PROGRAM TITLE: Residential Geothermal Heat Pump Program

PROGRAM DESCRIPTION: The objective of the Residential Geothermal Heat Pump Program is to reduce the demand and energy requirements of new and existing residential customers through the promotion and installation of advanced and emerging geothermal systems. Geothermal heat pumps provide significant benefits to participating customers in the form of reduced operating costs and are superior to other available heating and cooling technologies with respect to source efficiency and environmental impacts. Florida Public Utilities Company's Geothermal Heat Pump Program is designed to overcome existing market barriers, specifically lack of consumer awareness, knowledge and acceptance of this technology.

Florida Public Utilities Company continued this program over a sustained period to educate consumers on geothermal technology and raise awareness about the availability, affordability, and improved customer satisfaction associated with these units. This commitment is necessary to foster a stable market for this promising technology. Not only will this increase customer and trade ally confidence, it will serve to encourage competition within this technology market and reduce the impact of the higher initial cost.

PROGRAM ACCOMPLISHMENTS: There was one participant during 2009. Even though there are no goals for this program we continue to promote this technology to our customers and HVAC partners.

PROGRAM FISCAL EXPENDITURES: The expenditures for the reporting period of January 1, 2009 through December 31 2009 were \$111

PROGRAM PROGRESS SUMMARY: Even though there is no particular goal for this program we will strive to continue our efforts to promote this energy efficient technology.

PROGRAM TITLE: "Good Cents" Home/Energy Star Program

PROGRAM DESCRIPTION: This type of program has long been the standard for energy efficient construction in Northwest Florida. For Florida Public Utilities Company and our customers, this program provides guidance concerning energy efficiency in new construction by promoting energy efficient home construction techniques, and by evaluating the energy efficient components of design and construction practices.

PROGRAM ACCOMPLISHMENTS: During 2009 no homes were certified through the under this program during this reporting period due to the home construction industry slowdown.

PROGRAM FISCAL EXPENDITURES: The expenditures for the reporting period of January 1, 2009 through December 31 2009 were \$922.

PROGRAM PROGRESS SUMMARY: We will continue to enhance our efforts in promoting contractor participation in this type of program and the benefits of owning energy efficient homes.

(MLS-1)
Page 12 of 21

PROGRAM TITLE: "Good Cents" Energy Survey Program

PROGRAM DESRIPTION: The objective of the this type of survey is to provide Florida Public Utilities Company's residential customers with energy conservation advice that encourages the implementation of efficiency measures resulting in energy savings for the customer. These measures, once implemented, also lower Florida Public Utilities Company's energy requirements and improve operating efficiencies. Florida Public Utilities Company views this program as a way of promoting the installation of cost-effective conservation measures. During the survey process, the customer is provided with specific whole-house recommendations. The survey process also checks for possible duct leakage.

PROGRAM ACCOMPLISHMENTS: This year a total of 326 energy surveys were performed.

PROGRAM FISCAL EXPENDITURES: The expenditures for the reporting period of January 1, 2009 through December 31 2009 were \$132,433.

PROGRAM PROGRESS SUMMARY: We feel confident that by our efforts to promote this program through newspaper, radio, and television that we will continue to exceed provide valuable advice to our customers on conservation measures and practices. Our customers have been increasing their participation in this program. The number of energy surveys performed over the last couple of years increased by 91% from 2007 to 2008 and by additional 29% during 2009

PROGRAM TITLE: "Good Cents" Commercial Building Program

PTOGRAM DESCRIPTION: The commercial/industrial market is comprised of a wide range of diverse businesses with variable size and operational characteristics. The overall success of this program lies in its ability to address this diversity by focusing on the common characteristics of commercial buildings. The most common critical areas in commercial buildings that affect summer peak kW demand are the thermal efficiency of the building and HVAC equipment efficiency. This program provides requirements for these areas that, if adhered to, will help reduce peak kW demand and energy consumption.

The promotion of this program through the years has created a positive relationship with trade allies, the public, and local commercial/industrial customers. The program's design continues to be sufficiently flexible to allow an architect or designer to use initiative and ingenuity to achieve results that are meaningful to both the customer and Florida Public Utilities Company.

This program is designed to ensure that buildings are constructed with energy efficiency levels above the Florida Model Energy code standards. These standards include both HVAC efficiency and thermal envelope requirements. Florida Public Utilities Company's continuing efforts to influence the market toward high-efficiency equipment and quality construction standards are the foundation of such a commercial building program.

PROGRAM ACCOMPLISHMENTS: This year a total of no commercial buildings were certified most likely due to the very tight economy, however since the program began during 2005, there have been 32 commercial buildings certified under this program.

PROGRAM FISCAL EXPENDITURES: The expenditures for the reporting period of January 1, 2009 through December 31 2009 were \$1,957.

PROGRAM PROGRESS SUMMARY: We feel confident that by our efforts to promote this and complimentary programs through newspaper, radio, and television that we will continue to exceed provide valuable advice to our customers on conservation measures and practices.

PROGRAM TITLE: "Good Cents" Commercial Technical Assistance Audit Program

PROGRAM DESCRIPTION: The Technical Assistance Audit (TAA) Program is an interactive program that assists commercial customers in identifying advanced energy conservation opportunities. It is customized to meet the individual needs of large customers as required; therefore, it is an evolving program.

The Technical Assistance Audit process consists of an on-site review of the customer's facility operation, equipment, and energy usage pattern by a Florida Public Utilities Company Conservation Specialist. The specialist identifies all areas of potential reduction in kW demand and kWh consumption as well as identifying end-use technology opportunities. A technical evaluation is then performed to determine the economic payback or life cycle cost for various improvements to the facility. Florida Public Utilities Company will subcontract the evaluation process to an independent engineering firm and/or contracting consultant, if necessary.

PROGRAM ACCOMPLISHMENTS: This year a total of 57 audits were complete during the reporting period.

PROGRAM FISCAL EXPENDITURES: The expenditures for the reporting period of January 1, 2009 through December 31 2009 were \$16,494.

PROGRAM PROGRESS SUMMARY: This program has been successful and we are optimistic that our commercial customers will continue to involve us to an even greater extent in the future on upcoming commercial construction projects.

PROGRAM TITLE: Low Income

PROGRAM DESCRIPTION: Florida Public Utilities Company presently has energy education programs that identify low-cost and no-cost energy conservation measures. To better assist low-income customers in managing their energy purchases, the presentations and formats of these energy education programs are tailored to the audience. These programs provide basic energy education, as well as inform the customers of other specific services, such as the free energy surveys that Florida Public Utilities Company currently offers.

PROGRAM ACCOMPLISHMENTS: Even though there are no goals for this program we continue to work through various agencies to provide home energy surveys to low income customers as well as evaluating homes for local agencies for possible energy efficiency improvements.

PROGRAM FISCAL EXPENDITURES: The expenditures for the reporting period of January 1, 2009 through December 31 2009 were \$0.

PROGRAM PROGRESS SUMMARY: Even though this year there was not any special events or presentations directly related to Low Income customers we will continue to promote the opportunity to educate low-income customers on the benefits of an energy efficient home.

Page 16 of 21

PROGRAM TITLE: Affordable Housing Builders and Providers

PROGRAM DESCRIPTION: Florida Public Utilities Company will identify the affordable housing builders within the service area and will encourage them to attend educational seminars and workshops related to energy efficient construction, retrofit programs, and financing programs. The Company will also encourage them to participate in our other residential programs. Florida Public Utilities Company will work with the Florida Energy Extension Service and other seminar sponsors to offer to facilitate a minimum of two seminars and/or workshops per year. Florida Public Utilities Company will work with all sponsors to reduce or eliminate attendance fees for affordable housing providers.

PROGRAM ACCOMPLISHMENTS: Even though there are no goals for this program we continue to promote energy efficient construction to affordable housing providers.

PROGRAM FISCAL EXPENDITURES: The expenditures for the reporting period of January 1, 2009 through December 31 2009 were \$0.

PROGRAM PROGRESS SUMMARY: This program is no longer offered as reflected in our 2008 report.

PROGRAM TITLE: Residential Heating & Cooling Efficiency Upgrade Program

PROGRAM DESCRIPTION: This program is directed at reducing the rate of growth in peak demand and energy throughout Florida Public Utilities Company's electricity service territories. The program will do this by increasing the saturation of high-efficiency heat pumps.

PROGRAM ACCOMPLISHMENTS: For the reporting period 152 customers participated in the residential heating and cooling efficiency upgrade program.

PROGRAM FISCAL EXPENDITURES: The expenditures for the reporting period of January 1, 2009 through December 31 2009 were \$27,463.

PROGRAM PROGRESS SUMMARY: Even though there is no particular goal for this program we will strive to continue our efforts to promote this energy efficient technology.

Exhibit No.
Docket No. 100002–EG
Florida Public Utilities Co.
(MLS-1)
Page 18 of 21

PROGRAM TITLE: Residential Ceiling Insulation Upgrade Program

PROGRAM DESCRIPTION: The purpose of this program is to reduce peak demand and energy consumption by decreasing the load presented by residential air-conditioning and heating equipment. To serve this purpose, this program requires that residential customers add at least R-11 of ceiling insulation. By doing so, they will qualify for an incentive of \$100.00 in the form of an Insulation Certificate that may be applied to the total cost of installing the added ceiling insulation.

Interested residential customers must request a free ceiling insulation inspection. Florida Public Utilities Company will then dispatch an energy efficiency expert to perform that inspection and determine what changes should be made to enhance efficiency. The inspection will also determine the customer's eligibility for the \$100 Insulation Certificate. If the customer desires it, Florida Public Utilities Company will also help them find a qualified contractor to do the needed upgrade.

PROGRAM ACCOMPLISHMENTS: For the reporting period 15 customers participated in the residential ceiling insulation upgrade program.

PROGRAM FISCAL EXPENDITURES: The expenditures for the reporting period of January 1, 2009 through December 31 2009 were \$4,743.

PROGRAM PROGRESS SUMMARY: Even though there is no particular goal for this program we will strive to continue our efforts to promote this energy efficient technology.

Exhibit No.
Docket No. 100002–EG
Florida Public Utilities Co.
(MLS-1)
Page 19 of 21

PROGRAM TITLE: Commercial Indoor Efficient Lighting Rebate Program

PROGRAM DESCRIPTION: The purpose of this program is to reduce peak demand and energy consumption by decreasing the load presented by commercial lighting equipment. To serve this purpose, this program requires that commercial customers achieve at least 1,000 watts of lighting reduction from any lighting source that has been retrofitted with a more efficient fluorescent lighting system (ballasts and lamps). By doing so, they will qualify for an incentive of 10¢ per watt reduced.

PROGRAM ACCOMPLISHMENTS: There were no participants in this program although there were several businesses that were evaluated to determine if they met the criteria to participate in the program. We have aggressively tried to promote this program and expect participation in 2009.

PROGRAM FISCAL EXPENDITURES: The expenditures for the reporting period of January 1, 2009 through December 31 2009 were \$2,595.

PROGRAM PROGRESS SUMMARY: Even though there is no particular goal for this program we will strive to continue our efforts to promote this energy efficient technology.

Exhibit No.
Docket No. 100002–EG
Florida Public Utilities Co.
(MLS-1)
Page 20 of 21

PROGRAM TITLE: Conservation Demonstration and Development (CDD) Program

PROGRAM DESCRIPTION: The primary purpose of the Conservation Demonstration and Development (CDD) program is to pursue research, development, and demonstration projects that are designed to promote energy efficiency and conservation. This program will supplement and complement the other demand-side management programs offered by Florida Public Utilities Company.

The CDD program is meant to be an umbrella program for the identification, development, demonstration, and evaluation of promising new end-use technologies. The CDD program does not focus on any specific end-use technology but, instead, will address a wide variety of energy applications.

PROGRAM ACCOMPLISHMENTS: Even though there are no goals for this program we continue to explore new technologies for applicability to this program.

PROGRAM FISCAL EXPENDITURES: The expenditures for the reporting period of January 1, 2009 through December 31 2009 were \$7,743.

PROGRAM PROGRESS SUMMARY: Even though there is no particular goal for this program we will strive to continue our efforts to look for new technologies and market barriers.

PROGRAM TITLE:

Residential Geothermal Heat Pump Program

PROGRAM DESCRIPTION:

The objective of the Residential Geothermal Heat Pump Program is to reduce the demand and energy requirements of new and existing residential customers through the promotion and installation of advanced and emerging geothermal systems. Geothermal heat pumps provide significant benefits to participating customers in the form of reduced operating costs and increased comfort levels, and are superior to other available heating and cooling technologies with respect to source efficiency and environmental impacts. FPUC's Geothermal Heat Pump Program is designed to overcome existing market barriers, specifically, lack of consumer awareness, knowledge, and acceptance of this technology.

This program will promote efficiency levels well above current market conditions, specifically those units with an Energy Efficiency Ratio (EER) of 13.0 or higher. According to the Department of Energy (DOE) geothermal technology is the most energy-efficient and environmentally clean space-conditioning system available today. Additionally, a recent DOE study indicates that geothermal systems have the lowest life-cycle cost of any HVAC system today.

PROGRAM PROJECTIONS:

For January 2011 through December 2011: At this time no participation goals have been set.

PROGRAM FISCAL EXPENDITURES:

For January 2011 through December 2011, projected expenses are \$2,463

PROGRAM SUMMARY:

Even though there is no particular goal for this program we continue our efforts to promote this technology and hope we will see a number of geothermal installations in the future. This program also receives the benefits from the advertising of the GoodCents Home/Energy Star Program, which promotes high efficient heating and cooling systems.

PROGRAM TITLE:

GoodCents Home/Energy Star Program

PROGRAM DESCRIPTION:

The GoodCents Home Program has long been the standard for energy efficient construction in North Florida and throughout other parts of the country where the GoodCents Program has been utilized by as many as 270 different utilities. For FPUC and our customers, GoodCents homes provides guidance concerning energy efficiency in new construction by promoting energy efficient home construction techniques by evaluating components in the categories of design and construction practices.

In an effort to further enhance the GoodCents Home Program and market the Program more efficiently and effectively, GoodCents signed a Memorandum of Understanding with the Department of Energy (DOE) and the Environmental Protection Agency (EPA). Since FPUC is a member of GoodCents this agreement provides the opportunity to offer the Energy Star Home Program to builders and customers and correlates the performance of GoodCents homes to the nationally recognized Energy Star efficiency label. In many cases, a standard GoodCents home will also qualify as an Energy Star Home. The GoodCents Home standards continue to exceed the minimum efficiency standards for new construction as set forth by the Florida Model Energy Code.

PROGRAM PROJECTION:

For January 2011 through December 2011 the goal for the number of program participants is 55.

PROGRAM FISCAL EXPENDITURES:

For January 2011 through December 2011 the projected expenses are \$65,725.

PROGRAM SUMMARY:

Through this program, participating customers will experience lower utility bills, increased comfort, and the eligibility to utilize energy efficient home mortgage products. We continue to see a positive participation in this program due to the continuous effort in educating and advertising the benefits of this program to our customers and builders. We will continue to build a good working relationship with our builders and customers to ensure the success of this program.

PROGRAM TITLE:

GoodCents Energy Survey Program

PROGRAM DESCRIPTION:

The objective of the GoodCents Energy Survey Program is to provide FPUC's residential customers with energy conservation advice that encourages the implementation of efficiency measures resulting in energy savings for the customer. FPUC views this program as a vehicle to promote the installation of cost-effective conservation features. During the survey process, the customer is provided with specific whole-house recommendations. The survey process also checks for possible duct leakage. If a problem is identified recommendations will be made for further analysis and repairs. Blower-door testing is required to identify and quantify the duct leakage and will be performed by a contractor. After identifying the leakage sites and quantities, the customer is given a written summary of the test findings and the potential for savings, along with a list of apporoved repair contractors. As a result, the increase in operating efficiencies provides for a reduction in weather-sensitive peak demand, as well as a reduction in energy consumption.

PROGRAM PROJECTIONS:

For January 2011 through December 2011 the goal for the number of program participants is 250.

PROGRAM FISCAL EXPENDITURES:

For January 2011 through December 2011 the projected expenses are \$153,839.

PROGRAM SUMMARY:

This program provides participating customers with the information needed to determine which energy saving measures are best suited to their individual needs and requirements. We feel confident that by continuing to advertise the benefits of this program through bill inserts, promotional materials, newspaper, and cable TV we will continue to see a high participation level in this program.

PROGRAM TITLE:

GoodCents Commercial Building Program/Energy Survey

PROGRAM DESCRIPTION:

The commercial/industrial market is comprised of a wide range of diverse businesses with variable size and operational characteristics. The success of the Commercial/Industrial Good Cents Building program lies in its ability to address this diversity by focusing on the mutual characteristics of commercial buildings. The most common critical areas in commercial buildings that affect summer peak demand are the thermal efficiency of the building and HVAC equipment efficiency. The Commercial/Industrial GoodCents Building Program provides requirements for these areas that, if adhered to, will help reduce peak demand and energy consumption.

The promotion of the GoodCents Commercial Building Program through the years has featured a positive relationship with trade allies, the public and local commercial/industrial customers. The program's design continues to be sufficiently flexible to allow an architect or designer to use initiative and ingenuity to achieve results that are meaningful to both the customer and FPUC.

To provide an accurate quantitative analysis of the kW and kWh savings due to the GoodCents Commercial Building Program, the GoodCents standards for average commercial buildings are compared to the Florida Model Energy Code. The features used to prepare the customer's analysis include: wall and ceiling R-values; glass area; description of glass; and equipment used in determining the kW and kWh differences for the two types of structures.

PROGRAM PROJECTIONS:

For January 2011 through December 2011 the goal for the number of program participants is 50.

PROGRAM FISCAL EXPENDITURES:

For January 2011 through December 2011 the projected expenses are \$36,108.

PROGRAM SUMMARY:

The GoodCents Building Program is designed to ensure that buildings are constructed with energy efficiency levels above the Florida Model Energy Code standards. These standards include both HVAC efficiency and thermal envelope requirements. This program will continue to be successful as FPUC builds on its efforts in working with builders and architects.

DOCKET NO. 100002-EG
FLORIDA PUBLIC UTILITIES CO.
(JVH-1)
PAGE 16 OF 24

PROGRAM TITLE:

GoodCents Commercial Technical Assistance Audit Program

PROGRAM DESCRIPTION:

The GoodCents Commercial Technical Assistance Audit Program is an interactive program that provides commercial customers assistance in identifying advanced energy conservation opportunities. It is customized to meet the individual needs of large customers as required; therefore, it is an evolving program.

The Technical Assistance Audit process consists of an on-site review by FPUC Conservation Specialist of the customer's facility operation, equipment and energy usage pattern. The specialist identifies areas of potential reduction in kW demand and kWh consumption as well as identifying end-use technology opportunities. A technical evaluation is then performed to determine the economic payback or life cycle cost for various improvements to the facility. When necessary, FPUC will subcontract the evaluation process to an independent engineering firm and/or contracting consultant.

PROGRAM PROJECTION:

For January 2011 through December 2011: There are no goals set for this program.

PROGRAM FISCAL EXPENDITURES:

For January 2011 through December 2011 the projected expenses are \$73,288

PROGRAM SUMMARY:

- . .

In recent research of commercial/industrial customers, consistent response for areas of improvement from this class of customer include individualized attention and service in helping them improve their cost of operation and efficiency. We have built trusting relationships with many of these customers by offering education on new technologies and by offering expertise in energy conservation. The work we have done in this area will continue to benefit FPUC.

(JVH-1)
PAGE 17 OF 24

SCHEDULE C-5 PAGE 7 OF 13

PROGRAM TITLE:

Low Income Program

PROGRAM DESCRIPTION:

FPUC presently has energy education programs that identify low cost and or no cost conservation measures. In order to better assist low-income customers in managing their energy purchases, the presentation and format of these energy education programs are tailored to the audience. These programs provide basic energy education, as well as inform the customers of other specific services, such as free energy surveys, that FPUC currently offers.

PROGRAM PROJECTION:

For January 2011 through December 2011: There are no goals set for this program.

PROGRAM FISCAL EXPENDITURES:

For January 2011 through December 2011 the projected expenses for this period are \$17,097

PROGRAM SUMMARY:

This program will benefit Florida Public Utilities Company by providing opportunities to educate low-income customers on the benefits of an energy efficient home.

EXHIBIT NO. ______
DOCKET NO. 100002-EG
FLORIDA PUBLIC UTILITIES CO.
(JVH-1)
PAGE 18 OF 24

SCHEDULE C-5 PAGE 8 OF 13

PROGRAM TITLE:

Residential Heating and Cooling Efficiency Upgrade Program

PROGRAM DESCRIPTION:

This program is directed at reducing the rate of growth in peak demand and energy throughout Florida Public Utilities Company's electricity service territories. The program will do this by increasing the saturation of high-efficiency heat pumps. Two types of rebates are offered, one is for replacing an existing resistance-heating system with a high efficiency heat pump and the second type is for replacing a lower-efficiency heat pump with a high-efficiency heat pump. FPUC will validate engineering analyses of energy and demand savings with billing data and by metering customer equipment.

PROGRAM PROJECTIONS:

For January 2011 through December 2011 the goal for the number of program participants is 150.

PROGRAM FISCAL EXPENDITURES:

For January 2011 through December 2011 the projected expenses are \$32,648.

PROGRAM SUMMARY:

This program provides an opportunity for FPUC customers' to install a more energy efficient heating and cooling system with the results being a decrease in energy consumption as well as a reduction in weather-sensitive peak demand for FPUC. We feel confident that by continuing to advertise the benefits of this program through our GoodCents Energy Survey Program, bill inserts, promotional materials, newspaper ads, and cable TV we will continue to see a high participation level.

FLORIDA PUBLIC UTILITIES CO. (JVH-1)
PAGE 19 OF 24

SCHEDULE C-5 PAGE 9 OF 13

PROGRAM TITLE:

Residential Ceiling Insulation Upgrade Program

PROGRAM DESCRIPTION:

The purpose of this program is to reduce peak demand and energy consumption by decreasing the load presented by residential air-conditioning and heating equipment. To serve this purpose, this program requires that residential customers add at least R-11 of ceiling insulation. Resulting total R-values achieved will be at least R-30. By doing so, they will qualify for an incentive of \$0.125 per square foot up to \$375 in the form of an Insulation Certificate that may be applied to the total cost of installing the added ceiling insulation.

PROGRAM PROJECTIONS:

For January 2011 through December 2011 the goal for the number of program participants is 30.

PROGRAM FISCAL EXPENDITURES:

For January 2011 through December 2011 the projected expenses are \$13,415

PROGRAM SUMMARY:

Interested residential customers must request a free ceiling insulation inspection. FPUC will then dispatch an energy efficiency expert to perform that inspection and determine what changes should be made to enhance efficiency. The inspection will also determine the customer's eligibility of the incentive. This program will be promoted through the GoodCents Energy Survey Program as well as bill inserts, newspaper ads and cable TV. We feel confident that by continuing to advertise the benefits of this program we will see participation levels increase.

EXHIBIT NO. ______
DOCKET NO. 100002-EG
FLORIDA PUBLIC UTILITIES CO.
(JVH-1)
PAGE 20 OF 24

PROGRAM TITLE:

Commercial Indoor Efficient Lighting Rebate Program

PROGRAM DESCRIPTION:

The purpose of this program is to reduce peak demand and energy consumption by decreasing the load presented by commercial lighting equipment. To serve this purpose, this program requires that commercial customers achieve at least 1,000 watts of lighting reduction from any lighting source that has been retrofitted with a more efficient fluorescent lighting system (ballasts and lamps). By doing so, they will qualify for an incentive of 10 cents per watt reduced for Tier 1 or a 2.5 cents per watt rebate for Tier 2 participation (\$100 max).

PROGRAM PROJECTION:

For January 2011 through December 2011 the goal for the number of program participants is 12.

PROGRAM FISCAL EXPENDITURES:

For January 2011 through December 2011 the projected expenses are \$22,517.

PROGRAM SUMMARY:

Interested customers or contractors must contact FPUC before starting a lighting retrofit project. The company will then dispatch a qualified lighting engineer to perform an inspection and determine what lighting changes should be made to enhance efficiency. The inspection will also determine the customer/contractor's eligibility for the incentive. This program will be promoted through the GoodCents Commercial Technical Assistance Audit Program, bill inserts, newspaper ads, and cable TV. We feel confident that by continuing advertising the benefits of this program we will see participation levels increase.

PAGE 21 OF 24

PROGRAM TITLE:

Conservation Demonstration and Development (CDD) Program

PROGRAM DESCRIPTION:

The primary purpose of the Conservation Demonstration and Development (CDD) Program is to pursue research, development, and demonstration projects that are designed to promote energy efficiency and conservation. This program will supplement and complement the other demand-side management programs offered by FPUC.

The CDD program is meant to be an umbrella program for the identification, development, demonstration, and evaluation of promising new end-use technologies. The CDD program does not focus on any specific end-use technology but, instead, will address a wide variety of energy applications.

PROGRAM PROJECTION:

For January 2010 through December 2011: There are no goals set for this program.

PROGRAM FISCAL EXPENDITURES:

For January 2011 through December 2011 the projected expenses for this period are \$15,000

PROGRAM SUMMARY:

This program will enable FPUC to pursue research, development and demonstration projects designed to promote energy efficiency and conservation. CDD projects will enable the collection of actual data from field tests. Engineering estimates and modeling techniques can be tested and validated. Future cost-benefit analyses for the subject CDD projects will be more reliable, thereby enabling better assessments of the expected future peak demand and energy conservation potential.

PROGRAM TITLE:

Affordable Housing Builders and Providers Program

PROGRAM DESCRIPTION:

FPUC will identify the affordable housing builders within the service area and will encourage them to attend education seminars and workshops related to energy efficient construction, retrofit programs, financing programs, etc., and to participate in the GoodCents Home Program. FPUC will work with the Florida Energy Extension Service and other seminar sponsors to offer a minimum of two seminars and/or workshops per year. FPUC will work with all sponsors to reduce or eliminate attendances fees for affordable housing providers.

PROGRAM PROJECTION:

For January 2011 through December 2011. There is no goal for this program.

PROGRAM FISCAL EXPENDITURES:

For January 2011 through December 2011 the projected expenses for this period are \$-0-.

PROGRAM SUMMARY:

This program will provide FPUC the opportunity to educate contractors on the benefits of building a home to GoodCents standards as well as introduce new and innovative energy efficient building technology. This program has been removed from FPU's DSM Portfolio.

Program Description and Progress

Program Title: Residential Energy Survey

Program Description: This program offers existing residential customers, and individuals and contractors building new homes, energy conservation advice that encourages the implementation of efficiency measures resulting in energy savings for the customer. Owners of existing homes may choose to have a Gulf Power representative conduct an on-site survey of their home, or they may opt to participate in either a mail-in or on-line interactive version of the survey known as the "Energy Check Up." Qualifying new home owners and contractors may request a pre-construction survey of their final construction plans. Regardless of the options chosen, these surveys provide customers with specific whole-house recommendations.

Program Accomplishments: Overall, 7,710 residential energy surveys were completed compared to 5,600 projected surveys, a difference of 2,110 surveys over projection. There were 1,000 more Walk-Through surveys, 655 more Internet/Mail-in surveys and 455 more Pre-construction surveys than projected.

Program Fiscal Expenditures: Actual expenses were \$1,310,732 with projected expenses of \$1,226,602 resulting in a variance of \$84,130 more than the projection. The additional expenses are due to more labor required for the increased number of surveys and an inaccurate re-projection of advertising expenses. The actual 2009 advertising expenses were \$8,443 less than the amount originally forecast in the September 12, 2008 projection filing. However, due to an inaccurate assumption, a lower amount was re-projected in the September 11, 2009 filing.

Program Progress Summary: Since the approval of this program, Gulf has performed 164,502 residential energy surveys. This is a result of Gulf's promotional campaign to solicit energy surveys as well as the overall rapport established with its customers as the "energy experts" in Northwest Florida.

Program Description and Progress

Program Title: Residential Geothermal Heat Pump

<u>Program Description</u>: The objective of this program is to reduce the demand and energy requirements of new and existing residential customers through the promotion and installation of geothermal heating and cooling systems.

<u>Program Accomplishments</u>: There were 72 units installed compared to 200 units projected by year end, a difference of 128 units under projection.

<u>Program Fiscal Expenditures</u>: Actual expenses for the period were \$182,196. Projected expenses were \$242,133 resulting in a variance of \$59,937 under the projection.

<u>Program Progress Summary</u>: Education and training of HVAC dealers and building contractors continue as vital components of this program. Since the inception, 2,498 geothermal systems have been installed.

Program Description and Progress

Program Title: Energy Select

Program Description: The Energy Select program is designed to increase the efficiency of energy consumption on Gulf Power's system. The program is an interactive energy management system that allows residential customers to program their central heating and cooling system, electric water heater and pool pump to automatically respond to varying prices of electricity depending upon the time of day, day of week and season. These prices are in relation to the Company's cost of producing or purchasing energy. Energy Select consists of three elements - a custom-designed programmable thermostat, a Residential Service Variable Pricing (RSVP) rate featuring four different prices for electricity and a communications gateway that facilitates two-way communication between the utility and the customer's home.

With this program, customers can save money by programming the largest portion of their energy purchases to occur in the lower price periods, while providing peak demand reduction benefits during the high and critical peak price periods.

<u>Program Accomplishments</u>: There was a net increase of 234 units during the reporting period compared to 100 net additions projected by year end for a difference of 134 units over the projection.

Program Fiscal Expenditures: There were actual expenses of \$6,368,177 compared to projected net expenses of \$6,922,585. The lower costs of \$554,408 is primarily due to less materials expense.

<u>Program Progress Summary</u>: As of December, 2009, there are 8,950 participating customers.

Program Description and Progress

Program Title: Commercial/Industrial Energy Analysis

Program Description: This program is designed to provide professional advice to our existing commercial and industrial customers on how to reduce, and make the most efficient use of their energy consumption. This program covers from the smallest commercial customer, requiring only a walk-through survey, to the use of computer programs which will simulate several design options for very large energy intensive customers. The program is designed to include semi-annual and annual follow-ups with the customer to verify any conservation measures installed and to reinforce the need to continue with more conservation efforts. Customers may participate by requesting a basic Energy Analysis Audit (EAA) provided through either an on-site survey or a direct mail survey. A more comprehensive analysis can be provided by conducting a Technical Assistance Audit (TAA).

<u>Program Accomplishments</u>: In 2009, 588 commercial energy surveys were completed compared to 550 projected surveys, a difference of 38 surveys over projection.

<u>Program Fiscal Expenditures</u>: Actual expenses were \$604,901 for the period compared to projected expenses of \$674,018. The resulting variance is \$69,117 under projection.

Program Progress Summary: A total of 19,397 E.A./T.A.A.'s have been completed since the program started in 1981. These audits have ranged from the basic walk-through type for some commercial customers to sophisticated technical assistance audits for other commercial and industrial customers.

Program Description and Progress

Program Title: GoodCents Commercial Buildings

Program Description: This program is designed to achieve energy efficient buildings by educating commercial and industrial customers on the most cost-effective methods of designing new and improving existing buildings. The program stresses efficient heating and cooling equipment, improved thermal envelope, operation and maintenance, lighting, cooking and water heating. Field representatives work with architects, engineers, consultants, contractors, equipment suppliers and building owners and occupants to encourage the most efficient use of all energy sources and available technologies.

<u>Program Accomplishments</u>: There were 90 actual buildings certified during the current period compared to 180 projected for a difference of 90 under projection.

<u>Program Fiscal Expenditures</u>: Actual expenses were \$553,023 for the period while projected expenses were \$632,146 resulting in a variance of \$79,123 under the projection.

Program Progress Summary: A total of 9,278 commercial/industrial buildings have qualified for the GoodCents designation since the program was developed in 1977.

Program Description and Progress

Program Title: Commercial Geothermal Heat Pump

<u>Program Description</u>: The objective of this program is to reduce the demand and energy requirements of new and existing commercial/industrial customers through the promotion and installation of geothermal heating and cooling systems.

<u>Program Accomplishments</u>: There were 14 units actually installed compared to 20 units projected by year end, a difference of 6 units under projection.

<u>Program Fiscal Expenditures</u>: Actual expenses were \$81,325 for the recovery period compared to projected expenses of \$138,393 resulting in a difference of \$57,068 under the projection.

<u>Program Progress Summary</u>: To date, 28 units have been installed under this program.

Program Description and Progress

Program Title: Energy Services

Program Description: The Energy Services program is designed to establish the capability and process to offer advanced energy services, and energy efficient end-use equipment that is customized to meet the individual needs of large customers. Potential projects are evaluated on a case by case basis and must be cost effective to qualify for incentives or rebates. The types of projects covered under this program would include demand reduction or efficiency improvement retrofits, such as lighting (fluorescent and incandescent), motor replacements, HVAC retrofit (including geothermal applications), and new electro-technologies.

Program Accomplishments: For the 2009 recovery period, at the meter reductions of 8,018,445 kWh, winter kW of 1,559 and summer kW of 1,561 were achieved. The projected results for this period were at the meter energy reductions of 1,178,470 kWh and at the meter demand reductions of 510 kW winter and 275 kW summer.

<u>Program Fiscal Expenditures</u>: There were actual expenditures of \$24,449, including \$24,000 of incentives, for the 2009 recovery period compared to projected expenses of \$104,971 resulting in a variance of \$80,522 under the projection.

<u>Program Progress Summary</u>: Total reductions at the meter of 22,310,136 kWh, winter kW of 4,685 and summer kW of 6,390 have been achieved since this program was initiated.

Program Description and Progress

Program Title: Renewable Energy

Program Description: The Renewable Energy Program is designed to encompass a variety of voluntary renewable and green energy programs under development by Gulf Power Company. The voluntary pricing options for customers include, but are not limited to, EarthCents Solar (Photovoltaic Rate Rider) and the Solar for Schools program. Additionally, this program will include expenses necessary to prepare and implement renewable energy initiatives utilizing landfill gas, wind, solar or other renewable energy sources.

Program Accomplishments:

EarthCents Solar (Photovoltaic (PV) Optional Rate Rider):
The PV Rate Rider is an optional rate rider in which
customers may purchase photovoltaic energy in 100-watt
blocks. The construction of the photovoltaic facility or
the purchase of power from photovoltaic facilities will
begin upon the attainment of sufficient commitments from all
participants across the Southern Company electric system
where the option is available and, as necessary, after
obtaining PSC approval. As of December, 2009, 53 customers
have signed up for 65 100-watt blocks of energy.

Solar for Schools: The principle objective of the Solar for Schools program is to implement solar education and demonstration projects, in conjunction with the Florida Solar Energy Center, at local educational facilities by means of voluntary contributions. The program also seeks to increase renewable energy and energy awareness among students, parents and contributors. Solar for Schools is a program that uses voluntary contributions to fund materials for energy education, permanent demonstration displays, rewards for science contests, and teacher education. Voluntary contributions are solicited from customers interested in renewable energy and/or helping to improve the quality of schools in the Gulf Power Company service area. Funds are collected through a "check-off" mechanism on the utility bill or through a direct contribution and are accumulated in an interest bearing account. When contributions reach an adequate level, they are directed to an educational facility for implementation of various solar educational programs and for the installation of solar equipment. Contributions are not used for administrative costs, program research or for promotion costs.

Florida Public Service Commission
Docket No. 100002-EG
Gulf Power Company
Witness: John N. Floyd
Exhibit No._____(JNF-1)
Schedule CT-6
Page 9 of 19

The Solar for Schools program has enabled Gulf Power to install a 4 kW PV solar system at each of the following institutions: the Junior Museum of Bay County in 2000, Meigs Middle School in Shalimar in 2003, West Florida High School of Advanced Technology in Pensacola in 2003, and Bay County High School in Panama City in 2004.

Renewable Energy Initiative: Gulf continues to evaluate and develop renewable energy sources and offerings. During 2008, Gulf added resources to further evaluate several renewable energy generation options including landfill gas, biomass, municipal solid waste, and solar PV projects. Gulf also continues to evaluate opportunities for demand-side renewable energy programs as part of our renewable initiative.

<u>Program Fiscal Expenditures</u>: Actual expenses for this period were \$264,411 compared to projected expenses of \$430,144 which resulted in a variance of \$165,733 under projection. Actual expenses were as follows: Solar for Schools, \$20; EarthCents Solar, \$11,678; and Renewable Energy initiatives, \$252,713.

Page 10 of 19

Program Description and Progress

Program Title: Conservation Demonstration and Development

Program Description: A package of conservation programs was approved by the FPSC in Order No. 23561 for Gulf Power Company to explore and to pursue research, development, and demonstration projects designed to promote energy efficiency and conservation. This program serves as an umbrella program for the identification, development, demonstration and evaluation of new or emerging end-use technologies.

Program Accomplishments:

McDonald's Geothermal Project - This is the first full Geothermal HVAC fast food restaurant to be constructed within Gulf Power Company's service area. The objective of this project is to demonstrate the energy and electrical demand benefits of this geothermal restaurant system as compared to other like restaurants operated by the same owner in the same geographic location. Additional benefits of developing a hot water consumption profile for this restaurant will be obtained within this project. Data collection for one year began January, 2008 and a final report should be available by the end of second quarter, 2010.

UWF BEST House - Gulf Power has entered into a partnership, along with a number of other donors, with the University of West Florida, located in Pensacola, Florida, to help build the BEST (Build Educate Sustain Technology) House. This is a demonstration house that will be used as an educational tool and resource for Northwest Florida.

The BEST House program's intent is to provide a home featuring energy-efficient, sustainable design techniques available to the median homebuilder and buyer of today. The 3,300 square foot, three-bedroom home is a study model featuring passive solar collectors, grey-water and rainwater collection systems, advanced insulation systems, a geothermal heat pump, whole-house ventilation, energy-efficient appliances and lighting, day-lighting, and sustainable building products. The most ambitious goal, however, is to make this an off-grid project with photovoltaic panels and a battery array substantial enough

Page 11 of 19

to supply all of the electrical power needed on site with an excess that can be sold.

Gulf Power is acting as the primary Energy Consultant to all end uses and new technologies that will continue to be donated to this project. Gulf Power will pay for the purchase, installation and monitoring of equipment that will provide data on a wide variety of energy and water end uses.

General economic conditions affecting sponsor support and permitting requirements have delayed construction of the BEST House. Construction of the garage/exposition center has been rescheduled to precede the main house to better track the national economic recovery projection. Despite the delays, all participants remain optimistic and enthusiastic about the completion and potential contributions of the BEST House.

Electrode Boiler - This project will measure overall energy performance and verify operation of a new 3.4mW Electrode Boiler and two new 200HP natural gas boilers which produce steam for the Escambia County Jail. The Electrode Boiler is an emerging technology that has the potential, coupled with a time varying rate such as RTP, to produce steam very efficiently.

After a number of delays since its inception in 2005, the Electrode Boiler CDD Project was installed and made ready for operation in 2007. For various reasons, including newness of the technology, relative costs of electricity and natural gas, operator proficiency, etc., the County has not yet operated the boiler for any extended period of time. A final report on this project will be submitted by the end of second quarter, 2010.

Variable-Speed Pool Pump - Two residential pool pumping configurations will be monitored and data gathered to determine and compare the kW and kWh consumption of the existing, conventional pumps, relative to the more technologically advanced and energy-efficient variable-speed pumping technology. This data will be gathered for both pumps under normal, but varied, operational scenarios such as long-term water filtration and short-term pool maintenance.

Docket No. 100002-EG
GULF POWER COMPANY
Witness: John N. Floyd
Exhibit No._____(JNF-1)
Schedule CT-6
Page 12 of 19

Monitoring of the conventional pumps began July, 2009, and monitoring of the variable-speed pumps began October, 2009. To date, monitoring results indicate significant kWh reduction potential and even larger kW reduction potential. A final report should be available by the end of first quarter, 2011.

Program Fiscal Expenditures: Actual expenses for this period were \$67,571 compared to projected expenses of \$202,629 which resulted in a difference of \$135,058 under projection. Project expenses were as follows: Electrode Boiler, \$0; McDonald's Geothermal, \$0; UWF BEST House, \$45,342; Variable Speed Pool Pump, \$22,229.

Program Description and Progress

Program Title: Solar Thermal Water Heating Pilot Program

Program Description: Approved in December 2008, Gulf Power's one-year Solar Thermal Water Heating Pilot Program was designed to gauge utility customer interest in, and acceptance of, the technology, as well as determine what economic incentives may be most effective in increasing the public's willingness to install the technology in their homes. Gulf offered a \$1,000 rebate payable to customers after a qualifying system was installed by the customer and inspected by Company personnel. The program also included a demonstration of the solar thermal water heating technology in a low-income multi-family application.

Program Accomplishments:

Program Participation: Through December 2009, 91 Gulf Power Residential customers applied for rebates for installation of qualifying Solar Thermal Water Heating Systems, and over 300 additional customers inquired about the technology but did not participate in the program. Three additional qualifying applications were processed during the first quarter of 2010 for a total of 94 participating customers. Gulf had projected a total of 75 participants would receive the program rebate by the end of the one-year pilot.

System Installation Costs: Several different system types were installed under the program by nine different contractors with system costs ranging from \$3,761 to \$8,940. The average installed system cost was \$5,830.

Monitoring and Evaluation: Through participant surveys, Gulf validated that the incentive program had a direct impact on the deployment of these systems in our area. More than 85% of participating customers would not have installed their systems without the Gulf Power incentive. However, 75% of the participating customers indicated that they would have installed their systems at a slightly lower incentive level. Gulf also conducted a focus group study of non-participating customers. This research indicated that the initial cost of installing a solar thermal system was the primary reason they chose not to install the technology.

Page 14 of 19

To aid in evaluating the potential impact of solar thermal water heating systems on peak demand, Gulf installed load research meters on the homes of customers participating in the solar thermal pilot program. However, there were a very limited number of customers that installed their solar thermal systems prior to the summer peak demand period. Due to the limited number of customers and the time constraint of the pilot program, the results of the analyses were inconclusive. Gulf recommends that future research be done with end-use metering on solar thermal and standard water heating equipment, as well as whole-premise metering.

Additional data collection is ongoing and will be used along with customer billing data over time to aid in validating estimates of energy reductions associated with solar thermal water heating.

Promotion and Advertising: Several forms of media were used to promote the pilot program and raise customer awareness of Solar Water Heating technology. These media forms included internet, bill inserts, National Public Radio ads, and daily newspaper ads in publications across Gulf Power's service area. Program brochures were also developed to aid in promoting the program as well as assist customers with quidelines for successful system installations.

Low-Income Housing Project: Gulf Power proposed to demonstrate solar thermal water heating in a low-income multi-family application at an estimated cost of \$375,000. Gulf Power worked with a low-income housing development to facilitate the installation of solar water heating systems in this type of application. However, due the limited timing of the pilot program, this project could not be demonstrated as originally proposed.

<u>Program Fiscal Expenditures</u>: There were actual expenditures of \$141,921 for the 2009 recovery period compared to projected expenses of \$271,282 resulting in a variance of \$129,361 under the projection.

Program Description and Progress

Program Title: Energy Education Pilot Program

<u>Program Description</u>: The objective of the Energy Education program is to raise awareness of energy efficiency and conservation and to increase participation in conservation opportunities, including Gulf's existing and future energy efficiency and conservation programs. The Program consists of four components:

- 1. Consumer Awareness
- 2. School-Based Education
 - a. Science Teacher Training
 - b. Eighth Grade Instructional Assistance
- 3. Community-Based Education
- 4. Contractor Education

Program Accomplishments:

Consumer Awareness

The Consumer Awareness Campaign provided general energy efficiency and conservation messages and supplemented existing Gulf advertising for conservation programs by associating all programs and services with a common overarching energy conservation message in order to maintain high customer awareness of the benefits of energy efficiency efforts, and to increase personal action in regards to efficiency. Overall, traditional media - television, billboard, radio, print, and online - have been used in addition to other venues including customer home energy makeovers in partnership with local TV stations and vendors; energy tip of the day opportunities; and shopping mall energy expos to increase energy efficiency awareness.

Non-traditional consumer awareness strategy included partnerships with local ABC and NBC affiliates, National Public Radio station and National Public Broadcasting Service TV station, as well as shopping malls and community organizations. The objective of these partnerships was to supplement traditional advertising pieces by providing details about energy efficiency and conservation using Gulf Power employees and local well-known broadcast personnel in a wide range of venues. Examples include:

 Through a Gulf Power partnership with the local ABC TV affiliate and several trade allies, a homeowner who had recently participated in the Energy Survey program was selected to receive an Energy Saver Home Makeover. Florida Public Service Commission
Docket No. 100002-EG
GULF POWER COMPANY
Witness: John N. Floyd
Exhibit No._____(JNF-1)
Schedule CT-6
Page 16 of 19

Based on the recommendations of the energy survey, a number of energy efficiency measures were donated and installed including a new 15 SEER heat pump HVAC, duct work improvements, additional attic insulation, new high efficiency windows and a new water heater. The makeover was documented on-air and on-line where the projected energy savings associated with the improvements were highlighted.

- Featured guest spots (Eco-minutes, Green Tips, Money-Saver Fridays, etc.) during regular programming for about 15 weeks on topics such as proper thermostat settings, phantom energy use, energy efficiency tips for renters, insulating your home, saving energy at work, how to check your energy use. Some of these were live interviews while others were taped sessions that could be aired multiple times.
- Features during prime newscasts on energy saving topics.
- Prominent placement on local media Websites, most often associated with weather pages, for Gulf Power energy saving advice.
- Tie-in with daily weather reports.
- Online blogs with energy advice.
- Educational messages targeted to children during Saturday morning cartoon programming, including promotion of contests.
- Distribution by partners of Gulf Power energy saving information during community events, including live broadcast of tips. Events included Earth Day events, regular weekly festivals, and Homebuilder expos.
- Exhibit for a Green Energy expo at a shopping mall (averaging 25,000 consumers on a summer Saturday) during which Gulf Power employees provided energy saving advice and program information.

Unlike other advertising targeted to specific consumer groups, the Energy Education campaign needed to reach the entire customer base in a short time period. Overall, the

Schedule CT-6
Page 17 of 19

awareness campaign generated approximately 100,366,000 energy education advertising impressions on traditional venues such as online, radio, TV, outdoor billboards and newsprint within the Gulf Power service territory, as well as the exposure through non-traditional efforts. Traditional media placement accounted for about 70 percent of the Consumer Awareness budget, with TV placement accounting for more than two-thirds of those costs.

School-Based Education

The School-based Education component is a training program for middle school science teachers, as well as a resource for support materials to augment the teachers' energy-related lesson plans. Gulf partnered with the non-profit National Energy Education Development (NEED) Project to provide teacher training and student materials customized to specific school and district needs in carrying out the Florida Department of Education's Sunshine State Standards for Science.

Classroom: During the spring of 2009, Gulf Power employees demonstrated hands-on activities and energy concepts to more than 3,300 middle school students at 13 schools throughout Northwest Florida (about one-third of total middle schools served by Gulf Power) during energy "expos" in the spring. As a result of this program exposure, school districts have adopted the materials as part of the energy curriculum for the 2009-2010 school year in almost 50 middle schools served by Gulf Power. Gulf Power provided 116 middle school science teachers with NEED teacher and student quidebooks and activities in more than six different energy-related subjects ranging from energy sources to energy conservation and school energy management. At the same time, 123 energy conservation and 123 solar energy hands-on learning kits were provided for use with the energy curriculum. Gulf Power also has the same kits and curriculum materials available for demonstration and presentations at schools or for use by teachers or student groups such as Scout troops and 4-H clubs.

Teacher: During the summer of 2009, Gulf Power provided two one-day teacher workshops in conjunction with NEED instructors. Almost 50 middle school science teachers and district curriculum coordinators participated to earn continuing education credits. Teacher evaluations of the energy-related curriculum and materials were exceptionally high, and additional teacher workshops have been requested. However, the majority of teachers preferred that Gulf Power provide more classroom materials - both lesson plans and

Exhibit No. (JNF-2)
Schedule CT-6
Page 18 of 19

hands-on science of energy activities - rather than training for teachers, so program funds were shifted, and teacher training was provided through Gulf Power resources in conjunction with the teachers who completed initial training courses.

Summer camp: Gulf Power partnered with universities, community colleges, public schools and workforce development agencies to offer seven intensive energy awareness camps throughout Northwest Florida during the summer of 2009. These camps ranged from five days to half-day sessions and gave in-depth, fun instruction in energy and conservation to more than 130 middle school and high school age children, including two camps for students from low-income families. Students learned about energy sources and created their own renewable energy sources, while learning to weatherize houses and create science projects about energy efficiency and conservation.

Community-Based Education

Gulf Power employees have increased energy awareness exposure in the communities we serve by doubling participation at events and meetings using energy efficiency and conservation educational displays and presentations. An energy conservation display booth as well as presentations and handouts were created that focused on energy use and ways to conserve energy. Examples of exposure include: Building Industry Association Home Show (3,000 attendees); Earth Day events at colleges and military bases (average 400 attendees per day); civic clubs and school presentations, among others. More than 50 Gulf Power employees participated as part of a speaker's bureau trained to share energy efficiency and conservation as well as renewable energy advice.

Contractor Education

Gulf Power provided two one-day workshops for 58 contractors and vendors that covered the five critical aspects of building an energy efficient home - framing, electrical/plumbing, air sealing, insulation, and HVAC. All Gulf Power Marketing representatives also completed the training. The workshops were "sold out", and course materials have been supplied to other contractors throughout the year. Despite the poor economic outlook and record low new-home construction, two builders committed to high energy efficient home construction, and are promoting Gulf Power higher efficiency standards. The first high efficiency performance certified subdivision was announced this year.

Docket No. 100002-EG
GULF POWER COMPANY
Witness: John N. Floyd
Exhibit No._____(JNF-2)
Schedule CT-6
Page 19 of 19

Monitoring and Evaluation

Gulf conducted an initial survey of 300 customers in April 2009 to determine a baseline of consumer awareness of energy efficiency and conservation, and followed up with two additional surveys of 300 customers, with the last one conducted in October 2009.

Gulf Power customers surveyed in each wave of the research have high awareness of the benefits of energy efficiency, including helping the environment, decreasing their utility bills and improving the comfort of their homes. However, all groups surveyed were less familiar with specific Gulf Power conservation programs and energy efficiency actions or behaviors with the exception of two programs, Energy Select and In-Home Energy Audits. While overall awareness of energy efficiency actions and programs remained low throughout the year, consumers reported increased awareness of energy-saving tips featured in Gulf Power's Consumer Awareness campaign. In fact, awareness of:

- how to reduce water heating costs tripled;
- how to reduce phantom energy use doubled;
- correct summer thermostat settings almost doubled.

Program Fiscal Expenditures: There were actual expenditures of \$977,491 for the 2009 recovery period compared to projected expenses of \$1,010,000 resulting in a difference of \$32,509 under the projection.

<u>Section 1 - Existing Programs Ending or Being Modified Upon</u> <u>Approval of Gulf's proposed DSM Plan (Docket 100154-EG-EG)</u>

Program Description and Progress

Program Title: Residential Energy Survey

Program Description: This program offers existing residential customers, and individuals and contractors building new homes, energy conservation advice that encourages the implementation of efficiency measures resulting in energy savings for the customer. Owners of existing homes may choose to have a Gulf Power representative conduct an on-site survey of their home, or they may opt to participate in either a mail-in or on-line interactive version of the survey known as the "Energy Check Up." Qualifying new home owners and contractors may request a pre-construction survey of their final construction plans. Regardless of the options chosen, these surveys provide customers with specific whole-house recommendations.

<u>Program Projections</u>: N/A - this program will be replaced in Gulf Power's DSM Plan (Docket 100154-EG-EG) currently before the Commission for approval.

<u>Program Accomplishments</u>: During the first seven months of 2010, 4,218 surveys were completed compared to the projection of 2,333 surveys for this period, a difference of 1,885 surveys. There were 1,519 more on-site, 43 more pre-construction and 323 more online/mail-in surveys than projected during this period. The revised projection for 2010 is 5,500 surveys.

Program Fiscal Expenditures: Actual expenses for January through July 2010 were \$680,080 compared to a budget of \$778,268 for the same period. This results in a difference of \$98,188 or 12.6% under budget.

<u>Program Progress Summary</u>: Since the approval of this program, Gulf Power Company has performed 168,720 residential energy surveys. This is a result of Gulf Power's promotional campaign to solicit energy surveys as well as the overall rapport established with its customers as the "energy experts" in Northwest Florida.

Schedule C-5(A) Page 2 of 36

Program Description and Progress

Program Title: Residential Geothermal Heat Pump

<u>Program Description</u>: The objective of this program is to reduce the demand and energy requirements of new and existing residential customers through the promotion and installation of geothermal systems.

Program Projections: N/A - this program will be replaced in Gulf Power's DSM Plan (Docket 100154-EG) currently before the Commission for approval.

<u>Program Accomplishments</u>: During the current recovery period, 35 geothermal heat pump units have been installed thus far. The total projection for 2010 is 100 units.

<u>Program Fiscal Expenditures</u>: For the first seven months of the 2010 recovery period, expenses were projected to be \$230,963 compared to actual expenses of \$132,914 for a deviation of \$98,049 or 42.5% below budget.

<u>Program Progress Summary</u>: To date, 2,533 units have been installed.

Schedule C-5(A) Page 3 of 36

Program Description and Progress

Program Title: Good Cents Commercial Buildings

Program Description: This program is designed to educate commercial and industrial customers on the most cost-effective methods of designing new buildings and improving existing buildings. The program stresses efficient heating and cooling equipment, improved thermal envelope, operation and maintenance, lighting, cooking and water heating. Field representatives work with architects, engineers, consultants, contractors, equipment suppliers and building owners and occupants to encourage them to make the most efficient use of all energy sources and available technologies.

<u>Program Projections</u>: N/A - this program will be replaced in Gulf Power's DSM Plan (Docket 100154-EG) currently before the Commission for approval.

<u>Program Accomplishments</u>: Certification of 33 buildings has been achieved during January through July 2010. The total projection for 2010 is 180 buildings.

Program Fiscal Expenditures: Forecasted expenses for January through July 2010 were \$340,833 compared to actual expenses of \$292,240 for a deviation of \$48,593 or 14.3% under budget.

<u>Program Progress Summary</u>: A total of 9,311 commercial buildings have qualified for the Good Cents certification since the program was developed in 1977

Schedule C-5(A) Page 4 of 36

Program Description and Progress

Program Title: Commercial Geothermal Heat Pump

<u>Program Description</u>: The objective of this program is to reduce the demand and energy requirements of new and existing commercial/industrial customers through the promotion and installation of advanced and emerging geothermal systems.

<u>Program Projections</u>: N/A - this program will be replaced in Gulf Power's DSM Plan (Docket 100154-EG) currently before the Commission for approval.

<u>Program Accomplishments</u>: During the January through July 2010 period, there was 1 unit installed. The total projection for 2010 is 20 units.

Program Fiscal Expenditures: Forecasted expenses for January through July, 2010 were \$89,840 compared to actual expenses of \$39,484 for a deviation of \$50,356 or 56.1% under budget.

<u>Program Progress Summary</u>: To date, 29 units have been installed.

Schedule C-5(A)
Page 5 of 36

Program Description and Progress

Program Title: Energy Services

Program Description: The Energy Services program is designed to establish the capability and process to offer advanced energy services, and energy efficient end-use equipment, that is customized to meet the individual needs of large customers. Potential projects are evaluated on a case-by-case basis and must be cost effective to qualify for incentives or rebates. Types of projects covered under this program would include demand reduction or efficiency improvement retrofits, such as lighting (fluorescent and incandescent), motor replacements, HVAC retrofit (including geothermal applications), and new electro-technologies.

<u>Program Projections</u>: N/A - this program will be replaced in Gulf Power's DSM Plan (Docket 100154-EG) currently before the Commission for approval.

Program Accomplishments: For the period January through July 2010, at the meter reductions of 77,000 kWh, 77 winter kW and 31 summer kW reductions were achieved. The total projection for 2010 includes at the meter energy reductions of 1,178,470 kWh, and at the meter demand reductions of 510 kW winter and 275 kW summer.

Program Fiscal Expenditures: Forecasted expenses for January through July 2010 were \$148,750 with \$58,480 in expenses incurred during this period for a deviation of \$90,270 or 60.7% under budget.

<u>Program Progress Summary</u>: Total reductions at the meter of 22,387,136 kWh, 4,762 kW winter and 6,421 kW summer reductions have been achieved since this program was initiated.

Schedule C-5(A) Page 6 of 36

Program Description and Progress

Program Title: Renewable Energy

Program Description: The Renewable Energy Program is designed to encompass a variety of voluntary renewable and green energy programs under development by Gulf Power Company. The voluntary pricing options for customers will include, but not be limited to, EarthCents Solar (Photovoltaic Rate Rider) and the Solar for Schools program. Additionally, this program will include expenses necessary to prepare and implement a renewable energy pilot program utilizing landfill gas, wind, solar or other renewable energy sources.

Program Accomplishments:

EarthCents Solar (Photovoltaic (PV) Optional Rate Rider): The PV Rate Rider is an optional rate rider in which customers may purchase photovoltaic energy in 100-watt blocks. The construction of the photovoltaic facility or the purchase of power from photovoltaic facilities will begin upon the attainment of sufficient commitments from all participants across the Southern Company electric system where the option is available and, as necessary, after obtaining PSC approval. As of July 2010, 50 customers have signed up for 62 100-watt blocks of energy.

Solar for Schools: The principle objective of the Solar for Schools program is to implement solar education and demonstration projects, in conjunction with the Florida Solar Energy Center, at local educational facilities by means of voluntary contributions. The program also seeks to increase renewable energy and energy awareness among students, parents and contributors. Solar for Schools is a program that uses voluntary contributions to fund materials for energy education, permanent demonstration displays, rewards for science contests, and teacher education. Voluntary contributions are solicited from customers interested in renewable energy and/or helping to improve the quality of schools in the Gulf Power Company service Funds are collected through a "check-off" mechanism on the utility bill or through a direct contribution and accumulated in an interest bearing account. When contributions reach an adequate level, they are directed to an educational facility for implementation of various solar educational programs and for the installation of solar

Schedule C-5(A)
Page 7 of 36

equipment. Contributions are not used for administrative costs, program research or for promotion costs.

The Solar for Schools program has enabled Gulf Power to install a 4 kW PV solar system at each of the following institutions: the Junior Museum of Bay County in 2000, Meigs Middle School in Shalimar in 2003, West Florida High School of Advanced Technology in Pensacola in 2003, and Bay County High School in Panama City in 2004.

Gulf Power's new Solar for Schools program recently approved as part of the Renewable Programs filed in Gulf Power's 2010 Demand Side Management plan will replace this existing program and will no longer require voluntary customer contributions. Gulf Power is currently evaluating solar education and demonstration projects that will be funded with the existing voluntary customer contributions as we transition between programs.

Renewable Energy Initiative: Gulf continues to evaluate and develop renewable energy sources and offerings. During 2008, Gulf added resources to further evaluate several renewable energy generation options including landfill gas, biomass, municipal solid waste, and solar PV projects and to further evaluate opportunities for demand-side renewable energy programs as part of our renewable initiative. During 2009 and 2010, these resources provided needed support to facilitate the construction of the Perdido Bay Landfill Gas generation facility, which will be operational September 2010, erect a wind meteorlogical tower on Navarre Beach to collect coastal wind data and support wind energy education at a local school, manage and evaluate Gulf's Solar Thermal Water Heating pilot program, develop the renewable program offerings submitted as part of Gulf Power's 2010 Demand-Side Management Plan, and manage other aspects of Gulf Power's renewable energy initiative and offerings such as Net Metering, customer inquiries related to renewable energy, and renewable energy related data collection and analysis.

Program Fiscal Expenditures: Program expenses were forecasted at \$151,963 for the period January through July 2010 compared to actual expenses of \$105,504 for a deviation of \$46,459 or 30.6% under budget. Actual expenses were as follows: Solar for Schools, \$0; EarthCents Solar, \$6,438; and Renewable Energy Pilot initiatives, \$99,066.

Schedule C-5(A) Page 8 of 36

Program Description and Progress

Program Title: Solar Thermal Water Heating Program Pilot

Program Description: Gulf Power's Solar Thermal Water Heating Pilot Program was designed to gauge utility customer interest in, and acceptance of, the technology, as well as determine what economic incentives may be most effective in increasing the public's willingness to install the technology in their homes. During the pilot in 2009, Gulf offered a \$1,000 rebate payable to customers after a qualifying system was installed by the customer and inspected by Company personnel.

Program Fiscal Expenditures: Program expenses were forecasted at \$67,081 for the period January through July 2010 in anticipation of this program continuing as part of Gulf's DSM Plan (Docket 100154-EG) currently before the Commission for approval. Minimal actual expenses of \$4,000 were incurred to close out the 2009 pilot for a deviation of \$63,081 or 94.0% under budget.

Schedule C-5(A) Page 9 of 36

Program Description and Progress

Program Title: Energy Education Pilot Program

<u>Program Description</u>: The objective of the Energy Education program is to raise awareness of energy efficiency and conservation and to increase participation in conservation opportunities, including Gulf's existing and future energy efficiency and conservation programs. The Program consists of four components:

- 1. Consumer Awareness
- 2. School-Based Education
 - a. Science Teacher Training
 - b. Eighth Grade Instructional Assistance
- 3. Community-Based Education
- 4. Contractor Education

Program Projections: The Commission approved this pilot program for the year 2009 in Order No. PSC-08-0802-PAA-EG. During 2010, minimal expenses were incurred to maintain continuity anticipating a transition to the revised program included as part of Gulf's Residential Energy Audit and Education program included in Gulf's DSM Plan (Docket 100154-EG) currently before the Commission for approval.

Program Accomplishments:

School-Based Education

The School-based Education component is a training program for middle school science teachers, as well as a resource for support materials to augment the teachers' energy-related lesson plans. Gulf has partnered with the non-profit National Energy Education Development (NEED) Project to provide training and materials customized to specific school and district needs in carrying out the Florida Department of Education's Sunshine State Standards for Science.

Classroom: For the 2010-11 school year, Gulf supplied curriculum and activities in more than six different energy-related subjects ranging from energy sources to energy conservation and school energy management to 25 elementary, middle and high school classrooms. Each class also received two hands-on experiments kits - one with energy efficiency and conservation projects and one with solar energy projects - to complement the curriculum materials.

Schedule C-5(A) Page 10 of 36

Gulf Power employees also support students' energy education through classroom demonstrations and presentations upon request.

<u>Teacher</u>: For the 2010-11 school year, Gulf Power provided a two-day teacher workshop in conjunction with NEED instructors. 25 elementary, middle and high school science teachers and district curriculum coordinators participated in energy efficiency/conservation and solar energy training to earn continuing education credits.

<u>Summer camp</u>: During the summer of 2010, Gulf Power conducted two energy summer camps - one in partnership with a community low-income program and the other with a university - providing energy efficiency and renewable energy activities for almost 50 students.

Community-Based Education

Gulf Power employees continue to provide energy efficiency awareness in the communities we serve through presentations at events and civic meetings on a regular basis.

<u>Program Fiscal Expenditures</u>: Program expenses were forecasted at \$151,665 for the period January through July 2010 compared to actual expenses of \$69,688 for a deviation of \$81,977 or 54.1% under budget.

Schedule C-5(A) Page 11 of 36

Section 2 - New Programs Proposed in Gulf's DSM Plan (Docket 100154-EG)

Program Description and Progress

Program Title: Residential Energy Audit and Education

Program Description: This program is the primary educational program to help customers improve the energy efficiency of their new or existing home through energy conservation advice and information that encourages the implementation of efficiency measures and behaviors resulting in energy and utility bill savings.

<u>Program Projections</u>: Expenses of \$4,563,516 are projected for this program in 2011 as detailed in Schedule C-2(A). This program includes three measurable areas of focus:

- Energy Audit During the recovery period, 8,220 participants are projected. A Gulf Power representative will conduct an on-site audit of a customer's home or they may opt to participate in either a mail-in or on-line, interactive version of the audit. Regardless of the method, the customer is provided with specific recommendations including available incentives and other alternatives to facilitate implementation.
- Home Energy Reporting During the recovery period, 35,000 participants are projected. This program combines energy usage data with customer demographic information to develop specific, targeted recommendations that educate and motivate customers to reduce their energy consumption.
- School-based Awareness and Education This program provides science-based energy-related curricula and training to science teachers which are in Gulf's service area. As a result of these efforts, during the recovery period, approximately 5,000 students will be reached.

Program Accomplishments: N/A - New

Program Fiscal Expenditures: N/A - New

Schedule C-5(A) Page 12 of 36

Program Description and Progress

Program Title: Community Energy Saver Program

<u>Program Description</u>: This program will assist low-income families with escalating energy costs. Through this program, qualifying customers will not only receive the direct installation of conservation measures at no cost to them; the program will also educate families on energy efficiency techniques and behavioral changes to help control their energy use and reduce their utility operating costs.

Program Projections: For the period January 2011 through December 2011, the Company expects to implement the efficiency measures included in this program for 2,500 eligible residential customers. Expenses of \$687,863 are projected for this program in 2011 as detailed in Schedule C-2(A).

Program Accomplishments: N/A - New

Program Fiscal Expenditures: N/A - New

Schedule C-5(A) Page 13 of 36

Program Description and Progress

Program Title: Landlord/Renter Custom Incentive Program

Program Description: This program is designed to increase energy efficiency in the residential rental property sector. This program will promote the installation of various energy efficiency measures available through other programs including HVAC, insulation, windows, water heating, lighting, appliances, etc. including additional incentives as appropriate to overcome the split-incentive barrier which exists in a landlord/renter situation. Additionally, this program will promote the installation of measures included in the Community Energy Saver Program by the landlord of multi-family properties.

<u>Program Projections</u>: For the period January 2011 through December 2011, the Company expects 750 program participants. Expenses of \$119,174 are projected for this program in 2011 as detailed in Schedule C-2(A).

Program Accomplishments: N/A - New

Program Fiscal Expenditures: N/A - New

Schedule C-5(A) Page 14 of 36

Program Description and Progress

Program Title: HVAC Efficiency Improvement Program

<u>Program Description</u>: This program is designed to increase energy efficiency and improve HVAC cooling system performance for new and existing homes. These efficiencies will be realized through:

- HVAC maintenance
- HVAC early retirement (for inefficient systems)
- HVAC upgrades
- Duct repair
- Retrofit of an electronically commutated motor fan on existing HVAC systems

Incentives will be offered to participants.

<u>Program Projections</u>: Expenses of \$3,367,897 are projected for this program in 2011 as detailed in Schedule C-2(A). For the period January 2011 through December 2011, the Company expects to implement the efficiency measures included in this program for:

| Program | Annual # Projected Participants (2011) | | | | | | | | |
|---|--|--|--|--|--|--|--|--|--|
| HVAC maintenance | 2400 | | | | | | | | |
| HVAC early retirement (for | Tier One: 638 | | | | | | | | |
| inefficient systems) | Tier Two: 90 | | | | | | | | |
| | Tier Three: 20 | | | | | | | | |
| HVAC upgrades | Tier One: 510 | | | | | | | | |
| | Tier Two: 72 | | | | | | | | |
| | Tier Three: 18 | | | | | | | | |
| Duct repair | 1000 | | | | | | | | |
| Retrofit of an electronically commutated motor fan on existing HVAC systems | 400 | | | | | | | | |

Program Description and Progress

Program Title: Heat Pump Water Heater Program

<u>Program Description</u>: This program will provide incentives directly to the customer for the installation of high-efficiency Heat Pump Water Heating equipment for domestic hot water production.

<u>Program Projections</u>: For the period January 2011 through December 2011, the Company expects 300 program participants. Expenses of \$460,413 are projected for this program in 2011 as detailed in Schedule C-2(A).

Program Accomplishments: N/A - New

Program Fiscal Expenditures: N/A - New

Schedule C-5(A) Page 17 of 36

Program Description and Progress

Program Title: Ceiling Insulation Program

<u>Program Description</u>: This program will provide incentives to encourage customers to install high efficiency insulation or increase insulation in existing residential single-family and multi-family homes. The objective of this program is to reduce heat loss and heat gain from both conductive and convective means by increased insulation.

<u>Program Projections</u>: For the period January 2011 through December 2011, the Company expects 200 program participants. Expenses of \$165,621 are projected for this program in 2011 as detailed in Schedule C-2(A).

Program Accomplishments: N/A - New

Program Fiscal Expenditures: N/A - New

Schedule C-5(A) Page 18 of 36

Program Description and Progress

Program Title: High Performance Window Program

Program Description: This program will provide incentives to install high-efficiency windows or window film in existing or new residential applications. The objective of the program is to reduce solar heat gain into a home which, in turn, leads to reduced HVAC loads and operating costs.

Program Projections: For the period January 2011 through December 2011, the Company expects 200 window replacements and 100 window film program participants. Expenses of \$339,392 are projected for this program in 2011 as detailed in Schedule C-2(A).

Program Accomplishments: N/A - New

Program Fiscal Expenditures: N/A - New

Schedule C-5(A) Page 19 of 36

Program Description and Progress

Program Title: Reflective Roof Program

<u>Program Description</u>: This program will provide incentives to install ENERGY STAR qualified cool/reflective roofing products when constructing a new home or replacing the roof on an existing residence. The objective of this program is to significantly decrease the amount of heat that is transferred through roof assemblies and into vented attic spaces which, in turn, decreases the transfer of heat into the home's conditioned living area.

<u>Program Projections</u>: For the period January 2011 through December 2011, the Company expects 200 reflective roof program participants. Expenses of \$202,902 are projected for this program in 2011 as detailed in Schedule C-2(A).

Program Accomplishments: N/A - New

Program Fiscal Expenditures: N/A - New

Schedule C-5(A) Page 20 of 36

Program Description and Progress

Program Title: Variable Speed/Flow Pool Pump Program

<u>Program Description</u>: This program will provide an incentive to encourage the installation of high-efficiency variable speed or variable flow pool pumping and control equipment in both new and existing residential applications. The objective of this program is to reduce the energy, demand, and cost associated with swimming pool operation.

<u>Program Projections</u>: For the period January 2011 through December 2011, the Company expects 150 program participants. Expenses of \$174,885 are projected for this program in 2011 as detailed in Schedule C-2(A).

Program Accomplishments: N/A - New

Program Fiscal Expenditures: N/A - New

Schedule C-5(A) Page 21 of 36

Program Description and Progress

Program Title: Energy Select

<u>Program Description</u>: The program is designed to provide the customer with a means of conveniently and automatically controlling and monitoring their energy purchases in response to prices that vary during the day and by season in relation to the Company's cost of producing or purchasing energy.

<u>Program Projections</u>: During the 2011 projection period, Gulf Power projects to have 1,000 installations. The program expenses are expected to be a net total of \$6,826,012 as detailed in Schedule C-2(A).

Program Accomplishments: From January through July 2010, Energy Select experienced a net reduction of 99 participants. Although installations continue to occur at a steady pace, removals associated with customers dropping their landline phones, and, customers replacing HVAC equipment with systems utilizing variable or multi-speed compressors are occurring at a slightly higher rate. Diligent work continues to develop solutions to these issues. A new version of equipment compatible with variable or multi-speed compressors will be available for installation in January 2011. In addition, work continues with the company's ongoing AMI deployment. This integration will provide an alternative to the current dependence on land line telephone service for equipment communication.

Program Fiscal Expenditures: There were projected expenses of \$3,966,832 for the period January through July 2010 with actual expenses of \$3,753,788. This results in a deviation of \$213,044 or 5.4% under budget.

Program Progress Summary: As of July 2010, there are 8,851
participating customers.

Schedule C-5(A) Page 22 of 36

Program Description and Progress

Program Title: Energy Select Lite Program

Program Description: This program will be a separate and complementary program offering to the existing Energy Select program. Energy Select Lite provides for expanded price responsive load management program participation from residential customers who do not meet the participation standards for Energy Select. The Energy Select Lite program does not require land-line telephone service and will be available to multi-family customers. The program is an interactive energy management system which allows residential customers to program their central heating and cooling system to automatically respond to varying prices of electricity depending upon the time of day, day of week and season, in relation to the Company's cost of producing or purchasing energy.

<u>Program Projections</u>: For the period January 2011 through December 2011, the Company expects 600 program participants. Expenses of \$597,861 are projected for this program in 2011 as detailed in Schedule C-2(A).

Program Accomplishments: N/A - New

Program Fiscal Expenditures: N/A - New

Schedule C-5(A) Page 23 of 36

Program Description and Progress

Program Title: Self-Install Energy Efficiency Program

<u>Program Description</u>: This program promotes the purchase and installation of ENERGY STAR rated appliances, lighting and other self-installed energy saving measures for residential customers. The program focuses on increasing customer awareness of the benefits of energy efficient technologies and products through customer education, retail partnerships, promotional distribution of compact fluorescent light bulbs (CFLs), on-line store, energy audits and seasonal promotional campaigns.

<u>Program Projections</u>: Expenses of \$715,295 are projected for this program in 2011 as detailed in Schedule C-2(A). For the period January 2011 through December 2011, the Company expects to implement the efficiency measures included in this program for:

| Program | Annual # Projected Participants (2011) |
|-------------------------------|--|
| ENERGY STAR Refrigerator | 2,000 |
| ENERGY STAR Freezer | 400 |
| ENERGY STAR Window A/C | 300 |
| ENERGY STAR Clothes Washer | 1,500 |
| CFL | 150,000 |

Program Accomplishments: N/A - New

Program Fiscal Expenditures: N/A - New

Schedule C-5(A) Page 24 of 36

Program Description and Progress

Program Title: Refrigerator Recycling Program

<u>Program Description</u>: This program is intended to eliminate inefficient or extraneous refrigerators in an environmentally safe manner and produce cost-effective long-term energy and peak demand savings in the residential sector. The objective of the program is to increase customer awareness of the economic and environmental costs associated with running in-efficient, older appliances in a household, and to provide eligible customers with free refrigerator and freezer pick-up services in addition to a cash incentive.

<u>Program Projections</u>: For the period January 2011 through December 2011, the Company expects 1,750 program participants. Expenses of \$430,659 are projected for this program in 2011 as detailed in Schedule C-2(A).

Program Accomplishments: N/A - New

Program Fiscal Expenditures: N/A - New

Schedule C-5(A) Page 25 of 36

Program Description and Progress

Program Title: Commercial/Industrial Audit

Program Description: This program is designed to provide professional advice to our existing commercial and industrial customers on how to reduce, and make the most efficient use of, energy. This program covers from the smallest commercial customer, requiring only a walk-through survey, to the use of computer programs which will simulate several design options for very large energy intensive customers. The program is designed to include semi-annual and annual follow-ups with the customer to verify any conservation measures installed and to reinforce the need to continue with more conservation efforts. Customers may participate by requesting a basic Energy Analysis Audit (EAA) provided through either an on-site survey or a direct mail survey. A more comprehensive analysis can be provided by conducting a Technical Assistance Audit (TAA).

<u>Program Projections</u>: For the period January 2011 through December 2011, the Company expects to conduct 600 audits and incur expenses totaling \$1,049,335.

<u>Program Accomplishments</u>: During the January through July 2010 period, actual results were 318 audits. The total projection for 2010 is 500 audits.

<u>Program Fiscal Expenditures</u>: Forecasted expenses were \$393,705 for the first seven months of 2010 compared to actual expenses of \$363,811 for a deviation of \$29,894 or 7.6% under budget.

<u>Program Progress Summary</u>: A total of 19,715 audits have been completed since the program's inception.

Schedule C-5(A) Page 26 of 36

Program Description and Progress

Program Title: Commercial HVAC Retrocommissioning Program

Program Description: This program offers basic retrocommissioning at a reduced cost for qualifying installations of existing commercial and industrial customers. It is designed to diagnose the performance of the HVAC cooling unit(s) operating in commercial buildings with the support of an independent computerized quality control process and make improvements to the system to bring its full efficiency. This program includes air cooled and water cooled equipment - identified as A/C, heat pump, direct expansion (DX) or geothermal cooling and heating.

<u>Program Projections</u>: For the period January 2011 through December 2011, the Company expects 400 program participants. Expenses of \$274,329 are projected for this program in 2011 as detailed in Schedule C-2(A).

Program Accomplishments: N/A - New

Program Fiscal Expenditures: N/A - New

Schedule C-5(A) Page 27 of 36

Program Description and Progress

Program Title: Commercial Building Efficiency Program

Program Description: This program is designed as an umbrella efficiency program for existing commercial and industrial customers to encourage the installation of eligible high-efficiency equipment as a means of reducing energy and demand. The goal of the program is to increase awareness and customer demand for high-efficiency, energy-saving equipment; increase availability and market penetration of energy efficient equipment; and contribute toward long-term energy savings and peak demand reductions. These goals will be accomplished through multiple options including HVAC efficiency upgrades, heat pump water heater installations, ceiling/roof insulation improvements, window film installation, interior lighting improvements, commercial occupancy sensors and commercial reflective roof installations.

<u>Program Projections</u>: Expenses of \$489,092 are projected for this program in 2011 as detailed in Schedule C-2(A). For the period January 2011 through December 2011, the Company expects to implement the efficiency measures included in this program for:

| Program | Annual Projections | | | | | | | |
|-------------------|--------------------|--|--|--|--|--|--|--|
| | (2011) | | | | | | | |
| Commercial HVAC | 300 tons of | | | | | | | |
| | installed HVAC | | | | | | | |
| Commercial | 175 tons of | | | | | | | |
| Geothermal Heat | installed | | | | | | | |
| Pump | Geothermal HVAC | | | | | | | |
| Heat Pump Water | 1 installation | | | | | | | |
| Heater | | | | | | | | |
| Ceiling/Roof | 55,130 square feet | | | | | | | |
| Insulation | of installed | | | | | | | |
| | insulation | | | | | | | |
| Window Film | 16,353 square feet | | | | | | | |
| | of installed | | | | | | | |
| | window film | | | | | | | |
| Commercial | 75 kW of lighting | | | | | | | |
| Interior Lighting | reduction | | | | | | | |
| Commercial | 30 kW of lighting | | | | | | | |
| Interior Lighting | reduction | | | | | | | |
| (LED) | | | | | | | | |
| Commercial | 500 installed | | | | | | | |

Program Fiscal Expenditures: N/A - New

Schedule C-5(A) Page 29 of 36

Program Description and Progress

Program Title: HVAC Occupancy Sensor

<u>Program Description</u>: This program is intended to help manage energy consumption and reduce energy waste in hotel rooms by providing hotel owners in Gulf Power's service area the opportunity to automatically control temperature settings in hotel rooms when the rooms are unoccupied.

<u>Program Projections</u>: For the period January 2011 through December 2011, the Company projects installation of 150 sensors. Expenses of \$24,771 are projected for this program in 2011 as detailed in Schedule C-2(A).

Program Accomplishments: N/A - New

Program Fiscal Expenditures: N/A - New

Schedule C-5(A)
Page 30 of 36

Program Description and Progress

Program Title: High Efficiency Motor Program

<u>Program Description</u>: This program is designed to encourage commercial and industrial customers to install premiumefficiency motors in new or existing facilities. The objective is to reduce demand and energy associated with electric motors by encouraging the replacement of worn out, inefficient motors with high efficiency motors.

<u>Program Projections</u>: Expenses of \$52,414 are projected for this program in 2011 as detailed in Schedule C-2(A). For the period January 2011 through December 2011, the Company projects installation of 4,325 HP of energy efficient motors.

Program Accomplishments: N/A - New

Program Fiscal Expenditures: N/A - New

Schedule C-5(A) Page 31 of 36

Program Description and Progress

Program Title: Food Service Efficiency Program

Program Description: This program encourages the installation of ENERGY STAR qualified or equivalent energy efficient commercial and industrial food service equipment. The objective of the program is to reduce energy consumption and demand as well as operating costs for the customer through the use of qualified food service equipment including convection ovens, fryers, griddles, steamers, holding cabinets and ice machines.

<u>Program Projections</u>: Expenses of \$43,770 are projected for this program in 2011 as detailed in Schedule C-2(A). For the period January 2011 through December 2011, the Company expects to implement the efficiency measures included in this program for:

| Program | Annual Projections (2011) |
|-----------------|---------------------------|
| Convection Oven | 3 |
| Fryer | 3 |
| Griddle | 1 |
| Steamer | 0 |
| Holding Cabinet | 6 |
| Ice Machine | 12 |

Program Accomplishments: N/A - New

Program Fiscal Expenditures: N/A - New

Schedule C-5(A) Page 32 of 36

Program Description and Progress

Program Title: Commercial/Industrial Custom Incentive

<u>Program Description</u>: This program is designed to establish the capability and process to offer advanced energy services and energy efficient end-user equipment to Commercial/Industrial customers. These energy services include comprehensive audits, design, and construction of energy conservation projects. Specifically, projects covered under this program would be demand reduction or efficiency improvement retrofits that are beyond the scope of other programs.

<u>Program Projections</u>: For the period January 2011 through December 2011, the Company expects at the meter reductions of 1,200,000 kWh, 391 winter kW and 391 summer kW resulting from this program. Expenses of \$100,875 are projected for this program in 2011 as detailed in Schedule C-2(A).

Program Accomplishments: N/A - New

Program Fiscal Expenditures: N/A - New

Schedule C-5(A) Page 33 of 36

Program Description and Progress

Program Title: Renewable Energy

Program Description: The Renewable Energy Program promotes the deployment of demand-side renewable technologies through a portfolio of four programs. These programs include providing capital to supplement deployment of PV systems up to 10 kW in public education facilities (Solar for Schools), offering PV rebates and solar thermal water heating (STWH) rebates structured similarly to the state's current program administered by the Florida Energy Climate Commission (FECC) and facilitating the installation of STWH systems in low-income housing units.

<u>Program Projections</u>: Expenses of \$778,546 are projected for this program in 2011 as detailed in Schedule C-2(A). For the period January 2011 through December 2011, the Company expects the following results:

- Solar for Schools PV equipment to support one school in a county served by Gulf Power
- Solar PV (residential and commercial) 46 participants projected
- Solar Thermal Water Heating 115 participants projected
- Solar Thermal Water Heating for Low Income 15 installations projected

Program Accomplishments: N/A - New

Program Fiscal Expenditures: N/A - New

Schedule C-5(A) Page 34 of 36

Program Description and Progress

Program Title: Conservation Demonstration and Development

Program Description: A package of conservation programs was approved by the FPSC in Order No. 23561 for Gulf Power Company to explore and to pursue research, development, and demonstration projects designed to promote energy efficiency and conservation. This program serves as an umbrella program for the identification, development, demonstration and evaluation of new or emerging end-use technologies.

Program Accomplishments:

McDonald's Geothermal Project - This is the first full Geothermal HVAC fast food restaurant to be constructed within Gulf Power Company's service area. The objective of this project is to demonstrate the energy and electrical demand benefits of this geothermal restaurant system as compared to other like restaurants operated by the same owner in the same geographic location. Additional benefits of developing a hot water consumption profile for this restaurant will be obtained within this project. Data collection for one year began January, 2008 and a final report was submitted September 10, 2010.

UWF BEST House - Gulf Power has entered into a partnership, along with a number of other donors, with the University of West Florida, located in Pensacola, Florida, to help build the BEST (Build Educate Sustain Technology) House. This is a demonstration house that will be used as an educational tool and resource for Northwest Florida.

The BEST House program's intent is to provide a home featuring energy-efficient, sustainable design techniques available to the median homebuilder and buyer of today. The 3,300 square foot, three-bedroom home is a study model featuring passive solar collectors, grey-water and rainwater collection systems, advanced insulation systems, a geothermal heat pump, whole-house ventilation, energy-efficient appliances and lighting, day-lighting, and sustainable building products. The most ambitious goal, however, is to make this an off-grid project with photovoltaic panels and a battery array substantial enough to supply all of the electrical power needed on site with an excess that can be sold.

Schedule C-5(A) Page 35 of 36

Gulf Power is acting as the primary Energy Consultant to all end uses and new technologies that will continue to be donated to this project. Gulf Power will pay for the purchase, installation and monitoring of equipment that will provide data on a wide variety of energy and water end uses.

General economic conditions affecting sponsor support and permitting problems have delayed construction of the BEST House. Construction of the garage/exposition center has been rescheduled to precede the main house to better track the national economic recovery projection. Despite the delays, all participants remain optimistic and enthusiastic about the completion and potential contributions of the BEST House.

Latest projections are for construction on the garage to be underway by October, 2010, with the main house under construction during first quarter 2011.

Electrode Boiler - This project will measure overall energy performance and verify operation of a new 3.4MW Electrode Boiler and two new 200HP natural gas boilers which produce steam for the Escambia County Jail. The Electrode Boiler is an emerging technology that has the potential, coupled with a time varying rate such as RTP, to produce steam very efficiently.

After a number of delays since its inception in 2005, the Electrode Boiler CDD Project was installed and made ready for operation in 2007. For various reasons, including newness of the technology, relative costs of electricity and natural gas, operator proficiency, etc., the County has not yet operated the boiler for any extended period of time. A final report on this project was submitted September 10, 2010.

Variable-Speed Pool Pump - Two residential pool pumping configurations will be monitored and data gathered to determine and compare the kW and kWh consumption of the existing, conventional pumps, relative to the more technologically advanced and energy-efficient variable-speed pumping technology. This data will be gathered for both pumps under normal, but varied, operational scenarios such as long-term water filtration and short-term pool maintenance.

Schedule C-5(A) Page 36 of 36

Monitoring of the conventional pumps began July, 2009, and monitoring of the variable-speed pumps began October, 2009. To date, monitoring results indicate significant kWh reduction potential and even larger kW reduction potential. A final report should be available by the end of first quarter, 2011.

Energy Select Electric Vehicle Project - In 2010, Gulf Power began conducting a demonstration project to obtain experience and collect data on a Plug-In Electric Hybrid Vehicle (PHEV). Of particular interest are the effects on the grid when charged at the premise of a customer on the Energy Select (CPP) rate schedule. The data collected is intended to include energy flows, operational characteristics and costs. The vehicle being used in the demonstration project is a Toyota Prius.

This project should continue through 2010, with a final report to be submitted in 2011.

Program Fiscal Expenditures: Program expenses were forecasted at \$107,502 for the period January through July 2010 compared to actual expenses of \$44,388 for a deviation of \$63,114 or 58.7% under budget. Project expenses were as follows: Electrode Boiler, \$5,528; McDonald's Geothermal, \$5,528; UWF BEST House, \$5,528; Variable-Speed Pool Pump, \$5,528; Energy Select Vehicle, \$22,276.

Schedule C-5(B) Page 1 of 16

Program Description and Progress

Program Title: Residential Energy Survey

Program Description: This program offers existing residential customers, and individuals and contractors building new homes, energy conservation advice that encourages the implementation of efficiency measures resulting in energy savings for the customer. Owners of existing homes may choose to have a Gulf Power representative conduct an on-site survey of their home, or they may opt to participate in either a mail-in or on-line interactive version of the survey known as the "Energy Check Up." Qualifying new home owners and contractors may request a pre-construction survey of their final construction plans. Regardless of the options chosen, these surveys provide customers with specific whole-house recommendations.

<u>Program Projections</u>: For the period January 2011 through December 2011, the Company expects to conduct 6,702 surveys and incur expenses totaling \$1,557,525.

<u>Program Accomplishments</u>: During the first seven months of 2010, 4,218 surveys were completed compared to the projection of 2,333 surveys for this period, a difference of 1,885 surveys. There were 1,519 more on-site, 43 more pre-construction and 323 more online/mail-in surveys than projected during this period. The revised projection for 2010 is 5,500 surveys.

<u>Program Fiscal Expenditures</u>: Actual expenses for January through July 2010 were \$680,080 compared to a budget of \$778,268 for the same period. This results in a difference of \$98,188 or 12.6% under budget.

Program Progress Summary: Since the approval of this program, Gulf Power Company has performed 168,720 residential energy surveys. This is a result of Gulf Power's promotional campaign to solicit energy surveys as well as the overall rapport established with its customers as the "energy experts" in Northwest Florida.

Schedule C-5(B)
Page 2 of 16

Program Description and Progress

Program Title: Residential Geothermal Heat Pump

<u>Program Description</u>: The objective of this program is to reduce the demand and energy requirements of new and existing residential customers through the promotion and installation of geothermal systems.

<u>Program Projections</u>: Gulf estimates the installation of 200 units during the 2011 period and expenses of \$433,995. Gulf Power Company's program includes promotion, rebates, education, training, and estimated heating and cooling savings for new and existing home customers.

<u>Program Accomplishments</u>: During the current recovery period, 35 geothermal heat pump units have been installed thus far. The total projection for 2010 is 100 units.

Program Fiscal Expenditures: For the first seven months of the 2010 recovery period, expenses were projected to be \$230,963 compared to actual expenses of \$132,914 for a deviation of \$98,049 or 42.5% below budget.

<u>Program Progress Summary</u>: To date, 2,533 units have been installed.

Schedule C-5(B)
Page 3 of 16

Program Description and Progress

Program Title: Energy Select

<u>Program Description</u>: The program is designed to provide the customer with a means of conveniently and automatically controlling and monitoring their energy purchases in response to prices that vary during the day and by season in relation to the Company's cost of producing or purchasing energy.

<u>Program Projections</u>: During the 2011 projection period, Gulf Power plans to have 1,000 installations. The program expenses are expected to be a net total of \$7,038,011 as detailed in Schedule C-2(B).

Program Accomplishments: From January through July 2010, Energy Select experienced a net reduction of 99 participants. Although installations continue to occur at a steady pace, removals associated with customers dropping their landline phones, and, customers replacing HVAC equipment with systems utilizing variable or multi-speed compressors are occurring at a slightly higher rate. Diligent work continues to develop solutions to these issues. A new version of equipment compatible with variable or multi-speed compressors will be available for installation in January 2011. In addition, work continues with the company's ongoing AMI deployment. This integration will provide an alternative to the current dependence on land line telephone service for equipment communication.

Program Fiscal Expenditures: There were projected expenses of \$3,966,832 for the period January through July 2010 with actual expenses of \$3,753,788. This results in a deviation of \$213,044 or 5.4% under budget.

<u>Program Progress Summary</u>: As of July 2010, there are 8,851 participating customers.

Schedule C-5(B) Page 4 of 16

Program Description and Progress

Program Title: Commercial/Industrial Energy Analysis

Program Description: This program is designed to provide professional advice to our existing commercial and industrial customers on how to reduce, and make the most efficient use of, energy. This program covers from the smallest commercial customer, requiring only a walk-through survey, to the use of computer programs which will simulate several design options for very large energy intensive The program is designed to include semi-annual customers. and annual follow-ups with the customer to verify any conservation measures installed and to reinforce the need to continue with more conservation efforts. Customers may participate by requesting a basic Energy Analysis Audit (EAA) provided through either an on-site survey or a direct mail survey. A more comprehensive analysis can be provided by conducting a Technical Assistance Audit (TAA).

<u>Program Projections</u>: For the period January 2011 through December 2011, the Company expects to conduct 300 audits and incur expenses totaling \$688,044.

<u>Program Accomplishments</u>: During the January through July 2010 period, actual results were 318 audits. The total projection for 2010 is 500 audits.

Program Fiscal Expenditures: Forecasted expenses were \$393,705 for the first seven months of 2010 compared to actual expenses of \$363,811 for a deviation of \$29,894 or 7.6% under budget.

<u>Program Progress Summary</u>: A total of 19,715 audits have been completed since the program's inception.

Schedule C-5(B)
Page 5 of 16

Program Description and Progress

Program Title: Good Cents Commercial Buildings

Program Description: This program is designed to educate commercial and industrial customers on the most cost-effective methods of designing new buildings and improving existing buildings. The program stresses efficient heating and cooling equipment, improved thermal envelope, operation and maintenance, lighting, cooking and water heating. Field representatives work with architects, engineers, consultants, contractors, equipment suppliers and building owners and occupants to encourage them to make the most efficient use of all energy sources and available technologies.

<u>Program Projections</u>: For the 2011 recovery period, Gulf expects to certify 180 Good Cents Buildings and incur expenses totaling \$611,430.

<u>Program Accomplishments</u>: Certification of 33 buildings has been achieved during January through July 2010. The total projection for 2010 is 180 buildings.

<u>Program Fiscal Expenditures</u>: Forecasted expenses for January through July 2010 were \$340,833 compared to actual expenses of \$292,240 for a deviation of \$48,593 or 14.3% under budget.

<u>Program Progress Summary</u>: A total of 9,311 commercial buildings have qualified for the Good Cents certification since the program was developed in 1977

Schedule C-5(B) Page 6 of 16

Program Description and Progress

Program Title: Commercial Geothermal Heat Pump

<u>Program Description</u>: The objective of this program is to reduce the demand and energy requirements of new and existing commercial/industrial customers through the promotion and installation of advanced and emerging geothermal systems.

Program Projections: Gulf estimates the installation of 20 units during the 2011 period and expenses of \$160,583. Gulf Power Company will promote these systems by providing: estimates of heating and cooling operating costs to commercial customers installing geothermal heat pumps in commercial facilities; \$400/ton incentive for commercial, full closed loop projects or \$200/ton for hybrid closed loop projects.

<u>Program Accomplishments</u>: During the January through July 2010 period, there was 1 unit installed. The total projection for 2010 is 20 units.

<u>Program Fiscal Expenditures</u>: Forecasted expenses for January through July, 2010 were \$89,840 compared to actual expenses of \$39,484 for a deviation of \$50,356 or 56.1% under budget.

Program Progress Summary: To date, 29 units have been installed.

Schedule C-5(B) Page 7 of 16

Program Description and Progress

Program Title: Energy Services

Program Description: The Energy Services program is designed to establish the capability and process to offer advanced energy services, and energy efficient end-use equipment, that is customized to meet the individual needs of large customers. Potential projects are evaluated on a case-by-case basis and must be cost effective to qualify for incentives or rebates. Types of projects covered under this program would include demand reduction or efficiency improvement retrofits, such as lighting (fluorescent and incandescent), motor replacements, HVAC retrofit (including geothermal applications), and new electro-technologies.

<u>Program Projections</u>: For the 2011 recovery period, Gulf projects at the meter energy reductions of 1,178,470 kWh, and at the meter demand reductions of 510 kW winter and 275 kW summer. Expenses are expected to total \$150,000.

<u>Program Accomplishments</u>: For the period January through July 2010, at the meter reductions of 77,000 kWh, 77 winter kW and 31 summer kW reductions were achieved. The total projection for 2010 includes at the meter energy reductions of 1,178,470 kWh, and at the meter demand reductions of 510 kW winter and 275 kW summer.

Program Fiscal Expenditures: Forecasted expenses for January through July 2010 were \$148,750 with \$58,480 in expenses incurred during this period for a deviation of \$90,270 or 60.7% under budget.

Program Progress Summary: Total reductions at the meter of 22,387,136 kWh, 4,762 kW winter and 6,421 kW summer reductions have been achieved since this program was initiated.

Schedule C-5(B)
Page 8 of 16

Program Description and Progress

Program Title: Renewable Energy

Program Description: The Renewable Energy Program is designed to encompass a variety of voluntary renewable and green energy programs under development by Gulf Power Company. The voluntary pricing options for customers will include, but not be limited to, EarthCents Solar (Photovoltaic Rate Rider) and the Solar for Schools program. Additionally, this program will include expenses necessary to prepare and implement a renewable energy pilot program utilizing landfill gas, wind, solar or other renewable energy sources.

Program Accomplishments:

EarthCents Solar (Photovoltaic (PV) Optional Rate Rider):
The PV Rate Rider is an optional rate rider in which
customers may purchase photovoltaic energy in 100-watt
blocks. The construction of the photovoltaic facility or
the purchase of power from photovoltaic facilities will
begin upon the attainment of sufficient commitments from
all participants across the Southern Company electric
system where the option is available and, as necessary,
after obtaining PSC approval. As of July 2010, 50
customers have signed up for 62 100-watt blocks of energy.

Solar for Schools: The principle objective of the Solar for Schools program is to implement solar education and demonstration projects, in conjunction with the Florida Solar Energy Center, at local educational facilities by means of voluntary contributions. The program also seeks to increase renewable energy and energy awareness among students, parents and contributors. Solar for Schools is a program that uses voluntary contributions to fund materials for energy education, permanent demonstration displays, rewards for science contests, and teacher education. Voluntary contributions are solicited from customers interested in renewable energy and/or helping to improve the quality of schools in the Gulf Power Company service area. Funds are collected through a "check-off" mechanism on the utility bill or through a direct contribution and accumulated in an interest bearing account. When contributions reach an adequate level, they are directed to an educational facility for implementation of various solar educational programs and for the installation of solar

Schedule C-5(B)
Page 9 of 16

equipment. Contributions are not used for administrative costs, program research or for promotion costs.

The Solar for Schools program has enabled Gulf Power to install a 4 kW PV solar system at each of the following institutions: the Junior Museum of Bay County in 2000, Meigs Middle School in Shalimar in 2003, West Florida High School of Advanced Technology in Pensacola in 2003, and Bay County High School in Panama City in 2004.

Gulf Power's new Solar for Schools program recently approved as part of the Renewable Programs filed in Gulf Power's 2010 Demand Side Management plan will replace this existing program and will no longer require voluntary customer contributions. Gulf Power is currently evaluating solar education and demonstration projects that will be funded with the existing voluntary customer contributions as we transition between programs.

Renewable Energy Initiative: Gulf continues to evaluate and develop renewable energy sources and offerings. During 2008, Gulf added resources to further evaluate several renewable energy generation options including landfill gas, biomass, municipal solid waste, and solar PV projects and to further evaluate opportunities for demand-side renewable energy programs as part of our renewable initiative. During 2009 and 2010, these resources provided needed support to facilitate the construction of the Perdido Bay Landfill Gas generation facility, which will be operational September 2010, erect a wind meteorological tower on Navarre Beach to collect coastal wind data and support wind energy education at a local school, manage and evaluate Gulf's Solar Thermal Water Heating pilot program, develop the renewable program offerings submitted as part of Gulf Power's 2010 Demand-Side Management Plan, and manage other aspects of Gulf Power's renewable energy initiative and offerings such as Net Metering, customer inquiries related to renewable energy, and renewable energy related data collection and analysis.

Program Fiscal Expenditures: Program expenses were forecasted at \$151,963 for the period January through July 2010 compared to actual expenses of \$105,504 for a deviation of \$46,459 or 30.6% under budget. Actual expenses were as follows: Solar for Schools, \$0; EarthCents Solar, \$6,438; and Renewable Energy Pilot initiatives, \$99,066.

Schedule C-5(B) Page 11 of 16

Program Description and Progress

Program Title: Solar Thermal Water Heating Program Pilot

Program Description: Gulf Power's Solar Thermal Water Heating Pilot Program was designed to gauge utility customer interest in, and acceptance of, the technology, as well as determine what economic incentives may be most effective in increasing the public's willingness to install the technology in their homes. During the pilot in 2009, Gulf offered a \$1,000 rebate payable to customers after a qualifying system was installed by the customer and inspected by Company personnel.

Program Fiscal Expenditures: Program expenses were forecasted at \$67,081 for the period January through July 2010 in anticipation of this program continuing as part of Gulf's DSM Plan (Docket 100154-EG) currently before the Commission for approval. Minimal actual expenses of \$4,000 were incurred to close out the 2009 pilot for a deviation of \$63,081 or 94.0% under budget.

Schedule C-5(B) Page 12 of 16

Program Description and Progress

Program Title: Energy Education Pilot Program

<u>Program Description</u>: The objective of the Energy Education program is to raise awareness of energy efficiency and conservation and to increase participation in conservation opportunities, including Gulf's existing and future energy efficiency and conservation programs. The Program consists of four components:

- 1. Consumer Awareness
- 2. School-Based Education
 - a. Science Teacher Training
 - b. Eighth Grade Instructional Assistance
- 3. Community-Based Education
- 4. Contractor Education

Program Projections: The Commission approved this pilot program for the year 2009 in Order No. PSC-08-0802-PAA-EG. During 2010, minimal expenses were incurred to maintain continuity anticipating a transition to the revised program included as part of Gulf's Residential Energy Audit and Education program included in our DSM plan (Docket 100154-EG) currently before the Commission for approval.

Program Accomplishments:

School-Based Education

The School-based Education component is a training program for middle school science teachers, as well as a resource for support materials to augment the teachers' energy-related lesson plans. Gulf has partnered with the non-profit National Energy Education Development (NEED) Project to provide training and materials customized to specific school and district needs in carrying out the Florida Department of Education's Sunshine State Standards for Science.

Classroom: For the 2010-11 school year, Gulf supplied curriculum and activities in more than six different energy-related subjects ranging from energy sources to energy conservation and school energy management to 25 elementary, middle and high school classrooms. Each class also received two hands-on experiments kits - one with energy efficiency and conservation projects and one with solar energy projects - to complement the curriculum materials.

Schedule C-5(B) Page 13 of 16

Gulf Power employees also support students' energy education through classroom demonstrations and presentations upon request.

Teacher: For the 2010-11 school year, Gulf Power provided a two-day teacher workshop in conjunction with NEED instructors. 25 elementary, middle and high school science teachers and district curriculum coordinators participated in energy efficiency/conservation and solar energy training to earn continuing education credits.

Summer camp: During the summer of 2010, Gulf Power conducted two energy summer camps - one in partnership with a community low-income program and the other with a university - providing energy efficiency and renewable energy activities for almost 50 students.

Community-Based Education

Gulf Power employees continue to provide energy efficiency awareness in the communities we serve through presentations at events and civic meetings on a regular basis.

Program Fiscal Expenditures: Program expenses were forecasted at \$151,665 for the period January through July 2010 compared to actual expenses of \$69,688 for a deviation of \$81,977 or 54.1% under budget.

Schedule C-5(B) Page 14 of 16

Program Description and Progress

Program Title: Conservation Demonstration and Development

Program Description: A package of conservation programs was approved by the FPSC in Order No. 23561 for Gulf Power Company to explore and to pursue research, development, and demonstration projects designed to promote energy efficiency and conservation. This program serves as an umbrella program for the identification, development, demonstration and evaluation of new or emerging end-use technologies.

Program Accomplishments:

McDonald's Geothermal Project - This is the first full Geothermal HVAC fast food restaurant to be constructed within Gulf Power Company's service area. The objective of this project is to demonstrate the energy and electrical demand benefits of this geothermal restaurant system as compared to other like restaurants operated by the same owner in the same geographic location. Additional benefits of developing a hot water consumption profile for this restaurant will be obtained within this project. Data collection for one year began January, 2008 and a final report was submitted September 10, 2010.

UWF BEST House - Gulf Power has entered into a partnership, along with a number of other donors, with the University of West Florida, located in Pensacola, Florida, to help build the BEST (Build Educate Sustain Technology) House. This is a demonstration house that will be used as an educational tool and resource for Northwest Florida.

The BEST House program's intent is to provide a home featuring energy-efficient, sustainable design techniques available to the median homebuilder and buyer of today. The 3,300 square foot, three-bedroom home is a study model featuring passive solar collectors, grey-water and rainwater collection systems, advanced insulation systems, a geothermal heat pump, whole-house ventilation, energy-efficient appliances and lighting, day-lighting, and sustainable building products. The most ambitious goal, however, is to make this an off-grid project with photovoltaic panels and a battery array substantial enough to supply all of the electrical power needed on site with an excess that can be sold.

Schedule C-5(B)
Page 15 of 16

Gulf Power is acting as the primary Energy Consultant to all end uses and new technologies that will continue to be donated to this project. Gulf Power will pay for the purchase, installation and monitoring of equipment that will provide data on a wide variety of energy and water end uses.

General economic conditions affecting sponsor support and permitting problems have delayed construction of the BEST House. Construction of the garage/exposition center has been rescheduled to precede the main house to better track the national economic recovery projection. Despite the delays, all participants remain optimistic and enthusiastic about the completion and potential contributions of the BEST House.

Latest projections are for construction on the garage to be underway by October, 2010, with the main house under construction during first quarter 2011.

Electrode Boiler - This project will measure overall energy performance and verify operation of a new 3.4MW Electrode Boiler and two new 200HP natural gas boilers which produce steam for the Escambia County Jail. The Electrode Boiler is an emerging technology that has the potential, coupled with a time varying rate such as RTP, to produce steam very efficiently.

After a number of delays since its inception in 2005, the Electrode Boiler CDD Project was installed and made ready for operation in 2007. For various reasons, including newness of the technology, relative costs of electricity and natural gas, operator proficiency, etc., the County has not yet operated the boiler for any extended period of time. A final report on this project was submitted September 10, 2010.

Variable-Speed Pool Pump - Two residential pool pumping configurations will be monitored and data gathered to determine and compare the kW and kWh consumption of the existing, conventional pumps, relative to the more technologically advanced and energy-efficient variable-speed pumping technology. This data will be gathered for both pumps under normal, but varied, operational scenarios such as long-term water filtration and short-term pool maintenance.

Schedule C-5(B) Page 16 of 16

Monitoring of the conventional pumps began July, 2009, and monitoring of the variable-speed pumps began October, 2009. To date, monitoring results indicate significant kWh reduction potential and even larger kW reduction potential. A final report should be available by the end of first quarter, 2011.

Energy Select Electric Vehicle Project - In 2010, Gulf Power began conducting a demonstration project to obtain experience and collect data on a Plug-In Electric Hybrid Vehicle (PHEV). Of particular interest are the effects on the grid when charged at the premise of a customer on the Energy Select (CPP) rate schedule. The data collected is intended to include energy flows, operational characteristics and costs. The vehicle being used in the demonstration project is a Toyota Prius.

This project should continue through 2010, with a final report to be submitted in 2011.

Program Fiscal Expenditures: Program expenses were forecasted at \$107,502 for the period January through July 2010 compared to actual expenses of \$44,388 for a deviation of \$63,114 or 58.7% under budget. Project expenses were as follows: Electrode Boiler, \$5,528; McDonald's Geothermal, \$5,528; UWF BEST House, \$5,528; Variable-Speed Pool Pump, \$5,528; Energy Select Vehicle, \$22,276.

Program Description and Progress

Program Title: Home Energy Check

Program Description: The Home Energy Check program is a comprehensive residential energy evaluation (audit) program. The program provides Progress Energy Florida, Inc.'s (PEF) residential customers with an analysis of energy consumption and recommendations on energy efficiency improvements. It acts as a motivational tool to identify, evaluate, and inform consumers on cost effective energy saving measures. It also serves as the foundation of the residential Home Energy Improvement program and is a program requirement for participation. The Home Energy Check program allows customers to choose from seven types of energy audits: the free walk-thru, the paid walk-thru (\$15 charge), the energy rating (Energy Gauge), the mail-in audit, an internet option, a phone assisted audit, and a student audit.

Program Accomplishments for January 2009 through December 2009: 56,987 customers participated in Home Energy Checks.

Program Fiscal Expenditures for January 2009 through December 2009: Expenses for this program were \$6,611,330.

Program Progress Summary: The Home Energy Check will continue to inform and motivate consumers on cost effective energy efficiency improvements which result in implementation of energy efficiency measures.

DOCKET NO. 100002-EG PROGRESS ENERGY FLORIDA WITNESS: G.R. FREEMAN EXHIBIT NO: (GRF-1T) SCHEDULE CT-5 Page 2 of 17

Program Description and Progress

Program Title: Home Energy Improvement

Program Description: Home Energy Improvement is an umbrella program for residential customers with existing homes. This program combines thermal envelope efficiency improvements with upgraded equipment and appliances. The Home Energy Improvement program includes incentives for measures such as duct testing, duct leakage repair, attic insulation, injected wall insulation, replacement windows, window film, reflective roofing, high efficiency heat pump replacing resistance heat, high efficiency heat pump replacing a heat pump, high efficiency A/C replacing A/C with non-electric heat, HVAC commissioning, plenum sealing, proper sizing and supplemental bonuses.

Program Accomplishments for January 2009 through December 2009: There were 44,491 implementations under this program.

Program Fiscal Expenditures for January 2009 through December 2009: Expenses for this program were \$7,365,747.

Program Progress Summary: This program will continue to be offered to residential customers through the Home Energy Check to provide opportunities for improving the energy efficiency of existing homes.

DOCKET NO. 100002-EG PROGRESS ENERGY FLORIDA WITNESS: G.R. FREEMAN EXHIBIT NO: (GRF-1T) SCHEDULE CT-5 Page 3 of 17

Program Description and Progress

Program Title: Residential New Construction

Program Description: The Home Advantage Program promotes energy-efficient construction which exceeds residential building codes. Information, education, and consultation are provided to homebuilders, contractors, realtors and home buyers on energy-related issues and efficiency measures. This program is designed to encourage single, multi, and manufactured home builders to build energy efficient homes by encouraging a whole house performance view including the installation of climate effective windows, reflective roof materials, upgraded insulation, conditioned space air handler placement, energy recovery ventilation, and highly efficient HVAC equipment. Incentives are awarded to the builder based on the level of efficiency they choose.

Program Accomplishments for January 2009 through December 2009: There were 9,502 measures implemented through this program.

Program Fiscal Expenditures for January 2009 through December 2009: Expenses for this program were \$1,896,238.

Program Progress Summary: This program is tied to the building industry. Economic forces will influence the number of homes built during this period. Participation in new construction efficiency measures has declined due to the weakening of the economy and building industry.

DOCKET NO. 100002-EG PROGRESS ENERGY FLORIDA WITNESS: G.R. FREEMAN EXHIBIT NO: (GRF-1T) SCHEDULE CT-5 Page 4 of 17

Program Description and Progress

Program Title: Low-Income Weatherization Assistance Program

Program Description: The program goal is to integrate PEF's DSM program measures with the Department of Community Affairs (DCA) and local weatherization providers to deliver energy efficiency measures to low-income families. Through this partnership, Progress Energy Florida will assist local weatherization agencies by providing energy educational materials and financial incentives to weatherize the homes of low-income families.

Program Accomplishments for January 2009 through December 2009: There were 983 measure implementations in the 2009 program.

Program Fiscal Expenditures for January 2009 through December 2009: Expenses for this program were \$102,701.

Program Progress Summary: To promote the delivery of this efficiency program, PEF participated in state-wide agency meetings held for all participating weatherization assistance program agencies. PEF also conducts individual meetings with weatherization providers and other low income providers throughout PEF's territory to encourage participation in LIWAP and energy efficiency.

Program Description and Progress

Program Title: Energy Management (Residential & Commercial)

Program Description: The Load Management (Energy Wise) Program is a voluntary program that incorporates direct radio control of selected customer equipment to reduce system demand during winter and summer peak capacity periods and/or emergency conditions by temporarily interrupting selected customer appliances for specified periods of time. Customers have a choice of interruptible appliance options and receive a credit on their monthly electric bills depending on the options selected and their monthly kWh usage.

Program Accomplishments for January 2009 through December 2009: During this period 8,009 customers were added to the program.

Program Fiscal Expenditures for January 2009 through December 2009: Program expenditures during this period were \$26,683,548.

Program Progress Summary: As of December 31, 2009 there were 367,615 customers participating in the Load Management (Energy Wise) program.

Program Description and Progress

Program Title: Business Energy Check

Program Description: The Business Energy Check is an audit for non-residential customers. Several audit options are available. The free audit provides a no-cost energy audit for non-residential facilities and can be completed at the facility by an auditor or online by the business customer. The paid audit provides a more thorough energy analysis for non-residential facilities. This program acts as a motivational tool to identify, evaluate, and inform consumers on cost-effective energy saving measures for their facility. It serves as the foundation of, and is a requirement for participation in the Better Business Program.

Program Accomplishments for January 2009 through December 2009: There were 3,109 customers who participated in this program.

Program Fiscal Expenditures for January 2009 through December 2009: Expenses for this program were \$2,477,462.

Program Progress Summary: The Business Energy Check continues to inform and motivate business customers on cost-effective energy efficiency improvements which result in implementation of energy efficiency measures. The program is required for participation in most of the company's other DSM Business incentive programs.

DOCKET NO. 100002-EG PROGRESS ENERGY FLORIDA WITNESS: G.R. FREEMAN EXHIBIT NO: (GRF-1T) SCHEDULE CT-5 Page 7 of 17

Program Description and Progress

Program Title: Better Business

Program Description: This umbrella efficiency program provides incentives to existing commercial and industrial customers for energy-efficient products and applications such as heating, air conditioning, motors, roof insulation upgrade, duct leakage and repair, window film, demand-control ventilation, lighting, occupancy sensors, green roof, cool roof, high efficiency energy recovery ventilation, compressed air, and HVAC optimization.

Program Accomplishments for January 2009 through December 2009: There were 1,800 implementations under this program.

Program Fiscal Expenditures for January 2009 through December 2009: Expenses for this program were \$2,203,437.

Program Progress Summary: This program will continue to be offered to commercial customers through the Business Energy Check to provide opportunities for improving the energy efficiency of existing facilities.

DOCKET NO. 100002-EG PROGRESS ENERGY FLORIDA WITNESS: G.R. FREEMAN EXHIBIT NO: (GRF-1T) SCHEDULE CT-5 Page 8 of 17

Program Description and Progress

Program Title: Commercial/Industrial New Construction

Program Description: This is an umbrella efficiency program for new commercial and industrial facilities. This program provides information, education, and advice on energy-related issues and efficiency measures by involvement early in the building's design process. With the exception of ceiling insulation upgrade, duct test and leakage repair, HVAC steam cleaning and roof top HVAC unit recommissioning, the Commercial and Industrial New Construction program provides incentives for the same efficiency measures listed in the Better Business program for existing buildings.

Program Accomplishments for January 2009 through December 2009: There were 191 program completions in 2009.

Program Fiscal Expenditures for January 2009 through December 2009: Expenses for this program were \$615,445.

Program Progress Summary: This program is tied to the building industry. Economic forces will affect the number of new commercial facilities built during this period and the resulting success of this program.

DOCKET NO. 100002-EG PROGRESS ENERGY FLORIDA WITNESS: G.R. FREEMAN EXHIBIT NO: (GRF-1T) SCHEDULE CT-5 Page 9 of 17

Program Description and Progress

Program Title: Innovation Incentive

Program Description: Significant conservation efforts that are not supported by other Progress Energy programs can be encouraged through the Innovation Incentive program. Major equipment replacement or other actions that substantially reduce PEF peak demand requirements are evaluated to determine their impact on Progress Energy's system. Incentives are provided for customer-specific demand and energy conservation projects on a case-by-case basis, where cost-effective to all PEF customers. To be eligible for incentives, projects must reduce or shift a minimum of 10 kW of peak demand.

Program Accomplishments for January 2009 through December 2009: There were a total of three projects initiated in 2009. Each of these projects are currently being evaluated to determine incentive eligibility.

Program Fiscal Expenditures for January 2009 through December 2009: Expenses for this program were \$21,939.

Program Progress Summary: This program continues to target specialized, customer specific energy efficiency measures not covered through the company's other DSM programs.

DOCKET NO. 100002-EG PROGRESS ENERGY FLORIDA WITNESS: G.R. FREEMAN EXHIBIT NO: (GRF-1T) SCHEDULE CT-5 Page 10 of 17

Program Description and Progress

Program Title: Standby Generation

Program Description: Progress Energy Florida provides an opportunity for commercial customers to voluntarily operate their on-site generators during times of system peak. Participants receive an incentive per kW available, as well as a kWh supplement for runtime during times of system peak.

Program Accomplishments for January 2009 through December 2009: There were 32 new accounts added to the program during this period.

Program Fiscal Expenditures for January 2009 through December 2009: Expenses for this program were \$2,564,990.

Program Progress Summary: A total of 215 accounts are currently participating in this incentive program.

Program Description and Progress

Program Title: Interruptible Service Program

Program Description: The Interruptible Service program is a rate tariff which allows PEF to switch off electrical service to customers during times of capacity shortages. The signal to operate the automatic switch on the customer's service is activated by the Energy Control Center. In return for this electric interruption, customers receive a monthly rebate on their kW demand charge.

Program Accomplishments for January 2009 through December 2009: There were 3 new participants added to the program under the IS-2 tariff during this period.

Program Fiscal Expenditures for January 2009 through December 2009: Expenses for this program were \$17,661,877.

Program Progress Summary: The program currently has 149 active participants including 126 IS-1 participants, 21 IS-2 accounts, and 2 SECI- IS participants. The original program (filed as the IS-1 tariff) is no longer cost-effective under the Commission approved test and was closed to new participants on April 16, 1996. Existing participants were grandfathered into the program. New participants are placed on the IS-2 tariff.

DOCKET NO. 100002-EG PROGRESS ENERGY FLORIDA WITNESS: G.R. FREEMAN EXHIBIT NO: (GRF-1T) SCHEDULE CT-5 Page 12 of 17

Program Description and Progress

Program Title: Curtailable Service Program

Program Description: Curtailable Service is a dispatchable DSM program in which customers contract to curtail or shut down a portion of their load during times of capacity shortages. The curtailment is done voluntarily by the customer when notified by PEF. In return for this cooperation, the customer receives a monthly rebate for the curtailable portion of their load.

Program Accomplishments for January 2009 through December 2009: There were no new participants added to this program in 2009.

Program Fiscal Expenditures for January 2009 through December 2009: Expenses for this program were \$746,753.

Program Progress Summary: The program currently has 6 participants including 4 CS-1 customers and 2 CS-2 customers. The original program (filed as the CS-1 tariff) is no longer cost-effective under the Commission approved test and was closed to new participants on April 16, 1996. Existing participants were grandfathered into the program. New participants are placed on the CS-2 tariff.

Program Description and Progress

Program Title: Technology Development

Program Description: This program allows PEF to undertake certain development and demonstration projects which have promise to become cost-effective conservation and energy efficiency programs.

Program Accomplishments for January 2009 through December 2009:

Several research and development projects continued and/or launched in 2009.

- Installed the first small-scale wind turbine associated with a FECC grant
- Advanced DSM-Smart Grid vision through research on customer behavior modification and awareness
- Installed DSM controlled charging infrastructure to support the Plug-in Hybrid Electric Vehicle (PHEV) smart charging research initiative
- Continued battery storage technology analysis by installing two Li-Ion batteries associated with the Renewable SEEDS project
- Partnered with the University of South Florida to design an automated controls and web management pilot to evaluate energy saving potential associated with a facility on campus
- Partnered with Stetson University to begin initial monitoring of a geothermal HVAC system
- Enhanced commercial solar water heating research to include restaurants, firehouse, and vocational school
- Partnered with EPRI and other research organizations to evaluate energy efficiency, energy storage, and alternative energy / innovative technologies

Program Fiscal Expenditures for January 2009 through December 2009: Expenses for this program were \$ 622,171.

Program Progress Summary:

In 2009 PEF continued the mission of helping our customers use energy responsibly, expand the use of renewable resources, and aggressively pursue energy technologies. Research managed under the Technology Development program provided significant input in the development of programs associated with the 2009 DSM goals filing. Examples include demand response enhancements, solar PV and water heating

Program Title: Technology Development (continued)

Program Description and Progress

initiatives, and customer behavior modification and awareness. Additional studies on geothermal, facility control automation, and battery storage will continue to be developed in the hopes of creating future program opportunities. Associated with a FECC grant, the first small-scale wind turbine was installed, which will provide an opportunity to develop a demand and energy profile of the renewable energy production. Initial results continue to reveal challenges for wind energy production in Florida. These challenges may result in necessary revisions to the project scope for the remaining two years of the grant. Electric transportation continues to maintain rapid development. Progress Energy has installed two DSM controlled charging stations and has partnered with Gridpoint to evaluate the use of three vehicles. This research will support the development of both control infrastructure and other behavior modifications to encourage off-peak charging. Another transformational technology in Smart Grid promises to provide many new demand and energy saving opportunities. Smart Grid research includes evaluation of advanced meters, communication and control technology, as well as customer acceptance.

Program Description and Progress

Program Title: Qualifying Facility

Program Description: Power is purchased from qualifying cogeneration and small power production facilities.

Program Accomplishments for January, 2009 through December, 2009: PEF executed a contract with FB Energy (60 MW) to purchase renewable capacity in 2009. Progress Energy Florida also executed amendments to the Biomass Gas & Electric (45 MW) contract and Vision Power (40 MW) contract in 2009. Progress Energy Florida will continue to negotiate with potential Qualifying Facilities and restructure existing contracts when opportunities arise.

Program Fiscal Expenditures for January, 2009 through December, 2009: Expenses for this program were \$662,362.

Program Progress Summary:

The total MW of qualifying facility capacity is approximately 682 MW with another 280 MW of future qualifying facility capacity under contract.

Program Description and Progress

Program Title: Renewable Energy Program

Program Description: This program consists of two measures that are designed to encourage the installation of renewable energy systems.

Solar Water Heater with EnergyWise: This measure encourages residential customers to install a solar thermal water heating system. The customer must have whole house electric cooling, electric water heating, and electric heating to be eligible for this program.

Solar Photovoltaics with EnergyWise (SolarWise for Schools): This measure promotes environmental stewardship and renewable energy education through the installation of solar energy systems at schools within Progress Energy Florida's service territory. Customers participating in the Winter-Only EnergyWise or Year-Round EnergyWise Program can elect to donate their monthly credit toward the Solar Photovoltaics with EnergyWise Fund.

All proceeds collected from participating customers, and their associated monthly credits, will be used to promote photovoltaics and renewable energy educational opportunities.

Program Accomplishments for January, 2009 through December, 2009: There were 2658 customers that participated in the Solar Water Heater with Energy Wise and 1324 customers participating in our SolarWise for Schools program in 2009.

Program Fiscal Expenditures for January, 2009 through December, 2009: Expenses for this program were \$807,798.

Program Progress Summary: This program will continue to be offered to residential customers to encourage the use of solar water heating systems and to promote environmental stewardship and renewable energy education. Total enrollment is 3,038 for Solar Water Heaters and 1,306 for SolarWise for Schools.

Program Title: Neighborhood Energy Saver

DOCKET NO. 100002-EG PROGRESS ENERGY FLORIDA WITNESS: G.R. FREEMAN EXHIBIT NO: (GRF-1T) SCHEDULE CT-5 Page 17 of 17

Program Description and Progress

Program Description: The Neighborhood Energy Saver Program is designed to assist low-income families with escalating energy costs. The goal of this program is to implement a comprehensive package of electric conservation measures at no cost to eligible customers. Additionally, we will endeavor to educate the participating families to better manage their energy usage through efficiency techniques and practices.

Program Accomplishments for January, 2009 through December, 2009: There were 2,236 customers who participated in the Neighborhood Energy Saver program.

Program Fiscal Expenditures for January, 2009 through December, 2009: Expenses for this program were \$990,124.

Program Progress Summary: This program will continue to be offered to low-income neighborhoods in PEF's service territories through 2014.

Program Description and Progress

Program Title: Home Energy Check

Program Description: The Home Energy Check program is a comprehensive residential energy evaluation (audit) program. The program provides Progress Energy Florida, Inc.'s (Progress Energy) residential customers with an analysis of energy consumption and recommendations on energy efficiency improvements. It acts as a motivational tool to identify, evaluate, and inform consumers on cost effective energy saving measures. Home Energy Check serves as the foundation of the residential Home Energy Improvement Program and it is a program requirement for participation. There are six types of energy audits: the free walk-through, the more comprehensive paid walk-through (\$15 charge), the energy rating (Energy Gauge), the mail-in audit, a web-based audit and a phone assisted audit.

Program Projections for January 2011 through December 2011: It is estimated that 57,000 customers will participate in this program during the projection period.

Program Fiscal Expenditures for January 2011 through December 2011: Expenses for this program are projected to be \$9,302,419.

Program Progress Summary: As of July 31, 2010 there have been 37,966 customers that have participated in this program. Participation in this program was influenced by tax credits, rising energy costs, and vendor incentives and is not projected to continue at this rate. The Home Energy Check will continue to inform and motivate consumers on cost effective energy efficiency improvements which result in implementation of energy efficiency measures.

DOCKET NO. 100002-EG PROGRESS ENERGY FLORIDA WITNESS: FREEMAN EXHIBIT NO: (GRF-1PA-1) SCHEDULE C-5 PAGE 2 of 18

Program Description and Progress

Program Title: Home Energy Improvement

Program Description: Home Energy Improvement is an umbrella program for residential customers with existing homes. This program combines thermal envelope efficiency improvements with upgraded equipment and appliances. The Home Energy Improvement program includes incentives for measures such as: duct testing, duct leakage repair, attic insulation, injected wall insulation, replacement windows, window film, reflective roofing, high efficiency heat pump replacing resistance heat, high efficiency heat pump replacing a heat pump, high efficiency A/C replacing A/C with non-electric heat, HVAC commissioning, plenum sealing, proper sizing and supplemental bonuses.

Program Projections for January 2011 through December 2011: It is estimated that 48,965 completions will be performed in this program during the projection period.

Program Fiscal Expenditures for January 2011 through December 2011: Expenses for this program are projected to be \$14,150,624.

Program Progress Summary: As of July 31, 2010 there have been 34,973 measure installations that have taken place as a result of this program. Participation in this program was influenced by tax credits, rising energy costs, and vendor incentives and is not projected to continue at this subscription rate. This program will continue to be offered to residential customers to provide opportunities for improving the energy efficiency of existing homes.

DOCKET NO. 100002-EG PROGRESS ENERGY FLORIDA WITNESS: FREEMAN EXHIBIT NO: (GRF-1PA-1) SCHEDULE C-5 PAGE 3 of 18

Program Description and Progress

Program Title: Residential New Construction (Home Advantage)

Program Description: The Home Advantage Program promotes energy-efficient construction, which exceeds the Florida Energy Code. Information, education, and consultation are provided to homebuilders, contractors, realtors and home buyers on energy-related issues and efficiency measures. This program is designed to encourage single family, multi-family, and manufactured home builders to build more energy efficiently by encouraging a whole house performance view including the installation of climate effective windows, reflective roof materials, upgraded insulation, conditioned space air handler placement, energy recovery ventilation, highly efficient HVAC equipment and quality installation. Incentives are awarded to the builder based on the level of efficiency they choose.

Program Projections for January 2011 through December 2011: It is estimated that 11,270 homes representing 200 builders will participate in this program during the projection period.

Program Fiscal Expenditures for January 2011 through December 2011: Expenses for this program are projected to be \$2,532,296.

Program Progress Summary: As of July 31, 2010 there have been 6,574 measure installations that have taken place as a result of this program. This program is tied to the building industry. Economic forces will dictate the number of homes built during this period.

DOCKET NO. 100002-EG PROGRESS ENERGY FLORIDA WITNESS: FREEMAN EXHIBIT NO: (GRF-1PA-1) SCHEDULE C-5 PAGE 4 of 18

Program Description and Progress

Program Title: Neighborhood Energy Saver Program

Program Description: The Neighborhood Energy Saver Program was designed to assist low-income families with escalating energy costs. The goal is to implement a comprehensive package of electric conservation measures in the homes of eligible customers. In addition to the installation of these measures, an important component of this program is educating families on energy efficiency techniques and best practices to help them change their behavior and empower them to control their energy usage.

Program Projections January 2011 through December 2011: It is estimated that 3,000 households will participate in the Neighborhood Energy Saver Program.

Program Fiscal Expenditures for January 2011 through December 2011: Expenses for this program are projected to be \$1,249,927.

Program Progress Summary: As of July 31, 2010 there have been 2,030 households that have participated in this program.

DOCKET NO. 100002-EG PROGRESS ENERGY FLORIDA WITNESS: FREEMAN EXHIBIT NO: (GRF-1PA-1) SCHEDULE C-5 PAGE 5 of 18

Program Description and Progress

Program Title: Low-Income Weatherization Assistance Program

Program Description: The program goal is to integrate Progress Energy's DSM program measures with the Department of Community Affairs (DCA) and local weatherization providers to deliver energy efficiency measures to low-income families. Through this partnership, Progress Energy will assist local weatherization agencies by providing energy education materials and financial incentives to weatherize the homes of low-income families.

Program Projections for January 2011 through December 2011: It is estimated that 1,500 measures provided by 9 agencies will be installed during 2011.

Program Fiscal Expenditures for January 2011 through December 2011: Expenses for this program are projected to be \$308,209.

Program Progress Summary: As of July 31, 2010 there have been 1,268 measures that have participated in this program. Historically, participation is reduced in the latter part of the year.

DOCKET NO. 100002-EG PROGRESS ENERGY FLORIDA WITNESS: FREEMAN EXHIBIT NO: (GRF-1PA-1) SCHEDULE C-5 PAGE 6 of 18

Program Description and Progress

Program Title: Energy Management (Residential & Commercial)

Program Description: The Energy Management program is a voluntary program that incorporates direct radio control of selected customer equipment to reduce system demand during winter and summer peak capacity periods and/or emergency conditions by temporarily interrupting selected customer appliances for specified periods of time. Customers have a choice of options and receive a credit on their monthly electric bills, depending on the options selected and their monthly kWh usage. The commercial program was closed to new participants as of May 12, 2000.

The current direct load control (DLC) one-way communications and appliance switching infrastructure that allows Progress Energy to shed an estimated 700 MW of winter peak demand is becoming obsolete. Major infrastructure maintenance and system upgrades are necessary to continue to ensure the availability of the existing 700 MW of direct load control capacity to support additional capacity in the future.

Progress Energy's existing system is a one-way communications (paging) direct load control program with no direct feedback. It provides Progress Energy with about 700 MW of Winter load reduction and 300 MW of Summer load. Close to 400,000 customers currently participate in the program requiring over 520,000 control switches, the majority being original analog switches.

Progress Energy is continuing with the systemic change out of antiquated equipment and replacement with a digital two-way communications based system that will be compatible with future Smart Grid technologies. Progress Energy believes the appropriate "Smart Grid" compatible technology will greatly enhance the ability to maintain the existing levels of load under control.

DOCKET NO. 100002-EG PROGRESS ENERGY FLORIDA WITNESS: FREEMAN EXHIBIT NO: (GRF-1PA-1) SCHEDULE C-5 PAGE 7 of 18

Program Description and Progress

Progress Energy will continue with a scaled deployment to transition the existing one-way residential direct load control infrastructure to a "Smart Grid" compatible system.

Program Projections for January 2011 through December 2011: During this period we anticipate adding 7,700 new participants.

Program Fiscal Expenditures for January 2011 through December 2011: Program expenditures during this period are projected to be \$23,392,522.

Program Progress Summary: As of July 31, 2010 there are 372,479 customers participating in the Energy Management program. Through July 31, 2010, a total of 4,310 new participant installations have been completed.

DOCKET NO. 100002-EG PROGRESS ENERGY FLORIDA WITNESS: FREEMAN EXHIBIT NO: (GRF-1PA-1) SCHEDULE C-5 PAGE 8 of 18

Program Description and Progress

Program Title: Renewable Energy Saver Program

Program Description: This program consists of two areas that are designed to encourage the installation of renewable energy systems.

Solar Water Heater with EnergyWise: This measure encourages residential customers to install a solar thermal water heating system. The customer must have whole house electric cooling, electric water heating, and electric heating to be eligible for this program. Pool heaters and photovoltaic systems do not qualify. In order to qualify for this incentive, the heating, air conditioning, and water heating systems must be on the Energy Management program and the solar thermal system must provide a minimum of 50% of the water heating load.

Solar Photovoltaics with EnergyWise: This measure promotes environmental stewardship and renewable energy education through the installation of solar energy systems at schools within Progress Energy service territory. Customers participating in the Winter-Only EnergyWise or Year-Round EnergyWise Program can elect to donate their monthly credit toward the Solar Photovoltaics with EnergyWise Fund. The fund will accumulate associated participant credits for a period of 2 years, at which time the customer may elect to renew for an additional 2 years. All proceeds collected from participating customers, and their associated monthly credits, will be used to promote photovoltaics and renewable energy educational opportunities.

Program Projections January 2011 through December 2011: It is estimated that 1,700 customers will participate in this program during the projection period.

Program Fiscal Expenditures for January 2011 through December 2011: Expenses for this program are projected to be \$1,201,962.

Program Progress Summary: As of July 31, 2010 there are a total of 1,250 customers participating in the Solar Photovoltaics with EnergyWise and an additional 3,712 customers participating in the Solar Water Heater with EnergyWise program. This program is tied to the solar industry. Economic forces will dictate the number of solar systems installed during this period.

DOCKET NO. 100002-EG PROGRESS ENERGY FLORIDA WITNESS: FREEMAN EXHIBIT NO: (GRF-1PA-1) SCHEDULE C-5 PAGE 9 of 18

Program Description and Progress

Program Title: Business Energy Check

Program Description: The Business Energy Check is an audit for non-residential customers. Several options are available. The free audit provides a no-cost energy audit for non-residential facilities and can be completed at the facility by an auditor, or online by the business customer. The paid audit provides a more thorough energy analysis for non-residential facilities. This program acts as a motivational tool to identify, evaluate, and inform consumers on cost effective energy saving measures for their facility. It serves as the foundation of the Better Business Program and is a requirement for participation.

Program Projections for January 2011 through December 2011: It is estimated that 2,900 customers will participate in this program during the projection period.

Program Fiscal Expenditures for January 2011 through December 2011: Expenses for this program are projected to be \$3,348,136.

Program Progress Summary: As of July 31, 2010 there have been 1,978 customers that have participated in this program. The Business Energy Check will continue to inform and motivate consumers on cost effective energy efficiency improvements which result in implementation of energy efficiency measures.

DOCKET NO. 100002-EG PROGRESS ENERGY FLORIDA WITNESS: FREEMAN EXHIBIT NO: (GRF-1PA-1) SCHEDULE C-5 PAGE 10 of 18

Program Description and Progress

Program Title: Better Business

Program Description: This umbrella efficiency program provides incentives to existing commercial and industrial customers for heating, air conditioning, motors, roof insulation upgrade, duct leakage and repair, window film, demand-control ventilation, lighting, occupancy sensors, green roof, cool roof coating, high efficiency energy recovery ventilation, compressed air, and HVAC optimization.

Program Projections for January 2011 through December 2011: It is estimated that 2,115 measure installations will take place as a result of this program during the projection period.

Program Fiscal Expenditures for January 2011 through December 2011: Expenses for this program are projected to be \$2,666,365.

Program Progress Summary: As of July 31, 2010 there have been 1,252 measure installations that have taken place as a result of this program. This program will continue to provide commercial customers with opportunities for improving the energy efficiency of existing facilities.

DOCKET NO. 100002-EG PROGRESS ENERGY FLORIDA WITNESS: FREEMAN EXHIBIT NO: (GRF-1PA-1) SCHEDULE C-5 PAGE 11 of 18

Program Description and Progress

Program Title: Commercial/Industrial New Construction

Program Description: This program is the umbrella efficiency program for new Commercial and Industrial facilities. This program provides information, education, and advice on energy-related issues and efficiency measures by involvement early in the building's design process. With the exception of ceiling insulation upgrade, duct test and leakage repair, HVAC steam cleaning and roof top HVAC unit recommissioning, the Commercial and Industrial New Construction program provides incentives for the same efficiency measures listed in the Better Business program for existing buildings.

Program Projections for January 2011 through December 2011: It is estimated that 185 measure participants will participate during the projection period.

Program Fiscal Expenditures for January 2011 through December 2011: Expenses for this program are projected to be \$987,545.

Program Progress Summary As of July 31, 2010 there have been 163 measure participants that have taken place as a result of this program. This program is tied to the building industry. Participation in this program is expected to decline due to economic pressures and external environment. Economic forces will dictate the number of commercial facilities built during this period.

DOCKET NO. 100002-EG PROGRESS ENERGY FLORIDA WITNESS: FREEMAN EXHIBIT NO: (GRF-1PA-1) SCHEDULE C-5 PAGE 12 of 18

Program Description and Progress

Program Title: Innovation Incentive

Program Description: Significant conservation efforts that are not supported by other Progress Energy programs can be encouraged through Innovation Incentive. Major equipment replacement or other actions that substantially reduce Progress Energy peak demand requirements are evaluated to determine their impact on Progress Energy's system. Incentives are provided for customer-specific demand and energy conservation projects on a case-by-case basis, where cost-effective to all Progress Energy customers. To be eligible, projects must reduce or shift a minimum of 10 kW of peak demand. Examples include refrigeration equipment replacement, PTAC chemical cleaning, and heat pipe technology for HVAC units.

Program Projections for January 2011 through December 2011: It is estimated that 2 customers will participate in the program during the projection period.

Program Fiscal Expenditures for January 2011 through December 2011: Expenses for this program are projected to be \$43,706.

Program Progress Summary: As of July 31, 2010 there have been 0 customers that have participated in this program. This program continues to recognize specialized, customer specific energy efficiency measures not covered through the company's other DSM programs.

DOCKET NO. 100002-EG PROGRESS ENERGY FLORIDA WITNESS: FREEMAN EXHIBIT NO: (GRF-1PA-1) SCHEDULE C-5 PAGE 13 of 18

Program Description and Progress

Program Title: Standby Generation

Program Description: Progress Energy provides an incentive for customers who, when notified by Progress Energy, voluntarily operate their on-site generation during times of system peak.

Program Projections for January 2011 through December 2011: It is estimated that 12 new installations will be completed during the projection period.

Program Fiscal Expenditures for January 2011 through December 2011: Expenses for this program are projected to be \$2,861,001.

Program Progress Summary: As of July 31, 2010 there are 237 active accounts with 61 customers participating in this program. It is estimated that active accounts will grow to 257 by the end of 2010.

DOCKET NO. 100002-EG PROGRESS ENERGY FLORIDA WITNESS: FREEMAN EXHIBIT NO: (GRF-1PA-1) SCHEDULE C-5 PAGE 14 of 18

Program Description and Progress

Program Title: Interruptible Service

Program Description: The Interruptible Service rate is a dispatchable DSM program in which customers contract to allow Progress Energy to switch off electrical service to customers during times of capacity shortages. In return for permitting interruption to their service, the customers receive a monthly credit on their bill based on their monthly peak demand.

Program Projections for January 2011 through December 2011: 1 new account is estimated to sign up during the period.

Program Fiscal Expenditures for January 2011 through December 2011: Expenses for this program are projected to be \$19,755,142.

Program Progress Summary: As of July 31, 2010, this program has 149 active accounts with 77 customers participating The original program filed as the IS-1 tariff is no longer cost-effective under the Commission approved test and was closed on April 16, 1996. Customers who were participating in this program at the time of closure were grandfathered into the program, and any new participants are placed on the IS-2 tariff.

Program Description and Progress

Program Title: Curtailable Service

Program Description: The Curtailable Service rate is a dispatchable DSM program in which customers contract to curtail or shut down a portion of their electric load during times of capacity shortages. The curtailment is managed by the customer when notified by Progress Energy. In return for this cooperation, the customer receives a monthly rebate for the curtailable portion of their load.

Program Projections for January 2011 through December 2011: 1 new participant is expected during the projection period.

Program Fiscal Expenditures for January 2011 through December 2011: Expenses for this program are projected to be \$843,275.

Program Progress Summary: As of July 31, 2010, this program has 5 active accounts with 3 customers participating. The original program filed as the CS-1 tariff is no longer cost-effective under the Commission approved test and was closed on April 16, 1996. Existing participants were grandfathered into the program. New participants are placed on the newer CS-2 or CS-3 tariffs.

Program Description and Progress

Program Title: Technology Development

Program Description: This program allows Progress Energy to undertake certain development and demonstration projects which provide support for the development of cost-effective demand reduction energy efficiency and alternative energy programs.

Program Projections for January 2011 through December 2011: Progress Energy has developed a Technology Roadmap to ensure effective development and implementation of Demand Side Management programs. The roadmap contains four focus areas: energy efficiency, alternative energy, state-of-the-art power systems, and electric transportation. Several research projects associated with these focus areas will continue and/or launch in 2011:

- On-line efficiency control in facilities
- Solar photovoltaic energy production and system impact
- Small-scale wind assessment
- Renewable SEEDS (solar PV with advanced energy storage)
- Mobile energy storage (ZnBr flow battery)
- Smart charging for electric transportation
- Truck stop electrification (TSE) load profile
- Electric Power Research Institute (EPRI) programs (energy storage, Intelligrid, electric transportation infrastructure)

Program Fiscal Expenditures for January 2011 through December 2011: Expenses for this program are projected to be \$826,215.

Program Progress Summary: Several research projects achieved significant milestones in 2010; examples include:

• Small-scale wind: Associated with a State of Florida Renewable Energy and Energy-Efficient Technologies Grant, Progress Energy is evaluating small-scale wind energy technologies. After completing a wind resource analysis, a 2.4kW wind turbine was installed at the Okahumpka Service Plaza for the Florida Turnpike in January 2010. Results to date indicate approximately 3.4 kWh per day of energy production. Additional

DOCKET NO. 100002-EG PROGRESS ENERGY FLORIDA WITNESS: FREEMAN EXHIBIT NO: (GRF-1PA-1) SCHEDULE C-5 PAGE 17 of 18

Program Description and Progress

wind resource mapping is currently underway with the results expected to support the decision for future installations.

- DOE L-Prize: Associated with a DOE grant, Progress Energy began testing LED dimmable light bulbs. Results to date indicate potential energy savings with enhanced customer satisfaction when compared to incandescent bulbs. A second customer survey will be conducted upon conclusion of the study.
- Renewable SEEDS: The solar PV with advanced battery storage project continued with the installation of a lithium ion (Li-ion) battery. The Li-ion battery system demonstrated a 73.5% round trip efficiency and is currently being modeled to identify opportunities for system support applications.
- PHEV smart charging: Two PHEV charging stations with direct load control management were installed at Progress Energy's Lake Mary office. These charging stations provide a research and demonstration platform to prepare for electric vehicle charging demand, and are supporting the development for a residential demand response program appliance addition.

In addition to the projects noted, we will continue to pursue other promising new technology projects and participation in industry research that support our technology roadmap and the pursuit of cost-effective demand reduction, energy efficiency, and alternative energy programs.

Program Description and Progress

Program Title: Home Energy Check

Program Description: The Home Energy Check program is a comprehensive residential energy evaluation (audit) program. The program provides Progress Energy Florida, Inc.'s (Progress Energy) residential customers with an analysis of energy consumption and recommendations on energy efficiency improvements. It acts as a motivational tool to identify, evaluate, and inform consumers on cost effective energy saving measures. Home Energy Check serves as the foundation of the residential Home Energy Improvement Program and it is a program requirement for participation. There are six types of energy audits: the free walk-through, the more comprehensive paid walk-through (\$15 charge), the energy rating (Energy Gauge), the mail-in audit, a web-based audit and a phone assisted audit.

Program Projections for January 2011 through December 2011: It is estimated that 57,000 customers will participate in this program during the projection period.

Program Fiscal Expenditures for January 2011 through December 2011: Expenses for this program are projected to be \$9,302,419.

Program Progress Summary: As of July 31, 2010 there have been 37,966 customers that have participated in this program. Participation in this program was influenced by tax credits, rising energy costs, and vendor incentives and is not projected to continue at this rate. The Home Energy Check will continue to inform and motivate consumers on cost effective energy efficiency improvements which result in implementation of energy efficiency measures.

DOCKET NO. 100002-EG PROGRESS ENERGY FLORIDA WITNESS: FREEMAN EXHIBIT NO: (GRF-1PA-2) SCHEDULE C-5 PAGE 2 of 23

Program Description and Progress

Program Title: Home Energy Improvement

Program Description: Home Energy Improvement is an umbrella program for residential customers with existing homes. This program combines thermal envelope efficiency improvements with upgraded equipment and appliances. The Home Energy Improvement program includes incentives for measures such as: duct testing, duct leakage repair, attic insulation, injected wall insulation, replacement windows, window film, reflective roofing, high efficiency heat pump replacing resistance heat, high efficiency heat pump replacing a heat pump, high efficiency A/C replacing A/C with non-electric heat, HVAC commissioning, plenum sealing, proper sizing and supplemental bonuses.

Program Projections for January 2011 through December 2011: It is estimated that 48,965 completions will be performed in this program during the projection period.

Program Fiscal Expenditures for January 2011 through December 2011: Expenses for this program are projected to be \$14,150,624.

Program Progress Summary: As of July 31, 2010 there have been 34,973 measure installations that have taken place as a result of this program. Participation in this program was influenced by tax credits, rising energy costs, and vendor incentives and is not projected to continue at this subscription rate. This program will continue to be offered to residential customers to provide opportunities for improving the energy efficiency of existing homes.

DOCKET NO. 100002-EG PROGRESS ENERGY FLORIDA WITNESS: FREEMAN EXHIBIT NO: (GRF-1PA-2) SCHEDULE C-5 PAGE 3 of 23

Program Description and Progress

Program Title: Residential New Construction (Home Advantage)

Program Description: The Home Advantage Program promotes energy-efficient construction, which exceeds the Florida Energy Code. Information, education, and consultation are provided to homebuilders, contractors, realtors and home buyers on energy-related issues and efficiency measures. This program is designed to encourage single family, multi-family, and manufactured home builders to build more energy efficiently by encouraging a whole house performance view including the installation of climate effective windows, reflective roof materials, upgraded insulation, conditioned space air handler placement, energy recovery ventilation, highly efficient HVAC equipment and quality installation. Incentives are awarded to the builder based on the level of efficiency they choose.

Program Projections for January 2011 through December 2011: It is estimated that 11,270 homes representing 200 builders will participate in this program during the projection period.

Program Fiscal Expenditures for January 2011 through December 2011: Expenses for this program are projected to be \$2,532,296.

Program Progress Summary: As of July 31, 2010 there have been 6,574 measure installations that have taken place as a result of this program. This program is tied to the building industry. Economic forces will dictate the number of homes built during this period.

DOCKET NO. 100002-EG PROGRESS ENERGY FLORIDA WITNESS: FREEMAN EXHIBIT NO: (GRF-1PA-2) SCHEDULE C-5 PAGE 4 of 23

Program Description and Progress

Program Title: Neighborhood Energy Saver Program

Program Description: The Neighborhood Energy Saver Program was designed to assist low-income families with escalating energy costs. The goal is to implement a comprehensive package of electric conservation measures in the homes of eligible customers. In addition to the installation of these measures, an important component of this program is educating families on energy efficiency techniques and best practices to help them change their behavior and empower them to control their energy usage.

Program Projections January 2011 through December 2011: It is estimated that 3,000 households will participate in the Neighborhood Energy Saver Program.

Program Fiscal Expenditures for January 2011 through December 2011: Expenses for this program are projected to be \$1,249,927.

Program Progress Summary: As of July 31, 2010 there have been 2,030 households that have participated in this program.

Program Description and Progress

Program Title: Low-Income Weatherization Assistance Program

Program Description: The program goal is to integrate Progress Energy's DSM program measures with the Department of Community Affairs (DCA) and local weatherization providers to deliver energy efficiency measures to low-income families. Through this partnership, Progress Energy will assist local weatherization agencies by providing energy education materials and financial incentives to weatherize the homes of low-income families.

Program Projections for January 2011 through December 2011: It is estimated that 1,500 measures provided by 9 agencies will be installed during 2011.

Program Fiscal Expenditures for January 2011 through December 2011: Expenses for this program are projected to be \$308,209.

Program Progress Summary: As of July 31, 2010 there have been 1,268 measures that have been installed under this program.

DOCKET NO. 100002-EG PROGRESS ENERGY FLORIDA WITNESS: FREEMAN EXHIBIT NO: (GRF-1PA-2) SCHEDULE C-5 PAGE 6 of 23

Program Description and Progress

Program Title: Energy Management (Residential & Commercial)

Program Description: The Energy Management program is a voluntary program that incorporates direct radio control of selected customer equipment to reduce system demand during winter and summer peak capacity periods and/or emergency conditions by temporarily interrupting selected customer appliances for specified periods of time. Customers have a choice of options and receive a credit on their monthly electric bills, depending on the options selected and their monthly kWh usage. The commercial program was closed to new participants as of May 12, 2000.

The current direct load control (DLC) one-way communications and appliance switching infrastructure that allows Progress Energy to shed an estimated 700 MW of winter peak demand is becoming obsolete. Major infrastructure maintenance and system upgrades are necessary to continue to ensure the availability of the existing 700 MW of direct load control capacity to support additional capacity in the future.

Progress Energy's existing system is a one-way communications (paging) direct load control program with no direct feedback. It provides Progress Energy with about 700 MW of Winter load reduction and 300 MW of Summer load. Close to 400,000 customers currently participate in the program requiring over 520,000 control switches, the majority being original analog switches.

Progress Energy is continuing with the systemic change out of antiquated equipment and replacement with a digital two-way communications based system that will be compatible with future Smart Grid technologies. Progress Energy believes the appropriate "Smart Grid" compatible technology will greatly enhance the ability to maintain the existing levels of load under control.

DOCKET NO. 100002-EG PROGRESS ENERGY FLORIDA WITNESS: FREEMAN EXHIBIT NO: (GRF-1PA-2) SCHEDULE C-5 PAGE 7 of 23

Program Description and Progress

Progress Energy will continue with a scaled deployment to transition the existing one-way residential direct load control infrastructure to a "Smart Grid" compatible system.

Program Projections for January 2011 through December 2011: During this period we anticipate adding 7,700 new participants.

Program Fiscal Expenditures for January 2011 through December 2011: Program expenditures during this period are projected to be \$23,392,522.

Program Progress Summary: As of July 31, 2010 there are 372,479 customers participating in the Energy Management program. Through July 31, 2010, a total of 4,310 new participant installations have been completed.

DOCKET NO. 100002-EG PROGRESS ENERGY FLORIDA WITNESS: FREEMAN EXHIBIT NO: (GRF-1PA-2) SCHEDULE C-5 PAGE 8 of 23

Program Description and Progress

Program Title: Business Energy Check

Program Description: The Business Energy Check is an audit for non-residential customers. Several options are available. The free audit provides a no-cost energy audit for non-residential facilities and can be completed at the facility by an auditor, or online by the business customer. The paid audit provides a more thorough energy analysis for non-residential facilities. This program acts as a motivational tool to identify, evaluate, and inform consumers on cost effective energy saving measures for their facility. It serves as the foundation of the Better Business Program and is a requirement for participation.

Program Projections for January 2011 through December 2011: It is estimated that 2,900 customers will participate in this program during the projection period.

Program Fiscal Expenditures for January 2011 through December 2011: Expenses for this program are projected to be \$3,348,136.

Program Progress Summary: As of July 31, 2010 there have been 1,978 customers that have participated in this program. The Business Energy Check will continue to inform and motivate consumers on cost effective energy efficiency improvements which result in implementation of energy efficiency measures.

DOCKET NO. 100002-EG PROGRESS ENERGY FLORIDA WITNESS: FREEMAN EXHIBIT NO: (GRF-1PA-2) SCHEDULE C-5 PAGE 9 of 23

Program Description and Progress

Program Title: Better Business

Program Description: This umbrella efficiency program provides incentives to existing commercial and industrial customers for heating, air conditioning, motors, roof insulation upgrade, duct leakage and repair, window film, demand-control ventilation, lighting, occupancy sensors, green roof, cool roof coating, high efficiency energy recovery ventilation, compressed air, and HVAC optimization.

Program Projections for January 2011 through December 2011: It is estimated that 2,115 measure installations will take place as a result of this program during the projection period.

Program Fiscal Expenditures for January 2011 through December 2011: Expenses for this program are projected to be \$2,666,365.

Program Progress Summary: As of July 31, 2010 there have been 1,252 measure installations that have taken place as a result of this program. This program will continue to provide commercial customers with opportunities for improving the energy efficiency of existing facilities.

DOCKET NO. 100002-EG PROGRESS ENERGY FLORIDA WITNESS: FREEMAN EXHIBIT NO: (GRF-1PA-2) SCHEDULE C-5 PAGE 10 of 23

Program Description and Progress

Program Title: Commercial/Industrial New Construction

Program Description: This program is the umbrella efficiency program for new Commercial and Industrial facilities. This program provides information, education, and advice on energy-related issues and efficiency measures by involvement early in the building's design process. With the exception of ceiling insulation upgrade, duct test and leakage repair, HVAC steam cleaning and roof top HVAC unit recommissioning, the Commercial and Industrial New Construction program provides incentives for the same efficiency measures listed in the Better Business program for existing buildings.

Program Projections for January 2011 through December 2011: It is estimated that 185 measure participants will participate during the projection period.

Program Fiscal Expenditures for January 2011 through December 2011: Expenses for this program are projected to be \$987,545.

Program Progress Summary As of July 31, 2010 there have been 163 measure participants that have taken place as a result of this program. This program is tied to the building industry. Participation in this program is expected to decline due to economic pressures and external environment. Economic forces will dictate the number of commercial facilities built during this period.

SCHEDULE C-5
PAGE 11 of 23

Program Description and Progress

Program Title: Innovation Incentive

Program Description: Significant conservation efforts that are not supported by other Progress Energy programs can be encouraged through Innovation Incentive. Major equipment replacement or other actions that substantially reduce Progress Energy peak demand requirements are evaluated to determine their impact on Progress Energy's system. Incentives are provided for customer-specific demand and energy conservation projects on a case-by-case basis, where cost-effective to all Progress Energy customers. To be eligible, projects must reduce or shift a minimum of 10 kW of peak demand. Examples include refrigeration equipment replacement, PTAC chemical cleaning, and heat pipe technology for HVAC units.

Program Projections for January 2011 through December 2011: It is estimated that 2 customers will participate in the program during the projection period.

Program Fiscal Expenditures for January 2011 through December 2011: Expenses for this program are projected to be \$43,706.

Program Progress Summary: As of July 31, 2010 there have been 0 customers that have participated in this program. This program continues to recognize specialized, customer specific energy efficiency measures not covered through the company's other DSM programs.

DOCKET NO. 100002-EG PROGRESS ENERGY FLORIDA WITNESS: FREEMAN EXHIBIT NO: (GRF-1PA-2) SCHEDULE C-5 PAGE 12 of 23

Program Description and Progress

Program Title: Standby Generation

Program Description: Progress Energy provides an incentive for customers who, when notified by Progress Energy, voluntarily operate their on-site generation during times of system peak.

Program Projections for January 2011 through December 2011: It is estimated that 12 new installations will be completed during the projection period.

Program Fiscal Expenditures for January 2011 through December 2011: Expenses for this program are projected to be \$2,861,001.

Program Progress Summary: As of July 31, 2010 there are 237 active accounts with 61 customers participating in this program. It is estimated that active accounts will grow to 257 by the end of 2010.

Program Description and Progress

Program Title: Interruptible Service

Program Description: The Interruptible Service rate is a dispatchable DSM program in which customers contract to allow Progress Energy to switch off electrical service to customers during times of capacity shortages. In return for permitting interruption to their service, the customers receive a monthly credit on their bill based on their monthly peak demand.

Program Projections for January 2011 through December 2011: 1 new account is estimated to sign up during the period.

Program Fiscal Expenditures for January 2011 through December 2011: Expenses for this program are projected to be \$19,755,142.

Program Progress Summary: As of July 31, 2010, this program has 149 active accounts with 77 customers participating. The original program filed as the IS-1 tariff is no longer cost-effective under the Commission approved test and was closed on April 16, 1996. Customers who were participating in this program at the time of closure were grandfathered into the program, and any new participants are placed on the IS-2 tariff.

DOCKET NO. 100002-EG PROGRESS ENERGY FLORIDA WITNESS: FREEMAN EXHIBIT NO: (GRF-1PA-2) SCHEDULE C-5 PAGE 14 of 23

Program Description and Progress

Program Title: Curtailable Service

Program Description: The Curtailable Service rate is a dispatchable DSM program in which customers contract to curtail or shut down a portion of their electric load during times of capacity shortages. The curtailment is managed by the customer when notified by Progress Energy. In return for this cooperation, the customer receives a monthly rebate for the curtailable portion of their load.

Program Projections for January 2011 through December 2011: 1 new participant is expected during the projection period.

Program Fiscal Expenditures for January 2011 through December 2011: Expenses for this program are projected to be \$843,275.

Program Progress Summary: As of July 31, 2010, this program has 5 active accounts with 3 customers participating. The original program filed as the CS-1 tariff is no longer cost-effective under the Commission approved test and was closed on April 16, 1996. Existing participants were grandfathered into the program. New participants are placed on the newer CS-2 or CS-3 tariffs.

Program Description and Progress

Program Title: Solar Water Heating For Low Income Residential Customers

Program Description: The Solar Water Heating for the Low-income Residential Customers pilot is a custom renewable energy measure designed to assist low-income families with energy costs by incorporating a solar thermal water heating system in their residence while it is under construction. Progress Energy will collaborate with non-profit builders to provide low-income families with a residential solar thermal water heater. The solar thermal system will be provided at no cost to the non-profit builders or the residential participants.

Program Projections for January 2011 through December 2011: It is estimated that 30 new customers will participate in the Solar Water Heating For Low Income Residential Customers pilot during the projection period.

Program Fiscal Expenditures for January 2011 through December 2011: Expenses for this program are projected to be \$149,495.

Program Progress Summary: This is a new program that was filed in March, 2010, and is pending a consummating order for approval. Progress updates will be provided as the program matures in customer acceptance and implementation.

Program Title: Photovoltaic for Schools

Program Description: The Photovoltaic for Schools pilot is designed to assist schools with energy costs while promoting energy education. This program will provide participating public schools with new photovoltaic systems at no cost. These systems will be installed, owned, operated and maintained by Progress Energy for a period of 5 years, after which the school assumes ownership and system benefits.

Program Projections for January 2011 through December 2011: It is estimated that 11 new customers will participate in the Photovoltaic for Schools pilot during the projection period.

Program Fiscal Expenditures for January 2011 through December 2011: Expenses for this program are projected to be \$657,224.

Program Progress Summary: As of July 31, 2010 there are a total of 1,250 customers participating in this program. This program is tied to the solar industry. Economic forces will dictate the number of solar systems installed during this period. Modifications to this program (Renewable Energy Saver) have been filed in Progress Energy's Proposed DSM Plan filed March, 2010, and are pending a consummating order for approval.

Program Description and Progress

Program Title: Research and Demonstration

Program Description: The purpose of the Research and Demonstration pilot component is to research technology and establish R&D initiatives to support the development of renewable energy pilot programs. Demonstration projects will provide real-world field testing to assist in the development of these initiatives. The program will be limited to a targeted annual expenditure cap of 5% of the total Demand-Side Renewable Portfolio annual expenditures. All projects will be designed to support the development of future solar and renewable energy pilot programs.

Program Projections for January 2011 through December 2011: Program participation projections will evolve as individual technologies and R&D initiatives are identified and approved to participate in the program.

Program Fiscal Expenditures for January 2011 through December 2011: Expenses for this program are projected to be \$323,380.

Program Progress Summary: This is a new program that was filed in March, 2010, and is pending a consummating order for approval. Progress updates will be provided as the program matures in customer acceptance and implementation.

Program Description and Progress

Program Title: Technology Development

Program Description: This program allows Progress Energy to undertake certain development and demonstration projects which provide support for the development of cost-effective demand reduction energy efficiency and alternative energy programs.

Program Projections for January 2011 through December 2011: Progress Energy has developed a Technology Roadmap to ensure effective development and implementation of Demand Side Management programs. The roadmap contains four focus areas: energy efficiency, alternative energy, state-of-the-art power systems, and electric transportation. Several research projects associated with these focus areas will continue and/or launch in 2011:

- On-line efficiency control in facilities
- Solar photovoltaic energy production and system impact
- Small-scale wind assessment
- Renewable SEEDS (solar PV with advanced energy storage)
- Mobile energy storage (ZnBr flow battery)
- Smart charging for electric transportation
- Truck stop electrification (TSE) load profile
- Electric Power Research Institute (EPRI) programs (energy storage, Intelligrid, electric transportation infrastructure)

Program Fiscal Expenditures for January 2011 through December 2011: Expenses for this program are projected to be \$826,215.

Program Progress Summary: Several research projects achieved significant milestones in 2010; examples include:

• Small-scale wind: Associated with a State of Florida Renewable Energy and Energy-Efficient Technologies Grant, Progress Energy is evaluating small-scale wind energy technologies. After completing a wind resource analysis, a 2.4kW wind turbine was installed at the Okahumpka Service Plaza for the Florida Turnpike in January 2010. Results to date indicate approximately 3.4 kWh per day of energy production. Additional

DOCKET NO. 100002-EG PROGRESS ENERGY FLORIDA WITNESS: FREEMAN EXHIBIT NO: (GRF-1PA-2) SCHEDULE C-5 PAGE 22 of 23

Program Description and Progress

wind resource mapping is currently underway with the results expected to support the decision for future installations.

- DOE L-Prize: Associated with a DOE grant, Progress Energy began testing LED dimmable light bulbs. Results to date indicate potential energy savings with enhanced customer satisfaction when compared to incandescent bulbs. A second customer survey will be conducted upon conclusion of the study.
- Renewable SEEDS: The solar PV with advanced battery storage project continued with the installation of a lithium ion (Li-ion) battery. The Li-ion battery system demonstrated a 73.5% round trip efficiency and is currently being modeled to identify opportunities for system support applications.
- PHEV smart charging: Two PHEV charging stations with direct load control
 management were installed at Progress Energy's Lake Mary office. These charging
 stations provide a research and demonstration platform to prepare for electric vehicle
 charging demand, and are supporting the development for a residential demand response
 program appliance addition.

In addition to the projects noted, we will continue to pursue other promising new technology projects and participation in industry research that support our technology roadmap and the pursuit of cost-effective demand reduction, energy efficiency, and alternative energy programs.

CT-5 Page 1 of 1

TAMPA ELECTRIC COMPANY
Reconciliation and Explanation of
Difference Between Filing and FPSC Audit
For Months January 2009 through December 2009

The audit has not been completed as of the date of this filing.

Program Title:

Heating and Cooling Program

Program Description:

This is a residential conservation program designed to reduce weather-sensitive peaks by providing incentives for the installation of high efficiency heating and air conditioning equipment at existing residences.

Program Accomplishments:

January 1, 2009 to December 31, 2009

In this reporting period 3,529 units were installed.

Program Fiscal Expenditures:

January 1, 2009 to December 31, 2009

Actual expenses were \$609,865.

Program Progress Summary:

Through this reporting period 167,446 approved units

have been installed.

Program Title:

Prime Time

Program Description:

This is a residential load management program designed to directly control the larger loads in customers' homes such as air conditioning, water heating, electric space heating and pool pumps. Participating customers receive monthly credits on their electric bills. Per Commission Order No. PSC-05-0181-PAA-EG issued February 16, 2005, this

program is closed to new participants.

Program Accomplishments:

January 1, 2009 to December 31, 2009

There were 2,603 net customers that discontinued

participation during this reporting period.

Program Fiscal Expenditures:

January 1, 2009 to December 31, 2009

Actual expenses were \$6,324,692.

Program Progress Summary:

Through this reporting period there are 48,080

participating customers.

Program Title: <u>Energy Audits</u>

Program Description: These are on-site audits of residential, commercial

and industrial premises and residential customer assisted on-line and telephone surveys that instruct customers on how to use conservation measures and

practices to reduce their energy usage.

Program Accomplishments: <u>January 1, 2009</u> to <u>December 31, 2009</u>

Number of audits completed: Residential on-site - 8,681

Residential customer assisted - 1,905

Commercial on-site – 1,009

Program Fiscal Expenditures: <u>January 1, 2009</u> to <u>December 31, 2009</u>

Actual expenses were \$2,067,040.

Program Progress Summary: Through this reporting period 278,592 on-site audits

have been performed. Additionally, the company has processed 116,109 residential and commercial

customer assisted audits.

Program Title: <u>Cogeneration</u>

Program Description: This program encourages the development of cost-

effective commercial and industrial cogeneration facilities through the evaluation and administration of standard offers and the negotiation of contracts for

the purchase of firm capacity and energy.

Program Accomplishments: <u>January 1, 2009 to December 31, 2009</u>

The company continued communication and interaction with all present and potential customers.

Tampa Electric completed the development and publication of the 20-Year Cogeneration Forecast, reviewed proposed cogeneration opportunities for cost-effectiveness and answered data requests from existing cogenerators. The company also attended meetings as scheduled with cogeneration customer

personnel at selected facilities.

Program Fiscal Expenditures: <u>January 1, 2009</u> to <u>December 31, 2009</u>

Actual expenses were \$112,026.

Program Progress Summary: The total maximum generation by electrically

interconnected cogeneration during 2009 was 450

MW and 3,555 GWH.

The company continues interaction with current and potential cogeneration developers regarding on-going and future cogeneration activities. Currently there are 11 Qualifying Facilities with generation on-line in

Tampa Electric's service area.

Program Title:

Commercial Load Management

Program Description:

This is a load management program that achieves weather-sensitive demand reductions through load control of equipment at the facilities of firm

commercial customers.

Program Accomplishments:

January 1, 2009 to December 31, 2009

There were five net customers that discontinued

participation during this reporting period.

Program Fiscal Expenditures:

January 1, 2009 to December 31, 2009

Actual expenses were \$14,816.

Program Progress Summary:

Through this reporting period there is one

participating customer.

Program Title:

Commercial Lighting

Program Description:

This is a conservation program designed to reduce weather-sensitive peaks by encouraging investment in more efficient lighting technology in commercial

facilities.

Program Accomplishments:

January 1, 2009 to December 31, 2009

In this reporting period 140 customers received an

incentive.

Program Fiscal Expenditures:

January 1, 2009 to December 31, 2009

Actual program expenses were \$456,459.

Program Progress Summary:

Through this reporting period 1,297 customers have

received an incentive.

Program Title:

Standby Generator

Program Description:

This is a program designed to utilize the emergency generation capacity at firm commercial and industrial facilities in order to reduce weather-sensitive peak

demand.

Program Accomplishments:

January 1, 2009 to December 31, 2009

Five new customers were added during this reporting

period.

Program Fiscal Expenditures:

January 1, 2009 to December 31, 2009

Actual expenses were \$1,601,549.

Program Progress Summary:

Through this reporting period there are 84

participating customers.

Program Title:

Conservation Value

Program Description:

This is an incentive program for firm commercial and industrial customers that encourages additional investments in substantial demand shifting or demand

reduction measures.

Program Accomplishments:

January 1, 2009 to December 31, 2009

Two customers qualified for an incentive during this reporting period however installations are pending.

Program Fiscal Expenditures:

January 1, 2009 to December 31, 2009

Actual expenses were \$9,029.

Program Progress Summary:

Through this reporting period 31 customers have

qualified and received the appropriate incentive.

DOCKET NO. 100002-EG
FINAL ECCR 2009 TRUE-UP
EXHIBIT HTB-1, SCHEDULE CT-6, PAGE 9 OF 29

Pursuant to Docket No. 900885-EG, Commission Order No. 24276, issued March 25, 1991 for the purpose of approving Tampa Electric Company's Conservation Value Program, the company is filing the attached table. Specifically, the table provides incentive payments as well as other program costs incurred during the January 2009 through December 2009 period. The table format was filed with the Commission on April 23, 1991 in response to the aforementioned order requesting the program participation standards.

⁽¹⁾ Represents project evaluation and administration costs.

Program Title:

Duct Repair

Program Description:

This is a residential conservation program designed to reduce weather-sensitive peaks by offering incentives to encourage the repair of the air distribution system

in a residence.

Program Accomplishments:

January 1, 2009 to December 31, 2009

In this reporting period 9,772 customers have

participated.

Program Fiscal Expenditures:

January 1, 2009 to December 31, 2009

Actual expenses were \$1,783,889.

Program Progress Summary:

Through this reporting period 78,666 customers have

participated.

Program Title:

Renewable Energy Initiative

Program Description:

This is a program designed to assist in the delivery of renewable energy for the company's Renewable Energy Program. This specific effort provides funding for program administration, evaluation and market

research.

Program Accomplishments:

January 1, 2009 to December 31, 2009

Net customers added - 608

Net blocks of energy added – 684 One time blocks sold – 1,376

Program Fiscal Expenditures:

January 1, 2009 to December 31, 2009

Actual expenses were \$176,837.

Program Progress Summary:

Through this reporting period 2,858 customers are participating purchasing a total of 4,042 blocks of energy. Two new solar generating resources were added in 2009. The first resource was a 15 KW Photovoltaic ("PV") array at the Lowery Park Zoo and the second, a 10KW PV array at the Florida Aquarium.

Program Title:

Industrial Load Management

Program Description:

This is a load management program for large industrial customers with interruptible loads of 500 kW

or greater.

Program Accomplishments:

January 1, 2009 to December 31, 2009

No new customers qualified for participation during

this reporting period.

Program Fiscal Expenditures:

January 1, 2009 to December 31, 2009

Actual expenses were \$13,145,086.

Program Progress Summary:

This program was approved by the Commission in Docket No. 990037-EI, Order No. PSC-99-1778-FOF-EI, issued September 10, 1999. For 2008, assessments indicated an opportunity for customer participation; therefore, the associated GSLM 2 & 3 tariffs were opened to new participants.

Beginning May 2009, Tampa Electric transferred existing IS (non-firm) customers to a new IS (firm) rate schedule. These customers are now incented under GSLM-2 or GSLM-3 rate rider with expenses

recovered under the ECCR clause.

Program Title: DSM Research and Development (R&D)

Program Description: This is a five-year R&D program directed at end-use

technologies (both residential and commercial) not yet commercially available or where insufficient data exists for measure evaluations specific to central

Florida climate.

Program Accomplishments: <u>January 1, 2008</u> to <u>December 31, 2008</u>

See Program Progress Summary below.

Program Fiscal Expenditures: <u>January 1, 2008</u> to <u>December 31, 2008</u>

Actual expenses were \$183,394.

Program Progress Summary: For 2009, Tampa Electric began the implementation

of a Commercial General Service Price Responsive Load Management Pilot. The company has agreed to partner with the University of South Florida to assist in

the project.

| Program Title: | Common Expenses |
|------------------------------|--|

| Program Fiscal Expenditures: | January 1, 2009 to December 31, 2009 Actual expenses were \$448,336. |
| Program Progress Summary: | N/A |
| | |

Program Title:

Commercial Cooling

Program Description:

This is an incentive program to encourage the installation of high efficiency direct expansion (DX)

commercial air conditioning equipment.

Program Accomplishments:

January 1, 2009 to December 31, 2009

In this reporting period 245 units were installed.

Program Fiscal Expenditures:

January 1, 2009 to December 31, 2009

Actual expenses were \$72,159.

Program Progress Summary:

Through this reporting period 1,121 approved units

have been installed.

Program Title: <u>Energy Plus Homes</u>

Program Description: This is a program that encourages the construction of

new homes to be above the minimum energy efficiency levels required by the State of Florida Energy Efficiency Code for New Construction through the installation of high efficiency equipment and

building envelope options.

Program Accomplishments: <u>January 1, 2009 to December 31, 2009</u>

In this reporting period 257 homes qualified.

Program Fiscal Expenditures: January 1, 2009 to December 31, 2009

Actual expenses were \$144,082.

Program Progress Summary: Through this reporting period 297 approved homes

have participated.

Program Title:

Price Responsive Load Management

Program Description:

This program is designed to reduce weather sensitive peak loads by offering a multi-tiered rate structure. This rate structure is designed as an incentive for participating customers to reduce their electric demand during high cost or critical periods of generation.

Program Accomplishments:

January 1, 2009 to December 31, 2009

There were 517 net customers that were added

during this reporting period.

Program Fiscal Expenditures:

January 1, 2009 to December 31, 2009

Actual expenses were \$1,495,578.

Program Progress Summary:

Through this reporting period 674 customers are

Program Title:

Commercial Demand Response

Program Description:

This program is intended to help alter the company's system load curve by reducing summer and winter demand peaks. The company has contracted for a turn-key program that will induce commercial and industrial customers to reduce their demand for electricity in response to market signals. Reductions will be achieved through a mix of emergency backup generation, energy management systems, raising cooling set-points and turning off or dimming lights, signage, etc.

Program Accomplishments:

January 1, 2009 to December 31, 2009

In this reporting period 82 customers are participating.

Program Fiscal Expenditures:

January 1, 2009 to December 31, 2009

Actual expenses were \$2,669,022.

Program Progress Summary:

Through this reporting period 82 approved customers are participating.

Program Title:

Residential Building Envelope Improvement

Program Description:

This program is designed to save demand and energy by decreasing the load on residential air conditioning and heating ("HVAC") equipment. Eligible customers can receive incentives to add ceiling insulation, exterior wall insulation, window replacement and

window film.

Program Accomplishments:

January 1, 2009 to December 31, 2009

Number of installations completed:
Ceiling insulation installed – 1,558
Exterior wall insulation installed – 6
Window replacement installations – 702

Window film installations - 540

Program Fiscal Expenditures:

January 1, 2009 to December 31, 2009

Actual expenses were \$616,261.

Program Progress Summary:

Through this reporting period the following measures

have been installed:

Ceiling insulation – 83,415 Exterior wall insulation – 8 Window replacement – 976

Window film - 803

Program Title:

Commercial Building Envelope Improvement

Program Description:

This program is designed to save demand and energy by decreasing the load on air conditioning and heating ("HVAC") equipment. Eligible customers can receive incentives to add ceiling insulation, exterior wall

insulation and window film.

Program Accomplishments:

January 1, 2009 to December 31, 2009

Number of installations completed: Ceiling insulation installed – 4 Exterior wall insulation installed – 0 Window film installations – 27

Program Fiscal Expenditures:

January 1, 2009 to December 31, 2009

Actual expenses were \$21,067.

Program Progress Summary:

Through this reporting period the following measures

have been installed:

Ceiling insulation – 6 Exterior wall insulation – 0

Window film - 30

Program Title:

Educational Energy Awareness (Pilot)

Program Description:

This program is designed to save demand and energy by increasing customer awareness of available conservation measures and practices that can reduce their energy use. Tampa Electric will partner with schools within its service area at the third grade level to teach students the benefits of energy efficiency.

Program Accomplishments:

January 1, 2009 to December 31, 2009

In this reporting period Tampa Electric partnered with 19 local schools to present the pilot program to 7,860

students in 314 classes.

Program Fiscal Expenditures:

January 1, 2009 to December 31, 2009

Actual expenses were \$72,827.

Program Progress Summary:

Through this reporting period Tampa Electric partnered with 27 local schools to present the pilot program to 10,840 students in 463 classes. In addition, the program presentations generated 33

customer assisted audits.

Program Title:

Commercial Duct Repair

Program Description:

This is a commercial conservation program designed to reduce weather-sensitive peaks by offering incentives to encourage the repair of the air

distribution system in a facility.

Program Accomplishments:

January 1, 2009 to December 31, 2009

In this reporting period 1,185 customers have

participated in the program.

Program Fiscal Expenditures:

January 1, 2009 to December 31, 2009

Actual expenses were \$246,314.

Program Progress Summary:

Through this reporting period 1,237 customers have

Program Title:

Commercial Efficient Motors

Program Description:

This program is designed to encourage commercial/industrial customers to install premium-efficiency motors in new or existing facilities through incentives. The program is aimed at reducing the growth of peak demand and energy by encouraging customers to replace worn out, inefficient equipment with high efficiency equipment that exceeds minimum

product manufacturing standards.

Program Accomplishments:

January 1, 2009 to December 31, 2009

In this reporting period seven customers have

participated in the program.

Program Fiscal Expenditures:

January 1, 2009 to December 31, 2009

Actual expenses were \$413.

Program Progress Summary:

Through this reporting period seven customers have

Program Title:

Residential Low-Income Weatherization

Program Description:

This program is designed to save demand and energy by decreasing the energy consumption at a residence. Aimed at low-income customers, the following will be provided at no cost to qualified customers (where applicable).

- Eight Compact fluorescent lamps
- One water heater wrap
- Three low flow faucet aerators and two showerheads
- Window HVAC weatherstripping kit
- Wall plate thermometers
- HVAC filters
- Weatherstripping and caulkingCeiling insulation (up to R-19)

Program Accomplishments:

January 1, 2009 to December 31, 2009

There were 207 customers who participated in the

program during this period.

Program Fiscal Expenditures:

January 1, 2009 to December 31, 2009

Actual expenses were \$24,866.

Program Progress Summary:

Through this reporting period 333 customers have

Program Title:

Commercial Chillers

Program Description:

This is an incentive program to encourage the installation of high efficiency cooling equipment that exceeds minimum product manufacturing standards.

Program Accomplishments:

January 1, 2009 to December 31, 2009

There were 17 customers who participated in the

program during this period.

Program Fiscal Expenditures:

January 1, 2009 to December 31, 2009

Actual expenses were \$67,106.

Program Progress Summary:

Through this reporting period 20 customers have

Program Title:

Commercial Occupancy Sensors

Program Description:

This is an incentive program to encourage the

installation of occupancy sensors in any area where

indoor lights would be used on peak.

Program Accomplishments:

January 1, 2009 to December 31, 2009

There were 20 customers who participated in the

program during this period.

Program Fiscal Expenditures:

January 1, 2009 to December 31, 2009

Actual expenses were \$57,539.

Program Progress Summary:

Through this reporting period 23 customers have

Program Description and Progress

Program Title:

Commercial Refrigeration (Anti-Condensate)

Program Description:

This is an incentive program to encourage the

installation of efficient refrigeration controls and

equipment.

Program Accomplishments:

January 1, 2009 to December 31, 2009

For the reporting period there were no customers who

participated in the program.

Program Fiscal Expenditures:

January 1, 2009 to December 31, 2009

There were no expenses during this period.

Program Progress Summary:

Through this reporting period there were no

customers who participated in the program.

Program Description and Progress

Program Title: Commercial Water Heating

Program Description: This program is designed to encourage

commercial/industrial customers to install high efficiency water heating systems. The two technologies covered under this program are heat

recovery units and heat pump water heaters.

Program Accomplishments: <u>January 1, 2009</u> to <u>December 31, 2009</u>

For the reporting period there were no customers who

participated in the program.

Program Fiscal Expenditures: <u>January 1, 2009</u> to <u>December 31, 2009</u>

There were no expenses during this period.

Program Progress Summary: Through this reporting period there were no

customers who participated in the program.

NOTES:

Depreciation expense is calculated using a useful life of 60 months.

Return on Average Investment is calculated using a monthly rate of 0.59480%.

Return requirements are calculated using an income tax multiplier of 1.634900.

Program Title:

HEATING AND COOLING

Program Description: This is a residential conservation program designed to reduce weather-sensitive peaks by providing incentives for the installation of high efficiency heating and air

conditioning equipment at existing residences.

Program Projections: January 1, 2010 to December 31, 2010

There are 5,000 units projected to be installed and approved.

January 1, 2011 to December 31, 2011

There are 2,000 units projected to be installed and approved.

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Expenditures estimated for the period are \$962,687.

January 1, 2011 to December 31, 2011

Expenditures estimated for the period are \$405,744.

Program Progress

Summary:

Through December 31, 2009, there were 167,446 units installed and approved.

Program Title:

PRIME TIME

Program Description: This is a residential load management program designed to directly control the larger loads in customers' homes such as air conditioning, water heating, electric space heating and pool pumps. Participating customers receive monthly credits on

their electric bills.

Program Projections: January 1, 2010 to December 31, 2010

There are 45,620 projected customers for this program on a cumulative basis.

January 1, 2011 to December 31, 2011

There are 43,520 projected customers for this program on a cumulative basis.

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Estimated expenditures are \$6,105,471.

January 1, 2011 to December 31, 2011

Estimated expenditures are \$5,947,560.

Program Progress

Summary:

There were 48,080 cumulative customers participating through December 31,

2009.

Breakdown is as follows:

Water Heating 43,807 Air Conditioning 32,760 Heating 34,190 Pool Pump 9,927

Per Commission Order No. PSC- 05-0181-PAA-EG issued February 16, 2005,

Prime Time is closed to new participants.

Program Title:

ENERGY AUDITS

Program Description: These are on-site, on-line and phone-in audits of residential, commercial and industrial premises that instruct customers on how to use conservation measures

and practices to reduce their energy usage.

Program Projections: January 1, 2010 to December 31, 2010

Residential – 11,105 (RCS - 0; Free -9,500; On-line – 1,600, Phone-in 5)

Comm/Ind - 800 (Paid - 0; Free - 800)

January 1, 2011 to December 31, 2011

Residential – 10,820 (RCS - 0; Free – 9,000; On-line – 1,800, Phone-in 20)

Comm/Ind - 1,201 (Paid - 1 Free - 1,200)

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Expenditures are expected to be \$1,935,396.

January 1, 2011 to December 31, 2011

Expenditures are expected to be \$2,258,408.

Program Progress

Summary:

Through December 31, 2009 the following audit totals are:

| Residential RCS (Fee) | 3,890 |
|---------------------------------|---------|
| Residential Alt (Free) | 255,214 |
| Residential Cust. Assisited (1) | 114,662 |
| Commercial-Ind (Fee) | 226 |
| Commercial-Ind (Free) | 19,167 |
| Commercial Mail-in | 1,477 |

Includes Mail-in and On-line audits. Mail-in audit program phased out on December 31, 2004.

Program Title:

COGENERATION

Program Description: This program encourages the development of cost-effective commercial and industrial cogeneration facilities through standard offers and negotiation of contracts for the purchase of firm capacity and energy.

Program Projections: January 1, 2010 to December 31, 2010

Communication and interaction will continue with all present and potential cogeneration customers. Tampa Electric is currently working with a customer to evaluate the economics of additional capacity in 2011, but a final decision will not be made for several months. In addition, nearly 10 MW of cogeneration capacity was added in 2010, as previously planned. However, approximately 40 MW of customer cogeneration will be supplied to another utility, as its purchase power agreement with Tampa Electric expired in 2010.

January 1, 2011 to December 31, 2011

The development and publication of the 20-Year Cogeneration Forecast will occur

Program Fiscal Expenditures:

January 1, 2010 to December 31, 2010

Expenditures are estimated to be \$117,855.

January 1, 2011 to December 31, 2011

Expenditures are estimated to be \$123,624.

Program Progress Summary:

The projected total maximum generation by electrically interconnected cogeneration during 2011 will be approximately 561 MW. This is a decrease of 40 MW due to the expiration of a purchase power agreement noted above.

The company continues interaction with existing participants and potential developers regarding current and future cogeneration activities. Currently there are 11 Qualifying Facilities with generation on-line in our service area.

Program Title:

COMMERCIAL LOAD MANAGEMENT

Program Description: This is a load management program that achieves weather-sensitive demand reductions through load control of equipment at the facilities of firm commercial

customers.

Program Projections: January 1, 2010 to December 31, 2010

There are no new installations expected.

January 1, 2011 to December 31, 2011

One installation is expected.

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Expenses of \$10,654 are estimated.

January 1, 2011 to December 31, 2011

Expenses of \$6,730 are estimated.

Program Progress

Summary:

Through December 31, 2009 there were seven commercial installations in service.

Program Title:

COMMERCIAL LIGHTING

Program Description: This is a conservation program designed to reduce weather-sensitive peaks by encouraging investment in more efficient lighting technology in commercial

facilities.

Program Projections: January 1, 2010 to December 31, 2010

During this period, 150 customers are expected to participate.

January 1, 2011 to December 31, 2011

During this period, 51 customers are expected to participate.

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Expenditures estimated for the period are \$530,396.

January 1, 2011 to December 31, 2011

Expenditures estimated for this period are \$310,377.

Program Progress

Summary:

Through December 31, 2009, there were 1,282 customers that participated.

Program Title:

STANDBY GENERATOR

Program Description: This is a program designed to utilize the emergency generation capacity at firm commercial/industrial facilities in order to reduce weather-sensitive peak demand.

Program Projections: January 1, 2010 to December 31, 2010

Five installations are expected.

January 1, 2011 to December 31, 2011

One installation is expected.

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Expenditures estimated for the period are \$1,691,462.

January 1, 2011 to December 31, 2011

Expenditures estimated for the period are \$1,986,340.

Program Progress

Summary:

Through December 31, 2009, there are 84 customers participating.

Program Title:

CONSERVATION VALUE

Program Description: This is an incentive program for firm commercial/industrial customers that encourages additional investments in substantial demand shifting or demand

reduction measures.

Program Projections: January 1, 2010 to December 31, 2010

One customer is expected to participate during this period.

January 1, 2011 to December 31, 2011

Two customers are expected to participate during this period.

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Estimated expenses are \$79,077.

January 1, 2011 to December 31, 2011

Estimated expenses are \$157,773.

Program Progress

Summary:

Through December 31, 2009, there were 31 customers that earned incentive dollars. Tampa Electric continues to work with customers on evaluations of

various measures.

Program Title:

DUCT REPAIR

Program Description: This is a residential conservation program designed to reduce weather-sensitive peaks by offering incentives to encourage the repair of the air distribution system

in a residence.

Program Projections: January 1, 2010 to December 31, 2010

There are 6,200 repairs projected to be made.

January 1, 2011 to December 31, 2011

There are 6,202 repairs projected to be made.

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Expenditures estimated for the period are \$1,322,973.

January 1, 2011 to December 31, 2011

Expenditures estimated for the period are \$1,324,128.

Program Progress

Summary:

Through December 31, 2009, there are 78,666 customers that have participated.

Program Title:

RENEWABLE ENERGY PROGRAM

Program Description: This program is designed to promote and deliver renewable energy options to the company's customers. This specific effort provides funding for program administration, generation, evaluation of potential new renewable sources and market research.

Program Projections: January 1, 2010 to December 31, 2010

There are 2,641 customers with 3,719 subscribed blocks estimated for this period on a cumulative basis.

There are 800 blocks estimated to be purchased for this period on a one time basis.

January 1, 2011 to December 31, 2011

There are 2,700 customers with 4,000 subscribed blocks estimated for this period on a cumulative basis.

There are 1,000 blocks estimated to be purchased for this period on a one time basis.

Program Fiscal Expenditures:

January 1, 2010 to December 31, 2010

For the period, the company anticipated excess revenues of approximately \$207,000 to be used for new renewable generation.

January 1, 2011 to December 31, 2011

For the period, expenditures are estimated to be \$270,188.

For the period, revenues and expenses are projected to be the same.

Program Progress Summary:

Through December 31, 2009, there were 2,730 customers with 3,822 blocks subscribed. In addition, there were 1,376 blocks of renewable energy purchased on a one time basis.

Program Title:

INDUSTRIAL LOAD MANAGEMENT

Program Description: This is a load management program for large industrial customers with

interruptible loads of 500 kW or greater.

Program Projections: January 1, 2010 to December 31, 2010

No new customers are expected to participate.

January 1, 2011 to December 31, 2011

No new customers are expected to participate.

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Expenditures estimated for the period are \$21,717,717.

January 1, 2011 to December 31, 2011

Expenditures estimated for the period are \$21,016,001.

Program Progress

Summary:

Through December 31, 2009, there are 56 customers participating.

Program Title:

DSM RESEARCH AND DEVELOPMENT (R&D)

Program Description: This is a five-year R&D program directed at end-use technologies (both residential and commercial) not yet commercially available or where insufficient

data exists for measure evaluations specific to central Florida climate.

Program Projections: See Program Progress Summary.

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Expenditures are estimated at \$158,555.

January 1, 2011 to December 31, 2011

Expenditures are estimated at \$42,667.

Program Progress

Summary:

For 2010, Tampa Electric continues its pilot program to evaluate the feasibility of a commercial price responsive load management rate. The project was approved by the Commission is Docket No. 090228-EG, Order No. PSC-09-0501-TRF-EG, issued July 15, 2009.

Program Title:

COMMERCIAL COOLING

Program Description: This is an incentive program to encourage the installation of high efficiency direct

expansion and Package Terminal Air Conditioning commercial air conditioning

equipment.

Program Projections: January 1, 2010 to December 31, 2010

There are 141 customers expected to participate.

January 1, 2011 to December 31, 2011

There are 135 customers expected to participate.

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Expenditures are estimated at \$69,560.

January 1, 2011 to December 31, 2011

Expenditures are estimated at \$67,704.

Program Progress

Summary:

Through December 31, 2009, there were 1,121 units installed and approved.

Program Title:

ENERGY PLUS HOMES

Program Description: This is a program that encourages the construction of new homes to be above the minimum energy efficiency levels required by the State of Florida Energy Efficiency Code for New Construction through the installation of high efficiency

equipment and building envelope options.

Program Projections: January 1, 2010 to December 31, 2010

There are 600 customers expected to participate.

January 1, 2011 to December 31, 2011

There are 734 customers expected to participate.

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Expenditures are estimated at \$474,978.

January 1, 2011 to December 31, 2011

Expenditures are estimated at \$437,112.

Program Progress

Summary:

Through December 31, 2009, a total of 297 approved homes have participated.

Program Title:

COMMON EXPENSES

Program Description: These are expenses common to all programs.

Program Projections: N/A

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Expenditures are estimated to be \$602,000.

January 1, 2011 to December 31, 2011

Expenditures are estimated at \$591,624.

Program Progress

Summary:

N/A

Program Title:

PRICE RESPONSIVE LOAD MANAGEMENT

Program Description: A load management program designed to reduce weather sensitive peak loads by offering a multi-tiered rate structure designed as an incentive for participating customers to reduce their electric demand during high cost or critical periods of

generation.

Program Projections: January 1, 2010 to December 31, 2010

There are 1,480 projected customers for this program on a cumulative basis.

January 1, 2011 to December 31, 2011

There are 2,500 projected customers for this program on a cumulative basis.

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Expenditures are estimated at \$2,285,845.

January 1, 2011to December 31, 2011

Expenditures are estimated at \$2,630,953.

Program Progress

Summary:

Through December 31, 2009, there were 674 participating customers.

Program Title:

RESIDENTIAL BUILDING ENVELOPE IMPROVEMENT

Program Description: This is a program that encourages customers to make cost-effective improvements to existing residences in the areas of ceiling insulation, wall insulation, and

window improvements.

Program Projections: January 1, 2010 to December 31, 2010

Ceiling Insulation – 1,960

Wall Insulation - 9

Window Upgrades – 1,200

Window Film - 555

January 1, 2011 to December 31, 2011

Ceiling Insulation – 1,900 Wall Insulation - 10 Window Upgrades – 1,150 Window Film - 565

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Expenditures are estimated to be \$848,307.

January 1, 2011 to December 31, 2011

Expenditures are estimated at \$857,780.

Program Progress

Summary:

Through December 31, 2009, there were 85,202 customers that participated in the

company's residential building envelope improvement program.

Program Title:

EDUCATIONAL EDUCATION OUTREACH

Program Description: A three year pilot program designed to save demand and energy by increasing customer awareness of energy use in personal residences. This program is aimed at schools within the Tampa Electric service area and designed to educate students on energy awareness through scripted, professionally written presentations using humor, interactive theater and classroom guides to teach students the benefits of

energy efficiency.

Program Projections: January 1, 2010 to December 31, 2010.

51 program presentations are projected to be completed for Hillsborough County

schools for the 2009 – 2010 school year.

January 1, 2011 to December 31, 2011.

Pilot program terminates on October 15, 2010, per Commission ruling in Docket No. 070375-EG, Order No. PSC-07-0822-PAA-EG, issued October 15, 2007.

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Expenditures are estimated to be \$59,639.

January 1, 2011 to December 31, 2011

No expenditures are estimated.

Program Progress Summary:

Through 2009, Tampa Electric partnered with 16 local schools to present the pilot program to 13,820 students in 612 classes, resulting in 59 additional audits being

completed.

Program Title:

RESIDENTIAL LOW-INCOME WEATHERIZATION

Program Description: A program designed to assist low-income families in reducing their energy usage by providing and/or installing the necessary materials for the various conservation measures, as well as educating families on energy conservation techniques that promote behavioral changes to help customers control their energy usage.

Program Projections: January 1, 2010 to December 31, 2010

There are 74 customers expected to participate.

January 1, 2011 to December 31, 2011

There are 100 customers expected to participate.

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Expenditures are estimated to be \$48,676.

January 1, 2011 to December 31, 2011

Expenditures are estimated at \$63,570.

Program Progress

Summary:

Through December 31, 2009, a total of 333 customers have participated in this

Program Title:

COMMERCIAL DUCT REPAIR

Program Description: This is a commercial conservation program designed to reduce weather-sensitive peaks for commercial HVAC units less than or equal to 65,000 Btu/h by offering incentives to encourage the repair of the air distribution system in commercial

facilities.

Program Projections: January 1, 2010 to December 31, 2010

There are 5,745 repairs expected to be made.

January 1, 2011 to December 31, 2011

There are 5,991 repairs projected to be made.

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Expenditures are estimated to be \$1,179,266.

January 1, 2011 to December 31, 2011

Expenditures are estimated at \$1,246,620.

Program Progress

Summary:

Through December 31, 2009, a total of 1,237 customers have participated in this

Program Title:

COMMERCIAL BUILDING ENVELOPE IMPROVEMENT

Program Description: This is a program that encourages customers to make cost-effective improvements to existing commercial facilities in the areas of ceiling insulation, wall insulation

and window improvements.

Program Projections: January 1, 2010 to December 31, 2010

Ceiling Insulation – 5 Wall Insulation - 1 Window Film - 15

January 1, 2011 to December 31, 2011

Ceiling Insulation - 5 Wall Insulation - 1 Window Film - 20

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Expenditures are estimated to be \$14,580.

January 1, 2011 to December 31, 2011

Expenditures are estimated at \$20,208.

Program Progress

Summary:

Through December 31, 2009, a total of 36 customers have participated in this

Program Title:

COMMERCIAL ENERGY EFFICIENT MOTORS

Program Description: This is a commercial/industrial conservation program designed to reduce weathersensitive peaks by providing incentives for the installation of high efficiency

motors at existing commercial/industrial facilities.

Program Projections: January 1, 2010 to December 31, 2010

There are eight motors projected to be installed and approved.

January 1, 2011 to December 31, 2011

There are four motors projected to be installed and approved.

Program Fiscal Expenditures:

January 1, 2010 to December 31, 2010

Expenditures are estimated to be \$3,702.

January 1, 2011 to December 31, 2011

Expenditures are estimated at \$1,197.

Program Progress

Summary:

Through December 31, 2009, a total of seven customers have participated in this

Program Title:

COMMERCIAL DEMAND RESPONSE

Program Description: Tampa Electric's Commercial Demand Response is a conservation and load management program intended to help alter the company's system load curve by

reducing summer and winter demand peaks.

Program Projections: January 1, 2010 to December 31, 2010

There are 35 MW of demand response available for control.

January 1, 2011 to December 31, 2011

There are 35 MW of demand response projected to be available for control.

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Expenditures are estimated to be \$3,725,875.

January 1, 2011 to December 31, 2011

Expenditures are estimated at \$3,730,984.

Program Progress

Summary:

Tampa Electric is currently subscribed for 35 MW.

Program Title:

COMMERCIAL CHILLER REPLACEMENT

Program Description: This is an incentive program to encourage the installation of high efficiency air

and water cooled chilled commercial air conditioning equipment.

Program Projections: January 1, 2010 to December 31, 2010

There are six units projected to be installed and approved.

January 1, 2011 to December 31, 2011

There are three units projected to be installed and approved.

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Expenditures are estimated to be \$30,649.

January 1, 2011 to December 31, 2011

Expenditures are estimated at \$19,464.

Program Progress

Summary:

Through December 31, 2009, a total of 20 customers have participated in this

Program Title:

COMMERCIAL OCCUPANCY SENSORS (LIGHTING)

Program Description: This program is aimed at reducing the growth of peak demand and energy by providing an incentive to encourage commercial/industrial customers to install occupancy sensors in any area where indoor lights would be used on peak.

Program Projections: January 1, 2010 to December 31, 2010

There are 53 units projected to be installed and approved.

January 1, 2011 to December 31, 2011

There are 62 units projected to be installed and approved.

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Expenditures are estimated to be \$68,399.

January 1, 2011 to December 31, 2011

Expenditures are estimated at \$75,924.

Program Progress

Summary:

Through December 31, 2009, a total of 23 customers have participated in this

Program Title:

COMMERCIAL REFRIGERATION (ANTI-CONDENSATE)

Program Description: This program is designed to reduce the peak demand and energy consumption for commercial/industrial customers by increasing the use of efficient refrigeration

controls and equipment.

Program Projections: January 1, 2010 to December 31, 2010

There is one unit projected to be installed and approved.

January 1, 2011 to December 31, 2011

There are three units projected to be installed and approved.

Program Fiscal Expenditures:

January 1, 2010 to December 31, 2010

Expenditures are estimated to be \$1,447.

January 1, 2011 to December 31, 2011

Expenditures are estimated at \$4,968.

Program Progress

Summary:

Through December 31, 2009, no customers have participated in this program.

Program Title:

COMMERCIAL WATER HEATING

Program Description: This is a conservation program designed to reducing future growth of demand and energy consumption by encouraging commercial/industrial customers to install

high efficiency water heating systems.

Program Projections: January 1, 2010 to December 31, 2010

There is one unit projected to be installed and approved.

January 1, 2011 to December 31, 2011

There are five units projected to be installed and approved.

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Expenditures are estimated to be \$1,567.

January 1, 2011 to December 31, 2011

Expenditures are estimated at \$5,028.

Program Progress

Summary:

Through December 31, 2009, no customers have participated in this program.

NOTES:

Depreciation expense is calculated using a useful life of 60 months.

Return on Average Investment is calculated using a monthly rate of 0.59480%.

Return requirements are calculated using an income tax multiplier of 1.634900.

Estimated for Months January 2011 through December 2011

Program Title:

HEATING AND COOLING

Program Description: This is a residential conservation program designed to reduce weather-sensitive peaks by providing incentives for the installation of high efficiency heating and air

conditioning equipment at existing residences.

Program Projections: January 1, 2010 to December 31, 2010

There are 5,000 units projected to be installed and approved.

January 1, 2011 to December 31, 2011

There are 3,000 units projected to be installed and approved.

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Expenditures estimated for the period are \$975,383.

January 1, 2011 to December 31, 2011

Expenditures estimated for the period are \$1,148,136.

Program Progress

Summary:

Through December 31, 2009, there were 167,446 units installed and approved.

Program Title:

PRIME TIME

Program Description: This is a residential load management program designed to directly control the larger loads in customers' homes such as air conditioning, water heating, electric space heating and pool pumps. Participating customers receive monthly credits on

their electric bills.

Program Projections: January 1, 2010 to December 31, 2010

There are 45,620 projected customers for this program on a cumulative basis.

January 1, 2011 to December 31, 2011

There are 43,520 projected customers for this program on a cumulative basis.

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Estimated expenditures are \$6,105,471.

January 1, 2011 to December 31, 2011

Estimated expenditures are \$5,947,560.

Program Progress

Summary:

There were 48,080 cumulative customers participating through December 31,

2009.

Breakdown is as follows:

Water Heating 43,807 Air Conditioning 32,760 34,190 Heating Pool Pump 9,927

Per Commission Order No. PSC- 05-0181-PAA-EG issued February 16, 2005,

Prime Time is closed to new participants.

Program Title:

ENERGY AUDITS

Program Description: These are on-site, on-line and phone-in audits of residential, commercial and

industrial premises that instruct customers on how to use conservation measures

and practices to reduce their energy usage.

Program Projections: January 1, 2010 to December 31, 2010

Residential – 11,105 (RCS - 0; Free -9,500; On-line – 1,600, Phone in 5)

Comm/Ind - 800 (Paid - 0; Free - 800)

January 1, 2011 to December 31, 2011

Residential – 12,020 (RCS - 0; Free – 10,000; On-line – 2,000, Phone-in 20)

Comm/Ind - 1,201 (Paid - 1 Free - 1,200)

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Expenditures are expected to be \$1,943,276.

January 1, 2011 to December 31, 2011

Expenditures are expected to be \$3,447,171.

Program Progress

Summary:

Through December 31, 2009 the following audit totals are:

| Residential RCS (Fee) | 3,890 |
|---------------------------------|---------|
| Residential Alt (Free) | 255,214 |
| Residential Cust. Assisited (1) | 114,662 |
| Commercial-Ind (Fee) | 226 |
| Commercial-Ind (Free) | 19,167 |
| Commercial Mail-in | 1,477 |

⁽¹⁾ Includes Mail-in and On-line audits. Mail-in audit program phased out on December 31, 2004.

Program Title:

COGENERATION

Program Description: This program encourages the development of cost-effective commercial and industrial cogeneration facilities through standard offers and negotiation of contracts for the purchase of firm capacity and energy.

Program Projections: January 1, 2010 to December 31, 2010

Communication and interaction will continue with all present and potential cogeneration customers. Tampa Electric is currently working with a customer to evaluate the economics of additional capacity in 2011, but a final decision will not be made for several months. In addition, nearly 10 MW of cogeneration capacity was added in 2010, as previously planned. However, approximately 40 MW of customer cogeneration will be supplied to another utility, as its purchase power agreement with Tampa Electric expired in 2010.

January 1, 2011 to December 31, 2011

The development and publication of the 20-Year Cogeneration Forecast will occur

Program Fiscal Expenditures:

January 1, 2010 to December 31, 2010

Expenditures are estimated to be \$117,855.

January 1, 2011 to December 31, 2011

Expenditures are estimated to be \$123,924.

Program Progress Summary:

The projected total maximum generation by electrically interconnected cogeneration during 2011 will be approximately 561 MW. This is a decrease of 40 MW due to the expiration of a purchase power agreement noted above.

The company continues interaction with existing participants and potential developers regarding current and future cogeneration activities. Currently there are 11 Qualifying Facilities with generation on-line in our service area.

Program Title:

COMMERCIAL LOAD MANAGEMENT

Program Description: This is a load management program that achieves weather-sensitive demand reductions through load control of equipment at the facilities of firm commercial

customers.

Program Projections: January 1, 2010 to December 31, 2010

There are no new installations expected.

January 1, 2011 to December 31, 2011

One installation is expected.

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Expenses of \$10,654 are estimated.

January 1, 2011 to December 31, 2011

Expenses of \$6,730 are estimated.

Program Progress

Summary:

Through December 31, 2009 there were seven commercial installations in service.

Program Title:

COMMERCIAL LIGHTING

Program Description: This is a conservation program designed to reduce weather-sensitive peaks by encouraging investment in more efficient lighting technology in commercial

facilities.

Program Projections: January 1, 2010 to December 31, 2010

During this period, 150 customers are expected to participate.

January 1, 2011 to December 31, 2011

During this period, 555 customers are expected to participate

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Expenditures estimated for the period are \$534,165.

January 1, 2011 to December 31, 2011

Expenditures estimated for this period are \$503,223.

Program Progress

Summary:

Through December 31, 2009, there were 1,282 customers that participated.

Program Title:

STANDBY GENERATOR

Program Description: This is a program designed to utilize the emergency generation capacity at firm

commercial/industrial facilities in order to reduce weather-sensitive peak demand.

Program Projections: January 1, 2010 to December 31, 2010

Five installations are expected.

January 1, 2011 to December 31, 2011

One installation is expected.

Program Fiscal Expenditures:

January 1, 2010 to December 31, 2010

Expenditures estimated for the period are \$1,691,462.

January 1, 2011 to December 31, 2011

Expenditures estimated for the period are \$1,986,340.

Program Progress

Summary:

Through December 31, 2009, there are 84 customers participating.

Program Title:

CONSERVATION VALUE

Program Description: This is an incentive program for firm commercial/industrial customers that encourages additional investments in substantial demand shifting or demand

reduction measures.

Program Projections: January 1, 2010 to December 31, 2010

One customer is expected to participate during this period.

January 1, 2011 to December 31, 2011

Three customers are expected to participate during this period.

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Estimated expenses are \$79,077.

January 1, 2011 to December 31, 2011

Estimated expenses are \$157,773.

Program Progress

Summary:

Through December 31, 2009, there were 31 customers that earned incentive dollars. We continue to work with customers on evaluations of various measures.

Program Title:

DUCT REPAIR

Program Description: This is a residential conservation program designed to reduce weather-sensitive peaks by offering incentives to encourage the repair of the air distribution system

in a residence.

Program Projections: January 1, 2010 to December 31, 2010

There are 6,200 repairs projected to be made.

January 1, 2011 to December 31, 2011

There are 13,645 repairs projected to be made.

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Expenditures estimated for the period are \$1,547,591.

January 1, 2011 to December 31, 2011

Expenditures estimated for the period are \$2,889,228.

Program Progress

Summary:

Through December 31, 2009, there are 78,666 customers that have participated.

Program Title:

RENEWABLE ENERGY PROGRAM

Program Description: This program is designed to promote and deliver renewable energy options to the company's customers. This specific effort provides funding for program administration, generation, evaluation of potential new renewable sources and market research.

Program Projections: January 1, 2010 to December 31, 2010

There are 2,641 customers with 3,719 subscribed blocks estimated for this period on a cumulative basis.

There are 800 blocks estimated to be purchased for this period on a one time

January 1, 2011 to December 31, 2011

There are 2,700 customers with 4,000 subscribed blocks estimated for this period on a cumulative basis.

There are 1,000 blocks estimated to be purchased for this period on a one time basis.

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

For the period, the company anticipated excess revenues of approximately \$207,000 to be used for new renewable generation.

January 1, 2011 to December 31, 2011

For the period, expenditures are estimated to be \$270,188.

For the period, revenues and expenses are projected to be the same.

Program Progress Summary:

Through December 31, 2009, there were 2,730 customers with 3,822 blocks subscribed. In addition, there were 1,376 blocks of renewable energy purchased

on a one time basis.

Program Title:

INDUSTRIAL LOAD MANAGEMENT

Program Description: This is a load management program for large industrial customers with

interruptible loads of 500 kW or greater.

Program Projections: January 1, 2010 to December 31, 2010

No new customers are expected to participate.

January 1, 2011 to December 31, 2011

No new customers are expected to participate.

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Expenditures estimated for the period are \$21,717,717.

January 1, 2011 to December 31, 2011

Expenditures estimated for the period are \$21,016,001.

Program Progress

Summary:

Through December 31, 2009, there are 56 customers participating.

Program Title:

DSM RESEARCH AND DEVELOPMENT (R&D)

Program Description: This is a five-year R&D program directed at end-use technologies (both residential and commercial) not yet commercially available or where insufficient

data exists for measure evaluations specific to central Florida climate.

Program Projections: See Program Progress Summary.

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Expenditures are estimated at \$158,555.

January 1, 2011 to December 31, 2011

Expenditures are estimated at \$42,667.

Program Progress

Summary:

For 2010, Tampa Electric continues its pilot program to evaluate the feasibility of a commercial price responsive load management rate. The project was approved by the Commission is Docket No. 090228-EG, Order No. PSC-09-0501-TRF-EG, issued July 15, 2009.

Program Title:

COMMERCIAL COOLING

Program Description: This is an incentive program to encourage the installation of high efficiency direct

expansion and Package Terminal Air Conditioning commercial air conditioning

equipment.

Program Projections: January 1, 2010 to December 31, 2010

There are 141 customers expected to participate.

January 1, 2011 to December 31, 2011

There are 250 customers expected to participate.

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Expenditures are estimated at \$69,560.

January 1, 2011 to December 31, 2011

Expenditures are estimated at \$192,636.

Program Progress

Summary:

Through December 31, 2009, there were 1,121 units installed and approved.

Program Title:

ENERGY PLUS HOMES

Program Description: This is a program that encourages the construction of new homes to be above the minimum energy efficiency levels required by the State of Florida Energy Efficiency Code for New Construction through the installation of high efficiency

equipment and building envelope options.

Program Projections: January 1, 2010 to December 31, 2010

There are 600 customers expected to participate.

January 1, 2011 to December 31, 2011

There are 1,200 customers expected to participate.

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Expenditures are estimated at \$474,978.

January 1, 2011 to December 31, 2011

Expenditures are estimated at \$1,325,136.

Program Progress

Summary:

Through December 31, 2009, a total of 297 approved homes have participated.

Program Title:

COMMON EXPENSES

Program Description: These are expenses common to all programs.

Program Projections: N/A

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Expenditures are estimated to be \$602,000.

January 1, 2011 to December 31, 2011

Expenditures are estimated at \$611,824.

Program Progress

Summary:

N/A

Program Title:

PRICE RESPONSIVE LOAD MANAGEMENT

Program Description: A load management program designed to reduce weather sensitive peak loads by offering a multi-tiered rate structure designed as an incentive for participating customers to reduce their electric demand during high cost or critical periods of

generation.

Program Projections: January 1, 2010 to December 31, 2010

There are 1,480 projected customers for this program on a cumulative basis.

January 1, 2011 to December 31, 2011

There are 2,880 projected customers for this program on a cumulative basis.

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Expenditures are estimated at \$2,215,744.

January 1, 2011to December 31, 2011

Expenditures are estimated at \$3,311,087.

Program Progress

Summary:

Through December 31, 2009, there were 674 participating customers.

Program Title:

RESIDENTIAL BUILDING ENVELOPE IMPROVEMENT

Program Description: This is a program that encourages customers to make cost-effective improvements

to existing residences in the areas of ceiling insulation, wall insulation, and

window improvements.

Program Projections: January 1, 2010 to December 31, 2010

Ceiling Insulation – 1,960

Wall Insulation - 9

Window Upgrades – 1,200

Window Film - 555

January 1, 2011 to December 31, 2011

Ceiling Insulation – 1,950 Wall Insulation - 12 Window Upgrades – 1,250

Window Film - 750

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Expenditures are estimated to be \$893,065.

January 1, 2011 to December 31, 2011

Expenditures are estimated at \$1,431,836.

Program Progress

Summary:

Through December 31, 2009, there were 85,202 customers that participated in the

company's residential building envelope improvement program.

Program Title:

EDUCATIONAL EDUCATION OUTREACH

Program Description: Originally, a three-year pilot program designed to save demand and energy by increasing customer awareness of energy use in personal residences. This program is aimed at schools within the Tampa Electric service area and designed to educate students on energy awareness through scripted, professionally written presentations using humor, interactive theater and classroom guides to teach students the benefits of energy efficiency.

> In Docket 100159-EG, Tampa Electric petitioned the Commission to modify this program to provide energy education through two distinct initiatives: 1) public education, and 2) energy awareness. If approved, the program known as Energy Education Outreach will continue presentations to service area schools and expand presentations to public forums, homeowner associations, trade shows, etc.

Program Projections: January 1, 2010 to December 31, 2010.

51 program presentations are projected to be completed for Hillsborough County

schools for the 2009 – 2010 school year.

January 1, 2011 to December 31, 2011.

There are 4,000 customers expected to participate.

Program Fiscal Expenditures:

January 1, 2010 to December 31, 2010

Expenditures are estimated to be \$59,719

January 1, 2011 to December 31, 2011

Expenditures are estimated at \$138,852.

Program Progress Summary:

Through 2009, Tampa Electric partnered with 16 local schools to present the pilot

program to 13,820 students in 612 classes, resulting in 59 additional audits being

completed.

Program Title:

RESIDENTIAL LOW-INCOME WEATHERIZATION

Program Description: A program designed to assist low-income families in reducing their energy usage by providing and/or installing the necessary materials for the various conservation measures, as well as educating families on energy conservation techniques that promote behavioral changes to help customers control their energy usage.

> In Docket 100159-EG, Tampa Electric petitioned the Commission to expand the installation of energy saving measures and include education and delivery of energy efficiency kits to customers working with agencies providing energy related assistance. If approved, the program will be known as Neighborhood Weatherization and Agency Assistance.

Program Projections: January 1, 2010 to December 31, 2010

There are 950 customers expected to participate.

January 1, 2011 to December 31, 2011

There are 2,500 customers expected to participate.

Program Fiscal Expenditures:

January 1, 2010 to December 31, 2010

Expenditures are estimated to be \$284,279.

January 1, 2011 to December 31, 2011

Expenditures are estimated at \$775,488.

Program Progress

Summary:

Through December 31, 2009, a total of 333 customers have participated in this

Program Title:

COMMERCIAL DUCT REPAIR

Program Description: This is a commercial conservation program designed to reduce weather-sensitive peaks for commercial HVAC units less than or equal to 65,000 Btu/h by offering incentives to encourage the repair of the air distribution system in commercial

facilities.

Program Projections: January 1, 2010 to December 31, 2010

There are 5,745 repairs expected to be made.

January 1, 2011 to December 31, 2011

There are 5,500 repairs projected to be made.

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Expenditures are estimated to be \$1,179,266.

January 1, 2011 to December 31, 2011

Expenditures are estimated at \$1,715,184.

Program Progress

Summary:

Through December 31, 2009, a total of 1,237 customers have participated in this

Program Title:

COMMERCIAL BUILDING ENVELOPE IMPROVEMENT

Program Description: This is a program that encourages customers to make cost-effective improvements to existing commercial facilities in the areas of ceiling insulation, wall insulation

and window improvements.

Program Projections: January 1, 2010 to December 31, 2010

Ceiling Insulation – 5 Wall Insulation - 1 Window Film - 15

January 1, 2011 to December 31, 2011

Ceiling Insulation - 5 Roof Insulation - 5 Wall Insulation - 1 Window Film - 30

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Expenditures are estimated to be \$22,927.

January 1, 2011 to December 31, 2011

Expenditures are estimated at \$162,408.

Program Progress

Summary:

Through December 31, 2009, a total of 36 customers have participated in this

Program Title:

COMMERCIAL ENERGY EFFICIENT MOTORS

Program Description: This is a commercial/industrial conservation program designed to reduce weathersensitive peaks by providing incentives for the installation of high efficiency

motors at existing commercial/industrial facilities.

Program Projections: January 1, 2010 to December 31, 2010

There are 8 motors projected to be installed and approved.

January 1, 2011 to December 31, 2011

There are 20 motors projected to be installed and approved.

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Expenditures are estimated to be \$3,702.

January 1, 2011 to December 31, 2011

Expenditures are estimated at \$20,076.

Program Progress

Summary:

Through December 31, 2009, seven customers have participated in this program.

Program Title:

COMMERCIAL DEMAND RESPONSE

Program Description: Tampa Electric's Commercial Demand Response is a conservation and load management program intended to help alter the company's system load curve by

reducing summer and winter demand peaks.

Program Projections: January 1, 2010 to December 31, 2010

There are 35 MW of demand response available for control.

January 1, 2011 to December 31, 2011

There are 36 MW of demand response projected to be available for control.

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Expenditures are estimated to be \$3,729,911.

January 1, 2011 to December 31, 2011

Expenditures are estimated at \$3,401,148.

Program Progress

Summary:

Tampa Electric is currently subscribed for 35 MW.

Program Title:

COMMERCIAL CHILLER REPLACEMENT

Program Description: This is an incentive program to encourage the installation of high efficiency air

and water cooled chilled commercial air conditioning equipment.

Program Projections: January 1, 2010 to December 31, 2010

There are six units projected to be installed and approved.

January 1, 2011 to December 31, 2011

There are 11 units projected to be installed and approved.

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Expenditures are estimated to be \$30,649.

January 1, 2011 to December 31, 2011

Expenditures are estimated at \$110,880.

Program Progress

Summary:

Through December 31, 2009, a total of 20 customers have participated in this

Program Title:

COMMERCIAL OCCUPANCY SENSORS (LIGHTING)

Program Description: This program is aimed at reducing the growth of peak demand and energy by providing an incentive to encourage commercial/industrial customers to install occupancy sensors in any area where indoor lights would be used on peak.

Program Projections: January 1, 2010 to December 31, 2010

There are 53 units projected to be installed and approved.

January 1, 2011 to December 31, 2011

There are 71 units projected to be installed and approved.

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Expenditures are estimated to be \$68,399.

January 1, 2011 to December 31, 2011

Expenditures are estimated at \$84,923.

Program Progress

Summary:

Through December 31, 2009, a total of 23 customers have participated in this

Program Title:

COMMERCIAL REFRIGERATION (ANTI-CONDENSATE)

Program Description: This program is designed to reduce the peak demand and energy consumption for commercial/industrial customers by increasing the use of efficient refrigeration

controls and equipment.

Program Projections: January 1, 2010 to December 31, 2010

There is one unit projected to be installed and approved.

January 1, 2011 to December 31, 2011

There are six units projected to be installed and approved.

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Expenditures are estimated to be \$1,447.

January 1, 2011 to December 31, 2011

Expenditures are estimated at \$5,640.

Program Progress

Summary:

Through December 31, 2009, no customers have participated in this program.

Program Title:

COMMERCIAL WATER HEATING

Program Description: This is a conservation program designed to reducing future growth of demand and energy consumption by encouraging commercial/industrial customers to install

high efficiency water heating systems.

Program Projections: January 1, 2010 to December 31, 2010

There is one unit projected to be installed and approved.

January 1, 2011 to December 31, 2011

There are five units projected to be installed and approved.

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Expenditures are estimated to be \$1,567.

January 1, 2011 to December 31, 2011

Expenditures are estimated at \$5,028.

Program Progress

Summary:

Through December 31, 2009, no customers have participated in this program.

Program Title:

RESIDENTIAL ELECTRONICALLY COMMUNTATED MOTOR

Program Description: This is a conservation program designed to reduce future growth of demand and energy consumption by encouraging residential customers to replace their existing

motor in HVAC air-handlers with an Electronically Commutated Motor.

Program Projections: January 1, 2010 to December 31, 2010

There are no units projected to be installed and approved.

January 1, 2011 to December 31, 2011

There are 2,222 units projected to be installed and approved.

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Expenditures are estimated to be \$68,662.

January 1, 2011 to December 31, 2011

Expenditures are estimated at \$525,084.

Program Progress

Summary:

Program Title:

RESIDENTIAL HVAC RE-COMMISSIONING

Program Description: This is a conservation program designed to reduce demand and energy consumption by helping residential customers ensure HVAC equipment is operating at optimal efficiency through maintenance and equipment tune-ups.

Program Projections: January 1, 2010 to December 31, 2010

There are no HVAC systems projected to be re-commissioned and approved.

January 1, 2011 to December 31, 2011

There are 1,440 HVAC systems projected to be re-commissioned and approved.

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Expenditures are estimated to be \$22,203.

January 1, 2011 to December 31, 2011

Expenditures are estimated at \$214,104.

Program Progress

Summary:

Program Title:

COMMERCIAL HVAC RE-COMMISSIONING

Program Description: This is a conservation program designed to reduce demand and energy consumption by helping residential customers ensure HVAC equipment is operating at optimal efficiency through maintenance and equipment tune-ups.

Program Projections: January 1, 2010 to December 31, 2010

There are no HVAC systems projected to be re-commissioned and approved.

January 1, 2011 to December 31, 2011

There are 700 HVAC systems projected to be re-commissioned and approved.

Program Fiscal Expenditures:

January 1, 2010 to December 31, 2010

Expenditures are estimated to be \$1,216.

January 1, 2011 to December 31, 2011

Expenditures are estimated at \$319,116.

Program Progress

Summary:

Program Title:

COMMERCIAL ELECTRONICALLY COMMUNTATED MOTOR

Program Description: This is a conservation program designed to reduce demand and energy consumption by helping customers ensure HVAC and refrigeration equipment is operating at optimal efficiency by incenting maintenance and tune-up of

equipment.

Program Projections: January 1, 2010 to December 31, 2010

There are no units projected to be installed and approved.

January 1, 2011 to December 31, 2011

There are 20 units projected to be installed and approved.

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Expenditures are estimated to be \$1,216.

January 1, 2011 to December 31, 2011

Expenditures are estimated at \$19,104.

Program Progress

Summary:

Program Title:

COMMERCIAL COOL ROOF

Program Description: This is a conservation program designed to reduce of demand and energy consumption by providing incentives to encourage commercial/industrial

customers to install a cool roof system above conditioned spaces.

Program Projections: January 1, 2010 to December 31, 2010

There are no units projected to be installed and approved.

January 1, 2011 to December 31, 2011

There are 5 units projected to be installed and approved.

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Expenditures are estimated to be \$680.

January 1, 2011 to December 31, 2011

Expenditures are estimated at \$41,016.

Program Progress

Summary:

Program Title:

COMMERCIAL ENERGY RECOVERY VENTILATION

Program Description: This is a conservation program designed to reduce of demand and energy consumption by encouraging commercial/industrial customers to install efficient

ventilation systems to reduce humidity and HVAC loads in buildings.

Program Projections: January 1, 2010 to December 31, 2010

There are no units projected to be installed and approved.

January 1, 2011 to December 31, 2011

There are 16 units projected to be installed and approved.

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Expenditures are estimated to be \$17,720.

January 1, 2011 to December 31, 2011

Expenditures are estimated at \$87,468.

Program Progress

Summary:

Program Title:

RENEWABLE ENERGY SYSTEMS INITIATIVE

Program Description: This is a five-year renewable energy pilot conservation program designed to reduce demand and energy consumption by encouraging the installation of solar photovoltaic and solar water heating technologies on existing and new residential

and commercial premises.

Program Projections: January 1, 2010 to December 31, 2010

There are no units projected to be installed and approved.

January 1, 2011 to December 31, 2011

There are 236 renewable systems projected to be installed and approved.

Program Fiscal

Expenditures:

January 1, 2010 to December 31, 2010

Expenditures are estimated to be \$45,328.

January 1, 2011 to December 31, 2011

Expenditures are estimated at \$1,531,018.

Program Progress
