IN RE: NUCLEAR POWER PLANT COST RECOVERY CLAUSE

Docket No. 100009-EI
Submitted for Filing: July 12, 2010

PROGRESS ENERGY FLORIDA'S TWELFTH REQUEST FOR CONFIDENTIAL CLASSIFICATION REGARDING PORTIONS OF THE DOCUMENTS AND INFORMATION PROVIDED TO STAFF AUDITOR DURING AUDIT NO. PA 10-01-001

Progress Energy Florida, Inc. ("PEF" or the "Company"), pursuant to Sections 366.093, Florida Statutes, and Rule 25-22.006(3), Florida Administrative Code, requests confidential classification of portions of the documents and information (the "audit response documents") provided to the Florida Public Service Commission Staff ("Staff") Auditors for review in conducting its annual audit of the Company's nuclear projects and in drafting *Audit Control No. PA 10-01-001* (the "Audit Report"). These audit response documents contain confidential contractual information, the disclosure of which would impair PEF's competitive business interests and violate PEF's confidentiality agreements with third parties, internal audit controls and reports, financial and cost information, and other information the disclosure of which would impair the Company's competitive business interests. Accordingly these audit response documents meet the definition of proprietary confidential business information per section 366.093(3), Florida Statutes. The unredacted documents are being filed under seal with the Commission on a confidential basis to keep the competitive business information in those documents confidential.

BASIS FOR CONFIDENTIAL CLASSIFICATION

Section 366.093(1), Florida Statutes, provides that "any records received by the Commission which are shown and found by the Commission to be proprietary confidential business information shall be kept confidential and shall be exempt from [the Public Records Act]." Proprietary confidential business information means information that is (i) intended to be and is treated as private confidential information by the Company, (ii) because disclosure of the information would cause harm, (iii) either to the Company's ratepayers or the Company's business operation, and (iv) the information has not been voluntarily disclosed to the public. § 366.093(3), Fla. Stat. Specifically, "information concerning bids or other contractual data, the disclosure of which would impair the efforts of the public utility or its affiliates to contract for goods or services on favorable terms" is defined as proprietary confidential business information. § 366.093(3)(d), Fla. Stat. Additionally, that statute defines "[i]nternal auditing controls and reports of internal auditors," and "information relating to competitive interests, the disclosure of which would impair the competitive business of the provider of the information," as proprietary confidential business information. §§ 366.093(3)(b) & (e), Fla. Stat.

Portions of the aforementioned audit response documents should be afforded confidential classification for the reasons set forth in the Affidavits of Jon Franke, John Elnitsky, Sue Hardison, and Raymond Phillips filed in support of PEF's Request for Confidential Classification, and for the following reasons. Specifically, portions of these responses contain confidential contractual data, including pricing agreements and other confidential contractual terms, the release of which would impair PEF's competitive business interests, and would further be a violation of the PEF's confidentiality agreements. See Affidavits of Franke, ¶ 4; Elnitsky, ¶ 4; & Hardison, ¶ 4.

The audit response documents contain work authorization contractual amendments and other contractual data that are subject to confidentiality agreements between PEF and the other contracting parties. PEF negotiates each of its contracts to obtain the most competitive terms available to benefit PEF and its ratepayers. In order to successfully obtain such contracts, however, PEF must be able to assure the other parties to the contracts that the sensitive business information contained therein, such as quantity and pricing terms, will remain confidential. The public disclosure of this information would allow other parties to discover how the Company analyzes risk options, scheduling, and cost, and would impair PEF's ability to contract for such goods and services on competitive and favorable terms. Portions of these documents reflect the Company's internal strategies for evaluating projects and meeting deadlines. If such information was disclosed to PEF's competitors and/or other potential suppliers, PEF's efforts to obtain competitive nuclear equipment and service options that provide economic value to both the Company and its customers could be compromised by the Company's competitors and/or suppliers changing their offers, consumption, or purchasing behavior within the relevant markets. PEF has kept confidential and has not publicly disclosed the proprietary contract terms and provisions at issue here. Absent such measures, PEF would run the risk that sensitive business information regarding what it is willing to pay for certain goods and services, as well as what the Company is willing to accept as payment for certain goods and/or services, would be made to available to the public and, as a result, other potential suppliers, vendors, and/or purchasers of such services could change their position in future negotiations with PEF. Without PEF's measures to maintain the confidentiality of sensitive terms in these contracts, the Company's efforts to obtain competitive contracts would be undermined. In addition, by the terms of these contracts, all parties, including PEF, have agreed to protect the proprietary and confidential

information, defined to include pricing arrangements, from public disclosure. See Affidavits of Franke, ¶ 4; Elnitsky, ¶ 4; & Hardison, ¶ 4.

The audit response documents also include internal audit procedures and reports, the release of which would harm PEF's ability to conduct internal audits. Public disclosure of the documents and information in question would compromise PEF's ability to effectively audit the Company's major projects. If the Company were to know that its internal auditing controls and process were subject to public disclosure, it would compromise the level of cooperation needed with auditors to efficiently conduct audits. In addition, such information and documents are specifically defined by Section 366.093(3)(b) as proprietary confidential business information that is entitled to confidential status. Affidavit of Phillips, ¶ 4.

Upon receipt of this confidential information, strict procedures are established and followed to maintain the confidentiality of the information provided, including restricting access to those persons who need the information to assist the Company. See Affidavits of Franke, ¶ 5-6; Elnitsky, ¶ 5; Hardison, ¶ 5; Phillips, ¶ 5. At no time since receiving the information in question has the Company publicly disclosed that information. See Affidavits of Franke, ¶ 5-6; Elnitsky, ¶ 5; Hardison, ¶ 5; Phillips, ¶ 5. The Company has treated and continues to treat the information at issue as confidential. See Affidavits of Franke, ¶ 5-6; Elnitsky, ¶ 5; Hardison, ¶ 5; Phillips, ¶ 5.

CONCLUSION

The competitive, confidential information at issue in this request fits the statutory definition of proprietary confidential business information under Section 366.093, Florida Statutes, and Rule 25-22.006, Florida Administrative Code, and that information should be afforded confidential classification. In support of this motion, PEF has enclosed the following:

(1) A separate, sealed envelope containing one copy of the confidential Appendix A to PEF's Request for Confidential Classification for which PEF has requested confidential classification with the appropriate section, pages, or lines containing the confidential information highlighted. **This information should be accorded confidential treatment pending a decision on PEF's request by the Florida Public Service Commission;**

(2) Two copies of the documents with the information for which PEF has requested confidential classification redacted by section, page or lines, where appropriate, as Appendix B; and,

(3) A justification matrix supporting PEF's Request for Confidential Classification of the highlighted information contained in confidential Appendix A, as Appendix C.

WHEREFORE, PEF respectfully requests that the redacted portions of the audit response documents be classified as confidential for the reasons set forth above.

Respectfully submitted this 12th day of July, 2010.

A Siemens payment of [redacted] was accrued earlier in the year for the completion of the Inner Casing Fabrication. There were issues that emerged just before shipment that have not been resolved with Siemens so the payment is not projected to be paid in 2009. This caused the reversal of the [redacted] accrual in July. POD total project cost is approximately [redacted] under budget for July. Approximately [redacted] was approved in project Integrated Change Forms (ICF) for Engineering Costs, these were not previously budgeted. EPU is favorable MTD The major variance items for December are: A budgeted TEI milestone payment of delayed and rescheduled to 2010 due to startup delay. EPU received a material burdens credit in December of for overpayment of warehouse burdens in 2009. EPU Point of Discharge material purchases is under budget approximately as delivery and payment have been rescheduled to 2010. A payment of for the rework of EPU License Amendment Renewal activities was not budgeted.

EPU is favorable YE In March, the 2009 Point of Discharge (POD) portion of the EPU project had a scope reduction of a warehouse and recirculation line that was removed from scope. These funds were moved into contingency and utilized primarily for additional EPU Phase 2 implementation contract labor and CR3 costs, as well as Phase 3 Engineering costs. This produced a net effect of for 2009.

In July, the total YE projection was reduced by for LP Turbine work that is being re-projected to the R17 outage in 2011. At the same time a request for funds of for contingency was granted. The total net affect to 2009 was a reduction of

At year end, the EPU POD portion of work was under an additional primarily due to large component milestones that are being rescheduled for 2010. TEI and Siemens milestone payments, as well as approximately ESI and Barnhart payments were budgeted in December but delayed to 2010 due to CR3 plant startup delay. Approximately of contingency is also being re-forecasted to later years.

All these changes have no material effect on the project life estimate that was approved through the October 2009 IPP. The cash flow changes will be incorporated into the next IPP revision.

CR3 EPU Project Response To:
Florida Public Service Commission
Audit Document/Record Request

Utility:	Progress Energy Florida
From:	Tripp Coston
Request Number:	DR-3
Date of Request:	03/26/10
Audit Purpose:	Nuclear Project Management and Internal Controls Review

Item Description:

3.8) Question:

Please describe, in detail, all options currently being considered by PEF to resolve the LPT issue for the CR3 EPU project. For each option, please discuss the impact on MWe output.

CONFIDENTIAL
Response:

The viability of the CR3 EPU project for PEF and the value of the CR3 EPU to PEF's customers was established in the November 2006 Business Analysis Plan. The first two phases of the CR3 EPU project have been successfully completed with the exception of the installation of the new low pressure turbines that were moved to the next refueling outage. PEF customers will be receiving the benefit of an additional 16 MWe upon the restart of CR3.

With regard to the low pressure turbines, the options under evaluation are:

a. This WA scope of work included the NSSS engineering, Fuel Engineering, and LAR work necessary to implement the EPU project. The scope of work was in direct support of the LAR. The NRC Regulatory Standard guidance document RS-001 and the Ginna LAR submittal were the guides for the LAR scope and format under the WA with AREVA.

2008

June 26, 2008

The NRC acknowledged Monticello's withdrawal of its EPU LAR. Monticello withdrew rather than face possible rejection of its application. The NRC noted three reasons for the withdrawal. One of the reasons directly impacted the CR3 Uprate LAR format and work scope. This was the Environmental Qualification. For the first time, the NRC had insisted that much more of the EQ work had to be completed prior to submittal of the LAR. This caused PEF to move activities and funds for this work much earlier in the schedule. PEF contacted the NRC when PEF saw the Monticello letter and negotiated a reasonable work scope for the LAR. This was the first clear indication that the NRC staff was taking a much tougher stance on some LAR issues.

2009

May 1, 2009

Jon Franke submitted testimony before the FPSC that included actual and estimated costs associated with the CR3 EPU project costs. EPU management team projected to spend [redacted] project to date through the end of 2009 and anticipated spending an additional [redacted] in 2010 on LAR activities.

June 29, 2009

The NRC split the Point Beach LAR submittal into three separate submittals (AFW, Setpoints and EPU). The NRC concluded it had enough information on the first two from a FPL supplement. The NRC deferred acceptance review of the EPU and there was an exhaustive exchange between the NRC and FPL.

This was significant because the level of detail of the NRC Staff inquiry into all these subjects for the LAR submittal far exceeded industry expectations and then industry standards for LARs.

July 2009	The EPU Project management team assembled an expert panel to review the current status of the LAR preparation activities and to provide feedback to EPU management on the increasing industry standards associated with NRC licensing activities.
August 25, 2009 October 19, 2009	Point Beach LAR: NRC linked EPU acceptance to open issues on AST (making a third linked submittal outside the NRC's guidance) and still had not accepted the EPU LAR for review. NRC review continued.
November 2009	Point Beach LAR: The NRC finally accepted the Point Beach EPU LAR for review.

2010

January 2010	PEF conducts second expert panel to review LAR submission.
February 9, 2010	Rev 1 to AREVA change orders #23 and #25 were approved by Progress Energy which increased the EPU LAR cost by [redacted] These change orders included new work scope and man-hours necessary to complete the EPU LAR and to update the LAR information to meet current industry standards and NRC expectations.

i. The new scope of work was in addition to and not a substitution for the original LAR work produced by AREVA and Progress Energy under the initial WA which formed the foundation of the technical basis of the LAR.

ii. Much of this additional LAR scope work occurred in 2009. The change orders were executed after a due diligence review was completed by Progress Energy regarding the AREVA charges to ensure Progress Energy did not pay AREVA twice for the original scope of work contained in the WA signed in 2007.

CR3 EPU management determined that the actual LAR support costs through the end of 2009 were [redacted] EPU management also updated the remaining LAR costs estimates as follows:

- [redacted] in 2010

- [redacted] in 2011
- [redacted] in 2012

These new LAR costs projections brought the total LAR project costs to [redacted] including the change orders. These new costs projections represent a [redacted] increase in the LAR project costs from the original 2007 estimate. This response is well within the range of reasonableness for a major project of this sort based on Association for the Advancement of Cost Engineering ("AACE") international standards.

March 31, 2010	The LAR preparation work is complete and the LAR is ready for submittal. Nuclear Generation Group management decided to delay submission because it has time to monitor Point Beach LAR NRC review and to conduct a final expert panel review.
April 15, 2010	The final review concluded that the CR3 EPU LAR was a high quality document and met all current industry licensing standards and met all submittal requirements.
May 28, 2010	Current scheduled date to submit CR3 EPU LAR to the NRC.
Summer/Fall 2011	The CR3 EPU management team estimated time for NRC approval of the EPU LAR.

work had been completed. Formal notification was made to the Consortium in February to document that PEF rejected the invoices, and the invoices were withdrawn.

- In accordance with FPSC rule No. 25-6.0423, a filing that provided true-up of the actual 2008 expenditures was submitted in March 2009. In May 2009, a filing was submitted that provided actual to date expenditures, projections for the balance of 2009 and estimated expenditures for 2010. In addition, Levy Transmission Team met with Commission Staff to answer questions on their field audits and a series of data requests were completed and submitted to the Commission.
- During the year, baseline schedules and costs estimates were completed for the program based on the original in-service date. Further work was completed on certain discrete Transmission projects contained in the program. Project control metrics were established which included metrics for cost, schedule, safety, compliance and risk. These metrics were continuously reviewed by the project managers and project team and were presented to senior management on a regular basis.
- Support staff provided oversight and coordination for other Nuclear Cost Recovery Clause regulatory filing needs, including Data Requests, Interrogatories, Document Production and Testimony preparation.
- The initial Burns and Roe "Review and Validation of the AP-1000 Cost and Schedule" report for risk assessment was issued in March. A detailed review of each of the findings in the report was completed. Based on the review of each finding with EPC members Shaw and Westinghouse, the current status was documented and a high level mitigation strategy was determined for each finding. An action was assigned for each mitigation strategy and is being formally tracked. Note that due dates have been extended on certain schedule related action items until new commercial operation dates are determined from the schedule scenario analysis.
- [redacted]
- Began efforts to evaluate estimate revisions needed under continued partial suspension, including work with EPC Consortium on various scenarios for schedule shift impacts on EPC contract.

Audit Document/Record Request

Utility:	Progress Energy Florida		
From:	Tripp Coston		
Request Number:	DR-1	Date of Request:	11/24/09
Audit Purpose:	Nuclear Project Management and Internal Controls Review		

Item Description:

8) Question:
Please describe:

a) Any changes made to company planning since January 2009 to date due to potential project risks, and the impact of those changes on the Levy project schedule and costs.

b) All risk mitigation strategies developed or considered and indicate which strategies the company is deploying on the Levy units project.

Response a) & b):

CONFIDENTIAL

The Company had identified the risk of not receiving Limited Work Authorization (LWA) and this risk was triggered early in the second quarter of 2009. As a result, changes made to company planning since January 2009 include Progress Energy's Management decision in April 2009 to shift the Levy schedule by at least 20 months, and formally withdraw the Levy Limited Work Authorization (LWA) request. This decision was based on the results of continuing discussions with the NRC regarding a reduced scope LWA for Levy, and the associated advantages/disadvantages.

1. EXECUTIVE SUMMARY

OVERVIEW

In September 2008, the Nuclear Plant Development (NPD) department (then Nuclear Projects and Construction) requested funding authorization to add approximately 1,105 MWe of electrical generating resources to the PEF system in the summer of 2016, and 1,105 MWe of electrical generating resources to its system in the summer of 2017. The project is scheduled to conclude with commercial operation of two state-of-the-art Westinghouse AP1000 Advanced Passive nuclear power plants in Levy County, Florida.

Along with the planned construction of two nuclear plants in Levy County, Florida, funding was requested to construct the additional system baseload transmission required to support the addition of 2,210 MWe. Specifically, the added transmission will include two (2) new 500/230kV substations, approximately 91 miles of 500 kV and 88 miles of 230kv transmission lines, upgrades to five (5) transmission substations and two (2) new distribution substations, as well as roughly 130 miles of low-voltage line upgrades across the full system to accommodate the added nuclear generation.

In September 2008, Senior Management approved the IPP including continued spending on the project through 2009 in the amount o[redacted] On May 1, 2009, the Company announced a schedule shift of no less than 20 months due to the NRC's decision to defer issuing a Limited Work Authorization until after COL issuance.

RECOMMENDATION

Since the 2008 IPP, NPD has engaged in negotiations with Shaw/Westinghouse (the "Consortium") to analyze potential schedule revisions and to amend the EPC contract. Because these negotiations and analyses likely will not be concluded this year, NPD recommends authorization of continued spending on the Levy project through March 31, 2010 in the amount of [redacted] as defined below. This funding is primarily for Conditions of Certification work in support of the SCA, continued EPC support through negotiations, funding for continued Levy COL application, strategic land purchases and Levy project staff. This amount does not include any one-time costs which may arise as part of long-lead material purchase order disposition with WEC.

Patrick Energy Services makes up the bulk of the Engineering support. Some work has been moved up earlier than originally planned. The plan assumed a ramp up in May and continuing through the year. With the increased in planned expenditures in May and the reduced Patrick invoices since May, the cumulative variance is favorable.

RE: LEVY BASELOAD TRANSMISSION PROJECT
DECEMBER 2009 - MONTHLY STATUS REPORT

Dear Amy:

Golder Associates Inc. (Golder) is pleased to present the December monthly status report for the Levy Baseload Transmission Project.

PROJECT DESCRIPTION

Golder has been contracted to provide environmental services in support of the detailed field information required regarding the transmission line rights of way (ROW) and substations to support the Conditions of Certification and the Final Environmental Impact Statement.

MAJOR PROJECT ACTIVITIES COMPLETED DURING THE MONTH OF NOVEMBER 2009

Transmission Line Wetland Delineations

Wetland delineations, listed species assessments and surveys of the Crystal River to Brookridge (CB), Brookridge to Brooksville West (BBW), Citrus to Crystal River East (CCRE), Common Corridor and Citrus Substation to Central Florida South (LCFS) transmission line ROWs were completed during the month of December, 2009 as described on Attachment A.

Hours Worked

Golder staff completed 16 field hours and 637.5 office hours and Mactec staff completed 372 field hours and 557 office hours during the month of December, 2009. No safety incidents were reported during the month of December, 2009.

Project Status/Percent Completion Report (See Attachment A)

CONTRACT ISSUES

Contract No. 453352-Work Authorization No. 001 was received and executed on September 22, 2009.

Summary of other items to note

Substations

Kathleen - The Kathleen substation parcel was determined to be approximately 124 acres, much larger than the 20 acre parcel which was used for cost estimation based on the original proposal information. Golder completed the additional site work to modify the wetland and threatened and endangered species assessment; Mactec is currently updating the survey information. The project (phase) budget was be adjusted, although the total project budget will not be impacted.

Central Florida South – As a result of PBSJ's involvement associated with the access road portion of the Central Florida South substation, as well as modification of the original access road boundary, additional effort has been required to incorporate PBSJ's data in the overall deliverable package. The project (phase) budget was adjusted, although the total project budget was not impacted.

CREC – Golder was originally requested to support the environmental permitting associated with the Central Florida South Substation and Crystal River Energy Complex Switchyard Environmental Resource Permit (ERP) process. The project has been put on-hold and additional support will not be required beyond that completed in December 2009.

Transmission ROWs

LCFS, CB and Common Route – The budget estimate for several of the ROWs (LCFS, CB and Common Route) exceeded the actual budget required for field effort and will be used to offset additional effort required by the various substations.

The following activities were completed or are in progress upon verbal/email request from Progress Energy although not specifically budgeted or authorized under the current work authorization:

- Golder provided support to CH2M Hill/Progress Energy in response to request for information regarding wetland impact assessment associated with the transmission line ROWs.
- Golder provided responded to a request from Gail Simpson, Public Information and provided mailing lists for the PHP, Common Route, LCFS, CCRE, BBW2 and CB ROWs and their associated HOA/COAs.
- Golder has been asked to calculate wetland impacts associated with the preliminary design of the various transmission lines within the ROW. Golder anticipates that the request can be completed and deliverables can be provided to Progress in mid-late January 2010 under the current authorized budget.

CREC Engineering Monthly Report

Commonwealth Associates, Inc.

November 10, 2009

(Through Month End October 2009)

Progress Energy

Major Activities

Accomplishments for the Month

1 Continued development of the ultimate electrical layout including review meetings 10/12 & 10/29
2 Continued yellow line checks of CREC drawings received
3 Continued work on SWPPP and supporting permits documentation
4 Continued development of PM Portal interface
5 Continued work on ultimate schedulue
6 Began CREC site verifications with site hours expended on 10/5-8 & 10/25-30
7 Began substation and transmisisonline design basis documents.

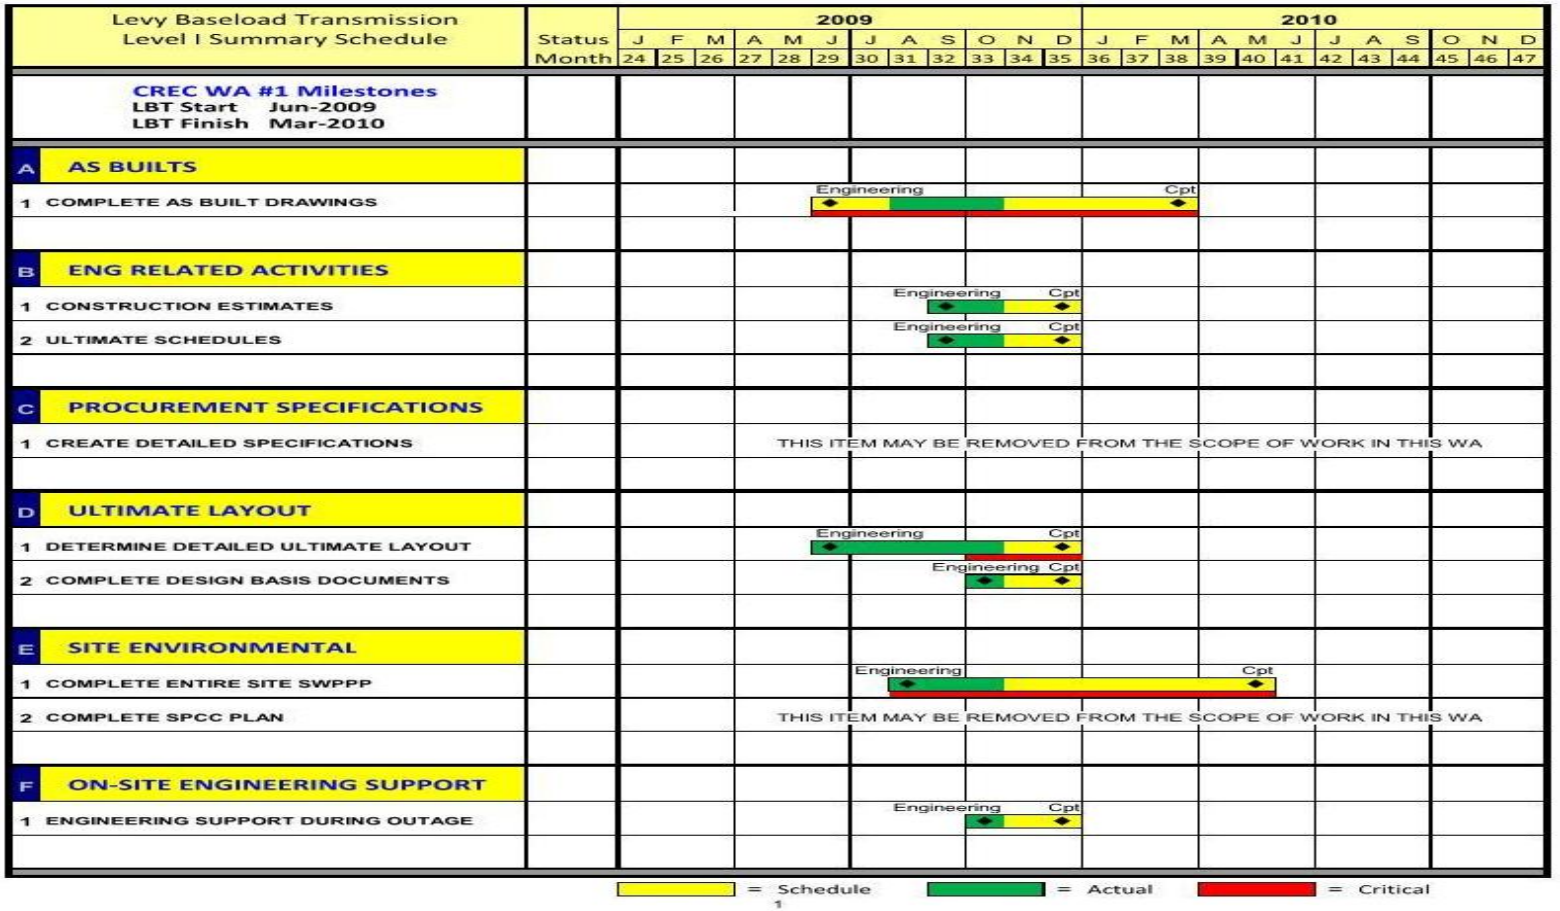

Accomplishments Planned and not achieved

1 Site veirification on 10/5-8 were minimal due to inability to enter the 230kV yard. A re-plan has been established to complete this work by the end of the year
2 The P&C design basis document could not be started due to the lack of approved P&C standards

Planned for the next Month

1 Continued utlimate layout development with meeting unscheduled as of this reporting date
2 Continued yellow line check (drawing verification)
3 Continued work on the SWPPP and supporting permit documentation
4 Continued CREC site verifications on 11/6-10 & 12/14-15
5 Continued work on the ultimate schedule

1. An additional panel containing Unit #4 synchronizing which was not on any drawing was found in the 230kV CEE. Hand sketches of this panel were found in the CEE for this panel. A new drawing will be created for this panel.
2. Six additional items needing verified which were not on the schedule were found. These include four racks in the 230kV termination enclosure, the aforementioned synchronizing panel and CB 1692. These items have been checked or added to the schedule.
3. To date about 2% of the wires were found to be incorrectly shown on the drawings. Most of these are related to instrumentation, indication, alarms or SCADA.

Risk: Risk Summary Ph I

ID	Short Name
1	Site Conditions
2	Delay in major material delivery
3	Damaged Major Material or Manufacturer Defect
4	Reduction in allowable work duration
5	Longer work duration required than planned
6	Storm / Inclement Weather
7	Lay down yard conflicts
8	Integration of project by multiple organizations
9	Work area congestion

Progress Energy

Risk: Description of Yellow Item

3) If damage occurs in transit or major material arrives defective; Then long lead times for these materials would not allow replacement in a timely manner, thereby impacting schedule
   - The project team has requested that all vendor equipment be inspected for quality during production and, when feasible, tested prior to delivery. Shipping dates are 30 - 60 days in advance of construction to allow inspection of material upon delivery. If such damage is seen, a condition assessment would take place to determine reparability and vendor/manufacturer will be onsite to make repairs as necessary.

6) Switchyard is known to "hold water" during rainy season, If inclement weather occurs or the storm plan initiated, Then schedule and cost will be impacted
   - The contractor will have pumps available at the switchyard and provide matting to access work areas if there are high levels of rain. If a named storm occurs and storm plan is activated, materials will be anchored down; crews would be re-directed to support storm duty. Schedule would be delayed depending upon duration of storm. Plan to work to 24/7 would be activated if feasible.

Progress Energy

Risk: Description of Yellow Item

9) If, due to the high volume of construction resources, work area congestion creates an incident, then project successful completion (cost, schedule incident free) will be impacted.
   - Plan is to work under scheduled clearances, work in barricaded area (as required), provide additional physical barriers to 230kV yard, work under the guidance of inspector, complete as much high risk work with designated positive controls in place and work according to early dates.

Progress Energy

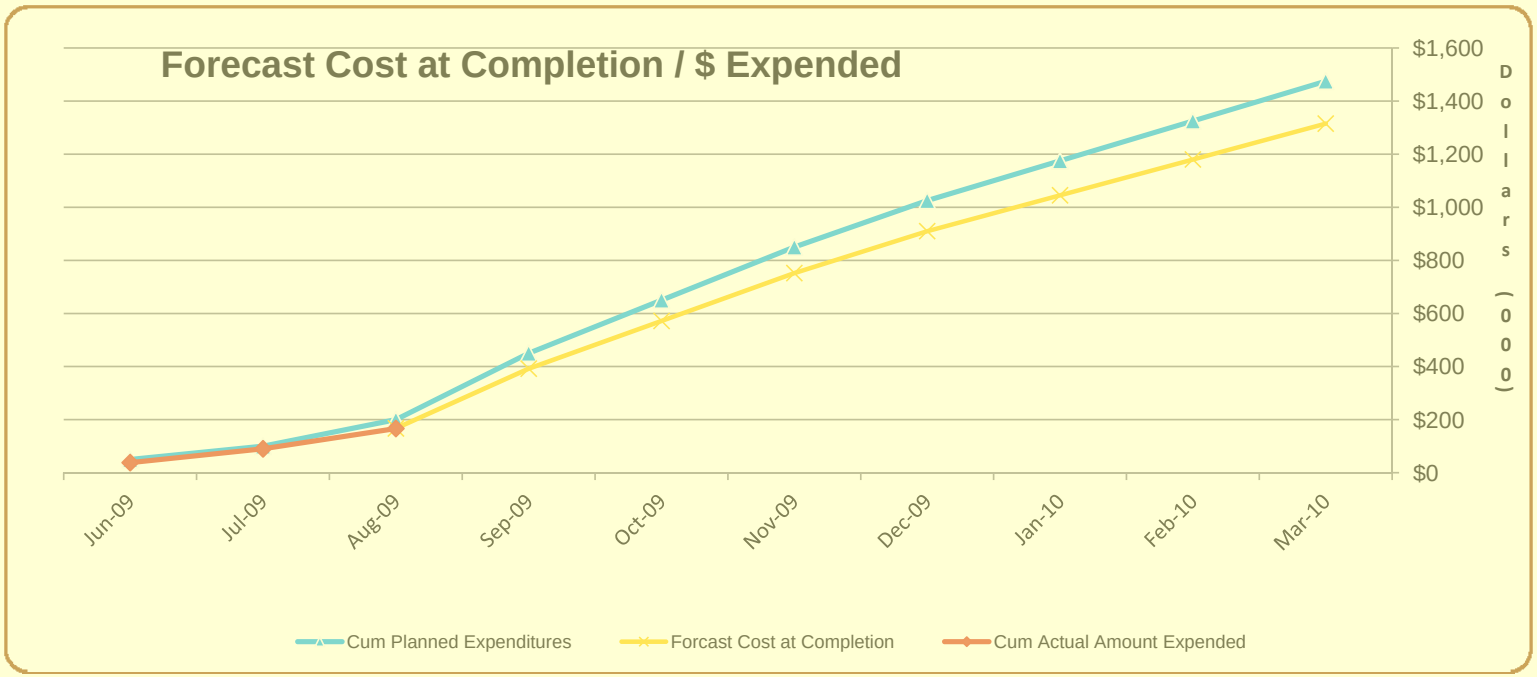

Lessons Learned – Phase I

- Breaker trips while workers in the switchyard
  - Add to pre-job briefing to contact ECC
  - CREC Fossil has updated procedures
  - CREC Nuclear is updating procedures
- Materials were delivered prior to planned date
  - Vendor shipped prior to agreed upon schedule
  - Need additional communication with vendor with respect to strict schedule constraints at CREC.
- Driving stakes into ground to assemble concrete forms near breakers 1661/1662
  - Conduct ground penetrating radar for ALL work that penetrates the ground
- Ensure all constraints and assumptions are documented and understood prior to releasing RFP
  - Activities in Schedule to track progress
  - Foundation packages Final vs Drafts
  - Site conditions / requirements
    - Barriers, matting, logistics
  - Soft dig requirements
  - Shoring requirements

Lessons Learned – Phase I

- Permits / licenses received prior to scheduled move-in
  - Activities in schedule to track progress
- Water hose came loose on vac truck
  - Pre-job briefing should include reminder of equipment inspections
  - Evaluate placement of equipment for hazards
- Badge lost by worker
  - Use breakaway lanyards for security and safety
- Utilize communication plan when actions / activities warrant
  - Detail plan of Who should be notified by When for What occurrences
  - Daily reports were beneficial to keep stakeholders informed
- Material delivery receipt process
  - Ensure all parties understand roles and responsibilities for receiving materials
  - Ensure all parties understand where materials will be delivered to

Mr. Paul Lewis, Jr.
Progress Energy – Florida
106 E. College Avenue
Suite 800
Tallahassee, FL 32301-7740

Dear Mr. Lewis:

The purpose of this letter is to inform Progress Energy-Florida that the Bureau of Performance Analysis is initiating an update to the 2008 audit of project management internal controls for the company's nuclear plant uprate and new construction projects. This audit is being performed at the request of the Division of Economic Regulation and will assist staff in the Nuclear Cost Recovery Clause docket (090009-EI).

As you may expect, this audit will include updating the information collected in last year's effort. Our focus will continue to be the documentation of operating procedures, internal controls, and other project management efforts. These topics, as well as new project developments and progress made, will be addressed in accordance with the direction given by the Commission during the September 2008 hearings.

Mr. Tripp Coston has been designated as project manager for this review. The timetable for completion of this project is not yet established, but we will discuss this as soon as possible. Mr. Coston is responsible for making sure that you are aware of our progress and that our review is independent and accurate. At the conclusion of the review, you will have an opportunity to review and respond to the report draft prior to release.

In the preliminary preparation for the review, we request that the following actions be taken by your company:

► Designate a company official to be a liaison with our staff. We suggest that this be a person capable of rendering an opinion as to the proprietary, or confidential nature, of the information requested by our staff. Please advise Mr. Coston of the person so designated by January 20, 2009.

► Respond to the attached Data Request. The timetable for this can be discussed with your designated liaison.

The details of providing this documentation and future document request responses can be worked out between your appointed liaison and Mr. Coston. Should the need arise to claim confidential treatment of material requested during this audit, please follow the procedure outlined in *Chapter 25-22.006 Florida Administrative Code.*

During the audit, you shall use the Document Request/Notice of Intent form to indicate any documents provided that are deemed potentially confidential. To maintain continued confidential handling of these documents at the conclusion of the audit, you must file a request for confidential classification with the Office of Commission Clerk. The request for confidentiality classification shall be filed in writing within 21 days of receipt of the draft audit report or the audit exit conference.

I would like to thank you in advance for your cooperation and for the efforts of all company personnel toward the satisfactory and expeditious completion of this review. In turn, we will make every effort possible to minimize interruptions to your schedule and to provide you with a fair and impartial review of your operations.

Please contact Tripp Coston (850) 413-6814 or Carl Vinson (850) 413-6812, if you have any questions regarding this review.

Sincerely,

Lisa S. Harvey, Chief
Bureau of Performance Analysis

   - SLLNP-2010-013: Impact Evaluation #272 (January 14, 2009) "SCA Wetland Reclassification" - for Approval

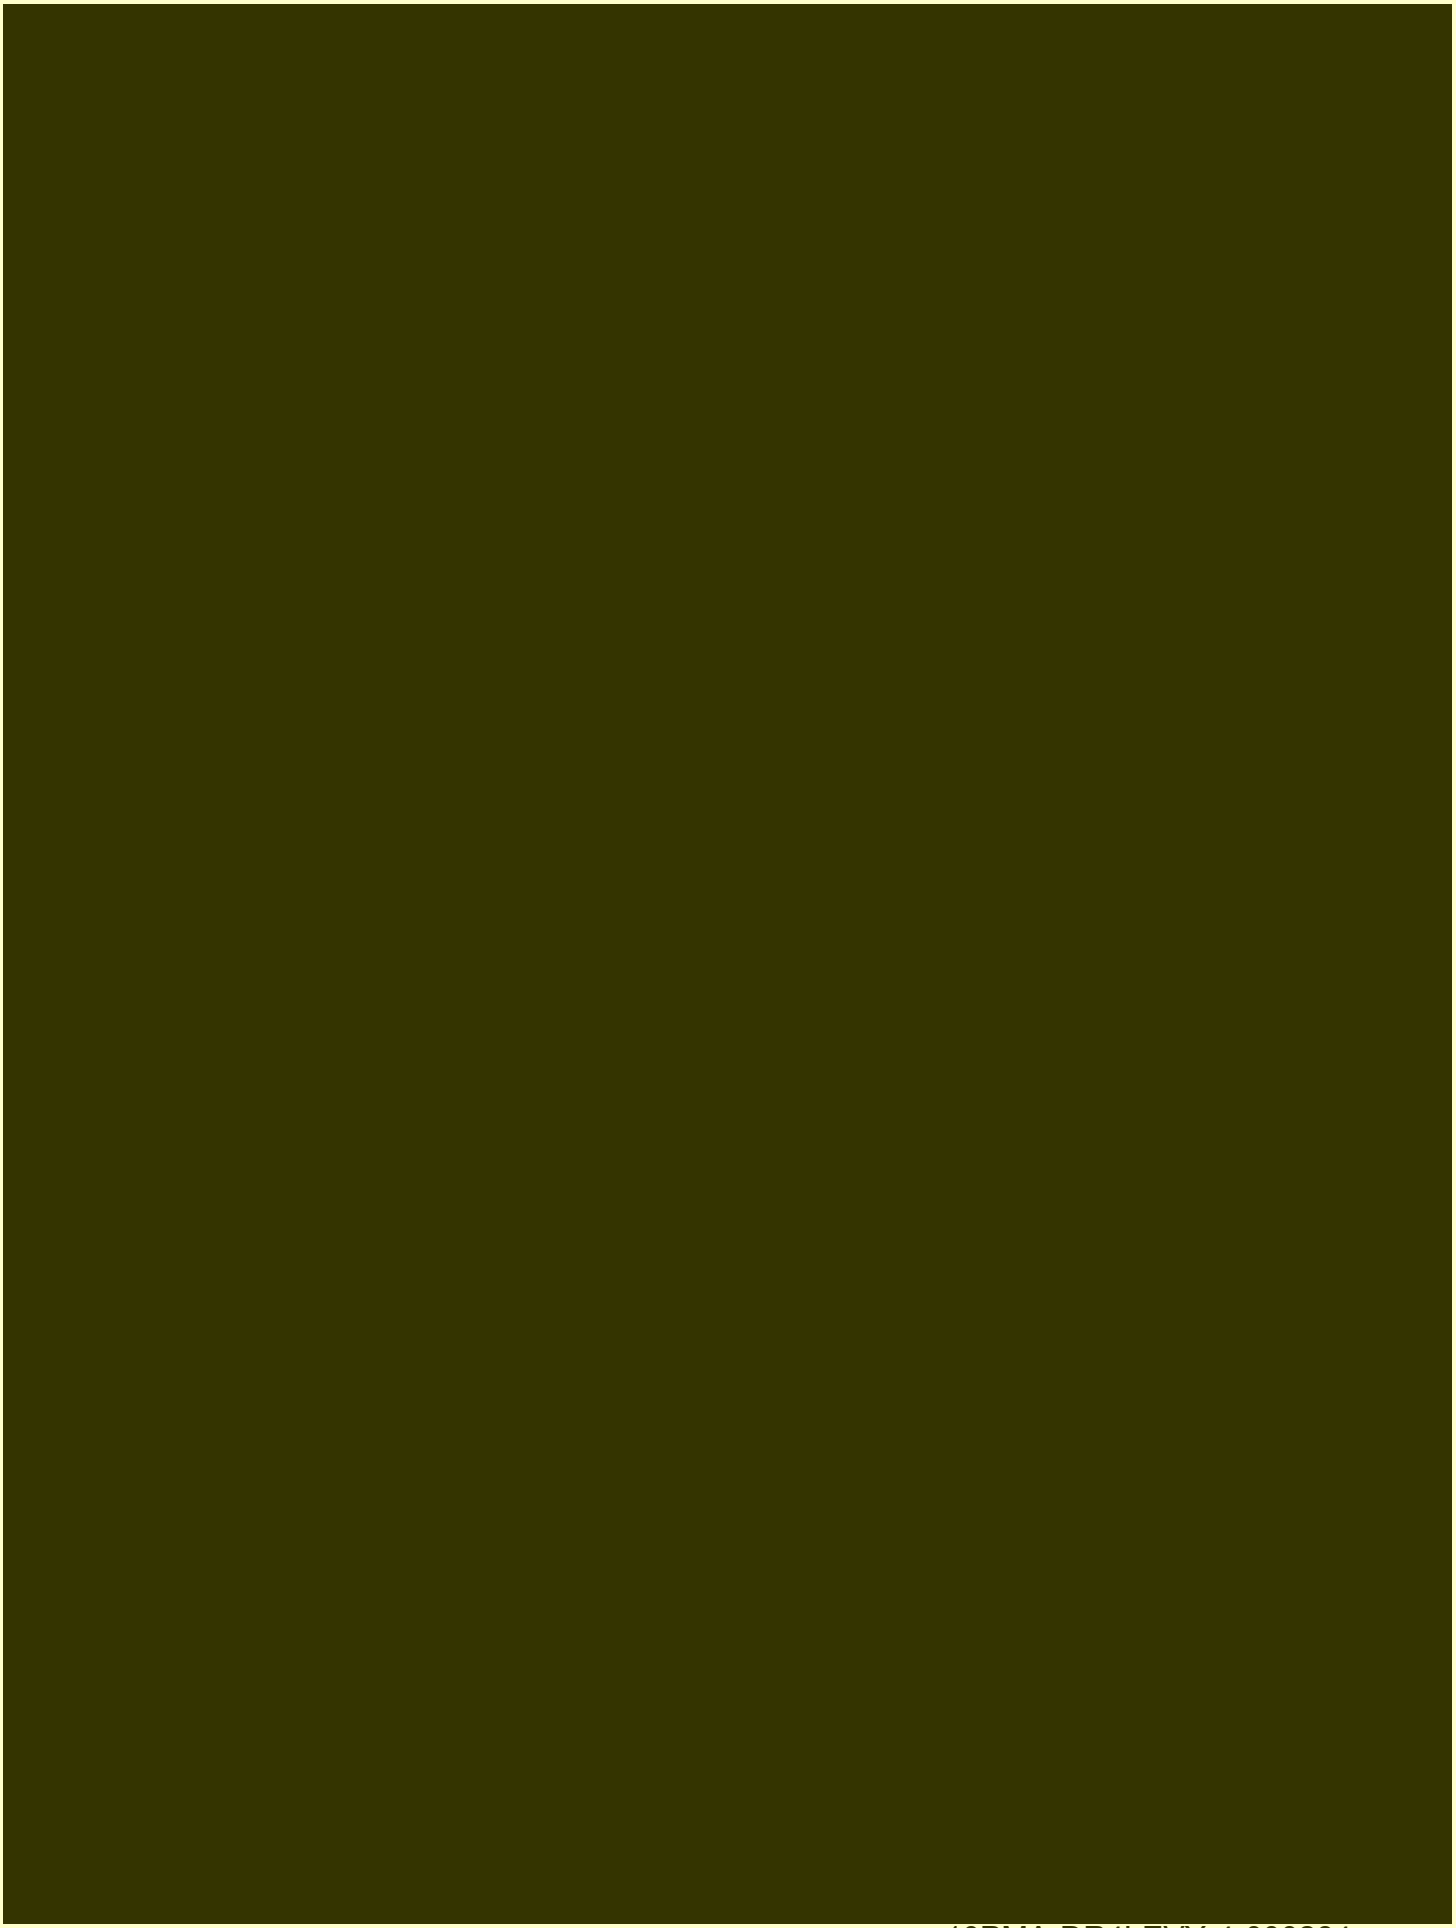

8. Open RFIs
   - RFI 384 for DL and LL for Turbine, Annex, and Radwaste Buildings. Turbine Building data will be available in December 2009.
   - RFI 387: Loads and Configuration for Turbine, Radwaste, and Annex Building. The data from WEC will be available in December 2009.
   - RFI #389 for HAR SSI analysis is in preparation (to WEC) for NRC Letter 064 RAI response

9. Project Management
   - WA 255934-03 Amendment 5 and WA 255934-06 Amendment 1 was received for JVT acceptance
   - JVT executed WA 255934-08 was submitted to PGN
   - PGN has requested that JVT pdf submittals on the project should be word searchable

10. LNP Phase II Tasks
    - LNP RAI status is discussed on Tuesday at 11:00 AM and Thursday at 10:30 AM RAI Status telecon using the Tillie Wilkins RAI status report
    - RWS system to be reviewed against the water quality requirements of the Demineralized Water Treatment, DTS, and Service Water, SWS, systems – prepare RFI to WEC – revise conceptual design and COLA description for RWS (fresh water portion).
    - NRC telecon on RCC design/test and NRC letters 046 and 055 RAIs was held 01/07/10
      - New RAI expected from NRC

- Meeting was held at PCR's offices among PGN, PCR, S&L, and Shaw to define the foundation design scope and testing that should be performed near term to minimize COL risks. The following scope will be initiated in the near term:
    - New RCC mix design using crystalline aggregates. Laboratory RCC tests for compressive strength, split cylinder tensile strength, direct tension test across lift joints, direct shear test across lift joints (COLA/JVT)
    - RCC bridging mat design (50% - 70% design) (EPC/Shaw)
    - Conceptual design for horizontal and vertical drains to relive pore pressures during SSE, conceptual specifications for structural backfill and in-situ soil remediation, settlement from deep layer liquefaction (COLA/JVT)
    - Feasibility study and performance specifications for diaphragm wall (EPC/Shaw)
- Offset boring program (OBP) milestones:
    - Samples to S&ME – on hold
    - S&ME Laboratory Testing complete – on hold
    - Final Survey of Borehole locations - PGN
    - Draft OBP Report for S&L Acceptance Review
    - OBP Report for OAR
    - New/revised Calculations for OAR
    - Draft Supplementary RAI Responses
    - Final RAI Reponses
    - Final OBP Report

PROGRESS ENERGY LNP/HAR COLA PROJECTS Weekly Telecon Summary

Prepared February 02, 2010. Changes from last week are in Blue or Green

- Meeting is scheduled on February 08-09, 2010 at PCR's offices (PGN, PCR, and S&L) to decide the foundation conceptual design scope and testing that should be performed pre COL. Post COL deliverables will also be identified. Meeting agenda and discussion outline was emailed to attendees. The discussion topics include:
  - New RCC mix design using crystalline aggregates. Laboratory RCC tests for compressive strength, split cylinder tensile strength, direct tension test across lift joints, direct shear test across lift joints
  - RCC bridging mat conceptual design scope – pre COL
  - Conceptual design for horizontal and vertical drains to relive pore pressures during SSE, conceptual specifications for structural backfill and in-situ soil remediation, settlement from deep layer liquefaction.
  - Turbine Building, Annex Building, and Radwaste Building drilled shaft conceptual design within the excavation and adjacent to the diaphragm wall
- Offset boring program (OBP) milestones:
  - Samples to S&ME – on hold because of QA Plan acceptance issues
  - S&ME Laboratory Testing – on hold
  - All other tasks have been completed including the final report

7. Scope Change Requests
   - IE #270 LNP New RCC mix design and testing was submitted informally for PGN review and comments
   - IE #273 for pre COL foundation conceptual design is in preparation (Budget Allocation Request LNP-010)
   - IE for LNP RWS system water treatment conceptual specification is in preparation
   - Budget Allocation Request LNP-008 Native figure files for USACE RAI L-0581 response was approved
   - Budget Allocation Request LNP-009 Effect of operational pumping on Wetlands was approved
   - Budget Allocation Request LNP-010 Pre COL Foundation Conceptual Design Plan (Impact Evaluation) was approved
   - Budget Allocation Request LNP-011 Switchyard Conceptual Design revision for RAI L-0684 was submitted
   - Budget Allocation Request LNP-012 Revisions to Drawing CSK-003 (wetland drawing background) was approved.

8. Open RFIs
   - RFI 384 for DL and LL for Turbine, Annex, and Radwaste Buildings. Turbine Building data will be available in mid 2010. Annex building and Radwaste building data provided (09/08/09) needs further review during the pre COL conceptual design.
   - RFI 387: Loads and Configuration for Turbine, Radwaste, and Annex Building. The data from WEC will be available in mid 2010.
   - RFI #389 for HAR SSI analysis is in preparation (to WEC) for NRC Letter 064 RAI response – schedule not yet available from WEC

9. Project Management
   - WA 255934-05 Amendment 4 approval is needed to invoice January charges for Self Assessment (approved IE #269).

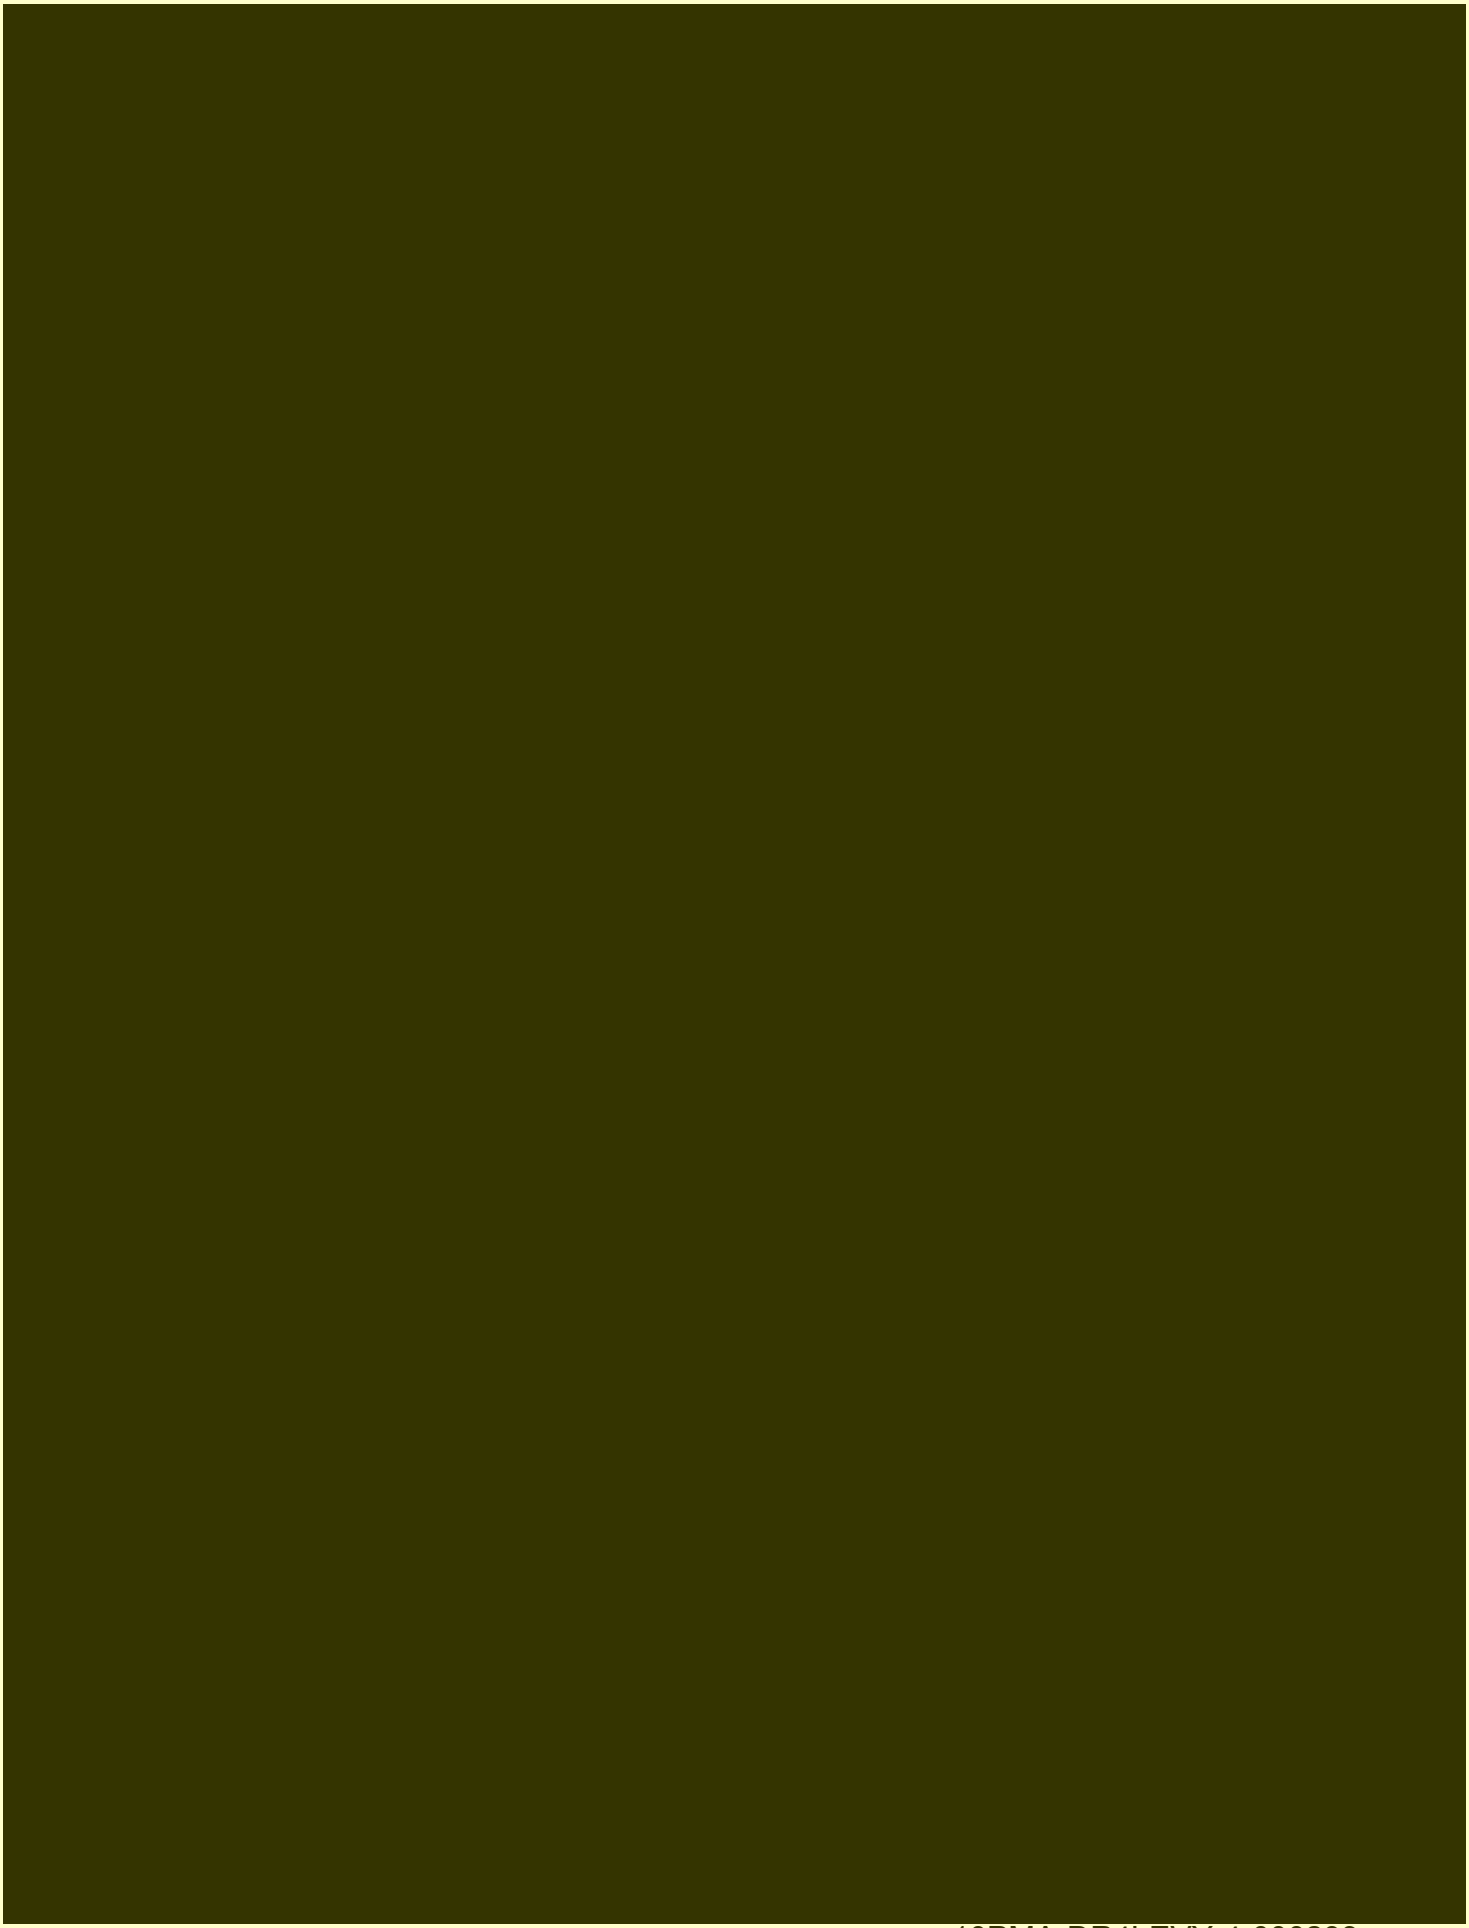

Prepared February 16, 2010. Changes from last week are in Blue or Green

- WA 25934-06 Amendment 3 approval is needed for full payment of the January invoice (IE #267 and IE #272)
- Approval of WA 255934-04 Amendment 7 and WA 255934-07 Amendment 2 is needed for February invoice payment
- WA 255934-04 Task 4 (HAR COLA R1) and WA 255934-05 (LNP COLA R1) closure letters are in preparation.
- Re-training in the Scientech RAI database is scheduled for 02/18/10 2:00 PM EST

10. LNP Phase II Tasks

- LNP RAI status is discussed on Thursdays at 10 AM (or following the bi-weekly project telecon) using the Tillie Wilkins RAI status report (1-877-336-1831 pc 5464062#)
- RWS system to be reviewed against the water quality requirements of the Demineralized Water Treatment, DTS, and Service Water, SWS, systems – prepare RFI to WEC – revise conceptual design and COLA description for RWS (fresh water portion).
- NRC in a telecon on 01/28/10 NRC has requested digitized data for FSAR Figures 2.5.2-244 and -245 (smooth and extended UHS) and 2.5.2-280 and -284 (amplification functions). NRC also believes that heading for column 1 in Table 2.5.2-226 should not be UHS. The value reported are GMRS divided by 0.45.
- Extensive comments were received on the Liquefaction Plan – they will be addresses as part of the pre COL conceptual design scope
- Meeting was held on February 08-09, 2010 at PCR's offices (PGN, PCR, and S&L) to decide the pre COL foundation conceptual design scope and testing. The discussion topics included:
  - New RCC mix design using crystalline aggregates. Laboratory RCC tests for compressive strength, split cylinder tensile strength, direct tension test across lift joints, direct shear test across lift joints (IE #270)
  - Pre COL scope for RCC bridging mat conceptual design, conceptual design for horizontal and vertical drains to relive pore pressures during SSE, and Turbine Building, Annex Building, and Radwaste Building drilled shaft conceptual design within the excavation and adjacent to the diaphragm wall
- Offset boring program (OBP) milestones:
  - S&ME Laboratory Testing – on hold because of QA Plan acceptance issues

9. Project Management
   - WA 255934-04 Amendment 07 was received for JVT acceptance.
   - WA 255934-05 Amendment 04 was received for JVT acceptance.
   - WA 25934-06 Amendment 03 was received for JVT acceptance.
   - WA 255934-07 Amendment 2 was received for JVT acceptance.
   - WA 255934-04 Task 4 (HAR COLA R1) and WA 255934-05 (LNP COLA R1) closure letters are in preparation.
   - PEF WA 255934-02 scope has been completed. Remaining open Tasks #11 and #14 closure letters will be submitted after subcontractor releases are received
   - SCA WA 255934-03 Task #02 scope has been completed. Closures letter is in preparation.

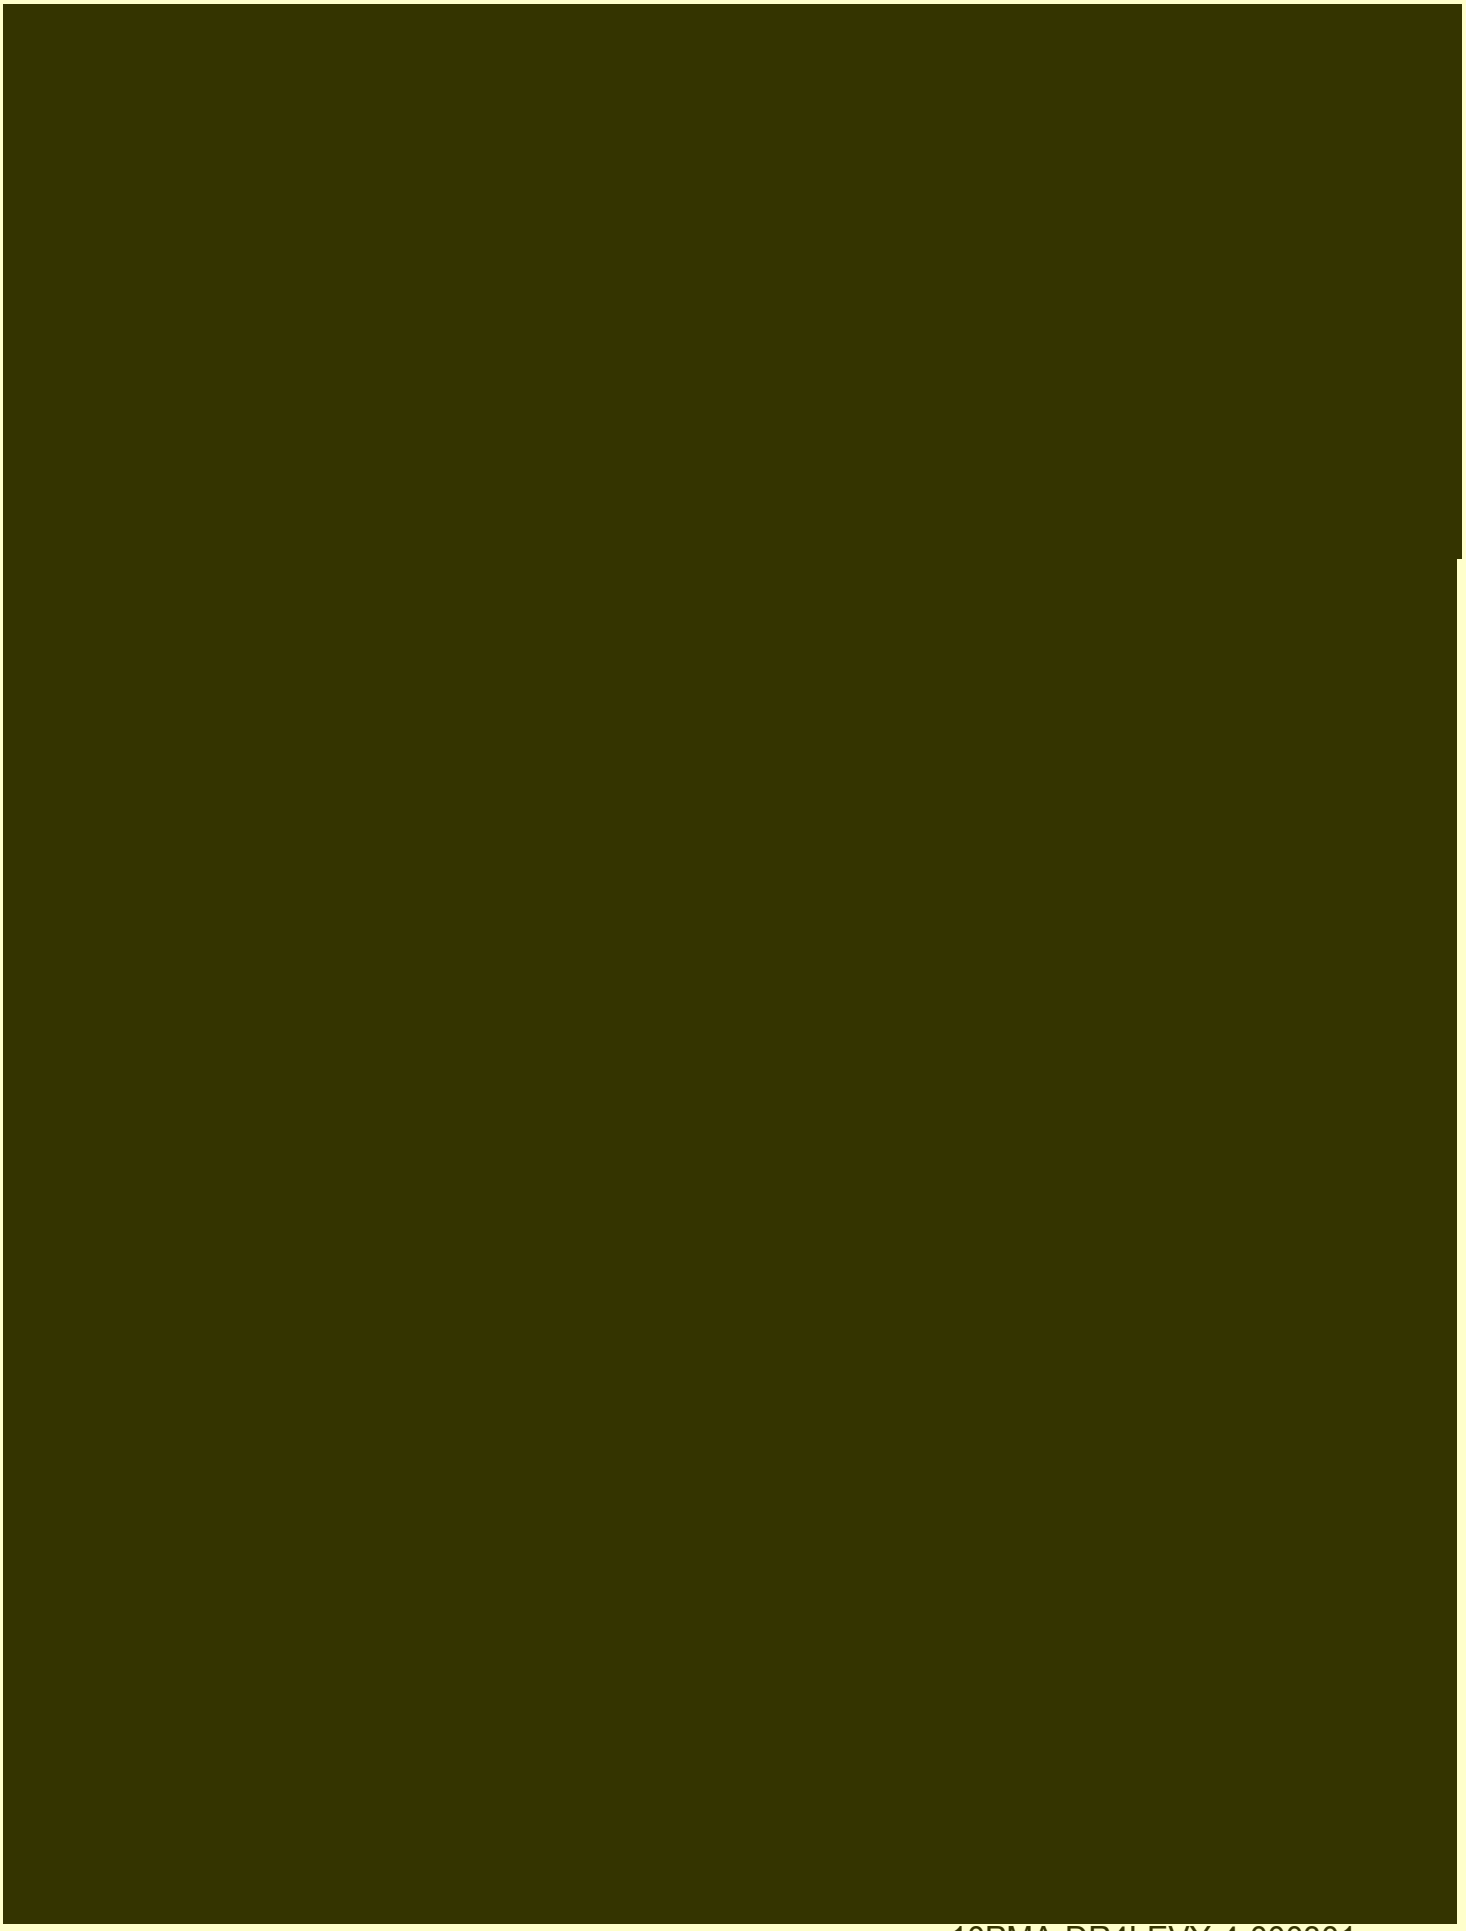

PROGRESS ENERGY LNP/HAR COLA PROJECTS Weekly Telecon Summary

Prepared March 16, 2010. Changes from last week are in Blue or Green

10. LNP Phase II Tasks

- LNP RAI status is discussed on Thursdays at 10 AM (or following the bi-weekly project telecon) using the Tillie Wilkins RAI status report (1-877-336-1831 pc 5464062#)
- HAR COLA Supporting documents – verification that design inputs have not changed since HAR COLA R1 – JVT will initiate the scope
- PGN should request copy of STP draft response to RAI 2.5.2-28 (Gulf of Mexico EQ).
- Telecon was held with NRC on draft RAIs #4361, 4363, 4370, and 4370. Key conclusions:
  - Site specific 3-D SSI analysis is required
  - Mean centered TB foundation displacement and site liquefaction potential using the UHRS (10^{-5}) spectra is required
  - AP1000 DCD requires no liquefaction. Effect of liquefaction would have to be evaluated.
- ACRS LNP COLA introductory meeting draft ACRS presentation was submitted
- Offset boring program (OBP): S&ME Laboratory Test Report (3/31/10)
- OAR comments were received on the Liquefaction Plan and drilled shaft foundation design criteria – they will be addresses as part of the pre COL conceptual design scope
- IE #270 for RCC mix design using crystalline aggregates was submitted after incorporation client comments. Work will be initiated once the IE is approved.

7. Scope Change Requests
   - IE #270 LNP New RCC mix design and testing is pending client review and approval. Client comments related to laboratory certification to ASTM C1077 and for the mix design to account for potential of aggregate properties changes in the intervening period to construction are being addressed.
   - IE #277 (March 19, 2010) "SCA AQ Monitoring Plan Agency Comments Resolution"
   - IE #279 (March 22, 2010) "SCA LEDPA Agency Responses"
   - IE for responses to NRC Seismic and RCC RAIs L-0727-L-0731, L-0736, L-0737 is in preparation.
   - IE for LNP COLA R2 is in preparation
   - IE for LNP Task #2 Simple RAI Responses is in preparation. WA Task #2 budget for simple RAI response has been exhausted
   - IE for pre COL scope for RCC bridging mat conceptual design, conceptual design for horizontal and vertical drains to relive pore pressures during SSE, and Turbine Building, Annex Building, and Radwaste Building drilled shaft conceptual design is pending preparation.
   - IE for RWS system to be reviewed against the water quality requirements of the Demineralized Water Treatment, DTS, and Service Water, SWS, systems.

8. Open RFIs
   - RFI 384 (July 22, 2009) for DL and LL for Turbine, Annex, and Radwaste Buildings. Turbine Building data will be available in mid 2010. Annex building and Radwaste building data provided (09/08/09) needs further review during the pre COL conceptual design.
   - RFI 387 (July 24, 2009) Loads and Configuration for Turbine, Radwaste, and Annex Building. The data from WEC will be available in mid 2010.
   - RFI #389 (October 22, 2009) for HAR SSI analysis is in preparation (to WEC) for NRC Letter 064 RAI response – Target July 2010
   - RFI #391 (March 18, 2010) for LNP Turbine Building, Annex Building, and Radwaste Building natural frequencies and NI grade elevation displacement. WEC will inform PGN of the schedule for the response.
   - RFI to WEC for LNP SSI analysis is being prepared
   - RFI to WEC – revise conceptual design and COLA description for RWS (fresh water portion) is pending preparation.

CDG February 2010 Financial Results O&M and Capital

Attached is a report displaying the financial results for the Corporate Development Group through February 2010. It is a consolidated report that provides the status of O&M and capital spending for all departments within CDG. This report is provided to the Legal Entity Finance Committees, Controllers, Financial Planning, Regulatory Accounting others with a need to know financial results. We have split Base O&M from Clause/Rider O&M to improve focus on both types of O&M.

Please refer to the attached report if you have additional questions. It is a consolidated report that provides the status of O&M and capital spending for all departments within CDG. This report is provided to the Legal Entity Finance Committees, Controllers, Financial Planning, Regulatory Accounting others with a need to know financial results. We have split Base O&M from Clause/Rider O&M to improve focus on both types of O&M.

PROGRESS ENERGY LNP/HAR COLA PROJECTS Weekly Telecon Summary

Prepared April 28, 2010. Changes from last week are in Blue or Green

Date/Time: 04/29/2010 10:00 -10:30 AM Eastern [redacted]

1. Actions Requiring Management Attention
   - None
2. Quality Issues
   - NRC COLA Project Inspection was held during the week of April 12, 2010. There were no violation or findings cited. NRC identified one open issue with the PGN OAR process that was not resolved at the conclusion of the NRC site visit.
   - Lessons learned from the NRC inspection preparatory work:
     - Self Assessment prior to the NRC inspection was required for success
     - Assembling documents likely need for the inspection was required for success
     - Hard copy binders of documents at the inspection were very useful.
     - Single point of contact to manage NRC requests during the audit worked very well
     - Improvement suggestions for future inspections/audits
       - Add a TOC for each document binder
       - Provide on-line access to electronic folders of documents to quickly locating/search for the requested information.

PROJECT: Levy County Wetland Mitigation

FOCUS: Cost / Performance / Safety / Environmental

Indicate Status (G/Y/R) → Cost | Schedule | Performance | Safety | Environ.

[ ] Draft [X] Final

A3

PM: Leigh Formanek
Department: CDG
Version No / Date: 14-May-10

(1) Near Term Performance Gaps & Targets:

Gaps- Cost

1. A Change Order was issued to Entrix for their support following the Wetland Mitigation Submittal for a NTE $100k. Note, this is included in the COLA budget, and not in the Wetland Mitigation budget

Gaps- Performance

No performance Gaps to report this month.

[redacted]

(2) Reflection on Last Month's Activities:

Challenges / Opportunities / Lessons Learned

No changes since last month.

Safety

-No OSHA recordable or first aids were incurred in 2010 relating to wetland mitigation.
-Approximately 950 hours were spent in the field in 2010 related to wetland mitigation.
-The field investigations are complete. Minimal additional field work will be done prior to starting engineering relating to wetland mitigation.
-Created NPD Safety Spreadsheet to track MH's, Recordables, First Aid's, etc to report to CDG Safety group.

Environmental

-No environmental impacts were incurred in 2010 related to wetland mitigation.

(3) Proposed Countermeasures to Close Gap:

Counter Measures to Close Gaps

No Countermeasures to report this month.

(5) Follow-up:

Critical Items Remaining (Relating to Cost/Performance/Safety/Environmental):

Description	Resp	Due Date	Forecast
1. Revise Cash Flow based on revised impacts and new info.	L. Formanek	TBD	Oct-10

Action Items

1. Develop a negotiating strategy for Boars Head Ranch: **COMPLETE.**

2. Check on "bankability" of Upland Credits for use on other projects or PEF in general. **CONCEPTUALLY, THE LAW ALLOWS US TO USE ANY UNUSED CREDITS. THIS WILL NEED TO BE NEGOTIATED AT THE TIME OF USE. NOTE: THE WETLAND MITIGATION PLAN ADDRESSES THE DESIRE TO USE RESERVE ANY UN-USED CREDITS FOR FUTURE IMPACTS.**

3. Work with legal to define a clear definition of FDEP statutory approval. **1) WE ACHIEVED OUR CONDITION OF CERTIFICATION BY SUBMITTING THE MITIGATION PLAN. 2) UPON FDEP'S CONCURRENCE OF THE PLAN THE DEP WILL APPROVE THE PLAN SUBJECT TO EXCEPTIONS.**
