Re: Docket No. 120292-GU -- Application for authorization to issue common stock, preferred stock and secured and/or unsecured debt, and to enter into agreements for interest rate swap products, equity products and other financial derivatives, and to exceed limitation placed on short-term borrowings in 2013, by Chesapeake Utilities Corporation.

Dear Ms. Stauffer:

Pursuant to the directions contained in Order No. PSC-13-0042-FOF-GU (Docket No. 120292-GU), and in accordance with Rule 25-8.009, Florida Administrative Code, please accept for filing the enclosed original and three copies of the Consummation Report of Chesapeake Utilities Corporation regarding the issuance and sale of securities during the fiscal year ended December 31, 2013.

Thank you for your assistance in connection with this filing. If you have any questions whatsoever, please do not hesitate to let me know.

Sincerely,

Beth Keating

RE: Docket No. 120292-GU: Application for authorization to issue common stock, preferred stock and secured and/or unsecured debt, and to enter into agreements for interest rate swap products, equity products and other financial derivatives, and to issue short-term borrowings in 2013, by Chesapeake Utilities Corporation. – CONSUMMATION REPORT

Dear Ms. Stauffer:

Chesapeake Utilities Corporation (Chesapeake) respectfully files this Consummation Report (original and three copies) on the issuance of securities for the fiscal year ended December 31, 2013 in compliance with Rule 25-8.009, Florida Administrative Code. This is a consolidated filing of Chesapeake Utilities Corporation and Florida Public Utilities Company. In satisfaction of the Consummation Report requirements, Chesapeake sets forth the following information:

1. On January 24, 2013, the Florida Public Service Commission (FPSC) issued Order No. PSC-13-0042-FOF-GU, which authorized Chesapeake to issue up to 5,868,334 shares of common stock for the purpose of administering Chesapeake's Retirement Savings Plan, Performance Incentive Plan, Dividend Reinvestment and Stock Purchase Plan, the conversion of Chesapeake's Convertible Debentures, Directors Stock Compensation Plan, and Employee Stock Awards Plan. The Order further approved the issuance by Chesapeake of up to \$77 million in secured and/or unsecured long-term debt for general purposes. The Order also authorized Chesapeake to issue up to 5,000,000 shares of common stock and an additional \$60 million in secured and/or unsecured debt for possible acquisitions. Due to the nature of typical cash for stock acquisitions, the \$60 million in secured and/or unsecured debt may be initially issued through a bridge loan in the form of bank notes or some

similar form of short-term obligations. The Order provides that the Company can issue short-term obligations in an amount not to exceed \$140 million in support of the bridge financing, subsequently refinanced as unsecured long-term debt with an estimated rate of interest of up to 300 basis points above U.S. Treasury rates with an equivalent average life. In addition, the Order authorized Chesapeake to issue up to 500,000 shares of common stock or an equity-linked instrument equivalent in value to permanently finance the Company's ongoing capital expenditures program. Chesapeake was also authorized to issue up to 1,000,000 shares of Chesapeake preferred stock for possible acquisitions, financing transactions, and other general corporate purposes, including potential distribution under the Company's Shareholder Rights Agreement adopted by the Board of Directors on August 20, 1999 and subsequently modified and extended by the Board of Directors on September 19, 2008. Lastly, Chesapeake received authorization pursuant to the Order to enter into agreements for Interest Rate Swap Products in an amount, in the aggregate not to exceed \$70 million.

2. Chesapeake now has five unsecured bank lines of credit with two commercial lenders. Chesapeake currently maintains a total short-term borrowing line capacity of \$165,000,000. At the beginning of 2013, the Company had \$140,000,000 short-term borrowing line capacity, including committed short-term borrowing capacity of \$100,000,000 (held through three separate lines of credit of \$40,000,000, \$30,000,000 and \$30,000,000, with two lenders), and uncommitted short-term borrowing capacity of \$40,000,000 (held through two separate lines of credit of \$20,000,000 each with two lenders). On June 28, 2013, the Company entered into a new \$55,000,000 committed short-term facility with one of its commercial lender, replacing a \$30,000,000 line of credit noted above.

3. For the twelve-month period ended December 31, 2013, Chesapeake issued the following:

- (a) No shares of common stock were issued for the purpose of administering Chesapeake's Retirement Savings Plan. The Company has the option of administering the plan by issuing new equity, issuing shares from reserves or purchasing shares on the open market.
- (b) 13,921 shares of common stock (24,332 gross shares less 10,411 shares redeemed for taxes) were issued for the Performance Incentive Plan. The average issuance price of these shares was \$49.81 per share. Expenses associated with these issuances were negligible.
- (c) No shares of common stock were issued for the purpose of administering Chesapeake's Dividend Reinvestment and Direct Stock Purchase Plan. The Company has the option of administering the plan by issuing new equity, issuing shares from reserves or purchasing shares on the open market.
- (d) 17,383 shares of common stock were issued for the conversion of debentures. The average issuance price of these shares was \$17.01 per share. Expenses associated with these issuances were negligible.
- (e) 9,427 shares of common stock were issued for the Directors Stock Compensation Plan. The average issuance price of these shares was \$52.49 per share. Expenses associated with these issuances were negligible.

- (f) No shares of common stock were issued for the Employee Stock Award Plan.

4. For the twelve-month period ended December 31, 2013, Chesapeake issued the following:

- (a) 6.43% Unsecured Senior Notes due May 2, 2028 in the principal amount of \$7,000,000 with provisions for payment of interest only prior to May 2, 2018; thereafter, principal shall be payable, in addition to interest on the unpaid balance for ten (10) years at the rate of \$700,000 per annum.

- (b) 3.73% Unsecured Senior Notes due December 16, 2028 in the principal amount of \$20,000,000 with provisions for payment of interest only prior to December 16, 2018; thereafter, principal shall be payable, in addition to interest on the unpaid balance for ten (10) years at the rate of \$2,000,000 per annum.

- (c) Capital lease agreement in an original present value amount of \$7,125,901 in connection with the acquisition and lease of certain assets of Eastern Shore Gas Company located in Worcester County, Maryland. The capital lease has monthly payments of \$41,667 through May 2014; and monthly payments of \$125,000 from June 2014 through May 2019.

- (d) Unsecured notes in an original amount of \$380,000 in connection with the acquisition of Glades Gas Company of Okeechobee, Inc, a Florida corporation. The notes have equal annual payments until February 5, 2018.

5. Schedules showing capitalization, pretax interest coverage and debt interest requirements as of December 31, 2013, are attached hereto as Exhibit A.

Except for those agreements provided as Exhibits to this document, copies of all Plans, Agreements, registration filings with the Securities and Exchange Commission and Orders of the Delaware Public Service Commission authorizing the issuance of the above securities have been previously filed with the FPSC under Docket Nos. 991631-GU, 080635-GU, 090487-GU, 100444-GU and 110304-GU and are hereby incorporated by reference.

6. Signed copies of the Opinions of Counsel with respect to the legality of all other securities issued have been previously filed with the FPSC as exhibits to the Consummation Reports of Securities issued by Chesapeake Utilities, Docket Nos. 931112-GU, 961194-GU, 971397-GU, 991631-GU, 030942-GU, 041263-GU, and 050630-GU, dated, respectively, April 1, 1994, March 27, 1998, March 29, 1999, March 29, 2001, March 22, 2005, March 28, 2006, and March 29, 2007, respectively, and are hereby incorporated by reference.
7. A copy of Chesapeake's most current Form 10-K as filed with the Securities and Exchange Commission is attached hereto as Exhibit B.

We respectfully submit this Consummation Report on the issuance of securities by Chesapeake Utilities Corporation, Florida Public Service Commission Docket No. 120292-GU, this 31st day of March 2014.

Sincerely,

CHESAPEAKE UTILITIES CORPORATION

Series B Notes: Series B of the unsecured Senior Notes to be issued on May 15, 2014 pursuant to the Note Agreement

Sharp: Sharp Energy, Inc., our wholly-owned propane distribution subsidiary

Sharpgas: Sharpgas, Inc., a subsidiary of Sharp

SICP: 2013 Stock and Incentive Compensation Plan, which replaced DSCP and PIP effective May 2, 2013

Skipjack: Skipjack, Inc. a subsidiary that owns and leases office buildings in Delaware and Maryland to affiliates of Chesapeake

S&P 500 Index: Standard & Poor's 500 Index

TETLP: Texas Eastern Transmission, LP

TOU: Time-of-use

Transco: Transcontinental Gas Pipe Line Company, LLC

Virginia LP: Virginia LP Gas, Inc.

Xeron: Xeron, Inc., our propane wholesale marketing subsidiary, based in Houston, Texas

PART I

References in this document to “Chesapeake,” the “Company,” “we,” “us” and “our” mean Chesapeake Utilities Corporation, its divisions and/or its wholly-owned subsidiaries, as appropriate in the context of the disclosure.

Safe Harbor for Forward-Looking Statements

We make statements in this Annual Report on Form 10-K that do not directly or exclusively relate to historical facts. Such statements are “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. One can typically identify forward-looking statements by the use of forward-looking words, such as “project,” “believe,” “expect,” “anticipate,” “intend,” “plan,” “estimate,” “continue,” “potential,” “forecast” or other similar words, or future or conditional verbs such as “may,” “will,” “should,” “would” or “could.” These statements represent our intentions, plans, expectations, assumptions and beliefs about future financial performance, business strategy, projected plans and objectives of the Company. These statements are subject to many risks and uncertainties. In addition to the risk factors described under Item 1A “Risk Factors,” the following important factors, among others, could cause actual future results to differ materially from those expressed in the forward-looking statements:

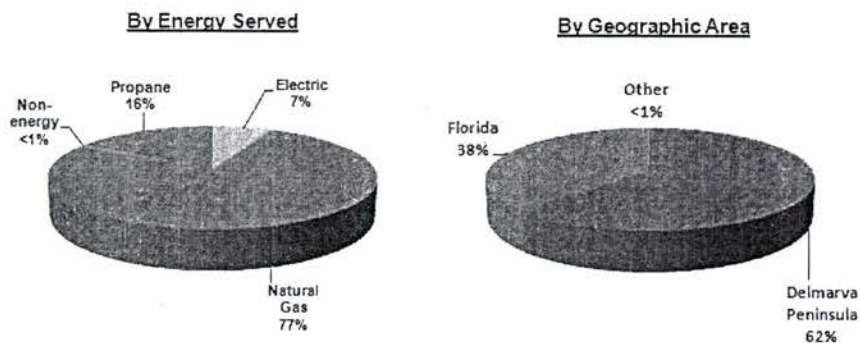

- state and federal legislative and regulatory initiatives that affect cost and investment recovery, have an impact on rate structures, and affect the speed at and the degree to which competition enters the electric and natural gas industries (including deregulation);
- the outcomes of regulatory, tax, environmental and legal matters, including whether pending matters are resolved within current estimates and whether the costs associated with such matters are adequately covered by insurance or recovered in rates;
- the loss of customers due to government-mandated sale of our utility distribution facilities;
- industrial, commercial and residential growth or contraction in our markets or service territories;
- the weather and other natural phenomena, including the economic, operational and other effects of hurricanes, ice storms and other damaging weather events;
- the timing and extent of changes in commodity prices and interest rates;
- general economic conditions, including any potential effects arising from terrorist attacks and any consequential hostilities or other hostilities or other external factors over which we have no control;
- changes in environmental and other laws and regulations to which we are subject and environmental conditions of property that we now or may in the future own or operate;
- the results of financing efforts, including our ability to obtain financing on favorable terms, which can be affected by various factors, including credit ratings and general economic conditions;
- the impact to the asset values and resulting higher costs and funding obligations of the Company's pension and other postretirement benefit plans as a result of potential downturns in the financial markets, lower discount rates or impacts associated with the Patient Protection and Affordable Care Act;
- the creditworthiness of counterparties with which we are engaged in transactions;
- the extent of success in connecting natural gas and electric supplies to transmission systems and in expanding natural gas and electric markets;
- the effect of accounting pronouncements issued periodically by accounting standard-setting bodies;
- conditions of the capital markets and equity markets during the periods covered by the forward-looking statements;
- the ability to successfully execute, manage and integrate merger, acquisition or divestiture plans, regulatory or other limitations imposed as a result of a merger, acquisition or divestiture, and the success of the business following a merger, acquisition or divestiture;
- the ability to establish and maintain new key supply sources;
- the effect of spot, forward and future market prices on our distribution, wholesale marketing and energy trading businesses;
- the effect of competition on our businesses;
- the ability to construct facilities at or below estimated costs;
- risks related to cyber-attack or failure of information technology systems; and
- changes in technology affecting our advanced information services business.

ITEM 1. BUSINESS.

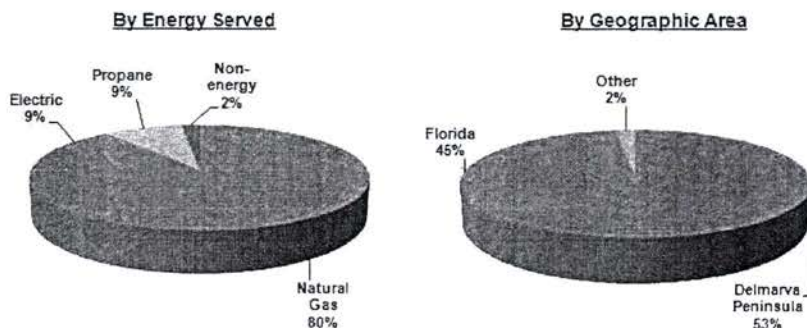

CORPORATE OVERVIEW

Chesapeake Utilities Corporation is a Delaware corporation formed in 1947. We are a diversified energy company engaged, through our operating divisions and subsidiaries, in various energy and other businesses. We operate primarily on the Delmarva Peninsula and throughout Florida, providing natural gas distribution and transmission, electric distribution and propane distribution service. The core of our business is regulated utilities, which provide stable earnings from their utility operations. Our unregulated businesses provide opportunities to achieve returns greater than those of a traditional utility. The following charts present operating income by energy served and geographic area for the year ended December 31, 2013 and average investment by energy served and geographic area as of December 31, 2013.

Operating Income by Energy Served and Geographic Area

Average Investment by Energy Served and Geographic Area

OPERATING SEGMENTS

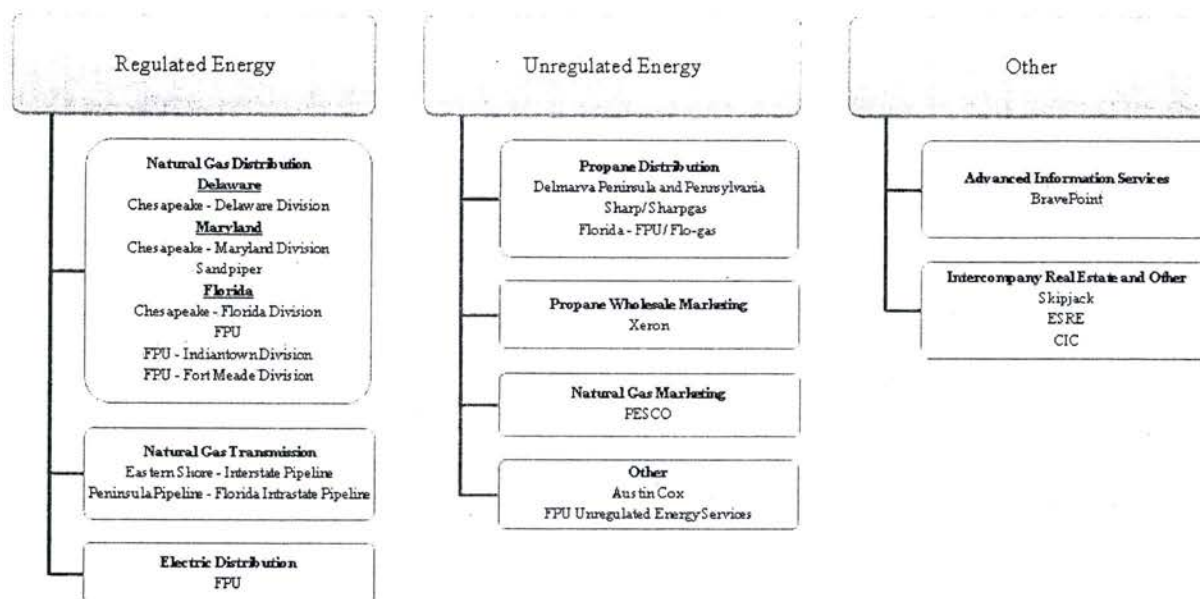

We operate within three reportable segments: Regulated Energy, Unregulated Energy and Other.

The Regulated Energy segment includes our natural gas distribution, natural gas transmission and electric distribution operations. All operations in this segment are regulated, as to their rates and service, by the PSC having jurisdiction in each state in which we operate or by the FERC in the case of Eastern Shore.

The Unregulated Energy segment includes our propane distribution, propane wholesale marketing and natural gas marketing operations, which are unregulated as to their rates and services. Also included in this segment are other unregulated energy services, such as energy-related merchandise sales and heating, ventilation and air conditioning, plumbing and electrical services.

The Other segment consists primarily of our advanced information services operation. Also included in this reportable segment are unregulated subsidiaries that own real estate leased to Chesapeake and certain corporate costs not allocated to other operations.

The following chart shows, in simplified form, our principal business structure:

The following table shows the size of each of our operating segments based on operating income for the year ended December 31, 2013 and total assets as of December 31, 2013 :

(dollars in thousands)

	Operating Income		Total Assets	
Regulated Energy	\$ 50,084	80%	\$ 708,950	85%
Unregulated Energy	12,353	20%	100,585	12%
Other	297	—%	27,987	3%
Total	\$ 62,734	100%	\$ 837,522	100%

Additional financial information by business segment is set forth in *Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operation* and *Item 8. Financial Statements and Supplementary Data* (see *Note 5, Segment Information*, in the Consolidated Financial Statements).

REGULATED ENERGY

Overview of Business

Regulated Energy is our largest segment and consists of our natural gas distribution operations in Delaware, Maryland and Florida; our electric distribution operation in Florida and our natural gas transmission operations on the Delmarva Peninsula and in Florida. Our natural gas and electric distribution operations, which are local distribution utilities, generate revenues based on tariff rates approved by the PSC of each state in which we operate. The PSCs, however, have authorized our utilities to negotiate rates, based on approved methodologies, with customers that have competitive alternatives. Eastern Shore, our interstate natural gas transmission subsidiary, bills its customers based upon the FERC-approved tariff rates, and the FERC has also authorized Eastern Shore to negotiate rates above or below the FERC-approved tariff rates. Peninsula Pipeline, our Florida intrastate pipeline subsidiary subject to regulation by Florida PSC, has negotiated contracts with third-party customers and with certain affiliates. Our rates are designed to provide us with the opportunity to generate revenues to recover all prudently incurred costs and provide a return on rate base sufficient to pay interest on debt and a reasonable return for our shareholders. Rate base generally consists of the original cost of utility plant less accumulated depreciation on utility plant in service, working capital and certain other assets and depending upon the regulatory jurisdictions, may also include deferred income tax liabilities and other additions or deletions.

The natural gas commodity market for Chesapeake's Florida division and FPU's Indiantown division has been deregulated. Accordingly, marketers, rather than a traditional utility, sell natural gas to end-use customers in those jurisdictions. For all of our other local distribution utilities, we have fuel cost recovery mechanisms authorized by the PSCs that allow us to periodically adjust fuel rates to reflect changes in the wholesale cost of natural gas and electricity and to ensure we recover all of the costs prudently incurred in purchasing natural gas and electricity for our customers.

Weather

Revenues from our residential and commercial sales are affected by seasonal variations in weather conditions, which directly influence the volume of natural gas and electricity sold and delivered. Specifically, customer demand substantially increases during the winter months, when natural gas and electricity are used for heating. For electricity, customer demand also increases during the summer months, when electricity is used for cooling. Accordingly, the volumes sold for these purposes are directly affected by the severity of summer and winter weather and can vary substantially from year to year. We measure the relative impact of weather by using an accepted degree-day methodology. Degree-day data is used to estimate amounts of energy required to maintain comfortable indoor temperature levels based on each day's average temperature. A degree-day is the measure of the variation in the weather based on the extent to which the average daily temperature (from 10:00 am to 10:00 am) falls above or below 65 degrees Fahrenheit. Each degree of temperature below 65 degrees Fahrenheit is counted as one heating degree-day. Each degree of temperature above 65 degrees Fahrenheit is counted as one cooling degree-day. Normal heating degree-days are based on the most recent 10-year average.

In an effort to stabilize the level of net revenues collected from customers in Maryland regardless of weather conditions, Chesapeake's Maryland division implemented a weather normalization adjustment for our residential heating and smaller commercial heating customers. A weather normalization adjustment is a billing adjustment mechanism that is designed to eliminate the effect of deviations from average seasonal temperatures on utility net revenues. For all of our other local distribution utilities, we do not currently have any weather normalization or "decoupled" rate mechanisms.

Recent Acquisition

On May 31, 2013, we completed the purchase of the operating assets of ESG. Approximately 11,000 residential and commercial underground propane distribution system customers acquired in this purchase are now being served by Sandpiper, our new subsidiary, and are subject to rate and service regulation by the Maryland PSC. We are evaluating the potential conversion of some of the underground propane distribution systems to natural gas distribution. Although these customers are currently being served with propane, we include Sandpiper's operating results in the Delmarva natural gas distribution operation.

Table of Contents

Operational Highlight

The following table presents operating revenues, volume and average customers by customer class for our natural gas and electric distribution operations for the year ended December 31, 2013 :

<i>(in thousands)</i>	Delmarva Natural Gas Distribution ⁽¹⁾		Florida Natural Gas Distribution ⁽¹⁾		FPU Electric Distribution				
Operating Revenues									
Residential	\$	52,594	59%	\$	26,543	34 %	\$	41,349	55 %
Commercial		28,445	32%		36,591	46 %		38,430	51 %
Industrial		6,349	7%		16,197	21 %		4,088	5 %
Other ⁽¹⁾		1,869	2%		(555)	(1)%		(8,917)	(11)%
Total Operating Revenues	\$	89,257	100%	\$	78,776	100 %	\$	74,950	100 %
Volume (in Dts for natural gas/MWHs for electric)									
Residential		3,189,000	30%		1,542,732	7 %		289,745	45 %
Commercial		3,378,707	31%		4,133,188	18 %		309,813	48 %
Industrial		4,169,615	39%		17,143,536	75 %		31,120	5 %
Other		69,090	—%		(81,723)	— %		18,347	2 %
Total		10,806,412	100%		22,737,733	100 %		649,025	100 %
Average Customers									
Residential		60,685	90%		64,056	90 %		23,742	76 %
Commercial		6,445	10%		5,904	8 %		7,407	24 %
Industrial		110	—%		1,005	2 %		2	— %
Other		5	—%		—	— %		—	— %
Total		67,245	100%		70,965	100 %		31,151	100 %

⁽¹⁾ Operating Revenues from "Other" sources include unbilled revenue, under (over) recoveries of fuel cost, conservation revenue, other miscellaneous charges, fees for billing services provided to third parties and adjustments for pass-through taxes.

⁽²⁾ Delmarva natural gas distribution operation includes Chesapeake's Delaware and Maryland divisions in addition to Sandpiper.

⁽³⁾ Florida natural gas distribution operation includes Chesapeake's Florida Division, FPU and FPU's Indiantown and Fort Meade divisions.

The following table presents operating revenues and design day capacity for Eastern Shore for the year ended December 31, 2013 and contracted firm transportation capacity at December 31, 2013 :

<i>(in thousands)</i>	Eastern Shore		
Operating Revenues			
Local distribution companies - affiliated ⁽¹⁾	\$	16,326	44%
Local distribution companies - non-affiliated		8,473	23%
Commercial and industrial		12,321	33%
Other ⁽²⁾		45	—%
Total Operating Revenues	\$	37,165	100%
Contracted firm transportation capacity (in Dts/d)			
Local distribution companies - affiliated		100,652	43%
Local distribution companies - non-affiliated		67,293	29%
Commercial and industrial		65,934	28%
Total		233,879	100%
Designed day capacity (in Dts/d)			
		234,379	—

⁽¹⁾ Eastern Shore's service to our local distribution affiliates is based on FERC-approved rates and is an integral component of the cost associated with providing natural gas supplies for those affiliates. We eliminate operating revenues of Eastern Shore against the cost of sales of those affiliates; however, our local distribution affiliates include this amount in their purchased fuel cost and recover it through fuel cost recovery mechanisms.

⁽²⁾ Operating revenues from "Other" sources are from rental of gas properties.

Peninsula Pipeline has three contracts with both affiliated and non-affiliated customers to provide firm transportation service. All of the contracts provide a fixed annual transportation fee. For the year ended December 31, 2013, operating revenues of Peninsula Pipeline were \$2.8 million, \$2.2 million of which were related to service to FPU under a contract with FPU, which has been approved by the Florida PSC. Peninsula Pipeline's operating revenue from FPU is eliminated against the cost of sales in consolidation; however, FPU includes this amount in its purchased fuel cost and recovers it through the fuel cost recovery mechanism.

Regulatory Matters

The following table highlights the key regulatory structure and the most recent base rate proceeding information for each of our major utilities:

	Chesapeake - Delaware Division	Chesapeake - Florida Division	FPU Natural Gas	FPU Electric	Chesapeake - Maryland Division	Eastern Shore
Commission Structure:	5 commissioners	5 commissioners	5 commissioners	5 commissioners	5 commissioners	5 commissioners
	Part-Time	Full-Time	Full-Time	Full-Time	Full-Time	Full-Time
	Gubernatorial Appointment	Gubernatorial Appointment	Gubernatorial Appointment	Gubernatorial Appointment	Gubernatorial Appointment	Presidential Appointment
Regulatory Jurisdiction:	Delaware PSC	Florida PSC	Florida PSC	Florida PSC	Maryland PSC	FERC
Base Rate Proceeding:						
Delay in collection of rates subsequent to filing application	60 days	90 days	90 days	90 days	180 days	Up to 180 days
Date of most recent application	7/6/2007	7/14/2009	12/17/2008	5/31/2006	5/1/2006	12/30/2010
Effective date of permanent rates	9/30/2008	1/14/2010	1/14/2010 ⁽¹⁾	5/22/2008	12/1/2007	7/29/2011
Rate increase (decrease) approved	\$325,000	\$2,536,300	\$7,969,000	\$3,856,900	\$648,000	\$805,000
Rate of return approved	10.25% ⁽²⁾	10.80% ⁽²⁾	10.85% ⁽²⁾	11.00% ⁽²⁾	10.75% ⁽²⁾	13.90% ⁽³⁾

⁽¹⁾ Effective date of the Order approving settlement agreement, which adjusted rates originally approved on June 4, 2009.

⁽²⁾ Allowed return on equity.

⁽³⁾ Allowed pre-tax, pre-interest rate of return

Our average investments in 2013 for regulated operations were: \$92.0 million for Delmarva natural gas distribution; \$177.0 million for Florida natural gas and electric distribution; and \$139.3 million for natural gas transmission.

The terms of the settlement agreement in Eastern Shore's most recent base rate proceeding provides a five-year moratorium on Eastern Shore's right to file a base rate increase and other parties' rights to challenge Eastern Shore's rates. It allows Eastern Shore to file for rate adjustments during those five years in the event certain costs related to government-mandated obligations are incurred and Eastern Shore's pre-tax earnings do not equal or exceed 13.9 percent. Eastern Shore is also required to file a base rate proceeding by January 2017.

In May 2013, the Maryland PSC approved our application for approval of the acquisition of the ESG operating assets and the transfer of the ESG franchises to Sandpiper. In this application, the Maryland PSC also approved a new gas service tariff and rates applicable to natural gas and propane distribution customers in Worcester County, Maryland. Sandpiper is required to file a base rate proceeding within two and a half years of Sandpiper's new service in Worcester County, Maryland, which commenced in May 2013.

In addition to the base rates approved by the PSCs, certain of our local distribution utilities have additional surcharge mechanisms, which were separately approved by their respective PSCs. Most notable surcharge mechanisms include Delaware's additional charges to facilitate natural gas service offerings designed to increase the availability of natural gas in portions of eastern Sussex County, Delaware, and Florida's GRIP surcharge designed to recover capital and other costs, inclusive of an appropriate return on investment, associated with accelerating the replacement of qualifying distribution mains.

See Item 8. *Financial Statements and Supplementary Data* (Note 18, *Rates and Other Regulatory Activities*, in the Consolidated Financial Statements) for more information.

Competition

Our natural gas and electric distribution operations and our natural gas transmission operations compete with other forms of energy, including natural gas, electricity, oil, propane and other alternative sources of energy. The principal competitive factors are price and, to a lesser extent, accessibility. Our natural gas distribution operations have several large industrial customers that are able to use fuel oil or propane as an alternative to natural gas. When oil or propane prices decline, these interruptible customers may convert to an alternative fuel source to satisfy their fuel requirements, and our sales volumes may decline. To address the uncertainty of alternative fuel prices, we use flexible pricing arrangements on both the supply and sales sides of our business to compete with alternative fuel price fluctuations.

Large industrial natural gas customers may be able to bypass our distribution and transmission systems and make direct connections with “upstream” interstate transmission pipelines when such connections are economically feasible. Certain large industrial electric customers may be capable of generating electricity for their own consumption. Although the risk of bypassing our systems is not considered significant, we may adjust services and rates for these customers to retain their business in certain situations.

Supplies, Transmission and Storage

We believe that the availability of supply and transmission of natural gas and electricity is adequate under existing arrangements to meet the anticipated needs of customers.

Chesapeake's Delaware and Maryland divisions use their firm transportation resources to meet a significant percentage of their projected demand requirements. They purchase firm natural gas supplies to meet those projected requirements with purchases of baseload, daily spot supplies and storage service. They have both firm and interruptible transportation service contracts with five interstate “open access” pipeline companies (Eastern Shore, Transco, Columbia, Gulf and TETLP) in order to meet customer demand. Their distribution system is directly interconnected with Eastern Shore's pipeline, which is directly interconnected with the upstream pipelines of Transco, Columbia and TETLP. The Gulf pipeline is directly interconnected with Columbia and indirectly interconnected with Eastern Shore's pipeline. Chesapeake's Delaware division has 71,754 Dts of maximum daily firm transportation capacity with Eastern Shore through contracts expiring on various dates between 2014 and 2027. It also has a total of 67,363 Dts of maximum daily firm transportation capacity with four upstream pipelines through contracts expiring between 2014 and 2028. Chesapeake's Maryland division has 27,898 Dts of maximum daily firm transportation capacity with Eastern Shore through contracts expiring on various dates between 2014 and 2027 and a total of 26,818 Dts of maximum daily firm transportation capacity with four upstream pipelines through contracts expiring between 2014 and 2027. The Delaware and Maryland divisions also have the capability to use propane-air peak-shaving equipment to supplement or displace natural gas purchases.

Chesapeake's Delaware and Maryland divisions contract with an unaffiliated energy marketing and risk management company through an asset management agreement to optimize their transportation and storage capacity and secure adequate supply of natural gas. The asset manager pays our divisions a fee, which our divisions share with their customers. The current asset management agreement expires in March 2015.

Sandpiper has a capacity, supply and operating agreement with EGWIC to purchase propane over a six -year term. Sandpiper's initial annual commitment is estimated at approximately 7.4 million gallons. Sandpiper also has 1,000 Dts of maximum daily firm transportation capacity with Eastern Shore through a contract expiring in 2027.

Chesapeake's Florida division has firm transportation service agreements with FGT and Gulfstream, totaling 26,092 to 28,639 Dts of daily firm transportation capacity expiring on various dates between 2020 and 2025. As a result of the deregulation of the natural gas sales market in Florida, the Florida PSC approved a program permitting the release of all of the capacity under these agreements to various third parties, including PESCO, our natural gas marketing subsidiary. We are contingently liable to FGT and Gulfstream if any party that acquired the capacity through release fails to pay the capacity charge.

FPU has firm transportation service agreements with FGT, Florida City Gas and Peninsula Pipeline, totaling 31,543 to 57,107 Dts of daily firm transportation capacity expiring on various dates between 2016 and 2033. FPU uses gas marketers and producers to procure all of its gas supplies to meet projected requirements. FPU also uses Peoples Gas to provide wholesale gas sales service in areas far from its interconnections with FGT.

Eastern Shore has three contracts with Transco for a total of 7,292 Dts of firm daily storage injection and withdrawal entitlements and total storage capacity of 288,003 Dts expiring on various dates between 2018 and 2023. Eastern Shore retains these firm storage services in order to provide swing transportation service and firm storage service to customers requesting such services.

FPU primarily purchases its wholesale electricity from two suppliers JEA and Gulf Power, under full requirements contracts expiring in December 2017 and 2019, respectively. The JEA contract provides generation and transmission service to northeast Florida. The Gulf Power contract provides generation and transmission service to northwest Florida. Our electric distribution operation also has a renewable energy purchase agreement with Rayonier that expires in 2023. FPU is committed under the Rayonier contract to purchase between 1.7 MWH and 3.0 MWH of electricity annually.

U NREGULATED E NERGY

Overview of Business

Our Unregulated Energy segment provides propane distribution, propane wholesale marketing, natural gas marketing services and other unregulated energy-related services to customers. Revenues generated from the Unregulated Energy segment are not subject to any federal, state or local pricing regulations. Our businesses in the Unregulated Energy segment typically complement our regulated businesses by offering propane as a fuel source where natural gas is not readily available or providing natural gas marketing service to customers who are able to procure their own supplies. Through competitive pricing and supply management, these businesses provide the opportunity to generate returns greater than those of a traditional utility.

Propane Distribution - Overview of Business

Our propane distribution operations sell propane primarily to residential, commercial/industrial and wholesale customers on the Delmarva Peninsula and in southeastern Pennsylvania through Sharp and Sharpgas and in Florida through FPU and Flo-gas. Many of our propane distribution customers are "bulk delivery" customers. We make deliveries of propane to the bulk delivery customers as needed, based on the level of propane remaining in the tank located at the customer's premises. We invoice and record revenues for our bulk delivery service customers at the time of delivery, rather than upon customers' actual usage, since the customers typically own the propane gas in the tank on their premises. We also have underground propane distribution systems serving various neighborhoods and communities. For the customers served by underground propane distribution systems, we have installed meters on their premises to measure consumption and bill them monthly.

Propane Distribution - Weather

Revenues from our propane distribution sales activities are affected by seasonal variations in weather conditions. Weather conditions directly influence the volume of propane sold and delivered to customers; specifically, customers' demand substantially increases during the winter months when propane is used for heating. The timing of deliveries to the bulk delivery customers can also vary significantly from year to year depending on weather variation. Accordingly, the propane volumes sold for this purpose are directly affected by the severity of winter weather and can vary substantially from year to year. Sustained warmer-than-normal temperatures will tend to reduce propane use, while sustained colder-than-normal temperatures will tend to increase consumption.

Propane Distribution - Operational Highlights

For the year ended December 31, 2013, operating revenues, total gallons sold and average customers by customer class for our Delmarva and Florida propane distribution operations were as follows:

<i>(in thousands)</i>	Delmarva Peninsula			Florida		
Operating Revenues						
Residential bulk	\$	24,573	31%	\$	5,526	28%
Residential metered		7,723	10%		4,779	24%
Commercial bulk		18,169	23%		6,692	33%
Commercial metered		—	—%		1,899	9%
Wholesale		24,576	31%		610	3%
Other ⁽¹⁾		4,591	5%		525	3%
Total Operating Revenues	\$	79,632	100%	\$	20,031	100%
Volume <i>(in gallons)</i>						
Residential bulk		9,192	22%		1,391	21%
Residential metered		3,318	8%		1,027	15%
Commercial bulk		10,482	25%		3,136	47%
Commercial metered		—	—%		673	10%
Wholesale		18,885	45%		449	7%
Other		—	—%		(42)	—%
Total		41,877	100%		6,634	100%
Average customers						
Residential bulk		23,760	67%		8,542	53%
Residential metered		7,255	20%		6,441	40%
Commercial bulk		3,962	11%		1,014	6%
Commercial metered		—	—%		264	1%
Wholesale		32	—%		3	—%
Other		715	2%		—	—%
Total		35,724	100%		16,264	100%

⁽¹⁾ Operating revenues from "Other" sources include revenues from customer loyalty programs; delivery, service and appliance fees; and unbilled revenues.

Propane Distribution - Competition

We compete with several other propane distributors in our geographic markets, primarily on the basis of price and our responsive and reliable service. Our competitors generally include local outlets of national distributors and local independent distributors, whose proximity to customers entails lower costs to provide service. As an energy source, propane competes with home heating oil and electricity, which are typically more expensive (based on equivalent unit of heat value). Since natural gas has historically been less expensive than propane, propane is generally not distributed in geographic areas served by natural gas pipeline or distribution systems.

Propane Distribution - Supplies, Transportation and Storage

We purchase propane for our propane distribution operations primarily from suppliers, including major oil companies, independent producers of natural gas liquids and from Xeron. Although supplies of propane from these and other sources are generally readily available for purchase, extreme market conditions, such as significant fluctuation in weather, closing of refineries and disruption in supply chain, could result in a reduction in available supplies.

Propane is transported by trucks and railroad cars from refineries, natural gas processing plants or pipeline terminals to our bulk storage facilities. We own various bulk propane storage facilities with an aggregate capacity of approximately 3.6 million gallons in Delaware, Maryland, Pennsylvania, Virginia and Florida. From these storage facilities, propane is delivered by "bobtail" trucks, owned and operated by us, to tanks located at the customers' premises.

Propane Wholesale Marketing

Through Xeron, we market propane to major independent oil and petrochemical companies, wholesale resellers and retail propane companies located primarily in the southeastern United States. Xeron enters into forward contracts with various counterparties to commit to purchase or sell an agreed-upon quantity of propane at an agreed-upon price at a specified future date, which typically

ranges from one to six months from the execution of the contract. At the expiration of the forward contracts, Xeron typically settles its purchases and sales financially, without taking physical delivery of the propane. Xeron also enters into futures and other option contracts that are traded on the InterContinentalExchange, Inc. The level and profitability of the propane wholesale marketing activity is affected by both propane wholesale price volatility and liquidity in the wholesale market. In 2013, Xeron had operating revenues, net of the associated cost of propane sold totaling approximately \$1.3 million. For further discussion of Xeron's wholesale marketing activities, market risks and controls that monitor Xeron's risks, refer to *Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations — Market Risk*. Xeron does not own physical storage facilities or equipment to transport propane; however, it contracts for storage and pipeline capacity to facilitate the sale of propane on a wholesale basis.

Natural Gas Marketing

We provide natural gas supply and supply management services through PESCO to 3,136 customers in Florida and 27 other customers, located primarily on the Delmarva Peninsula. In 2013, PESCO had operating revenues of \$53.7 million in Florida and \$8.0 million from customers located primarily on the Delmarva Peninsula. PESCO competes with regulated utilities and other unregulated third-party marketers to sell natural gas supplies directly to commercial and industrial customers through competitively-priced contracts. PESCO does not own or operate any natural gas transmission or distribution assets. The gas that PESCO sells is delivered to retail customers through affiliated and non-affiliated local distribution company systems and transmission pipelines. PESCO bills its customers directly or through the billing services of the regulated utilities that deliver the gas.

Other Unregulated Businesses

We provide heating, ventilation and air conditioning, plumbing and electrical services through Austin Cox to residential, commercial and industrial customers throughout the lower Delmarva Peninsula. FPU sells energy-related merchandise in Florida. Operating revenues in 2013 from these other unregulated businesses totaled \$4.1 million.

O T H E R

Overview of Business

The "Other" segment consists primarily of BravePoint, our advanced information services subsidiary; other unregulated subsidiaries, including Skipjack and ESRE that own real estate leased to affiliates; and certain unallocated corporate costs, which are not directly attributable to a specific business unit.

Advanced Information Services

BravePoint provides domestic and a limited number of international clients with information technology services and solutions for both enterprise and e-business applications. BravePoint provides the following products and services to its clients: Pro-2, ProfitZoom, 360 Analytics, Application Evolution, Software Development, Integration, Database services, Managed DBA, Application Expertise and Marketing Consulting. For the year ended December 31, 2013, BravePoint's operating revenue was \$19.1 million.

Skipjack and ESRE own and lease office buildings in Delaware and Maryland to affiliates of Chesapeake. CIC is an affiliated investment company incorporated in Delaware.

E N V I R O N M E N T A L C O M P L I A N C E

We are subject to federal, state and local laws and regulations governing environmental quality and pollution control. These laws and regulations require us to remove or remediate the effect on the environment of the disposal or release of specified substances at current and former operating sites. We have participated in the investigation, assessment or remediation, and have exposures at six former MGP sites. At December 31, 2013, we had \$10.7 million in environmental liabilities, representing our estimate of such future costs principally related to two of the six former MGP sites. The most significant site is located in West Palm Beach, Florida, where FPU previously operated an MGP and is currently implementing a remedial plan approved by the FDEP. The estimated cost of remediation for the West Palm Beach site ranges from approximately \$4.5 million to \$15.4 million. Chesapeake is also currently assessing a remediation plan and actively remediating a former MGP site in Winter Haven, Florida. The estimated cost of remediation for the Winter Haven site ranges from approximately \$443,000 to \$1.0 million. Base rates of our local distribution utilities include recovery of environmental remediation costs adequate to fully recover our current estimate of cost of remediation. We continue to expect that any additional costs related to environmental remediation and related activities beyond our current estimate will be recoverable from customers through rates. For additional information on each site, refer to *Item 8. Financial Statements and Supplementary Data* (see *Note 19, Environmental Commitments and Contingencies* in the Consolidated Financial Statements).

E M P L O Y E E S

As of December 31, 2013, we had a total of 842 employees, 122 of whom are union employees represented by two labor unions: the International Brotherhood of Electrical Workers and Commercial Workers Union, whose collective bargaining agreements expire in 2014 and 2016.

Our Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and other reports and amendments to these reports that we file with or furnish to the SEC are available free of charge at our website, www.chpk.com, as soon as reasonably practicable after we electronically file these reports with, or furnish these reports to, the SEC. The content of this website is not part of this report. These reports, and amendments to these reports, that we file with or furnish to the SEC are also available on the SEC's website, www.sec.gov. The public may also read and copy any materials that we file with the SEC at the SEC's Public Reference Room, 100 F Street, N.E., Washington, DC 20549-5546. The public may obtain information from the Public Reference Room by calling the SEC at 1-800-SEC-0330.

In addition, the following documents are available free of charge on our website, www.chpk.com:

- Business Code of Ethics and Conduct applicable to all employees, officers and directors;
- Code of Ethics for Financial Officers;
- Corporate Governance Guidelines;
- Charters for the Audit Committee, Compensation Committee and Corporate Governance Committee of the Board Directors; and
- Corporate Governance Guidelines on Director Independence.

Any of these reports or documents may also be obtained by writing to: Corporate Secretary; c/o Chesapeake Utilities Corporation, 909 Silver Lake Boulevard, Dover, DE 19904.

If we make any amendment to, or grant a waiver of, any provision of the Business Code of Ethics and Conduct or the Code of Ethics for Financial Officers applicable to our principal executive officer, president, principal financial officer, principal accounting officer or controller, the amendment or waiver will be disclosed within four business days in a press release, by website disclosure, or by filing a current report on Form 8-K with the SEC.

C E R T I F I C A T I O N T O T H E N Y S E

Our Chief Executive Officer certified to the NYSE on June 4, 2013, that as of that date, he was unaware of any violation by Chesapeake of the NYSE's corporate governance listing standards.

ITEM 1A. RISK FACTORS.

The following is a discussion of the primary factors that may affect the operations or financial performance of our regulated and unregulated businesses. Refer to the section entitled *Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations* of this report for an additional discussion of these and other related factors that affect our operations and/or financial performance.

FINANCIAL RISKS

Instability and volatility in the financial markets could negatively impact our ability to access capital at competitive rates.

Our business strategy includes the continued pursuit of growth, both organically and through acquisitions. To the extent that we do not generate sufficient cash flow from operations, we may incur additional indebtedness to finance our growth. We rely on access to both short-term and long-term capital markets as a significant source of liquidity for capital requirements not satisfied by the cash flows from our operations. We are committed to maintaining a sound capital structure and strong credit ratings to provide the financial flexibility needed to access capital markets when required. However, if we are not able to access capital at competitive rates, our ability to implement our strategic plan, undertake improvements and make other investments required for our future growth may be limited.

A downgrade in our credit rating could adversely affect our access to capital markets and our cost of capital.

Our ability to obtain adequate and cost-effective capital depends on our credit ratings, which are greatly affected by our financial performance and the liquidity of financial markets. A downgrade in our current credit ratings could adversely affect our access to capital markets, as well as our cost of capital.

If we fail to comply with our debt covenant obligations, we could experience adverse financial consequences that could affect our liquidity and ability to borrow funds.

Our long-term debt obligations and committed short-term lines of credit contain financial covenants related to debt-to-capital ratios and interest-coverage ratios. Failure to comply with any of these covenants could result in an event of default which, if not cured or waived, could result in the acceleration of outstanding debt obligations or the inability to borrow under certain credit agreements. Any such acceleration would cause a material adverse change in our financial condition.

An increase in interest rates may adversely affect our results of operations and cash flows.

An increase in interest rates, without the recovery of the higher cost of debt in the sales and/or transportation rates we charge our utility customers, could adversely affect future earnings. An increase in short-term interest rates would negatively affect our results of operations, which depend on short-term lines of credit to finance accounts receivable and storage gas inventories, as well as to temporarily finance capital expenditures.

Inflation may impact our results of operations, cash flows and financial position.

Inflation affects the cost of supply, labor, products and services required for operations, maintenance and capital improvements. To help cope with the effects of inflation on our capital investments and returns, we seek rate increases from regulatory commissions for regulated operations and closely monitor the returns of our unregulated operations. There can be no assurance that we will be able to obtain adequate and timely rate increases to offset the effects of inflation. To compensate for fluctuations in propane gas prices, we adjust our propane selling prices to the extent allowed by the market. There can be no assurance, however, that we will be able to increase propane sales prices sufficiently to compensate fully for such fluctuations in the cost of propane gas to us.

Our energy marketing subsidiaries are exposed to market risks, beyond our control, which could adversely affect our financial results and capital requirements.

Our energy marketing subsidiaries are subject to market risks beyond our control, including market liquidity and commodity price volatility. Although we maintain risk management policies, we may not be able to offset completely the price risk associated with volatile commodity prices, which could lead to volatility in earnings. Physical trading also has price risk on any net open positions at the end of each trading day, as well as volatility resulting from: (i) intra-day fluctuations of natural gas and/or propane prices, and (ii) daily price movements between the time natural gas and/or propane is purchased or sold for future delivery and the time the related purchase or sale is economically hedged. The determination of our net open position at the end of any trading day requires us to make assumptions as to future circumstances, including the use of natural gas and/or propane by our customers in relation to its anticipated market positions. Because the price risk associated with any net open position at the end of such day

may increase if the assumptions are not realized, we review these assumptions daily. Net open positions may increase volatility in our financial condition or results of operations if market prices move in a significantly favorable or unfavorable manner, because the changes in fair value of trading contracts are immediately recognized as profits or losses for financial accounting purposes. This volatility may occur, with a resulting increase or decrease in earnings or losses, even though the expected profit margin is essentially unchanged from the date the transactions were consummated.

Our energy marketing subsidiaries are exposed to credit risk of their counterparties.

Our energy marketing subsidiaries extend credit to counterparties and continually monitor and manage collections aggressively. Each of these subsidiaries is exposed to the risk that it may not be able to collect amounts owed to it. If the counterparty to such a transaction fails to perform, and any underlying collateral is inadequate, we could experience financial losses.

Our energy marketing subsidiaries are dependent upon the availability of credit to successfully operate their businesses.

Our energy marketing subsidiaries are dependent upon the availability of credit to buy propane and natural gas for resale or to trade. If financial market conditions decline generally, or the financial condition of these subsidiaries or of our Company declines, then the cost of credit available to these subsidiaries could increase. If credit is not available, or if credit is more costly, our results of operations, cash flows and financial condition may be adversely affected.

Current market conditions have adversely impacted the return on plan assets for our pension plans, which may require significant additional funding.

We have pension plans that are closed to new employees and the future benefits are frozen. The costs of providing benefits and related funding requirements of these plans are subject to changes in the market value of the assets that fund the plans and the discount rates used to estimate the pension benefit obligations. As a result of the extreme volatility and disruption in the domestic and international equity, bond and interest rate markets in recent years, the asset values and benefit obligations of Chesapeake's and FPU's Pension Plans have fluctuated significantly since 2008. The funded status of the plans and the related costs reflected in our financial statements are affected by various factors that are subject to an inherent degree of uncertainty, particularly in the current economic environment. Future losses of asset values and further declines in discount rates may necessitate accelerated funding of the plans in the future to meet minimum federal government requirements as well as higher pension expense to be recorded in future years. Adverse changes in the asset values and benefit obligations of our pension plans may require us to record higher pension expense and fund obligations earlier than originally planned, which would have an adverse impact on our cash flows from operations, decrease borrowing capacity and increase interest expense.

OPERATIONAL RISKS

Fluctuations in weather may cause a significant variance in our earnings.

Our natural gas and propane distribution operations are sensitive to fluctuations in weather conditions, which directly influence the volume of natural gas and propane we sell and deliver to our customers. A significant portion of our natural gas and propane distribution revenues is derived from the sales and deliveries of natural gas and propane to residential and commercial heating customers during the five-month peak heating season (November through March). If the weather is warmer than normal, we sell and deliver less natural gas and propane to customers, and earn less revenue, which could adversely affect our results of operations, cash flows and financial condition.

Our electric operation is also affected by variations in general weather conditions and particularly unusually severe weather conditions. Electricity is generally less seasonal than natural gas and propane sales because it is used for both heating and cooling in our service areas.

The amount and availability of natural gas, propane and electricity supplies are difficult to predict; a substantial reduction in available supplies could reduce our earnings in those segments.

Natural gas, propane and electricity production can be affected by factors beyond our control, such as weather and closings of energy generation facilities and refineries. If we are unable to obtain sufficient natural gas, electricity and propane supplies to meet demand, results in those businesses may be adversely affected. Any substantial decrease in the availability of supplies of natural gas, propane and electricity could result in increased supply costs and higher prices for customers, which could also adversely affect our financial condition and results of operations.

We rely on a limited number of natural gas, propane and electricity suppliers, the loss of which could have a material adverse effect on our financial condition and results of operations.

We have entered into various agreements with suppliers to purchase natural gas, propane and electricity to serve our customers. The loss of any significant suppliers or our inability to renew these contracts at favorable terms upon their expiration could significantly affect our ability to serve our customers and have a material adverse impact on our financial condition and results of operations.

A substantial disruption or lack of growth in interstate natural gas pipeline transmission and storage capacity and electric transmission capacity may impair our ability to meet customers' existing and future requirements.

In order to meet existing and future customer demands for natural gas and electricity, we must acquire sufficient supplies of natural gas and electricity, interstate pipeline transmission and storage capacity, and electric transmission capacity to serve such requirements. We must contract for reliable and adequate upstream transmission capacity for our distribution systems while considering the dynamics of the interstate pipeline and storage and electric transmission markets, our own on-system resources, as well as the characteristics of our markets. Our financial condition and results of operations would be materially and adversely affected if the future availability of these capacities were insufficient to meet future customer demands for natural gas and electricity. Currently, our Florida natural gas operation relies primarily on one pipeline system, FGT, for most of its natural gas supply and transmission. Our Florida electric operation relies primarily on two suppliers, Gulf Power for the northwest service territory and JEA for the northeast service territory. Any interruption to these systems could adversely affect our ability to meet the demands of FPU's customers and our earnings.

Commodity price increases may adversely affect the operating costs and competitive positions of our natural gas, electric and propane distribution operations, which may adversely affect our results of operations, cash flows and financial condition.

Natural Gas/Electric. Higher natural gas prices can significantly increase the cost of gas billed to our natural gas customers. Increases in the cost of coal, natural gas and other fuels used to generate electricity can significantly increase the cost of electricity billed to our electric customers. Damage to the production or transportation facilities of our suppliers, decreasing their supply of natural gas and electricity, could result in increased supply costs and higher prices for our customers. Such cost increases generally have no immediate effect on our revenues and net income because of our regulated fuel cost recovery mechanisms. Our net income, however, may be reduced by higher expenses that we may incur for uncollectible customer accounts and by lower volumes of natural gas and electricity deliveries when customers reduce their consumption. Therefore, increases in the price of natural gas, coal and other fuels can affect our operating cash flows and the competitiveness of natural gas and electricity as energy sources.

Propane. Propane costs are subject to volatile changes as a result of product supply or other market conditions, including weather and economic and political factors affecting crude oil and natural gas supply or pricing. For example, weather conditions could damage production or transportation facilities, which could result in decreased supplies of propane, increased supply costs and higher prices for customers. Such cost changes can occur rapidly and can affect profitability. There is no assurance that we will be able to pass on propane cost increases fully or immediately, particularly when propane costs increase rapidly. Therefore, average retail sales prices can vary significantly from year to year as product costs fluctuate in response to propane, fuel oil, crude oil and natural gas commodity market conditions. In addition, in periods of sustained higher commodity prices, declines in retail sales volumes due to reduced consumption and increased amounts of uncollectible accounts may adversely affect net income.

Our propane inventory is subject to inventory valuation risk, which may result in a write-down of inventory.

Our propane distribution operations own bulk propane storage facilities, with an aggregate capacity of approximately 3.6 million gallons. We purchase and store propane based on several factors, including inventory levels and the price outlook. We may purchase large volumes of propane at current market prices during periods of low demand and low prices, which generally occur during the summer months. Propane is a commodity, and as such, its price is subject to volatile fluctuations in response to changes in supply or other market conditions. We have no control over these market conditions. Consequently, the wholesale price of the propane that we purchase can change rapidly over a short period of time. The retail market price for propane could fall below the price at which we made the purchases, which would adversely affect our profits or cause sales from that inventory to be unprofitable. In addition, falling propane prices may result in inventory write-downs, as required by GAAP, if the market price of propane falls below our weighted average cost of inventory, which could adversely affect net income.

Operating events affecting public safety and the reliability of our natural gas and electric distribution and transmission systems could adversely affect our operations and increase our costs.

Our natural gas and electric operations are exposed to operational events and risks, such as major leaks, outages, mechanical failures and breakdown, operations below expected level of performance or efficiency and accidents that could affect public safety and the reliability of our distribution and transmission systems, significantly increase costs and cause loss of customer confidence.

If we are unable to recover from customers through the regulatory process, all or some of these costs and our authorized rate of return, our results of operations, financial condition and cash flows could be adversely affected.

We operate in a competitive environment, and we may lose customers to competitors.

Natural Gas. Our natural gas marketing operations compete with third-party suppliers to sell natural gas to commercial and industrial customers. Our natural gas transmission and distribution operations compete with interstate pipelines when our transmission and/or distribution customers are located close enough to a competing pipeline to make direct connections economically feasible. Failure to retain and grow our customer base in the natural gas operations would have an adverse effect on our financial condition, cash flows and results of operations.

Electric. While there is active wholesale power sales competition in Florida, our retail electric business through FPU has remained substantially free from direct competition from other electric service providers. Generally, however, our retail electric business through FPU remains subject to competition from other energy sources. Changes in the competitive environment caused by legislation, regulation, market conditions or initiatives of other electric power providers, particularly with respect to retail competition, could adversely affect our results of operations, cash flows and financial condition.

Propane. Our propane distribution operations compete with other propane distributors, primarily on the basis of service and price. Some of our competitors have significantly greater resources. Our ability to grow the propane distribution business is contingent upon capturing additional market share, expanding into new markets, and successfully utilizing pricing programs that retain and grow our customer base. Failure to retain and grow our customer base in our propane distribution operations would have an adverse effect on our results of operations, cash flows and financial condition.

Our propane wholesale marketing operation competes with various marketers, many of which have significantly greater resources and are able to obtain price or volumetric advantages.

Energy conservation could lower energy consumption and adversely affect our earnings.

We have seen various legislative and regulatory initiatives to promote energy efficiency and conservation at both federal and state levels. In response to the initiatives in the states in which we operate, we have put into place programs to promote energy efficiency by our current and potential customers. To the extent a PSC allows us to recover the cost of such energy efficiency programs, funding for such programs is recovered through the rates we charge to our regulated customers. However, lower energy consumption as a result of energy efficiency and conservation by current and potential customers may adversely affect our results of operations, cash flows and financial condition.

Changes in technology may adversely affect BravePoint's competitiveness.

BravePoint participates in a market that is characterized by rapidly changing technology and accelerating product introduction cycles. The success of BravePoint depends upon our ability to address the rapidly changing needs of our customers by developing and supplying high-quality, cost-effective products, product enhancements and services, on a timely basis, and by keeping pace with technological developments and emerging industry standards. There is no assurance that we will be able to keep up with technological advancements to the degree necessary to keep our products and services competitive.

Our use of derivative instruments may adversely affect our results of operations.

Fluctuating commodity prices may affect our earnings and financing costs because our propane distribution and wholesale marketing operations use derivative instruments, including forwards, futures, swaps and puts, to hedge price risk. While we have risk management policies and operating procedures in place to control our exposure to risk, if we purchase derivative instruments that are not properly matched to our exposure, our results of operations, cash flows, and financial condition may be adversely affected.

Changes in customer growth may affect earnings and cash flows.

Our ability to increase gross margins in our regulated energy and unregulated propane distribution businesses is dependent upon growth in the residential construction market, adding new commercial and industrial customers and conversion of customers to natural gas, electricity or propane from other energy sources. Slowdowns in growth may adversely affect our gross margin, earnings and cash flows.

Our businesses are capital intensive, and the increased costs and/or delays of capital projects may adversely affect our future earnings.

Our businesses are capital intensive and require significant investments in on-going infrastructure projects. There are limited materials and qualified vendors that can be used in our projects. Our ability to complete our infrastructure projects on a timely basis and manage the overall cost of those projects is affected by the availability of the necessary materials and qualified vendors. Our future earnings could be adversely affected if we are unable to manage such capital projects effectively, or if full recovery of such capital costs is not permitted in future regulatory proceedings.

Our regulated energy business may be at risk if franchise agreements are not renewed.

Our regulated natural gas and electric distribution operations hold franchises in each of the incorporated municipalities that require franchise agreements in order to provide natural gas and electricity. Our natural gas and electric distribution operations are currently in negotiations for franchises with certain municipalities for new service areas and renewal of some existing franchises. Ongoing financial results would be adversely impacted from the loss of service to certain operating areas within our electric or natural gas territories in the event that franchise agreements were not renewed.

A strike, work stoppage or a labor dispute could adversely affect our operations.

We are party to collective bargaining agreements with various labor unions at some of our Florida operations. A strike, work stoppage or a labor dispute with a union or employees represented by a union could cause interruption to our operations. If a strike, work stoppage or other labor dispute were to occur, our results could be adversely affected.

Accidents, natural disasters, severe weather (such as a major hurricane) and acts of terrorism could adversely impact earnings.

Inherent in energy transmission and distribution activities are a variety of hazards and operational risks, such as leaks, ruptures, fires, explosions, sabotage and mechanical problems. Natural disasters and severe weather may damage our assets, cause operational interruptions and result in the loss of human life. The threat of terrorism and the impact of retaliatory military and other action by the United States and its allies may lead to increased political, economic and financial market instability and volatility in the price of natural gas, electricity and propane that could affect our operations. In addition, future acts of terrorism could be directed against companies operating in the United States, and companies in the energy industry may face a heightened risk of exposure to acts of terrorism. The insurance industry may also be affected by natural disasters, severe weather and acts of terrorism, and as a result, the availability of insurance covering risks against which we and our competitors typically insure may be limited. In addition, the insurance we are able to obtain may have higher deductibles, higher premiums and more restrictive policy terms, which could adversely affect our results of operations, financial condition and cash flows.

A security breach disrupting our operating systems and facilities or exposing confidential information may adversely affect our reputation, disrupt our operations and increase our costs.

Security breaches of our information technology infrastructure, including cyber-attacks and cyber-terrorism, could lead to system disruptions or generate facility shutdowns. If such an attack or security breach were to occur, our business, results of operations and financial condition could be adversely affected. Additionally, the protection of customer, employee and Company data is crucial to our operational security. A breakdown or a breach in our systems that results in the unauthorized release of individually identifiable customer or other sensitive data could occur and have an adverse effect on our reputation, results of operations and financial condition. A breakdown or breach could also materially increase our costs of maintaining our system and protecting it against future breakdowns or breaches. We take reasonable precautions to safeguard our information systems from cyber-attacks and security breaches; however, there is no guarantee that the procedures implemented to protect against unauthorized access to our information systems are adequate to safeguard against all attacks and breaches.

R E G U L A T O R Y , L E G A L A N D E N V I R O N M E N T A L R I S K S

Regulation of our businesses, including changes in the regulatory environment, may adversely affect our results of operations, cash flows and financial condition.

The Delaware, Maryland and Florida PSCs regulate our utility operations in those states. Eastern Shore is regulated by the FERC. The PSCs and the FERC set the rates that we can charge customers for services subject to their regulatory jurisdiction. Our ability to obtain timely future rate increases and rate supplements to maintain current rates of return depends on regulatory approvals, and there can be no assurance that our regulated operations will be able to obtain such approvals or maintain currently authorized

rates of return. When our earnings from the regulated utilities exceed the authorized rate of return, the respective PSC, or the FERC in the case of Eastern Shore, may require us to reduce our rates charged to customers in the future.

We are dependent upon construction of new facilities to support future growth in earnings in our natural gas and electric distribution and natural gas transmission operations.

Construction of new facilities required to support future growth is subject to various regulatory and developmental risks, including but not limited to: (i) our ability to obtain necessary approvals and permits from regulatory agencies on a timely basis and on terms that are acceptable to us; (ii) potential changes in federal, state and local statutes and regulations, including environmental requirements, that prevent a project from proceeding or increase the anticipated cost of the project; (iii) inability to acquire rights-of-way or land rights on a timely basis on terms that are acceptable to us; (iv) lack of anticipated future growth in available natural gas and electricity supply; and (v) insufficient customer throughput commitments.

We are subject to operating and litigation risks that may not be fully covered by insurance.

Our operations are subject to the operating hazards and risks normally incidental to handling, storing, transporting, transmitting and delivering natural gas, electricity and propane to end users. From time to time, we are a defendant in legal proceedings arising in the ordinary course of business. We maintain insurance policies with insurers to cover our general liabilities in the amount of \$51 million, which we believe are reasonable and prudent. There can be no assurance, however, that such insurance will be adequate to protect us from all material expenses related to potential future claims for personal injury and property damage or that such levels of insurance will be available in the future at economical prices.

We may face certain regulatory and financial risks related to pipeline safety legislation.

A number of legislative proposals to implement increased oversight over natural gas pipeline operations and increased investment in facilities to inspect pipeline facilities, upgrade pipeline facilities, or control the impact of a breach of such facilities are pending at the federal level. Additional operating expenses and capital expenditures may be necessary to remain in compliance with the increased federal oversight resulting from such proposals. If such legislation is adopted and we incur additional expenses and expenditures as a result, our financial condition, results of operations and cash flows could be adversely affected, particularly if we are not authorized through the regulatory process to recover from customers some or all of these costs and our authorized rate of return.

Costs of compliance with environmental laws may be significant.

We are subject to federal, state and local laws and regulations governing environmental quality and pollution control. These evolving laws and regulations may require expenditures over a long period of time to control environmental effects at our current and former operating sites, especially former MGP sites. Compliance with these legal obligations requires us to commit capital. If we fail to comply with environmental laws and regulations, even if such failure is caused by factors beyond our control, we may be assessed civil or criminal penalties and fines.

To date, we have been able to recover, through regulatory rate mechanisms, the costs associated with the remediation of former MGP sites. There is no guarantee, however, that we will be able to recover future remediation costs in the same manner or at all. A change in our approved rate mechanisms for recovery of environmental remediation costs at former MGP sites could adversely affect our results of operations, cash flows and financial condition.

Further, existing environmental laws and regulations may be revised, or new laws and regulations seeking to protect the environment may be adopted and be applicable to us. Revised or additional laws and regulations could result in additional operating restrictions on our facilities or increased compliance costs, which may not be fully recoverable.

Derivatives legislation and the implementation of related rules could have an adverse impact on our ability to hedge risks associated with our business.

The Dodd-Frank Act regulates derivative transactions, which include certain instruments used in our risk management activities. The Dodd-Frank Act contemplates that most swaps will be required to be cleared through a registered clearing facility and traded on a designated exchange or swap execution facility, subject to certain exceptions for entities that use swaps to hedge or mitigate commercial risk. Although the Dodd-Frank Act includes significant new provisions regarding the regulation of derivatives, the impact of those requirements will not be known definitively until regulations have been adopted and fully implemented by both the SEC and the Commodities Futures Trading Commission, and market participants establish registered clearing facilities under those regulations. The legislation and any new regulations could increase the operational and transactional cost of derivatives contracts and affect the number and/or creditworthiness of available counterparties.

Our business may be subject in the future to additional regulatory and financial risks associated with global warming and climate change.

There have been a number of federal and state legislative and regulatory initiatives proposed in recent years in an attempt to control or limit the effects of global warming and overall climate change, including greenhouse gas emissions, such as carbon dioxide. The adoption of this type of legislation by Congress or similar legislation by states or the adoption of related regulations by federal or state governments mandating a substantial reduction in greenhouse gas emissions in the future could have far-reaching and significant impacts on the energy industry. Such new legislation or regulations could result in increased compliance costs for us or additional operating restrictions on our business, affect the demand for natural gas and propane or impact the prices we charge to our customers. At this time, we cannot predict the potential impact of such laws or regulations that may be adopted on our future business, financial condition or financial results.

ITEM 1B. UNRESOLVED STAFF COMMENTS.

None.

ITEM 2. PROPERTIES.

Key Properties

We own approximately 1,214 miles of natural gas distribution mains (together with related service lines, meters and regulators) located in New Castle, Kent and Sussex Counties, Delaware; and Cecil, Caroline, Dorchester, Wicomico and Worcester Counties, Maryland. We own 2,642 miles of natural gas distribution mains (and related equipment) in Nassau, Polk, Osceola, Citrus, DeSoto, Liberty, Hillsborough, Holmes, Jackson, Gadsden, Gilchrist, Union, Washington, Pasco, Suwannee, Palm Beach, Broward, Martin, Marion, Seminole and Volusia Counties, Florida. In addition, we have adequate gate stations to handle receipt of the gas into each of the distribution systems. We also own facilities in Delaware and Maryland, which we use for propane-air injection during periods of peak demand.

We own and operate through Eastern Shore approximately 437 miles of transmission pipeline, extending from supply interconnects at Parkesburg, Daleville and Honey Brook, Pennsylvania; and Hockessin, Delaware, to 90 delivery points in southeastern Pennsylvania, Delaware and the eastern shore of Maryland. We also own and operate through Peninsula Pipeline approximately eight miles of transmission pipeline in Suwannee County, Florida. We also own approximately 45 percent of the 16-mile pipeline extending from the Duval/Nassau County line to Amelia Island in Nassau County, Florida. The remaining 55 percent of the pipeline is owned by Peoples Gas.

We own and operate through FPU 20 miles of electric transmission line located in Nassau County, Florida and 881 miles of electric distribution line in Jackson, Liberty, Calhoun and Nassau Counties, Florida.

We own 479 miles of underground propane distribution mains in Kent, New Castle and Sussex Counties, Delaware; Dorchester, Princess Ann, Queen Anne's, Somerset, Talbot, Wicomico and Worcester Counties, Maryland; Chester and Delaware Counties, Pennsylvania; and Alachua, Brevard, Broward, Citrus, Duval, Hillsborough, Marion, Nassau, Orange, Palm Beach, Polk, Seminole, St. Johns and Volusia Counties, Florida.

We own bulk propane storage facilities, with an aggregate capacity of approximately 2.7 million gallons, at 31 plant facilities in Delaware, Maryland, Pennsylvania and Virginia, located on real estate that is either owned or leased by us. In Florida, we own 39 bulk propane storage facilities with a total capacity of 906,000 gallons. Xeron does not own physical storage facilities or equipment to transport propane; however, it leases propane storage and pipeline capacity from non-affiliated third parties.

We own offices and operate facilities in the following locations: Worcester, Wicomico, Dorchester, Talbot, Cecil and Somerset Counties, Maryland; Kent and Sussex Counties, Delaware; Accomack County, Virginia; and Palm Beach, Volusia, Levy, Martin, Jackson, Broward, Nassau, Brevard, Alachua, Hendry, Okeechobee, and Polk Counties, Florida.

Lien

All of the assets owned by FPU are subject to a lien in favor of the holders of its first mortgage bond securing its indebtedness under its Mortgage Indenture and Deed of Trust. FPU owns offices and operates facilities in the following locations: Palm Beach, Volusia, Levy, Martin, Jackson, Broward, Nassau, Brevard, Alachua, Hendry and Okeechobee Counties, Florida. The FPU assets subject to the lien also include: 1,800 miles of natural gas distribution mains (and related equipment) in its service areas; 20 miles of electric transmission line located in Nassau County, Florida; 881 miles of electric distribution line located in Jackson, Liberty, Calhoun and Nassau Counties in Florida; 39 bulk propane storage facilities with a total capacity of 906,000 gallons located in south and central Florida; and 71 miles of underground propane distribution mains in Alachua, Brevard, Broward, Citrus, Duval, Hillsborough, Marion, Nassau, Orange, Palm Beach, Polk, Seminole, St. Johns and Volusia Counties, Florida.

ITEM 3. LEGAL PROCEEDINGS.

GENERAL

We are involved in various legal actions and claims arising in the normal course of business. We are also involved in certain administrative proceedings before various governmental or regulatory agencies concerning rates. In the opinion of management, the ultimate disposition of these current proceedings will not have a material effect on our consolidated financial position, results of operations or cash flows.

LEGAL PROCEEDINGS

On March 2, 2011, the City of Marianna filed a complaint against FPU in the Circuit Court of the Fourteenth Judicial Circuit in and for Jackson County, Florida. In the complaint, the City of Marianna alleged three breaches of the Franchise Agreement by FPU: (i) FPU failed to develop and implement TOU and interruptible rates that were mutually agreed to by the City of Marianna and FPU; (ii) mutually agreed upon TOU and interruptible rates by FPU were not effective or in effect by February 17, 2011; and (iii) FPU did not have such rates available to all of FPU's customers located within and without the corporate limits of the City of Marianna. The City of Marianna sought a declaratory judgment allowing it to exercise its option under the Franchise Agreement to purchase FPU's property (consisting of the electric distribution assets) within the City of Marianna. Any such purchase would be subject to approval by the Marianna Commission, which would also need to approve the presentation of a referendum to voters in the City of Marianna related to the purchase and the operation by the City of Marianna of an electric distribution facility.

Prior to the scheduled trial date, FPU and the City of Marianna reached an agreement in principle to resolve their dispute, which resulted in the City of Marianna dismissing its legal action with prejudice on February 11, 2013. Subsequently, FPU and the City of Marianna entered into a settlement agreement, which contemplated, among other items, the City of Marianna proceeding with a referendum on the purchase of FPU's facilities within the City of Marianna. On April 9, 2013, the referendum took place, and the citizens of the City of Marianna voted, by a wide margin, to reject the purchase of FPU's facilities by the City of Marianna. As a result of the dismissal with prejudice of the legal action by the City of Marianna and the outcome of the referendum on the purchase of FPU's facilities, we no longer have any contingencies related to claims by the City of Marianna.

ITEM 4A. EXECUTIVE OFFICERS OF THE REGISTRANT.

Set forth below are the names, ages, and positions of our executive officers with their recent business experience. The age of each officer is as of the filing date of this report.

Table of Contents

Name	Age	Position
Michael P. McMasters	55	<p>President (March 2010 - present)</p> <p>Chief Executive Officer (January 2011 - present)</p> <p>Director (March 2010 - present)</p> <p>Executive Vice President (September 2008 - February 2010)</p> <p>Chief Operating Officer (September 2008 - December 2010)</p> <p>Chief Financial Officer (January 1997 - September 2008)</p> <p><i>Mr. McMasters also previously served as Senior Vice President, Vice President, Treasurer, Director of Accounting and Rates, and Controller.</i></p>
Beth W. Cooper	47	<p>Senior Vice President (September 2008 - present)</p> <p>Chief Financial Officer (September 2008 - present)</p> <p>Corporate Secretary (June 2005 - present)</p> <p>Vice President (June 2005 - September 2008)</p> <p>Treasurer (March 2003 - May 2012)</p> <p><i>Ms. Cooper also previously served as Assistant Vice President, Assistant Treasurer, Assistant Secretary, Director of Internal Audit, and Director of Strategic Planning.</i></p>
Elaine B. Bittner	44	<p>Senior Vice President of Strategic Development (May 2013 - present)</p> <p>Vice President of Strategic Development (June 2010 - May 2013)</p> <p>Vice President, Eastern Shore (May 2005 - June 2010)</p> <p><i>Ms. Bittner also previously served as Director of Eastern Shore; Director of Customer Services and Regulatory Affairs for Eastern Shore; Director of Environmental Affairs and Environmental Engineer.</i></p>
Stephen C. Thompson	53	<p>Senior Vice President (September 2004 - present)</p> <p>President, Eastern Shore (January 1997 - present)</p> <p>Vice President (May 1997 - September 2004)</p> <p><i>Mr. Thompson also previously served as Director of Gas Supply and Marketing for Eastern Shore; Superintendent of Eastern Shore; and Regional Manager for Florida distribution operations.</i></p>
Jeffrey M. Householder	56	<p>President of Florida Public Utilities Company (June 2010 - present)</p>

PART II

ITEM 5. MARKET FOR THE REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES.

COMMON STOCK PRICE RANGES, COMMON STOCK DIVIDENDS AND SHAREHOLDER INFORMATION:

At February 28, 2014, there were 2,342 holders of record of Chesapeake common stock. Our common stock is listed on the NYSE under the symbol "CPK." The high, low and closing prices of our common stock and dividends declared per share for each calendar quarter during 2013 and 2012 were as follows:

	Quarter Ended	High	Low	Close	Dividends Declared Per Share
2013					
	March 31	\$ 50.39	\$ 45.84	\$ 49.05	\$ 0.365
	June 30	\$ 55.86	\$ 48.26	\$ 51.49	\$ 0.385
	September 30	\$ 60.08	\$ 50.84	\$ 52.49	\$ 0.385
	December 31	\$ 61.17	\$ 50.53	\$ 60.02	\$ 0.385
2012					
	March 31	\$ 43.83	\$ 39.89	\$ 41.12	\$ 0.345
	June 30	\$ 45.15	\$ 40.22	\$ 43.72	\$ 0.365
	September 30	\$ 48.51	\$ 43.65	\$ 47.36	\$ 0.365
	December 31	\$ 48.92	\$ 41.17	\$ 45.40	\$ 0.365

We have paid a cash dividend to common stock shareholders for 53 consecutive years. Dividends are payable at the discretion of our Board of Directors. Future payment of dividends, and the amount of these dividends, will depend on our financial condition, results of operations, capital requirements, and other factors. We declared quarterly cash dividends on our common stock in 2013 and 2012, totaling \$1.52 per share and \$1.44 per share, respectively.

Indentures to our long-term debt contain various restrictions which limit our ability to pay dividends. Each of our unsecured senior notes contains a "Restricted Payments" covenant. The most restrictive covenants of this type are included within the 7.83 percent Senior Notes, due January 1, 2015. The covenant provides that we cannot pay or declare any dividends or make any other Restricted Payments (such as dividends) in excess of the sum of \$10.0 million plus consolidated net income of the Company accrued on and after January 1, 2001. As of December 31, 2013, our cumulative consolidated net income base was \$218.1 million, offset by Restricted Payments of \$117.7 million, leaving \$100.5 million of cumulative net income free of restrictions.

FPU's first mortgage bonds due in 2022 contain a similar restriction that limits the payment of dividends by FPU. They provide that FPU cannot make dividend or other restricted payments in excess of the sum of \$2.5 million plus FPU's consolidated net income accrued on and after January 1, 1992. As of December 31, 2013, FPU had a cumulative net income base of \$95.1 million, offset by restricted payments of \$37.6 million, leaving \$57.5 million of cumulative net income of FPU free of restrictions based on this covenant.

No securities were sold during the year 2013 that were not registered under the Securities Act of 1933, as amended.

PURCHASES OF EQUITY SECURITIES BY THE ISSUER

The following table sets forth information on purchases by or on behalf of Chesapeake of shares of its common stock during the quarter ended December 31, 2013.

<u>Period</u>	<u>Total Number of Shares Purchased</u>	<u>Average Price Paid per Share</u>	<u>Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs ⁽¹⁾</u>	<u>Maximum Number of Shares That May Yet Be Purchased Under the Plans or Programs ⁽²⁾</u>
October 1, 2013 through October 31, 2013 ⁽¹⁾	274	\$ 50.61	—	—
November 1, 2013 through November 30, 2013	—	—	—	—
December 1, 2013 through December 31, 2013	—	—	—	—
Total	274	\$ 50.61	—	—

⁽¹⁾ Chesapeake purchased shares of common stock on the open market for the purpose of reinvesting the dividend on shares held in the Rabbi Trust accounts for certain Directors and Senior Executives under the Non-Qualified Deferred Compensation Plan. The Non-Qualified Deferred Compensation Plan is discussed in detail in *Item 8, Financial Statements and Supplementary Data* (see *Note 16, Employee Benefit Plans*, in the Consolidated Financial Statements). During the quarter, 274 shares were purchased through the reinvestment of dividends.

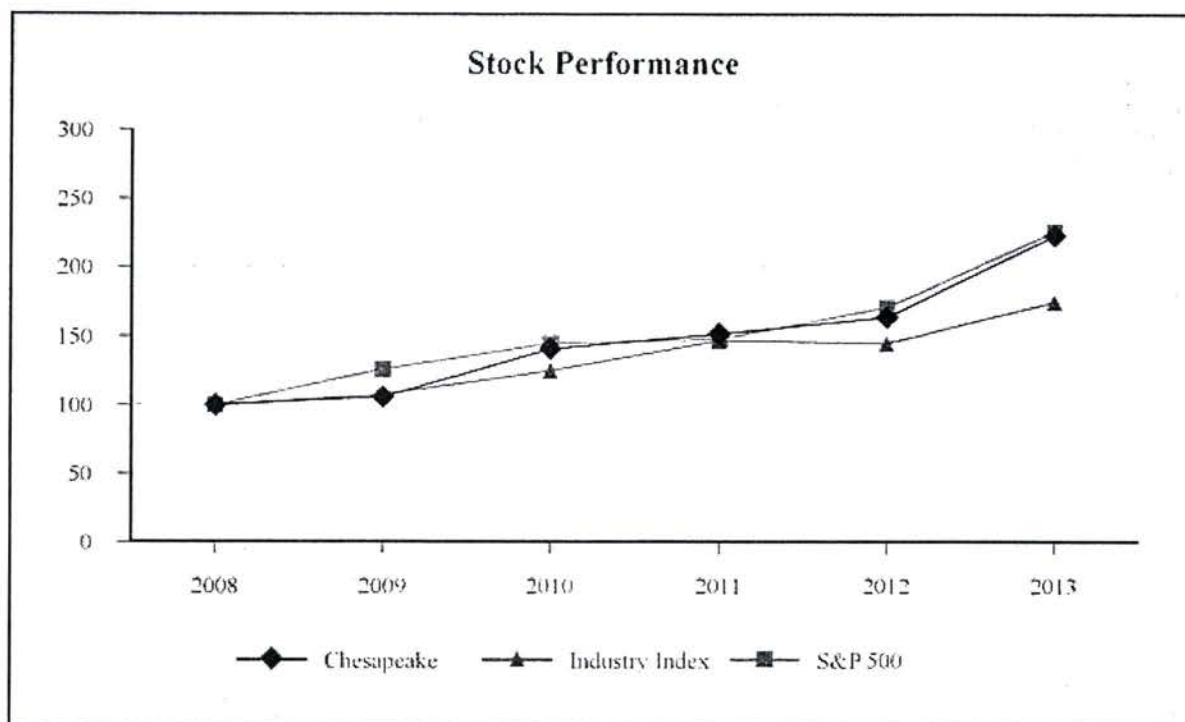

⁽²⁾ Except for the purpose described in Footnote ⁽¹⁾, Chesapeake has no publicly announced plans or programs to repurchase its shares.

Discussion of our compensation plans, for which shares of Chesapeake common stock are authorized for issuance, is included in the portion of the Proxy Statement captioned "Equity Compensation Plan Information" to be filed no later than March 31, 2014, in connection with our Annual Meeting to be held on or about May 6, 2014, and is incorporated herein by reference.

COMMON STOCK PERFORMANCE GRAPH

The stock performance graph and table below compares cumulative total stockholder return on our common stock during the five fiscal years ended December 31, 2013, with the cumulative total stockholder return of the S&P 500 Index and the cumulative total stockholder return of the Edward Jones Natural Gas Distribution Group, a published listing of selected gas distribution utilities' results, which consists of Chesapeake and ten other companies, including: AGL Resources, Inc., Atmos Energy Corporation, Delta Natural Gas Company, Inc., The Laclede Group, Inc., New Jersey Resources Corporation, Northwest Natural Gas Company, Piedmont Natural Gas Company, Inc., RGC Resources, Inc., South Jersey Industries, Inc., and WGL Holdings, Inc.

The comparison assumes \$100 was invested on December 31, 2008 in our common stock and in each of the foregoing indices and assumes reinvested dividends. The comparisons in the graph below are based on historical data and are not intended to forecast the possible future performance of our common stock.

	2008	2009	2010	2011	2012	2013
Chesapeake	\$ 100	\$ 106	\$ 141	\$ 152	\$ 164	\$ 223
Industry Index	\$ 100	\$ 108	\$ 125	\$ 147	\$ 145	\$ 175

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This section provides management's discussion of Chesapeake and its consolidated subsidiaries, with specific information on results of operations, liquidity and capital resources, as well as discussion of how certain accounting principles affect our financial statements. It includes management's interpretation of our financial results and our operating segments, the factors affecting these results, the major factors expected to affect future operating results as well as investment and financing plans. This discussion should be read in conjunction with our Consolidated Financial Statements and notes thereto in *Item 8, Financial Statements and Supplementary Data*.

Several factors exist that could influence our future financial performance, some of which are described in *Item 1A, Risk Factors*. They should be considered in connection with forward-looking statements contained in this report, or otherwise made by or on behalf of us, since these factors could cause actual results and conditions to differ materially from those set out in such forward-looking statements.

The following discussions and those later in the document on operating income and segment results include the use of the term "gross margin." Gross margin is determined by deducting the cost of sales from operating revenue. Cost of sales includes the purchased cost of natural gas, electricity and propane and the cost of labor spent on direct revenue-producing activities. Gross margin should not be considered an alternative to operating income or net income, which are determined in accordance with GAAP. We believe that gross margin, although a non-GAAP measure, is useful and meaningful to investors as a basis for making investment decisions. It provides investors with information that demonstrates the profitability achieved by us under our allowed rates for regulated energy operations and under our competitive pricing structure for non-regulated segments. Our management uses gross margin in measuring our business units' performance and has historically analyzed and reported gross margin information publicly. Other companies may calculate gross margin in a different manner.

INTRODUCTION

We are a diversified utility company engaged, directly or through subsidiaries, in regulated energy businesses, unregulated energy businesses, and other unregulated businesses, including advanced information services.

Our strategy is focused on growing earnings from a stable utility foundation and investing in related businesses and services that provide opportunities for returns greater than traditional utility returns. The key elements of this strategy include:

- executing a capital investment program in pursuit of organic growth opportunities that generate returns equal to or greater than our cost of capital;
- expanding the regulated energy distribution and transmission businesses into new geographic areas and providing new services in our current service territories;
- expanding the propane distribution business in existing and new markets through leveraging our community gas system services and our bulk delivery capabilities;
- expanding both our regulated energy and unregulated energy businesses through strategic acquisitions;
- utilizing our expertise across our various businesses to improve overall performance;
- pursuing and entering new unregulated energy markets and business lines that will complement our existing strategy and operating units;
- enhancing marketing channels to attract new customers;
- providing reliable and responsive customer service to existing customers so they become our best promoters;
- engaging our customers through a distinctive service excellence initiative;
- developing and retaining a high performing team that advances our goals;
- empowering and engaging our employees at all levels to live our brand and vision;
- demonstrating community leadership and engaging our local communities and governments in a cooperative and mutually beneficial way;
- maintaining a capital structure that enables us to access capital as needed;
- maintaining a consistent and competitive dividend for shareholders; and
- creating and maintaining a diversified customer base, energy portfolio and utility foundation.

C RITICAL A CCOUNTING P OLICIES

We prepare our financial statements in accordance with GAAP. Application of these accounting principles requires the use of estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosures of contingencies during the reporting period. We base our estimates on historical experience and on various assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying value of assets and liabilities that are not readily apparent from other sources. Since most of our businesses are regulated and the accounting methods used by these businesses must comply with the requirements of the regulatory bodies, the choices available are limited by these regulatory requirements. In the normal course of business, estimated amounts are subsequently adjusted to actual results that may differ from estimates. Management believes that the following policies require significant estimates or other judgments of matters that are inherently uncertain. These policies and their application have been reviewed by our Audit Committee.

Regulatory Assets and Liabilities

As a result of the ratemaking process, we record certain assets and liabilities in accordance with FASB ASC Topic 980, *Regulated Operations*, and consequently, the accounting principles applied by our regulated energy businesses differ in certain respects from those applied by the unregulated businesses. Costs are deferred when there is a probable expectation that they will be recovered in future revenues as a result of the regulatory process. As more fully described in *Item 8, Financial Statements and Supplementary Data* (see *Note 2, Summary of Significant Accounting Policies* in the Consolidated Financial Statements), we have recorded regulatory assets of \$69.0 million and regulatory liabilities of \$48.1 million at December 31, 2013. If we were required to terminate application of ASC Topic 980, we would be required to recognize all such deferred amounts as a charge or a credit to earnings, net of applicable income taxes. Such an adjustment could have a material effect on our results of operations.

Valuation of Environmental Regulatory Assets and Liabilities

As more fully described in *Item 8, Financial Statements and Supplementary Data* (see *Note 19, Environmental Commitments and Contingencies*, in the Consolidated Financial Statements), we are currently participating in the investigation, assessment or remediation of six former MGP sites. We have also been in discussions with the MDE regarding a seventh former MGP site. Amounts have been recorded as environmental liabilities and regulatory assets based on estimates of future costs to remediate these sites, which are provided by independent consultants, and future recovery of those costs in rates. At December 31, 2013, we had \$10.7 million in environmental liabilities, representing our estimate of such future costs. We also had \$5.5 million in regulatory and other assets, representing the amount of our environmental remediation costs to be recovered in future rates. There is uncertainty in these amounts, as the EPA, or other applicable state environmental authority, may not have selected the final remediation methods. In addition, there is uncertainty with regard to amounts that may be recovered from other potentially responsible parties.

Derivatives

We use derivative and non-derivative instruments to manage the risks related to obtaining adequate supplies and the price fluctuations of natural gas, electricity and propane. We also use derivative instruments to engage in propane wholesale marketing activities. We continually monitor the use of these instruments to ensure compliance with our risk management policies and account for them in accordance with the appropriate GAAP, such that every derivative instrument be recorded as either an asset or a liability measured at its fair value. It also requires that changes in the derivatives' fair value are recognized in the current period earnings unless specific hedge accounting criteria is met. If these instruments do not meet the definition of derivatives or are considered "normal purchases and sales," they are accounted for on an accrual basis of accounting.

Additionally, GAAP also requires us to classify the derivative assets and liabilities based on the lowest level of input that is significant to the fair value measurement. Our assessment of the significance of a particular input to the fair value measurement requires judgment and may affect the fair value of the assets and liabilities and their placement within the fair value hierarchy.

During the last three years, we had the following derivative assets and liabilities:

- Propane forward contracts entered into by Xeron; and
- Propane put and call options entered into by Sharp.

We determined that certain propane put and call options met the specific hedge accounting criteria. We also determined that our contracts for the purchase or sale of natural gas, electricity and propane either did not meet the definition of derivatives as they did not have a minimum requirement to purchase/sell or were considered "normal purchases and sales," as they provided for the purchase or sale of natural gas, electricity or propane to be delivered in quantities that we expect to use and sell by our operations over a reasonable period of time in the normal course of business. Accordingly, these contracts were accounted for on an accrual basis of accounting.

As of December 31, 2013, we recorded \$385,000 and \$127,000 of derivative assets and liabilities. As of December 31, 2012, we recorded \$210,000 and \$331,000 of derivative assets and liabilities.

Operating Revenues

Revenues for our natural gas and electric distribution operations are based on rates approved by the PSC of each state in which we operate. Customers' base rates may not be changed without formal approval by these commissions. The PSCs, however, have authorized our regulated operations to negotiate rates, based on approved methodologies, with customers that have competitive alternatives. Eastern Shore's revenues are based on rates approved by the FERC. The FERC has also authorized Eastern Shore to negotiate rates above or below the FERC-approved maximum rates, which customers can elect as an alternative to negotiated rates.

For regulated deliveries of natural gas, propane and electricity, we read meters and bill customers on monthly cycles that do not coincide with the accounting periods used for financial reporting purposes. We accrue unbilled revenues for natural gas and electricity that have been delivered, but not yet billed, at the end of an accounting period to the extent that they do not coincide. We estimate the amount of the unbilled revenue by jurisdiction and customer class. A similar computation is made to accrue unbilled revenues for propane customers with meters, such as community gas system customers, and natural gas marketing customers, whose billing cycles do not coincide with the accounting periods.

We record trading activity for open propane wholesale marketing contracts on a net mark-to-market basis in the consolidated statement of income. For propane bulk delivery customers without meters and advanced information services customers, we record revenue in the period the products are delivered and/or services are rendered.

Each of our natural gas distribution operations in Delaware and Maryland, our bundled natural gas distribution service in Florida and our electric distribution operation in Florida has a fuel cost recovery mechanism. This mechanism provides us with a method of adjusting billing rates to customers to reflect changes in the cost of purchased fuel. The difference between the current cost of fuel purchased and the cost of fuel recovered in billed rates is deferred and accounted for as either unrecovered fuel cost or amounts payable to customers. Generally, these deferred amounts are recovered or refunded within one year.

We charge flexible rates to industrial interruptible customers on our natural gas distribution systems to compete with the price of alternative fuel that they can use. Neither we nor any of our interruptible customers are contractually obligated to deliver or receive natural gas on a firm service basis.

Allowance for Doubtful Accounts

An allowance for doubtful accounts is recorded against amounts due to reduce the net receivable balance to the amount we reasonably expect to collect based upon our collections experience, the condition of the overall economy and our assessment of our customers' inability or reluctance to pay. If circumstances change, however, our estimate of the recoverability of accounts receivable may also change. Circumstances which could affect our estimates include, but are not limited to, customer credit issues, the level of natural gas, electricity and propane prices and general economic conditions. Accounts are written off once they are deemed to be uncollectible.

Pension and Other Postretirement Benefits

Pension and other postretirement plan costs and liabilities are determined on an actuarial basis and are affected by numerous assumptions and estimates including the market value of plan assets, estimates of the expected returns on plan assets, assumed discount rates, the level of contributions made to the plans, and current demographic and actuarial mortality data. The assumed discount rates and the expected returns on plan assets are the assumptions that generally have the most significant impact on the pension costs and liabilities. The assumed discount rates, the assumed health care cost trend rates and the assumed rates of retirement generally have the most significant impact on our postretirement plan costs and liabilities. Additional information is presented in *Item 8, Financial Statements and Supplementary Data* (See *Note 16, Employee Benefit Plans* in the Consolidated Financial Statements), including plan asset investment allocation, estimated future benefit payments, general descriptions of the plans, significant assumptions, the impact of certain changes in assumptions, and significant changes in estimates.

Actuarial assumptions affecting 2013 include expected long-term rates of return on plan assets of 6.0 percent and 7.0 percent for Chesapeake's pension plan and FPU's pension plan, respectively, and discount rates of 4.25 percent and 4.75 percent for Chesapeake's and FPU's plans, respectively. The discount rate for each plan was determined by management considering high-quality corporate bond rates, such as Moody's Aa bond index and the Citigroup yield curve, changes in those rates from the prior year and other pertinent factors, including the expected lives of the plans and the availability of the lump-sum payment option. A

0.25 percent decrease in the discount rate could increase our annual pension and postretirement costs by approximately \$4,000 , and a 0.25 percent increase could decrease our annual pension and postretirement costs by approximately \$40,000 .

Actual changes in the fair value of plan assets and the differences between the actual return on plan assets and the expected return on plan assets could have a material effect on the amount of pension and postretirement benefit costs that we ultimately recognize. A 0.25 percent change in the rate of return could change our annual pension cost by approximately \$132,000 and would not have an impact on the postretirement and Chesapeake SERP because these plans are not funded.

The health care inflation rate for 2013 used to calculate the benefit obligation is 5.5 percent for medical and 6.5 percent for prescription drugs for the Chesapeake Postretirement Plan; and 6.5 percent for the FPU Medical Plan. A one-percentage point increase in the health care inflation rate from the assumed rate would increase the accumulated postretirement benefit obligation by approximately \$264,000 as of December 31, 2013 , and would increase the aggregate of the service cost and interest cost components of the net periodic postretirement benefit cost for 2013 by approximately \$10,000 . A one-percentage point decrease in the health care inflation rate from the assumed rate would decrease the accumulated postretirement benefit obligation by approximately \$228,000 as of December 31, 2013 , and would decrease the aggregate of the service cost and interest cost components of the net periodic postretirement benefit cost for 2013 by approximately \$8,000 .

Tax-related Contingency

We account for uncertainty in income taxes in the financial statements only if it is more likely than not that an uncertain tax position is sustainable based on technical merits. Recognizable tax positions are then measured to determine the amount of benefit recognized in the financial statements. We recognize penalties and interest related to unrecognized tax benefits as a component of other income.

We account for contingencies associated with taxes other than income when the likelihood of a loss is both probable and estimable. In assessing the likelihood of a loss, we do not consider the existence of current inquiries, or the likelihood of future inquiries, by tax authorities as a factor. Our assessment is based solely on our application of the appropriate statutes and the likelihood of a loss assuming the proper inquiries are made by tax authorities.

As of December 31, 2013 and 2012, we recorded a total liability of \$300,000 associated with unrecognized income tax benefits. As of December 31, 2013 and 2012, we recorded a total liability of \$1.0 million and \$82,000 , respectively, related to taxes other than income.

OVERVIEW AND HIGHLIGHTS

*(in thousands except per share)***For the Year Ended December 31,****Business Segment:**

	2013	2012	Increase (decrease)	2012	2011	Increase (decrease)

SUMMARY OF KEY FACTORS

The following is a summary of key factors affecting our businesses and their impacts on our results for the year ended December 31, 2013, as well as future periods.

Major Projects

Acquisition

In May 2013, we completed the purchase of the operating assets of ESG. Approximately 11,000 residential and commercial underground propane distribution system customers acquired in this transaction are now being served by Sandpiper under a tariff approved by the Maryland PSC. We are evaluating the potential conversion of some of these propane systems to natural gas. This acquisition is expected to be accretive to earnings per share in the first full year of operations. For 2013, we generated \$4.4 million in additional gross margin and incurred \$3.1 million in other operating expenses.

Service Expansions

We expanded our natural gas transmission and distribution services in Sussex County, Delaware; Cecil and Worcester Counties, Maryland; and Nassau and Indian River Counties, Florida, which generated additional gross margin of \$1.5 million in 2013.

In May 2013, Eastern Shore commenced new short-term transmission services to industrial customers located in New Castle and Kent Counties, Delaware. Eastern Shore provided these services from May to October 2013 using existing system capacity under short-term contracts and generated additional gross margin of \$1.4 million in 2013. Eastern Shore also provided increased interruptible service to one of these industrial customers during 2013, which generated \$333,000 of additional gross margin. In November 2013, Eastern Shore completed construction of new facilities and replaced these short-term contracts with long-term service contracts, which generated additional gross margin of \$702,000 in 2013. We expect these long-term services will generate \$4.3 million of annual gross margin. These long-term contracts displace the gross margin generated from short-term contracts, increased interruptible service and an annualized gross margin of \$1.1 million from an older contract, which expired in November 2012.

The following Major Project Highlights table summarizes our major projects initiated in 2011, 2012 and 2013 (dollars in thousands):

Major Projects	Gross Margin			
	2011	2012	2013	2014 ⁽¹⁾
Acquisition:				
ESG acquisition being served by Sandpiper in Worcester County, Maryland ⁽²⁾	\$ —	\$ —	\$ 4,432	\$ 9,817
Service Expansions				
Natural Gas Distribution:				
Long-term				
Sussex County, Delaware	\$ 1	\$ 590	\$ 670	\$ 694
Natural Gas Transmission:				
Short-term				
New Castle County, Delaware ^{(3) (4) (5)}	\$ 168	\$ 868	\$ 398	\$ 1,862
Kent County, Delaware ⁽³⁾	—	—	1,158	—
Total Short-term	\$ 168	\$ 868	\$ 1,556	\$ 1,862
Long-term				
Sussex County, Delaware	\$ 156	\$ 1,269	\$ 1,437	\$ 1,725
New Castle County, Delaware ⁽⁶⁾	243	530	1,637	2,964
Nassau County, Florida	—	1,540	1,314	1,300
Worcester County, Maryland	—	90	417	547
Cecil County, Maryland	—	147	926	1,147
Indian River, Florida	—	—	350	840
Kent County, Delaware	—	—	437	2,660
Total Long-term	\$ 399	\$ 3,576	\$ 6,518	\$ 11,183
Total Service Expansions	\$ 568	\$ 5,034	\$ 8,744	\$ 13,739
Total Major Projects	\$ 568	\$ 5,034	\$ 13,176	\$ 23,556

⁽¹⁾ The figures provided represent the estimated annual gross margin.

⁽²⁾ During 2013, we incurred \$3.1 million in other operating expenses related to Sandpiper's operation. We expect to incur \$6.3 million in other operating expenses in 2014.

⁽³⁾ Prior to commencing new long-term service using new facilities, we provided a short-term service utilizing the existing system capacity. The short-term service was displaced by the new long-term service.

⁽⁴⁾ In addition to providing a short-term service, we also provided interruptible service during 2013, which generated \$989,000. Gross margin generated from interruptible service is expected to be displaced by the long-term service starting in November 2013.

⁽⁵⁾ Expected gross margin in 2014 includes \$1.9 million from a new short-term contract for 50,000 Dts/d for one year, which is expected to begin in April 2014.

⁽⁶⁾ Gross margin generated from this service expansion replaces the 10,000 Dts/d contract, which expired in November 2012. This expired contract had annualized gross margin of \$1.1 million.

Other Natural Gas Growth

In addition to these service expansions, the natural gas distribution operations on the Delmarva Peninsula and in Florida generated \$2.0 million in additional gross margin for the year ended December 31, 2013, due to increases in the number of residential, commercial and industrial customers served. These increases are due primarily to a two-percent increase in residential customers on the Delmarva Peninsula, excluding customers added as a part of the Sandpiper acquisition, and an increase in commercial and industrial customers in Florida.

Future Service Expansion Initiatives

In June 2013, Eastern Shore filed an application with the FERC, seeking approval to construct a pipeline lateral to an industrial customer facility under construction in Kent County, Delaware. Upon completion of construction of the required facilities, this new service is expected to generate annual gross margin of approximately \$1.2 million to \$1.8 million. The new facilities include approximately 5.5 miles of lateral pipeline and metering facilities and extend from Eastern Shore's mainline to this new industrial

customer facility. The construction of this lateral will not increase the overall capacity of Eastern Shore's mainline system. Service is projected to commence in January 2015.

We also executed a one-year contract with another industrial customer to provide additional 50,000 Dts/d of capacity from April 2014 to April 2015. This short-term contract is expected to generate \$1.9 million and \$767,000 of gross margin in 2014 and 2015, respectively.

Investing in Growth

We continue to expand our resources and capabilities to support growth. Our Delmarva natural gas distribution operation is in the early stages of natural gas distribution expansions in Sussex County, Delaware, and Worcester and Cecil Counties, Maryland. These expansions will require not only the construction or conversion of distribution facilities, but also the conversion of residential customers' appliances or equipment. We have begun reorganizing our Delmarva natural gas distribution operation and expect to increase staffing to support future expansions. Eastern Shore recently completed construction of new facilities to provide additional services to industrial customers on the Delmarva Peninsula and is working on constructing a new lateral pipeline to provide service to a new industrial customer facility in Kent County, Delaware. Eastern Shore is also developing other opportunities to further expand its transmission system, and it also expects to increase its staffing as it continues to expand its facilities and service. Finally, to increase our overall capabilities to move growth initiatives forward and to assist in developing additional strategic initiatives for sustained future growth, resources have been, and continue to be, added in our corporate shared services departments. During 2013, payroll and benefits expense increased by \$2.4 million, or six percent, compared to 2012. We expect to make additional investments in human resources, as needed, to further develop our capability to capitalize on future growth opportunities.

Weather and Consumption

Weather was a significant factor in 2013 as temperatures on the Delmarva Peninsula returned to more normal levels from historically warm weather in 2012. The temperatures in Florida continued to be significantly warmer in 2013. The following tables highlight the HDD and CDD information for the years ended December 31, 2013 and 2012 and the gross margin variance resulting from weather fluctuations in those periods.

HDD and CDD Information

For the Periods Ended December 31,	2013	2012	Variance	2012	2011	Variance
Delmarva						
Actual HDD	4,638	3,936	702	3,936	4,221	(285)

Total	<u>\$ 3,399</u>	<u>\$ (767)</u>	<u>\$ (3,627)</u>	<u>\$ (5,057)</u>

Propane Prices

Propane prices affect both retail and wholesale marketing margins. Our propane distribution operation usually benefits from rising propane prices by selling propane to its customers based upon higher wholesale prices, while its average cost of inventory trails behind. Retail prices generally take into account replacement cost, along with other factors, such as competition and market conditions. When wholesale prices (replacement costs) increase, retail prices generally increase, and our margins expand until the current wholesale price is fully reflected in the average cost of inventory. The opposite occurs when wholesale propane prices decline.

Strong retail propane margins throughout 2013 on the Delmarva Peninsula generated \$3.2 million in additional gross margin. During the first three quarters of 2013, our average propane inventory costs decreased by 25 percent as a result of lower propane wholesale prices in late 2012 and early 2013, coupled with the execution of our supply plan. This decline in propane costs considerably outpaced a slight decline in retail prices, which were influenced by propane wholesale prices in the local area and other market conditions. The combination of declining costs and sustaining retail prices resulted in higher retail margins during the first three quarters of 2013, compared to the same period in 2012. During the fourth quarter of 2013, average propane wholesale prices in the local area increased by \$0.49 per gallon, or 38 percent, as demand for propane significantly increased. In executing our supply plan, we benefited from supply diversity and were able to: (a) reduce the impact of this price increase on our average propane inventory cost, and (b) limit the increase in retail prices to our customers, charging considerably less than the wholesale price increase in the local area. As a result, our retail margins did not increase during the fourth quarter of 2013 and did not result in a significant gross margin variance, compared to last year's fourth quarter. Propane retail sales prices are subject to various market conditions, including competition with other propane suppliers as well as the availability and price of alternative energy sources, and may fluctuate based on changes in demand, supply and other energy commodity prices. The level of retail margins sustained during 2013 is not typical and, therefore, is not included in our long-term financial plans or forecasts.

Xeron benefits from price volatility in the propane wholesale market by entering into trading transactions. Xeron experienced a decrease in gross margin of \$1.1 million for the year ended December 31, 2013, compared to the same period in 2012, as lower propane wholesale price volatility during the current period resulted in lower profit on executed trades.

REGULATED ENERGY

For the Year Ended December 31,	2013	2012	Increase (decrease)	2012	2011	Increase (decrease)
<i>(in thousands)</i>						
Revenue	\$ 264,637	\$ 246,208	\$ 18,429	\$ 246,208	\$ 256,226	\$ (10,018)
Cost of sales	118,817	111,402	7,415	111,402	128,111	(16,709)
Gross margin	145,820	134,806	11,014	134,806	128,115	6,691
Operations & maintenance	65,713	61,113	4,600	61,113	59,816	1,297

Other operating expenses	95,736	87,807	7,929	87,807	84,204	3,603
Operating Income	\$ 50,084	\$ 46,999	\$ 3,085	\$ 46,999	\$ 43,911	\$ 3,088

2013 compared to 2012

Operating income for the Regulated Energy segment for 2013 was \$50.1 million, an increase of \$3.1 million, or seven percent. An increase in gross margin of \$11.0 million was partially offset by an increase in other operating expenses of \$7.9 million.

Gross Margin

Items contributing to the year-over-year increase of \$11.0 million, or eight percent, in gross margin are listed in the following table:

(in thousands)

Gross margin for the year ended December 31, 2012	\$ 134,806
Factors contributing to the gross margin increase for the year ended December 31, 2013:	
Contribution from Sandpiper	4,432
Service expansions	3,710
Other natural gas growth	1,824
Additional surcharge for GRIP in Florida	724
Increased customer consumption—weather and other	455
Other	(131)
Gross margin for the year ended December 31, 2013	<u>\$ 145,820</u>

Contribution from Sandpiper

In late May 2013, upon completion of the purchase of the ESG operating assets, Sandpiper began providing services to approximately 11,000 propane underground distribution system customers in Worcester County, Maryland under a new tariff approved by the Maryland PSC. Sandpiper generated \$4.4 million of gross margin for the year ended December 31, 2013.

Service Expansions

Increased gross margin from service expansions was due primarily to the following:

- \$1.5 million from expansions of natural gas transmission and distribution services - Expansion initiatives completed in 2012 and 2013 in Sussex County, Delaware; Worcester and Cecil Counties, Maryland; and Nassau and Indian River Counties, Florida.
- \$1.4 million from short-term natural gas transmission services - From May to October 2013, Eastern Shore provided short-term transmission services to industrial customers located in New Castle and Kent Counties, Delaware by using existing system capacity. In November 2013, upon completion of construction of new facilities, these short-term contracts were replaced with long-term service contracts.
- \$702,000 from long-term transmission services commenced in November 2013 - In November 2013, Eastern Shore began providing long-term transmission services to industrial customers, which displaced the short-term services previously

discussed. These long-term services are expected to generate \$4.3 million of annual gross margin. They also displace an annualized gross margin of \$1.1 million from an older contract, which expired in November 2012.

Other Natural Gas Growth

Increased gross margin from other natural growth was due primarily to the following:

- \$1.5 million from Florida customer growth - Our Florida natural gas distribution operation experienced additional gross margin due primarily to new services to commercial and industrial customers.
- \$566,000 from Delmarva customer growth - We experienced two percent residential customer growth, as well as growth in commercial and industrial customers, in our Delmarva natural gas distribution operation.

Additional Surcharge for GRIP in Florida

In August 2012, the Florida PSC approved a surcharge for GRIP for FPU and Chesapeake's Florida division. This surcharge is designed to recover capital and other program-related costs, inclusive of an appropriate rate of return on investment, associated with accelerating the replacement of qualifying distribution mains and services. During 2013, FPU and Chesapeake's Florida division recorded \$724,000 in additional gross margin as a result of the increased GRIP spending.

Increased Customer Consumption—Weather and Other

Higher customer consumption, due to temperatures on the Delmarva Peninsula returning to more normal levels in 2013, generated increased gross margin of approximately \$984,000. Higher non-weather related consumption generated additional gross margin of \$42,000. This was partially offset by \$571,000 in lower gross margin as a result of warmer weather in Florida.

Other Operating Expenses

The increase in other operating expenses was due primarily to (a) \$ 3.1 million in other operating expenses associated with Sandpiper's operations; (b) \$1.7 million in higher payroll and benefits costs to support recent growth and expand our capabilities for future growth; (c) \$1.3 million of increased incentive bonuses as a result of broader participation in the bonus program, which was extended during 2013 to cover substantially all employees, and the strong financial performance in 2013; (d) \$1.4 million in higher depreciation, amortization, asset removal costs and property taxes associated with capital expenditures to support growth and maintain system integrity; (e) a one-time sales tax of \$726,000 expensed by Sandpiper related to the ESG acquisition in May 2013; and (f) \$342,000 in increased bad debt expense. These increases were partially offset by a \$1.5 million recovery of previously expensed costs related to litigation involving our franchise with the City of Marianna, Florida.

2012 Compared to 2011

Operating income for our Regulated Energy segment for 2012 was \$47.0 million, an increase of \$3.1 million, or seven percent. An increase in gross margin of \$6.7 million was partially offset by an increase in other operating expenses of \$3.6 million.

Gross Margin

Items contributing to the year-over-year increase of \$6.7 million, or five percent, in gross margin were as follows:

(in thousands)

Gross margin for the year ended December 31, 2011	\$ 128,115
Factors contributing to the gross margin increase for the year ended December 31, 2012:	
Service expansions	4,466
Other natural gas growth	1,795
Florida natural gas regulatory reserve	(750)
Eastern Shore rate case settlement	737
Other	673
Decreased customer consumption—weather and other	(230)
Gross margin for the year ended December 31, 2012	<u>\$ 134,806</u>

Service Expansions

Increased gross margin from service expansions was due primarily to the following:

- \$589,000 from new natural gas distribution services in Sussex County, Delaware - We initiated new natural gas distribution service to several industrial customers in Sussex County, Delaware in late 2011 and during 2012.
- \$700,000 from short-term natural gas transmission services - Eastern Shore provided a short-term transmission service from November 2011 to October 2012 for 9,415 Dts/d to an industrial customer, which generated additional gross margin of \$713,000 in 2012. This short-term service was replaced by a long-term service contract for the same capacity in November 2012.
- \$1.1 million from the Sussex County expansion - In conjunction with providing new natural gas distribution service in Sussex County, Delaware, as previously discussed, Eastern Shore initiated new natural gas transmission service in 2011 and 2012.
- \$1.5 million from the Nassau County, Florida expansion - Peninsula Pipeline generated additional gross margin during 2012 as a result of this new transmission service.
- \$237,000 from the Worcester and Cecil Counties, Maryland expansions - We generated additional transmission gross margin of \$90,000 and \$147,000 during 2012 as a result of Eastern Shore's expansion to Worcester and Cecil Counties, Maryland, respectively.

Other Natural Gas Growth

Increased gross margin from other natural gas growth was due primarily to the following:

- \$1.1 million from Delmarva customer growth - Our Delmarva natural gas distribution operation generated \$1.1 million of additional gross margin, due primarily to the addition of 12 new large commercial and industrial customers in 2011 and two-percent growth in residential customers.
- \$986,000 from Florida customer growth - Our Florida natural gas distribution operation generated \$986,000 of additional gross margin due primarily to growth in commercial and industrial customers.
- \$360,000 in expired natural gas transmission contracts - Partially offsetting the above increases in gross margin was a decrease in gross margin as a result of expired natural gas transmission contracts.

Florida Natural Gas Regulatory Reserve

In January 2012, the Florida PSC approved the recovery of \$34.2 million as an acquisition adjustment and \$2.2 million in merger-related costs in connection with the Company's acquisition of FPU in 2009. The Florida PSC also determined that no refund should be made to customers as a result of the 2010 earnings of our Florida natural gas distribution operations. Accordingly, we reversed the \$750,000 reserve, in the fourth quarter of 2011. We previously accrued the reserve in the third and fourth quarters of 2010 based on the contingent regulatory risks associated with the Florida natural gas earnings, merger benefits and recovery of the acquisition adjustment.

Eastern Shore Rate Case Settlement

Eastern Shore generated \$737,000 of additional gross margin, as a result of new rates which became effective in July 2011.

Decreased Customer Consumption – Weather and Other

Customer consumption of natural gas and electricity decreased during 2012, primarily on the Delmarva Peninsula. The first quarter of 2012 was the warmest first quarter in the past preceding ten years, both on the Delmarva Peninsula and in Florida. We estimate that significantly warmer weather in 2012, primarily during the first three months of 2012, resulted in a period-over-period decrease of approximately \$926,000 in gross margin, most of which occurred during the first three months of the year. This decrease was partially offset by \$696,000 in higher gross margins due primarily to other volume increases in Florida.

Other Operating Expenses

Other operating expenses for the Regulated Energy segment increased by \$3.6 million for 2012 due largely to: (a) \$2.4 million in increased amortization expense associated with the recovery of the FPU acquisition adjustment and merger-related costs, which was partially offset by an amortization credit of \$684,000 associated with FPU's pre-merger deferred income tax gain; (b) \$1.3 million in higher depreciation expense, asset removal and facilities costs associated with capital investments; (c) \$646,000 in increased costs associated with investing in growth; (d) \$379,000 in increased payroll and benefits cost for the Delmarva natural

gas distribution operation due to increased staffing to support expansions; (e) \$325,000 in increased costs related to pipeline integrity requirements; (f) \$305,000 in higher legal costs associated with an electric franchise dispute in Marianna, Florida; and (g) \$254,000 in an increased accrual for general liability claims. These increases in expenses were partially offset by \$1.2 million in reduced payroll and benefits, primarily in Florida, because of a workforce reduction in 2011, and one-time charges totaling \$1.1 million in 2011 as a result of the voluntary workforce reduction in Florida and pension settlements.

UNREGULATED ENERGY

<u>For the Year Ended December 31,</u>			<u>Increase</u>			<u>Increase</u>
<i>(in thousands)</i>	<u>2013</u>	<u>2012</u>	<u>(decrease)</u>	<u>2012</u>	<u>2011</u>	<u>(decrease)</u>
Revenue	\$ 166,723	\$ 133,049	\$ 33,674	\$ 133,049	\$ 149,586	\$ (16,537)
Cost of sales	121,348	97,137	24,211	97,137	112,415	(15,278)
Gross margin	45,375	35,912	9,463	35,912	37,171	(1,259)
Operations & maintenance	26,657	22,804	3,853	22,804	22,863	(59)
Depreciation & amortization	3,686	3,420	266	3,420	3,229	191
Other taxes	2,679	1,333	1,346	1,333	1,460	(127)
Other operating expenses	33,022	27,557	5,465	27,557	27,552	5
Operating Income	\$ 12,353	\$ 8,355	\$ 3,998	\$ 8,355	\$ 9,619	\$ (1,264)

2013 Compared to 2012

Operating income for our Unregulated Energy segment for 2013 was \$12.4 million, an increase of \$4.0 million, or 48 percent. An increase in gross margin of \$9.5 million was partially offset by an increase in other operating expenses of \$5.5 million.

Gross Margin

Items contributing to the year-over-year increase of \$9.5 million, or 26 percent, in gross margin were as follows:

(in thousands)

Gross margin for the year ended December 31, 2012	\$ 35,912
Factors contributing to the gross margin increase for the year ended December 31, 2013:	
Increased customer consumption—weather and other	4,233
Increase in propane margins	3,163
Contributions from acquisitions	1,989
Other	1,215
Decreased propane wholesale marketing margins	(1,137)
Gross margin for the year ended December 31, 2013	\$ 45,375

Increased Customer Consumption—Weather and Other

Increased gross margin from higher customer consumption was due primarily to the following:

- \$3.0 million from increased weather-related consumption - Temperatures on the Delmarva Peninsula returned to more normal levels in 2013, which generated additional gross margin of \$3.1 million. This was offset by an \$83,000 decrease in gross margin in Florida.
- \$573,000 from non-weather related volumes - This was attributable to the timing of deliveries to bulk customers.
- \$675,000 from higher wholesale sales - An increase in wholesale propane sales generated additional gross margin.

Increase in Propane Margins

Higher retail propane margins during 2013 generated \$3.2 million of additional gross margin. Retail margins on the Delmarva Peninsula remained strong throughout 2013 as our propane supply management resulted in a decrease in the average cost of

inventory during 2013, which considerably outpaced a slight decline in retail prices during most of 2013. The propane retail prices are subject to various market conditions, including competition with other propane suppliers and the availability and price of alternative energy sources, and may fluctuate based on changes in demand, supply and other energy commodity prices.

Contributions from Acquisitions

The acquisitions of the operating assets of Glades in February 2013 and Austin Cox in June 2013 generated \$1.2 million and \$820,000, respectively of additional gross margin in 2013.

Other

Increased gross margin from other factors is primarily attributable to \$192,000 and \$746,000 from merchandise sales and miscellaneous fees, respectively.

Decreased propane wholesale marketing margins

Xeron experienced a decrease in gross margin of \$1.1 million, as a result of lower margins on executed trades. Lower price volatility in the wholesale propane market and a decrease in trading volume reduced opportunities for Xeron to generate a profit in 2013 until primarily the latter part of the year.

Other Operating Expenses

The increase in other operating expenses was due primarily to: (a) \$2.2 million in additional expenses associated with serving newly acquired customers, (b) an accrual of \$990,000 due to a contingency for taxes other than income, and (c) \$706,000 in increased incentive bonuses as a result of the strong financial performance in 2013.

2012 Compared to 2011

Operating income for our Unregulated Energy segment for 2012 was \$8.4 million, a decrease of \$1.3 million, or 13 percent, due primarily to a decrease in gross margin of \$1.3 million. Other operating expenses for 2012 remained unchanged.

Gross Margin

Items contributing to the year-over-year decrease of \$1.3 million, or three percent, in gross margin are listed in the following table:

(in thousands)

Gross margin for the year ended December 31, 2011	\$ 37,171
Factors contributing to the gross margin decrease for the year ended December 31, 2012:	
Decreased customer consumption—weather and other	(3,259)
Increase in propane margins	2,724
Gain from litigation settlement—recorded in 2011	(575)
Other	(149)
Gross margin for the year ended December 31, 2012	<u>\$ 35,912</u>

Decreased Customer Consumption – Weather and Other

Lower gross margin from decreased customer consumption was due primarily to the following:

- \$2.7 million from decreased weather-related consumption - Significantly warmer weather, particularly during the first three months of 2012, when propane demand for heating is typically at its highest, resulted in decreased propane consumption.
- \$515,000 from decreased non-weather-related volume - Our Delmarva and Florida propane distribution operations experienced a decline in sales volume, beyond the estimated weather impact in 2012, due to the timing of deliveries to bulk-delivery customers, conservation and other factors. This was partially offset by additional gross margin generated from 1,180 customers acquired in late 2011 and early 2012, following the purchase of the operating assets of several small propane distribution companies in Florida.

Increase in Propane Margins

Higher retail propane margins on the Delmarva Peninsula and in Florida generated \$631,000 and \$2.1 million, respectively, of additional gross margin in 2012. Sustained retail pricing in response to local market conditions and lower average propane inventory cost contributed to the higher margins.

Gain from Litigation Settlement – Recorded in 2011

A non-recurring gain of \$575,000 was recorded in 2011 related to our share of proceeds received from an antitrust litigation settlement with a major propane supplier and is reflected as a period-over-period decrease in gross margin.

Other

PESCO's gross margin decreased by \$310,000 in 2012. PESCO's gross margin in 2011 benefited from unusually large favorable imbalance resolutions with third-party intrastate pipeline suppliers. Imbalance resolutions are not predictable and, therefore, are not included in our long-term financial plans or forecasts. Lower gross margin from imbalance resolutions was partially offset by additional gross margin generated by new customers and contracts.

Partially offsetting the decrease in PESCO's gross margin was Xeron's increase in gross margin of \$225,000 in 2012 as a result of higher margins from its trading activity, as the market presented opportunities from fluctuations in wholesale propane prices.

Other Operating Expenses

Other operating expenses for the Unregulated Energy segment were \$27.6 million for both 2012 and 2011.

O T H E R

For the Year Ended December 31,	2013	2012	Increase (decrease)	2012	2011	Increase (decrease)
<i>(in thousands)</i>						
Revenue	\$ 19,990	\$ 18,357	\$ 1,633	\$ 18,357	\$ 13,829	\$ 4,528
Cost of sales	10,544	8,872	1,672	8,872	7,051	1,821

Operating Income — Other	297	1,280	(983)	1,280	174	1,106
Operating Income — Eliminations	—	1	(1)	1	1	—
Operating Income	\$ 297	\$ 1,281	\$ (984)	\$ 1,281	\$ 175	\$ 1,106

2013 Compared to 2012

The "Other" segment reported operating income of \$297,000 for 2013, compared to \$1.3 million in 2012. This decrease was primarily attributable to a decrease in the operating results of BravePoint, which reported a \$154,000 operating loss in 2013, compared to operating income of \$828,000 in 2012.

Gross margin for BravePoint for 2012 and 2013 remained unchanged at \$8.6 million. Other operating expenses increased by 943,000 to \$8.7 million in 2013 due primarily to BravePoint's higher payroll and related costs.

2012 Compared to 2011

Operating income for our "Other" segment for 2012 was \$1.3 million, an increase of \$1.1 million, compared to 2011. This increase was attributable to higher operating income from BravePoint, which reported operating income of \$828,000 in 2012, compared to an operating loss of \$270,000 for 2011.

BravePoint generated increased gross margin of \$2.6 million, \$852,000 of which represented increased margin from ProfitZoom and Application Evolution sales and related services. The remaining increase in gross margin was generated from higher consulting

revenues and other product sales. This increase in gross margin was partially offset by \$1.5 million of increased other operating expenses as a result of resources added to support these services.

OTHER INCOME

Other income for 2013, 2012 and 2011 was \$372,000, \$271,000 and \$906,000, respectively. Included in other income for 2011 was a \$553,000 gain from the sale of a non-operating Internet Protocol address asset. The remaining balance in other income includes non-operating investment income, interest income, late fees charged to customers and gains or losses from the sale of assets.

INTEREST EXPENSE

2013 compared to 2012

Interest expense for the year ended December 31, 2013 decreased by approximately \$513,000, or six percent, compared to the same period in 2012. The decrease in interest expense was attributable primarily to decreases of \$700,000 in other long-term interest expense due to scheduled repayments and \$321,000 in interest on deposits from customers due to a lower interest rate on those deposits. These decreases were partially offset by an increase of \$501,000 in short-term interest expense due to higher borrowings in 2013.

2012 Compared to 2011

Total interest expense for 2012 decreased by approximately \$253,000, or three percent, compared to 2011. The decrease in interest expense was attributable primarily to decreases of \$699,000 in other long-term interest expense due to scheduled repayments and \$337,000 in interest on deposits from FPU's customers due to a lower interest rate on those deposits. Also contributing to the decrease was a reduction of \$41,000 in short-term interest expense due to slightly lower borrowings and rates in 2012, compared to 2011. Offsetting the decrease in interest expense was additional interest expense of \$824,000 related to the \$29 million long-term debt issuance of 5.68 percent unsecured senior notes on June 23, 2011. We used the proceeds from these notes to repay a portion of Chesapeake's short-term loan credit facilities, which had been used to redeem two series of FPU first mortgage bonds.

INCOME TAXES

2013 compared to 2012

Income tax expense was \$22.1 million in 2013, compared to \$19.3 million in 2012. Our effective tax rate was 40.2 percent in 2013, compared to 40.1 percent in 2012.

2012 Compared to 2011

Income tax expense was \$19.3 million in 2012, compared to \$18.0 million in 2011. Our effective tax rate was 40.1 percent in 2012, compared to 39.4 percent in 2011. The increase in our effective tax rate in 2012 was due primarily to a \$300,000 tax contingency accrual associated with a state tax audit recorded during 2012.

LIQUIDITY AND CAPITAL RESOURCES

Our capital requirements reflect the capital-intensive and seasonal nature of our business and are principally attributable to investment in new plant and equipment, retirement of outstanding debt and seasonal variability in working capital. We rely on cash generated from operations, short-term borrowings, and other sources to meet normal working capital requirements and to finance capital expenditures.

Our energy businesses are weather-sensitive and seasonal. We normally generate a large portion of our annual net income and subsequent increases in our accounts receivable in the first and fourth quarters of each year due to significant volumes of natural gas, electricity, and propane delivered by our natural gas, electric, and propane distribution operations to customers during the

peak heating season. In addition, our natural gas and propane inventories, which usually peak in the fall months, are largely drawn down in the heating season and provide a source of cash as the inventory is used to satisfy winter sales demand.

Capital expenditures, which are our investments in new or acquired plant and equipment, are our largest capital requirements. Our capital expenditures during 2013, 2012 and 2011 were \$108.0 million, \$78.2 million, and \$44.4 million, respectively. We experienced a significant increase in our capital expenditures in 2013 and 2012, compared to 2011, as a result of the acquisition of ESG, continued expansions of our natural gas distribution and transmission systems on the Delmarva Peninsula and in Florida as well as a natural gas infrastructure replacement program in Florida, electric infrastructure improvements in Florida to increase the distribution system reliability, and other initiatives.

We have budgeted \$110.9 million for capital expenditures during 2014. The following table shows the 2014 capital expenditure budget by segment:

(dollars in thousands)

Regulated Energy:

Natural gas distribution	\$	53,444
Natural gas transmission		26,857
Electric distribution		4,697
Total Regulated Energy		<u>84,998</u>

Unregulated Energy:

Propane distribution		5,846
Other unregulated energy		9,823
Total Unregulated Energy		<u>15,669</u>

Other

Advanced information services		846
Other		9,400
Total Other		<u>10,246</u>

Total 2014 Capital Expenditures	\$	<u><u>110,913</u></u>
---------------------------------	----	-----------------------

We expect to fund the 2014 capital expenditures program from short-term borrowings, cash provided by operating activities, and other sources. In addition, as further discussed in the *Capital Structure* section below, we will be issuing \$50.0 million of our long-term uncollateralized senior notes in May 2014.

The capital expenditures program is subject to continuous review and modification. Actual capital requirements may vary from the above estimates due to a number of factors, including changing economic conditions, customer growth in existing areas, regulation, new growth or acquisition opportunities and availability of capital. Historically, actual capital expenditures have typically lagged behind the budgeted amounts.

Capital Structure

We are committed to maintaining a sound capital structure and strong credit ratings to provide the financial flexibility needed to access capital markets when required. This commitment, along with adequate and timely rate relief for our regulated operations, is intended to ensure our ability to attract capital from outside sources at a reasonable cost. We believe that the achievement of these objectives will provide benefits to our customers, creditors and investors.

The following presents our capitalization, excluding and including short-term borrowings, as of December 31, 2013 and 2012 :

	December 31, 2013		December 31, 2012	
(in thousands)				
Long-term debt, net of current maturities	\$	117,592 30%	\$	101,907 28%
Stockholders' equity		278,773 70%		256,598 72%
Total capitalization, excluding short-term borrowings	\$	396,365 100%	\$	358,505 100%
	December 31, 2013		December 31, 2012	
(in thousands)				
Short-term debt	\$	105,666 21%	\$	61,199 14%
Long-term debt, including current maturities		128,945 25%		110,103 26%
Stockholders' equity		278,773 54%		256,598 60%
Total capitalization, including short-term borrowings	\$	513,384 100%	\$	427,900 100%

In September 2013, we entered into an agreement with the Note Holders to issue \$70.0 million of uncollateralized senior notes. We issued \$20.0 million of these notes in December 2013, which are included in long-term debt at December 31, 2013. We will be issuing the remaining \$50.0 million of the senior notes in May 2014. The proceeds from this issuance will be used to reduce our short-term borrowings and fund capital expenditures.

As of December 31, 2013, we did not have any restrictions on our cash balances. Both Chesapeake's senior notes and FPU's first mortgage bonds contain a restriction that limits the payment of dividends or other restricted payments in excess of certain pre-determined thresholds. As of December 31, 2013, \$100.5 million of Chesapeake's cumulative consolidated net income and \$57.5 million of FPU's cumulative net income were free of such restrictions.

Included in the long-term debt balance at December 31, 2013 was a capital lease obligation associated with Sandpiper's capacity, supply and operating agreement (\$6.1 million net of current maturities and \$7.0 million including current maturities). At the closing of the ESG acquisition in May 2013, Sandpiper entered into this agreement, which has a six-year term. The capacity portion of this agreement is accounted for as a capital lease. This capital lease arrangement is further described in *Item 8, Financial Statements and Supplementary Data* (See Note 4, *Acquisitions* in the Consolidated Financial Statements).

Short-term Borrowings

Our outstanding short-term borrowings at December 31, 2013 and 2012 were \$105.7 million and \$61.2 million, respectively, at the weighted average interest rates of 1.25 percent and 1.48 percent, respectively.

We utilize bank lines of credit to provide funds for our short-term cash needs to meet seasonal working capital requirements and to temporarily fund portions of the capital expenditure program. As of December 31, 2013, we had four unsecured bank lines of credit with two financial institutions for a total of \$125.0 million. Two of these unsecured bank lines, totaling \$85.0 million, are available under committed lines of credit. None of these unsecured bank lines of credit requires compensating balances. Advances offered under the uncommitted lines of credit are subject to the discretion of the banks. In addition to the four unsecured bank lines of credit, we had an unsecured short-term credit facility for \$40.0 million with an existing lender. We are currently authorized by our Board of Directors to borrow up to \$140.0 million of short-term borrowings, as required.

Our outstanding short-term borrowings at December 31, 2013 and 2012 included \$3.1 million and \$4.8 million, respectively of book overdrafts. Book overdrafts are not actual borrowings under the credit facilities; however, these book drafts would be funded through the credit facilities if presented and, therefore, they were included in the short-term borrowings.

As of December 31, 2013, we issued \$4.7 million in letters of credit to various counter-parties under one of the bank lines of credit. Although the amount of the letters of credit is not included in the outstanding short-term borrowings and we do not anticipate they will be drawn upon by the counter-parties, they reduce the available borrowings under the credit facilities.

Our outstanding borrowings under these unsecured short-term credit facilities at December 31, 2013 and 2012 were \$102.6 million and \$56.4 million, respectively. Short term borrowings were as follows during 2013, 2012 and 2011:

<i>(in thousands)</i>	2013	2012	2011
Average borrowings	\$ 67,367	\$ 23,419	\$ 11,000
Weighted average interest rate	1.34%	1.79%	2.35%
Maximum month-end borrowings	\$ 102,554	\$ 56,421	\$ 35,357

Cash Flows

The following table provides a summary of our operating, investing and financing cash flows for the years ended December 31, 2013, 2012 and 2011:

<i>(in thousands)</i>	For the Year Ended December 31,		
	2013	2012	2011
Net cash provided by (used in):			
Operating activities	\$ 72,931	\$ 66,641	\$ 71,121
Investing activities	(114,781)	(70,598)	(47,836)
Financing activities	41,845	4,681	(22,291)
Net increase in cash and cash equivalents	(5)	724	994
Cash and cash equivalents—beginning of period	3,361	2,637	1,643
Cash and cash equivalents—end of period	\$ 3,356	\$ 3,361	\$ 2,637

Cash Flows Provided by Operating Activities

Changes in our cash flows from operating activities are attributable primarily to changes in net income and working capital, adjusted for non-cash adjustments for depreciation and deferred income taxes and other deferrals. Changes in working capital are determined by a variety of factors, including weather, the prices of natural gas, electricity and propane, the timing of customer collections, payments for purchases of natural gas, electricity and propane, and deferred fuel cost recoveries.

We normally generate a large portion of our annual net income and related increases in our accounts receivable in the first and fourth quarters of each year due to significant volumes of natural gas and propane delivered by our natural gas and propane distribution operations to customers during the peak heating season. In addition, our natural gas and propane inventories, which usually peak in the fall months, are largely drawn down in the heating season and provide a source of cash as the inventory is used to satisfy winter sales demand.

During 2013 and 2012, net cash provided by operating activities was \$72.9 million, and \$66.6 million resulting in an increase in cash flows of \$6.3 million. Significant operating activities generating the cash flow change were as follows:

- Net income, adjusted for reconciling activities, increased cash flows by \$5.6 million, due primarily to higher earnings and increased non-cash items, such as depreciation and amortization expenses included in our earnings;
- Lower net regulatory liabilities increased cash flows by \$7.3 million, due primarily to an increase in fuel cost collected through the fuel cost recovery mechanisms during 2013 and the absence of the \$1.2 million refund by Eastern Shore in January 2012 to customers as a result of its rate case settlement;
- Higher inventory balances in 2013 decreased cash flows by \$5.1 million due primarily to higher propane costs; and
- Lower customer deposits decreased cash flows by \$1.7 million due to refunds to customers during the year.

During 2012 and 2011, our net cash flow provided by operating activities was \$66.6 million and \$71.1 million, respectively, resulting in a decrease of \$4.5 million. Significant operating activities generating the cash flow change were as follows:

- Lower customer deposits decreased cash flows by \$6.7 million, due primarily to the absence in 2012 of a large deposit made by an industrial customer in 2011 and refunds to customers during 2012;
- Higher net regulatory liabilities decreased cash flows by \$2.5 million, primarily as a result of a reduction in fuel costs due and collected from regulated customers during 2012; and

- Lower propane inventory, storage gas and other inventory increased cash flows by \$3.1 million , as a result of lower commodity prices during 2012, partially offset by an increase in the pipes and other construction inventory purchased during 2012.

Cash Flows Used in Investing Activities

Net cash used in investing activities totaled \$114.8 million and \$70.6 million for 2013 and 2012, respectively, resulting in a decrease in cash flows of \$44.2 million . Significant investing activities contributing to the cash flow change were as follows:

- Increased cash paid for capital expenditures during 2013, decreased cash flows by \$24.3 million ; and
- Cash paid for acquisitions during 2013, due primarily to the ESG acquisition in May 2013, decreased cash flows by \$20.1 million .

Net cash used in investing activities totaled \$70.6 million and \$47.8 million for 2012 and 2011, respectively, resulting in an increase of \$22.8 million . Significant investing activities contributing to the cash flow change were as follows:

- Increased cash paid for capital expenditures during 2012, decreased cash flows by \$25.7 million ; and
- Cash receipts of \$2.2 million from the sale of FPU's office building in West Palm Beach, Florida in 2012 increased cash flows.

Cash Flows Provided by/Used in Financing Activities

Net cash provided by financing activities totaled \$41.8 million and \$4.7 million for 2013 and 2012, respectively, resulting in an increase of \$37.2 million . Significant financing activities generating the cash flow change were as follows:

- Higher net short-term borrowings to fund capital expenditures and working capital needs increased cash flows by \$20.2 million ;
- Net cash provided by long-term debt, due primarily to the new issuances during 2013, partially offset by the repayment of FPU's first mortgage bonds prior to their maturities, increased cash flows by \$20.0 million;
- Book overdrafts decreased cash flows by \$2.3 million ; and
- Higher cash dividends paid during 2013 decreased cash flows by \$746,000 .

Net cash provided by financing activities totaled \$4.7 million for 2012, compared to net cash used in financing activities of \$22.3 million in 2011, resulting in an increase of \$27.0 million . Significant financing activities generating the cash flow change were as follows:

- Higher short-term borrowings to fund capital expenditures and working capital needs increased cash flows by \$26.1 million ;
- Lower scheduled principal payments during 2012 increased cash flows by \$932,000 ; and
- Higher cash dividends paid during 2012 decreased cash flows by \$672,000 .

C ONTRACTUAL O BLIGATIONS

We have the following contractual obligations and other commercial commitments as of December 31, 2013 :

<u>Contractual Obligations</u> (in thousands)	Payments Due by Period				Total
	Less than 1 year	1 — 3 years	3 — 5 years	More than 5 years	
Long-term debt ⁽¹⁾	\$ 10,504	\$ 15,601	\$ 18,669	\$ 77,226	\$ 122,000
Operating leases ⁽²⁾	1,249	1,949	865	2,745	6,808
Capital leases ⁽²⁾ ⁽³⁾	1,083	3,000	3,000	625	7,708
Purchase obligations ⁽⁴⁾					
Transmission capacity	27,981	67,837	47,950	132,122	275,890
Storage — Natural Gas	3,193	8,376	4,167	1,508	17,244
Commodities	50,066	23,109	6,870	—	80,045
Electric supply	14,435	30,617	29,614	13,978	88,644
Forward purchase contracts — Propane ⁽⁵⁾	2,477	—	—	—	2,477
Unfunded benefits ⁽⁶⁾	452	953	819	2,887	5,111
Funded benefits ⁽⁷⁾	3,166	70	—	2,961	6,197
Total Contractual Obligations	\$ 114,606	\$ 151,512	\$ 111,954	\$ 234,052	\$ 612,124

⁽¹⁾ Principal payments on long-term debt, see *Item 8, Financial Statements and Supplementary Data, Note 12, Long-Term Debt*, for additional discussion of this item. The expected interest payments on long-term debt are \$6.9 million, \$12.1 million, \$9.9 million and \$16.8 million, respectively, for the periods indicated above. Expected interest payments for all periods total \$45.8 million.

⁽²⁾ See *Item 8, Financial Statements and Supplementary Data, Note 14, Lease Obligations*, for further information.

⁽³⁾ See *Item 8, Financial Statements and Supplementary Data, Note 4, Acquisitions*, for further information.

⁽⁴⁾ See *Item 8, Financial Statements and Supplementary Data, Note 20, Other Commitments and Contingencies*, for further information.

⁽⁵⁾ We have also entered into forward sale contracts. See *Item 7A, Quantitative and Qualitative Disclosures About Market Risk* for further information.

⁽⁶⁾ We have recorded long-term liabilities of \$5.1 million at December 31, 2013 for unfunded post-employment and post-retirement benefit plans. The amounts specified in the table are based on expected payments to current retirees and assumes a retirement age of 62 for currently active employees. There are many factors that would cause actual payments to differ from these amounts, including early retirement, future health care costs that differ from past experience and discount rates implicit in calculations.

⁽⁷⁾ We have recorded long-term liabilities of \$13.1 million at December 31, 2013 for two qualified, defined benefit pension plans. The assets funding these plans are in a separate trust and are not considered assets of the Company or included in the Company's balance sheets. The Contractual Obligations table above includes \$3.1 million, reflecting the expected payments we will make to the trust funds in 2014. Additional contributions may be required in future years based on the actual return earned by the plan assets and other actuarial assumptions, such as the discount rate and long-term expected rate of return on plan assets. See *Item 8, Financial Statements and Supplementary Data, Note 16, Employee Benefit Plans*, for further information on the plans. Additionally, the Contractual Obligations table includes deferred compensation obligations totaling \$3.1 million, funded with Rabbi Trust assets in the same amount. The Rabbi Trust assets are recorded under Investments on the Balance Sheet. We assume a retirement age of 65 for purposes of distribution from this account.

O FF - B ALANCE S HEET A RRANGEMENTS

We have issued corporate guarantees to certain vendors of our subsidiaries, primarily Xeron and PESCO. These corporate guarantees provide for the payment of propane and natural gas purchases in the event of the respective subsidiary's default. Neither of these subsidiaries has ever defaulted on its obligations to pay its suppliers. The liabilities for these purchases are recorded in our financial statements when incurred. The aggregate amount guaranteed at December 31, 2013 was \$31.1 million, with the guarantees expiring on various dates through December 2014.

We have issued a letter of credit for \$1.0 million, which expires on September 12, 2014, related to the electric transmission services for FPU's northwest electric division. We have also issued a letter of credit to our current primary insurance company for \$1.1 million, which expires on December 2, 2014, as security to satisfy the deductibles under our various insurance policies. As a result of a change in our primary insurance company in 2010, we renewed and decreased the letter of credit for \$304,000 to our former primary insurance company, which will expire on June 1, 2014. There have been no draws on these letters of credit as of December 31, 2013. We do not anticipate that the letters of credit will be drawn upon by the counterparties, and we expect that the letters of credit will be renewed to the extent necessary in the future.

We provided a letter of credit for \$2.3 million to TETLP related to the precedent agreement. Additional information is presented in *Item 8, Financial Statements and Supplementary Data, Note 20, Other Commitments and Contingencies* in the Consolidated Financial Statements.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

INTEREST RATE RISK

Long-term debt is subject to potential losses based on changes in interest rates. Our long-term debt consists of fixed-rate senior notes, secured debt and convertible debentures. All of our long-term debt is fixed-rate debt and was not entered into for trading purposes. The carrying value of long-term debt, including current maturities but excluding a capital lease obligation was \$122.0 million at December 31, 2013, as compared to a fair value of \$136.8 million, using a discounted cash flow methodology that incorporates a market interest rate based on published corporate borrowing rates for debt instruments with similar terms and average maturities with adjustments for duration, optionality, credit risk, and risk profile. We evaluate whether to refinance existing debt or permanently refinance existing short-term borrowing, based in part on the fluctuation in interest rates.

COMMODITY PRICE RISK RELATED TO REGULATED ENERGY SEGMENT

We have entered into agreements with various wholesale suppliers to purchase natural gas and electricity for resale to our customers. Purchases under these contracts either do not meet the definition of derivatives or are considered "normal purchases and sales" and are accounted for on an accrual basis. For all of our regulated businesses that sell natural gas or electricity to end-use customers, we have fuel cost recovery mechanisms authorized by the PSCs that allow us to periodically adjust fuel rates to reflect changes in the wholesale cost of natural gas and electricity and to ensure that we recover all of the costs prudently incurred in purchasing natural gas and electricity for our customers.

COMMODITY PRICE RISK RELATED TO UNREGULATED ENERGY SEGMENT

Our propane distribution business is exposed to commodity price risk as a result of the competitive nature of retail pricing offered to our customers. In order to mitigate this risk, we utilize propane storage activities and forward contracts for supply.

We can store up to approximately 6.0 million gallons of propane (including leased storage and rail cars) during the winter season to meet our customers' peak requirements and to serve metered customers. Purchases under forward contracts are typically considered "normal purchases and sales" and are accounted for on an accrual basis. Decreases in the wholesale price of propane may cause the value of stored propane to decline, particularly if we utilize fixed price forward contracts for supply. To mitigate the risk of propane commodity price fluctuations on the inventory valuation, we have adopted a Risk Management Policy that allows our propane distribution operation to enter into fair value hedges or other economic hedges of our inventory. The following highlights our hedging activities:

- In June 2013, our propane distribution operation entered into put options to protect against the decline in propane prices and related potential inventory losses associated with 1.3 million gallons purchased for the propane price cap program in the upcoming heating season. If the put options are exercised, we would receive the difference between the market price and the strike price if propane prices fall below the strike prices of \$0.830 per gallon in December 2013 through February of 2014 and \$0.860 per gallon in January through March 2014. We account for these options as fair value hedges, and there is no ineffective portion of these hedges. We paid \$120,000 to purchase these put options. As of December 31, 2013, the put options had a fair value of \$20,000. The change in the fair value of the put options effectively reduced our propane inventory balance.
- In May 2013, our propane distribution operation entered into a call option to protect against an increase in propane prices associated with 630,000 gallons expected to be purchased at market-based prices to supply the demands of our propane price cap program customers. The retail price that we can charge to those customers during the upcoming heating season is capped at a pre-determined level. The call option is exercised if the propane prices rise above the strike price of \$0.975 per gallon in January through March 2014. We account for this call option as a derivative instrument on a mark-to-market basis with any change in its fair value being reflected in current period earnings. We paid \$72,000 to purchase this call option. As of December 31, 2013, the call option had a fair value of \$169,000.
- In May 2012, our propane distribution operation entered into call options to protect against an increase in propane prices associated with 1,260,000 gallons purchased for the propane price cap program for the months of December 2012 through March 2013. The strike prices of these call options ranged from \$0.905 per gallon to \$0.990 per gallon during this four-

month period. We paid \$139,000 to purchase the call options, which expired without exercising them as the market prices were below the strike prices. We accounted for the call options as a fair value hedge. As of December 31, 2012, the call options had a fair value of \$28,000. There was no ineffective portion of this fair value hedge in 2012.

Our propane wholesale marketing operation, Xeron, is a party to natural gas liquids forward contracts, primarily propane contracts, with various third parties. These contracts require that the propane wholesale marketing operation purchase or sell natural gas liquids at a fixed price at fixed future dates. At expiration, the contracts are typically settled financially without taking physical delivery of propane. The propane wholesale marketing operation also enters into futures contracts that are traded on the IntercontinentalExchange. In certain cases, the futures contracts are settled by the payment or receipt of a net amount equal to the difference between the current market price of the futures contract and the original contract price; however, they may also be settled by physical receipt or delivery of propane.

The forward and futures contracts are entered into for trading and wholesale marketing purposes. The propane wholesale marketing business is subject to commodity price risk on its open positions to the extent that market prices for natural gas liquids deviate from fixed contract settlement prices. Market risk associated with the trading of futures and forward contracts is monitored daily for compliance with our Risk Management Policy, which includes volumetric limits for open positions. To manage exposures to changing market prices, open positions are marked up or down to market prices and reviewed daily by our oversight officials. In addition, the Risk Management Committee reviews periodic reports on markets and the credit risk of counter-parties, approves any exceptions to the Risk Management Policy (within limits established by the Board of Directors) and authorizes the use of any new types of contracts.

Quantitative information on forward, futures and other contracts at December 31, 2013 and 2012 is presented in the following tables:

<u>At December 31, 2013</u>	<u>Quantity in Gallons</u>	<u>Estimated Market Prices</u>	<u>Estimated Market Contract Prices</u>
Forward Contracts			
Sale	1,892,000	\$0.9900 - \$1.4750	\$ 1.2786
Purchase	1,991,000	\$0.9411 - \$1.4600	\$ 1.2444

Estimated market prices and weighted average contract prices are in dollars per gallon.

All contracts expire by the end of the first quarter of 2014.

<u>At December 31, 2012</u>	<u>Quantity in Gallons</u>	<u>Estimated Market Prices</u>	<u>Weighted Average Contract Prices</u>
Forward Contracts			
Sale	1,262,000	\$0.7550-\$1.3650	\$ 0.9214
Purchase	2,648,000	\$0.7550-\$1.3300	\$ 0.9291

Estimated market prices and weighted average contract prices are in dollars per gallon.

All contracts expired by the end of the first quarter of 2013.

At December 31, 2013 and 2012, we marked these forward and other contracts to market, using market transactions in either the listed or OTC markets, which resulted in the following assets and liabilities:

<u>(in thousands)</u>	<u>2013</u>	<u>2012</u>
Mark-to-market energy assets, including put/call options	\$ 385	\$ 210
Mark-to-market energy liabilities	\$ 127	\$ 331

INFLATION

Inflation affects the cost of supply, labor, products and services required for operations, maintenance and capital improvements. While the impact of inflation has remained low in recent years, natural gas and propane prices are subject to rapid fluctuations. In the regulated natural gas and electric distribution operations, fluctuations in natural gas and electricity prices are passed on to customers through the fuel cost recovery mechanism in our tariffs. To help cope with the effects of inflation on our capital investments and returns, we periodically seek rate increases from regulatory commissions for our regulated operations and closely monitor the returns of our unregulated business operations. To compensate for fluctuations in propane gas prices, we adjust propane selling prices to the extent allowed by the market.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders of
Chesapeake Utilities Corporation

We have audited the accompanying consolidated balance sheets of Chesapeake Utilities Corporation (the "Company") as of December 31, 2013 and 2012, and the related consolidated statements of income, comprehensive income, stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2013. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2013 and 2012, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2013, in conformity with accounting principles generally accepted in the United States of America.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of December 31, 2013, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework), and our report dated March 6, 2014 expressed an unqualified opinion.

⁽²⁾ Includes amounts for shares issued for Directors' compensation.

⁽³⁾ The shares issued under the PIP are net of shares withheld for employee taxes. For 2013, 2012 and 2011, we withheld 10,411 , 5,670 and 12,234 shares, respectively, for taxes.

The accompanying notes are an integral part of the financial statements.

Table of Contents
Notes to the Consolidated Financial Statements

1. ORGANIZATION AND BASIS OF PRESENTATION

Chesapeake, incorporated in 1947 in Delaware, is a diversified energy company engaged in regulated energy, unregulated energy and other unregulated businesses. Our regulated energy businesses consist of: (a) regulated natural gas distribution operations in central and southern Delaware, Maryland's eastern shore and Florida; (b) regulated natural gas transmission operations on the Delmarva Peninsula, in Pennsylvania and in Florida; and (c) regulated electric distribution operations serving customers in northeast and northwest Florida. Our unregulated energy businesses primarily include: (a) propane distribution operations in Delaware, the eastern shore of Maryland and Virginia, southeastern Pennsylvania and Florida; (b) our propane wholesale marketing operation, which markets propane to major independent oil and petrochemical companies, wholesale resellers and retail propane companies located primarily in the southeastern United States; and (c) our natural gas marketing operation providing natural gas supplies directly to commercial and industrial customers in Florida, Delaware and Maryland. We also engage in non-energy businesses, primarily through our advanced information services subsidiary, which provides information-technology-related business services and solutions for both enterprise and e-business applications.

Our consolidated financial statements as of December 31, 2013 and 2012 and for the years ended December 31, 2013, 2012 and 2011 have been prepared in compliance with the rules and regulations of the SEC and GAAP. Our consolidated financial statements include the accounts of Chesapeake and its wholly-owned subsidiaries. We do not have any ownership interests in investments accounted for using the equity method or any variable interests in a variable interest entity. All intercompany accounts and transactions have been eliminated in consolidation. We have assessed and reported on subsequent events through the date of issuance of these consolidated financial statements.

We reclassified certain amounts in the consolidated statements of cash flows for the years ended December 31, 2012 and 2011 to conform to the current year's presentation. We also reclassified certain amounts in the consolidated statements of stockholders' equity for the years ended December 31, 2012 and 2011 to conform to the current year's presentation. These reclassifications are considered immaterial to the overall presentation of our consolidated financial statements.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates in measuring assets and liabilities and related revenues and expenses. These estimates involve judgments with respect to, among other things, various future economic factors that are difficult to predict and are beyond our control; therefore, actual results could differ from these estimates.

Table of Contents
Notes to the Consolidated Financial Statements

Property, Plant and Equipment

Property, plant and equipment are stated at original cost less accumulated depreciation or fair value, if impaired. Costs include direct labor, materials and third-party construction contractor costs, AFUDC, and certain indirect costs related to equipment and employees engaged in construction. The costs of repairs and minor replacements are charged against income as incurred, and the costs of major renewals and betterments are capitalized. Upon retirement or disposition of property owned by the unregulated businesses, the gain or loss, net of salvage value, is charged to income. Upon retirement or disposition of property within the regulated businesses, the gain or loss, net of salvage value, is charged to accumulated depreciation. A summary of property, plant and equipment by classification as of December 31, 2013 and 2012 is provided in the following table:

	As of December 31,	
	2013	2012
(in thousands)		
Property, plant and equipment		
Regulated Energy		
Natural gas distribution – Delmarva	\$ 179,724	\$ 149,558
Natural gas distribution – Florida	199,289	170,943
Natural gas transmission	242,163	202,968
Electric distribution – Florida	70,346	61,960
Unregulated Energy		
Propane distribution—Delmarva	54,865	53,156
Propane distribution – Florida	20,829	16,823
Other unregulated energy	573	239
Other	21,002	20,067
Total property, plant and equipment	788,791	675,714
Less: Accumulated depreciation and amortization	(174,148)	(155,378)
Plus: Construction work in progress	16,603	21,445
Net property, plant and equipment	\$ 631,246	\$ 541,781

Contributions or Advances in Aid of Construction

Customer contributions or advances in aid of construction reduce property, plant and equipment unless the amounts are refundable to customers. Contributions or advances may be refundable to customers after a number of years based on the amount of revenues generated from the customers or the duration of the service provided to the customers. Refundable contributions or advances are recorded initially as liabilities. The amounts that are determined to be non-refundable reduce property, plant and equipment at the time of such determination. During the years ended December 31, 2013 and 2012, there were \$785,000 and \$1.1 million, respectively, of non-refunded contributions or advances reducing property, plant and equipment.

Allowed Funds Used During Construction

Some of the additions to our regulated property, plant and equipment include AFUDC, which represents the estimated cost of funds, from both debt and equity sources, used to finance the construction of major projects. AFUDC is capitalized in rate base for rate making purposes when the completed projects are placed in service. During the years ended December 31, 2013, 2012, and 2011, we recorded \$131,000, \$111,000 and \$25,000, respectively, of AFUDC, all of which were related to short-term debt and reflected as a reduction of interest charges.

Asset Used in Leases

Property, plant and equipment for the natural gas transmission operation includes \$1.4 million of assets, consisting primarily of mains, measuring equipment and regulation station equipment used by Peninsula Pipeline to provide natural gas transmission service pursuant to a contract with a third party. This contract is accounted for as an operating lease due to the exclusive use of the assets by the customer. The service under this contract commenced in January 2009 and generates \$264,000 in annual revenue for a term of 20 years. Accumulated depreciation for these assets totaled \$363,000 and \$291,000 at December 31, 2013 and 2012, respectively.

Table of Contents
Notes to the Consolidated Financial Statements

Capital Lease Asset

Property, plant and equipment for our Delmarva natural gas distribution operation includes a capital lease asset of \$7.0 million, net of amortization, related to Sandpiper's capacity, supply and operating agreement. See *Note 4, Acquisitions* for additional information.

Jointly-owned pipeline

Property, plant and equipment for the natural gas transmission operation also includes \$6.7 million of assets, which consists of the 16 -mile pipeline from the Duval/Nassau County line to Amelia Island in Nassau County, Florida, jointly owned by Peninsula Pipeline and Peoples Gas. The amount included in property, plant and equipment represents Peninsula Pipeline's 45 -percent ownership of this pipeline. This 16 -mile pipeline was placed in service in December 2012. Accumulated depreciation for this pipeline totaled \$361,000 and \$28,000, at December 31, 2013 and 2012, respectively.

Gain on Sale of Asset

In July 2011, we sold an Internet Protocol address asset to an unaffiliated entity for approximately \$553,000. This particular Internet Protocol address was not used by us and did not have any net carrying value at the time of the sale. We recognized a non-operating pre-tax gain of \$553,000 from this sale, which is included in other income in the accompanying consolidated statements of income.

Depreciation and Accretion Included in Operations Expenses

We compute depreciation expense for our regulated operations by applying composite, annual rates, as approved by the regulators. The following table shows the average depreciation rates used during the years ended December 31, 2013, 2012 and 2011:

	2013	2012	2011
Natural gas distribution – Delmarva	2.7%	2.5%	2.5%
Natural gas distribution – Florida	3.3%	3.2%	3.5%
Natural gas transmission	2.7%	2.7%	2.6%
Electric distribution – Florida	3.6%	3.8%	4.2%

For our unregulated operations, we compute depreciation expense on a straight line basis over the following estimated useful lives of the assets:

<u>Asset Description</u>	<u>Useful Life</u>
Propane distribution mains	10-37 years
Propane bulk plants and tanks	10-40 years
Liquefied petroleum gas equipment	5-33 years
Meters and meter installations	5-33 years
Measuring and regulating station equipment	5-37 years
Office furniture and equipment	3-10 years
Transportation equipment	4-20 years
Structures and improvements	5-45 years
Other	Various

We report certain depreciation and accretion in operations expense, rather than depreciation and amortization expense, in the accompanying consolidated statements of income in accordance with industry practice and regulatory requirements. Depreciation and accretion included in operations expense consists of the accretion of the costs of removal for future retirements of utility assets, vehicle depreciation, computer software and hardware depreciation, and other minor amounts of depreciation expense. For the years ended December 31, 2013, 2012 and 2011, \$6.1 million, \$5.5 million and \$5.1 million, respectively, of depreciation and accretion were reported in operations expenses.

Regulated Operations

We account for our regulated operations in accordance with ASC Topic 980, *Regulated Operations*, which includes accounting principles for companies whose rates are determined by independent third-party regulators. When setting rates, regulators often make decisions, the economics of which require companies to defer costs or revenues in different periods than may be appropriate for unregulated enterprises. When this situation occurs, a regulated company defers the associated costs as regulatory assets on the balance sheet and records them as expense on the income statement as it collects revenues. Further, regulators can also impose liabilities upon a regulated company for amounts previously collected from customers and for recovery of costs that are expected to be incurred in the future as regulatory liabilities. If we were required to terminate the application of these regulatory provisions to our regulated operations, all such deferred amounts would be recognized in the statement of income at that time, which could have a material impact on our financial position, results of operations and cash flows.

At December 31, 2013 and 2012, the regulated utility operations had recorded the following regulatory assets and liabilities included in our consolidated balance sheets. These assets and liabilities will be recognized as revenues and expenses in future periods as they are reflected in customers' rates.

Table of Contents
Notes to the Consolidated Financial Statements

	As of December 31,	
	2013	2012
<i>(in thousands)</i>		
Regulatory Assets		
Under-recovered purchased fuel costs ⁽¹⁾	\$ 1,549	\$ 2,219
Deferred post retirement benefits ⁽²⁾	8,578	17,755
Deferred transaction and transition costs ⁽³⁾	471	1,035
Deferred conversion and development costs ⁽¹⁾	1,320	842
Environmental regulatory assets and expenditures ⁽⁴⁾	5,170	5,432
Acquisition adjustment ⁽⁵⁾	47,478	48,724
Loss on reacquired debt ⁽⁶⁾	1,486	1,484
Other	2,968	2,653
Total Regulatory Assets	\$ 69,020	\$ 80,144
Regulatory Liabilities		
Self insurance ⁽⁹⁾	\$ 1,000	\$ 1,212
Over-recovered purchased fuel costs ⁽¹⁾	2,818	218
Conservation cost recovery ⁽¹⁾	51	356
Storm reserve ⁽⁹⁾	2,875	2,742
Accrued asset removal cost ⁽⁸⁾	39,510	38,096
Deferred gains ⁽⁷⁾	783	1,977
Other	1,032	526
Total Regulatory Liabilities	\$ 48,069	\$ 45,127

⁽¹⁾ We are allowed to recover the asset or are required to pay the liability in rates. We do not earn an overall rate of return on these assets.

⁽²⁾ The Florida PSC allowed FPU to treat as a regulatory asset the portion of the unrecognized costs pursuant to *ASC Topic 715, Compensation - Retirement Benefits*, related to its regulated operations. See *Note 16, Employee Benefit Plans*, for additional information.

⁽³⁾ The Florida PSC approved the inclusion of the FPU merger-related costs in our rate base and the recovery of those costs in rates. The balances at December 31, 2013 and 2012 include the gross-up of this regulatory asset for income tax because a portion of the merger-related costs is not tax-deductible.

⁽⁴⁾ All of our environmental expenditures incurred to date and current estimate of future environmental expenditures have been approved by various PSCs for recovery. See *Note 19, Environmental Commitments and Contingencies*, for additional information on our environmental contingencies.

⁽⁵⁾ We are allowed to include the premiums paid in various natural gas utility acquisitions in Florida in our rate bases and recover them over a specific time period pursuant to the Florida PSC approvals. Included in these amounts are \$1.3 million of the premium paid by FPU, \$34.2 million of the premium paid by Chesapeake in 2009, including the gross up of the amount for income tax, because it is not tax deductible, and \$746,000 of the premium paid by FPU in 2010.

⁽⁶⁾ Gains and losses resulting from the reacquisition of long-term debt are amortized over future periods as adjustments to interest expense in accordance with established regulatory practice.

⁽⁷⁾ Pursuant to the Florida PSC order, we are required to defer and amortize over a specific time period certain gains identified during the FPU merger integration.

⁽⁸⁾ In accordance with regulatory treatment, our depreciation rates are comprised of two components – historical cost and the estimated cost of removal, net of estimated salvage, of certain regulated properties. We collect these costs in base rates through depreciation expense with a corresponding credit to accumulated depreciation. Because the accumulated estimated removal costs meet the requirements of authoritative guidance related to regulated operations, we have accounted for them as a regulatory liability and have reclassified them from accumulated depreciation to accumulated removal costs in our consolidated balance sheets.

⁽⁹⁾ We have self-insurance and storm reserves that allow us to collect through rates amounts to be used against general claims, storm restoration costs and other losses as they are incurred.

We monitor our regulatory and competitive environments to determine whether the recovery of our regulatory assets continues to be probable. If we were to determine that recovery of these assets is no longer probable, we would write off the assets against earnings. We believe that provisions of *ASC Topic 980, Regulated Operations*, continue to apply to our regulated operations and that the recovery of our regulatory assets is probable.

Table of Contents
Notes to the Consolidated Financial Statements

Operating Revenues

Revenues for our natural gas and electric distribution operations are based on rates approved by the PSC in each state in which they operate. Eastern Shore's revenues are based on rates approved by the FERC. Customers' base rates may not be changed without formal approval by these commissions. The PSCs, however, have authorized our regulated operations to negotiate rates, based on approved methodologies, with customers that have competitive alternatives. The FERC has also authorized Eastern Shore to negotiate rates above or below the FERC-approved maximum rates, which customers can elect as an alternative to negotiated rates.

For regulated deliveries of natural gas and electricity, we read meters and bill customers on monthly cycles that do not coincide with the accounting periods used for financial reporting purposes. We accrue unbilled revenues for natural gas and electricity that have been delivered, but not yet billed, at the end of an accounting period to the extent that they do not coincide. We estimate the amount of the unbilled revenue by jurisdiction and customer class. A similar computation is made to accrue unbilled revenues for propane customers with meters and natural gas marketing customers, whose billing cycles do not coincide with our accounting periods.

The propane wholesale marketing operation records trading activity for open contracts on a net mark-to-market basis in our consolidated statement of income. For propane bulk delivery customers without meters and for advanced information services customers, we record revenue in the period the products are delivered and/or services are rendered.

All of our natural gas and electric distribution operations, except for two utilities that do not sell natural gas to end-use customers as a result of deregulation, have fuel cost recovery mechanisms. These mechanisms provide a method of adjusting the billing rates to reflect changes in the cost of purchased fuel. The difference between the current cost of fuel purchased and the cost of fuel recovered in billed rates is deferred and accounted for as either unrecovered fuel cost or amounts payable to customers. Generally, these deferred amounts are recovered or refunded within one year. Chesapeake's Florida natural gas distribution division and FPU's Indiantown division provide unbundled delivery service to their customers, whereby the customers are permitted to purchase their gas requirements directly from competitive natural gas marketers.

We charge flexible rates to our natural gas distribution industrial interruptible customers to compete with prices of alternative fuels, which these customers are able to use. Neither we nor our interruptible customers are contractually obligated to deliver or receive natural gas on a firm service basis.

We report revenue taxes, such as gross receipts taxes, franchise taxes, and sales taxes, on a net basis.

Cost of Sales

Cost of sales includes the direct costs attributable to the products sold or services provided to our customers. These costs include primarily the variable cost of natural gas, electricity and propane commodities, pipeline capacity costs needed to transport and store natural gas, transmission costs for electricity, transportation costs to transport propane purchases to our storage facilities, and the direct cost of labor for our advanced information services subsidiary.

Operations and Maintenance Expenses

Operations and maintenance expenses include operations and maintenance salaries and benefits, materials and supplies, usage of vehicles, tools and equipment, payments to contractors, utility plant maintenance, customer service, professional fees and other outside services, insurance expense, minor amounts of depreciation, accretion of cost of removal for future retirements of utility assets, and other administrative expenses.

Cash and Cash Equivalents

Our policy is to invest cash in excess of operating requirements in overnight income-producing accounts. Such amounts are stated at cost, which approximates fair value. Investments with an original maturity of three months or less when purchased are considered cash equivalents.

Accounts Receivable and Allowance for Doubtful Accounts

Accounts receivable consist primarily of amounts due for distribution sales of natural gas, electricity and propane and transportation services to customers. An allowance for doubtful accounts is recorded against amounts due to reduce the receivables balance to the amount we reasonably expect to collect based upon our collections experiences and our assessment of customers' inability or reluctance to pay. If circumstances change, our estimates of recoverable accounts receivable may also change. Circumstances which could affect such estimates include, but are not limited to, customer credit issues, the level of natural gas, electricity and propane prices and general economic conditions. Accounts are written off when they are deemed to be uncollectible.

Table of Contents
Notes to the Consolidated Financial Statements

Inventories

We use the average cost method to value propane, materials and supplies, and other merchandise inventory. If market prices drop below cost, inventory balances that are subject to price risk are adjusted to market values.

Goodwill and Other Intangible Assets

Goodwill is not amortized but is tested for impairment at least annually. In addition, goodwill of a reporting unit is tested for impairment between annual tests if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying value. Other intangible assets are amortized on a straight-line basis over their estimated economic useful lives. Please refer to *Note 10, Goodwill and Other Intangible Assets*, for additional discussion of this subject.

Other Deferred Charges

Other deferred charges include discount, premium and issuance costs associated with long-term debt. Debt issuance costs are deferred and then are amortized to interest expense over the original lives of the respective debt issuances.

Pension and Other Postretirement Plans

Pension and other postretirement plan costs and liabilities are determined on an actuarial basis and are affected by numerous assumptions and estimates including the fair value of plan assets, estimates of the expected returns on plan assets, assumed discount rates, the level of contributions made to the plans, and current demographic and actuarial mortality data. We review annually the estimates and assumptions underlying our pension and other postretirement plan costs and liabilities with the assistance of third-party actuarial firms. The assumed discount rates and the expected returns on plan assets are the assumptions that generally have the most significant impact on our pension costs and liabilities. The assumed discount rates, health care cost trend rates and rates of retirement generally have the most significant impact on our postretirement plan costs and liabilities.

The discount rates are utilized principally in calculating the actuarial present value of our pension and postretirement obligations and net pension and postretirement costs. When estimating our discount rates, we consider high quality corporate bond rates, such as Moody's Aa bond index and the Citigroup yield curve, changes in those rates from the prior year and other pertinent factors, including the expected life of each of our plans and their respective payment options.

The expected long-term rates of return on assets are utilized in calculating the expected returns on the plan assets component of our annual pension plan costs. We estimate the expected returns on plan assets of each of our plans by evaluating expected bond returns, asset allocations, the effects of active plan management, the impact of periodic plan asset rebalancing and historical performance. We also consider the guidance from our investment advisors in making a final determination of our expected rates of return on assets.

We estimate the health care cost trend rates used in determining our postretirement net expense based upon actual health care cost experience, the effects of recently enacted legislation and general economic conditions. Our assumed rate of retirement is estimated based upon our annual reviews of participant census information as of the measurement date.

Actual changes in the fair value of plan assets and the differences between the actual return on plan assets and the expected return on plan assets could have a material effect on the amount of pension and postretirement benefit costs that we ultimately recognize. A 0.25 percent decrease in the discount rate could increase our annual pension and postretirement costs by approximately \$4,000, and a 0.25 percent increase could decrease our annual pension and postretirement costs by approximately \$40,000. A 0.25 percent change in the rate of return could change our annual pension cost by approximately \$132,000 and would not have an impact on the postretirement and supplemental executive retirement plans because these plans are not funded.

Income Taxes, Investment Tax Credit Adjustments and Tax-related contingency

Deferred tax assets and liabilities are recorded for the income tax effect of temporary differences between the financial statement bases and tax bases of assets and liabilities and are measured using the enacted income tax rates in effect in the years in which the differences are expected to reverse. Deferred tax assets are recorded net of any valuation allowance when it is more likely than not that such income tax benefits will be realized. Investment tax credits on utility property have been deferred and are allocated to income ratably over the lives of the subject property.

We account for uncertainty in income taxes in the financial statements only if it is more likely than not that an uncertain tax position is sustainable based on technical merits. Recognizable tax positions are then measured to determine the amount of benefit recognized in the financial statements. We recognize penalties and interest related to unrecognized tax benefits as a component of other income.

We account for contingencies associated with taxes other than income when the likelihood of a loss is both probable and estimable. In assessing the likelihood of a loss, we do not consider the existence of current inquiries, or the likelihood of future inquiries, by

Table of Contents
Notes to the Consolidated Financial Statements

tax authorities as a factor. Our assessment is based solely on our application of the appropriate statutes and the likelihood of a loss assuming the proper inquiries are made by tax authorities.

Financial Instruments

Xeron engages in trading activities using forward and futures contracts, which have been accounted for using the mark-to-market method of accounting. Under mark-to-market accounting, our trading contracts are recorded at fair value as mark-to-market energy assets and liabilities. The changes in fair value of the contracts are recognized as gains or losses in revenues on the consolidated statements of income in the period of change.

Our natural gas, electric and propane distribution operations and natural gas marketing operations enter into agreements with suppliers to purchase natural gas, electricity and propane for resale to their customers. Purchases under these contracts either do not meet the definition of derivatives or are considered "normal purchases and sales" and are accounted for on an accrual basis.

Our propane distribution operation may enter into derivative transactions, such as swaps, put options and call options in order to mitigate the impact of wholesale price fluctuations on its inventory valuation. These transactions may be designated as fair value hedges if they meet all of the accounting requirements pursuant to ASC Topic 815, *Derivatives and Hedging* and we elect to designate the instruments as fair value hedges. If designated as a fair value hedge, the value of the hedging instrument, such as a swap or put option, is recorded at fair value with the effective portion of the gain or loss of the hedging instrument effectively reducing or increasing the value of propane inventory. The ineffective portion of the gain or loss is recorded in earnings. If the instrument is not designated as a fair value hedge or does not meet the accounting requirements of a fair value hedge, it is recorded at fair value with the gain or loss being recorded in earnings.

FASB Statements and Other Authoritative Pronouncements

Recent Accounting Standards Yet to be Adopted

Income Taxes (ASC 740) - In July 2013, the FASB issued ASU 2013-11, *Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists*, which requires the netting of certain unrecognized tax benefits against a deferred tax asset for a loss or other similar tax carryforward that would apply upon settlement of an uncertain tax position. This ASU is effective prospectively, beginning on January 1, 2014, for all unrecognized tax benefits existing at the adoption of this new standard. Retrospective implementation and early adoption of this standard are permitted. We expect the adoption of ASU 2013-11 to have no material impact on our financial position and results of operations.

Recently Adopted Accounting Standards

Comprehensive Income (ASC 220) - Effective January 1, 2013, we adopted ASU 2013-02, *Reporting of Amounts Reclassified Out Of Accumulated Other Comprehensive Income*, which requires enhanced disclosures of amounts reclassified out of accumulated other comprehensive income by component. The adoption of ASU 2013-02 had no impact on our financial position and results of operations. See *Note 15, Accumulated Other Comprehensive Income (Loss)*, for additional disclosures required under this new standard.

Balance Sheet (ASC 210) - Effective January 1, 2013, we adopted ASU 2011-11, *Disclosures About Offsetting Assets and Liabilities*, and ASU 2013-01, *Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities*. These new standards require disclosures about offsetting and related arrangements in order to help financial statement users better understand the effect of those arrangements on our financial position. The adoption of ASU 2011-11 and ASU 2013-01 had no material impact on our financial position and results of operations. See *Note 7, Derivative Instruments*, for additional disclosures about our offsetting of certain assets and liabilities.

Table of Contents
Notes to the Consolidated Financial Statements

3. EARNINGS PER SHARE

Basic earnings per share are computed by dividing income available for common stockholders by the weighted average number of shares of common stock outstanding during the period. Diluted earnings per share are computed by dividing income available for common stockholders by the weighted average number of shares of common stock outstanding during the period adjusted for the exercise and/or conversion of all potentially dilutive securities, such as convertible debt and share-based compensation. The calculations of both basic and diluted earnings per share are presented in the following table.

	For the Year Ended December 31,		
	2013	2012	2011
<i>(in thousands, except shares and per share data)</i>			
Calculation of Basic Earnings Per Share:			
Net Income	\$ 32,787	\$ 28,863	\$ 27,622
Weighted average shares outstanding	9,620,641	9,586,144	9,555,799
Basic Earnings Per Share	\$ 3.41	\$ 3.01	\$ 2.89
Calculation of Diluted Earnings Per Share:			
Reconciliation of Numerator:			
Net Income	\$ 32,787	\$ 28,863	\$ 27,622
Effect of 8.25% Convertible debentures	43	53	61
Adjusted numerator — Diluted	\$ 32,830	\$ 28,916	\$ 27,683
Reconciliation of Denominator:			
Weighted shares outstanding — Basic	9,620,641	9,586,144	9,555,799
Effect of dilutive securities:			
Share-based Compensation	25,244	23,499	23,792
8.25% Convertible debentures	49,745	61,864	71,467
Adjusted denominator — Diluted	9,695,630	9,671,507	9,651,058
Diluted Earnings Per Share	\$ 3.39	\$ 2.99	\$ 2.87

4. ACQUISITIONS

Eastern Shore Gas Company

On May 31, 2013, the Maryland PSC approved the acquisition of ESG (see *Note 18, Rates and Other Regulatory Activities*, for additional information regarding this approval). Upon receiving this approval, we completed the purchase of the operating assets of ESG, which was not related to, or affiliated with, our interstate natural gas transmission subsidiary, Eastern Shore. We paid approximately \$16.5 million at the closing of the transaction, which was subject to certain adjustments specified in the asset purchase agreement. During the third quarter of 2013, the purchase price was reduced by \$543,000 due to adjustments to property, plant and equipment, propane inventory, accounts receivable and other accrued liabilities. The purchase price included approximately \$726,000 of sales tax related to the transaction. We financed the acquisition using unsecured short-term debt.

Approximately 11,000 residential and commercial underground propane distribution system customers and 500 bulk propane delivery customers acquired in the transaction are being served by our new subsidiary, Sandpiper, and our propane distribution subsidiary, Sharp, respectively. Sandpiper's operations, which cover all of Worcester County, Maryland, are now subject to rate and service regulation by the Maryland PSC. We are evaluating the potential conversion of some of the underground propane distribution systems to natural gas distribution. Although these customers are currently being served with propane, we classify Sandpiper's operations as natural gas distribution in the Regulated Energy segment.

In connection with this acquisition, we recorded \$12.6 million in property, plant and equipment, \$344,000 in propane inventory, \$2.5 million in accounts receivable and accrued revenue and \$227,000 in other current liabilities, which included the effect of the purchase price adjustment in the third quarter of 2013. All but insignificant amounts of assets and liabilities are recorded in the regulated energy segment. No goodwill or intangible asset was recorded from this acquisition. The allocation of the purchase price and valuation of assets are preliminary, and we will complete the final purchase price allocation as soon as practicable, but no later than one year from the purchase of the assets.

Sales tax of approximately \$726,000 included in the purchase price was expensed as a transaction cost and was reflected in other taxes in the accompanying consolidated statements of income for the year ended December 31, 2013. The revenue and net income

Table of Contents
Notes to the Consolidated Financial Statements

from this acquisition for the year ended December 31, 2013, included in our consolidated statement of income was \$9.8 million and \$309,000, respectively.

At the closing of this transaction, we entered into a capacity, supply and operating agreement with EGWIC, an affiliate of the seller for a term of six years. Pursuant to this agreement, Sandpiper has access to 13 propane storage tanks, with total storage capacity of 570,000 gallons in Worcester County, Maryland to meet its supply requirements. For this access, Sandpiper has agreed to pay a monthly fee of \$42,000 for the first annual period and a monthly fee of \$125,000 for the remaining term of the agreement. Sandpiper will also purchase propane supply (initially estimated at approximately 7.4 million gallons of annual contract volume) from EGWIC over the same six -year period. Sandpiper has the option to pay a fixed per-gallon price for some or all of the propane purchases under this agreement or a market-based price using one of two local propane pricing indices. As further discussed in *Note 18, Rates and Other Regulatory Activities*, the cost of the capacity, supply and operating agreement will be recovered as a fuel cost in Sandpiper's new annual GSR filing.

Due to the specific property involved and the fixed monthly payments for the use of the storage capacity, the capacity portion of the capacity, supply and operating agreement is accounted for as a capital lease. As a result, we recorded a corresponding capital lease asset and capital lease obligation of \$7.1 million at the inception of the agreement. During the year ended December 31, 2013, we recorded approximately \$144,000 and \$147,000, respectively, for the interest on the capital lease obligation and amortization of the capital lease asset. Since the entire amount of the capacity payments is expected to be recovered through the GSR mechanism, the timing and amount of the expense recognition, as well as the presentation of the expenses, will also follow the regulatory accounting.

Other Acquisitions

On December 2, 2013, we acquired certain operating assets of Fort Meade for approximately \$792,000. The purchased assets are used to provide natural gas distribution service in the City of Fort Meade, Florida. In connection with this acquisition we recorded \$670,000 in property, plant and equipment, \$14,000 in inventory, \$150,000 in goodwill and \$42,000 in other current liabilities. Valuation of certain property, plant and equipment is preliminary and may be adjusted in the future based upon the final valuation, but no later than one year from the date of acquisition. All of the goodwill is expected to be deductible for income tax purposes. The revenue and net income from this acquisition that were included in our consolidated statement of income for the year ended December 31, 2013 were not material.

On June 7, 2013, we acquired the operating assets of Austin Cox for approximately \$600,000. The purchased assets are used to provide heating, ventilation and air conditioning, plumbing and electrical services to residential, commercial and industrial customers throughout the lower Delmarva Peninsula. In connection with this acquisition, we recorded \$105,000 in property, plant and equipment, \$30,000 in inventory, \$250,000 as an intangible asset related to a non-compete agreement to be amortized over five years beginning in July 2013 and \$237,000 in goodwill. All of the goodwill is expected to be deductible for income tax purposes. The revenue and net income from this acquisition that were included in our consolidated statement of income for the year ended December 31, 2013 were not material.

On February 5, 2013, we purchased the propane operating assets of Glades for approximately \$2.9 million. The purchased assets are used to provide propane distribution service to approximately 3,000 residential and commercial customers in Okeechobee, Glades and Hendry Counties, Florida. In connection with this acquisition, we recorded \$1.6 million in property, plant and equipment, \$502,000 in propane and other inventory, \$300,000 in an intangible asset related to Glades' customer list, to be amortized over 12 years beginning in February 2013 and \$453,000 in goodwill. All of the goodwill is expected to be deductible for income tax purposes. The revenue and net income from this acquisition that were included in our consolidated statement of income for the year ended December 31, 2013 were not material.

In December 2011 and January, 2012, we purchased the propane operating assets of Crescent and Barefoot Bay Propane Gas Company for total consideration of approximately \$954,000. In connection with these acquisitions, we recorded \$200,000 in goodwill, all of which is deductible for income tax purposes. There was no intangible asset other than goodwill recorded in connection with these acquisitions. The revenue and net income from these acquisitions, which are included in our consolidated statements of income, are not material.

5. SEGMENT INFORMATION

We use the management approach to identify operating segments. We organize our business around differences in regulatory environment and/or products or services, and the operating results of each segment are regularly reviewed by the chief operating decision maker (our Chief Executive Officer) in order to make decisions about resources and to assess performance. The segments are evaluated based on their pre-tax operating income. Our operations comprise three operating segments:

Table of Contents
Notes to the Consolidated Financial Statements

- *Regulated Energy*. The Regulated Energy segment includes natural gas distribution, natural gas transmission operations and electric distribution operations. All operations in this segment are regulated, as to their rates and services, by the PSCs having jurisdiction in each operating territory or by the FERC in the case of Eastern Shore.
- *Unregulated Energy*. The Unregulated Energy segment includes propane distribution and wholesale marketing operations, and natural gas marketing operations, which are unregulated as to their rates and services. Also included in this segment are other unregulated energy services, such as energy-related merchandise sales and heating, ventilation and air conditioning, plumbing and electrical services.
- *Other*. The "Other" segment consists primarily of our advanced information services subsidiary, as well as our unregulated subsidiaries that own real estate leased to Chesapeake and certain corporate costs not allocated to other operations.

The following table presents information about our reportable segments.

	For the Year Ended December 31,		
	2013	2012	2011
<i>(in thousands)</i>			
Operating Revenues, Unaffiliated Customers			
Regulated Energy	\$ 263,573	\$ 245,042	\$ 255,405
Unregulated Energy	161,760	130,020	149,586
Other	18,973	17,440	13,036
Total operating revenues, unaffiliated customers	<u>\$ 444,306</u>	<u>\$ 392,502</u>	<u>\$ 418,027</u>
Intersegment Revenues ⁽¹⁾			
Regulated Energy	\$ 1,064	\$ 1,166	\$ 821
Unregulated Energy	4,963	3,029	—
Other	1,017	917	793
Total intersegment revenues	<u>\$ 7,044</u>	<u>\$ 5,112</u>	<u>\$ 1,614</u>
Operating Income			
Regulated Energy	\$ 50,084	\$ 46,999	\$ 43,911
Unregulated Energy	12,353	8,355	9,619
Other	297	1,281	175

Unregulated Energy	4,829	3,969	2,432
Other	7,266	5,185	4,895
Total capital expenditures	<u>\$ 108,039</u>	<u>\$ 78,210</u>	<u>\$ 44,431</u>

⁽¹⁾ All significant intersegment revenues are billed at market rates and have been eliminated from consolidated revenues.

Table of Contents
Notes to the Consolidated Financial Statements

	As of December 31,	
	2013	2012
Identifiable Assets		
Regulated Energy	\$ 708,950	\$ 615,438
Unregulated Energy	100,585	79,287
Other	27,987	39,021
Total identifiable assets	<u>\$ 837,522</u>	<u>\$ 733,746</u>

Our operations are almost entirely domestic. BravePoint has infrequent transactions with foreign companies, located primarily in Canada. These transactions, which are denominated and paid in U.S. dollars, are immaterial to the consolidated revenues.

6. SUPPLEMENTAL CASH FLOW DISCLOSURES

Cash paid for interest and income taxes during the years ended December 31, 2013, 2012 and 2011 were as follows:

	For the Year Ended December 31,		
	2013	2012	2011
(in thousands)			
Cash paid for interest	\$ 7,837	\$ 8,086	\$ 7,746
Cash paid for income taxes	\$ 10,243	\$ 3,809	\$ 2,327

Non-cash investing and financing activities during the years ended December 31, 2013, 2012, and 2011 were as follows:

	For the Year Ended December 31,		
	2013	2012	2011
(in thousands)			
Capital property and equipment acquired on account, but not paid as of December 31	\$ 341	\$ 7,065	\$ 1,811
Retirement Savings Plan	\$ —	\$ —	\$ 80
Conversion of Debentures	\$ 295	\$ 186	\$ 181
Performance Incentive Plan	\$ 355	\$ 427	\$ 280
Director Stock Compensation Plan	\$ 495	\$ 443	\$ 456
Capital Lease Obligation	\$ 7,126	\$ —	\$ —

7. DERIVATIVE INSTRUMENTS

We use derivative and non-derivative contracts to engage in trading activities and manage risks related to obtaining adequate supplies and the price fluctuations of natural gas, electricity and propane. Our natural gas, electric and propane distribution operations have entered into agreements with suppliers to purchase natural gas, electricity and propane for resale to their customers. Purchases under these contracts either do not meet the definition of derivatives or are considered "normal purchases and sales" and are accounted for on an accrual basis. Our propane distribution operation may also enter into fair value hedges of its inventory in order to mitigate the impact of wholesale price fluctuations. As of December 31, 2013, our natural gas and electric distribution operations did not have any outstanding derivative contracts.

In June 2013, Sharp entered into put options to protect against the decline in propane prices and related potential inventory losses associated with 1.3 million gallons purchased for the propane price cap program in the upcoming heating season. If exercised, we will receive the difference between the market price and the strike price if propane prices fall below the strike prices of \$0.830 per gallon in December 2013 through February of 2014 and \$0.860 per gallon in January through March 2014. We account for these options as fair value hedges, and there is no ineffective portion of these hedges. We paid \$120,000 to purchase these put options. As of December 31, 2013, the put options had a fair value of \$20,000. The change in the fair value of the put options effectively reduced our propane inventory balance.

In May 2013, Sharp entered into a call option to protect against an increase in propane prices associated with 630,000 gallons expected to be purchased at market-based prices to supply the demands of our propane price cap program customers. The retail

Table of Contents
Notes to the Consolidated Financial Statements

price that we can charge to those customers during the upcoming heating season is capped at a pre-determined level. The call option is exercised if the propane prices rise above the strike price of \$0.975 per gallon in January through March 2014. We account for this call option as a derivative instrument on a mark-to-market basis with any change in its fair value being reflected in current period earnings. We paid \$72,000 to purchase this call option. As of December 31, 2013, the call option had a fair value of \$169,000.

In May 2012, Sharp entered into call options to protect against an increase in propane prices associated with 1,260,000 gallons purchased for the propane price cap program for the months of December 2012 through March 2013. The strike prices of these call options ranged from \$0.905 per gallon to \$0.990 per gallon during this four-month period. We paid \$139,000 to purchase the call options, which expired without exercising the options as the market prices were below the strike prices. We accounted for the call options as a fair value hedge. As of December 31, 2012, the call options had a fair value of \$28,000. There was no ineffective portion of this fair value hedge in 2012.

Xeron engages in trading activities using forward and futures contracts. These contracts are considered derivatives and have been accounted for using the mark-to-market method of accounting. Under the mark-to-market method of accounting, the trading contracts are recorded at fair value, and the changes in fair value of those contracts are recognized as unrealized gains or losses in the consolidated statements of income in the period of change. As of December 31, 2013, we had the following outstanding trading contracts, which we accounted for as derivatives:

At December 31, 2013	Quantity in Gallons	Estimated Market Prices	Weighted Average Contract Prices
Forward Contracts			
Sale	1,892,000	\$0.9900 - \$1.4750	\$ 1.2786
Purchase	1,991,000	\$0.9411 - \$1.4600	\$ 1.2444

Estimated market prices and weighted average contract prices are in dollars per gallon.

All contracts expire by the end of the first quarter of 2014.

Xeron has entered into master netting agreements with two counterparties to mitigate exposure to counterparty credit risk. The master netting agreements enable Xeron to net these two counterparties' outstanding accounts receivable and payable, which are presented on a gross basis in the accompanying consolidated balance sheets. At December 31, 2013, Xeron had a right to offset \$2.8 million and \$3.2 million of accounts receivable and accounts payable, respectively, with these two counterparties. At December 31, 2012, Xeron had a right to offset \$1.2 million and \$511,000 of accounts receivable and accounts payable, respectively, with these two counterparties.

The following tables present information about the fair value and related gains and losses of our derivative contracts. We did not have any derivative contracts with a credit-risk-related contingency.

Table of Contents
Notes to the Consolidated Financial Statements

Fair values of the derivative contracts recorded in the consolidated balance sheets as of December 31, 2013 and 2012, are as follows:

(in thousands)	Asset Derivatives		
	Balance Sheet Location	Fair Value As Of	
		December 31, 2013	December 31, 2012
Derivatives not designated as hedging instruments			
Forward contracts	Mark-to-market energy assets	\$ 196	\$ 182
Call Option	Mark-to-market energy assets	169	—
Derivatives designated as fair value hedges			
Call option	Mark-to-market energy assets	—	28
Put option	Mark-to-market energy assets	20	—
Total asset derivatives		\$ 385	\$ 210

(in thousands)	Liability Derivatives		
	Balance Sheet Location	Fair Value As Of	
		December 31, 2013	December 31, 2012
Derivatives not designated as hedging instruments			
Forward contracts	Mark-to-market energy liabilities	\$ 127	\$ 331
Total liability derivatives		\$ 127	\$ 331

The effects of gains and losses from derivative instruments are as follows:

(in thousands)	Amount of Gain (Loss) on Derivatives:			
	Location of Gain (Loss) on Derivatives	For the Year Ended December 31,		
		2013	2012	2011
Derivatives not designated as hedging instruments:				
Unrealized gain (loss) on forward contracts	Revenue	\$ 217	\$ (339)	\$ 41
Call Option	Cost of Sales	97	—	(23)
Derivatives designated as fair value hedges:				
Put/Call Option	Cost of Sales	(28)	27	—
Put/Call Option ⁽¹⁾	Propane Inventory	(100)	(40)	—
Total		\$ 186	\$ (352)	\$ 18

(1) As a fair value hedge with no ineffective portion, the unrealized gains and losses associated with this call option are recorded in cost of sales, offset by the corresponding change in the value of propane inventory (hedged item), which is also recorded in cost of sales. The amounts in cost of sales offset to zero and the unrealized gains and losses of this call option effectively changed the value of propane inventory.

The effects of trading activities on the consolidated statements of income are as follows:

(in thousands)	Amount of Trading Revenue			
	Location of Gain (Loss) on Derivatives	For the Year Ended December 31,		
		2013	2012	2011
Realized gain on forward contracts and options	Revenue	\$ 1,127	\$ 2,695	\$ 2,215
Unrealized gain (loss) on forward contracts	Revenue	217	(339)	41
Total		\$ 1,344	\$ 2,356	\$ 2,256

8. FAIR VALUE OF FINANCIAL INSTRUMENTS

GAAP establishes a fair value hierarchy that prioritizes the inputs to valuation methods used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are the following:

Level 1: Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;

Level 2: Quoted prices in markets that are not active, or inputs which are observable, either directly or indirectly, for substantially the full term of the asset or liability; and

Level 3: Prices or valuation techniques requiring inputs that are both significant to the fair value measurement and unobservable (i.e. supported by little or no market activity).

Financial Assets and Liabilities Measured at Fair Value

The following table summarizes our financial assets and liabilities that are measured at fair value on a recurring basis and the fair value measurements, by level, within the fair value hierarchy as of December 31, 2013 :

(in thousands)	Fair Value	Fair Value Measurements Using:		
		Quoted Prices in Active Markets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets:

Table of Contents
Notes to the Consolidated Financial Statements

The following table sets forth the summary of the changes in the fair value of Level 3 investments for the year ended December 31, 2013 :

	For the Year Ended December 31, 2013
<i>(in thousands)</i>	
Beginning Balance	\$ —
Transfers in due to change in trustee	425
Purchases and adjustments	41
Transfers	(16)
Investment income	8
Ending Balance	<u>\$ 458</u>

Investment income from the Level 3 investments is reflected in other income (loss) in the accompanying consolidated statements of income.

The following valuation techniques were used to measure fair value assets in the tables above on a recurring basis as of December 31, 2013 and 2012:

Level 1 Fair Value Measurements:

Investments- equity securities — The fair values of these trading securities are recorded at fair value based on unadjusted quoted prices in active markets for identical securities.

Investments- other — The fair values of these investments, comprised of money market and mutual funds, are recorded at fair value based on quoted net asset values of the shares.

Level 2 Fair Value Measurements:

Mark-to-market energy assets and liabilities — These forward contracts are valued using market transactions in either the listed or OTC markets.

Propane put/call option — The fair value of the propane put/call option is valued using market transactions for similar assets and liabilities in either the listed or OTC markets.

Level 3 Fair Value Measurements:

Investments- guaranteed income fund — The fair values of these investments are recorded at the contract value, which approximates their fair value.

At December 31, 2013, there were no non-financial assets or liabilities required to be reported at fair value. We review our non-financial assets for impairment at least on an annual basis, as required.

Other Financial Assets and Liabilities

Financial assets with carrying values approximating fair value include cash and cash equivalents and accounts receivable. Financial liabilities with carrying values approximating fair value include accounts payable and other accrued liabilities and short-term debt. The fair value of cash and cash equivalents is measured using the comparable value in the active market and approximates its carrying value (Level 1 measurement). The fair value of short-term debt approximates the carrying value due to its short maturities and because interest rates approximate current market rates (Level 3 measurement).

At December 31, 2013, long-term debt, which includes the current maturities but excludes a capital lease obligation, had a carrying value of \$122.0 million, compared to a fair value of \$136.8 million, using a discounted cash flow methodology that incorporates a market interest rate based on published corporate borrowing rates for debt instruments with similar terms and average maturities, adjusted for duration, optionality and risk profile. At December 31, 2012, long-term debt, which includes the current maturities of long-term debt, had a carrying value of \$110.1 million, compared to the estimated fair value of \$133.2 million. The valuation technique used to estimate the fair value of long-term debt would be considered a Level 3 measurement.

Note 16, *Employee Benefit Plans*, provides the fair value measurement information for our pension plan assets.

Notes to the Consolidated Financial Statements

9. INVESTMENTS

The investment balances at December 31, 2013 and 2012, consisted of the following:

	As of December 31,	
	2013	2012
<i>(in thousands)</i>		
Rabbi trust associated with 401(k) SERP	\$ 2,991	\$ 2,116
Rabbi trust (associated with the deferred compensation plan)	107	39
Investments in equity securities	—	2,013
Total	<u>\$ 3,098</u>	<u>\$ 4,168</u>

We classify these investments as trading securities and report them at their fair value. For the years ended December 31, 2013, 2012 and 2011, we recorded net unrealized gains of \$489,000, \$451,000 and \$282,000, respectively, in other income in the consolidated statements of income related to these investments. We have also recorded an associated liability, which is included in other pension and benefit costs in the consolidated balance sheets and is adjusted each month for the gains and losses incurred by the Rabbi Trusts. During 2013, we sold our investments in equity securities, which resulted in \$702,000 of realized gain. We recorded \$438,000 of unrealized gain on these securities prior to 2013.

10. GOODWILL AND OTHER INTANGIBLE ASSETS

The carrying value of goodwill as of December 31, 2013 and 2012 was as follows:

	As of December 31,	
	2013	2012
<i>(in thousands)</i>		
Regulated Energy segment	\$ 2,790	\$ 3,216
Unregulated Energy segment	1,564	874
Total	<u>\$ 4,354</u>	<u>\$ 4,090</u>

Goodwill in the regulated energy segment is comprised of approximately \$2.5 million from the FPU merger in October 2009, \$170,000 from the purchase of operating assets from IGC in August 2010 and \$150,000 from the purchase of Fort Meade in December 2013. During 2013, approximately \$576,000 of the \$746,000 goodwill that was originally recorded as a result of the IGC acquisition was reclassified to regulatory asset pursuant to the regulatory order which allowed recovery of the amount in rates. See *Note 18, Rates and Other Regulatory Activities* for further information. Goodwill in the unregulated energy segment is comprised of \$237,000 from the purchase of the operating assets of Austin Cox in June 2013, \$453,000 from the purchase of the operating assets of Glades in February 2013, \$200,000 from the purchase of the operating assets from Crescent in December 2011 and \$674,000 related to the premium paid by Sharp from its acquisitions in the late 1980s and 1990s.

We test for impairment of goodwill at least annually. The testing for 2013 and 2012 indicated no impairment of goodwill.

The carrying value and accumulated amortization of intangible assets subject to amortization as of December 31, 2013 and 2012 are as follows:

	As of December 31,			
	2013		2012	
<i>(in thousands)</i>	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Customer lists	\$ 3,993	\$ 1,389	\$ 3,693	\$ 1,067
Non-Compete agreements	353	87	103	43
Other	270	165	270	158
Total	<u>\$ 4,616</u>	<u>\$ 1,641</u>	<u>\$ 4,066</u>	<u>\$ 1,268</u>

The customer lists are intangible assets which were acquired in the purchases of the operating assets of Glades in February 2013, Virginia LP in February 2010 and the FPU merger in October 2009 and are being amortized over seven to 12 years. The non-compete agreements are intangible assets acquired in the purchase of the operating assets of Austin Cox in June 2013 and Virginia LP in February 2010 and are being amortized over a seven-year period. The other intangible assets consist of acquisition costs from our propane distribution acquisitions in the late 1980s and 1990s and are being amortized over 40 years.

Table of Contents
Notes to the Consolidated Financial Statements

For the years ended December 31, 2013, 2012 and 2011, amortization expense of intangible assets was \$373,000, \$329,000 and \$332,000, respectively. Amortization expense of intangible assets is expected to be: \$400,000 for each year in 2014 and 2015, \$375,000 for 2016, \$373,000 for 2017, and \$344,000 for 2018.

11. INCOME TAXES

We file a consolidated federal income tax return. Income tax expense allocated to our subsidiaries is based upon their respective taxable incomes and tax credits. State income tax returns are filed on a separate company basis in most states where we have operations and/or are required to file.

The IRS performed its examination of Chesapeake's consolidated federal income tax return for 2009 and FPU's consolidated federal income tax return for 2008 and the period from January 1, 2009 to October 28, 2009 (the pre-merger period in 2009, during which FPU was required to file a separate federal income tax return). Both of the IRS examinations were completed in 2012 without any material findings.

The State of Florida performed its examination of Chesapeake's state income tax returns for 2008, 2009 and 2010 and completed its examination in 2012 without any material findings.

The State of Texas is currently performing its examination of Chesapeake's amended state tax return for 2007. We amended the 2007 Texas state tax return due to a change in the methodology used to calculate the gross receipts used to determine the Texas apportionment. This new methodology was used in Chesapeake's Texas tax returns for all years after 2006. In 2012, we recorded a total liability of \$300,000 associated with the unrecognized tax benefit related to this change in methodology given the unknown outcome of this examination. We recorded this liability associated with the unrecognized tax benefit as an income tax payable, which reduced the income tax receivable in the accompanying balance sheets at December 31, 2013 and 2012.

We generated net operating losses of \$2.0 million in 2011 for federal income tax purposes, primarily from increased book-to-tax timing differences authorized by The Tax Relief Unemployment Insurance Reauthorization, and Job Creation Act of 2010, which allowed bonus depreciation for certain assets. The federal net operating losses from 2011 were fully utilized in our 2012 federal income tax return. None of the federal net operating losses from 2011 remained at December 31, 2013. We also had state net operating losses of \$25.0 million in various states as of December 31, 2013, almost all of which will expire in 2030. We have recorded a deferred tax asset of \$1.4 million and \$1.6 million related to the net operating loss carry-forwards at December 31, 2013 and 2012, respectively. We have not recorded a valuation allowance to reduce the future benefit of the tax net operating losses because we believe they will be fully utilized.

The following tables provide: (a) the components of income tax expense in 2013, 2012, and 2011; (b) the reconciliation between the statutory federal income tax rate and the effective income tax rate for 2013, 2012, and 2011; and (c) the components of accumulated deferred income tax assets and liabilities at December 31, 2013 and 2012.

12. LONG-TERM DEBT

Our outstanding long-term debt is shown below:

	As of December 31,	
	2013	2012
<i>(in thousands)</i>		
FPU secured first mortgage bonds:		
9.57% bond, due May 1, 2018	\$ —	\$ 5,444
10.03% bond, due May 1, 2018	—	2,994
9.08% bond, due June 1, 2022	7,967	7,962
Uncollateralized senior notes:		
7.83% note, due January 1, 2015	2,000	4,000
6.64% note, due October 31, 2017	10,909	13,636
5.50% note, due October 12, 2020	14,000	16,000
5.93% note, due October 31, 2023	30,000	30,000
5.68% note, due June 30, 2026	29,000	29,000
6.43% note, due May 2, 2028	7,000	—
3.73% note, due December 16, 2028	20,000	—
Convertible debentures:		
8.25% due March 1, 2014	646	942
Promissory notes	445	125
Capital lease obligation	6,978	—
Total long-term debt	128,945	110,103
Less: current maturities	(11,353)	(8,196)
Total long-term debt, net of current maturities	\$ 117,592	\$ 101,907

Annual maturities and principal repayments of consolidated long-term debt, excluding the capital lease obligation, are as follows: \$10,504 for 2014; \$7,803 for 2015; \$7,798 for 2016; \$10,698 for 2017; \$7,971 for 2018 and \$77,226 thereafter. See Note 14, Lease obligations for future payments related to the capital lease obligation.

Secured First Mortgage Bonds

In May 2013, prior to their respective maturities and in conjunction with the issuance of the Senior Notes, which is further described later, we redeemed the 9.57 percent and 10.03 percent series of FPU's first mortgage bonds. The difference between the carrying value of those bonds and the amount paid at redemption of \$93,000 was deferred as a regulatory asset. We are amortizing this difference over the remaining terms of these bonds as an adjustment to interest expense, as allowed by the Florida PSC.

FPU's remaining secured first mortgage bonds are guaranteed by Chesapeake and are secured by a lien covering all of FPU's property. FPU's first mortgage bonds contain a restriction that limits the payment of dividends by FPU. It provides that FPU cannot make dividends or other restricted payments in excess of the sum of \$2.5 million plus FPU's consolidated net income accrued on and after January 1, 1992. As of December 31, 2013, FPU's cumulative net income base was \$95.1 million, offset by restricted payments of \$37.6 million, leaving \$57.5 million of cumulative net income for FPU free of restrictions pursuant to this covenant.

The dividend restrictions by FPU's first mortgage bonds resulted in approximately \$53.3 million of the net assets of our consolidated subsidiaries being restricted at December 31, 2013. This represents approximately 19 percent of our consolidated net assets. Other than the dividend restrictions by FPU's first mortgage bonds, there are no legal, contractual or regulatory restrictions on the net assets of our subsidiaries for the purposes of determining the disclosure of parent-only financial statements.

Uncollateralized Senior Notes

In September 2013, we entered into a Note Agreement with the Note Holders. Under the terms of the Note Agreement, we will issue \$70.0 million in aggregate of unsecured Senior Notes to the Note Holders. In December 2013, we issued Series A Notes of unsecured Senior Notes, with an aggregate principal amount of \$20.0 million, at a rate of 3.73 percent. Series B Notes of the unsecured Senior Notes, with an aggregate principal amount of \$50.0 million, will be issued in May 2014, at a rate of 3.88 percent.

Table of Contents
Notes to the Consolidated Financial Statements

The proceeds received from the issuances of the Notes will be used to reduce our short-term borrowings under our lines of credit and to fund capital expenditures.

In June 2010, we entered into an agreement with Metropolitan Life Insurance Company and New England Life Insurance Company to issue up to \$36.0 million of Chesapeake's unsecured Senior Notes. In June 2011, we issued \$29.0 million of 5.68 percent unsecured Senior Notes to permanently finance the redemption of two series of FPU first mortgage bonds in 2010. On May 2, 2013, we issued an additional \$7.0 million of 6.43 percent unsecured senior notes under the same agreement.

All of our uncollateralized Senior Notes require periodic principal and interest payments as specified in each note. They also contain various restrictions. The most stringent restrictions state that we must maintain equity of at least 40 percent of total capitalization, and the fixed charge coverage ratio must be at least 1.2 times. The most recent Senior Notes issued in December 2013 also contain a restriction that we must maintain an aggregate net book value in our regulated business assets of at least 50 percent of our consolidated total assets. Failure to comply with those covenants could result in accelerated due dates and/or termination of the uncollateralized senior note agreements. As of December 31, 2013, we are in compliance with all of our debt covenants.

Most of Chesapeake's uncollateralized Senior Notes contain a "Restricted Payments" covenant as defined in the Note agreements. The most restrictive covenants of this type are included within the 7.83 percent Unsecured Senior Notes, due January 1, 2015. The covenant provides that we cannot pay or declare any dividends or make any other Restricted Payments in excess of the sum of \$10.0 million, plus our consolidated net income accrued on and after January 1, 2001. As of December 31, 2013, the cumulative consolidated net income base was \$218.1 million, offset by Restricted Payments of \$117.7 million, leaving \$100.5 million of cumulative net income free of restrictions.

Convertible Debentures

Prior to the maturity in March 2014, the holders of outstanding Convertible Debentures had the option to convert them into shares of our common stock at a conversion price of \$17.01 per share. During 2013 and 2012, Convertible Debentures totaling \$296,000 and \$187,000, respectively, were converted to stock. The Convertible Debentures were also redeemable for cash at the option of the holder, subject to an annual non-cumulative maximum limitation of \$200,000. No Convertible Debentures were redeemed for cash in 2013. In 2012, Convertible Debentures totaling \$5,000 were redeemed for cash. Subsequent to December 31, 2013, Convertible Debentures totaling \$537,000 were converted to stock and \$109,000 were redeemed for cash. As of March 1, 2014, we no longer have any outstanding Convertible Debentures.

13. S H O R T - T E R M B O R R O W I N G S

At December 31, 2013 and 2012, we had \$105.7 million and \$61.2 million, respectively, of short-term borrowings outstanding through five unsecured bank credit facilities with two financial institutions totaling \$165.0 million. The annual weighted average interest rates on our short-term borrowings were 1.26 percent and 1.48 percent for 2013 and 2012, respectively. We incurred commitment fees of \$56,000 and \$73,000 in 2013 and 2012, respectively.

Table of Contents
Notes to the Consolidated Financial Statements

(in thousands)	Total Facility	Interest Rate	Expiration Date	Outstanding borrowings at		Available at December 31, 2013
				December 31, 2013	December 31, 2012	
Bank revolving credit						
Facility A						
Committed	\$ 55,000	LIBOR plus 1.25 percent	June 28, 2014	\$ 35,000	\$ 30,000	\$ 20,000
Uncommitted	20,000	Rate offered by the bank	June 28, 2014	—	—	20,000
Bank revolving credit						
Facility B						
Committed	30,000	LIBOR plus 1.25 percent ⁽¹⁾	October 31, 2014	17,554	16,421	12,446
Uncommitted ⁽²⁾	20,000	Rate offered by the bank	October 31, 2014	10,000	—	10,000
Short-term revolving credit Note	40,000	LIBOR plus 0.80 percent ⁽³⁾	October 31, 2014	40,000	10,000	—
Total short term credit facilities	<u>\$ 165,000</u>			<u>\$ 102,554</u>	<u>\$ 56,421</u>	<u>\$ 62,446</u>
Book overdrafts ⁽⁴⁾				3,112	4,778	
Total short-term borrowing				<u>\$ 105,666</u>	<u>\$ 61,199</u>	

⁽¹⁾ This facility bears interest at LIBOR for the applicable period plus 1.25 percent, if requested three days prior to the advance date. If requested and advanced on the same day, this facility bears interest at a base rate plus 1.25 percent.

⁽²⁾ We have issued \$4.7 million in letters of credit under this credit facility as of December 31, 2013. There have been no draws on these letters of credit and we do not anticipate that they will be drawn upon by the counter-parties. We expect that the letters of credit will be renewed to the extent necessary in the future.

⁽³⁾ At our discretion, the borrowings under this facility can bear interest at the lender's base rate plus 0.80 percent.

⁽⁴⁾ If presented, these book overdrafts would be funded through the bank revolving credit facilities.

These bank credit facilities are available to provide funds for our short-term cash needs to meet seasonal working capital requirements and to temporarily fund portions of our capital expenditures. Advances offered under the uncommitted lines of credit are subject to the discretion of the banks. We are currently authorized by our Board of Directors to borrow up to \$140.0 million of short-term debt, as required, from these short-term lines of credit.

The availability of funds under our credit facilities is subject to conditions specified in the respective credit agreements, all of which we currently satisfy. These conditions include our compliance with financial covenants and the continued accuracy of representations and warranties contained in these agreements. We are required by the financial covenants in our revolving credit facilities to maintain, at the end of each fiscal year:

- a funded indebtedness ratio of no greater than 65 percent ; and
- a fixed charge coverage ratio of at least 1.20 to 1.0 .

We are in compliance with all of our debt covenants.

14. L E A S E O B L I G A T I O N S

We have entered into several operating lease arrangements for office space, equipment and pipeline facilities. Rent expense related to these leases for 2013, 2012 and 2011 was \$1.6 million, \$1.4 million and \$1.1 million, respectively. Future minimum payments under our current lease agreements for the years 2014 through 2018 are \$1.2 million, \$1.1 million, \$851,000, \$446,000 and \$419,000, respectively; and approximately \$2.7 million thereafter, with an aggregate total of approximately \$6.8 million.

For the year ended December 31, 2013, we paid \$292,000 for a capital lease arrangement related to Sandpiper's capacity, supply and operating agreement. See *Note 4, Acquisitions* for additional information. Future minimum payments under this lease arrangement are \$1.1 million for 2014; \$1.5 million for each year from 2015 through 2018; and \$625,000 thereafter, with an aggregate total of \$7.7 million.

15. ACCUMULATED OTHER COMPREHENSIVE INCOME (LOSS)

The following table presents the changes in the balance of accumulated other comprehensive income (loss) for the year ended December 31, 2013. Defined benefit pension and postretirement plan items are the only component of our accumulated comprehensive income (loss). All amounts in the following table are presented net of tax.

	For the Year Ended December 31, 2013
(in thousands)	
Beginning balance	\$ (5,062)
Other comprehensive income before reclassifications	2,251
Amounts reclassified from accumulated other comprehensive loss	278
Net current-period other comprehensive income	2,529
Ending balance	\$ (2,533)

The following table presents amounts reclassified out of accumulated other comprehensive loss for the year ended December 31, 2013.

	For the Year Ended December 31, 2013
(in thousands)	
Amortization of defined benefit pension and postretirement plan items:	
Prior service cost ⁽¹⁾	\$ 60
Net gain ⁽¹⁾	(523)
Total before tax	(463)
Tax cost	185
Benefit, net of tax	\$ (278)

⁽¹⁾ These amounts are included in the computation of net periodic benefits See Note 16, Employee Benefit Plans, for additional details.

Amortization of defined benefit pension and postretirement plan items are included in operations expense in the accompanying consolidated statements of income. Tax cost is included in income tax expense in the accompanying consolidated statements of income.

16. EMPLOYEE BENEFIT PLANS

We measure the assets and obligations of the defined benefit pension plans and other postretirement benefits plans to determine the plans' funded status as of the end of the year as an asset or a liability on our consolidated balance sheets. We record as a component of other comprehensive income/loss or a regulatory asset the changes in funded status that occurred during the year that are not recognized as part of net periodic benefit costs.

Defined Benefit Pension Plans

We sponsor three defined benefit pension plans: the Chesapeake Pension Plan, the FPU Pension Plan and the Chesapeake SERP.

The Chesapeake Pension Plan was closed to new participants effective January 1, 1999, and was frozen with respect to additional years of service and additional compensation effective January 1, 2005. Benefits under the Chesapeake Pension Plan were based on each participant's years of service and highest average compensation, prior to the freezing of the plan.

The FPU Pension Plan covers eligible FPU non-union employees hired before January 1, 2005 and union employees hired before the respective union contract expiration dates in 2005 and 2006. Prior to the merger, the FPU Pension Plan was frozen with respect to additional years of service and additional compensation, effective December 31, 2009.

The Chesapeake SERP was frozen with respect to additional years of service and additional compensation as of December 31, 2004. Benefits under the Chesapeake SERP were based on each participant's years of service and highest average compensation, prior to the freezing of the plan.

In January 2011, a former executive officer retired and received lump-sum pension distributions of \$844,000 and \$765,000 from the Chesapeake Pension Plan and Chesapeake SERP, respectively. In connection with these lump-sum payment distributions, we recorded \$436,000 in pension settlement losses in addition to the net benefit cost in 2011. Based upon the current funding status of the Chesapeake Pension Plan, which does not meet or exceed 110 percent of the benefit obligation as required per the Department of Labor regulations, our former executive officer was required to deposit property equal to 125 percent of the restricted portion of his lump sum distribution into an escrow. Each year, an amount equal to the value of payments that would have been paid to him if he had elected the life annuity form of distribution will become unrestricted. Property equal to the life annuity amount will be returned to him from the escrow account. These same regulations will apply to the top 20 highest compensated employees taking distributions from the Pension Plan.

The following schedule sets forth the funded status at December 31, 2013 and 2012 and the net periodic cost for the years ended December 31, 2013, 2012 and 2011 for the Chesapeake and FPU Pension Plans:

	Chesapeake Pension Plan		FPU Pension Plan	
	2013	2012	2013	2012
At December 31,				
<i>(in thousands)</i>				
Change in benefit obligation:

Total periodic cost	\$ 240	\$ 290	\$ 464	\$ 592	\$ 907	\$ 673
Assumptions:						
Discount rate	3.50%	4.25%	5.00%	3.75%	4.50%	5.25%
Expected return on plan assets	6.00%	6.00%	6.00%	7.00%	7.00%	7.00%

Included in the net periodic costs for the FPU Pension Plan is continued amortization of the FPU pension regulatory asset, which represents the portion attributable to FPU's regulated operations of the changes in funded status that occurred but were not recognized as part of net periodic cost prior to the merger with Chesapeake in October 2009. This was previously deferred as a regulatory asset by FPU prior to the merger to be recovered through rates pursuant to an order by the Florida PSC. The unamortized balance of this regulatory asset was \$4.3 million and \$5.1 million at December 31, 2013 and 2012, respectively.

The following sets forth the funded status at December 31, 2013 and 2012 and the net periodic cost for the years ended December 31, 2013, 2012 and 2011 for the Chesapeake SERP:

<u>At December 31,</u>	2013	2012

Our funding policy provides that payments to the trustee of each qualified plan shall be equal to at least the minimum funding requirements of the Employee Retirement Income Security Act of 1974. The following schedule summarizes the assets of the Chesapeake Pension Plan and the FPU Pension Plan, by investment type, at December 31, 2013, 2012 and 2011:

	Chesapeake Pension Plan			FPU Pension Plan		
<u>At December 31,</u>	2013	2012	2011	2013	2012	2011
Asset Category						
Equity securities	54.40%	52.07%	51.75%	55.02%	52.81%	51.98%
Debt securities	36.54%	38.00%	37.88%	36.54%	38.04%	38.05%
Other	9.06%	9.93%	10.37%	8.44%	9.15%	9.97%
Total	<u>100.00%</u>	<u>100.00%</u>	<u>100.00%</u>	<u>100.00%</u>	<u>100.00%</u>	<u>100.00%</u>

The investment policy of both the Chesapeake and FPU Pension Plans is designed to provide the capital assets necessary to meet the financial obligations of the plans. The investment goals and objectives are to achieve investment returns that, together with contributions, will provide funds adequate to pay promised benefits to present and future beneficiaries of the plans, earn a long-term investment return in excess of the growth of the Plans' retirement liabilities, minimize pension expense and cumulative

contributions resulting from liability measurement and asset performance, and maintain a diversified portfolio to reduce the risk of large losses.

The following allocation range of asset classes is intended to produce a rate of return sufficient to meet the Plans' goals and objectives:

Asset Allocation Strategy

<u>Asset Class</u>	<u>Minimum Allocation Percentage</u>	<u>Maximum Allocation Percentage</u>
Domestic Equities (Large Cap, Mid Cap and Small Cap)	14%	32%
Foreign Equities (Developed and Emerging Markets)	13%	25%
Fixed Income (Inflation Bond and Taxable Fixed)	26%	40%
Alternative Strategies (Long/Short Equity and Hedge Fund of Funds)	6%	14%
Diversifying Assets (High Yield Fixed Income, Commodities, and Real Estate)	7%	19%
Cash	0%	5%

Due to periodic contributions and different asset classes producing varying returns, the actual asset values may temporarily move outside of the intended ranges. The investments are monitored on a quarterly basis, at a minimum, for asset allocation and performance.

At December 31, 2013, the assets of the Chesapeake Pension Plan and the FPU Pension Plan were comprised of the following investments:

<u>Asset Category</u> <i>(in thousands)</i>	<u>Fair Value Measurement Hierarchy</u>			<u>Total</u>

At December 31, 2013 and 2012, all of the investments classified under Level 1 of the fair value measurement hierarchy were recorded at fair value based on unadjusted quoted prices in active markets for identical investments. The Level 2 investments were recorded at fair value based on net asset value per unit of the investments, which used significant observable inputs although those investments were not traded publicly and did not have quoted market prices in active markets. The Level 3 investments were guaranteed deposit accounts, which were valued based on the liquidation value of those accounts, including the effect of the balance and interest guarantee and liquidation restriction.

The following table sets forth the summary of the changes in the fair value of Level 3 investments for the years ended December 31, 2013 and 2012:

	For the Year Ended December 31,	
	2013	2012
<i>(in thousands)</i>		
Balance, beginning of year	\$ 710	\$ 897
Purchases	618	79

Investment income	65	16
Balance, end of year	<u>\$ 602</u>	<u>\$ 710</u>

Other Postretirement Benefits Plans

We sponsor two defined benefit plans: the Chesapeake Postretirement Plan and the FPU Medical Plan. In March 2011, new plan provisions for the FPU Medical Plan were adopted in a continuing effort to standardize FPU's benefits with those offered by Chesapeake. The new plan provisions, which became effective January 1, 2012, require eligible employees retiring in 2012 through 2014 to pay a portion of the total benefit costs based on the year they retire. Participants retiring in 2015 and after will be required to pay the full benefit costs associated with participation in the FPU Medical Plan. The change in the FPU Medical Plan resulted in a curtailment gain of \$892,000. Since we determined that the non-recurring gain resulted from the FPU merger and the related integration, we determined that the appropriate accounting treatment for the portion of the gain allocated to FPU's regulated operations prescribed deferral as a regulatory liability and amortization over a future period, as specified by the Florida PSC. We recorded \$170,000 of this curtailment gain which was allocated to FPU's unregulated operations in 2012. We deferred \$722,000 of this curtailment gain and included it as a regulatory liability.

The following sets forth the funded status at December 31, 2013 and 2012 and the net periodic cost for the years ended December 31, 2013, 2012, and 2011:

<u>At December 31,</u> <i>(in thousands)</i>	<u>Chesapeake Postretirement Plan</u>		<u>FPU Medical Plan</u>

Prior service cost	(77)	(77)	(77)	—	—	—
Net periodic cost	\$ 44	\$ 51	\$ 54	\$ 63	\$ 80	\$ 356
Curtailment gain	—	—	—	—	(892)	—
Amortization of pre-merger regulatory asset	—	—	—	8	8	8
Net periodic cost	\$ 44	\$ 51	\$ 54	\$ 71	\$ (804)	\$ 364
Assumptions						
Discount rate	3.50%	4.25%	5.00%	3.75%	4.50%	5.25%

Similar to the FPU Pension Plan, continued amortization of the FPU postretirement benefit regulatory asset related to the unrecognized cost prior to the merger with Chesapeake was included in the net periodic cost. The unamortized balance of this regulatory asset was \$54,000 and \$62,000 at December 31, 2013 and 2012, respectively.

The following table presents the amounts not yet reflected in net periodic benefit cost and included in accumulated other comprehensive income/loss or as a regulatory asset as of December 31, 2013 :

(in thousands)	Chesapeake Pension Plan	FPU Pension Plan	Chesapeake SERP	Chesapeake Postretirement Plan	FPU Medical Plan	Total
Prior service cost (credit)	\$ —	\$ —	\$ 28	\$ (909)	\$ —	\$ (881)
Net loss	2,483	5,298	659	972	(142)	9,270
Total	\$ 2,483	\$ 5,298	\$ 687	\$ 63	\$ (142)	\$ 8,389
Accumulated other comprehensive loss pre-tax ⁽¹⁾	\$ 2,483	\$ 1,007	\$ 687	\$ 63	\$ (27)	\$ 4,213
Post-merger regulatory asset	—	4,291	—	—	(115)	4,176
Subtotal	2,483	5,298	687	63	(142)	8,389
Pre-merger regulatory asset	—	4,348	—	—	54	4,402
Total unrecognized cost	\$ 2,483	\$ 9,646	\$ 687	\$ 63	\$ (88)	\$ 12,791

⁽¹⁾ The total amount of accumulated other comprehensive loss recorded on our consolidated balance sheet as of December 31, 2013 is net of income tax benefits of \$1.7 million.

The amounts in accumulated other comprehensive income/loss and recorded as a regulatory asset for our pension and postretirement benefits plans that are expected to be recognized as a component of net benefit cost in 2014 are set forth in the following table:

<i>(in thousands)</i>	Chesapeake Pension Plan	FPU Pension Plan	Chesapeake SERP	Chesapeake Postretirement Plan	FPU Medical Plan	Total
Prior service cost (credit)	\$ —	\$ —	\$ 19	\$ (77)	\$ —	\$ (58)
Net loss	\$ 149	\$ —	\$ 48	\$ 67	\$ —	\$ 264
Amortization of pre-merger regulatory asset	\$ —	\$ 761	\$ —	\$ —	\$ 8	\$ 769

Assumptions

The assumptions used for the discount rate to calculate the benefit obligations of all the plans were based on the interest rates of high-quality bonds in 2013, reflecting the expected lives of the plans. In determining the average expected return on plan assets for each applicable plan, various factors, such as historical long-term return experience, investment policy and current and expected allocation, were considered. Since Chesapeake's plans and FPU's plans have different expected plan lives and investment policies, particularly in light of the lump-sum-payment option provided in the Chesapeake Pension Plan, different assumptions regarding discount rate and expected return on plan assets were selected for Chesapeake's plans and FPU's plans. Since both pension plans are frozen with respect to additional years of service and compensation, the rate of assumed compensation increases is not applicable.

The health care inflation rate for 2013 used to calculate the benefit obligation is 5.5 percent for medical and 6.5 percent for prescription drugs for the Chesapeake Postretirement Plan; and 6.5 percent for the FPU Medical Plan. A one-percentage point increase in the health care inflation rate from the assumed rate would increase the accumulated postretirement benefit obligation by approximately \$264,000 as of December 31, 2013, and would increase the aggregate of the service cost and interest cost components of the net periodic postretirement benefit cost for 2013 by approximately \$10,000. A one-percentage point decrease in the health care inflation rate from the assumed rate would decrease the accumulated postretirement benefit obligation by approximately \$228,000 as of December 31, 2013, and would decrease the aggregate of the service cost and interest cost components of the net periodic postretirement benefit cost for 2013 by approximately \$8,000.

Estimated Future Benefit Payments

In 2014, we expect to contribute \$670,000 and \$2.4 million to the Chesapeake Pension Plan and FPU Pension Plan, respectively, and \$88,000 to the Chesapeake SERP. We also expect to contribute \$95,000 and \$245,000 to the Chesapeake Postretirement Plan and FPU Medical Plan, respectively, in 2014. The schedule below shows the estimated future benefit payments for each of the plans previously described:

<i>(in thousands)</i>	Chesapeake Pension Plan ⁽¹⁾	FPU Pension Plan ⁽¹⁾	Chesapeake SERP ⁽²⁾	Chesapeake Postretirement Plan ⁽²⁾	FPU Medical Plan ⁽²⁾
2014	\$ 494	\$ 2,814	\$ 88	\$ 95	\$ 245
2015	\$ 622	\$ 2,886	\$ 138	\$ 97	\$ 223
2016	\$ 572	\$ 2,946	\$ 146	\$ 98	\$ 203
2017	\$ 1,071	\$ 2,988	\$ 143	\$ 96	\$ 166
2018	\$ 634	\$ 3,048	\$ 140	\$ 95	\$ 133
Years 2019 through 2023	\$ 3,984	\$ 16,362	\$ 890	\$ 436	\$ 393

⁽¹⁾ The pension plan is funded; therefore, benefit payments are expected to be paid out of the plan assets.

⁽²⁾ Benefit payments are expected to be paid out of our general funds.

Retirement Savings Plan

Effective January 1, 2012, we sponsor one 401(k) retirement savings plan and the 401(k) SERP, a non-qualified supplemental executive retirement savings plan.

Our 401(k) plan is offered to all eligible employees who have completed three months of service, except for employees represented by a collective bargaining agreement that does not specifically provide for participation in the plan, non-resident aliens with no U.S. source income and individuals classified as consultants, independent contractors or leased employees. Effective January 1,

2011, we match 100 percent of eligible participants' pre-tax contributions to the Chesapeake 401(k) plan up to a maximum of six percent of eligible compensation. In addition, we may make a supplemental contribution to participants in the plan, without regard to whether or not they make pre-tax contributions. Beginning January 1, 2011, the employer matching contribution is made in cash and is invested based on a participant's investment directions. Any supplemental employer contribution is generally made in Chesapeake stock. With respect to the employer match and supplemental employer contribution, employees are 100 percent vested after two years of service or upon reaching 55 years of age while still employed by Chesapeake. Employees with one year of service are 20 percent vested and will become 100 percent vested after two years of service. Employees who do not make an election to contribute or do not opt out of the Chesapeake 401(k) plan will be automatically enrolled at a deferral rate of three percent, and the automatic deferral rate will increase by one percent per year up to a maximum of six percent.

We also offer the 401(k) SERP to our executive officers over a specific income threshold. Participants receive a cash-only matching contribution percentage equivalent to their 401(k) match level. All contributions and matched funds can be invested among the mutual funds available for investment. All obligations arising under the 401(k) SERP are payable from our general assets, although we have established a Rabbi Trust for the 401(k) SERP. Assets held in the Rabbi Trust for the 401(k) SERP had a fair value of \$3.1 million and \$2.2 million at December 31, 2013 and 2012, respectively. (See *Note 9, Investments*, for further details). The assets of the Rabbi Trust are at all times subject to the claims of our general creditors.

Contributions to all of our 401(k) plans totaled \$3.7 million, \$2.9 million and \$2.7 million for the years ended December 31, 2013, 2012 and 2011, respectively. As of December 31, 2013, there are 580,484 shares of our common stock reserved to fund future contributions to the 401(k) plan.

Deferred Compensation Plan

On December 7, 2006, the Board of Directors approved the Deferred Compensation Plan as amended, effective January 1, 2007. At December 31, 2013, the Deferred Compensation Plan consisted solely of shares of our common stock related to the deferral of executive performance shares and directors' stock retainers.

Participants in the Deferred Compensation Plan are able to elect the payment of benefits to begin on a specified future date after the election is made in the form of a lump sum or annual installments. Deferrals of executive cash bonuses and directors' cash retainers and fees are paid in cash. All deferrals of executive performance shares, which represent deferred stock units, and directors' stock retainers are paid in shares of our common stock, except that cash is paid in lieu of fractional shares. We established a Rabbi Trust in connection with the Deferred Compensation Plan. The value of our stock held in the Rabbi Trust is classified within the stockholders' equity section of the consolidated balance sheet and has been accounted for in a manner similar to treasury stock. The amounts recorded under the Deferred Compensation Plan totaled \$1.1 million and \$982,000 at December 31, 2013 and 2012, respectively.

Effective January 1, 2014, our 401(k) SERP was amended, restated and renamed as the Chesapeake Utilities Corporation Non-Qualified Deferred Compensation Plan. In addition, the Deferred Compensation Plan was consolidated into this plan. As a result of these actions, the 401(k) SERP and the Deferred Compensation Plan are now administered as a single plan.

Notes to the Consolidated Financial Statements

17. SHARE-BASED COMPENSATION PLANS

Effective May 2, 2013, our non-employee directors and key employees are awarded share-based awards through our 2013 SICP. Prior to May 2, 2013, our non-employee directors and key employees were awarded share-based awards through our DSCP and our PIP, respectively. We record these share-based awards as compensation costs over the respective service period for which services are received in exchange for an award of equity or equity-based compensation. The compensation cost is based primarily on the fair value of the shares awarded, using the estimated fair value of each share on the date it was granted and the number of shares to be issued at the end of the service period. We have 441,241 shares reserved for issuance under the SICP, including the shares previously awarded through the DSCP and PIP that will be issued from this reserve.

The table below presents the amounts included in net income related to share-based compensation expense for the awards granted under the DSCP and the PIP for the years ended December 31, 2013, 2012 and 2011:

	For the Year Ended December 31,		
	2013	2012	2011
(in thousands)			
Directors Stock Compensation Plan	\$ 478	\$ 443	\$ 407
Performance Incentive Plan	1,153	976	1,043
Total compensation expense	1,631	1,419	1,450
Less: tax benefit	657	569	581
Share-Based Compensation amounts included in net income	\$ 974	\$ 850	\$ 869

Stock Options

We did not have any stock options outstanding at December 31, 2013 or 2012, nor were any stock options issued during 2013, 2012 and 2011.

Directors Stock Compensation Plan

Shares granted under the DSCP were issued in advance of the directors' service periods and were fully vested as of the date of the grant. We record a prepaid expense equal to the fair value of the shares issued and amortize the expense equally over a service period of one year. In May 2013, each of our non-employee directors received an annual retainer of 857 shares of common stock under the DSCP. There were no shares granted under the SICP as of December 31, 2013.

A summary of stock activity under the DSCP for the years ended December 31, 2013, 2012 and 2011 is presented below.

	Number of Shares	Weighted Average Grant Date Fair Value
Outstanding — December 31, 2011	—	\$ —
Granted	10,800	\$ 41.06
Vested	10,800	\$ 41.06
Outstanding — December 31, 2012	—	\$ —
Granted	9,427	\$ 52.49
Vested	9,427	\$ 52.49
Outstanding — December 31, 2013	—	\$ —

The weighted average grant date fair value of DSCP shares awarded during 2013, 2012 and 2011 was \$52.49, \$41.06 and \$41.02 per share, respectively. The intrinsic values of the DSCP awards are equal to the fair value of these awards on the date of grant. At December 31, 2013, there was \$165,000 of unrecognized compensation expense related to DSCP awards that is expected to be recognized over the first four months of 2014.

Performance Incentive Plan

Our Compensation Committee is authorized to grant key employees of the Company the right to receive awards of shares of our common stock, contingent upon the achievement of established performance goals. These awards are subject to certain post-vesting transfer restrictions.

Table of Contents
Notes to the Consolidated Financial Statements

We currently have multi-year performance plans, which are based upon the successful achievement of long-term goals, growth and financial results, which comprised both market-based and performance-based conditions or targets. The fair value of each share of stock tied to a performance-based condition or target is equal to the market price of our common stock on the date of the grant. For the market-based conditions, we used the Black-Scholes pricing model to estimate the fair value of each share of market-based award granted.

In July 2012, we replaced a subsidiary officer's multi-year cash-based incentive award with an award of up to 4,800 shares under the PIP. These shares will vest at the end of the service period ending December 31, 2014 and have terms and market/performance targets similar to other shares granted under the PIP in January 2012.

Effective February 24, 2012, one of our named executive officers, who was a participant in the PIP, resigned. Pursuant to a separation agreement entered into between the Company and the named executive officer, the named executive officer received a cash payment of \$181,500 and other benefits in lieu of other performance-based compensation, which he might have been entitled to receive.

A summary of stock activity under the PIP is presented below:

	Number of Shares	Weighted Average Fair Value
Outstanding — December 31, 2011	87,414	\$ 34.47
Granted	35,706	\$ 39.62
Vested	13,837	\$ 29.19
Forfeited ⁽¹⁾	21,600	\$ 36.57
Expired	3,038	\$ 26.29
Outstanding — December 31, 2012	84,645	\$ 37.86
Granted	23,491	\$ 44.85
Vested	24,332	\$ 33.26
Expired	3,043	\$ 39.12
Outstanding — December 31, 2013	80,761	\$ 42.30

⁽¹⁾ Includes shares settled with a cash payment pursuant to the terms of a separation agreement with a former named executive officer.

In 2013, 2012 and 2011, we withheld shares with value at least equivalent to the employees' minimum statutory obligation for the applicable income and other employment taxes, and remitted the cash to the appropriate taxing authorities with the executives receiving the net shares. The total number of shares withheld of 10,411 5,670 and 12,234 for 2013, 2012 and 2011, respectively, was based on the value of the PIP shares on their vesting date, determined by the average of high and low of our stock price. Total payments for the employees' tax obligations to the taxing authorities were approximately \$519,000 , \$238,000 and \$496,000 , in 2013, 2012 and 2011, respectively.

Tax benefit on PIP for 2013, 2012 and 2011 were \$202,000 , \$172,000 and \$13,000 , respectively, and included in additional paid-in capital in the consolidated statements of stockholders' equity.

The weighted average grant-date fair value of PIP awards granted during 2013, 2012 and 2011 was \$44.85 , \$39.62 and \$40.16 per share, respectively. The intrinsic value of the PIP awards was \$4.8 million , \$3.8 million and \$3.8 million for 2013, 2012 and 2011, respectively.

18. R A T E S A N D O T H E R R E G U L A T O R Y A C T I V I T I E S

Our natural gas and electric distribution operations in Delaware, Maryland and Florida are subject to regulation by their respective PSC; Eastern Shore, our natural gas transmission subsidiary, is subject to regulation by the FERC; and Peninsula Pipeline, our intrastate pipeline subsidiary, is subject to regulation by the Florida PSC. Chesapeake's Florida natural gas distribution division and FPU's natural gas and electric operations continue to be subject to regulation by the Florida PSC as separate entities.

Delaware

Natural Gas Expansion Service Offerings: On November 5, 2013, the Delaware PSC approved a settlement agreement, which incorporated comments from the DPA, the Delaware PSC staff and us, in regards to increasing our natural gas expansion service

Table of Contents
Notes to the Consolidated Financial Statements

offerings to facilitate conversions to natural gas within our Delaware service areas. Under the settlement agreement, the Delaware division is authorized to:

- (i) charge a monthly fixed charge to customers in portions of eastern Sussex County, Delaware, which will enable us to extend our distribution system to provide natural gas service to these customers economically without upfront contributions from these customers; and
- (ii) offer optional service choices to customers to facilitate conversions to natural gas, including a conversion finance service to help customers manage their cost of conversion equipment.

Maryland

ESG Acquisition: On September 7, 2012, we filed an application with the Maryland PSC for approval of the acquisition of the ESG operating assets and the transfer of the ESG franchises to Chesapeake (see *Note 4, Acquisitions*, for additional information on the ESG acquisition). In this application, we also requested that the Maryland PSC approve the overall regulatory framework we proposed for Sandpiper in Worcester County. The proposed regulatory framework included: (i) a new gas service tariff and rates applicable to natural gas and propane distribution customers in Worcester County, including the customers that were being served by ESG; (ii) the capacity, supply and operating agreement with ESG for the supply and storage of propane, which will be utilized to serve the ESG customers; and (iii) the accounting treatment for certain purchased assets.

On April 8, 2013, the parties finalized a settlement agreement, which was approved by the Maryland PSC in its order effective May 29, 2013. The Maryland PSC granted approval of: (i) the ESG acquisition; (ii) the overall regulatory framework requested; and (iii) recovery of the cost of the capacity, supply and operating agreement with ESG. In addition, the Maryland PSC's order requires us to file a depreciation study within the first year after the acquisition, at which point, the proper amount of the accumulated depreciation associated with the purchased assets in the rate base and the depreciation rates on those assets will be determined and then applied prospectively. The order also requires us to file a base rate case within two and a half years of Sandpiper's new service in Worcester County. The acquisition of the ESG operating assets was completed on May 31, 2013.

On July 31, 2013, Sandpiper filed an application with the Maryland PSC to revise its tariff to allow, on a temporary basis until the next base rate case, negotiated contract rates for a discrete subset of commercial customers receiving propane service who: (i) experienced rate increases on June 1, 2013, when Sandpiper's tariff took effect in Worcester County, and (ii) do not meet the minimum usage requirement for eligibility for negotiated contract rates under the current tariff. On August 14, 2013, the Maryland PSC considered the application and accepted the proposed tariff revisions, effective August 14, 2013.

Florida

Marianna Franchise: On July 7, 2009, the Marianna Commission adopted the Franchise Agreement. The Franchise Agreement required FPU to develop and implement new TOU and interruptible electric power rates, or other similar rates, mutually agreeable to FPU and the City of Marianna, effective by February 17, 2011, and available to all customers within FPU's northwest division, which includes the City of Marianna. If the rates were not in effect by February 17, 2011, the City of Marianna had the right to give notice to FPU of its intent to exercise its option in the Franchise Agreement to purchase FPU's property (consisting of the electric distribution assets) within the City of Marianna. Any such purchase was subject to approval by the Marianna Commission, which needed to approve the presentation of a referendum to voters in the City of Marianna for the approval of the purchase and the operation by the City of Marianna of an electric distribution facility.

FPU developed TOU and interruptible rates. On December 14, 2010, FPU filed a petition with the Florida PSC for authority to implement such proposed TOU and interruptible rates on or before February 17, 2011. On January 26, 2011, FPU filed a petition with the Florida PSC for approval of an amendment to FPU's Generation Services Agreement between FPU and Gulf Power. The amendment provides for a reduction in the capacity demand quantity, which generates the savings necessary to support the TOU and interruptible rates approved by the Florida PSC. The amendment also extended the current agreement by two years, with a new expiration date of December 31, 2019.

On February 11, 2011, the Florida PSC approved FPU's petition for authority to implement the proposed TOU and interruptible rates, effective as of February 8, 2011. The City of Marianna objected to the proposed rates and filed a petition protesting the entry of the Florida PSC's order. On June 21, 2011, the Florida PSC issued an order approving the amendment to FPU's Generation Services Agreement. On July 12, 2011, the City of Marianna filed a protest of this decision and requested a hearing on the amendment. On January 24, 2012, the Florida PSC dismissed with prejudice the protests by the City of Marianna regarding both the TOU and interruptible rates and the amendment to the Generation Services Agreement.

The City of Marianna filed an appeal with the Florida Supreme Court on March 7, 2012 and with the Florida PSC on March 19, 2012, seeking an appellate review of both of the decisions by the Florida PSC with respect to the protests by the City of Marianna.

Table of Contents
Notes to the Consolidated Financial Statements

As more fully disclosed in *Note 20, Other Commitments and Contingencies*, on March 2, 2011, the City of Marianna filed a complaint against FPU in the Circuit Court of the Fourteenth Judicial Circuit in and for Jackson County, Florida, alleging breaches of the Franchise Agreement by FPU and seeking a declaratory judgment that the City of Marianna has the right to exercise its option to purchase FPU's property in the City of Marianna in accordance with the terms of the Franchise Agreement. Prior to the scheduled trial date, FPU and the City of Marianna reached an agreement in principle to resolve their dispute, which resulted in the City of Marianna dismissing its legal action with prejudice on February 11, 2013. Subsequently, FPU and the City of Marianna entered into a settlement agreement, which contemplated, among other items, the City of Marianna proceeding with a referendum on the purchase of FPU's facilities. On April 9, 2013, the referendum took place, and the citizens of the City of Marianna voted, by a wide margin, to reject the purchase of FPU's facilities by the City of Marianna. As a result of the outcome of the referendum and pursuant to the terms of the settlement agreement, FPU's franchise with the City of Marianna was extended by ten years. Also pursuant to the settlement agreement, the City of Marianna withdrew before the Florida Supreme Court its appeals related to the Florida PSC's orders regarding the implementation of TOU and interruptible rates and the amendment to the Generation Services Agreement between FPU and Gulf Power.

FPU has incurred approximately \$1.9 million of expenses associated with the City of Marianna litigation. In seeking regulatory recovery of these extraordinary expenses, FPU filed a petition with the Florida PSC on August 27, 2012, for approval to: (i) defer, as a regulatory asset, the expenses associated with the litigation initiated by the City of Marianna; and (ii) amortize over five years, beginning in January 2013, previously expensed as well as future litigation expenses. Although this petition did not request recovery of these expenses, FPU sought deferral treatment of the expenses for regulatory purposes, which could allow future recovery of those expenses. On December 3, 2012, the Florida PSC approved FPU's request. Since this order did not provide specific recovery of these costs, we did not defer these costs as a regulatory asset at that point until further assurance of recovery could be obtained. Subsequent discussions with the Office of Public Counsel resulted in a settlement agreement on October 11, 2013. Under this settlement agreement, FPU will recover approximately \$1.8 million of the total expenses associated with the City of Marianna litigation by retaining the \$1.8 million refund received from Gulf Power. This refund represented the higher fuel cost paid by FPU during the City of Marianna franchise dispute as a result of the delay in implementing the amendment to the Generation Service Agreement. Upon reinstatement of the amendment, Gulf Power refunded this amount to FPU pursuant to the terms of the amendment. The remaining litigation expenses will be amortized over the five -year period beginning in January 2013, as previously approved by the Florida PSC. The Florida PSC approved the settlement agreement on October 24, 2013.

Pursuant to the settlement agreement we established a regulatory asset of approximately \$1.9 million by reversing approximately \$1.5 million of expenses recognized in 2012 and 2011 and deferring \$376,000 of expenses in 2013. The refund of \$1.8 million received from Gulf Power was reflected as a regulatory liability, which was used to offset the regulatory asset.

Other Matters: We also had developments in the following regulatory matters in Florida:

On September 28, 2012, FPU provided a letter to the Florida PSC stating its intent to request approval of a \$746,000 acquisition adjustment associated with FPU's purchase of the operating assets of IGC in 2010. In this letter, FPU also acknowledged the jurisdiction of the Florida PSC to calculate and dispose of prospective overearnings, if any, occurring after October 1, 2012, as the Florida PSC may determine at the conclusion of the acquisition adjustment proceeding. On December 11, 2012, FPU filed a petition to request approval of this acquisition adjustment associated with FPU's purchase of IGC's assets. The Florida PSC, at its December 17, 2013 meeting, approved the acquisition adjustment and determined there were no over earnings in 2012.

On December 14, 2012, Peninsula Pipeline filed a petition with the Florida PSC, asking for approval of a transportation service agreement with FPU. The agreement provides for an upstream interconnection of Peninsula Pipeline's facilities with the FGT system and a downstream interconnection with FPU's facilities. At the agenda conference on July 30, 2013, the Florida PSC approved this agreement.

On July 2, 2013, FPU filed a petition with the Florida PSC for recognition of a regulatory liability for a one-time curtailment gain associated with a change in the FPU Medical Plan. The change in the FPU Medical Plan was implemented effective January 1, 2012 in an effort to conform the benefits offered to FPU's employees to those offered by Chesapeake. The change in the FPU Medical Plan resulted in a total curtailment gain of \$892,000, of which \$722,000 was allocated to FPU's regulated operations. Since this gain resulted from the merger integration effort, FPU believes that the treatment most consistent with prior regulatory practice would be to record the gain allocated to the regulated operations as a regulatory liability and amortize that amount over a specified period. This treatment is similar to how merger-related costs and a one-time tax contingency gain were treated. FPU requested approval to record regulatory liabilities of \$464,000 and \$258,000, respectively, in its natural gas and electric operations. FPU also sought permission to amortize the proposed regulatory liabilities over a 34 -month period, beginning January 1, 2012, and ending October 30, 2014. The Florida PSC approved this petition on October 24, 2013. We recorded \$510,000 of the amortization of this regulatory liability in 2013, including immediate recognition

Table of Contents
Notes to the Consolidated Financial Statements

in current period earnings of the amortization related to the period prior to the Florida PSC's approval, which reduced depreciation and amortization expense.

Eastern Shore

The following are regulatory activities involving FERC orders applicable to Eastern Shore and the expansions of Eastern Shore's transmission system:

Mainline Expansion Project: On May 14, 2012, Eastern Shore submitted to the FERC an application for a CP for approval to construct the facilities necessary to deliver additional firm service of 15,040 Dts/d to an existing electric power generation customer and to Chesapeake's Delaware and Maryland divisions. The estimated capital cost of the project is approximately \$16.3 million. The filing was publicly noticed on May 25, 2012. Two of Eastern Shore's existing customers and Chesapeake's Delaware and Maryland divisions filed motions to intervene in support of the project. One existing customer filed a motion to intervene and protest. On June 28, 2012, Eastern Shore submitted a response to the protest, and on August 31, 2012, the protesting customer filed a reply to Eastern Shore's response. On October 3, 2012, the US Department of the Interior submitted comments on the FERC's environmental assessment regarding Eastern Shore's re-vegetation plan. On October 9, 2012, a non-profit organization also submitted comments on the FERC's environmental assessment, asserting that the environmental assessment was deficient and requesting the FERC to extend the comment period by 60 days. In February 2013, the FERC approved Eastern Shore's application and issued a CP. On March 11, 2013, Eastern Shore accepted this CP and filed its environmental compliance plan. On March 21, 2013, the FERC issued a notice to proceed with construction. On November 1, 2013, Eastern Shore commenced service upon completion of construction.

Daleville Compressor Station Upgrade Filing: On October 12, 2012, Eastern Shore submitted to the FERC an application for a CP, seeking authorization to construct a new gas-fired compressor unit at its existing Daleville Compressor Station located in Chester County, Pennsylvania. The new unit will provide 17,500 Dts/d of additional firm transportation service to two of Eastern Shore's existing customers. In this application, Eastern Shore also included a description of a second new gas fired compressor unit to be installed at the Daleville Compressor Station, which will replace the three existing compressors that serve as back-up units to existing primary compressor units. Eastern Shore also plans to replace the engine exhaust devices of the existing primary compressor units with air emissions control equipment to comply with new environmental regulations. The replacement compressor unit and new engine exhaust devices will result in improved air emissions, reliability and flexibility on Eastern Shore's system. Eastern Shore does not need specific FERC approval to construct the replacement compressor unit or emission controls; however, Eastern Shore wanted the FERC to be fully advised of these improvement efforts. The estimated capital costs of the project were approximately \$12.1 million. On March 4, 2013, the FERC approved this application. On April 19, 2013, the FERC issued a notice to proceed with construction. On November 1, 2013, Eastern Shore commenced service upon completion of construction.

White Oak Lateral Project Filing: On June 13, 2013, Eastern Shore submitted to the FERC an application for a CP, seeking authorization to construct the White Oak lateral project located in Kent County, Delaware. The project consists of installing approximately 5.5 miles of 16 -inch diameter pipeline, metering facilities and miscellaneous appurtenances extending from Eastern Shore's mainline system near its North Dover City Gate Station to the Garrison Oak Technical Park, all located in Dover, Delaware. This project is designed to provide 55,200 Dts/d of delivery lateral firm transportation service to Calpine for its proposed 309 megawatt combined-cycle power plant under development. The total cost of the project is estimated to be approximately \$11.2 million.

On August 9, 2013, the FERC issued a notice of intent to prepare an environmental assessment for the project. The comment period concluded on September 9, 2013 with no comments being filed in the docket. The environmental assessment was issued on October 4, 2013 and FERC staff recommended a finding of no significant impact. Eastern Shore filed the implementation plan and acceptance of conditions stating that it will comply with all environmental conditions as set forth in the order. On November 27, 2013, the FERC issued a CP for this project. On January 17, 2014, the FERC issued its notice to allow Eastern Shore to proceed with the construction. Eastern Shore began construction activities for this project on January 22, 2014 for an in-service date of January 1, 2015.

Table of Contents
Notes to the Consolidated Financial Statements

Other matters: Eastern Shore also had developments in the following FERC matters:

On May 31, 2013, Eastern Shore submitted to the FERC a combined filing of its FRP and Cash-Out Refund for a twelve -month period beginning April 2012 and ending March 2013. In this filing, Eastern Shore proposed an FRP rate of 0.24 percent and continuation of its existing zero percent rate for the Cash-Out Surcharge. During the period, Eastern Shore experienced an under-recovery of \$285,000 in its Deferred Gas Required for Operations costs and an over-recovery of \$146,000 in its Deferred Cash-Out costs. Eastern Shore proposed to incorporate the Cash-Out Refund into its FRP to mitigate the effect of the increase in the FRP to its customers. On June 27, 2013, the FERC issued an order accepting Eastern Shore's submittal of a combined filing to update both its FRP and Cash-Out Refund mechanisms, effective July 1, 2013.

19. ENVIRONMENTAL COMMITMENTS AND CONTINGENCIES

We are subject to federal, state and local laws and regulations governing environmental quality and pollution control. These laws and regulations require us to remove or remediate at current and former operating sites the effect on the environment of the disposal or release of specified substances.

We have participated in the investigation, assessment or remediation, and have exposures at six former MGP sites. Those sites are located in Salisbury, Maryland, and Winter Haven, Key West, Pensacola, Sanford and West Palm Beach, Florida. We have also been in discussions with the MDE regarding a seventh former MGP site located in Cambridge, Maryland.

As of December 31, 2013, we had approximately \$10.2 million in environmental liabilities related to all of FPU's MGP sites in Florida, which include the Key West, Pensacola, Sanford and West Palm Beach sites, representing our estimate of the future costs associated with those sites. FPU has approval to recover up to \$14.0 million of its environmental costs related to all of its MGP sites from insurance and from customers through rates, approximately \$9.2 million of which has been recovered as of December 31, 2013. We had approximately \$4.8 million in regulatory assets for future recovery of environmental costs from FPU's customers.

In addition to the FPU MGP sites, we had \$488,000 in environmental liabilities at December 31, 2013, related to Chesapeake's MGP sites in Maryland and Florida, representing our estimate of future costs associated with these sites. As of December 31, 2013, we had approximately \$691,000 in regulatory and other assets for future recovery through Chesapeake's rates. Environmental liabilities for all of our MGP sites are recorded on an undiscounted basis based on the estimate of future costs provided by independent consultants.

We continue to expect that all costs related to environmental remediation and related activities will be recoverable from customers through rates.

The following discussion provides details on MGP sites:

West Palm Beach, Florida

Remedial options are being evaluated to respond to environmental impacts to soil and groundwater at and in the immediate vicinity of a parcel of property owned by FPU in West Palm Beach, Florida, where FPU previously operated a MGP. FPU is currently implementing a remedial plan approved by the FDEP for the east parcel of the West Palm Beach site, which includes installation of monitoring test wells, sparging of air into the groundwater system and extraction of vapors from the subsurface. It is anticipated that similar remedial actions ultimately will be implemented for other portions of the site. Estimated costs of remediation for the West Palm Beach site range from approximately \$4.5 million to \$15.4 million, including costs associated with the relocation of FPU's operations at this site, which is necessary to implement the remedial plan, and any potential costs associated with future redevelopment of the properties.

Sanford, Florida

FPU is the current owner of property in Sanford, Florida, which was a former MGP site that was operated by several other entities before FPU acquired the property. FPU was never an owner or an operator of the MGP. In January 2007, FPU and the Sanford Group signed a Third Participation Agreement, which provides for the funding of the final remedy approved by the EPA for the site. FPU's share of remediation costs under the Third Participation Agreement is set at five percent of a maximum of \$13.0 million, or \$650,000. As of December 31, 2013, FPU has paid \$650,000 to the Sanford Group escrow account for its entire share of the funding requirements.

The total cost of the final remedy is now estimated to be over \$20.0 million, which includes long-term monitoring and the settlement of claims asserted by two adjacent property owners to resolve damages that the property owners allege they have incurred and will incur as a result of the implementation of the EPA-approved remediation. In settlement of these claims, members of the Sanford Group, which in this instance does not include FPU, have agreed to pay specified sums of money to the parties. FPU has refused

Table of Contents
Notes to the Consolidated Financial Statements

to participate in the funding of the third-party settlement agreements based on its contention that it did not contribute to the release of hazardous substances at the site giving rise to the third-party claims. FPU has advised the other members of the Sanford Group that it is unwilling at this time to agree to pay any sum in excess of the \$650,000 committed by FPU in the Third Participation Agreement.

As of December 31, 2013, FPU's remaining remediation expenses, including attorneys' fees and costs, are estimated to be \$24,000. However, we are unable to determine, to a reasonable degree of certainty, whether the other members of the Sanford Group will accept FPU's asserted defense to liability for costs exceeding \$13.0 million as provided in the Third Participation Agreement to implement the final remedy for this site or will pursue a claim against FPU for a sum in excess of the \$650,000 that FPU has paid under the Third Participation Agreement. No such claims have been made as of December 31, 2013.

Key West, Florida

FPU formerly owned and operated a MGP in Key West, Florida. Field investigations performed in the 1990s identified limited environmental impacts at the site, which is currently owned by an unrelated third party. In 2010, after 17 years of regulatory inactivity, FDEP observed that some soil and groundwater standards were exceeded and requested implementation of additional soil and groundwater fieldwork. The scope of work is limited to the installation of two additional monitoring wells and periodic monitoring of the new and existing wells. The two new monitoring wells were installed in November 2011, and groundwater monitoring began in December 2011. The first semi-annual report from the monitoring program was issued in May 2012. The data from the June 2012 and September 2012 monitoring events were submitted to the FDEP on October 4, 2012. FDEP responded via e-mail on October 9, 2012 that based on the data NAM appears to be an appropriate remedy for the site. The FDEP issued a Remedial Action Plan approval order, dated October 12, 2012, which specified that a limited semi-annual monitoring program is to be conducted. The annual cost to conduct the limited NAM program is not expected to exceed \$8,000. Although the duration of the FDEP-required limited NAM cannot be determined with certainty, it is anticipated that total costs to complete the remedial action will not exceed \$50,000.

Pensacola, Florida

FPU formerly owned and operated a MGP in Pensacola, Florida, which was subsequently owned by Gulf Power. Portions of the site are now owned by the City of Pensacola and the FDOT. In October 2009, FDEP informed Gulf Power that FDEP would approve a conditional No Further Action determination for the site, which must include a requirement for institutional and engineering controls. On December 13, 2011, Gulf Power, the City of Pensacola, FDOT and FPU submitted to FDEP a draft covenant for institutional and engineering controls for the site. Upon FDEP's approval and the subsequent recording of the institutional and engineering controls, no further work is expected to be required of the parties. Assuming FDEP approves the draft institutional and engineering controls, it is anticipated that FPU's share of remaining legal and cleanup costs will not exceed \$5,000.

Salisbury, Maryland

We have substantially completed remediation of a site in Salisbury, Maryland, where it was determined that a former MGP caused localized groundwater contamination. In February 2002, the MDE granted permission to permanently decommission the systems used for remediation and to discontinue all on-site and off-site well monitoring, except for one well, which is being maintained for periodic product monitoring and recovery. We anticipate that the remaining costs of the one remaining monitoring well will not exceed \$5,000 annually. We cannot predict at this time when the MDE will grant permission to permanently decommission the one remaining monitoring well.

Winter Haven, Florida

The Winter Haven site is located on the eastern shoreline of Lake Shipp, in Winter Haven, Florida. Pursuant to a consent order entered into with FDEP, we are obligated to assess and remediate environmental impacts at this former MGP site. The recent groundwater sampling results show a continuing reduction in contaminant concentrations from the treatment system, which has been in operation since 2002. Currently, we predict that remedial action objectives could be met in approximately two to three years for the area being treated by the remediation system. On August 7, 2012, FDEP issued a letter discussing the need to evaluate further remedial options, which could incorporate risk-management options, including natural attenuation and the use of institutional and engineering controls. Modifications to the existing consent order and the remedial action plan modification could be required to incorporate risk-management options into the remedy for the site. A response letter was submitted to FDEP on May 7, 2013, and the most recent groundwater monitoring report was submitted on June 17, 2013. FDEP issued an additional comment letter, dated September 16, 2013, containing various requests and questions, which we responded to on October 10, 2013. If modifications to the existing consent order and remedial action plan are required, we estimate that future remediation costs could be as much as \$443,000, which includes an estimate of \$100,000 to implement additional actions, such as institutional controls.

Table of Contents
Notes to the Consolidated Financial Statements

at the site. If we are required to incur this cost, we continue to believe that the entire amount will be recoverable from customers through our approved rates.

The current treatment system at the Winter Haven site does not address impacted soils in the southwest corner of the site. In 2010, we obtained conditional approval from FDEP for a soil excavation plan; however, because the costs associated with shoreline stabilization and dewatering are likely to be substantial, alternatives to this excavation plan are being evaluated.

FDEP has indicated that we may be required to remediate sediments along the shoreline of Lake Shipp, immediately west of the site. Based on studies performed to date, we object to FDEP's suggestion that the sediments have been adversely impacted by the former operations of the MGP. Our early estimates indicate that some of the corrective measures discussed by FDEP could cost as much as \$1.0 million. We believe that corrective measures for the sediments are not warranted and intend to oppose any requirement that we undertake corrective measures in the offshore sediments. We have not recorded a liability for sediment remediation, as the final resolution of this matter cannot be predicted at this time.

Other

We are in discussions with the MDE regarding a former MGP site located in Cambridge, Maryland. The outcome of this matter cannot be determined at this time; therefore, we have not recorded an environmental liability for this location.

20. OTHER COMMITMENTS AND CONTINGENCIES

Litigation

On March 2, 2011, the City of Marianna filed a complaint against FPU in the Circuit Court of the Fourteenth Judicial Circuit in and for Jackson County, Florida. In the complaint, the City of Marianna alleged three breaches of the Franchise Agreement by FPU: (i) FPU failed to develop and implement TOU and interruptible rates that were mutually agreed to by the City of Marianna and FPU; (ii) mutually agreed upon TOU and interruptible rates by FPU were not effective or in effect by February 17, 2011; and (iii) FPU did not have such rates available to all of FPU's customers located within and without the corporate limits of the City of Marianna. The City of Marianna sought a declaratory judgment allowing it to exercise its option under the Franchise Agreement to purchase FPU's property (consisting of the electric distribution assets) within the City of Marianna. Any such purchase would be subject to approval by the Marianna Commission, which would also need to approve the presentation of a referendum to voters in the City of Marianna related to the purchase and the operation by the City of Marianna of an electric distribution facility. On March 28, 2011, FPU filed its answer to the declaratory action by the City of Marianna, in which it denied the material allegations by the City of Marianna and asserted several affirmative defenses. On August 3, 2011, the City of Marianna notified FPU that it was formally exercising its option to purchase FPU's property. On August 31, 2011, FPU advised the City of Marianna that it had no right to exercise the purchase option under the Franchise Agreement and that FPU would continue to oppose the effort by the City of Marianna to purchase FPU's property. In December 2011, the City of Marianna filed a motion for summary judgment. On April 3, 2012, the court conducted a hearing on the City of Marianna's motion for summary judgment. The court subsequently denied in part and granted in part the City of Marianna's motion after concluding that issues of fact remained for trial with respect to each of the three alleged breaches of the Franchise Agreement.

Prior to the February 2013 trial date, FPU and the City of Marianna reached an agreement in principle to resolve their dispute, which resulted in the City of Marianna dismissing its legal action with prejudice on February 11, 2013. Subsequently, FPU and the City of Marianna entered into a settlement agreement, which contemplated, among other items, the City of Marianna proceeding with a referendum on the purchase of FPU's facilities within the City of Marianna. On April 9, 2013, the referendum took place, and the citizens of the City of Marianna voted, by a wide margin, to reject the purchase of FPU's facilities by the City of Marianna. As a result of the dismissal with prejudice of the legal action by the City of Marianna and the outcome of the referendum on the purchase of FPU's facilities, we no longer have any contingencies related to claims by the City of Marianna.

We are involved in certain other legal actions and claims arising in the normal course of business. We are also involved in certain legal and administrative proceedings before various governmental agencies concerning rates. In the opinion of management, the ultimate disposition of these proceedings will not have a material effect on our consolidated financial position, results of operations or cash flows.

Natural Gas, Electric and Propane Supply

We have entered into contractual commitments to purchase gas, electricity and propane from various suppliers. The contracts have various expiration dates. For our Delaware and Maryland natural gas distribution divisions, we had a contract with an unaffiliated energy marketing and risk management company to manage a portion of their natural gas transportation and storage capacity, which expired on March 31, 2013. On April 1, 2013, we entered into a new contract with a different company to perform similar asset management functions. The new contract expires on March 31, 2015.

Table of Contents
Notes to the Consolidated Financial Statements

As discussed in *Note 4, Acquisitions*, in May 2013, Sandpiper entered into a capacity, supply and operating agreement with EGWIC to purchase propane over a six -year term. Sandpiper's initial annual commitment is estimated at approximately 7.4 million gallons. Sandpiper has the option to enter into either a fixed per-gallon price for some or all of the propane purchases or a market-based price utilizing one of two local propane pricing indices.

Chesapeake's Florida natural gas distribution division has firm transportation service contracts with FGT and Gulfstream. Pursuant to a capacity release program approved by the Florida PSC, all of the capacity under these agreements has been released to various third parties, including PESCO. Under the terms of these capacity release agreements, Chesapeake is contingently liable to FGT and Gulfstream, should any party that acquired the capacity through release fail to pay the capacity charge.

In May 2013, PESCO renewed contracts to purchase natural gas from various suppliers. These contracts expire in May 2014. PESCO is currently obtaining and reviewing proposals from suppliers and anticipates executing agreements before the existing agreements expire.

FPU entered into an amendment to its Generation Services Agreement with Gulf Power, which reduces the capacity demand quantity and provides the savings necessary to support the TOU and interruptible rates for the customers in the City of Marianna, both of which were approved by the Florida PSC. The amendment also extends the current agreement by two years, with a new expiration date of December 31, 2019.

FPU's electric fuel supply contracts require FPU to maintain an acceptable standard of creditworthiness based on specific financial ratios. FPU's agreement with JEA requires FPU to comply with the following ratios based on the results of the prior 12 months: (a) total liabilities to tangible net worth less than 3.75 times, and (b) fixed charge coverage ratio greater than 1.5 times. If either ratio is not met by FPU, it has 30 days to cure the default or provide an irrevocable letter of credit if the default is not cured. FPU's electric fuel supply agreement with Gulf Power requires FPU to meet the following ratios based on the average of the prior nine quarters: (a) funds from operations interest coverage ratio (minimum of 2 times), and (b) total debt to total capital (maximum of 65 percent). If FPU fails to meet the requirements, it has to provide the supplier a written explanation of actions taken or proposed to be taken to become compliant. Failure to comply with the ratios specified in the Gulf Power agreement could result in FPU providing an irrevocable letter of credit. As of December 31, 2013, FPU was in compliance with all of the requirements of its fuel supply contracts.

Sharp entered into a separate supply and operating agreement with EGWIC. Under this agreement, Sharp has a commitment to supply propane to EGWIC over a six -year term. Sharp's initial annual commitment is estimated at approximately 7.4 million gallons. The agreement between Sharp and EGWIC is separate from the agreement between Sandpiper and EGWIC, and neither agreement permits the parties to set off the rights and obligations specified in one agreement against those specified in the other agreement.

The total purchase obligations for natural gas, electric and propane supplies are \$98.2 million for 2014, \$129.9 million for 2015-2016, \$88.6 million for 2017-2018 and \$147.6 million thereafter.

Corporate Guarantees

The Board of Directors has authorized the Company to issue corporate guarantees securing obligations of our subsidiaries and to obtain letters of credit securing our obligations, including the obligations of our subsidiaries. The maximum authorized liability under such guarantees and letters of credit is \$45.0 million.

We have issued corporate guarantees to certain vendors of our subsidiaries, the largest portion of which are for Xeron and PESCO. These corporate guarantees provide for the payment of propane and natural gas purchases in the event of the respective subsidiary's default. Neither subsidiary has ever defaulted on its obligations to pay its suppliers. The liabilities for these purchases are recorded when incurred. The aggregate amount guaranteed at December 31, 2013 was \$31.1 million, with the guarantees expiring on various dates through December 30, 2014.

Chesapeake guarantees the payment of FPU's first mortgage bonds. The maximum exposure under the guarantee is the outstanding principal and accrued interest balances. The outstanding principal balances of FPU's first mortgage bonds approximate their carrying values (see *Note 12, Long-Term Debt*, for further details).

In addition to the corporate guarantees, we have issued a letter of credit for \$1.0 million, which expires on September 12, 2014, related to the electric transmission services for FPU's northwest electric division. We have also issued a letter of credit to our current primary insurance company for \$1.1 million, which expires on December 2, 2014, as security to satisfy the deductibles under our various insurance policies. As a result of a change in our primary insurance company in 2010, we renewed and decreased the letter of credit to \$304,000 to our former primary insurance company, which will expire on June 1, 2014. There have been no draws on these letters of credit as of December 31, 2013. We do not anticipate that the letters of credit will be drawn upon by the counterparties, and we expect that the letters of credit will be renewed to the extent necessary in the future.

Table of Contents
Notes to the Consolidated Financial Statements

We provided a letter of credit for \$2.3 million to TETLP related to the precedent agreement and firm transportation service agreement between our Delaware and Maryland divisions.

Tax-related Contingencies

We are subject to various audits and reviews by the federal, state and local and other regulatory authorities regarding income taxes and taxes other than income. As of December 31, 2013, we maintained a liability of \$300,000 related to unrecognized income tax benefits and \$1.0 million related to contingencies for taxes other than income. As of December 31, 2012, we maintained a liability of \$300,000 related to unrecognized income tax benefits and \$82,000 related to contingencies for taxes other than income. We recorded an additional accrual in 2013 related to taxes other than income based upon a re-assessment of these tax-related contingencies.

21. QUARTERLY FINANCIAL DATA (UNAUDITED)

In our opinion, the quarterly financial information shown below includes all adjustments necessary for a fair presentation of the operations for such periods. Due to the seasonal nature of our business, there are substantial variations in operations reported on a quarterly basis.

	For the Quarters Ended			
	March 31	June 30	September 30	December 31
<i>(in thousands except per share amounts)</i>				
2013 ⁽¹⁾				
Operating Revenue	\$ 140,729	\$ 94,146	\$ 86,545	\$ 122,887

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE.

None.

ITEM 9A. CONTROLS AND PROCEDURES.

EVALUATION OF DISCLOSURE CONTROLS AND PROCEDURES

Our Chief Executive Officer and Chief Financial Officer, with the participation of other Company officials, have evaluated our "disclosure controls and procedures" (as such term is defined under Rule 13a-15(e) and 15d - 15(e) promulgated under the Securities Exchange Act of 1934, as amended) as of December 31, 2013. Based upon their evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of December 31, 2013.

CHANGE IN INTERNAL CONTROLS

There has been no change in internal control over financial reporting (as such term is defined in Exchange Act Rule 13a-15(f)) that occurred during the quarter ended December 31, 2013, that materially affected, or is reasonably likely to materially affect, internal control over financial reporting.

CEO AND CFO CERTIFICATIONS

Our Chief Executive Officer and Chief Financial Officer have filed with the SEC the certifications required by Section 302 of the Sarbanes-Oxley Act of 2002 as Exhibits 31.1 and 31.2 to our Annual Report on Form 10-K for the fiscal year ended December 31, 2013. In addition, on June 4, 2013, our Chief Executive Officer certified to the NYSE that he was not aware of any violation by us of the NYSE corporate governance listing standards.

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

Management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rule 13a-15 (f) of the Exchange Act. A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with GAAP. A company's internal control over financial reporting includes those policies and procedures that: (i) pertain to the maintenance of records which in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with GAAP and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Under the supervision and with the participation of management, including the principal executive officer and principal financial officer, our management conducted an evaluation of the effectiveness of its internal control over financial reporting based on the criteria established in an updated report entitled "Internal Control — Integrated Framework," issued in May 2013 by the Committee of Sponsoring Organizations of the Treadway Commission. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Our management has evaluated and concluded that our internal control over financial reporting was effective as of December 31, 2013.

Our independent auditors, ParenteBeard LLC, have audited and issued their report on effectiveness of our internal control over financial reporting. That report appears on the following page.

R E P O R T O F I N D E P E N D E N T R E G I S T E R E D P U B L I C A C C O U N T I N G F I R M

The Board of Directors and Stockholders of
Chesapeake Utilities Corporation

We have audited Chesapeake Utilities Corporation's (the "Company") internal control over financial reporting as of December 31, 2013, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO") (2013 framework). The Company's management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2013, based on criteria established in Internal Control-Integrated Framework issued by COSO (2013 framework).

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of the Company as of December 31, 2013 and 2012, and the related consolidated statements of income, comprehensive income, stockholders' equity, and cash flows of the Company and our report dated March 6, 2014 expressed an unqualified opinion.

ITEM 9B. OTHER INFORMATION.

None.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS OF THE REGISTRANT AND CORPORATE GOVERNANCE.

The information required by this Item is incorporated herein by reference to the portions of the Proxy Statement, captioned "Election of Directors (Proposal 1)," "Information Concerning Nominees and Continuing Directors," "Corporate Governance," "Committees of the Board – Audit Committee" and "Section 16(a) Beneficial Ownership Reporting Compliance," to be filed no later than March 31, 2014, in connection with our Annual Meeting to be held on or about May 6, 2014.

The information required by this Item with respect to executive officers is, pursuant to instruction 3 of paragraph (b) of Item 401 of Regulation S-K, set forth in this report following Item 4, as *Item 4A Executive Officers of the Registrant*.

We have adopted a Code of Ethics for Financial Officers, which applies to our principal executive officer, president, principal financial officer, principal accounting officer or controller, or persons performing similar functions. The information set forth under Item 1 hereof concerning the Code of Ethics for Financial Officers is filed herewith.

ITEM 11. EXECUTIVE COMPENSATION.

The information required by this Item is incorporated herein by reference to the portions of the Proxy Statement, captioned "Director Compensation," "Executive Compensation" and "Compensation Discussion and Analysis" in the Proxy Statement to be filed no later than March 31, 2014, in connection with our Annual Meeting to be held on or about May 6, 2014.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS.

The information required by this Item is incorporated herein by reference to the portion of the Proxy Statement, captioned "Security Ownership of Certain Beneficial Owners and Management" to be filed no later than March 31, 2014, in connection with our Annual Meeting to be held on or about May 6, 2014.

The following table sets forth information, as of December 31, 2013, with respect to our SICP, under which shares of Chesapeake common stock are authorized for issuance:

	(a) Number of securities to be issued upon exercise of outstanding options, warrants, and rights	(b) Weighted-average exercise price of outstanding options, warrants, and rights	(c) Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a))
Equity compensation plans approved by security holders	—	—	441,241
Equity compensation plans not approved by security holders	—	—	—
Total	—	—	441,241

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE.

The information required by this Item is incorporated herein by reference to the portion of the Proxy Statement captioned, "Corporate Governance," to be filed no later than March 31, 2014 in connection with our Annual Meeting to be held on or about May 6, 2014.

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES .

The information required by this Item is incorporated herein by reference to the portion of the Proxy Statement, captioned "Fees and Services of Independent Registered Public Accounting Firm," to be filed no later than March 31, 2014, in connection with our Annual Meeting to be held on or about May 6, 2014 .

PART IV

ITEM 15. EXHIBITS, FINANCIAL STATEMENT SCHEDULES.

The following documents are filed as part of this report:

- (a)(1) All of the financial statements, reports and notes to the financial statements included in Item 8 of Part II of this Annual Report on Form 10-K.
- (a)(2) Report of Independent Registered Public Accounting Firm; and Schedule II—Valuation and Qualifying Accounts.
- (a)(3) The Exhibits below.

- Exhibit 3.1 Amended and Restated Certificate of Incorporation of Chesapeake Utilities Corporation is incorporated herein by reference to Exhibit 3.1 of our Quarterly Report on Form 10-Q for the period ended June 30, 2010, File No. 001-11590.
- Exhibit 3.2 Amended and Restated Bylaws of Chesapeake Utilities Corporation, effective December 4, 2012, are incorporated herein by reference to Exhibit 3 of our Current Report on Form 8-K, filed December 7, 2012, File No. 001-11590.
- Exhibit 4.1 Form of Indenture between Chesapeake and Boatmen's Trust Company, Trustee, with respect to the 8 1/4% Convertible Debentures is incorporated herein by reference to Exhibit 4.2 of our Registration Statement on Form S-2, Reg. No. 33-26582, filed on January 13, 1989.
- Exhibit 4.2 Note Purchase Agreement entered into by Chesapeake on December 27, 2000, pursuant to which Chesapeake privately placed \$20 million of its 7.83% Senior Notes, due in 2015, is incorporated by reference to Exhibit 4.4 of our Annual Report on Form 10-K for the year ended December 31, 2009, File No. 001-11590.
- Exhibit 4.3 Note Agreement entered into by Chesapeake on October 31, 2002, pursuant to which Chesapeake privately placed \$30 million of its 6.64% Senior Notes, due in 2017, is incorporated herein by reference to Exhibit 2 of our Current Report on Form 8-K, filed November 6, 2002, File No. 001-11590.
- Exhibit 4.4 Note Agreement entered into by Chesapeake on October 18, 2005, pursuant to which Chesapeake, on October 12, 2006, privately placed \$20 million of its 5.5% Senior Notes, due in 2020, with Prudential Investment Management, Inc., is incorporated herein by reference to Exhibit 4.1 of our Annual Report on Form 10-K for the year ended December 31, 2005, File No. 001-11590.
- Exhibit 4.5 Note Agreement entered into by Chesapeake on October 31, 2008, pursuant to which Chesapeake, on October 31, 2008, privately placed \$30 million of its 5.93% Senior Notes, due in 2023, with General American Life Insurance Company and New England Life Insurance Company, is incorporated by reference to Exhibit 4.7 of our Annual Report on Form 10-K for the year ended December 31, 2009, File No. 001-11590.
- Exhibit 4.6 Note Agreement entered into by Chesapeake on June 23, 2011, pursuant to which Chesapeake privately placed \$29 million of its 5.68% Senior Notes, due in 2026, with Metropolitan Life Insurance Company and New England Life Insurance Company is not being filed herewith pursuant to Item 601(b)(4)(v) of Regulation S-K under the Securities Act of 1933, as amended. We hereby agree to furnish a copy of that agreement to the SEC upon request.
- Exhibit 4.7 Note Agreement entered into by Chesapeake on June 23, 2011, pursuant to which Chesapeake privately placed \$7 million of its 6.43% Senior Notes, due in 2028, with Metropolitan Life Insurance Company is not being filed herewith pursuant to Item 601(b)(4)(v) of Regulation S-K under the Securities Act of 1933, as amended. We hereby agree to furnish a copy of that agreement to the SEC upon request.
- Exhibit 4.8 Note Agreement entered into by Chesapeake on September 5, 2013 pursuant to which Chesapeake privately placed Series A Notes of its 3.73% Senior Notes, due 2028 and will issue Series B Notes to the Noteholders is not being filed herewith pursuant to Item 601(b)(4)(v) of Regulation S-K under the Securities Act of 1933, as amended. We hereby agree to furnish a copy of the agreement to the SEC upon request.

The Board of Directors and Stockholders of
Chesapeake Utilities Corporation

The audit referred to in our report dated March 6, 2014 relating to the consolidated financial statements of Chesapeake Utilities Corporation (the "Company") as of December 31, 2013 and 2012 and for each of the years in the three-year period ended December 31, 2013, which is contained in Item 8 of this Form 10-K also included the audits of the financial statement schedule listed in Item 15(a)2. This financial statement schedule is the responsibility of the Company's management. Our responsibility is to express an opinion on this financial statement schedule based on our audits.

In our opinion, such financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, present fairly, in all material respects, the information set forth therein.

CHESAPEAKE UTILITIES CORPORATION
NON-QUALIFIED DEFERRED COMPENSATION PLAN

The Chesapeake Utilities Corporation Supplemental Executive Retirement Savings Plan is hereby amended, restated and renamed as the "Chesapeake Utilities Corporation Non-Qualified Deferred Compensation Plan" (the "Plan"), effective as of January 1, 2014, by Chesapeake Utilities Corporation, a Delaware corporation (the "Company"), for the benefit of a select group of the management and highly compensated employees of the Company and of its affiliated entities which participate in this Plan with the consent of the Company. In addition, the Chesapeake Utilities Corporation Deferred Compensation Plan (the "DCP"), originally established September 1, 1998, is also hereby consolidated within this Plan, effective as of January 1, 2014, and the two prior plans shall thereupon and thereafter be administered as a single plan on the terms set forth in this amended and restated document.

Background Information

A. The Company desires to continue to maintain the Plan in order to provide certain of its highly compensated and management employees with the opportunity to defer a portion of the base salary, bonuses and other cash compensation otherwise payable to them.

B. The Company also desires to continue to permit certain of its highly compensated and management employees to defer a portion of their performance based awards of Shares, as well as to permit members of the Board of Directors to defer the fees they would otherwise receive for their service on the Board, whether in cash or Shares of Chesapeake Utilities Corporation common stock, as has been permitted under the DCP.

C. Accordingly, the Company hereby merges and consolidates the DCP with and into the Plan, effective as of December 31, 2013, and the terms and provisions of both the Plan and the DCP shall be governed by this Plan, to be known as the Chesapeake Utilities Corporation Non-Qualified Deferred Compensation Plan.

D. The Company intends for the Plan to continue to be an unfunded, non-qualified deferred compensation arrangement as provided under the Employee Retirement Income Security Act of 1974, as amended ("ERISA"), and to satisfy the requirements of a "top hat" plan thereunder and under Labor Reg. Sec. 2520.104-23.

E. This amended, restated and consolidated Plan is intended to continue to comply with the requirements of Section 409A of the Internal Revenue Code of 1986, as amended ("Code"), and final regulations and other rulings issued by the Internal Revenue Service ("IRS") thereunder.

F. Amounts deferred and vested (within the meaning of Code Section 409A) under the Plan and the DCP before January 1, 2005, and earnings thereon, are intended to continue to remain "grandfathered" from the requirements of Code Section 409A and shall remain subject to the terms of the Plan and the DCP as in effect on December 31, 2004. Amounts under the Plan and the DCP that were not so grandfathered shall continue to be subject to a good faith interpretation of Code

Section 409A for the period from January 1, 2005, through December 31, 2008, and any applicable transition rules that apply during that period, and amounts deferred under the Plan and the DCP from and after January 1, 2009, until the effective date of this amended and restated Plan shall continue to be subject to the terms of the Plan and the DCP in effect during that period of time. This new amended and restated Plan document shall govern all amounts that are deferred from and after January 1, 2014.

ARTICLE I

DEFINITIONS AND GENERAL PROVISIONS

1.1 Definitions. Unless the context requires otherwise, the terms defined in this Article shall have the meanings set forth below unless the context clearly requires another meaning. When the defined meaning is intended, the term is capitalized:

(a) Account. The bookkeeping account for each Participant under Section 3.9. Each account may include subaccounts for different categories of deferrals under the Plan and the earnings that are credited thereto on behalf of a Participant, as described in Article III.

(b) Administrative Committee. The Employee Benefits Committee or such other committee of at least three persons appointed by the Compensation Committee of the Board to oversee the administration of the Plan.

(c) Beneficiary. The person(s) entitled to receive any distribution hereunder upon the death of a Participant. The Beneficiary (and any contingent Beneficiary) for benefits payable under this Plan shall be the persons designated by the Participant in accordance with procedures established by the Administrative Committee as of the Participant's date of death. In the absence of any such designation, any death benefit shall be payable to the Participant's surviving spouse, or if none, to the Participant's estate.

(d) Board. The Board of Directors of the Company.

(e) Change of Control. For purposes of the Plan, a Change of Control means the first of the following events to occur:

A. Any one person, or group of owners of another corporation who acting together through a merger, consolidation, purchase, acquisition of stock or the like (a "group"), acquires ownership of stock of the Company (or a majority-controlled subsidiary of the Company) that, together with the stock held by such person or group, constitutes more than 50 percent of the total fair market value or total voting power of the stock of the Company. However, if such person or group is considered to own more than 50 percent of the total fair market value or total voting power of the stock of the corporation before this transfer of the Company's stock, the acquisition of additional stock by the same person or persons shall not be considered to cause a Change in Control of the Company; or

B. Any one person or group (as described in paragraph A, above) acquires (or has acquired during the 12-month period ending on the date of the most recent acquisition by such person or persons) ownership of stock of the Company (or a majority-owned subsidiary of the Company) possessing 35 percent or more of the total voting power of the stock of the Company where such person or group is not merely acquiring additional control of the Company; or

C. A majority of members of the Company's Board (other than the Board of a majority-controlled subsidiary of the Company) is replaced during any 12-month period by directors whose appointment or election is not endorsed by a majority of the members of the Company's Board prior to the date of the appointment or election (the "Incumbent Board"), but excluding, for purposes of determining whether a majority of the Incumbent Board has endorsed any candidate for election to the Board, any individual whose initial assumption of office occurs as a result of an actual or threatened election contest with respect to the election or removal of directors or other actual or threatened solicitation of proxies or consents by or on behalf of a person or group other than the Company's Board; or

D. Any one person or group (as described in paragraph A, above) acquires (or has acquired during the 12-

month period ending on the date of the most recent acquisition by such person or group) assets from the Company (or a majority-controlled subsidiary of the Company) that have a total gross fair market value equal to or more than 40 percent of the total gross fair market value of all assets of the Company immediately prior to such acquisition or acquisitions. For this purpose, gross fair market value means the value of the assets of the Company, or the value of the assets being disposed of, determined without regard to any liabilities associated with such assets. A transfer of assets by the Company will not result in a Change in Control under this paragraph if the assets are transferred to:

- (i) A shareholder of the Company (immediately before the asset transfer) in exchange for or with respect to its stock;
- (ii) An entity, 50 percent or more of the total value or voting power of which is owned, directly or indirectly, by the Company immediately after the transfer of assets;
- (iii) A person, or more than one person acting as a group (as described in paragraph A, above), that owns, directly or indirectly, 50 percent or more of the total value or voting power of all the outstanding stock of the Company; or
- (iv) An entity, at least 50 percent of the total value or voting power of which is owned, directly or indirectly, by a person described in subparagraph (iii), above.

E. However, no Change in Control shall be deemed to have occurred with respect to a Participant by reason of (i) any event involving a transaction in which the Participant or a group of persons or entities with which the Participant acts in concert, acquires, directly or indirectly, more than 30 percent of the common stock or the business or assets of the Company; (ii) any event involving or arising out of a proceeding under Title 11 of the United States Code (or the provisions of any future United States bankruptcy law), an assignment for the benefit of creditors or an insolvency proceeding under state or local law; or (iii) any event constituting approval by the Company's stockholders of a merger or consolidation if a majority of the group consisting of the president and vice presidents of the Company who are parties to agreements conferring rights upon a Change in Control shall have agreed in writing prior to the approval that the approval shall be deemed not to constitute a Change in Control.

F. The term "Change in Control" is intended to comply with Code Section 409A and shall be interpreted such that a Change in Control (1) shall occur for purposes of the Plan in any circumstance that would constitute a "Change in Control Event" (within the meaning of Treasury Regulations under Code Section 409A) and (2) shall not occur for purposes of the Plan in any circumstance that would not constitute such a Change in Control Event.

(f) Code. The Internal Revenue Code of 1986, as amended from time to time.

(g) Committee. The Compensation Committee of the Board.

(h) Company. Chesapeake Utilities Corporation, a Delaware corporation.

(i) Compensation. Amounts paid or payable by the Company to an Eligible Employee for a Plan Year in cash which are includable in income for federal tax purposes and which are treated as compensation under the Qualified Plan, but also including any cash amounts deferred under this Plan or the Qualified Plan. In addition, the dollar limit on compensation under the Qualified Plan does not apply to this Plan.

(j) Compensation Deferral Contribution. An amount of Compensation payable to an Eligible Employee for a Plan Year that he or she elects to defer in accordance with the rules and procedures of this Plan.

(k) Deferred Stock Unit. Hypothetical Shares (whole or fractional) based upon the deferral of Shares to the Plan by a Participant.

(l) Director. A member of the Board of Directors of the Company who is not also an Eligible Employee.

(m) Director Compensation. Amounts paid or payable by the Company to a Director for a Plan Year which are

includable in income for federal tax purposes, whether paid in cash or Shares, including any and all fees paid for service as a member of the Board and for attendance at meetings or committee meetings. Any other non-cash compensation or expense reimbursements are excluded from Director Compensation.

(n) Director Deferral Contribution. An amount of Director Compensation payable to a Director for a Plan Year that he or she elects to defer in accordance with the rules and procedures of this Plan.

(o) Distribution Options. A single lump sum or annual installment payments over a fixed period of years. The standard form of distribution (the "Standard Option") shall be a single lump sum payment unless otherwise elected by a Participant in accordance with the terms of the Plan or as determined by the Company to the extent permitted by Code Section 409A and regulations thereunder. Installment payment options may be elected for a fixed period of up to 15 years for payments commencing on a fixed future date or upon a Separation from Service. Each installment payment option (rather than each individual installment payment) shall be treated as an entitlement to a "single payment" as described in Treasury Regulations under Code Section 409A.

(p) Effective Date. January 1, 2014, the date this amendment and restatement of the Plan is effective.

(q) Eligibility Effective Date. The date an Eligible Employee or Director receives the enrollment materials from the Company or its agent. The Eligibility Effective Date will be presumed to occur three business days after the enrollment materials are deposited in the U.S. mail, properly addressed to the Eligible Employee or Director, or the date the enrollment materials are otherwise delivered to the Eligible Employee or Director.

(r) Eligible Employee. Any individual who is (A) among a select group of management or highly compensated employees (within the meaning of Sections 201(2), 301(a)(3) and 401(a)(1) of ERISA), and (B) designated by the Committee, in its sole discretion, as eligible to participate in the Plan.

(s) Employer. The Company and any affiliate thereof or successor thereto which adopts and participates in the Plan. Any affiliate that has U.S. employees and is a member of a controlled group of corporations or other business entities within the meaning of Code Sections 414(b) and (c) that includes Chesapeake Utilities Corporation shall participate in the Plan unless determined otherwise by the Company. Such participation in the Plan shall continue only so long as the affiliate remains a member of a controlled group of corporations or other business entities within the meaning of Code Sections 414(b) and (c) that includes Chesapeake Utilities Corporation.

(t) Employer Matching Contribution. An Employer contribution to the Plan that is based on the Participant's Compensation Deferral Contribution for the Plan Year.

(u) Employer Supplemental Contribution. An Employer contribution to the Plan that is based on a Participant's Excess Compensation for the Plan Year.

(v) ERISA. The Employee Retirement Income Security Act of 1974, as amended from time to time.

(w) Excess Compensation. The amount, if any, of an Eligible Employee's Compensation for the Plan Year that exceeds (i) the limitation under Code Section 401(a)(17) for that Plan Year, or (ii) if less than the limitation under Code Section 401(a)(17), the portion of Compensation that is taken into account under the terms of the Qualified Plan after deducting any Compensation Deferrals to this Plan.

(x) Fair Market Value. The closing sales price of the Shares, as reported on the New York Stock Exchange (or any other reporting system as shall be selected by the Committee) on the relevant date, or if no sale of Shares is reported for a date, on the most recent previous date on which trading occurred.

(y) Participant. Any Director and any Eligible Employee who meets the eligibility requirements for participation in the Plan as set forth in Article II and who earns benefits under the Plan.

(z) Performance-Based. A bonus or other payment of Compensation or an award of Shares is Performance-Based if the amount of the payment or the entitlement thereto is contingent on the satisfaction of organizational or individual performance criteria relating to a performance period of at least 12 consecutive months. The organizational or individual performance criteria shall be established in writing no later than 90 days after the beginning of the period of service to which the criteria relate, and the outcome must be substantially uncertain at the time the criteria are established. Notwithstanding

the above, a Performance-Based bonus or Share award may be based on subjective performance criteria, provided that :

A. The subjective performance criteria are bona fide and relate to the performance of the Participant, a group of service providers that includes the Participant, or a business unit for which the Participant provides services (which may include the entire organization); and

B. the determination that any subjective performance criteria have been met is not to be made by the Participant or a family member of the Participant (as defined in Code Section 267(c)(4) applied as if the family of an individual includes the spouse of any member of the family), or a person under the effective control of the Participant or such a family member, and no amount of the Compensation of the person making such determination is effectively controlled in whole or in part by the Participant or such a family member.

(aa) Performance Share Award. A Performance-Based award of Shares granted under an equity compensation plan of the Company.

(bb) Performance Share Deferral Contribution. A Performance Share Award payable to an Eligible Employee that he or she elects to defer in accordance with the rules and procedures of this Plan.

(cc) Plan. The Chesapeake Utilities Corporation Non-Qualified Deferred Compensation Plan, as set forth herein, and as such Plan may be amended from time to time hereafter.

(dd) Plan Year. The fiscal year of the Plan, which is the 12 consecutive month period beginning January 1 and ending December 31.

(ee) Qualified Plan. The Chesapeake Utilities Corporation Retirement Savings Plan, as amended from time to time.

(ff) Retirement. An Eligible Employee's Separation from Service with the Employer following attainment of age 65.

(gg) Restricted Share Award. An award of Shares granted under an equity compensation plan of the Company with vesting based on elapsed time or some other factor or condition other than a Performance-Based condition.

(hh) Restricted Share Deferral Contribution. A Restricted Share Award payable to an eligible employee that he or she elects to defer in accordance with the rules and procedures of this Plan.

(ii) Separation from Service. An Eligible Employee separates from service with the Employer if the Eligible Employee dies, retires or otherwise has a termination of employment with the Employer. Whether a termination of employment has occurred is determined based on whether the facts and circumstances indicate that the Employer and the Eligible Employee reasonably anticipated that no further services would be performed after a certain date or that the level of bona fide services the Eligible Employee would perform after such date (as an employee or independent contractor) would permanently decrease to no more than 20 percent of the average level of bona fide services performed over the immediately preceding 36-month period (or the full period in which the Eligible Employee provided services to the Employer if the Eligible Employee has been providing services for less than 36 months). An Eligible Employee will not be deemed to have experienced a Separation from Service if such Eligible Employee is on military leave, sick leave, or other bona fide leave of absence, to the extent such leave does not exceed a period of six months or, if longer, such longer period of time during which a right to re-employment is protected by either statute or contract. If the period of leave exceeds six months and the individual does not retain a right to re-employment under an applicable statute or by contract, the employment relationship is deemed to terminate on the first date immediately following such six-month period. In the case of a Director, a separation from service occurs upon the termination of the Director's service on the Board, provided, however, that a Director who is also providing services to the Employer as an independent contractor, does not have a Separation from Service until he or she has separated from service both as a Director and as an independent contractor. If an Eligible Employee provides services both as an employee and as a member of the Board, the services provided as a Director are generally not taken into account in determining whether the Eligible Employee has a Separation from Service as an employee for purposes of the Plan, in accordance with final regulations under Code Section 409A.

(jj) Shares. The common stock, par value \$0.4867 per share, of the Company, or any security of the Company

issued in substitution, exchange or lieu thereof.

(kk) Total Disability. Occurs when a Participant is unable to engage in any substantial gainful activity and has qualified for benefits under the Company's long term disability plan by reason of any medically determinable physical or mental impairment that can be expected to result in death or can be expected to last for a continuous period of not less than 12 months. A Participant shall also be deemed to be totally disabled if determined to be totally disabled by the Social Security Administration. The Company may require the Participant to submit to periodic medical examinations at the Participant's expense to confirm the existence and continuation of a Total Disability.

(ll) Valuation Date. The last business day of each calendar month.

1.2 General Provisions. Singular and plural forms are interchangeable. Certain terms of more limited application have been defined in the provisions to which they are principally applicable. The division of the Plan into Articles and Sections with captions is for convenience only and is not to be taken as limiting or extending the meaning of any of its provisions.

ARTICLE II

ELIGIBILITY AND PARTICIPATION

2.1 General Eligibility Conditions. Each Director of the Company is eligible to participate in the Plan for purposes of making Director Deferral Contributions. For an employee to become eligible to participate in the Plan, the employee must be (A) among a select group of management or highly compensated employees within the meaning of Sections 201(2), 301(a)(3), and 401(a)(1) of ERISA and (B) designated as an Eligible Employee by the Company (or another participating Employer) to receive any applicable Employer contributions and to make Compensation Deferral Contributions, Performance Share Deferral Contributions or Restricted Share Deferral Contributions under the Plan. In order to receive a benefit under the Plan, a Participant must also meet the requirements of Sections 2.2 and 2.3. An Eligible Employee or Director shall be considered eligible to participate in the Plan effective as of his or her Eligibility Effective Date.

2.2 Specific Conditions for Active Participation. To participate actively in the Plan (i.e., to make deferrals hereunder), a Participant must execute or acknowledge an agreement to make Compensation Deferral Contributions, Performance Share Deferral Contributions, Restricted Share Deferral Contributions or Director Deferral Contributions, in accordance with procedures, including electronic enrollment, as are established by the Administrative Committee from time to time. A Participant's agreement to make a permitted deferral to the Plan shall be maintained by or on behalf of the Administrative Committee and must be executed, acknowledged, filed or submitted electronically within 30 days of the Participant's Eligibility Effective Date and, for all subsequent deferral elections after initial participation, within the following time limitations, as applicable: (i) in advance of the beginning of the calendar year during which such Compensation or Director Compensation is expected to be earned; (ii) in the case of Performance-Based Compensation or a Performance Share Award, on or before the mid-point of the performance period but in no event later than six months before the end of the performance period, provided the amount of such Compensation or Performance Award has not become readily ascertainable at that time; (iii) in the case of a Restricted Share Award, on or before the date the award is granted, provided that the restriction or vesting period for the Restricted Share Award is at least 12 months long; or (iv) at such other time or times as may be required or permitted by regulations issued under Code Section 409A and administrative procedures established by the Administrative Committee.

2.3 Suspension of Active Participation. Any Participant not selected as an Eligible Employee for a given Plan Year shall cease to have any right to defer Compensation for such Plan Year or to receive Employer Matching Contributions or Employer Supplemental Contributions for such Plan Year. However, any amounts credited to the Account of a Participant whose participation is suspended shall otherwise continue to be maintained under the Plan in accordance with its terms. If an Eligible Employee has ceased being eligible to participate in the Plan (other than the accrual of earnings on his Account, if any), regardless of whether all amounts deferred under the Plan have yet been paid, and subsequently becomes eligible to participate in the Plan again, the Eligible Employee may be treated as being initially eligible to participate in the Plan if he or she has not been eligible to participate in the Plan (other than the accrual of earnings on his or her Account, if any) at any time during the 24-month period ending on the date the employee again becomes an Eligible Employee under the Plan.

2.4 Termination of Participation. Once an Eligible Employee becomes a Participant, such individual shall continue to be a Participant until such individual (i) ceases to be described as an Eligible Employee, and (ii) ceases to have any vested

interest in the Plan (as a result of distributions made to such Participant or his or her Beneficiary, if applicable, or otherwise).

2.5 Participation by Other Employers. Each corporation or other entity with U.S. employees that is a member of the same controlled group as the Company (within the meaning of Code Sections 414(b) and (c)) shall be a participating employer under the Plan unless determined otherwise by the Company. Participating affiliates that cease to be a member of the same controlled group as Chesapeake Utilities Corporation within the meaning of Code Sections 414(b) and (c) are no longer eligible to participate in the Plan effective as of the date that they cease to qualify as a controlled group member. Participants of such an employer shall no longer be eligible to participate effective as of the date that their employer becomes ineligible.

ARTICLE III

DEFERRED COMPENSATION CREDITS and ACCOUNTS

3.1 Deferred Compensation Credits. Pursuant to the provisions of Article II and this Article III, a Participant and the Employer may, by mutual agreement, provide for deferred and postponed payment of a percentage of the Participant's Compensation, Director Fees, Performance Share Awards or Restricted Share Awards which otherwise would be paid during the applicable Plan Year(s) for services to be rendered in such year(s). All elections to defer Compensation, Director Fees, Performance Share Awards or Restricted Share Awards must be made within 30 days after the Participant's Eligibility Effective Date and, for subsequent elections after initial eligibility, prior to the calendar year during which the Compensation is expected to be earned or at such other time as may be specified under regulations issued under the Code. In the case of the deferral of any Performance-Based Compensation or Performance Share Award, such election must also be made no later than six months before the end of the performance period, provided that in no event may an election to defer Performance-Based Compensation or a Performance Share Award be made after such Compensation or award has become readily ascertainable within the meaning of Code Section 409A. In the case of the deferral of any Restricted Share Award, such election must also be made at least 12 months before the restrictions applicable to the Restricted Share Award will lapse and result in vesting of the award. In all cases, a Participant's election to defer Compensation that is not Performance-Based shall be made prior to the time any of the Compensation covered by such election is to be earned by such Participant. Elections to participate and defer Compensation shall be irrevocable with respect to the Compensation to which they apply and may be amended, revoked or suspended by the Participant only effective as of the January 1st following the amendment, revocation or suspension in accordance with procedures established by the Administrative Committee, unless rules and regulations under Code Section 409A permit amendment, revocation or suspension as of some other time. In the Administrative Committee's discretion, Participant elections to defer Compensation may apply only to Compensation above a fixed dollar amount or payable after a particular date during the year, provided that such designation is made at the time of the initial deferral election and is irrevocable for the Plan Year to which it applies. Deferred Compensation Credits for a Participant under the Plan may include one or more of the following: Compensation Deferral Contributions, Director Deferral Contributions, Performance Share Deferral Contributions, Restricted Share Deferral Contributions, Employer Matching Contributions and Employer Supplemental Contributions.

3.2 Compensation Deferral Contributions. A Participant who is an Eligible Employee may defer up to 80 percent of Compensation that is not Performance-Based Compensation and may also, to the extent permitted by the Administrative Committee, make one or more separate elections for the deferral of up to 80 percent of Performance-Based Compensation from a plan or arrangement offering the opportunity to earn such Compensation. The Company may, in its discretion, establish and change from time to time the minimum and maximum amount that may be so deferred. Elections shall be made in accordance with procedures established by the Administrative Committee. In addition, special limitations may be established by the Administrative Committee to apply to the deferral of any special bonus or other non-periodic Compensation that a Participant is expected to receive. The Employer will credit the deferred compensation amount agreed to for each Plan Year to the Participant's Account from time to time as soon as administratively practicable after the deferred amounts otherwise would have been earned and paid to the Participant. All contributions under this provision to the Accounts of Participants in the Plan, as adjusted for earnings or losses (described below), shall be referred to as the Participant's "Compensation Deferral Contribution Subaccount."

A Participant's Compensation Deferral Contribution hereunder will be automatically suspended during any unpaid leave of absence or temporary layoff. Contributions suspended in accordance with the provisions of this paragraph shall be automatically resumed, without the necessity of any action by the Participant, upon return to employment at the expiration of such suspension period if such return to employment occurs within the same Plan Year for which the Compensation Deferral

Contributions were being made.

3.3 Director Deferral Contributions. A Participant who is a Director may defer up to 100 percent of Director Compensation to be earned in the next Plan Year and may also, to the extent permitted by the Administrative Committee, make one or more separate elections for the deferral of Director Compensation payable in cash and Director Compensation payable in Shares. The Company may, in its discretion, establish and change from time to time the minimum and maximum amount that may be so deferred. Elections shall be made in accordance with procedures established by the Administrative Committee. The Employer will credit the deferred compensation amount agreed to for each Plan Year to the Participant's Account from time to time as soon as administratively practicable after the deferred amounts otherwise would have been earned and paid to the Participant. Deferrals of Director Compensation payable in Shares shall be credited to the Account as Deferred Stock Units. Such Deferred Stock Units shall equal the number of Shares that the Participant otherwise would be entitled to receive as Director Compensation. All contributions under this provision to the Accounts of Participants in the Plan, as adjusted for earnings or losses (described below), shall be referred to as the Participant's "Director Deferral Contribution Subaccount." The Director Deferral Contribution Subaccount shall also maintain a separate record of Deferred Stock Units credited thereto and of cash deferral amounts.

3.4 Performance Share Deferral Contributions. A Participant who is eligible to receive a Performance Share Award may elect to defer up to 100% of the Shares he or she might otherwise receive under the Award, net of any Shares required to be retained to satisfy tax withholding requirements. The Company may, in its discretion, establish and change from time to time the minimum and maximum amount that may be so deferred. Elections shall be made in accordance with procedures established by the Administrative Committee. The Employer will credit the deferred compensation amount agreed to for each Performance Share Award to the Participant's Account from time to time as soon as administratively practicable after the deferred amounts otherwise would have been earned and paid to the Participant. Such deferrals of amounts otherwise payable in Shares shall be credited to the Account as Deferred Stock Units. Such Deferred Stock Units shall equal the number of Shares that the Participant otherwise would be entitled to receive under the Performance Share Award for the portion of the Award that is deferred. All contributions under this provision to the Accounts of Participants in the Plan, as adjusted for earnings or losses (described below), shall be referred to as the Participant's "Performance Share Deferral Contribution Subaccount."

3.5 Restricted Share Deferral Contributions. A Participant who is eligible to receive a Restricted Share Award may elect to defer up to 100% of the Shares he or she might otherwise receive under the Award, net of any Shares required to be retained to satisfy tax withholding requirements. The Company may, in its discretion, establish and change from time to time the minimum and maximum amount that may be so deferred. Elections shall be made in accordance with procedures established by the Administrative Committee. The Employer will credit the deferred compensation amount agreed to for each Restricted Share Award to the Participant's Account from time to time as soon as administratively practicable after the deferred amounts otherwise would have been earned and paid to the Participant. Such deferrals of amounts otherwise payable in Shares shall be credited to the Account as Deferred Stock Units. Such Deferred Stock Units shall equal the number of Shares that the Participant otherwise would be entitled to receive under the Restricted Share Award for the portion of the Award that is deferred. All contributions under this provision to the Accounts of Participants in the Plan, as adjusted for earnings or losses (described below), shall be referred to as the Participant's "Restricted Share Deferral Contribution Subaccount."

3.6 Employer Matching Contributions. The Employer shall credit to a Participant's Account each Plan Year during which the Participant is selected to participate in the Plan an amount equal to a percentage of the Participant's Deferred Compensation Credits as a matching contribution. The amount of any such contribution shall be based upon the rate of match in effect for the same Plan Year under the Qualified Plan and may vary from year to year or among Participants, as may be applicable under the Qualified Plan. Notwithstanding the foregoing, such Employer Matching Contributions shall in no event be made to the extent that they would duplicate matching contributions made under the Qualified Plan for the same Plan Year with respect to deferrals of Compensation below the dollar limit applicable to the Qualified Plan under Code Section 401(a) (17). It is the intent of this limitation to provide each Participant with an Employer Matching Contribution under this Plan that, when added to the Employer Matching Contribution under the Qualified Plan for a particular Plan Year, equals the amount of Employer Matching Contribution the Participant would have received under the Qualified Plan in the absence of any limitations on Compensation under the Qualified Plan and without regard to any deferrals of Compensation by the Participant to this Plan. All contributions under this provision to the Accounts of Participants in the Plan, as adjusted for earnings or losses (described below), shall be referred to as the Participant's "Employer Matching Contribution

Subaccount."

3.7 Employer Supplemental Contributions. The Employer shall credit to a Participant's Account each Plan Year during which the Participant is selected to participate in the Plan an Employer Supplemental Contribution on the same allocation basis as is used for that Plan Year under the Qualified Plan, but only with respect to Excess Compensation. The amount of any such contribution may vary from year to year or among Participants, as may be applicable under the Qualified Plan. Notwithstanding the foregoing, such Employer Supplemental Contributions shall in no event be made to the extent that they would duplicate supplemental contributions made under the Qualified Plan for the same Plan Year with respect to Compensation below the dollar limit applicable to the Qualified Plan under Code Section 401(a)(17). It is the intent of this limitation to provide each Participant with an Employer Supplemental Contribution under this Plan that, when added to the Employer Supplemental Contribution under the Qualified Plan for a particular Plan Year, equals the amount of Employer Supplemental Contribution the Participant would have received under the Qualified Plan in the absence of any limitations on Compensation under the Qualified Plan and without regard to any deferrals of Compensation by the Participant to this Plan. In addition, such Employer Supplemental Contributions may be made in cash or Shares, in the sole discretion of the Employer. If made in Shares, such amounts shall be credited as Deferred Stock Units. All contributions under this provision to the Accounts of Participants in the Plan, as adjusted for earnings or losses (described below), shall be referred to as the Participant's "Employer Supplemental Contribution Subaccount."

3.8 Prior Plan Accounts. The Employer will credit to the Participant's Account the accrued benefit of the Participant under the Chesapeake Utilities Corporation Deferred Compensation Plan and any other nonqualified deferred compensation plan or arrangement sponsored by the Company or one of its affiliates that is consolidated and merged with and into this Plan. All amounts credited as contributions under this provision to the Accounts of Participants in the Plan, as adjusted for earnings or losses (described below), are referred to as "Prior Plan Credits." A schedule of the nonqualified deferred compensation plans merged with and into this Plan, if any, and of the amounts credited to the Accounts of Participants from such prior plans, shall be maintained by the Administrative Committee. Prior Plan Credits shall continue to be subject to the time and form of payment elected by the Participant under the Prior Plan, notwithstanding any contrary provision of this Plan.

3.9 Record of Account. Solely for the purpose of measuring the amount of the Employer's obligations to each Participant or his or her Beneficiaries under the Plan, the Employer will maintain a separate bookkeeping record, an "Account," for each Participant in the Plan.

(a) Earnings on Cash Equivalent Amounts. The Company, in its discretion, may either credit a hypothetical earnings rate to the cash portion of a Participant's Account balance for the Plan Year (i.e., the portion that is not credited as Deferred Stock Units), or may actually invest an amount equal to the amount credited to the Participant's Account from time to time in an account or accounts in its name with investment vehicles or companies, which investment options may include some or all of those used for investment purposes under the Qualified Plan, as determined by the Company in its discretion. The Company may also establish a deferred compensation trust that qualifies as a so-called "rabbi" trust meeting applicable requirements of Code Section 409A. If such separate investments are made, the Participant may be permitted to direct the investment of the portion of the Employer's cash accounts allocable to him under the Plan in the same manner as is permitted under the Qualified Plan, except that the investment options may be different from those available under the Qualified Plan. The Participant may change the allocation of the cash portion of his or her Account among the applicable investment alternatives then available under the Plan in accordance with procedures established by the Administrative Committee from time to time. The Company is not obligated to make any particular investment options available, however, if investments are in fact made, and may, from time to time in its sole discretion, change the investment alternatives. Nothing herein shall be construed to confer on the Participant the right to continue to have any particular investment available.

The Company will credit the cash portion of each Participant's Account with hypothetical or actual earnings or losses at least quarterly based on the earnings rate declared by the Company or the performance results of the Employer's account(s) invested pursuant to the Company's or the Participant's directions, and shall determine the fair market value of the cash portion of the Participant's Account based on the bookkeeping record or the fair market value of the portion of the Employer's accounts representing the cash portion of the Participant's Account as of each applicable Valuation Date. The determination of the earnings, losses or fair market value of the cash portion of the Participant's Account may be adjusted by the Company to reflect its payroll, income or other taxes or costs associated with the Plan, as determined by the Company in its sole discretion.

(b) Earnings on Deferred Stock Units. Amounts credited to the Plan as Deferred Stock Units shall be separately

accounted for from amounts credited as cash or cash equivalents, as described in subsection (a), above. The Deferred Stock Units credited to a Participant's Account shall be increased on each date that a dividend is paid on Shares. The number of additional Deferred Stock Units credited to a Participant's Account as a result of such increase shall be determined first by multiplying the number of Deferred Stock Units credited to the Participant's Account on the dividend record date by the amount of the dividend declared per Share on the dividend declaration date, and then by dividing the product so determined by the Fair Market Value of the Shares on the dividend payment date. A Participant may not elect to change or convert any amount credited to his or her Account as a Deferred Stock Unit to a cash equivalent amount. The value of the Deferred Stock Units credited to a Participant's Account shall be based upon the Fair Market Value of an equivalent amount of Shares for the Valuation Date or other date as of which the valuation is made. Notwithstanding the foregoing, the Administrative Committee may elect to credit the dollar equivalent of the dividends allocable to Deferred Stock Units as a cash equivalent amount for each Participant or for each Participant who is an Eligible Employee, in lieu of increasing the number of Deferred Stock Units credited to the Participant's Account. Any such election shall apply to all Participants in the Plan or to all Participants who are Eligible Employees, as determined by the Administrative Committee in its sole discretion.

(c) Effect of Organic Changes on Deferred Stock Units. An "Organic Change" includes (i) a stock dividend, stock split, reverse stock split, share combination, special or extraordinary cash dividend, or recapitalization or similar event affecting the capital structure of the Company (each, a "Share Change"), or (ii) a merger, consolidation, acquisition of property or shares, separation, spin-off, reorganization, stock rights offering, liquidation, disaffiliation from the Company of a subsidiary or division ("Disaffiliation"), or similar event affecting the Company or any of its subsidiaries (each, an "Organic Change"). If any Organic Change shall occur, then the Committee shall make such substitutions or adjustments as it deems appropriate and equitable to each Participant's Account credited with Deferred Stock Units (if any). In the case of Organic Changes, such adjustments may include, without limitation, (x) the cancellation of outstanding Deferred Stock Units in exchange for payments of cash, property or a combination thereof having an aggregate value equal to the value of such Deferred Stock Units, as determined by the Committee in its sole discretion, (y) the substitution of other property (including, without limitation, cash or other securities of the Company and securities of entities other than the Company) for the Deferred Stock Units, and (z) in connection with any Disaffiliation, arranging for the assumption or replacement of Deferred Stock Units with new deferred units based on other property or other securities (including, without limitation, other securities of the Company and securities of entities other than the Company), by the affected subsidiary, affiliate or division or by the entity that controls such subsidiary, affiliate or division following such Disaffiliation (as well as any corresponding adjustments to awards that remain based upon Company securities). If the assets held in the Participant's Account immediately after such adjustment are not equity securities, then the Participant shall be permitted to re-direct the investment thereof into the other investment choices then available under this Plan.

ARTICLE IV

VESTING

4.1 Vesting. A Participant always will be 100% vested in amounts credited to his or her Account as Compensation Deferral Contributions or Director Deferral Contributions and earnings allocable thereto. A Participant will become 100% vested in amounts credited to his or her Account as Employer Matching Contributions and Employer Supplemental Contributions after he or she completes two years of service with the Employer. For this purpose, "years of service" shall be determined under the terms of the Qualified Plan. Any Deferred Stock Units credited to a Participant's Account as a Performance Share Deferral Contribution or Restricted Share Deferral Contribution shall be credited under this Plan only after vesting has occurred in accordance with the terms of the Performance Share Award or Restricted Share Award under which it was earned. In addition, a Participant shall become 100% vested in his or her entire Account upon his or her Retirement, death, Total Disability or upon a Change of Control of the Company. If a Participant has a Separation from Service prior to becoming 100% vested in his or her entire Account, the non-vested portion shall be forfeited. If the Participant has a Separation from Service but is subsequently re-employed by the Employer, no benefits forfeited hereunder shall be reinstated unless otherwise determined by the Company in its sole discretion.

4.2 Confidentiality and Non-Competition Agreement. In its discretion, the Employer may require any Eligible Employee selected to become a Participant in the Plan to execute a Confidentiality and Non-Competition Agreement with the Employer in consideration of the benefits to be provided hereunder.

ARTICLE V

DISTRIBUTION OF BENEFITS

5.1 Distribution Elections. Each Participant, when he or she executes or acknowledges an agreement to make Compensation Deferral Contributions, Performance Share Deferral Contributions, Restricted Share Deferral Contributions, or Director Deferral Contributions, in accordance with procedures, including electronic enrollment, as are established by the Administrative Committee from time to time, shall also make an election at the same time as to the time and form of payment of such deferred amounts in accordance with this Plan, procedures established by the Administrative Committee and Code Section 409A. If a Participant does not elect to make any Compensation Deferral Contributions, Performance Share Deferral Contributions or Restricted Share Deferral Contributions, but is entitled to receive an allocation of Employer Supplemental Contributions, such a Participant must make an election as to the time and form of payment of such Employer Supplemental Contributions in accordance with procedures established by the Administrative Committee, within no more than 30 days after his or her Eligibility Effective Date (if a new Participant), and, for all subsequent deferral elections after initial participation, in advance of the beginning of the calendar year during which such Employer Supplemental Contribution is expected to be earned. In addition, only one time and form of payment may be elected for all amounts to be credited to a Participant's Account in a single Plan Year as Compensation Deferral Contributions, Employer Matching Contributions and Employer Supplemental Contributions, but a Participant may make a different election as to the time and form of distribution of the amounts deferred and credited to his or her Account as Compensation Deferral Contributions, Employer Matching Contributions and Employer Supplemental Contributions for any other Plan Year. A Participant may also make a separate time and form of distribution election each Plan Year for amounts to be deferred as Performance Share Deferral Contributions for such Plan Year, and a separate time and form of distribution election each Plan Year for amounts to be deferred as Restricted Share Deferral Contributions, if any. A Director may make a separate distribution election each Plan Year for the cash portion of his or her Director Deferral Contributions to be made for such Plan Year and for the Deferred Stock Unit portion of his or her Director Deferral Contributions to be made for such Plan Year. All form of payment elections shall be limited to the permitted Distribution Options. If a Participant fails to make a distribution election as to the time or the form of payment or both within the applicable time limitations, the default form of payment shall be the Standard Option and the default time of payment shall be upon Separation from Service.

5.2 Distribution Timing. A Participant shall receive payment of the amounts credited to his or her Account upon his or her Separation from Service due to Retirement or any other reason or upon a fixed date elected by the Participant. A Participant may also elect to receive payment of the amounts credited to his or her Account as of the earlier or later of a fixed date and Separation from Service, to the extent permitted by the Administrative Committee. The Administrative Committee may make rules of uniform applicability and change them from time to time regarding the distribution timing alternatives that may be elected under the Plan, provided such rules comply with Code Section 409A. If a Participant elects to have any portion of his or her Account payable upon his or her Separation from Service, such amounts shall be payable on the first business day that is at least six months after the Valuation Date coincident with or next following the date of the Participant's Separation from Service. If distribution is to be made on a fixed date, payment will be made on such date (if a business day) or on the first business day thereafter. No Participant may elect a fixed payment date that is earlier than the third calendar year after the year of deferral. If payment is to be made in annual installments, it shall commence on the applicable payment date as described in this Section, with subsequent annual installments to occur on the same date each year thereafter (or the next business day if the date falls on a weekend or holiday), until the amount payable in installments is distributed in full.

5.3 Form of Payment. Upon Retirement or Separation from Service (other than due to death or Total Disability) or the attainment of a fixed date properly elected by a Participant, the Participant shall be eligible to receive payment of the amounts credited to the Participant's Account for payment upon such event or date in the Standard Distribution Option or any other permitted Distribution Option, as specified in Section 5.2, above. If an annual installment payment method is the selected Distribution Option, the amount of the annual benefit shall equal the amount necessary to fully distribute the Participant's Account (or portion thereof to which the Distribution Option applies) as an annual benefit payable over the installment period, consistent with the following methodology: the amount payable as the annual installment shall equal the value of the Participant's Account (or portion thereof to which the Distribution Option applies) as of the most recent Valuation Date, multiplied by a fraction, the numerator of which is one and the denominator of which is the number of annual installments remaining in the installment period elected by the Participant. For example, assuming a 10 year installment payment period applies, the amount distributed at each of the distribution dates would represent the value of the Participant's Account (or portion thereof to which the Distribution Option applies) as of the most recent Valuation Date preceding the actual distribution date times the following factors: year one – 10 percent (1/10); year two – 11.11 percent (1/9); year three – 12.5 percent (1/8); year four – 14.29 percent (1/7); year five – 16.66 percent (1/6); year six – 20 percent (1/5); year seven – 25 percent (1/4); year eight – 33.33 percent (1/3); year nine – 50 percent (1/2) and year ten – 100 percent (1/1). The Participant

must provide the Employer advance notice of his or her intention to retire and receive benefits hereunder in accordance with uniform procedures established by the Administrative Committee. Payments of amounts credited as cash or cash equivalents to the Participant's Account will be made in U.S. dollars, and amounts credited as Deferred Stock Units will be distributed in Shares, except that cash shall be paid in lieu of a fractional Share.

5.4 Change in Distribution Option. A Participant may change his or her election of a Distribution Option or time of payment pursuant to an election made during the annual deferral election period prior to the beginning of each Plan Year, provided said election is made at least 12 months prior to the date that payments would otherwise have begun under such option and provided that payments will also be deferred to a new commencement date that is at least five years later than the original commencement date (i.e., five years after the date of the Participant's Separation from Service or a new fixed date that is five years later than the original fixed date). A Participant may not change a Distribution Option or a distribution date in a manner that does not comply with Code Section 409A. If a Distribution Option election is made or changed and distribution is triggered before 12 months have elapsed, the distribution will be made in accordance with the Distribution Option election in effect prior to the change or, if none, in accordance with the Standard Option.

5.5 Distribution upon Death. In the event of the death of the Participant while receiving benefit payments under the Plan, the Beneficiary or Beneficiaries designated by the Participant shall be paid the remaining payments due under the Plan in a single lump sum. In the event of the death of the Participant prior to the commencement of the distribution of benefits under the Plan, such benefits shall be paid to the Beneficiary or Beneficiaries designated by the Participant in the Standard Option (a single lump sum). Amounts payable upon the death of a Participant shall be paid as soon as practicable but no more than 90 days after the Participant's death.

5.6 Distribution in the Event of Total Disability. Upon the Participant's Total Disability, the Participant shall be eligible to receive payment of the amounts credited to his or her Account commencing as soon as practicable but no more than 90 days after the Administrative Committee is satisfied of the determination of the existence of a Total Disability with respect to such Participant. Benefits payable upon Total Disability shall be paid in the Standard Option (a single lump sum).

5.7 Special Rules for Prior Plan Credits. Amounts credited to a Participant's Account as Prior Plan Credits, if any, shall be payable under the terms of the Prior Plan and the distribution elections made thereunder to the extent in compliance with Code Section 409A.

5.8 Lump Sum Distribution of Small Amounts or upon a Change of Control. If the value of a Participant's entire Account as of the date it becomes distributable is not greater than the applicable dollar amount under Section 402(g)(1)(B) of the Code, then the Participant's entire Account balance shall be payable as a single lump sum notwithstanding any other election that may be in effect. In addition, upon a Change of Control of the Company, the Participant's Account shall be payable in a single lump sum no later than 90 days following the Change of Control, and alternative elections in effect by the Participant shall no longer apply.

5.9 Withdrawals for Unforeseeable Emergency. Upon the occurrence of an unforeseeable emergency, a Participant shall be eligible to receive payment of the amount necessary to satisfy such emergency plus amounts necessary to pay taxes reasonably anticipated as a result of the distribution, after taking into account the extent to which such hardship is or may be relieved through reimbursement or compensation by insurance or otherwise or by liquidation of the Participant's assets (to the extent such liquidation would not itself cause severe financial hardship), or by cessation of deferrals under the Plan. The amount determined to be properly distributable under this Section and applicable regulations under Code Section 409A shall be payable in a single lump sum only. For the purposes of this Section, the term "unforeseeable emergency" means a severe financial hardship to the Participant resulting from an illness or accident of the Participant, the Participant's spouse, or a dependent of the Participant (as defined in Code Section 152, without regard to Sections 152(b)(1), (b)(2) and (d)(1)(B)); loss of the Participant's property due to casualty, including the need to rebuild a home following damage not otherwise covered by insurance, for example, not as a result of a natural disaster; or other similar extraordinary and unforeseeable circumstances arising as a result of events beyond the control of the Participant, including imminent foreclosure of or eviction from the Participant's primary residence, the need to pay for medical expenses, including non-refundable deductibles, the cost of prescription drugs, and the need to pay for funeral expenses of a spouse, beneficiary, or dependent. It shall be the responsibility of the Participant seeking to make a withdrawal under this Section to demonstrate to the Administrative Committee that an unforeseeable emergency has occurred and to document the amount properly distributable hereunder. After a distribution on account of an unforeseeable emergency, a Participant's deferral elections shall cease and such Participant will not be permitted to participate in the Plan or elect additional deferrals until the next enrollment following one full year from the date of the distribution on account of an unforeseeable emergency. Such future deferral elections following a

distribution on account of an unforeseeable emergency will be treated as an initial deferral election and subject to the rules applicable thereto under the Plan and Code Section 409A.

5.10 Acceleration of Payment. The acceleration of the time and/or form of any payment determined in accordance with the provisions of this Article V, above, shall not be made except due to unforeseeable emergency, as described above, or as set forth below and otherwise permitted by Code Section 409A and the Treasury Regulations and other guidance issued thereunder:

(a) Domestic Relations Order. A payment of all or part of the Participant's Account may be made to a spouse, former spouse or other dependent under the terms of a domestic relations order (as defined in Code Section 414(p)(1)(B)). The Administrative Committee shall determine whether a payment should be made pursuant to the terms of a domestic relations order and the time and form of such payment.

(b) * Employment Taxes. A payment of all or part of the Participant's Account may be made to the extent necessary to pay the Federal Insurance Contributions Act ("FICA") tax imposed under Code Sections 3101, 3121(a), and 3121(v)(2) on amounts deferred under the Plan (the "FICA Amount"), income tax at source on wages imposed under Code Section 3401 or the corresponding withholding provisions of applicable state, local, or foreign tax laws as a result of the payment of the FICA Amount, and to pay the additional income tax at source on wages attributable to the pyramiding Code Section 3401 wages and taxes. The total payment under this Section shall not exceed the aggregate of the FICA Amount and the income tax withholding related to such FICA Amount.

(c) Payment of State, Local or Foreign Taxes. Payment may be made to reflect payment of state, local or foreign tax obligations arising from participation in the Plan that apply to an amount deferred under the Plan before the amount is paid or made available to the Participant, plus the income tax at source on wages imposed under Code Section 3401 as a result of such payment; provided, however, that the amount of the payment may not exceed the amount of the taxes due, and the income tax withholding related to such state, local and foreign tax amount.

(d) Income Inclusion under Code Section 409A. Payment may be made at any time the Plan fails to meet the requirements of Code Section 409A and the Treasury Regulations issued thereunder; provided, however, that payment cannot exceed the amount required to be included in income as a result of the failure to comply.

(e) Certain Offsets. Payment may be made as satisfaction of a debt of the Participant to the Employer where: (1) the debt is incurred in the ordinary course of the employment relationship; (2) the entire amount of the offset in any of the Participant's taxable years does not exceed \$5,000; and (3) the reduction is made at the same time and in the same amount as the debt otherwise would have been due and collected from the Participant.

5.11 Delay of Payment. A Participant who is a "specified employee" (as defined in Code Section 409A and the regulations thereunder) and is entitled to a distribution due to a Separation from Service may not receive a distribution under the Plan until a date that is at least six months after the date of the Separation from Service. In addition, the Company may in its discretion delay any payment due under the Plan to the extent permitted by Code Section 409A and the regulations thereunder.

5.12 Assignment and Assumption of Liabilities. In the discretion of the Company, upon the cessation of participation in the Plan by any Participant solely due to the employer of that Participant no longer qualifying as a member of the controlled group of Chesapeake Utilities Corporation within the meaning of Code Sections 414(b) and (c), all liabilities associated with the Account of such Participant may be transferred to and assumed by the Participant's employer under a deferred compensation plan established by such employer that is substantially identical to this Plan and that preserves the deferral and payment elections in effect for the Participant under this Plan to the extent required by Code Section 409A. Any such Participant shall not be deemed to have incurred a Separation from Service for purposes of the Plan by virtue of his or her employer's ceasing to be a member of the controlled group of Chesapeake Utilities Corporation. The foregoing provision shall be interpreted and administered in compliance with the requirements of Code Section 409A.

ARTICLE VI

PLAN ADMINISTRATION

6.1 Administration. The Plan shall be administered by the Administrative Committee as an unfunded deferred compensation plan that is not intended to meet the qualification requirements of Code Section 401 and that is intended to meet all applicable requirements of Code Section 409A.

6.2 Administrative Committee. The Administrative Committee will operate and administer the Plan and shall have all powers necessary to accomplish that purpose, including, but not limited to, the discretionary authority to interpret the Plan, the discretionary authority to determine all questions relating to the rights and status of Eligible Employees and Participants, and the discretionary authority to make such rules and regulations for the administration of the Plan as are not inconsistent with the terms and provisions hereof or applicable law, as well as such other authority and powers relating to the administration of the Plan, except such as are reserved by the Committee or by the Plan to the Committee or the Board. All decisions made by the Committee or the Administrative Committee shall be final.

Without limiting the powers set forth herein, the Administrative Committee shall have the power (i) to change or waive any requirements of the Plan to conform with Code Section 409A or other applicable law or to meet special circumstances not anticipated or covered in the Plan; (ii) to determine the times and places for holding meetings of the Administrative Committee and the notice to be given of such meetings; (iii) to employ such agents and assistants, such counsel (who may be counsel to the Company), and such clerical and other services as the Administrative Committee may require in carrying out the provisions of the Plan; and (iv) to authorize one or more of their members or any agent to execute or deliver any instrument on behalf of the Administrative Committee.

The members of the Administrative Committee, the Committee, and the Company and its officers and directors, shall be entitled to rely upon all valuations, certificates and reports furnished by any funding agent or service provider, upon all certificates and reports made by an accountant, and upon all opinions given by any legal counsel selected or approved by the Administrative Committee, and the members of the Administrative Committee, the Committee, and the Company and its officers and directors shall, except as otherwise provided by law, be fully protected in respect of any action taken or suffered by them in good faith in reliance upon any such valuations, certificates, reports, opinions or other advice of a funding agent, service provider, accountant or counsel.

6.3 Statement of Participant's Account. The Administrative Committee shall, as soon as practicable after the end of each Plan Year, provide or make available to each Participant a statement setting forth the Account of such Participant under Section 3.9 as of the end of such Plan Year. Such statement shall be deemed to have been accepted as correct unless written notice to the contrary is received by the Administrative Committee within 30 days after providing such statement to the Participant. Account statements may be provided more often than annually in the discretion of the Administrative Committee.

6.4 Filing Claims. Any Participant, Beneficiary or other individual (hereinafter a "Claimant") entitled to benefits under the Plan, or otherwise eligible to participate herein, may be required to make a claim with the Administrative Committee (or its designee) requesting payment or distribution of such Plan benefits (or written confirmation of Plan eligibility, as the case may be), on such form or in such manner as the Administrative Committee shall prescribe. Unless and until a Claimant makes proper application for benefits in accordance with the rules and procedures established by the Administrative Committee, such Claimant shall have no right to receive any distribution from or under the Plan.

6.5 Notification to Claimant. If a Claimant's application is wholly or partially denied, the Administrative Committee (or its designee) shall, within 90 days, furnish to such Claimant a written notice of its decision. Such notices shall be written in a manner calculated to be understood by such Claimant, and shall contain at least the following information:

- (i) the specific reason or reasons for such denial;
- (ii) specific reference to pertinent Plan provisions upon which such denial is based;
- (iii) a description of any additional material or information necessary for such Claimant to perfect his or her claim, and an explanation of why such material or information is necessary; and
- (iv) an explanation of the Plan's claim review procedure describing the steps to be taken by such Claimant, if he or she wishes to submit his or her claim for review.

6.6 Review Procedure. Within 60 days after the receipt of such notice from the Administrative Committee, such Claimant, or the duly authorized representative thereof, may request, by written application to the Plan, a review by the Administrative Committee (the Committee in the case of executive officers of the Company) of the decision denying such

claim. In connection with such review, such Claimant, or duly authorized representative thereof, shall be entitled to receive any and all documents pertinent to the claim or its denial and shall also be entitled to submit issues and comments in writing. The decision of the Administrative Committee (the Committee in the case of executive officers of the Company) upon such review shall be made promptly and not later than 60 days after the receipt of such request for review, unless special circumstances require an extension of time for processing, in which case a decision shall be rendered as soon as possible, but not later than 120 days after the Administrative Committee's (the Committee's in the case of executive officers of the Company) receipt of a request for review. Any such decision on review shall be in writing and shall include specific reasons for the decision and specific references to the pertinent Plan provisions on which the decision is based. In the event of a genuine dispute regarding the amount or timing of payments under the Plan, a delay in the payment of Plan benefits shall not cause a violation of Code Section 409A to the extent such delay satisfies the conditions set forth in Code Section 409A and the regulations thereunder.

6.7 Payment of Expenses. All costs and expenses incurred in administering the Plan shall be paid from the Plan unless the Company elects to pay the costs and expenses.

ARTICLE VII

AMENDMENT AND TERMINATION

7.1 Amendment. The Company has reserved, and does hereby reserve, the right at any time and from time to time by action of the Board or the Committee (or by action of the Administrative Committee if and to the extent that the Board or the Committee has delegated the authority to amend the provisions of the Plan to such committee) to amend, modify or alter any or all of the provisions of the Plan without the consent of any Eligible Employees or Participants; provided, however, that no amendment shall operate retroactively so as to affect materially and adversely any rights to which a Participant may be entitled under the provisions of the Plan as in effect prior to such action. Any such amendment, modification or alteration shall be expressed in an instrument executed by an authorized officer or officers of the Company, and shall become effective as of the date designated in such instrument.

7.2 Termination. The Company reserves the right to suspend, discontinue or terminate the Plan, at any time in whole or in part; provided, however, that a suspension, discontinuance or termination of the Plan shall not accelerate the obligation to make payments to any person not otherwise currently entitled to payments under the Plan, unless otherwise specifically so determined by the Company and permitted by applicable law, relieve the Company of its obligations to make payments to any person then entitled to payments under the Plan, or reduce any existing Account balance.

ARTICLE VIII

MISCELLANEOUS PROVISIONS

8.1 Employment Relationship. For purposes of determining if there has been a Separation from Service, the Employer is defined to include all members of a controlled group of corporations or other business entities within the meaning of Code Sections 414(b) and (c) that includes Chesapeake Utilities Corporation as modified by this Section. A Participant shall be considered to be in the employ of the Employer and its related affiliates and subsidiaries as long as he or she remains an employee of the Company, any subsidiary corporation of the Company, or any corporation to which substantially all of the assets and business of the Company are transferred. For this purpose, a subsidiary corporation of the Company is any corporation (other than the Company) in an unbroken chain of corporations beginning with the Company if, as of the date such determination is to be made, each of the corporations other than the last corporation in the unbroken chain owns stock possessing greater than 50 percent of the total combined voting power of all classes of stock in one of the other corporations in such chain. Nothing in the adoption of the Plan or the crediting of deferred compensation shall confer on any Participant the right to continued employment by the Company or an affiliate or subsidiary corporation of the Company, or affect in any way the right of the Company or such affiliate or subsidiary to terminate his or her employment at any time. Any question as to whether and when there has been a Separation from Service of a Participant's employment and the cause of such Separation from Service shall be determined by the Administrative Committee, and its determination shall be final.

8.2 Facility of Payments. Whenever, in the opinion of the Administrative Committee, a person entitled to receive any payment, or installment thereof, is under a legal disability or is unable to manage his or her financial affairs, the Administrative Committee shall have the discretionary authority to direct payments to such person's legal representative or to

a relative or friend of such person for his or her benefit; alternatively, the Administrative Committee may in its discretion apply the payment for the benefit of such person in such manner as the Administrative Committee deems advisable. Any such payment or application of benefits made in good faith in accordance with the provisions of this Section shall be a complete discharge of any liability of the Administrative Committee with respect to such payment or application of benefits.

8.3 Funding. All benefits under the Plan are unfunded and the Company shall not be required to establish any special or separate fund or to make any other segregation of assets in order to assure the payment of any amounts under the Plan; provided, however, that in order to provide a source of payment for its obligations under the Plan, the Company may establish a trust fund. The right of a Participant or his or her Beneficiary to receive a distribution hereunder shall be an unsecured claim against the general assets of the Company, and neither the Participant nor his or her Beneficiary shall have any rights in or claim against any amounts credited under the Plan or any other specific assets of the Company. All amounts credited under the Plan to the benefit of a Participant shall constitute general assets of the Company and may be disposed of by the Company at such time and for such purposes as it may deem appropriate.

8.4 Anti-Assignment. No right or benefit under the Plan shall be subject to anticipation, alienation, sale, assignment, pledge, encumbrance or charge; and any attempt to anticipate, alienate, sell, assign, pledge, encumber or charge the same shall be void. No right or benefit shall be liable for or subject to the debts, contracts, liabilities, or torts of the person entitled to such benefits. If a Participant, a Participant's spouse, or any Beneficiary should become bankrupt or attempt to anticipate, alienate, sell, assign, pledge, encumber or charge any right to benefits under the Plan, then those rights, in the discretion of the Administrative Committee, shall cease. In this case, the Administrative Committee may hold or apply the benefits at issue or any part thereof for the benefit of the Participant, the Participant's spouse, or Beneficiary in such manner as the Administrative Committee may deem proper.

8.5 Unclaimed Interests. If the Administrative Committee shall at any time be unable to make distribution or payment of benefits hereunder to a Participant or any Beneficiary of a Participant by reason of the fact that his or her whereabouts is unknown, the Administrative Committee shall so certify, and thereafter the Administrative Committee shall make a reasonable attempt to locate such missing person. If such person continues missing for a period of three years following such certification, the interest of such Participant in the Plan shall, in the discretion of the Administrative Committee, be distributed to the Beneficiary of such missing person. If neither the Participant nor the Beneficiary can be located, then any amounts due may be forfeited, subject to reinstatement without interest or earnings upon the missing Participant or Beneficiary providing sufficient evidence to satisfy the Administrative Committee that he or she is entitled to such forfeited amount.

8.6 References to Code, Statutes and Regulations. Any and all references in the Plan to any provision of the Code, ERISA, or any other statute, law, regulation, ruling or order shall be deemed to refer also to any successor statute, law, regulation, ruling or order.

8.7 Liability. The Company, and its directors, officers and employees, shall be free from liability, joint or several, for personal acts, omissions, and conduct, and for the acts, omissions and conduct of duly constituted agents, in the administration of the Plan, except to the extent that the effects and consequences of such personal acts, omissions or conduct shall result from willful misconduct. However, this Section shall not operate to relieve any of the aforementioned from any responsibility, liability, obligation, or duty that may arise under ERISA.

8.8 Tax Consequences of Compensation Reductions. The income and employment tax consequences to Participants of participating in the Plan shall be determined under applicable federal, state and local tax law and regulation and neither the Company nor any member of the Board, the Committee or the Administrative Committee shall be a guarantor of or in any way responsible for the tax consequences to any Participant.

8.9 Company as Agent for Related Employers. Each corporation which shall become a participating employer pursuant to Section 2.5 by so doing shall be deemed to have appointed the Company its agent to exercise on its behalf all of the powers and authority hereby conferred upon the Company by the terms of the Plan, including but not limited to the power to amend and terminate the Plan. The Company's authority shall continue unless and until the related employer terminates its participation in the Plan.

8.10 Governing Law; Severability. The Plan shall be construed according to the laws of the State of Delaware, including choice of law provisions, and all provisions hereof shall be administered according to the laws of that State, except to the extent preempted by federal law. A final judgment in any action or proceeding shall be conclusive and may be enforced in other jurisdictions by suit on the judgment or in any other manner provided by law. In the event that any one or more of the provisions of the Plan shall for any reason be held to be invalid, illegal, or unenforceable, such invalidity, illegality or unenforceability shall not affect any other provision of the Plan, but the Plan shall be construed as if such invalid, illegal, or unenforceable provisions had never been contained herein, and there shall be deemed substituted such other provision as will most nearly accomplish the intent of the parties to the extent permitted by applicable law.

8.11 Taxes. The Company shall be entitled to withhold any taxes from any distribution hereunder or from other compensation then payable, as it believes necessary, appropriate, or required under relevant law.

Chesapeake Utilities Corporation

Title: _____

Date: _____

PERFORMANCE SHARE AGREEMENT

pursuant to the

CHESAPEAKE UTILITIES CORPORATION 2013 STOCK AND INCENTIVE COMPENSATION PLAN

On January 7, 2014, (the "Grant Date"), Chesapeake Utilities Corporation, a Delaware corporation (the "Company"), has granted to _____ (the "Grantee"), who resides at _____, a Performance Share Award on the terms and subject to the conditions of this Performance Share Agreement.

Recitals

WHEREAS, the Chesapeake Utilities Corporation 2013 Stock and Incentive Compensation Plan (the "Plan") has been duly adopted by action of the Company's Board of Directors (the "Board") on March 6, 2013 and approved by the Shareholders of the Company at a meeting held on May 2, 2013; and

WHEREAS, the Plan is effective on May 2, 2013; and

WHEREAS, the Committee of the Board of Directors of the Company referred to in the Plan (the "Committee") has determined that it is in the best interests of the Company to grant the Performance Share Award described herein pursuant to the Plan; and

WHEREAS, the shares of the Common Stock of the Company ("Shares") that are subject to this Agreement, when added to the other shares of Common Stock that are subject to awards granted under the Plan, do not exceed the total number of shares of Common Stock with respect to which awards are authorized to be granted under the Plan.

Agreement

It is hereby covenanted and agreed by and between the Company and the Grantee as follows:

Section 1. Performance Share Award and Performance Period

The Company hereby grants to the Grantee a Performance Share Award as of the Grant Date. As more fully described herein, the Grantee may earn up to _____ Shares upon the Company's achievement of the performance criteria set forth in Section 2 (the "Performance Shares") over the performance period from January 1, 2014 to December 31, 2016 (the "Performance Period"). This Award has been granted pursuant to the Plan; capitalized terms used in this agreement which are not specifically defined herein shall have the meanings ascribed to such terms in the Plan.

Section 2. Performance Criteria and Terms of Share Award

(a) The Committee selected and established in writing performance criteria for the Performance Period, which, if met, may entitle the Grantee to some or all of the Performance

Shares under this Award. If this Award is intended by the Committee to comply with the exception from Code Section 162(m) for qualified performance-based compensation for Grantees who are "Covered Employees" as defined in Code Section 162 (m), the performance criteria established shall be based on one or more Performance Goals selected by the Committee in writing within 90 days following the first day of the Performance Period (or, if earlier, before 25% of that period has elapsed), and at a time when the outcome relative to the attainment of the performance criteria is not substantially certain. As soon as practicable after the Company's independent auditors have certified the Company's financial statements for each fiscal year of the Company in the Performance Period, the Committee shall determine for purposes of this Agreement the Company's (1) total shareholder return, defined as the cumulative total return to shareholders ("Shareholder Value"), (2) growth in long-term earnings, defined as the growth in total capital expenditures as a percentage of total capitalization ("Growth") and (3) earnings performance, defined as average return on equity ("RoE"), in accordance with procedures established by the Committee. The Shareholder Value, Growth and RoE (each a "Performance Metric" and collectively, the "Performance Metrics") shall be determined by the Committee in accordance with the terms of the Plan and this Agreement based on financial results reported to shareholders in the Company's annual reports and shall be subject to adjustment by the Committee for extraordinary events during the Performance Period, as applicable. Both the Shareholder Value and the Growth Performance Metrics will be compared to the performance of the following companies: AGL Resources, Inc., Atmos Energy Corp., Delta Natural Gas Company, Inc., Laclede Group, Inc., New Jersey Resources Corp., Northwest Natural Gas Company, Piedmont Natural Gas Company, Inc., RGC Resources, Inc., South Jersey Industries, Inc. and WGL Holdings, Inc. (collectively referred to as the "Peer Group") for the Performance Period and Awards will be determined according to the schedule in subsection (b) below. For Shareholder Value, the calculation of total shareholder return will utilize the average closing stock price from November 1 through December 31 immediately preceding the beginning and at the end of the performance period. For the average RoE Performance Metric, the Company's performance will be compared to pre-determined RoE thresholds established by the Committee. At the end of the Performance Period, the Committee shall certify in writing the extent to which the Performance Goals were met during the Performance Period for Awards for Covered Employees. If the Performance Goals for the Performance Period are met, Covered Employees shall be entitled to the Award, subject to the Committee's exercise of discretion to reduce any Award to a Covered Employee based on business objectives established for that Covered Employee or other factors as determined by the Committee in its sole discretion. The Committee shall promptly notify the Grantee of its determination.

(b) The Grantee may earn ___ percent or more of the target award of ____ Performance Shares (the "Target Award") up to a maximum number of Performance Shares set forth in Section 1 above (the "Maximum Award") based upon achievement of threshold and target levels of performance against the Performance Metrics established for the Performance Period. The Committee shall confirm the level of Award attained for the Performance Period after the Company's independent auditors have certified the Company's financial statements for each fiscal year of the Company in the Performance Period.

(c) Once established, the performance criteria identified above normally shall not be changed during the Performance Period. However, if any of the companies in the Peer Group cease to be publically traded, they will automatically be deleted from the Peer Group. In addition, if the Committee determines that external changes or other unanticipated business conditions have materially affected the fairness of the goals, or that a change in the business, operations, corporate structure or capital structure of the Company, or the manner in which it conducts its business, or acquisitions or divestitures of subsidiaries or business units, or other events or circumstances

materially affect the performance criteria or render the performance criteria unsuitable, then the Committee may approve appropriate adjustments to the performance criteria (either up or down) during the Performance Period. Notwithstanding the foregoing, no changes shall be made to an Award intended to satisfy the requirements of Code Section 162(m) if such changes would affect the qualification of the Award as performance-based compensation within the meaning of Code Section 162(m).

(d) Performance Shares that are earned by the Grantee pursuant to this Section 2 shall be issued promptly, without payment of consideration by the Grantee, within 2 ½ months of the end of the Performance Period. The Grantee shall have the right to vote the Performance Shares and to receive the dividends distributable with respect to such Shares on and after, but not before, the date on which the Grantee is recorded on the Company's ledger as holder of record of the Performance Shares (the "Issue Date"). If, however, the Grantee receives Shares as part of any dividend or other distribution with respect to the Performance Shares, such Shares shall be treated as if they are Performance Shares, and such Shares shall be subject to all of the terms and conditions imposed by this Section 2. Notwithstanding the foregoing, the Grantee shall be entitled to receive an amount in cash, equivalent to the dividends that would have been paid on the awarded Performance Shares from the Grant Date to the Issue Date for those Performance Shares actually earned by the Grantee during the applicable Performance Period. Such dividend equivalents shall be payable at the time such Performance Shares are issued.

(e) The Performance Shares will not be registered for resale under the Securities Act of 1933 or the laws of any state except when and to the extent determined by the Board pursuant to a resolution. Until a registration statement is filed and becomes effective, however, transfer of the Performance Shares shall require the availability of an exemption from such registration, and prior to the issuance of new certificates, the Company shall be entitled to take such measures as it deems appropriate (including but not limited to obtaining from the Grantee an investment representation letter and/or further legending the new certificates) to ensure that the Performance Shares are not transferred in the absence of such exemption.

(f) In the event of a Change in Control, as defined in the Plan, during the Performance Period, the Grantee shall earn the Target Award of Performance Shares set forth in this Section 2, as if all performance criteria were satisfied, without any pro ration based on the proportion of the Performance Period that has expired as of the date of such Change in Control.

(g) If, during the Performance Period, the Grantee is separated from employment, Performance Shares shall be deemed earned or forfeited as follows:

(1) Upon voluntary termination by the Grantee or termination by the Company for failure of job performance or other just cause as determined by the Committee, all unearned Performance Shares shall be forfeited immediately;

(2) If the Grantee separates from employment by reason of death or total and permanent disability (as determined by the Committee), the number of Performance Shares that would otherwise have been earned at the end of the Performance Period shall be reduced by pro rating such Performance Shares based on the proportion of the Performance Period during which the Grantee was employed by the Company, unless the Committee determines that the Performance Shares shall not be so reduced;

(3) Upon retirement by the Grantee at age 55 or thereafter, all unearned Performance Shares shall be forfeited immediately.

(h) The Grantee shall be solely responsible for any federal, state and local taxes of any kind imposed in connection with the vesting or delivery of the Performance Shares. Prior to the transfer of any Performance Shares to the Grantee, the Grantee shall remit to the Company an amount sufficient to satisfy any federal, state, local and other withholding tax requirements. The Grantee may elect to have all or part of any withholding tax obligation satisfied by having the Company withhold Shares otherwise deliverable to the Grantee as Performance Shares, unless the Committee determines otherwise by resolution. If the Grantee fails to make such payments or election, the Company and its subsidiaries shall, to the extent permitted by law, have the right to deduct from any payments of any kind otherwise due to the Grantee any taxes required by law to be withheld with respect to the Performance Shares. In the case of any amounts withheld for taxes pursuant to this provision in the form of Shares, the amount withheld shall not exceed the minimum required by applicable law and regulations.

(i) Notwithstanding any other provision of this Agreement, if any payment or distribution (a "Payment") by the Company or any other person or entity to or for the benefit of the Grantee is determined to be an "excess parachute payment" (within the meaning of Code Section 280G(b)(1) or any successor provision of similar effect), whether paid or payable or distributed or distributable pursuant to this Agreement or otherwise, then the Grantee's benefits under this Agreement may, unless the Grantee elects otherwise pursuant to his employment agreement, be reduced by the amount necessary so that the Grantee's total "parachute payment" as defined in Code Section 280G(b)(2)(A) under this and all other agreements will be \$1.00 less than the amount that would be a "parachute payment". The payment of any "excess parachute payment" pursuant to this paragraph shall also comply with the terms of the Grantee's employment agreement.

Section 3. Additional Conditions to Issuance of Shares

Each transfer of Performance Shares shall be subject to the condition that if at any time the Committee shall determine, in its sole discretion, that it is necessary or desirable as a condition of, or in connection with, transfer of Performance Shares (i) to satisfy withholding tax or other withholding liabilities, (ii) to effect the listing, registration or qualification on any securities exchange or under any state or federal law of any Shares deliverable in connection with such exercise, or (iii) to obtain the consent or approval of any regulatory body, then in any such event such transfer shall not be effective unless such withholding, listing, registration, qualification, consent or approval shall have been effected or obtained free of any conditions not acceptable to the Company.

Section 4. Adjustment of Shares

(a) If the Company shall become involved in a merger, consolidation or other reorganization, whether or not the Company is the surviving corporation, any right to earn Performance Shares shall be deemed a right to earn or to elect to receive the consideration into which the Shares represented by the Performance Shares would have been converted under the terms of the merger, consolidation or other reorganization. If the Company is not the surviving corporation, the surviving corporation (the "Successor") shall succeed to the rights and obligations of the Company under this Agreement.

(b) If any subdivision or combination of Shares or any stock dividend, capital reorganization or recapitalization occurs after the adoption of the Plan, the Committee shall make such proportionate adjustments as are appropriate to the number of Performance Shares to be earned in order to prevent the dilution or enlargement of the rights of the Grantee.

Section 5. No Right to Employment

Nothing contained in this Agreement shall be deemed by implication or otherwise to confer upon the Grantee any right to continued employment by the Company or any affiliate of the Company.

Section 6. Notice

Any notice to be given hereunder by the Grantee shall be sent by mail addressed to Chesapeake Utilities Corporation, 909 Silver Lake Boulevard, Dover, Delaware 19904, for the attention of the Committee, c/o the Corporate Secretary, and any notice by the Company to the Grantee shall be sent by mail addressed to the Grantee at the address of the Grantee shown on the first page hereof. Either party may, by notice given to the other in accordance with the provisions of this Section, change the address to which subsequent notices shall be sent.

Section 7. Beneficiary Designation

Grantee may designate a beneficiary to receive any Performance Shares to which Grantee is entitled which vest as a result of Grantee's death. Grantee acknowledges that the Company may exercise all rights under this Agreement and the Plan against Grantee and Grantee's estate, heirs, lineal descendants and personal representatives and shall not be limited to exercising its rights against Grantee's beneficiary.

Section 8. Assumption of Risk

It is expressly understood and agreed that the Grantee assumes all risks incident to any change hereafter in the applicable laws or regulations or incident to any change in the market value of the Performance Shares.

Section 9. Terms of Plan

This Agreement is entered into pursuant to the Plan (a copy of which has been delivered to the Grantee). This Agreement is subject to all of the terms and provisions of the Plan, which are incorporated into this Agreement by reference, and the actions taken by the Committee pursuant to the Plan. In the event of a conflict between this Agreement and the Plan, the provisions of the Plan shall govern. All determinations by the Committee shall be in its sole discretion and shall be binding on the Company and the Grantee.

Section 10. Governing Law; Amendment

This Agreement shall be governed by, and shall be construed and administered in accordance with, the laws of the State of Delaware (without regard to its choice of law rules) and the requirements of any applicable federal law. This Agreement may be modified or amended only by a writing signed by the parties hereto.

Section 11. Action by the Committee

The parties agree that the interpretation of this Agreement shall rest exclusively and completely within the sole discretion of the Committee. The parties agree to be bound by the decisions of the Committee with regard to the interpretation of this Agreement and with regard to any and all matters set forth in this Agreement. The Committee may delegate its functions under this Agreement to an officer of the Company designated by the Committee (hereinafter the "Designee"). In fulfilling its responsibilities hereunder, the Committee or its Designee may rely upon documents, written statements of the parties or such other material as the Committee or its Designee deems appropriate. The parties agree that there is no right to be heard or to appear before the Committee or its Designee and that any decision of the Committee or its Designee relating to this Agreement shall be final and binding unless such decision is arbitrary and capricious.

Section 12. Terms of Agreement

This Agreement shall remain in full force and effect and shall be binding on the parties hereto for so long as any Performance Shares issued to the Grantee under this Agreement continue to be held by the Grantee.

IN WITNESS WHEREOF, the Company has caused this Agreement to be executed in its corporate name, and the Grantee has executed the same in evidence of the Grantee's acceptance hereof, upon the terms and conditions herein set forth, as of the day and year first above written.

CODE OF ETHICS FOR FINANCIAL OFFICERS

Adopted December 4, 2012

This Code of Ethics for Financial Officers has been adopted by the Board of Directors of Chesapeake Utilities Corporation ("Chesapeake") to promote honest and ethical conduct, accurate and timely disclosure of financial information in Chesapeake's filings with the Securities and Exchange Commission (SEC), and compliance with all applicable laws, rules and regulations.

Chesapeake expects all of its employees to carry out their responsibilities in accordance with the highest standards of personal and professional integrity and to abide by the provisions of Chesapeake's Business Code of Ethics and Conduct and all other policies and procedures that may be adopted by the Company from time to time governing the conduct of its employees. This Code of Ethics for Financial Officers supplements the Company's Business Code of Ethics and Conduct as it relates to the activities of Chesapeake's Chief Executive Officer, President, Chief Financial Officer, Treasurer, and Corporate Controller, hereafter referred to as the "Financial Officers".

Each Financial Officer when performing his or her duties must:

- Maintain high standards of honest and ethical conduct, including the ethical handling of actual or apparent conflicts of interest between personal and professional relationships.
- Take reasonable actions within the scope of his or her responsibilities to ensure that the disclosures in reports and documents filed by Chesapeake with the SEC and in other public communications made by Chesapeake are accurate, complete, fairly stated, timely and understandable.
- Comply with applicable laws, rules and regulations, including the rules, regulations and policies of public regulatory agencies.
- Act at all times in good faith, responsibly, with due care, and diligence in carrying out his or her responsibilities.
- Maintain the confidentiality of confidential financial or other information acquired in the course of employment, except when disclosure is properly authorized or is required by applicable law or legal process, and not use any such confidential information for personal advantage.
- Not take any action to coerce, manipulate, mislead or fraudulently influence an independent accountant or internal auditor engaged in the performance of an audit or review of Chesapeake's financial statements or accounting books and records, with the purpose of rendering the financial statements false or misleading.
- Report promptly any violation of this Code of Ethics for Financial Officers either directly to the Director of Internal Audit or the Chairman of the Audit Committee.

Any Financial Officer who violates this Code of Ethics for Financial Officers will be subject to appropriate disciplinary action, including possible termination of employment.

The Audit Committee shall be responsible for overseeing compliance with this Code of Ethics for Financial Officers and shall direct the investigation of any alleged violation and report its findings, including any recommended action, to the Board of Directors.

BUSINESS CODE OF ETHICS AND CONDUCT

Adopted December 4, 2012

Chesapeake Utilities Corporation ("Chesapeake") is committed to conducting its business in compliance with all applicable laws, rules and regulations and in accordance with the highest ethical standards. In furtherance of this commitment, the Board of Directors of Chesapeake has adopted this Business Code of Ethics and Conduct (the "Code of Ethics") setting forth the principles that govern the conduct of all employees, officers and directors of Chesapeake and its subsidiaries (collectively, the "Company").

As used herein, Company official shall mean any officer of the Company. Some provisions of this Code of Ethics also extend to the family members of employees, officers, directors, or nominees for director. For this purpose, the term "family member" shall mean any child, stepchild, grandchild, parent, stepparent, grandparent, spouse, sibling, mother-in-law, father-in-law, daughter-in-law, son-in-law, brother-in-law, or sister-in-law, and any person (other than a tenant or employee) sharing the household of any director, nominee for director, or officer of the Company. These associations include adoptive relationships.

I. Compliance with Laws, Rules, Regulations, Policies and Procedures

Each employee, officer and director is expected to understand and comply with both the letter and intent of all applicable laws, rules and regulations and with all Company policies and procedures that apply to matters for which he or she is responsible. All employees and officers are expected to participate in compliance training and information sessions when offered by the Company. **Any employee or officer who is uncertain as to the meaning or interpretation of any law, rule, regulation, policy or procedure, or its application to his or her responsibilities, is expected to seek advice from a supervisor, manager or other appropriate Company official.**

II. Conflicts of Interest

In carrying out their responsibilities, all employees, officers and directors have a duty always to act in the best interests of the Company and its stockholders. The ability of an employee, officer or director to fulfill this obligation can be compromised if a conflict exists between his or her personal interests and the interests of the Company. In general, a conflict of interest can arise whenever the personal interests of an employee, officer or director in a matter (financial or otherwise) are different from the interests of the Company and its stockholders. Even where the outcome of the matter is on terms that are entirely fair to the Company, the existence of a conflict of interest can create an appearance of impropriety.

While it is not possible to list all of the situations that could present a conflict of interest, examples include:

- Ownership of a material financial interest in any business or other enterprise that does business (whether as a supplier, customer or otherwise), or is seeking to do business, with the Company.
 - Serving as a director, officer or partner of, or in any other managerial role with respect to, or as a consultant to, any business or other enterprise that does business (whether as a supplier, customer or otherwise), or is seeking to do business, with the Company.
 - Ownership of a material financial interest in, or serving as a director, officer or partner of, or in any other managerial role with respect to, or as a consultant to, any competitor of the Company.
 - Acting as a broker, finder or other intermediary in any transaction involving the Company.
-

- Any situation where the employee, officer or director will receive any payment of money, services, loan, guarantee or any other personal benefits from within the Company or a third party in anticipation of or as a result of any transaction or business relationship between the Company and a third party.
- Ownership of a material financial interest in any business or other enterprise that does business (whether as a supplier, customer or otherwise), or is seeking to do business, with any competitor of the Company.
- Serving as a director, officer or partner of, or in any other managerial role with respect to, or as a consultant to, any business or other enterprise that does business (whether as a supplier, customer or otherwise), or is seeking to do business, with any competitor of the Company.
- Taking a public position or making public statements contrary to the best interests of the Company or that could result in embarrassment to the Company.

A conflict also can exist where the person doing business, or seeking to do business with the Company is a family member of an employee, officer or director. However, the acquisition or use by an employee, officer or director of the Company of products or services obtained from the Company in the ordinary course of the Company's business will not represent a conflict of interest.

All employees and officers are encouraged to avoid relationships that have the potential for creating an actual conflict of interest or a perception of a conflict of interest. Employees and officers must be free of any conflict of interest whenever they act on behalf of the Company, including engaging in negotiations or recommending or approving a transaction, arrangement or relationship with an existing or potential customer, supplier, lender or investor. **Any officer who has a conflict of interest with respect to any matter is required to make prompt and full disclosure of the matter to the Chief Executive Officer or, in the case of the Chief Executive Officer, to the Audit Committee. All other employees are required to make prompt and full disclosure of any conflict of interest to the Director of Internal Audit.** No employee or officer is permitted to participate in any matter in which he or she has a conflict of interest unless authorized by an appropriate Company official and under circumstances that are designed to protect the interests of the Company and its stockholders and to avoid any appearance of impropriety.

Any officer who has a question as to whether a given situation or relationship might represent a conflict of interest is required to consult with the Chief Executive Officer. Any other employee who has a question as to whether a situation or relationship might constitute a conflict is required to consult with the Director of Internal Audit.

Directors are required to disclose any conflict of interest to the Chairman of the Board of Directors and to refrain from voting on any matter(s) in which they have a conflict.

III. Corporate Opportunities

All business opportunities that are within the existing or reasonably foreseeable scope of the Company's business, including planned business ventures, are the property of the Company. Without the prior consent of the Board of Directors, employees, officers and directors are prohibited from:

- Taking for themselves personally opportunities that they discovered through the use of Company property or information or through their position with the Company;
- Using property or information of the Company or their position with the Company for personal gain; or
- Engaging in any business in competition with the Company.

IV. Confidentiality

Employees, officers, directors and director nominees are required to maintain the confidentiality of, and not use for personal benefit, confidential information entrusted to them by the Company, its customers or its suppliers, or otherwise acquired in the course of their employment by or service to the Company. Disclosure or use of confidential information is permitted only for a proper business purpose and when specifically authorized by an appropriate Company official or as required by law or legal proceedings. Confidential information includes all information protected by law or by an agreement between the Company and a third party, as well as other non-public information that, if disclosed, might be harmful to the Company or useful to competitors, including but not limited to:

- Trade secrets and other proprietary technical information or data.
- Undisclosed financial and accounting information.
- Strategic information concerning current and future business plans.
- Pricing information.
- Customer records.
- Employee personnel records (e.g., job applications, resumes, performance evaluations and records, compensation information, notices regarding performance, termination notices, etc.).
- Research information and records.

All employees, officers and directors are required to sign a confidentiality statement.

These confidentiality and non-use restrictions continue beyond termination of service for directors, and termination of employment for employees and officers. Upon termination, employees, officers and directors are not permitted to take, copy or retain any records or documents of the Company.

V. Proper Accounting for Company Transactions

The maintenance of accurate financial and accounting records is essential in order to enable the Company to comply with the requirements of the federal securities laws and with its obligations to its shareholders.

A. Maintenance of Accurate Records

All Company assets and liabilities and all items of revenue and expense shall be properly recorded in the Company's regular books and records in accordance with generally accepted accounting principles. All employees and officers who are responsible for the recording or reporting of Company property, assets, liabilities, transactions and other activities are required to provide full, fair, accurate, timely and understandable recording or reporting thereof. Without limitation of the foregoing:

- No undisclosed or unrecorded fund or asset of the Company shall be established or maintained for any purpose.
- No employee or officer of the Company shall intentionally conceal or fail to record or report any matter that is required to be recorded or reported.
- No employee or officer of the Company shall improperly record or report any matter, or improperly alter any record or report of any matter.

B. Documentation of Disbursement of Funds

No payment or other disbursement of Company funds shall be made without proper authorization. No approval shall be granted for the payment or other disbursement of Company funds without adequate supporting documentation. No payment on behalf of the Company shall be approved or made with the intention or understanding that any part of such payment is to be used for a purpose other than that described by the documents supporting the payment.

VI. Improper Payments and Gifts to Third Parties

A. Improper Payments and Gifts .

Except for permitted gifts (as described below), neither the Company nor any employee, officer or director shall, either directly or indirectly, authorize or make any payment or gift of money or any other thing of value (including materials, equipment, facilities or services) to any:

- Current or prospective customer, supplier or competitor of the Company or to government officials; or
- Any director, officer, employee, general partner, stockholder or owner of a current or prospective customer, supplier or competitor,

if the purpose of the payment or the gift is to induce the current or prospective customer, supplier, competitor or government official improperly to grant or convey any benefit to, or forgo any claim against, the Company or any of its employees, officers or directors, or otherwise to influence a business or other decision of the current or prospective customer, supplier, competitor or government official.

B. Permitted Gifts

An employee, officer or director may make gifts, generally in the form of meals, entertainment or specialty advertising items, to Company customers, suppliers or other third parties engaged, or that may become engaged, in business with the Company if the gift meets all of the following criteria:

- It is consistent with customary business practices;
- It is not for an improper purpose;
- It is not in contravention of any applicable laws, rules, regulations or ethical standards; and
- Public disclosure of the full details of the gift would not cause embarrassment to the Company.

VII. Acceptance of Gifts or Other Personal Benefits

No employee, officer or director shall solicit from any supplier, customer or other person doing business, or seeking to do business, with the Company any gift of money, products or services, gratuity, loans or guarantees, or other personal benefits of any kind.

An employee, officer or director, including their family members, may accept an unsolicited gift or gratuity of nominal value or reasonable business entertainment (including recreation and attendance of sporting or cultural events) if the gift or gratuity meets all of the following criteria:

- It does not go beyond common courtesies usually associated with accepted business practices;
- It does not interfere with the recipient's independence or judgment in carrying out his or her responsibilities on behalf of the Company; and
- Public disclosure of the full details of the gift or gratuity would not cause embarrassment to the Company.

Any gifts or gratuity that do not meet these requirements must to the extent possible be returned.

VIII. Relationships with Customers

When dealing with customers, the Company is committed to:

- Providing all customers with exceptional service;
 - Dealing fairly and ethically with all customers and treating customers with respect;
-

- Providing customers with accurate and clear information regarding the services offered by the Company; and
- Investigating promptly and resolving on fair terms all customer complaints and inquiries.

Each employee, officer and director has a responsibility to use his or her best efforts to ensure that these objectives are attained. The Company prohibits manipulation, misrepresentation of facts, and other forms of unfair dealing with customers.

IX. Relationships with Suppliers

When dealing with suppliers of products and services to the Company, all employees, officers and directors are required at all times to act in the best interests of the Company, while at the same time adhering to the highest standards of ethical conduct. All unlawful behavior, manipulation, misrepresentation of facts, or any other forms of unfair dealing are prohibited.

X. Fair Competition

The Company is committed to fair and honest competition. The Company seeks to achieve its competitive advantage through competitive prices, products and services, and not through illegal or unethical business practices. All employees, officers and directors are required to adhere to all laws and regulations regarding fair competition, including antitrust laws. Misappropriation of trade secrets or other proprietary information, manipulation, misrepresentation of facts and all other forms of unfair dealing are prohibited.

XI. Relationships with Employees

All employees and officers are entitled to work in an environment free of discrimination and harassment. Therefore the Company strives to provide each employee and officer with a workplace that is free from unlawful discrimination or harassment. It is the policy of the Company to provide equal employment opportunity to qualified individuals regardless of race, religion, gender, national origin, age, or their status as disabled veterans or as disabled individuals. Equal opportunity applies to all aspects of the employment relationship, including initial employment, promotion, training, wage and salary administration, seniority, retirement, and employee benefits.

XII. Protection and Proper Use of Company Assets

Proper protection and proper use of Company assets is the responsibility of each employee, officer and director. Employees, officers and directors are required to promote the efficient use of Company assets and to take appropriate security measures to safeguard physical property and other assets against unauthorized use or removal, as well as against loss by wrongful acts or negligence. Employees, officers and directors may use Company property only for legitimate business purposes and strictly in accordance with established Company policies and guidelines.

XIII. Insider Trading

All employees, officers and directors are required to adhere to the Company's policy entitled "Securities Trades by Company Personnel and Related Persons", which governs trading by employees, officers and directors in Chesapeake stock.

XIV. Political Activities

Employees, officers and directors are free to participate in lawful political activities on their own time and at their own expense, and to make personal contributions to political parties, committees or candidates of their choice. However, under no circumstances shall an employee, officer or director use Company facilities or assets, or be compensated or reimbursed by the Company, for their personal political activities or contributions.

While employees and officers are encouraged to participate in civic and community activities during their non-work hours, an employee's or officer's determination to seek election or appointment to public office, including membership on a public board or commission ("public office"), raises special concerns. Because the Company's business frequently interfaces with many government branches, employees, officers and directors would have a responsibility to disqualify themselves from any action in which they know the Company has an interest. In addition, care must be taken that campaigning for office or fulfilling public responsibilities is not done during work hours. Accordingly, any employee or officer who wishes to seek or accept public office must provide the Director of Internal Audit with reasonable advance notice of that intent. In certain cases, depending on the nature of the office and other surrounding circumstances, the Company may decide that the employee or officer should not seek or accept such office while remaining in the Company's employment without a determination by the Company's Chief Executive Officer (or in the case of the Chief Executive Officer, the Board of Directors) that such activities will be consistent with Company policies and applicable laws and standards.

XV. Compliance Procedures

A. Distribution of this Code of Ethics

A copy of this Code of Ethics shall be furnished to each employee, officer, director and director nominee of the Company and shall be posted on the Company's website (www.chpk.com). Company officers are required to ensure that all Company personnel in the departments for which they are responsible receive a copy.

Any employee who has a question concerning the interpretation or application of any provision of this Code of Ethics should consult his or her immediate manager, who may, if necessary, refer the question to the Director of Internal Audit or an appropriate Company official. Alternatively, any employee, officer or director may contact the Director of Internal Audit directly.

B. Reporting Violations

Any employee or officer who has knowledge of a violation by the Company or any employee, officer or director of any law, rule or regulation or this Code of Ethics, or suspects that such a violation has occurred, is required to report the matter to an independent third party via a dedicated toll-free hotline or a secure website, or in written form directly to the Director of Internal Audit in accordance with the process set forth on the Company's website (www.chpk.com). All valid concerns will be investigated under the direction of the Chairman of the Audit Committee.

The Company will make every effort, within the limits allowed by law, to keep confidential the identity of anyone requesting guidance or reporting a violation or suspected violation. However, it may not be possible to maintain the confidentiality of the reported person or the reported information if (i) disclosure is necessary to enable the Company or law enforcement officials to investigate the matter, (ii) disclosure is required by law or (iii) the person accused of a violation is entitled to the information as a matter of legal right. All employees, officers and directors are expected to cooperate, to the extent requested, in any investigation of any violation of any law, rule or regulation or this Code of Ethics.

No adverse action will be taken against any person who in good faith reports a violation, or a suspected violation, by the Company, or any employee, officer or director of any law, rule or regulation or this Code of Ethics. Any such retaliation is also a violation of this Code of Ethics and will be grounds for disciplinary action against the person or persons who engage in retaliation. Any employee, officer or director who believes that he or she has been retaliated against may file a complaint with the Director of Internal Audit, who shall be responsible for the investigation of the matter.

C. Violations

Any employee, officer or director who fails to comply with any applicable law, rule, or regulation or with this Code of Ethics is subject to disciplinary action, which could include, without limitation, a reprimand, probation, suspension, reduction in salary, demotion or dismissal — depending upon the seriousness of the offense.

XVI. Amendments and Waivers

The Board of Directors must approve any amendment to this Code of Ethics. No waivers or exceptions to this Code of Ethics are anticipated; however, any waiver of any provision to this Code of Ethics for employees, other than executive officers, requires the approval of the Chief Executive Officer. Any waiver involving an executive officer or director requires the approval of the Board of Directors or a designated Board Committee and must be promptly disclosed to shareholders within four business days of such determination in a press release, by website disclosure, or by filing a current report on Form 8-K with the Securities and Exchange Commission.

We hereby consent to the incorporation by reference in the Registration Statements on Form S-2 (No. 33-26582), Form S-3 (Nos. 333-178678, 333-63381, 333-135602 and 333-156192) and Form S-8 (Nos. 333-01175, 333-94159, 333-124646, 333-124694, 333-124717 and 333-192198) of Chesapeake Utilities Corporation of our reports dated March 6, 2014, relating to the consolidated financial statements, financial statement schedule, and the effectiveness of Chesapeake Utilities Corporation's internal control over financial reporting, which appear in this Form 10-K.

/s/ ParenteBeard LLC

Philadelphia, Pennsylvania

March 6, 2014

**CERTIFICATE PURSUANT TO RULE 13A-14(A)
UNDER THE SECURITIES EXCHANGE ACT OF 1934**

I, Michael P. McMasters, certify that:

1. I have reviewed this annual report on Form 10-K for the year ended December 31, 2013 of Chesapeake Utilities Corporation;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

President and Chief Executive Officer

**CERTIFICATE PURSUANT TO RULE 13A-14(A)
UNDER THE SECURITIES EXCHANGE ACT OF 1934**

I, Beth W. Cooper, certify that:

1. I have reviewed this annual report on Form 10-K for the year ended December 31, 2013 of Chesapeake Utilities Corporation;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
