1.7 million for the electric segment. The Company does not have a storm reserve for the natural gas or propane gas segments. Any future storm costs affecting the natural gas segment will be recovered from customers either through rate increases or through applying any available over-earnings as a reduction to the costs. All such deferred costs are subject to review and approval by the FPSC.

The Company deferred storm costs for the natural gas segment incurred in 2004 as a regulatory asset on the condensed consolidated balance sheets. The FPSC approved recovery of these storm costs, plus interest and revenue related taxes, over a 30-month period beginning in November 2005. As of March 31, 2007, the remaining balance of these storm costs to be recovered is $207,000.

8. Goodwill and Other Intangible Assets

The Company does not amortize goodwill or intangibles with indefinite lives. The Company periodically tests the applicable reporting segments, natural gas and propane gas, for impairment. In the event goodwill or intangible assets related to a segment are determined to be impaired, the Company would write down such assets to fair value. The impairment test performed in 2006 showed no impairment for either reporting segment. The Company does not believe the 2007 impairment test will indicate impairment for either reporting segment. Final results are expected in the second quarter of 2007.

Goodwill associated with the Company's acquisitions consists of $500,000 in the natural gas segment and $1.9 million in the propane gas segment. The summary of intangible assets at March 31, 2007, is as follows:

Intangible Assets
(Dollars in thousands)

		2007
Customer distribution rights	(Indefinite life)	$ 1,900
Customer relationships	(Indefinite life)	900

Software	(Five to nine year life)	3,169
Accumulated amortization		(1,603)
Total intangible assets, net of amortization		$ 4,366

The amortization expense of intangible assets was approximately $86,000 for the three months ended March 31, 2007.

9. Common Shareholders' Equity
Items impacting common shareholders' equity other than income and dividends are the dividend reinvestment program, employee stock purchase program, stock compensation plans and treasury stock. The net impact of these additional items increased common shareholders' equity approximately $220,000 for the three months ended March 31, 2007.

10. Over-earnings – Natural Gas Segment
The FPSC approves rates that are intended to permit a specified rate of return on investment and limits the maximum amount of earnings of regulated operations. The Company has agreed with the FPSC staff to limit the earned return on equity for regulated natural gas and electric operations.

The Company has recorded estimated 2006 and 2005 over-earnings for regulated natural gas operations of $25,000 and $650,000, respectively. These liabilities are included in the over-earnings liability on the Company's condensed consolidated balance sheet of March 31, 2006. The calculations supporting these liabilities are complex and involve a variety of projections and estimates before the ultimate settlement of such obligations.

The 2005 and 2006 over-earnings liabilities are based on the Company's best estimates, but the amounts could change upon the FPSC finalization and review of earnings expected in 2007 and 2008. The FPSC determines the disposition of over-earnings with alternatives that include refunding to customers, increasing storm damage or environmental reserves or reducing any depreciation reserve deficiency.

11. Environmental Contingencies
The Company is subject to federal and state legislation with respect to soil, groundwater and employee health and safety matters and to environmental regulations issued by the Florida Department of Environmental Protection (FDEP), the United States Environmental Protection Agency (EPA) and other federal and state agencies. For full disclosure of the legal items that impact the Company, please refer to "Contingencies" in the Notes to Consolidated Financial Statements in the Company's Form 10-K for the year ended December 31, 2006.

12. Reclassification
Certain amounts in the 2006 financial statements have been reclassified to conform to the 2007 presentation.

13. IRS Examination
In February of 2007, the IRS informed us that it has selected our 2003 and 2004 tax

years for examination. As our tax positions have remained consistent with those from the previously audited tax years, we do not expect any material adverse findings as the result of the impending IRS audit.

14. Recent Accounting Standards

Financial Accounting Standard No. 159

In February 2007, the Financial Accounting Standards Board (FASB) issued Statement No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities". This Statement permits measurement at fair value of certain firm commitments, non-financial insurance contracts and warranties, host financial instruments and recognized financial assets and liabilities, excluding consolidating investments in subsidiaries, consolidating variable interest entities, various forms of deferred compensation agreements, leases, depository institution deposit liabilities and financial instruments included in shareholders' equity. This Statement is effective for financial statements issued for fiscal years beginning after November 15, 2007. The Company expects to adopt SFAS No. 159 effective January 1, 2008. The Company does not believe adoption of this Statement will have a material impact on our financial condition or results of operation.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

We have three primary business segments: natural gas, electric and propane gas. The Florida Public Service Commission (FPSC) regulates the natural gas and electric segments.

Effects of seasonal weather conditions, the timing of rate increases, fluctuations in demand due to the cost of fuel passed on to customers and the migration of winter residents and tourists to Florida during the winter season all have an impact on income.

Results of Operations

Revenues and Gross Profit Summary

Revenues include cost recovery revenues. The FPSC allows cost recovery revenues to directly recover costs of fuel, conservation and revenue-based taxes in our natural gas and electric segments. Revenues collected for these costs and expenses have no effect on results of operations and fluctuations could distort the relationship of revenues between periods. Gross profit is defined as gross operating revenues less fuel, conservation and revenue-based taxes that are passed directly through to customers. Because gross profit eliminates these cost recovery revenues, we believe it provides a more meaningful basis for evaluating utility revenues. The following summary compares gross profit between periods and units sold in one thousand Dekatherm (MDth) (gas) and Megawatt Hour (MWH) (electric).

Revenues and Gross Profit

(Dollars and units in thousands)	Three Months Ended	
	2007	**2006**
Natural Gas		
Revenues	$20,573	$26,954
Cost of fuel and other pass through costs	12,522	18,555
Gross Profit	$ 8,051	$ 8,399
Units sold: (MDth)	1,840	1,946
Electric		
Revenues	$13,358	$11,696
Cost of fuel and other pass through costs	9,899	8,273
Gross Profit	$ 3,459	$ 3,423
Units sold: (MWH)	186	197
Propane Gas		
Revenues	$4,681	$4,698
Cost of fuel	2,348	2,385
Gross Profit	$2,333	$2,313
Units sold: (MDth)	192	200
Consolidated		
Revenues	$38,612	$43,348
Cost of fuel	24,769	29,213

Gross Profit	$13,843	$14,135

Three Months Ended March 31, 2007 Compared with Three Months Ended March 31, 2006.

Revenues and Gross Profit

Natural Gas

Natural gas service revenues decreased $6,381,000 in the first quarter of 2007 over the same period in 2006. As the cost of natural gas continues to decline, revenues to recover our cost of fuel and other costs passed through to customers decreased by $6,033,000. Since these costs do not impact our gross profit, our gross profit decreased $348,000 or 4%. The decrease in gross profit is attributable to a 5% decrease in units sold in 2007 due primarily to generally warmer weather compared to the prior year.

Electric

Electric service revenues increased $1,662,000 in the first quarter of 2007 over the same period in 2006. $1,626,000 of the increase was attributable to the cost of fuel and other costs that were passed through to customers. A new fuel contract in our Northeast division was effective January 1, 2007 and this increased the cost of fuel that was passed through to our customers. Gross profit was flat compared to the first quarter of 2006.

Propane Gas

Propane gas revenues and gross profit did not significantly fluctuate in the first quarter of 2007 over the same period in 2006.

Operating Expenses

Operating expenses increased $498,000 or approximately 5% in the first quarter of 2007 compared to the same period in 2006. The inflationary impact on payroll accounts for the majority of our expense increase. Additionally, we outsourced our meter reading function in our natural gas segment to allow for additional focus on serving our customers and increasing our collection efforts which increased customer accounts expenses.

Other Income and Deductions

Although merchandise and service revenue decreased by $ 311,000 in the first quarter of 2007 compared to the same period last year, our profit increased by $64,000. We experienced a decrease in revenue mainly due to lower demand for merchandise as a result of the slow down of new construction projects in our areas due to a downturn in the housing market. Despite the decrease to our revenues, profitability rose due to a focus by our management on pricing structure.

The total interest expense decreased $46,000 as compared to the same period last year, due mainly to a decrease in the average outstanding balance on the line of credit.

Income Taxes

Income tax expense decreased in the first quarter of 2007 by $257,000 over the same period last year as a result of lower taxable income.

Liquidity and Capital Resources

Cash Flows

Operating Activities

Net cash flow provided by operating activities for the three months ended March 31, 2007 decreased by approximately $4.8 million over the same period in 2006. Previously over recovered fuel costs in 2006 and the following year's related reduction in fuel costs passed through to our customers accounted for a decrease in the current year's net cash flow of approximately $5.1 million compared to the prior year.

Investing Activities

Construction expenditures did not fluctuate significantly between the quarters; decreasing by approximately $178,000 compared to the same period last year.

Financing Activities

Decreases in cash flow used in financing activities were mostly attributable to reductions in short-term borrowings. In the first quarter of 2007 we paid down our line of credit by $1.3 million as compared to $6.1 million in the first quarter of 2006. The increase in fuel costs during the latter part of 2005 resulted in large fuel under-recoveries and therefore a higher dependence on short-term financing in the first quarter of 2006 compared to 2007.

Capital Resources

We have a $12 million line of credit (LOC), which expires on July 1, 2008. Upon 30 days notice by us we can increase the LOC to a maximum of $20 million. The LOC contains affirmative and negative covenants that, if violated, would give the bank the right to accelerate the due date of the loan to be immediately payable. The covenants include certain financial ratios. All ratios are currently within the required limits and management believes we are in full compliance with all covenants and anticipates continued compliance in the foreseeable future. We reserve $1 million of the LOC to cover expenses for any major storm repairs in our electric segment and an additional $250,000 for a letter of credit insuring propane facilities. As of March 31, 2007, the amount borrowed from the LOC was $2.2 million. At March 31, 2007, the LOC, long-term debt and preferred stock comprised 52% of total equity and debt capitalization.

Our 1942 Indenture of Mortgage and Deed of Trust, which is a mortgage on all real and personal property, permits the issuance of additional bonds based upon a calculation of unencumbered net real and personal property. At March 31, 2007, such calculation would permit the issuance of approximately $39.8 million of additional bonds.

We have $3.4 million in invested funds for payment of future environmental costs. We expect to incur between $5.8 million and $19.1 million for expenses related to environmental clean up.

Capital Requirements

Portions of our business are seasonal and dependent on weather conditions in Florida. The weather affects the sale of electricity and gas, and thereby impacts the cash provided by operations. Construction costs also impact cash requirements throughout the year. Cash needs for operations and construction are met partially through short-term borrowings from our LOC.

We plan to purchase land for the construction of our South Florida division office within 3 years. The possible purchase of the land would increase construction expenditures by $4 to $6 million over the same period last year. Additionally, the construction expenditures for the remainder of 2007 are expected to increase due to the anticipated construction of an office building in Northeast Florida. The cost is expected to be approximately $750,000 with construction scheduled for completion in early 2008.

The current south Florida division office is located on environmentally impacted property, which requires relocating the office to allow for clean up of the property. It will not be possible to rebuild at the current location since this site has been rezoned with a residential designation. The estimated cost of the land is $4 million to $6 million. We are planning to build and complete this new facility in the next five years.

Material commitments for capital expenditures consist of $775,000 for the purchase of a transformer and vehicle purchases totaling approximately $200,000.

Cash requirements are anticipated to increase significantly in the future due to additional environmental clean up costs, sinking fund payments on long-term debt and pension contributions. Environmental clean up costs are forecasted to be approximately $600,000 through 2007, with remaining payments which could total approximately $13.1 million, beginning in 2008. Annual long-term debt sinking fund payments of approximately $1.4 million will begin in 2008 and will continue for eleven years. Current projections indicate that we will need to make a contribution of $250,000 to our pension plan in 2007. Congress has finalized the new funding rules and we may have significant contribution requirements for several years beginning with 2008.

Due to delayed environmental clean-up costs, we currently do not anticipate that any equity or debt financing in 2007 will be required. We believe that cash from operations, coupled with short-term borrowings on the LOC, will be sufficient to satisfy our operating expenses, normal capital expenditure requirements and dividend payments through spring of 2008. However, cash requirements are forecasted to increase significantly in the future due to our environmental clean up costs, a land purchase, and sinking fund payments on long-term debt and pension contributions. If cash needs relating to the land purchase and related construction and the timing of environmental expenditures change, it is possible we may consider equity or debt financing in 2008. The need and timing will depend upon the overall company cash flow requirements. There can be no assurance, however, that equity or debt financing will be available on favorable terms, or at all, in 2008 or later years when we seek such financings.

Outlook

Electric Power Supply
Contracts with our two electric suppliers were originally set to expire on December 31, 2007. Those contracts provided electricity to our customers at rates much lower than market rates. As part of our negotiations, we agreed to end the current contract terms for our Northeast division on December 31, 2006 and executed an amended contract that began January 1, 2007 and will expire December 31, 2017. Although the contract rates have increased for 2007, this enabled us to obtain lower rates for the longer term of the contract than would have been available if we had not revised the contract. The savings are passed through to our customers without profit to us.

We executed a contract for the provider of electricity in our Northwest division in December 2006 and are seeking approval of this contract and its related terms and conditions from the FPSC on or before July 1, 2007. If the FPSC does not approve this contract, we may need to seek an alternative supplier or new contract with this same supplier for the purchase of electricity in the Northwest division. This contract will be for the purchase of electricity beginning January 1, 2008. We anticipate that contract will result in rates closer to market, which could cause our customers' bills to double over existing prices in the next several years.

We are unable to estimate what impact, if any, the higher rates could have on electric consumption.

Propane Gas
We continue to review the possibility of hedging activities later in 2007 to help mitigate the risk of price changes for our cost of propane gas. We are unable to determine the impact this activity will have on our future operating income.

We used advance purchase agreements made in the normal course of procuring propane gas supplies in past years. These agreements resulted in a loss of gross profit of approximately $5,000 in 2006 and additional gross profit of approximately $383,000 in 2005.

Over-earnings-Natural Gas Segment
The FPSC approves rates that are intended to permit a specified rate of return on investment and limits the maximum amount of earnings of regulated operations. We originally estimated 2006 over-earnings for regulated natural gas operations of $72,000. The 2006 over-earnings estimate was revised in 2007 to be $25,000. We originally estimated 2005 over-earnings for regulated natural gas operations of $700,000. The 2005 over-earnings estimate was revised in 2006 to be $650,000. These liabilities have been included in the over-earnings liability on our balance sheet. The calculations supporting these liabilities are complex and involve a variety of projections and estimates before the ultimate settlement of such obligations.

Our 2005 and 2006 estimates of our over-earnings liabilities could change upon the FPSC finalization and review of our earnings in 2007 and 2008. The FPSC determines the disposition of over-earnings with alternatives that include refunding to customers, funding storm damage or environmental reserves, or reducing any depreciation reserve deficiency.

In 2007, we requested that the 2005 natural gas over-earnings be used to provide additional funds to our regulatory storm reserve liability and reduce the costs currently being recovered from our customers through a storm surcharge. If the FPSC approves this disposition, we will end the storm surcharge later in 2007.

Indiantown Gas
The FPSC approved our joint transportation and territorial agreements with Indiantown in October 2006. We have also begun construction in the Indiantown area to install natural gas mains in the first phase of this development for approximately 100 homes. The next two developments are slated to break ground later in 2007 for construction of approximately 1,000 homes.

Land Purchase
We have entered into an agreement to purchase land for the new South Florida division office. We are in the process of completing a due diligence on this property and expect to finalize this phase and close during the second quarter of 2007.

New Division Office
We are planning to build a new operations center for our Northeast division on land we are currently own. We are in the process of developing and finalizing the building plans, and expect to begin construction sometime in 2007. The cost is expected to be $750,000 and should be completed in early 2008.

Storm Related Expenditures
Regulators continue to focus on hurricane preparedness and storm recovery issues for utility companies. Newly mandated storm preparedness initiatives could impact our operating expenses and capital expenditures later in 2007. The initial forecasts of these annual expenditures are approximately $700,000. It is possible that additional regulation and rules will be mandated regarding storm related expenditures over the next several years. We requested that the FPSC allow us to recover the cost of the newly mandated storm preparedness initiatives and to defer these storm-related expenditures until we receive recovery through a rate increase. If approved, both the recovery and expenditures may occur by mid-2007. If these expenditures are approved for rate recovery in 2007, these rates would be temporary until final rates were implemented as a result of an electric base rate proceeding.

Electric Base Rate Proceeding
We plan to file a request with the FPSC in the third quarter of 2007 for a base rate increase in our electric segment. This request will include recovery of increased expenses and capital expenditures since our last rate proceeding in 2004, as well as additional storm-related expenditures as discussed above. Finalization of this request and approval, if any, of an electric base rate increase would not occur until early 2008. Possible interim rate relief for partial recovery of the increased expenditures may occur in late 2007.

Impact of Recent Accounting Standards

Financial Accounting Standard No. 159

In February 2007, the Financial Accounting Standards Board (FASB) issued Statement No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities". This Statement permits measurement at fair value of certain firm commitments, nonfinancial insurance contracts and warranties, host financial instruments and recognized financial assets and liabilities, excluding consolidating investments in subsidiaries, consolidating variable interest entities, various forms of deferred compensation agreements, leases, depository institution deposit liabilities and financial instruments included in shareholders' equity. This Statement is effective for financial statements issued for fiscal years beginning after November 15, 2007. The Company expects to adopt SFAS No. 159 effective January 1, 2008. The Company does not believe adoption of this Statement will have a material impact on our financial condition or results of operation.

Forward-Looking Statements (Cautionary Statement)

This report contains forward-looking statements including those relating to the following:

- Based on our current expectations for cash needs, including cash needs relating to the possible land purchase and related construction, we may choose to consider an equity or debt financing in 2007 or 2008.
- Our anticipation of continued compliance in the foreseeable future with our LOC covenants.
- Construction expenditures for the remainder of 2007 may increase by $4 to $6 million over the same period in 2006 if we are successful in negotiating the purchase of the land for our South Florida operations.
- Our expectation that cash requirements will increase significantly in the future due to environmental clean-up costs, sinking fund payment on long-term debt and pension contributions.
- Our belief that cash from operations, coupled with short-term borrowings on our LOC, will be sufficient to satisfy our operating expenses, normal construction expenditure and dividend payments through spring of 2008.
- Our 2006 and 2005 over-earnings liability in natural gas will materialize as estimated after the FPSC review and audit.
- We expect there will be no impairment of either reporting segment upon finalization of our impairment testing in 2007.
- We expect higher fuel costs beginning in 2008 for our Northwest electric divisions.
- The development in Indiantown will occur as estimated.
- Storm related expenditures may be necessary beginning in 2007 and the total cost may be significant. We may receive recovery for these expenditures.
- The purchase of land for our new South Florida division office may occur in 2007.

- We expect to file for an electric base rate increase in the third quarter of 2007 and finalization is expected in early 2008. Final rates, if approved by the FPSC, would not occur until 2008.
- We anticipate capital expenditures of approximately $750,000 for the construction of an office building in Northeast Florida. Construction will begin in 2007 and completed in early 2008.

These statements involve certain risks and uncertainties. Actual results may differ materially from what is expressed in such forward-looking statements. Important factors that could cause actual results to differ materially from those expressed by the forward-looking statements include, but are not limited to, those set forth in "Risk Factors" below and in our Form 10-K for the year ending December 31, 2006.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

All financial instruments held by us were entered into for purposes other than for trading. We have market risk exposure only from the potential loss in fair value resulting from changes in interest rates. We have no material exposure relating to commodity prices because under our regulatory jurisdictions, we are fully compensated for the actual costs of commodities (natural gas and electricity) used in our operations. Any commodity price increases for propane gas are normally passed through monthly to propane gas customers as the fuel charge portion of their rate.

None of our gas or electric contracts are accounted for using the fair value method of accounting. While some of our contracts meet the definition of a derivative, we have designated these contracts as "normal purchases and sales" under SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities".

On a rolling four-quarter basis, we will purchase a "cap" on approximately one-third of our forecast propane volume purchases and pre-buy or hedge with a swap one-third of our forecast anticipated propane purchases. The remaining one-third will fluctuate with the market price. Our energy strategy allows us to participate in two-thirds of price declines but only one-third of price increases. As of March 31, 2007, we have not entered into any hedging activities. When we do enter into hedging activities, we will determine whether they meet the definition of normal sales and purchases and if not, we will determine whether we should use hedge accounting.

We have no exposure to equity risk, as we do not hold any equity instruments. Our exposure to interest rate risk is limited to investments held for environmental costs, the long-term notes receivable from the sale of our water division and short-term borrowings on the line of credit. The investments held for environmental costs are short-term fixed income debt securities whose carrying amounts are not materially different than fair value. The short-term borrowings were approximately $2.2 million at the end of March 2007. We do not believe we have material market risk exposure related to these instruments. The indentures governing our two first mortgage bond series outstanding contain "make-whole" provisions (pre-payment penalties that charge for lost interest), which render refinancing impracticable.

Item 4. Controls and Procedures

Disclosure Controls and Procedures

Our management carried out an evaluation, under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, of the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act). Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer as of March 31, 2007, concluded that our disclosure controls and procedures were effective, in that they provide reasonable assurance that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

Changes in Internal Control over Financial Reporting

No change in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) occurred during the fiscal quarter ended March 31, 2007 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

None.

Item 1A. Risk Factors

No new risk factors have been identified outside of those included in our most recent Form 10-K for the year ending December 31, 2006. You should read the risk factors contained within the 10K in conjunction with this report.

Item 6. Exhibits

3.1 Amended Articles of Incorporation (incorporated herein by reference as Exhibit 3.1 to our quarterly report on Form 10-Q for the period ended June 30, 2002).

3.2 Amended By-Laws (incorporated herein by reference as Exhibit 3(ii) to our quarterly report on Form 10-Q for the period ended June 30, 2002).

4.1 Indenture of Mortgage and Deed of Trust of FPU dated as of September 1, 1942 (incorporated by reference herein to Exhibit 7-A to Registration No. 2-6087).

4.2 Fourteenth Supplemental Indenture dated September 1, 2001 (incorporated by reference to exhibit 4.2 on our annual report on Form 10-K for the year ended December 31, 2001).

4.3 Fifteenth Supplemental Indenture dated November 1, 2001 (incorporated by reference to exhibit 4.3 on our annual report on Form 10-K for the year ended December 31, 2001).

10.1 Amendment to Electric Service Contract by and between JEA and FPU dated September 25, 2006.

10.2 Amended Security Agreement and Promissory Note between FPU and Bank of America dated August 25, 2006.

31.1 Certification of Chief Executive Officer (CEO) per Section 302 of the Sarbanes-Oxley Act of 2002.

31.2 Certification of Chief Financial Officer (CFO) per Section 302 of the Sarbanes-Oxley Act of 2002.

32 Certification of Principal Executive Officer and Principal Financial Officer per Section 906 of the Sarbanes-Oxley Act of 2002.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

Subject: 2007 1st quarter audit
Attachments: image001.jpg; 10Q checklist.xls; AUDIT_10k.xls; image001.jpg

Good morning, everyone!

Please find attached the 1st quarter 2007 checklist. Please review all three tabs and let me know if there are any items that need to be reassigned. As the audit progresses, and as you have time available, we may reassign...

Also, please familiarize yourself with the Audit_10k file. Each accountant will be responsible to enter variance analysis for their accounts. The attached file is an example from last quarter. I will let you know after the quarter has been closed when the working file is ready for your input.

If you have any questions, please give me a call!

Thank you,
April Lundgren

Florida Public Utility Company
December Revenue Variance
December 31, 2006

Purpose: Reasonableness of revenue accounts variance during the year.

Procedure: Obtained 13 month financial statements in Excel for both 2005 and 2006.
Using auto filter, all the revenue accounts were filtered (account numbers with 4000)
Compared activity 12/06 to activity 12/05 and investigated increases >77,250.

Scope: >77,250

Florida Public Utility Company
December Revenue Variance
December 31, 2005

Pg. 1 of 2

Purpose: Reasonableness of revenue accounts variance during the year.

Procedure: Obtained 13 month financial statements in Excel for both 2005 and 2006.
Using auto filter, all the revenue accounts were filtered (account numbers with 4000)
Compared activity 12/05 to activity 12/06 and investigated increases >81,750.

Scope: >81,750

Comments Dec '05 & Jan '06	Comments 13 Mo Ave & Dec 05
N/A	N/A
Increased Fuel Costs (3%) and Volume (15%)	N/A
Fuel Rev for NW inc 9% while fuel costs dec 10% (CY)	N/A
Timing of Billing Cycle	N/A
Dec 2005 there was a $52K adj to correct 2005 (NB)	N/A
Higher Fuel Cost (14%)	N/A
Increased Volume (24%) & Higher Fuel Cost (14%)	Seasonality & Higher Fuel costs (Avg = .91 v Dec 05 = 1.14334) 26%
Increased Volume (14%) & Higher Fuel Cost (14%)	Seasonality & Higher Fuel costs (Avg = .91 v Dec 05 = 1.14334) 26%
Higher Fuel Cost (14%)	Seasonality & Higher Fuel costs (Avg = .91 v Dec 05 = 1.14334) 26%
Included in $421K is a $299K bal trans from U/R. The remaining $122K is due to a 11% inc in rev fron Dec 05 to Jan 06 and a 4% dec in consv costs. (CY)	N/A
SF NG has an est $182K for the 4th Qrt of 2005 (booked in Dec). There were no O/E booked for Jan 06. (CY)	Rate Refund estimated and booked quarterly if necessary
Increased Volume (43%) due to weather, Higher Fuel Cost (14%)	N/A
Increased Volume (43%) due to weather, Higher Fuel Cost (14%)	Seasonality & Higher Fuel costs (Avg = .91 v Dec 05 = 1.14334) 26%
Increased Volume (38%) due to weather, Higher Fuel Cost (14%)	N/A
Increased Volume (24%) due to weather, Higher Fuel Cost (14%)	Seasonality & Higher Fuel costs (Avg = .91 v Dec 05 = 1.14334) 26%
Timing of Billing Cycle	
Includes a $382K bal trans from U/R. The remaining $15K in in O/R due to a 20% inc in Consv Rev offset partially by a 30% inc in Consv Costs. (CY)	N/A

Analytical Comments
Y/e 12.31.2006

Variances $77,250 & 10%

	Account	2006	2005	Amount Changed	%	EXPLANATION
Doreen	991-4000.4802 RESIDENTIAL BULK SAL	(1,278,314.00)	(927,821.00)	(350,493.00)	38%	The increase in residential bulk sales is attributable to customer growth of 31% (Community Gas Systems being built-out), which contributed to an increase in units sold of 27% over prior year. The customer growth and increase sales were sufficient to offset the decrease in usage per customer (3%) resulting from milder weather.
Doreen	991-4000.4812 COMM.& INDUS. SALES	(2,390,010.00)	(2,172,193.00)	(217,817.00)	10%	Customer growth (3%) and margin increases (12%) were sufficient to counter the reduction in usage due to warmer weather.
Doreen	993-4000.4802 RESIDENTIAL SALES -	(663,348.00)	(564,514.00)	(98,834.00)	18%	Customer growth (21%) and margin increases (8%) were sufficient to counter the reduction in usage per customer (10%) due to warmer weather.
Doreen	993-4000.4812 COMM & INDUS. SALES	(366,915.00)	(281,415.00)	(85,500.00)	30%	Customer growth (15%) and margin increases (12%).
Doreen	995-4000.4812 COMM.& INDUS. SALES	(1,222,412.00)	(1,053,109.00)	(169,303.00)	16%	The increase in customers (8%) and margin (19%) were sufficient to offset the decrease in usage per customer (10%) and units sold (2%). The decrease in customer usage is attributable to milder weather. For bulk customers the timing of deliveries is also a contributing factor to variances.
	12 Propane revenue	(5,920,999.00)	(4,999,052.00)	(921,947.00)	18%	Customer growth and margin increases contributed to the increase in revenues, even with warmer weather than the prior year.

Analytical Comments **Variances $77,250 & 10%**
Y/e 12.31.2006

	Account	2006	2005	Amount Changed	%	EXPLANATION
Doreen	991-4000.4802 RESIDENTIAL BULK SAL	(1,278,314.00)	(927,821.00)	(350,493.00)	38%	The increase in residential bulk sales is attributable to customer growth of 31% (Community Gas Systems being built-out), which contributed to an increase in units sold of 27% over prior year. The customer growth and increase sales were sufficient to offset the decrease in usage per customer (3%) resulting from milder weather.
Doreen	991-4000.4812 COMM.& INDUS. SALES	(2,390,010.00)	(2,172,193.00)	(217,817.00)	10%	Customer growth (3%) and margin increases (12%) were sufficient to counter the reduction in usage due to warmer weather.
Doreen	993-4000.4802 RESIDENTIAL SALES -	(663,348.00)	(564,514.00)	(98,834.00)	18%	Customer growth (21%) and margin increases (8%) were sufficient to counter the reduction in usage per customer (10%) due to warmer weather.
Doreen	993-4000.4812 COMM & INDUS. SALES	(366,915.00)	(281,415.00)	(85,500.00)	30%	Customer growth (15%) and margin increases (12%).
Doreen	995-4000.4812 COMM.& INDUS. SALES	(1,222,412.00)	(1,053,109.00)	(169,303.00)	16%	The increase in customers (8%) and margin (19%) were sufficient to offset the decrease in usage per customer (10%) and units sold (2%). The decrease in customer usage is attributable to milder weather. For bulk customers the timing of deliveries is also a contributing factor to variances.
	12 Propane revenue	(5,920,999.00)	(4,999,052.00)	(921,947.00)	18%	Customer growth and margin increases contributed to the increase in revenues, even with warmer weather than the prior year.

December Revenue Variance
December 31, 2006

Not Available

Purpose: Reasonableness of revenue accounts variance during the year.

Procedure: Obtained 13 month financial statements in Excel for both 2005 and 2006.
Using auto filter, all the revenue accounts were filtered (account numbers with 4000)
Compared activity 12/06 to activity 12/05 and investigated increases >77,250.

Scope: >77,250

Florida Public Utility Company
December Revenue Variance
December 31, 2005

/ →

Purpose: Reasonableness of revenue accounts variance during the year.

Procedure: Obtained 13 month financial statements in Excel for both 2005 and 2006.
Using auto filter, all the revenue accounts were filtered (account numbers with 4000)
Compared activity 12/05 to activity 12/06 and investigated increases >81,750.

Scope: >81,750

Comments Dec '05 & Jan '06	Comments 13 Mo Ave & Dec 05
N/A	N/A
Increased Fuel Costs (3%) and Volume (15%)	N/A
Fuel Rev for NW inc 9% while fuel costs dec 10% (CY)	N/A
Timing of Billing Cycle	N/A
Dec 2005 there was a $52K adj to correct 2005 (NB)	N/A
Higher Fuel Cost (14%)	N/A
Increased Volume (24%) & Higher Fuel Cost (14%)	Seasonality & Higher Fuel costs (Avg = .91 v Dec 05 = 1.14334) 26%
Increased Volume (14%) & Higher Fuel Cost (14%)	Seasonality & Higher Fuel costs (Avg = .91 v Dec 05 = 1.14334) 26%
Higher Fuel Cost (14%)	Seasonality & Higher Fuel costs (Avg = .91 v Dec 05 = 1.14334) 26%
Included in $421K is a $299K bal trans from U/R. The remaining $122K is due to a 11% inc in rev fron Dec 05 to Jan 06 and a 4% dec in consv costs. (CY)	N/A
SF NG has an est $182K for the 4th Qrt of 2005 (booked in Dec). There were no O/E booked for Jan 06. (CY)	Rate Refund estimated and booked quarterly if necessary
Increased Volume (43%) due to weather, Higher Fuel Cost (14%)	N/A
Increased Volume (43%) due to weather, Higher Fuel Cost (14%)	Seasonality & Higher Fuel costs (Avg = .91 v Dec 05 = 1.14334) 26%
Increased Volume (38%) due to weather, Higher Fuel Cost (14%)	N/A
Increased Volume (24%) due to weather, Higher Fuel Cost (14%)	Seasonality & Higher Fuel costs (Avg = .91 v Dec 05 = 1.14334) 26%
Timing of Billing Cycle	
Includes a $382K bal trans from U/R. The remaining $15K in in O/R due to a 20% inc in Consv Rev offset partially by a 30% inc in Consv Costs. (CY)	N/A

QUESTIONNAIRE
y/e 12/31/2007

	1st Qtr YES / NO / NA / WP REF	2nd Qtr YES / NO / NA / WP REF	3rd Qtr YES / NO / NA / WP REF	4th Qtr YES / NO / NA / WP REF
A. General				
1. Have the general ledger control accounts been agreed to or reconciled with subsidiary records?	Yes			
2. Have all accounts and transactions been reflected in the books and records?	Yes			
3. Were all significant journal entries or other adjustments in the period properly recorded?	Yes			
4. Were all significant transactions that have occurred or been recognized in the last several days of the interim period properly recorded?	Yes except immaterial on list			
5. Were any uncorrected misstatements identified during the previous audit or interim review recorded or recognized in this period?	Yes			
6. Have the financial statements been prepared on a basis consistent with:				
a. GAAP	Yes			
b. The corresponding period of the preceding year?	Yes			
c. The preceding period of the current year if separately disclosed?	Yes			
d. The most recent annual financial statements?	Yes			
7. Have business activities remained substantially unchanged from those of the periods mentioned in A.6?	Except as in Q			
8. Have accounting and reporting practices and methods of applying them remained substantially unchanged from those of the periods mentioned in A.6?	yes			
9. Have all unusual or complex situations been identified and all issues resolved and disclosed as required? (e.g., business combinations, restructuring charges, etc. -- see Appendix A)	Yes			
10. Was the design or operation of internal control relating to the annual or interim financial information substantially unchanged (consider policies, procedures, and personnel)?	Yes			
11. Were significant deficiencies or material weaknesses in internal controls that were discovered in this period (and any issues of disclosure and reporting arising from them) properly communicated / disclosed to the audit committee, and in Form 10-Q?	NA			
12. Have events that occurred subsequent to the balance sheet date that would require adjustment to, or disclosure in, the interim financial statements been properly accounted for and/or disclosed?	yes			
13. Have any instances of fraud or allegations of fraud or suspected fraud affecting the entity involving management, employees who have significant roles in internal control, or others where fraud could have a material effect on the financial statements arising in this period been fully investigated, resolved, and properly communicated and disclosed to the audit committee or in Form 10-Q?	Yes			
14. Have any communications from regulatory agencies that may call into question compliance with regulatory policy or otherwise indicate business risks been analyzed and any issues arising been satisfactorily resolved?	na			
15. Have actions taken at stockholder, directors, committees of directors, or comparable meetings that affect the interim financial statements been properly reflected and/or disclosed therein?	yes			
16. Do the interim financial statements appropriately reflect any plans or intentions that may materially affect the carrying amounts or classification of assets and liabilities?	yes			
17. Were related parties and related party transactions substantially unchanged?	yes			
18. Have material transactions between or among related parties (e.g., sales, purchases, loans, or leasing arrangements) been properly disclosed in Form 10-Q?	yes			
19. Have all uncertainties, including going concern matters, that could have a material effect on the interim financial statements, and changes in the status of previously disclosed material uncertainties, been properly disclosed in Form 10-Q?	yes			
20. Are barter or other nonmonetary transactions properly recorded and disclosed in the Form 10-Q?	yes			
21. Were material adjustments other than normal recurring accruals appropriately disclosed in Form 10-Q?	yes			
22. Do the interim financial statements appropriately reflect new accounting pronouncements?	Yes			
23. Were disclosures in Form 10-Q sufficient so as not to be misleading, as required by APB 28 and Rule 10-01 of Reg S-X, including the following matters, if applicable:				
a. Significant events or transactions during the period (e.g., those affecting results of operations or	Yes			
b. The status of material contingencies? [Regulation S-X requires disclosure of material contingencies, even if no significant change since year end has occurred -- see Reg. § 210.10-01 (a)(5)]	Yes			
c. Unusually large changes in leases or other commitments?	Yes			
d. Unusually large changes in short-term borrowings?	Yes			
e. Basis of allocating major elements of costs and expenses to interim periods?	Yes			
f. Unusual relationship between income tax expense and income before taxes?	Yes			
g. Pro forma and other disclosures as required in FAS 148 relating to stock-based compensation?	Yes			
h. Other significant matters?	Yes			
24. Does Form 10-Q information comply with SEC instructions?	Yes			
25. Have trends or developments affecting accounting estimates, such as allowances for bad debts and excess or obsolete inventories, provisions for warranties and employee benefits, and realization of unearned income and deferred charges, been assessed and any identified issues satisfactorily resolved?	Yes			
26. Were the provisions of stock compensation plans substantially unchanged from the prior period?	Yes			
27. Have restructuring charges taken in the current quarter been properly recorded and disclosed in Form 10-Q?	NA			
28. If any entities, other than the reporting entity, are commonly controlled by the owners, has an evaluation been performed to determine whether those other entities should be consolidated into the interim financial statements of the reporting entity?	Na except Flogas			
29. If there are any entities other than the reporting entity in which the owners have significant investments (for example, variable interest entities), has an analysis been performed to determine whether the reporting entity is the primary beneficiary related to the activities of those other entities?	NA			
B. Cash and Cash Equivalents				
1. Is the entity's policy regarding the composition of cash and cash equivalents in accordance with SFAS 95, paragraphs 7-10, applied on a consistent basis?	Yes			
2. Have all cash and cash equivalents accounts been reconciled and properly adjusted on a timely basis?	Yes			
3. Have old or unusual reconciling items between bank balances and book balances been reviewed and adjustments made where necessary?	Yes			
4. Has there been a proper cutoff of cash receipts and disbursements?	yes			
5. Has a reconciliation of intercompany transfers been prepared and have all transfers been recorded in the proper periods?	yes			
6. Have checks written but not mailed as of the end of the period been properly reclassified as liabilities?	yes			

y/e 12/31/2007

	1st Qtr YES / NO / NA / WP REF	2nd Qtr YES / NO / NA / WP REF	3rd Qtr YES / NO / NA / WP REF	4th Qtr YES / NO / NA / WP REF
7. Have material bank overdrafts been properly reclassified as liabilities?	yes			
8. Has reclassification as noncurrent assets been considered for any cash and cash equivalents balances that are subject to compensating balance and/or other restrictive arrangements?	Yes			
9. Have significant cash funds been counted and reconciled with control accounts?	Yes			
C. Receivables				
1. Have terms of sale remained substantially unchanged from those in effect during the periods mentioned in A.6?	Yes			
2. Have sales credits and customer claims been normal in the period under review and in the period subsequent to the balance sheet date, in relation to the periods mentioned in A.6?	yes			
3. Have uncollectible receivables been written off through a charge against the allowance account or earnings?	yes			
4. Has an adequate allowance been properly reflected in the interim financial statements for all accounts (i.e., past due or disputed accounts and for all other accounts), based on experience?	yes			
5. Has interest earned on receivables been properly reflected in the interim financial statements?	yes			
6. Have receivables from employees, stockholders, affiliated organizations, or other related parties been appropriately disclosed in Form 10-Q?	yes			
7. Have receivables from stockholders or other owners been evaluated to determine whether they should be reflected in the equity section, rather than the asset section, of the balance sheet?	Yes			
8. Has proper disclosure been made of receivables that are pledged, discounted, factored, or collateralized, and are any recourse provisions properly reflected in Form 10-Q?	yes			
9. Have receivables been properly classified as to current and long-term?	yes			
10. Has there been a proper cutoff of sales transactions, credit memos, and other sales adjustments?	yes			
D. Inventory				
1. Have major products and methods of production remained substantially unchanged from those periods mentioned	yes			
2. Are physical inventory counts performed on a regular basis, including at the end of the reporting period, and are the count procedures adequate to ensure an appropriate count? (If so, describe the procedures used to take the latest physical inventory and indicate the date on which it was taken. If not, describe or reference the method for determining inventories for purposes of presentation in the interim financial statements, and document the reasonableness of the method used.)	annually			
3. If physical inventories were taken at a date other than the date of the interim financial statements, were appropriate procedures used to record changes in inventory between the date of the physical inventory counts and the date of the financial statements?	yes			
4. Have general ledger control accounts been adjusted to agree with the physical inventory count? (If so, indicate whether the adjustments were significant.)	yes as reconciled			
6. Has the method of pricing been consistently applied with that of the periods mentioned in A.6?	yes			
7. Is the basis of valuing inventory for purposes of presentation in the interim financial statements appropriate under the circumstances?	yes			
8. Does inventory cost include material, labor and, if applicable, overhead?	yes			
9. Were consignments in or out considered in taking physical inventories?	na			
10. Has inventory been reviewed for obsolescence or cost in excess of net realizable value? (If so, indicate how these costs are reflected in the interim financial statements.)	yes			
11. Have proper cutoffs of purchases, goods in transit, returned goods and shipments been made?	yes			
12. Has appropriate accrual and disclosure been made in Form 10-Q of the amount of LIFO liquidation expected to be replaced by year-end?	na			
13. Has scrap been adequately inventoried and controlled?	na			
E. Prepaid Expenses				
1. Are the amounts included in prepaid expenses appropriate and properly amortized?	yes			
F. Investments				
1. Is the basis of accounting for investments reported in the interim financial statements appropriate? (Describe the basis of accounting for each type of investment — e.g., securities, joint ventures, closely-held businesses, etc.)	yes			
2. Are investments in marketable debt and equity securities properly classified as trading, available-for-sale, or held-to-maturity?	yes			
3. Were fair values of investments, and unrealized gains and losses, properly recognized in the interim financial statements and in Form 10-Q? (Describe how fair values were determined.)	yes			
4. If the fair values of marketable debt and equity securities are less than cost, have the declines in value been evaluated to determine whether the declines are other-than-temporary, and, if so, have the carrying values of the investments been appropriately adjusted?	yes			
5. For any debt securities classified as held-to-maturity, does management have the positive ability and intent to hold the securities until they mature, and, if so, have those debt securities been properly measured?	yes			
6. Have gains and losses related to disposal of investments been properly recognized in the interim financial statements?	yes			
7. Has investment income been properly recognized in the interim financial statements?	yes			
8. Have investments been properly classified as current or noncurrent?	yes			
9. For business combinations and investments made by the reporting entity, have consolidation, equity, or cost method accounting requirements been appropriately considered?	yes			
10. Have loans and advances between affiliated companies been reconciled?	yes			
11. Are investments unencumbered?	yes			
G. Property and Equipment				
1. Are property and equipment items properly stated at depreciated cost or other proper value?	yes			
2. Are physical inventories of property and equipment taken on a periodic basis? (If so, indicate the last time such an inventory was taken)	yes, see schedule, different for each area			
3. Have any items of property and equipment that are held for sale been properly reclassified from property and equipment and accounted for in accordance with FAS 144 and other applicable literature?	yes			
4. Have gains or losses on disposal of property or equipment been properly reflected in Form 10-Q?	yes			

y/e 12/31/2007

	1st Qtr YES / NO / NA / WP REF	2nd Qtr YES / NO / NA / WP REF	3rd Qtr YES / NO / NA / WP REF	4th Qtr YES / NO / NA / WP REF
5. Have the criteria for capitalization of property and equipment been consistently and appropriately applied? (Describe such criteria)	Yes- see FA rules			
6. Are repairs and maintenance costs properly reflected as an expense in the income statement?	yes			
7. Are the depreciation methods and rates appropriate and consistently applied? (Describe the methods and rates utilized in the interim financial statements)	yes composite			
8. Are all additions, retirements, abandonments, sales, or trade-ins properly recorded?	yes			
9. Are lease agreements and related commitments properly accounted for and disclosed in Form 10-Q?	yes			
10. For any asset retirement obligations associated with tangible long-lived assets, has the recorded amount of the related asset been increased because of the obligation and is the liability properly reflected in the liability section of the balance sheet?	na			
11. If the entity has constructed any of its property and equipment items, have all components of cost been reflected in measuring these items for purposes of presentation in Form 10-Q, including, but not limited to, capitalized interest?	yes			
12. Has the impairment loss related to any significant impairment in value of property and equipment items been assessed and properly reflected in Form 10-Q?	no impairment			
13. Are any mortgages or other encumbrances on property or equipment items substantially unchanged from the prior period?	yes			
H. Intangibles and Other Assets				
1. Are the amounts included in other assets appropriate and calculated on a consistent basis?	yes			
2. Do these assets represent costs that will benefit future periods?	yes			
3. Is the amortization policy related to these assets appropriate and substantially unchanged from the prior period?	yes			
4. Have other assets been properly classified between current and noncurrent?	yes			
5. If a business combination occurred during the period, have all intangible assets arising from contractual, seperable, or other legal rights been properly recognised as assets from goodwill?	na			
6. Are intangible assets with finite lives being appropriately amortized?	yes			
7. Are the costs associated with computer software properly reflected as intangible assets (rather than property and euipment) in the interim financial statements?	yes			
8. Are the costs associated with goodwill (and other intangible assets with indefinite lives) properly reflected as intangible assets in Form 10-Q, and has amortization ceased related to these assets?	yes			
9. Has the impairment loss related to any significant impairement in value of these assets been assessed and properly reflected in Form 10-Q	no impairment			
10. Are any mortgages or other encumbrances on intangibles or other assets substantially unchanged from the prior period?	yes			
I. Accounts and Short-Term Notes Payable and Accrued Liabilities				
1. Does the subsidiary accounts payable ledger agree with the control account in the general ledger?	yes			
2. Have all significant payables been reflected in Form 10-Q?	yes			
3. Have all significant accruals (e.g., payroll, interest, provisions for pension and profit-sharing plans, or other postretirement benefit obligations) been properly reflected in Form 10-Q, and was the method of determining accrued liabilities consistent with the periods mentioned in A 6?	yes			
4. Has a liability for employees' compensation for future absences been properly accrued and disclosed in Form 10-Q?	yes			
5. Has a review been made by the client to determine whether any unrecorded liabilities exist?	yes			
6. Have loans from financial institutions and other short-term liabilities been properly classified in the interim financial statements?	yes			
7. Are collateralized or subordinated liabilities substantially unchanged from the prior period?	yes			
8. Are payables to employees, stockholders, affiliated companies, etc. substantially unchanged from the prior period?	yes			
9. Were warranty reserves, product guarantees, and similar loss contingencies accounted for properly?	yes			
10. Were provisions in major contracts with suppliers substantially unchanged from the prior period?	yes			
J. Long-term Liabilities				
1. Are the terms and other provisions of long-term liability agreements substantially unchanged from the prior period?	yes			
2. Have liabilities been properly classified between current and non-current? (Consider the impact, if any, of EITF 95-22 regarding revolving credit agreements that include a subjective acceleration clause and lockbox arrangement.)	yes			
3. Has interest expense been properly accrued and reflected in Form 10-Q?	yes			
4. Has noncompliance with loan covenants or agreements been properly disclosed in Form 10-Q?	na			
5. Are borrowing arrangements, including collateral or subordination provisions, substantially unchanged from the prior period?	yes			
6. Have any obligations that, by their terms, are due on demand within one year from the balance sheet date been properly reclassified into the current liability section of the balance sheet?	yes			
7. Has convertible debt been properly recognized in the interim financial statements (e.g., beneficial conversion features)?	na			
K. Income and Other Taxes				
1. Do the interim financial statements reflect an appropriate provision for current and prior period income taxes payable (consider the effect of the AMT and Uniform Capitalization Rules, and other relevant tax laws and regulations)?	yes			
2. Have all assessments or reassessments received been properly accounted for and/or disclosed in Form 10-Q?	yes			
3. Have the effects of tax authority examinations currently in process been properly accounted for and/or disclosed in Form 10-Q?	yes			
4. If there are temporary differences between book and tax amounts, have deferred taxes on these differences been properly reflected in Form 10-Q?	yes			
5. Do the interim financial statements reflect an appropriate provision for taxes other than income taxes (e.g. franchise, sales)?	yes			
6. Have all required tax payments been made on a timely basis?	yes			
L. Other Liabilities, Contingencies and Commitments				
1. Are the amounts included in other liabilities appropriate and calculated on a consistent basis?	yes			
2. Have other liabilities been properly classified between current and noncurrent?	yes			
3. Are any guarantees, whether written or verbal, whereby the entity must stand ready to perform or is contingently liable related to the guarantee, properly reflected in Form 10-Q?	yes			

y/e 12/31/2007

	1st Qtr YES / NO / NA / WP REF	2nd Qtr YES / NO / NA / WP REF	3rd Qtr YES / NO / NA / WP REF	4th Qtr YES / NO / NA / WP REF
4. Have all material contingent liabilities (e.g., discounted notes, drafts, endorsements, warranties, litigation, unsettled asserted claims, taxes in dispute, etc.) been properly measured and disclosed in Form 10-Q? (Refer to Reg S-X Reg 10-01 (a) (5))	yes			
5. Have all matters concerning litigation, claims, and assessments been properly accounted for and disclosed in Form 10-Q, and have all unasserted potential claims been disclosed in accordance with SFAS 5 (if the client cannot represent to us the absence of contingencies, litigation, or unasserted claims, we should direct this inquiry to legal counsel)?	yes			
6. Are all material contractual obligations for construction, purchase, or lease of property and equipment; commitments or options to purchase or sell company securities; employment contracts, etc. substantially unchanged from the prior period?	yes			
7. Were terms of debt that may affect classification substantially unchanged from the prior period?	yes			
8. Has any environmental remediation liability for which the entity is responsible been properly measured and disclosed in Form 10-Q?	yes			
9. If the entity has any agreement to repurchase items that previously were sold, have the repurchase agreements been taken into account in determining the appropriate measurements and disclosures in Form 10-Q?	na			
10. Have any sales commitments at prices expected to result in a loss at the consummation of the sale, or long-term sales contracts on which losses may be incurred, been properly reflected in Form 10-Q?	na			
11. Have the effects of any violations, or possible violations, of laws or regulations been appropriately considered for accrual or disclosure in Form 10-Q?	na			
M. Equity				
1. Have all significant changes in equity accounts (including consideration of contingent compensation awards, beneficial conversion features, stock compensation, etc.) during each reporting period been properly reflected in Form 10-Q?	yes			
2. Do amounts of outstanding shares of stock (or other ownership interests) agree with subsidiary records?	yes			
3. Have any mandatorily redeemable ownership interests been evaluated to determine whether such interests should be measured and reclassified to the liability section of the balance sheet, and are redemption features associated with ownership interests substantially unchanged from the prior period?	na			
4. Are direct costs of raising capital (e.g. legal and accounting fees related to stock issuances or limited partnership syndications) properly reflected in Form 10-Q as a reduction of equity (rather than an asset), once the offering is complete, or, if consummation of the offering is not probable of the offering has been aborted, were such costs	yes			
5. Have all treasury stock acquisitions been properly accounted for and reflected in the financial statements as a reduction in equity, and in accordance with applicable state laws?	yes			
6. Have earnings per share been properly calculated?	yes			
7. Have restrictions or appropriations on retained earnings or other capital accounts been properly reflected in the interim financial statements?	yes			
N. Revenue and Expenses				
1. Were the policies for revenue recognition and allocation of major elements of costs and expenses appropriate and consistent with the policies used in the periods mentioned in A.6?	yes			
2. Have revenues from sales of products and rendering of services been recognized in the appropriate reporting period (i.e., when the products have been delivered and when the services have been performed)?	yes			
3. Did any sales recorded under a "bill and hold" arrangement meet the criteria to record the transaction as a sale?	na			
4. Have purchases and expenses been recognized in the appropriate reporting period (i.e., matched against revenue) and properly classified in the interim financial statements?	yes			
5. Have all extraordinary items, operations that were discontinued, accounting changes, and other unusual items been properly classified and disclosed in Form 10-Q?	yes			
6. Have any gains or losses that would necessitate the display of comprehensive income (e.g. gains/losses on available-for-sale securities or cash flow hedge derivatives) been properly displayed within comprehensive income (rather than included in the determination of net income)?	yes			
O. Derivatives				
1. Have significant contracts (e.g., sales, purchase, lease or other general business contracts) been reviewed to determine if contracts are derivatives, as defined by SFAS 133, or contain embedded derivatives?	yes			
2. Are all derivatives recorded as assets or liabilities at their fair values?	na			
3. For derivatives accounted for as hedges under SFAS 133, is documentation adequate and has a quarterly re-assessment been made?	yes			
4. Has appropriate disclosure been made of any derivatives, as required by SFAS 133?	yes

Pg. 2 of 2

This increased due to higher cumulative unbilled units recorded for 2006
This increased due to higher cumulative unbilled units recorded for 2006
Reduced by Storm Charges recovered from customers per Order PSC--05-1040 effective since 12/05
Reduced by Storm Charges recovered from customers per Order PSC--05-1040 effective since 12/05
There were $115K of general and auto liability paid claims in 2006 against the accruals
There were $115K of general and auto liability paid claims in 2006 against the accruals
Net of accrued liability of $1,289,452 per AON's estimate for 06 pension reserve and paid in $250,000 on 8/06
Net of accrued liability of $1,289,452 per AON's estimate for 06 pension reserve and paid in $250,000 on 8/06
This change is mainly due to higher number of unbilled days 392days in 2006 vs 372days in 2005 and a 1% higher unaccounted units in '06
This change is mainly due to an adj in Mar and Jun. Unbilled units were reduced by an adj to GSLD
and Unaccounted for %age to reflect a $29K change to Unbilled revenue. The rest is due to higher unbilled days in 2006
Also, in Dec. 2005, there was a $52K year end adjustment to correct 2005
920 increased 17% due to merit increases and additional Payroll for a FT HR and IT personnel
920 increased 20% due to merit increases and additional Payroll for a FT HR and IT personnel
Higher due to 40% of Storm recovery surcharges posted here per Order PSC--05-1040 effective since 12/05 JE19
Increased due merit increases, additional Payroll for a FT HR and IT personnel, and Exe. Insentives

Subject: expense

Where is the amount of bad debt expense we have projected vs what was in 2006? I would like to see those amounts.

Mehrdad can you check this JE first with the last quarter reclassification entries and see if you agree. I can check afterwards. Also, please assign, I thought we already did, but assign as necessary.

Thanks,

Cheryl Martin

Attached is JE 999. The only reclassification that I'm not 100% sure on is the reclass. of water receivable and Jack's Lake. Please double check that one for me. Also, I am working on a copy of the 4th qtr 10k on my PC and when the schedules are ready I will save it back on the P drive so that Nadira can work off it.

The link below is the audit schedules I've been automated. It is a shared file so everyone should be able to work off of it. The BS is not ready yet until the JE999 is in and the Jan 2007 IS variances will not be available until next month. For all the accounts, I put who was responsible for each based on the logs I was given. If someone finds an error as far as who is responsible for what account, just have them over write the formula and enter their name or position name in the appropriate field. That was just used as a guild for who is responsible for what account.

Let me know if you have any questions and also when JE 999 is posted.

Thanks,
Jennifer

FLORIDA PUBLIC UTILITIES COMPANY
CONDENSED CONSOLIDATED BALANCE SHEETS (UNAUDITED)
NOTES

RECLASSIFICATION AND ELIMINATION

A = Elimination of Plant Acquisition Adjs. and Reclassified to Natural & Bottled Gas and Electric Utility Plant.

B = Elimination of Contributions in Aid and Reclassified to Accum. Depr. & Amort and Water Utility Plant.

C = Elimination of Investment in Assoc. Co. and Reclassified to Common Stock and Treasury Stock.

D = Elimination of Working Funds and Reclassified to Cash.

E = Elimination of Receivable Assoc. Co. and Payable to Assoc. Co.

F = Elimination of Under/Over Recovery of Fuel and Reclassified to Under/Over Recovery.

G = Reclassified Debits to Taxes Accrued to Prepayments other - I/T. (.8 & .9 accounts)

H = Elimination of accum. def. income taxes asset and reclass. to accum. def. income taxes liab.

I = Elimination of OWIP - Environment cleanup to environmental reserve

J = Elimination of Under/Over Recovery of Conservation & Unbundling and Reclassified to Under/Over Recovery.

K = Reclassify plant acquisition adjustment from Intangible Assets to Plant.

M = Cost of Removal

N = Propane Asset Retirement Obligation

(Title of class)

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. [ ] Yes [X] No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. [ ] Yes [X] No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. [X] Yes [ ] No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. [X]

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer" and "large accelerated filer" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer [ ]   Accelerated filer [ ]   Non-accelerated filer [X]

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). [ ] Yes [X] No

As of June 30, 2006, the aggregate market value of the Registrant's Common Stock held by non-affiliates (based upon the closing price of the Common Stock on that date on the American Stock Exchange) was approximately $71,300,000.

On February 9, 2007, 6,024,739 shares of the Registrant's $1.50 par value common stock were outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the registrant's Proxy Statement for the May 8, 2007 Annual Meeting of Shareholders are incorporated by reference in Part III hereof.

PART I

Item 1. Business

General

Florida Public Utilities Company (FPU) was incorporated on March 6, 1924 and reincorporated on April 29, 1925 under the 1925 Florida Corporation Law. We provide natural gas, electricity and propane gas to residential, commercial and industrial customers in Florida. We do not produce energy and are not a generating utility. Our regulated segments sell natural gas and electricity to approximately 82,000 customers, and our unregulated segment sells propane gas through a wholly owned subsidiary, Flo-Gas Corporation, to approximately 13,000 customers. We also sell merchandise and other service related products on a limited basis as a complement to the natural and propane gas segments.

Our three primary business segments are aligned with our products and are natural gas, electric and propane gas. The Florida Public Service Commission (FPSC) regulates the natural gas and electric segments. We operate through five divisions based on geographic areas:

(1) South Florida Division - provides natural and propane gas to customers in West Palm Beach, Palm Beach Gardens, North Palm Beach, Jupiter, Riviera Beach, Palm Beach, Lake Worth, Royal Palm Beach, Wellington, Boynton Beach, Delray Beach, Boca Raton, Lauderdale Lakes, Deerfield Beach, Stuart, Palm City and other areas near these cities.
(2) Central Florida Division - provides natural and propane gas to customers in Sanford, Deland, Deltona, DeBary, Orange City, Lake Mary, Winter Springs, New Smyrna Beach, Edgewater, Longwood, Port Orange and other areas near these cities.
(3) Northwest Florida Division - provides electricity to customers in Marianna, Bristol, Altha, Cottondale, Malone, Alford and other areas near these cities.
(4) Northeast Florida Division - provides electricity and propane gas to customers in Fernandina Beach, Jacksonville, Callahan, Yulee and other areas near these cities.
(5) West Florida Division - provides propane gas to customers in Dunnellon, Inglis, Crystal River, Inverness, Brooksville and other areas near these cities.

Business Environment

Natural and propane gas are some of the most popular forms of energy today. Gas is used for heating, cooling, cooking, backup generation and decorative lighting by businesses and homeowners and in many other ways by various industries. Natural gas is also used in combination with other fuels to improve environmental performance and decrease pollution in the generation of electricity.

Natural and propane gas have seen increased demand in Florida as a result of the recent hurricanes and the popularity of generators. Generators themselves do not impact usage significantly for a region; however, gas appliances have been added as a result of generator popularity, and that does increase gas usage. Prices of natural and propane gas

have decreased during 2006 due in part to the absence of a hurricane affecting the Gulf of Mexico.

As a result of historically high natural gas costs in 2005, alternatives such as coal and nuclear power for generation of electricity have seen increased interest. Our sales in the electric segment have not been impacted by higher electricity costs due to our long-term favorable fixed price contracts for purchasing electricity. However, our long-term contract ended at the end of 2006 for our Northeast division and our long-term contract will end at the end of 2007 for our Northwest division. We now have new contracts in place with pricing much closer to current market price. Our electric prices are expected to significantly increase. Although this will not directly impact our income from operations because increased fuel costs are passed through to the customer, this may impact the number of units sold and decrease income from operations as a result of less usage.

Because of the hurricanes in 2004 and 2005, the electric industry in Florida has seen increased interest in improving reliability of electric services during and after hurricanes. Regulators have been researching the issue and have introduced new storm preparedness requirements to improve electric reliability with storm preparedness rules regarding pole inspections, strengthened design specifications for wind loading, vegetation management practices and installation of underground facilities for electric distribution and transmission systems. We are seeking rate relief and implementation for these new requirements in 2007.

Business Segments
We are organized in three operating and reporting segments: natural gas, electric and propane gas. We are also involved in limited merchandise sales and other services within our natural gas and propane gas areas to complement these segments. For information concerning revenues, operating income and identifiable assets of each of our segments, see Note 13 in Notes to Consolidated Financial Statements.

Natural Gas
Natural gas is primarily composed of methane, which is a colorless, odorless fuel that burns cleaner than many other traditional fossil fuels. Odorant is added to enable easy detection of a gas leak.

We provide natural gas to customers in our South and Central Florida divisions. The vast majority of the natural gas we distribute is purchased in the Gulf Coast region, both onshore and offshore.

We use Florida Gas Transmission (FGT) as our natural gas pipeline in peninsular Florida. FGT is under the jurisdiction of the Federal Energy Regulatory Commission (FERC). We use gas marketers and producers to procure all gas supplies for our markets. We use Florida City Gas and Indiantown Gas Company to provide wholesale gas transportation services in areas distant from our interconnections with FGT. We pass all fuel costs on to our customers. We also transport natural gas for customers who purchase their own gas supplies and arrange for pipeline transportation. Our operating results are not adversely affected if our customers purchase gas from third parties because we do not profit on the fuel portion of sales.

Our natural gas revenues are affected by the rates charged to customers, supply costs for natural gas purchased for resale, economic conditions in our service areas and weather.

Although the FPSC permits us to pass through to customers the increase in price for our gas supply, higher rates may cause customers to purchase less natural gas.

Our current portfolio of natural gas customers is reasonably diverse, with the largest customer using natural gas for the generation of electricity. We are not dependent on any single natural gas customer for over ten percent of our total natural gas revenues.

The FPSC approved joint transportation and territorial agreements with Indiantown Gas Company in October 2006. We plan to transport natural gas through Indiantown's system to new developments. In the early phase, Indiantown Gas Company will provide operational and customer service related work. We also began construction in the Indiantown area to install natural gas mains in the first phase of a development for approximately 100 homes. Two more new developments are slated to break ground in 2007 for construction of approximately 1,000 homes.

Electric

We provide electricity to our customers in our Northwest and Northeast Florida divisions. Wholesale electricity is purchased from two suppliers; Gulf Power Company and JEA (formerly Jacksonville Electric Authority). In 1996, we executed ten-year fixed-price purchased power contracts with both suppliers. Gulf Power Company provides electric power to the Northwest division and JEA provides electric power to the Northeast division. These long-term contracts provided our customers with the lowest consumer electric rates in Florida.

During 2006 we completed negotiations and executed final contracts for the supply of electricity in our Northeast division from JEA beginning January 1, 2007 and our Northwest division from Gulf Power Company beginning in January 1, 2008. We are seeking approval of the contract with Gulf Power Company from the FPSC in 2007. We expect that rates charged to our customers will significantly increase when the new contracts become effective in 2007 and 2008 because the prices are closer to market price. We are unable to estimate what impact higher rates could have on electric consumption, but electricity usage could decrease.

The Northwest and Northeast divisions experience a variety of weather patterns. Hot summers and cold winters produce year-round electric sales that normally do not have highly seasonal fluctuations. None of the electric segment's customers represent more than ten percent of our total electric revenues.

The electric utility industry has not been deregulated in the state of Florida. All customers within a given service or franchise area purchase from a single electricity provider in that area.

Propane Gas

We provide propane gas to customers in our Northeast, West, Central and South Florida divisions and can purchase our propane gas supply from several different wholesale companies. Propane gas is delivered to Florida by barges and railcars to terminals in Tampa and Ft. Lauderdale, and through the Dixie Pipeline terminus at Alma and Albany, Georgia. Propane gas is also delivered by transport to our facilities and directly to a customer's premise. We believe that the propane gas supply infrastructure is adequate to meet the needs of the industry in Florida for the foreseeable future.

Propane gas is not as affected by environmental regulations as other petroleum products. However, propane gas is a hazardous material and as such is subject to strict code enforcement and safety requirements.

As with natural gas, the sales volume of propane gas is affected by the season and the weather. Typically, Florida has a tourist season that coincides with the winter months. The propane gas segment's sales volumes and revenues are closely balanced between residential and commercial customers. We employ two strategies to become less weather dependent, concentrating on the forklift propane gas cylinder exchange market and marketing propane gas appliances not used for heating air. We believe that water heaters and forklift cylinder exchange accounts are good ways to become less weather reliant. None of the propane gas segment's customers represent more than ten percent of our total propane gas sales volume or revenues.

Strategy

Our strategy is to leverage our expertise in the natural gas, electric and propane gas distribution business to assist us in consistently meeting our customer's expectations. Our core focus is to build mutually beneficial relationships with builders, developers and customers with high-energy usage requirements. Included in our strategy is a plan to enhance our future success by expanding our service territory into new areas with high growth potential.

Competition

We do not face substantial competition in our electric divisions. This is because no other competitor can currently provide the same energy in our areas due to FPSC regulations and territorial agreements between utilities. In addition, natural gas as an alternative fuel is only available in a small area served by our electric divisions. Although our natural gas segment operates with the same types of guidelines, there is competition in our natural gas segment from electric utilities. Normally each home will have electricity as a base fuel and natural gas as an alternative source of energy used for cooking and heating. Electricity competes with natural gas, in large part based on the cost of fuel. Our propane gas segment is unregulated and faces competition from other suppliers of propane gas as well as alternative energy source suppliers. Competition in the propane gas segment is primarily based on price and service.

Rates and Regulation

The natural gas and electric segments are highly regulated by the FPSC. The FPSC has the authority to regulate our rates, conditions of service, issuance of securities and certain other matters affecting our natural gas and electric operations. As a result, FPSC regulation has a significant effect on our results of operations. The FPSC approves rates that are intended to permit a specified rate of return on investment. Our rate tariffs allow the cost of natural gas and electricity to be passed through to customers. Increases in the operating expenses of the regulated segments may require us to request increases in the rates charged to our customers. The FPSC has granted us the flexibility of automatically passing on increased expenses for certain fuel costs to customers. Other operational expenses, such as pension and medical expenses require us to petition the FPSC for rate increases. The FPSC is likely to grant rate increases to offset increased expenditures necessary for business operations. We successfully petitioned for an electric rate increase, which became effective on March 17, 2004, and for a natural gas rate increase that went into effect on November 18, 2004. We are currently seeking electric

rate relief in 2007 for the recent storm preparedness requirements implemented to improve reliability of electric utility systems.

We are subject to federal and state regulation with respect to soil, groundwater, employee health and safety matters and to environmental regulations issued by the Florida Department of Environmental Protection (FDEP), the United States Environmental Protection Agency (EPA) and other federal and state agencies.

Prior to the widespread availability of natural gas, we manufactured gas for sale to our customers or purchased utility assets from other companies that manufactured gas. The process for manufacturing gas produced by-products and residuals such as coal tar. The remnants of these residuals are sometimes found at former gas manufacturing sites. These sites face environmental regulation from various agencies including the FDEP and EPA on necessary cleanup and restoration.

Franchises
We hold franchises in each of the incorporated municipalities that require franchise agreements in order to provide natural gas and electricity. Generally, these franchises have terms ranging from 10 to 30 years and terminate on varying dates. We are currently in negotiations with certain municipalities for new service areas within our current operating divisions, and renewals of existing franchises. We continue to provide services to these municipalities and do not anticipate any interruption in our service.

Employees
As of January 18, 2007, we had 362 employees, of which 9 were part-time and 2 were temporary. Of these employees, 175 were covered under union contracts with two labor unions, the Internal Brotherhood of Electric Workers and the International Chemical Workers Union. We believe that our labor relations with employees are good.

Available Information
We file periodic reports including our Form 10-Qs, Form 10-Ks, and Form 8-Ks with the Securities and Exchange Commission (SEC). The most recent copies of Form 10-Qs and Form 10-Ks as well as a copy of our Code of Ethics Policy can be obtained through our website (http://www.fpuc.com).

Item 1A. Risk Factors

A substantial portion of our revenues and, to a large extent, our profitability, depends upon rates determined by the FPSC.

FPSC regulates many aspects of our natural gas and electric operating segments, including the retail rates that we may charge customers for natural gas and electric service. Our retail rates are set by the FPSC using a cost-of-service approach that takes into account our historical operating expenses, our fixed obligations and recovery of our capital investments, including potentially stranded obligations. Using this approach, the FPSC sets rates at a level calculated to recover such costs, adjusted to reflect known and measurable changes, and a permitted return on investment. Any rate adjustments to recover increased costs or to otherwise improve our profitability must be obtained through a petition filed with the FPSC, which is referred to as a rate case. The rates permitted by the FPSC in rate cases will determine a substantial portion of our revenues for succeeding periods and may have a material impact on our consolidated earnings, cash flows and

financial position, as well as our ability to maintain our common stock dividend at current levels or to increase our dividend in the future.

Some of our natural gas and electric service costs may not be fully recovered through retail rates.

Our natural gas and electric service retail rates, once established by the FPSC, remain fixed until changed in a subsequent rate case. We may at any time elect to file a rate case to request a change in our rates or intervening parties may request that the FPSC review our rates for possible adjustment, subject to any limitations that may have been ordered by the FPSC. Earnings could be reduced to the extent that our operating costs increase more than our revenues during the period between rate cases, which may occur because of maintenance and repair of plants, fuel and purchased power expenses, employee or labor costs, inflation or other factors. In addition, even if we decide to file rate cases, our requests for rate adjustments in such rate cases may be rejected. Other parties to a rate case or the FPSC staff may contend that our current rates, or rates proposed in a rate case, are excessive and our petition for rate adjustments may be denied on that or another basis.

Our segments are sensitive to variations in weather.

Our segments are affected by variations in general weather conditions and unusually severe weather. We forecast energy sales on the basis of normal weather, which represents a long-term historical average. Significant variations from normal weather could have a material impact on energy sales. Unusual weather, such as hurricanes, could also adversely affect operating costs and sales.

Our natural gas and propane gas customers use gas primarily for heating purposes. As a result, our natural gas and propane gas sales peak in the winter and are more weather sensitive than electricity sales, which peak in both summer and winter periods. Mild winter weather in Florida can be expected to negatively impact results from our natural gas and propane gas operations. Severe weather conditions could also interrupt or slow down service and increase the operating costs of all our segments.

We operate in an increasingly competitive industry, which may affect our future earnings.

Natural Gas
The natural gas distribution industry has been subject to competitive forces for several years. We receive our supply of natural gas at thirteen city gate stations connected to an interstate pipeline system owned by FGT and one gate station connected to an intrastate pipeline owned by Florida City Gas Company. Gulfstream Natural Gas System currently also serves peninsular Florida with interstate natural gas transmission service; however we cannot predict if this system will be extended to areas near our existing facilities and how it could affect our natural gas operations.

Electric
The U.S. electric power industry has been undergoing restructuring. There is competition in wholesale power sales on a national level. Some states have mandated or encouraged competition at the retail level. While there is active wholesale competition in Florida, the retail electric business has remained substantially free from direct competition. Changes

in the competitive environment occasioned by legislation, regulation, market conditions or initiatives of other electric power providers, particularly with respect to retail competition, could adversely affect our financial condition and results of operations. To the extent competitive pressures increase and the pricing and sale of electricity assumes more of the characteristics of a commodity business, the economics of our electric operating segment may come under increasing pressure. In addition, regulatory changes may increase access to electricity transmission grids by utility and non-utility purchasers and sellers of electricity, thus potentially resulting in a significant number of additional competitors.

Propane Gas

Our propane gas business is our only non-regulated business segment. Because the propane gas business is not regulated, we face significant competition in this segment. Our propane gas business competes directly with other distributors of propane gas, and other sources of energy including natural gas and electric. We may encounter increased competition in the propane gas business in the future. Our inability to compete effectively in the propane gas business, whether on the basis of price, customer service, alternative energy sources or otherwise, could have a material adverse effect on our financial condition and results of operations.

Our business could be adversely affected if our supply of natural gas is interrupted.

FGT's pipeline system transports all of our natural gas. FGT is owned by Citrus Corporation, which is jointly owned by Cross Country Energy Corporation and El Paso Corporation. Our ability to receive our normal supply of natural gas could be adversely affected by an interruption in FGT's service.

General economic conditions may adversely affect our segments.

Our segments are affected by general economic conditions. The consumption of the energy we supply is directly tied to the economy. A downturn in the economy in our local areas of operations, as well as on the state, national and international levels, could adversely affect the performance of our segments. Changes in political climate, including terrorist activities, could further negatively impact our performance. If tourism is down, then the demand for the energy we supply is reduced.

Commodity price changes may affect the operating costs and competitive position of our segments.

Our segments are sensitive to changes in coal, gas, oil and other commodity prices. If we are unable to increase the rates we charge to customers to reflect increases in these commodity prices, our margins and earnings will be lowered. If increased prices for any of these commodities persist for substantial periods, our competitive position could be adversely affected by customers who switch to cheaper energy sources. Further, natural gas prices have been increasingly volatile and, accordingly, the earnings from our natural gas operations are increasingly difficult to predict.

We could incur material expenses as a result of our obligations to comply with existing and new environmental laws and regulations.

We are subject to environmental regulations in connection with the ongoing conduct of our business and to civil and criminal liability for failure to comply with these regulations. In addition, new environmental laws and regulations, or new interpretations of existing laws and regulations, affecting our operations or facilities may be adopted which may cause us to incur additional material expenses.

We are subject to federal and state legislation with respect to soil, groundwater, employee health and safety matters and to environmental regulations issued by the Florida Department of Environmental Protection (FDEP), the EPA and other federal and state agencies. We may incur material future expenditures in order to comply with these existing environmental laws and regulations.

We rely on a limited number of natural gas and electric suppliers, the loss of which could materially adversely affect our financial condition and results of operations.

Two pipeline suppliers under several contracts having expiration dates from 2007 to 2023 transport our natural gas to us. These contracts have provisions, which allow us to extend the terms ranging from 2020 to 2032. Our electric services are provided by two suppliers under contracts, which expire in 2007 and 2017. We have renegotiated a new contract for the one that is set to expire in 2007 with the same supplier for electric service beginning in 2008 which we are currently awaiting approval for from the FPSC. If we were to lose any of these contracts, we might not be able to replace the corresponding energy source on acceptable terms, if at all. In addition, in the event of the expiration of the contracts, we might not be able to renew them on favorable terms, if at all. As a result, the loss of any of these suppliers, the terminations of any of these supply contracts or the non-renewal of any of these supply contracts before or upon their expiration could have material adverse effects on our financial condition and results of operations.

New supply contracts could result in substantial increases to our prices, and could materially adversely affect our financial condition and results of operations.

Two pipeline suppliers under firm contracts having expiration dates from 2007 to 2023 transport our natural gas to us. All of these contracts have provisions which allow us to extend the terms ranging from 2020 to 2032. Our electric services are provided by two suppliers under contracts, which expire in 2007 and 2017.

The recent renewal of the electricity supply contract that was terminated in 2006 and the one that will expire in 2007 will result in the cost of electricity more than doubling over existing prices. Extensions or renewals of our natural gas contracts could result in the cost of natural gas increasing. Although these increases are currently passed through to our customers, these could have a significant impact on our financial condition and results of operations due to decreased consumption or if costs cannot be passed through in the future.

Fluctuation in prices under long-term purchase and transportation commitments may have an adverse effect on our financial condition and results of operations.

To ensure a reliable supply of electricity and natural gas at competitive prices, we have entered into purchase and transportation contracts with various suppliers and producers, which expire at various dates through 2023. Purchase prices under these contracts are determined by formulas either based on market prices or at fixed prices.

As of December 31, 2006, we have firm purchase and transportation commitments adequate to supply our expected sales requirements for electricity with contracts that will expire in 2017. Our contract in the Northeast division of the electric segment began January 1, 2007 and expires on December 31, 2017. We have a contract with a supplier for the Northwest division beginning January 1, 2008 and expiring December 31, 2017. We are currently seeking approval with the FPSC for the Northwest division contract. If the FPSC does not approve this contract, we may need to seek an alternative supplier or new contract with this same supplier for the purchase of electricity in the Northwest division.

Our natural gas pipeline transportation contracts expire in parts in 2010, 2015 and 2023. We are committed to pay demand or similar fixed charges monthly through 2023 related to the natural gas pipeline transportation agreements. Significant fluctuation in prices under these long-term purchase and transportation commitments may have a material adverse effect on our financial condition and results of operations.

Problems with operations could materially adversely impact us.

We are subject to various operational risks, including accidents, outages, equipment breakdowns or failures, or operations below expected levels of performance or efficiency. Problems such as the breakdown or failure of transmission lines, pipelines or other equipment or processes and interruptions in service which would result in performance below affected levels of output or efficiency, particularly if extending for prolonged periods of time, would have a material adverse effect on our financial condition and results of operations.

We are vulnerable to interest rate changes and may not have access to capital at favorable rates, if at all.

Changes in interest rates can affect our cost of borrowing on our line of credit, on refinancing of debt maturities and on incremental borrowing to fund new investments. Because our stock is not widely held and has a low trading volume, we may not be able to access the equity market or may be limited in the amount of equity financing. If we are unable to obtain equity or debt financing on terms satisfactory to us, our ability to fund capital expenditures and other commitments will be impaired. Moreover, even if available, the cost of such financing could reduce our margins and materially adversely affect our results of operations.

Failure to effectively and efficiently manage our growth, as well as changes in our business strategies, could have a negative impact on our performance.

An essential part of our business strategy is to grow our businesses. Much of our growth depends on our ability to find attractive development opportunities and to obtain the necessary financing for them. Our outlook is based on our expectation that we will be successful in finding and capitalizing on development opportunities, but our efforts may not be successful. Our failure to effectively and efficiently manage our growth, as well as changes in our business strategies, may have a material adverse effect on our financial

condition and results of operations. If we grow our business with acquisitions there is a risk the acquisition will not have a positive effect on our financial condition.

Our ability to pay dividends on our common stock is limited.

We cannot guaranty that we will continue to pay dividends at our current annual dividend rate or at all. In particular, our ability to pay dividends in the future will depend upon, among other things, our future earnings, our cash requirements and our debt covenants.

Provisions in our certificate of reincorporation, certain agreements, and the Florida Business Corporation Act may inhibit a takeover, which could adversely affect the value of our common stock.

Our certificate of reincorporation as well as provisions of the Florida Business Corporation Act (FBCA), contain provisions that could delay or prevent a change of control in our management that shareholders might consider favorable and may prevent them from receiving a takeover premium for their shares.

Our certificate of reincorporation contains provisions that make it more difficult to obtain control of our company through transactions, which have not received the approval of our board of directors. These provisions include supermajority voting requirements for certain transactions with affiliated persons, staggering the terms of the members of our board of directors, and certain procedural requirements relating to shareholder meetings and amendments to our certificate of reincorporation or bylaws.

In addition, Florida has enacted legislation that may deter or frustrate takeovers of Florida corporations. Subject to certain exceptions, the "Control Share Acquisitions" section of the FBCA generally provides that shares acquired in excess of certain specified thresholds, beginning at 20% of a corporation's outstanding voting shares, will not possess any voting rights unless such voting rights are approved by a majority vote of the corporation's disinterested shareholders.

The "Affiliated Transactions" section of the FBCA generally requires majority approval by disinterested directors or supermajority approval by disinterested shareholders of certain specified transactions (such as mergers, consolidations, sales of assets, issuance or transfer of shares or reclassifications of securities) between a corporation and a holder of more than 10% of the outstanding shares of the corporation, or any affiliate of such shareholder.

Finally, we have agreements with three of our executive officers that provide for significant payments to those executives upon a change in control under certain circumstances. The existence of these contracts may make an acquisition of our company less attractive to a possible buyer.

Conflict or turmoil in oil producing countries could impact future prices for commodities including natural gas, propane gas and electricity, and increases in these prices could materially affect our financial condition and results of operations.

Worldwide turmoil could cause the cost of crude oil and its associated products to rise on

concerns of the conflicts interfering with the production of crude oil. If these conflicts are large, escalate or spread, the impact to the cost of all fuel related commodities could increase substantially. These increases could materially adversely affect our financial condition and results of operations.

Item 1B. Unresolved Staff Comments

None

Item 2. Properties

We have natural gas, electric and propane gas utility related properties. These properties include transmission, distribution, storage and general facilities at various locations in our service areas. We do not have generating facilities. We maintain property that is adequate for our current operations and we expand our existing facilities as required by growth or other operational needs.

We own natural gas mains that distribute gas through 1,558 miles of pipe located in Central and South Florida. Additionally, we have adequate gate stations in each distribution system.

In the electric segment, we own 22 miles of electric transmission lines located in Northeast Florida and 1,082 miles of electric distribution lines located in Northeast and Northwest Florida. The distribution lines are installed both under and above ground with many of the coastal locations having under ground facilities. All transmission lines are installed above ground. Additionally, we own various substations and regulator stations that are used in our operations.

Our propane gas segment has bulk storage facilities and tank installations on the customers' premises. We also have 16 community gas systems that distribute propane gas to customers in a specific area. These systems are subject to the Federal Department of Transportation Office of Pipeline Safety Regulations.

We own office and warehouse facilities in Northwest, Northeast, Central, West and South Florida, which are used for our operations and materials storage by the natural gas, electric, and propane gas segments. We also have various easements and other assets located throughout our service areas that are utilized by all of our operations.

We also own a three-story building in West Palm Beach, where our corporate headquarters is located.

All of our property is subject to a lien collateralizing our funded indebtedness under our Mortgage Indenture as discussed in Note 1-I in Notes to Consolidated Financial Statements.

Item 3. Legal Proceedings

In our operations, we currently use or have used several contamination sites that have pending or threatened environmental litigation. We are in the process of investigating and assessing this litigation. We intend to vigorously defend our rights in this litigation. We have insurance and rate relief to cover losses or expenses incurred as a result of this

litigation. We believe all future contamination assessment and remedial costs, legal fees and other related expenses would not exceed the combined sum of any insurance proceeds received and any rate relief granted.

West Palm Beach Site

We are currently evaluating remedial options to respond to environmental impacts to soil and groundwater at and in the immediate vicinity of a parcel of property we own in West Palm Beach, Florida. We previously operated a gasification plant at this site. We entered into a Consent Order with the FDEP effective April 8, 1991. This requires us to delineate the extent of soil and groundwater impacts associated with the prior operation of the gasification plant and to remediate such soil and groundwater impacts, if necessary. We have submitted numerous reports to FDEP describing the results of soil and groundwater sampling conducted at the site. We completed the delineation of soil and groundwater impacts at the site in October 2006. An engineering consultant performed a feasibility study to evaluate appropriate remedies for the site. The feasibility study was transmitted to FDEP on November 30, 2006.

The feasibility study evaluated a wide range of remedial alternatives based on criteria provided by applicable laws and regulations. The total costs for the remedies evaluated in the feasibility study ranged from a low of $2.8 million to a high of $54.6 million. Based on the likely acceptability of proven remedial technologies described in the feasibility study and implemented at similar sites, consulting/remediation costs to address the impacts now characterized at the West Palm Beach site are projected to range from $4.6 million to $17.9 million. This range of costs covers such remedies as in situ solidification for deeper soil impacts, excavation of superficial soil impacts, installation of a barrier wall with a permeable biotreatment zone (PBZ), monitored natural attenuation of dissolved impacts in groundwater (MNA) or some combination of these remedies. The feasibility study proposed a remedy of superficial soil excavation, and installation of a hanging barrier wall with PBZ and MNA, the cost of which is projected to range from $4.6 million to $9.9 million.

Prior to FDEP's approval of a final remedy for the site, we are unable to determine, to a reasonable degree of certainty, the complete extent or cost of remedial action that may be required. As of December 31, 2006, and subject to the limitations described above, remediation costs (including attorneys' fees and costs) for this site are projected to range from approximately $4.8 million to $18 million.

Sanford Site

We own a parcel of property located in Sanford, Florida, upon which a gasification plant was operated prior to our acquisition of the property. Following discovery of soil and groundwater impacts on the property, we have participated with four former owners and operators of the gasification plant in the funding of numerous investigations of the extent of the impacts and the identification of an appropriate remedy. On or about March 25, 1998, we executed an Administrative Order on Consent (AOC) with the four former owners and operators (Group) and the United States Environmental Protection Agency (EPA) that obligated the Group to implement a Remedial Investigation/Feasibility Study (RI/FS) and to pay EPA's past and future oversight costs. The Group also entered into a Participation Agreement and an Escrow Agreement on or about April 13, 1998 (WFS Participation Agreement). Work under the RI/FS AOC and RI/FS Participation Agreement is now complete and we have no further obligations under either document.

In late September 2006, EPA sent us a Special Notice Letter, notifying us of EPA's selection of a final remedy for OU1 (soils), OU2 (groundwater), and OU3 (sediments), and giving the other Group members and us sixty (60) days within which to submit a "good faith offer" to EPA to provide for implementation of the selected remedies. The Special Notice Letter included an Amended Record of Decision (ROD) for OU1 (the ROD for OU1 was amended to account for a significant increase in the volume of off-site soil impacts and a change in the selected remedy), the original ROD for OU2, and a ROD for OU3. The total estimated remediation costs for the Sanford Gasification Plant Site are now projected to be $12.5 million. On November 30, 2006, we, along with the Group, submitted to EPA a good faith offer to implement the approved remedies as set forth in the RODs for OU1 through OU3.

In January, we, along with the other members of the Group signed a Third Participation Agreement, which provides for funding the remediation work specified in the RODs for OU1 through OU3 and supercedes and replaces the Second Participation Agreement. Our share of remediation costs under the Third Participation Agreement is set at 5% of a maximum of $13 million or $650,000. At present, it is not anticipated that the total cost of remediation will exceed $13 million. If it does, the Group members have agreed to negotiate in good faith to allocate the excess costs at such time that it reasonably appears that the total remediation costs will exceed $13 million. In any such event, we do not expect our share of such additional costs to be greater than 5% and our share of such additional costs may be less than 5%.

Our future legal costs and expenses and our share future remediation expenses for this site are currently projected to be approximately $710,000.

Deleted: 710,000

Pensacola Site

We are the prior owner/operator of the former Pensacola gasification plant, located in Pensacola, Florida. Following notification on October 5, 1990 that FDEP had determined that we were one of several responsible parties for any environmental impacts associated with the former gasification plant site, we entered into cost sharing agreements with three other responsible parties providing for the funding of certain contamination assessment activities at the site.

Following field investigations performed on behalf of the responsible parties, on July 16, 1997, FDEP approved a final remedy for the site that provides for annual sampling of selected monitoring wells. Such annual sampling has been undertaken at the site since 1998. Our share of these costs is less than $2,000 annually or a total cost of $27,000.

In March 1999, EPA requested site access in order to undertake an Expanded Site Inspection (ESI). The ESI was completed by EPA's contractor in 1999 and an ESI Report was transmitted to us in January 2000. The ESI Report recommends additional work at the site. The responsible parties met with FDEP on February 7, 2000 to discuss EPA's plans for the site. In February 2000, EPA indicated preliminarily that it will defer management of the site to FDEP; however, as of December 31, 2006, we have not received any written confirmation from EPA or FDEP regarding this matter. Prior to receipt of EPA's written determination regarding site management, we are unable to determine whether additional fieldwork or site remediation will be required by EPA and, if so, the scope or costs of such work.

Key West Site

From 1927-1938, we owned and operated a gasification plant in Key West, Florida. The plant discontinued operations in the late 1940s; the property on which the plant was located is currently used for a propane gas distribution business. In March 1993, a Preliminary Contamination Assessment Report (PCAR) was prepared by a consultant jointly retained by the current site owner and us and was delivered to FDEP. The PCAR reported that very limited soil and groundwater impacts were present at the site. By letter dated December 20, 1993, FDEP notified us that the site did not warrant further "CERCLA consideration and a Site Evaluation Accomplished disposition is recommended." FDEP then referred the matter to its Marathon office for consideration of whether additional work would be required by FDEP's district office under Florida law. As of December 31, 2006, we have received no further communication from FDEP with respect to the site. At this time, we are unable to determine whether additional fieldwork will be required by FDEP and, if so, the scope or costs of such work. In 1999, we received an estimate from our consultant that additional costs to assess and remediate the reported impacts would be approximately $166,000. Assuming the current owner shared in such costs according to the allocation agreed upon by the parties for the PCAR, our share would be approximately $83,000.

Item 4. Submission of Matters to a Vote of Security Holders

None

Executive Officers of the Registrant

The following sets forth certain information about the executive officers of the Company as of February 17, 2007.

Name	Age	Position	Date
John T. English	63	Chairman of the Board	2006 - Present
		Chief Executive Officer	1998 - Present
		President	1997 - Present
		Chief Operating Officer	1997 2000
Charles L. Stein	57	Senior Vice President	1997 - Present
		Chief Operating Officer	2001 - Present
George M. Bachman	47	Corporate Secretary	2004 - Present
		Chief Financial Officer	2001 - Present
		Treasurer	2001 - Present

Deleted: -

Mr. English was Senior Vice President from 1993 preceding his appointment as President and Chief Operating Officer.

Mr. Stein was Vice President from 1993 preceding his appointment as Senior Vice President.

Mr. Bachman was Controller from 1996 preceding his appointment as Chief Financial Officer and Treasurer.

Each of these executive officers has an employment agreement for a three-year term, which can be renewed at the Board Meeting preceding the expiration of the agreement subject to his earlier resignation or removal. There are no family relationships among any of the executive officers and directors of the Company.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Quarterly Stock Prices and Dividends Paid

Our common shares are traded on the American Stock Exchange under the symbol FPU. The quarterly dividends declared and the reported last sale price range per share of our common stock for the most recent two years were as follows:

	2006			2005		
	Stock Prices		Dividends	Stock Prices *		Dividends
Quarter ended	Low	High	Declared	Low	High	Declared*
March 31	$13.25	$14.50	$0.1033	$11.47	$13.49	$0.1000
June 30	11.86	14.40	0.1075	11.45	12.67	0.1033
September 30	12.61	14.42	0.1075	12.67	16.84	0.1033
December 31	13.10	14.05	0.1075	13.46	16.44	0.1033

* On July 25, 2005 we issued a three for two stock split in the form of a stock dividend to our shareholders of record on July 15, 2005. All common share information has been restated to reflect the stock split.

As of February 16, 2007, there were approximately 3,900 holders of record of our common shares.

We intend to continue to pay quarterly cash dividends for the foreseeable future. Our dividend policy is reviewed on an ongoing basis by our Board of Directors and is dependent upon future earnings, cash flow, financial condition, capital requirements and other factors. Our Fifteenth Supplemental Indenture of Mortgage and Deed of Trust restricts the amount that is available for cash dividends. At December 31, 2006, approximately $9 million of retained earnings were free of such restriction and therefore available for the payment of dividends.

Securities Authorized for Issuance under Equity Compensation Plans

Equity Compensation Plan Information

Plan Category	Number of Securities remaining available for future issuance under equity compensation plans
Equity compensation plans approved by security holders	72,749*
Equity compensation plans not approved by security holders	-
Total	72,749

* This includes 20,714 shares for the Non-Employee Director Compensation Plan. This plan was adopted by the Board of Directors on March 18, 2005 and was approved at the 2005 meeting of shareholders. This also includes 52,035 shares for the Employee Stock Purchase Plan.

PERFORMANCE GRAPH

The following graph compares the yearly percentage change and the cumulative total of shareholder return on the Company's common stock with the cumulative return on the Russell 2000 Index (Russell 2000) and Standard & Poor's Utilities Index (S&P Utilities) for the last five calendar years. These comparisons assume the investment of $100 in the Company's common stock and each of the indices on January 1, 2001 and the reinvestment of dividends. The stock price performance shown in the graph below should not be considered indicative of

COMPARISON OF 5 YEAR CUMULATIVE TOTAL RETURN*

Among Florida Public Utilities Company, The Russell 2000 Index
And The S & P Utilities Index

Note to the Selected Financial Data:

(1) On December 3, 2002, FPU entered into an agreement to sell the assets of its water utility system to the City of Fernandina Beach. The transaction closed on March 27, 2003. Revenues, Gross profit and Utility plant-net do not include discontinued operations.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operation

RESULTS OF OPERATIONS

General

Effects of seasonal weather conditions, the timing of rate increases, fluctuations in demand due to the cost of fuel passed on to customers and the migration of winter residents and tourists to Florida during the winter season all have an impact on income.

Revenues and Gross Profit Summary

Revenues include cost recovery revenues. The FPSC allows cost recovery revenues to directly recover costs of fuel, conservation and revenue-based taxes in our natural gas and electric segments. Revenues collected for these expenses have no effect on results of operations and fluctuations could distort the relationship of revenues between periods. Gross profit is defined as gross operating revenues less fuel, conservation and revenue-based taxes that are passed directly through to customers. Because gross profit eliminates these cost recovery revenues, we believe it provides a more meaningful basis for evaluating utility revenues. The following summary compares gross profit between periods and units sold in One thousand Dekatherm (MDth) (gas) and Megawatt Hour (MWH) (electric).

Revenues and Gross Profit
(Dollars in thousands)

	Year Ended December 31,		
	2006	2005	2004
Natural Gas			
Revenues	$70,981	$69,094	$55,962
Cost of fuel and other pass through costs	43,909	42,815	34,232
Gross Profit	$27,072	$26,279	$21,730
Units sold: (MDth)	6,230	6,224	6,124
Electric			
Revenues	$48,527	$47,450	$42,910
Cost of fuel and other pass through costs	34,259	33,352	29,732
Gross Profit	$14,268	$14,098	$13,178
Units sold: (MWH)	849,124	814,353	766,349
Propane Gas			
Revenues	$14,727	$13,479	$11,167
Cost of fuel and other pass through costs	7,803	6,637	5,386
Gross Profit	$ 6,924	$6,842	$5,781
Units sold: (MDth)	621	640	614
Consolidated			
Revenues	$134,235	$130,023	$110,039

Gross Profit	$ 48,264	$ 47,219	$ 40,689

Natural Gas

Natural gas revenues increased $1.9 million, or 3% in 2006 over 2005 primarily due to increased revenue collected for taxes passed directly through to customers. A change in legislature regarding the calculation of Gross Receipts tax became effective January 1, 2006, and along with an increase to overall revenues, increased these taxes paid by our

customers by approximately $500,000. Franchise fee revenues also increased by $500,000 due to increased rates and area expansion.

Natural gas gross profit increased by $793,000, or 3% in 2006 over 2005. We had higher revenue and gross profit in 2006 compared to 2005 primarily due to billed revenue not exceeding the FPSC allowable earnings as much as in the prior year. In 2006 we reduced billed revenues and gross profit by our estimate of over-earnings of $230,000 for the year. Our estimate for 2005 was recorded at $700,000 in 2005 and we reduced that estimate in 2006 by $50,000 to $650,000. The combined effect of this was to increase our revenues and gross profit over the prior year by approximately $500,000. Other factors contributing to the increase in revenues and gross profit were 2% customer growth and storm surcharge revenues, which became effective November 2005. The revenues and gross profit increases were slightly offset by the loss of approximately $100,000 of revenue from two customers who went off-line for several months to do maintenance work.

Natural gas revenues increased $13.1 million in 2005 over 2004 primarily due to an $8.6 million increase in the cost of fuel and other costs that were passed through to customers. The cost of natural gas increased significantly over prior years, partially as a result of hurricanes and their impact on supplies. Gross profit increased $4.5 million, or 21%, primarily as a result of rate relief effective in November 2004, normal customer growth and a 2% increase in units sold. Offsetting these increases was the estimated over-earnings for 2005 of $700,000, which reduced revenues and gross profit.

Electric

Electric revenues increased $1.1 million in 2006 over 2005. Cost of fuel and other costs that were passed through to customers contributed approximately $900,000 of the increase. Gross profit increased $170,000 or 1% in 2006 over 2005. The increase in gross profit was primarily due to a slight increase in customer growth and units sold.

Electric revenues increased $4.5 million in 2005 over 2004. Cost of fuel and other costs that were passed through to customers contributed $3.6 million of the increase. Gross profit increased $920,000 or 7% in 2005 over 2004. The increase in gross profit was primarily due to a 6% increase in units sold along with the rate increases granted in March 2004. A large distribution center was built in our Northwest division and increased revenues by approximately $700,000 and gross profit by approximately $91,000 in 2005 over 2004.

Propane Gas

Propane revenues increased $1.2 million, or 9% and gross profit increased $82,000 or 1% in 2006 compared to 2005. Revenues increased primarily due to rising fuel costs. Although customers increased by 5% in 2006, the usage per customer declined by 8% contributing to a decrease of 3% in units sold. Warmer weather was the primary reason for this decrease in usage per customer in 2006 compared to 2005. The increase in gross profit was minimal when compared to last year primarily due to pre-buy gains of $383,000 realized in 2005 but not in 2006.

Propane revenues increased $2.3 million and gross profit increased $1.1 million or 18% in 2005 compared to 2004. The Company realized gains of approximately $383,000 as a result of buying propane supplies before market price increases. The remaining increase

of 12% from the previous year resulted from propane unit sales increasing 4% due primarily to a 13% growth in residential bulk customers and units sold.

Operating Expenses

Operating expenses include operation, maintenance, depreciation, amortization and taxes other than income taxes, and exclude fuel costs, conservation and taxes based on revenues that are directly passed through to customers and recovered in revenues.

Operating Expenses
(Dollars in thousands)

	Year Ended December 31,		
	2006	2005	2004
Natural gas	$ 20,954	$ 20,230	$ 16,752
Electric	11,131	10,596	9,825
Propane gas	5,850	5,756	5,126
Total Operating Expenses	$ 37,935	$ 36,582	$ 31,703

Natural Gas

Natural gas operating expenses increased $724,000, or 4%, in 2006 as compared with 2005. Outside of the normal inflationary impacts on our expenses, customer account expenses increased by $237,000 as a result of our customer service focus initiated in 2005 based on our strategic plan. We continued the focus on this area and increased the number of employees in an effort to respond more effectively to customers. Bad debt provision increased $49,000 over the prior year primarily due to increasing revenues, aging accounts receivable on several major accounts, and the slowing housing economy. We increased our collection efforts in the fourth quarter of 2006 and will continue to do so in 2007.

In 2006 we had additional increases of $90,000 to sales expense resulting from initiatives to boost sales by increasing sales staff. Depreciation expense increased $137,000 principally due to construction of mains and new meters to distribute gas to a growing number of new developments in South Florida and increasing capacity requirements for existing customers.

Natural gas operating expenses increased $3.5 million or 21%, in 2005 as compared with 2004. Amortization expense increased $1 million. The bare steel replacement program and recovery of future environmental costs approved in our 2004 natural gas rate proceeding were the primary reasons for this increase. We are currently under a 50-year program to replace all bare steel mains and service lines with coated steel and polyethylene lines. We have received approval to recover the funds necessary to replace these mains and services over the 50-year period. Pursuant to an FPSC mandate, we accrue an amortization expense as an offset to the revenues received, and record a contribution reducing the related construction expenditures. The FPSC also approved recovery of our expected environmental liability over a 20-year period.

Deleted: for
Deleted: /
Deleted: tion
Deleted: to

Customer account expense increased $373,000 in 2005 as compared to 2004 primarily due to increased payroll expenses for additional staffing and facility and equipment upgrades. There were also increased bad debt provisions as a result of the increases in accounts receivable due to general and fuel rate increases. The purchase of additional safety equipment, tools, hardware and office furniture contributed to a $942,000 increase in other operating expense. Other items affecting expenses included a research marketing study to provide us with data to better serve our customers and additional payroll

expenses relating to hurricane preparedness and wage increases. Maintenance expense increased by $208,000 primarily due to maintenance expenditures in Central Florida for cleaning and painting a distribution regulator and gate stations and the purchase of maintenance related safety equipment and tools.

Electric
Electric operating expenses increased $535,000, or 5%, in 2006 as compared with 2005. As a result of our efforts to inform and educate our electric customers about the expected 2007 and 2008 fuel rate increases in upcoming bills, sales expense increased by $120,000. Customer account expenses increased $106,000 in 2006 over the prior year mainly due to increased bad debt provisions due to higher sales and slower housing economy. Depreciation expense increased $202,000 largely due to major construction work done in the latter part of 2005 and the beginning of 2006. This included the rebuilding of a transmission sub-station, the rebuilding of an entire distribution sub-station with two transformers and the replacement of a failed sub-distribution station transformer. Additional significant work on transformers is expected in 2008.

Electric operating expenses increased $771,000, or 8%, in 2005 as compared with 2004. As we continued to focus on improving service reliability, we increased maintenance expense by $397,000 for additional tree trimming and the use of a temporary mobile substation while a new transformer was purchased and put into service. Depreciation expense increased $100,000 due to normal increases in plant assets. In 2005, other operating expenses increased $114,000 due to a shift from work on capital assets to operational needs along with personnel raises.

Propane Gas
Propane gas operating expenses increased $94,000, or 2%, in 2006 as compared with 2005. Depreciation expense increased $99,000 for the addition of plant assets including a propane gas delivery system that will increase the efficiency of our deliveries and improve our overall customer satisfaction. Aging accounts receivable, slowing housing economy and increasing revenues contributed to an increase in our bad debt expense over the prior year.

Propane gas operating expenses increased $630,000, or 12%, in 2005 as compared with 2004. As we continued to focus on increasing our propane gas business, other operating costs increased $467,000. We placed additional emphasis in the sales area, which resulted in signing up new housing developments that will utilize propane gas. We incurred increased expenditures for piping homes, delivering propane gas, implementing a new delivery system and increasing commission payments. This increased effort in our sales area contributed to an increase of 150 customers and 4% overall units sold in our propane gas segment.

Administrative Expenses
Administrative expenses increased $177,000, or 2%, in 2006 over 2005. These expenses generally are related to all of our operating segments. To continue to adequately support our internal and external customers, we increased staffing in our administrative areas. Payroll increases of $322,000 related to an increased number of employees, annual pay raises and normal inflationary impacts. In 2006, we discontinued eligibility to our defined benefit pension plan for new employees and replaced the defined benefit pension plan with a 401K-match plan for new employees. Although this change will take time to reduce pension expense, we did experience a reduction of $107,000 in our pension expenses in

2006. Medical costs increased $120,000 over the prior year and these costs are expected to continue to rise.

Regulatory storm surcharge expenses approved in our 2005 natural gas petition increased natural gas expenses by $180,000.

Administrative expenses increased $996,000, or 13%, in 2005 over 2004. Pension expense increased $274,000 due to our estimate that the return on the pension's assets will not keep pace with growing pension liabilities. Medical insurance premiums continue to rise, increasing $130,000 in 2005. Compliance costs related to Sarbanes-Oxley and internal control requirements, as well as audit fees, increased outside services expenses by $156,000. With the impact from our focus on hurricane preparations and the 2005 hurricanes, our safety expense increased by $235,000. A portion of this increase related to compensation for an additional safety employee and costs for a new safety incentive program.

Total Other Income and Deductions
Other income and deductions include revenues and expenses from sales and installation, service of merchandise, gains or losses on disposal of property, interest expense and other income and expenses. The largest components of this section are merchandise sales, services income and interest expenses. Our service activities include the installation of merchandise and other contract work. Interest expense consists of interest on bonds, short-term borrowings and customer deposits.

Merchandise and Services Revenue and Expenses
Although merchandise and services revenue decreased by approximately $268,000 in 2006, the overall profitability in this area increased by $325,000 compared to 2005. This was primarily a result of significant strategic changes made by management. These changes included revising the product markup structure, increasing installation fees and increasing employee training. We experienced a revenue decrease due to lower demand for merchandise as a result of a quiet hurricane season and the slow down of new construction projects in our areas due to the downturn in the housing market.

Merchandise and services revenues and expenses increased in 2005 from 2004 but profitability decreased $114,000. We experienced an increase in revenues and cost of sales primarily due to an increased demand for electric to gas conversions and installations of customer owned propane gas tanks to supply back-up generators. We had increased expenses from sub-contractors that were not passed on to customers in sales prices.

Interest Expenses
In 2005, total interest expense increased $106,000. Interest on short-term debt increased $37,000. This was due to the increase in the average outstanding loan balance on the line of credit and higher interest rates. Interest on customer deposits increased $48,000 due to increased customer deposits primarily as a result of additional deposits required after implementing increased rates in our natural gas operation.

Other
Other revenues increased $51,000 compared to 2005 due to additional interest income associated with the sale of the water assets.

Income Taxes

Income tax expense decreased in 2006 over the normal tax rate on net income by $67,000. This decrease was due to tax return adjustments related to the regulatory deferred tax liabilities.

Income tax expense decreased in 2005 over the normal tax rate on net income by $43,000. Tax return adjustments related to the sale of our water assets and the regulatory deferred tax liabilities decreased expenses by $118,000. We had an offsetting increase of $75,000 related to our IRS audit of the 2002 and 2003 income tax returns.

Liquidity and Capital Resources

Summary of Primary Sources and Uses of Cash

(Dollars in thousands)

	Year Ended December 31,		
	2006	2005	2004
Sources of Cash:			
Operating activities, including working capital changes	$20,090	$10,213	$11,673
Net proceeds on short-term debt	-	3,733	3,547
Other sources of cash	1,179	1,214	648
Uses of Cash:			
Construction expenditures	13,116	12,441	13,731
Dividends paid	2,551	2,448	2,368
Net payment on short-term debt	6,092	-	-
Other uses of cash	121	75	129
Net (use) source of cash	$ (611)	$ 196	$ (360)

Cash Flows

Operating Activities

Net cash flow provided by continuing operating activities increased in 2006 by approximately $10 million compared to 2005. Fuel and other pass through costs accounted for $6.5 million of the increase. This increase resulted from the collection of the prior year's under-recoveries of $3.4 million and over-recoveries of $3.1 million in 2006. Amounts over-recovered will be refunded to customers in subsequent calendar years. Lower fuel costs during the latter part of the year in our natural gas segment contributed to a decrease in receivables and increase in cash of $3 million. The lower fuel costs and timing of payments to our major fuel suppliers resulted in a decrease to operating cash of $1 million. Income taxes paid increased by approximately $600,000 primarily due to the tax effect of the collection of prior year's fuel under-recoveries.

Net cash flow provided by continuing operating activities decreased in 2005 by approximately $1.5 million compared to 2004. Payments for fuel exceeded the amount collected from customers by an additional $3.1 million in 2005. The under-recovery of fuel costs is collected in the following calendar year. Income tax payments increased approximately $1.5 million, primarily as a result of less tax depreciation and higher income. The deduction for tax depreciation was higher in 2004 as a result of bonus depreciation, resulting in lower taxes in that year. We also received a refund in 2004 relating to the deferral of the gain on our water assets sale.

Offsetting the decreases to 2005 cash flow was additional cash received from rate increases in our natural gas segment. The rate increases also contributed to an increase to accounts receivable of $4 million. Accounts payable increased $3.3 million in 2005 primarily due to the increased cost of fuel in our natural gas segment.

Investing Activities
Capital expenditures increased in 2006 compared to 2005 by approximately $700,000. The increase in 2006 included expenditures for transportation equipment in our electric segment for approximately $400,000, vehicles in our natural gas segment above 2005 levels of approximately $600,000, and various other typical capital expenditures. Offsetting total 2006 increases was a $663,000 transformer replacement in 2005.

Capital expenditures decreased in 2005 compared to 2004 by approximately $1.3 million. In 2004, there were large projects to rebuild two substations in our electric segment and additional propane community gas systems costing approximately $3.3 million. In 2005 such expenditures were lower and consisted of the purchase of a transformer in our electric segment for $663,000, a new natural gas mapping system to track our assets used in serving our customers for approximately $300,000, a propane delivery system for approximately $300,000, additional propane community gas systems for approximately $300,000 and other various capital expenditures.

Financing Activities
Short-term borrowings decreased by $6 million in 2006. Over-recovery of fuel costs provided a large source of cash during 2006 as well as the recovery of the prior year's under-recovery of fuel costs in 2006, reducing the need for short-term borrowings.

Although additional sources of cash were provided by our rate increases and lower construction expenditures in 2005, the additional expenditures from the under-recovery of fuel costs and additional income taxes increased our short-term debt. Short-term borrowings increased in 2005 over 2004 by approximately $3.7 million.

Capital Resources
We currently have a $12 million line of credit, which expires on July 1, 2008. Upon 30 days notice by us we can increase the line of credit to a maximum of $20 million. The line of credit contains affirmative and negative covenants that, if violated, would give the bank the right to accelerate the due date of the loan to be immediately payable. The covenants include certain financial ratios. All ratios are currently met and management believes we are in full compliance with all covenants and anticipates continued compliance. We reserve $1 million of the line of credit to cover expenses for any major storm repairs in our electric segment and an additional $250,000 for a letter of credit insuring propane gas facilities. As of December 31, 2006, the amount borrowed on the line of credit was $3.5 million. The line of credit, long-term debt and preferred stock as of December 31, 2006 comprised 53% of total capitalization and debt.

In prior years we periodically paid off short-term borrowings under lines of credit using the net proceeds from the sale of long-term debt or equity securities. We may use similar types of proceeds in the future to pay off short-term borrowings, dependent on the amount borrowed from the line of credit, prevailing market conditions for debt and equity, the impact to our financial covenants and the effect on income.

Our 1942 Indenture of Mortgage and Deed of Trust, which is a mortgage on all real and personal property, permits the issuance of additional bonds based upon a calculation of unencumbered net real and personal property. At December 31, 2006, such calculation would permit the issuance of approximately $39.3 million of additional bonds.

On November 30, 2006 we received approval from the FPSC to issue and sell or exchange an additional amount of $45 million in any combination of long-term debt, short-term notes and equity securities and/or to assume liabilities or obligations as guarantor, endorser or surety during calendar year 2007. We will seek approval from the FPSC in 2007 for any possible financing in 2008.

We have $3.4 million in invested funds for payment of future environmental costs. We expect to use some of these funds in 2007.

Capital Requirements
Portions of our business are seasonal and dependent upon weather conditions in Florida. This factor affects the sale of electricity and gas and impacts the cash provided by operations. Construction costs also impact cash requirements throughout the year. Cash needs for operations and construction are met partially through short-term borrowings from our line of credit.

Capital expenditures are expected to be higher in 2007 compared to 2006 by approximately $3.9 million. The primary reason for the expected increase in expenditures is the anticipated purchase of land for a new South Florida division office. The current division office is on environmentally impacted property, which requires relocating the office to allow for clean up of the property. It is not possible to rebuild at the current location since the property has been rezoned with a residential designation. The estimated cost of land is $3.8 million. We are planning to build and complete this new facility in the next five years. We do not have any commitments for capital expenditures in 2007 other than vehicles of approximately $102,000.

Cash requirements will increase significantly in the future due to environmental clean up costs, sinking fund payments on long-term debt and pension contributions. Environmental clean up is forecast to require payments of approximately $600,000 in 2007, with remaining payments, which could total approximately $13.1 million, beginning in 2008. Annual long-term debt sinking fund payments of approximately $1.4 million will begin in 2008 and will continue for eleven years. Based on current projections, we will make voluntary contributions in our defined benefit pension plan of $250,000 in 2007 and $500,000 in 2008. Required contributions will begin in 2009 and are forecast to be approximately $2 million in 2009 and 2010.

Based on our current expectations for cash needs, including the possible land purchase and related South Florida office construction, we may choose to consider an equity or debt financing in 2008 to address those cash needs. The need and timing will depend upon operational requirements, environmental expenditures, pension contributions and construction expenditures and cannot be precisely predicted at this time. In addition, if we experience significant environmental expenditures in the next two or three years it is possible we may need to raise additional funds. If interest rates remain favorable we may consider re-financing one of our mortgage bonds. If refinancing is deemed beneficial, we may re-issue the bond for additional principal. There can be no assurance, however, that equity or debt transaction financing will be available on favorable terms or at all when we make the decision to proceed with a financing transaction.

Outlook

Pension and Insurance Expenses

Insurance costs have been increasing and are expected to continue to increase while we expect pension costs to decrease. Pension expenses decreased $107,000 in 2006 and our actuarial estimates show pension expense decreasing by $142,000 in 2007. Insurance expenses including Medical, Liability and Workers' Compensation increased $70,000 in 2006 and are expected to increase further in 2007.

The regulated segments received rate relief for some of the historical pension and insurance increases in 2003 and 2004. Increases beyond those experienced through 2005, which are allocated to the regulated segments, may require requesting future rate relief. The propane gas segment may recover these expenses by increasing rates, depending on market conditions in the propane gas industry and the ability to remain competitive.

Due to significant cost increases for our defined benefit pension plan over the past several years and with expectations that these cost increases will continue in the years ahead, we discontinued eligibility to our pension plan for all new hires.

For new hires not eligible for the defined benefit pension plan, we established an employer match to the employee's contribution to their 401K plans. It provided for a company match of 50% for each dollar contributed by the employee, up to 6% of their salary, for a company contribution of up to 3%. Beginning in 2007, for non-union employees the plan was enhanced to provide a company match of 100% for the first 2% of an employee's contribution, and a match of 50% for the next 4% of an employee's contribution, for a total company match of up to 4%. This new enhanced match will be negotiated with our six union contracts during 2007, to be effective on their respective contract date within 2007. The employees are eligible for the company match after six months of continuous service, with vesting of 100% after three years of continuous service.

Electric Power Supply Contracts

Contracts with our two electric suppliers were originally set to expire on December 31, 2007. Those contracts provided electricity to our customers at rates much lower than market rates. As part of our negotiations, we agreed to end the current contract terms for our Northeast division on December 31, 2006 and executed an amended contract to begin January 1, 2007 and expire December 31, 2017. Although the contract rates will increase for 2007, this enabled us to obtain lower rates for the longer term of the contract than would have been available if we had not revised the contract. The savings are passed through to our customers without profit to us.

We executed a contract for the provider of electricity in our Northwest division in December 2006 and are seeking approval of this contract and its related terms and conditions from the FPSC on or before July 1, 2007. If the FPSC does not approve this contract, we may need to seek an alternative supplier or new contract with this same supplier for the purchase of electricity in the Northwest division. This contract will be for the purchase of electricity beginning January 1, 2008. We anticipate that contract will result in rates closer to market, which could cause our customers' bills to double over existing prices in the next several years.

We are unable to estimate what impact, if any, the higher rates could have on electric consumption.

Propane Gas

We are currently reviewing the possibility of hedging activities in 2007 to help mitigate the risk of price changes for our cost of propane gas. We are unable to determine the impact this activity will have on our future operating income.

We used advance purchase agreements made in the normal course of procuring propane gas supplies in past years. These agreements resulted in a loss of gross profit of approximately $5,000 in 2006 and additional gross profit of approximately $383,000 in 2005 and $242,000 in 2004.

Over-earnings-Natural Gas Segment
The FPSC approves rates that are intended to permit a specified rate of return on investment and limits the maximum amount of earnings of regulated operations. We currently estimate over-earnings in 2006 of $230,000 and in 2005 of $650,000. We revised our prior year's 2005 estimate of $700,000 during 2006. These liabilities have been included in an over-earnings liability on our balance sheet, with the potential of rate refunds to customers. The calculations supporting these liabilities are complex and involve a variety of projections and estimates before the ultimate settlement of such obligations.

Our 2005 and 2006 estimates of our over-earnings liabilities could change upon the FPSC finalization and review of our earnings in 2007 and 2008. The FPSC determines the disposition of over-earnings with alternatives that include refunding to customers, funding storm damage or environmental reserves, or reducing any depreciation reserve deficiency.

In 2007 we requested that the 2005 natural gas over-earnings be used to provide additional funds to our regulatory liability – storm reserve and reduce the costs currently being recovered from our customers through a storm surcharge. If the FPSC approves this disposition, we will end the storm surcharge in 2007.

Electric Customers
A large commercial customer in our electric division closed its operations in late 2006. As a result we anticipate annual revenues to be reduced by approximately $300,000 and annual gross profit to be reduced by approximately $50,000.

A large distribution center was built in our Northwest division in 2004 and a second facility was added in 2006. A third distribution facility is expected to be added by the end of 2007. Additional industrial and commercial development is planned for this general area, which should increase load significantly. Additional gross profit is anticipated in the future to increase between $30,000 and $50,000 as a result of the additional developments.

Natural Gas Customers

Two natural gas customers went off-line for approximately six months in 2006 due to lower production, market slow down and maintenance work on their facilities. We anticipate that they will not be fully operational until mid-2007. The decreased revenue and gross profit is estimated to be $100,000 in 2007.

Indiantown Gas Agreement

The FPSC approved our joint transportation and territorial agreements with Indiantown Gas Company in October 2006. We began construction in the Indiantown area to install natural gas mains in the first phase of this development, for approximately 100 homes. Two more developments are slated for construction of approximately 1,000 homes in 2007.

Storm Preparedness Expenses

Regulators continue to focus on hurricane preparedness and storm recovery issues for utility companies. Newly mandated storm preparedness initiatives could impact our operating expenses and capital expenditures beginning in 2007. The initial forecasts of these annual expenditures are approximately $700,000. It is possible that additional regulation and rules will be mandated regarding storm related expenditures over the next several years. We requested that the FPSC allow us to recover the cost of the newly mandated storm preparedness initiatives and to defer these storm-related expenditures until we receive recovery through a rate increase. If approved, both the recovery and expenditures may occur by mid-2007. If the FPSC does not approve our request, we plan to file a rate proceeding in 2007 as an alternative option for recovery of these expenditures.

Land Purchase

We are currently reviewing multiple sites for the new South Florida division office. We expect to purchase land for the new South Florida division office during 2007.

Contractual Obligations

Table of Contractual Obligations
(Dollars in thousands)

Payments due by period:	Total	Less than 1 year	1 to 3 years	3 to 5 years	More than 5 years
Long-term Debt Obligations	$52,500	$ -	$2,818	$2,818	$46,864

Deleted: 448

Long-term Debt Obligations

The Long-term debt obligations are principal amounts.

Long-term Debt Interest

The Long-term debt interest represents the interest obligation on our Mortgage Bonds.

Operating Lease Obligations

Our total operating lease obligation is $352,000. We are leasing property from the City of Fernandina Beach in our Northeast division. The total obligation for the duration of this lease is about $107,000 over the next five years. We lease our appliance showroom in the same division for approximately $35,000 annually. We also have other operating lease agreements with various terms and expiration dates.

Purchase Obligations

A purchase order is considered an obligation if it is associated with a contract or is authorizing a specific purchase of material. The Other Purchase Obligation amount presented above represents the amount of open orders.

Pension, Medical Postretirement and Other Obligations
Our pension plan continues to meet all funding requirements under ERISA regulations; however, under current actuarial assumptions, contributions may be required as early as 2009. Current projections indicate that we will make voluntary contributions of $250,000 in 2007, $500,000 in 2008 and make required contributions of approximately $2 million in 2009 and 2010, decreasing to under $1 million in 2011. These payments are not included in the Contractual Obligations table.

Environmental clean up is anticipated to require approximately $600,000 in 2007, the remainder to be paid in following years. These payments are not included in the Contractual Obligations table.

We have medical postretirement payments relating to retiree medical insurance. These payments are not included in the Contractual Obligations table. Estimated future payments are described in Note 12 in the Notes to Consolidated Financial Statements.

Dividends
We have historically paid dividends. It is our intent to continue to pay quarterly dividends for the foreseeable future. Our dividend policy is reviewed on an ongoing basis by our Board of Directors and is dependent upon our future earnings, cash flow, financial condition, capital requirements and other factors.

Other

Impact of Recent Accounting Standards

Financial Accounting Standard Board Interpretation No. 48
In June 2006, the FASB issued Interpretation No. 48, Accounting for Uncertainty in Income Taxes (FIN 48). The interpretation clarifies the accounting for uncertainty in income taxes recognized in an entity's financial statements in accordance with SFAS No. 109, Accounting for Income Taxes. The interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 also provides guidance on de-recognition, measurement, classification, interest and penalties, accounting in interim periods, disclosure and transition. This interpretation is effective for calendar years beginning January 1, 2007.

We have performed an analysis of tax positions taken and expected to be taken on the tax returns and assessed the technical merits of each tax position by relying on legislation, statutes, common legislative intent, regulations, rulings, and case law and determined that the Company has no material uncertain tax positions. Additionally, the IRS concluded an audit of the 2002 and 2003 tax years in September of 2005.

In February of 2007, the IRS informed us that it selected our 2003 and 2004 tax years for examination. As our tax positions have remained consistent with those from the previously audited tax years, we are not expecting any material adverse findings as the result of the impending IRS audit.

Based on the aforementioned, we believe that the adoption of FASB Interpretation No. 48 will not have a material impact on our financial condition or results of operation.

Financial Accounting Standard No. 157

In September 2006, the FASB issued Statement No. 157, "Fair Value Measurements". This Statement clarifies fair value as the market value received to sell an asset or paid to transfer a liability, that is, the exit value, and applies to any assets or liabilities that require recurring determination of fair value. The measurement includes any applicable risk factors and does not include any adjustment for volume. This Statement is effective for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods within. The Company expects to adopt SFAS No. 157 effective January 1, 2008. The Company does not believe adoption of this Statement will have a material impact on our financial condition or results of operation.

Financial Accounting Standard No. 158

In September 2006, the FASB issued Statement No. 158, "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans". Statement 158 requires the Company to show the funded status of its pension and retiree health care plans as a prepaid asset or accrued liability, and to show the net deferred and unrecognized gains and losses related to the retirement plans, net of tax, as part of accumulated other comprehensive income in shareholders' equity. Previously, the net deferred and unrecognized gains and losses were netted in the prepaid asset or accrued liability recorded for the retirement plans. The Company adopted the recognition provisions of Statement 158, as required, at December 31, 2006.

The Company uses December 31 as the measurement date to measure the assets and obligations of its retirement plans. Statement 158 will also require the Company to use December 31 as the measurement date no later than fiscal years ending after December 15, 2008. The Company currently uses this date as the measurement date, and has used it for all periods presented.

Deleted: September 30

Deleted: expects to make this change in 2008.

The actuarial valuation of the retirement plan obligations has been completed and the recognition provisions of Statement 158 at December 31, 2006 resulted in an additional liability for retirement plans. The tax on the non-regulated portion of the liability has been recorded as a deferred income tax asset. As an offset, the regulatory portion of this liability has been deferred as a regulatory asset-retirement plans to be recovered in future rate proceedings and the remaining expense for recording the liability has been included in other comprehensive income. The fair value of retirement plan assets and obligations are subject to change based on market fluctuations. The table below summarizes the effects to our financial statements.

Deleted: is

FASB 158 Implementation Summary
(Dollars in thousands)

	December 31, 2006		
	Before Application of SFAS 158	Adjustment	After Application of SFAS 158

Long term medical and pension reserve	3,819	912	4,731
Deferred income taxes	16,224	(88)	16,136

Staff Accounting Bulletin No. 108

In September 2006, the SEC issued Staff Accounting Bulletin (SAB) No. 108 "Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements". SAB 108 requires that public companies utilize a "dual-approach" to assessing the quantitative effects of financial misstatements. This dual approach includes an assessment from both an income statement and a balance sheet focus. The guidance in SAB 108 must be applied to annual financial statements for fiscal years ending after November 15, 2006. The Company has adopted SAB No.108 and there has not been any impact on our consolidated financial position or results of operations as the result of this adoption.

Critical Accounting Policies and Estimates

Regulatory Accounting

We prepare our financial statements in accordance with the provisions of SFAS No. 71 "Accounting for the Effects of Certain Types of Regulation" and it is our most critical accounting policy. In general, SFAS No. 71 recognizes that accounting for rate-regulated enterprises should reflect the relationship of costs and revenues introduced by rate regulation. As a result, a regulated utility may defer recognition of a cost (a regulatory asset) or recognize an obligation (a regulatory liability) if it is probable that, through the rate making process, there will be a corresponding increase or decrease in revenues or expenses. SFAS No. 71 does not apply to our unregulated propane gas operations.

Use of Estimates

We are required to use estimates in preparing our financial statements so they will be in compliance with accounting principles generally accepted in the United States of America. Actual results could differ from these estimates. We believe that the accruals for potential liabilities are adequate. The estimates in our financial statements included the accrual for pensions, environmental liabilities, over-earnings liability, unbilled revenues, allowances for doubtful accounts, uninsured liability claims and the regulatory deferred income tax and deferred income liabilities.

- Pension and post retirement benefits-An actuary calculates the estimated pension liability in accordance with FASB 87, FASB 88 as amended by FASB 132 and FASB 158.
- Environmental liabilities-These liabilities are subject to certain unknown future events. The Company reviews the environmental issues regularly with the geologists performing the feasibility studies and their legal counsel specializing in manufactured gas plant issues and negotiates with the environmental regulators and the other participating parties to determine the adequacy of the estimated liability for environmental reserves.

Deleted: ***Financial Accounting Standard No. 154***

In May 2005, the FASB issued Statement No. 154, "Accounting Changes and Error Corrections". This Statement applies to all voluntary changes in accounting principle and requires retrospective application to prior period financial statements of changes in accounting principle, unless it is impracticable to determine either the period-specific effects or the cumulative effects of the change. This Statement is effective for accounting changes and corrections of errors made in fiscal years beginning after December 15, 2005. We adopted SFAS No. 154 as of January 1, 2006; however, we did not have any impact to our financial statements in 2006 as a result of this adoption.

Deleted: ***Financial Accounting Standard Board Interpretation No. 47***

In March 2005, the FASB issued Interpretation No. 47, "An Interpretation of FASB Statement No. 143". SFAS No. 143, "Accounting for Asset Retirement Obligations", requires that the fair value of an asset retirement obligation be recognized at the time those obligations are incurred. Upon initial recognition of a legal liability, costs are capitalized as part of the related long-lived asset and allocated to expense over the useful life of the asset. SFAS No. 143 also requires that components of previously recorded depreciation related to the cost of removal of assets upon retirement, whether legal asset retirement obligations or not, be removed from a company's accumulated depreciation reserve. We adopted the provisions of the Statement as of January 1, 2003, as prescribed by the FPSC. Under FPSC guidelines, the estimated cost of removal expenses for normal retirements related to regulated fixed assets were reserved through the depreciation expense and accumulated reserves. This was disclosed in a footnote until December 31, 2003, when the estimated cost of removal from accumulated depreciation was reclassified to a regulatory liability for the obligation.

This Interpretation addresses the legal obligation to retire an asset when the timing and (or) met[... [1]

Deleted: y

Deleted:

- Over-earnings liability-This liability is subject to regulatory review and possible disallowance of some expenses in determining the amount of over-earnings.
- Unbilled revenues-Unbilled revenue is estimated with certain assumptions including unaccounted for units and the use of current month sales to estimate unbilled sales.
- Allowances for doubtful accounts- This liability is estimated based on historical information and trended current economic conditions, certain assumptions, and is subject to unknown future events. Actual results could differ from our estimates.
- Uninsured liability claims-We are self-insured for the first $250,000 of each general and auto liability claim and accrue for estimated losses occurring from both asserted and unasserted claims. The estimate for unasserted claims arising from unreported incidents is based on an analysis of historical claims data and judgment.
- Regulatory deferred income tax and deferred income tax liabilities-These liabilities are estimated based on historical data and are subject to finalization of our income tax return. Actual results could differ from our estimates.

Deleted: y

Revenue Recognition
We bill utility customers on a monthly cycle basis; however, the billing cycle periods for most customers do not coincide with the accounting periods used for financial reporting. We accrue estimated revenue for gas and electric customers for consumption used but not yet billed for in an accounting period. Determination of unbilled revenue relies on the use of estimates and historical data. We believe that the estimates for unbilled revenue materially reflect the unbilled gross profit for our customers for units used but not yet billed in the current period.

The FPSC approves rates that are intended to permit a specified rate of return on investment and limits the maximum amount of earnings of regulated operations. Any earnings in excess of this maximum amount are accrued for as an over-earnings liability and revenues are reduced for this same amount. The calculations supporting these liabilities are complex and involve a variety of projections and estimates before the ultimate settlement of such obligations. The FPSC determines the disposition of any over-earnings with alternatives that include refunding to customers, funding storm damage or environmental reserves or reducing any depreciation reserve deficiency.

Effects of Inflation
Our tariffs for natural gas and electric operations provide for fuel clauses that adjust annually for changes in the cost of fuel. Increases in other utility costs and expenses not offset by increases in revenues or reductions in other expenses could have an adverse effect on earnings due to the time lag associated with obtaining regulatory approval to recover such increased costs and expenses, the uncertainty of whether regulatory commissions will allow full recovery of such increased costs and expenses and any effect on unregulated propane gas operations.

Environmental Matters
We currently use or have used in the past, several contamination sites that are currently involved in pending or threatened environmental litigation as discussed in Note 10-"Contingencies" in the Notes to Consolidated Financial Statements. We intend to vigorously defend our rights in this litigation. We have insurance and rate relief to cover

any expected losses or expenses. We believe that the aggregate of all future contamination assessment and remedial costs, legal fees and other related expenses would not exceed the insurance proceeds received and any rate relief granted. The final 2004 natural gas rate relief granted by the FPSC provided future recovery of $8.9 million for environmental liabilities. The remaining balance to be recovered from customers through future recovery is included on the balance sheet as "Other regulatory assets-environmental".

Off-Balance Sheet Arrangements
We do not have any off-balance sheet arrangements.

Forward-Looking Statements (Cautionary Statement)
This report contains forward-looking statements including those relating to the following expectations:

- Based on our current expectations for cash needs, including cash needs relating to the possible land purchase and related construction, we may choose to consider an equity or debt financing in 2008 to address those cash needs. The need and timing will depend upon operational requirements, environmental expenditures, pension contributions and construction expenditures and cannot be precisely predicted at this time.
- Pension expenses will continue to decrease in 2007.
- Other insurance costs will increase in 2007.
- Our anticipation of continued compliance in the foreseeable future with our line of credit covenants.
- Our expectation that cash requirements will increase significantly in the future due to environmental clean-up costs, sinking fund payment on long-term debt and pension contributions.
- Electric storm related expenditures may be necessary beginning in mid-2007 and the total cost may be significant. We may receive recovery for these expenditures.
- Propane gas hedging activity may occur in 2007.
- The fuel supply contract in our Northwest Florida division beginning January 1, 2008 will be approved by the FPSC in 2007 and will be effective for the purchase of fuel supply beginning in 2008.
- Our 2005 and 2006 over-earnings liabilities in natural gas will materialize as estimated after the FPSC reviews and audits.
- We expect to have higher fuel costs for 2007, 2008 and beyond.
- The development in Indiantown will occur as estimated.
- The purchase of land for our new natural gas and propane gas division office will occur in 2007.
- The FPSC will allow our natural gas over-earnings to fund a future storm reserve and reduce our current regulatory asset related to historic storm costs and discontinue the related natural gas storm surcharge in 2007.
-
- The commercial and industrial growth will occur as expected in our Northwest division providing increases in our revenues and gross profit.
- The two customers that went off-line in 2006 will be fully operational by mid-2007.

Deleted: We have increased our focus on collection efforts of bad debt and we expect our bad debt expense to return to normal levels in 2007 and beyond.

These statements involve certain risks and uncertainties. Actual results may differ materially from what is expressed in such forward-looking statements. Important factors

that could cause actual results to differ materially from those expressed by the forward-looking statements include, but are not limited to, those set forth above in "Risk Factors".

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

All financial instruments held by us were entered into for purposes other than for trading. We have market risk exposure only from the potential loss in fair value resulting from changes in interest rates. We have no material exposure relating to commodity prices because under our regulatory segments, we are currently fully compensated for the actual costs of commodities (natural gas and electricity) used in our operations. Any commodity price increases for propane gas are normally passed through monthly to propane gas customers as the fuel charge portion of their rate.

None of our gas or electric contracts are accounted for using the fair value method of accounting. While some of our contracts meet the definition of a derivative, we have designated these contracts as "normal purchases and sales" under SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities".

Beginning in 2007 we plan, on a rolling four-quarter basis, to purchase a "cap" on approximately one-third of our forecast propane gas volume purchases and pre-buy or hedge with a swap one-third of our forecast anticipated propane gas purchases. The remaining one-third will fluctuate with the market price. Our energy strategy allows us to participate in two-thirds of price declines but only one-third of price increases. As of December 31, 2006, we have not entered into any hedging activities. When we do enter into hedging activities, we will determine whether they meet the definition of normal sales and purchases and if not, we will determine whether we can use hedge accounting.

We have no exposure to equity risk, as we do not hold any equity instruments. Our exposure to interest rate risk is limited to investments held for environmental costs, the water sale long term receivable and short-term borrowings on the line of credit. The investments held for environmental costs are short-term fixed income debt securities whose carrying amounts are not materially different than fair value. The short-term borrowings were $3.5 million at the end of December 2006. Therefore, we do not believe we have material market risk exposure related to these instruments. The indentures governing our two first mortgage bond series outstanding contain "make-whole" provisions, which are pre-payment penalties that charge for lost interest, which render refinancing impracticable.

Our non-interest bearing long-term receivable from the sale of the water operations was discounted at 4.34%. A hypothetical 0.5% (50 basis points) increase in the interest rate used would change the current fair value from $6 million to $5.9 million.

In 2006, a hypothetical 0.5% (50 basis points) decrease in the long-term interest rate on $52.5 million debt excluding unamortized debt discount would change the fair value from $63 million to $66.9 million.

Changes in short-term interest rates could have an effect on income depending on the balance borrowed on the variable rate line of credit. We had short-term debt of $3.5 million on December 31, 2006 and $9.6 million on December 31, 2005. A hypothetical 1% increase in interest rates would have resulted in a decrease in annual earnings for 2006 by $35,000 and for 2005 by $96,000, based on year-end borrowings.

See Notes to Consolidated Financial Statements

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Summary of Significant Accounting and Reporting Policies

A. General

The Company is an operating public utility engaged principally in the purchase, transmission, distribution and sale of electricity and in the purchase, transmission, distribution, sale and transportation of natural gas. The Company is subject to the jurisdiction of the FPSC with respect to its natural gas and electric operations. The suppliers of electric power to the Northwest Florida division and of natural gas to the natural gas divisions are subject to the jurisdiction of the FERC. The Northeast Florida division is supplied most of its electric power by a municipality which is exempt from FERC and FPSC regulation. The Company also distributes propane gas through a non-regulated subsidiary.

B. Basis of Presentation

The consolidated financial statements include the accounts of Florida Public Utilities Company (FPU) and its wholly owned subsidiary, Flo-Gas Corporation. All significant intercompany balances and transactions have been eliminated. The Company's accounting policies and practices conform to accounting principles generally accepted in the United States of America (GAAP) as applied to regulated public utilities and are in accordance with the accounting requirements and rate-making practices of the FPSC and in accordance to the rule requirements of the Securities and Exchange Commission (SEC).

C. Use of Estimates

The preparation of financial statements in conformity with GAAP requires the Company to make certain estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of any contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Some of these estimates include the accruals for pensions, allowances, environmental liabilities, liability reserves, unbilled revenue, regulatory deferred tax liabilities and over-earnings liability. Actual results may differ from these estimates and assumptions.

D. Reclassifications

Certain amounts in the prior years' financial statements have been reclassified to conform to the 2006 presentation.

E. Regulation

The financial statements are prepared in accordance with the provisions of Statement of Financial Accounting Standards (SFAS) No. 71 – "Accounting for the Effects of Certain Types of Regulation". SFAS No. 71 recognizes that accounting for rate-regulated enterprises should reflect the relationship of costs and revenues introduced by rate regulation. A regulated utility may defer recognition of a cost (a regulatory asset) or show recognition of an obligation (a regulatory liability) if it is probable that, through the ratemaking process, there will be a corresponding increase or decrease in revenues. The Company has recognized certain regulatory assets and liabilities in the consolidated balance sheets. The Company believes that the FPSC will continue to allow recovery of

such items through rates. As these regulatory assets and liabilties are recovered through rates or paid through a reduction of rates, the assets and liabilities are amortized to revenue and expense. In the event that a portion of the Company's operations are no longer subject to the provisions of SFAS No. 71, the Company would be required to write-off related regulatory assets and liabilities that are not specifically recoverable through regulated rates. In addition, the Company would be required to determine if an impairment related to other assets exists, including plant, and write-down the assets, if impaired, to their fair value.

Summary of Regulatory Assets and Liabilities
(Dollars in thousands)

	2006	2005
Assets		
Deferred development costs (1)	$ 3,952	$ 4,190
Unamortized fuel related regulatory costs (6)	48	24
Environmental assets (2)	8,284	8,868
Storm Reserve assets (3)	270	452
Deferred retirement plan costs (5)	829	-
Unamortized Rate Case expense	368	541
Under-recovery of fuel costs	862	3,375
Unamortized piping and conversion costs (1)	1,521	1,587
Unamortized loss on reacquired debt (1)	209	227
Total Regulatory Assets	$16,343	$19,264
Liabilities		
Tax liabilities	$ 876	$ 991
Cost of removal	8,800	8,256
Storm reserve liabilities	1,636	1,536
Over-recovery of fuel costs	3,656	-
Over-recovery of conservation	355	24
Over-earnings liability (4)	880	700
Total Regulatory Liabilities	$16,203	$11,507

Deleted: -

Deleted: 15,481

Deleted: 2,794

Deleted: 15,341

(1) Deferred development costs, unamortized piping and conversion costs, and unamortized loss on reacquired debt are included in deferred charges in the consolidated balance sheets.
(2) The Company has included the amount due from customers as a regulatory asset for environmental costs. The FPSC authorized recovery of these environmenatl costs from customers over 20 years.
(3) The FPSC has authorized the Company to recover storm damages incurred in 2004 in their natural gas operations. Recovery of these costs from customers over 30 months began November 2005.
(4) The Company originally estimated the 2005 over-earnings for regulated natural gas operations at $700,000. In 2006 the estimate was reduced to $650,000. The Company has estimated 2006 over-earnings for regulated natural gas operations of $230,000. The Company has recorded these liabilities which reduced revenues. The FPSC determines the disposition of over-earnings with alternatives that include refunding to customers, funding storm damage or environmental reserves, or reducing any depreciation reserve deficiency.
(5) The actuarial valuation of the retirement plan obligations has been completed and the recognition provisions of Statement 158 at December 31, 2006

Deleted: his was authorized by t

Deleted: in their most recent natural gas rate proceeding and is being recovered

resulted in a regulatory asset for the portion of the loss of $829,000 to be recovered in future rate proceedings.

(6) The Company has deferred certain regulatory fuel related costs and as of January 2006 has been amortizing these over five years according to a FPSC order in the November 2005 fuel hearings.

The base revenue rates for regulated segments are determined by the FPSC and remain constant until a request for an increase is filed and approved by the FPSC or the FPSC orders the Company to reduce their rates. For the Company to recover increased costs from the effects of inflation and construction expenditures for regulated segments, a request for an increase in base revenues would be required. Separate filings would be required for the electric and natural gas segments. The Company is currently seeking rate relief for electric storm preparedness initiatives required in 2007.

F. Derivatives

None of the Company's gas or electric contracts are accounted for using the fair value method of accounting. All material contracts that meet the definition of derivative instruments are considered "normal purchases and sales" under SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities".

Deleted: possible

G. Revenue Recognition

The Company's revenues consist of base revenues, fuel adjustment charges, conservation charges and the pass-through of certain governmental imposed taxes based on revenues.

The FPSC approves base revenue rates that are intended to permit a specified rate of return on investment and limits the maximum amount of earnings of regulated operations. Fuel adjustment charges, conservation charges and the pass-through of certain governmental imposed taxes based on revenues are approved by the FPSC to allow recovery of fuel, conservation and revenue based taxes from the Company's customers. Any over or under-recovery of these expense items are deferred and subsequently refunded or collected in the following period.

Annually, any earnings in excess of this maximum amount permitted in the base rates are accrued for as an over-earnings liability and revenues are reduced an equivalent amount. The calculations supporting these liabilities are complex and involve a variety of projections and estimates before the ultimate settlement of such obligations. The FPSC determines the disposition of any over-earnings with alternatives that include refunding to customers, funding storm damage or environmental reserves, or reducing any depreciation reserve deficiency.

The Company bills utility customers on a monthly cycle basis; however, the billing cycle periods for most customers do not coincide with the accounting periods used for financial reporting. The Company accrues estimated revenue for gas and electric customers on usage not yet billed for the accounting period. Determination of unbilled revenue relies on the use of estimates, fuel purchases and historical data.

H. Allowance for Doubtful Accounts

The Company records an allowance for doubtful accounts based on historical information and trended current economic conditions. The following is a summary of the activity in Allowance for Doubtful Accounts for the years ending December 31:

Allowance for Doubtful Accounts				
	Balance at Beginning of Year	Write-offs	Provisions to Bad Debt Expense	Balance at End of Year
2004	$ 180,000	320,000	409,000	$ 269,000
2005	$ 269,000	292,000	295,000	$ 272,000
2006	$ 272,000	350,000	50[illegible],000	$ 429,000

Deleted: 4
Deleted: 11

I. Utility Plant and Depreciation

Utility plant is stated at original cost. The propane gas utility plant that has been acquired in acquisitions was stated at fair market value when acquired. Additions to utility plant include contracted services, direct labor, transportation and materials for additions. Units of property are removed from utility plant when retired. Maintenance and repairs of property and replacement and renewal of items determined not to be units of property are charged to operating expenses. Substantially all of the utility plant and the shares of Flo-Gas Corporation collateralize the Company's first mortgage bonds.

Utility Plant
(Dollars in thousands)

Plant Classification	Annual Composite Depreciation Rate	2006	2005
Land		$ 1,130	$ 1,124
Buildings	2.0% to 4.9%	6,991	6,862
Distribution	2.0% to 8.6%	158,010	147,580
Transmission	2.2% to 3.8%	6,878	6,799
Equipment	2.0% to 20.0%	12,700	11,534
Furniture and Fixtures	4.8% to 20.0%	392	369
Work-in-Progress		2,867	5,010
		$ 188,968	$ 179,278

Depreciation for the Company's regulated segments is computed using the composite straight-line method at rates prescribed by the FPSC for financial accounting purposes. Propane gas depreciation is computed using a composite straight-line method at an average rate based on estimated average life of approximately 20-30 years. Such rates are based on estimated service lives of the various classes of property. Depreciation provisions on average depreciable property approximate 3.9% in 2006, 3.9% in 2005 and 3.6% in 2004.

J. Impact of Recent Accounting Standards

Financial Accounting Standard Board Interpretation No. 48

In June 2006, the FASB issued Interpretation No. 48, Accounting for Uncertainty in Income Taxes (FIN 48). The interpretation clarifies the accounting for uncertainty in income taxes recognized in an entity's financial statements in accordance with SFAS No. 109, Accounting for Income Taxes. The interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 also provides guidance on de-recognition, measurement, classification, interest and penalties, accounting in interim periods, disclosure and transition. This interpretation is effective for calendar years beginning January 1, 2007.

We have performed an analysis of tax positions taken and expected to be taken on the tax returns and assessed the technical merits of each tax position by relying on legislation, statutes, common legislative intent, regulations, rulings and case law and determined that the Company has no material uncertain tax positions. Additionally, the IRS concluded an audit of the 2002 and 2003 tax years in September of 2005.

In February of 2007, the IRS informed us that it selected our 2003 and 2004 tax years for examination. As our tax positions have remained consistent with those from the previously audited tax years, we are not expecting any material adverse findings as the result of the impending IRS audit.

Based on the aforementioned, we believe that the adoption of FASB Interpretation No. 48 will not have a material impact on our financial condition or results of operations.

Financial Accounting Standard No. 157

In September 2006, the FASB issued Statement No. 157, "Fair Value Measurements". This Statement clarifies fair value as the market value received to sell an asset or paid to transfer a liability, that is, the exit value, and applies to any assets or liabilities that require recurring determination of fair value. The measurement includes any applicable risk factors and does not include any adjustment for volume. This Statement is effective for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods within. The Company expects to adopt SFAS No. 157 effective January 1, 2008. The Company does not believe adoption of this Statement will have a material impact on our financial condition or results of operation.

Financial Accounting Standard No. 158

In September 2006, the FASB issued Statement No. 158, "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans". Statement 158 requires the Company to show the funded status of its pension and retiree health care plans as a prepaid asset or accrued liability, and to show the net deferred and unrecognized gains and losses related to the retirement plans, net of tax, as part of accumulated other comprehensive income in shareholders' equity. Previously, the net deferred and unrecognized gains and losses were netted in the prepaid asset or accrued liability recorded for the retirement plans. The Company adopted the recognition provisions of Statement 158, as required, at December 31, 2006.

The Company uses December 31 as the measurement date to measure the assets and obligations of its retirement plans. Statement 158 will also require the Company to use December 31 as the measurement date no later than fiscal years ending after December 15, 2008. The Company currently uses this date as the measurement date, and has used it for all periods presented.

The actuarial valuation of the retirement plan obligations has been completed and the recognition provisions of Statement 158 at December 31, 2006 resulted in an additional liability for retirement plans. The tax on the non-regulated portion of this liability has been recorded as a deferred income tax asset. As an offset, the regulatory portion of this liability has been deferred as a regulatory asset-retirement plans to be recovered in future rate proceedings and the remaining expense from recording the liability has been included in other comprehensive income. The fair value of retirement plan assets and obligations are subject to change based on market fluctuations. The table below summarizes the effects to our financial statements.

FASB 158 Implementation Summary
(Dollars in thousands)

	December 31, 2006		
	Before Application of SFAS 158	Adjustment	After Application of SFAS 158
Assets:			
Other regulatory assets- retirement plans	$ -	$829	$829
Liabilities and Equity:			
Accumulated other comprehensive income/(loss)	-	(146)	(146)
Other accruals and payables	2,034	151	2,185
Long term medical and pension reserve	3,819	912	4,731
Deferred income taxes	16,224	(88)	16,136

Staff Accounting Bulletin No. 108

In September 2006, the SEC issued Staff Accounting Bulletin (SAB) No. 108 "Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements". SAB 108 requires that public companies utilize a "dual-approach" to assessing the quantitative effects of financial misstatements. This dual approach includes an assessment from both an income statement and a balance sheet focus. The guidance in SAB 108 must be applied to annual financial statements for fiscal years ending after November 15, 2006. The Company has adopted SAB No.108 and there has not been any impact on our consolidated financial position or results of operations as the result of this adoption.

2. **Goodwill and Intangible Assets**

In accordance with SFAS No. 142, "Goodwill and Other Intangible Assets", the Company does not amortize goodwill or intangibles with indefinite lives. The Company periodically tests the applicable reporting segments, natural gas and propane gas, for

Deleted: The Company uses September 30 as the measurement date to measure the assets and obligations of its retirement plans. Statement 158 will also require the Company to use December 31 as the measurement date no later than fiscal years ending after December 15, 2008. The Company expects to make this change in 2008.¶

Deleted: is

Deleted: ***Financial Accounting Standard No. 154¶***
In May 2005, the FASB issued Statement No. 154, "Accounting Changes and Error Corrections". This Statement applies to all voluntary changes in accounting principle and requires retrospective application to prior period financial statements of changes in accounting principle, unless it is impracticable to determine either the period-specific effects or the cumulative effects of the change. This Statement is effective for accounting changes and corrections of errors made in fiscal years beginning after December 15, 2005. We adopted SFAS No. 154 as of January 1, 2006; however, we did not have any impact to our financial statements in 2006 as a result of this adoption.¶

Deleted: ***Financial Accounting Standard Board Interpretation No. 47¶***
In March 2005, the FASB issued Interpretation No. 47, "An Interpretation of FASB Statement No. 143". SFAS No. 143, "Accounting for Asset Retirement Obligations", requires that the fair value of an asset retirement obligation be recognized at the time those obligations are incurred. Upon initial recognition of a legal liability, costs are capitalized as part of the related long-lived asset and allocated to expense over the useful life of the asset. SFAS No. 143 also requires that components of previously recorded depreciation related to the cost of removal of assets upon retirement, whether legal asset retirement obligations or not, be removed from a company's accumulated depreciation reserve. The Company adopted the provisions of the Statement as of January 1, 2003, as prescribed by the FPSC. Under FPSC guidelines, the estimated cost of removal expenses for normal retirements related to regulated fixed assets were reserved through the depreciation expense and accumulated reserves. This w ... [2]

impairment. In the event a segment becomes impaired, the Company would write down the associated goodwill and intangible assets to fair value. The impairment tests performed in 2005 and 2006 showed no impairment for either reporting segment.

Goodwill associated with the Company's acquisitions is identified as a separate line item on the consolidated balance sheet and consists of $500,000 in the natural gas segment and $1.9 million in the propane gas segment. Isn't this backwards – 1.9 NG and $500K Propane

Intangible assets associated with the Company's acquisitions and software have been identified as a separate line item on the balance sheet. Summaries of those intangible assets at December 31 are as follows:

Intangible Assets
(Dollars in thousands)

		2006	2005
Customer distribution rights	(Indefinite life)	$ 1,900	$ 1,900
Customer relationships	(Indefinite life)	900	900
Software	(Five to nine year life)	3,122	2,971
Non-compete agreement	(Five year life)	-	35
Accumulated amortization		(1,517)	(1,415)
Total intangible assets, net of amortization		$4,405	$ 4,391

The 2006 amortization expense of computer software is approximately $300,000. The Company expects the amortization expense of computer software to be approximately $300,000 annually over the next five years, with the current level of software investment. The non-compete agreements expired in 2006.

3. *Over-earnings-Natural Gas*

The FPSC approves rates that are intended to permit a specified rate of return on investment and limits the maximum amount of earnings of regulated operations. The Company has agreed with the FPSC staff to limit the earned return on equity for regulated natural gas and electric operations.

The Company estimated 2005 over-earnings for regulated natural gas operations of $700,000. The 2005 over-earnings estimate was revised in 2006 to be $650,000. The Company estimated 2006 over-earnings for regulated natural gas operations of $230,000. These liabilities have been included in the over-earnings liability on the Company's balance sheet. The calculations supporting these liabilities are complex and involve a variety of projections and estimates before the ultimate settlement of such obligations.

The Company feels the estimates of the 2005 and 2006 over-earnings liabilities are accurate, but the amounts could change upon the FPSC finalization and review of earnings expected in 2007 and 2008. The FPSC determines the disposition of over-earnings with alternatives that include refunding to customers, increasing storm damage or environmental reserves or reducing any depreciation reserve deficiency.

Deleted: it

Deleted: funding

4. *Storm Reserves*

As of December 31, 2006, the electric segment storm reserve was approximately $1.6 million. Since the last order on the 1999 disposition of electric over-earnings, the FPSC has allowed the Company the flexibility of automatically applying the electric over-earnings to the storm damage reserves each year since 1999 and allowing additional storm damage accruals up to a cap of $2.9 million. In 2006, 2005 and 2004 there were no electric over-earnings and accordingly no additional over-earnings amounts were added to the storm damage reserves.

In October 2005, the FPSC approved recovery of 2004 natural gas segment storm costs plus interest and revenue taxes over a 30-month period beginning November 2005. The Company deferred storm costs as a regulatory asset due from customers on the balance sheet. As of December 31, 2006, the unrecovered amount of natural gas regulatory asset relating to storm costs was $270,000.

The Company has requested that the FPSC allow 2005 over-earnings in natural gas to be used to recover the regulatory asset -storm and discontinue this storm surcharge. As part of this same request, the Company has also asked the FPSC to allow any excess over-earnings amount to provide additional funds for the "regulatory liability- storm reserve" for natural gas. We expect the FPSC to rule on this request during 2007.

In 2005, the FPSC approved applying 2002 natural gas over-earnings of $118,000 to the storm reserve to cover future storm costs.

5. Income Taxes

Deferred income taxes are provided on all significant temporary differences between the financial statements and tax basis of assets and liabilities at currently enacted tax rates. Investment tax credits have been deferred and are amortized based upon the average useful life of the related property in accordance with the rate treatment.

A. Income Taxes related to Deferred Gain on Water Sale

On March 27, 2003, the Company sold substantially all of its assets of the water division to the City of Fernandina Beach. The sale was made pursuant to a "threat of condemnation" during the fourth quarter of 2002. For tax purposes the Company elected to defer the gain on the sale of the assets pursuant to Code Section 1033 of the Internal Revenue Code of 1986 (IRC). Section 1033 allows non-recognition of gain if property is disposed as a result of threat of condemnation and property that is similar or related in service or use is purchased to replace the disposed property. To qualify, the replacement property must be purchased within the replacement period, which begins on the earlier of date of disposition (March 27, 2003) or date of threat of condemnation (December 31, 2002) and ending two years after the close of the year of sale (December 31, 2005). For real property, the replacement period is extended to three years (December 31, 2006).

The Company purchased property that is similar or related in service or use within the replacement periods with the exception of the intangible assets. During the IRS audit in 2005, the IRS disallowed a portion, approximately $900,000 of the deferral relating to the intangible assets, since replacement was no longer expected.

A $2.9 million estimated tax payment was made in 2003 related to the gain on the sale of the water division. It was subsequently determined that the income tax would be deferred. The Company applied for a refund and received $3.9 million in July 2004, which included other estimated tax overpayments.

B. Provision for Income Taxes

The provision (benefit) for income taxes consists of the following:

(Dollars in thousands)	Years ended December 31, 2006	2005	2004
Current payable			
Federal	$ 3,652	$ 2,150	$ (566)
State	664	370	(96)
Current – net	4,316	2,520	(662)
Deferred			
Federal	(1,674)	(143)	2,003
State	(272)	(9)	358
Deferred – net	(1,946)	(152)	2,361
Investment tax credit	(75)	(81)	(84)
Total income taxes	$ 2,295	$ 2,287	$ 1,615

C. Effective Tax Rate Reconciliation

The difference between the effective income tax rate and the statutory federal income tax rate applied to pretax income is of continuing operations accounted for as follows:

(Dollars in thousands)	Years ended December 31, 2006	2005	2004
Federal income tax at statutory rate (34%)	$ 2,230	$ 2,222	$ 1,771
State income tax, net of federal benefit (5.5%)	238	237	189
Investment tax credit	(75)	(81)	(84)
Tax exempt interest	(85)	(71)	(94)
Other	(13)	(20)	(167)
Total provision for income taxes	$ 2,295	$ 2,287	$ 1,615

D. Deferred Income Taxes

Temporary timing differences which produce deferred income taxes in the accompanying consolidated balance sheets are as follows:

(Dollars in thousands)	Years ended December 31, 2006	2005
Deferred tax assets:		
Environmental	$ 2,063	$ 1,932
Self insurance	774	731
Storm reserve liability	509	408
Vacation pay	357	320
Other deferred credits	15	61
Allowance for uncollectible accounts receivable	162	103
General liability	68	111
Rate refund	331	263
Pension	698	286

Under/over-recovery of conservation costs	134	9
Other	37	37
Total deferred tax assets	5,148	4,261
Deferred tax liabilities:		
Utility plant related	20,274	20,319
Deductible intangibles	696	577
Under-recovery of fuel costs	643	1,704
Rate case expense	138	204
Loss on reacquired debt	79	85
Other	33	6
Total deferred tax liabilities	21,863	22,895
Net deferred income taxes liabilities	$ 16,715	$ 18,634

Deferred tax liabilities included in the consolidated balance sheets are as follows:

(Dollars in thousands)	2006	2005
Deferred income tax – current	$ 579	$ 1,066
Deferred income tax – long term	16,136	17,568
Net deferred income tax liabilities	$ 16,715	$ 18,634

E. IRS Audit

The IRS has informed us that it has selected our 2003 and 2004 tax returns for examination. Management does not expect any material adjustments from the audit but the effects, if any, that result from the final resolution of this IRS audit will be recorded when they become known and estimable. The Company expects the audit will be completed before the end of 2007.

Deleted: It is our understanding that the 2003 tax return is included in the audit due to a net operating loss carry back to that year. The Company may incur related interest expense and income tax liabilities as a result of this audit.

Deleted: At this time m

Deleted: is unable to estimate

Deleted: could

The IRS completed an audit in 2005 of the Company's 2002 and 2003 federal income tax returns. The audit resulted in a current income tax payable amount of $361,000 due to adjustments to depreciation, reserve accounts and recognition of a portion of the water sale gain that was previously deferred. This amount was partially offset by $285,000 in deferred tax liabilities previously established.

6. Capitalization

A. Stock Dividend

On July 25, 2005 a three-for-two stock split in the form of a stock dividend was issued to the shareholders of record on July 15, 2005. All common share information has been restated to reflect the stock split for all periods presented.

B. Common Shares Reserved

The Company has 3,833,352 authorized but unissued shares and 160,349 treasury shares as of December 31, 2006. The Company has reserved the following common shares for issuance as of December 31, 2006:

Dividend Reinvestment Plan	54,071
Employee Stock Purchase Plan	52,035

Board Compensation Plan	20,714

Deleted: Common Stock

Deleted: 3,833,352

C. Preferred Stock

The Company has 6,000 shares of 4 ¾% Series A preferred stock $100 par value authorized for issuance of which 6,000 were issued and outstanding at December 31, 2006. The preferred stock is included in stockholders' equity on the balance sheet.

The Company also has 5,000, 4 ¾% Series B preferred stock $100 par value authorized for issuance none of which has been issued.

The Company also has 32,500, $1.12 Convertible Preference stock, $20 par value and $22 redemption price, authorized for issuance none of which has been issued.

D. Dividend Restriction

The Company's Fifteenth Supplemental Indenture of Mortgage and Deed of Trust restricts the amount that is available for cash dividends. At December 31, 2006, approximately $9 million of retained earnings were free of such restriction and therefore available for the payment of dividends. The line of credit agreement contains covenants that, if violated, could restrict or prevent the payment of dividends. At December 31, 2006 the Company is not in violation of these covenants.

E. Treasury Shares

In prior years, common shares resulting from stock dividends have been allocated to common shares held as treasury shares. Treasury shares are not eligible to receive such allocations. Some of these treasury shares were subsequently reissued, resulting in an overstatement of additional paid-in capital. Accordingly, the Company has restated all periods presented to reflect the correct number of treasury shares and the value of treasury shares and additional paid-in capital at each year-end. As the adjustment is a reallocation of amounts between treasury stock and additional paid-in capital, there is no effect on net income, earnings per common share or total stockholders' equity in any period presented.

Deleted: C

F. Employee Stock Purchase Plan

The Company's Employee Stock Purchase Plan offers common stock at a discount to qualified employees.

Deleted: . The following table shows the number of shares issued under the Plan and the total aggregate consideration received:¶
¶
Year ... [3]

G. Dividend Reinvestment Plan

The Company's Dividend Reinvestment Plan is offered to all Company shareholders and allows the shareholder to reinvest dividends received and purchase additional shares without a fee.

Deleted: The following table shows the number of shares issued under the Plan and the total aggregate consideration received:¶
¶
Year ... [4]

7. Long-term Debt

The Company issued its Fourteenth Series of FPU's First Mortgage Bond on September 27, 2001 in the aggregate principal amount of $15 million as security for the 6.85% Secured Insured Quarterly Notes, due October 1, 2031 (IQ Notes). Interest on the pledged bond accrues at the annual rate of 6.85% payable quarterly in arrears on January 1, April 1, July 1 and October 1 of each year beginning January 1, 2002.

The Company issued $14 million of Palm Beach County municipal bonds (Industrial Development Revenue Bonds) on November 14, 2001 to finance development in the area. The interest rate on the thirty-year callable bonds is 4.90%. The bond proceeds were restricted and held in trust until construction expenditures were actually incurred by the Company. In 2002 the remaining $8 million was drawn from the restricted funds held by the trustee.

In 1992, the Company issued its First Mortgage Bond 9.08% Series in the amount of $8 million. The thirty-year bond is due in June 2022.

The Company issued two of its Twelfth Series First Mortgage bond series on May 1, 1988; the 9.57% Series due 2018 in the amount of $10 million and 10.03% Series due 2018 in the amount of $5.5 million. These two issuances require sinking fund payments of $909,000 and $500,000 respectively, beginning in 2008.

Long-term debt on the balance sheet has been reduced for unamortized debt discount. The unamortized debt discount at December 31 included in long-term debt on the balance sheet is $1.8 million in 2006 and $1.9 million in 2005.

Annual Maturities of Long-Term Debt
(Dollars in thousands)

	Total	2007	2008	2009	2010	2011	Thereafter
Long-term Debt	$52,500		$1,409	$1,409	$1,409	$1,409	$ 46,864

Deleted: 45,476

8. Notes Payable

In 2004, FPU entered into an amended and restated loan agreement that allows the Company to increase the line of credit upon 30 days notice by the Company to a maximum of $20 million. In 2006 the agreement was renewed with an expiration date of July 1, 2008. We have not exercised our option to increase the line of credit limit which is currently at $12 million with an outstanding balance of $3.5 million and a remaining amount available of $8.5 million. The Company reserves $1 million of the line of credit to cover expenses for any major storm repairs in its Northwest Florida division. An additional $250,000 of the line of credit is reserved for a 'letter of credit' insuring our propane facilities.

The average interest rates for the line of credit were as follows as of December 31:

Year	Rate
2006	6.2%
2005	5.3%
2004	3.3%

9. Fair Value of Financial Instruments

The carrying amounts reported in the balance sheet for investments held in escrow for environmental costs, notes payable, taxes accrued and other accrued liabilities approximate fair value. The fair value of long-term debt excluding the unamortized debt discount is estimated by discounting the future cash flows of each issuance at rates

Deleted: since the older bonds contain 'make whole' provisions that negates any fluctuation in interest rates currently offered to the Company for similar debt instruments of comparable maturities. The values at December 31 are shown below.

(in thousands)	2006		2005	
	Carrying Amounts	Approximate Fair Value	Carrying Amounts	Approximate Fair Value
Long-term debt	$ 52,500	$63,000	$52,500	$ 63,000

Deleted: ,000
Deleted: ,000
Deleted: ,000
Deleted: ,000

10. Contingencies

Environmental

The Company is subject to federal and state legislation with respect to soil, groundwater and employee health and safety matters and to environmental regulations issued by the Florida Department of Environmental Protection (FDEP), the United States Environmental Protection Agency (EPA) and other federal and state agencies. Except as discussed below, the Company does not expect to incur material future expenditures for compliance with existing environmental laws and regulations.

(Dollars in thousands)

Site	Range From	Range To
West Palm Beach	$ 4,801	$ 18,027
Sanford	710	710
Pensacola and Other	110	110
Total	$ 5,621	$ 18,847

Deleted: 710
Deleted: 710
Deleted: 85
Deleted: 85
Deleted: 596
Deleted: 822

The Company currently has $13.8 million reserved as an environmental liability. The FPSC approved up to $14 million for total recovery from insurance and rates based on the original 2005 projections as a basis for rate recovery. The Company has recovered a total of $5.5 million from insurance and rate recovery, net of costs incurred to date. The remaining balance of $8.3 million is recorded as a regulatory asset. On October 18, 2004 the FPSC approved recovery of $9.1 million for environmental liabilities (the remaining amount to be recovered is $8.3 million and is included on the balance sheet as "Other regulatory assets – environmental"). The amortization of this recovery and reduction to the regulatory asset began on January 1, 2005. The majority of environmental cash expenditures are expected to be incurred before 2010, but may continue for another 10 years.

West Palm Beach Site

The Company is currently evaluating remedial options to respond to environmental impacts to soil and groundwater at and in the immediate vicinity of a parcel of property owned by it in West Palm Beach, Florida upon which the Company previously operated a gasification plant. The Company entered into a Consent Order with the FDEP effective April 8, 1991, that requires the Company to delineate the extent of soil and groundwater impacts associated with the prior operation of the gasification plant and to remediate such soil and groundwater impacts, if necessary. The Company completed the delineation of soil and groundwater impacts at the site in October 2006. An engineering consultant was retained to perform a feasibility study to evaluate appropriate remedies for the site. The feasibility study was transmitted to FDEP on November 30, 2006.

The feasibility study evaluated a wide range of remedial alternatives based on criteria provided by applicable laws and regulations. The total costs for the remedies evaluated in the feasibility study ranged from a low of $2.8 million to a high of $54.6 million. Based on the likely acceptability of proven remedial technologies described in the feasibility study and implemented at similar sites, consulting/remediation costs to address the impacts now characterized at the West Palm Beach site are projected to range from $4.6 million to $17.9 million. This range of costs covers such remedies as in situ solidification for deeper soil impacts, excavation of superficial soil impacts, installation of a barrier wall with a permeable biotreatment zone (PBZ), monitored natural attenuation of dissolved impacts in groundwater (MNA) or some combination of these remedies. The feasibility study proposed a remedy of superficial soil excavation, and installation of a hanging barrier wall with PBZ and MNA, the cost of which is projected to range from $4.6 million to $9.9 million.

Prior to FDEP's approval of a final remedy for the site, the Company is unable to determine, to a reasonable degree of certainty, the complete extent or cost of remedial action that may be required. As of December 31, 2006, and subject to the limitations described above, remediation costs (including attorneys' fees and costs) for this site are projected to range from approximately $4.8 million to $18 million.

Sanford Site
The Company owns a parcel of property located in Sanford, Florida, upon which a gasification plant was operated prior to its acquisition of the property. Following discovery of soil and groundwater impacts on the property, the Company has participated with four former owners and operators of the gasification plant in the funding of numerous investigations of the extent of the impacts and the identification of an appropriate remedy. On or about March 25, 1998, the Company executed an Administrative Order on Consent (AOC) with the four former owners and operators (collectively, the Group) and the EPA that obligated the Group to implement a Remedial Investigation/Feasibility Study (RI/FS) and to pay EPA's past and future oversight costs. The Group also entered into a Participation Agreement and an Escrow Agreement on or about April 13, 1998 (WFS Participation Agreement). Work under the RI/FS AOC and RI/FS Participation Agreement is now complete and the Company has no further obligations under either document.

In late September 2006, EPA sent a Special Notice Letter to the Company, notifying the Company of EPA's selection of a final remedy for OU1 (soils), OU2 (groundwater), and OU3 (sediments), and giving the Company and the other Group members sixty (60) days within which to submit a "good faith offer" to EPA to provide for implementation of the selected remedies. The Special Notice Letter included an Amended Record of Decision (ROD) for OU1 (the ROD for OU1 was amended to account for a significant increase in the volume of off-site soil impacts and a change in the selected remedy), the original ROD for OU2, and a ROD for OU3. The total estimated remediation costs for the Sanford Gasification Plant Site are now projected to be $12.5 million. On November 30, 2006, the Company and the Group submitted to EPA a good faith offer to implement the approved remedies as set forth in the RODs for OU1 through OU3.

In January, the Company along with the other members of the Group signed a Third Participation Agreement, which provides for funding the remediation work specified in the RODs for OU1 through OU3 and supercedes and replaces the Second Participation Agreement. The Company's share of remediation costs under the Third Participation Agreement is set at 5% of a maximum of $13 million, or $650,000. At present, it is not anticipated that the total cost of remediation will exceed $13 million. If it does, the Group members have agreed to negotiate in good faith to allocate the excess costs at such time that it reasonably appears that the total remediation costs will exceed $13 million. In any such event, the Company does not expect our share of such additional costs to be greater than 5%; and its share of such additional costs may be less than 5%.

The Company's future legal costs and expenses and its share future remediation expenses for this site are currently projected to be approximately $710,000.

Deleted: 710,000

Pensacola Site
The Company is the prior owner/operator of the former Pensacola gasification plant, located in Pensacola, Florida. Following notification on October 5, 1990 that FDEP had determined that the Company was one of several responsible parties for any environmental impacts associated with the former gasification plant site, the Company entered into cost sharing agreements with three other responsible parties providing for the funding of certain contamination assessment activities at the site.

Following field investigations performed on behalf of the responsible parties, on July 16, 1997, FDEP approved a final remedy for the site that provides for annual sampling of selected monitoring wells. Such annual sampling has been undertaken at the site since 1998. The Company's share of these costs is less than $2,000 annually or a total of $27,000.

In March 1999, EPA requested site access in order to undertake an Expanded Site Inspection (ESI). The ESI was completed by EPA's contractor in 1999 and an ESI Report was transmitted to the Company in January 2000. The ESI Report recommends additional work at the site. The responsible parties met with FDEP on February 7, 2000 to discuss EPA's plans for the site. In February 2000, EPA indicated preliminarily that it will defer management of the site to FDEP; however, as of December 31, 2006, the Company has not received any written confirmation from EPA or FDEP regarding this matter. Prior to receipt of EPA's written determination regarding site management, the Company is unable to determine whether additional field work or site remediation will be required by EPA and, if so, the scope or costs of such work.

Key West Site
From 1927 to 1938, the Company owned and operated a gasification plant in Key West, Florida. The plant discontinued operations in the late 1940s; the property on which the plant was located is currently used for a propane gas distribution business. In March 1993, a Preliminary Contamination Assessment Report (PCAR) was prepared by a consultant jointly retained by the Company and the current site owner and was delivered to FDEP. The PCAR reported that very limited soil and groundwater impacts were present at the site. By letter dated December 20, 1993, FDEP notified the Company that the site did not warrant further "CERCLA consideration and a Site Evaluation Accomplished disposition is recommended."

FDEP then referred the matter to its Marathon office for consideration of whether additional work would be required by FDEP's district office under Florida law. As of December 31, 2006, the Company has received no further communication from FDEP with respect to the site. At this time, we are unable to determine whether additional fieldwork will be required by FDEP and, if so, the scope or costs of such work. In 1999, the Company received an estimate from its consultant that additional costs to assess and remediate the reported impacts would be approximately $166,000. Assuming the current owner shared in such costs according to the allocation agreed upon by the parties for the PCAR, the Company's share would be approximately $83,000.

11. Commitments

A. General

To ensure a reliable supply of electric and natural gas at competitive prices, the Company has entered into long-term purchase and transportation contracts with various suppliers and producers, which expire at various dates through 2015. Purchase prices under these contracts are determined by formulas either based on market prices or at fixed prices. At December 31, 2006, the Company has firm purchase and transportation commitments adequate to supply its expected future sales requirements. The Company is committed to pay demand or similar fixed charges of approximately $37.8 million during 2007 related to gas purchase agreements. Substantially all costs incurred under the electric and gas purchase agreements are recoverable from customers through fuel adjustment clause mechanisms.

B. Operating Leases

The Company's total operating lease obligation is $352,000. The Company is leasing property from the City of Fernandina Beach in our Northeast division. The Company is in the process of renegotiating the terms of this lease and it may be able to terminate this lease at an earlier date. The Company leases an appliance showroom in the same division for approximately $35,000 annually. The Company also has other operating lease agreements with various terms and expiration dates. The following table shows the approximate future obligations under noncancelable agreements.

	2007	2008	2009	2010	2011
Operating Lease Obligations	$151,000	$116,000	$47,000	$38,000	-

12. Employee Benefit Plans

The actuarial valuation of the retirement plan obligations has been completed and the recognition provisions of Statement 158 at December 31, 2006 resulted in an additional liability for retirement plans, pension plan and retirees medical plan. See Footnote 1J, Impact of Recent Accounting Standards, Financial Accounting Standard 158 for a summary of the impact to our financial statements.

A. Pension Plan

The Company sponsors a qualified defined benefit pension plan for non-union employees that were hired before January 1, 2005 and for unionized employees that work under one of the six Company union contracts and were hired before their respective contract dates in 2005.

Deleted: that approved this change in 2005. Our six union contracts have accepted this change for their new members hired after

The following tables provide a reconciliation of the changes in the plan's benefit obligations and fair value of assets over the 3-year period ending December 31, 2006 and a statement of the funded status as of December 31, of all three years:

Benefit Obligations and Funded Status

			Years Ended December 31,		
			2006	2005	2004
(1)		Change in Projected Benefit Obligation

(d)	Other	5%-15%	2%	1%	1%
(e)	Total		100%	100%	100%

Expected Return on Plan Assets

The expected rate of return on plan assets is 8.5%. The Company expects 8.5% to fall within the 40 to 50 percentile range of returns on investment portfolios with asset diversification similar to that of the Pension Plan's target asset allocation.

Investment Policy and Strategy

The Company has established and maintains an investment policy designed to achieve a long-term rate of return, including investment income and appreciation, sufficient to meet the actuarial requirements of the Pension Plan. The Company seeks to accomplish its return objectives by investing in a diversified portfolio of equity, fixed income and cash securities seeking a balance of growth and stability as well as an adequate level of liquidity for pension distributions as they fall due. Plan assets are constrained such that no more than 10% of the portfolio will be invested in any one issue.

Cash Flows

Voluntary Prescription Drug Coverage

Legislation enacted in December 2003 provides for the addition of voluntary prescription drug coverage under Medicare starting in 2006. The legislation also provides for a 28% tax-free subsidy for each qualified covered retiree's drug cost between certain thresholds if the employer's coverage is at least actuarially equivalent to the standard Medicare drug benefit. Based on the final regulations issued by the Centers for Medicare and Medicaid Services on January 21, 2005, we determined our prescription drug coverage of the Postretirement Medical Benefits plan to be actuarially equivalent to Medicare Part D.

Discount Rate Assumption

The discount rate assumption used to determine the postretirement benefit obligations is based on current yield rates in the double A bond market. The current year's discount rate was selected using a method that matches projected payouts from the plan with a zero-coupon double A bond yield curve. This yield curve was constructed from the underlying bond price and yield data collected as of the plan's measurement date and is represented by a series of annualized, individual discount rates with durations ranging from six months to thirty years. Each discount rate in the curve was derived from an equal weighting of the double A or higher bond universe, apportioned into distinct maturity groups. These individual discount rates are then converted into a single equivalent discount rate, which is then used for FAS discount purposes. To assure that the resulting rates can be achieved by a postretirement benefit plan, only bonds that satisfy certain criteria and are expected to remain available through the period of maturity of the plan benefits are used to develop the discount rate. Prior years' discount rate assumptions were set based on investment yields available on double A, long-term corporate bonds.

Actuarial Equivalent

In determining "Actuarial Equivalence," our plan's actuary, Aon Consulting, proprietary prescription drug pricing tool, Aon Rx, was used. This tool allowed us to determine the estimated Per Member Per Month (PMPM) prescription drug cost

for both the Company plan and the Medicare plan. The two PMPM's were adjusted for monthly retiree contributions. We assumed that 60% of the monthly combined medical and prescription drug retiree contribution for the Company plan applies towards prescription drugs.

Deleted: Because the subsidy is the same regardless of the cost sharing structure unless the plan is not "Actuarial Equivalent", in general a plan that has higher cost sharing would reduce their annual cost as a percentage greater than a plan would that has lower cost sharing.

C. Health Plan

In December 2003, the Company became fully insured for its employee and retiree's medical insurance. Net health care benefits paid by the Company for active employees were approximately $1.7 million in 2006, $1.6 million in 2005 and $1.5 million in 2004, excluding administrative and stop-loss insurance.

D. 401K Plan

The Company has discontinued eligibility to the defined benefit pension plan for all new hires, and replaced it with a new 401K match.

For new hires not eligible for the defined benefit pension plan, we established an employer match to the employee's contribution to their 401K plans. It provided for a company match of 50% for each dollar contributed by the employee, up to 6% of their salary, for a Company contribution of up to 3%. Beginning in 2007, for non-union employees the plan was enhanced to provide a company match of 100% for the first 2% of an employee's contribution, and a match of 50% for the next 4% of an employee's contribution, for a total company match of up to 4%. This new enhanced match will be negotiated with our six union contracts during 2007, to be effective on their respective contract date within 2007. The employees are eligible for the company match after six months of continuous service, with vesting of 100% after three years of continuous service. The expenses incurred in 2005 and 2006 relating to the Company's 401K plan are not material.

E. Employee Stock Purchase Plan

The Company offers an employee stock purchase plan to substantially all of its employees. The plan offers a 15% discount on the Company's stock at market price fixed six months prior to the date of purchase. The recorded stock compensation expense relating to the Company's employee stock purchase plan is not material.

13. Segment Information

The Company is organized into two regulated business segments: natural gas and electric, and one non-regulated business segment, propane gas. There are no material inter-segment sales or transfers.

Identifiable assets are those assets used in the Company's operations in each business segment. Common assets are principally cash and overnight investments, deferred tax assets and common plant.

Business segment information for 2006, 2005 and 2004 is summarized as follows:

(Dollars in thousands)	2006	2005	2004
Revenues			
Natural gas	$ 70,981	$ 69,094	$ 55,962
Electric	48,527	47,450	42,910

Propane gas	14,727	13,479	11,167	
Consolidated	$ 134,235	$ 130,023	$ 110,039	
Operating income, excluding income tax

Common	246	93	77	
Consolidated	$ 2,295	$ 2,287	$ 1,615	

14. Quarterly Financial Data (Unaudited)

The quarterly financial data presented below reflects the influence of seasonal weather conditions, the timing of rate increases and the migration of winter residents and tourists to Central and South Florida during the winter season. Significant increases in the fourth quarter of 2005 expenses relate to the performance of previously delayed expenditures from previous quarters.

(Dollars in thousands, except per share amounts):	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
2006				
Revenues	$ 43,348	$ 29,878	$ 29,415	$ 31,594
Gross profit	$ 14,135	$ 11,402	$ 10,867	$ 11,860
Operating income	$ 4,528	$ 2,065	$ 1,488	$ 2,248
Earnings before income taxes	$ 3,507	$ 1,162	$ 609	$ 1,281

Net Income	$ 2,221	$ 738	$ 475	$ 830
Earnings per common share (basic and diluted):				
Continuing operations	$ 0.37	$ 0.12	$ 0.08	$ 0.14
2005				
Revenues	$ 35,438	$ 28,329	$ 29,190	$ 37,066
Gross profit	$ 13,619	$ 10,963	$ 10,374	$ 12,263
Operating income	$ 4,684	$ 2,215	$ 1,578	$ 2,160
Earnings before income taxes	$ 3,711	$ 1,205	$ 573	$ 1,046
Net Income	$ 2,353	$ 851	$ 260	$ 784
Earnings per common share (basic and diluted):				
Continuing operations	$ 0.40	$ 0.14	$ 0.04	$ 0.13

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Directors and Shareholders of FPU:

We have audited the accompanying consolidated balance sheets and statements of capitalization of Florida Public Utilities Company and its wholly-owned subsidiary, Flo-Gas Corporation as of December 31, 2006 and 2005 and the related consolidated statements of income, comprehensive income, common shareholders' equity and cash flows for each of the three years in the period ended December 31, 2006. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements and schedules, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Florida Public Utilities Company and its wholly-owned subsidiary, Flo-Gas Corporation at December 31, 2006 and 2005, and the results of its operation and its cash flows for each of the three years in the period ended December 31, 2006, in conformity with accounting principles generally accepted in the United States of America.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None

Item 9A. Controls and Procedures

Disclosure Controls and Procedures

Our management carried out an evaluation, under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, of the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act). Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that, as of December 31, 2006, our disclosure controls and procedures were effective, in that they provide reasonable assurance that information required to be disclosed by us in the reports that we file or submit under the Exchange Act are recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

Changes in Internal Control over Financial Reporting

No change in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) occurred during the fiscal quarter ended December 31, 2006 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Item 9B. Other Information

None

PART III

Item 10. Directors and Executive Officers of the Registrant

Information required by this item concerning directors and nominees of the Registrant will be included under the caption "Information About Nominees and Continuing Directors" in the Registrant's Proxy Statement for the 2007 Annual Meeting of Shareholders (the "2007 Proxy Statement") and is incorporated by reference herein. Information required by this item regarding the Audit Committee will be included under the caption "Board of Directors and Committees" in the 2007 Proxy Statement and is incorporated by reference herein. Information required by this Item regarding the Code of Ethics will be included under the caption "Code of Ethics" in the 2007 Proxy Statement and is incorporated by reference herein. Information required by this Item regarding compliance with Section 16(a) of the Exchange Act will be set forth in the 2007 Proxy Statement under "Section 16(a) Beneficial Ownership Reporting Compliance" and is incorporated by reference herein. Information required by this Item concerning executive officers is set out in Part I of this Form 10-K, above.

Item 11. Executive Compensation

Information required by this Item concerning executive compensation is included under the captions "Board of Directors and Committees", "Executive Compensation", and "Compensation Committee Interlocks and Inside Participation" in the 2007 Proxy Statement is incorporated by reference herein.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

Information required by this Item concerning the security ownership of certain of the Registrant's beneficial owners and management is included under the caption "Security Ownership of Management and Certain Beneficial Owners" in the 2007 Proxy Statement and is incorporated by reference herein. See Item 5 above for equity compensation plan information, which is incorporated by reference herein.

Item 13. Certain Relationships and Related Transactions

None.

Item 14. Principal Accountant Fees and Services

Information required by this Item is set forth in the Registrant's 2007 Proxy Statement under the caption "Principal Accountant Fees and Services" and is incorporated by reference herein.

PART IV

Item 15. Exhibits, Financial Statement Schedules

(a) The following documents are filed as part of this report:

(1) Financial Statements
The following consolidated financial statements of the Company are included herein and in the Registrant's 2006 Annual Report to Shareholders:

Consolidated Statements of Income
Consolidated Statements of Comprehensive Income
Consolidated Balance Sheets
Consolidated Statements of Capitalization
Consolidated Statements of Common Shareholders' Equity
Consolidated Statements of Cash Flows
Notes to Consolidated Financial Statements
Report of Independent Registered Public Accounting Firm

(2) Financial Statement Schedules
The following valuation and qualifying accounts table is included in Note 1.H. herein and in the Registrant's 2006 Annual Report to Shareholders:

Allowance for Doubtful Accounts

Financial Accounting Standard Board Interpretation No. 47

In March 2005, the FASB issued Interpretation No. 47, "An Interpretation of FASB Statement No. 143". SFAS No. 143, "Accounting for Asset Retirement Obligations", requires that the fair value of an asset retirement obligation be recognized at the time those obligations are incurred. Upon initial recognition of a legal liability, costs are capitalized as part of the related long-lived asset and allocated to expense over the useful life of the asset. SFAS No. 143 also requires that components of previously recorded depreciation related to the cost of removal of assets upon retirement, whether legal asset retirement obligations or not, be removed from a company's accumulated depreciation reserve. We adopted the provisions of the Statement as of January 1, 2003, as prescribed by the FPSC. Under FPSC guidelines, the estimated cost of removal expenses for normal retirements related to regulated fixed assets were reserved through the depreciation expense and accumulated reserves. This was disclosed in a footnote until December 31, 2003, when the estimated cost of removal from accumulated depreciation was reclassified to a regulatory liability for the obligation.

This Interpretation addresses the legal obligation to retire an asset when the timing and (or) method of settlement are conditional on a future event that may or may not be within the control of the Company. This Interpretation is effective no later than the end of fiscal years ending after December 15, 2005 (December 31, 2005 for calendar-year entities). We adopted FIN No. 47 as of January 1, 2006. The adoption of this Interpretation has not had an impact to our financial condition or results of operations.

Attachments:	ANALYTICAL 12.31.06.xls

Attached are responses to various assigned accounts. Chris Snyder responded to the natural gas purchase and revenue accounts.

The worksheet rows are in the original order; rows assigned to others have been hidden.

Please contact me if I may be of further assistance.

Thank you,

Jim

Please provide your explanations for the accounts assigned to you on the attached file and e-mail it back to Dale - dbuschmann@bdo.com and Jackie - jgibbons@bdo.com

Pleas make sure to CC me on your e-mails.

Thanks,

Mehrdad

Cheryl attached please find spreadsheet of variances between 12.31.05 & 12.31.06. Please type comments on the same spreadsheet and email back to us. I will be here until Friday afternoon, so you can choose to email me the responses up to that date or just send them directly to Dale.

Thanks

Balance Sheet and Profit & Loss
Analytical Comments
Y/e 12.31.2006

Variances $77,250 & 10%

	Account	2006	2005	Amount Changed	%
Jim	100-1080-1 Cost of removal reclass	-	8,256,355.00	(8,256,355.00)	-100%

The 2006 amount is $8,799,830. This entry is for reporting purposes. BDO has been provided with details of the computation and will prepare the 2006 entry.

	Account	2006	2005	Amount Changed	%
Jim	114-1010.391305 SOFTWARE	360,744.00	-	360,744.00	10000%

During 2006 the Northeast Florida Electric Division completed installation of a computerized Automated Mapping and Facilities Management (AM/FM) System. This amount represents the software cost of the system.

	Account	2006	2005	Amount Changed	%
Jim	121-1860.21 MISC DEF-DR.-UNDERRE	-	1,319,418.00	(1,319,418.00)	-100%

Allocation between divisions is for internal accounting purposes. Accounts 1860.21,2530.21,4000.4951, and 4010.8051 are all interdependant. Charges to the accounts are based on the mothly PGA (Purchase Gas Adjustment) computation that reconciles fuel purchases and fuel revenues. See "Monthly PGA Computation", below.

	Account	2006	2005	Amount Changed	%
Jim	121-2530.21 OVER REC-FUEL ADJ-PU	(4,009,675.00)	-	(4,009,675.00)	100%

Allocation between divisions is for internal accounting purposes. Accounts 1860.21,2530.21,4000.4951, and 4010.8051 are all interdependant. Charges to the accounts are based on the mothly PGA (Purchase Gas Adjustment) computation that reconciles fuel purchases and fuel revenues. See "Monthly PGA Computation", below.

	Account	2006	2005	Amount Changed	%
Jim	123-1860.21 MISC DEF-DR.-UNDERRE	-	1,596,481.00	(1,596,481.00)	-100%

Allocation between divisions is for internal accounting purposes. Accounts 1860.21,2530.21,4000.4951, and 4010.8051 are all interdependant. Charges to the accounts are based on the mothly PGA (Purchase Gas Adjustment) computation that reconciles fuel purchases and fuel revenues. See "Monthly PGA Computation", below.

	Account	2006	2005	Amount Changed	%
Jim	123-2530.21 OVER REC-FUEL ADJ-PU	353,654.00	-	353,654.00	100%

Allocation between divisions is for internal accounting purposes. Accounts 1860.21,2530.21,4000.4951, and 4010.8051 are all interdependant. Charges to the accounts are based on the mothly PGA (Purchase Gas Adjustment) computation that reconciles fuel purchases and fuel revenues. See "Monthly PGA Computation", below.

2

Jim	100-2800-1 Deferred Credit Cost of Removal	-	(8,256,355.00)	8,256,355.00	-100%

The 2006 amount is ($8,799,830). This entry is for reporting purposes. BDO has been provided with details of the computation and will prepare the 2006 entry.

Jim	121-4000.4951 OVER REC;FUEL ADJ- P	4,009,675.00	(411,003.00)	4,420,678.00	-1076%

Allocation between divisions is for internal accounting purposes. Accounts 1860.21,2530.21,4000.4951, and 4010.8051 are all interdependant. Charges to the accounts are based on the mothly PGA (Purchase Gas Adjustment) computation that reconciles fuel purchases and fuel revenues. See "Monthly PGA Computation", below.

Jim	123-4000.4951 OVER REC;FUEL ADJ- P	(353,654.00)	(697,128.00)	343,474.00	-49%

Allocation between divisions is for internal accounting purposes. Accounts 1860.21,2530.21,4000.4951, and 4010.8051 are all interdependant. Charges to the accounts are based on the mothly PGA (Purchase Gas Adjustment) computation that reconciles fuel purchases and fuel revenues. See "Monthly PGA Computation", below.

C Snyder	121-4000.48002 FUEL REVENUE-RESIDEN	(8,281,260.00)	(7,302,886.00)	(978,374.00)	13%

The PGA was 8.2% higher in 2006 than in 2005; this percentage was signficant during the period of higher consumption (Jan-Apr) and would account for the large variance.

C Snyder	121-4000.48102 C/S FUEL REVENUES-CO	(9,211,422.00)	(7,998,557.00)	(1,212,865.00)	15%

The PGA was 8.2% higher in 2006 than in 2005; this percentage was signficant during the period of higher consumption (Jan-Apr) and would account for the large variance.

C Snyder	121-4000.48122 FUEL REV.-INTERRUPTI	-	(287,378.00)	287,378.00	-100%

The last interruptible customer in the South Florida division transitioned to transportation service; therefore, there will not be any fuel revenues for interruptible service.

C Snyder	121-4000.48982 POOLMANAGER SVC FUEL	737,020.00	369,312.00	367,708.00	100%

Pool Manager Fuel Revenue is dependent upon the imbalance that is created between deliveries by Pool Managers and the consumption of their customers. During 2006, Florida Extruders was offline for maintenance which contributed significantly to this increase; however, the overall increase in the PGA (the basis upon imbalances are paid to/received from the Pool Managers) was higher during 2006 than 2005 as discussed above.

C Snyder	123-4000.48002 FUEL REVENUE-RESIDEN	(3,997,083.00)	(3,469,698.00)	(527,385.00)	15%

The PGA was 8.2% higher in 2006 than in 2005; this percentage was signficant during the period of higher consumption (Jan-Apr) and would account for the large variance.

C Snyder	123-4000.48102 C/S FUEL REVENUE-COM	(2,526,351.00)	(2,078,142.00)	(448,209.00)	22%

The PGA was 8.2% higher in 2006 than in 2005; this percentage was signficant during the period of higher consumption (Jan-Apr) and would account for the large variance.

C Snyder	123-4000.48112 C/L FUEL REVENUE-COM	(6,698,501.00)	(5,154,636.00)	(1,543,865.00)	30%

The PGA was 8.2% higher in 2006 than in 2005; this percentage was signficant during the period of higher consumption (Jan-Apr) and would account for the large variance.

3

C Snyder	121-4010.8011 COMMODITY OTHER-SYST	20,211,180.00	24,627,795.00	(4,416,615.00)	-18%

Although the PGA was 8.2% higher during 2006 than 2005, FPUC actual cost of gas was less during 2006 than in 2006. The PGA was higher in order to recover from an undercollected position with our customers.

C Snyder	121-4010.8042 COMMODITY PIPELINE-S	299,309.00	406,242.00	(106,933.00)	-26%

FGT's commodity rate to move gas on the pipeline was lower during 2006 than in 2005.

Jim	121-4010.8051 UNDER RECOVERY PURCH	1,319,418.00	(1,319,418.00)	2,638,836.00	-200%

Allocation between divisions is for internal accounting purposes. Accounts 1860.21,2530.21,4000.4951, and 4010.8051 are all interdependant. Charges to the accounts are based on the mothly PGA (Purchase Gas Adjustment) computation that reconciles fuel purchases and fuel revenues. See "Monthly PGA Computation", below.

C Snyder	123-4010.8045 DEMAND - SYSTEM SUPP	1,294,113.00	1,144,557.00	149,556.00	13%

The increase in demand costs for the Central Florida division is attributible to the allocation of costs between the divisions.

Jim	123-4010.8051 UNDER RECOVERY PURCH	1,596,481.00	(1,596,481.00)	3,192,962.00	-200%

Allocation between divisions is for internal accounting purposes. Accounts 1860.21,2530.21,4000.4951, and 4010.8051 are all interdependant. Charges to the accounts are based on the mothly PGA (Purchase Gas Adjustment) computation that reconciles fuel purchases and fuel revenues. See "Monthly PGA Computation", below.

Jim	115-4030.1 DEPRECIATION EXPENSE	1,504,419.00	1,318,759.00	185,660.00	14%

Transposrtation plant is not included in depreciation expense. During 2005,the Northeast Electric Division's non-transportation plant increased by $4M, 11%. $3M of the increase was during the final two months of 2005. For 2006, non-transportation plant increased $2.3M, 6%. The 2006 increases were even throughout the year. The 14% increase in 2006 depreciation expense, in effect, reflects the sum of plant increases for both 2005 and 2006.

<u>Monthly PGA Computation:</u> Accounts 4010.8051 and 4000.4951 are charged with the income statement results from the monthly over/under recovery PGA computation. Accounts 1860.21 and 2530.21 reflect the cumulative balance sheet effect of charges from the monthly PGA computation. When the cumulative PGA is an over-recovery, accounts 2530.21 (Cr.) and 4000.4951 (Dr.) are charged with the monthly computational results: when the cumulative PGA is an under-recovery, accounts 1860.21 (Dr.) and 4010.8051 (Cr.) are charged. During 2006, the company had total over-recoveries of $6,426,754 resulting from a recovery rate increase granted in January 2006. This over-recovery included the true-up of prior years' under-recoveries of $2,915,896 plus 2006 interest of $145,162. The December 2006 over-recovery balance of $3,656,021 in account 2530.21 is in anticipation of winter increases in gas costs and unit sales.

Doreen,

Thanks for the update. I will incorporate into the valuation analysis and send an updated draft report to you.

Regards,
Dan

Dan
Attached is the revised Balance Sheet Allocation worksheet. As we discussed the revisions made are as follows:

1. Re-allocation of Special LT Deposits 1340.1 entirely to Electric. This deposit relates to our Electric Fuel Contracts.
2. Re-classification of the net fuel over/under recoveries to capital in order to eliminate the associated timing differences, which are refunded or collected from our customers in the next period. These over/under recoveries directly affect our Notes Payable Balance and have therefore been re-classified to our ST Debt Capital Component.

This approach has been discussed with our external auditors – the auditor agrees with the concept, but she will also discuss and get the opinion of their valuation expert.

Please review and let us know if the re-classifications are not appropriate from a business valuation perspective.
Thanks
Doreen

Dan,
Other Investments is left in so that we can tie to the General Ledger, but I do believe we need to be consistent and remove it on the basis of it being considered non-operating. Everything else looks fine.
Thanks
Doreen

Subject: RE: Balance Sheet

Doreen,

The adjustments seem appropriate. Should I use the balance sheet as is was sent over? It appears that you left in other investments. Last year we adjusted as a non-operating asset (and reduced the carrying value). I can do the same this year, but would rather leave it in current assets. If it is removed, a working capital short-fall is created. I then would have to make an adjustment and discuss in the report. I can do that if you want, but it is a much cleaner presentation to leave the other investments as a component of other current assets. Attached is the balance sheet for the Natural Gas Reporting Unit. Please let me know your thoughts.

Thanks,
Dan

Bonnie
Attached is the Questionnaire for Directors and Officers updated with the highlighted numbers updated with data as at December 31, 2006 as requested. Please note the following:

1. Page 7 Ques 9 - the highlighted figure was previously shown as a dollar amount, but since the section relates to shares I have removed the $ sign.
2. Page 11 Ques 17 – in addition to the figure highlighted in section (ii), I have updated the figure in section (i) which was not highlighted but refers to the same gross revenues.

The information is based on our un-audited financial results which could therefore be subject to change. Please let me know if you have any questions, or would like any additional information.
Thanks
Doreen

Hi Cheryl. Just wondering if we were getting close to having the numbers we need so I can release the D&O questionnaire. I'm just trying to stay in the forefront of your thoughts.

Thanks,
Bonnie

Subject: Dir-Quest.2007-FINAL

Good morning and Happy New Year. Cheryl, I'm meant to release the D&O questionnaires to the parties tomorrow. I've revised our current questionnaire to reflect this year's dates but there are several areas I've highlighted which require accounting input. The highlighted figures were used in last year's questionnaire.

Can you please get back with me with these numbers today or advise me with whom I can follow-up? Thanks for your help,

Bonnie

FLORIDA PUBLIC
UTILITIES

QUESTIONNAIRES FOR DIRECTORS AND OFFICERS

Directors' and Officers' Proxy Statement Questionnaire

GENERAL INSTRUCTIONS

In preparing of the Proxy Statement for the 2007 Annual Meeting of Shareholders of Florida Public Utilities Company (the "Company"), we must obtain from you written verification of certain information required to be disclosed in the Proxy Statement.

In order to obtain such verification, this Questionnaire is being sent to each person who, during the Company's Last Fiscal Year (as defined below), served as an officer or director of the Company, as well as current, officers and directors and all nominees for election as a director and to certain officers or employees of the Company's subsidiaries or other principal business units or divisions who may be considered executive officers of the Company under rules of the SEC. Please fill in the answers to the following questions, sign and date the Questionnaire, and return one signed copy to Bonnie Erdek in the enclosed pre-addressed envelope not later than February 5th, 2007. The remaining copy is for your files.

Please use the utmost care in responding to this Questionnaire. You should be aware that if the Proxy Statement contains any false or misleading statements which are material to the election of directors or other actions taken at the Annual Meeting, the validity of such actions could be questioned and under certain - circumstances the Company and those in control of the Company, including officers and directors, could be subject to liability. If the answer to any of the questions is "no" "none" or "not applicable," please so indicate. Please do not leave any questions unanswered.

As used herein. "Last Fiscal Year" refers to the Company's fiscal year ended December 31, 2006. Other italicized terms are defined in **Appendix A** to this Questionnaire. **Appendix B** contains a list of all of the subsidiaries of the Company.

If at any time before the Annual Meeting *you* discover that your answer to any question was inaccurate, or if any event occurring subsequent to your completion hereof would require a change in your answers to any questions (including any transaction reducing, increasing or otherwise affecting your beneficial ownership of the Company's securities as reported Part II of this Questionnaire), please contact George Bachman by telephone at 561.838.1731 immediately.

PART I - STOCK OWNERSHIP

Question 1:
[SEC Regulation S-K, Items 401 (a) and (b)]
Name and Date of Birth
Please set forth your full name and date of birth.
John t English

Question 2:
[SEC Regulation S-K, Item 401 (d)]
Family Relationships

If you have any family relationship, by blood, marriage or adoption not more remote than first cousin, with any director, ***executive officer***, or nominee' or person chosen to become a director or ***executive officer*** of the Company, its parent, any of its subsidiaries (as listed in Appendix B), or other ***affiliates***, or any individual who has been employed by the Company in the past three years as an ***executive officer***, please identify such relative and describe the nature of the relationship.

Question 3:
[SEC Regulation S-K, Items 401 (a), (b), (c), (e), 4020)(1)(ii)]
Principal Occupation and Employment

(a) Please give a brief account of your business experience during the past five years (together with applicable dates); include your principal occupations and employment during that period, including but not limited to any ***executive officer*** position and directorships; the name and principal business of any company, partnership or other entity in which such occupations and employment were carried on; and whether any such company, partnership or other entity is a parent, subsidiary or other ***affiliate*** of the Company. If you are an ***executive officer*** of the Company and have been employed by the Company for less than five years, include a brief explanation of the nature of your responsibilities in prior positions. What is required is information relating to the level of your professional competence, which may include, depending upon the circumstances, such specific information as the size of the operation supervised.

(b) Please indicate all executive officer positions and offices with the Company, its parent or any subsidiary that you presently hold. State your term of office and the period during which you have served as such.

(c) If you are a director, please indicate whether at any time in the past you were an ***officer*** of the Company, its parent or any of its subsidiaries. State the position you held and the dates you held such position.

Question 4:
[SEC Regulation S-K, Items 401 (e) and 4020), SEC Rule 16b-3(b)(3)]
Other Directorships and Executive Officer Positions

(a) If you are, or have been nominated to become, a director of the Company, list all other directorships held by you during the past five years with respect to any company (or "investment company" registered under the Investment Company Act of 1940) required to file periodic reports with the Securities and Exchange Commission.

COMPANY	TIME PERIOD (MO. & YR.)	EXPIRATION OF CURRENT TERM

(b) Did you serve as a director, ***executive officer***, general partner or perform similar functions of any other company, partnership or other entity (public or private) during the Last Fiscal Year? (Omit entities exempt from tax under Section 501 (c) (3) of the Internal Revenue Code.)
☐Yes ☐No

If yes:

(i) Please specify the company name(s) and your position within the company (ies):

____

(ii) Do you serve on any board committees or otherwise determine compensation for the executives of such company? If yes, please specify:
☐Yes ☐No

(iii) Did any ***executive officer*** of the Company serve on the compensation committee of the board or otherwise determine compensation of the executives of any such company during the Last Fiscal Year? If yes, please give specifics:
☐Yes ☐No

(iv) Did any ***executive officer*** of the Company serve on the board of any such company? If yes, please give specifics.
☐Yes ☐No

(v) If your answer to either Question 4(b)(iii) or 4(b)(iv) above is "yes", did any ***executive officer*** of any such company also serve on the compensation committee of the Company's board or otherwise serve on the Company's board during the Last Fiscal Year? If yes, please give specifics, including information about whether that company is a competitor of the Company.
☐Yes ☐No

Question 5:
[SEC Regulation S-K, Items 103, 401 (I) and *401 (g)]*
Involvement in Certain Legal Proceedings

Have any of the following events occurred during the last five years:

(a) Was a petition under the Federal bankruptcy laws, or any state insolvency law, filed by or against you, or was a receiver, fiscal agent or similar officer appointed by a court for the business or property of (i) yourself, (ii) any partnership in which you were a general partner at or within two years before such event or (iii) any corporation or business association of which you were an ***executive officer*** at or within two years before such event?
☐Yes ☐No

7589

(b) Were you convicted in a criminal proceeding, or are you the subject (of a criminal proceeding which is presently pending? Omit traffic violations.

☐Yes ☐No

(c) Were you the subject of any order, judgment or decree of any court (not subsequently reversed, suspended or vacated by any court) permanently or temporarily enjoining you (i) from acting as a futures commission merchant, introducing broker, commodity trading advisor, commodity pool operator, floor broker, leverage transaction merchant, any other person regulated by the Commodity Futures Trading Commission ("CFTC"). or an associated person of any of the foregoing, or as an investment advisor, underwriter, broker or dealer in securities; or as an affiliated person, director or employee of any investment company, bank, savings and loan association or insurance company; or from engaging in or continuing any conduct or practice in connection with such activity; or (ii) from engaging in any type of business practice; or (ill) from engaging in any activity in connection with the purchase or sale of any security or commodity or in connection with any violation of federal or state securities laws or federal commodities laws?

☐Yes ☐No

(d) Were you the subject of any order, judgment or decree of any federal or state authority barring, suspending or otherwise limiting for more than 60 days your right to engage in any activity described in subparagraph (c) above, or to be associated with persons engaged in any such activity?

☐Yes ☐No

(e) Has any court, the SEC, CFTC, NYSE, American Stock Exchange, NASD or any commodity exchange or NASDAQ imposed a sanction against you or found you to have violated any federal or state securities or commodities laws?

☐Yes ☐No

(f) Do you or any of your associates have any claims against the Company or any of its subsidiaries; or are *you* or any of your associates a party adverse to the Company or any of its subsidiaries in any legal proceeding; or do you or any of your associates have a material interest adverse to the Company or any of its subsidiaries in any legal proceeding?

☐Yes ☐No

(g) With respect to the following, are you aware of any claims or pending legal proceedings against the Company, any of its subsidiaries or any of its properties involving:

(i) any pending legal proceeding (or group of proceedings involving the same legal or factual issues) which would involve any claim for monetary damages greater than $1,000,000; or

(ii) any pending administrative or judicial proceeding arising under any federal. State or local provisions regulating the discharge of materials into the environment or primarily for the purpose of protecting the environment which would involve a claim for monetary damages greater than $1,000,000; or

(iii) any proceeding by a governmental authority, involving the imposition of sanctions greater than $100,000; or

(iv) any material bankruptcy, receivership, or similar proceeding with respect to the registrant or any of its subsidiaries.

☐Yes ☐No

If the answer to any of the foregoing questions is "yes," provide a full description of the event or events and your connection therewith (attach a supplemental page if necessary). You may explain any mitigating circumstances associated with any event or events identified.

PART II - SECURITY OWNERSHIP

Question 6:
[For Questions 6-8: SEC Regulation S-K, Items 402, 403(b) and 405, SEC Rule 13d-3, 13d-4, 16a-2 and 16a-3]

Your Securities Holdings

(a) As to each class of ***equity securities*** of the Company, its parent or any subsidiary, state the total number of shares or other units ***beneficially owned*** by you as of January 15, 2007.

TITLE OF EQUITY SECURITY	NUMBER OF SHARES OR OTHER UNITS BENEFICIALLY OWNED
FPU Common Stock	

In the table provided on the following page:

(b) If, as a result of applying the rules regarding ***beneficial ownership*** summarized in **Appendix A** to this Questionnaire, you have included in the amount stated in answer to Question 6(a) above under "Number of Shares or Other Units Beneficially Owned" shares or units not issued in your name, please provide details as to the nature of such ***beneficial ownership*** of such shares or other units and state the amount of shares or units so owned: and

(c) If, as a result of applying the rules regarding ***beneficial ownership*** summarized in Appendix A to this Questionnaire, you have excluded from the amount stated in the answer to Question 6(a) above under "Number of Shares or Other Units Beneficially Owned" shares or units which are issued in your name, please state the amount so excluded and explain why you are not the ***beneficial owner*** of such shares or units.

	Title of Equity Security	Number of Shares or Units	Nature of Beneficial Ownership
(a) Shares or Units Included but Issued in Another's Name			
(b) Shares or Units Excluded but Issued in Your Name			

(a) Explanation: ______________________________

(b) Explanation: ______________________________

7591

(d) Of the total number of shares or units ***beneficially owned*** by you, as reported in answer to Question 6 (a), indicate below the amounts as to which you have sole or shared voting or investment power and the amount as to which you have the "right to acquire beneficial ownership" (as defined in paragraph 3 (b) of Appendix A).

	Common Stock	Other
Number of shares or units as to which you have sole voting power		
Number of shares or units as to which you have shared voting power		
Number of shares or units as to which you have sole investment power		
Number of shares or units as to which you have shared investment power		
Number of shares or units as to which you have the "right to acquire beneficial owner- ship" (see paragraph 3 (b) of Appendix A)		

(e) Has the Company adjusted the exercise price of or otherwise re-priced any of your options during the Last Fiscal Year?

☐Yes ☐No

(f) Are you aware of any transactions in the Last Fiscal Year for which you did not timely file a Form 3 or Form 4?

☐Yes ☐No

(g) Did you have any transactions, exempt from Form 4 filing, which now need to be reported on Form 5? (The most common transactions exempt from Form 4 reporting involve employee benefit plans and certain acquisitions involving less than $10.000.)

☐Yes ☐No

(h) Have you or a member of your immediate family who lives in your household entered into a contract, issued an instruction or established a plan (other than under any Company savings or compensation plan or dividend reinvestment plan) that provides for the purchase or sale of Company stock in the future (these are often called pre-arranged trading plans or Rule lOb5-1 plans).

☐Yes ☐No

Question 7:
Disclaimer of Beneficial Ownership

(a) If you wish to disclaim ***beneficial ownership*** of any securities referred to above, please set forth the number of such shares or units, the circumstances upon which the disclaimer of beneficial *ownership* is based, the name of the person or persons who should be shown as the beneficial owner(s) of such shares or units, and your relationship to that person or those persons.

____

____

(b) Do you or any of your ***affiliates*** or ***associates*** participate in investment decisions made by any nonprofit entity that owns Company securities? If yes, please provide details and indicate whether you disclaim beneficial *ownership* of such Company securities.

☐Yes ☐No

Question 8:
Securities Holdings of Your Relatives

If any ***equity securities*** of the Company, its parent or any subsidiary are ***beneficially owned*** by any relative of yours (by blood. marriage or adoption) who shares your home, please indicate below the name of each such relative, your relationship with him or her, and the amount of shares so owned. .

____

____

Question 9:
[SEC Regulation S-K, Item 403(a)]
5% Holders of Company Securities

If you know of any ***person*** (including yourself) or ***group*** which ***beneficially owns*** more than 300,000 shares of the Common Stock of the Company [1], please state name and address of such person, or the name and address of each member of such group, and the number of shares ***beneficially owned*** by each such person or group as of January 15, 2007.

Name of Person or Members of Group	Address	Number of Shares

[1] Note to Company reviewer: "x" and "y" (voting and non-voting shares of the Company's securities) should be the amounts roughly equal to 5% of the outstanding shares in the particular class of stock, perhaps rounded down to some convenient threshold Management can then determine if any person owns 5% or more.

PART III - DIRECTORS' COMPENSATION

THIS SECTION SHOULD BE COMPLETED ONLY <u>IF YOU ARE A DIRECTOR OF THE COMPANY.</u> IF YOU ARE AN OFFICER, BUT NOT A DIRECTOR, OF THE COMPANY YOU SHOULD PROCEED TO QUESTION 12.

<u>Question 10:</u>

[For Questions 10-11, SEC Regulation S-K, Items 402(g), IRS Reg. 1.162-27(e)(3)]

State the amount of compensation paid to you pursuant to any standard arrangement applicable to all directors during the Last Fiscal Year for your services as director (including any additional amounts paid to you for committee participation or special assignments).

____

____

<u>Question 11:</u>

If, as a director of the Company, you received any payment for your services as a director pursuant to any arrangement not applicable to all directors of the Company, please state the amount of such compensation and describe such arrangement.

____

____

PART IV - CERTAIN TRANSACTIONS AND RELATIONSHIPS

Question 12:
[SEC Regulation S-K, Item 404(a)}
Transactions with Management

In the table on the following page, describe any transaction (or series of similar ***transactions),*** during the Company's Last Fiscal Year, or any currently proposed ***transaction*** (or series of similar ***transactions),*** to which the Company or any of its subsidiaries was or is to be a party, and in which you had or anyone in your ***immediate family*** has, a material direct or indirect financial interest[2]. Identify the person(s) involved arid state the nature of your or their interest in the *transaction,* the amount of the ***transaction,*** the amount of your or their interest in the *transaction,* and, if the person is a member of your ***immediate family,*** describe the nature of their relationship to *you* and to the Company, if any. (Attach a supplemental page if necessary.) [3]

Description of *Transaction*	Persons Involved	Nature of Interest / Relationship	Amount *of* *Transaction*[4]	Amount *of* Interest[5]

[2] A person who has a position or relationship with a firm, corporation or other entity that engages in a *transaction* with the Company or its subsidiaries may have an indirect interest in such *transaction* by reason of such position or relationship. However, you are not deemed *to* have an indirect material interest in a *transaction* where (a) your interest in the ***transaction*** arises only (i) from your position as a director of another corporation or organization which is a party *to* the *transaction* or (n) from the direct or indirect aggregate ownership of less than a 10% equity interest in another person (other than a partnership) which is a party *to* the ***transaction.*** by you, or by all other directors, nominees for director, ***officers,*** holders of more than 5% of any class of the voting securities of the Company or °members of the immediate family of any of the foregoing persons; or (ill) from both (a)(i) and (a)(ii); (b) your interest arises only from your position as a limited partnership in a partnership in which you or all other persons specified in (a) (i) and (a) (ii) have an interest of less than 10%; or (c) your interest arises solely from the holding of an equity interest (including a limited partnership interest, but excluding a general partnership interest) or a creditor interest in another person that is a party *to* the transaction with the Company, and the *transaction* is not material *to* such other person.

[3] Note *to* Company reviewer: Item 404 of Reg. S-K requires disclosure only for a transaction or series of similar transactions in which the amount involved exceeds $60,000.

[4] In computing the amount involved in the *transaction* 'or series of similar transactions include all periodic installments in the case of any lease *or* other agreement providing *for* periodic payments. *For* any *transaction* involving the purchase *or* sale of assets by *or* to the Company *or* any of its subsidiaries, otherwise than in the *ordinary* course of business, state the cost of the assets to the purchaser and. if acquired by the seller within two years prior to the *transaction* ,the cost thereof to the seller. Indicate the principle followed in determining the Company's purchase or sale price and the name' of the person making such determination.

Include information with respect to transactions that involve remuneration *from* the Company or its subsidiaries, directly or indirectly, *for* services in any capacity.

[5] The amount of your interest should be computed without regard to the amount of profit *or* loss involved in the transaction.

Question 12a:

If anyone in your ***immediate family*** is a director or officer of any company, please list their name and the Company name.

Question 13:

[SEC Regulation S-1(, *Item 404(c),* Section *402 of Sarbanes-Oxley* Act of2002]

Indebtedness of Management

If you or any ***associate*** of yours has been indebted to the Company or any of its subsidiaries at any time during the Company's Last Fiscal Year, state: (a) the name of the indebted person; (b) if the indebted person is an associate, the nature of your relationship to that person; (c) the largest aggregate amount of indebtedness outstanding at any time during the Company's Last Fiscal Year; (d). the nature of the indebtedness and of the transaction in which it was incurred; (e) the amount of indebtedness outstanding as of the latest practicable date (indicating that date); and (f) the rate of interest paid or charged thereon, if any.

Include (with respect to yourself only) any instances where the Company, either directly or indirectly (including through a subsidiary), extended or maintained credit for you, arranged for the extension of credit, or renewed any extension of credit.

You may exclude all amounts due for purchases subject to usual trade terms, for ordinary travel and expense payments and for other transactions in the ordinary course of business.

Question 14:

[SEC Regulation S-K, Item 402(h) and *403(c)]*

Agreements Affecting Control

(a) If you know of any contractual agreements, including any pledge of securities of the Company, the operation of the terms of which has resulted since the beginning of the Company's Last Fiscal Year or may, at a subsequent date, result in a change in ***control*** of the Company, please briefly describe the agreement, the parties thereto and the number and class of securities involved.

(b) Do you know of or believe that any arrangements exist pursuant to which more than 5% of the Company's stock is held or is to be held subject to any voting trust or other similar arrangement (including through a trading plan implemented under Rule 10b5-I)?

☐Yes ☐No

(c) If you are an ***executive officer*** of the Company, are you party to any employment, change in control or termination contract with the Company or its subsidiaries?

☐Yes ☐No

If your answer to either questions 14(b) or 14(c) is "yes," please explain:

7596

Question 15:
[SEC Regulation S-K, *Item 702J*
Indemnification

Do you know of any provision, other than the Corporation Law of (state of incorporation of the Company), the Charter and Bylaws of the Company and the Company's ***officers'*** and directors' liability insurance policy, under which any director, ***officer*** or controlling person of the Company is insured or indemnified in any manner against any liability which he or she may incur in his or her capacity as such? If so, please describe such provision.

____

____

Question 16:
SEC Regulation S-K, *Item 401* (a) and *401(b))*

Arrangements as to Election

(a) If you are a director -or a nominee for election as a director, state whether or not you were or are proposed to be elected pursuant to any arrangement or understanding between yourself and any other person or entity (except directors and ***officers*** of the Company acting solely in their capacities as such), the names of such other persons or entities and a brief description of the arrangement or understanding.

____

____

(b) If you are an ***officer*** of the Company, state whether or not you were selected as an ***officer*** pursuant to any arrangement or understanding between yourself and any other person or entity (except directors and ***officers*** of the Company acting solely in their capacities as such), the names of such other persons or entities and a brief description of the arrangement or understanding.

____

____

Question 17:
[SEC Regulation S-K, Item 404(b)]

Certain Business Relationships (please answer the following if you are a director or nominee for director. Otherwise, proceed to Question 19.) [6]

(a) Are you now or have you been, during the Company's Last Fiscal Year, an ***executive officer*** of, or do you now own or have you owned, during the Company's Last Fiscal Year, of record or beneficially, in excess of a 10% equity interest in, any firm, corporation, or other business or professional entity:

(i) That has made, during the Company's Last Fiscal Year or proposes to make during the Company's current fiscal year payments to the Company or any of its subsidiaries for property or services[7] in excess of (A) 5% of the Company's consolidated gross revenues for the Company's Last Fiscal Year ($6,710,000) or (B) 5% of such other entity's consolidated gross revenues for its Last Fiscal Year?
☐Yes ☐No

(ii) To which the Company has made, during the Company's Last Fiscal Year or which the Company proposes to make during the Company's current fiscal year payments for property or services in excess of (A) 5% of the Company's consolidated gross revenues for the Company's Last Fiscal Year ($6,710,000) or (B) 5% of such other entity's consolidated gross revenues for its Last Fiscal Year?
☐Yes ☐No

(iii)To which the Company was indebted,[8] at the end of the Company's Last Fiscal Year, in an aggregate amount in excess of 5% of the Company's total consolidated assets at the end of that fiscal year ($9,540,000)?

☐Yes ☐No

(b) Are you now or have you been, during the Company's Last Fiscal Year:

(i) A member of, or of counsel to, a law firm that the Company retained during the Company's Last Fiscal Year or that the Company proposes to retain during the current fiscal year?

☐Yes ☐No

(ii) A partner or executive officer of any investment banking firm or accounting firm that performed services for the Company (other than as a participating underwriter in a syndicate) during the Company's Last Fiscal Year or that the Company proposes to have perform services during the current fiscal year?

☐Yes ☐No

(c) If the answer to either Question 17(b)(i) or 17(b)(ii) is yes, does the amount of fees paid by the Company during the Last Fiscal Year or proposed to be paid during the current fiscal year exceed 5% of such firm's consolidated gross revenues for that firm's last full fiscal year?

☐Yes ☐No

(d) Are there any other relationships (financial, business or otherwise) between you and the Company or its ***executive officers***, or another Company director that are substantially similar in nature and scope to those described in this Question 17?

☐Yes ☐No

---

[6] If you are using this questionnaire for the preparation of a registration statement, you should request the information in this question as to the last three fiscal years and provide three years financial information in answer to Question 11(a) (i)-(iii).

[7] In calculating payments for property and services, exclude:
(i) Payments where the rates or charges involved in the transaction are determined by competitive bids. or common contract carrier or public utility at rates or charges fixed in conformity with law or governmental authority; or
(ii) Payments that arise solely from the ownership of securities of the Company and no extra or special benefit not shared on a pro rata basis by all holders of the class of securities is received.

[8] In calculating indebtedness, exclude:
(i) Debt securities that have been publicly offered, admitted to trading on a national securities exchange or quoted on the automated quotation system of a registered securities association; or
(ii) Amounts due for purchases subject to usual trade terms.

If you have answered "Yes" to any of the items in this Question 17 above, please describe (attach a supplemental page if necessary):

(1) the identity of the entity with which the Company has such a relationship;
(2) the nature of your affiliation with such entity;
(3) the nature of the relationship between such entity and the Company; and
(4) the amount of business conducted between the Company and such entity during the Company's Last Fiscal Year pr proposed to be conducted during the Company's current fiscal year.

Question 18:

[SEC Regulation S-K, Item 4020) and *Schedule 14A, Items 7(d}, (J)]*

Board Meeting Attendance

(a) The Company's records indicate that of the nine (9) board meetings held during the Last Fiscal Year, you attended [___] of such meetings, and that of the [___] meetings of the [___] committee(s) on - which you serve, you attended [___] such meetings. Is this correct?

☐Yes ☐No

7598

If no, please provide correct information.

(b) If you have been nominated to stand for election to the Board of Directors of the Company at the 2006 Annual Meeting of Stockholders, do you agree to serve if elected?

☐Yes ☐No

Question 19:

[For Question 19-20, SEC Regulation S-K, Item 402(a) and *404(a)]*

If you are an ***executive officer*** of the Company, state whether: (a) you received any amount in the Last Fiscal Year (including any ***personal*** benefits) from any third party (individual or entity) or, (b) anyone in your ***immediate family*** received any amount from the Company or its subsidiaries, under any transaction or due to any relationship, including those described in Questions 12 and 13, the primary purpose of which was to furnish you such compensation for services rendered to the Company or its subsidiaries and describe and state the amount(s) of compensation received.

____

____

Question 20:

If you are a director of the Company, state whether: (a) you received any amount in the Last Fiscal Year (including any ***personal benefits)*** from any third party (individual or entity) or (b) anyone in your ***immediate family*** received any amount from the Company or its subsidiaries, under any transaction or due to any relationship, including those described in Questions 12, 13 and 17, the primary purpose of which was to furnish you such compensation and describe and state the amount(s) of compensation received. .

____

____

Question 21:

Compliance with "Outside Director" Requirements of Internal Revenue Service Regulation 1.162-27(e)(3).

Please respond to the following questions only if you are a Director of the Company.

(a) If you are a former employee of the Company, its parent or any of its subsidiaries (for purposes of this Question, the Company, its parents and its subsidiaries are referred to collectively as the "Affiliated Group") and received compensation for your prior services (other than benefits under a tax-qualified retirement plan) during the Company's last fiscal year, please state the amount and nature of such compensation and the member of the Affiliated Group from which such compensation was received.

(b) (i) During the Last Fiscal Year did *you* or any entity (including any sole proprietorship, trust, estate, partnership, corporation or other entity) in which *you* own, or have owned, in excess of a 50% ***beneficial ownership*** interest (i) receive payments, either directly or indirectly, from a member of the Affiliated Group in exchange for property or services (other than your service as a director) provided to the Affiliated Group, or (ii) enter into any (or remain a party to any previously entered into) agreement by which *you* or such entity are entitled to receive payments for property and services provided to the Affiliated Group?

☐Yes ☐No

(ii) Are you, or have *you* been during the Last Fiscal Year, an employee of, or self-employed by, or have you owned during the Last Fiscal Year, a ***beneficial ownership*** interest in excess of 5%, but less than 50% in any entity (including any sole proprietorship, trust, estate, partnership, corporation or other entity) to which the Affiliated Group made or proposes to make any payments in exchange for property or services (other than services as director of a member of the Affiliated Group)?

☐Yes ☐No

If your answer is "Yes," please, answer the following question:

(A) Does the amount of such payments made or proposed to be made by the Affiliated Group exceed the lesser of (i) 5% of such entity's gross revenues for its last fiscal year or (ii) $60,000?

☐Yes ☐No

(iii) Are you, or have *you* been during the Last Fiscal Year, employed or self employed by an entity (including any sole proprietorship, trust, estate, partnership, corporation or other entity) that performed personal services for the Affiliated Group? For purposes of this question, "Personal Services" includes personal or professional services such as legal, accounting, investment banking, management consulting, and similar services.

☐Yes ☐No

If your response to any part of question 21 (b) is yes, please indicate the amount of each such payment, the goods or services provided, the Affiliated Group member making or required to make such payments, and, if payment is not made to you, the nature of your interest in the entity receiving payment.

I hereby acknowledge, by my execution and dating of this Questionnaire in the places indicated below, that my answers to the foregoing questions are true and correct to the best of my information and belief. If I am a nominee for director, I confirm my consent to being named as such in the proxy statement and to serve if elected.

If at any time before the Annual Meeting I discover that my answer to any question was inaccurate, or if any event occurring subsequent to my completion hereof would require a change in my answers to any questions, I agree to contact George Bachman by telephone at 561.838.1731 immediately.

APPENDIX A

DEFINITIONS OF CERTAIN TERMS IN QUESTIONNAIRE

1. *"Affiliate"*
An "affiliate" of any entity is a person that, directly or indirectly, through one or more intermediaries, *controls,* is *controlled* by or is under common *control* with such person (for example, a parent subsidiary or sister corporation).

2. *"Associate"*
Associate" for the purpose of Question 5 means (1) any corporation or organization (other than the Company or a majority-owned subsidiary of the Company) of which you are an officer or partner or are, directly or indirectly, the *beneficial owner* of 10% or more of any class of equity securities; (2) any trust or other estate in which you have a substantial beneficial interest or as to which you serve as a trustee or in a similar fiduciary capacity; and (3) any member of your *immediate family.*

"Associate" for the purpose of Question 13 means the same as the foregoing, except that subsection (1) shall state "any corporation or organization ... of which you are an *executive* officer ... "

3. *"Beneficial Ownership"*

a. General Rule Under the rules of the SEC, you are deemed to "beneficially own" or be the "beneficial owner" of any security with respect to which you have or share, directly or indirectly, through any contract, arrangement, understanding, relationship, agreement or otherwise: (1) Voting Power (which includes the power to vote, or to direct the voting of, such security); and/or (2) Investment Power (which includes the power to dispose, or to direct the disposition of, such security). You are also the beneficial owner of a security if you, directly or indirectly, create or use a trust, proxy, power of attorney, pooling arrangement or any other contract, arrangement, or device with the purpose ,or effect of divesting yourself of beneficial ownership of a security or preventing the vesting of such beneficial ownership.

Some specific applications of the above definition of beneficial ownership are:

(i) Family situations Although the determination of beneficial ownership of securities is necessarily a question to be determined in light of the facts of each particular case, family relationships may result in your having, or sharing, the power to vote, or direct the voting *of,* or dispose, or direct the disposition *of,* shares held by your family members. In view *of* the broad definition *of* "Beneficial Ownership," it may be prudent to include such shares in your beneficial ownership disclosure and then disclaim beneficial ownership *of* such securities pursuant to Question 6.

(ii) Shares held by others for your benefit There are numerous instances in which you may have, or share, voting or investment power (as defined above) over securities, although the securities are held by another person or entity. For example, you may have or share such power in securities held for you or your family members living with *you* by custodians, brokers, relatives, executors, administrators or trustees; securities held for your account by pledgees; securities owned by a partnership in which you are a member, and securities owned by a corporation which is or should be regarded as a personal holding company *of* yours or is controlled by you.

(iii)Shares held by you for the benefit *of* others Beneficial ownership *of* securities also includes securities held in your name as a trustee, custodian or other fiduciary where you have, or share, voting or investment power with respect to such securities.

b. Options and other rights to acquire securities In addition to being beneficial owner *of* securities over which you have, or share, voting or investment power, the SEC has determined that you are deemed to be the beneficial owner *of* a security if you have a right to acquire beneficial ownership *of* (i.e.. the right to obtain or share voting or investment power over) such security at any time within sixty days. Examples *of* such rights would include the right to acquire: (i) through the exercise *of* any option. warrant or similar right; (ii) through conversion *of* any security; or (iii) pursuant to the power to revoke, or the provision for automatic termination *of,* a trust, discretionary account or similar arrangement Also, if you have acquired or hold any options, convertible securities or power to revoke such a trust with the "purpose or effect" *of* changing or influencing control *of* the Company, you are deemed the beneficial owner *of* the underlying securities upon such acquisition. without regard to the sixty-day rule stated above.

4. *"Control"*

The term" control" means the possession, direct or indirect, *of* the power to direct or cause the direction *of* the management and policies of the Company, whether through the ownership *of* voting securities, by contract or otherwise. An *executive officer* or director *of* a company generally is considered to control that company. It is suggested that, if you are in doubt as to the meaning *of* "control" in a particular context, you communicate with counsel.

5. *"Equity Security"*

The definition of "equity security" encompasses more than common and preferred stock. It includes for instance convertible debt instruments as well as warrants and options to acquire stock or similar securities. If you have a question as to the proper characterization of your holdings you should consult with the Company's legal counsel.

6. *"Executive Officer"*

"Executive officer" for the purpose of this Questionnaire means the chief executive officer or president of a company, any vice president of it in charge of a principal business unit, division or function (such as sales, administration or finance), any other *officer* who performs a policy-making function or any other person who performs similar policy-making functions for the company. Executive officers of subsidiaries may be deemed executive officers of a company if they perform such policy-making functions for the company.

7. *"Group"*

A "group" exists when two or more persons act as a partnership, limited partnership, syndicate or other group for the purpose of acquiring, holding or disposing of securities of any issuer.

8. *"Immediate Family"*

"Immediate family" for the purpose of this Questionnaire includes your spouse, parents, children, siblings, mothers- and fathers-in-law. sons- and daughters-in-law, and brothers- and sisters-in-law.

9. *"Officer"*

"Officer" means a president, vice president, secretary, treasurer or principal financial officer, comptroller or principal accounting officer, and any person routinely performing corresponding functions with respect to any organization whether incorporated or unincorporated.

10. *"Person."*

"Person" for the purpose of this Questionnaire means an individual, a corporation, a partnership, an association, a joint-stock company, a business trust, an unincorporated organization, or any other entity.

11. "Personal Benefits"

The SEC's prior interpretive releases on what the SEC views as a personal benefit or a "perk," were previously rescinded by Item 402 and as most recently revised, Item 402 does not specifically define "personal benefit." Item 402, however, does not require disclosure of personal benefits for any individual if the aggregate amount paid to that individual is less than the lesser of (i) $50,000 or (ii) 10% of that individual's compensation. In general, the position of the SEC has been that benefits which are directly related *to* job performance, as well as benefits provided to broad categories of employees and which do not discriminate in scope or terms of operation in favor of *officers* and directors, may be omitted from the calculation of total compensation, while benefits not so related should be disclosed as compensation. If you have any questions, please resolve the issue in favor of disclosure. The Company will review the necessity for disclosure in the proxy statement with its counsel.

12. "Promoter"

The term "promoter" includes (i) any person who, acting alone or in conjunction with one or more other persons, directly or indirectly took initiative in founding and organizing the business or enterprise of the Company; or (ii) any person who, in connection with the founding and organizing of the business or enterprise of the Company, directly or indirectly received, or will receive, in consideration of services or property, or both services and property, 10% or more of any class of securities of the Company or 10% or more the proceeds from the sale of any class of such securities. However, a person who received, or will receive, such securities or proceeds either solely as underwriting commissions or solely in consideration of property shall not be deemed a promoter within the meaning of this paragraph if such person did not otherwise take part in founding and organizing the Company.

13. *"Subsidiary."*

"Subsidiary" includes all of the subsidiaries of the Company, as - listed on Appendix B.

14. *"Transaction* or *Transactions"*

"Transaction" or "transactions" is to be understood in its broadest sense, and includes the direct or indirect receipt of anything of value. No transaction or interest therein need be disclosed where: (a) the rates or charges involved in the transaction are determined by competitive bids, or the transaction involves the rendering of services as a common or contract carrier or public utility at rates or charges fixed in conformity with law or governmental authority; (b) the transaction involves services as a bank depository of funds, transfer agent, registrar, trustee under a trust indenture or similar services; or (c) the interest in question arises solely from the ownership of securities of the Company and the interested party receives no extra or special benefit not shared on a pro rata basis by all shareholders.

Subject: JE999

Can you make sure we have a list of all reclassification and elimination entry types we do as a check list? Is it part of the spreadsheet? At one time it was?

Thanks,

Cheryl Martin

FLORIDA PUBLIC UTILITIES COMPANY
CONDENSED CONSOLIDATED BALANCE SHEETS (UNAUDITED)
NOTES

RECLASSIFICATION AND ELIMINATION

A = Elimination of Plant Acquisition Adjs. and Reclassified to Natural & Bottled Gas and Electric Utility Plant.

B = Elimination of Contributions in Aid and Reclassified to Accum. Depr. & Amort and Water Utility Plant.

C = Elimination of Investment in Assoc. Co. and Reclassified to Common Stock and Treasury Stock.

D = Elimination of Working Funds and Reclassified to Cash.

E = Elimination of Receivable Assoc. Co. and Payable to Assoc. Co.

F = Elimination of Under/Over Recovery of Fuel and Reclassified to Under/Over Recovery.

G = Reclassified Debits to Taxes Accrued to Prepayments other - I/T. (.8 & .9 accounts)

H = Elimination of accum. def. income taxes asset and reclass. to accum. def. income taxes liab.

I = Elimination of OWIP - Environment cleanup to environmental reserve

J = Elimination of Under/Over Recovery of Conservation & Unbundling and Reclassified to Under/Over Recovery.

K = Reclassify plant acquisition adjustment from Intangible Assets to Plant.

M = Cost of Removal

N = Propane Asset Retirement Obligation

O = Eliminate Unamortized Debt to LT Debt

From: Lundgren April
Sent: Friday, March 16, 2007 7:55 AM
To: Martin Cheryl; Khojasteh Mehrdad
Subject: FW: Q changes

1. I could not find section 26 (a) in the 3 Q revised file... However the table would disclose the following:

Statement of Income

	Inc (Dec)
Operation and maintenance	225
Total operating expenses	225
Operating income	(225)
Earnings Before Income Taxes	(225)
Income taxes	(85)
Net income	(140)
Earnings for common stock	(140)
Earnings per common share	(0.03)

Balance Sheet

	Inc (Dec)
Common shareholders' equity	(140)
Total capitalization	(140)
Deferred income taxes	(85)
Other liabilities	225
Total other liabilities	140

Thanks,
April
x1788

Subject: Q changes

1. Under par 26 (a) to FAS 154 the company has to disclose:

"a. The effect of the correction on each financial statement line item and any per-share amounts affected for each prior period presented". Why don't you provide this disclosure by a note that includes a table that shows the effects of the restatement on the Company's previously reported statements of income and balance sheet.

2. The 2006 income statements columns and the 9/30/06 balance sheet should state in the heading that they are restated.

Thanks Dale

FLORIDA PUBLIC UTILITIES
ESTIMATED ALLOCATION OF CONSOLIDATED BALANCE SHEET
December 31, 2005

PURPOSE:
To break-out the Consolidated Balance Sheet by segment as a basis for estimating the Carrying Value of each segment of FPU's business.

METHODOLOGY:
Based on FPU's 10K Balance Sheet - each line item was allocated based on one of the following methods:

PLANT - The Report Writer report "PLANT" used as the basis for allocation of plant, depreciation, amortization and common plant. Re-classification of Cost of Removal and Advances made for Construction and Intangibles done as per 10K.

WORK-CAP - The Report Writer report "WORK-CAP" which is used for allocating between segments for our quarterly ROR Surveillance report for the FPSC used as the basis for allocating working capital items.

CAPITAL ITEMS:
Common Equity, Preferred Stock, LT Debt (net of Unamortized Debt Expense and Unamortized loss on Re-acquired Debt) and Notes Payable.

ITB - Interactive Trial Balance.

ACCOUNTS PAYABLE – Allocated based on Revenues.

NOTES RECEIVABLE – Allocated based on Net Plant

OTHER INVESTMENTS - Allocated based on Net Plant

DEFERRED INCOME TAX – Common portion allocated based on Net Plant.

DIVIDENDS DECLARED – Allocated based on Cash balance.

Clara Leider

From: Jennifer Starr [mstarr@bellsouth.net]
Sent: Tuesday, January 30, 2007 9:59 AM
To: Martin Cheryl; Khojasteh Mehrdad
Cc: Lundgren April
Subject: JE999
Attachments: JE999 Qtr406.XLS

Attached is JE 999. The reclass entry for def. tax current of 698,000 that is on the download but not on the JE, I will set this up once the statements are completed. This reclass has been a manual adjustment for awhile that should be book on JE 999. Also, the reclass for checks out standing is 2,213,875. I included the query from Melanie on the file for backup. This amount seems high to me and on the query it has checks dating back to 2005 which would not be considered current. We may want to double check this amount.

Thanks,
Jennifer

C-44 computed the interest last rate case, but there was no ST debt, and it looks like the ITC was wrong.

Subject: Propane Projections - Impairment Testing

Importance: High

P:\FPUC\PRIVATE\Propane Impairment Review\Jan 2007

We are in the process of updating our projections for the period 2007 – 2011 for submission to our consultant for our annual goodwill impairment testing as required under SFAS 142.

Please review the assumptions on the linked worksheet for your respective Propane Division and update the sheets as follows:

1. Projected Construction Expenditure (SF, CF, NE, WF) – update in the light blue sections projected expenditures for 2008 – 2011. Please exclude Community Gas Systems, which are projected for separately.
2. A-Cost Savings – Update for your respective Divisions for the years 2008 – 2011 for capital expenditures that will result in cost savings eg. Tank Monitoring Systems.
3. C-Revenue Producing Capital expenditures – Update for projected capital expenditures that will generate projected revenues eg. Tank Monitoring System and Regulatory Compliance Fee (RCF) increases. Marc, if we do not anticipate annual increases of the RCF by $0.50 please advise me so that we can revise the projections accordingly.
4. D-Investments with No Return – Update for anticipated non-revenue producing capital expenditures for your Division. NE, the items listed in column N were included in the impairment forecast last year, but not in our Budget for 2007. We need to determine if those amounts are to be eliminated or included in some other year.
5. Please review the Summary Sheet for reasonability.

Please call if you have any questions or suggestions. I would like to have this information provided to the consultant by April 9th, and would appreciate your input by Friday of this week. Please advise me by e-mail when your section has been updated.
Thanks
Doreen

1st quarter
1007dmbmark

I would not say they are auditing it. I would just say that all years after 2002 are open or conversely all years before 2002 are closed. You already state in a separate section that you are being audited for 2003 & 2004. Maybe you could move that note right after the FIN 48 note and then you could eliminate the duplication See my changes on the attached. Thanks Dale PS I didn't fix the pension table

They have not specifically said that they are auditing 2005 but since it is open, Ana suggested that we add it to our note.

Thanks,

Mehrdad K.
(561) 838-1724

Fin 48 note - Companies should be a small C. You added 2005 here but didn't add it to the Income tax audit note. Are they auditing 2005? Rather than add 2005 to the audit note if it's not being audited, I would just state something along these lines:

Under the tax statute of limitations applicable to the Internal Revenue Code, we are no longer subject to U.S. federal income tax examinations by the Internal Revenue Service for years before 2003. However, because we are carrying forward income tax attributes, such as net operating losses and tax credits from 2002 and earlier tax years, these attributes can still be audited when utilized on returns filed in the future.
State: Under the statutes of limitation applicable to most state income tax laws, we are no longer subject to state income tax examinations by tax authorities for years before 2003 in states in which we have filed income tax returns. Certain states may take the position that we are subject to income tax in such states even though we have not filed income tax returns in such states and, depending on the varying state income tax statutes and administrative practices, the statute of limitations in such states may extend to years before 2003.
You could combine it into one paragraph and not have a federal and a state separately.
On the pension note, the table doesn't look right. Postretirement expense recorded for

the 3 months of 2007 was $50K, wasn't it?

Can you please leave the tracking on for these changes?

thanks Dale

FLORIDA PUBLIC UTILITIES COMPANY
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)
March 31, 2007

1. **Basis of Presentation**
The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with the generally accepted accounting principles in the United States (GAAP) for interim financial information and with the instructions for Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. In the opinion of management, all adjustments necessary for fair presentation have been included. The operating results for the period are not necessarily indicative of the results that may be expected for the full year. For further information, refer to the audited consolidated financial statements and footnotes included in the Company's Annual Report on Form 10-K for the year ended December 31, 2006.

2. **Use of Estimates**
The preparation of financial statements in conformity with GAAP requires the Company to make certain estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of any contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Significant estimates include allowances, accruals for pensions, environmental liabilities, liability reserves, regulatory deferred tax liabilities, unbilled revenue and over-earnings liability. Actual results may differ from these estimates.

3. **Regulation**
The financial statements are prepared in accordance with the provisions of Statement of Financial Accounting Standards (SFAS) No. 71 – "Accounting for the Effects of Certain Types of Regulation". SFAS No. 71 recognizes that accounting for rate-regulated enterprises should reflect the relationship of costs and revenues introduced by rate regulation. A regulated utility may defer recognition of a cost (a regulatory asset) or show recognition of an obligation (a regulatory liability) if it is probable that, through the ratemaking process, there will be a corresponding increase or decrease in revenues. The Company has recognized certain regulatory assets and liabilities in the condensed consolidated balance sheets.

As a result, Florida Public Service Commission (FPSC) regulation has a significant effect on the Company's results of operations. The FPSC approves rates that are intended to permit a specified rate of return on investment. Rate tariffs allow the flexibility of automatically passing through the cost of natural gas and electricity to customers. Increases in the operating expenses of the regulated segments may require a request for increases in the rates charged to customers.

4. **Pledged Assets**
Substantially all of the Company's utility plant and the shares of its wholly owned subsidiary, Flo-Gas Corporation, collateralize the Company's First Mortgage Bonds (long-term debt). Cash, accounts receivable and inventory are collateral for the line of

credit.

5. **Restriction on Dividends**
The Company's Fifteenth Supplemental Indenture of Mortgage and Deed of Trust restricts the amount that is available for cash dividends. At March 31, 2007, approximately $10.1 million of retained earnings were free of such restriction and available for the payment of dividends. The Company's line of credit agreement contains covenants that, if violated, could restrict or prevent the payment of dividends. The Company is not in violation of these covenants.

6. **Allowance for Uncollectible Accounts**
The Company records an allowance for uncollectible accounts based on historical information and trended current economic conditions. The bad debt write-offs for the first quarter 2007 were $177,000 while the provisions were $174,000.

7. **Storm Reserves**
As of March 31, 2007, the Company had a storm reserve of approximately $1.7 million for the electric segment. The Company does not have a storm reserve for the natural gas or propane gas segments. Any future storm costs affecting the natural gas segment will be deferred for recovery from customers either through rate increases or through applying any available over-earnings as a reduction to the costs. All such deferred costs are subject to review and approval by the FPSC.

The Company deferred storm costs for the natural gas segment incurred in 2004 as a regulatory asset on the condensed consolidated balance sheets. The FPSC approved recovery of these storm costs, plus interest and revenue related taxes, over a 30-month period beginning in November 2005. As of March 31, 2007, the remaining balance of these storm costs to be recovered is $207,000.

8. **Goodwill and Other Intangible Assets**
The Company does not amortize goodwill or intangibles with indefinite lives. The Company periodically tests the applicable reporting segments, natural gas and propane gas, for impairment. In the event goodwill or intangible assets related to a segment are determined to be impaired, the Company would write down such assets to fair value. The impairment test performed in 2006 showed no impairment for either reporting segment. The Company does not believe the 2007 impairment test will indicate impairment for either reporting segment. Final results are expected in the second quarter of 2007.

Goodwill associated with the Company's acquisitions consists of $500,000 in the natural gas segment and $1.9 million in the propane gas segment. The summary of intangible assets at March 31, 2007, is as follows:

Intangible Assets
(Dollars in thousands)

		2007
Customer distribution rights	(Indefinite life)	$ 1,900
Customer relationships	(Indefinite life)	900
Software	(Five to nine year life)	3,169

Accumulated amortization	(1,603)
Total intangible assets, net of amortization	$ 4,366

The amortization expense of intangible assets was approximately $86,000 for the three months ended March 31, 2007.

9. Common Shareholders' Equity

Items impacting common shareholders' equity other than income and dividends are the dividend reinvestment program, employee stock purchase program, stock compensation plans and treasury stock. The net impact of these additional items increased common shareholders' equity approximately $220,000 for the three months ended March 31, 2007. Accumulated other comprehensive loss, comprised of the deferred cost of employee benefit plans, totaled approximately $100,000 as of March 31, 2007 and December 31, 2006.

10. Over-earnings – Natural Gas Segment

The FPSC approves rates that are intended to permit a specified rate of return on investment and limits the maximum amount of earnings of regulated operations. The Company has agreed with the FPSC staff to limit the earned return on equity for regulated natural gas and electric operations.

The Company has recorded estimated 2006 and 2005 over-earnings for regulated natural gas operations of $25,000 and $650,000, respectively. These liabilities are included in the over-earnings liability on the Company's condensed consolidated balance sheet of March 31, 2007. The calculations supporting these liabilities are complex and involve a variety of projections and estimates before the ultimate settlement of such obligations. Estimates may be revised as expectations change and factors become known and determinable.

The 2005 and 2006 over-earnings liabilities are based on the Company's best estimates, but the amounts could change upon the FPSC finalization and review of earnings expected in 2007 and 2008. The FPSC determines the disposition of over-earnings with alternatives that include refunding to customers, increasing storm damage or environmental reserves or reducing any depreciation reserve deficiency.

11. Environmental Contingencies

The Company is subject to federal and state legislation with respect to soil, groundwater and employee health and safety matters and to environmental regulations issued by the Florida Department of Environmental Protection (FDEP), the United States Environmental Protection Agency (EPA) and other federal and state agencies. For full disclosure of the legal items that impact the Company, please refer to "Contingencies" in the Notes to Consolidated Financial Statements in the Company's Form 10-K for the year ended December 31, 2006.

12. Reclassification

Certain amounts in the 2006 financial statements have been reclassified to conform to the 2007 presentation.

13. Financial Accounting Standard Board Interpretation No. 48

The Company accounts for uncertainty in income taxes in accordance with FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes (FIN 48) and SFAS No. 109, Accounting for Income Taxes. The Company performed an analysis of tax positions taken and expected to be taken on the tax returns. The analysis concluded that the Company had no material uncertain tax positions.

The Interpretation requires Companies to accrue interest and penalties that would be incurred if an uncertain tax position ultimately were not sustained. In such a case, the Company would start accruing interest and penalty in the period which gives rise to the uncertain tax position. The Company would classify interest and penalties in the income statement and balance sheet separately from other tax balances and based on expected timing of cash payment to the taxing authorities.

Under the tax statute of limitations applicable to the Internal Revenue Code and state taxes, we are no longer subject to examinations by the Internal Revenue Service or the State of Florida for years before 2003. However, because we are carrying forward income tax attributes, such as net operating losses and tax credits from 2002 and earlier tax years, these attributes can still be audited when utilized on returns filed in the future. As noted in Note 14, we have been notified of a IRS audit.

14. IRS Examination

In February of 2007, the IRS informed us that it has selected our 2003 and 2004 tax years for examination. As our tax positions have remained consistent with those from the previously audited tax years, we do not expect any material adverse findings as the result of the impending IRS audit.

15. Recent Accounting Standards

FSP AUG AIR-1 Accounting for Planned Major Maintenance Activities

FASB Staff Position (FSP) AUG AIR-1 *"Accounting for Planned Major Maintenance Activities,"* amended APB 28, *"Interim Financial Reporting,"* to prohibit the use of the accrue-in-advance method of accounting for planned major maintenance. The Company does not accrue-in-advance for planned major maintenance activities therefore the adoption of FSP AUG AIR-1 in the first quarter of 2007 did not have an impact on the Company's results of operations, cash flows or financial position.

Financial Accounting Standard No. 159

In February 2007, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standard (SFAS) No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities". This Statement permits measurement at fair value of certain firm commitments, non-financial insurance contracts and warranties, host financial instruments and recognized financial assets and liabilities, excluding consolidating investments in subsidiaries, consolidating variable interest entities, various forms of deferred compensation agreements, leases, depository institution deposit liabilities and financial instruments included in shareholders' equity. This Statement becomes effective January 1, 2008 for financial statements issued for fiscal years beginning after November 15, 2007. As the Company does not

For additional information related to our employee benefit plans, please see Note 12 to the Consolidated Financial Statements of the company's 10-K Annual Report.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

We have three primary business segments: natural gas, electric and propane gas. The Florida Public Service Commission (FPSC) regulates the natural gas and electric segments.

Results of Operations

Deleted: ¶

Deleted: Effects of seasonal weather conditions, the timing of rate increases, fluctuations in demand due to the cost of fuel passed on to customers and the migration of winter residents and tourists to Florida during the winter season all have an impact on income. ¶

Revenues and Gross Profit Summary

Revenues include cost recovery revenues. The FPSC allows cost recovery revenues to directly recover costs of fuel, conservation and revenue-based taxes in our natural gas and electric segments. Revenues collected for these costs and expenses have no effect on results of operations and fluctuations could distort the relationship of revenues between periods. Gross profit is defined as gross operating revenues less fuel, conservation and revenue-based taxes that are passed directly through to customers. Because gross profit eliminates these cost recovery revenues, we believe it provides a more meaningful basis for evaluating utility revenues. The following summary compares gross profit between periods and units sold in one thousand Dekatherm (MDth) (gas) and Megawatt Hour (MWH) (electric).

Formatted Table

Revenues and Gross Profit
(Dollars in thousands)

	Three Months Ended March 31,	
	2007	**2006**
Natural Gas		
Revenues	$20,573	$26,954

Consolidated		

Revenues	$38,612	$43,348
Cost of fuel	24,769	29,213
Gross Profit	$13,843	$14,135

[...[4]]

Three Months Ended March 31, 2007 Compared with Three Months Ended March 31, 2006.

Revenues and Gross Profit

Natural Gas

Natural gas service revenues decreased $6,381,000 in the first quarter of 2007 over the same period in 2006. As the cost of natural gas continues to decline, revenues to recover our cost of fuel and other costs passed through to customers decreased by $6,033,000. These costs do not impact our gross profit. Our gross profit decreased $348,000 or 4%. The decrease in gross profit is attributable to a 5% decrease in units sold in 2007 due primarily to generally warmer weather compared to the prior year.

Electric

Electric service revenues increased $1,662,000 in the first quarter of 2007 over the same period in 2006. $1,626,000 of the increase was attributable to the cost of fuel and other costs that were passed through to customers. A new fuel contract in our Northeast division was effective January 1, 2007 and this increased the cost of fuel that was passed through to our customers. Gross profit was flat compared to the first quarter of 2006.

Propane Gas

Propane experienced a 4% decrease in units sold to customers due to warmer weather; however this was offset by increased profit margins.

Operating Expenses

Operating expenses were higher by $498,000 in the first quarter of 2007 compared to the same period in 2006. The majority of the increased expense is from cost of living raises related to payroll and increased payroll expense incurred to improve natural gas customer service and collections.

Other Income and Deductions

Although merchandise and service revenue decreased by $311,000 in the first quarter of 2007 compared to the same period last year, our profit increased by $64,000. We experienced a decrease in revenue mainly due to lower demand for merchandise as a result of the slow down of new construction projects during the current downturn in the housing market. Despite the decrease to our revenues, profitability rose due to a focus by our management on pricing structure.

Deleted: in our areas due to a

The total interest expense decreased $46,000 as compared to the same period last year, due mainly to a decrease in the average outstanding balance on the line of credit.

Income Taxes

Income tax expense decreased in the first quarter of 2007 by $257,000 over the same period last year as a result of lower taxable income.

Liquidity and Capital Resources

Deleted: ¶
¶

Cash Flows

Operating Activities
Net cash flow provided by operating activities for the three months ended March 31, 2007 decreased by approximately $4.8 million over the same period in 2006. The over-recovered fuel costs in 2006 and the related reduction in fuel costs in 2007 that are passed to our customers accounted for approximately $5.1 million decrease in the current year's net cash flow as compared to the prior year.

Investing Activities
Construction expenditures did not fluctuate significantly between the quarters, decreasing by approximately $178,000 compared to the same period last year.

Deleted: ;

Financing Activities
Decreases in cash flow used in financing activities were mostly attributable to reductions in short-term borrowings. In the first quarter of 2007 we paid down our line of credit by $1.3 million as compared to $6.1 million in the first quarter of 2006. The increase in fuel costs during the latter part of 2005 resulted in large fuel under-recoveries and therefore a higher dependence on short-term financing in the first quarter of 2006 compared to 2007.

Capital Resources

We have a $12 million line of credit (LOC), which expires on July 1, 2008. Upon 30 days notice by us we can increase the LOC to a maximum of $20 million. The LOC contains affirmative and negative covenants that, if violated, would give the bank the right to accelerate the due date of the loan to be immediately payable. The covenants include certain financial ratios. All ratios are currently within the required limits and management believes we are in full compliance with all covenants and anticipates continued compliance in the foreseeable future. We reserve $1 million of the LOC to cover expenses for any major storm repairs in our electric segment and an additional $250,000 for a letter of credit insuring propane facilities. As of March 31, 2007, the amount borrowed from the LOC was $2.2 million. At March 31, 2007, the LOC, long-term debt and preferred stock comprised 52% of total equity and debt capitalization.

Our 1942 Indenture of Mortgage and Deed of Trust, which is a mortgage on all real and personal property, permits the issuance of additional bonds based upon a calculation of unencumbered net real and personal property. At March 31, 2007, such calculation would permit the issuance of approximately $39.8 million of additional bonds.

We have $3.4 million in invested funds for payment of future environmental costs. We expect to incur between $5.8 million and $19.1 million through year ending December 31, 2021 for expenses related to environmental clean up.

Capital Requirements

Portions of our business are seasonal and dependent on weather conditions in Florida. The weather affects the sale of electricity and gas, and thereby impacts the cash provided by operations. Construction costs also impact cash requirements throughout the year. Cash needs for operations and construction are met partially through short-term borrowings from our LOC.

We plan to purchase land for the construction of our South Florida division office within three years. The possible purchase of the land would increase capital expenditures by $4 to $6 million. The current South Florida division office is located on environmentally impacted property, which requires relocating the office to allow for clean up of the property. It will not be possible to rebuild at the current location since this site has been rezoned with a residential designation. We are planning to build and complete this new facility in the next five years. Additional construction expenditures for the remainder of 2007 include the anticipated construction of an office building in Northeast Florida. The cost is expected to be approximately $750,000 with construction scheduled for completion in early 2008.

Deleted: 3

Deleted: construction

Deleted: in 2007 over the same period last year

Deleted: Additionally, the construction expenditures for the remainder of 2007 are expected to increase due to the anticipated construction of an office building in Northeast Florida. The cost is expected to be approximately $750,000 with construction scheduled for completion in early 2008.

Deleted: ¶
¶

Deleted: The estimated cost of the land is $4 million to $6 million.

Material commitments for capital expenditures consist of $775,000 for the purchase of a transformer and vehicle purchases totaling approximately $489,000.

Cash requirements are anticipated to increase significantly in the future due to additional environmental clean up costs, sinking fund payments on long-term debt and pension contributions. Environmental clean up costs are forecasted to be approximately $600,000 through 2007, with remaining payments which could total approximately $13.1 million, beginning in 2008 and ending in 2021. Annual long-term debt sinking fund payments of approximately $1.4 million will begin in 2008 and will continue for eleven years. Current projections indicate that we will need to make a contribution of $250,000 to our pension plan in 2007. Congress has finalized the new funding rules and we may have significant contribution requirements for several years beginning with 2008.

Due to delayed environmental clean-up costs, we currently do not anticipate that any equity or debt financing in 2007 will be required. We believe that cash from operations, coupled with short-term borrowings on the LOC, will be sufficient to satisfy our operating expenses, normal capital expenditure requirements and dividend payments through spring of 2008. However, cash requirements are forecasted to increase significantly in the future due to our environmental clean up costs, a land purchase, and sinking fund payments on long-term debt and pension contributions. If cash needs relating to the land purchase and related construction and the timing of environmental expenditures change, it is possible we may consider equity or debt financing. The need and timing will depend upon the overall company cash flow requirements. There can be no assurance, however, that equity or debt financing will be available on favorable terms, or at all, when we seek such financings.

Deleted: in 2008 or later years

Outlook

Electric Power Supply

Contracts with our two electric suppliers were originally set to expire on December 31,

2007. Those long-term contracts provided electricity to our customers at rates much lower than current market rates. As part of our negotiations, we agreed to end the current contract terms for our Northeast division on December 31, 2006 and executed an amended contract that began January 1, 2007 and will expire December 31, 2017. Although the contract rates have increased for 2007, this enabled us to obtain lower rates for the longer term of the contract than would have been available if we had not revised the contract. The savings are passed through to our customers without profit to us.

We executed a contract for the provider of electricity in our Northwest division in December 2006 and are seeking approval of this contract and its related terms and conditions from the FPSC on or before July 1, 2007. If the FPSC does not approve this contract, we may need to seek an alternative supplier or new contract with this same supplier for the purchase of electricity in the Northwest division. This contract will be for the purchase of electricity beginning January 1, 2008. We anticipate that contract will result in rates closer to market, which could cause our customers' bills to double over existing prices in the next several years.

We are unable to estimate what impact, if any, the higher rates could have on electric consumption.

Propane Gas

We continue to review the possibility of hedging activities later in 2007 to help mitigate the risk of price changes for our cost of propane gas. We are unable to determine the impact this activity will have on our future operating income.

Deleted: We used advance purchase agreements made in the normal course of procuring propane gas supplies in past years. These agreements resulted in a loss of gross profit of approximately $5,000 in 2006 and additional gross profit of approximately $383,000 in 2005.¶

Over-earnings-Natural Gas Segment

The FPSC approves rates that are intended to permit a specified rate of return on investment and limits the maximum amount of earnings of regulated operations. We have recorded estimated 2006 and 2005 over-earnings for regulated natural gas operations of $25,000 and $650,000, respectively. These liabilities have been included in the over-earnings liability on our balance sheet. The calculations supporting these liabilities are complex and involve a variety of projections and estimates before the ultimate settlement of such obligations. Estimates may be revised as expectations change and factors become known and determinable.

Our 2005 and 2006 estimates of our over-earnings liabilities could change upon the FPSC finalization and review of our earnings for 2007 and 2008. The FPSC determines the disposition of over-earnings with alternatives that include refunding to customers, funding storm damage or environmental reserves, or reducing any depreciation reserve deficiency.

Deleted: in

In 2007, we requested that the 2005 natural gas over-earnings be used to provide additional funds to our regulatory storm reserve liability and reduce the costs currently being recovered from our customers through a storm surcharge. If the FPSC approves this disposition, we will end the storm surcharge later in 2007.

Indiantown Gas
The FPSC approved our joint transportation and territorial agreements with Indiantown in October 2006. We have also begun construction in the Indiantown area to install natural gas mains in the first phase of this development for approximately 100 homes. The next two developments are slated to break ground later in 2007 for construction of approximately 1,000 homes.

Land Purchase
We have entered into an agreement to purchase land for the new South Florida division office. We are in the process of completing due diligence on this property and expect to finalize this phase and close on the property during the second quarter of 2007.

Deleted: a

New Division Office
We are planning to build a new operations center for our Northeast division on land we currently own. We are in the process of developing and finalizing the building plans, and expect to begin construction sometime in 2007. The cost is expected to be $750,000 and should be completed in early 2008.

Storm Related Expenditures
Regulators continue to focus on hurricane preparedness and storm recovery issues for utility companies. Newly mandated storm preparedness initiatives could impact our operating expenses and capital expenditures later in 2007. The initial forecasts of these annual expenditures are approximately $700,000. It is possible that additional regulation and rules will be mandated regarding storm related expenditures over the next several years. We requested that the FPSC allow us to recover the cost of the newly mandated storm preparedness initiatives and to defer these storm-related expenditures until we receive recovery through a rate increase. If approved, both the recovery and expenditures may occur by mid-2007. If these expenditures are approved for rate recovery in 2007, these rates would be temporary until final rates were implemented as a result of an electric base rate proceeding.

Electric Base Rate Proceeding
We plan to file a request with the FPSC in the third quarter of 2007 for a base rate increase in our electric segment. This request will include recovery of increased expenses and capital expenditures since our last rate proceeding in 2004, as well as additional storm-related expenditures as discussed above. Finalization of this request and approval, if any, of an electric base rate increase would not occur until early 2008. Possible interim rate relief for partial recovery of the increased expenditures may occur in late 2007.

Impact of Recent Accounting Standards
FASB Staff Position (FSP) AUG AIR-1 *"Accounting for Planned Major Maintenance Activities,"* amended APB 28, "*Interim Financial Reporting*," to prohibit the use of the accrue-in-advance method of accounting for planned major maintenance. The Company does not accrue-in-advance for planned major maintenance activities

Formatted: Font: Italic
Deleted: ¶

therefore the adoption of FSP AUG AIR-1 in the first quarter of 2007 did not have an impact on the Company's results of operations, cash flows or financial position.

Financial Accounting Standard No. 159
In February 2007, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standard (SFAS) No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities". This Statement permits measurement at fair value of certain firm commitments, nonfinancial insurance contracts and warranties, host financial instruments and recognized financial assets and liabilities, excluding consolidating investments in subsidiaries, consolidating variable interest entities, various forms of deferred compensation agreements, leases, depository institution deposit liabilities and financial instruments included in shareholders' equity. This Statement is effective for financial statements issued for fiscal years beginning after November 15, 2007. The Company expects to adopt SFAS No. 159 effective January 1, 2008. The Company does not believe adoption of this Statement will have a material impact on our financial condition or results of operation.

Financial Accounting Standard Board Interpretation No. 48
The Company accounts for uncertainty in income taxes in accordance with FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes (FIN 48) and SFAS No. 109, Accounting for Income Taxes. The Company performed an analysis of tax positions taken and expected to be taken on the tax returns. The analysis concluded that the Company had no material uncertain tax positions.

The Interpretation requires Companies to accrue interest and penalties that would be incurred if an uncertain tax position ultimately were not sustained. In such a case, the Company would start accruing interest and penalty in the period which gives rise to the uncertain tax position. The Company would classify interest and penalties in the income statement and balance sheet separately from other tax balances and based on expected timing of cash payment to the taxing authorities.

In February of 2007, the IRS informed us that it selected our 2003, 2004 and 2005 tax years for examination. As our tax positions have remained consistent with those from the previously audited tax years, we are not expecting any material adverse findings resulting from the IRS audit.

Forward-Looking Statements (Cautionary Statement)
This report contains forward-looking statements including those relating to the following:

- Based on our current expectations for cash needs, including cash needs relating to the possible land purchase and related construction, we may choose to consider an equity or debt financing.

Deleted: and

Deleted:

Deleted: In June 2006, the FASB issued Interpretation No. 48, Accounting for Uncertainty in Income Taxes (FIN 48). The interpretation clarifies the accounting for uncertainty in income taxes recognized in an entity's financial statements in accordance with SFAS No. 109, Accounting for Income Taxes. The interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 also provides guidance on de-recognition, measurement, classification, interest and penalties, accounting in interim periods, disclosure and transition. This interpretation is effective for calendar years beginning January 1, 2007.¶
¶
We have performed an analysis of tax positions taken and expected to be taken on the tax returns and assessed the technical merits of each tax position by relying on legislation, statutes, common legislative intent, regulations, rulings and case law and determined that the Company has no material uncertain tax positions. ¶

Deleted: in 2008

- Our anticipation of continued compliance in the foreseeable future with our LOC covenants.
- Construction expenditures for the remainder of 2007 may increase by $4 to $6 million over the same period in 2006 if we are successful in negotiating the purchase of the land for our South Florida operations.
- Our expectation that cash requirements will increase significantly in the future due to environmental clean-up costs, sinking fund payment on long-term debt and pension contributions.
- Our belief that cash from operations, coupled with short-term borrowings on our LOC, will be sufficient to satisfy our operating expenses, normal construction expenditure and dividend payments through spring of 2008.
- Our 2006 and 2005 over-earnings liability in natural gas will materialize as estimated after the FPSC review and audit.
- We expect there will be no impairment of either reporting segment upon finalization of our impairment testing in 2007.
- We expect higher fuel costs beginning in 2008 for our Northwest electric division.
- The development in Indiantown will occur as estimated.
- Storm related expenditures may be necessary beginning in 2007 and the total cost may be significant. We may receive recovery for these expenditures.
- The purchase of land for our new South Florida division office may occur in 2007.
- We expect to file for an electric base rate increase in the third quarter of 2007 and finalization is expected in early 2008. Final rates, if approved by the FPSC, would not occur until 2008.
- We anticipate capital expenditures of approximately $750,000 for the construction of an office building in Northeast Florida. Construction will begin in 2007 and be completed in early 2008.

These statements involve certain risks and uncertainties. Actual results may differ materially from what is expressed in such forward-looking statements. Important factors that could cause actual results to differ materially from those expressed by the forward-looking statements include, but are not limited to, those set forth in "Risk Factors" in our Form 10-K for the year ending December 31, 2006.

Deleted: below and

Item 3. Quantitative and Qualitative Disclosures about Market Risk

All financial instruments held by us were entered into for purposes other than for trading. We have market risk exposure only from the potential loss in fair value resulting from changes in interest rates. We have no material exposure relating to commodity prices because under our regulatory jurisdictions, we are fully compensated for the actual costs of commodities (natural gas and electricity) used in our operations. Any commodity price increases for propane gas are normally passed through monthly to propane gas customers as the fuel charge portion of their rate.

None of our gas or electric contracts are accounted for using the fair value method of accounting. While some of our contracts meet the definition of a derivative, we have designated these contracts as "normal purchases and sales" under SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities".

On a rolling four-quarter basis, we will purchase a "cap" on approximately one-third of our forecast propane volume purchases and pre-buy or hedge with a swap one-third of our forecast anticipated propane purchases. The remaining one-third will fluctuate with the market price. Our energy strategy allows us to participate in two-thirds of price declines but only one-third of price increases. As of March 31, 2007, we have not entered into any hedging activities. When we do enter into hedging activities, we will determine whether they meet the definition of normal sales and purchases and if not, we will determine whether we can use hedge accounting.

We have no exposure to equity risk, as we do not hold any equity instruments. Our exposure to interest rate risk is limited to investments held for environmental costs, the long-term notes receivable from the sale of our water division and short-term borrowings on the line of credit. The investments held for environmental costs are short-term fixed income debt securities whose carrying amounts are not materially different than fair value. The short-term borrowings were approximately $2.2 million at the end of March 2007. We do not believe we have material market risk exposure related to these instruments. The indentures governing our two first mortgage bond series outstanding contain "make-whole" provisions (pre-payment penalties that charge for lost interest), which render refinancing impracticable.

Item 4. Controls and Procedures

Disclosure Controls and Procedures

Our management carried out an evaluation, under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, of the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act). Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer as of March 31, 2007, concluded that our disclosure controls and procedures were effective, in that they provide reasonable assurance that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

Changes in Internal Control over Financial Reporting

No change in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) occurred during the fiscal quarter ended March 31, 2007 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 6. Exhibits

3.1 Amended Articles of Incorporation (incorporated herein by reference as Exhibit 3.1 to our quarterly report on Form 10-Q for the period ended June 30, 2002).

3.2 Amended By-Laws (incorporated herein by reference as Exhibit 3(ii) to our quarterly report on Form 10-Q for the period ended June 30, 2002).

FASB Staff Position (FSP) AUG AIR-1 *"Accounting for Planned Major Maintenance Activities,"* amended APB 28, *"Interim Financial Reporting,"* to prohibit the use of the accrue-in-advance method of accounting for planned major maintenance. The Company does not accrue-in-advance for planned major maintenance activities therefore the adoption of FSP AUG AIR-1 in the first quarter of 2007 did not have an impact on the Company's results of operations, cash flows or financial position.

Financial Accounting Standard No. 159

In February 2007, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standard (SFAS) No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities". This Statement permits measurement at fair value of certain firm commitments, non-financial insurance contracts and warranties, host financial instruments and recognized financial assets and liabilities, excluding consolidating investments in subsidiaries, consolidating variable interest entities, various forms of deferred compensation agreements, leases, depository institution deposit liabilities and financial instruments included in shareholders' equity. This Statement becomes effective January 1, 2008 for financial statements issued for fiscal years beginning after November 15, 2007. As the Company does not believe adoption of this Statement will have a material impact on our financial condition or results of operation, we do not anticipate electing the fair value option.

Page 10: [2] Deleted **buschmdm** **5/10/2007 11:46:00 AM**

As our tax positions have remained consistent with those from the previously audited tax years, we are not expecting any material adverse findings resulting from the IRS audit.

Page 10: [3] Deleted **alundgren** **5/9/2007 4:59:00 PM**

In June 2006, the FASB issued Interpretation No. 48, Accounting for Uncertainty in Income Taxes (FIN 48). The interpretation clarifies the accounting for uncertainty in income taxes recognized in an entity's financial statements in accordance with SFAS No. 109, Accounting for Income Taxes. The interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 also provides guidance on de-recognition, measurement, classification, interest and penalties, accounting in interim periods, disclosure and transition. This interpretation is effective for calendar years beginning January 1, 2007.

We have performed an analysis of tax positions taken and expected to be taken on the tax returns and assessed the technical merits of each tax position by relying on legislation, statutes, common legislative intent, regulations, rulings and case law and determined that the Company has no material uncertain tax positions.

1007dmbmark

I would not say they are auditing it. I would just say that all years after 2002 are open or conversely all years before 2002 are closed. You already state in a separate section that you are being audited for 2003 & 2004. Maybe you could move that note right after the FIN 48 note and then you could eliminate the duplication See my changes on the attached. Thanks Dale PS I didn't fix the pension table

They have not specifically said that they are auditing 2005 but since it is open, Ana suggested that we add it to our note.

Thanks,

Mehrdad K.

Subject: RE: 10q redline and clean versions

Fin 48 note - Companies should be a small C. You added 2005 here but didn't add it to the Income tax audit note. Are they auditing 2005? Rather than add 2005 to the audit note if it's not being audited, I would just state something along these lines:

Under the tax statute of limitations applicable to the Internal Revenue Code, we are no longer subject to U.S. federal income tax examinations by the Internal Revenue Service for years before 2003. However, because we are carrying forward income tax attributes, such as net operating losses and tax credits from 2002 and earlier tax years, these attributes can still be audited when utilized on returns filed in the future.
State: Under the statutes of limitation applicable to most state income tax laws, we are no longer subject to state income tax examinations by tax authorities for years before 2003 in states in which we have filed income tax returns. Certain states may take the position that we are subject to income tax in such states even though we have not filed income tax returns in such states and, depending on the varying state income tax statutes and administrative practices, the statute of limitations in such states may extend to years before 2003.
You could combine it into one paragraph and not have a federal and a state separately.
On the pension note, the table doesn't look right. Postretirement expense recorded for

the 3 months of 2007 was $50K, wasn't it?

Can you please leave the tracking on for these changes?

thanks Dale

FLORIDA PUBLIC UTILITIES COMPANY
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)
March 31, 2007

1. **Basis of Presentation**
The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with the generally accepted accounting principles in the United States (GAAP) for interim financial information and with the instructions for Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. In the opinion of management, all adjustments necessary for fair presentation have been included. The operating results for the period are not necessarily indicative of the results that may be expected for the full year. For further information, refer to the audited consolidated financial statements and footnotes included in the Company's Annual Report on Form 10-K for the year ended December 31, 2006.

2. **Use of Estimates**
The preparation of financial statements in conformity with GAAP requires the Company to make certain estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of any contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Significant estimates include allowances, accruals for pensions, environmental liabilities, liability reserves, regulatory deferred tax liabilities, unbilled revenue and over-earnings liability. Actual results may differ from these estimates.

3. **Regulation**
The financial statements are prepared in accordance with the provisions of Statement of Financial Accounting Standards (SFAS) No. 71 – "Accounting for the Effects of Certain Types of Regulation". SFAS No. 71 recognizes that accounting for rate-regulated enterprises should reflect the relationship of costs and revenues introduced by rate regulation. A regulated utility may defer recognition of a cost (a regulatory asset) or show recognition of an obligation (a regulatory liability) if it is probable that, through the ratemaking process, there will be a corresponding increase or decrease in revenues. The Company has recognized certain regulatory assets and liabilities in the condensed consolidated balance sheets.

As a result, Florida Public Service Commission (FPSC) regulation has a significant effect on the Company's results of operations. The FPSC approves rates that are intended to permit a specified rate of return on investment. Rate tariffs allow the flexibility of automatically passing through the cost of natural gas and electricity to customers. Increases in the operating expenses of the regulated segments may require a request for increases in the rates charged to customers.

4. **Pledged Assets**
Substantially all of the Company's utility plant and the shares of its wholly owned subsidiary, Flo-Gas Corporation, collateralize the Company's First Mortgage Bonds (long-term debt). Cash, accounts receivable and inventory are collateral for the line of

credit.

5. **Restriction on Dividends**
The Company's Fifteenth Supplemental Indenture of Mortgage and Deed of Trust restricts the amount that is available for cash dividends. At March 31, 2007, approximately $10.1 million of retained earnings were free of such restriction and available for the payment of dividends. The Company's line of credit agreement contains covenants that, if violated, could restrict or prevent the payment of dividends. The Company is not in violation of these covenants.

6. **Allowance for Uncollectible Accounts**
The Company records an allowance for uncollectible accounts based on historical information and trended current economic conditions. The bad debt write-offs for the first quarter 2007 were $177,000 while the provisions were $174,000.

7. **Storm Reserves**
As of March 31, 2007, the Company had a storm reserve of approximately $1.7 million for the electric segment. The Company does not have a storm reserve for the natural gas or propane gas segments. Any future storm costs affecting the natural gas segment will be deferred for recovery from customers either through rate increases or through applying any available over-earnings as a reduction to the costs. All such deferred costs are subject to review and approval by the FPSC.

The Company deferred storm costs for the natural gas segment incurred in 2004 as a regulatory asset on the condensed consolidated balance sheets. The FPSC approved recovery of these storm costs, plus interest and revenue related taxes, over a 30-month period beginning in November 2005. As of March 31, 2007, the remaining balance of these storm costs to be recovered is $207,000.

8. **Goodwill and Other Intangible Assets**
The Company does not amortize goodwill or intangibles with indefinite lives. The Company periodically tests the applicable reporting segments, natural gas and propane gas, for impairment. In the event goodwill or intangible assets related to a segment are determined to be impaired, the Company would write down such assets to fair value. The impairment test performed in 2006 showed no impairment for either reporting segment. The Company does not believe the 2007 impairment test will indicate impairment for either reporting segment. Final results are expected in the second quarter of 2007.

Goodwill associated with the Company's acquisitions consists of $500,000 in the natural gas segment and $1.9 million in the propane gas segment. The summary of intangible assets at March 31, 2007, is as follows:

Intangible Assets
(Dollars in thousands)

		2007
Customer distribution rights	(Indefinite life)	$ 1,900
Customer relationships	(Indefinite life)	900
Software	(Five to nine year life)	3,169

Accumulated amortization	(1,603)
Total intangible assets, net of amortization	$ 4,366

The amortization expense of intangible assets was approximately $86,000 for the three months ended March 31, 2007.

9. Common Shareholders' Equity

Items impacting common shareholders' equity other than income and dividends are the dividend reinvestment program, employee stock purchase program, stock compensation plans and treasury stock. The net impact of these additional items increased common shareholders' equity approximately $220,000 for the three months ended March 31, 2007. Accumulated other comprehensive loss, comprised of the deferred cost of employee benefit plans, totaled approximately $100,000 as of March 31, 2007 and December 31, 2006.

10. Over-earnings – Natural Gas Segment

The FPSC approves rates that are intended to permit a specified rate of return on investment and limits the maximum amount of earnings of regulated operations. The Company has agreed with the FPSC staff to limit the earned return on equity for regulated natural gas and electric operations.

The Company has recorded estimated 2006 and 2005 over-earnings for regulated natural gas operations of $25,000 and $650,000, respectively. These liabilities are included in the over-earnings liability on the Company's condensed consolidated balance sheet of March 31, 2007. The calculations supporting these liabilities are complex and involve a variety of projections and estimates before the ultimate settlement of such obligations. Estimates may be revised as expectations change and factors become known and determinable.

The 2005 and 2006 over-earnings liabilities are based on the Company's best estimates, but the amounts could change upon the FPSC finalization and review of earnings expected in 2007 and 2008. The FPSC determines the disposition of over-earnings with alternatives that include refunding to customers, increasing storm damage or environmental reserves or reducing any depreciation reserve deficiency.

11. Environmental Contingencies

The Company is subject to federal and state legislation with respect to soil, groundwater and employee health and safety matters and to environmental regulations issued by the Florida Department of Environmental Protection (FDEP), the United States Environmental Protection Agency (EPA) and other federal and state agencies. For full disclosure of the legal items that impact the Company, please refer to "Contingencies" in the Notes to Consolidated Financial Statements in the Company's Form 10-K for the year ended December 31, 2006.

12. Reclassification

Certain amounts in the 2006 financial statements have been reclassified to conform to the 2007 presentation.

13. Financial Accounting Standard Board Interpretation No. 48

The Company accounts for uncertainty in income taxes in accordance with FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes (FIN 48) and SFAS No. 109, Accounting for Income Taxes. The Company performed an analysis of tax positions taken and expected to be taken on the tax returns. The analysis concluded that the Company had no material uncertain tax positions.

The Interpretation requires Companies to accrue interest and penalties that would be incurred if an uncertain tax position ultimately were not sustained. In such a case, the Company would start accruing interest and penalty in the period which gives rise to the uncertain tax position. The Company would classify interest and penalties in the income statement and balance sheet separately from other tax balances and based on expected timing of cash payment to the taxing authorities.

Under the tax statute of limitations applicable to the Internal Revenue Code and state taxes, we are no longer subject to examinations by the Internal Revenue Service or the State of Florida for years before 2003. However, because we are carrying forward income tax attributes, such as net operating losses and tax credits from 2002 and earlier tax years, these attributes can still be audited when utilized on returns filed in the future. As noted in Note 14, we have been notified of a IRS audit.

14. IRS Examination

In February of 2007, the IRS informed us that it has selected our 2003 and 2004 tax years for examination. As our tax positions have remained consistent with those from the previously audited tax years, we do not expect any material adverse findings as the result of the impending IRS audit.

15. Recent Accounting Standards

FSP AUG AIR-1 Accounting for Planned Major Maintenance Activities

FASB Staff Position (FSP) AUG AIR-1 *"Accounting for Planned Major Maintenance Activities,"* amended APB 28, *"Interim Financial Reporting,"* to prohibit the use of the accrue-in-advance method of accounting for planned major maintenance. The Company does not accrue-in-advance for planned major maintenance activities therefore the adoption of FSP AUG AIR-1 in the first quarter of 2007 did not have an impact on the Company's results of operations, cash flows or financial position.

Financial Accounting Standard No. 159

In February 2007, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standard (SFAS) No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities". This Statement permits measurement at fair value of certain firm commitments, non-financial insurance contracts and warranties, host financial instruments and recognized financial assets and liabilities, excluding consolidating investments in subsidiaries, consolidating variable interest entities, various forms of deferred compensation agreements, leases, depository institution deposit liabilities and financial instruments included in shareholders' equity. This Statement becomes effective January 1, 2008 for financial statements issued for fiscal years beginning after November 15, 2007. As the Company does not

16. Employee Benefit Plans

The Company sponsors a qualified defined benefit pension plan for non-union employees that were hired before January 1, 2005 and for unionized employees that work under one of the six Company union contracts and were hired before their respective contract dates in 2005. The Company also sponsors a postretirement medical plan.

The following table provides the components of the net periodic benefit cost for our pension plan and postretirement benefit plan for the three months ended March 31, 2006 and 2007.

FLORIDA PUBLIC UTILITIES COMPANY
Net Periodic Benefit Costs
(Dollars in thousands)

	Three Months Ended March 31, 2007	2006
Pension Plan:		
Service Cost	$ 283	$ 308
Interest Cost	566	524
Expected Return on Plan Assets	(610)	(603)
Amortization of Prior Service Cost	184	184
Net Periodic Pension Cost	$ 423	$ 413
Postretirement Benefit Plan:		
Service Cost	16	15
Interest Cost	26	26
Amortization of Transition Obligation/(Asset)	11	11
Amortization of Net (Gain) or Loss	(5)	(4)
Net Periodic Postretirement Benefit Cost	$ 48	$ 48

For additional information related to our employee benefit plans, please see Note 12 to the Consolidated Financial Statements of the company's 10-K Annual Report.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

We have three primary business segments: natural gas, electric and propane gas. The Florida Public Service Commission (FPSC) regulates the natural gas and electric segments.

Results of Operations

Deleted: ¶

Deleted: Effects of seasonal weather conditions, the timing of rate increases, fluctuations in demand due to the cost of fuel passed on to customers and the migration of winter residents and tourists to Florida during the winter season all have an impact on income. ¶

Revenues and Gross Profit Summary

Revenues include cost recovery revenues. The FPSC allows cost recovery revenues to directly recover costs of fuel, conservation and revenue-based taxes in our natural gas and electric segments. Revenues collected for these costs and expenses have no effect on results of operations and fluctuations could distort the relationship of revenues between periods. Gross profit is defined as gross operating revenues less fuel, conservation and revenue-based taxes that are passed directly through to customers. Because gross profit eliminates these cost recovery revenues, we believe it provides a more meaningful basis for evaluating utility revenues. The following summary compares gross profit between periods and units sold in one thousand Dekatherm (MDth) (gas) and Megawatt Hour (MWH) (electric).

Formatted Table

Revenues and Gross Profit
(Dollars in thousands)

	Three Months Ended March 31,	
	2007	**2006**
Natural Gas		
Revenues	**$20,573**	**$26,954**
Cost of fuel and other pass through costs	12,522	18,555
Gross Profit	**$ 8,051**	**$ 8,399**

Propane Gas		
Revenues	**$4,681**	**$4,698**
Cost of fuel	2,348	2,385
Gross Profit	**$2,333**	**$2,313**
Units sold: (MDth)	192	200
Consolidated		

Revenues	$38,612	$43,348
Cost of fuel	24,769	29,213
Gross Profit	$13,843	$14,135

... [4]

Three Months Ended March 31, 2007 Compared with Three Months Ended March 31, 2006.

Revenues and Gross Profit

Natural Gas

Natural gas service revenues decreased $6,381,000 in the first quarter of 2007 over the same period in 2006. As the cost of natural gas continues to decline, revenues to recover our cost of fuel and other costs passed through to customers decreased by $6,033,000. These costs do not impact our gross profit. Our gross profit decreased $348,000 or 4%. The decrease in gross profit is attributable to a 5% decrease in units sold in 2007 due primarily to generally warmer weather compared to the prior year.

Electric

Electric service revenues increased $1,662,000 in the first quarter of 2007 over the same period in 2006. $1,626,000 of the increase was attributable to the cost of fuel and other costs that were passed through to customers. A new fuel contract in our Northeast division was effective January 1, 2007 and this increased the cost of fuel that was passed through to our customers. Gross profit was flat compared to the first quarter of 2006.

Propane Gas

Propane experienced a 4% decrease in units sold to customers due to warmer weather; however this was offset by increased profit margins.

Operating Expenses

Operating expenses were higher by $498,000 in the first quarter of 2007 compared to the same period in 2006. The majority of the increased expense is from cost of living raises related to payroll and increased payroll expense incurred to improve natural gas customer service and collections.

Other Income and Deductions

Although merchandise and service revenue decreased by $311,000 in the first quarter of 2007 compared to the same period last year, our profit increased by $64,000. We experienced a decrease in revenue mainly due to lower demand for merchandise as a result of the slow down of new construction projects during the current downturn in the housing market. Despite the decrease to our revenues, profitability rose due to a focus by our management on pricing structure.

Deleted: in our areas due to a

The total interest expense decreased $46,000 as compared to the same period last year, due mainly to a decrease in the average outstanding balance on the line of credit.

Income Taxes

Income tax expense decreased in the first quarter of 2007 by $257,000 over the same period last year as a result of lower taxable income.

Liquidity and Capital Resources

Deleted: ¶
¶

Cash Flows

Operating Activities

Net cash flow provided by operating activities for the three months ended March 31, 2007 decreased by approximately $4.8 million over the same period in 2006. The over-recovered fuel costs in 2006 and the related reduction in fuel costs in 2007 that are passed to our customers accounted for approximately $5.1 million decrease in the current year's net cash flow as compared to the prior year.

Investing Activities

Construction expenditures did not fluctuate significantly between the quarters, decreasing by approximately $178,000 compared to the same period last year.

Deleted: ;

Financing Activities

Decreases in cash flow used in financing activities were mostly attributable to reductions in short-term borrowings. In the first quarter of 2007 we paid down our line of credit by $1.3 million as compared to $6.1 million in the first quarter of 2006. The increase in fuel costs during the latter part of 2005 resulted in large fuel under-recoveries and therefore a higher dependence on short-term financing in the first quarter of 2006 compared to 2007.

Capital Resources

We have a $12 million line of credit (LOC), which expires on July 1, 2008. Upon 30 days notice by us we can increase the LOC to a maximum of $20 million. The LOC contains affirmative and negative covenants that, if violated, would give the bank the right to accelerate the due date of the loan to be immediately payable. The covenants include certain financial ratios. All ratios are currently within the required limits and management believes we are in full compliance with all covenants and anticipates continued compliance in the foreseeable future. We reserve $1 million of the LOC to cover expenses for any major storm repairs in our electric segment and an additional $250,000 for a letter of credit insuring propane facilities. As of March 31, 2007, the amount borrowed from the LOC was $2.2 million. At March 31, 2007, the LOC, long-term debt and preferred stock comprised 52% of total equity and debt capitalization.

Our 1942 Indenture of Mortgage and Deed of Trust, which is a mortgage on all real and personal property, permits the issuance of additional bonds based upon a calculation of unencumbered net real and personal property. At March 31, 2007, such calculation would permit the issuance of approximately $39.8 million of additional bonds.

We have $3.4 million in invested funds for payment of future environmental costs. We expect to incur between $5.8 million and $19.1 million through year ending December 31, 2021 for expenses related to environmental clean up.

Capital Requirements

Portions of our business are seasonal and dependent on weather conditions in Florida. The weather affects the sale of electricity and gas, and thereby impacts the cash provided by operations. Construction costs also impact cash requirements throughout the year. Cash needs for operations and construction are met partially through short-term borrowings from our LOC.

We plan to purchase land for the construction of our South Florida division office within three years. The possible purchase of the land would increase capital expenditures by $4 to $6 million. The current South Florida division office is located on environmentally impacted property, which requires relocating the office to allow for clean up of the property. It will not be possible to rebuild at the current location since this site has been rezoned with a residential designation. We are planning to build and complete this new facility in the next five years. Additional construction expenditures for the remainder of 2007 include the anticipated construction of an office building in Northeast Florida. The cost is expected to be approximately $750,000 with construction scheduled for completion in early 2008.

Material commitments for capital expenditures consist of $775,000 for the purchase of a transformer and vehicle purchases totaling approximately $489,000.

Cash requirements are anticipated to increase significantly in the future due to additional environmental clean up costs, sinking fund payments on long-term debt and pension contributions. Environmental clean up costs are forecasted to be approximately $600,000 through 2007, with remaining payments which could total approximately $13.1 million, beginning in 2008 and ending in 2021. Annual long-term debt sinking fund payments of approximately $1.4 million will begin in 2008 and will continue for eleven years. Current projections indicate that we will need to make a contribution of $250,000 to our pension plan in 2007. Congress has finalized the new funding rules and we may have significant contribution requirements for several years beginning with 2008.

Due to delayed environmental clean-up costs, we currently do not anticipate that any equity or debt financing in 2007 will be required. We believe that cash from operations, coupled with short-term borrowings on the LOC, will be sufficient to satisfy our operating expenses, normal capital expenditure requirements and dividend payments through spring of 2008. However, cash requirements are forecasted to increase significantly in the future due to our environmental clean up costs, a land purchase, and sinking fund payments on long-term debt and pension contributions. If cash needs relating to the land purchase and related construction and the timing of environmental expenditures change, it is possible we may consider equity or debt financing. The need and timing will depend upon the overall company cash flow requirements. There can be no assurance, however, that equity or debt financing will be available on favorable terms, or at all, when we seek such financings.

Outlook

Electric Power Supply

Contracts with our two electric suppliers were originally set to expire on December 31,

¶

Deleted: The estimated cost of the land is $4 million to $6 million.

Deleted: in 2008

Deleted: in 2008 or later years

2007. Those long-term contracts provided electricity to our customers at rates much lower than current market rates. As part of our negotiations, we agreed to end the current contract terms for our Northeast division on December 31, 2006 and executed an amended contract that began January 1, 2007 and will expire December 31, 2017. Although the contract rates have increased for 2007, this enabled us to obtain lower rates for the longer term of the contract than would have been available if we had not revised the contract. The savings are passed through to our customers without profit to us.

We executed a contract for the provider of electricity in our Northwest division in December 2006 and are seeking approval of this contract and its related terms and conditions from the FPSC on or before July 1, 2007. If the FPSC does not approve this contract, we may need to seek an alternative supplier or new contract with this same supplier for the purchase of electricity in the Northwest division. This contract will be for the purchase of electricity beginning January 1, 2008. We anticipate that contract will result in rates closer to market, which could cause our customers' bills to double over existing prices in the next several years.

We are unable to estimate what impact, if any, the higher rates could have on electric consumption.

Propane Gas
We continue to review the possibility of hedging activities later in 2007 to help mitigate the risk of price changes for our cost of propane gas. We are unable to determine the impact this activity will have on our future operating income.

Deleted: We used advance purchase agreements made in the normal course of procuring propane gas supplies in past years. These agreements resulted in a loss of gross profit of approximately $5,000 in 2006 and additional gross profit of approximately $383,000 in 2005.

Over-earnings-Natural Gas Segment
The FPSC approves rates that are intended to permit a specified rate of return on investment and limits the maximum amount of earnings of regulated operations. We have recorded estimated 2006 and 2005 over-earnings for regulated natural gas operations of $25,000 and $650,000, respectively. These liabilities have been included in the over-earnings liability on our balance sheet. The calculations supporting these liabilities are complex and involve a variety of projections and estimates before the ultimate settlement of such obligations. Estimates may be revised as expectations change and factors become known and determinable.

Our 2005 and 2006 estimates of our over-earnings liabilities could change upon the FPSC finalization and review of our earnings for 2007 and 2008. The FPSC determines the disposition of over-earnings with alternatives that include refunding to customers, funding storm damage or environmental reserves, or reducing any depreciation reserve deficiency.

Deleted: in

In 2007, we requested that the 2005 natural gas over-earnings be used to provide additional funds to our regulatory storm reserve liability and reduce the costs currently being recovered from our customers through a storm surcharge. If the FPSC approves this disposition, we will end the storm surcharge later in 2007.

Indiantown Gas
The FPSC approved our joint transportation and territorial agreements with Indiantown in October 2006. We have also begun construction in the Indiantown area to install natural gas mains in the first phase of this development for approximately 100 homes. The next two developments are slated to break ground later in 2007 for construction of approximately 1,000 homes.

Land Purchase
We have entered into an agreement to purchase land for the new South Florida division office. We are in the process of completing due diligence on this property and expect to finalize this phase and close on the property during the second quarter of 2007.

Deleted: a

New Division Office
We are planning to build a new operations center for our Northeast division on land we currently own. We are in the process of developing and finalizing the building plans, and expect to begin construction sometime in 2007. The cost is expected to be $750,000 and should be completed in early 2008.

Storm Related Expenditures
Regulators continue to focus on hurricane preparedness and storm recovery issues for utility companies. Newly mandated storm preparedness initiatives could impact our operating expenses and capital expenditures later in 2007. The initial forecasts of these annual expenditures are approximately $700,000. It is possible that additional regulation and rules will be mandated regarding storm related expenditures over the next several years. We requested that the FPSC allow us to recover the cost of the newly mandated storm preparedness initiatives and to defer these storm-related expenditures until we receive recovery through a rate increase. If approved, both the recovery and expenditures may occur by mid-2007. If these expenditures are approved for rate recovery in 2007, these rates would be temporary until final rates were implemented as a result of an electric base rate proceeding.

Electric Base Rate Proceeding
We plan to file a request with the FPSC in the third quarter of 2007 for a base rate increase in our electric segment. This request will include recovery of increased expenses and capital expenditures since our last rate proceeding in 2004, as well as additional storm-related expenditures as discussed above. Finalization of this request and approval, if any, of an electric base rate increase would not occur until early 2008. Possible interim rate relief for partial recovery of the increased expenditures may occur in late 2007.

Impact of Recent Accounting Standards
FASB Staff Position (FSP) AUG AIR-1 *"Accounting for Planned Major Maintenance Activities,"* amended APB 28, *"Interim Financial Reporting,"* to prohibit the use of the accrue-in-advance method of accounting for planned major maintenance. The Company does not accrue-in-advance for planned major maintenance activities

Formatted: Font: Italic

Deleted: ¶

therefore the adoption of FSP AUG AIR-1 in the first quarter of 2007 did not have an impact on the Company's results of operations, cash flows or financial position.

Financial Accounting Standard No. 159

In February 2007, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standard (SFAS) No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities". This Statement permits measurement at fair value of certain firm commitments, nonfinancial insurance contracts and warranties, host financial instruments and recognized financial assets and liabilities, excluding consolidating investments in subsidiaries, consolidating variable interest entities, various forms of deferred compensation agreements, leases, depository institution deposit liabilities and financial instruments included in shareholders' equity. This Statement is effective for financial statements issued for fiscal years beginning after November 15, 2007. The Company expects to adopt SFAS No. 159 effective January 1, 2008. The Company does not believe adoption of this Statement will have a material impact on our financial condition or results of operation.

Financial Accounting Standard Board Interpretation No. 48

The Company accounts for uncertainty in income taxes in accordance with FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes (FIN 48) and SFAS No. 109, Accounting for Income Taxes. The Company performed an analysis of tax positions taken and expected to be taken on the tax returns. The analysis concluded that the Company had no material uncertain tax positions.

The Interpretation requires Companies to accrue interest and penalties that would be incurred if an uncertain tax position ultimately were not sustained. In such a case, the Company would start accruing interest and penalty in the period which gives rise to the uncertain tax position. The Company would classify interest and penalties in the income statement and balance sheet separately from other tax balances and based on expected timing of cash payment to the taxing authorities.

In February of 2007, the IRS informed us that it selected our 2003, 2004 and 2005 tax years for examination. As our tax positions have remained consistent with those from the previously audited tax years, we are not expecting any material adverse findings resulting from the IRS audit.

Deleted: In June 2006, the FASB issued Interpretation No. 48, Accounting for Uncertainty in Income Taxes (FIN 48). The interpretation clarifies the accounting for uncertainty in income taxes recognized in an entity's financial statements in accordance with SFAS No. 109, Accounting for Income Taxes. The interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 also provides guidance on de-recognition, measurement, classification, interest and penalties, accounting in interim periods, disclosure and transition. This interpretation is effective for calendar years beginning January 1, 2007.¶
¶
We have performed an analysis of tax positions taken and expected to be taken on the tax returns and assessed the technical merits of each tax position by relying on legislation, statutes, common legislative intent, regulations, rulings and case law and determined that the Company has no material uncertain tax positions. ¶

Forward-Looking Statements (Cautionary Statement)

This report contains forward-looking statements including those relating to the following:

- Based on our current expectations for cash needs, including cash needs relating to the possible land purchase and related construction, we may choose to consider an equity or debt financing.

- Our anticipation of continued compliance in the foreseeable future with our LOC covenants.
- Construction expenditures for the remainder of 2007 may increase by $4 to $6 million over the same period in 2006 if we are successful in negotiating the purchase of the land for our South Florida operations.
- Our expectation that cash requirements will increase significantly in the future due to environmental clean-up costs, sinking fund payment on long-term debt and pension contributions.
- Our belief that cash from operations, coupled with short-term borrowings on our LOC, will be sufficient to satisfy our operating expenses, normal construction expenditure and dividend payments through spring of 2008.
- Our 2006 and 2005 over-earnings liability in natural gas will materialize as estimated after the FPSC review and audit.
- We expect there will be no impairment of either reporting segment upon finalization of our impairment testing in 2007.
- We expect higher fuel costs beginning in 2008 for our Northwest electric division.
- The development in Indiantown will occur as estimated.
- Storm related expenditures may be necessary beginning in 2007 and the total cost may be significant. We may receive recovery for these expenditures.
- The purchase of land for our new South Florida division office may occur in 2007.
- We expect to file for an electric base rate increase in the third quarter of 2007 and finalization is expected in early 2008. Final rates, if approved by the FPSC, would not occur until 2008.
- We anticipate capital expenditures of approximately $750,000 for the construction of an office building in Northeast Florida. Construction will begin in 2007 and be completed in early 2008.

These statements involve certain risks and uncertainties. Actual results may differ materially from what is expressed in such forward-looking statements. Important factors that could cause actual results to differ materially from those expressed by the forward-looking statements include, but are not limited to, those set forth in "Risk Factors", in our Form 10-K for the year ending December 31, 2006.

Deleted: below and

Item 3. Quantitative and Qualitative Disclosures about Market Risk

All financial instruments held by us were entered into for purposes other than for trading. We have market risk exposure only from the potential loss in fair value resulting from changes in interest rates. We have no material exposure relating to commodity prices because under our regulatory jurisdictions, we are fully compensated for the actual costs of commodities (natural gas and electricity) used in our operations. Any commodity price increases for propane gas are normally passed through monthly to propane gas customers as the fuel charge portion of their rate.

None of our gas or electric contracts are accounted for using the fair value method of accounting. While some of our contracts meet the definition of a derivative, we have designated these contracts as "normal purchases and sales" under SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities".

On a rolling four-quarter basis, we will purchase a "cap" on approximately one-third of our forecast propane volume purchases and pre-buy or hedge with a swap one-third of our forecast anticipated propane purchases. The remaining one-third will fluctuate with the market price. Our energy strategy allows us to participate in two-thirds of price declines but only one-third of price increases. As of March 31, 2007, we have not entered into any hedging activities. When we do enter into hedging activities, we will determine whether they meet the definition of normal sales and purchases and if not, we will determine whether we can use hedge accounting.

We have no exposure to equity risk, as we do not hold any equity instruments. Our exposure to interest rate risk is limited to investments held for environmental costs, the long-term notes receivable from the sale of our water division and short-term borrowings on the line of credit. The investments held for environmental costs are short-term fixed income debt securities whose carrying amounts are not materially different than fair value. The short-term borrowings were approximately $2.2 million at the end of March 2007. We do not believe we have material market risk exposure related to these instruments. The indentures governing our two first mortgage bond series outstanding contain "make-whole" provisions (pre-payment penalties that charge for lost interest), which render refinancing impracticable.

Item 4. Controls and Procedures

Disclosure Controls and Procedures

Our management carried out an evaluation, under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, of the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act). Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer as of March 31, 2007, concluded that our disclosure controls and procedures were effective, in that they provide reasonable assurance that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

Changes in Internal Control over Financial Reporting

No change in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) occurred during the fiscal quarter ended March 31, 2007 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

FASB Staff Position (FSP) AUG AIR-1 *"Accounting for Planned Major Maintenance Activities,"* amended APB 28, *"Interim Financial Reporting,"* to prohibit the use of the accrue-in-advance method of accounting for planned major maintenance. The Company does not accrue-in-advance for planned major maintenance activities therefore the adoption of FSP AUG AIR-1 in the first quarter of 2007 did not have an impact on the Company's results of operations, cash flows or financial position.

Financial Accounting Standard No. 159
In February 2007, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standard (SFAS) No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities". This Statement permits measurement at fair value of certain firm commitments, non-financial insurance contracts and warranties, host financial instruments and recognized financial assets and liabilities, excluding consolidating investments in subsidiaries, consolidating variable interest entities, various forms of deferred compensation agreements, leases, depository institution deposit liabilities and financial instruments included in shareholders' equity. This Statement becomes effective January 1, 2008 for financial statements issued for fiscal years beginning after November 15, 2007. As the Company does not believe adoption of this Statement will have a material impact on our financial condition or results of operation, we do not anticipate electing the fair value option.

Page 10: [2] Deleted | **buschmdm** | **5/10/2007 11:46:00 AM**

As our tax positions have remained consistent with those from the previously audited tax years, we are not expecting any material adverse findings resulting from the IRS audit.

Page 10: [3] Deleted | **alundgren** | **5/9/2007 4:59:00 PM**

In June 2006, the FASB issued Interpretation No. 48, Accounting for Uncertainty in Income Taxes (FIN 48). The interpretation clarifies the accounting for uncertainty in income taxes recognized in an entity's financial statements in accordance with SFAS No. 109, Accounting for Income Taxes. The interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 also provides guidance on de-recognition, measurement, classification, interest and penalties, accounting in interim periods, disclosure and transition. This interpretation is effective for calendar years beginning January 1, 2007.

We have performed an analysis of tax positions taken and expected to be taken on the tax returns and assessed the technical merits of each tax position by relying on legislation, statutes, common legislative intent, regulations, rulings and case law and determined that the Company has no material uncertain tax positions.

☒ **ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT** OF 1934
For the fiscal year ended ______ December 31, 2006

OR

☐ **TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**
For the transition period from ______ to ______

Commission file number ______ 001-10608

Florida Public Utilities Company
(Exact name of the registrant as specified in its charter)

Florida	59-0539080
(State or other jurisdiction of Incorporation or organization)	(I.R.S. Employer Identification Number)

401 South Dixie Highway, West Palm Beach, FL 33401
(Address of principal executive offices, Zip Code)

Registrant's telephone number, including area code (561) 832-0872

Securities registered pursuant to section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
Common Stock par value $1.50 per share	American Stock Exchange

Securities registered pursuant to section 12(g) of the Act:

______
(Title of class)

______
(Title of class)

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. [ ] Yes [X] No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. [ ] Yes [X] No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. [X] Yes [ ] No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. [X]

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer" and "large accelerated filer" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer [ ]   Accelerated filer [ ]   Non-accelerated filer [X]

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). [ ] Yes [X] No

As of June 30, 2006, the aggregate market value of the Registrant's Common Stock held by non-affiliates (based upon the closing price of the Common Stock on that date on the American Stock Exchange) was approximately $71,300,000.

On February 9, 2007, 6,024,739 shares of the Registrant's $1.50 par value common stock were outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the registrant's Proxy Statement for the May 8, 2007 Annual Meeting of Shareholders are incorporated by reference in Part III hereof.

PART I

Item 1. Business

General

Florida Public Utilities Company (FPU) was incorporated on March 6, 1924 and reincorporated on April 29, 1925 under the 1925 Florida Corporation Law. We provide natural gas, electricity and propane gas to residential, commercial and industrial customers in Florida. We do not produce energy and are not a generating utility. Our regulated segments sell natural gas and electricity to approximately 82,000 customers, and our unregulated segment sells propane gas through a wholly owned subsidiary, Flo-Gas Corporation, to approximately 13,000 customers. We also sell merchandise and other service related products on a limited basis as a complement to the natural and propane gas segments.

Our three primary business segments are aligned with our products and are natural gas, electric and propane gas. The Florida Public Service Commission (FPSC) regulates the natural gas and electric segments. We operate through five divisions based on geographic areas:

(1) South Florida Division - provides natural and propane gas to customers in West Palm Beach, Palm Beach Gardens, North Palm Beach, Jupiter, Riviera Beach, Palm Beach, Lake Worth, Royal Palm Beach, Wellington, Boynton Beach, Delray Beach, Boca Raton, Lauderdale Lakes, Deerfield Beach, Stuart, Palm City and other areas near these cities.
(2) Central Florida Division - provides natural and propane gas to customers in Sanford, Deland, Deltona, DeBary, Orange City, Lake Mary, Winter Springs, New Smyrna Beach, Edgewater, Longwood, Port Orange and other areas near these cities.
(3) Northwest Florida Division - provides electricity to customers in Marianna, Bristol, Altha, Cottondale, Malone, Alford and other areas near these cities.
(4) Northeast Florida Division - provides electricity and propane gas to customers in Fernandina Beach, Jacksonville, Callahan, Yulee and other areas near these cities.
(5) West Florida Division - provides propane gas to customers in Dunnellon, Inglis, Crystal River, Inverness, Brooksville and other areas near these cities.

Business Environment

Natural and propane gas are some of the most popular forms of energy today. Gas is used for heating, cooling, cooking, backup generation and decorative lighting by businesses and homeowners and in many other ways by various industries. Natural gas is also used in combination with other fuels to improve environmental performance and decrease pollution in the generation of electricity.

Natural and propane gas have seen increased demand in Florida as a result of the recent hurricanes and the popularity of generators. Generators themselves do not impact usage significantly for a region; however, gas appliances have been added as a result of generator popularity, and that does increase gas usage. Prices of natural and propane gas

have decreased during 2006 due in part to the absence of a hurricane affecting the Gulf of Mexico.

As a result of historically high natural gas costs in 2005, alternatives such as coal and nuclear power for generation of electricity have seen increased interest. Our sales in the electric segment have not been impacted by higher electricity costs due to our long-term favorable fixed price contracts for purchasing electricity. However, our long-term contract ended at the end of 2006 for our Northeast division and our long-term contract will end at the end of 2007 for our Northwest division. We now have new contracts in place with pricing much closer to current market price. Our electric prices are expected to significantly increase. Although this will not directly impact our income from operations because increased fuel costs are passed through to the customer, this may impact the number of units sold and decrease income from operations as a result of less usage.

Because of the hurricanes in 2004 and 2005, the electric industry in Florida has seen increased interest in improving reliability of electric services during and after hurricanes. Regulators have been researching the issue and have introduced new storm preparedness requirements to improve electric reliability with storm preparedness rules regarding pole inspections, strengthened design specifications for wind loading, vegetation management practices and installation of underground facilities for electric distribution and transmission systems. We are seeking rate relief and implementation for these new requirements in 2007.

Business Segments
We are organized in three operating and reporting segments: natural gas, electric and propane gas. We are also involved in limited merchandise sales and other services within our natural gas and propane gas areas to complement these segments. For information concerning revenues, operating income and identifiable assets of each of our segments, see Note 13 in Notes to Consolidated Financial Statements.

Natural Gas
Natural gas is primarily composed of methane, which is a colorless, odorless fuel that burns cleaner than many other traditional fossil fuels. Odorant is added to enable easy detection of a gas leak.

We provide natural gas to customers in our South and Central Florida divisions. The vast majority of the natural gas we distribute is purchased in the Gulf Coast region, both onshore and offshore.

We use Florida Gas Transmission (FGT) as our natural gas pipeline in peninsular Florida. FGT is under the jurisdiction of the Federal Energy Regulatory Commission (FERC). We use gas marketers and producers to procure all gas supplies for our markets. We use Florida City Gas and Indiantown Gas Company to provide wholesale gas transportation services in areas distant from our interconnections with FGT. We pass all fuel costs on to our customers. We also transport natural gas for customers who purchase their own gas supplies and arrange for pipeline transportation. Our operating results are not adversely affected if our customers purchase gas from third parties because we do not profit on the fuel portion of sales.

Our natural gas revenues are affected by the rates charged to customers, supply costs for natural gas purchased for resale, economic conditions in our service areas and weather.

Although the FPSC permits us to pass through to customers the increase in price for our gas supply, higher rates may cause customers to purchase less natural gas.

Our current portfolio of natural gas customers is reasonably diverse, with the largest customer using natural gas for the generation of electricity. We are not dependent on any single natural gas customer for over ten percent of our total natural gas revenues.

The FPSC approved joint transportation and territorial agreements with Indiantown Gas Company in October 2006. We plan to transport natural gas through Indiantown's system to new developments. In the early phase, Indiantown Gas Company will provide operational and customer service related work. We also began construction in the Indiantown area to install natural gas mains in the first phase of a development for approximately 100 homes. Two more new developments are slated to break ground in 2007 for construction of approximately 1,000 homes.

Electric

We provide electricity to our customers in our Northwest and Northeast Florida divisions. Wholesale electricity is purchased from two suppliers; Gulf Power Company and JEA (formerly Jacksonville Electric Authority). In 1996, we executed ten-year fixed-price purchased power contracts with both suppliers. Gulf Power Company provides electric power to the Northwest division and JEA provides electric power to the Northeast division. These long-term contracts provided our customers with the lowest consumer electric rates in Florida.

During 2006 we completed negotiations and executed final contracts for the supply of electricity in our Northeast division from JEA beginning January 1, 2007 and our Northwest division from Gulf Power Company beginning in January 1, 2008. We are seeking approval of the contract with Gulf Power Company from the FPSC in 2007. We expect that rates charged to our customers will significantly increase when the new contracts become effective in 2007 and 2008 because the prices are closer to market price. We are unable to estimate what impact higher rates could have on electric consumption, but electricity usage could decrease.

The Northwest and Northeast divisions experience a variety of weather patterns. Hot summers and cold winters produce year-round electric sales that normally do not have highly seasonal fluctuations. None of the electric segment's customers represent more than ten percent of our total electric revenues.

The electric utility industry has not been deregulated in the state of Florida. All customers within a given service or franchise area purchase from a single electricity provider in that area.

Propane Gas

We provide propane gas to customers in our Northeast, West, Central and South Florida divisions and can purchase our propane gas supply from several different wholesale companies. Propane gas is delivered to Florida by barges and railcars to terminals in Tampa and Ft. Lauderdale, and through the Dixie Pipeline terminus at Alma and Albany, Georgia. Propane gas is also delivered by transport to our facilities and directly to a customer's premise. We believe that the propane gas supply infrastructure is adequate to meet the needs of the industry in Florida for the foreseeable future.

Propane gas is not as affected by environmental regulations as other petroleum products. However, propane gas is a hazardous material and as such is subject to strict code enforcement and safety requirements.

As with natural gas, the sales volume of propane gas is affected by the season and the weather. Typically, Florida has a tourist season that coincides with the winter months. The propane gas segment's sales volumes and revenues are closely balanced between residential and commercial customers. We employ two strategies to become less weather dependent, concentrating on the forklift propane gas cylinder exchange market and marketing propane gas appliances not used for heating air. We believe that water heaters and forklift cylinder exchange accounts are good ways to become less weather reliant. None of the propane gas segment's customers represent more than ten percent of our total propane gas sales volume or revenues.

Strategy
Our strategy is to leverage our expertise in the natural gas, electric and propane gas distribution business to assist us in consistently meeting our customer's expectations. Our core focus is to build mutually beneficial relationships with builders, developers and customers with high-energy usage requirements. Included in our strategy is a plan to enhance our future success by expanding our service territory into new areas with high growth potential.

Competition
We do not face substantial competition in our electric divisions. This is because no other competitor can currently provide the same energy in our areas due to FPSC regulations and territorial agreements between utilities. In addition, natural gas as an alternative fuel is only available in a small area served by our electric divisions. Although our natural gas segment operates with the same types of guidelines, there is competition in our natural gas segment from electric utilities. Normally each home will have electricity as a base fuel and natural gas as an alternative source of energy used for cooking and heating. Electricity competes with natural gas, in large part based on the cost of fuel. Our propane gas segment is unregulated and faces competition from other suppliers of propane gas as well as alternative energy source suppliers. Competition in the propane gas segment is primarily based on price and service.

Rates and Regulation
The natural gas and electric segments are highly regulated by the FPSC. The FPSC has the authority to regulate our rates, conditions of service, issuance of securities and certain other matters affecting our natural gas and electric operations. As a result, FPSC regulation has a significant effect on our results of operations. The FPSC approves rates that are intended to permit a specified rate of return on investment. Our rate tariffs allow the cost of natural gas and electricity to be passed through to customers. Increases in the operating expenses of the regulated segments may require us to request increases in the rates charged to our customers. The FPSC has granted us the flexibility of automatically passing on increased expenses for certain fuel costs to customers. Other operational expenses, such as pension and medical expenses require us to petition the FPSC for rate increases. The FPSC is likely to grant rate increases to offset increased expenditures necessary for business operations. We successfully petitioned for an electric rate increase, which became effective on March 17, 2004, and for a natural gas rate increase that went into effect on November 18, 2004. We are currently seeking electric

rate relief in 2007 for the recent storm preparedness requirements implemented to improve reliability of electric utility systems.

We are subject to federal and state regulation with respect to soil, groundwater, employee health and safety matters and to environmental regulations issued by the Florida Department of Environmental Protection (FDEP), the United States Environmental Protection Agency (EPA) and other federal and state agencies.

Prior to the widespread availability of natural gas, we manufactured gas for sale to our customers or purchased utility assets from other companies that manufactured gas. The process for manufacturing gas produced by-products and residuals such as coal tar. The remnants of these residuals are sometimes found at former gas manufacturing sites. These sites face environmental regulation from various agencies including the FDEP and EPA on necessary cleanup and restoration.

Franchises
We hold franchises in each of the incorporated municipalities that require franchise agreements in order to provide natural gas and electricity. Generally, these franchises have terms ranging from 10 to 30 years and terminate on varying dates. We are currently in negotiations with certain municipalities for new service areas within our current operating divisions, and renewals of existing franchises. We continue to provide services to these municipalities and do not anticipate any interruption in our service.

Employees
As of January 18, 2007, we had 362 employees, of which 9 were part-time and 2 were temporary. Of these employees, 175 were covered under union contracts with two labor unions, the Internal Brotherhood of Electric Workers and the International Chemical Workers Union. We believe that our labor relations with employees are good.

Available Information
We file periodic reports including our Form 10-Qs, Form 10-Ks, and Form 8-Ks with the Securities and Exchange Commission (SEC). The most recent copies of Form 10-Qs and Form 10-Ks as well as a copy of our Code of Ethics Policy can be obtained through our website (http://www.fpuc.com).

Item 1A. Risk Factors

A substantial portion of our revenues and, to a large extent, our profitability, depends upon rates determined by the FPSC.

FPSC regulates many aspects of our natural gas and electric operating segments, including the retail rates that we may charge customers for natural gas and electric service. Our retail rates are set by the FPSC using a cost-of-service approach that takes into account our historical operating expenses, our fixed obligations and recovery of our capital investments, including potentially stranded obligations. Using this approach, the FPSC sets rates at a level calculated to recover such costs, adjusted to reflect known and measurable changes, and a permitted return on investment. Any rate adjustments to recover increased costs or to otherwise improve our profitability must be obtained through a petition filed with the FPSC, which is referred to as a rate case. The rates permitted by the FPSC in rate cases will determine a substantial portion of our revenues for succeeding periods and may have a material impact on our consolidated earnings, cash flows and

financial position, as well as our ability to maintain our common stock dividend at current levels or to increase our dividend in the future.

Some of our natural gas and electric service costs may not be fully recovered through retail rates.

Our natural gas and electric service retail rates, once established by the FPSC, remain fixed until changed in a subsequent rate case. We may at any time elect to file a rate case to request a change in our rates or intervening parties may request that the FPSC review our rates for possible adjustment, subject to any limitations that may have been ordered by the FPSC. Earnings could be reduced to the extent that our operating costs increase more than our revenues during the period between rate cases, which may occur because of maintenance and repair of plants, fuel and purchased power expenses, employee or labor costs, inflation or other factors. In addition, even if we decide to file rate cases, our requests for rate adjustments in such rate cases may be rejected. Other parties to a rate case or the FPSC staff may contend that our current rates, or rates proposed in a rate case, are excessive and our petition for rate adjustments may be denied on that or another basis.

Our segments are sensitive to variations in weather.

Our segments are affected by variations in general weather conditions and unusually severe weather. We forecast energy sales on the basis of normal weather, which represents a long-term historical average. Significant variations from normal weather could have a material impact on energy sales. Unusual weather, such as hurricanes, could also adversely affect operating costs and sales.

Our natural gas and propane gas customers use gas primarily for heating purposes. As a result, our natural gas and propane gas sales peak in the winter and are more weather sensitive than electricity sales, which peak in both summer and winter periods. Mild winter weather in Florida can be expected to negatively impact results from our natural gas and propane gas operations. Severe weather conditions could also interrupt or slow down service and increase the operating costs of all our segments.

We operate in an increasingly competitive industry, which may affect our future earnings.

Natural Gas
The natural gas distribution industry has been subject to competitive forces for several years. We receive our supply of natural gas at thirteen city gate stations connected to an interstate pipeline system owned by FGT and one gate station connected to an intrastate pipeline owned by Florida City Gas Company. Gulfstream Natural Gas System currently also serves peninsular Florida with interstate natural gas transmission service; however we cannot predict if this system will be extended to areas near our existing facilities and how it could affect our natural gas operations.

Electric
The U.S. electric power industry has been undergoing restructuring. There is competition in wholesale power sales on a national level. Some states have mandated or encouraged competition at the retail level. While there is active wholesale competition in Florida, the retail electric business has remained substantially free from direct competition. Changes

in the competitive environment occasioned by legislation, regulation, market conditions or initiatives of other electric power providers, particularly with respect to retail competition, could adversely affect our financial condition and results of operations. To the extent competitive pressures increase and the pricing and sale of electricity assumes more of the characteristics of a commodity business, the economics of our electric operating segment may come under increasing pressure. In addition, regulatory changes may increase access to electricity transmission grids by utility and non-utility purchasers and sellers of electricity, thus potentially resulting in a significant number of additional competitors.

Propane Gas
Our propane gas business is our only non-regulated business segment. Because the propane gas business is not regulated, we face significant competition in this segment. Our propane gas business competes directly with other distributors of propane gas, and other sources of energy including natural gas and electric. We may encounter increased competition in the propane gas business in the future. Our inability to compete effectively in the propane gas business, whether on the basis of price, customer service, alternative energy sources or otherwise, could have a material adverse effect on our financial condition and results of operations.

Our business could be adversely affected if our supply of natural gas is interrupted.

FGT's pipeline system transports all of our natural gas. FGT is owned by Citrus Corporation, which is jointly owned by Cross Country Energy Corporation and El Paso Corporation. Our ability to receive our normal supply of natural gas could be adversely affected by an interruption in FGT's service.

General economic conditions may adversely affect our segments.

Our segments are affected by general economic conditions. The consumption of the energy we supply is directly tied to the economy. A downturn in the economy in our local areas of operations, as well as on the state, national and international levels, could adversely affect the performance of our segments. Changes in political climate, including terrorist activities, could further negatively impact our performance. If tourism is down, then the demand for the energy we supply is reduced.

Commodity price changes may affect the operating costs and competitive position of our segments.

Our segments are sensitive to changes in coal, gas, oil and other commodity prices. If we are unable to increase the rates we charge to customers to reflect increases in these commodity prices, our margins and earnings will be lowered. If increased prices for any of these commodities persist for substantial periods, our competitive position could be adversely affected by customers who switch to cheaper energy sources. Further, natural gas prices have been increasingly volatile and, accordingly, the earnings from our natural gas operations are increasingly difficult to predict.

We could incur material expenses as a result of our obligations to comply with existing and new environmental laws and regulations.

We are subject to environmental regulations in connection with the ongoing conduct of our business and to civil and criminal liability for failure to comply with these regulations. In addition, new environmental laws and regulations, or new interpretations of existing laws and regulations, affecting our operations or facilities may be adopted which may cause us to incur additional material expenses.

We are subject to federal and state legislation with respect to soil, groundwater, employee health and safety matters and to environmental regulations issued by the Florida Department of Environmental Protection (FDEP), the EPA and other federal and state agencies. We may incur material future expenditures in order to comply with these existing environmental laws and regulations.

We rely on a limited number of natural gas and electric suppliers, the loss of which could materially adversely affect our financial condition and results of operations.

Two pipeline suppliers under several contracts having expiration dates from 2007 to 2023 transport our natural gas to us. These contracts have provisions, which allow us to extend the terms ranging from 2020 to 2032. Our electric services are provided by two suppliers under contracts, which expire in 2007 and 2017. We have renegotiated a new contract for the one that is set to expire in 2007 with the same supplier for electric service beginning in 2008 which we are currently awaiting approval for from the FPSC. If we were to lose any of these contracts, we might not be able to replace the corresponding energy source on acceptable terms, if at all. In addition, in the event of the expiration of the contracts, we might not be able to renew them on favorable terms, if at all. As a result, the loss of any of these suppliers, the terminations of any of these supply contracts or the non-renewal of any of these supply contracts before or upon their expiration could have material adverse effects on our financial condition and results of operations.

New supply contracts could result in substantial increases to our prices, and could materially adversely affect our financial condition and results of operations.

Two pipeline suppliers under firm contracts having expiration dates from 2007 to 2023 transport our natural gas to us. All of these contracts have provisions which allow us to extend the terms ranging from 2020 to 2032. Our electric services are provided by two suppliers under contracts, which expire in 2007 and 2017.

The recent renewal of the electricity supply contract that was terminated in 2006 and the one that will expire in 2007 will result in the cost of electricity more than doubling over existing prices. Extensions or renewals of our natural gas contracts could result in the cost of natural gas increasing. Although these increases are currently passed through to our customers, these could have a significant impact on our financial condition and results of operations due to decreased consumption or if costs cannot be passed through in the future.

Fluctuation in prices under long-term purchase and transportation commitments may have an adverse effect on our financial condition and results of operations.

To ensure a reliable supply of electricity and natural gas at competitive prices, we have entered into purchase and transportation contracts with various suppliers and producers, which expire at various dates through 2023. Purchase prices under these contracts are determined by formulas either based on market prices or at fixed prices.

As of December 31, 2006, we have firm purchase and transportation commitments adequate to supply our expected sales requirements for electricity with contracts that will expire in 2017. Our contract in the Northeast division of the electric segment began January 1, 2007 and expires on December 31, 2017. We have a contract with a supplier for the Northwest division beginning January 1, 2008 and expiring December 31, 2017. We are currently seeking approval with the FPSC for the Northwest division contract. If the FPSC does not approve this contract, we may need to seek an alternative supplier or new contract with this same supplier for the purchase of electricity in the Northwest division.

Our natural gas pipeline transportation contracts expire in parts in 2010, 2015 and 2023. We are committed to pay demand or similar fixed charges monthly through 2023 related to the natural gas pipeline transportation agreements. Significant fluctuation in prices under these long-term purchase and transportation commitments may have a material adverse effect on our financial condition and results of operations.

Problems with operations could materially adversely impact us.

We are subject to various operational risks, including accidents, outages, equipment breakdowns or failures, or operations below expected levels of performance or efficiency. Problems such as the breakdown or failure of transmission lines, pipelines or other equipment or processes and interruptions in service which would result in performance below affected levels of output or efficiency, particularly if extending for prolonged periods of time, would have a material adverse effect on our financial condition and results of operations.

We are vulnerable to interest rate changes and may not have access to capital at favorable rates, if at all.

Changes in interest rates can affect our cost of borrowing on our line of credit, on refinancing of debt maturities and on incremental borrowing to fund new investments. Because our stock is not widely held and has a low trading volume, we may not be able to access the equity market or may be limited in the amount of equity financing. If we are unable to obtain equity or debt financing on terms satisfactory to us, our ability to fund capital expenditures and other commitments will be impaired. Moreover, even if available, the cost of such financing could reduce our margins and materially adversely affect our results of operations.

Failure to effectively and efficiently manage our growth, as well as changes in our business strategies, could have a negative impact on our performance.

An essential part of our business strategy is to grow our businesses. Much of our growth depends on our ability to find attractive development opportunities and to obtain the necessary financing for them. Our outlook is based on our expectation that we will be successful in finding and capitalizing on development opportunities, but our efforts may not be successful. Our failure to effectively and efficiently manage our growth, as well as changes in our business strategies, may have a material adverse effect on our financial

condition and results of operations. If we grow our business with acquisitions there is a risk the acquisition will not have a positive effect on our financial condition.

Our ability to pay dividends on our common stock is limited.

We cannot guaranty that we will continue to pay dividends at our current annual dividend rate or at all. In particular, our ability to pay dividends in the future will depend upon, among other things, our future earnings, our cash requirements and our debt covenants.

Provisions in our certificate of reincorporation, certain agreements, and the Florida Business Corporation Act may inhibit a takeover, which could adversely affect the value of our common stock.

Our certificate of reincorporation as well as provisions of the Florida Business Corporation Act (FBCA), contain provisions that could delay or prevent a change of control in our management that shareholders might consider favorable and may prevent them from receiving a takeover premium for their shares.

Our certificate of reincorporation contains provisions that make it more difficult to obtain control of our company through transactions, which have not received the approval of our board of directors. These provisions include supermajority voting requirements for certain transactions with affiliated persons, staggering the terms of the members of our board of directors, and certain procedural requirements relating to shareholder meetings and amendments to our certificate of reincorporation or bylaws.

In addition, Florida has enacted legislation that may deter or frustrate takeovers of Florida corporations. Subject to certain exceptions, the "Control Share Acquisitions" section of the FBCA generally provides that shares acquired in excess of certain specified thresholds, beginning at 20% of a corporation's outstanding voting shares, will not possess any voting rights unless such voting rights are approved by a majority vote of the corporation's disinterested shareholders.

The "Affiliated Transactions" section of the FBCA generally requires majority approval by disinterested directors or supermajority approval by disinterested shareholders of certain specified transactions (such as mergers, consolidations, sales of assets, issuance or transfer of shares or reclassifications of securities) between a corporation and a holder of more than 10% of the outstanding shares of the corporation, or any affiliate of such shareholder.

Finally, we have agreements with three of our executive officers that provide for significant payments to those executives upon a change in control under certain circumstances. The existence of these contracts may make an acquisition of our company less attractive to a possible buyer.

Conflict or turmoil in oil producing countries could impact future prices for commodities including natural gas, propane gas and electricity, and increases in these prices could materially affect our financial condition and results of operations.

Worldwide turmoil could cause the cost of crude oil and its associated products to rise on

concerns of the conflicts interfering with the production of crude oil. If these conflicts are large, escalate or spread, the impact to the cost of all fuel related commodities could increase substantially. These increases could materially adversely affect our financial condition and results of operations.

Item 1B. Unresolved Staff Comments

None

Item 2. Properties

We have natural gas, electric and propane gas utility related properties. These properties include transmission, distribution, storage and general facilities at various locations in our service areas. We do not have generating facilities. We maintain property that is adequate for our current operations and we expand our existing facilities as required by growth or other operational needs.

We own natural gas mains that distribute gas through 1,558 miles of pipe located in Central and South Florida. Additionally, we have adequate gate stations in each distribution system.

In the electric segment, we own 22 miles of electric transmission lines located in Northeast Florida and 1,082 miles of electric distribution lines located in Northeast and Northwest Florida. The distribution lines are installed both under and above ground with many of the coastal locations having under ground facilities. All transmission lines are installed above ground. Additionally, we own various substations and regulator stations that are used in our operations.

Our propane gas segment has bulk storage facilities and tank installations on the customers' premises. We also have 16 community gas systems that distribute propane gas to customers in a specific area. These systems are subject to the Federal Department of Transportation Office of Pipeline Safety Regulations.

We own office and warehouse facilities in Northwest, Northeast, Central, West and South Florida, which are used for our operations and materials storage by the natural gas, electric, and propane gas segments. We also have various easements and other assets located throughout our service areas that are utilized by all of our operations.

We also own a three-story building in West Palm Beach, where our corporate headquarters is located.

All of our property is subject to a lien collateralizing our funded indebtedness under our Mortgage Indenture as discussed in Note 1-I in Notes to Consolidated Financial Statements.

Item 3. Legal Proceedings

In our operations, we currently use or have used several contamination sites that have pending or threatened environmental litigation. We are in the process of investigating and assessing this litigation. We intend to vigorously defend our rights in this litigation. We have insurance and rate relief to cover losses or expenses incurred as a result of this

litigation. We believe all future contamination assessment and remedial costs, legal fees and other related expenses would not exceed the combined sum of any insurance proceeds received and any rate relief granted.

West Palm Beach Site
We are currently evaluating remedial options to respond to environmental impacts to soil and groundwater at and in the immediate vicinity of a parcel of property we own in West Palm Beach, Florida. We previously operated a gasification plant at this site. We entered into a Consent Order with the FDEP effective April 8, 1991. This requires us to delineate the extent of soil and groundwater impacts associated with the prior operation of the gasification plant and to remediate such soil and groundwater impacts, if necessary. We have submitted numerous reports to FDEP describing the results of soil and groundwater sampling conducted at the site. We completed the delineation of soil and groundwater impacts at the site in October 2006. An engineering consultant performed a feasibility study to evaluate appropriate remedies for the site. The feasibility study was transmitted to FDEP on November 30, 2006.

The feasibility study evaluated a wide range of remedial alternatives based on criteria provided by applicable laws and regulations. The total costs for the remedies evaluated in the feasibility study ranged from a low of $2.8 million to a high of $54.6 million. Based on the likely acceptability of proven remedial technologies described in the feasibility study and implemented at similar sites, consulting/remediation costs to address the impacts now characterized at the West Palm Beach site are projected to range from $4.6 million to $17.9 million. This range of costs covers such remedies as in situ solidification for deeper soil impacts, excavation of superficial soil impacts, installation of a barrier wall with a permeable biotreatment zone (PBZ), monitored natural attenuation of dissolved impacts in groundwater (MNA) or some combination of these remedies. The feasibility study proposed a remedy of superficial soil excavation, and installation of a hanging barrier wall with PBZ and MNA, the cost of which is projected to range from $4.6 million to $9.9 million.

Prior to FDEP's approval of a final remedy for the site, we are unable to determine, to a reasonable degree of certainty, the complete extent or cost of remedial action that may be required. As of December 31, 2006, and subject to the limitations described above, remediation costs (including attorneys' fees and costs) for this site are projected to range from approximately $4.8 million to $18 million.

Sanford Site
We own a parcel of property located in Sanford, Florida, upon which a gasification plant was operated prior to our acquisition of the property. Following discovery of soil and groundwater impacts on the property, we have participated with four former owners and operators of the gasification plant in the funding of numerous investigations of the extent of the impacts and the identification of an appropriate remedy. On or about March 25, 1998, we executed an Administrative Order on Consent (AOC) with the four former owners and operators (Group) and the United States Environmental Protection Agency (EPA) that obligated the Group to implement a Remedial Investigation/Feasibility Study (RI/FS) and to pay EPA's past and future oversight costs. The Group also entered into a Participation Agreement and an Escrow Agreement on or about April 13, 1998 (WFS Participation Agreement). Work under the RI/FS AOC and RI/FS Participation Agreement is now complete and we have no further obligations under either document.

In late September 2006, EPA sent us a Special Notice Letter, notifying us of EPA's selection of a final remedy for OU1 (soils), OU2 (groundwater), and OU3 (sediments), and giving the other Group members and us sixty (60) days within which to submit a "good faith offer" to EPA to provide for implementation of the selected remedies. The Special Notice Letter included an Amended Record of Decision (ROD) for OU1 (the ROD for OU1 was amended to account for a significant increase in the volume of off-site soil impacts and a change in the selected remedy), the original ROD for OU2, and a ROD for OU3. The total estimated remediation costs for the Sanford Gasification Plant Site are now projected to be $12.5 million. On November 30, 2006, we, along with the Group, submitted to EPA a good faith offer to implement the approved remedies as set forth in the RODs for OU1 through OU3.

In January, we, along with the other members of the Group signed a Third Participation Agreement, which provides for funding the remediation work specified in the RODs for OU1 through OU3 and supercedes and replaces the Second Participation Agreement. Our share of remediation costs under the Third Participation Agreement is set at 5% of a maximum of $13 million or $650,000. At present, it is not anticipated that the total cost of remediation will exceed $13 million. If it does, the Group members have agreed to negotiate in good faith to allocate the excess costs at such time that it reasonably appears that the total remediation costs will exceed $13 million. In any such event, we do not expect our share of such additional costs to be greater than 5% and our share of such additional costs may be less than 5%.

Our future legal costs and expenses and our share future remediation expenses for this site are currently projected to be approximately $710,000.

Deleted: 710,000

Pensacola Site
We are the prior owner/operator of the former Pensacola gasification plant, located in Pensacola, Florida. Following notification on October 5, 1990 that FDEP had determined that we were one of several responsible parties for any environmental impacts associated with the former gasification plant site, we entered into cost sharing agreements with three other responsible parties providing for the funding of certain contamination assessment activities at the site.

Following field investigations performed on behalf of the responsible parties, on July 16, 1997, FDEP approved a final remedy for the site that provides for annual sampling of selected monitoring wells. Such annual sampling has been undertaken at the site since 1998. Our share of these costs is less than $2,000 annually or a total cost of $27,000.

In March 1999, EPA requested site access in order to undertake an Expanded Site Inspection (ESI). The ESI was completed by EPA's contractor in 1999 and an ESI Report was transmitted to us in January 2000. The ESI Report recommends additional work at the site. The responsible parties met with FDEP on February 7, 2000 to discuss EPA's plans for the site. In February 2000, EPA indicated preliminarily that it will defer management of the site to FDEP; however, as of December 31, 2006, we have not received any written confirmation from EPA or FDEP regarding this matter. Prior to receipt of EPA's written determination regarding site management, we are unable to determine whether additional fieldwork or site remediation will be required by EPA and, if so, the scope or costs of such work.

Key West Site

From 1927-1938, we owned and operated a gasification plant in Key West, Florida. The plant discontinued operations in the late 1940s; the property on which the plant was located is currently used for a propane gas distribution business. In March 1993, a Preliminary Contamination Assessment Report (PCAR) was prepared by a consultant jointly retained by the current site owner and us and was delivered to FDEP. The PCAR reported that very limited soil and groundwater impacts were present at the site. By letter dated December 20, 1993, FDEP notified us that the site did not warrant further "CERCLA consideration and a Site Evaluation Accomplished disposition is recommended." FDEP then referred the matter to its Marathon office for consideration of whether additional work would be required by FDEP's district office under Florida law. As of December 31, 2006, we have received no further communication from FDEP with respect to the site. At this time, we are unable to determine whether additional fieldwork will be required by FDEP and, if so, the scope or costs of such work. In 1999, we received an estimate from our consultant that additional costs to assess and remediate the reported impacts would be approximately $166,000. Assuming the current owner shared in such costs according to the allocation agreed upon by the parties for the PCAR, our share would be approximately $83,000.

Item 4. Submission of Matters to a Vote of Security Holders

None

Executive Officers of the Registrant

The following sets forth certain information about the executive officers of the Company as of February 17, 2007.

Name	Age	Position	Date
John T. English	63	Chairman of the Board	2006 - Present
		Chief Executive Officer	1998 - Present
		President	1997 - Present
		Chief Operating Officer	1997 - 2000
Charles L. Stein	57	Senior Vice President	1997 - Present
		Chief Operating Officer	2001 - Present
George M. Bachman	47	Corporate Secretary	2004 - Present
		Chief Financial Officer	2001 - Present
		Treasurer	2001 - Present

Deleted: -

Mr. English was Senior Vice President from 1993 preceding his appointment as President and Chief Operating Officer.

Mr. Stein was Vice President from 1993 preceding his appointment as Senior Vice President.

Mr. Bachman was Controller from 1996 preceding his appointment as Chief Financial Officer and Treasurer.

Each of these executive officers has an employment agreement for a three-year term, which can be renewed at the Board Meeting preceding the expiration of the agreement subject to his earlier resignation or removal. There are no family relationships among any of the executive officers and directors of the Company.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Quarterly Stock Prices and Dividends Paid

Our common shares are traded on the American Stock Exchange under the symbol FPU. The quarterly dividends declared and the reported last sale price range per share of our common stock for the most recent two years were as follows:

	2006			2005		
	Stock Prices		Dividends	Stock Prices *		Dividends
Quarter ended	Low	High	Declared	Low	High	Declared*
March 31	$13.25	$14.50	$0.1033	$11.47	$13.49	$0.1000
June 30	11.86	14.40	0.1075	11.45	12.67	0.1033
September 30	12.61	14.42	0.1075	12.67	16.84	0.1033
December 31	13.10	14.05	0.1075	13.46	16.44	0.1033

* On July 25, 2005 we issued a three for two stock split in the form of a stock dividend to our shareholders of record on July 15, 2005. All common share information has been restated to reflect the stock split.

As of February 16, 2007, there were approximately 3,900 holders of record of our common shares.

We intend to continue to pay quarterly cash dividends for the foreseeable future. Our dividend policy is reviewed on an ongoing basis by our Board of Directors and is dependent upon future earnings, cash flow, financial condition, capital requirements and other factors. Our Fifteenth Supplemental Indenture of Mortgage and Deed of Trust restricts the amount that is available for cash dividends. At December 31, 2006, approximately $9 million of retained earnings were free of such restriction and therefore available for the payment of dividends.

Securities Authorized for Issuance under Equity Compensation Plans

Equity Compensation Plan Information

Plan Category	Number of Securities remaining available for future issuance under equity compensation plans
Equity compensation plans approved by security holders	72,749*
Equity compensation plans not approved by security holders	-
Total	72,749

* This includes 20,714 shares for the Non-Employee Director Compensation Plan. This plan was adopted by the Board of Directors on March 18, 2005 and was approved at the 2005 meeting of shareholders. This also includes 52,035 shares for the Employee Stock Purchase Plan.

PERFORMANCE GRAPH

The following graph compares the yearly percentage change and the cumulative total of shareholder return on the Company's common stock with the cumulative return on the Russell 2000 Index (Russell 2000) and Standard & Poor's Utilities Index (S&P Utilities) for the last five calendar years. These comparisons assume the investment of $100 in the Company's common stock and each of the indices on January 1, 2001 and the reinvestment of dividends. The stock price performance shown in the graph below should not be considered indicative of

COMPARISON OF 5 YEAR CUMULATIVE TOTAL RETURN*
Among Florida Public Utilities Company, The Russell 2000 Index
And The S & P Utilities Index

Note to the Selected Financial Data:

(1) On December 3, 2002, FPU entered into an agreement to sell the assets of its water utility system to the City of Fernandina Beach. The transaction closed on March 27, 2003. Revenues, Gross profit and Utility plant-net do not include discontinued operations.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operation

RESULTS OF OPERATIONS

General

Effects of seasonal weather conditions, the timing of rate increases, fluctuations in demand due to the cost of fuel passed on to customers and the migration of winter residents and tourists to Florida during the winter season all have an impact on income.

Revenues and Gross Profit Summary

Revenues include cost recovery revenues. The FPSC allows cost recovery revenues to directly recover costs of fuel, conservation and revenue-based taxes in our natural gas and electric segments. Revenues collected for these expenses have no effect on results of operations and fluctuations could distort the relationship of revenues between periods. Gross profit is defined as gross operating revenues less fuel, conservation and revenue-based taxes that are passed directly through to customers. Because gross profit eliminates these cost recovery revenues, we believe it provides a more meaningful basis for evaluating utility revenues. The following summary compares gross profit between periods and units sold in One thousand Dekatherm (MDth) (gas) and Megawatt Hour (MWH) (electric).

Revenues and Gross Profit
(Dollars in thousands)

	Year Ended December 31,		
	2006	**2005**	**2004**
Natural Gas			
Revenues	$70,981	$69,094	$55,962
Cost of fuel and other pass through costs	43,909	42,815	34,232
Gross Profit	$27,072	$26,279	$21,730
Units sold: (MDth)	6,230	6,224	6,124
Electric			
Revenues	$48,527	$47,450	$42,910
Cost of fuel and other pass through costs	34,259	33,352	29,732
Gross Profit	$14,268	$14,098	$13,178
Units sold: (MWH)	849,124	814,353	766,349
Propane Gas			
Revenues	$14,727	$13,479	$11,167
Cost of fuel and other pass through costs	7,803	6,637	5,386
Gross Profit	$ 6,924	$6,842	$5,781
Units sold: (MDth)	621	640	614
Consolidated			
Revenues	$134,235	$130,023	$110,039
Cost of fuel and other pass through costs	85,971	82,804	69,350
Gross Profit	$ 48,264	$ 47,219	$ 40,689

Natural Gas

Natural gas revenues increased $1.9 million, or 3% in 2006 over 2005 primarily due to increased revenue collected for taxes passed directly through to customers. A change in legislature regarding the calculation of Gross Receipts tax became effective January 1, 2006, and along with an increase to overall revenues, increased these taxes paid by our

customers by approximately $500,000. Franchise fee revenues also increased by $500,000 due to increased rates and area expansion.

Natural gas gross profit increased by $793,000, or 3% in 2006 over 2005. We had higher revenue and gross profit in 2006 compared to 2005 primarily due to billed revenue not exceeding the FPSC allowable earnings as much as in the prior year. In 2006 we reduced billed revenues and gross profit by our estimate of over-earnings of $230,000 for the year. Our estimate for 2005 was recorded at $700,000 in 2005 and we reduced that estimate in 2006 by $50,000 to $650,000. The combined effect of this was to increase our revenues and gross profit over the prior year by approximately $500,000. Other factors contributing to the increase in revenues and gross profit were 2% customer growth and storm surcharge revenues, which became effective November 2005. The revenues and gross profit increases were slightly offset by the loss of approximately $100,000 of revenue from two customers who went off-line for several months to do maintenance work.

Natural gas revenues increased $13.1 million in 2005 over 2004 primarily due to an $8.6 million increase in the cost of fuel and other costs that were passed through to customers. The cost of natural gas increased significantly over prior years, partially as a result of hurricanes and their impact on supplies. Gross profit increased $4.5 million, or 21%, primarily as a result of rate relief effective in November 2004, normal customer growth and a 2% increase in units sold. Offsetting these increases was the estimated over-earnings for 2005 of $700,000, which reduced revenues and gross profit.

Electric

Electric revenues increased $1.1 million in 2006 over 2005. Cost of fuel and other costs that were passed through to customers contributed approximately $900,000 of the increase. Gross profit increased $170,000 or 1% in 2006 over 2005. The increase in gross profit was primarily due to a slight increase in customer growth and units sold.

Electric revenues increased $4.5 million in 2005 over 2004. Cost of fuel and other costs that were passed through to customers contributed $3.6 million of the increase. Gross profit increased $920,000 or 7% in 2005 over 2004. The increase in gross profit was primarily due to a 6% increase in units sold along with the rate increases granted in March 2004. A large distribution center was built in our Northwest division and increased revenues by approximately $700,000 and gross profit by approximately $91,000 in 2005 over 2004.

Propane Gas

Propane revenues increased $1.2 million, or 9% and gross profit increased $82,000 or 1% in 2006 compared to 2005. Revenues increased primarily due to rising fuel costs. Although customers increased by 5% in 2006, the usage per customer declined by 8% contributing to a decrease of 3% in units sold. Warmer weather was the primary reason for this decrease in usage per customer in 2006 compared to 2005. The increase in gross profit was minimal when compared to last year primarily due to pre-buy gains of $383,000 realized in 2005 but not in 2006.

Propane revenues increased $2.3 million and gross profit increased $1.1 million or 18% in 2005 compared to 2004. The Company realized gains of approximately $383,000 as a result of buying propane supplies before market price increases. The remaining increase

of 12% from the previous year resulted from propane unit sales increasing 4% due primarily to a 13% growth in residential bulk customers and units sold.

Operating Expenses

Operating expenses include operation, maintenance, depreciation, amortization and taxes other than income taxes, and exclude fuel costs, conservation and taxes based on revenues that are directly passed through to customers and recovered in revenues.

Operating Expenses
(Dollars in thousands)

	Year Ended December 31,		
	2006	2005	2004
Natural gas	$ 20,954	$ 20,230	$ 16,752
Electric	11,131	10,596	9,825
Propane gas	5,850	5,756	5,126
Total Operating Expenses	$ 37,935	$ 36,582	$ 31,703

Natural Gas

Natural gas operating expenses increased $724,000, or 4%, in 2006 as compared with 2005. Outside of the normal inflationary impacts on our expenses, customer account expenses increased by $237,000 as a result of our customer service focus initiated in 2005 based on our strategic plan. We continued the focus on this area and increased the number of employees in an effort to respond more effectively to customers. Bad debt provision increased $49,000 over the prior year primarily due to increasing revenues, aging accounts receivable on several major accounts, and the slowing housing economy. We increased our collection efforts in the fourth quarter of 2006 and will continue to do so in 2007.

In 2006 we had additional increases of $90,000 to sales expense resulting from initiatives to boost sales by increasing sales staff. Depreciation expense increased $137,000 principally due to construction of mains and new meters to distribute gas to a growing number of new developments in South Florida and increasing capacity requirements for existing customers.

Natural gas operating expenses increased $3.5 million or 21%, in 2005 as compared with 2004. Amortization expense increased $1 million. The bare steel replacement program and recovery of future environmental costs approved in our 2004 natural gas rate proceeding were the primary reasons for this increase. We are currently under a 50-year program to replace all bare steel mains and service lines with coated steel and polyethylene lines. We have received approval to recover the funds necessary to replace these mains and services over the 50-year period. Pursuant to an FPSC mandate, we accrue an amortization expense as an offset to the revenues received, and record a contribution, reducing the related construction expenditures. The FPSC also approved recovery of our expected environmental liability over a 20-year period.

Deleted: for
Deleted: /
Deleted: tion
Deleted: to

Customer account expense increased $373,000 in 2005 as compared to 2004 primarily due to increased payroll expenses for additional staffing and facility and equipment upgrades. There were also increased bad debt provisions as a result of the increases in accounts receivable due to general and fuel rate increases. The purchase of additional safety equipment, tools, hardware and office furniture contributed to a $942,000 increase in other operating expense. Other items affecting expenses included a research marketing study to provide us with data to better serve our customers and additional payroll

expenses relating to hurricane preparedness and wage increases. Maintenance expense increased by $208,000 primarily due to maintenance expenditures in Central Florida for cleaning and painting a distribution regulator and gate stations and the purchase of maintenance related safety equipment and tools.

Electric

Electric operating expenses increased $535,000, or 5%, in 2006 as compared with 2005. As a result of our efforts to inform and educate our electric customers about the expected 2007 and 2008 fuel rate increases in upcoming bills, sales expense increased by $120,000. Customer account expenses increased $106,000 in 2006 over the prior year mainly due to increased bad debt provisions due to higher sales and slower housing economy. Depreciation expense increased $202,000 largely due to major construction work done in the latter part of 2005 and the beginning of 2006. This included the rebuilding of a transmission sub-station, the rebuilding of an entire distribution sub-station with two transformers and the replacement of a failed sub-distribution station transformer. Additional significant work on transformers is expected in 2008.

Electric operating expenses increased $771,000, or 8%, in 2005 as compared with 2004. As we continued to focus on improving service reliability, we increased maintenance expense by $397,000 for additional tree trimming and the use of a temporary mobile substation while a new transformer was purchased and put into service. Depreciation expense increased $100,000 due to normal increases in plant assets. In 2005, other operating expenses increased $114,000 due to a shift from work on capital assets to operational needs along with personnel raises.

Propane Gas

Propane gas operating expenses increased $94,000, or 2%, in 2006 as compared with 2005. Depreciation expense increased $99,000 for the addition of plant assets including a propane gas delivery system that will increase the efficiency of our deliveries and improve our overall customer satisfaction. Aging accounts receivable, slowing housing economy and increasing revenues contributed to an increase in our bad debt expense over the prior year.

Propane gas operating expenses increased $630,000, or 12%, in 2005 as compared with 2004. As we continued to focus on increasing our propane gas business, other operating costs increased $467,000. We placed additional emphasis in the sales area, which resulted in signing up new housing developments that will utilize propane gas. We incurred increased expenditures for piping homes, delivering propane gas, implementing a new delivery system and increasing commission payments. This increased effort in our sales area contributed to an increase of 150 customers and 4% overall units sold in our propane gas segment.

Administrative Expenses

Administrative expenses increased $177,000, or 2%, in 2006 over 2005. These expenses generally are related to all of our operating segments. To continue to adequately support our internal and external customers, we increased staffing in our administrative areas. Payroll increases of $322,000 related to an increased number of employees, annual pay raises and normal inflationary impacts. In 2006, we discontinued eligibility to our defined benefit pension plan for new employees and replaced the defined benefit pension plan with a 401K-match plan for new employees. Although this change will take time to reduce pension expense, we did experience a reduction of $107,000 in our pension expenses in

2006. Medical costs increased $120,000 over the prior year and these costs are expected to continue to rise.

Regulatory storm surcharge expenses approved in our 2005 natural gas petition increased natural gas expenses by $180,000.

Administrative expenses increased $996,000, or 13%, in 2005 over 2004. Pension expense increased $274,000 due to our estimate that the return on the pension's assets will not keep pace with growing pension liabilities. Medical insurance premiums continue to rise, increasing $130,000 in 2005. Compliance costs related to Sarbanes-Oxley and internal control requirements, as well as audit fees, increased outside services expenses by $156,000. With the impact from our focus on hurricane preparations and the 2005 hurricanes, our safety expense increased by $235,000. A portion of this increase related to compensation for an additional safety employee and costs for a new safety incentive program.

Total Other Income and Deductions
Other income and deductions include revenues and expenses from sales and installation, service of merchandise, gains or losses on disposal of property, interest expense and other income and expenses. The largest components of this section are merchandise sales, services income and interest expenses. Our service activities include the installation of merchandise and other contract work. Interest expense consists of interest on bonds, short-term borrowings and customer deposits.

Merchandise and Services Revenue and Expenses
Although merchandise and services revenue decreased by approximately $268,000 in 2006, the overall profitability in this area increased by $325,000 compared to 2005. This was primarily a result of significant strategic changes made by management. These changes included revising the product markup structure, increasing installation fees and increasing employee training. We experienced a revenue decrease due to lower demand for merchandise as a result of a quiet hurricane season and the slow down of new construction projects in our areas due to the downturn in the housing market.

Merchandise and services revenues and expenses increased in 2005 from 2004 but profitability decreased $114,000. We experienced an increase in revenues and cost of sales primarily due to an increased demand for electric to gas conversions and installations of customer owned propane gas tanks to supply back-up generators. We had increased expenses from sub-contractors that were not passed on to customers in sales prices.

Interest Expenses
In 2005, total interest expense increased $106,000. Interest on short-term debt increased $37,000. This was due to the increase in the average outstanding loan balance on the line of credit and higher interest rates. Interest on customer deposits increased $48,000 due to increased customer deposits primarily as a result of additional deposits required after implementing increased rates in our natural gas operation.

Other
Other revenues increased $51,000 compared to 2005 due to additional interest income associated with the sale of the water assets.

Income Taxes

Income tax expense decreased in 2006 over the normal tax rate on net income by $67,000. This decrease was due to tax return adjustments related to the regulatory deferred tax liabilities.

Income tax expense decreased in 2005 over the normal tax rate on net income by $43,000. Tax return adjustments related to the sale of our water assets and the regulatory deferred tax liabilities decreased expenses by $118,000. We had an offsetting increase of $75,000 related to our IRS audit of the 2002 and 2003 income tax returns.

Liquidity and Capital Resources

Summary of Primary Sources and Uses of Cash
(Dollars in thousands)

	Year Ended December 31,		
	2006	2005	2004
Sources of Cash:			
Operating activities, including working capital changes	$20,090	$10,213	$11,673
Net proceeds on short-term debt	-	3,733	3,547
Other sources of cash	1,179	1,214	648
Uses of Cash:			
Construction expenditures	13,116	12,441	13,731
Dividends paid	2,551	2,448	2,368
Net payment on short-term debt	6,092	-	-
Other uses of cash	121	75	129
Net (use) source of cash	$ (611)	$ 196	$ (360)

Cash Flows

Operating Activities

Net cash flow provided by continuing operating activities increased in 2006 by approximately $10 million compared to 2005. Fuel and other pass through costs accounted for $6.5 million of the increase. This increase resulted from the collection of the prior year's under-recoveries of $3.4 million and over-recoveries of $3.1 million in 2006. Amounts over-recovered will be refunded to customers in subsequent calendar years. Lower fuel costs during the latter part of the year in our natural gas segment contributed to a decrease in receivables and increase in cash of $3 million. The lower fuel costs and timing of payments to our major fuel suppliers resulted in a decrease to operating cash of $1 million. Income taxes paid increased by approximately $600,000 primarily due to the tax effect of the collection of prior year's fuel under-recoveries.

Net cash flow provided by continuing operating activities decreased in 2005 by approximately $1.5 million compared to 2004. Payments for fuel exceeded the amount collected from customers by an additional $3.1 million in 2005. The under-recovery of fuel costs is collected in the following calendar year. Income tax payments increased approximately $1.5 million, primarily as a result of less tax depreciation and higher income. The deduction for tax depreciation was higher in 2004 as a result of bonus depreciation, resulting in lower taxes in that year. We also received a refund in 2004 relating to the deferral of the gain on our water assets sale.

Offsetting the decreases to 2005 cash flow was additional cash received from rate increases in our natural gas segment. The rate increases also contributed to an increase to accounts receivable of $4 million. Accounts payable increased $3.3 million in 2005 primarily due to the increased cost of fuel in our natural gas segment.

Investing Activities

Capital expenditures increased in 2006 compared to 2005 by approximately $700,000. The increase in 2006 included expenditures for transportation equipment in our electric segment for approximately $400,000, vehicles in our natural gas segment above 2005 levels of approximately $600,000, and various other typical capital expenditures. Offsetting total 2006 increases was a $663,000 transformer replacement in 2005.

Capital expenditures decreased in 2005 compared to 2004 by approximately $1.3 million. In 2004, there were large projects to rebuild two substations in our electric segment and additional propane community gas systems costing approximately $3.3 million. In 2005 such expenditures were lower and consisted of the purchase of a transformer in our electric segment for $663,000, a new natural gas mapping system to track our assets used in serving our customers for approximately $300,000, a propane delivery system for approximately $300,000, additional propane community gas systems for approximately $300,000 and other various capital expenditures.

Financing Activities

Short-term borrowings decreased by $6 million in 2006. Over-recovery of fuel costs provided a large source of cash during 2006 as well as the recovery of the prior year's under-recovery of fuel costs in 2006, reducing the need for short-term borrowings.

Although additional sources of cash were provided by our rate increases and lower construction expenditures in 2005, the additional expenditures from the under-recovery of fuel costs and additional income taxes increased our short-term debt. Short-term borrowings increased in 2005 over 2004 by approximately $3.7 million.

Capital Resources

We currently have a $12 million line of credit, which expires on July 1, 2008. Upon 30 days notice by us we can increase the line of credit to a maximum of $20 million. The line of credit contains affirmative and negative covenants that, if violated, would give the bank the right to accelerate the due date of the loan to be immediately payable. The covenants include certain financial ratios. All ratios are currently met and management believes we are in full compliance with all covenants and anticipates continued compliance. We reserve $1 million of the line of credit to cover expenses for any major storm repairs in our electric segment and an additional $250,000 for a letter of credit insuring propane gas facilities. As of December 31, 2006, the amount borrowed on the line of credit was $3.5 million. The line of credit, long-term debt and preferred stock as of December 31, 2006 comprised 53% of total capitalization and debt.

In prior years we periodically paid off short-term borrowings under lines of credit using the net proceeds from the sale of long-term debt or equity securities. We may use similar types of proceeds in the future to pay off short-term borrowings, dependent on the amount borrowed from the line of credit, prevailing market conditions for debt and equity, the impact to our financial covenants and the effect on income.

Our 1942 Indenture of Mortgage and Deed of Trust, which is a mortgage on all real and personal property, permits the issuance of additional bonds based upon a calculation of unencumbered net real and personal property. At December 31, 2006, such calculation would permit the issuance of approximately $39.3 million of additional bonds.

On November 30, 2006 we received approval from the FPSC to issue and sell or exchange an additional amount of $45 million in any combination of long-term debt, short-term notes and equity securities and/or to assume liabilities or obligations as guarantor, endorser or surety during calendar year 2007. We will seek approval from the FPSC in 2007 for any possible financing in 2008.

We have $3.4 million in invested funds for payment of future environmental costs. We expect to use some of these funds in 2007.

Capital Requirements
Portions of our business are seasonal and dependent upon weather conditions in Florida. This factor affects the sale of electricity and gas and impacts the cash provided by operations. Construction costs also impact cash requirements throughout the year. Cash needs for operations and construction are met partially through short-term borrowings from our line of credit.

Capital expenditures are expected to be higher in 2007 compared to 2006 by approximately $3.9 million. The primary reason for the expected increase in expenditures is the anticipated purchase of land for a new South Florida division office. The current division office is on environmentally impacted property, which requires relocating the office to allow for clean up of the property. It is not possible to rebuild at the current location since the property has been rezoned with a residential designation. The estimated cost of land is $3.8 million. We are planning to build and complete this new facility in the next five years. We do not have any commitments for capital expenditures in 2007 other than vehicles of approximately $102,000.

Cash requirements will increase significantly in the future due to environmental clean up costs, sinking fund payments on long-term debt and pension contributions. Environmental clean up is forecast to require payments of approximately $600,000 in 2007, with remaining payments, which could total approximately $13.1 million, beginning in 2008. Annual long-term debt sinking fund payments of approximately $1.4 million will begin in 2008 and will continue for eleven years. Based on current projections, we will make voluntary contributions in our defined benefit pension plan of $250,000 in 2007 and $500,000 in 2008. Required contributions will begin in 2009 and are forecast to be approximately $2 million in 2009 and 2010.

Based on our current expectations for cash needs, including the possible land purchase and related South Florida office construction, we may choose to consider an equity or debt financing in 2008 to address those cash needs. The need and timing will depend upon operational requirements, environmental expenditures, pension contributions and construction expenditures and cannot be precisely predicted at this time. In addition, if we experience significant environmental expenditures in the next two or three years it is possible we may need to raise additional funds. If interest rates remain favorable we may consider re-financing one of our mortgage bonds. If refinancing is deemed beneficial, we may re-issue the bond for additional principal. There can be no assurance, however, that equity or debt transaction financing will be available on favorable terms or at all when we make the decision to proceed with a financing transaction.

Outlook

Pension and Insurance Expenses

Insurance costs have been increasing and are expected to continue to increase while we expect pension costs to decrease. Pension expenses decreased $107,000 in 2006 and our actuarial estimates show pension expense decreasing by $142,000 in 2007. Insurance expenses including Medical, Liability and Workers' Compensation increased $70,000 in 2006 and are expected to increase further in 2007.

The regulated segments received rate relief for some of the historical pension and insurance increases in 2003 and 2004. Increases beyond those experienced through 2005, which are allocated to the regulated segments, may require requesting future rate relief. The propane gas segment may recover these expenses by increasing rates, depending on market conditions in the propane gas industry and the ability to remain competitive.

Due to significant cost increases for our defined benefit pension plan over the past several years and with expectations that these cost increases will continue in the years ahead, we discontinued eligibility to our pension plan for all new hires.

For new hires not eligible for the defined benefit pension plan, we established an employer match to the employee's contribution to their 401K plans. It provided for a company match of 50% for each dollar contributed by the employee, up to 6% of their salary, for a company contribution of up to 3%. Beginning in 2007, for non-union employees the plan was enhanced to provide a company match of 100% for the first 2% of an employee's contribution, and a match of 50% for the next 4% of an employee's contribution, for a total company match of up to 4%. This new enhanced match will be negotiated with our six union contracts during 2007, to be effective on their respective contract date within 2007. The employees are eligible for the company match after six months of continuous service, with vesting of 100% after three years of continuous service.

Electric Power Supply Contracts

Contracts with our two electric suppliers were originally set to expire on December 31, 2007. Those contracts provided electricity to our customers at rates much lower than market rates. As part of our negotiations, we agreed to end the current contract terms for our Northeast division on December 31, 2006 and executed an amended contract to begin January 1, 2007 and expire December 31, 2017. Although the contract rates will increase for 2007, this enabled us to obtain lower rates for the longer term of the contract than would have been available if we had not revised the contract. The savings are passed through to our customers without profit to us.

We executed a contract for the provider of electricity in our Northwest division in December 2006 and are seeking approval of this contract and its related terms and conditions from the FPSC on or before July 1, 2007. If the FPSC does not approve this contract, we may need to seek an alternative supplier or new contract with this same supplier for the purchase of electricity in the Northwest division. This contract will be for the purchase of electricity beginning January 1, 2008. We anticipate that contract will result in rates closer to market, which could cause our customers' bills to double over existing prices in the next several years.

We are unable to estimate what impact, if any, the higher rates could have on electric consumption.

Propane Gas

We are currently reviewing the possibility of hedging activities in 2007 to help mitigate the risk of price changes for our cost of propane gas. We are unable to determine the impact this activity will have on our future operating income.

We used advance purchase agreements made in the normal course of procuring propane gas supplies in past years. These agreements resulted in a loss of gross profit of approximately $5,000 in 2006 and additional gross profit of approximately $383,000 in 2005 and $242,000 in 2004.

Over-earnings-Natural Gas Segment
The FPSC approves rates that are intended to permit a specified rate of return on investment and limits the maximum amount of earnings of regulated operations. We currently estimate over-earnings in 2006 of $230,000 and in 2005 of $650,000. We revised our prior year's 2005 estimate of $700,000 during 2006. These liabilities have been included in an over-earnings liability on our balance sheet, with the potential of rate refunds to customers. The calculations supporting these liabilities are complex and involve a variety of projections and estimates before the ultimate settlement of such obligations.

Our 2005 and 2006 estimates of our over-earnings liabilities could change upon the FPSC finalization and review of our earnings in 2007 and 2008. The FPSC determines the disposition of over-earnings with alternatives that include refunding to customers, funding storm damage or environmental reserves, or reducing any depreciation reserve deficiency.

In 2007 we requested that the 2005 natural gas over-earnings be used to provide additional funds to our regulatory liability – storm reserve and reduce the costs currently being recovered from our customers through a storm surcharge. If the FPSC approves this disposition, we will end the storm surcharge in 2007.

Electric Customers
A large commercial customer in our electric division closed its operations in late 2006. As a result we anticipate annual revenues to be reduced by approximately $300,000 and annual gross profit to be reduced by approximately $50,000.

A large distribution center was built in our Northwest division in 2004 and a second facility was added in 2006. A third distribution facility is expected to be added by the end of 2007. Additional industrial and commercial development is planned for this general area, which should increase load significantly. Additional gross profit is anticipated in the future to increase between $30,000 and $50,000 as a result of the additional developments.

Natural Gas Customers

Two natural gas customers went off-line for approximately six months in 2006 due to lower production, market slow down and maintenance work on their facilities. We anticipate that they will not be fully operational until mid-2007. The decreased revenue and gross profit is estimated to be $100,000 in 2007.

Indiantown Gas Agreement

The FPSC approved our joint transportation and territorial agreements with Indiantown Gas Company in October 2006. We began construction in the Indiantown area to install natural gas mains in the first phase of this development, for approximately 100 homes. Two more developments are slated for construction of approximately 1,000 homes in 2007.

Storm Preparedness Expenses
Regulators continue to focus on hurricane preparedness and storm recovery issues for utility companies. Newly mandated storm preparedness initiatives could impact our operating expenses and capital expenditures beginning in 2007. The initial forecasts of these annual expenditures are approximately $700,000. It is possible that additional regulation and rules will be mandated regarding storm related expenditures over the next several years. We requested that the FPSC allow us to recover the cost of the newly mandated storm preparedness initiatives and to defer these storm-related expenditures until we receive recovery through a rate increase. If approved, both the recovery and expenditures may occur by mid-2007. If the FPSC does not approve our request, we plan to file a rate proceeding in 2007 as an alternative option for recovery of these expenditures.

Land Purchase
We are currently reviewing multiple sites for the new South Florida division office. We expect to purchase land for the new South Florida division office during 2007.

Contractual Obligations

Table of Contractual Obligations
(Dollars in thousands)

Payments due by period:	Total	Less than 1 year	1 to 3 years	3 to 5 years	More than 5 years
Long-term Debt Obligations	$52,500	$ -	$2,818	$2,818	$46,864
Long-term Debt Interest	63,904	3,949	7,623	7,074	45,258
Operating Lease Obligations	352	151	163	38	-

Deleted: -
Deleted: 584
Deleted: 448

Long-term Debt Obligations
The Long-term debt obligations are principal amounts.

Long-term Debt Interest
The Long-term debt interest represents the interest obligation on our Mortgage Bonds.

Operating Lease Obligations
Our total operating lease obligation is $352,000. We are leasing property from the City of Fernandina Beach in our Northeast division. The total obligation for the duration of this lease is about $107,000 over the next five years. We lease our appliance showroom in the same division for approximately $35,000 annually. We also have other operating lease agreements with various terms and expiration dates.

Purchase Obligations

A purchase order is considered an obligation if it is associated with a contract or is authorizing a specific purchase of material. The Other Purchase Obligation amount presented above represents the amount of open orders.

Pension, Medical Postretirement and Other Obligations
Our pension plan continues to meet all funding requirements under ERISA regulations; however, under current actuarial assumptions, contributions may be required as early as 2009. Current projections indicate that we will make voluntary contributions of $250,000 in 2007, $500,000 in 2008 and make required contributions of approximately $2 million in 2009 and 2010, decreasing to under $1 million in 2011. These payments are not included in the Contractual Obligations table.

Environmental clean up is anticipated to require approximately $600,000 in 2007, the remainder to be paid in following years. These payments are not included in the Contractual Obligations table.

We have medical postretirement payments relating to retiree medical insurance. These payments are not included in the Contractual Obligations table. Estimated future payments are described in Note 12 in the Notes to Consolidated Financial Statements.

Dividends
We have historically paid dividends. It is our intent to continue to pay quarterly dividends for the foreseeable future. Our dividend policy is reviewed on an ongoing basis by our Board of Directors and is dependent upon our future earnings, cash flow, financial condition, capital requirements and other factors.

Other

Impact of Recent Accounting Standards

Financial Accounting Standard Board Interpretation No. 48
In June 2006, the FASB issued Interpretation No. 48, Accounting for Uncertainty in Income Taxes (FIN 48). The interpretation clarifies the accounting for uncertainty in income taxes recognized in an entity's financial statements in accordance with SFAS No. 109, Accounting for Income Taxes. The interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 also provides guidance on de-recognition, measurement, classification, interest and penalties, accounting in interim periods, disclosure and transition. This interpretation is effective for calendar years beginning January 1, 2007.

We have performed an analysis of tax positions taken and expected to be taken on the tax returns and assessed the technical merits of each tax position by relying on legislation, statutes, common legislative intent, regulations, rulings, and case law and determined that the Company has no material uncertain tax positions. Additionally, the IRS concluded an audit of the 2002 and 2003 tax years in September of 2005.

In February of 2007, the IRS informed us that it selected our 2003 and 2004 tax years for examination. As our tax positions have remained consistent with those from the previously audited tax years, we are not expecting any material adverse findings as the result of the impending IRS audit.

Based on the aforementioned, we believe that the adoption of FASB Interpretation No. 48 will not have a material impact on our financial condition or results of operations.

Financial Accounting Standard No. 157

In September 2006, the FASB issued Statement No. 157, "Fair Value Measurements". This Statement clarifies fair value as the market value received to sell an asset or paid to transfer a liability, that is, the exit value, and applies to any assets or liabilities that require recurring determination of fair value. The measurement includes any applicable risk factors and does not include any adjustment for volume. This Statement is effective for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods within. The Company expects to adopt SFAS No. 157 effective January 1, 2008. The Company does not believe adoption of this Statement will have a material impact on our financial condition or results of operation.

Financial Accounting Standard No. 158

In September 2006, the FASB issued Statement No. 158, "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans". Statement 158 requires the Company to show the funded status of its pension and retiree health care plans as a prepaid asset or accrued liability, and to show the net deferred and unrecognized gains and losses related to the retirement plans, net of tax, as part of accumulated other comprehensive income in shareholders' equity. Previously, the net deferred and unrecognized gains and losses were netted in the prepaid asset or accrued liability recorded for the retirement plans. The Company adopted the recognition provisions of Statement 158, as required, at December 31, 2006.

The Company uses December 31 as the measurement date to measure the assets and obligations of its retirement plans. Statement 158 will also require the Company to use December 31 as the measurement date no later than fiscal years ending after December 15, 2008. The Company currently uses this date as the measurement date, and has used it for all periods presented.

Deleted: September 30

Deleted: expects to make this change in 2008.

The actuarial valuation of the retirement plan obligations has been completed and the recognition provisions of Statement 158 at December 31, 2006 resulted in an additional liability for retirement plans. The tax on the non-regulated portion of the liability has been recorded as a deferred income tax asset. As an offset, the regulatory portion of this liability has been deferred as a regulatory asset-retirement plans to be recovered in future rate proceedings and the remaining expense for recording the liability has been included in other comprehensive income. The fair value of retirement plan assets and obligations are subject to change based on market fluctuations. The table below summarizes the effects to our financial statements.

Other regulatory assets- retirement plans	$ -	$829	$829
Liabilities and Equity:			

Accumulated other comprehensive income/(loss)	-	(146)	(146)
Other accruals and payables	2,034	151	2,185
Long term medical and pension reserve	3,819	912	4,731
Deferred income taxes	16,224	(88)	16,136

Staff Accounting Bulletin No. 108

In September 2006, the SEC issued Staff Accounting Bulletin (SAB) No. 108 "Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements". SAB 108 requires that public companies utilize a "dual-approach" to assessing the quantitative effects of financial misstatements. This dual approach includes an assessment from both an income statement and a balance sheet focus. The guidance in SAB 108 must be applied to annual financial statements for fiscal years ending after November 15, 2006. The Company has adopted SAB No.108 and there has not been any impact on our consolidated financial position or results of operations as the result of this adoption.

Critical Accounting Policies and Estimates

Regulatory Accounting

We prepare our financial statements in accordance with the provisions of SFAS No. 71 "Accounting for the Effects of Certain Types of Regulation" and it is our most critical accounting policy. In general, SFAS No. 71 recognizes that accounting for rate-regulated enterprises should reflect the relationship of costs and revenues introduced by rate regulation. As a result, a regulated utility may defer recognition of a cost (a regulatory asset) or recognize an obligation (a regulatory liability) if it is probable that, through the rate making process, there will be a corresponding increase or decrease in revenues or expenses. SFAS No. 71 does not apply to our unregulated propane gas operations.

Use of Estimates

We are required to use estimates in preparing our financial statements so they will be in compliance with accounting principles generally accepted in the United States of America. Actual results could differ from these estimates. We believe that the accruals for potential liabilities are adequate. The estimates in our financial statements included the accrual for pensions, environmental liabilities, over-earnings liability, unbilled revenues, allowances for doubtful accounts, uninsured liability claims and the regulatory deferred income tax and deferred income liabilities.

- Pension and post retirement benefits-An actuary calculates the estimated pension liability in accordance with FASB 87, FASB 88 as amended by FASB 132 and FASB 158.
- Environmental liabilities-These liabilities are subject to certain unknown future events. The Company reviews the environmental issues regularly with the geologists performing the feasibility studies and their legal counsel specializing in manufactured gas plant issues and negotiates with the environmental regulators and the other participating parties to determine the adequacy of the estimated liability for environmental reserves.

Deleted: ***Financial Accounting Standard No. 154***

In May 2005, the FASB issued Statement No. 154, "Accounting Changes and Error Corrections". This Statement applies to all voluntary changes in accounting principle and requires retrospective application to prior period financial statements of changes in accounting principle, unless it is impracticable to determine either the period-specific effects or the cumulative effects of the change. This Statement is effective for accounting changes and corrections of errors made in fiscal years beginning after December 15, 2005. We adopted SFAS No. 154 as of January 1, 2006; however, we did not have any impact to our financial statements in 2006 as a result of this adoption.

Deleted: ***Financial Accounting Standard Board Interpretation No. 47***

In March 2005, the FASB issued Interpretation No. 47, "An Interpretation of FASB Statement No. 143". SFAS No. 143, "Accounting for Asset Retirement Obligations", requires that the fair value of an asset retirement obligation be recognized at the time those obligations are incurred. Upon initial recognition of a legal liability, costs are capitalized as part of the related long-lived asset and allocated to expense over the useful life of the asset. SFAS No. 143 also requires that components of previously recorded depreciation related to the cost of removal of assets upon retirement, whether legal asset retirement obligations or not, be removed from a company's accumulated depreciation reserve. We adopted the provisions of the Statement as of January 1, 2003, as prescribed by the FPSC. Under FPSC guidelines, the estimated cost of removal expenses for normal retirements related to regulated fixed assets were reserved through the depreciation expense and accumulated reserves. This was disclosed in a footnote until December 31, 2003, when the estimated cost of removal from accumulated depreciation was reclassified to a regulatory liability for the obligation.

This Interpretation addresses the legal obligation to retire an asset when the timing and (or) met[... [1]

Deleted:

- Over-earnings liability-This liability is subject to regulatory review and possible disallowance of some expenses in determining the amount of over-earnings.
- Unbilled revenues-Unbilled revenue is estimated with certain assumptions including unaccounted for units and the use of current month sales to estimate unbilled sales.
- Allowances for doubtful accounts- This liability is estimated based on historical information and trended current economic conditions, certain assumptions, and is subject to unknown future events. Actual results could differ from our estimates.
- Uninsured liability claims-We are self-insured for the first $250,000 of each general and auto liability claim and accrue for estimated losses occurring from both asserted and unasserted claims. The estimate for unasserted claims arising from unreported incidents is based on an analysis of historical claims data and judgment.
- Regulatory deferred income tax and deferred income tax liabilities-These liabilities are estimated based on historical data and are subject to finalization of our income tax return. Actual results could differ from our estimates.

Deleted: y

Revenue Recognition
We bill utility customers on a monthly cycle basis; however, the billing cycle periods for most customers do not coincide with the accounting periods used for financial reporting. We accrue estimated revenue for gas and electric customers for consumption used but not yet billed for in an accounting period. Determination of unbilled revenue relies on the use of estimates and historical data. We believe that the estimates for unbilled revenue materially reflect the unbilled gross profit for our customers for units used but not yet billed in the current period.

The FPSC approves rates that are intended to permit a specified rate of return on investment and limits the maximum amount of earnings of regulated operations. Any earnings in excess of this maximum amount are accrued for as an over-earnings liability and revenues are reduced for this same amount. The calculations supporting these liabilities are complex and involve a variety of projections and estimates before the ultimate settlement of such obligations. The FPSC determines the disposition of any over-earnings with alternatives that include refunding to customers, funding storm damage or environmental reserves or reducing any depreciation reserve deficiency.

Effects of Inflation
Our tariffs for natural gas and electric operations provide for fuel clauses that adjust annually for changes in the cost of fuel. Increases in other utility costs and expenses not offset by increases in revenues or reductions in other expenses could have an adverse effect on earnings due to the time lag associated with obtaining regulatory approval to recover such increased costs and expenses, the uncertainty of whether regulatory commissions will allow full recovery of such increased costs and expenses and any effect on unregulated propane gas operations.

Environmental Matters
We currently use or have used in the past, several contamination sites that are currently involved in pending or threatened environmental litigation as discussed in Note 10-"Contingencies" in the Notes to Consolidated Financial Statements. We intend to vigorously defend our rights in this litigation. We have insurance and rate relief to cover

any expected losses or expenses. We believe that the aggregate of all future contamination assessment and remedial costs, legal fees and other related expenses would not exceed the insurance proceeds received and any rate relief granted. The final 2004 natural gas rate relief granted by the FPSC provided future recovery of $8.9 million for environmental liabilities. The remaining balance to be recovered from customers through future recovery is included on the balance sheet as "Other regulatory assets-environmental".

Off-Balance Sheet Arrangements
We do not have any off-balance sheet arrangements.

Forward-Looking Statements (Cautionary Statement)
This report contains forward-looking statements including those relating to the following expectations:

- Based on our current expectations for cash needs, including cash needs relating to the possible land purchase and related construction, we may choose to consider an equity or debt financing in 2008 to address those cash needs. The need and timing will depend upon operational requirements, environmental expenditures, pension contributions and construction expenditures and cannot be precisely predicted at this time.
- Pension expenses will continue to decrease in 2007.
- Other insurance costs will increase in 2007.
- Our anticipation of continued compliance in the foreseeable future with our line of credit covenants.
- Our expectation that cash requirements will increase significantly in the future due to environmental clean-up costs, sinking fund payment on long-term debt and pension contributions.
- Electric storm related expenditures may be necessary beginning in mid-2007 and the total cost may be significant. We may receive recovery for these expenditures.
- Propane gas hedging activity may occur in 2007.
- The fuel supply contract in our Northwest Florida division beginning January 1, 2008 will be approved by the FPSC in 2007 and will be effective for the purchase of fuel supply beginning in 2008.
- Our 2005 and 2006 over-earnings liabilities in natural gas will materialize as estimated after the FPSC reviews and audits.
- We expect to have higher fuel costs for 2007, 2008 and beyond.
- The development in Indiantown will occur as estimated.
- The purchase of land for our new natural gas and propane gas division office will occur in 2007.
- The FPSC will allow our natural gas over-earnings to fund a future storm reserve and reduce our current regulatory asset related to historic storm costs and discontinue the related natural gas storm surcharge in 2007.
-
- The commercial and industrial growth will occur as expected in our Northwest division providing increases in our revenues and gross profit.
- The two customers that went off-line in 2006 will be fully operational by mid-2007.

Deleted: We have increased our focus on collection efforts of bad debt and we expect our bad debt expense to return to normal levels in 2007 and beyond.

These statements involve certain risks and uncertainties. Actual results may differ materially from what is expressed in such forward-looking statements. Important factors

that could cause actual results to differ materially from those expressed by the forward-looking statements include, but are not limited to, those set forth above in "Risk Factors".

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

All financial instruments held by us were entered into for purposes other than for trading. We have market risk exposure only from the potential loss in fair value resulting from changes in interest rates. We have no material exposure relating to commodity prices because under our regulatory segments, we are currently fully compensated for the actual costs of commodities (natural gas and electricity) used in our operations. Any commodity price increases for propane gas are normally passed through monthly to propane gas customers as the fuel charge portion of their rate.

None of our gas or electric contracts are accounted for using the fair value method of accounting. While some of our contracts meet the definition of a derivative, we have designated these contracts as "normal purchases and sales" under SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities".

Beginning in 2007 we plan, on a rolling four-quarter basis, to purchase a "cap" on approximately one-third of our forecast propane gas volume purchases and pre-buy or hedge with a swap one-third of our forecast anticipated propane gas purchases. The remaining one-third will fluctuate with the market price. Our energy strategy allows us to participate in two-thirds of price declines but only one-third of price increases. As of December 31, 2006, we have not entered into any hedging activities. When we do enter into hedging activities, we will determine whether they meet the definition of normal sales and purchases and if not, we will determine whether we can use hedge accounting.

We have no exposure to equity risk, as we do not hold any equity instruments. Our exposure to interest rate risk is limited to investments held for environmental costs, the water sale long term receivable and short-term borrowings on the line of credit. The investments held for environmental costs are short-term fixed income debt securities whose carrying amounts are not materially different than fair value. The short-term borrowings were $3.5 million at the end of December 2006. Therefore, we do not believe we have material market risk exposure related to these instruments. The indentures governing our two first mortgage bond series outstanding contain "make-whole" provisions, which are pre-payment penalties that charge for lost interest, which render refinancing impracticable.

Our non-interest bearing long-term receivable from the sale of the water operations was discounted at 4.34%. A hypothetical 0.5% (50 basis points) increase in the interest rate used would change the current fair value from $6 million to $5.9 million.

In 2006, a hypothetical 0.5% (50 basis points) decrease in the long-term interest rate on $52.5 million debt excluding unamortized debt discount would change the fair value from $63 million to $66.9 million.

Changes in short-term interest rates could have an effect on income depending on the balance borrowed on the variable rate line of credit. We had short-term debt of $3.5 million on December 31, 2006 and $9.6 million on December 31, 2005. A hypothetical 1% increase in interest rates would have resulted in a decrease in annual earnings for 2006 by $35,000 and for 2005 by $96,000, based on year-end borrowings.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Summary of Significant Accounting and Reporting Policies

A. General

The Company is an operating public utility engaged principally in the purchase, transmission, distribution and sale of electricity and in the purchase, transmission, distribution, sale and transportation of natural gas. The Company is subject to the jurisdiction of the FPSC with respect to its natural gas and electric operations. The suppliers of electric power to the Northwest Florida division and of natural gas to the natural gas divisions are subject to the jurisdiction of the FERC. The Northeast Florida division is supplied most of its electric power by a municipality which is exempt from FERC and FPSC regulation. The Company also distributes propane gas through a non-regulated subsidiary.

B. Basis of Presentation

The consolidated financial statements include the accounts of Florida Public Utilities Company (FPU) and its wholly owned subsidiary, Flo-Gas Corporation. All significant intercompany balances and transactions have been eliminated. The Company's accounting policies and practices conform to accounting principles generally accepted in the United States of America (GAAP) as applied to regulated public utilities and are in accordance with the accounting requirements and rate-making practices of the FPSC and in accordance to the rule requirements of the Securities and Exchange Commission (SEC).

C. Use of Estimates

The preparation of financial statements in conformity with GAAP requires the Company to make certain estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of any contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Some of these estimates include the accruals for pensions, allowances, environmental liabilities, liability reserves, unbilled revenue, regulatory deferred tax liabilities and over-earnings liability. Actual results may differ from these estimates and assumptions.

D. Reclassifications

Certain amounts in the prior years' financial statements have been reclassified to conform to the 2006 presentation.

E. Regulation

The financial statements are prepared in accordance with the provisions of Statement of Financial Accounting Standards (SFAS) No. 71 – "Accounting for the Effects of Certain Types of Regulation". SFAS No. 71 recognizes that accounting for rate-regulated enterprises should reflect the relationship of costs and revenues introduced by rate regulation. A regulated utility may defer recognition of a cost (a regulatory asset) or show recognition of an obligation (a regulatory liability) if it is probable that, through the ratemaking process, there will be a corresponding increase or decrease in revenues. The Company has recognized certain regulatory assets and liabilities in the consolidated balance sheets. The Company believes that the FPSC will continue to allow recovery of

such items through rates. In the event that a portion of the Company's operations are no longer subject to the provisions of SFAS No. 71, the Company would be required to write-off related regulatory assets and liabilities that are not specifically recoverable through regulated rates. In addition, the Company would be required to determine if an impairment related to other assets exists, including plant, and write-down the assets, if impaired, to their fair value.

Summary of Regulatory Assets and Liabilities
(Dollars in thousands)

	2006	2005
Assets		
Deferred development costs (1)	$ 3,952	$ 4,190
Unamortized fuel related regulatory costs (6)	48	24
Environmental assets (2)	8,284	8,868
Storm Reserve assets (3)	270	452
Deferred retirement plan costs (5)	829	-
Unamortized Rate Case expense	368	541
Under-recovery of fuel costs	862	3,375
Unamortized piping and conversion costs (1)	1,521	1,587
Unamortized loss on reacquired debt (1)	209	227
Total Regulatory Assets	$16,343	$19,264
Liabilities		
Tax liabilities	$ 876	$ 991
Cost of removal	8,800	8,256
Storm reserve liabilities	1,636	1,536
Over-recovery of fuel costs	3,656	-
Over-recovery of conservation	355	24
Over-earnings liability (4)	880	700
Total Regulatory Liabilities	$16,203	$11,507

Deleted: -

Deleted: 15,481

Deleted: 2,794

Deleted: 15,341

(1) Deferred development costs, unamortized piping and conversion costs, and unamortized loss on reacquired debt are included in deferred charges in the consolidated balance sheets.
(2) The Company has included the amount due from customers as a regulatory asset for environmental costs. The FPSC authorized recovery of these environmenatl costs from customers over 20 years.
(3) The FPSC has authorized the Company to recover storm damages incurred in 2004 in their natural gas operations. Recovery of these costs from customers over 30 months began November 2005.
(4) The Company originally estimated the 2005 over-earnings for regulated natural gas operations at $700,000. In 2006 the estimate was reduced to $650,000. The Company has estimated 2006 over-earnings for regulated natural gas operations of $230,000. The Company has recorded these liabilities which reduced revenues. The FPSC determines the disposition of over-earnings with alternatives that include refunding to customers, funding storm damage or environmental reserves, or reducing any depreciation reserve deficiency.
(5) The actuarial valuation of the retirement plan obligations has been completed and the recognition provisions of Statement 158 at December 31, 2006 resulted in a regulatory asset for the portion of the loss of $829,000 to be recovered in future rate proceedings.

Deleted: his was authorized by t

Deleted: in their most recent natural gas rate proceeding and is being recovered

(6) The Company has deferred certain regulatory fuel related costs and as of January 2006 has been amortizing these over five years according to a FPSC order in the November 2005 fuel hearings.

The base revenue rates for regulated segments are determined by the FPSC and remain constant until a request for an increase is filed and approved by the FPSC or the FPSC orders the Company to reduce their rates. For the Company to recover increased costs from the effects of inflation and construction expenditures for regulated segments, a request for an increase in base revenues would be required. Separate filings would be required for the electric and natural gas segments. The Company is currently seeking rate relief for electric storm preparedness initiatives required in 2007.

F. Derivatives

None of the Company's gas or electric contracts are accounted for using the fair value method of accounting. All material contracts that meet the definition of derivative instruments are considered "normal purchases and sales" under SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities".

Deleted: possible

G. Revenue Recognition

The Company's revenues consist of base revenues, fuel adjustment charges, conservation charges and the pass-through of certain governmental imposed taxes based on revenues.

The FPSC approves base revenue rates that are intended to permit a specified rate of return on investment and limits the maximum amount of earnings of regulated operations. Fuel adjustment charges, conservation charges and the pass-through of certain governmental imposed taxes based on revenues are approved by the FPSC to allow recovery of fuel, conservation and revenue based taxes from the Company's customers. Any over or under-recovery of these expense items are deferred and subsequently refunded or collected in the following period.

Annually, any earnings in excess of this maximum amount permitted in the base rates are accrued for as an over-earnings liability and revenues are reduced an equivalent amount. The calculations supporting these liabilities are complex and involve a variety of projections and estimates before the ultimate settlement of such obligations. The FPSC determines the disposition of any over-earnings with alternatives that include refunding to customers, funding storm damage or environmental reserves, or reducing any depreciation reserve deficiency.

The Company bills utility customers on a monthly cycle basis; however, the billing cycle periods for most customers do not coincide with the accounting periods used for financial reporting. The Company accrues estimated revenue for gas and electric customers on usage not yet billed for the accounting period. Determination of unbilled revenue relies on the use of estimates, fuel purchases and historical data.

H. Allowance for Doubtful Accounts

The Company records an allowance for doubtful accounts based on historical information and trended current economic conditions. The following is a summary of the activity in Allowance for Doubtful Accounts for the years ending December 31:

Allowance for Doubtful Accounts				
	Balance at Beginning of Year	Write-offs	Provisions to Bad Debt Expense	Balance at End of Year
2004	$ 180,000	320,000	409,000	$ 269,000
2005	$ 269,000	292,000	295,000	$ 272,000
2006	$ 272,000	350,000	507,000	$ 429,000

Deleted: 4

Deleted: 11

I. Utility Plant and Depreciation

Utility plant is stated at original cost. The propane gas utility plant that has been acquired in acquisitions was stated at fair market value when acquired. Additions to utility plant include contracted services, direct labor, transportation and materials for additions. Units of property are removed from utility plant when retired. Maintenance and repairs of property and replacement and renewal of items determined not to be units of property are charged to operating expenses. Substantially all of the utility plant and the shares of Flo-Gas Corporation collateralize the Company's first mortgage bonds.

Utility Plant

Equipment	2.0% to 20.0%	12,700	11,534
Furniture and Fixtures	4.8% to 20.0%	392	369
Work-in-Progress		2,867	5,010
		$ 188,968	$ 179,278

Depreciation for the Company's regulated segments is computed using the composite straight-line method at rates prescribed by the FPSC for financial accounting purposes. Propane gas depreciation is computed using a composite straight-line method at an average rate based on estimated average life of approximately 20-30 years. Such rates are based on estimated service lives of the various classes of property. Depreciation provisions on average depreciable property approximate 3.9% in 2006, 3.9% in 2005 and 3.6% in 2004.

J. Impact of Recent Accounting Standards

Financial Accounting Standard Board Interpretation No. 48

In June 2006, the FASB issued Interpretation No. 48, Accounting for Uncertainty in Income Taxes (FIN 48). The interpretation clarifies the accounting for uncertainty in income taxes recognized in an entity's financial statements in accordance with SFAS No. 109, Accounting for Income Taxes. The interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 also provides guidance on de-recognition, measurement, classification, interest and penalties, accounting in interim periods, disclosure and transition. This interpretation is effective for calendar years beginning January 1, 2007.

We have performed an analysis of tax positions taken and expected to be taken on the tax returns and assessed the technical merits of each tax position by relying on legislation, statutes, common legislative intent, regulations, rulings and case law and determined that the Company has no material uncertain tax positions. Additionally, the IRS concluded an audit of the 2002 and 2003 tax years in September of 2005.

In February of 2007, the IRS informed us that it selected our 2003 and 2004 tax years for examination. As our tax positions have remained consistent with those from the previously audited tax years, we are not expecting any material adverse findings as the result of the impending IRS audit.

Based on the aforementioned, we believe that the adoption of FASB Interpretation No. 48 will not have a material impact on our financial condition or results of operations.

Financial Accounting Standard No. 157
In September 2006, the FASB issued Statement No. 157, "Fair Value Measurements". This Statement clarifies fair value as the market value received to sell an asset or paid to transfer a liability, that is, the exit value, and applies to any assets or liabilities that require recurring determination of fair value. The measurement includes any applicable risk factors and does not include any adjustment for volume. This Statement is effective for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods within. The Company expects to adopt SFAS No. 157 effective January 1, 2008. The Company does not believe adoption of this Statement will have a material impact on our financial condition or results of operation.

Financial Accounting Standard No. 158
In September 2006, the FASB issued Statement No. 158, "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans". Statement 158 requires the Company to show the funded status of its pension and retiree health care plans as a prepaid asset or accrued liability, and to show the net deferred and unrecognized gains and losses related to the retirement plans, net of tax, as part of accumulated other comprehensive income in shareholders' equity. Previously, the net deferred and unrecognized gains and losses were netted in the prepaid asset or accrued liability recorded for the retirement plans. The Company adopted the recognition provisions of Statement 158, as required, at December 31, 2006.

The Company uses December 31 as the measurement date to measure the assets and obligations of its retirement plans. Statement 158 will also require the Company to use December 31 as the measurement date no later than fiscal years ending after December 15, 2008. The Company currently uses this date as the measurement date, and has used it for all periods presented.

The actuarial valuation of the retirement plan obligations has been completed and the recognition provisions of Statement 158 at December 31, 2006 resulted in an additional liability for retirement plans. The tax on the non-regulated portion of this liability has been recorded as a deferred income tax asset. As an offset, the regulatory portion of this liability has been deferred as a regulatory asset-retirement plans to be recovered in future rate proceedings and the remaining expense from recording the liability has been included in other comprehensive income. The fair value of retirement plan assets and obligations are subject to change based on market fluctuations. The table below summarizes the effects to our financial statements.

FASB 158 Implementation Summary
(Dollars in thousands)

	December 31, 2006		
	Before Application of SFAS 158	Adjustment	After Application of SFAS 158
Assets:			
Other regulatory assets- retirement plans	$ -	$829	$829
Liabilities and Equity:			
Accumulated other comprehensive income/(loss)	-	(146)	(146)
Other accruals and payables	2,034	151	2,185
Long term medical and pension reserve	3,819	912	4,731
Deferred income taxes	16,224	(88)	16,136

Staff Accounting Bulletin No. 108
In September 2006, the SEC issued Staff Accounting Bulletin (SAB) No. 108 "Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements". SAB 108 requires that public companies utilize a "dual-approach" to assessing the quantitative effects of financial misstatements. This dual approach includes an assessment from both an income statement and a balance sheet focus. The guidance in SAB 108 must be applied to annual financial statements for fiscal years ending after November 15, 2006. The Company has adopted SAB No.108 and there has not been any impact on our consolidated financial position or results of operations as the result of this adoption.

2. **Goodwill and Intangible Assets**
In accordance with SFAS No. 142, "Goodwill and Other Intangible Assets", the Company does not amortize goodwill or intangibles with indefinite lives. The Company periodically tests the applicable reporting segments, natural gas and propane gas, for

Deleted: The Company uses September 30 as the measurement date to measure the assets and obligations of its retirement plans. Statement 158 will also require the Company to use December 31 as the measurement date no later than fiscal years ending after December 15, 2008. The Company expects to make this change in 2008.¶

Deleted: is

Deleted: ***Financial Accounting Standard No. 154¶***
In May 2005, the FASB issued Statement No. 154, "Accounting Changes and Error Corrections". This Statement applies to all voluntary changes in accounting principle and requires retrospective application to prior period financial statements of changes in accounting principle, unless it is impracticable to determine either the period-specific effects or the cumulative effects of the change. This Statement is effective for accounting changes and corrections of errors made in fiscal years beginning after December 15, 2005. We adopted SFAS No. 154 as of January 1, 2006; however, we did not have any impact to our financial statements in 2006 as a result of this adoption.¶

Deleted: ***Financial Accounting Standard Board Interpretation No. 47¶***
In March 2005, the FASB issued Interpretation No. 47, "An Interpretation of FASB Statement No. 143". SFAS No. 143, "Accounting for Asset Retirement Obligations", requires that the fair value of an asset retirement obligation be recognized at the time those obligations are incurred. Upon initial recognition of a legal liability, costs are capitalized as part of the related long-lived asset and allocated to expense over the useful life of the asset. SFAS No. 143 also requires that components of previously recorded depreciation related to the cost of removal of assets upon retirement, whether legal asset retirement obligations or not, be removed from a company's accumulated depreciation reserve. The Company adopted the provisions of the Statement as of January 1, 2003, as prescribed by the FPSC. Under FPSC guidelines, the estimated cost of removal expenses for normal retirements related to regulated fixed assets were reserved through the depreciation expense and accumulated reserves. This w[... [2]

impairment. In the event a segment becomes impaired, the Company would write down the associated goodwill and intangible assets to fair value. The impairment tests performed in 2005 and 2006 showed no impairment for either reporting segment.

Goodwill associated with the Company's acquisitions is identified as a separate line item on the consolidated balance sheet and consists of $500,000 in the natural gas segment and $1.9 million in the propane gas segment.

Intangible assets associated with the Company's acquisitions and software have been identified as a separate line item on the balance sheet. Summaries of those intangible assets at December 31 are as follows:

Intangible Assets
(Dollars in thousands)

		2006	2005
Customer distribution rights	(Indefinite life)	$ 1,900	$ 1,900
Customer relationships	(Indefinite life)	900	900
Software	(Five to nine year life)	3,122	2,971
Non-compete agreement	(Five year life)	-	35
Accumulated amortization		(1,517)	(1,415)
Total intangible assets, net of amortization		$4,405	$ 4,391

The 2006 amortization expense of computer software is approximately $300,000. The Company expects the amortization expense of computer software to be approximately $300,000 annually over the next five years, with the current level of software investment. The non-compete agreements expired in 2006.

3. *Over-earnings-Natural Gas*
The FPSC approves rates that are intended to permit a specified rate of return on investment and limits the maximum amount of earnings of regulated operations. The Company has agreed with the FPSC staff to limit the earned return on equity for regulated natural gas and electric operations.

The Company estimated 2005 over-earnings for regulated natural gas operations of $700,000. The 2005 over-earnings estimate was revised in 2006 to be $650,000. The Company estimated 2006 over-earnings for regulated natural gas operations of $230,000. These liabilities have been included in the over-earnings liability on the Company's balance sheet. The calculations supporting these liabilities are complex and involve a variety of projections and estimates before the ultimate settlement of such obligations.

The Company feels the estimates of the 2005 and 2006 over-earnings liabilities are accurate, but the amounts could change upon the FPSC finalization and review of earnings expected in 2007 and 2008. The FPSC determines the disposition of over-earnings with alternatives that include refunding to customers, increasing storm damage or environmental reserves or reducing any depreciation reserve deficiency.

Deleted: it

Deleted: funding

4. *Storm Reserves*
As of December 31, 2006, the electric segment storm reserve was approximately $1.6 million. Since the last order on the 1999 disposition of electric over-earnings, the FPSC has allowed the Company the flexibility of automatically applying the electric over-earnings to the storm

damage reserves each year since 1999 and allowing additional storm damage accruals up to a cap of $2.9 million. In 2006, 2005 and 2004 there were no electric over-earnings and accordingly no additional over-earnings amounts were added to the storm damage reserves.

In October 2005, the FPSC approved recovery of 2004 natural gas segment storm costs plus interest and revenue taxes over a 30-month period beginning November 2005. The Company deferred storm costs as a regulatory asset due from customers on the balance sheet. As of December 31, 2006, the unrecovered amount of natural gas regulatory asset relating to storm costs was $270,000.

The Company has requested that the FPSC allow 2005 over-earnings in natural gas to be used to recover the regulatory asset -storm and discontinue this storm surcharge. As part of this same request, the Company has also asked the FPSC to allow any excess over-earnings amount to provide additional funds for the "regulatory liability- storm reserve" for natural gas. We expect the FPSC to rule on this request during 2007.

In 2005, the FPSC approved applying 2002 natural gas over-earnings of $118,000 to the storm reserve to cover future storm costs.

5. Income Taxes
Deferred income taxes are provided on all significant temporary differences between the financial statements and tax basis of assets and liabilities at currently enacted tax rates. Investment tax credits have been deferred and are amortized based upon the average useful life of the related property in accordance with the rate treatment.

A. Income Taxes related to Deferred Gain on Water Sale

On March 27, 2003, the Company sold substantially all of its assets of the water division to the City of Fernandina Beach. The sale was made pursuant to a "threat of condemnation" during the fourth quarter of 2002. For tax purposes the Company elected to defer the gain on the sale of the assets pursuant to Code Section 1033 of the Internal Revenue Code of 1986 (IRC). Section 1033 allows non-recognition of gain if property is disposed as a result of threat of condemnation and property that is similar or related in service or use is purchased to replace the disposed property. To qualify, the replacement property must be purchased within the replacement period, which begins on the earlier of date of disposition (March 27, 2003) or date of threat of condemnation (December 31, 2002) and ending two years after the close of the year of sale (December 31, 2005). For real property, the replacement period is extended to three years (December 31, 2006).

The Company purchased property that is similar or related in service or use within the replacement periods with the exception of the intangible assets. During the IRS audit in 2005, the IRS disallowed a portion, approximately $900,000 of the deferral relating to the intangible assets, since replacement was no longer expected.

A $2.9 million estimated tax payment was made in 2003 related to the gain on the sale of the water division. It was subsequently determined that the income tax would be deferred. The Company applied for a refund and received $3.9 million in July 2004, which included other estimated tax overpayments.

B. Provision for Income Taxes

The provision (benefit) for income taxes consists of the following:

(Dollars in thousands)	Years ended December 31, 2006	2005	2004
Current payable			
Federal	$ 3,652	$ 2,150	$ (566)
State	664	370	(96)
Current – net	4,316	2,520	(662)
Deferred			
Federal	(1,674)	(143)	2,003
State	(272)	(9)	358
Deferred – net	(1,946)	(152)	2,361
Investment tax credit	(75)	(81)	(84)
Total income taxes	$ 2,295	$ 2,287	$ 1,615

C. Effective Tax Rate Reconciliation

The difference between the effective income tax rate and the statutory federal income tax rate applied to pretax income is of continuing operations accounted for as follows:

(Dollars in thousands)	Years ended December 31, 2006	2005	2004
Federal income tax at statutory rate (34%)	$ 2,230	$ 2,222	$ 1,771
State income tax, net of federal benefit (5.5%)	238	237	189
Investment tax credit	(75)	(81)	(84)
Tax exempt interest	(85)	(71)	(94)
Other	(13)	(20)	(167)
Total provision for income taxes	$ 2,295	$ 2,287	$ 1,615

D. Deferred Income Taxes

Temporary timing differences which produce deferred income taxes in the accompanying consolidated balance sheets are as follows:

(Dollars in thousands)	Years ended December 31, 2006	2005
Deferred tax assets:		
Environmental	$ 2,063	$ 1,932
Self insurance	774	731
Storm reserve liability	509	408
Vacation pay	357	320
Other deferred credits	15	61
Allowance for uncollectible accounts receivable	162	103
General liability	68	111
Rate refund	331	263
Pension	698	286
Under/over-recovery of conservation costs	134	9

Other	37	37
Total deferred tax assets	5,148	4,261
Deferred tax liabilities:		
Utility plant related	20,274	20,319
Deductible intangibles	696	577
Under-recovery of fuel costs	643	1,704
Rate case expense	138	204
Loss on reacquired debt	79	85
Other	33	6
Total deferred tax liabilities	21,863	22,895
Net deferred income taxes liabilities	$ 16,715	$ 18,634

Deferred tax liabilities included in the consolidated balance sheets are as follows:

(Dollars in thousands)	2006	2005
Deferred income tax – current	$ 579	$ 1,066
Deferred income tax – long term	16,136	17,568
Net deferred income tax liabilities	$ 16,715	$ 18,634

E. IRS Audit

The IRS has informed us that it has selected our 2003 and 2004 tax returns for examination. Management does not expect any material adjustments from the audit but the effects, if any, that result from the final resolution of this IRS audit will be recorded when they become known and estimable. The Company expects the audit will be completed before the end of 2007.

Deleted: It is our understanding that the 2003 tax return is included in the audit due to a net operating loss carry back to that year. The Company may incur related interest expense and income tax liabilities as a result of this audit.

Deleted: At this time m

Deleted: is unable to estimate

Deleted: could

The IRS completed an audit in 2005 of the Company's 2002 and 2003 federal income tax returns. The audit resulted in a current income tax payable amount of $361,000 due to adjustments to depreciation, reserve accounts and recognition of a portion of the water sale gain that was previously deferred. This amount was partially offset by $285,000 in deferred tax liabilities previously established.

6. Capitalization

A. Stock Dividend

On July 25, 2005 a three-for-two stock split in the form of a stock dividend was issued to the shareholders of record on July 15, 2005. All common share information has been restated to reflect the stock split for all periods presented.

B. Common Shares Reserved

The Company has 3,833,352 authorized but unissued shares and 160,349 treasury shares as of December 31, 2006. The Company has reserved the following common shares for issuance as of December 31, 2006:

Dividend Reinvestment Plan	54,071
Employee Stock Purchase Plan	52,035
Board Compensation Plan	20,714

Deleted: Common Stock

Deleted: 3,833,352

C. Preferred Stock

The Company has 6,000 shares of 4 ¾% Series A preferred stock $100 par value authorized for issuance of which 6,000 were issued and outstanding at December 31, 2006. The Company also has 5,000, 4 ¾% Series B preferred stock $100 par value authorized for issuance none of which has been issued.

The Company also has 32,500, $1.12 Convertible Preference stock, $20 par value and $22 redemption price, authorized for issuance none of which has been issued.

D. Dividend Restriction

The Company's Fifteenth Supplemental Indenture of Mortgage and Deed of Trust restricts the amount that is available for cash dividends. At December 31, 2006, approximately $9 million of retained earnings were free of such restriction and therefore available for the payment of dividends. The line of credit agreement contains covenants that, if violated, could restrict or prevent the payment of dividends. At December 31, 2006 the Company is not in violation of these covenants.

E. Treasury Shares

In prior years, common shares resulting from stock dividends have been allocated to common shares held as treasury shares. Treasury shares are not eligible to receive such allocations. Some of these treasury shares were subsequently reissued, resulting in an overstatement of additional paid-in capital. Accordingly, the Company has restated all periods presented to reflect the correct number of treasury shares and the value of treasury shares and additional paid-in capital at each year-end. As the adjustment is a reallocation of amounts between treasury stock and additional paid-in capital, there is no effect on net income, earnings per common share or total stockholders' equity in any period presented.

Deleted: C

F. Employee Stock Purchase Plan

The Company's Employee Stock Purchase Plan offers common stock at a discount to qualified employees.

Deleted: . The following table shows the number of shares issued under the Plan and the total aggregate consideration received:¶
¶
Year ... [3]

G. Dividend Reinvestment Plan

The Company's Dividend Reinvestment Plan is offered to all Company shareholders and allows the shareholder to reinvest dividends received and purchase additional shares without a fee.

Deleted: The following table shows the number of shares issued under the Plan and the total aggregate consideration received:¶
¶
Year ... [4]

7. Long-term Debt

The Company issued its Fourteenth Series of FPU's First Mortgage Bond on September 27, 2001 in the aggregate principal amount of $15 million as security for the 6.85% Secured Insured Quarterly Notes, due October 1, 2031 (IQ Notes). Interest on the pledged bond accrues at the annual rate of 6.85% payable quarterly in arrears on January 1, April 1, July 1 and October 1 of each year beginning January 1, 2002.

The Company issued $14 million of Palm Beach County municipal bonds (Industrial Development Revenue Bonds) on November 14, 2001 to finance development in the area. The interest rate on the thirty-year callable bonds is 4.90%. The bond proceeds were restricted and held in trust until construction expenditures were actually incurred by the

Company. In 2002 the remaining $8 million was drawn from the restricted funds held by the trustee.

In 1992, the Company issued its First Mortgage Bond 9.08% Series in the amount of $8 million. The thirty-year bond is due in June 2022.

The Company issued two of its Twelfth Series First Mortgage bond series on May 1, 1988; the 9.57% Series due 2018 in the amount of $10 million and 10.03% Series due 2018 in the amount of $5.5 million. These two issuances require sinking fund payments of $909,000 and $500,000 respectively, beginning in 2008.

Long-term debt on the balance sheet has been reduced for unamortized debt discount. The unamortized debt discount at December 31 included in long-term debt on the balance sheet is $1.8 million in 2006 and $1.9 million in 2005.

Annual Maturities of Long-Term Debt
(Dollars in thousands)

	Total	2007	2008	2009	2010	2011	Thereafter
Long-term Debt	$52,500		$1,409	$1,409	$1,409	$1,409	$ 46,864

Deleted: 50
Deleted: 702
Deleted: $(82)
Deleted: 1,327
Deleted: 1,327
Deleted: 1,327
Deleted: 1,327
Deleted: 45,476

8. Notes Payable

In 2004, FPU entered into an amended and restated loan agreement that allows the Company to increase the line of credit upon 30 days notice by the Company to a maximum of $20 million. In 2006 the agreement was renewed with an expiration date of July 1, 2008. We have not exercised our option to increase the line of credit limit which is currently at $12 million with an outstanding balance of $3.5 million and a remaining amount available of $8.5 million. The Company reserves $1 million of the line of credit to cover expenses for any major storm repairs in its Northwest Florida division. An additional $250,000 of the line of credit is reserved for a 'letter of credit' insuring our propane facilities.

The average interest rates for the line of credit were as follows as of December 31:

Year	Rate
2006	6.2%
2005	5.3%
2004	3.3%

9. Fair Value of Financial Instruments

The carrying amounts reported in the balance sheet for investments held in escrow for environmental costs, notes payable, taxes accrued and other accrued liabilities approximate fair value. The fair value of long-term debt excluding the unamortized debt discount is estimated by discounting the future cash flows of each issuance at rates currently offered to the Company for similar debt instruments of comparable maturities. The values at December 31 are shown below.

Deleted: since the older bonds contain 'make whole' provisions that negates any fluctuation in interest rates

2006	2005

(in thousands)	Carrying Amounts	Approximate Fair Value	Carrying Amounts	Approximate Fair Value
Long-term debt	$ 52,500	$63,000	$52,500	$ 63,000

Deleted: ,000
Deleted: ,000
Deleted: ,000
Deleted: ,000

10. Contingencies

Environmental

The Company is subject to federal and state legislation with respect to soil, groundwater and employee health and safety matters and to environmental regulations issued by the Florida Department of Environmental Protection (FDEP), the United States Environmental Protection Agency (EPA) and other federal and state agencies. Except as discussed below, the Company does not expect to incur material future expenditures for compliance with existing environmental laws and regulations.

(Dollars in thousands)

Site	Range From	Range To
West Palm Beach	$ 4,801	$ 18,027
Sanford	710	710
Pensacola and Other	110	110
Total	$ 5,621	$ 18,847

Deleted: 710
Deleted: 710
Deleted: 85
Deleted: 85
Deleted: 596
Deleted: 822

The Company currently has $13.8 million reserved as an environmental liability. The FPSC approved up to $14 million for total recovery from insurance and rates based on the original 2005 projections as a basis for rate recovery. The Company has recovered a total of $5.5 million from insurance and rate recovery, net of costs incurred to date. The remaining balance of $8.3 million is recorded as a regulatory asset. On October 18, 2004 the FPSC approved recovery of $9.1 million for environmental liabilities (the remaining amount to be recovered is $8.3 million and is included on the balance sheet as "Other regulatory assets – environmental"). The amortization of this recovery and reduction to the regulatory asset began on January 1, 2005. The majority of environmental cash expenditures are expected to be incurred before 2010, but may continue for another 10 years.

West Palm Beach Site

The Company is currently evaluating remedial options to respond to environmental impacts to soil and groundwater at and in the immediate vicinity of a parcel of property owned by it in West Palm Beach, Florida upon which the Company previously operated a gasification plant. The Company entered into a Consent Order with the FDEP effective April 8, 1991, that requires the Company to delineate the extent of soil and groundwater impacts associated with the prior operation of the gasification plant and to remediate such soil and groundwater impacts, if necessary. The Company completed the delineation of soil and groundwater impacts at the site in October 2006. An engineering consultant was retained to perform a feasibility study to evaluate appropriate remedies for the site. The feasibility study was transmitted to FDEP on November 30, 2006.

The feasibility study evaluated a wide range of remedial alternatives based on criteria provided by applicable laws and regulations. The total costs for the remedies evaluated in the feasibility study ranged from a low of $2.8 million to a high of $54.6 million. Based on the likely acceptability of proven remedial

technologies described in the feasibility study and implemented at similar sites, consulting/remediation costs to address the impacts now characterized at the West Palm Beach site are projected to range from $4.6 million to $17.9 million. This range of costs covers such remedies as in situ solidification for deeper soil impacts, excavation of superficial soil impacts, installation of a barrier wall with a permeable biotreatment zone (PBZ), monitored natural attenuation of dissolved impacts in groundwater (MNA) or some combination of these remedies. The feasibility study proposed a remedy of superficial soil excavation, and installation of a hanging barrier wall with PBZ and MNA, the cost of which is projected to range from $4.6 million to $9.9 million.

Prior to FDEP's approval of a final remedy for the site, the Company is unable to determine, to a reasonable degree of certainty, the complete extent or cost of remedial action that may be required. As of December 31, 2006, and subject to the limitations described above, remediation costs (including attorneys' fees and costs) for this site are projected to range from approximately $4.8 million to $18 million.

Sanford Site
The Company owns a parcel of property located in Sanford, Florida, upon which a gasification plant was operated prior to its acquisition of the property. Following discovery of soil and groundwater impacts on the property, the Company has participated with four former owners and operators of the gasification plant in the funding of numerous investigations of the extent of the impacts and the identification of an appropriate remedy. On or about March 25, 1998, the Company executed an Administrative Order on Consent (AOC) with the four former owners and operators (collectively, the Group) and the EPA that obligated the Group to implement a Remedial Investigation/Feasibility Study (RI/FS) and to pay EPA's past and future oversight costs. The Group also entered into a Participation Agreement and an Escrow Agreement on or about April 13, 1998 (WFS Participation Agreement). Work under the RI/FS AOC and RI/FS Participation Agreement is now complete and the Company has no further obligations under either document.

In late September 2006, EPA sent a Special Notice Letter to the Company, notifying the Company of EPA's selection of a final remedy for OU1 (soils), OU2 (groundwater), and OU3 (sediments), and giving the Company and the other Group members sixty (60) days within which to submit a "good faith offer" to EPA to provide for implementation of the selected remedies. The Special Notice Letter included an Amended Record of Decision (ROD) for OU1 (the ROD for OU1 was amended to account for a significant increase in the volume of off-site soil impacts and a change in the selected remedy), the original ROD for OU2, and a ROD for OU3. The total estimated remediation costs for the Sanford Gasification Plant Site are now projected to be $12.5 million. On November 30, 2006, the Company and the Group submitted to EPA a good faith offer to implement the approved remedies as set forth in the RODs for OU1 through OU3.

In January, the Company along with the other members of the Group signed a Third Participation Agreement, which provides for funding the remediation work specified in the RODs for OU1 through OU3 and supercedes and replaces the Second Participation Agreement. The Company's share of remediation costs under the Third Participation Agreement is set at 5% of a maximum of $13 million, or

$650,000. At present, it is not anticipated that the total cost of remediation will exceed $13 million. If it does, the Group members have agreed to negotiate in good faith to allocate the excess costs at such time that it reasonably appears that the total remediation costs will exceed $13 million. In any such event, the Company does not expect our share of such additional costs to be greater than 5%; and its share of such additional costs may be less than 5%.

The Company's future legal costs and expenses and its share future remediation expenses for this site are currently projected to be approximately $710,000.

Deleted: 710,000

Pensacola Site
The Company is the prior owner/operator of the former Pensacola gasification plant, located in Pensacola, Florida. Following notification on October 5, 1990 that FDEP had determined that the Company was one of several responsible parties for any environmental impacts associated with the former gasification plant site, the Company entered into cost sharing agreements with three other responsible parties providing for the funding of certain contamination assessment activities at the site.

Following field investigations performed on behalf of the responsible parties, on July 16, 1997, FDEP approved a final remedy for the site that provides for annual sampling of selected monitoring wells. Such annual sampling has been undertaken at the site since 1998. The Company's share of these costs is less than $2,000 annually or a total of $27,000.

In March 1999, EPA requested site access in order to undertake an Expanded Site Inspection (ESI). The ESI was completed by EPA's contractor in 1999 and an ESI Report was transmitted to the Company in January 2000. The ESI Report recommends additional work at the site. The responsible parties met with FDEP on February 7, 2000 to discuss EPA's plans for the site. In February 2000, EPA indicated preliminarily that it will defer management of the site to FDEP; however, as of December 31, 2006, the Company has not received any written confirmation from EPA or FDEP regarding this matter. Prior to receipt of EPA's written determination regarding site management, the Company is unable to determine whether additional field work or site remediation will be required by EPA and, if so, the scope or costs of such work.

Key West Site
From 1927 to 1938, the Company owned and operated a gasification plant in Key West, Florida. The plant discontinued operations in the late 1940s; the property on which the plant was located is currently used for a propane gas distribution business. In March 1993, a Preliminary Contamination Assessment Report (PCAR) was prepared by a consultant jointly retained by the Company and the current site owner and was delivered to FDEP. The PCAR reported that very limited soil and groundwater impacts were present at the site. By letter dated December 20, 1993, FDEP notified the Company that the site did not warrant further "CERCLA consideration and a Site Evaluation Accomplished disposition is recommended." FDEP then referred the matter to its Marathon office for consideration of whether additional work would be required by FDEP's district office under Florida law. As of December 31, 2006, the Company has received no further communication from FDEP with respect to the site. At this time, we are unable to determine whether additional fieldwork will be required by FDEP and, if so, the scope or costs of such

work. In 1999, the Company received an estimate from its consultant that additional costs to assess and remediate the reported impacts would be approximately $166,000. Assuming the current owner shared in such costs according to the allocation agreed upon by the parties for the PCAR, the Company's share would be approximately $83,000.

11. Commitments

A. General

To ensure a reliable supply of electric and natural gas at competitive prices, the Company has entered into long-term purchase and transportation contracts with various suppliers and producers, which expire at various dates through 2015. Purchase prices under these contracts are determined by formulas either based on market prices or at fixed prices. At December 31, 2006, the Company has firm purchase and transportation commitments adequate to supply its expected future sales requirements. The Company is committed to pay demand or similar fixed charges of approximately $37.8 million during 2007 related to gas purchase agreements. Substantially all costs incurred under the electric and gas purchase agreements are recoverable from customers through fuel adjustment clause mechanisms.

B. Operating Leases

The Company's total operating lease obligation is $352,000. The Company is leasing property from the City of Fernandina Beach in our Northeast division. The Company is in the process of renegotiating the terms of this lease and it may be able to terminate this lease at an earlier date. The Company leases an appliance showroom in the same division for approximately $35,000 annually. The Company also has other operating lease agreements with various terms and expiration dates. The following table shows the approximate future obligations under noncancelable agreements.

	2007	2008	2009	2010	2011
Operating Lease Obligations	$151,000	$116,000	$47,000	$38,000	-

12. Employee Benefit Plans

The actuarial valuation of the retirement plan obligations has been completed and the recognition provisions of Statement 158 at December 31, 2006 resulted in an additional liability for retirement plans, pension plan and retirees medical plan. See Footnote 1J, Impact of Recent Accounting Standards, Financial Accounting Standard 158 for a summary of the impact to our financial statements.

A. Pension Plan

The Company sponsors a qualified defined benefit pension plan for non-union employees that were hired before January 1, 2005 and for unionized employees that work under one of the six Company union contracts and were hired before their respective contract dates in 2005.

Deleted: that approved this change in 2005. Our six union contracts have accepted this change for their new members hired after

The following tables provide a reconciliation of the changes in the plan's benefit obligations and fair value of assets over the 3-year period ending December 31, 2006 and a statement of the funded status as of December 31, of all three years:

	(c)	Real Estate	5%-15%	0%	0%	0%
	(d)	Other	5%-15%	2%	1%	1%
	(e)	Total		100%	100%	100%

Expected Return on Plan Assets

The expected rate of return on plan assets is 8.5%. The Company expects 8.5% to fall within the 40 to 50 percentile range of returns on investment portfolios with asset diversification similar to that of the Pension Plan's target asset allocation.

Investment Policy and Strategy

The Company has established and maintains an investment policy designed to achieve a long-term rate of return, including investment income and appreciation, sufficient to meet the actuarial requirements of the Pension Plan. The Company seeks to accomplish its return objectives by investing in a diversified portfolio of equity, fixed income and cash securities seeking a balance of growth and stability as well as an adequate level of liquidity for pension distributions as they fall due. Plan assets are constrained such that no more than 10% of the portfolio will be invested in any one issue.

Voluntary Prescription Drug Coverage

Legislation enacted in December 2003 provides for the addition of voluntary prescription drug coverage under Medicare starting in 2006. The legislation also provides for a 28% tax-free subsidy for each qualified covered retiree's drug cost between certain thresholds if the employer's coverage is at least actuarially equivalent to the standard Medicare drug benefit. Based on the final regulations issued by the Centers for Medicare and Medicaid Services on January 21, 2005, we determined our prescription drug coverage of the Postretirement Medical Benefits plan to be actuarially equivalent to Medicare Part D.

Discount Rate Assumption

The discount rate assumption used to determine the postretirement benefit obligations is based on current yield rates in the double A bond market. The current year's discount rate was selected using a method that matches projected payouts from the plan with a zero-coupon double A bond yield curve. This yield curve was constructed from the underlying bond price and yield data collected as of the plan's measurement date and is represented by a series of annualized, individual discount rates with durations ranging from six months to thirty years. Each discount rate in the curve was derived from an equal weighting of the double A or higher bond universe, apportioned into distinct maturity groups. These individual discount rates are then converted into a single equivalent discount rate, which is then used for FAS discount purposes. To assure that the resulting rates can be achieved by a postretirement benefit plan, only bonds that satisfy certain criteria and are expected to remain available through the period of maturity of the plan benefits are used to develop the discount rate. Prior years' discount rate assumptions were set based on investment yields available on double A, long-term corporate bonds.

Actuarial Equivalent

In determining "Actuarial Equivalence," our plan's actuary, Aon Consulting, proprietary prescription drug pricing tool, Aon Rx, was used. This tool allowed us to determine the estimated Per Member Per Month (PMPM) prescription drug cost

for both the Company plan and the Medicare plan. The two PMPM's were adjusted for monthly retiree contributions. We assumed that 60% of the monthly combined medical and prescription drug retiree contribution for the Company plan applies towards prescription drugs.

Deleted: Because the subsidy is the same regardless of the cost sharing structure unless the plan is not "Actuarial Equivalent", in general a plan that has higher cost sharing would reduce their annual cost as a percentage greater than a plan would that has lower cost sharing.

C. Health Plan

In December 2003, the Company became fully insured for its employee and retiree's medical insurance. Net health care benefits paid by the Company for active employees were approximately $1.7 million in 2006, $1.6 million in 2005 and $1.5 million in 2004, excluding administrative and stop-loss insurance.

D. 401K Plan

The Company has discontinued eligibility to the defined benefit pension plan for all new hires, and replaced it with a new 401K match.

For new hires not eligible for the defined benefit pension plan, we established an employer match to the employee's contribution to their 401K plans. It provided for a company match of 50% for each dollar contributed by the employee, up to 6% of their salary, for a Company contribution of up to 3%. Beginning in 2007, for non-union employees the plan was enhanced to provide a company match of 100% for the first 2% of an employee's contribution, and a match of 50% for the next 4% of an employee's contribution, for a total company match of up to 4%. This new enhanced match will be negotiated with our six union contracts during 2007, to be effective on their respective contract date within 2007. The employees are eligible for the company match after six months of continuous service, with vesting of 100% after three years of continuous service. The expenses incurred in 2005 and 2006 relating to the Company's 401K plan are not material.

E. **Employee Stock Purchase Plan**

The Company offers an employee stock purchase plan to substantially all of its employees. The plan offers a 15% discount on the Company's stock at market price fixed six months prior to the date of purchase. The recorded stock compensation expense relating to the Company's employee stock purchase plan is not material.

13. Segment Information

The Company is organized into two regulated business segments: natural gas and electric, and one non-regulated business segment, propane gas. There are no material inter-segment sales or transfers.

Identifiable assets are those assets used in the Company's operations in each business segment. Common assets are principally cash and overnight investments, deferred tax assets and common plant.

Business segment information for 2006, 2005 and 2004 is summarized as follows:

(Dollars in thousands)	2006	2005	2004
Revenues			
Natural gas	$ 70,981	$ 69,094	$ 55,962
Electric	48,527	47,450	42,910

Propane gas	14,727	13,479	11,167
Consolidated	$ 134,235	$ 130,023	$ 110,039
Operating income, excluding income tax			
Natural gas	$ 6,118	$ 6,049	$ 4,978
Electric	3,137	3,502	3,353
Propane gas	1,074	1,086	655
Consolidated	$ 10,329	$ 10,637	$ 8,986
Identifiable assets			
Natural gas	$ 93,689	$ 96,106	$ 87,729
Electric	52,251	51,317	48,687

14. Quarterly Financial Data (Unaudited)

The quarterly financial data presented below reflects the influence of seasonal weather conditions, the timing of rate increases and the migration of winter residents and tourists to Central and South Florida during the winter season. Significant increases in the fourth quarter of 2005 expenses relate to the performance of previously delayed expenditures from previous quarters.

(Dollars in thousands, except per share amounts):	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
2006				
Revenues	$ 43,348	$ 29,878	$ 29,415	$ 31,594
Gross profit	$ 14,135	$ 11,402	$ 10,867	$ 11,860
Operating income	$ 4,528	$ 2,065	$ 1,488	$ 2,248
Earnings before income taxes	$ 3,507	$ 1,162	$ 609	$ 1,281

Net Income	$ 2,221	$ 738	$ 475	$ 830
Earnings per common share (basic and diluted):				
Continuing operations	$ 0.37	$ 0.12	$ 0.08	$ 0.14
2005				
Revenues	$ 35,438	$ 28,329	$ 29,190	$ 37,066
Gross profit	$ 13,619	$ 10,963	$ 10,374	$ 12,263
Operating income	$ 4,684	$ 2,215	$ 1,578	$ 2,160
Earnings before income taxes	$ 3,711	$ 1,205	$ 573	$ 1,046
Net Income	$ 2,353	$ 851	$ 260	$ 784
Earnings per common share (basic and diluted):				
Continuing operations	$ 0.40	$ 0.14	$ 0.04	$ 0.13

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Directors and Shareholders of FPU:

We have audited the accompanying consolidated balance sheets and statements of capitalization of Florida Public Utilities Company and its wholly-owned subsidiary, Flo-Gas Corporation as of December 31, 2006 and 2005 and the related consolidated statements of income, comprehensive income, common shareholders' equity and cash flows for each of the three years in the period ended December 31, 2006. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements and schedules, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Florida Public Utilities Company and its wholly-owned subsidiary, Flo-Gas Corporation at December 31, 2006 and 2005, and the results of its operation and its cash flows for each of the three years in the period ended December 31, 2006, in conformity with accounting principles generally accepted in the United States of America.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None

Item 9A. Controls and Procedures

Disclosure Controls and Procedures

Our management carried out an evaluation, under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, of the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act). Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that, as of December 31, 2006, our disclosure controls and procedures were effective, in that they provide reasonable assurance that information required to be disclosed by us in the reports that we file or submit under the Exchange Act are recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

Changes in Internal Control over Financial Reporting

No change in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) occurred during the fiscal quarter ended December 31, 2006 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Item 9B. Other Information

None

PART III

Item 10. Directors and Executive Officers of the Registrant

Information required by this item concerning directors and nominees of the Registrant will be included under the caption "Information About Nominees and Continuing Directors" in the Registrant's Proxy Statement for the 2007 Annual Meeting of Shareholders (the "2007 Proxy Statement") and is incorporated by reference herein. Information required by this item regarding the Audit Committee will be included under the caption "Board of Directors and Committees" in the 2007 Proxy Statement and is incorporated by reference herein. Information required by this Item regarding the Code of Ethics will be included under the caption "Code of Ethics" in the 2007 Proxy Statement and is incorporated by reference herein. Information required by this Item regarding compliance with Section 16(a) of the Exchange Act will be set forth in the 2007 Proxy Statement under "Section 16(a) Beneficial Ownership Reporting Compliance" and is incorporated by reference herein. Information required by this Item concerning executive officers is set out in Part I of this Form 10-K, above.

Item 11. Executive Compensation

Information required by this Item concerning executive compensation is included under the captions "Board of Directors and Committees", "Executive Compensation", and "Compensation Committee Interlocks and Inside Participation" in the 2007 Proxy Statement is incorporated by reference herein.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

Information required by this Item concerning the security ownership of certain of the Registrant's beneficial owners and management is included under the caption "Security Ownership of Management and Certain Beneficial Owners" in the 2007 Proxy Statement and is incorporated by reference herein. See Item 5 above for equity compensation plan information, which is incorporated by reference herein.

Item 13. Certain Relationships and Related Transactions

None.

Item 14. Principal Accountant Fees and Services

Information required by this Item is set forth in the Registrant's 2007 Proxy Statement under the caption "Principal Accountant Fees and Services" and is incorporated by reference herein.

PART IV

Item 15. Exhibits, Financial Statement Schedules

(a) The following documents are filed as part of this report:

(1) Financial Statements
The following consolidated financial statements of the Company are included herein and in the Registrant's 2006 Annual Report to Shareholders:

Consolidated Statements of Income
Consolidated Statements of Comprehensive Income
Consolidated Balance Sheets
Consolidated Statements of Capitalization
Consolidated Statements of Common Shareholders' Equity
Consolidated Statements of Cash Flows
Notes to Consolidated Financial Statements
Report of Independent Registered Public Accounting Firm

(2) Financial Statement Schedules
The following valuation and qualifying accounts table is included in Note 1.H. herein and in the Registrant's 2006 Annual Report to Shareholders:

Allowance for Doubtful Accounts

Financial Accounting Standard Board Interpretation No. 47

In March 2005, the FASB issued Interpretation No. 47, "An Interpretation of FASB Statement No. 143". SFAS No. 143, "Accounting for Asset Retirement Obligations", requires that the fair value of an asset retirement obligation be recognized at the time those obligations are incurred. Upon initial recognition of a legal liability, costs are capitalized as part of the related long-lived asset and allocated to expense over the useful life of the asset. SFAS No. 143 also requires that components of previously recorded depreciation related to the cost of removal of assets upon retirement, whether legal asset retirement obligations or not, be removed from a company's accumulated depreciation reserve. We adopted the provisions of the Statement as of January 1, 2003, as prescribed by the FPSC. Under FPSC guidelines, the estimated cost of removal expenses for normal retirements related to regulated fixed assets were reserved through the depreciation expense and accumulated reserves. This was disclosed in a footnote until December 31, 2003, when the estimated cost of removal from accumulated depreciation was reclassified to a regulatory liability for the obligation.

This Interpretation addresses the legal obligation to retire an asset when the timing and (or) method of settlement are conditional on a future event that may or may not be within the control of the Company. This Interpretation is effective no later than the end of fiscal years ending after December 15, 2005 (December 31, 2005 for calendar-year entities). We adopted FIN No. 47 as of January 1, 2006. The adoption of this Interpretation has not had an impact to our financial condition or results of operations.

Financial Accounting Standard Board Interpretation No. 47

In March 2005, the FASB issued Interpretation No. 47, "An Interpretation of FASB Statement No. 143". SFAS No. 143, "Accounting for Asset Retirement Obligations", requires that the fair value of an asset retirement obligation be recognized at the time those obligations are incurred. Upon initial recognition of a legal liability, costs are capitalized as part of the related long-lived asset and allocated to expense over the useful life of the asset. SFAS No. 143 also requires that components of previously recorded depreciation related to the cost of removal of assets upon retirement, whether legal asset retirement obligations or not, be removed from a company's accumulated depreciation reserve. The Company adopted the provisions of the Statement as of January 1, 2003, as prescribed by the FPSC. Under FPSC guidelines, the estimated cost of removal expenses for normal retirements related to regulated fixed assets were reserved through the depreciation expense and accumulated reserves. This was disclosed in a footnote until December 31, 2003, when the estimated cost of removal from accumulated depreciation was reclassified to a regulatory liability for the obligation.

This Interpretation addresses the legal obligation to retire an asset when the timing and (or) method of settlement are conditional on a

future event that may or may not be within the control of the Company. This Interpretation is effective no later than the end of fiscal years ending after December 15, 2005 (December 31, 2005 for calendar-year entities). We adopted FIN No. 47 as of January 1, 2006. The adoption of this Interpretation has not had an impact to our financial condition or results of operations.

☒ **ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT** OF 1934
For the fiscal year ended December 31, 2006

OR

☐ **TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**
For the transition period from ____________ to ____________

Commission file number 001-10608

Florida Public Utilities Company
(Exact name of the registrant as specified in its charter)

Florida	59-0539080
(State or other jurisdiction of Incorporation or organization)	(I.R.S. Employer Identification Number)

401 South Dixie Highway, West Palm Beach, FL 33401
(Address of principal executive offices, Zip Code)

Registrant's telephone number, including area code (561) 832-0872

Securities registered pursuant to section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
Common Stock par value $1.50 per share	American Stock Exchange

Securities registered pursuant to section 12(g) of the Act:

____
(Title of class)

____
(Title of class)

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. [ ] Yes [X] No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. [ ] Yes [X] No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. [X] Yes [ ] No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. [X]

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer" and "large accelerated filer" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer [ ] Accelerated filer [ ] Non-accelerated filer [X]

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). [ ] Yes [X] No

As of June 30, 2006, the aggregate market value of the Registrant's Common Stock held by non-affiliates (based upon the closing price of the Common Stock on that date on the American Stock Exchange) was approximately $71,300,000.

On February 9, 2007, 6,024,739 shares of the Registrant's $1.50 par value common stock were outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the registrant's Proxy Statement for the May 8, 2007 Annual Meeting of Shareholders are incorporated by reference in Part III hereof.

PART I

Item 1. Business

General

Florida Public Utilities Company (FPU) was incorporated on March 6, 1924 and reincorporated on April 29, 1925 under the 1925 Florida Corporation Law. We provide natural gas, electricity and propane gas to residential, commercial and industrial customers in Florida. We do not produce energy and are not a generating utility. Our regulated segments sell natural gas and electricity to approximately 82,000 customers, and our unregulated segment sells propane gas through a wholly owned subsidiary, Flo-Gas Corporation, to approximately 13,000 customers. We also sell merchandise and other service related products on a limited basis as a complement to the natural and propane gas segments.

Our three primary business segments are aligned with our products and are natural gas, electric and propane gas. The Florida Public Service Commission (FPSC) regulates the natural gas and electric segments. We operate through five divisions based on geographic areas:

(1) South Florida Division - provides natural and propane gas to customers in West Palm Beach, Palm Beach Gardens, North Palm Beach, Jupiter, Riviera Beach, Palm Beach, Lake Worth, Royal Palm Beach, Wellington, Boynton Beach, Delray Beach, Boca Raton, Lauderdale Lakes, Deerfield Beach, Stuart, Palm City and other areas near these cities.
(2) Central Florida Division - provides natural and propane gas to customers in Sanford, Deland, Deltona, DeBary, Orange City, Lake Mary, Winter Springs, New Smyrna Beach, Edgewater, Longwood, Port Orange and other areas near these cities.
(3) Northwest Florida Division - provides electricity to customers in Marianna, Bristol, Altha, Cottondale, Malone, Alford and other areas near these cities.
(4) Northeast Florida Division - provides electricity and propane gas to customers in Fernandina Beach, Jacksonville, Callahan, Yulee and other areas near these cities.
(5) West Florida Division - provides propane gas to customers in Dunnellon, Inglis, Crystal River, Inverness, Brooksville and other areas near these cities.

Business Environment

Natural and propane gas are some of the most popular forms of energy today. Gas is used for heating, cooling, cooking, backup generation and decorative lighting by businesses and homeowners and in many other ways by various industries. Natural gas is also used in combination with other fuels to improve environmental performance and decrease pollution in the generation of electricity.

Natural and propane gas have seen increased demand in Florida as a result of the recent hurricanes and the popularity of generators. Generators themselves do not impact usage significantly for a region; however, gas appliances have been added as a result of generator popularity, and that does increase gas usage. Prices of natural and propane gas

have decreased during 2006 due in part to the absence of a hurricane affecting the Gulf of Mexico.

As a result of historically high natural gas costs in 2005, alternatives such as coal and nuclear power for generation of electricity have seen increased interest. Our sales in the electric segment have not been impacted by higher electricity costs due to our long-term favorable fixed price contracts for purchasing electricity. However, our long-term contract ended at the end of 2006 for our Northeast division and our long-term contract will end at the end of 2007 for our Northwest division. We now have new contracts in place with pricing much closer to current market price. Our electric prices are expected to significantly increase. Although this will not directly impact our income from operations because increased fuel costs are passed through to the customer, this may impact the number of units sold and decrease income from operations as a result of less usage.

Because of the hurricanes in 2004 and 2005, the electric industry in Florida has seen increased interest in improving reliability of electric services during and after hurricanes. Regulators have been researching the issue and have introduced new storm preparedness requirements to improve electric reliability with storm preparedness rules regarding pole inspections, strengthened design specifications for wind loading, vegetation management practices and installation of underground facilities for electric distribution and transmission systems. We are seeking rate relief and implementation for these new requirements in 2007.

Business Segments
We are organized in three operating and reporting segments: natural gas, electric and propane gas. We are also involved in limited merchandise sales and other services within our natural gas and propane gas areas to complement these segments. For information concerning revenues, operating income and identifiable assets of each of our segments, see Note 13 in Notes to Consolidated Financial Statements.

Natural Gas
Natural gas is primarily composed of methane, which is a colorless, odorless fuel that burns cleaner than many other traditional fossil fuels. Odorant is added to enable easy detection of a gas leak.

We provide natural gas to customers in our South and Central Florida divisions. The vast majority of the natural gas we distribute is purchased in the Gulf Coast region, both onshore and offshore.

We use Florida Gas Transmission (FGT) as our natural gas pipeline in peninsular Florida. FGT is under the jurisdiction of the Federal Energy Regulatory Commission (FERC). We use gas marketers and producers to procure all gas supplies for our markets. We use Florida City Gas and Indiantown Gas Company to provide wholesale gas transportation services in areas distant from our interconnections with FGT. We pass all fuel costs on to our customers. We also transport natural gas for customers who purchase their own gas supplies and arrange for pipeline transportation. Our operating results are not adversely affected if our customers purchase gas from third parties because we do not profit on the fuel portion of sales.

Our natural gas revenues are affected by the rates charged to customers, supply costs for natural gas purchased for resale, economic conditions in our service areas and weather.

Although the FPSC permits us to pass through to customers the increase in price for our gas supply, higher rates may cause customers to purchase less natural gas.

Our current portfolio of natural gas customers is reasonably diverse, with the largest customer using natural gas for the generation of electricity. We are not dependent on any single natural gas customer for over ten percent of our total natural gas revenues.

The FPSC approved joint transportation and territorial agreements with Indiantown Gas Company in October 2006. We plan to transport natural gas through Indiantown's system to new developments. In the early phase, Indiantown Gas Company will provide operational and customer service related work. We also began construction in the Indiantown area to install natural gas mains in the first phase of a development for approximately 100 homes. Two more new developments are slated to break ground in 2007 for construction of approximately 1,000 homes.

Electric
We provide electricity to our customers in our Northwest and Northeast Florida divisions. Wholesale electricity is purchased from two suppliers; Gulf Power Company and JEA (formerly Jacksonville Electric Authority). In 1996, we executed ten-year fixed-price purchased power contracts with both suppliers. Gulf Power Company provides electric power to the Northwest division and JEA provides electric power to the Northeast division. These long-term contracts provided our customers with the lowest consumer electric rates in Florida.

During 2006 we completed negotiations and executed final contracts for the supply of electricity in our Northeast division from JEA beginning January 1, 2007 and our Northwest division from Gulf Power Company beginning in January 1, 2008. We are seeking approval of the contract with Gulf Power Company from the FPSC in 2007. We expect that rates charged to our customers will significantly increase when the new contracts become effective in 2007 and 2008 because the prices are closer to market price. We are unable to estimate what impact higher rates could have on electric consumption, but electricity usage could decrease.

The Northwest and Northeast divisions experience a variety of weather patterns. Hot summers and cold winters produce year-round electric sales that normally do not have highly seasonal fluctuations. None of the electric segment's customers represent more than ten percent of our total electric revenues.

The electric utility industry has not been deregulated in the state of Florida. All customers within a given service or franchise area purchase from a single electricity provider in that area.

Propane Gas
We provide propane gas to customers in our Northeast, West, Central and South Florida divisions and can purchase our propane gas supply from several different wholesale companies. Propane gas is delivered to Florida by barges and railcars to terminals in Tampa and Ft. Lauderdale, and through the Dixie Pipeline terminus at Alma and Albany, Georgia. Propane gas is also delivered by transport to our facilities and directly to a customer's premise. We believe that the propane gas supply infrastructure is adequate to meet the needs of the industry in Florida for the foreseeable future.

Propane gas is not as affected by environmental regulations as other petroleum products. However, propane gas is a hazardous material and as such is subject to strict code enforcement and safety requirements.

As with natural gas, the sales volume of propane gas is affected by the season and the weather. Typically, Florida has a tourist season that coincides with the winter months. The propane gas segment's sales volumes and revenues are closely balanced between residential and commercial customers. We employ two strategies to become less weather dependent, concentrating on the forklift propane gas cylinder exchange market and marketing propane gas appliances not used for heating air. We believe that water heaters and forklift cylinder exchange accounts are good ways to become less weather reliant. None of the propane gas segment's customers represent more than ten percent of our total propane gas sales volume or revenues.

Strategy
Our strategy is to leverage our expertise in the natural gas, electric and propane gas distribution business to assist us in consistently meeting our customer's expectations. Our core focus is to build mutually beneficial relationships with builders, developers and customers with high-energy usage requirements. Included in our strategy is a plan to enhance our future success by expanding our service territory into new areas with high growth potential.

Competition
We do not face substantial competition in our electric divisions. This is because no other competitor can currently provide the same energy in our areas due to FPSC regulations and territorial agreements between utilities. In addition, natural gas as an alternative fuel is only available in a small area served by our electric divisions. Although our natural gas segment operates with the same types of guidelines, there is competition in our natural gas segment from electric utilities. Normally each home will have electricity as a base fuel and natural gas as an alternative source of energy used for cooking and heating. Electricity competes with natural gas, in large part based on the cost of fuel. Our propane gas segment is unregulated and faces competition from other suppliers of propane gas as well as alternative energy source suppliers. Competition in the propane gas segment is primarily based on price and service.

Rates and Regulation
The natural gas and electric segments are highly regulated by the FPSC. The FPSC has the authority to regulate our rates, conditions of service, issuance of securities and certain other matters affecting our natural gas and electric operations. As a result, FPSC regulation has a significant effect on our results of operations. The FPSC approves rates that are intended to permit a specified rate of return on investment. Our rate tariffs allow the cost of natural gas and electricity to be passed through to customers. Increases in the operating expenses of the regulated segments may require us to request increases in the rates charged to our customers. The FPSC has granted us the flexibility of automatically passing on increased expenses for certain fuel costs to customers. Other operational expenses, such as pension and medical expenses require us to petition the FPSC for rate increases. The FPSC is likely to grant rate increases to offset increased expenditures necessary for business operations. We successfully petitioned for an electric rate increase, which became effective on March 17, 2004, and for a natural gas rate increase that went into effect on November 18, 2004. We are currently seeking electric

rate relief in 2007 for the recent storm preparedness requirements implemented to improve reliability of electric utility systems.

We are subject to federal and state regulation with respect to soil, groundwater, employee health and safety matters and to environmental regulations issued by the Florida Department of Environmental Protection (FDEP), the United States Environmental Protection Agency (EPA) and other federal and state agencies.

Prior to the widespread availability of natural gas, we manufactured gas for sale to our customers or purchased utility assets from other companies that manufactured gas. The process for manufacturing gas produced by-products and residuals such as coal tar. The remnants of these residuals are sometimes found at former gas manufacturing sites. These sites face environmental regulation from various agencies including the FDEP and EPA on necessary cleanup and restoration.

Franchises
We hold franchises in each of the incorporated municipalities that require franchise agreements in order to provide natural gas and electricity. Generally, these franchises have terms ranging from 10 to 30 years and terminate on varying dates. We are currently in negotiations with certain municipalities for new service areas within our current operating divisions, and renewals of existing franchises. We continue to provide services to these municipalities and do not anticipate any interruption in our service.

Employees
As of January 18, 2007, we had 362 employees, of which 9 were part-time and 2 were temporary. Of these employees, 175 were covered under union contracts with two labor unions, the Internal Brotherhood of Electric Workers and the International Chemical Workers Union. We believe that our labor relations with employees are good.

Available Information
We file periodic reports including our Form 10-Qs, Form 10-Ks, and Form 8-Ks with the Securities and Exchange Commission (SEC). The most recent copies of Form 10-Qs and Form 10-Ks as well as a copy of our Code of Ethics Policy can be obtained through our website (http://www.fpuc.com).

Item 1A. Risk Factors

A substantial portion of our revenues and, to a large extent, our profitability, depends upon rates determined by the FPSC.

FPSC regulates many aspects of our natural gas and electric operating segments, including the retail rates that we may charge customers for natural gas and electric service. Our retail rates are set by the FPSC using a cost-of-service approach that takes into account our historical operating expenses, our fixed obligations and recovery of our capital investments, including potentially stranded obligations. Using this approach, the FPSC sets rates at a level calculated to recover such costs, adjusted to reflect known and measurable changes, and a permitted return on investment. Any rate adjustments to recover increased costs or to otherwise improve our profitability must be obtained through a petition filed with the FPSC, which is referred to as a rate case. The rates permitted by the FPSC in rate cases will determine a substantial portion of our revenues for succeeding periods and may have a material impact on our consolidated earnings, cash flows and

financial position, as well as our ability to maintain our common stock dividend at current levels or to increase our dividend in the future.

Some of our natural gas and electric service costs may not be fully recovered through retail rates.

Our natural gas and electric service retail rates, once established by the FPSC, remain fixed until changed in a subsequent rate case. We may at any time elect to file a rate case to request a change in our rates or intervening parties may request that the FPSC review our rates for possible adjustment, subject to any limitations that may have been ordered by the FPSC. Earnings could be reduced to the extent that our operating costs increase more than our revenues during the period between rate cases, which may occur because of maintenance and repair of plants, fuel and purchased power expenses, employee or labor costs, inflation or other factors. In addition, even if we decide to file rate cases, our requests for rate adjustments in such rate cases may be rejected. Other parties to a rate case or the FPSC staff may contend that our current rates, or rates proposed in a rate case, are excessive and our petition for rate adjustments may be denied on that or another basis.

Our segments are sensitive to variations in weather.

Our segments are affected by variations in general weather conditions and unusually severe weather. We forecast energy sales on the basis of normal weather, which represents a long-term historical average. Significant variations from normal weather could have a material impact on energy sales. Unusual weather, such as hurricanes, could also adversely affect operating costs and sales.

Our natural gas and propane gas customers use gas primarily for heating purposes. As a result, our natural gas and propane gas sales peak in the winter and are more weather sensitive than electricity sales, which peak in both summer and winter periods. Mild winter weather in Florida can be expected to negatively impact results from our natural gas and propane gas operations. Severe weather conditions could also interrupt or slow down service and increase the operating costs of all our segments.

We operate in an increasingly competitive industry, which may affect our future earnings.

Natural Gas
The natural gas distribution industry has been subject to competitive forces for several years. We receive our supply of natural gas at thirteen city gate stations connected to an interstate pipeline system owned by FGT and one gate station connected to an intrastate pipeline owned by Florida City Gas Company. Gulfstream Natural Gas System currently also serves peninsular Florida with interstate natural gas transmission service; however we cannot predict if this system will be extended to areas near our existing facilities and how it could affect our natural gas operations.

Electric
The U.S. electric power industry has been undergoing restructuring. There is competition in wholesale power sales on a national level. Some states have mandated or encouraged competition at the retail level. While there is active wholesale competition in Florida, the retail electric business has remained substantially free from direct competition. Changes

in the competitive environment occasioned by legislation, regulation, market conditions or initiatives of other electric power providers, particularly with respect to retail competition, could adversely affect our financial condition and results of operations. To the extent competitive pressures increase and the pricing and sale of electricity assumes more of the characteristics of a commodity business, the economics of our electric operating segment may come under increasing pressure. In addition, regulatory changes may increase access to electricity transmission grids by utility and non-utility purchasers and sellers of electricity, thus potentially resulting in a significant number of additional competitors.

Propane Gas
Our propane gas business is our only non-regulated business segment. Because the propane gas business is not regulated, we face significant competition in this segment. Our propane gas business competes directly with other distributors of propane gas, and other sources of energy including natural gas and electric. We may encounter increased competition in the propane gas business in the future. Our inability to compete effectively in the propane gas business, whether on the basis of price, customer service, alternative energy sources or otherwise, could have a material adverse effect on our financial condition and results of operations.

Our business could be adversely affected if our supply of natural gas is interrupted.

FGT's pipeline system transports all of our natural gas. FGT is owned by Citrus Corporation, which is jointly owned by Cross Country Energy Corporation and El Paso Corporation. Our ability to receive our normal supply of natural gas could be adversely affected by an interruption in FGT's service.

General economic conditions may adversely affect our segments.

Our segments are affected by general economic conditions. The consumption of the energy we supply is directly tied to the economy. A downturn in the economy in our local areas of operations, as well as on the state, national and international levels, could adversely affect the performance of our segments. Changes in political climate, including terrorist activities, could further negatively impact our performance. If tourism is down, then the demand for the energy we supply is reduced.

Commodity price changes may affect the operating costs and competitive position of our segments.

Our segments are sensitive to changes in coal, gas, oil and other commodity prices. If we are unable to increase the rates we charge to customers to reflect increases in these commodity prices, our margins and earnings will be lowered. If increased prices for any of these commodities persist for substantial periods, our competitive position could be adversely affected by customers who switch to cheaper energy sources. Further, natural gas prices have been increasingly volatile and, accordingly, the earnings from our natural gas operations are increasingly difficult to predict.

We could incur material expenses as a result of our obligations to comply with existing and new environmental laws and regulations.

We are subject to environmental regulations in connection with the ongoing conduct of our business and to civil and criminal liability for failure to comply with these regulations. In addition, new environmental laws and regulations, or new interpretations of existing laws and regulations, affecting our operations or facilities may be adopted which may cause us to incur additional material expenses.

We are subject to federal and state legislation with respect to soil, groundwater, employee health and safety matters and to environmental regulations issued by the Florida Department of Environmental Protection (FDEP), the EPA and other federal and state agencies. We may incur material future expenditures in order to comply with these existing environmental laws and regulations.

We rely on a limited number of natural gas and electric suppliers, the loss of which could materially adversely affect our financial condition and results of operations.

Two pipeline suppliers under several contracts having expiration dates from 2007 to 2023 transport our natural gas to us. These contracts have provisions, which allow us to extend the terms ranging from 2020 to 2032. Our electric services are provided by two suppliers under contracts, which expire in 2007 and 2017. We have renegotiated a new contract for the one that is set to expire in 2007 with the same supplier for electric service beginning in 2008 which we are currently awaiting approval for from the FPSC. If we were to lose any of these contracts, we might not be able to replace the corresponding energy source on acceptable terms, if at all. In addition, in the event of the expiration of the contracts, we might not be able to renew them on favorable terms, if at all. As a result, the loss of any of these suppliers, the terminations of any of these supply contracts or the non-renewal of any of these supply contracts before or upon their expiration could have material adverse effects on our financial condition and results of operations.

New supply contracts could result in substantial increases to our prices, and could materially adversely affect our financial condition and results of operations.

Two pipeline suppliers under firm contracts having expiration dates from 2007 to 2023 transport our natural gas to us. All of these contracts have provisions which allow us to extend the terms ranging from 2020 to 2032. Our electric services are provided by two suppliers under contracts, which expire in 2007 and 2017.

The recent renewal of the electricity supply contract that was terminated in 2006 and the one that will expire in 2007 will result in the cost of electricity more than doubling over existing prices. Extensions or renewals of our natural gas contracts could result in the cost of natural gas increasing. Although these increases are currently passed through to our customers, these could have a significant impact on our financial condition and results of operations due to decreased consumption or if costs cannot be passed through in the future.

Fluctuation in prices under long-term purchase and transportation commitments may have an adverse effect on our financial condition and results of operations.

To ensure a reliable supply of electricity and natural gas at competitive prices, we have entered into purchase and transportation contracts with various suppliers and producers, which expire at various dates through 2023. Purchase prices under these contracts are determined by formulas either based on market prices or at fixed prices.

As of December 31, 2006, we have firm purchase and transportation commitments adequate to supply our expected sales requirements for electricity with contracts that will expire in 2017. Our contract in the Northeast division of the electric segment began January 1, 2007 and expires on December 31, 2017. We have a contract with a supplier for the Northwest division beginning January 1, 2008 and expiring December 31, 2017. We are currently seeking approval with the FPSC for the Northwest division contract. If the FPSC does not approve this contract, we may need to seek an alternative supplier or new contract with this same supplier for the purchase of electricity in the Northwest division.

Our natural gas pipeline transportation contracts expire in parts in 2010, 2015 and 2023. We are committed to pay demand or similar fixed charges monthly through 2023 related to the natural gas pipeline transportation agreements. Significant fluctuation in prices under these long-term purchase and transportation commitments may have a material adverse effect on our financial condition and results of operations.

Problems with operations could materially adversely impact us.

We are subject to various operational risks, including accidents, outages, equipment breakdowns or failures, or operations below expected levels of performance or efficiency. Problems such as the breakdown or failure of transmission lines, pipelines or other equipment or processes and interruptions in service which would result in performance below affected levels of output or efficiency, particularly if extending for prolonged periods of time, would have a material adverse effect on our financial condition and results of operations.

We are vulnerable to interest rate changes and may not have access to capital at favorable rates, if at all.

Changes in interest rates can affect our cost of borrowing on our line of credit, on refinancing of debt maturities and on incremental borrowing to fund new investments. Because our stock is not widely held and has a low trading volume, we may not be able to access the equity market or may be limited in the amount of equity financing. If we are unable to obtain equity or debt financing on terms satisfactory to us, our ability to fund capital expenditures and other commitments will be impaired. Moreover, even if available, the cost of such financing could reduce our margins and materially adversely affect our results of operations.

Failure to effectively and efficiently manage our growth, as well as changes in our business strategies, could have a negative impact on our performance.

An essential part of our business strategy is to grow our businesses. Much of our growth depends on our ability to find attractive development opportunities and to obtain the necessary financing for them. Our outlook is based on our expectation that we will be successful in finding and capitalizing on development opportunities, but our efforts may not be successful. Our failure to effectively and efficiently manage our growth, as well as changes in our business strategies, may have a material adverse effect on our financial

condition and results of operations. If we grow our business with acquisitions there is a risk the acquisition will not have a positive effect on our financial condition.

Our ability to pay dividends on our common stock is limited.

We cannot guaranty that we will continue to pay dividends at our current annual dividend rate or at all. In particular, our ability to pay dividends in the future will depend upon, among other things, our future earnings, our cash requirements and our debt covenants.

Provisions in our certificate of reincorporation, certain agreements, and the Florida Business Corporation Act may inhibit a takeover, which could adversely affect the value of our common stock.

Our certificate of reincorporation as well as provisions of the Florida Business Corporation Act (FBCA), contain provisions that could delay or prevent a change of control in our management that shareholders might consider favorable and may prevent them from receiving a takeover premium for their shares.

Our certificate of reincorporation contains provisions that make it more difficult to obtain control of our company through transactions, which have not received the approval of our board of directors. These provisions include supermajority voting requirements for certain transactions with affiliated persons, staggering the terms of the members of our board of directors, and certain procedural requirements relating to shareholder meetings and amendments to our certificate of reincorporation or bylaws.

In addition, Florida has enacted legislation that may deter or frustrate takeovers of Florida corporations. Subject to certain exceptions, the "Control Share Acquisitions" section of the FBCA generally provides that shares acquired in excess of certain specified thresholds, beginning at 20% of a corporation's outstanding voting shares, will not possess any voting rights unless such voting rights are approved by a majority vote of the corporation's disinterested shareholders.

The "Affiliated Transactions" section of the FBCA generally requires majority approval by disinterested directors or supermajority approval by disinterested shareholders of certain specified transactions (such as mergers, consolidations, sales of assets, issuance or transfer of shares or reclassifications of securities) between a corporation and a holder of more than 10% of the outstanding shares of the corporation, or any affiliate of such shareholder.

Finally, we have agreements with three of our executive officers that provide for significant payments to those executives upon a change in control under certain circumstances. The existence of these contracts may make an acquisition of our company less attractive to a possible buyer.

Conflict or turmoil in oil producing countries could impact future prices for commodities including natural gas, propane gas and electricity, and increases in these prices could materially affect our financial condition and results of operations.

Worldwide turmoil could cause the cost of crude oil and its associated products to rise on

concerns of the conflicts interfering with the production of crude oil. If these conflicts are large, escalate or spread, the impact to the cost of all fuel related commodities could increase substantially. These increases could materially adversely affect our financial condition and results of operations.

Item 1B. Unresolved Staff Comments

None

Item 2. Properties

We have natural gas, electric and propane gas utility related properties. These properties include transmission, distribution, storage and general facilities at various locations in our service areas. We do not have generating facilities. We maintain property that is adequate for our current operations and we expand our existing facilities as required by growth or other operational needs.

We own natural gas mains that distribute gas through 1,558 miles of pipe located in Central and South Florida. Additionally, we have adequate gate stations in each distribution system.

In the electric segment, we own 22 miles of electric transmission lines located in Northeast Florida and 1,082 miles of electric distribution lines located in Northeast and Northwest Florida. The distribution lines are installed both under and above ground with many of the coastal locations having under ground facilities. All transmission lines are installed above ground. Additionally, we own various substations and regulator stations that are used in our operations.

Our propane gas segment has bulk storage facilities and tank installations on the customers' premises. We also have 16 community gas systems that distribute propane gas to customers in a specific area. These systems are subject to the Federal Department of Transportation Office of Pipeline Safety Regulations.

We own office and warehouse facilities in Northwest, Northeast, Central, West and South Florida, which are used for our operations and materials storage by the natural gas, electric, and propane gas segments. We also have various easements and other assets located throughout our service areas that are utilized by all of our operations.

We also own a three-story building in West Palm Beach, where our corporate headquarters is located.

All of our property is subject to a lien collateralizing our funded indebtedness under our Mortgage Indenture as discussed in Note 1-I in Notes to Consolidated Financial Statements.

Item 3. Legal Proceedings

In our operations, we currently use or have used several contamination sites that have pending or threatened environmental litigation. We are in the process of investigating and assessing this litigation. We intend to vigorously defend our rights in this litigation. We have insurance and rate relief to cover losses or expenses incurred as a result of this

litigation. We believe all future contamination assessment and remedial costs, legal fees and other related expenses would not exceed the combined sum of any insurance proceeds received and any rate relief granted.

West Palm Beach Site
We are currently evaluating remedial options to respond to environmental impacts to soil and groundwater at and in the immediate vicinity of a parcel of property we own in West Palm Beach, Florida. We previously operated a gasification plant at this site. We entered into a Consent Order with the FDEP effective April 8, 1991. This requires us to delineate the extent of soil and groundwater impacts associated with the prior operation of the gasification plant and to remediate such soil and groundwater impacts, if necessary. We have submitted numerous reports to FDEP describing the results of soil and groundwater sampling conducted at the site. We completed the delineation of soil and groundwater impacts at the site in October 2006. An engineering consultant performed a feasibility study to evaluate appropriate remedies for the site. The feasibility study was transmitted to FDEP on November 30, 2006.

The feasibility study evaluated a wide range of remedial alternatives based on criteria provided by applicable laws and regulations. The total costs for the remedies evaluated in the feasibility study ranged from a low of \$2.8 million to a high of \$54.6 million. Based on the likely acceptability of proven remedial technologies described in the feasibility study and implemented at similar sites, consulting/remediation costs to address the impacts now characterized at the West Palm Beach site are projected to range from \$4.6 million to \$17.9 million. This range of costs covers such remedies as in situ solidification for deeper soil impacts, excavation of superficial soil impacts, installation of a barrier wall with a permeable biotreatment zone (PBZ), monitored natural attenuation of dissolved impacts in groundwater (MNA) or some combination of these remedies. The feasibility study proposed a remedy of superficial soil excavation, and installation of a hanging barrier wall with PBZ and MNA, the cost of which is projected to range from \$4.6 million to \$9.9 million.

Prior to FDEP's approval of a final remedy for the site, we are unable to determine, to a reasonable degree of certainty, the complete extent or cost of remedial action that may be required. As of December 31, 2006, and subject to the limitations described above, remediation costs (including attorneys' fees and costs) for this site are projected to range from approximately \$4.8 million to \$18 million.

Sanford Site
We own a parcel of property located in Sanford, Florida, upon which a gasification plant was operated prior to our acquisition of the property. Following discovery of soil and groundwater impacts on the property, we have participated with four former owners and operators of the gasification plant in the funding of numerous investigations of the extent of the impacts and the identification of an appropriate remedy. On or about March 25, 1998, we executed an Administrative Order on Consent (AOC) with the four former owners and operators (Group) and the United States Environmental Protection Agency (EPA) that obligated the Group to implement a Remedial Investigation/Feasibility Study (RI/FS) and to pay EPA's past and future oversight costs. The Group also entered into a Participation Agreement and an Escrow Agreement on or about April 13, 1998 (WFS Participation Agreement). Work under the RI/FS AOC and RI/FS Participation Agreement is now complete and we have no further obligations under either document.

In late September 2006, EPA sent us a Special Notice Letter, notifying us of EPA's selection of a final remedy for OU1 (soils), OU2 (groundwater), and OU3 (sediments), and giving the other Group members and us sixty (60) days within which to submit a "good faith offer" to EPA to provide for implementation of the selected remedies. The Special Notice Letter included an Amended Record of Decision (ROD) for OU1 (the ROD for OU1 was amended to account for a significant increase in the volume of off-site soil impacts and a change in the selected remedy), the original ROD for OU2, and a ROD for OU3. The total estimated remediation costs for the Sanford Gasification Plant Site are now projected to be $12.5 million. On November 30, 2006, we, along with the Group, submitted to EPA a good faith offer to implement the approved remedies as set forth in the RODs for OU1 through OU3.

In January, we, along with the other members of the Group signed a Third Participation Agreement, which provides for funding the remediation work specified in the RODs for OU1 through OU3 and supercedes and replaces the Second Participation Agreement. Our share of remediation costs under the Third Participation Agreement is set at 5% of a maximum of $13 million or $650,000. At present, it is not anticipated that the total cost of remediation will exceed $13 million. If it does, the Group members have agreed to negotiate in good faith to allocate the excess costs at such time that it reasonably appears that the total remediation costs will exceed $13 million. In any such event, we do not expect our share of such additional costs to be greater than 5% and our share of such additional costs may be less than 5%.

Our future legal costs and expenses and our share future remediation expenses for this site are currently projected to be approximately $710,000.

Deleted: 710,000

Pensacola Site
We are the prior owner/operator of the former Pensacola gasification plant, located in Pensacola, Florida. Following notification on October 5, 1990 that FDEP had determined that we were one of several responsible parties for any environmental impacts associated with the former gasification plant site, we entered into cost sharing agreements with three other responsible parties providing for the funding of certain contamination assessment activities at the site.

Following field investigations performed on behalf of the responsible parties, on July 16, 1997, FDEP approved a final remedy for the site that provides for annual sampling of selected monitoring wells. Such annual sampling has been undertaken at the site since 1998. Our share of these costs is less than $2,000 annually or a total cost of $27,000.

In March 1999, EPA requested site access in order to undertake an Expanded Site Inspection (ESI). The ESI was completed by EPA's contractor in 1999 and an ESI Report was transmitted to us in January 2000. The ESI Report recommends additional work at the site. The responsible parties met with FDEP on February 7, 2000 to discuss EPA's plans for the site. In February 2000, EPA indicated preliminarily that it will defer management of the site to FDEP; however, as of December 31, 2006, we have not received any written confirmation from EPA or FDEP regarding this matter. Prior to receipt of EPA's written determination regarding site management, we are unable to determine whether additional fieldwork or site remediation will be required by EPA and, if so, the scope or costs of such work.

Key West Site

From 1927-1938, we owned and operated a gasification plant in Key West, Florida. The plant discontinued operations in the late 1940s; the property on which the plant was located is currently used for a propane gas distribution business. In March 1993, a Preliminary Contamination Assessment Report (PCAR) was prepared by a consultant jointly retained by the current site owner and us and was delivered to FDEP. The PCAR reported that very limited soil and groundwater impacts were present at the site. By letter dated December 20, 1993, FDEP notified us that the site did not warrant further "CERCLA consideration and a Site Evaluation Accomplished disposition is recommended." FDEP then referred the matter to its Marathon office for consideration of whether additional work would be required by FDEP's district office under Florida law. As of December 31, 2006, we have received no further communication from FDEP with respect to the site. At this time, we are unable to determine whether additional fieldwork will be required by FDEP and, if so, the scope or costs of such work. In 1999, we received an estimate from our consultant that additional costs to assess and remediate the reported impacts would be approximately $166,000. Assuming the current owner shared in such costs according to the allocation agreed upon by the parties for the PCAR, our share would be approximately $83,000.

Item 4. Submission of Matters to a Vote of Security Holders

None

Executive Officers of the Registrant

The following sets forth certain information about the executive officers of the Company as of February 17, 2007.

Name	Age	Position	Date
John T. English	63	Chairman of the Board	2006 - Present
		Chief Executive Officer	1998 - Present
		President	1997 - Present
		Chief Operating Officer	1997 - 2000
Charles L. Stein	57	Senior Vice President	1997 - Present
		Chief Operating Officer	2001 - Present
George M. Bachman	47	Corporate Secretary	2004 - Present
		Chief Financial Officer	2001 - Present
		Treasurer	2001 - Present

Deleted: -

Mr. English was Senior Vice President from 1993 preceding his appointment as President and Chief Operating Officer.

Mr. Stein was Vice President from 1993 preceding his appointment as Senior Vice President.

Mr. Bachman was Controller from 1996 preceding his appointment as Chief Financial Officer and Treasurer.

Each of these executive officers has an employment agreement for a three-year term, which can be renewed at the Board Meeting preceding the expiration of the agreement subject to his earlier resignation or removal. There are no family relationships among any of the executive officers and directors of the Company.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Quarterly Stock Prices and Dividends Paid

Our common shares are traded on the American Stock Exchange under the symbol FPU. The quarterly dividends declared and the reported last sale price range per share of our common stock for the most recent two years were as follows:

	2006			2005		
	Stock Prices		Dividends	Stock Prices *		Dividends
Quarter ended	Low	High	Declared	Low	High	Declared*
March 31	$13.25	$14.50	$0.1033	$11.47	$13.49	$0.1000
June 30	11.86	14.40	0.1075	11.45	12.67	0.1033
September 30	12.61	14.42	0.1075	12.67	16.84	0.1033
December 31	13.10	14.05	0.1075	13.46	16.44	0.1033

* On July 25, 2005 we issued a three for two stock split in the form of a stock dividend to our shareholders of record on July 15, 2005. All common share information has been restated to reflect the stock split.

As of February 16, 2007, there were approximately 3,900 holders of record of our common shares.

We intend to continue to pay quarterly cash dividends for the foreseeable future. Our dividend policy is reviewed on an ongoing basis by our Board of Directors and is dependent upon future earnings, cash flow, financial condition, capital requirements and other factors. Our Fifteenth Supplemental Indenture of Mortgage and Deed of Trust restricts the amount that is available for cash dividends. At December 31, 2006, approximately $9 million of retained earnings were free of such restriction and therefore available for the payment of dividends.

Securities Authorized for Issuance under Equity Compensation Plans

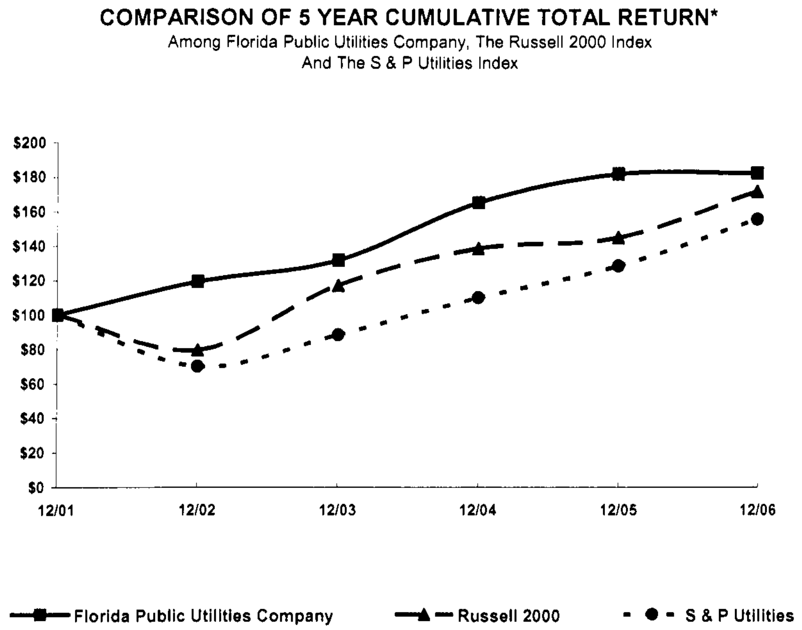
Equity Compensation Plan Information

Plan Category	Number of Securities remaining available for future issuance under equity compensation plans
Equity compensation plans approved by security holders	72,749*
Equity compensation plans not approved by security holders	-
Total	72,749

* This includes 20,714 shares for the Non-Employee Director Compensation Plan. This plan was adopted by the Board of Directors on March 18, 2005 and was approved at the 2005 meeting of shareholders. This also includes 52,035 shares for the Employee Stock Purchase Plan.

PERFORMANCE GRAPH

The following graph compares the yearly percentage change and the cumulative total of shareholder return on the Company's common stock with the cumulative return on the Russell 2000 Index (Russell 2000) and Standard & Poor's Utilities Index (S&P Utilities) for the last five calendar years. These comparisons assume the investment of $100 in the Company's common stock and each of the indices on January 1, 2001 and the reinvestment of dividends. The stock price performance shown in the graph below should not be considered indicative of



* $100 invested on 12/31/01 in stock or index-including reinvestment of dividends. Fiscal year ending December 31.

future stock performance.

Note to the Selected Financial Data:

(1) On December 3, 2002, FPU entered into an agreement to sell the assets of its water utility system to the City of Fernandina Beach. The transaction closed on March 27, 2003. Revenues, Gross profit and Utility plant-net do not include discontinued operations.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operation

RESULTS OF OPERATIONS

General
Effects of seasonal weather conditions, the timing of rate increases, fluctuations in demand due to the cost of fuel passed on to customers and the migration of winter residents and tourists to Florida during the winter season all have an impact on income.

Revenues and Gross Profit Summary
Revenues include cost recovery revenues. The FPSC allows cost recovery revenues to directly recover costs of fuel, conservation and revenue-based taxes in our natural gas and electric segments. Revenues collected for these expenses have no effect on results of operations and fluctuations could distort the relationship of revenues between periods. Gross profit is defined as gross operating revenues less fuel, conservation and revenue-based taxes that are passed directly through to customers. Because gross profit eliminates these cost recovery revenues, we believe it provides a more meaningful basis for evaluating utility revenues. The following summary compares gross profit between periods and units sold in One thousand Dekatherm (MDth) (gas) and Megawatt Hour (MWH) (electric).

Revenues and Gross Profit

(Dollars in thousands)

	Year Ended December 31,		
	2006	2005	2004
Natural Gas			
Revenues	$70,981	$69,094	$55,962
Cost of fuel and other pass through costs	43,909	42,815	34,232
Gross Profit	$27,072	$26,279	$21,730
Units sold: (MDth)	6,230	6,224	6,124
Electric			
Revenues	$48,527	$47,450	$42,910
Cost of fuel and other pass through costs	34,259	33,352	29,732
Gross Profit	$14,268	$14,098	$13,178
Units sold: (MWH)	849,124	814,353	766,349
Propane Gas			
Revenues	$14,727	$13,479	$11,167
Cost of fuel and other pass through costs	7,803	6,637	5,386
Gross Profit	$ 6,924	$6,842	$5,781
Units sold: (MDth)	621	640	614
Consolidated			
Revenues	$134,235	$130,023	$110,039
Cost of fuel and other pass through costs	85,971	82,804	69,350
Gross Profit	$ 48,264	$ 47,219	$ 40,689

Natural Gas
Natural gas revenues increased $1.9 million, or 3% in 2006 over 2005 primarily due to increased revenue collected for taxes passed directly through to customers. A change in legislature regarding the calculation of Gross Receipts tax became effective January 1, 2006, and along with an increase to overall revenues, increased these taxes paid by our

customers by approximately $500,000. Franchise fee revenues also increased by $500,000 due to increased rates and area expansion.

Natural gas gross profit increased by $793,000, or 3% in 2006 over 2005. We had higher revenue and gross profit in 2006 compared to 2005 primarily due to billed revenue not exceeding the FPSC allowable earnings as much as in the prior year. In 2006 we reduced billed revenues and gross profit by our estimate of over-earnings of $230,000 for the year. Our estimate for 2005 was recorded at $700,000 in 2005 and we reduced that estimate in 2006 by $50,000 to $650,000. The combined effect of this was to increase our revenues and gross profit over the prior year by approximately $500,000. Other factors contributing to the increase in revenues and gross profit were 2% customer growth and storm surcharge revenues, which became effective November 2005. The revenues and gross profit increases were slightly offset by the loss of approximately $100,000 of revenue from two customers who went off-line for several months to do maintenance work.

Natural gas revenues increased $13.1 million in 2005 over 2004 primarily due to an $8.6 million increase in the cost of fuel and other costs that were passed through to customers. The cost of natural gas increased significantly over prior years, partially as a result of hurricanes and their impact on supplies. Gross profit increased $4.5 million, or 21%, primarily as a result of rate relief effective in November 2004, normal customer growth and a 2% increase in units sold. Offsetting these increases was the estimated over-earnings for 2005 of $700,000, which reduced revenues and gross profit.

Electric

Electric revenues increased $1.1 million in 2006 over 2005. Cost of fuel and other costs that were passed through to customers contributed approximately $900,000 of the increase. Gross profit increased $170,000 or 1% in 2006 over 2005. The increase in gross profit was primarily due to a slight increase in customer growth and units sold.

Electric revenues increased $4.5 million in 2005 over 2004. Cost of fuel and other costs that were passed through to customers contributed $3.6 million of the increase. Gross profit increased $920,000 or 7% in 2005 over 2004. The increase in gross profit was primarily due to a 6% increase in units sold along with the rate increases granted in March 2004. A large distribution center was built in our Northwest division and increased revenues by approximately $700,000 and gross profit by approximately $91,000 in 2005 over 2004.

Propane Gas

Propane revenues increased $1.2 million, or 9% and gross profit increased $82,000 or 1% in 2006 compared to 2005. Revenues increased primarily due to rising fuel costs. Although customers increased by 5% in 2006, the usage per customer declined by 8% contributing to a decrease of 3% in units sold. Warmer weather was the primary reason for this decrease in usage per customer in 2006 compared to 2005. The increase in gross profit was minimal when compared to last year primarily due to pre-buy gains of $383,000 realized in 2005 but not in 2006.

Propane revenues increased $2.3 million and gross profit increased $1.1 million or 18% in 2005 compared to 2004. The Company realized gains of approximately $383,000 as a result of buying propane supplies before market price increases. The remaining increase

of 12% from the previous year resulted from propane unit sales increasing 4% due primarily to a 13% growth in residential bulk customers and units sold.

Operating Expenses

Operating expenses include operation, maintenance, depreciation, amortization and taxes other than income taxes, and exclude fuel costs, conservation and taxes based on revenues that are directly passed through to customers and recovered in revenues.

Operating Expenses
(Dollars in thousands)

	Year Ended December 31,		
	2006	2005	2004
Natural gas	$ 20,954	$ 20,230	$ 16,752
Electric	11,131	10,596	9,825
Propane gas	5,850	5,756	5,126
Total Operating Expenses	$ 37,935	$ 36,582	$ 31,703

Natural Gas

Natural gas operating expenses increased $724,000, or 4%, in 2006 as compared with 2005. Outside of the normal inflationary impacts on our expenses, customer account expenses increased by $237,000 as a result of our customer service focus initiated in 2005 based on our strategic plan. We continued the focus on this area and increased the number of employees in an effort to respond more effectively to customers. Bad debt provision increased $49,000 over the prior year primarily due to increasing revenues, aging accounts receivable on several major accounts, and the slowing housing economy. We increased our collection efforts in the fourth quarter of 2006 and will continue to do so in 2007.

In 2006 we had additional increases of $90,000 to sales expense resulting from initiatives to boost sales by increasing sales staff. Depreciation expense increased $137,000 principally due to construction of mains and new meters to distribute gas to a growing number of new developments in South Florida and increasing capacity requirements for existing customers.

Natural gas operating expenses increased $3.5 million or 21%, in 2005 as compared with 2004. Amortization expense increased $1 million. The bare steel replacement program and recovery of future environmental costs approved in our 2004 natural gas rate proceeding were the primary reasons for this increase. We are currently under a 50-year program to replace all bare steel mains and service lines with coated steel and polyethylene lines. We have received approval to recover the funds necessary to replace these mains and services over the 50-year period. Pursuant to an FPSC mandate, we accrue an amortization expense as an offset to the revenues received, and record a contribution, reducing the related construction expenditures. The FPSC also approved recovery of our expected environmental liability over a 20-year period.

Deleted: for
Deleted: /
Deleted: tion
Deleted: to

Customer account expense increased $373,000 in 2005 as compared to 2004 primarily due to increased payroll expenses for additional staffing and facility and equipment upgrades. There were also increased bad debt provisions as a result of the increases in accounts receivable due to general and fuel rate increases. The purchase of additional safety equipment, tools, hardware and office furniture contributed to a $942,000 increase in other operating expense. Other items affecting expenses included a research marketing study to provide us with data to better serve our customers and additional payroll

expenses relating to hurricane preparedness and wage increases. Maintenance expense increased by $208,000 primarily due to maintenance expenditures in Central Florida for cleaning and painting a distribution regulator and gate stations and the purchase of maintenance related safety equipment and tools.

Electric
Electric operating expenses increased $535,000, or 5%, in 2006 as compared with 2005. As a result of our efforts to inform and educate our electric customers about the expected 2007 and 2008 fuel rate increases in upcoming bills, sales expense increased by $120,000. Customer account expenses increased $106,000 in 2006 over the prior year mainly due to increased bad debt provisions due to higher sales and slower housing economy. Depreciation expense increased $202,000 largely due to major construction work done in the latter part of 2005 and the beginning of 2006. This included the rebuilding of a transmission sub-station, the rebuilding of an entire distribution sub-station with two transformers and the replacement of a failed sub-distribution station transformer. Additional significant work on transformers is expected in 2008.

Electric operating expenses increased $771,000, or 8%, in 2005 as compared with 2004. As we continued to focus on improving service reliability, we increased maintenance expense by $397,000 for additional tree trimming and the use of a temporary mobile substation while a new transformer was purchased and put into service. Depreciation expense increased $100,000 due to normal increases in plant assets. In 2005, other operating expenses increased $114,000 due to a shift from work on capital assets to operational needs along with personnel raises.

Propane Gas
Propane gas operating expenses increased $94,000, or 2%, in 2006 as compared with 2005. Depreciation expense increased $99,000 for the addition of plant assets including a propane gas delivery system that will increase the efficiency of our deliveries and improve our overall customer satisfaction. Aging accounts receivable, slowing housing economy and increasing revenues contributed to an increase in our bad debt expense over the prior year.

Propane gas operating expenses increased $630,000, or 12%, in 2005 as compared with 2004. As we continued to focus on increasing our propane gas business, other operating costs increased $467,000. We placed additional emphasis in the sales area, which resulted in signing up new housing developments that will utilize propane gas. We incurred increased expenditures for piping homes, delivering propane gas, implementing a new delivery system and increasing commission payments. This increased effort in our sales area contributed to an increase of 150 customers and 4% overall units sold in our propane gas segment.

Administrative Expenses
Administrative expenses increased $177,000, or 2%, in 2006 over 2005. These expenses generally are related to all of our operating segments. To continue to adequately support our internal and external customers, we increased staffing in our administrative areas. Payroll increases of $322,000 related to an increased number of employees, annual pay raises and normal inflationary impacts. In 2006, we discontinued eligibility to our defined benefit pension plan for new employees and replaced the defined benefit pension plan with a 401K-match plan for new employees. Although this change will take time to reduce pension expense, we did experience a reduction of $107,000 in our pension expenses in

2006. Medical costs increased $120,000 over the prior year and these costs are expected to continue to rise.

Regulatory storm surcharge expenses approved in our 2005 natural gas petition increased natural gas expenses by $180,000.

Administrative expenses increased $996,000, or 13%, in 2005 over 2004. Pension expense increased $274,000 due to our estimate that the return on the pension's assets will not keep pace with growing pension liabilities. Medical insurance premiums continue to rise, increasing $130,000 in 2005. Compliance costs related to Sarbanes-Oxley and internal control requirements, as well as audit fees, increased outside services expenses by $156,000. With the impact from our focus on hurricane preparations and the 2005 hurricanes, our safety expense increased by $235,000. A portion of this increase related to compensation for an additional safety employee and costs for a new safety incentive program.

Total Other Income and Deductions
Other income and deductions include revenues and expenses from sales and installation, service of merchandise, gains or losses on disposal of property, interest expense and other income and expenses. The largest components of this section are merchandise sales, services income and interest expenses. Our service activities include the installation of merchandise and other contract work. Interest expense consists of interest on bonds, short-term borrowings and customer deposits.

Merchandise and Services Revenue and Expenses
Although merchandise and services revenue decreased by approximately $268,000 in 2006, the overall profitability in this area increased by $325,000 compared to 2005. This was primarily a result of significant strategic changes made by management. These changes included revising the product markup structure, increasing installation fees and increasing employee training. We experienced a revenue decrease due to lower demand for merchandise as a result of a quiet hurricane season and the slow down of new construction projects in our areas due to the downturn in the housing market.

Merchandise and services revenues and expenses increased in 2005 from 2004 but profitability decreased $114,000. We experienced an increase in revenues and cost of sales primarily due to an increased demand for electric to gas conversions and installations of customer owned propane gas tanks to supply back-up generators. We had increased expenses from sub-contractors that were not passed on to customers in sales prices.

Interest Expenses
In 2005, total interest expense increased $106,000. Interest on short-term debt increased $37,000. This was due to the increase in the average outstanding loan balance on the line of credit and higher interest rates. Interest on customer deposits increased $48,000 due to increased customer deposits primarily as a result of additional deposits required after implementing increased rates in our natural gas operation.

Other
Other revenues increased $51,000 compared to 2005 due to additional interest income associated with the sale of the water assets.

Income Taxes

Income tax expense decreased in 2006 over the normal tax rate on net income by $67,000. This decrease was due to tax return adjustments related to the regulatory deferred tax liabilities.

Income tax expense decreased in 2005 over the normal tax rate on net income by $43,000. Tax return adjustments related to the sale of our water assets and the regulatory deferred tax liabilities decreased expenses by $118,000. We had an offsetting increase of $75,000 related to our IRS audit of the 2002 and 2003 income tax returns.

Liquidity and Capital Resources

Summary of Primary Sources and Uses of Cash

(Dollars in thousands)

	Year Ended December 31, 2006	2005	2004
Sources of Cash:			
Operating activities, including working capital changes	$20,090	$10,213	$11,673
Net proceeds on short-term debt	-	3,733	3,547
Other sources of cash	1,179	1,214	648
Uses of Cash:			
Construction expenditures	13,116	12,441	13,731
Dividends paid	2,551	2,448	2,368
Net payment on short-term debt	6,092	-	-
Other uses of cash	121	75	129
Net (use) source of cash	$ (611)	$ 196	$ (360)

Cash Flows

Operating Activities

Net cash flow provided by continuing operating activities increased in 2006 by approximately $10 million compared to 2005. Fuel and other pass through costs accounted for $6.5 million of the increase. This increase resulted from the collection of the prior year's under-recoveries of $3.4 million and over-recoveries of $3.1 million in 2006. Amounts over-recovered will be refunded to customers in subsequent calendar years. Lower fuel costs during the latter part of the year in our natural gas segment contributed to a decrease in receivables and increase in cash of $3 million. The lower fuel costs and timing of payments to our major fuel suppliers resulted in a decrease to operating cash of $1 million. Income taxes paid increased by approximately $600,000 primarily due to the tax effect of the collection of prior year's fuel under-recoveries.

Net cash flow provided by continuing operating activities decreased in 2005 by approximately $1.5 million compared to 2004. Payments for fuel exceeded the amount collected from customers by an additional $3.1 million in 2005. The under-recovery of fuel costs is collected in the following calendar year. Income tax payments increased approximately $1.5 million, primarily as a result of less tax depreciation and higher income. The deduction for tax depreciation was higher in 2004 as a result of bonus depreciation, resulting in lower taxes in that year. We also received a refund in 2004 relating to the deferral of the gain on our water assets sale.

Offsetting the decreases to 2005 cash flow was additional cash received from rate increases in our natural gas segment. The rate increases also contributed to an increase to accounts receivable of $4 million. Accounts payable increased $3.3 million in 2005 primarily due to the increased cost of fuel in our natural gas segment.

Investing Activities
Capital expenditures increased in 2006 compared to 2005 by approximately $700,000. The increase in 2006 included expenditures for transportation equipment in our electric segment for approximately $400,000, vehicles in our natural gas segment above 2005 levels of approximately $600,000, and various other typical capital expenditures. Offsetting total 2006 increases was a $663,000 transformer replacement in 2005.

Capital expenditures decreased in 2005 compared to 2004 by approximately $1.3 million. In 2004, there were large projects to rebuild two substations in our electric segment and additional propane community gas systems costing approximately $3.3 million. In 2005 such expenditures were lower and consisted of the purchase of a transformer in our electric segment for $663,000, a new natural gas mapping system to track our assets used in serving our customers for approximately $300,000, a propane delivery system for approximately $300,000, additional propane community gas systems for approximately $300,000 and other various capital expenditures.

Financing Activities
Short-term borrowings decreased by $6 million in 2006. Over-recovery of fuel costs provided a large source of cash during 2006 as well as the recovery of the prior year's under-recovery of fuel costs in 2006, reducing the need for short-term borrowings.

Although additional sources of cash were provided by our rate increases and lower construction expenditures in 2005, the additional expenditures from the under-recovery of fuel costs and additional income taxes increased our short-term debt. Short-term borrowings increased in 2005 over 2004 by approximately $3.7 million.

Capital Resources
We currently have a $12 million line of credit, which expires on July 1, 2008. Upon 30 days notice by us we can increase the line of credit to a maximum of $20 million. The line of credit contains affirmative and negative covenants that, if violated, would give the bank the right to accelerate the due date of the loan to be immediately payable. The covenants include certain financial ratios. All ratios are currently met and management believes we are in full compliance with all covenants and anticipates continued compliance. We reserve $1 million of the line of credit to cover expenses for any major storm repairs in our electric segment and an additional $250,000 for a letter of credit insuring propane gas facilities. As of December 31, 2006, the amount borrowed on the line of credit was $3.5 million. The line of credit, long-term debt and preferred stock as of December 31, 2006 comprised 53% of total capitalization and debt.

In prior years we periodically paid off short-term borrowings under lines of credit using the net proceeds from the sale of long-term debt or equity securities. We may use similar types of proceeds in the future to pay off short-term borrowings, dependent on the amount borrowed from the line of credit, prevailing market conditions for debt and equity, the impact to our financial covenants and the effect on income.

Our 1942 Indenture of Mortgage and Deed of Trust, which is a mortgage on all real and personal property, permits the issuance of additional bonds based upon a calculation of unencumbered net real and personal property. At December 31, 2006, such calculation would permit the issuance of approximately $39.3 million of additional bonds.

On November 30, 2006 we received approval from the FPSC to issue and sell or exchange an additional amount of $45 million in any combination of long-term debt, short-term notes and equity securities and/or to assume liabilities or obligations as guarantor, endorser or surety during calendar year 2007. We will seek approval from the FPSC in 2007 for any possible financing in 2008.

We have $3.4 million in invested funds for payment of future environmental costs. We expect to use some of these funds in 2007.

Capital Requirements
Portions of our business are seasonal and dependent upon weather conditions in Florida. This factor affects the sale of electricity and gas and impacts the cash provided by operations. Construction costs also impact cash requirements throughout the year. Cash needs for operations and construction are met partially through short-term borrowings from our line of credit.

Capital expenditures are expected to be higher in 2007 compared to 2006 by approximately $3.9 million. The primary reason for the expected increase in expenditures is the anticipated purchase of land for a new South Florida division office. The current division office is on environmentally impacted property, which requires relocating the office to allow for clean up of the property. It is not possible to rebuild at the current location since the property has been rezoned with a residential designation. The estimated cost of land is $3.8 million. We are planning to build and complete this new facility in the next five years. We do not have any commitments for capital expenditures in 2007 other than vehicles of approximately $102,000.

Cash requirements will increase significantly in the future due to environmental clean up costs, sinking fund payments on long-term debt and pension contributions. Environmental clean up is forecast to require payments of approximately $600,000 in 2007, with remaining payments, which could total approximately $13.1 million, beginning in 2008. Annual long-term debt sinking fund payments of approximately $1.4 million will begin in 2008 and will continue for eleven years. Based on current projections, we will make voluntary contributions in our defined benefit pension plan of $250,000 in 2007 and $500,000 in 2008. Required contributions will begin in 2009 and are forecast to be approximately $2 million in 2009 and 2010.

Based on our current expectations for cash needs, including the possible land purchase and related South Florida office construction, we may choose to consider an equity or debt financing in 2008 to address those cash needs. The need and timing will depend upon operational requirements, environmental expenditures, pension contributions and construction expenditures and cannot be precisely predicted at this time. In addition, if we experience significant environmental expenditures in the next two or three years it is possible we may need to raise additional funds. If interest rates remain favorable we may consider re-financing one of our mortgage bonds. If refinancing is deemed beneficial, we may re-issue the bond for additional principal. There can be no assurance, however, that equity or debt transaction financing will be available on favorable terms or at all when we make the decision to proceed with a financing transaction.

Outlook

Pension and Insurance Expenses

Insurance costs have been increasing and are expected to continue to increase while we expect pension costs to decrease. Pension expenses decreased $107,000 in 2006 and our actuarial estimates show pension expense decreasing by $142,000 in 2007. Insurance expenses including Medical, Liability and Workers' Compensation increased $70,000 in 2006 and are expected to increase further in 2007.

The regulated segments received rate relief for some of the historical pension and insurance increases in 2003 and 2004. Increases beyond those experienced through 2005, which are allocated to the regulated segments, may require requesting future rate relief. The propane gas segment may recover these expenses by increasing rates, depending on market conditions in the propane gas industry and the ability to remain competitive.

Due to significant cost increases for our defined benefit pension plan over the past several years and with expectations that these cost increases will continue in the years ahead, we discontinued eligibility to our pension plan for all new hires.

For new hires not eligible for the defined benefit pension plan, we established an employer match to the employee's contribution to their 401K plans. It provided for a company match of 50% for each dollar contributed by the employee, up to 6% of their salary, for a company contribution of up to 3%. Beginning in 2007, for non-union employees the plan was enhanced to provide a company match of 100% for the first 2% of an employee's contribution, and a match of 50% for the next 4% of an employee's contribution, for a total company match of up to 4%. This new enhanced match will be negotiated with our six union contracts during 2007, to be effective on their respective contract date within 2007. The employees are eligible for the company match after six months of continuous service, with vesting of 100% after three years of continuous service.

Electric Power Supply Contracts

Contracts with our two electric suppliers were originally set to expire on December 31, 2007. Those contracts provided electricity to our customers at rates much lower than market rates. As part of our negotiations, we agreed to end the current contract terms for our Northeast division on December 31, 2006 and executed an amended contract to begin January 1, 2007 and expire December 31, 2017. Although the contract rates will increase for 2007, this enabled us to obtain lower rates for the longer term of the contract than would have been available if we had not revised the contract. The savings are passed through to our customers without profit to us.

We executed a contract for the provider of electricity in our Northwest division in December 2006 and are seeking approval of this contract and its related terms and conditions from the FPSC on or before July 1, 2007. If the FPSC does not approve this contract, we may need to seek an alternative supplier or new contract with this same supplier for the purchase of electricity in the Northwest division. This contract will be for the purchase of electricity beginning January 1, 2008. We anticipate that contract will result in rates closer to market, which could cause our customers' bills to double over existing prices in the next several years.

We are unable to estimate what impact, if any, the higher rates could have on electric consumption.

Propane Gas

We are currently reviewing the possibility of hedging activities in 2007 to help mitigate the risk of price changes for our cost of propane gas. We are unable to determine the impact this activity will have on our future operating income.

We used advance purchase agreements made in the normal course of procuring propane gas supplies in past years. These agreements resulted in a loss of gross profit of approximately $5,000 in 2006 and additional gross profit of approximately $383,000 in 2005 and $242,000 in 2004.

Over-earnings-Natural Gas Segment
The FPSC approves rates that are intended to permit a specified rate of return on investment and limits the maximum amount of earnings of regulated operations. We currently estimate over-earnings in 2006 of $230,000 and in 2005 of $650,000. We revised our prior year's 2005 estimate of $700,000 during 2006. These liabilities have been included in an over-earnings liability on our balance sheet, with the potential of rate refunds to customers. The calculations supporting these liabilities are complex and involve a variety of projections and estimates before the ultimate settlement of such obligations.

Our 2005 and 2006 estimates of our over-earnings liabilities could change upon the FPSC finalization and review of our earnings in 2007 and 2008. The FPSC determines the disposition of over-earnings with alternatives that include refunding to customers, funding storm damage or environmental reserves, or reducing any depreciation reserve deficiency.

In 2007 we requested that the 2005 natural gas over-earnings be used to provide additional funds to our regulatory liability – storm reserve and reduce the costs currently being recovered from our customers through a storm surcharge. If the FPSC approves this disposition, we will end the storm surcharge in 2007.

Electric Customers
A large commercial customer in our electric division closed its operations in late 2006. As a result we anticipate annual revenues to be reduced by approximately $300,000 and annual gross profit to be reduced by approximately $50,000.

A large distribution center was built in our Northwest division in 2004 and a second facility was added in 2006. A third distribution facility is expected to be added by the end of 2007. Additional industrial and commercial development is planned for this general area, which should increase load significantly. Additional gross profit is anticipated in the future to increase between $30,000 and $50,000 as a result of the additional developments.

Natural Gas Customers

Two natural gas customers went off-line for approximately six months in 2006 due to lower production, market slow down and maintenance work on their facilities. We anticipate that they will not be fully operational until mid-2007. The decreased revenue and gross profit is estimated to be $100,000 in 2007.

Indiantown Gas Agreement

The FPSC approved our joint transportation and territorial agreements with Indiantown Gas Company in October 2006. We began construction in the Indiantown area to install natural gas mains in the first phase of this development, for approximately 100 homes. Two more developments are slated for construction of approximately 1,000 homes in 2007.

Storm Preparedness Expenses
Regulators continue to focus on hurricane preparedness and storm recovery issues for utility companies. Newly mandated storm preparedness initiatives could impact our operating expenses and capital expenditures beginning in 2007. The initial forecasts of these annual expenditures are approximately $700,000. It is possible that additional regulation and rules will be mandated regarding storm related expenditures over the next several years. We requested that the FPSC allow us to recover the cost of the newly mandated storm preparedness initiatives and to defer these storm-related expenditures until we receive recovery through a rate increase. If approved, both the recovery and expenditures may occur by mid-2007. If the FPSC does not approve our request, we plan to file a rate proceeding in 2007 as an alternative option for recovery of these expenditures.

Land Purchase
We are currently reviewing multiple sites for the new South Florida division office. We expect to purchase land for the new South Florida division office during 2007.

Contractual Obligations

Table of Contractual Obligations
(Dollars in thousands)

Payments due by period:	Total	Less than 1 year	1 to 3 years	3 to 5 years	More than 5 years
Long-term Debt Obligations	$52,500	$ -	$2,818	$2,818	$46,864
Long-term Debt Interest	63,904	3,949	7,623	7,074	45,258
Operating Lease Obligations	352	151	163	38	-
Natural Gas and Propane Gas Purchase Obligations	64,904	37,768	16,244	4,568	6,324

Other Purchase Obligations	2,682	940	1,726	14	2
Total	$184,[illegible]	$42,861	$28,672	$14,603	$98,[illegible]

Deleted: 242
Deleted: -
Deleted: 584
Deleted: 448

Long-term Debt Obligations
The Long-term debt obligations are principal amounts.

Long-term Debt Interest
The Long-term debt interest represents the interest obligation on our Mortgage Bonds.

Operating Lease Obligations
Our total operating lease obligation is $352,000. We are leasing property from the City of Fernandina Beach in our Northeast division. The total obligation for the duration of this lease is about $107,000 over the next five years. We lease our appliance showroom in the same division for approximately $35,000 annually. We also have other operating lease agreements with various terms and expiration dates.

Purchase Obligations

A purchase order is considered an obligation if it is associated with a contract or is authorizing a specific purchase of material. The Other Purchase Obligation amount presented above represents the amount of open orders.

Pension, Medical Postretirement and Other Obligations
Our pension plan continues to meet all funding requirements under ERISA regulations; however, under current actuarial assumptions, contributions may be required as early as 2009. Current projections indicate that we will make voluntary contributions of $250,000 in 2007, $500,000 in 2008 and make required contributions of approximately $2 million in 2009 and 2010, decreasing to under $1 million in 2011. These payments are not included in the Contractual Obligations table.

Environmental clean up is anticipated to require approximately $600,000 in 2007, the remainder to be paid in following years. These payments are not included in the Contractual Obligations table.

We have medical postretirement payments relating to retiree medical insurance. These payments are not included in the Contractual Obligations table. Estimated future payments are described in Note 12 in the Notes to Consolidated Financial Statements.

Dividends
We have historically paid dividends. It is our intent to continue to pay quarterly dividends for the foreseeable future. Our dividend policy is reviewed on an ongoing basis by our Board of Directors and is dependent upon our future earnings, cash flow, financial condition, capital requirements and other factors.

Other

Impact of Recent Accounting Standards

Financial Accounting Standard Board Interpretation No. 48
In June 2006, the FASB issued Interpretation No. 48, Accounting for Uncertainty in Income Taxes (FIN 48). The interpretation clarifies the accounting for uncertainty in income taxes recognized in an entity's financial statements in accordance with SFAS No. 109, Accounting for Income Taxes. The interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 also provides guidance on de-recognition, measurement, classification, interest and penalties, accounting in interim periods, disclosure and transition. This interpretation is effective for calendar years beginning January 1, 2007.

We have performed an analysis of tax positions taken and expected to be taken on the tax returns and assessed the technical merits of each tax position by relying on legislation, statutes, common legislative intent, regulations, rulings, and case law and determined that the Company has no material uncertain tax positions. Additionally, the IRS concluded an audit of the 2002 and 2003 tax years in September of 2005.

In February of 2007, the IRS informed us that it selected our 2003 and 2004 tax years for examination. As our tax positions have remained consistent with those from the previously audited tax years, we are not expecting any material adverse findings as the result of the impending IRS audit.

Based on the aforementioned, we believe that the adoption of FASB Interpretation No. 48 will not have a material impact on our financial condition or results of operations.

Financial Accounting Standard No. 157
In September 2006, the FASB issued Statement No. 157, "Fair Value Measurements". This Statement clarifies fair value as the market value received to sell an asset or paid to transfer a liability, that is, the exit value, and applies to any assets or liabilities that require recurring determination of fair value. The measurement includes any applicable risk factors and does not include any adjustment for volume. This Statement is effective for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods within. The Company expects to adopt SFAS No. 157 effective January 1, 2008. The Company does not believe adoption of this Statement will have a material impact on our financial condition or results of operation.

Financial Accounting Standard No. 158
In September 2006, the FASB issued Statement No. 158, "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans". Statement 158 requires the Company to show the funded status of its pension and retiree health care plans as a prepaid asset or accrued liability, and to show the net deferred and unrecognized gains and losses related to the retirement plans, net of tax, as part of accumulated other comprehensive income in shareholders' equity. Previously, the net deferred and unrecognized gains and losses were netted in the prepaid asset or accrued liability recorded for the retirement plans. The Company adopted the recognition provisions of Statement 158, as required, at December 31, 2006.

The Company uses December 31 as the measurement date to measure the assets and obligations of its retirement plans. Statement 158 will also require the Company to use December 31 as the measurement date no later than fiscal years ending after December 15, 2008. The Company currently uses this date as the measurement date, and has used it for all periods presented.

Deleted: September 30

Deleted: expects to make this change in 2008.

The actuarial valuation of the retirement plan obligations has been completed and the recognition provisions of Statement 158 at December 31, 2006 resulted in an additional liability for retirement plans. The tax on the non-regulated portion of the liability has been recorded as a deferred income tax asset. As an offset, the regulatory portion of this liability has been deferred as a regulatory asset-retirement plans to be recovered in future rate proceedings and the remaining expense for recording the liability has been included in other comprehensive income. The fair value of retirement plan assets and obligations are subject to change based on market fluctuations. The table below summarizes the effects to our financial statements.

Deleted: is

FASB 158 Implementation Summary
(Dollars in thousands)

	December 31, 2006		
	Before Application of SFAS 158	Adjustment	After Application of SFAS 158

Other accruals and payables	2,034	151	2,185
Long term medical and pension reserve	3,819	912	4,731
Deferred income taxes	16,224	(88)	16,136

Staff Accounting Bulletin No. 108

In September 2006, the SEC issued Staff Accounting Bulletin (SAB) No. 108 "Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements". SAB 108 requires that public companies utilize a "dual-approach" to assessing the quantitative effects of financial misstatements. This dual approach includes an assessment from both an income statement and a balance sheet focus. The guidance in SAB 108 must be applied to annual financial statements for fiscal years ending after November 15, 2006. The Company has adopted SAB No.108 and there has not been any impact on our consolidated financial position or results of operations as the result of this adoption.

Critical Accounting Policies and Estimates

Regulatory Accounting

We prepare our financial statements in accordance with the provisions of SFAS No. 71 "Accounting for the Effects of Certain Types of Regulation" and it is our most critical accounting policy. In general, SFAS No. 71 recognizes that accounting for rate-regulated enterprises should reflect the relationship of costs and revenues introduced by rate regulation. As a result, a regulated utility may defer recognition of a cost (a regulatory asset) or recognize an obligation (a regulatory liability) if it is probable that, through the rate making process, there will be a corresponding increase or decrease in revenues or expenses. SFAS No. 71 does not apply to our unregulated propane gas operations.

Use of Estimates

We are required to use estimates in preparing our financial statements so they will be in compliance with accounting principles generally accepted in the United States of America. Actual results could differ from these estimates. We believe that the accruals for potential liabilities are adequate. The estimates in our financial statements included the accrual for pensions, environmental liabilities, over-earnings liability, unbilled revenues, allowances for doubtful accounts, uninsured liability claims and the regulatory deferred income tax and deferred income liabilities.

- Pension and post retirement benefits-An actuary calculates the estimated pension liability in accordance with FASB 87, FASB 88 as amended by FASB 132 and FASB 158.
- Environmental liabilities-These liabilities are subject to certain unknown future events. The Company reviews the environmental issues regularly with the geologists performing the feasibility studies and their legal counsel specializing in manufactured gas plant issues and negotiates with the environmental regulators and the other participating parties to determine the adequacy of the estimated liability for environmental reserves.

Deleted: ***Financial Accounting Standard No. 154¶***
In May 2005, the FASB issued Statement No. 154, "Accounting Changes and Error Corrections". This Statement applies to all voluntary changes in accounting principle and requires retrospective application to prior period financial statements of changes in accounting principle, unless it is impracticable to determine either the period-specific effects or the cumulative effects of the change. This Statement is effective for accounting changes and corrections of errors made in fiscal years beginning after December 15, 2005. We adopted SFAS No. 154 as of January 1, 2006; however, we did not have any impact to our financial statements in 2006 as a result of this adoption.¶

Deleted: ***Financial Accounting Standard Board Interpretation No. 47¶***
In March 2005, the FASB issued Interpretation No. 47, "An Interpretation of FASB Statement No. 143". SFAS No. 143, "Accounting for Asset Retirement Obligations", requires that the fair value of an asset retirement obligation be recognized at the time those obligations are incurred. Upon initial recognition of a legal liability, costs are capitalized as part of the related long-lived asset and allocated to expense over the useful life of the asset. SFAS No. 143 also requires that components of previously recorded depreciation related to the cost of removal of assets upon retirement, whether legal asset retirement obligations or not, be removed from a company's accumulated depreciation reserve. We adopted the provisions of the Statement as of January 1, 2003, as prescribed by the FPSC. Under FPSC guidelines, the estimated cost of removal expenses for normal retirements related to regulated fixed assets were reserved through the depreciation expense and accumulated reserves. This was disclosed in a footnote until December 31, 2003, when the estimated cost of removal from accumulated depreciation was reclassified to a regulatory liability for the obligation.¶
¶
This Interpretation addresses the legal obligation to retire an asset when the timing and (or) met[... [1]

Deleted: y

Deleted:

- Over-earnings liability-This liability is subject to regulatory review and possible disallowance of some expenses in determining the amount of over-earnings.
- Unbilled revenues-Unbilled revenue is estimated with certain assumptions including unaccounted for units and the use of current month sales to estimate unbilled sales.
- Allowances for doubtful accounts- This liability is estimated based on historical information and trended current economic conditions, certain assumptions, and is subject to unknown future events. Actual results could differ from our estimates.
- Uninsured liability claims-We are self-insured for the first $250,000 of each general and auto liability claim and accrue for estimated losses occurring from both asserted and unasserted claims. The estimate for unasserted claims arising from unreported incidents is based on an analysis of historical claims data and judgment.
- Regulatory deferred income tax and deferred income tax liabilities-These liabilities are estimated based on historical data and are subject to finalization of our income tax return. Actual results could differ from our estimates.

Deleted: y

Revenue Recognition

We bill utility customers on a monthly cycle basis; however, the billing cycle periods for most customers do not coincide with the accounting periods used for financial reporting. We accrue estimated revenue for gas and electric customers for consumption used but not yet billed for in an accounting period. Determination of unbilled revenue relies on the use of estimates and historical data. We believe that the estimates for unbilled revenue materially reflect the unbilled gross profit for our customers for units used but not yet billed in the current period.

The FPSC approves rates that are intended to permit a specified rate of return on investment and limits the maximum amount of earnings of regulated operations. Any earnings in excess of this maximum amount are accrued for as an over-earnings liability and revenues are reduced for this same amount. The calculations supporting these liabilities are complex and involve a variety of projections and estimates before the ultimate settlement of such obligations. The FPSC determines the disposition of any over-earnings with alternatives that include refunding to customers, funding storm damage or environmental reserves or reducing any depreciation reserve deficiency.

Effects of Inflation

Our tariffs for natural gas and electric operations provide for fuel clauses that adjust annually for changes in the cost of fuel. Increases in other utility costs and expenses not offset by increases in revenues or reductions in other expenses could have an adverse effect on earnings due to the time lag associated with obtaining regulatory approval to recover such increased costs and expenses, the uncertainty of whether regulatory commissions will allow full recovery of such increased costs and expenses and any effect on unregulated propane gas operations.

Environmental Matters

We currently use or have used in the past, several contamination sites that are currently involved in pending or threatened environmental litigation as discussed in Note 10-"Contingencies" in the Notes to Consolidated Financial Statements. We intend to vigorously defend our rights in this litigation. We have insurance and rate relief to cover

any expected losses or expenses. We believe that the aggregate of all future contamination assessment and remedial costs, legal fees and other related expenses would not exceed the insurance proceeds received and any rate relief granted. The final 2004 natural gas rate relief granted by the FPSC provided future recovery of $8.9 million for environmental liabilities. The remaining balance to be recovered from customers through future recovery is included on the balance sheet as "Other regulatory assets-environmental".

Off-Balance Sheet Arrangements
We do not have any off-balance sheet arrangements.

Forward-Looking Statements (Cautionary Statement)
This report contains forward-looking statements including those relating to the following expectations:

- Based on our current expectations for cash needs, including cash needs relating to the possible land purchase and related construction, we may choose to consider an equity or debt financing in 2008 to address those cash needs. The need and timing will depend upon operational requirements, environmental expenditures, pension contributions and construction expenditures and cannot be precisely predicted at this time.
- Pension expenses will continue to decrease in 2007.
- Other insurance costs will increase in 2007.
- Our anticipation of continued compliance in the foreseeable future with our line of credit covenants.
- Our expectation that cash requirements will increase significantly in the future due to environmental clean-up costs, sinking fund payment on long-term debt and pension contributions.
- Electric storm related expenditures may be necessary beginning in mid-2007 and the total cost may be significant. We may receive recovery for these expenditures.
- Propane gas hedging activity may occur in 2007.
- The fuel supply contract in our Northwest Florida division beginning January 1, 2008 will be approved by the FPSC in 2007 and will be effective for the purchase of fuel supply beginning in 2008.
- Our 2005 and 2006 over-earnings liabilities in natural gas will materialize as estimated after the FPSC reviews and audits.
- We expect to have higher fuel costs for 2007, 2008 and beyond.
- The development in Indiantown will occur as estimated.
- The purchase of land for our new natural gas and propane gas division office will occur in 2007.
- The FPSC will allow our natural gas over-earnings to fund a future storm reserve and reduce our current regulatory asset related to historic storm costs and discontinue the related natural gas storm surcharge in 2007.
-
- The commercial and industrial growth will occur as expected in our Northwest division providing increases in our revenues and gross profit.
- The two customers that went off-line in 2006 will be fully operational by mid-2007.

Deleted: We have increased our focus on collection efforts of bad debt and we expect our bad debt expense to return to normal levels in 2007 and beyond.

These statements involve certain risks and uncertainties. Actual results may differ materially from what is expressed in such forward-looking statements. Important factors

that could cause actual results to differ materially from those expressed by the forward-looking statements include, but are not limited to, those set forth above in "Risk Factors".

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

All financial instruments held by us were entered into for purposes other than for trading. We have market risk exposure only from the potential loss in fair value resulting from changes in interest rates. We have no material exposure relating to commodity prices because under our regulatory segments, we are currently fully compensated for the actual costs of commodities (natural gas and electricity) used in our operations. Any commodity price increases for propane gas are normally passed through monthly to propane gas customers as the fuel charge portion of their rate.

None of our gas or electric contracts are accounted for using the fair value method of accounting. While some of our contracts meet the definition of a derivative, we have designated these contracts as "normal purchases and sales" under SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities".

Beginning in 2007 we plan, on a rolling four-quarter basis, to purchase a "cap" on approximately one-third of our forecast propane gas volume purchases and pre-buy or hedge with a swap one-third of our forecast anticipated propane gas purchases. The remaining one-third will fluctuate with the market price. Our energy strategy allows us to participate in two-thirds of price declines but only one-third of price increases. As of December 31, 2006, we have not entered into any hedging activities. When we do enter into hedging activities, we will determine whether they meet the definition of normal sales and purchases and if not, we will determine whether we can use hedge accounting.

We have no exposure to equity risk, as we do not hold any equity instruments. Our exposure to interest rate risk is limited to investments held for environmental costs, the water sale long term receivable and short-term borrowings on the line of credit. The investments held for environmental costs are short-term fixed income debt securities whose carrying amounts are not materially different than fair value. The short-term borrowings were $3.5 million at the end of December 2006. Therefore, we do not believe we have material market risk exposure related to these instruments. The indentures governing our two first mortgage bond series outstanding contain "make-whole" provisions, which are pre-payment penalties that charge for lost interest, which render refinancing impracticable.

Our non-interest bearing long-term receivable from the sale of the water operations was discounted at 4.34%. A hypothetical 0.5% (50 basis points) increase in the interest rate used would change the current fair value from $6 million to $5.9 million.

In 2006, a hypothetical 0.5% (50 basis points) decrease in the long-term interest rate on $52.5 million debt excluding unamortized debt discount would change the fair value from $63 million to $66.9 million.

Changes in short-term interest rates could have an effect on income depending on the balance borrowed on the variable rate line of credit. We had short-term debt of $3.5 million on December 31, 2006 and $9.6 million on December 31, 2005. A hypothetical 1% increase in interest rates would have resulted in a decrease in annual earnings for 2006 by $35,000 and for 2005 by $96,000, based on year-end borrowings.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Summary of Significant Accounting and Reporting Policies

A. General

The Company is an operating public utility engaged principally in the purchase, transmission, distribution and sale of electricity and in the purchase, transmission, distribution, sale and transportation of natural gas. The Company is subject to the jurisdiction of the FPSC with respect to its natural gas and electric operations. The suppliers of electric power to the Northwest Florida division and of natural gas to the natural gas divisions are subject to the jurisdiction of the FERC. The Northeast Florida division is supplied most of its electric power by a municipality which is exempt from FERC and FPSC regulation. The Company also distributes propane gas through a non-regulated subsidiary.

B. Basis of Presentation

The consolidated financial statements include the accounts of Florida Public Utilities Company (FPU) and its wholly owned subsidiary, Flo-Gas Corporation. All significant intercompany balances and transactions have been eliminated. The Company's accounting policies and practices conform to accounting principles generally accepted in the United States of America (GAAP) as applied to regulated public utilities and are in accordance with the accounting requirements and rate-making practices of the FPSC and in accordance to the rule requirements of the Securities and Exchange Commission (SEC).

C. Use of Estimates

The preparation of financial statements in conformity with GAAP requires the Company to make certain estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of any contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Some of these estimates include the accruals for pensions, allowances, environmental liabilities, liability reserves, unbilled revenue, regulatory deferred tax liabilities and over-earnings liability. Actual results may differ from these estimates and assumptions.

D. Reclassifications

Certain amounts in the prior years' financial statements have been reclassified to conform to the 2006 presentation.

E. Regulation

The financial statements are prepared in accordance with the provisions of Statement of Financial Accounting Standards (SFAS) No. 71 – "Accounting for the Effects of Certain Types of Regulation". SFAS No. 71 recognizes that accounting for rate-regulated enterprises should reflect the relationship of costs and revenues introduced by rate regulation. A regulated utility may defer recognition of a cost (a regulatory asset) or show recognition of an obligation (a regulatory liability) if it is probable that, through the ratemaking process, there will be a corresponding increase or decrease in revenues. The Company has recognized certain regulatory assets and liabilities in the consolidated balance sheets. The Company believes that the FPSC will continue to allow recovery of

such items through rates. In the event that a portion of the Company's operations are no longer subject to the provisions of SFAS No. 71, the Company would be required to write-off related regulatory assets and liabilities that are not specifically recoverable through regulated rates. In addition, the Company would be required to determine if an impairment related to other assets exists, including plant, and write-down the assets, if impaired, to their fair value.

Summary of Regulatory Assets and Liabilities
(Dollars in thousands)

	2006	2005
Assets		
Deferred development costs (1)	$ 3,952	$ 4,190
Unamortized fuel related regulatory costs (6)	48	24
Environmental assets (2)	8,284	8,868
Storm Reserve assets (3)	270	452
Deferred retirement plan costs (5)	829	-
Unamortized Rate Case expense	368	541
Under-recovery of fuel costs	862	3,375
Unamortized piping and conversion costs (1)	1,521	1,587
Unamortized loss on reacquired debt (1)	209	227
Total Regulatory Assets	$16,343	$19,264
Liabilities		
Tax liabilities	$ 876	$ 991
Cost of removal	8,800	8,256
Storm reserve liabilities	1,636	1,536
Over-recovery of fuel costs	3,656	-
Over-recovery of conservation	355	24
Over-earnings liability (4)	880	700
Total Regulatory Liabilities	$16,203	$11,507

Deleted: -

Deleted: 15,481

Deleted: 2,794

Deleted: 15,341

(1) Deferred development costs, unamortized piping and conversion costs, and unamortized loss on reacquired debt are included in deferred charges in the consolidated balance sheets.

(2) The Company has included the amount due from customers as a regulatory asset for environmental costs. The FPSC authorized recovery of these environmenatl costs from customers over 20 years.

Deleted: his was authorized by t

Deleted: in their most recent natural gas rate proceeding and is being recovered

(3) The FPSC has authorized the Company to recover storm damages incurred in 2004 in their natural gas operations. Recovery of these costs from customers over 30 months began November 2005.

(4) The Company originally estimated the 2005 over-earnings for regulated natural gas operations at $700,000. In 2006 the estimate was reduced to $650,000. The Company has estimated 2006 over-earnings for regulated natural gas operations of $230,000. The Company has recorded these liabilities which reduced revenues. The FPSC determines the disposition of over-earnings with alternatives that include refunding to customers, funding storm damage or environmental reserves, or reducing any depreciation reserve deficiency.

(5) The actuarial valuation of the retirement plan obligations has been completed and the recognition provisions of Statement 158 at December 31, 2006 resulted in a regulatory asset for the portion of the loss of $829,000 to be recovered in future rate proceedings.

(6) The Company has deferred certain regulatory fuel related costs and as of January 2006 has been amortizing these over five years according to a FPSC order in the November 2005 fuel hearings.

The base revenue rates for regulated segments are determined by the FPSC and remain constant until a request for an increase is filed and approved by the FPSC or the FPSC orders the Company to reduce their rates. For the Company to recover increased costs from the effects of inflation and construction expenditures for regulated segments, a request for an increase in base revenues would be required. Separate filings would be required for the electric and natural gas segments. The Company is currently seeking rate relief for electric storm preparedness initiatives required in 2007.

F. Derivatives

None of the Company's gas or electric contracts are accounted for using the fair value method of accounting. All material contracts that meet the definition of derivative instruments are considered "normal purchases and sales" under SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities".

Deleted: possible

G. Revenue Recognition

The Company's revenues consist of base revenues, fuel adjustment charges, conservation charges and the pass-through of certain governmental imposed taxes based on revenues.

The FPSC approves base revenue rates that are intended to permit a specified rate of return on investment and limits the maximum amount of earnings of regulated operations. Fuel adjustment charges, conservation charges and the pass-through of certain governmental imposed taxes based on revenues are approved by the FPSC to allow recovery of fuel, conservation and revenue based taxes from the Company's customers. Any over or under-recovery of these expense items are deferred and subsequently refunded or collected in the following period.

Annually, any earnings in excess of this maximum amount permitted in the base rates are accrued for as an over-earnings liability and revenues are reduced an equivalent amount. The calculations supporting these liabilities are complex and involve a variety of projections and estimates before the ultimate settlement of such obligations. The FPSC determines the disposition of any over-earnings with alternatives that include refunding to customers, funding storm damage or environmental reserves, or reducing any depreciation reserve deficiency.

The Company bills utility customers on a monthly cycle basis; however, the billing cycle periods for most customers do not coincide with the accounting periods used for financial reporting. The Company accrues estimated revenue for gas and electric customers on usage not yet billed for the accounting period. Determination of unbilled revenue relies on the use of estimates, fuel purchases and historical data.

H. Allowance for Doubtful Accounts

The Company records an allowance for doubtful accounts based on historical information and trended current economic conditions. The following is a summary of the activity in Allowance for Doubtful Accounts for the years ending December 31:

Allowance for Doubtful Accounts				
	Balance at Beginning of Year	Write-offs	Provisions to Bad Debt Expense	Balance at End of Year
2004	$ 180,000	320,000	409,000	$ 269,000
2005	$ 269,000	292,000	295,000	$ 272,000
2006	$ 272,000	350,000	507,000	$ 429,000

Deleted: 11

I. Utility Plant and Depreciation

Utility plant is stated at original cost. The propane gas utility plant that has been acquired in acquisitions was stated at fair market value when acquired. Additions to utility plant include contracted services, direct labor, transportation and materials for additions. Units of property are removed from utility plant when retired. Maintenance and repairs of property and replacement and renewal of items determined not to be units of property are charged to operating expenses. Substantially all of the utility plant and the shares of Flo-Gas Corporation collateralize the Company's first mortgage bonds.

Utility Plant
(Dollars in thousands)

Plant Classification	Annual Composite Depreciation Rate	2006	2005
Land		$ 1,130	$ 1,124
Buildings	2.0% to 4.9%	6,991	6,862
Distribution	2.0% to 8.6%	158,010	147,580
Transmission	2.2% to 3.8%	6,878	6,799
Equipment	2.0% to 20.0%	12,700	11,534
Furniture and Fixtures	4.8% to 20.0%	392	369
Work-in-Progress		2,867	5,010
		$ 188,968	$ 179,278

Depreciation for the Company's regulated segments is computed using the composite straight-line method at rates prescribed by the FPSC for financial accounting purposes. Propane gas depreciation is computed using a composite straight-line method at an average rate based on estimated average life of approximately 20-30 years. Such rates are based on estimated service lives of the various classes of property. Depreciation provisions on average depreciable property approximate 3.9% in 2006, 3.9% in 2005 and 3.6% in 2004.

J. Impact of Recent Accounting Standards

Financial Accounting Standard Board Interpretation No. 48

In June 2006, the FASB issued Interpretation No. 48, Accounting for Uncertainty in Income Taxes (FIN 48). The interpretation clarifies the accounting for uncertainty in income taxes recognized in an entity's financial statements in accordance with SFAS No. 109, Accounting for Income Taxes. The interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 also provides guidance on de-recognition, measurement, classification, interest and penalties, accounting in interim periods, disclosure and transition. This interpretation is effective for calendar years beginning January 1, 2007.

We have performed an analysis of tax positions taken and expected to be taken on the tax returns and assessed the technical merits of each tax position by relying on legislation, statutes, common legislative intent, regulations, rulings and case law and determined that the Company has no material uncertain tax positions. Additionally, the IRS concluded an audit of the 2002 and 2003 tax years in September of 2005.

In February of 2007, the IRS informed us that it selected our 2003 and 2004 tax years for examination. As our tax positions have remained consistent with those from the previously audited tax years, we are not expecting any material adverse findings as the result of the impending IRS audit.

Based on the aforementioned, we believe that the adoption of FASB Interpretation No. 48 will not have a material impact on our financial condition or results of operations.

Financial Accounting Standard No. 157
In September 2006, the FASB issued Statement No. 157, "Fair Value Measurements". This Statement clarifies fair value as the market value received to sell an asset or paid to transfer a liability, that is, the exit value, and applies to any assets or liabilities that require recurring determination of fair value. The measurement includes any applicable risk factors and does not include any adjustment for volume. This Statement is effective for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods within. The Company expects to adopt SFAS No. 157 effective January 1, 2008. The Company does not believe adoption of this Statement will have a material impact on our financial condition or results of operation.

Financial Accounting Standard No. 158
In September 2006, the FASB issued Statement No. 158, "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans". Statement 158 requires the Company to show the funded status of its pension and retiree health care plans as a prepaid asset or accrued liability, and to show the net deferred and unrecognized gains and losses related to the retirement plans, net of tax, as part of accumulated other comprehensive income in shareholders' equity. Previously, the net deferred and unrecognized gains and losses were netted in the prepaid asset or accrued liability recorded for the retirement plans. The Company adopted the recognition provisions of Statement 158, as required, at December 31, 2006.

The Company uses December 31 as the measurement date to measure the assets and obligations of its retirement plans. Statement 158 will also require the Company to use December 31 as the measurement date no later than fiscal years ending after December 15, 2008. The Company currently uses this date as the measurement date, and has used it for all periods presented.

The actuarial valuation of the retirement plan obligations has been completed and the recognition provisions of Statement 158 at December 31, 2006 resulted in an additional liability for retirement plans. The tax on the non-regulated portion of this liability has been recorded as a deferred income tax asset. As an offset, the regulatory portion of this liability has been deferred as a regulatory asset-retirement plans to be recovered in future rate proceedings and the remaining expense from recording the liability has been included in other comprehensive income. The fair value of retirement plan assets and obligations are subject to change based on market fluctuations. The table below summarizes the effects to our financial statements.

FASB 158 Implementation Summary
(Dollars in thousands)

	December 31, 2006		
	Before Application of SFAS 158	Adjustment	After Application of SFAS 158
Assets:			
Other regulatory assets- retirement plans	$ -	$829	$829
Liabilities and Equity:			
Accumulated other comprehensive income/(loss)	-	(146)	(146)
Other accruals and payables	2,034	151	2,185
Long term medical and pension reserve	3,819	912	4,731
Deferred income taxes	16,224	(88)	16,136

Staff Accounting Bulletin No. 108

In September 2006, the SEC issued Staff Accounting Bulletin (SAB) No. 108 "Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements". SAB 108 requires that public companies utilize a "dual-approach" to assessing the quantitative effects of financial misstatements. This dual approach includes an assessment from both an income statement and a balance sheet focus. The guidance in SAB 108 must be applied to annual financial statements for fiscal years ending after November 15, 2006. The Company has adopted SAB No.108 and there has not been any impact on our consolidated financial position or results of operations as the result of this adoption.

2. **Goodwill and Intangible Assets**
In accordance with SFAS No. 142, "Goodwill and Other Intangible Assets", the Company does not amortize goodwill or intangibles with indefinite lives. The Company periodically tests the applicable reporting segments, natural gas and propane gas, for

Deleted: The Company uses September 30 as the measurement date to measure the assets and obligations of its retirement plans. Statement 158 will also require the Company to use December 31 as the measurement date no later than fiscal years ending after December 15, 2008. The Company expects to make this change in 2008.¶

Deleted: is

Deleted: ***Financial Accounting Standard No. 154¶***
In May 2005, the FASB issued Statement No. 154, "Accounting Changes and Error Corrections". This Statement applies to all voluntary changes in accounting principle and requires retrospective application to prior period financial statements of changes in accounting principle, unless it is impracticable to determine either the period-specific effects or the cumulative effects of the change. This Statement is effective for accounting changes and corrections of errors made in fiscal years beginning after December 15, 2005. We adopted SFAS No. 154 as of January 1, 2006; however, we did not have any impact to our financial statements in 2006 as a result of this adoption.¶

Deleted: ***Financial Accounting Standard Board Interpretation No. 47¶***
In March 2005, the FASB issued Interpretation No. 47, "An Interpretation of FASB Statement No. 143". SFAS No. 143, "Accounting for Asset Retirement Obligations", requires that the fair value of an asset retirement obligation be recognized at the time those obligations are incurred. Upon initial recognition of a legal liability, costs are capitalized as part of the related long-lived asset and allocated to expense over the useful life of the asset. SFAS No. 143 also requires that components of previously recorded depreciation related to the cost of removal of assets upon retirement, whether legal asset retirement obligations or not, be removed from a company's accumulated depreciation reserve. The Company adopted the provisions of the Statement as of January 1, 2003, as prescribed by the FPSC. Under FPSC guidelines, the estimated cost of removal expenses for normal retirements related to regulated fixed assets were reserved through the depreciation expense and accumulated reserves. This w ... [2]

impairment. In the event a segment becomes impaired, the Company would write down the associated goodwill and intangible assets to fair value. The impairment tests performed in 2005 and 2006 showed no impairment for either reporting segment.

Goodwill associated with the Company's acquisitions is identified as a separate line item on the consolidated balance sheet and consists of $500,000 in the natural gas segment and $1.9 million in the propane gas segment.

Intangible assets associated with the Company's acquisitions and software have been identified as a separate line item on the balance sheet. Summaries of those intangible assets at December 31 are as follows:

Intangible Assets
(Dollars in thousands)

		2006	2005
Customer distribution rights	(Indefinite life)	$ 1,900	$ 1,900
Customer relationships	(Indefinite life)	900	900
Software	(Five to nine year life)	3,122	2,971
Non-compete agreement	(Five year life)	-	35
Accumulated amortization		(1,517)	(1,415)
Total intangible assets, net of amortization		$4,405	$ 4,391

The 2006 amortization expense of computer software is approximately $300,000. The Company expects the amortization expense of computer software to be approximately $300,000 annually over the next five years, with the current level of software investment. The non-compete agreements expired in 2006.

3. *Over-earnings-Natural Gas*
The FPSC approves rates that are intended to permit a specified rate of return on investment and limits the maximum amount of earnings of regulated operations. The Company has agreed with the FPSC staff to limit the earned return on equity for regulated natural gas and electric operations.

The Company estimated 2005 over-earnings for regulated natural gas operations of $700,000. The 2005 over-earnings estimate was revised in 2006 to be $650,000. The Company estimated 2006 over-earnings for regulated natural gas operations of $230,000. These liabilities have been included in the over-earnings liability on the Company's balance sheet. The calculations supporting these liabilities are complex and involve a variety of projections and estimates before the ultimate settlement of such obligations.

The Company feels the estimates of the 2005 and 2006 over-earnings liabilities are accurate, but the amounts could change upon the FPSC finalization and review of earnings expected in 2007 and 2008. The FPSC determines the disposition of over-earnings with alternatives that include refunding to customers, increasing storm damage or environmental reserves or reducing any depreciation reserve deficiency.

Deleted: it

Deleted: funding

4. *Storm Reserves*
As of December 31, 2006, the electric segment storm reserve was approximately $1.6 million. Since the last order on the 1999 disposition of electric over-earnings, the FPSC has allowed the Company the flexibility of automatically applying the electric over-earnings to the storm

damage reserves each year since 1999 and allowing additional storm damage accruals up to a cap of $2.9 million. In 2006, 2005 and 2004 there were no electric over-earnings and accordingly no additional over-earnings amounts were added to the storm damage reserves.

In October 2005, the FPSC approved recovery of 2004 natural gas segment storm costs plus interest and revenue taxes over a 30-month period beginning November 2005. The Company deferred storm costs as a regulatory asset due from customers on the balance sheet. As of December 31, 2006, the unrecovered amount of natural gas regulatory asset relating to storm costs was $270,000.

The Company has requested that the FPSC allow 2005 over-earnings in natural gas to be used to recover the regulatory asset -storm and discontinue this storm surcharge. As part of this same request, the Company has also asked the FPSC to allow any excess over-earnings amount to provide additional funds for the "regulatory liability- storm reserve" for natural gas. We expect the FPSC to rule on this request during 2007.

In 2005, the FPSC approved applying 2002 natural gas over-earnings of $118,000 to the storm reserve to cover future storm costs.

5. Income Taxes

Deferred income taxes are provided on all significant temporary differences between the financial statements and tax basis of assets and liabilities at currently enacted tax rates. Investment tax credits have been deferred and are amortized based upon the average useful life of the related property in accordance with the rate treatment.

A. Income Taxes related to Deferred Gain on Water Sale

On March 27, 2003, the Company sold substantially all of its assets of the water division to the City of Fernandina Beach. The sale was made pursuant to a "threat of condemnation" during the fourth quarter of 2002. For tax purposes the Company elected to defer the gain on the sale of the assets pursuant to Code Section 1033 of the Internal Revenue Code of 1986 (IRC). Section 1033 allows non-recognition of gain if property is disposed as a result of threat of condemnation and property that is similar or related in service or use is purchased to replace the disposed property. To qualify, the replacement property must be purchased within the replacement period, which begins on the earlier of date of disposition (March 27, 2003) or date of threat of condemnation (December 31, 2002) and ending two years after the close of the year of sale (December 31, 2005). For real property, the replacement period is extended to three years (December 31, 2006).

The Company purchased property that is similar or related in service or use within the replacement periods with the exception of the intangible assets. During the IRS audit in 2005, the IRS disallowed a portion, approximately $900,000 of the deferral relating to the intangible assets, since replacement was no longer expected.

A $2.9 million estimated tax payment was made in 2003 related to the gain on the sale of the water division. It was subsequently determined that the income tax would be deferred. The Company applied for a refund and received $3.9 million in July 2004, which included other estimated tax overpayments.

B. Provision for Income Taxes

The provision (benefit) for income taxes consists of the following:

(Dollars in thousands)	Years ended December 31, 2006	2005	2004
Current payable			
Federal	$ 3,652	$ 2,150	$ (566)
State	664	370	(96)
Current – net	4,316	2,520	(662)
Deferred			
Federal	(1,674)	(143)	2,003
State	(272)	(9)	358
Deferred – net	(1,946)	(152)	2,361
Investment tax credit	(75)	(81)	(84)
Total income taxes	$ 2,295	$ 2,287	$ 1,615

C. Effective Tax Rate Reconciliation

The difference between the effective income tax rate and the statutory federal income tax rate applied to pretax income is of continuing operations accounted for as follows:

(Dollars in thousands)	Years ended December 31, 2006	2005	2004
Federal income tax at statutory rate (34%)	$ 2,230	$ 2,222	$ 1,771
State income tax, net of federal benefit (5.5%)	238	237	189
Investment tax credit	(75)	(81)	(84)
Tax exempt interest	(85)	(71)	(94)
Other	(13)	(20)	(167)
Total provision for income taxes	$ 2,295	$ 2,287	$ 1,615

D. Deferred Income Taxes

Temporary timing differences which produce deferred income taxes in the accompanying consolidated balance sheets are as follows:

(Dollars in thousands)	Years ended December 31, 2006	2005
Deferred tax assets:		
Environmental	$ 2,063	$ 1,932
Self insurance	774	731
Storm reserve liability	509	408
Vacation pay	357	320
Other deferred credits	15	61
Allowance for uncollectible accounts receivable	162	103
General liability	68	111
Rate refund	331	263
Pension	698	286
Under/over-recovery of conservation costs	134	9

Other	37	37
Total deferred tax assets	5,148	4,261
Deferred tax liabilities:		
Utility plant related	20,274	20,319
Deductible intangibles	696	577
Under-recovery of fuel costs	643	1,704
Rate case expense	138	204
Loss on reacquired debt	79	85
Other	33	6
Total deferred tax liabilities	21,863	22,895
Net deferred income taxes liabilities	$ 16,715	$ 18,634

Deferred tax liabilities included in the consolidated balance sheets are as follows:

(Dollars in thousands)	2006	2005
Deferred income tax – current	$ 579	$ 1,066
Deferred income tax – long term	16,136	17,568
Net deferred income tax liabilities	$ 16,715	$ 18,634

E. IRS Audit

The IRS has informed us that it has selected our 2003 and 2004 tax returns for examination. Management does not expect any material adjustments from the audit but the effects, if any, that result from the final resolution of this IRS audit will be recorded when they become known and estimable. The Company expects the audit will be completed before the end of 2007.

Deleted: It is our understanding that the 2003 tax return is included in the audit due to a net operating loss carry back to that year. The Company may incur related interest expense and income tax liabilities as a result of this audit.

Deleted: At this time m

Deleted: is unable to estimate

Deleted: could

The IRS completed an audit in 2005 of the Company's 2002 and 2003 federal income tax returns. The audit resulted in a current income tax payable amount of $361,000 due to adjustments to depreciation, reserve accounts and recognition of a portion of the water sale gain that was previously deferred. This amount was partially offset by $285,000 in deferred tax liabilities previously established.

6. Capitalization

A. Stock Dividend

On July 25, 2005 a three-for-two stock split in the form of a stock dividend was issued to the shareholders of record on July 15, 2005. All common share information has been restated to reflect the stock split for all periods presented.

B. Common Shares Reserved

The Company has 3,833,352 authorized but unissued shares and 160,349 treasury shares as of December 31, 2006. The Company has reserved the following common shares for issuance as of December 31, 2006:

Dividend Reinvestment Plan	54,071
Employee Stock Purchase Plan	52,035
Board Compensation Plan	20,714

C. Preferred Stock

The Company has 6,000 shares of 4 ¾% Series A preferred stock $100 par value authorized for issuance of which 6,000 were issued and outstanding at December 31, 2006. The Company also has 5,000, 4 ¾% Series B preferred stock $100 par value authorized for issuance none of which has been issued.

The Company also has 32,500, $1.12 Convertible Preference stock, $20 par value and $22 redemption price, authorized for issuance none of which has been issued.

D. Dividend Restriction

The Company's Fifteenth Supplemental Indenture of Mortgage and Deed of Trust restricts the amount that is available for cash dividends. At December 31, 2006, approximately $9 million of retained earnings were free of such restriction and therefore available for the payment of dividends. The line of credit agreement contains covenants that, if violated, could restrict or prevent the payment of dividends. At December 31, 2006 the Company is not in violation of these covenants.

E. Treasury Shares

In prior years, common shares resulting from stock dividends have been allocated to common shares held as treasury shares. Treasury shares are not eligible to receive such allocations. Some of these treasury shares were subsequently reissued, resulting in an overstatement of additional paid-in capital. Accordingly, the Company has restated all periods presented to reflect the correct number of treasury shares and the value of treasury shares and additional paid-in capital at each year-end. As the adjustment is a reallocation of amounts between treasury stock and additional paid-in capital, there is no effect on net income, earnings per common share or total stockholders' equity in any period presented.

F. Employee Stock Purchase Plan

The Company's Employee Stock Purchase Plan offers common stock at a discount to qualified employees.

G. Dividend Reinvestment Plan

The Company's Dividend Reinvestment Plan is offered to all Company shareholders and allows the shareholder to reinvest dividends received and purchase additional shares without a fee.

7. Long-term Debt

The Company issued its Fourteenth Series of FPU's First Mortgage Bond on September 27, 2001 in the aggregate principal amount of $15 million as security for the 6.85% Secured Insured Quarterly Notes, due October 1, 2031 (IQ Notes). Interest on the pledged bond accrues at the annual rate of 6.85% payable quarterly in arrears on January 1, April 1, July 1 and October 1 of each year beginning January 1, 2002.

The Company issued $14 million of Palm Beach County municipal bonds (Industrial Development Revenue Bonds) on November 14, 2001 to finance development in the area. The interest rate on the thirty-year callable bonds is 4.90%. The bond proceeds were restricted and held in trust until construction expenditures were actually incurred by the

Year ... [4]

Company. In 2002 the remaining $8 million was drawn from the restricted funds held by the trustee.

In 1992, the Company issued its First Mortgage Bond 9.08% Series in the amount of $8 million. The thirty-year bond is due in June 2022.

The Company issued two of its Twelfth Series First Mortgage bond series on May 1, 1988; the 9.57% Series due 2018 in the amount of $10 million and 10.03% Series due 2018 in the amount of $5.5 million. These two issuances require sinking fund payments of $909,000 and $500,000 respectively, beginning in 2008.

Long-term debt on the balance sheet has been reduced for unamortized debt discount. The unamortized debt discount at December 31 included in long-term debt on the balance sheet is $1.8 million in 2006 and $1.9 million in 2005.

Annual Maturities of Long-Term Debt
(Dollars in thousands)

	Total	2007	2008	2009	2010	2011	Thereafter
Long-term Debt	$52,500	-	$1,409	$1,409	$1,409	$1,409	$ 46,864

8. Notes Payable

In 2004, FPU entered into an amended and restated loan agreement that allows the Company to increase the line of credit upon 30 days notice by the Company to a maximum of $20 million. In 2006 the agreement was renewed with an expiration date of July 1, 2008. We have not exercised our option to increase the line of credit limit which is currently at $12 million with an outstanding balance of $3.5 million and a remaining amount available of $8.5 million. The Company reserves $1 million of the line of credit to cover expenses for any major storm repairs in its Northwest Florida division. An additional $250,000 of the line of credit is reserved for a 'letter of credit' insuring our propane facilities.

The average interest rates for the line of credit were as follows as of December 31:

Year	Rate
2006	6.2%
2005	5.3%
2004	3.3%

9. Fair Value of Financial Instruments

The carrying amounts reported in the balance sheet for investments held in escrow for environmental costs, notes payable, taxes accrued and other accrued liabilities approximate fair value. The fair value of long-term debt excluding the unamortized debt discount is estimated by discounting the future cash flows of each issuance at rates currently offered to the Company for similar debt instruments of comparable maturities. The values at December 31 are shown below.

Deleted: since the older bonds contain 'make whole' provisions that negates any fluctuation in interest rates

2006	2005

In thousands	Carrying Amounts	Approximate Fair Value	Carrying Amounts	Approximate Fair Value
Long-term debt	$ 52,500	$63,000	$52,500	$ 63,000

Deleted: ,000
Deleted: ,000
Deleted: ,000
Deleted: ,000

10. Contingencies

Environmental

The Company is subject to federal and state legislation with respect to soil, groundwater and employee health and safety matters and to environmental regulations issued by the Florida Department of Environmental Protection (FDEP), the United States Environmental Protection Agency (EPA) and other federal and state agencies. Except as discussed below, the Company does not expect to incur material future expenditures for compliance with existing environmental laws and regulations.

The Company currently has $13.8 million reserved as an environmental liability. The FPSC approved up to $14 million for total recovery from insurance and rates based on the original 2005 projections as a basis for rate recovery. The Company has recovered a total of $5.5 million from insurance and rate recovery, net of costs incurred to date. The remaining balance of $8.3 million is recorded as a regulatory asset. On October 18, 2004 the FPSC approved recovery of $9.1 million for environmental liabilities (the remaining amount to be recovered is $8.3 million and is included on the balance sheet as "Other regulatory assets – environmental"). The amortization of this recovery and reduction to the regulatory asset began on January 1, 2005. The majority of environmental cash expenditures are expected to be incurred before 2010, but may continue for another 10 years.

West Palm Beach Site

The Company is currently evaluating remedial options to respond to environmental impacts to soil and groundwater at and in the immediate vicinity of a parcel of property owned by it in West Palm Beach, Florida upon which the Company previously operated a gasification plant. The Company entered into a Consent Order with the FDEP effective April 8, 1991, that requires the Company to delineate the extent of soil and groundwater impacts associated with the prior operation of the gasification plant and to remediate such soil and groundwater impacts, if necessary. The Company completed the delineation of soil and groundwater impacts at the site in October 2006. An engineering consultant was retained to perform a feasibility study to evaluate appropriate remedies for the site. The feasibility study was transmitted to FDEP on November 30, 2006.

The feasibility study evaluated a wide range of remedial alternatives based on criteria provided by applicable laws and regulations. The total costs for the remedies evaluated in the feasibility study ranged from a low of $2.8 million to a high of $54.6 million. Based on the likely acceptability of proven remedial

technologies described in the feasibility study and implemented at similar sites, consulting/remediation costs to address the impacts now characterized at the West Palm Beach site are projected to range from $4.6 million to $17.9 million. This range of costs covers such remedies as in situ solidification for deeper soil impacts, excavation of superficial soil impacts, installation of a barrier wall with a permeable biotreatment zone (PBZ), monitored natural attenuation of dissolved impacts in groundwater (MNA) or some combination of these remedies. The feasibility study proposed a remedy of superficial soil excavation, and installation of a hanging barrier wall with PBZ and MNA, the cost of which is projected to range from $4.6 million to $9.9 million.

Prior to FDEP's approval of a final remedy for the site, the Company is unable to determine, to a reasonable degree of certainty, the complete extent or cost of remedial action that may be required. As of December 31, 2006, and subject to the limitations described above, remediation costs (including attorneys' fees and costs) for this site are projected to range from approximately $4.8 million to $18 million.

Sanford Site
The Company owns a parcel of property located in Sanford, Florida, upon which a gasification plant was operated prior to its acquisition of the property. Following discovery of soil and groundwater impacts on the property, the Company has participated with four former owners and operators of the gasification plant in the funding of numerous investigations of the extent of the impacts and the identification of an appropriate remedy. On or about March 25, 1998, the Company executed an Administrative Order on Consent (AOC) with the four former owners and operators (collectively, the Group) and the EPA that obligated the Group to implement a Remedial Investigation/Feasibility Study (RI/FS) and to pay EPA's past and future oversight costs. The Group also entered into a Participation Agreement and an Escrow Agreement on or about April 13, 1998 (WFS Participation Agreement). Work under the RI/FS AOC and RI/FS Participation Agreement is now complete and the Company has no further obligations under either document.

In late September 2006, EPA sent a Special Notice Letter to the Company, notifying the Company of EPA's selection of a final remedy for OU1 (soils), OU2 (groundwater), and OU3 (sediments), and giving the Company and the other Group members sixty (60) days within which to submit a "good faith offer" to EPA to provide for implementation of the selected remedies. The Special Notice Letter included an Amended Record of Decision (ROD) for OU1 (the ROD for OU1 was amended to account for a significant increase in the volume of off-site soil impacts and a change in the selected remedy), the original ROD for OU2, and a ROD for OU3. The total estimated remediation costs for the Sanford Gasification Plant Site are now projected to be $12.5 million. On November 30, 2006, the Company and the Group submitted to EPA a good faith offer to implement the approved remedies as set forth in the RODs for OU1 through OU3.

In January, the Company along with the other members of the Group signed a Third Participation Agreement, which provides for funding the remediation work specified in the RODs for OU1 through OU3 and supercedes and replaces the Second Participation Agreement. The Company's share of remediation costs under the Third Participation Agreement is set at 5% of a maximum of $13 million, or

$650,000. At present, it is not anticipated that the total cost of remediation will exceed $13 million. If it does, the Group members have agreed to negotiate in good faith to allocate the excess costs at such time that it reasonably appears that the total remediation costs will exceed $13 million. In any such event, the Company does not expect our share of such additional costs to be greater than 5%; and its share of such additional costs may be less than 5%.

The Company's future legal costs and expenses and its share future remediation expenses for this site are currently projected to be approximately $710,000.

Deleted: 710,000

Pensacola Site
The Company is the prior owner/operator of the former Pensacola gasification plant, located in Pensacola, Florida. Following notification on October 5, 1990 that FDEP had determined that the Company was one of several responsible parties for any environmental impacts associated with the former gasification plant site, the Company entered into cost sharing agreements with three other responsible parties providing for the funding of certain contamination assessment activities at the site.

Following field investigations performed on behalf of the responsible parties, on July 16, 1997, FDEP approved a final remedy for the site that provides for annual sampling of selected monitoring wells. Such annual sampling has been undertaken at the site since 1998. The Company's share of these costs is less than $2,000 annually or a total of $27,000.

In March 1999, EPA requested site access in order to undertake an Expanded Site Inspection (ESI). The ESI was completed by EPA's contractor in 1999 and an ESI Report was transmitted to the Company in January 2000. The ESI Report recommends additional work at the site. The responsible parties met with FDEP on February 7, 2000 to discuss EPA's plans for the site. In February 2000, EPA indicated preliminarily that it will defer management of the site to FDEP; however, as of December 31, 2006, the Company has not received any written confirmation from EPA or FDEP regarding this matter. Prior to receipt of EPA's written determination regarding site management, the Company is unable to determine whether additional field work or site remediation will be required by EPA and, if so, the scope or costs of such work.

Key West Site
From 1927 to 1938, the Company owned and operated a gasification plant in Key West, Florida. The plant discontinued operations in the late 1940s; the property on which the plant was located is currently used for a propane gas distribution business. In March 1993, a Preliminary Contamination Assessment Report (PCAR) was prepared by a consultant jointly retained by the Company and the current site owner and was delivered to FDEP. The PCAR reported that very limited soil and groundwater impacts were present at the site. By letter dated December 20, 1993, FDEP notified the Company that the site did not warrant further "CERCLA consideration and a Site Evaluation Accomplished disposition is recommended." FDEP then referred the matter to its Marathon office for consideration of whether additional work would be required by FDEP's district office under Florida law. As of December 31, 2006, the Company has received no further communication from FDEP with respect to the site. At this time, we are unable to determine whether additional fieldwork will be required by FDEP and, if so, the scope or costs of such

work. In 1999, the Company received an estimate from its consultant that additional costs to assess and remediate the reported impacts would be approximately $166,000. Assuming the current owner shared in such costs according to the allocation agreed upon by the parties for the PCAR, the Company's share would be approximately $83,000.

11. Commitments

A. General

To ensure a reliable supply of electric and natural gas at competitive prices, the Company has entered into long-term purchase and transportation contracts with various suppliers and producers, which expire at various dates through 2015. Purchase prices under these contracts are determined by formulas either based on market prices or at fixed prices. At December 31, 2006, the Company has firm purchase and transportation commitments adequate to supply its expected future sales requirements. The Company is committed to pay demand or similar fixed charges of approximately $37.8 million during 2007 related to gas purchase agreements. Substantially all costs incurred under the electric and gas purchase agreements are recoverable from customers through fuel adjustment clause mechanisms.

B. Operating Leases

The Company's total operating lease obligation is $352,000. The Company is leasing property from the City of Fernandina Beach in our Northeast division. The Company is in the process of renegotiating the terms of this lease and it may be able to terminate this lease at an earlier date. The Company leases an appliance showroom in the same division for approximately $35,000 annually. The Company also has other operating lease agreements with various terms and expiration dates. The following table shows the approximate future obligations under noncancelable agreements.

	2007	2008	2009	2010	2011
Operating Lease Obligations	$151,000	$116,000	$47,000	$38,000	-

12. Employee Benefit Plans

The actuarial valuation of the retirement plan obligations has been completed and the recognition provisions of Statement 158 at December 31, 2006 resulted in an additional liability for retirement plans, pension plan and retirees medical plan. See Footnote 1J, Impact of Recent Accounting Standards, Financial Accounting Standard 158 for a summary of the impact to our financial statements.

A. Pension Plan

The Company sponsors a qualified defined benefit pension plan for non-union employees that were hired before January 1, 2005 and for unionized employees that work under one of the six Company union contracts and were hired before their respective contract dates in 2005.

Deleted: that approved this change in 2005. Our six union contracts have accepted this change for their new members hired after

The following tables provide a reconciliation of the changes in the plan's benefit obligations and fair value of assets over the 3-year period ending December 31, 2006 and a statement of the funded status as of December 31, of all three years:

61

Benefit Obligations and Funded Status

		Years Ended December 31, 2006	2005	2004

Plan Assets

		Target Allocation 2007	Percentage of Plan Assets at December 31 2006	2005	2004
(1)	Plan Assets				
(a)	Equity Securities	40%-60%	68%	67%	69%
(b)	Debt Securities	25%-40%	30%	32%	30%
(c)	Real Estate	5%-15%	0%	0%	0%
(d)	Other	5%-15%	2%	1%	1%
(e)	Total		100%	100%	100%

Expected Return on Plan Assets

The expected rate of return on plan assets is 8.5%. The Company expects 8.5% to fall within the 40 to 50 percentile range of returns on investment portfolios with asset diversification similar to that of the Pension Plan's target asset allocation.

Investment Policy and Strategy

The Company has established and maintains an investment policy designed to achieve a long-term rate of return, including investment income and appreciation, sufficient to meet the actuarial requirements of the Pension Plan. The Company seeks to accomplish its return objectives by investing in a diversified portfolio of equity, fixed income and cash securities seeking a balance of growth and stability as well as an adequate level of liquidity for pension distributions as they fall due. Plan assets are constrained such that no more than 10% of the portfolio will be invested in any one issue.

Cash Flows

Voluntary Prescription Drug Coverage

Legislation enacted in December 2003 provides for the addition of voluntary prescription drug coverage under Medicare starting in 2006. The legislation also provides for a 28% tax-free subsidy for each qualified covered retiree's drug cost between certain thresholds if the employer's coverage is at least actuarially equivalent to the standard Medicare drug benefit. Based on the final regulations issued by the Centers for Medicare and Medicaid Services on January 21, 2005, we determined our prescription drug coverage of the Postretirement Medical Benefits plan to be actuarially equivalent to Medicare Part D.

Discount Rate Assumption

The discount rate assumption used to determine the postretirement benefit obligations is based on current yield rates in the double A bond market. The current year's discount rate was selected using a method that matches projected payouts from the plan with a zero-coupon double A bond yield curve. This yield curve was constructed from the underlying bond price and yield data collected as of the plan's measurement date and is represented by a series of annualized, individual discount rates with durations ranging from six months to thirty years. Each discount rate in the curve was derived from an equal weighting of the double A or higher bond universe, apportioned into distinct maturity groups. These individual discount rates are then converted into a single equivalent discount rate, which is then used for FAS discount purposes. To assure that the resulting rates can be achieved by a postretirement benefit plan, only bonds that satisfy certain criteria and are expected to remain available through the period of maturity of the plan benefits are used to develop the discount rate. Prior years' discount rate assumptions were set based on investment yields available on double A, long-term corporate bonds.

Actuarial Equivalent

In determining "Actuarial Equivalence," our plan's actuary, Aon Consulting, proprietary prescription drug pricing tool, Aon Rx, was used. This tool allowed us to determine the estimated Per Member Per Month (PMPM) prescription drug cost

for both the Company plan and the Medicare plan. The two PMPM's were adjusted for monthly retiree contributions. We assumed that 60% of the monthly combined medical and prescription drug retiree contribution for the Company plan applies towards prescription drugs.

Deleted: Because the subsidy is the same regardless of the cost sharing structure unless the plan is not "Actuarial Equivalent", in general a plan that has higher cost sharing would reduce their annual cost as a percentage greater than a plan would that has lower cost sharing.

C. Health Plan

In December 2003, the Company became fully insured for its employee and retiree's medical insurance. Net health care benefits paid by the Company for active employees were approximately $1.7 million in 2006, $1.6 million in 2005 and $1.5 million in 2004, excluding administrative and stop-loss insurance.

D. 401K Plan

The Company has discontinued eligibility to the defined benefit pension plan for all new hires, and replaced it with a new 401K match.

For new hires not eligible for the defined benefit pension plan, we established an employer match to the employee's contribution to their 401K plans. It provided for a company match of 50% for each dollar contributed by the employee, up to 6% of their salary, for a Company contribution of up to 3%. Beginning in 2007, for non-union employees the plan was enhanced to provide a company match of 100% for the first 2% of an employee's contribution, and a match of 50% for the next 4% of an employee's contribution, for a total company match of up to 4%. This new enhanced match will be negotiated with our six union contracts during 2007, to be effective on their respective contract date within 2007. The employees are eligible for the company match after six months of continuous service, with vesting of 100% after three years of continuous service. The expenses incurred in 2005 and 2006 relating to the Company's 401K plan are not material.

E. Employee Stock Purchase Plan

The Company offers an employee stock purchase plan to substantially all of its employees. The plan offers a 15% discount on the Company's stock at market price fixed six months prior to the date of purchase. The recorded stock compensation expense relating to the Company's employee stock purchase plan is not material.

13. Segment Information

The Company is organized into two regulated business segments: natural gas and electric, and one non-regulated business segment, propane gas. There are no material inter-segment sales or transfers.

Identifiable assets are those assets used in the Company's operations in each business segment. Common assets are principally cash and overnight investments, deferred tax assets and common plant.

Business segment information for 2006, 2005 and 2004 is summarized as follows:

(Dollars in thousands)	2006	2005	2004
Revenues			
Natural gas	$ 70,981	$ 69,094	$ 55,962
Electric	48,527	47,450	42,910

Propane gas	14,727	13,479	11,167
Consolidated	$ 134,235	$ 130,023	$ 110,039
Operating income, excluding income tax			
Natural gas	$ 6,118	$ 6,049	$ 4,978
Electric	3,137	3,502	3,353

14. Quarterly Financial Data (Unaudited)

The quarterly financial data presented below reflects the influence of seasonal weather conditions, the timing of rate increases and the migration of winter residents and tourists to Central and South Florida during the winter season. Significant increases in the fourth quarter of 2005 expenses relate to the performance of previously delayed expenditures from previous quarters.

(Dollars in thousands, except per share amounts):	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
2006				
Revenues	$ 43,348	$ 29,878	$ 29,415	$ 31,594
Gross profit	$ 14,135	$ 11,402	$ 10,867	$ 11,860
Operating income	$ 4,528	$ 2,065	$ 1,488	$ 2,248
Earnings before income taxes	$ 3,507	$ 1,162	$ 609	$ 1,281

Net Income	$	2,221	$	738	$	475	$	830
Earnings per common share (basic and diluted):								
Continuing operations	$	0.37	$	0.12	$	0.08	$	0.14
2005								
Revenues	$	35,438	$	28,329	$	29,190	$	37,066
Gross profit	$	13,619	$	10,963	$	10,374	$	12,263
Operating income	$	4,684	$	2,215	$	1,578	$	2,160
Earnings before income taxes	$	3,711	$	1,205	$	573	$	1,046
Net Income	$	2,353	$	851	$	260	$	784
Earnings per common share (basic and diluted):								
Continuing operations	$	0.40	$	0.14	$	0.04	$	0.13

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Directors and Shareholders of FPU:

We have audited the accompanying consolidated balance sheets and statements of capitalization of Florida Public Utilities Company and its wholly-owned subsidiary, Flo-Gas Corporation as of December 31, 2006 and 2005 and the related consolidated statements of income, comprehensive income, common shareholders' equity and cash flows for each of the three years in the period ended December 31, 2006. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

Deleted: wo

Deleted: We have also audited the schedule listed in the accompanying index.

Deleted: and schedule

Deleted: and schedule

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements and schedules, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Deleted: and schedules

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Florida Public Utilities Company and its wholly-owned subsidiary, Flo-Gas Corporation at December 31, 2006 and 2005, and the results of its operation and its cash flows for each of the three years in the period ended December 31, 2006, in conformity with accounting principles generally accepted in the United States of America.

Deleted: wo

Deleted: Also, in our opinion, the schedule presents fairly, in all material respects, the information set forth therein.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None

Item 9A. Controls and Procedures

Disclosure Controls and Procedures

Our management carried out an evaluation, under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, of the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act). Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that, as of December 31, 2006, our disclosure controls and procedures were effective, in that they provide reasonable assurance that information required to be disclosed by us in the reports that we file or submit under the Exchange Act are recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

Changes in Internal Control over Financial Reporting

No change in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) occurred during the fiscal quarter ended December 31, 2006 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Item 9B. Other Information

None

PART III

Item 10. Directors and Executive Officers of the Registrant

Information required by this item concerning directors and nominees of the Registrant will be included under the caption "Information About Nominees and Continuing Directors" in the Registrant's Proxy Statement for the 2007 Annual Meeting of Shareholders (the "2007 Proxy Statement") and is incorporated by reference herein. Information required by this item regarding the Audit Committee will be included under the caption "Board of Directors and Committees" in the 2007 Proxy Statement and is incorporated by reference herein. Information required by this Item regarding the Code of Ethics will be included under the caption "Code of Ethics" in the 2007 Proxy Statement and is incorporated by reference herein. Information required by this Item regarding compliance with Section 16(a) of the Exchange Act will be set forth in the 2007 Proxy Statement under "Section 16(a) Beneficial Ownership Reporting Compliance" and is incorporated by reference herein. Information required by this Item concerning executive officers is set out in Part I of this Form 10-K, above.

Item 11. Executive Compensation

Information required by this Item concerning executive compensation is included under the captions "Board of Directors and Committees", "Executive Compensation", and "Compensation Committee Interlocks and Inside Participation" in the 2007 Proxy Statement is incorporated by reference herein.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

Information required by this Item concerning the security ownership of certain of the Registrant's beneficial owners and management is included under the caption "Security Ownership of Management and Certain Beneficial Owners" in the 2007 Proxy Statement and is incorporated by reference herein. See Item 5 above for equity compensation plan information, which is incorporated by reference herein.

Item 13. Certain Relationships and Related Transactions

None.

Item 14. Principal Accountant Fees and Services

Information required by this Item is set forth in the Registrant's 2007 Proxy Statement under the caption "Principal Accountant Fees and Services" and is incorporated by reference herein.

PART IV

Item 15. Exhibits, Financial Statement Schedules

(a) The following documents are filed as part of this report:

(1) Financial Statements
The following consolidated financial statements of the Company are included herein and in the Registrant's 2006 Annual Report to Shareholders:
