Re: Docket No. 110091-EU - Petition for Approval of Renewable Energy Tariff and Standard Offer Contract by Florida Power & Light Company

Dear Ms. Cole:

The proposed tariff and standard offer contract ("SOC") filed in this proceeding on April 1, 2011, are based on Florida Power & Light Company's ("FPL's") 2011 Ten Year Site Plan ("Site Plan") filed April 1, 2011. The information presented in the 2011 Site Plan was based on FPL's then current resource planning assumptions. One of the resource planning assumptions in the Site Plan was that FPL would need to begin scheduling planned maintenance of its generating units during all summer months. Subsequently, FPL has determined that under current operating parameters the required maintenance may be performed during the non-summer months. All other things equal, this would lower FPL's projected resource needs in all future years, as reflected in the Site Plan, by 350 MW of capacity.

As indicated in the Site Plan itself, FPL's Site Plan is a planning document that is constantly evolving. FPL also is in the process of assessing its long term generation needs in a more detailed fashion. This work, which has not been concluded, will ultimately determine whether FPL's next planned generating unit will be required in 2016 or 2017.

As a result, FPL requests that the Commission defer its consideration of FPL's filing in this docket. If FPL's ongoing analysis determines that its next planned generating unit will be a 2017 unit, FPL would file revisions to its April 1, 2011, filing in this docket. FPL intends to complete its analysis to determine if the 2016 or 2017 avoided unit is appropriate within the next two (2) months. Upon completion of that analysis, FPL will notify the Commission and provide any revisions to its filing in this docket that are appropriate. Until such time as FPL's 2011 SOC filing is approved, FPL will utilize the 2010 SOC and its payment schedules as approved by the Commission.
